Want Extra Copies?

Copies of the 1988-89 UCLA General Catalog are available for purchase at the Students' Store. To obtain a copy by mail, send a check or money order for $6 within California or $7 outside California (includes UPS or first-class postage) to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645. Make checks payable to ASUCLA. You may also charge the cost to your VISA or MasterCard by calling the Mail Out Department at (213) 825-6064.

Please note

Every effort has been made to ensure the accuracy of the information presented in the UCLA General Catalog. However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or deletion without notice.

Other information about UCLA may be found in the announcements of the Schools of Architecture and Urban Planning, Dentistry, Education, Engineering and Applied Science, Law, Library and Information Science, Management, Medicine, Nursing, Public Health, and Social Welfare, and in literature produced by the College of Fine Arts. Further details on graduate programs are available in various Graduate Division publications, including Standards and Procedures for Graduate Study at UCLA.

UCLA (USPS 646-680)
Volume 28, Number 4, July 1, 1988
A series of administrative publications of the University of California, Los Angeles, published nine times a year (one issue in March and August; two issues in May and July; three issues in September) by the UCLA Public Affairs Department, Academic Publications, 405 Hilgard Avenue, Los Angeles, CA 90024-1391, (213) 825-6704. Second-class postage paid at Los Angeles, CA. © 1988 by The Regents of the University of California. POSTMASTER: Send address changes to UCLA Mail Production Services, 405 Hilgard Avenue, Los Angeles, CA 90024-1361.
Calendar

First day to file undergraduate application with admissions officer, 1147 Murphy Hall (last day will depend on number of applications received)

Last day to file application for graduate admission, readmission, or renewal of application with complete credentials and application fee, with Graduate Admissions Office, 1247 Murphy Hall

Last day to file graduate petitions for change of major with Graduate Division, 1225 Murphy Hall

First day to obtain Student Parking Request forms at Campus Parking Service

Distribution of registration materials by letter groups for continuing students

Schedule of Classes goes on sale at Students’ Store, Ackerman Union and North Campus Student Center

New and reentrant students eligible to register by mail should receive Registration Form at mailing address (weekly mailings)

*First mailing date for registration fee payment

*First mailing date for undergraduate student enrollment in classes

Last day to submit Student Parking Request for campus parking permit

Eligibility date for new and reentrant registration by mail (Statement of Legal Residence must be processed by the Residence Deputy by this date in order to receive Registration Form by mail)

Last day to file undergraduate application for readmission with Registrar, 1111 Murphy Hall (late applicants will pay a $50 late payment fee)

*Last mailing date for all students to enroll in classes

*Last mailing date for all students to pay registration fees

Registration fee payments must be deposited in Cashier’s Drop Slot, 1125 Murphy Hall

REGISTRATION FEE PAYMENT DEADLINE

LATE registration in person with $50 fee, 8:30 a.m. to 5 p.m.

Mailing of Tentative Study List datamailer with class information

Registrar mails valid Reg Card (datamailer)

English as a Second Language Placement Examination (ESLPE)

Chemistry/Mathematics Preliminary Examination

QUARTER BEGINS

Financial Aid check distribution begins

Issuing of UCLA Student I.D. Cards to new and reentering students begins

Spanish and Portuguese Placement Examination

Undergraduate enrollment in person by appointment

French Placement Examination

Music Placement Examination

INSTRUCTION BEGINS

Change in Study List in person without fee, 8:30 a.m. to 5 p.m.

Classes will be dropped if fee payment is not completed by 5 p.m.

Subject A Placement Examination and Proficiency Examinations for English 3

Graduate Study List Request should be filed with major department by 4 p.m.; all approved requests due to Enrollment Office, 1111 Murphy Hall, by 5:15 p.m.

Last day to register for ETS foreign language examinations in French, German, Russian, and Spanish
Last day:
(1) To change Study List (add, drop courses) without fee
(2) To check waiting lists for courses on computer
(3) To file advancement to candidacy petition for master's degree with Graduate Division, 1225 Murphy Hall
(4) To file graduate leaves of absence with Graduate Division, 1225 Murphy Hall
(5) To file Study List Request without fee
(6) To file undergraduate request for fee reduction with college or school

ETS foreign language examinations in French, German, Russian, and Spanish
Registrar mails Official Study List datamailer to all registered students

WITH APPROVAL OF ACADEMIC DEAN:
*(1) Last day for graduates to ADD courses with $3 petition fee
(2) Last day for graduates to file Late Study List with $50 fee
(3) Undergraduates approved for reduced fees are audited (must be enrolled in 10 units or less to be eligible for reduction)

Orientation meetings on format for master's theses and doctoral dissertations (see Theses and Dissertations Adviser, 141 Powell Library)

Last day to declare bachelor's degree candidacy for current quarter (without fee) with Degree Auditor, 1111 Murphy Hall

WITH APPROVAL OF ACADEMIC DEAN:
*(1) Last day for undergraduates to ADD OR DROP courses with $3 petition fee
(2) Last day for undergraduates to file Late Study List with $50 fee

Last day for continuing students to file applications for undergraduate scholarships for 1989-90
Last day to submit final drafts of dissertations to doctoral committees for degrees to be conferred in current quarter

*Last day for undergraduates to change grading basis (optional P/NP) with $3 petition fee and APPROVAL OF ACADEMIC DEAN
Last day to declare bachelor's degree candidacy (with $3 fee) with Degree Auditor, 1111 Murphy Hall
Last day to submit final drafts of theses to master's committees for degrees to be conferred in current quarter
Last day to file completed copies of theses for master's degrees and dissertations for doctoral degrees to be conferred in current quarter with Theses and Dissertations Adviser, 141 Powell Library

Last day to withdraw

WITH APPROVAL OF ACADEMIC DEAN:
*(1) Last day for graduates to change grading basis (optional S/U) with $3 petition fee
(2) Last day for graduates to DROP courses with $3 petition fee

About UCLA
Introducing UCLA

"... in 10 years ... we shall look with amazement upon the development of this University, for it is certain to be greater, far greater, than the imagination of any of us can foresee."
— Ernest Carroll Moore
UCLA Director, 1919

From Little Acorns ... 

The year was 1880. With a population of 11,000, Los Angeles was a gaslit pueblo trying to convince the state to establish in Southern California a second State Normal School like the one already existing in San Jose, some 300 miles to the north.

In March of the following year, the State Assembly approved the establishment of such a school. A group of enthusiastic citizens, over 200 of whom contributed between $2 and $500, purchased a site less than a mile from the business section. Soon the towering Victorian form of the school rose from an orange grove which, today, is the site of the Central Los Angeles Public Library. On August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students.

By 1914, the little pueblo of Los Angeles had grown to a city of 350,000 and the school, whose enrollment far exceeded its capacity, moved to new quarters — a Hollywood ranch off a dirt road which would later become Vermont Avenue.

With a view toward expansion, Director Ernest Carroll Moore proposed in 1917 that the school become the first branch of the Berkeley-based University of California. Two years later, the Los Angeles State Normal School was replaced by the Southern Branch of the University of California, no longer merely a teacher's college but an institution that offered two years of instruction in Letters and Science. Third- and fourth-year courses were soon added, the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: University of California at Los Angeles (the "at" became a comma in 1958).

The Move Westward

As the student population of the University continued to increase, the need for a new site became obvious and the search was soon under way for a permanent home for UCLA. On September 21, 1927, Director Moore turned the first shovelful of soil that broke ground for the creation of the campus of his dreams.

The choice of Westwood, set squarely in the path of westward-moving Los Angeles, no doubt was an important factor in determining UCLA's future growth. But in 1929, on the barren, chaparral-covered hills of Westwood, the four original buildings — Royce Hall, Powell Library, Haines and Kinsey Halls — formed a lonesome little cluster in the middle of four hundred empty acres. The campus hosted some 5,500 students that fall.

The first priority after the move to Westwood was to establish a graduate curriculum, essential for any major university. The Regents established the master's degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

Los Angeles and the University nurtured each other through the years and both experienced phenomenal growth and development during the next half century. UCLA's most spectacular period of growth occurred in the 25 years following World War II, when it tripled its prewar enrollment of 9,000 students and undertook what would become a $260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 715-bed teaching hospital which is now one of the largest and most highly respected in the world.

UCLA Today

Today, UCLA is a large and complex institution devoted to undergraduate and graduate scholarship, research, and public service. Known for academic excellence, many of its programs are rated among the best in the nation, some among the best in the world.
Some 160 buildings on 411 acres house 13 colleges and schools and serve over 33,000 students. Another major period of campus development is currently under way, which will provide needed additional space for engineering, chemistry, law, management, and medical center programs, as well as a new Museum of Cultural History building and increased student housing and parking space on north campus. UCLA’s top administrative officer is Chancellor Charles E. Young, who is celebrating the twentieth anniversary of his appointment to that position.

The Setting
UCLA is cradled in rolling green hills just five miles inland from the ocean, in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and at its southern gate by Westwood Village. Originally envisioned as a business district to serve UCLA, this picturesque little college town has mushroomed into an entertainment magnet for the entire Los Angeles area.

The cultural treasures of the Los Angeles County Museum of Art are a few miles to the east as are other museums, the community of Beverly Hills, the Music Center, and the downtown business area. Beyond that, the deserts, snowcapped mountains, and ski resorts are little more than an hour’s drive.

The Ambience
The stately Tudor Gothic and Italian Romanesque architecture of UCLA’s early buildings blends with the contemporary and modern design of the newer structures. Royce Hall, one of the original four buildings, remains the campus symbol. Contrasting campus moods range from the activity of Bruin Walk to the serenity of the Japanese Garden. Attend a rock concert on the lawn, or a classical recital in Schoenberg Hall. Contemplate a Rodin or a Lachaise in the Sculpture Garden, or participate in a political rally in Meyerhoff Park.

UCLA is a place of surprises. A unique inverted fountain, where water flows over river rocks, recalls the Yellowstone creeks that inspired it. Enter the Bunche Hall Annex and discover a glorious atrium where palms and ferns glisten in filtered sunlight. Step inside the courtyard of Macgowan Hall and come face to face with the impressive stone Tower of Masks, created by the noted sculptress Anna Mahler.

UCLA is a place for serious study in a vibrant, dynamic atmosphere. You must visit the campus to appreciate it. The Visitors Center, located in 1417 Ueberroth Building (206-8147), has a reception area where visitors are met, welcomed, and assisted. The center arranges group or personal tours of the campus all year round and provides information on campus exhibits and recreation areas. The Office of Undergraduate Admissions and Relations with Schools (825-6764) conducts tours for prospective undergraduates.

The Commitment to Research
UCLA is one of the outstanding “research universities” in the country. What does this mean to you as a student?

It means that the same faculty members teach both undergraduate and graduate courses and that these instructors create knowledge as well as transmit it. They spend a major portion of their time engaged in research in libraries and laboratories and out in the field.

At UCLA you are taught by the people making the discoveries, so you learn the latest findings on every front. You may exchange ideas with faculty members who are authorities in their fields, and you will be encouraged to participate in research to experience firsthand the discovery of new knowledge. This inseparable commitment to teaching and research is the hallmark of a research university.

The Question of Size
Although UCLA has a larger enrollment than other University of California campuses, it is small in comparison to some of the Midwestern universities. Its general campus population of some 29,500 students is equal to that at UC Berkeley, but the UCLA campus is enriched by an additional 3,750 men and women studying in its health science schools of Dentistry, Medicine, Nursing, and Public Health. UCLA makes the most of its size by offering an extraordinary breadth of high quality academic programs and a range of student opportunities available at few other universities in the country.

A major concern of the faculty and staff is to allow you, the student, to feel that you belong. UCLA provides orientation sessions and special academic assistance programs for new students, a staff of helpful advisers and counselors in every college and academic department, a myriad of student services, and unlimited opportunities for involvement and participation.

All UCLA students share the pride of attending one of the most prestigious educational institutions in the country. Beyond that, no one individual deals with the totality of UCLA. Campus life is made comfortable by interacting and identifying with only certain parts of the whole, whether they be your academic department, residence hall, fraternity or sorority, club or organization, or the spirit of Bruin victories on the athletic fields.

Many prospective students ask about the size of classes at UCLA. Standard instructional formats include lectures, discussion sections, seminars, and laboratory sessions. Although large lecture groups in some introductory courses are not unheard of, 93 percent of all lower division lecture classes in 1986-87 had fewer than 200 students, and the University is making every effort to further reduce class size. Students in most lecture classes also enroll in discussion sections of about 25 students, and seminars and laboratory classes usually have fewer than 20 students. There is an overall ratio of one faculty member for approximately 17 students.

Most UCLA faculty members take a genuine interest in their students. They set aside office hours for receiving students, and most appreciate the opportunity for informal conversation. Even professors who seem remote in the classroom may be just the opposite on a one-to-one basis. A brief discussion can benefit both student and instructor.
Professors are often aided, especially in the small discussion sections, by teaching assistants (TAs). These are graduate students who teach on a part-time basis while pursuing their degree. Many students find it helpful to talk to the TAs about academic problems.

### Hallmarks of Excellence

Recent surveys indicate that in overall excellence, UCLA is one of America's most prestigious and influential public universities. It is consistently rated among the best universities in the nation and is by far the youngest institution in this select group.

**ACADEMICS** — UCLA has two colleges and 11 professional schools. The College of Letters and Science and the College of Fine Arts offer programs leading to both undergraduate and graduate degrees, as do the School of Engineering and Applied Science and the School of Nursing. The other professional schools offer graduate programs exclusively: the Graduate School of Architecture and Urban Planning, Graduate School of Education, School of Law, Graduate School of Library and Information Science, John E. Anderson Graduate School of Management, School of Social Welfare and, in the health sciences, the Schools of Dentistry, Medicine, and Public Health.

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 104 different disciplines; graduate students may earn one of 76 master's and 94 doctoral and professional degrees.

Academic programs undergo a continuing process of review and evaluation to maintain their excellence, and new programs are added as they are approved by The Regents. New for last fall, for example, were an undergraduate major in women's studies and a doctoral program in the School of Nursing which culminates in a Doctor of Nursing Science degree.

**THE FACULTY** — Of the many factors that go into the making of a great university, no single factor is as important as its faculty. UCLA's distinguished faculty includes 1987 Nobel prizewinner Donald Cram, several John Simon Guggenheim fellows and Fulbright scholars, and many members of both the National Academy of Sciences and the American Academy of Arts and Sciences. In 1987-88 13 faculty members received Fulbright scholarships to conduct research, lecture, and consult abroad and 10 UCLA scientists and scholars were awarded Guggenheim fellowships, putting UCLA among the leading universities nationwide in the number of these prestigious awards.

In a recent survey the Conference Board of Associated Research Councils evaluated the quality of the faculty in more than 150 American research universities. UCLA was judged second in the nation among public universities, and among the most highly rated overall. Of the 32 disciplines studied, 17 of UCLA's academic departments were ranked among the top 10 in the country.

**RESEARCH** — UCLA is among the six leading research universities in the country, receiving $218 million in 1986-87 in extramural grants and contracts to support its research activities. The University hosts several hundred postdoctoral scholars each year who share its excellent research facilities. Its laboratories have seen major breakthroughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in a myriad of vital areas continue to improve the quality of life for people around the world.

**TEACHING** — Although all UCLA faculty members engage in research and the discovery of new knowledge, they are equally dedicated to disseminating their findings in the classroom. Indeed, excellence in teaching is one of the main criteria for faculty promotion, and distinguished teaching awards are among those most highly prized by UCLA professors.

**STUDENT BODY** — The diversity of UCLA's student population — nearly equally divided between men and women — yields the wide range of opinion and perspective essential to a great university. Although most students are from California, they come from all 50 states and more than 100 foreign countries to study at UCLA. International students number more than 2,000, making this one of the most popular American universities for students from abroad. And UCLA now enrolls the most ethnically mixed and culturally diverse undergraduate student population — both in total students and as a percentage of enrollment — of any major university in the U.S. Ethnic minorities comprise nearly one half of the undergraduates and 25 percent of the graduate student population.

**NUMEROUS OTHER FACTORS** — With nearly six million volumes, UCLA's library is rated among the finest in the country. Its athletic teams have made the University an acknowledged leader in intercollegiate sports. Its Center for the Performing Arts ranks as the largest, most diversified and comprehensive program of its kind in the country.

The University played a significant role in the 1984 Summer Olympics in Los Angeles, with a 4,000-athlete Olympic Village, all gymnastics and tennis events, the drug-testing laboratory, and most theatrical events of the Olympic Arts Festival on its campus.

All these factors plus its research facilities, its community service, and its international links with all parts of the world make UCLA today a very special kind of institution.

### The University of California

The University of California traces its origins to 1868, when Governor Henry H. Haight signed the Organic Act providing that California's first "complete University" be created.
Classes began the following year at the College of California in Oakland. The first buildings on the Berkeley campus were completed in 1873, and the University moved into its new home. The following June, the University of California conferred bachelor's degrees on 12 graduates.

Today the University is one of the largest and most renowned centers of higher education in the world. Its nine campuses span the state, from Davis in the north to San Diego in the south. In between are Berkeley, San Francisco, Santa Cruz, Santa Barbara, Riverside, Irvine and, of course, Los Angeles.

All the campuses adhere to the same admission guidelines and high academic standards, yet each has its own distinct character, atmosphere, and — to some degree — academic individuality. Riverside, for example, excels in the plant sciences and entomology; Davis has a large agricultural school and offers the University's only veterinary medicine program; San Diego has excellent oceanography and marine biology programs; San Francisco is devoted exclusively to the health sciences. Among the campuses there are five medical schools and three law schools, as well as schools of architecture, business administration, education, engineering, and many others.

The UC campuses have a combined enrollment of 152,000 students, 84 percent of them California residents. About one fourth study at the graduate level. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the nation. The collections of over 100 UC libraries on the nine campuses are surpassed in size on the American continent only by the Library of Congress collection.

The faculty of the University of California is internationally known for its distinguished academic achievements. On its nine campuses the University has 26 Nobel laureates, and membership in the National Academy of Sciences is the largest of any university in the country.

**University Administration**

The University of California system is governed by a Board of Regents whose regular members are appointed by the Governor of California. In addition to setting broad general policy and making budgetary decisions for the UC system, the Regents appoint the President of the University, the nine chancellors, and the directors, provosts, and deans who administer the affairs of the individual campuses and divisions of the University.

The Regents delegate authority in academic matters to the Academic Senate, which determines academic policy for the University as a whole. The Senate, composed of faculty members and certain administrative officers, determines the conditions for admission and granting of degrees, authorizes and supervises courses and curricula, and advises University administrators on budgets and faculty appointments and promotions. Individual divisions of the Universitywide Academic Senate determine academic policy for each campus. Students participate in policy-making at both campuswide and systemwide levels.
Academic Resources and Programs

Research: The Discovery of Knowledge

As one of the largest research universities in the world, UCLA is renowned for its programs of faculty and student research; more than 5,000 funded programs are in progress at a given time. One focus of these efforts is a group of “organized research units” (ORUs) which provide an interdisciplinary approach to the search for knowledge.

ORUs are study centers and research institutes consisting of faculty and students from various departments engaged in continuing research of particular subjects. They do not offer courses of instruction or degrees, although several work in conjunction with interdepartmental instruction programs which lead to bachelor’s or advanced degrees. ORUs provide invaluable experience for students and faculty in basic and applied research and greatly enhance UCLA’s educational program and the overall academic quality of the University.

In the overview which follows, UCLA’s 24 organized research units are listed within five major divisions — health sciences, life sciences, physical sciences and engineering, social sciences, and arts and humanities. Within each division, representative groups and programs are included which, although not formally established as ORUs, are nevertheless doing important research in their respective areas.

Health Sciences

The LABORATORY OF BIOMEDICAL AND ENVIRONMENTAL SCIENCES, located in Warren Hall (900 Veteran Avenue, 825-9431) and funded through a contract with the Department of Energy, conducts research in the fields of biomolecular and cellular science, environmental biology, and nuclear medicine. Its major facilities include a cobalt radiation installation, a biomedical cyclotron, an ECAT III scanner, and environmentally controlled growth chambers.

The BRAIN RESEARCH INSTITUTE, center of neuroscience research at UCLA, is located in the Center for the Health Sciences (73-369 BRI, 825-5061). It has the largest investigative program of its kind in the country, with more than 160 scientists working on problems ranging from the nerve cell to human behavior. The institute provides an environment for specific multidisciplinary research and training on the structure and function of the brain.

The DENTAL RESEARCH INSTITUTE, with principal laboratories on the seventh floor of the School of Dentistry, fosters research related to oral health. Areas of investigation include biomaterials, clinical studies, craniofacial biology, immunology/immunogenetics, oral neurology/pain, periodontology, and ultrastructure/cell biology. The Office of the Director is located in 73-029 Center for the Health Sciences (206-8045).

The MENTAL RETARDATION RESEARCH CENTER, located on the fourth through eighth floors of the Neuropsychiatric Institute and Hospital, provides laboratory and clinical facilities for research and training in mental retardation and related aspects of human development. Its interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases. Administrative offices are located in 58-258 NPI&H (825-0313).

The STEIN EYE INSTITUTE is one of the best equipped centers for research and treatment of eye diseases anywhere in the world. This comprehensive facility, located in the Center for the Health Sciences (825-5051), is devoted to the study of vision, the care of patients with eye disease, and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided.

In the health sciences, research carried out in ORUs is complemented by research on neurological and neuromuscular diseases in the Lewis Neuromuscular Research Center, the Reed Neurological Research Center, and the Neuropsychiatric Institute and Hospital. The Jonsson Comprehensive Cancer Center, one of 20 comprehensive centers in the nation, is renowned for the breadth and excellence of its cancer research. The Center for Ulcer Research and Education is a federally funded center doing basic and applied research on the origin and treatment of ulcers. And of course, UCLA is deeply involved in all aspects of the fight against AIDS, with basic research into the evolution of the disease being done in the AIDS Clinical Research Center.

Life Sciences

The MOLECULAR BIOLOGY INSTITUTE provides the research and training resources in molecular biology for faculty from the College of Letters and Science and the School of Medicine, and includes the Parvin Cancer Research Laboratories. Administrative offices are located in 168 MBI (825-1018).

The CENTER FOR THE STUDY OF WOMEN, located in 236A Kinsey Hall (825-0590), coordinates and disseminates interdisciplinary research on women, focusing on three programmatic areas: women, work, and the economy; women, language, and the arts; and women, science, and health. The center promotes innovative research by sponsoring conferences, publications, programs for affiliated and visiting scholars, a Directory of UCLA Scholars, an ongoing faculty research seminar, and a public lecture series on Women, Culture, and Society. In collaboration with other UC campuses, women's studies programs, and community groups, the center seeks to address public policies affecting women's lives.

Last year UCLA opened the Fernald Child Study Center, a life sciences interdisciplinary research unit to study and treat a variety of childhood behavioral problems and learning disorders.

Physical Sciences and Engineering

The CRUMP INSTITUTE FOR MEDICAL ENGINEERING applies theory and engineering practice to problems in clinical medicine. Research focuses on noninvasive physiological monitoring of human subjects from infants to the aged, including development of experimental regimens, methods and equipment for data collection, and new mathematical techniques of data analysis, to assess the stability of these complex systems. Additional research areas include biochemical sensors, drug delivery systems, medical electronics, and biomechanics. Administrative offices are located off campus at 1950 Sawtelle Boulevard, Suite 330 (825-4111).

The INSTITUTE OF GEOPHYSICS AND PLANETARY PHYSICS (IGPP) is a multicampus research unit (MRU); the branch at UCLA is engaged in geophysical, geochemical, and biochemical research into the nature of the Earth, moon, and other planetary bodies, the origin of terrestrial life, interplanetary space, and stellar interiors and their evolution. Laboratory studies include space physics, plasma astrophysics, fluid dynamics, meteoritics, seismology, climate dynamics, glaciology, petrology, geochronology, archaeology, and origins of life. The UCLA branch office is located in 3839 Slichter Hall (825-1664).
The INSTITUTE OF PLASMA AND FUSION RESEARCH, an ORU formed by The Regents in early 1987 and temporarily located in 6291 Boelter Hall (825-1613), is dedicated to research into plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, professional research staff, and faculty, generally working in groups, study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering and nuclear technology, computer simulations and the theory of plasmas, advanced plasma diagnostic development, laser-plasma interactions, and the use of plasma in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings.

The INSTITUTE OF PLASMA AND FUSION RESEARCH, an ORU formed by The Regents in early 1987 and temporarily located in 6291 Boelter Hall (825-1613), is dedicated to research into plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, professional research staff, and faculty, generally working in groups, study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering and nuclear technology, computer simulations and the theory of plasmas, advanced plasma diagnostic development, laser-plasma interactions, and the use of plasma in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings.

The WHITE MOUNTAIN RESEARCH STATION is a multicampus research unit (MRU) dedicated to high-altitude research. Four separate laboratory sites near Bishop, California, ranging up to 14,250 feet above sea level, include the highest permanent teaching and research facilities in North America. Research includes studies in archaeology and the biological, medical, and physical sciences. The administrative office is located in 6713 Geology (825-2093).

Among other interdisciplinary activities in the physical sciences and engineering at UCLA, a newly formed Engineering Research Center for Hazardous Substances Control is researching ways to reduce the volume and toxicity of hazardous wastes and dispose of the remainder in a safe manner. On other frontiers, an Artificial Intelligence Laboratory designed exclusively for research in this burgeoning field has opened under the wing of the Computer Science Department and the Intel Laboratory for Microelectronics and Computing has been established at the Crump Institute for Medical Engineering to advance a wide range of sophisticated research.

Social Sciences

The OFFICE OF INTERNATIONAL STUDIES AND OVERSEAS PROGRAMS (ISOP) supports and coordinates international and foreign area studies at UCLA. Among the area studies centers and programs that operate under its aegis are four major interdisciplinary research centers that rank among the best in the nation. Some of the world's leading specialists on area studies have joined these centers.

The African Studies Center (10244 Bunche Hall, 825-3686) is the major center for African studies in the Western U.S. It furthers teaching and research on Africa involving economics, linguistics, humanities, social sciences, and theater, film, and television. The center also works with the professional schools of Architecture and Urban Planning, Education, Management, and Public Health.

The Latin American Center (10343 Bunche Hall, 825-4571) encourages and coordinates interdisciplinary research, academic programs, and publications. By linking campus activities with developments in the field and in other institutional settings, the center benefits UCLA, the broader community of Latin Americanists, and the general public.

The von Grunebaum Center for Near Eastern Studies (10286 Bunche Hall, 825-1181) promotes research and training in basic problems related to the Near and Middle East countries in modern and medieval times. It also sponsors lectures, seminars, and conferences and promotes an extensive publications program.

The Center for Russian and East European Studies (11369 Bunche Hall, 825-4060) promotes research on Russia and the countries of Eastern Europe through conferences, lectures, seminars, and academic exchange programs with Russian and Eastern European universities.

ISOP also supports other interdisciplinary activities such as the study of arms control, nuclear proliferation, and international security in the Center for International and Strategic Affairs. The recently formed Center for Pacific Rim Studies promotes research, course offerings, seminars, and faculty and student exchange programs on the people and nations bordering the Pacific Ocean. And a new Center for Chinese Studies is developing a major Chinese studies program as well as a graduate program in Chinese historical studies for UCLA students. Finally, an NDEA Joint Center in East Asian Studies with the University of Southern California sponsors joint seminars and conferences focused on the East Asian region.

The INSTITUTE OF AMERICAN CULTURES promotes the activities of four major ethnic centers whose goals are to study and illuminate the histories of our country's minorities, and to apply the University's capabilities to the analysis and solution of specific minority problems. These centers promote faculty research, encourage the development of new courses and degree programs, assist departments in recruiting scholars, build library and other resources, and publish literature to disseminate the results of their work.

The Center for Afro-American Studies (3111 Campbell Hall, 825-7403) conducts and sponsors research on the Afro-American experience, coordinates the Afro-American Studies curriculum, publishes research results, and sponsors community service programming.

The American Indian Studies Center (3220 Campbell Hall, 825-7315) is one of the largest centers of its kind in the country. It serves as an educational and research catalyst and includes a library, master's and postdoctoral fellowship programs, and a publishing unit that produces a number of books and a quarterly journal.

The Asian American Studies Center (3232 Campbell Hall, 825-2974) seeks to increase the knowledge and understanding of the experiences of Asian Pacific peoples in America and promotes the development of material resources related to Asian American studies.

The Chicano Studies Research Center (3121 Campbell Hall, 825-2363) facilitates interdisciplinary academic research related to the Chicano experience. The center has research and academic programs and maintains a publications unit and research library that are considered leading contributors to Chicano studies nationally.
The INSTITUTE OF ARCHAEOLOGY, located in 288 Kinsey Hall (206-8934), develops and coordinates the archaeological research and activities of more than 10 academic departments with field interests in the Americas, Asia, Africa, and Europe. Its major goal is to contribute to a reconstruction of the human past based on archaeological evidence. Activities include management of archives and laboratories such as the Rock Art Archive, public lectures, seminars, a publications program, field surveys, and excavations. The institute's Archaeological Survey coordinates research and data collection on Southern California archaeological sites.

The INSTITUTE OF INDUSTRIAL RELATIONS, located in 1101J Campbell Hall (825-1954), has an interdisciplinary research and publishing program directed toward the study of all aspects of the employment relationship, including labor markets, labor law, labor-management relations, equal employment opportunity, occupational safety and health, and related issues. It also offers social policy and employment relations programs to the general public, unions, and management.

The INSTITUTE FOR SOCIAL SCIENCE RESEARCH promotes interdisciplinary research on a broad spectrum of contemporary sociological, psychological, political, and economic problems and community issues. Research components include the Survey Research Center and the Social Science Data Archive. Training in survey research methodology is available to students through participation in the annual Southern California Social Survey. The institute is located in 9240 Bunche Hall (825-0711).

Other interdisciplinary activities in the social sciences include the nationally respected Business Forecasting Project in UCLA's John E. Anderson Graduate School of Management which forecasts short-run and long-run economic activity both regionally and nationally and the Center for the Study of Evaluation in the Graduate School of Education, which is at the forefront of efforts to improve the quality of schooling in America through systematic evaluation practices.

Arts and Humanities

The CENTER FOR THE STUDY OF COMPARATIVE FOLKLORE AND MYTHOLOGY, located in 1037 GSM (825-4242), supports and coordinates the comparative study of folklore and mythology. Resources include the Wayland D. Hand Library, the Visual Media and Folk Medicine Archives, the Archive of California and Western Folklore, the American Popular Beliefs and Superstitions Archive and Encyclopedia Project, the D.K. Wilgus Archive of Folk Song and Music, and other collections of field recordings, records, and films.

The CENTER FOR MEDIEVAL AND RENAISSANCE STUDIES supports the research activities of some 20 academic departments dealing with the development of Western civilization between A.D. 300 and 1650. Major programs include training research assistants, appointment of postdoctoral associates and visiting professors, organizing conferences and colloquia, and supporting departments in inviting lecturers. The center also sponsors the publication of research both in book-length studies and in two journals, Viator, with emphasis on intercultural and interdisciplinary studies, and Comitatus, with articles by graduate students. The center is located in 212 Royce Hall (825-1880, 825-1970).

The CENTER FOR SEVENTEENTH- AND EIGHTEENTH-CENTURY STUDIES, located in 2223 Campbell Hall (206-8552), coordinates the research activities of more than 100 faculty members studying the development of civilization in the early modern period. It is an extension of and includes the programs of UCLA's Clark Memorial Library. Center programs involve appointing predoctoral and postdoctoral fellows and visiting professors, organizing conferences and colloquia, and sponsoring publication of research.

In other research activities, the Center for Bilingual Research and Second Language Education is working to produce a society that is proficient in at least two languages. In the Linguistics Phonetics Lab, one of the best-known labs of its kind in the nation, researchers are finding new ways to analyze speech functions and make voiceprints for use in law enforcement. And the University has established the Hammer Center for Leonardo Studies and Research where scholars have access to major resources for the study of the works of Leonardo da Vinci.

Resources for Research and Study

University Library System

Library facilities are crucial to both study and research. The University Library on the UCLA campus is one of the country's largest and most renowned academic libraries. The 19-branch system consists of the University Research Library, the College Library, the Clark Memorial Library, and 16 specialized subject libraries. Collectively they contain nearly six million volumes and extensive holdings of government publications, pamphlets, manuscripts, maps, microforms, music scores, recordings, photographs, and slides. They regularly receive over 92,000 serial publications.

ORION, the library's on-line information system, provides location and holdings information for materials acquired or cataloged since 1977, an increasing percentage of older materials, and current information for materials on order or in processing. On-line circulation status information for some libraries is also available. ORION public access terminals are located in most campus libraries, and demonstrations and workshops in using the system are available at the beginning of each quarter. The main card catalog in the University Research Library lists older holdings in all campus libraries.

Students have access to the stacks in most libraries. A handbook describing the organization, services, and hours of the University libraries is available in all of the campus branches.

University Research Library

The University Research Library on north campus is a modern six-story building designed primarily as a graduate research library serving the social sciences and humanities. The building houses over three million volumes arranged in open stacks, as well as the Reference Room, Circulation Department, Graduate Reserve Service, Periodicals Room, and Audiovisual Service. The Microform Reading Service, with some 1,086,000 microcopies of newspapers, books, and periodicals, has a variety of reading and copying equipment. During academic sessions library hours are weekdays 8 a.m. to 11 p.m. (6 p.m. Friday), Saturday 9 a.m. to 5 p.m., Sunday 1 to 10 p.m.

The Department of Special Collections in the Research Library contains rare books and pamphlets, the University Archives, early maps, and files of early California newspapers. Manuscript collections include the literary papers of Henry Miller and Anaïs Nin, as well as the private papers of Jack Benny, Charles Laughton, Carey McWilliams, King Vidor, and Nobel Peace Prize winner Dr. Ralph J. Bunche, a UCLA alumnus. Other significant holdings include the Sadleir Collection of nineteenth-century fiction, generally regarded as the finest of its kind, and the Ahmanson-Murphy Collection of Early Italian Printing (1471-1550), with a concentration on Aldine imprints. The department also houses UCLA's Oral History Program, a national leader in the field with over 400 interviews with prominent individuals since the program was founded in 1959.

The Public Affairs Service, also housed in the Research Library, collects official publications of the U.S. government, the State of California, California counties and cities, selected U.S. state and local governments, foreign nations and selected foreign states and provinces, plus those of the United Nations and some of its specialized agencies and a number of other international organizations. Also housed are current English-language, nongovernmental pamphlets on public affairs representing a wide spectrum of political and social opinion, with strong emphasis on social welfare, economic, social, and political conditions, and industrial relations.
College Library
The College Library, located in the Powell Library Building, is designed to meet the basic study needs of most undergraduates. Its 255,000 books and periodicals are maintained in open stacks, with course reserve materials, lecture notes, past examinations, and APS (Academic Publishing Service) readings available for loan. During academic sessions library hours are weekdays 8 a.m. to 10 p.m. (5 p.m. Friday), Saturday 10 a.m. to 6 p.m., Sunday noon to 9 p.m. The Powell Library reading rooms, with study space for 800 students, are open daily until midnight. The Reprographic Services office, housed in the Powell Library Building, provides a complete reprographic service for duplicating books, periodicals, manuscripts, and maps.

Specialized Subject Libraries
The resources of the specialized campus libraries are devoted mainly to subjects of concern to the departments or professional schools which they serve, but their materials are available to all UCLA students and faculty. A recorded message (825-8301) provides current hours of service for each library.

The Architecture and Urban Planning Library includes materials treating architecture, building technology, city and regional planning, and selected environmental topics. The Art Library supports the art, design, and art history programs. For those interested in the Italian Renaissance, one of the greatest research centers in the world for the study of Leonardo da Vinci is the Belt Library of Vinciana, part of the Art Library.

The Louise Darling Biomedical Library, in the Center for the Health Sciences, is one of the finest libraries of its kind in the country. Its 450,000 volumes and over 6,200 serial subscriptions serve all the UCLA health and life sciences schools and the UCLA Medical Center.

The Chemistry Library includes material on chemistry, biochemistry, and molecular biology, while education, psychology, teaching English as a second language, and kinesiology are the principal subjects covered by the Education and Psychology Library. Materials for engineering, astronomy, computer science, meteorology, and mathematics are kept in the Engineering and Mathematical Sciences Library. The English Reading Room mainly duplicates the Research Library's holdings in English and American literature, and major subjects covered by the Geology-Geophysics Library include geoscience, invertebrate paleontology, planetary and space science, and hydrology.

The Law Library has a substantial collection of over 350,000 volumes selected to further the course of instruction in the School of Law and the legal research needs of the UCLA community, and the Management Library serves the John E. Anderson Graduate School of Management and the various subjects related to business and management.

The Bruman Map Library in Bunche Hall houses maps, city plans, nautical charts, and technical books and serials on all aspects of cartography and is one of the largest of its kind in the U.S. The Music Library houses historical musicology and ethnomusicology materials, musical scores, recordings, and the personal collections of such composers as Henry Mancini, Alex North, and Ernst Toch. Materials in Chinese, Japanese, and Korean are available in the Rudolph Oriental Library, and the Physics Library covers all aspects of that science, including acoustics and spectroscopy.

The Theater Arts Library is the home of many prestigious collections which have been donated to UCLA, such as those of Charlton Heston, Rosalind Russell, director William Wyler, and animator Walter Lantz. The collections include original scripts, contracts, correspondence, shooting diaries, and much more. The University Elementary School Library contains contemporary materials for children from kindergarten through junior high school age.

Clark Memorial Library
Supplementing the University Library is the Clark Memorial Library, with its collection of some 83,500 volumes and 15,000 manuscripts related to English culture of the seventeenth and eighteenth centuries. Its John Dryden collection is among the most complete in the world. The library, located approximately 10 miles from the UCLA campus, contains noncirculating materials. Leaflets describing the Clark Library and information about University transportation to it are available at the Reference Desk in the Research Library.

Special Archive Collections
The UCLA FILM AND TELEVISION ARCHIVE is a living resource equally respected by industry and scholars. Students use the collections to learn the finer points of production techniques and to study the careers of leading actors, directors, and other figures in the entertainment industry, many of whom also use the archive. The campus office is located in 1438 Melnitz Hall and is open Monday through Friday from 9 a.m. to 5 p.m. For information and/or viewing appointments, call 206-8013.

The Motion Picture Collection, with more than 30,000 films, is the country's largest collection west of the Library of Congress. Among its outstanding collections are 27 million feet of Hearst Metrotone News film dating back to 1919. Other noteworthy holdings include studio print libraries from Twentieth Century-Fox, Paramount Pictures, Warner Brothers, Columbia Studios, New World Pictures, Universal Studios, and Orion. Special collections document the careers of William Wyler, Hal Ashby, Tony Curtis, Rosalind Russell, Stanley Kramer, Cecil B. DeMille, Harold Lloyd, and other persons of prominence in the American film industry.

The Television Collection, operated jointly by the Academy of Television Arts and Sciences and UCLA, is the nation's largest university-based collection of television broadcast materials. Its 25,000 titles include kinescopes, telefilms, and videotapes spanning television history from 1947 to the present, with emphasis on network news, drama, comedy, and variety programming.

Other archive collections include the Collection of Television Technology and Design, with over 300 historical television cameras and receivers dating from the 1930s, and a Radio Study Collection. Radio holdings include programs featuring Jack Benny, Bing Crosby, and Edward R. Murrow, as well as episodes from the Screen Directors Playhouse and Hallmark Hall of Fame series.

Art Galleries and Museums
A tour of all the UCLA museums and art galleries will take you from one corner of campus to the other. In the course of three decades UCLA's WIGHT ART GALLERY COMPLEX has evolved into a multifaceted museum, responsive to the needs of the University and the general public. The complex includes the Wight exhibition galleries, with 14,000 square feet of exhibition space in which to mount approximately 12 exhibitions per year; the Grunwald Center for the Graphic Arts, and the Murphy Sculpture Garden.

Located in the Dickson Art Center on north campus, the Wight Art Gallery is open Tuesday 11 a.m. to 8 p.m., Wednesday through Friday 11 a.m. to 5 p.m., Saturday and Sunday 1 to 5 p.m. (closed Monday, major holidays, and July and August). Admission is free. Daily tours are offered by the UCLA Art Council docents; special group tours may be arranged by calling 825-3264. The administrative office is located in 1100 Dickson Art Center. For a schedule of exhibitions, call 825-9345.

On the second floor of the Wight Art Gallery is the Grunwald Center for the Graphic Arts, which houses a distinguished collection of some 30,000 prints, drawings, and photographs. Maintained as a study and research center for the benefit of students and the community, the center's permanent holdings include significant examples from the thirteenth century to the present. It is particularly noted for its collection of German expressionist prints formed by Fred Grunwald and comprehensive holdings of Matisse, Picasso, and Goya. The center, located in 2122 Dickson Art Center (825-3783), is open Tuesday through Friday from 2 to 5 p.m. and by appointment.
The Murphy Sculpture Garden, located between Bunche Hall and the Wight Art Gallery, contains a collection of over 70 major works by Rodin, Matisse, Calder, Lachaise, Lichitz, Moore, Miro, Hepworth, and many other late nineteenth- and early twentieth-century masters. All works in the growing collection, situated on a picturesque five-acre expanse, are private gifts to the University.

The MUSEUM OF CULTURAL HISTORY is internationally known for the quality of its collections and exhibits. Its collections encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Oceania, and Latin America. The museum, located in 55A Haines Hall (825-4361), offers assistance with instruction and research and sponsors major exhibitions, lecture programs, and symposia. Gallery hours are Wednesday through Sunday noon to 5 p.m.

Other Resources

The OFFICE OF ACADEMIC COMPUTING (OAC), with administrative offices in 4302 Math Sciences, provides centralized computing facilities for the UCLA academic community. OAC offers a broad range of services, including operation of an IBM 3090 computer with vector facilities; assistance to individuals and departments in the selection of microcomputer and workstation hardware and software through the Microcomputer Support Office (2035 GSM); maintenance of public computing facilities; instruction in the use of computer hardware and software through free noncredit classes; professional consulting services; and the publication of newsletters and user documentation.

OAC's IBM 3090 runs the VM and MVS operating systems and is available to all registered students. OAC maintains a large library of applications software, including statistical, text processing, language, and graphics packages. The 3090, together with its vector facilities, is particularly appropriate for numerically intensive computing and data management tasks. OAC is connected to the campus backbone network, thus enabling access to its services wherever there is a connection to the network throughout the campus. These services include access to ORION, the UCLA on-line library information system; use of BEN, an electronic communication system; access to the Internet, which includes BITNET and ARPANET; and a direct link to the San Diego Supercomputer Center and NSFnet.

To arrange for use of the IBM 3090 computer, apply in the OAC User Relations Office (4302 Math Sciences, 825-7548) weekdays from 8 a.m. to 5 p.m.

Supplementary Educational Programs

In addition to the regular academic programs which are described in Chapters 5 through 17 of this catalog, the following optional programs are available to UCLA's undergraduate and graduate students.

Summer Sessions

UCLA offers more than 500 courses from approximately 50 UCLA departments in six-, eight-, and 10-week sessions. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year, repeat courses in which they may have done poorly, lighten their academic load for the following quarter, or complete graduation requirements more quickly.

Admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in Chapter 2 (undergraduate) or Chapter 3 (graduate).

If you are a regularly enrolled undergraduate student, you may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on your UCLA transcript, and grades earned are computed into your grade-point average. Check with your college or school counselor about the possibility of applying these courses toward minimum unit requirements and for any limitations the college or school may impose on Summer Sessions study.
If you are a regularly enrolled graduate student, you may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master’s or doctoral degree; consult your graduate adviser in advance concerning this possibility. Summer Sessions courses may also satisfy the academic residence requirement for master’s or doctoral degrees (see Chapter 3 for details).

Unlike enrollment in regular quarters, you may attend another college institution for credit while you are enrolled in Summer Sessions. Applications and more information are available in 100 Dodd Hall (825-8355).

**University Extension**

Serving approximately 100,000 adult students each year, UCLA Extension is one of the largest university continuing education programs in the world. It is designed to bring the benefits of the University — its scholars, research, and resources — to the community and the state as a whole.

Many of UCLA’s 4,500 Extension classes are innovative and experimental in content, format, and teaching methods. Credit and noncredit courses are offered in nearly every academic discipline and in many interdisciplinary areas. Many noncredit Extension courses offer the opportunity to earn Continuing Education Units, widely used for relicensure and other professional/career-related purposes.

Although registering for Extension courses does not constitute admission to regular session, degree credit earned through Extension may apply toward the UCLA bachelor’s or master’s degree; consult your college or school counselor or graduate adviser before enrolling. For more information, see the sections on “Concurrent Enrollment and Transfer of Credit” in Chapter 4. Graduate students should also see “Transfer of Credit” in Chapter 3.

The Extension Advisory Service offers assistance in planning long- or short-term study through Extension. The office is located in 114 UCLA Extension, 10995 Le Conte Avenue (206-6201). To obtain the current UCLA Extension Catalog, call 825-8895. The Registration Office is open weekdays from 8 a.m. to 6 p.m. and until 5 p.m. on Friday (825-9971).

**Education Abroad Program (EAP)**

Each year, more than 1,000 undergraduate and graduate students from UC campuses study at distinguished universities throughout the world. UCLA students remain registered here while overseas and receive UC units and grade points for work completed abroad. Currently, EAP offers study opportunities on more than 80 different campuses in 33 countries: Australia, Austria, Brazil, Canada, China, Costa Rica, Denmark, Egypt, England, France, Germany, Ghana, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Kenya, Korea, Mexico, New Zealand, Norway, Peru, Portugal, Scotland, Spain, Sweden, Taiwan, Thailand, Togo, U.S.S.R., and Wales. Participants generally spend a full academic year abroad, enjoying a unique opportunity to enhance language skills and become involved in the culture of the host country. A special orientation program and, when necessary, intensive language training are included. During the year UC faculty members at the host campus assist with scholastic or personal problems.

EAP is open to all UC faculty members at the host campus assist with scholastic or personal problems.

**Education at Home Program**

Students interested in early American history and culture have the opportunity to spend Winter Quarter 1989 “on location” in three Eastern cities. The Education at Home Program, conducted through the UC Riverside campus, is open to graduate students (with prior approval of their adviser) and undergraduates from any campus in the UC system.

Those selected for participation spend nine weeks in Williamsburg, one in Philadelphia, and a concluding week in Washington, D.C. Formal instruction consists of three American history courses (four units each) comprising classroom work and field trips to places of historical interest. An additional four units of independent study may be arranged. For further information, brochures, or applications, write to the Education at Home Program, Department of History, University of California, Riverside, CA 92521, or call Susan Braddock at (714) 787-3820.

**Interdisciplinary Colloquia**

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interests. They are open to all faculty members, interested undergraduates, and graduate students assigned to the colloquia by their advisers. Credit is not awarded directly but may be given through appropriate departmental courses. For information about the committees in charge of these colloquia, call the assistant to the provost of the College of Letters and Science at 825-4621.

**African Studies** — The African Studies Center annually sponsors at least one interdisciplinary colloquium on Africa which focuses on topics in the social sciences or humanities. It is the policy of the center to organize its colloquium so that they can be taken for course credit at the graduate or undergraduate level or attended as open lectures. For further information, contact the center at 825-3686.

The Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences provides a forum for interaction among faculty and students interested in the applications of mathematics and statistics to the behavioral sciences. Disciplines include anthropology, architecture, artificial intelligence, biology, business, computer science, economics, education, engineering, geography, linguistics, management, operations research, philosophy, political science, psychology, public health, public planning and policy, sociology, and systems analysis.

The colloquium sponsors presentations by leading experts in these fields, including faculty members from UCLA, other UC campuses, and other universities, and meets on alternate Fridays from 1 to 3 p.m. in 2270 GSM during the academic year. Announcements of presentations, including abstracts of the papers to be presented, are circulated and posted on campus; announcements also appear in UCLA Today. For further information, contact Trish Rogers at 825-1581.
Student Life

Living Accommodations

Where you live while attending UCLA can play an important role in your total college experience. Nearly half of UCLA freshmen live on campus, but the majority of undergraduates commute. About a quarter of the total student population lives at home.

There are many different housing options available, though the housing shortage on and near the UCLA campus means your first choice may not be available. You should therefore consider all housing options, decide early which ones you plan to pursue, and apply for or follow up on them as soon as possible. If you plan to live off campus, arrive early to make your housing arrangements for the coming academic year. Some students even pay rent year-round to insure accommodations, and try to sublet during the summer months.

The UCLA Community Housing Office, 270 De Neve Drive, Los Angeles, CA 90024-1495, (213) 825-4491, provides information and current listings on University-owned apartments, cooperatives, fraternities, sororities, private apartments, roommates, rooms in private homes, room and board in exchange for work, and temporary housing. It also has bus schedules, area maps, neighborhood profiles, and counselors to help resolve landlord-tenant conflicts. A current Registration Card or letter of acceptance and a valid photo identification card are required for service.

The International Student Center on Hilgard Avenue helps international students find housing and may also provide temporary facilities until suitable permanent housing arrangements are made.

UCLA Housing Options: Information and Application, a booklet which covers the housing situation in much greater detail, is mailed to all students when they are accepted for admission (you may also request it prior to admission).

On-Campus Housing

Living on campus can add an extra dimension of enjoyment and convenience to your UCLA experience; the demand, however, currently exceeds the space available. Four residence halls (Dykstra, Hedrick, Rieber, and Sproul Halls) and two residential suite complexes (Hitch and Saxon Residential Suites) accommodate nearly 4,000 undergraduates. There is one residence hall, Hershey Hall, which houses some 335 students.

Residence hall rooms are shared by two or three students. Residential suites, shared by four or six students, consist of two bedrooms, a full bathroom, and a common living room. The residence hall cafeterias, which also accommodate students in the residential suites, serve 19 meals per week.

Applications for on-campus housing are contained in the UCLA Housing Options: Information and Application booklet, available at the UCLA On-Campus Housing Assignment Office, 270 De Neve Drive, Los Angeles, CA 90024-1497, (213) 825-4271. Applications should be submitted by:

- March 18 (May 20 for graduate students) for Fall Quarter 1988
- October 28 for Winter Quarter 1989
- January 27 for Spring Quarter 1989
- March 17, 1989 (May 19 for graduate students) for Fall Quarter 1989

Following each of these dates, a lottery will be held to determine the order in which students will be offered housing. The full cost per student for the 1988-89 academic year (Fall, Winter, and Spring Quarters, excluding vacation periods) is $3,350 (triples) or $3,700 (doubles) for residence halls and $3,900 (six persons) or $4,400 (four persons) for suites, plus a $21.45 membership fee in the On-Campus Housing Student Association.

The Office of Residential Life, in the Residential Life Building next to Sproul Hall (825-3401), is responsible for the conduct of students in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems.

Family Student Housing

UCLA maintains nearly 650 off-campus apartments for married and single-parent students at Sawtelle and Sepulveda Boulevards and 60 units on Barrington Avenue, about five miles from campus. Unfurnished one-, two-, and three-bedroom units are available. Rentals for 1988-89, excluding utilities, are expected to range from $373 to $519 per month. Since waiting lists for family student housing are long, do not wait until you have been accepted to UCLA to apply. Verification of marriage and/or copies of children's birth certificates must accompany your application. Call the Family Student Housing Office at (213) 391-0686 for up-to-date information.

University-Owned Apartments

Over 300 shared apartments for single students in four off-campus facilities are maintained by the University. Three of the locations are within walking distance of campus and the fourth, about five miles south, has free shuttle bus service on weekdays during regular academic sessions. Rental rates vary depending on the location and size of the apartment. There is no waiting list; apartments are rented on a first come, first served basis. Listings are posted in the UCLA Community Housing Office.

Cooperatives

Cooperatives provide an atmosphere similar to residence halls except that you must work three to four hours per week as partial payment for room and board. There are five cooperatives within walking distance of campus. Room and board rates for 1987-88 varied between $550 and $900 per quarter. Cooperatives normally have long waiting lists, so apply early. For applications and specific information, write directly to each cooperative. Addresses are available from the UCLA Community Housing Office.

Fraternities and Sororities

Many of the 52 fraternities and sororities at UCLA own chapter houses on the west and east sides of campus respectively. You must be a member to live in the house and generally will be able to move in after your first year of active membership. Room, board, and dues are about the same as the monthly residence hall fee. During the summer break, most fraternities with chapter houses lease rooms to students, greek or not. For more information, contact the Office of Fraternity and Sorority Relations, 118 Men's Gym (825-6322).
Parking Space and Permits

A limited number of parking permits for campus lots are sold to students each quarter, but parking spaces on campus are at a premium and not all students who request a permit will receive one. Obtain a Student Parking Request at the Campus Parking Service (Structure 8, Level 2) and return it by the deadline. Check dates on the Calendar at the beginning of this catalog or in the quarterly Schedule of Classes.

Parking assignments are based on the distance you live from campus, work commitments, and other information you provide. Students with permanent or temporary disabilities who have DMV disabled persons' license plates or placards may apply to the Office for Students with Disabilities for parking assignments and on-campus transportation assistance. Students with short-term disabilities (normally less than three months) who do not have DMV disabled persons' license plates or placards may obtain recommendations for parking permits through Student Health Service. If you do not receive a permit, you must reapply every quarter to be reconsidered. For more information, call the Campus Parking Service at 825-9871.

ASUCLA

Every registered UCLA student is a member of the Associated Students of UCLA (ASUCLA), one of the nation's largest such enterprises in terms of size, scope, and range of programs. The undergraduate and graduate student governments are integral parts of ASUCLA, which supports the following activities and services.

Food Service

ASUCLA operates the food service on the general campus and provides a number of innovative menu options at a variety of locations. Catering for special events is also available.

THE COOPERAGE — On the A Level of Ackerman Union, the Cooperage offers Mexican food, pizza, grill items, croissants, special salads, and soft ice cream. A stage and sound system for live entertainment and a large-screen TV for major events are available. Hours are weekdays 8 a.m. to 12:30 a.m. (1:30 a.m. Friday), Saturday 11 a.m. to 1:30 a.m., Sunday 11 a.m. to 11 p.m.

NORTH CAMPUS STUDENT CENTER — This facility, just south of the Research Library, offers a variety of Mexican and Latin entrees, frozen yogurt, fresh-baked cookies, deli and garden sandwiches, a wide selection of international-style entrees, hamburgers, and a salad bar. North Campus is open for breakfast, lunch, and dinner. Hours are weekdays 7:30 a.m. to 11 p.m. (8 p.m. Friday), Saturday 10 a.m. to 6 p.m., Sunday 11 a.m. to 9 p.m.

THE BOMBSHELTER DELI AND BURGER BAR — This unique food service in the center of the Court of Sciences offers an assortment of traditional deli sandwiches, snacks, frozen yogurt, broiled hamburgers and chicken, and salads at reasonable prices. A full breakfast menu is served in the morning. Hours are weekdays 7:30 a.m. to 2 p.m., Saturday 10 a.m. to 4 p.m.

THE TREEHOUSE — Located on the first floor of Ackerman Union, the Treehouse is open for breakfast, lunch, and dinner and features ranch-fried chicken, a chili bar, Italian-style dishes, and a variety of traditional American favorites. Grilled-to-order sandwiches are offered at the Hole-in-the-Wall. Hours are weekdays 7 a.m. to 7:30 p.m. (3 p.m. Friday). Adjacent to the Treehouse is the Sandwich Room, where you can find a variety of low-cost, made-to-order sandwiches, including Italian-style hot or cold submarine sandwiches. Hours are weekdays 10 a.m. to 4 p.m. (3 p.m. Friday), Saturday 10 a.m. to 2:30 p.m.

Between the Treehouse and the Sandwich Room is Tout de Suite, a candy, baked goods, and frozen yogurt counter. Hours are weekdays 7 a.m. to 8 p.m., Saturday 11 a.m. to 3 p.m.
CAMPUS CORNER — The oldest of the ASUCLA food facilities, the Campus Corner is located just across Bruin Walk from Kerckhoff Hall. Soft frozen yogurt, hamburgers and French fries, and a wide range of pita bread pocket sandwiches are available. Hours are weekdays 7:30 a.m. to 5 p.m. (4 p.m. Friday).

THE KERCKHOFF COFFEE HOUSE, on the second floor of Kerckhoff Hall, offers Baskin-Robbins ice cream specialties and a variety of teas, coffees, and potages (hearty soups). Live entertainment is featured almost every night. Hours are weekdays 7 a.m. to 1 a.m., weekends 10 a.m. to midnight.

POTLATCH, a lounge on the first floor of the Graduate School of Management, offers a variety of sandwiches, snacks, and beverages. Hours are Monday through Thursday 7:45 a.m. to 9 p.m., Friday 9 a.m. to 2 p.m.

LU VALLE COMMONS, located adjacent to the Graduate School of Management, features deli food, hamburgers, and other grilled specialties. Hours are weekdays 7:30 a.m. to 10 p.m. (8 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday 11 a.m. to 8 p.m.

Within Lu Valle Commons is Jimmy's Coffee House, featuring coffee, teas, and cheesecake. Hours are weekdays 7 a.m. to midnight (10 p.m. Friday), Saturday 9 a.m. to 9 p.m., Sunday 11 a.m. to 10 p.m.

Students' Store

The ASUCLA Students' Store, the largest on-campus retail store in the nation, is actually a mini department store with four campus locations. The Main Store (B Level of Ackerman Union, 825-7711) offers textbooks, general books, school and art supplies, calculators and other electronic items, UCLA insignia merchandise (Bearwear), men's and women's sportswear, groceries, health/beauty aids, and greeting cards. The University's computer purchase program is administered through the Main Store — Macintosh, IBM, and Zenith computers are available to students, faculty, and staff at discounts up to 40 percent. Selected software is discounted as much as 75 percent. Hours during regular school sessions are weekdays 7:45 a.m. to 7:30 p.m. (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday noon to 5 p.m.

The Health Sciences Store (13-126 CHS, 825-7721) specializes in books and supplies for students in dentistry, medicine, public health, and related areas. The Lu Valle Commons Students' Store (just south of GSM, 825-7238) carries convenience items, magazines, and general books for the north campus area, as well as textbooks for selected graduate programs (law, management, architecture, urban planning, social welfare). The North Campus Shop (in the North Campus Student Center, 206-0751) is a small convenience store offering school supplies and snacks.

Lecture Notes

The Lecture Notes Office (A206 Ackerman Union, 206-0882) publishes concise weekly summaries of about 130 of UCLA's large lecture classes. Hours during regular school sessions are weekdays 7:45 a.m. to 6:30 p.m. (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday noon to 5 p.m.

Job Opportunities on Campus

ASUCLA reserves over 1,800 part-time jobs for UCLA students in food service, the students' stores, Graphic Services, and other departments. Listings are posted outside the Personnel Office, 205 Kerckhoff Hall (825-7055).

The residence halls offer a number of positions, as do the University libraries; check at the residences and the Personnel Office in the University Research Library (825-7947). Other on-campus jobs may be available through the Placement and Career Planning Center (see "Student Services" later in this chapter).

Check Cashing and Money Orders

Cash is available via Home Federal automatic tellers at the North Campus Student Center and on the A Level of Ackerman Union.

Students with current UCLA identification may cash a personal check or traveler's check for up to $50 a day, with a service charge for each check, at the ASUCLA Service Center, 140 Kerckhoff Hall (825-2423). Check cashing hours are weekdays 9 a.m. to 4 p.m.

Students, staff, and faculty may purchase money orders for up to $300 (cash only) at the same location. There is a service charge of 85¢ for each money order. Students, staff, and faculty may also rent post office boxes there at $12 per quarter for a small box and $15 for a large one. Hours for both services are weekdays 9 a.m. to 4 p.m.

Graphic Services

ASUCLA Graphic Services, 150 Kerckhoff Hall (206-0894), is the campus center for photographic, printing, copying, typographic, and other graphic services. Portraits, photography, yearbook sittings, passport photographs, film, photo and darkroom supplies, and discount photofinishing are also provided. Hours are weekdays 8:30 a.m. to 5:30 p.m. A satellite Graphic Services Center is located in Lu Valle Commons (825-7568).

The Graphic Services Kerckhoff Hall office also features the Macintosh and Laser Rental Service (206-8454). Macintosh computers are available for hourly rental; term papers, newsletters, and flyers may be output on a Laserwriter or Imagewriter printer. A Linotronic 300 is available for high-resolution typesetting of newsletters and brochures designed on the Macintosh. Weekend and evening hours are available during busy periods; call for the latest information.

Meeting Rooms

A variety of meeting rooms is available for use by the entire campus community. To reserve space in Ackerman Union or Kerckhoff Hall, contact the Student Union Operations Office on the A Level of Ackerman Union (825-2311). Contact the Food Service Office at the North Campus Student Center (206-0720) and the Main Office at Lu Valle Commons (825-7238) to reserve space at those locations.

Travel Service

The ASUCLA Travel Service, located on the A Level of Ackerman Union (825-9131), offers a wide range of domestic and international charter flights, land arrangements and charter packages, student tours, scheduled air and rail tickets, and other travel-related services. Hours are weekdays 8:30 a.m. to 6 p.m., Saturday 11 a.m. to 3 p.m.
Student Activities

The opportunities to participate in extracurricular activities at UCLA are virtually unlimited. Though it is impossible to list all the activities here, the following are just a few of the many ways you can get involved in campus life and expand your horizons beyond classroom learning.

Student Government

In addition to its Services and Enterprises division, which is responsible for the services described above, ASUCLA includes the Undergraduate Students Association, the Graduate Students Association, and the Communications Board, which publishes the Daily Bruin and other campus student publications. Governed by a 10-member Board of Control, ASUCLA operates and manages Ackerman Union, Kerckhoff Hall, North Campus Student Center, and Lu Valle Commons.

Many facets of student life at UCLA are sponsored or organized in some way by student government. Getting involved in the decision-making process can be extremely rewarding and can offer avenues of expression you may not find in other aspects of your university experience.

Undergraduate Student Government — The Undergraduate Students Association (USA), located on the third floor of Kerckhoff Hall (825-4504), is governed by the Undergraduate Students Association Council. USAC administers the association’s $500,000 annual operating budget through a network of student commissions (Academic Affairs, Campus Events, Community Service, Cultural Affairs, Facilities, Financial Supports, and Student Welfare) presided over by the student body president. The undergraduate student body elects officers annually.

Many student government programs benefit both campus and community. The Community Service Commission (825-2333) serves Los Angeles through such programs as Amigos del Barrio, offering academic and emotional support for Latino students; the UCLA Prison Coalition, providing tutoring for inmates of juvenile correctional institutions; and the UCLA Special Olympics, to name just a few. More than 1,250 students volunteer annually for community service participation.

Student government also supports the various special interest groups on campus, including the American Indian Students Association, Asian Pacific Coalition, Black Students Alliance, Gay and Lesbian Association, MEChA, and the UCLA Jewish Student Union.

The Campus Events Commission (825-1957) is responsible for such events as Ackerman movies, Mardi Gras, and the Speakers Program (see next page), as well as other movie and concert programs providing campus entertainment at reduced prices.

Graduate Student Government — The Graduate Students Association is the official organization representing the interests of UCLA graduate students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees, including the ASUCLA Board of Control and the Student Fee Advisory Committee, as well as to departmental student organizations and committees of the Academic Senate. In addition, GSA sponsors various graduate student journals, programs, and social events, including Melnitz Movies (UCLA student film program) and publication of the GSA newsletter, Grad Voice. The GSA Office is located in 301 Kerckhoff Hall (206-8512).

Clubs and Organizations

Joining a club or organization is an excellent way to make new friends and find your niche on campus. UCLA has about 500 different clubs and registered organizations — more than you will find on almost any other university campus in the country. Political, athletic, recreational, cultural, academic, and religious clubs of almost every description are represented — and if you can’t find one to suit your particular interest, you can start your own.

Clubs focusing on sports and recreation are listed in the University Recreation Association Office, located in the Wooden Center (825-3701). For a full listing of registered student organizations, contact the Center for Student Programming, 161 Kerckhoff Hall (825-7041). This office can help you start a club or join an existing one, and serves as the official registry for all campus organizations. The center assists students with program development and fund-raising, monitors financial activities of student organizations, and interprets and enforces University rules and regulations.

Groups registered through the Center for Student Programming are eligible to use the services of the Campus Activities Service Office (CASO), 12 Royce Hall (825-8981). CASO offers technical advice and estimates for services in the public events area and reserves most campus public assembly facilities, classrooms, and auditoriums. A CASO manager maintains office hours at the Center for Student Programming to assist students. Official and general purpose bulletin boards on campus, general assignment lockers, and the sale of UCLA padlocks are administered by CASO.

Fraternities and Sororities

Serving as small, cohesive communities within the larger UCLA community, fraternities and sororities provide the security of friendship and academic support while encouraging personal development and expansion. Members have group and individual responsibilities related to their particular interests and talents, and all take part in the group’s programs and support networks. “Greeks” follow their founding principles of service, scholarship, and friendship. There is a place for anyone who will contribute to a group experience, and the cost to live in a chapter house is no more than living in a campus residence hall, although many members “live out.”

For information on joining the more than 4,000 other students in “greek” life, contact the Office of Fraternity and Sorority Relations, 118 Men’s Gym (825-6322).

Mardi Gras

UCLA's annual Mardi Gras has become the world's largest student-operated collegiate activity. Each Spring Quarter over 5,000 Bruins from all types of campus organizations help to prepare and present this carnival. Students design and operate more than 65 booths featuring games, food, and live entertainment. There are celebrity judges, carnival rides, clowns, balloons, fireworks, and much more.

The three-day event generates well over $100,000 annually for UCLA's official charity, UniCamp, a summer camp for underprivileged children in Los Angeles. For more information, contact the Mardi Gras Committee in 129 Kerckhoff Hall (825-8001) or the Campus Events Commission in 300A Kerckhoff Hall (825-1957).

UCLA Campus Events Speakers Program

Headed by the Campus Events Commission, the Speakers Program brings many of the foremost literary and political leaders and entertainers to the campus. Past speakers have included Jack Lemmon, Itzhak Perlman, Whoopi Goldberg, David Letterman, Joan Rivers, Bob Hope, Lily Tomlin, Bill Murray, and Bette Davis from the entertainment world; Jimmy Carter, Jesse Jackson, Gerald Ford, Justice William O. Douglas, and Senator Gary Hart representing government and politics; and authors Gore Vidal, John Irving, William F. Buckley, Jr., Gloria Steinem, and Hunter S. Thompson.

Publications and Broadcast Media

UCLA's publications and broadcast media, operated by the ASUCLA Communications Board, provide excellent training grounds for aspiring writers, journalists, photographers, radio announcers, and television performers while serving the communication needs of the campus and community. The following are the major student-operated sources of information on campus:

The Daily Bruin, with a circulation of 22,000, is the fourth largest daily newspaper in Los Angeles. As the principal outlet for campus news, the Bruin is published each weekday of the regular academic year (twice weekly during the summer) and is distributed free from kiosks around campus. Students work as reporters, editors, proofreaders, photographers, and advertising sales representatives; new staff members are always welcome. Bruin offices are located in 112 Kerckhoff Hall (825-9898).

Six student special interest papers are published twice each quarter to serve special segments of the campus community: Ha'Am for Jewish students, La Gente for Chicanos and Latinos, Nommo for black audiences, Pacific Ties for Asian readers, TenPercent for gay and lesbian groups, and Together for women. Each includes news and features on political and cultural affairs — both on and off campus — of interest to its audience. Prospective staffers are welcome. The offices of the special interest periodicals are located in 112 Kerckhoff Hall.

The UCLA yearbook, Bruin Life, is one of the largest student publication efforts on campus. Available each spring, it contains photographs and information on graduating seniors, athletic teams, fraternities and sororities, and campus activities. If you would like to participate on the yearbook staff, contact the staff in the trailer behind Kerckhoff Hall (825-2640).

Like many other large universities, UCLA has its own radio station. KLA Radio provides music, news, and sports 24 hours a day during the academic year (12 hours daily during Summer Sessions). The carrier current signal is sent to the residence halls and parts of Ackerman Union and Kerckhoff Hall on 53 AM and to many parts of the Los Angeles area on 99 Cable FM. The studios are located at the rear of the Grand Ballroom in 2400A Ackerman Union (825-9104; request line: 825-9999). All positions, including on-air, news staff, and advertising representatives, are open to students.

The Performing Arts

UCLA offers a rich variety of concerts, art exhibits, dance recitals, and theater productions as an integral part of University life. A full calendar of exceptional programs by the Music, Dance, and Theater, Film, and Television Departments of the College of Fine Arts provides opportunities for student involvement and personal growth.

The Music Department offers more than 20 performance organizations. Instrumentalists are invited to play with one of seven different bands and orchestras. An extensive ethnomusicology program allows you to perform with various non-Western and ethnic groups. Campus choral organizations include a Concert Choir, Chamber Singers, Women's Chorus, Men's Glee Club, and the Collegiate Chorus which, with 120 members, is the largest of the groups.

The Dance Department presents afternoon and evening modern dance concerts and demonstrations both on and off campus, and folk and ethnic performing groups meet regularly. Dance students have the opportunity to design and choreograph as well as perform.

The Theater, Film, and Television Department, one of the finest in the country, offers students several opportunities for artistic expression. Each year the Theater Division presents a series of major productions to the general public. The Motion Picture/Television Division produces about 300 student-directed films each year in addition to hundreds of television programs. Professionals appearing on campus frequently visit classes to share their skills, and many have established awards and scholarships in the performing arts at UCLA.
Be a Spectator
If you'd rather be entertained than do the entertaining, UCLA's Center for the Performing Arts stages more than 200 public concerts and events each year. Ever since Royce Hall was dedicated in 1929, UCLA has been a premiere West Coast showcase for both new talent and the world's leading artists. The Los Angeles Philharmonic and Chamber Orchestras perform regularly each season, as do several major dance ensembles, theatrical companies, and performance artists. Numerous celebrities have appeared on UCLA stages, from Luciano Pavarotti to Marcel Marceau, Isaac Stern to Cleo Laine, Pierre Boulez to Liv Ullman. Discount tickets for students, faculty, and staff are available to all events.

Sports and Athletics
Athletics play a major role in the University's mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports. In 1987-88 the UCLA men's athletic program placed first in the national all-around excellence competition and has won the award nine times. The women's program placed first in the poll conducted by the Knoxville Journal and has won that award several times. UCLA is the only university in the country to win five National Collegiate Athletic Association (NCAA) men's and women's championships in a single year (1981-82).

MEN'S INTERCOLLEGIATE SPORTS — UCLA is a member of the Pacific-10 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; Stanford University; University of Southern California; University of Oregon; Oregon State University; Washington State University; and the University of Washington. UCLA teams have won an overall total of 53 NCAA men's championships — second highest in the nation — including 15 in tennis, 12 in volleyball, and 10 in basketball under the legendary John Wooden. In addition, the basketball team won the 1987 Pacific-10 Conference Tournament, and the golf and track and field teams won 1988 NCAA titles. You can participate on the varsity level in football, basketball, track, baseball, tennis, crew, volleyball, gymnastics, swimming, water polo, golf, soccer, and cross-country. For more information, contact the Men's Athletic Office at 825-8699.

WOMEN'S INTERCOLLEGIATE SPORTS — With 10 different varsity sports, the UCLA women's program is one of the most extensive in the country, and UCLA has played an important role in establishing women's sports as part of the NCAA. Women's teams have won many national, regional, and conference titles, including the 1981-82, 1983-84, 1984-85, and 1987-88 NCAA championships in softball, the 1981-82 and 1982-83 track and field crowns, and the 1984 volleyball and golf titles. Other nationally ranked teams are those in basketball, swimming, tennis, cross-country, and gymnastics. Athletic grants-in-aid are available on a selective basis in most sports. For more information, contact the Women's Athletic Office at 825-8699.

INTERCOLLEGIATE ATHLETIC FACILITIES — UCLA's major indoor arena is the famed Pauley Pavilion, which seats 12,543 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, Drake Stadium is the home of UCLA track and field competitions and site of many outdoor events including the College of Letters and Science Commencement. The Los Angeles Tennis Center, a 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. The Morgan Intercollegiate Athletics Center houses the UCLA Athletic Hall of Fame. Off-campus facilities include Robinson Stadium for varsity baseball, the UCLA Aquatics Center in Marina del Rey for the UCLA crew and sailing programs, and the renowned Rose Bowl in Pasadena, home of the UCLA football team.

Athletics for Everyone
Whether you want to practice your favorite sport or learn a new one, you can do it all at UCLA. The extraordinary scope of athletic opportunities ranges from intercollegiate team play to an enjoyable jog around campus.

INTRAMURALS — Competitive intramural teams at UCLA are open to students, faculty, and staff. There are 40 activities in men's, women's, and coed competition, and many are divided into size or skill divisions so students at any level can get involved. For more information, contact the Intramural Sports Office in 2131 Wooden Center (825-3701).

RECREATIONAL CLUBS AND CLASSES — Recreational clubs are formed at UCLA to bring people interested in a particular sport or activity together. Through more than 30 different clubs with a combined membership of some 2,000 students, you can learn (and meet people who enjoy) bowling, waterskiing, karate, rugby, or lacrosse, to name just a few. For club information, contact the University Recreation Association in 2131 Wooden Center (825-3701).

You'll also find a broad range of noncredit recreation classes in aquatics, boating and sailing, dance, fine arts, outdoor studies, physical fitness, and sports skills. For class information, contact the Recreation Instruction Program Office in 2131 Wooden Center (825-3701).

RECREATION FACILITIES — UCLA students have several major facilities in which to practice and play. The Wooden Recreation and Sports Center is a comprehensive student activities building with several gymnasia, 10 racquetball/handball courts, a weight training facility, and exercise and martial arts workout rooms. The Sunset Canyon Recreation Center, open seven days a week the year round, features an Olympic-sized swimming pool, a family pool, picnic-barbecue areas, multipurpose play fields, an outdoor amphitheater, and various meeting rooms and lounges. Students also have the use of Pauley Pavilion, Drake Stadium, and the Los Angeles Tennis Center for recreational sports.
Student Services

UCLA students enjoy an extremely broad range of benefits and support services which enrich their college careers and help them attain their academic and career goals.

Academic Counseling

Many sources of academic counseling are available. Faculty advisers and counselors in each college and school help students with major selection, program planning, academic difficulties, degree requirements, and petitions for exceptions to these requirements.

Advisers in each major department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see "Academic Resources and Assistance" in Chapter 2 of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

Placement and Career Planning Center

The Placement and Career Planning Center (PCPC) offers career guidance and placement services to all UCLA students. Services are located in the PCPC Building (825-2981) and in two satellite locations: 1349 GSM (specializing in management, 825-3325) and 5289 Boelter Hall (specializing in engineering and the physical sciences, 825-4606).

Career Development — A staff of career counselors is available to assist you in career exploration and the job search. Information on planning further education and alternative careers can be found in the Career Resources Library. In addition to bringing graduate school representatives to campus, the Campus Interview Program brings employer representatives to discuss career opportunities with seniors and graduate students, and career-related summer employment with continuing students. The direct referral service posts a large number of currently available jobs in a variety of organizations. A professional file service is provided for those seeking positions in the field of education.

Student Employment — A job listing and referral system helps students and their spouses find part-time, temporary, or vacation employment. Career-related opportunities include internships and cooperative education possibilities.

Student Health Service

The Student Health Service (SHS) is designed to offer the health care and information you may need as a UCLA student. Services are provided on an appointment or walk-in basis at little or no cost to all registered students on presentation of Registration and UCLA Student I.D. Cards. You are encouraged to select a clinician who will provide ongoing health care. Additional information on all phases of SHS is available in the UCLA Student Health Service and UCLA Student Medical Insurance Plan booklets produced by SHS, or by calling SHS Information at 825-4073.

Location and Hours — General and emergency care is available in A2-130 Center for the Health Sciences. Office hours weekdays are 8 a.m. to 5 p.m., except Tuesday, when service begins at 9 a.m. Emergency care is also available between Gates 10 and 11 in Pauley Pavilion (825-5704) from 1:30 to 6 p.m. weekdays. For emergency care when these facilities are closed, you may obtain treatment at the UCLA Medical Center Emergency Room on a fee-for-service basis.

Primary Care Clinic provides outpatient diagnoses and treatment for most health care needs of both men and women. Care is provided by board certified physicians and nurse practitioners. The clinic also provides counseling for general health concerns. Call 825-2463 to schedule an appointment.

Specialty Clinics provide specialized care when you are referred by the Primary Care Clinic. Services include dermatology, orthopedics, surgery, gynecology, internal medicine, allergy, chest, ENT (ear, nose, and throat), ophthalmology, urology, and neurology. Routine physicals, health clearances, immunizations, and travel shots are available for a moderate fee. Call 825-0861.

Women's Health Service provides care for routine women's health needs and treatment of gynecological problems. Family planning (birth control) services are available, as are counseling, and referrals for pregnancy. Counseling for sexual problems and relationship concerns is also provided. Call 825-0854.

Men's Health Clinic treats male genital and urinary problems, sexual and nonsexual in nature. The clinic also provides sexual counseling for UCLA's male students. Call 825-0861.

Dental Clinic services are available by appointment without need of a referral. While the primary function of this clinic is to treat dental emergencies, a limited number of general dentistry and dental hygiene services are available. Fees are charged for all services. Call 825-5858.

Outreach Programs, such as the Peer Health Counselor and Student Health Advocate Programs, provide peer care and educational counseling for health concerns. The programs allow students to be involved in the planning and delivery of all aspects of health care. Call 825-4730.

Supplemental Medical Insurance is recommended for all fully enrolled students because certain major expenses, including hospitalization, surgery, and emergency room costs, are not covered by the regular SHS program. The University requires, as a condition of registration, that international students attending UCLA on nonimmigrant visas have adequate medical insurance, and it reserves the right to make the same requirement of all students.

A low-cost student Medical Insurance Plan (MIP) developed by the Student Health Insurance Committee (SHIC) is available for purchase each quarter. You can enroll yourself in MIP by paying the additional medical insurance fee assessed on the UCLA Fee Statement portion of your quarterly Registration Form. There is no other enrollment form to complete; this is the only method available for enrolling yourself in MIP. For more information regarding enrolling dependents in MIP and/or purchasing additional SuperCap coverage, call the SHS Insurance Office at 825-1856.

Student Psychological Services

Student Psychological Services offers short-term personal counsel and psychotherapy at two locations. The Mid-Campus Office is located in 4223 Math Sciences (825-0768, 825-4207); the South Campus Office is in A3-062 CHS (825-7985).

Psychologists, clinical social workers, and psychiatrists are available at both locations, offering assistance with situational stresses and emotional problems from the most mild to the most severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.
The service is confidential and free to regularly enrolled students. Students are seen individually or may choose from a number of groups offered each quarter. Appointments are made on weekdays between 8 a.m. and 5 p.m. Emergency counseling is also available.

**Helpline**

Helpline (825-HELP) provides information, referrals, crisis intervention, and a friendly ear when you don't know where else to turn. Hours are weekdays 5 p.m. to midnight, Saturday and Sunday 8 p.m. to midnight. For more information, contact Clive D. Kennedy, Student Psychological Services, 4223 Math Sciences (825-4207).

**Office of the Dean of Students**

The Office of the Dean of Students, located in 1206 Murphy Hall (825-3871), exists to help you, either directly or by referral, with whatever needs you might have. Direct services include general counseling; sending emergency messages to students; and assisting in understanding University policies and procedures, including grievance procedures regarding student records, discrimination, student debts, and sexual harassment.

In addition, the office publishes “Official Notices” in the Daily Bruin at various times during the year. Such notices are important, and all students are held responsible for the information in them.

The Office of the Dean of Students also plays a role in administering campus discipline and applying the standards of citizenship which you are expected to follow at UCLA. Those standards involve complying with the policies and regulations governing this campus and being aware that infractions of those policies or regulations can result in disciplinary action. See “Student Conduct: Violation of University Policies” in the Appendix for more information.

**Ombudsman**

The Ombudsman is responsible for listening and responding to grievances from any member of the campus community (i.e., students, faculty, administrators, staff), for investigating those grievances where resolution has not been to the satisfaction of the concerned individual or where there are no established guidelines for resolution, and for resolving where possible, through mediation, those grievances (including sexual harassment). The office, located in 274 Kinsey Hall (825-7627), is independent in operation, and all matters are handled confidentially. Hours are weekdays 8 a.m. to 5 p.m.

**Student Legal Services**

If you are a currently registered and enrolled student with a legal problem, you can get assistance free of charge from attorneys or law students under direct supervision of attorneys. They will help you solve legal problems, including those related to landlord/tenant relations, domestic relations, accident and injury problems, criminal matters, and contract and debt problems. Assistance is available on a walk-in basis from 9 a.m. to noon weekdays in 70 Dodd Hall (825-9894).

**Central Ticket Office**

Tickets are available at two locations on the UCLA campus: the ticket office on the ground floor of the West Center (825-2101) and the trailer at 650 Westwood Plaza (825-2953). Tickets for all UCLA events are sold at both locations. In addition, each location provides special ticket services as follows:

The West Center location offers student discount tickets to campus athletic events and local motion picture theaters. You may also purchase tickets to off-campus events through Ticketmaster and Ticketron, as well as student discount tickets for RTD buses and tokens for the Santa Monica bus system.

The service is confidential and free to regularly enrolled students. Students are seen individually or may choose from a number of groups offered each quarter. Appointments are made on weekdays between 8 a.m. and 5 p.m. Emergency counseling is also available.

The 650 Westwood Plaza location offers student discount tickets for on-campus cultural events, subsidized by the Student Committee for the Arts (Registration and UCLA Student I.D. Cards must be shown). There is a limit of two tickets per person. Watch the Daily Bruin ads for ticket sale dates.

**Services for International Students**

The Office of International Students and Scholars (OISS) works closely with the International Student Center to provide services and programs specifically for UCLA’s 5,200 international students. Together they provide a comprehensive orientation program for these students which helps them pursue their academic goals, and a series of programs which allow them to share their viewpoints with American students and the community.

The OISS staff, located in 105 Men’s Gym (825-1681), includes professional and peer counselors specially prepared to assist with questions about immigration, employment, government regulations, financial aid, cultural adjustment, and personal matters. Visa assistance is given to faculty, researchers, and postdoctoral scholars.

The International Student Center, 1023 Hilgard Avenue (206-4587), focuses on student-community relations and helps with language, housing, and other problems in addition to sponsoring cultural, educational, and social programs.

**Services for Students with Disabilities**

The Office for Students with Disabilities, A255 Murphy Hall (825-1501 or TDD 206-6083), provides services to students with permanent and temporary disabilities, including registration/priority enrollment assistance, special parking, priority enrollment, academic and test-taking assistance, support group, and adaptive equipment. The office can also assist with arrangements for training and access to the Computer Program for the Disabled.

The Computer Program for the Disabled helps provide access to campus computer facilities for disabled UCLA students, faculty, and staff. Specially adapted computer workstations and training are available to those with low vision, blindness, and physical and learning disabilities. For further information, call 825-6227.
Veterans' and Social Security Services

Registrar's Student Information, 1134 Murphy Hall, provides information for veterans and eligible dependents about V.A. educational benefits, tutorial assistance, the work-study program, and emergency loans; issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet the income restrictions in Education Code Section 10652; and certifies student status for recipients of Social Security benefits.

Women's Resource Center

The Women's Resource Center, located in 2 Dodd Hall (825-3945), offers services to all UCLA students, with special focus on women's needs. The center presents workshops and support groups on many topics, including child care, self-defense, assertiveness training, rape prevention and education, career development, single parenting, returning to school, and personal relationships. It also offers referrals for medical, legal, career planning, personal counseling, and other services both on and off campus. A library includes specialized publications on women's issues. Internships are offered in areas such as creative writing, editing, legislative research, publicity, and program development.

The Women's Resource Center, committed to improving the status of women on campus, works with other campus agencies to help women reach their full potential.

Child Care Services

The Child Care Center provides full- and part-time care for children aged two months to five years. Fees range from $199 to $440 per month depending on the age of the child and amount of time enrolled in the program. The center is located in the northwest corner of campus between Veteran Avenue, Sunset Boulevard, and Bellagio Drive, with the entrance on Bellagio Drive (825-5086).

The Outreach Program helps parents make off-campus child care arrangements. The Outreach Coordinator meets parents each Monday from noon to 1 p.m. in 2 Dodd Hall. For more information, call 825-8474.

The UCLA Parent Toddler Group is a cooperative nursery school open to children two to three and one-half years of age. Co-oping at the school is available for those parents who wish to participate. Morning or full-day programs are offered. The school is located in the UCLA Family Student Housing complex four miles south of campus at 3327 South Sepulveda Boulevard. For more information, call 398-8739.

The University Parents Nursery School is a multicultural cooperative school for three- to five-year-old children of UCLA students, faculty, and staff. Experienced teachers, assisted by co-oping parents, provide a gradual transition from the home to the school environment. Tuition per four-week period ranges from $55.80 to $208, depending on the program selected. Hours are weekdays 9 a.m. to noon and/or noon to 4 p.m., with some extended care available until 5:30 p.m. The nursery school is located in the UCLA Family Student Housing Community Center, 3327 South Sepulveda Boulevard (397-2735).

Safety and Security

Emergency: Campus Police — If you need to call the Campus Police Department, just dial two digits — 35 — from any campus phone. For nonemergency information, contact them at 601 Westwood Plaza (825-1491).

Escort Service — The Department of Community Safety provides free escort service every day of the year from dusk to 1 a.m. Uniformed escorts — specially trained UCLA students — are available to walk students, faculty, and staff members between campus buildings and local living areas or Westwood Village. To obtain an escort, call 825-1493 about 20 minutes before you need one.

Evening Van Service — The free service provides a safe and convenient mode of transportation around campus at night. Five vans operate Sunday through Thursday from 5 p.m. to midnight (6 p.m. to midnight in Spring Quarter) and serve many campus areas, including the residence halls, sororities, libraries, and living areas west of campus. For further information, call 825-1493.

UCLA Rape Prevention and Education Services are cosponsored by the Women's Resource Center and the Department of Community Safety. Services include workshops, self-defense classes, intake counseling, and referrals to offer women practical safety suggestions, increase physical and psychological preparedness, and heighten awareness of the complex issues of rape and sexual assault. For more information, call 206-8240 or 825-7661.

CPR — Free three-hour day or evening cardiopulmonary resuscitation classes (composed of a two-hour lecture and slide presentation and an hour of hands-on practice on Resusci-Annie torsos) are offered to UCLA students, staff, faculty, and visitors. For more information and scheduling, call 206-8886.

UCLA Alumni Association

For more than 50 years, in addition to supporting UCLA's commitment to excellence in education, research, and community service, the UCLA Alumni Association has provided its members with the opportunity for intellectual, cultural, and social enrichment. With more than 50,000 members, it ranks among the six largest dues-paying alumni groups in the country. Additionally, students, graduates, parents, faculty, staff, and University Extension students may join one of approximately 130 regional clubs, professional and school organizations, and support and honorary groups. Alumni participate in the many general interest programs as well.

The Alumni Association supports student events such as the Chancellor's Freshman and Graduate Receptions and Mardi Gras and, through its Advisory and Scholarship Program, awards merit scholarships to freshmen and continuing students each year. Its Student Alumni Association sponsors UCLA's Homecoming festivities and Spring Sing and holds "Dinners for Twelve Strangers," which bring together students, alumni, and faculty. Parents' Day and Bruin Survival Kits are also part of this program. The Alumni Travel Program enables alumni to participate in educational and cultural travel and to support UCLA athletic teams at major away games. The Governmental Relations Program promotes constructive relations between the University and government officials.

Benefits of Alumni Association membership include library privileges as well as discounts on UCLA Fine Arts Productions, athletic events, group medical insurance, and travel programs. Involvement opportunities for students exist through the Student Alumni Association. Graduating seniors who join receive special discounts on cap and gown rental, diploma lamination, graduation announcements, and an Extension class of their choice. The Alumni Association is located in the West Center, 325 Westwood Plaza (825-3901)
Undergraduate Admission

Preparing for University Work

A carefully planned program of high school courses best prepares you for University work. It can give you a definite edge in your undergraduate studies and a head start in your selected field. Most important, if you master certain basic skills in high school, you increase the probability of your success at the University.

As a prospective UCLA freshman, you should give priority to completing the high school courses required for admission — the academic pattern of courses outlined later in this chapter. In addition, you should give careful thought to the general field of study, if not the specific major, you want to pursue. If you can make this decision early, you can take additional high school courses related to your field.

You should understand that the academic requirements for admission are minimum entrance standards. Completing the required high school courses with satisfactory grades will not automatically determine whether you will be selected for admission to UCLA, as students are chosen from a large number of highly competitive applicants. Most of these applicants will have exceeded the minimum requirements; thus selection is based on your demonstrated overall preparation. Those applicants with the strongest preparation are offered admission.

Many elements are considered in the selection process, but the primary ones are (1) academic preparation — quality, level, and content of coursework, (2) performance in courses completed, and (3) scores received on the standardized college tests (Scholastic Aptitude Test or American College Test and achievement tests).

You should take as many honors and advanced placement courses as possible and should try to exceed the minimum academic subject requirements in all subjects, particularly mathematics, laboratory sciences, and foreign languages. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of academic courses. Overall performance must be well above average.

You must begin preparation for college at least by the ninth grade in order to allow you to progress through more than just the minimum required courses. If possible, you should begin academic coursework in mathematics and foreign language in the seventh and/or eighth grades, as this allows you to complete five or six years of college preparatory work. With the strength of solid preparation, students applying to UCLA will be in a competitive position for admission.

Applying for Admission

The first step in applying for admission is to obtain an Undergraduate Application Packet containing all necessary forms and instructions from your California high school or community college counselor or from any University of California Undergraduate Admissions Office. One application is used to apply to all UC campuses. You may apply to one UC campus for the initial $35 application fee; for each additional campus you select, you must pay an extra $20 fee per campus. Checks or money orders should be made payable to The Regents of the University of California. These fees are not refundable.

Complete the application, taking care to list the college or school you wish to attend at UCLA and your desired major. Send the completed application, along with the nonrefundable application fee, to University of California, P.O. Box 23460, Oakland, CA 94623-0460.

If you are in high school when you apply (freshman applicant), do not send your sixth and/or seventh semester high school transcripts. A complete and final transcript, including a statement of graduation or proficiency, will be required at a later date. You must submit official results of the Scholastic Aptitude Test (SAT) or American College Test (ACT) and three achievement tests; request that test results be sent directly to UCLA when you take each test. You should take these tests by the December test date, as they are part of the review process for admission.

If you have attended or are attending another college when you apply (transfer applicant), request that transcripts of all your high school and college work be sent to UCLA. It is your responsibility to arrange for transcripts to be sent and to assure that they arrive promptly; hand-carried transcripts are not acceptable for final evaluation. Transcripts and other documents cannot be returned or forwarded to other institutions.

When to Apply

<table>
<thead>
<tr>
<th>The filing periods for applications are as follows:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Winter Quarter 1989:</td>
</tr>
<tr>
<td>Closed to new applicants</td>
</tr>
<tr>
<td>Spring Quarter 1989:</td>
</tr>
<tr>
<td>File October 1-31, 1988 (junior-level transfers only)</td>
</tr>
<tr>
<td>Fall Quarter 1989:</td>
</tr>
<tr>
<td>File November 1-30, 1988 (Freshmen and transfers)</td>
</tr>
</tbody>
</table>

(Applications for admission to Fall Quarter 1988 would have had to be filed during November 1987.)

Some departments, majors, colleges, or schools at UCLA may close to new applicants as enrollment targets are met. You should inquire just prior to the filing period to determine if your area of interest is open.

Notification of Admission

You will be mailed a notice, which you should keep, acknowledging receipt of your application. Later, you will receive a letter explaining your admission status. The length of time before admission notification varies depending on how complete your application is and how quickly your records are received. In general, most Fall Quarter applicants are notified by March 15.
If you are accepted for admission, you will be asked to sign and return a Statement of Intent to Register and a Statement of Legal Residence. A nonrefundable $100 deposit, also required at this time, will be applied to your University registration fee if you register in the quarter to which you are admitted.

Entrance Requirements

All campuses of the University of California have the same minimum undergraduate admission requirements. The requirements are based on two principles: (1) the best indicator of success at the University is a record of high grades in previous schoolwork and (2) the completion of certain academic courses in high school prepares you to begin University work and choose a general field of study.

Fulfilling the minimum admission requirements, however, does not necessarily assure admission to the campus of your first choice. Some UC campuses with enrollment limits, including UCLA, cannot admit all qualified undergraduate applicants. Many departmental programs of study attract more qualified applicants than can be accommodated each year.

The selection of applicants is based on demonstrated high scholarship in preparatory work, which often goes well beyond the minimum eligibility requirements. UCLA offers admission to those students with the best overall academic preparation.

As a state institution responsible to the legislature and the people of California, the University maintains a student affirmative action program to seek out and admit students from underrepresented minority groups. Though these applicants must still meet the UC eligibility requirements and demonstrate the ability to contend with the competition they will face at the University, their applications are screened in light of their historically and often economically deprived circumstances. UCLA is fully committed to student affirmative action and, for the foreseeable future, will take this element into account as one of many factors used to select students.

Note, too, that admission requirements vary for California residents and nonresidents. Since the University of California is partially state-funded, admission requirements are necessarily somewhat more restrictive for out-of-state applicants. The term “resident” as used here should not be confused with the definition of legal residence for tuition purposes as defined in the Appendix.

Admission as a Freshman

You are considered a freshman applicant if you have not enrolled in a regular session of any college-level institution since graduation from high school (except for summer session immediately following high school graduation). To qualify for admission as a freshman, you must meet three major requirements: the Subject Requirement, the Scholarship Requirement, and the Examination Requirement. These are the minimum requirements for admission to the University; meeting them does not automatically assure admission to UCLA.

Subject Requirement

Outlined below are the high school academic courses required for admission to the University of California. Each course must be completed with at least a grade of C. The requirement consists of 15 year-long courses, of which seven must be taken during your last two years in high school. These are the minimum courses required for admission; you are encouraged to exceed these requirements whenever possible.

(1) History — One year of U.S. history, or one-half year of U.S. history and one-half year of civics or American government.

(2) English — Four years of university preparatory courses in English composition and/or literature, with no more than one year accepted from the ninth grade.

(3) Mathematics — Three years of university preparatory courses (elementary algebra, geometry, and advanced algebra).

(4) Laboratory Science — A one-year course in one laboratory science, taken in the tenth, eleventh, or twelfth grade.

(5) Foreign Language — Two years of one foreign language with a written literature.

(6) College Preparatory Electives — Four units, in addition to those required above, to be selected from at least two of the following subject areas: history, English, advanced mathematics, laboratory science, foreign language, social sciences, and visual and performing arts. In general, elective courses should involve considerable reading and should develop your analytical and reasoning ability and skill with written and oral exposition.

Scholarship Requirement

Eligibility for admission to UCLA is based on a combination of your grade-point average (GPA) in the academic subject requirements and your American College Test (ACT) or Scholastic Aptitude Test (SAT) scores. For detailed scholarship requirements, see the Undergraduate Application Packet or contact Undergraduate Admissions and Relations with Schools (UARS).

Examination Requirement

All freshman applicants must submit scores from the following tests:

(1) One Aptitude Test:
   (a) The American College Test (ACT), composite score OR
   (b) The Scholastic Aptitude Test (SAT), total score.

(2) Three College Board Achievement Tests (ACH) which must include:
   (a) English composition AND
   (b) Mathematics, level 1 or 2, AND
   (c) Either English literature, foreign language, science, or social science.

For detailed information on admission requirements for freshman students, see the Undergraduate Admission Packet or contact UARS.

Admission as a Transfer Student

A transfer applicant has been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) You may not disregard your college record and apply for admission as a freshman. Priority is given to junior-level applicants. If you wish to transfer to UCLA, you should follow these general guidelines:

(1) See your college counselor, who can help you identify the courses you should take to prepare for your intended major, and make certain the courses you are currently taking are transferable.

(2) Take as many English and mathematics courses as possible. UCLA’s academic program is rigorous and requires a strong background in both critical and quantitative skills. English and mathematics are the most important subjects you can take.
(3) Begin to satisfy general education requirements and fulfill prerequisites for your intended major. Because a sound liberal arts education encompasses more than an in-depth knowledge of one field, most colleges and schools at UCLA require that students take coursework in areas outside their major. Before transferring to UCLA, you can take courses to satisfy these general education requirements as well as fulfill some of the required "prerequisite" courses for your major.

For more detailed information on admission requirements for transfer students, see the Undergraduate Application Packet or contact UARS.

**Intercampus Transfers**

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the Undergraduate Application Packet and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see "When to Apply" at the beginning of this chapter). If you attended another UC campus and wish to be considered for admission to UCLA, you must have been in good standing when you left that campus.

**Senior-Level Applicants**

Students attaining senior standing are not generally admitted by the University.

**Second Bachelor's Degree Applicants**

By policy, second BAs are not generally granted by the University.

**Transfer Credit and Credit by Examination**

The University gives unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by the Office of Undergraduate Admissions and Relations with Schools (OARS). All courses which meet the criteria are used in determining your eligibility for admission.

College credit for examinations given by national testing services is generally not allowed, except for the Advanced Placement examinations given by the College Board. Contact UARS for more information.

**Applicants from Other Countries**

To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certificate of completion which would enable them to be admitted to a university in the home country.

Your application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted as early as possible after the filing period opens (see "When to Apply" at the beginning of this chapter). This will allow time for the necessary correspondence and, if you are admitted, to obtain your passport visa.

Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. To demonstrate that command, you are required to pass the UCLA English as a Second Language Placement Examination (ESLPE). If you do not pass the ESLPE, you are required to enroll in one or more ESL courses. In addition, you are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing your ability. Make arrangements for this test by writing to the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Have your test results sent directly to the UCLA Office of Undergraduate Admissions and Relations with Schools.

All new and reentering international students must obtain clearance in person at the Student Health Service by completing and returning a Health Evaluation form, by verifying adequate medical insurance cover-age, and by establishing absence of active tuberculosis. In addition, all international students must obtain an annual medical insurance clearance each fall through the SHS Insurance Office. For information, call (213) 825-4073.

**Readmission**

Undergraduate students are required to apply for readmission only if they were absent from the University for more than one quarter. Thus, if you complete a quarter and then withdraw, cancel, or fail to register for the next quarter, registration materials will be available for you for the term immediately following.

If you are absent for two or more consecutive quarters, you must file an application for readmission with the Registrar. During the 1988-89 academic year, all such students returning in the same standing (undergraduate) must file applications for readmission as follows:

<table>
<thead>
<tr>
<th>Filing Deadlines</th>
</tr>
</thead>
<tbody>
<tr>
<td>August 15 for Fall Quarter 1988</td>
</tr>
<tr>
<td>November 25 for Winter Quarter 1989</td>
</tr>
<tr>
<td>February 25 for Spring Quarter 1989</td>
</tr>
</tbody>
</table>

Applications are available from the Registrar's Office, 1111 Murphy Hall. Your completed application must be accompanied by a $35 application fee (nonrefundable) and transcripts of records from any other institutions (including University Extension) you attended during your absence. Within enrollment limitations, readmission is generally approved if you were in good academic standing (2.0 grade-point average) when you left the University, if coursework completed elsewhere in the interim is satisfactory, and if applications for readmission are filed on time. Contact the Registrar's Office at (213) 825-1091 for further information on readmission.
Registration and Enrollment

Information:
Registrar’s Office
1111 Murphy Hall
(213) 825-1091

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly Schedule of Classes, available for purchase at the Students’ Store several weeks before the beginning of each quarter. To obtain a copy by mail, write to ASUCLA Students’ Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, Attn: Mail Out. Include a check or money order for $2 payable to ASUCLA.

Registration consists of paying fees and enrolling in classes. The Registration Form, issued by the Registrar, is used for paying fees and for requesting enrollment in classes. You must complete both processes by the established deadlines to be officially registered and enrolled for the quarter.

Advance payment is required of all eligible students. Payments may be mailed, deposited in the Main Cashier’s Drop Slot, or made in person at 1125 Murphy Hall during the published payment period. Payments submitted after the published fee deadline will be assessed an additional $50 late payment fee. Students on financial aid may be eligible for a waiver of the $50 fee if funds are delayed by the University.

Enrollment in Classes

The quarterly Schedule of Classes contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the Schedule and with the aid of academic counseling from your school or college advisers, you can assemble a program of courses (see “Choosing Your Major” and “Planning a Program” later in this chapter).

You should plan two or three alternate programs in case your first choice of courses is not available. You may not choose two courses in the same final examination group and should not select classes that conflict in meeting times. If conflicts are unavoidable, consult with the instructor of each course at the first class meeting.

Enrolling in classes, like paying fees, is accomplished most effectively and most easily by mail. Because enrollment by mail is processed according to a postmarked date, you will increase your chances of getting the classes you want if you send your Study List Request to the Registrar’s Office on the first mailing date. Consult the Schedule of Classes for firm dates and for all details on enrollment procedures.

You may enroll in classes in person on the days published by the Registrar in the Schedule of Classes and on the specific day and time printed on your Tentative Study List. Hours are 8:30 a.m. to 5 p.m.

Study List Changes

Tentative Study Lists showing enrollment results are mailed to each student prior to the enrollment in person period. During the enrollment in person period, you may make program changes (add/drop courses, switch sections, or change grading options) by keeping the appointment to enroll which is printed on your Tentative Study List. Once instruction begins, and through Friday of the second week of classes, you may make as many program changes as you wish, without appointment and without fee, at the enrollment terminals in the Ackerman Union second-floor lounge.

Viewing Terminal — If you want to take an up-to-date look at your Study List or obtain an extra copy of it, you may do so before instruction begins or during the first 10 days of classes at the viewing terminal on the east balcony of Ackerman Union or at 1111 Murphy Hall. On each visit to the terminal, you will receive a copy of your Study List showing enrolled courses and waiting list courses, including your position on the waiting list. You may also use the viewing terminal to drop courses or change the grading basis of courses, but in order to add courses or switch sections you must use a regular enrollment terminal.

On Friday of the second week of instruction the Study List of enrolled courses becomes “official” and a computerized Official Study List is mailed to each registered student. (If you do not receive yours on time, obtain a copy in the Enrollment Office, 1111 Murphy Hall.) You are responsible for all courses and the grading basis as listed on the Official Study List, and you cannot receive credit for courses not listed. Unapproved withdrawal from or neglect of a course entered on the Study List will result in a failing grade.

Changes to your Official Study List require an Enrollment Petition from your college or school. Each petition costs $3, but you may make any number of changes on the same form. If you plan to add a course, you must bring a Permission to Enroll form from the instructor or ask the instructor to sign the petition. If you add a special studies (199) course, you must also bring an approved copy of the Petition for Enrollment in Special Studies 199 Course. The deadline to drop classes is the end of the fourth week of instruction (see Calendar). Note: When retroactive approval is given, in exceptional cases, to drop a course or to change the grading basis, the course and action will appear on the official transcript.

Change of College or Major

Changing your college or major requires the approval of the college or department you want to attend. Applications are made by petition, which is available without charge from the college or school office. You may not change majors after the opening of the last quarter of your senior year.
Undergraduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of $1,502 per quarter (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each quarter, all undergraduates must pay the following fixed fees. Fees for Fall Quarter 1988 are current as of publication date but are subject to change without notice by The Regents.

<table>
<thead>
<tr>
<th>Quarterly Expenses, Fall 1988</th>

</tr>
<tr>
<td>Wooden Recreation Center fee</td>
</tr>
<tr>
<td>Total for California residents</td>
</tr>
<tr>
<td>Nonresident tuition fee</td>
</tr>
<tr>
<td>Total for nonresidents</td>
</tr>
</tbody>
</table>

The registration fee covers certain student expenses for counseling service, all laboratory and course fees, athletic and gymnasium facilities and equipment, lockers, registration, graduation, and care and treatment on campus by the Student Health Service. This fee is charged whether or not you make use of these services.

Other Fees

Miscellaneous fees charged to UCLA undergraduates include a $50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes). A $60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). Minimal charges of $5 or less are assessed for most petitions and other special requests. A complete list of fees may be found in the Schedule of Classes.

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction may receive partial refunds of fees. For the refund schedule and more information, see "Withdrawal" in Chapter 4 of this catalog or refer to the Schedule of Classes.

Reduced Fee Programs

UCLA recognizes the need for undergraduate part-time study in special circumstances. If you have ongoing family or employment responsibilities or health problems which preclude full-time study, you may qualify for part-time enrollment.

If you have approval from your college or school to enroll in 10 units or less, you may qualify for a fee reduction. Nonresident students pay only half the nonresident tuition fee; residents pay half the education fee. You must file the Request for Fee Reduction form with your college or school by Friday of the second week of instruction. Fee assessment is based on total units enrolled as of Friday of the third week of instruction.

Living Expenses

Printed below are the estimated yearly budgets for undergraduate California residents. Nonresidents must add the $4,506 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session quarters of the 1988-89 academic year and do not include Summer Sessions. The budgets are designed to serve as a guide only.

<table>
<thead>

*If you are assigned a room in a residential suite, add $600.
**Includes $100 for extra meals during breaks.

For more information on housing, see Chapter 1 or contact the UCLA Community Housing Office, 270 De Neve Drive (825-4491).
Financial Support

Information:
Financial Aid Office
A129J Murphy Hall
(213) 206-0432

It is not required that you come from a low-income family in order to qualify for financial aid. You must, however, demonstrate “financial need,” which is defined as the difference between the cost of attending UCLA and the amount that you and your family should be able to contribute. The University expects that students and their families will bear as much of the necessary cost of a student’s education as their circumstances will permit.

The Financial Aid Office publishes a Financial Aid Handbook which provides more complete information than this catalog can give. You can get a copy free of charge from your high school counselor or from the Financial Aid Office, A129J Murphy Hall, University of California, Los Angeles, CA 90024-1435.

Applying for Financial Aid

The deadline for filing all undergraduate financial aid applications for academic year 1989-90 is March 2, 1989 (applications for 1988-89 would have had to be filed by March 1988). Because of the limits being placed on financial aid funding, meeting deadlines is more crucial than ever. Applications received after the deadline will be considered only if funds are still available. The Daily Bruin and other campus media publish information on deadline dates.

Prospective students must first apply for admission to UCLA by filing the Undergraduate Application Packet during the filing period (see “Undergraduate Admission” at the beginning of this chapter). On the application, check the boxes requesting financial aid and scholarship application materials.

Continuing students may obtain UCLA Scholarship and Financial Aid Application Packets in December of each year at the Financial Aid Office. Continuing students from foreign countries may pick up a Financial Aid Application for International Students at the same office. No financial aid can be awarded to international students in their first year of attendance at UCLA.

Student Aid Application for California (SAAC)

One of the key assumptions of financial aid is that parents, to the extent that they can contribute, have primary responsibility for financing the cost of a student’s education. To permit an evaluation of need, all students who apply for need-based aid must provide financial information on the Student Aid Application for California (SAAC). If you are financially independent, your own financial circumstances are analyzed rather than those of your parents (see the Financial Aid Handbook for the definition of financial independence).

The SAAC is used to apply for Pell Grants, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. It is available from California high schools and colleges and from the UCLA Financial Aid Office, and should be filed in early February with the College Scholarship Service, P.O. Box 24820, Oakland, CA 94623-1820. Be sure to indicate that a report is to be sent to UCLA.

Kinds of Financial Aid

There are four basic kinds of aid: scholarships, grants, loans, and work-study employment. Since most students are eligible for several of these, the Financial Aid Office usually offers a combination “package” consisting of some money that is a gift (scholarship or grant) and some that will have to be paid back or worked for. If you indicate a preference for work or loan, we will attempt to honor it.

Unless otherwise stated, you must demonstrate financial need to qualify for aid, and you must be making normal academic progress as defined by your college or school and department.

Scholarships

Scholarships are gifts that do not have to be repaid. The Undergraduate Scholarship Program at UCLA rewards academic excellence and promise and provides assistance in meeting the expenses of an undergraduate education. Scholarships are expected to create opportunities for further academic growth and development.

Financial need is a prerequisite only for University and name (endowed) scholarships other than those listed below. Each year approximately $300,000 is awarded from the many different scholarship funds. Awards range from $100 to $2,000 and are not renewable. You must reapply each year for continued consideration.

Regents Scholarships

One of the highest honors that may be conferred on an undergraduate student is the awarding of a Regents Scholarship. Unlike other University scholarships, these are awarded for four years to students entering from high school, and for two years to juniors. A UCLA faculty committee selects Regents Scholars on the basis of their exceptional academic achievement and promise. Financial need is not a criterion for this award; scholars receive a yearly honorarium of $500 if they have no financial need. Scholars who establish financial need by filing the SAAC receive a yearly stipend to cover the amount of their need. In addition to the monetary awards, Regents Scholars receive special privileges.

National Merit Scholarships

UCLA sponsors a number of four-year scholarships for entering freshmen who are finalists in the National Merit Scholarship competition. Finalists who are admitted to UCLA must select UCLA as their institution of choice and must meet UCLA’s scholarship criteria in order to receive a UCLA Merit Scholarship. Awards range from $500 to $2,000.

UCLA Alumni Association Scholarships

Alumni Scholarships are available to California high school graduates who will be UCLA freshmen in the Fall Quarter. No financial need is involved, but you must show academic promise. Alumni Scholarships are merit-based and competitively awarded; amounts range from $1,000 to $10,000. The Ralph Bunche Scholarship, also awarded by the UCLA Alumni Association and named in honor of the Nobel Peace Prize laureate and UCLA alumnus, is awarded to students who meet the University’s Student Affirmative Action definition.

Chancellor’s Scholarships

The Chancellor has established these honorary scholarships to recognize superior achievement among UCLA’s entering freshmen. A $300 honorarium is awarded to a limited number of semi-finalists in the Regents Scholarship competition.

ROTC Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide tuition, a book allowance, fees, and a monetary allowance of $100 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, 825-7384; Air Force, 825-1742; Navy, 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Completed applications should be received prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Three- and two-year scholarship applications may be obtained from the appropriate UCLA department and should be submitted prior to February 1.
Grads, transferring, or withdrawing from UCLA.

The University will place a hold on your academic records and registration materials. Call 825-9864 for an interview appointment before rights and responsibilities. If you fail to participate in an exit interview, the University will withhold if your loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action.

For more information, contact the financial aid counselor either in the Financial Aid Office or in the School of Nursing.

American Educational Loans

You may borrow up to $75 for immediate emergency needs; this amount is repayable within five weeks. To qualify, you must be a registered UCLA student with a satisfactory loan repayment record. Applications are available from the Financial Aid Office, A227 Murphy Hall.

Guaranteed Student Loans (GSL)

Federal and California Guaranteed Student Loans are long-term budget-based loans made by banks, savings, and loan associations, and credit unions. They are available to U.S. citizens, permanent residents, or refugees who are enrolled in at least a half-time program at UCLA. You should check with various lending institutions to determine their particular loan policies, but the Financial Aid Office must process applications before you submit them to a lending institution. Applications are available from the Financial Aid Office, A230 Murphy Hall. You must pass a needs test in order to qualify for the loan.

Repayment of the GSL begins six to nine months after graduation or withdrawal and continues for a maximum of 10 years. If you receive a federal or state interest subsidy, the loan is interest-free while you are in school. A financial aid offer almost always includes a long-term, low-interest loan. The loans come from revolving funds; most repayments are immediately reloaned to current students.

State University Grants

These grants provide eligible students with financial assistance from state funds. Awards range from $100 to $5,800. All students may apply.

Supplemental Educational Opportunity Grants

These awards are federally funded and are granted only to undergraduates with financial need. Awards range from $100 to $4,000.

Loans

Loans allow you to postpone paying some of the costs of your education until you have completed school. A financial aid offer almost always includes a long-term, low-interest loan. The loans come from revolving funds; most repayments are immediately reloaned to current students.

It is essential that borrowers realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, you should assess your total educational debt and your ability to repay following graduation. If you are a first-time borrower, schedule an appointment with a financial aid counselor. The University will make every effort to assist you during the repayment of your obligation, but University services, including registration and the release of official transcripts, will be withheld if your loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action.

All loan recipients must come to the Student Loan Services Office (A227 Murphy Hall) for a loan exit interview before leaving UCLA for any reason. This interview will help you understand your loan agreement and your rights and responsibilities. If you fail to participate in an exit interview, the University will place a hold on your academic records and registration materials. Call 825-9864 for an interview appointment before graduating, transferring, or withdrawing from UCLA.

Grants

Grants are gifts that do not have to be repaid and are based solely on need. Whenever guidelines and funds permit, your financial aid package will include a grant.

Pell Grants

Pell Grants are federal aid programs intended to be the “floor” of financial aid packages. As such, they may be combined with other forms of aid in order to meet the full costs of education. Amounts for 1988-89 range from $200 to $2,300, depending on federal funding, and are determined by your own and your family’s financial resources. U.S. citizens, permanent residents, and refugees are eligible to apply by filing the SAAC. The University requires all eligible undergraduates to apply for a Pell Grant.

Cal Grants A and B

California residents who have not completed more than nine quarters or six semesters of college work prior to September 1988 are eligible to apply for a California Student Aid Commission Cal Grant award. The SAAC is the official application for these programs. “Cal Grant A” awards are applied toward education and registration fees. They are based on need and academic achievement and are renewable each year. “Cal Grant B” awards are intended to assist low-income families and are renewable annually.

State University Grants

These grants provide eligible students with financial assistance from state funds. Awards range from $100 to $5,800. All students may apply.

Supplemental Educational Opportunity Grants

These awards are federally funded and are granted only to undergraduates with financial need. Awards range from $100 to $4,000.

Loans

Loans allow you to postpone paying some of the costs of your education until you have completed school. A financial aid offer almost always includes a long-term, low-interest loan. The loans come from revolving funds; most repayments are immediately reloaned to current students.

It is essential that borrowers realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, you should assess your total educational debt and your ability to repay following graduation. If you are a first-time borrower, schedule an appointment with a financial aid counselor. The University will make every effort to assist you during the repayment of your obligation, but University services, including registration and the release of official transcripts, will be withheld if your loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action.

All loan recipients must come to the Student Loan Services Office (A227 Murphy Hall) for a loan exit interview before leaving UCLA for any reason. This interview will help you understand your loan agreement and your rights and responsibilities. If you fail to participate in an exit interview, the University will place a hold on your academic records and registration materials. Call 825-9864 for an interview appointment before graduating, transferring, or withdrawing from UCLA.

Perkins Loans

These low-interest loans (formerly known as National Direct Student Loans) are available to all students who are U.S. citizens, permanent residents, or refugees and who are carrying at least half the full-time academic workload. Repayment begins nine months after you terminate at least half-time study. Minimum repayment is $90 per quarter, including interest, for a maximum of 10 years.

Nursing Loans

To be eligible for a nursing loan, you must be a U.S. citizen, permanent resident, or refugee and a student in the School of Nursing. Up to $2,500 is available per academic year. For more information, contact the financial aid counselor either in the Financial Aid Office or in the School of Nursing.

Emergency Educational Loans

You need not be receiving financial aid to apply for emergency loans. You may borrow up to $75 for immediate emergency needs; this amount is repayable within five weeks. To qualify, you must be a registered UCLA student with a satisfactory loan repayment record. Applications are available from the Student Loan Services Office, A227 Murphy Hall.

Guaranteed Student Loans (GSL)

Federal and California Guaranteed Student Loans are long-term budget-based loans made by banks, savings, and loan associations, and credit unions. They are available to U.S. citizens, permanent residents, or refugees who are enrolled in at least a half-time program at UCLA. You should check with various lending institutions to determine their particular loan policies, but the Financial Aid Office must process applications before you submit them to a lending institution. Applications are available from the Financial Aid Office, A230 Murphy Hall. You must pass a needs test in order to qualify for the loan.

Repayment of the GSL begins six to nine months after graduation or withdrawal and continues for a maximum of 10 years. If you receive a federal or state interest subsidy, the loan is interest-free while you are a student and for six to nine months thereafter. Undergraduates may borrow from $2,625 to $4,000 per academic year up to a total of $17,250. GSL processing takes approximately 10 to 12 weeks.

Work-Study Programs

Work-study is a need-based program designed to expand part-time job opportunities for students. The program allows you to work a maximum of 20 hours per week while attending school and 40 hours per week during breaks. An academic year's work-study award may range from $1,000 to $6,000, but your gross earnings may not exceed the amount awarded to you. There are two basic work-study programs available.

Under College Work-Study, the federal government pays a portion of your hourly wage; your employer contributes the balance. Whenever possible, work is related to your educational objectives. Employment may be on or off campus. Hourly pay rates comply with minimum wage laws and vary with the nature of your work, experience, and capabilities. To be eligible you must be a U.S. citizen, permanent resident, or refugee.

The President's Work-Study program is administered in the same manner as College Work-Study except that The Regents of the University and your employer provide funding, and you are limited to on-campus jobs. All students are eligible to apply.

Getting Your Bachelor's Degree

Colleges and Schools
The UCLA campus consists of 13 colleges and schools, most of which are subdivided into departments. The courses of instruction are administered within the departments.

Colleges at UCLA provide a broad, nonprofessionally oriented curriculum leading to both undergraduate and graduate degrees. UCLA has two colleges: the College of Letters and Science and the College of Fine Arts.

Schools provide training for specific professions and are authorized to grant professional degrees (e.g., Master of Business Administration, Doctor of Education, Master of Public Health). UCLA has 11 professional schools, two of which offer undergraduate degree programs: the School of Engineering and Applied Science and the School of Nursing.

Each of the colleges and schools has its own degree requirements and is headed by a dean or provost who has final academic authority. Thus, when you attend UCLA, you are enrolled not only at the University of California, Los Angeles campus, but in a specific college or school within the University. Your academic life is governed by the college or school which houses your major.

As the chart on the previous pages shows, UCLA offers Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in a broad range of disciplines. There are no undergraduate minors at UCLA, but there are a number of special programs which you may complete as an adjunct to your major. The bachelor's degree (you may earn only one) is the culmination of your undergraduate work; master's and doctoral degrees are earned in graduate study.

Knowing Your Responsibilities
UCLA provides its students with a wide variety of academic assistance and personal support resources, but it is up to you to realize when you need help and to seek it out. It is also your responsibility to keep informed and to comply with the rules, regulations, and policies affecting your academic standing and your life as a UCLA student. Consult this catalog, the college and school announcements, and the Schedule of Classes for the information you need; watch for official announcements in the Daily Bruin and on campus bulletin boards. Meeting academic deadlines, monitoring your Study List for accuracy, completing prerequisites, and fulfilling degree requirements are all part of your academic duties as a student. Living up to your responsibilities will add immeasurably to the value and enjoyment of your education (also see “Student Conduct” in the Appendix of this catalog).

Choosing Your Major
One of the most important decisions you will have to make in college is your choice of major — the field of study which represents your principal academic interest and which will possibly contribute toward your career goals. Some students select their major at the time they fill out the University’s application for admission. A far greater number, however, are undecided about their major.

If you are in the College of Letters and Science, you do not need to declare your major in your freshman year. The college allows you to attend with an undeclared major until the end of your sophomore year. In fact, if you are not certain of your specific academic goals, it is often wise to wait and explore the diversity of subject areas offered at UCLA. Enroll in introductory courses (usually numbered below 100) in a variety of disciplines to learn the scope and vocabulary of the major. It is not unusual for students to become enthusiastic about disciplines previously unfamiliar to them. With careful planning, such courses may also apply toward fulfilling college requirements for whatever major you choose. To narrow your choices further, carefully consider general college requirements, the description of courses offered in the major, and the departmental requirements for completing the program of study. Look at the books required for each course. Sit in on a few classes and talk with professors during their office hours. Discuss your interests and plans with a departmental counselor or faculty adviser, a college counselor, or with advisers in the Placement and Career Planning Center.

A few words of warning: certain majors, especially in fine arts, engineering, and the sciences, require early declaration. Some have enrollment quotas and will allow application by new majors only during a specified quarter. Check with the departmental adviser for the majors that interest you.

In addition, each UCLA undergraduate is limited to between 208 and 216 quarter units, depending on the college or school, to complete the academic program and fulfill all degree requirements. So, if you wait to declare a major, don’t wait too long. In any case, you must declare a major by the beginning of your junior year (90 quarter units). When you are ready to declare your major, or if you wish to change from one major to another, pick up a Petition for Change of Major at the college or school office. There is no fee for this petition.

Planning a Program
Every new student should obtain academic counseling before enrolling in classes at UCLA (counseling is required in the School of Engineering and Applied Science). Working with a tentative major in mind, you need to plan courses to satisfy all of the degree requirements while staying within the minimum and maximum number of units required for graduation. The Orientation program for new students will take you through a step-by-step plan for an effective program (see “Orientation” later in this chapter). If you cannot attend Orientation, see your college or school adviser or, if you have selected a major, make an appointment with your major department adviser before enrolling in classes.

Undergraduate Degree Requirements
In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college coursework for the bachelor’s degree at UCLA. A maximum of 208 units is allowed in the College of Fine Arts and the School of Nursing; in the College of Letters and Science, a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 185 and 201 (depending on the program); 213 maximum units are allowed.

As you work toward a bachelor’s degree, be aware that in addition to unit requirements there are three types of requirements which you must satisfy. The first type consists of Universitywide requirements which all undergraduates must satisfy; the rest vary depending on your major and the college or school which offers it.
(1) University requirements — Subject A or English as a Second Language (ESL), and American History and Institutions;

(2) College or school requirements (e.g., credit and scholarship, English composition, general education requirements);

(3) Department requirements (courses in preparation for the major and in satisfaction of the major).

University requirements are described below. Turn to “Requirements for the Bachelor’s Degree” in the appropriate school or college chapter for a description of the college or school requirements, and then to the individual departments within each college and school for the department requirements.

University Requirements
The University of California has established two requirements which all undergraduates must satisfy in order to graduate: Subject A or English as a Second Language (ESL), and American History and Institutions. It is your responsibility to see that these requirements are fulfilled.

Subject A
Because proficiency in English composition is so important to successful performance in many courses, Subject A is the only requirement for graduation that you must satisfy before entering UCLA or during your first quarter in residence. You may meet this requirement by:

(1) Scoring 3, 4, or 5 on one of the College Entrance Examination Board (CEEB) Advanced Placement Tests in English OR

(2) Scoring 600 or better on the CEEB Achievement Test in English Composition OR

(3) Presenting transfer credit for an acceptable college-level course in English composition (passed with a grade of C or better) at another institution OR

(4) Passing the Subject A Examination. All freshmen from California high schools should have taken the Universitywide Subject A Examination in May 1988; others will take an examination at UCLA prior to their first quarter.

If you do not meet the requirement in one of the ways described above, during your first quarter in residence at UCLA you must enroll in either English A or B (determined by performance on the Subject A Examination). Each course must be taken for a letter grade and passed with a grade of C or better. No credit toward a degree is granted for either course whether taken at UCLA or another UC campus. If you receive a final grade of C— or less, you must repeat the course during your next quarter in residence. You will not receive credit for any English course (except English A or B) taken prior to satisfying the Subject A requirement.

English as a Second Language (ESL) Students: If your native language is not English, you are required to take the UCLA English as a Second Language Placement Examination (ESLPE) in addition to the Subject A Examination. Results of both examinations will be reviewed to determine which track (Subject A or ESL) better meets your needs. If you are placed in the Subject A track, you may satisfy the Subject A requirement by following the guidelines listed above. If you are placed in the ESL track, you may satisfy the requirement by completing the required courses in the English (ESL) 33 series — one or more of courses 33A, 33B, 33C — and 35, depending on your ESLPE results. Each course must be passed with a grade of C or better (C— or a Passed grade is not acceptable). You must begin taking the required courses during your first quarter in residence at UCLA and then proceed in the English (ESL) 33 series followed by course 35. All units apply toward graduation but cannot be applied toward general education requirements.

Transfer students whose native language is not English are also required to take the ESLPE (but not the Subject A Examination) even if they have received transfer credit for an acceptable college-level course in English composition at another institution. Those without transfer credit must take both the ESLPE and the Subject A Examination.

American History and Institutions
This requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the U.S. under the federal and state constitutions. Candidates for a bachelor’s degree must satisfy the requirement in American History and Institutions by one of the following methods:

(1) Completing a year’s course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better OR

(2) Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:

- Afro-American Studies M104A, M104B, M158A, M158B, M158C
- Chicano Studies M159A, M159B
- Economics 183
- Geography 136
- Political Science 1, 70, 114A, 114B, 143, 144, 145, 172A, 172B, 183A

- Equivalent courses completed in University Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement OR

(3) Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state OR

(4) Scoring 500 or better on the College Entrance Examination Board (CEEB) Achievement Test in American History OR

(5) Scoring 3, 4, or 5 on the CEEB Advanced Placement Test in American History.

Candidates for a teaching credential, but not for a degree, must take one of the following courses: History 7A, 7B, 151A, 151B, Political Science 172A, or 172B.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the U.S.

For more information on this requirement, contact the undergraduate History Department counselor in 6248 Bunche Hall (825-3720).

Course Credit and Minimum Scholarship
The grades A through C and Passed denote satisfactory progress toward the bachelor’s degree. The grades D — through D — yield unit credit but may not satisfy certain scholarship requirements. Even when they do, they must be offset by grades of C+ or better in other courses.

In order to qualify for a bachelor’s degree in any college or school at UCLA, you must earn at least a C (2.0) average in all courses taken at any University of California campus. If you fail to maintain this level, you may be placed on academic probation or may become subject to dismissal.

Academic Probation
You will be placed on probation if your overall grade-point average falls between 1.5 and 1.99 or if you do not earn at least a 2.0 GPA in any one quarter. While you are on probation, you may not take any course on a Passed/Not Passed basis, and you may have to limit your Study List to 12 units.
Your probation will end at the close of a regular quarter if you have attained a C (2.0) average for the term and a cumulative C average in all University work. If you do not end probation within two quarters, you will become subject to dismissal.

Academic Dismissal

You will be subject to dismissal from the University under any of the following conditions:

1. If your grade-point average in any one quarter is less than 1.5 OR
2. If you do not earn at least a C (2.0) average in any quarter when you are on probation OR
3. If you do not end probation within two quarters.

If you are subject to dismissal, your transcript will carry that notation. You should make an appointment with your college or school counselor. Depending on your situation, you will be given conditions for continuation, or you will be dismissed from the University.

Your college or school counselor can explain the conditions for readmission if you wish to return to the University after dismissal (see "Readmission" earlier in this chapter).

Progress Toward the Bachelor's Degree

UCLA is a full-time educational institution, and students are expected to complete their undergraduate degree requirements and graduate within four years.

The normal program for undergraduate students is three to four courses (12 to 16 units) per quarter. All colleges and schools enforce minimum enrollment or minimum progress regulations. You may be subject to disqualification for failing to meet minimum progress requirements. Check with your college or school counselor. Please read the degree requirements section under each college and school for specific Study List limits. See Chapter 4 for information on concurrent enrollment, credit by examination and credit from other institutions, and special studies (199) course limitations.
Alternative Academics

UCLA has a broad range of options that can lend an added dimension to your undergraduate academic program. You will find other services and programs available to both graduate students and undergraduates in Chapter 1 of this catalog.

Council on Educational Development

The Council on Educational Development (CED) offers special courses and programs that encourage educational diversity and enrichment for undergraduates. CED works closely with colleges, schools, and research centers on campus to support new academic programs and courses. Many of these courses cover socially important issues which, because they are new, are not addressed in existing academic departments. Many involve nontraditional educational concepts, interdisciplinary topics, and subjects on the leading edge of faculty interest.

Each quarter several courses focus on medicine, law, and human values. Students analyze ethical, legal, and scientific values in medical and mental health care issues, such as genetic screening, human experimentation, patients’ rights, and medical technology.

For information about CED courses, consult the Schedule of Classes. Your college, school, or department can advise you about degree credit available to UCLA students. EXPO also maintains a library of current materials and information on any of the programs or services listed below, contact the EXPO Center, A213 Ackerman Union (825-0831).

UCLA Internship Program — More than 3,000 UCLA students have learned about the inner workings of government and business while serving in the internship program, the largest of its kind in any university in the nation. Bruins serve full-time internships for one or more quarters on the staffs of elected officials, public interest groups, government agencies, and corporate offices in Sacramento, Washington, and overseas. Others are participating in business, banking, and the arts in New York and San Francisco. Stipends for students in the program can be arranged.

International Opportunity Counseling Service — The EXPO Center counsels students on study, travel, and work opportunities outside the U.S., offering information on some 1,800 overseas study programs open to UCLA students. EXPO also maintains a library of current materials related to study and travel opportunities abroad. International Student Identity Cards and Youth Hostel memberships are issued at the center.

Field Studies Development

Field Studies Development, a division of the Office of Instructional Development, helps students, faculty, and academic departments to develop meaningful learning experiences outside the classroom. These may be in the form of internships, field studies or research, community service, or cooperative education programs. The office is located in 70 Powell Library (825-7867).

Departmental Field Studies Development — Field study programs for academic credit have been developed in anthropology, business and administration, Chicano studies, communication studies, education, English, folklore, geography, history, kinesiology, political science, psychology, sociology, urban planning, and women’s studies. Departmental coordinators work with you to develop field projects and find placements and academic sponsors.

Independent Field Studies — You may design internships and field study opportunities to meet your specific academic, personal, and career goals. A field study coordinator assists you with your plans and helps identify faculty sponsors for your field study. Most departments offer independent field study opportunities.

Community Service — Learning Programs — These programs enable students to do community service while studying topics related to economics, history, sociology, education, or urban planning.

Developmental Disabilities Immersion Program (DDIP) — Co-sponsored by Field Studies Development and the Departments of Psychology and Psychiatry, DDIP offers an intensive living, studying, and working experience in developmental disabilities. The program is a full two-quarter sequence offered in Winter and Spring Quarters. For more information, call 825-1627.

Freshman and Sophomore Programs

Honors Collegium

The Honors Collegium is an innovative educational alternative designed primarily for UCLA’s promising freshmen and sophomores. For a complete description of this program, see Chapter 5 on the College of Letters and Science.

Professional Schools Seminar Program

This program offers seminars that explore topics bridging various academic disciplines and professional practice. Students seeking to define their own academic and career goals will gain valuable exposure to (1) research frontiers in the professions, (2) policy and ethical issues, and (3) historical and sociological perspectives on professional practice.

Seminars are offered in the Fall, Winter, and Spring Quarters (consult the Schedule of Classes). Enrollment is limited to allow students close contact with professional school faculty members; lower division students are preferred. General education credit is granted for most seminars. For further information, contact the Program Office in 80 Powell Library (825-5467).

Individual Classes

Most departments offer the individual study (199) course for seniors — or juniors with at least a B average — who want to pursue a particular research interest. Consult your department or the departmental listings in this catalog for further information.

Individual Majors

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.
The requirements for an individual major vary with each college and school at UCLA, although maintaining a high scholastic average is usually mandatory. Please refer to the appropriate college or school chapter.

Reserve Officer Training Corps (ROTC)
The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows you to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing your college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs carry a monthly stipend in the junior and senior years, and additional financial aid is available to qualified students. Individual programs are described in detail in Chapter 5 on the College of Letters and Science.

Student Research Program (SRP)
The Student Research Program is designed to provide UCLA undergraduates with opportunities to work with senior faculty on research projects. You select a faculty sponsor and the two of you agree on a contract detailing the nature of your work and the specific research tasks to be completed. Your involvement can be either voluntary or, in some instances, for academic credit through an individual special studies 199 course. In addition, you will be eligible to have "Student Research Program" and a designation of the research department appear on your transcript.

All undergraduates in good academic standing are eligible to participate. Research opportunities exist in most academic departments within the College of Letters and Science and in several of the professional schools. For further information, contact the SRP Office in A316 Murphy Hall (825-6443).

Advising and Academic Assistance
UCLA's academic standards are high, and many students find they need some form of academic assistance. Help is available in several forms: staff and student counselors, faculty advisers, services, and special programs. You need only to seek it out. This section will introduce you to the many kinds of assistance available to undergraduates. Refer to the section on "Student Services" in Chapter 1 for other helpful programs.

College and School Advisers
Each college, school, and academic department at UCLA has a staff of academic counselors and advisers who are knowledgeable and experienced. They are eager to help you plan your academic program, monitor your progress toward the bachelor's degree, provide information about college and major requirements and prerequisites, and assist you with academic problems, improving study habits, and program planning. Counseling offices for each undergraduate college and school are listed below.

College of Letters and Science — A316 Murphy Hall, 825-1965 or 825-3382 (Division of Honors — A311 Murphy Hall, 825-1553 or 825-3786)
College of Fine Arts — A239 Murphy Hall, 825-9705
School of Engineering and Applied Science — 6426 Boelter Hall, 825-2626
School of Nursing — 2-200 Factor Building, 825-7181

Counseling Assistants
Counseling assistants (CAs) are UCLA graduate students who have been specially trained to help new students with the transition into University life. Employed in the College of Letters and Science, they represent a number of academic disciplines in several colleges and schools on campus. CAs help new students during Orientation with program planning and course selection, and are available throughout the year for follow-up visits and to provide help with program planning, skill building, and personal support. You may make an appointment with a CA in A316 Murphy Hall (206-6681).

ASK Peer Counselors
The ASK program provides an extension to the counseling services available to College of Letters and Science undergraduates. ASK counselors are students trained to provide you with academic information, advisement, and referral in a convenient walk-up setting. You can find ASK counselors at these outdoor campus locations: Campbell Hall (southwest corner), Placement and Career Planning Center, Powell Library (southwest corner), and Royce/Powell Quad, weekdays 10 a.m. to 2 p.m.; inside the northwest entrance of Murphy Hall, weekdays 9 a.m. to 4 p.m. During registration and open enrollment periods every quarter, ASK counselors also are available from 8 a.m. to 5 p.m. daily in the computer room and Grand Ballroom in Ackerman Union.

Office of Preparatory Programs
The Office of Preparatory Programs, located in A316 Murphy Hall (206-1217), administers four important programs to help new students adjust and succeed academically at UCLA: Orientation, ARC Math/Sciencetutorials, ARC Composition Tutoring Lab and ESL Service Courses Tutorials, and Student Athletes Tutorial Services. Since most of the courses which new students take are offered by the College of Letters and Science, the Office of Preparatory Programs is a part of that academic unit; however, the programs are open to new students enrolled in any college or school on campus.

Orientation
Orientation at UCLA provides a comprehensive introduction to campus life. During the summer and before the beginning of the Winter and Spring Quarters, special programs offer new undergraduates extensive academic counseling and educational planning. During Orientation you work in small groups with peer counselors and professional academic advisers. You gain insight into necessary academic skills, learn how to plan and construct your academic program, and become familiar with the educational opportunities, student services, and facilities available at UCLA. Individual counseling sessions help you adjust to University life and fulfill the advising requirements of some colleges and schools. Sessions for parents are also offered.

During the summer, Orientation offers three-day, two-night dormitory live-in programs for freshmen and two-day, one-night programs for transfer students. Prior to Winter and Spring Quarters, one-day on-campus programs are offered. There is a fee for participation. For more information, contact the Orientation Office at 206-6685 or 825-9315.

ARC Math/Sciences Tutorials
The Academic Resources Center Math/Sciences Tutorials provide an organized by-appointment tutorial program for Biology 2, 5, 6, 7, and 8, Chemistry 2, 11A, and 11B, Economics 40, most math courses between Mathematics 1 and 32A, Physics 6A, 6B, 8A, and 10, Psychology 41, and Sociology 18. Trained tutors meet in small group sessions on a weekly basis, teaching methods to improve problem-solving skills and test-taking strategies. Requests for tutors must be made during the first three weeks of the quarter; early registration is strongly advised. You may submit requests between 10 a.m. and 2 p.m. Monday through Friday, beginning the first day of classes. For more information, call 206-6965 or 825-7305.
ARC Composition Tutoring Lab and ESL Service Courses Tutorials
The Academic Resources Center Composition Tutoring Lab, in cooperation with the UCLA Writing Programs, offers individual assistance to students enrolled in English A, B, and 3 and to students writing papers for other UCLA courses. The lab is staffed by trained undergraduate peer tutors who have shown outstanding ability in advanced composition courses and who can help students at any stage of the writing process—from generating and organizing ideas to polishing final drafts.

The ARC ESL Tutoring Lab assists nonnative-speaking students with English grammar, idioms, pronunciation, listening comprehension, and composition. Priority is given to students enrolled in English (ESL) 33A, 33B, and 33C, and other ESL courses. The tutors are all graduate students pursuing degrees in teaching English as a second language.

Both the Composition and ESL Labs are located in 339 Kinsey Hall and offer free individual tutoring by appointment. For tutoring appointments or further information, call 206-1491.

Student Athletes Tutorial Services
The Student Athletes Tutorial Services provide tutoring in the evening and on weekends for intercollegiate athletes whose practice and competition schedules prevent them from participating in the Academic Resources Center (ARC) tutorial services. Eligible student athletes can receive regular individual or small group assistance in a wide range of courses, provided they request tutoring within the first four weeks of the quarter. Trained tutors clarify course content, teach study strategies and, in consultation with course instructors, develop problem-solving exercises and practice examinations to build learning and performance skills.

The coordinator is located on the second floor of the Morgan Center. For tutoring appointments and further information, call 825-8699.

Academic Advancement Program (AAP)
Located in Campbell Hall, the Academic Advancement Program is dedicated to expanding educational opportunities for over 5,000 underrepresented minority and low-income students. Through the Counseling Unit, Tutorial Unit, and Summer Program, AAP provides both personal and academic support services to its students in order to enhance their scholastic achievement and promote their successful pursuit of the bachelor's degree.

Counseling Unit
Throughout the academic year AAP freshman, advanced standing, learning skills, and peer counselors meet with students to facilitate their personal, social, and academic adjustment to UCLA and to assist them in clarifying problems, concerns, and goals. Individual counseling is available by appointment and on a walk-in basis; group counseling sessions are also available.

Incorporated within AAP in 1984, the federally funded Program Leading to Undergraduate Success (PLUS) provides counseling services to low-income, minority, and underprepared freshmen whose parents have never earned a bachelor's degree.

The Peer Counseling Center, staffed by students who have made a successful academic transition to UCLA, provides a student perspective on courses, study materials, and educational goals. All peer counselors undergo thorough training in University policies and counseling techniques; they inform students about resources, services, clubs, and organizations on a one-to-one basis.

AAP also offers a series of workshops on time management, reading comprehension, examination preparation, note taking, professional and/ or graduate school entrance examination preparation, and other academic areas.

Tutorial Unit
The unit is staffed by approximately 200 upper division student tutors who provide academic support services in 15 major disciplines covering more than 450 different courses. Approximately 2,000 students receive tutoring every quarter on both an individual and group basis. Any AAP student is eligible to request tutoring.

Summer Program
The Summer Program is a six-week instructional program which offers students a firsthand introduction to UCLA through in-class instruction, tutorials, and learning skills workshops. You receive guidance on academic planning and are assured enrollment in Fall Quarter classes. You also have the option of residence hall living or commuting; cultural, social, and recreational activities, along with counseling assistance, are available.

The Summer Program for Freshmen (FSP) is designed to help entering freshmen meet UCLA's high academic standards by improving composition, mathematical, and general learning skills. Intensive English courses help students improve writing skills and meet the University's initial composition requirement. The program's math courses prepare students for subsequent university-level math courses, including calculus which is required for many majors at UCLA.

The Summer Program for Transfer Students (TSP) is designed to improve the composition and general learning skills of incoming transfer students and to acquaint them with key campus resources and counseling/career information. The program consists of a composition course and an upper division course which, if completed successfully, yield credit toward the bachelor's degree.

For more information regarding eligibility, application, and/or specific questions on services, contact the AAP Office in 1209 Campbell Hall (825-1481).

Learning Resource Centers (LRC)
The Learning Resource Centers, a division of the Office of Instructional Development, include the Instructional Media Laboratory, Instructional Media Library, and Language Laboratory. All of these resources provide access to course-related audiovisual materials which supplement and enrich classroom instruction. For general information, contact the LRC Office in 46 Powell Library (206-1248).

The Instructional Media Laboratory provides individual student access to course-related interactive and videotape programs. Students, assigned by faculty to study specific supplementary materials, may learn at their own pace and at times that suit their individual schedules. Some self-instructional programs designed to improve learning skills are available. The laboratory is located in 270 Powell Library (206-1211).

The Instructional Media Library is UCLA's central resource for the collection and maintenance of educational and instructional media. Materials from the collection are loaned to regularly scheduled UCLA classes and may be rented by organizations and individuals from the campus community. The library is authorized to monitor compliance with University guidelines and federal copyright law governing the use of video recordings. Reference books from educational and feature film distributors are available. The staff assists in researching media on any subject and obtaining materials from outside sources. Two screening rooms, located in 46 Powell Library, are available by appointment (825-0755).

The Language Laboratory is a full-service audio facility for teaching and learning languages. Students enrolled in foreign language classes are assigned by faculty to practice pronunciation, comprehension, and listening skills in the laboratory, 190 Powell Library (206-8855). Audiotape programs which accompany specific texts used in classes and listening, recording, and monitoring equipment are available.
Petitions

A petition is a piece of paper representing your need or desire to be excepted from any standard rule or regulation in the University. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whoever has authority over your particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between you, your college or school and, in some cases, the department chair, granting you an exception from the existing regulations.

Academic Excellence

Eligible students receive the following honors and awards in recognition of academic achievement.

Dean's Honors List

The Colleges of Letters and Science and Fine Arts, and the School of Engineering and Applied Science, all award Dean's Honors to deserving students each quarter. The School of Nursing awards Dean's Honors on an annual basis. These honors are based on the grade-point average attained within a specified number of units. Consult your college or school for further information.

Honors with the Bachelor's Degree

Your college or school awards graduation honors according to your overall GPA at the beginning of your last quarter of academic work or at graduation. To be eligible, you must have completed at least 90 University of California units for a letter grade.

The levels of honors are Summa cum laude, Magna cum laude, and Cum laude. Specific requirements vary for each level and are included in the appropriate college and school chapters.

Departmental Honors

In all campus units except the School of Engineering and Applied Science and the School of Nursing, departmental honors and highest honors are awarded at graduation on your major department's recommendation, based on successful completion of a departmental honors program. Consult your department for its requirements.

Departmental Scholar Program

Departments in all campus units except the School of Nursing may nominate exceptionally promising juniors and seniors as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Nominations are submitted to the college or school dean or provost for recommendation to the dean of the Graduate Division. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog).

Honor Societies

Alpha Lambda Delta and Phi Eta Sigma

Membership in these national freshman honor societies is based solely on academic achievement during your freshman year. To be eligible you must have a 3.5 GPA with 12 graded University of California units in the first quarter of your freshman year, or a cumulative 3.5 GPA at the end of the second and/or third quarters. Invitations are issued in Winter Quarter, and initiation is held during Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (825-3871).

Golden Key

Golden Key is a national interdisciplinary academic honors organization dedicated to excellence. Students qualify on the basis of objective academic criteria; no more than the top 15 percent of enrolled juniors and seniors may be eligible. The society recognizes and encourages scholastic achievement and excellence in all undergraduate fields of study, unites with collegiate faculties and administrators in developing and maintaining high standards of education, provides economic assistance to outstanding members by means of annual scholarships, and promotes scholastic achievement and altruistic conduct through voluntary service. Invitations are issued in Winter Quarter, and a reception is held in Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (825-3871).

Mortar Board

Mortar Board is a national honor society for college seniors which recognizes scholastic ability (a 3.0 GPA is required), outstanding and continual leadership, and dedicated service to the community. Membership applications are available from the Office of the Dean of Students, 1206 Murphy Hall (825-3871), during Winter Quarter.

Phi Beta Kappa

Phi Beta Kappa is a national honorary society in the humanities, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. (Students do not apply for Phi Beta Kappa membership.)

At UCLA only graduating seniors are elected to membership. The annual election is held in May, with the initiation in June. At present, the minimum GPA considered is 3.65 (for 140 or more UC units); the minimum number of UC units considered is 75 (students at the 75-unit level must have at least a 3.85 GPA). A reasonable distribution of courses in the humanities and sciences is also required. (A Passed grade is computed approximately as a B, depending on number of courses taken and graded units.) If you are elected, you will be notified by mail. For more information, contact the Phi Beta Kappa Office, Division of Honors, A311 Murphy Hall (825-0192).

Outstanding Senior Award

The Outstanding Senior Award offers recognition to graduating seniors who have demonstrated scholastic excellence, creativity in the department, and outstanding service to the University and community. Nominations are accepted from November through the end of January, and awards are presented at the annual Alumni Awards Ceremony in June. For more information, contact the UCLA Alumni Association in the West Center, 325 Westwood Plaza (825-3901).
Graduate Study

Victoria A. Fromkin
Dean of the Graduate Division,
Vice Chancellor — Graduate Programs
Nature of Graduate Education

The principal characteristic of graduate study is the pursuit of new knowledge through research. At UCLA graduate students benefit from—and contribute to—the resources of one of the outstanding research universities in the country. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, and excellent research centers, institutes, and laboratories in virtually every major discipline (see details in Chapter 1) all provide an extraordinary scope of opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classroom, the laboratories, the libraries, in specialized seminars, through independent research, and in teaching experiences. As a graduate student, your education is enriched by the several hundred postdoctoral and visiting scholars from other universities who engage in research and teaching at UCLA every year. This unique research environment promotes the quality of original work and study which is the hallmark of graduate education.

The first stage of graduate education leads to the degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration or Juris Doctor. The master's program is intended to develop your mastery of a field and prepare you for the practice of a profession.

The second stage leads to a doctoral degree (Ph.D., Ed.D., etc.) and is designed to prepare you for creative activity and original research, often in association with college or university teaching.

Administration

The Graduate Division

The UCLA Graduate Division is responsible for administering policy established by the Academic Senate’s Graduate Council for master’s, doctoral, and certain graduate professional degree programs. It oversees graduate recruitment and admissions, fellowships, teaching and research assistantships and other graduate student support, affirmative action, and the maintenance of high quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice chancellor—graduate programs.

The Graduate Council

The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University's philosophy of shared governance, it establishes policy for graduate education at UCLA, including degree requirements and standards for admission, and it approves graduate degree programs. A major responsibility of the Graduate Council is the periodic review and evaluation of all graduate programs. It also makes recommendations regarding fellowships and apprentice personnel.

The Graduate Adviser

After admission to a department, program, or school, each graduate student is assigned a graduate adviser who approves Official Study Lists and assists the student in program planning and completing degree requirements. The graduate adviser is available for counseling whenever needed, but departments usually require at least one student consultation each quarter. When the master's or doctoral committee is established, the faculty chair of that committee often assumes the adviser's role.

Graduate Students Association (GSA)

UCLA’s Graduate Students Association (GSA) shares an equal voice with the Undergraduate Students Association in the governance of the Associated Students. For more details on the GSA, see “Student Activities” in Chapter 1.
Graduate Admission

Admission Requirements

U.S. applicants to graduate standing must hold a bachelor's degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. Degrees granted on the basis, for example, of nonacademic prior learning, test scores, and other than organized supervised coursework in academic subjects are not considered comparable. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above average scholarship, from a non-U.S. university or university-level institution. If your examinations have been graded Excellent, Very Good, Good, and Pass, you must have at least a Very Good general rating to qualify for admission. Students who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, etc., or a four-year degree, diploma, or higher certificate from a technical, vocational, or postsecondary specialized school, should not apply for graduate admission. Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, etc., also do not qualify for graduate admission.

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places available in UCLA's schools, colleges, and departments. Applications are evaluated in terms of scholastic qualifications and formal preparation for the graduate field of study. Departments may have special requirements for admission, which are included under individual departmental listings in this catalog.

Applying for Admission

Graduate students at UCLA must submit the Application for Graduate Admission, Fellowships, and Financial Support to the Graduate Admissions Office. You may obtain this form, in person or by mail, from your prospective school or department.

Applications are generally accepted for Fall, Winter, and Spring Quarters, although some departments limit admission to Fall Quarter due to course sequencing. Such restrictions are stated in this catalog's departmental listings and in the application packet. Enrollment in Summer Sessions courses does not constitute admission to graduate standing.

Applications and supporting papers should be on file in the Graduate Admissions Office by the following dates (if the dates below fall on a weekend or holiday, the next working day applies):
- October 1, 1988, for Winter Quarter 1989
- December 31, 1988, for Spring Quarter 1989
- January 15, 1989, for Fall Quarter 1989

Applications postmarked after these dates will be considered only when enrollment and funding limitations permit.

Supporting papers and materials to be submitted, including official transcripts of record and a $35 nonrefundable application fee, are specified in the application packet. Unless the $35 fee was paid at another UC campus, applications received without the fee will not be processed. Submitted materials are not returnable.

Graduate Record Examination — If you are applying for admission to a department or school which requires Graduate Record Examination (GRE) scores, you should arrange to take the examination no later than February so your scores arrive on time. GRE scores should be sent directly to your prospective department and not to the Graduate Division.

<table>
<thead>
<tr>

</tr>
<tr>
<td>February 4, 1989</td>
</tr>
<tr>
<td>April 8, 1989</td>
</tr>
<tr>
<td>June 3, 1989 (general only)</td>
</tr>
</tbody>
</table>

GRE applications and information are available from offices of the Educational Testing Service, either at CN 6000, Princeton, NJ 08541-6000, or at 1947 Center Street, Berkeley, CA 94704. For information on GRE Fee Waivers, write to the Associate Program Director at the New Jersey address.

Letters of Recommendation — Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze your abilities and academic promise. In some cases, these letters may mean the difference between acceptance and rejection. Letters should be sent directly to the prospective department. Forms to be used are included in the application packet.

International Applicants

Applicants who have credentials from universities and colleges in foreign countries should submit applications at least two months before the dates listed above. International applicants should have an academic degree or professional title earned at a university and will be evaluated on the basis of grades (marks) and class or rank achieved. You should submit official transcripts of record, in duplicate, for all college and university work. Specific instructions are given in the application packet.

Proficiency in English

Test of English as a Foreign Language (TOEFL) — International students who hold a bachelor's or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from both the TOEFL and the UCLA English as a Second Language Placement Examination (ESLPE). All other applicants must take and pass the TOEFL, administered by the Educational Testing Service in some 95 foreign centers. Applications are available from the Educational Testing Service, CN 6000, Princeton, NJ 08541-6000.

UCLA English as a Second Language Placement Examination (ESLPE) — If your native language is not English, you are required to take the UCLA ESLPE (in addition to the TOEFL) before the term in

</table>

*The department admits only applicants whose objective is the Ph.D.*
which you are to register. This requirement must be met even if you have received transfer credit for an academic college-level course in English composition at another institution. Depending on your ESLPE results, you may have to complete one or more courses in the English (ESL) 33A through 33C series and 35, beginning in your first quarter in residence at UCLA. These courses must be passed with a grade of C or better. You should expect to spend a longer period of time at the University than would normally be necessary to complete a degree program if you are required to take any ESL courses. If you do not pass the ESLPE, your admission is deferred until you have acquired the necessary proficiency in English. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

Test of Spoken English — If you are an international student and wish an appointment as a teaching assistant, you should take the Test of Spoken English offered at the TOEFL Center in your home country.

No Degree Objective

UCLA has no special graduate, limited, or unclassified categories of admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. Teachers with a master’s degree who wish some refresher study, or international students on a year’s stay in the U.S., may wish to apply in this manner. Requirements for admission are the same as those for degree programs.

Duplication of Degrees

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see “Concurrent and Articulated Degree Programs” later in this chapter). If you are applying for a second academic degree at the same level or lower than the one you already hold, you are required to show compelling cause to the department. All degree requirements and University regulations apply just as they do for a first degree. Courses already applied to the earlier degree may not be applied to the second.

Summer Sessions Courses

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. If you wish to apply Summer Sessions courses to your subsequent graduate program, you should consult in advance with your departmental adviser. This is also true if you have been readmitted to graduate standing and you wish to resume graduate study in Summer Sessions. Information and applications are available from the Office of Summer Sessions, 100 Dodd Hall. Also refer to the sections on “Academic Residence” and “Transfer of Credit” later in this chapter.

Renewal of Application

An offer of admission is valid for a specific quarter only. If you were not admitted, or failed to register in the quarter for which you were first accepted, you should file a Renewal of Application form for admission to a later quarter. Forms are available from the departments and should be submitted to the Graduate Admissions Office, 1247 Murphy Hall. Filing dates are the same as those for new applications. Forms should be accompanied by official transcripts, in duplicate, of any graduate work completed since the former application and by a $35 application fee.

You may file only one Renewal of Application without the $35 fee. Acceptance for admission at any earlier date does not guarantee approval of the renewal. Since application records are kept no longer than two years, you may apply for admission after this period only by completing a new application and providing all necessary documents.

Readmission

Students who are granted a formal leave of absence (see “Leaving UCLA” in Chapter 4) do not have to apply for readmission if they resume their graduate work in accordance with the terms of their leaves. All other continuing graduate students who fail to register for any regular session, or who fail to complete a quarter through cancellation or withdrawal, must compete for readmission with new applicants.

If you have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence), you must file an Application for Readmission. Forms are available from the departments and should be submitted to the Graduate Admissions Office, 1247 Murphy Hall. The following materials must accompany the Application for Readmission:

(1) A check or money order for $35 (nonrefundable) made payable to The Regents of the University of California.

(2) The Graduate Petition for Change of Major, if appropriate. (If you are reapplying in a new major, request this form along with the Application for Readmission.) Your UCLA graduate transcript must also be submitted.

(3) Transcripts of all academic work and your UCLA graduate transcript.

Admission to the Schools of Dentistry, Law, and Medicine

Applicants for M.S. and Ph.D. programs in departments of the School of Medicine or Dentistry should apply for admission to the Graduate Division as described above. For admission to D.D.S., J.D., and M.D. degree programs in the Schools of Dentistry, Law, and Medicine, write to the respective schools for their announcement booklets and for information and application procedures.
Registration and Enrollment

Information:
Registrar’s Office
1111 Murphy Hall
(213) 825-1091

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly Schedule of Classes, available for purchase at the Students’ Store several weeks before the beginning of each quarter. To obtain a copy by mail, write to ASUCLA Students’ Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, Attn: Mail Out. Include a check or money order for $2 payable to ASUCLA.

Registration consists of paying fees and enrolling in classes. The Registration Form, issued by the Registrar, is used for paying fees and for requesting enrollment in classes. You must complete both processes by the established deadlines to be officially registered and enrolled for the quarter. Advance payment is required of all eligible students. Payments may be mailed, deposited in the Main Cashier’s Drop Slot, or made in person at 1125 Murphy Hall during the published payment period. Payments submitted after the published fee deadline will be assessed an additional $50 late payment fee. Students on financial aid may be eligible for a waiver of the $50 fee if funds are delayed by the University.

Advance payment of $50 is required of all eligible students. Payments may be mailed, deposited in the Main Cashier’s Drop Slot, or made in person at 1125 Murphy Hall during the published payment period. Payments submitted after the published fee deadline will be assessed an additional $50 late payment fee. Students on financial aid may be eligible for a waiver of the $50 fee if funds are delayed by the University.

Deadline Dates
(Tentative only; refer to Schedule of Classes for firm dates.)

To Register (Pay Fees) by Mail:
September 2 for Fall Quarter 1988
December 9 for Winter Quarter 1989
March 10 for Spring Quarter 1989

Fee Payment Deadlines:
September 9 for Fall Quarter 1988
December 16 for Winter Quarter 1989
March 17 for Spring Quarter 1989

Enrollment in Classes

Enrollment requests are processed from the completed Study List Request portion of the Registration Form. To be enrolled for credit, you must complete the request, obtain your adviser’s signature approval, and file it with your major department by Friday of the second week of classes. There is a $50 fee for late filing of the Study List (see your department for departmental procedures).

You are guaranteed enrollment in courses in your major department provided that department is coded correctly on your Study List Request. If you have recently changed majors and your Study List Request is incorrect, you need proof that the Graduate Division has approved the change. For guaranteed enrollment in restricted or possibly closed courses outside your major department, you must submit an approved Permission to Enroll form with the Study List Request.

Change of Major

Continuing graduate students may petition for a change of major after discussing plans with the new department. Forms for this purpose are available from the departments and should be filed with the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure, but you should consult with the adviser in the new program before filing an application.

Full-Time Graduate Program

Three graduate courses (or 12 units) per quarter are considered the normal enrollment for graduate students. A minimum of eight units is required for full-time standing for all students, including teaching assistants, research assistants, and fellowship awardees.

Teaching and research assistants are required to take at least two courses per quarter, or the equivalent of eight units, throughout their appointments. Those assistants who take a leave of absence or withdraw from the University, must request term of appointments. Course 375 for teaching assistants and independent studies at the 500 level may be included in reaching the eight-unit load.

Graduate students holding fellowships must be enrolled full-time students, both before and after advancement to candidacy. The two courses required per quarter may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Veterans Administration regulations is available from Registrar’s Student Information, 1134 Murphy Hall.

Continuous Registration

Graduate students are normally required to register in all three quarters of each academic year, including the quarter in which their degrees or certificates are to be awarded. If you are granted a formal leave of absence or are eligible to pay the filing fee for a degree (see next page), you are exempt from this requirement. You must be registered in order to continue as a matriculating student and from Fellowships and Graduate Student Support, 1228 Murphy Hall.
Registration in the Final Quarter for the Award of the Degree

(1) You must register in the final quarter in which the degree is to be conferred if you are (a) completing coursework, (b) using library or other University facilities, (c) taking up faculty time other than for a final reading of the thesis or dissertation or to administer the comprehensive or final examination, or (d) subject to the regulations of the In-Candidacy Fee Offset Grant Program and were not registered the quarter immediately preceding the quarter in which your dissertation is filed. If you were not continuously registered or on leave of absence and you are required to register to receive your degree, you must apply for readmission.

(2) If only the thesis or dissertation and/or comprehensive or final examination remain to be completed in your final quarter, you may be eligible to pay the filing fee instead of registering (see next column).

(3) If you were registered in the preceding quarter and have completed all degree requirements, including final examinations and filing your thesis/dissertation, during the interval between quarters and before the first day of instruction, you are not required to register (or pay the filing fee) to receive your degree at the end of the following quarter.

The Filing Fee

If you have completed all requirements for a degree except filing the thesis or dissertation and/or taking the master's comprehensive or doctoral final oral examination, you may be eligible to pay a filing fee of half the registration fee instead of registering and paying all required fees. Applications are available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. For eligibility conditions and further information on the filing fee and registration in the final quarter, please consult Standards and Procedures for Graduate Study at UCLA, available in 1225 Murphy Hall or in individual departments.

Health Evaluation

New students enrolling in the School of Dentistry, Education, Medicine, Nursing, or Social Welfare must complete and return to the Student Health Service the Health Evaluation form provided by their departments.

All new and reentering international students must obtain clearance in person at the Student Health Service by completing and returning a Health Evaluation form, by verifying adequate medical insurance coverage, and by establishing absence of active tuberculosis. In addition, all international students must obtain an annual medical insurance clearance each fall through the SHS Insurance Office. For information, call 825-4073.
Graduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to your academic program, personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of $1,502 per quarter (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each quarter, all graduate students (except Law and Medicine School students) must pay the following fixed fees. Students in the Schools of Law and Medicine should refer to their individual school announcements for explanation of fees per semester. Fees for Fall Quarter 1988 are current as of publication date but are subject to change without notice by The Regents.

Other Fees

Miscellaneous fees charged to UCLA graduate students include a $50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes); $25 for advancement to doctoral candidacy; and $5 or less for most petitions and other special requests. A $60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). A complete list of fees may be found in the Schedule of Classes.

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction or take an approved leave of absence by the end of the second week of classes may receive partial refunds of fees. For the refund schedule and more information, see "Withdrawal" in Chapter 4 of this catalog or refer to the Schedule of Classes.

Nonresident Tuition Fellowships

A limited number of nonresident tuition fellowships are awarded each year to graduate students with distinguished academic records. Details of eligibility are available from your department or Fellowships and Graduate Student Support, 1228 Murphy Hall.

Living Expenses

Printed below are the estimated yearly budgets for graduate California residents. Nonresidents must add the $4,506 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session quarters of the 1988-89 academic year and do not include Summer Sessions. (Budgets for the Schools of Medicine, Dentistry, and Nursing are higher, reflecting the expense of specialized books and supplies; figures are available from your health professions counselor.)

Financial Support

Information:
Fellowships and Graduate Student Support
1228 Murphy Hall
(213) 825-3521

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance. Awards are based on either academic merit or financial need, but the two types are not mutually exclusive. You are strongly urged to apply in all categories for which you may qualify.

Entering graduate students interested in University-administered awards should complete the Application for Graduate Admission, Fellowships, and Financial Support. Readmitted students should request the Graduate Application for Readmission form, and continuing graduate students should complete the Fellowship and Assistantship Application for Continuing Students. Completed applications must be returned by January 15. (Some departments have earlier deadlines; consult the application packet for details.)

UCLA Graduate Student Support, a booklet describing the full range of financial assistance available, is published annually and mailed to continuing students by Fellowships and Graduate Student Support. Contact your department for more detailed information.

Awards Based on Academic Merit

The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Assistantships

Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. Teaching assistantships provide experience in teaching undergraduates, with faculty supervision. (Teaching assistants, associates, and fellows are eligible to receive partial payment at the beginning of the quarter in the form of an interest-free advance loan check. Interested students should apply to their departments.) Research assistantships give students experience working on faculty-supervised research projects.

Fellowships and Grants

Most fellowship, traineeship, and grant awards are for one academic year (three quarters). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the tuition, for periods of one to three quarters, of selected graduate students who are not California residents.

In-Candidacy Fee Offset Grant Program

The In-Candidacy Fee Offset Grant Program pays the education fee for eligible doctoral students who have been advanced to candidacy. This program is described in detail in Standards and Procedures for Graduate Study at UCLA, available in 1225 Murphy Hall or in individual departments.

Graduate Affirmative Action Awards

These programs were established to increase the graduate enrollment and retention of groups of students who have traditionally been underrepresented in graduate education. These groups include American Indians, blacks/Afro-Americans, Chicano/Mexican Americans, Pilipino Americans, and Puerto Ricans. In addition, women are eligible in fields where they are underrepresented.

As indicated below, the Graduate Division offers one need-based financial aid program (GAP) and several merit-based fellowships to underrepresented students. Students may apply for both need- and merit-based assistance simultaneously. All applicants for merit-based awards must be U.S. citizens. For more information on these programs, contact the Graduate Affirmative Affairs Office, 1248 Murphy Hall (825-2780).

(1) Graduate Advancement Program (GAP) — Awards are made on the basis of need as demonstrated by standard University financial aid criteria. These awards differ from conventional financial aid allocations in that grants may be slightly larger and work-study awards do not require matching funds by employers.

(2) Patricia Roberts Harris Fellowship (formerly Graduate and Professional Opportunity Program) — This program is funded by the U.S. Department of Education. The number of fellowships awarded to participating colleges and universities each year depends on congressional funding. UCLA currently has fellows enrolled in the fields of urban planning, biology, psychology, public health, and physics.

(3) Graduate Opportunity Fellowship Program (GOFP) — Funded by the University of California Office of the President, this program provides fellowships to students from groups traditionally underrepresented in graduate programs and to women in fields such as engineering and the physical sciences.

(4) Dorothy Danforth-Compton Minority Fellowship Program — UCLA is one of 10 universities selected by the Danforth Foundation for this program, which is jointly sponsored by the UCLA Office of the Chancellor. Initiated in 1981-82, it remains the most prestigious four-year merit-based fellowship available to underrepresented students. A limited number of fellowships are awarded to black/Afro-American, Chicano/ Mexican American, American Indian, and Puerto Rican students committed to careers in college and university teaching. Students pursuing Ph.D. degrees in the humanities, social sciences, health sciences, and fine arts are eligible.

(5) Research Assistantship/Mentorship Program — Funded by the UC Office of the President, this program provides research assistantships for underrepresented students and is designed to counter attrition, thereby increasing the pool of qualified Ph.D. minority students by encouraging a close research relationship between students and faculty members.

Awards Based on Financial Need

Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and your financial resources. Financial aid applicants must file either the Student Aid Application for California (SAAC) or the GAPSFAS. The SAAC is preferred.

Financial aid awards include work-study and low-interest loans. Students are usually awarded a financial aid "package" which is a combination of these forms of assistance. Further information is available from the Financial Aid Office, A129J Murphy Hall.
UCLA offers instruction leading to a broad range of master's and doctoral degrees, both academic and professional. Graduate students earn master's or doctoral degrees through distinguished achievement in study and research. Achievement in study is evaluated principally by means of the qualifying and comprehensive examinations. Achievement in research is judged by the merits of the thesis or dissertation.

The Master's Degree

University Minimum Standards

The requirements described here are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses and/or examinations for their master's degree. You are advised to consult the appropriate school announcement or your graduate adviser.

Academic Residence

The minimum residence requirement consists of three academic quarters in graduate standing at the University of California, including at least two quarters at UCLA. Academic residency is established by successfully completing at least one graduate or upper division course (four units) during a quarter.

You may earn one quarter of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

</tbody>
</table>

* Individual departments and programs may set higher standards. Please refer to departmental listings under the appropriate college or school chapter or consult your graduate adviser for details.

** If the master's degree was earned at UCLA, one year of residence will have been satisfied.
Courses and Grades

The master's program at UCLA consists of at least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) completed in graduate standing, of which at least five must be graduate. To maintain satisfactory progress toward the master's degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward the master's degree.

Transfer of Credit

There are two general regulations governing transfer of credit. No courses completed before the award of the bachelor's degree may be applied toward a graduate degree unless you are a Departmental Scholar. Also, courses taken for any other degree may not be applied toward a master's degree at UCLA unless you are enrolled in a Graduate Council-approved concurrent degree program (see " Concurrent and Articulated Degree Programs" later in this chapter).

From Within the University — You may petition to have units and grade points for graduate work completed at other campuses of the University applied toward satisfaction of master's degree requirements at UCLA. Such courses may fulfill up to one half of both the total course and graduate course requirements, and one third of the academic residence requirement, but may not have been used to fulfill the requirements for another degree.

From Outside the University — With approval of the dean of the Graduate Division and your major department, courses completed with a grade of B or better in graduate standing at institutions outside the University of California may apply toward UCLA master's programs. However, courses taken for any degree awarded at another institution may not be applied toward a graduate degree at UCLA. A maximum of two courses (eight quarter units or five semester units) may be applied, but they cannot be used to reduce either the minimum graduate course requirement or the academic residence requirement.

From Summer Sessions — Regular session courses offered in UCLA Summer Sessions by regular faculty qualify for credit toward a higher degree with departmental approval. Courses offered by visiting faculty may apply, with a recommendation from the department chair. It is best to consult your graduate adviser about applying Summer Sessions courses to your graduate program.

From University Extension — University Extension courses (100 series) taken before July 1, 1969, may apply on approval of the department and dean of the Graduate Division. No more than two such courses (eight units) may be applied.

Extension courses taken after July 1, 1969, can be applied only if they are concurrent courses prefixed by XLC (offered for students in degree programs and open to Extension students by petition) in the 100, 200, or 400 series, completed with a grade of B or better. By petition to the dean of the Graduate Division and with departmental approval, a maximum of two such courses may be applied toward the nine-course minimum and the five-graduate-course requirements for the master's degree. The master's program, then, would include at least three courses in the 200 or 500 series for academic degrees, or three courses in the 200, 400, or 500 series for professional degrees.

If your master's program requires more than nine courses, concurrent Extension courses may be applied toward one half of the course requirements over the minimum of nine.

Grades earned in Extension courses or in courses taken outside the University of California are not included in computing your grade-point average nor may they be used to remove scholarship deficiencies. Correspondence courses are not applicable to graduate degrees.

Foreign Language Requirements

Foreign language requirements are determined by individual departments and programs. If your program has a language requirement, for maximum benefit you should fulfill it before you begin graduate study or as soon as possible thereafter. All foreign language requirements must be satisfied before advancement to candidacy.

Depending on your department's regulations, you may fulfill foreign language requirements either by passing the Educational Testing Service (ETS) Graduate School Tests in French, German, Russian, or Spanish or (in languages not offered by ETS) by passing examinations given by UCLA language departments. You may register for the ETS examination at the University Extension Cashier's Office, 10995 Le Conte Avenue. UCLA enrollment is not required. Consult University Extension for registration procedures.

Some departments allow students to fulfill language requirements either by passing departmental examinations or by completing coursework in a foreign language. Certain departments may require additional languages, special competence, or other special procedures. In some departments, English satisfies the foreign language requirement if it is not your native language.

For further details on foreign language requirements, refer to Standards and Procedures for Graduate Study at UCLA or see your graduate adviser.

Advancement to Candidacy

When you have completed approximately half the program for the master's degree (usually at least two quarters), you should formally apply for advancement to candidacy. Application forms are available from your department or the Graduate Division, Student and Academic Affairs Section (1225 Murphy Hall), and must be filed in your major department no later than the second week of the quarter in which you expect to receive your degree (by the end of the second week of the first Summer Session for a September degree).

You may not be advanced to candidacy until all departmental requirements for advancement, including foreign language examinations, have been satisfied. You then have one year from the date of advancement to complete all requirements for the degree, including your thesis or comprehensive examination. Candidacy expires at the end of one year and reinstatement during the quarter in which you plan to receive the degree is by petition only.

Plans of Study

UCLA offers master's degrees under two plans: Plan I, the Master's Thesis, and Plan II, the Master's Comprehensive Examination. Some departments offer both plans, and you must consult with your adviser to determine the plan for meeting your degree requirements. University minimum requirements are the same under either plan.

Master's Thesis (Plan I)

After advancement to candidacy, students under Plan I must submit a thesis reporting on the results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

A thesis committee, consisting of at least three faculty members who hold regular professorial appointments at the University, is nominated by the department and appointed by the dean of the Graduate Division for each student (consult Standards and Procedures for Graduate Study at UCLA for more details on committee members' eligibility requirements). The thesis committee, which must be appointed before you may be advanced to candidacy, approves the subject and plan of the thesis, provides the guidance necessary to complete it, then reads and approves the completed manuscript. Approval must be unanimous among committee members.
Once the thesis committee and other concerned faculty have approved the subject for the thesis, work may begin. You are responsible for preparing the thesis in the proper form and for observing filing deadlines. For guidance in the final preparation of the thesis, you may:

1. Consult the Theses and Dissertations Adviser, Office of the University Archivist, 141 Powell Library.
2. Read Regulations for Thesis and Dissertation Preparation, available in the Graduate Division, Student and Academic Affairs Section, or in the Archivist's Office.
3. Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each quarter (see the Calendar at the beginning of this catalog).

When all members of the committee have approved the thesis and you are ready to file it, you must initiate the final steps in the process by submitting the original signature (approval) page, title page, and any other required forms to the Graduate Division, Student and Academic Affairs Section, where completion of degree requirements will be verified. After final approval by the dean of the Graduate Division, you must file the thesis with the Theses and Dissertations Adviser approximately two weeks before the degree is to be awarded. Deadlines for this academic year are:

- December 5 for Fall Quarter 1988
- March 13 for Winter Quarter 1989
- June 5 for Spring Quarter 1989

Master's Comprehensive Examination (Plan II)

Following advancement to candidacy, students under Plan II must pass a comprehensive examination administered by a committee consisting of at least three faculty members appointed by the department. In some departments the comprehensive examination may serve as a screening examination for admission to doctoral programs. Information concerning this examination and its form (written, oral, or both) is available from your graduate adviser.

The Candidate in Philosophy Degree

In several departments, as approved by the Graduate Council, the intermediate degree of Candidate in Philosophy (C.Phil.) is awarded to qualified students on advancement to candidacy for the Ph.D. degree.

The C.Phil. is not a terminal degree but gives formal recognition to a definite state of progress toward the doctorate. Academic requirements are the same as for advancement to candidacy for the Ph.D. (see below). Four quarters in academic residence, three of them (usually the last three) in continuous residence at UCLA, are required. (Also refer to "Academic Residence" under doctoral programs below.)

The C.Phil. may not be conferred after or simultaneously with the Ph.D. For departments offering the C.Phil., see the degree chart at the beginning of this chapter. For further details, consult Standards and Procedures for Graduate Study at UCLA, available in 1225 Murphy Hall or in individual departments.

The Doctoral Degree

The doctorate, and specifically the Doctor of Philosophy degree, is awarded in recognition of a candidate's in-depth knowledge of a broad field of learning, and for demonstrated ability to make original and distinguished contributions to the field. More generally, the degree is an affidavit of critical aptitude in scholarship, imaginative enterprise in research, and proficiency and style in communication.

University Minimum Standards

The requirements described here are the University's minimum standards for doctoral degrees. Each department may adopt additional requirements according to the demands of the field of study. Consult your graduate adviser for details.

Academic Residence

The minimum residence requirement for the doctoral degree is two years (six quarters) in graduate standing at the University of California, including one year (usually the second) in continuous residence at UCLA. If you earned a master's degree at UCLA, one year of this requirement will have been met.

In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal. Academic residency is established by successfully completing one graduate or upper division course (four units) during a quarter.

You may earn one quarter of residence for summer study in either of these ways: (1) enroll in two consecutive six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

Program of Study and Scholarship

Programs of study for doctoral degrees are more individualized than those for master's degrees, permitting a higher degree of specialization. The University does not specify course requirements for doctoral programs. However, individual programs have coursework or other requirements which must be completed before taking the University Oral Qualifying Examination. You will determine your course of study in consultation with the adviser and guidance committee who supervise your activities until the doctoral committee is appointed.

Satisfactory progress toward the doctoral degree requires that you maintain at least a B average in all courses taken in graduate standing on any University of California campus.

Foreign Language Requirements

Most departments require doctoral candidates to demonstrate proficiency in one or more foreign languages, so that you can acquire broad knowledge in your field of study and keep abreast of foreign developments in the field.

You are urged to complete language requirements as early as possible in your graduate career. If your department requires two or more foreign languages, you must complete at least one before the Oral Qualifying Examination. See "Foreign Language Requirements" under the Master's Degree for information on fulfilling these requirements.

Examinations Before Advancement to Candidacy

A doctoral program generally involves two stages, separated by advancement to candidacy. The first stage is spent in fulfilling the coursework, teaching, and/or examinations required by the major department or group. You are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after you complete the recommended or required work. Once all departmental and foreign language requirements are met, the department chair consults with you and then nominates a doctoral committee.
University Oral Qualifying Examination

The doctoral committee, consisting of at least five faculty members nominated by your department, is appointed by the dean of the Graduate Division (consult Standards and Procedures for Graduate Study at UCLA for details on committee membership). To determine your qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a written examination.

Advancement to Candidacy

You are eligible for advancement to doctoral candidacy after passing the University Oral Qualifying Examination with no more than one negative vote, completing four quarters of academic residence and any additional departmental requirements, and maintaining a 3.0 grade-point average in graduate standing. You must complete the application for candidacy form sent to you by the Registrar's Office, have it signed by your doctoral committee chair, pay a $25 advancement to candidacy fee, and submit the form to the Graduate Division, Student and Academic Affairs Section. You are officially advanced to candidacy on the date the completed form is submitted.

Writing the Dissertation

Once the doctoral committee approves the subject for your dissertation, the second or in-candidacy stage of the doctoral program begins and is devoted primarily to independent study and research and to the preparation of the dissertation, which demonstrates your ability for independent investigation. The doctoral committee guides your progress toward its completion.

Final Oral Examination

A final oral examination may be required at the option of any member of the doctoral committee, and in some departments it is required of all doctoral candidates. The examination, for which all committee members must be present, may be held before you have prepared the final copy of your dissertation, but passing the examination (with no more than one negative vote of the committee members) does not imply approval of the final manuscript. Consult your doctoral committee chair or graduate adviser for further information.

Filing the Dissertation

You are responsible for following instructions on the preparation of the dissertation and for observing filing deadlines. For guidance in the preparation and submission of the dissertation and accompanying abstract, you may:

1. Consult the Theses and Dissertations Adviser, Office of the University Archivist, 141 Powell Library.
2. Read Regulations for Thesis and Dissertation Preparation, available in the Graduate Division, Student and Academic Affairs Section, or in the Archivist's Office.
3. Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each quarter (see the Calendar at the beginning of this catalog).

On the day that your final dissertation is approved by the doctoral committee, you must submit the original signature (approval) page and title page to the Graduate Division, Student and Academic Affairs Section, where completion of degree requirements will be verified. After final
approval by the dean of the Graduate Division, you must file two paper copies of the dissertation with the Theses and Dissertations Adviser approximately two weeks before the degree is to be awarded. Deadlines for this academic year are:

- December 5 for Fall Quarter 1988
- March 13 for Winter Quarter 1989
- June 5 for Spring Quarter 1989

**Individual Ph.D. Program**

Although the University of California offers an extraordinary range of established doctoral programs, these cannot meet the needs and specific career goals of every student. The Individual Ph.D. Program therefore makes it possible for superior students to design their own coherent programs of interdisciplinary studies leading to the Ph.D. degree.

To qualify for this program, you must have been a full-time graduate student at UCLA for at least one year, making satisfactory progress toward a doctoral degree. After at least three faculty members have agreed to sponsor your proposal for an individual program of study, you may submit it to the Graduate Council for review. University minimum standards regarding courses, scholarship, residence, and dissertation apply. Further information on this program is available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall.

**Interdepartmental Degree Programs**

In addition to graduate degree programs offered within schools and departments, UCLA offers interdisciplinary programs involving two or more participating departments. A total of 27 interdepartmental programs offer bachelor’s, master’s, and doctoral degrees in some combination; several units offer all three degrees. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of faculty division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

Interdepartmental degree programs which currently lead to advanced degrees are listed below. All are described more fully in Chapter 5 under the College of Letters and Science, with the exceptions of Environmental Science and Engineering which is in the School of Public Health and Neuroscience which is in the School of Medicine. For further information, contact the chair or graduate adviser of the specific program that interests you.

- African Area Studies (M.A.)
- Afro-American Studies (M.A.)
- American Indian Studies (M.A.)
- Applied Linguistics (Ph.D.)
- Archaeology (M.A., Ph.D.)
- Asian American Studies (M.A.)
- Comparative Literature (M.A., Ph.D.)
- Environmental Science and Engineering (D.Env.)
- Folklore and Mythology (M.A., Ph.D.)
- Indo-European Studies (Ph.D.)
- Islamic Studies (M.A., Ph.D.)
- Latin American Studies (M.A.)
- Molecular Biology (Ph.D.)
- Neuroscience (Ph.D.)
- Romance Linguistics and Literature (M.A., Ph.D.)

**Concurrent and Articulated Degree Programs**

Each of the programs described thus far leads to a single degree — either master's or doctoral. UCLA also offers concurrent and articulated degree programs, which allow you to earn two degrees simultaneously by combining two free-standing degree programs into a coordinated course of study. You may petition to design your own articulated program (with departmental and Graduate Division approval), but you may not apply credits for one degree to the other. Concurrent degree programs, which may not be individually designed, allow some credit overlap.

These programs accomplish several important objectives: they enable the University to respond to societal changes by creating new fields of study; they prepare students more fully for the world's complexities by combining the cultural (political-social-economic) aspects of their field with the tools of a professional degree; and they allow faculty members to cross departmental lines and interact on a broader scale.

**Concurrent degree programs, by allowing a specified amount of credit to apply to both degrees, permit students to reduce the total number of courses required for the two degrees and thereby reduce the time normally required if courses were taken in sequence. Programs leading to concurrent degrees are offered in the following disciplines:**

- Education, M.A., Ph.D., M.Ed., or Ed.D. — Law, J.D.
- History, M.A. — Library and Information Science, M.L.S.
- Latin American Studies, Interdepartmental M.A. — Urban Planning, M.A.
- Management, M.B.A. — Urban Planning, M.A.
- Management, M.B.A. — Computer Science, M.S. (School of Engineering and Applied Science)
- Management, M.B.A. — Latin American Studies, Interdepartmental M.A.
- Management, M.B.A. — Law, J.D.
- Management, M.B.A. — Library and Information Science, M.L.S.
- Management, M.B.A. — Public Health, M.P.H.
- Urban Planning, M.A. — Law, J.D.

**Articulated degree programs permit no credit overlap, and students must complete degree requirements separately for each degree. Programs leading to articulated degrees are offered in the following disciplines:**

- African Area Studies, Interdepartmental M.A. — Public Health, M.P.H.
- African Area Studies, Interdepartmental M.A. — Theater, Film, and Television, M.F.A. in Motion Picture/Television
- Latin American Studies, Interdepartmental M.A. — Education, M.Ed. in Curriculum
- Latin American Studies, Interdepartmental M.A. — Engineering and Applied Science, M.S.
- Latin American Studies, Interdepartmental M.A. — Library and Information Science, M.L.S.
- Latin American Studies, Interdepartmental M.A. — Public Health, M.P.H.
- Medicine, M.D. — Graduate Division health science major, Ph.D.
- Oral Biology, M.S. — Dentistry, D.D.S. or Certificate

Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Contact the Graduate Division, Student and Academic Affairs Section, for information on designing your own articulated program.
Special Programs and Training

Graduate Cross-Enrollment Program with USC

As an integral part of an Academic Resource Sharing program linking UCLA with the University of Southern California, the Graduate Cross-Enrollment Program makes possible graduate student exchanges in many departments. The program is limited to specialized courses which would not otherwise be available to UCLA students and is in effect only during the regular academic year (not in summer).

If you have completed at least one quarter of graduate study at UCLA and have obtained the necessary approvals, you may enroll in a 501 course through your department. When you have completed the course at USC, your grade will be forwarded to UCLA to be recorded on your transcript (S/U grading only). Only eight units of cross-enrollment courses may be applied toward requirements for the master's degree, and these courses may not be used to satisfy the five-graduate-course requirement. Applications, available from the Graduate Division, Student and Academic Affairs Section, should be completed before the start of the term in which the course is offered.

Intercampus Exchange Program

If you have completed one quarter of graduate study at any campus of the University, you may attend another campus as an Intercampus Exchange Graduate Student with the approval of your department chair, the chair of the department or group in which you wish to study at the host campus, and the dean of the Graduate Division at both the home and host campuses. The privilege should be used only by students whose graduate study may be enhanced by work with certain faculty or use of facilities and resources accessible only at another campus. Although you are considered to be in residence at your home campus, as an Intercampus Exchange Student you have library, health service, and other privileges at the host campus. Grades are transferred to your home campus and entered on your official record.

Applications are available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall, and should be filed at least four weeks before the beginning of the quarter in which you expect to enter the program. The program is available only during the regular academic year (not in summer).

Graduate students may also take advantage of the Education Abroad and Education at Home Programs, described in Chapter 1 of this catalog.

Postdoctoral and Visiting Scholars

The University makes opportunities and facilities available to qualified scholars — those holding doctoral degrees or foreign equivalents — to continue advanced study and research under faculty guidance. Postdoctoral Scholar standing, which does not lead to any degree, is limited to a maximum of three years and must begin within three years after the doctoral degree is awarded. Interested candidates should make advance arrangements with the relevant department or research unit.

The same opportunities are made available to Visiting Scholars — senior scholars and distinguished visitors holding doctoral degrees or foreign equivalents — who wish to pursue independent research or advanced study at UCLA for a limited time, normally no more than one year. Visiting Scholars are distinguished from Postdoctoral Scholars and academic appointees in that they usually have adequate support funds from sources outside the University.

Further information on both Postdoctoral and Visiting Scholars is available from Fellowships and Graduate Student Support, 1228 Murphy Hall.
General Policies and Regulations

Standards of Scholarship

To maintain satisfactory progress toward a graduate degree, UCLA requires at least a B (3.0) average in all courses taken in graduate standing at any campus of the University and in all courses applied toward advanced degrees. This standard applies to all graduate students, including candidates in certificate programs. In courses graded on an S/U basis, the grade of S (Satisfactory) is awarded for work which would otherwise receive a B or better. Grades S and U are not included in calculating grade-point averages.

Scholarship Probation

You are on probation and are subject to dismissal if your cumulative average in all work attempted in graduate standing falls below a B (3.0) or if work in any two consecutive quarters falls below a B average. The dean of the Graduate Division, in consultation with your department, determines your eligibility to continue graduate study in probationary status. If you are allowed to continue, you must make timely progress toward improving your grade-point average.

Disqualification and Appeal

If you are subject to disqualification for reasons other than failure to maintain the minimum grade-point average, you will have your records reviewed by the Graduate Division, in consultation with the graduate adviser. If disqualification results, you may submit a written appeal to the dean of the Graduate Division for reconsideration.

Appeals will be considered only if based on appropriate cause such as (1) procedural error, (2) judgments based on nonacademic criteria, (3) personal bias, or (4) specific mitigating circumstances contributing to performance. Alleged errors in academic judgment or evaluation are not considered appropriate causes for appeal.

In cases of appropriate cause, the dean of the Graduate Division refers the appeal to the Graduate Council’s Committee on Instruction and Degree Requirements. You are required to submit a written statement on the basis for your appeal and are entitled to a personal appearance before the committee. After obtaining information on the matter from any appropriate person or office, the committee makes a recommendation to the dean of the Graduate Division, who makes the final decision. In reporting the decision, the committee includes the basis for the decision, its effective date, and any specific recommendations.

Graduate Student Complaints

Because of the separation of functions within the University, students are sometimes uncertain where they should direct their complaints. The following information may be helpful.

If you have complaints of a scholastic or professional nature involving faculty, you should take them up with the faculty member concerned or, if that is not feasible, with the chair of the department. If the department as a whole is involved, you should take the matter to the appropriate divisional or school dean. Should the issue not be resolved at that level, you may appeal to the dean of the Graduate Division, 1237 Murphy Hall.

Complaints of misconduct against a student or group of students should be made at the Office of the Dean of Students, 1206 Murphy Hall.

Complaints concerning alleged violation of the policies and regulations governing graduate study should be made to the dean or associate dean of the Graduate Division, 1237 Murphy Hall.

Complaints about a violation of University policy regarding the conduct of one or more faculty members should be made to the Charges Committee of the Academic Senate, 3125 Murphy Hall.
Units and Grading Policy

UCLA students are responsible for understanding the grading policies and regulations established by the Academic Senate. Should any semantic variations exist between explanations in this catalog and regulations in the Manual of the Academic Senate, the manual will prevail in all cases. Copies of the Senate manual are available for your review in the Academic Senate Office, 3125 Murphy Hall.

Grades

Instructors are required to assign a final grade for each student registered in a course. The following grades are used to report the quality of a student’s work at UCLA:

Undergraduate Students

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Superior</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
</tr>
<tr>
<td>C</td>
<td>Fair</td>
</tr>
<tr>
<td>D</td>
<td>Poor</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
</tr>
<tr>
<td>P</td>
<td>Passed (achievement at grade C level or better)</td>
</tr>
</tbody>
</table>

Graduate Students

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Superior Achievement</td>
</tr>
<tr>
<td>B</td>
<td>Satisfactorily demonstrates potential for professional achievement</td>
</tr>
<tr>
<td>C</td>
<td>Passed but work does not indicate potential for professional achievement</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory (achievement at grade B level or better)</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress</td>
</tr>
<tr>
<td>DR</td>
<td>Deferred Report</td>
</tr>
</tbody>
</table>

For Undergraduates — The grade A may be modified by a minus (-) suffix, and the grades B, C, and D by a plus (+) or minus (-) suffix, to either raise or lower your grade-point average. The grades A, B, C, and P denote satisfactory progress toward the bachelor’s degree, but a D grade must be offset by higher grades in the same quarter for you to remain in good academic standing. An F grade yields no unit or course credit.

For Graduate Students — The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same quarter for you to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees.

The Schools of Dentistry, Medicine, and Law maintain their own grading codes. If you are interested in programs in any of these schools, consult the appropriate school announcement.

Grade Points

In computing scholarship standing, a course counts as four quarter units. Partial or multiple courses are counted proportionally (e.g., one-half course is equal to two units).

Grade points per unit are assigned by the Registrar as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Point Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D-</td>
<td>0.7</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
<tr>
<td>NP</td>
<td>0</td>
</tr>
<tr>
<td>U</td>
<td>0</td>
</tr>
</tbody>
</table>

Courses in which you receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, and IP, are disregarded in determining your grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent grade-point averages.)

Computing Your Grade-Point Average

Your grade-point average, or GPA, is determined by dividing the number of grade points earned by the number of units attempted. For example, suppose you take three four-unit courses and receive grades of A-, B-, and C+. The grade points are computed as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Course Units</th>
<th>Total Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A-</td>
<td>4</td>
<td>14.8</td>
</tr>
<tr>
<td>B-</td>
<td>4</td>
<td>10.8</td>
</tr>
<tr>
<td>C+</td>
<td>4</td>
<td>9.2</td>
</tr>
<tr>
<td></td>
<td>12</td>
<td>34.8</td>
</tr>
</tbody>
</table>

To determine your GPA for the quarter, divide the total grade points earned (34.8) by the total course units attempted (12). Your GPA is 2.9.

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except University Extension). Individual departments may require higher standards of achievement.

Only grades earned in regular session or Summer Sessions at any UC campus are used to compute in your UCLA grade-point average. Grades earned at another institution or in UCLA Extension do not affect your GPA.

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except University Extension). Individual departments may require higher standards of achievement.

Other schools and agencies may calculate grade-point averages differently from the University when evaluating your records for admission to graduate and professional school programs. You should consult them about their policies in this regard.

Class Standing

Undergraduate classification is determined by the number of units completed:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Completed Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 - 44.9</td>
</tr>
<tr>
<td>Sophomore</td>
<td>45 - 89.9</td>
</tr>
<tr>
<td>Junior</td>
<td>90 - 134.9</td>
</tr>
<tr>
<td>Senior</td>
<td>135 or more</td>
</tr>
</tbody>
</table>
In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the College of Fine Arts and the School of Nursing; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 185 and 201 (depending on the program); 213 maximum units are allowed. If you exceed the maximum, you may not be allowed to continue, except in rare cases approved by your college or school. See the degree requirements under each college and school for further details.

Graduate classification is based on your degree objective and whether or not you are advanced to candidacy for a doctorate.

**Passed/Not Passed (P/NP) Grades**

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed basis.

By alleviating grading pressures, this option allows you to explore areas in which you have little or no previous experience. The grade P is assigned for a letter grade of C or better. Units earned this way count toward satisfaction of degree requirements but do not affect your GPA. You will receive neither units nor course credit for an NP grade.

You may enroll in one course each quarter on a P/NP basis (two courses if you have not elected the P/NP option in the preceding quarter). You may not elect this option for Summer Sessions courses without an approved petition. Your department or school may require that you take some or all courses in your major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult your college or school for details.

You may make program changes to or from P/NP grading through the fourth week of instruction (see the Calendar at the beginning of this catalog for exact dates); changes after the first two weeks of class require a petition ($3), available from your college or school.

Certain undergraduate courses are offered only on a Passed/Not Passed basis and are designated PN in the Schedule of Classes.

**Satisfactory/Unsatisfactory (S/U) Grades**

Graduate students in good standing (minimum 3.0 GPA) may enroll for S/U grading in one graduate or upper division course outside the major field each quarter, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of B or better, but units earned in this manner will not be counted in computing the GPA. You will receive neither units nor course credit for a U grade. You may not elect the S/U option for Summer Sessions courses without an approved petition.

Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction (see the Calendar at the beginning of this catalog); changes after the first two weeks of class require a petition ($3), available from your department.

Certain graduate courses are offered only on a Satisfactory/Unsatisfactory basis and are designated SU in the Schedule of Classes.

**Incomplete (I) Grades**

Your instructor may assign the I grade when your work is of passing quality but is incomplete for a good cause (i.e., illness or other serious problems). It is your responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, you may replace it with a passing grade and receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. If the work is not completed by the end of the next full quarter in residence, the grade will lapse to an F, NP, or U as appropriate. Your college or school may extend this deadline in unusual cases.

Petitions for Removal of Incomplete Grade ($5) are available in your school or department office. (Note: Once an I grade is assigned, it remains on your transcript along with the passing grade you may later receive for the course.)

**In Progress (IP) Grades**

For certain courses extending over more than one quarter (identified by T1, T2, T3, or T4 in the Schedule of Classes), evaluation of student performance is deferred until the end of the final quarter of the course. Provisional grades of IP are assigned in the intervening quarter(s) and are replaced with the final grade when you complete the full sequence. The school or college faculty or the Graduate Council will determine credit if you do not complete the full sequence and petition for partial credit.

**Deferred Report (DR) Grades**

You may receive a DR grade when the instructor believes your work to be complete but cannot assign a grade because of disciplinary proceedings or other problems. If you are given a disciplinary DR grade, the Office of the Dean of Students will assist you in resolving the problem. For graduate students, the dean of the Graduate Division will set a deadline by which the DR will lapse to an F if the problem is not resolved and a grade assigned. The DR will be changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that you have resolved the situation. The DR grade is not included in determining your grade-point average.

**Repetition of Courses**

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except Extension) may be repeated only according to the following guidelines:

1. To improve your grade-point average, you may repeat only those courses in which you receive a grade of C – or lower; NP or U grades may be repeated to gain unit credit. Courses in which you received a letter grade may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated either on the same basis or for a letter grade.

2. Repetition of a course more than once requires the approval of your college or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.

3. Degree credit for a course will be given only once, but the grade assigned each time you take the course will be permanently recorded on your transcript.

4. For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points will be computed in the grade-point average. After repeating 16 units, however, your GPA will be based on all letter grades assigned and total units attempted.

5. For graduate students, all courses in which a letter grade is given, including repeated courses, will be used in computing the grade-point average.
Correction of Grades

All grades except I, IP, and DR are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by reexamination or, with the exception of the I and IP grades, by completing additional work. If you are dissatisfied with a grade, you should review your work with the instructor and receive an explanation of the grade assigned. See the Appendix for further details and procedures for appealing grades.

Credit by Examination

Students with high scholastic standing may earn credit for regular University courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study which may include oral and written work in addition to other requirements. To be eligible for this privilege, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner. The results of these courses are entered on your record in the same way as regular courses, and corresponding grade points are assigned. Graduate credit earned by examination may be applied toward minimum course requirements for master’s degrees but cannot apply to academic residence requirements for master’s or doctoral degrees.

You will need approval from the appropriate instructors, the department, and your college or school or the dean of the Graduate Division, from whom petitions for credit by examination ($5 each) are available.
Other Academic Policies

Concurrent Enrollment and Transfer of Credit

Concurrent enrollment means taking courses for credit in UCLA regular session (Fall, Winter, or Spring Quarter) and at another college institution (including UCLA Extension) at the same time. Concurrent enrollment is not permitted except in extraordinary circumstances, and no credit will be given for courses taken concurrently elsewhere without the approval of your college or school. This does not apply to UCLA Summer Sessions (see “Summer Sessions” in Chapter 1).

Undergraduates

During the summer or during a quarter when you are not registered at UCLA, you may elect to take courses for credit at UCLA Extension, a community college, or another four-year institution (see limitations below). The Office of Undergraduate Admissions and Relations with Schools makes the final decision on credit transferability, but it is your responsibility to select courses with catalog descriptions similar to courses offered in regular session at UCLA. You should avoid courses that are closely related to those you have already taken, as you cannot receive credit twice for the same or similar courses. If you wish to apply a specific course from another college toward satisfaction of degree requirements at UCLA, consult your college, school, or department counselor before taking the course.

Only grades earned in regular session or Summer Sessions at any UC campus will be computed into your UCLA grade-point average. You may, however, receive unit credit and satisfy course requirements with transferable work taken elsewhere. You must have the other college send a copy of your transcript to the UCLA Office of Undergraduate Admissions and Relations with Schools (UARS); you must also fill out a Transfer Credit Evaluation Request form in the UARS Office.

UCLA Extension — If you wish to receive degree credit for work taken through UCLA Extension, you should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. No degree credit is given for courses numbered X300 through X499. Remember that concurrent enrollment in Extension and regular session is not permitted.

Community Colleges — The maximum number of community college units allowed toward the bachelor’s degree is 105 quarter units (70 semester units). The UCLA Office of Undergraduate Admissions and Relations with Schools will not count community college courses beyond 105 quarter units, but you may still receive subject credit to satisfy lower division requirements. Consult your college or school counselors for possible further limitations. (To convert semester units into quarter units, multiply the semester units by 1.5.)

Graduates

With approval of the dean of the Graduate Division, certain courses completed outside of UCLA regular session may be applied toward the master’s degree. For more details, see “Transfer of Credit” under “The Master's Degree,” Chapter 3.

Transcript of Record

The Registrar prepares and permanently retains a record of each student's academic work. Your transcript reflects all undergraduate and graduate work completed in UCLA regular session and Summer Sessions. It lists chronologically your courses, units, grades, cumulative grade-point average, transfer credits, and total units.

Unofficial copies of student transcripts are issued several weeks after the end of each quarter (to learn your grades more quickly, leave postcards with your instructors). You should pick up your transcript and inform the Registrar immediately of any omissions or other discrepancies. Student copies are available from mid-January to mid-February for Fall Quarter grades, mid-April to mid-May for Winter Quarter grades, and July to October for Spring Quarter grades at no charge from Registrar's Student Information, 1134 Murphy Hall (students in the College of Fine Arts and the Schools of Nursing, Public Health, Management, and Architecture and Urban Planning should pick up their transcripts in the respective college or school office).

To have official transcripts sent to other schools or institutions, fill out a Request for Transcript of Record form at the Registrar’s Office (transcripts cannot be issued without your signed request). The fee is $3 for the first copy and $1 for each additional transcript requested at the same time. Rush transcript service is available for an additional $5 per copy. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

Verification of Student Status

The Registrar verifies current quarter registration and full-time enrollment status for loan forms and other noncampus certifications, beginning on the first day of classes for undergraduates and the third week of classes for graduates.

Certificate of Resident Study for International Students

In addition to a formal transcript, each college or school or the Graduate Division may issue a Certificate of Resident Study to a registered international student. To obtain this certificate, you must have completed a program of at least nine courses with a minimum 2.0 grade-point average, or have satisfactorily completed a research project over a period of nine months or more. The chair of your major department recommends the award of this certificate.

Registration Card

Your valid Registration Card (Reg Card) is your official student identification and is required, along with your UCLA Student I.D. Card, for most University services. Carry it with you as you will be asked to show it for student health services, library privileges, athletic and cultural student ticket rates, recreation center, check cashing, and many other campus services.

If you lose or do not receive your Reg Card, a temporary verification card (good for seven days) will be issued without fee at the Registrar's Office, 1111 Murphy Hall. After the quarter begins, you may replace lost, destroyed, or mutilated cards at the Registrar's Office for a $3 fee. You must show proof of identity for verification or replacement cards.

UCLA Student I.D. Card

This card with photo is issued without charge in your first term of registration and is valid with the current Reg Card as long as you remain in the same standing (graduate or undergraduate). It is required for most University services and student activities.

You will need a current Reg Card and other valid identification (driver's license, passport, or DMV I.D. card) to get your Student I.D. Card. In Fall Quarter cards are issued adjacent to the enrollment area in Ackerman Union. In other quarters, cards are issued at 140 Kerckhoff Hall. There is a $10 fee for issuing the card after your first term in attendance. You may replace lost or destroyed cards at 140 Kerckhoff Hall for a $10 fee.

Change of Name or Address

If you wish to change your name on your official record, fill out a name change form at Registrar's Student Information in 1134 Murphy Hall. If you change your address after filling the UCLA Address/Data portion of your Registration Form, notify the Registrar's Office in 1111 Murphy Hall as soon as possible.
Leaving UCLA

Intercampus Transfer
Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the Undergraduate Application Packet and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see "Undergraduate Admission" in Chapter 2). Applications are available from the UCLA Office of Undergraduate Admissions and Relations with Schools, 1147 Murphy Hall, Los Angeles, CA 90024-1436, other University of California Undergraduate Admissions Offices, or your local community college.

Graduate students who wish to enroll as degree candidates at other UC campuses must apply for admission to those Graduate Divisions.

Absence during a Quarter
If you have to be absent from classes temporarily for reasons beyond your control, you should notify your instructors. Regardless of the reasons for absence, you will be required to complete all coursework. If you cannot complete the work on time because your absence is late in the quarter or prolonged, you may request that the instructors assign an incomplete grade (see "Incomplete Grades" earlier in this chapter).

One Quarter Absence for Undergraduates
Undergraduate students who have completed at least one quarter at UCLA and fail to register for a quarter may return to the University the following quarter and preregister and preenroll as continuing students. If you plan to attend another institution following quarter and preregister and preenroll as continuing students. If you cancel in your first quarter at UCLA, you must reapply for admission.

Graduate students who cancel their registration and do not apply for a formal leave of absence must compete for readmission to return to the University.

Cancellation
Before the first day of classes, you may cancel registration by submitting a written notice, together with your current Registration Card and Student I.D. Card, to the Registrar's Office, 1111 Murphy Hall. A $10 service charge will be deducted from your fee refund.

Undergraduates who return to the University for the following quarter may preregister and preenroll as continuing students. If you are absent longer than one quarter, you must apply for readmission. If you cancel in your first quarter at UCLA, you must reapply for admission.

Withdrawal
Withdrawing from the University means discontinuing attendance in all courses in which you are enrolled. If you withdraw during a quarter, you need to file a Notice of Withdrawal, available from your academic dean's office (undergraduates) or departmental office (graduates). Submit your Registration Card and Student I.D. Card along with the form or a fee will be deducted from any refund.

One Quarter Absence for Undergraduates
Undergraduate students who have completed at least one quarter at UCLA and fail to register for a quarter may return to the University the following quarter and preregister and preenroll as continuing students. If you plan to attend another institution (including University Extension) during your absence, you should consult your college or school counselor or before enrolling elsewhere. When you return to UCLA you must provide the Office of Undergraduate Admissions and Relations with Schools with a transcript of any courses taken and request that your courses be evaluated (see "Concurrent Enrollment and Transfer of Credit" earlier in this chapter). If you are absent for two or more consecutive quarters, you are no longer considered a continuing student and must compete for readmission with all other applicants.

Leave of Absence for Graduate Students
Graduate students in good standing may be granted leaves of absence, normally for periods of one to three quarters, on approval from the appropriate department and the Graduate Division. Leaves, which may be extended for a total of two years at the discretion of your department and approval of the Graduate Division, must be requested before the end of the second week of class. Request forms are available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. For details on leaves of absence, see Standards and Procedures for Graduate Study at UCLA, available in the Graduate Division offices or in individual departments. Students on leaves of absence are not eligible to use University facilities (except libraries) or faculty time. Leaves of absence as described here do not apply to undergraduates.

Undergraduate Students — If you return to the University for the quarter following withdrawal, you may preregister and preenroll as a continuing student. If you return later than the following quarter, you must apply for readmission.

Cancellation
Before the first day of classes, you may cancel registration by submitting a written notice, together with your current Registration Card and Student I.D. Card, to the Registrar's Office, 1111 Murphy Hall. A $10 service charge will be deducted from your fee refund.

Undergraduates who return to the University for the following quarter may preregister and preenroll as continuing students. If you are absent longer than one quarter, you must apply for readmission. If you cancel in your first quarter at UCLA, you must reapply for admission.

Graduate students who cancel their registration and do not apply for a formal leave of absence must compete for readmission to return to the University.

Withdrawal
Withdrawing from the University means discontinuing attendance in all courses in which you are enrolled. If you withdraw during a quarter, you need to file a Notice of Withdrawal, available from your academic dean's office (undergraduates) or departmental office (graduates). Submit your Registration Card and Student I.D. Card along with the form or a fee will be deducted from any refund.

When you withdraw officially during the first five weeks of instruction, a percentage of your registration fee will be refunded as follows:

- First and second weeks of instruction: 80% refund
- Third week of instruction: 60% refund
- Fourth week of instruction: 40% refund
- Fifth week of instruction: 20% refund
- After fifth week of instruction: no refund

Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. Refer to the current Schedule of Classes for further details and specific refund dates.

You may withdraw only if you have not taken any final examinations or otherwise completed the work in any of your classes. For undergraduates, one withdrawal places no restriction on readmission or continuation if you started the quarter in good academic standing. If you withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on your continuance in undergraduate standing. Before withdrawing, you are urged to consult faculty, departmental, or college advisers to consider the full implications of this action.

If you register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation, you will receive F, NP, or U grades, as appropriate, for all courses in which you are enrolled for that quarter. A $60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). No fees will be refunded, and future registration privileges may be curtailed or revoked. Transcripts will not be issued if you have outstanding financial obligations to the University.

Undergraduate Students — If you return to the University for the quarter following withdrawal, you may preregister and preenroll as a continuing student. If you return later than the following quarter, you must apply for readmission.
Graduate Students — If you do not register for a quarter, you are considered to have withdrawn from the University and must apply for re-admission when you return.

Graduation from UCLA

Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. According to a recent survey of UCLA alumni, one third of all UCLA baccalaureate recipients go on to graduate school. For information on academic requirements for graduation, see “Undergraduate Degree Requirements” in Chapter 2.

Undergraduate Students

The awarding of the bachelor’s degree does not happen automatically but is the culmination of a multistep procedure which involves your participation.

1) The Degree Candidacy portion of your Registration Form must be completed and filed during the registration period when you are a junior (minimum 90 quarter units earned) to let the Registrar’s Office know when you intend to graduate. The “degree expected term” indicated on the form must be the same as the term in which you wish to graduate in order for your degree progress to be audited by the Registrar’s Office. You cannot graduate without such an audit.

2) Degree Checks are conducted by your school or college and the Registrar’s Office to inform you of degree requirements remaining to be satisfied. If you have filed the Degree Candidacy portion of your Registration Form, you should receive your first degree check ("Status in Reference to the BA/BS Degree") about two quarters before you graduate and an updated one each subsequent quarter. Consult your college or school, or a degree auditor in 1111 Murphy Hall if you have any questions or problems.

3) Announcement of Candidacy list is posted on the Registrar’s bulletin board about four weeks into the quarter. Although this is not a guarantee of graduation, your name should appear on the list posted during your final quarter. If not, inform a degree auditor in 1111 Murphy Hall. There is a fee for declaring degree candidacy after the fourth week of your final quarter and a late fee when filing after the seventh week.

4) Important Degree Notice is mailed to you only if your records indicate you will not have satisfied all degree requirements by the end of your last quarter. If you receive such a notice, contact a degree auditor as soon as possible for further information and instructions.

5) Certificate of Completion is official proof that you have graduated. It is sent to you four to five weeks after your final quarter ends if you have successfully completed all courses that quarter and met all degree requirements.

Graduate Students

Candidates for both master’s and doctoral degrees must be advanced to candidacy and complete all degree requirements, including the master’s thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred. A Certificate of Completion, certifying the award of the degree, is issued to all students four to five weeks after the end of the quarter in which all degree requirements are met. For full details on degree requirements and procedures for graduate students, see Chapter 3 on Graduate Study.

Degree Date

Degrees are awarded at the end of each quarter (Fall, Winter, Spring) and at the end of the second Summer Session. Refer to University calendars for the actual date of the final day in each quarter or Summer Session.

Diplomas

Diplomas for both undergraduates and graduate students are not distributed at Commencement but become available six to eight weeks after graduation. The Registrar’s Office will notify you by mail at your permanent address when your diploma is ready. If you wish, the diploma can be sent to you by certified mail at a cost of $4 ($8 outside the U.S.). There is no diploma fee, although if the original is lost or stolen, there is a $25 charge ($38 for professional schools) for a duplicate diploma. Contact the Registrar’s Office, Diploma Reorder, for additional information.

Commencement

Commencement exercises honoring candidates for undergraduate and graduate degrees will be held June 17 and 18. Students who have earned degrees in Summer Sessions 1988, December 1988, March 1989, or who expect to receive a degree in June 1989, are eligible and welcome to participate.

Each school and college conducts an academic ceremony for its graduates. Some of the ceremonies feature an address by the Chancellor, student speakers, recognition of candidates who have achieved high academic distinction and honors, as well as prizes, and the awarding of the UCLA Medal. Check with your school or college for program and time schedules.

Academic regalia (caps, gowns, and hoods) become available through ASUCLA two weeks prior to Commencement. The rental fee is $19.50 for bachelor’s candidates; $30 for master’s and doctoral candidates. For further information, consult the Commencement Handbook, which is mailed to each candidate by the end of May. You may purchase graduation announcements with printed enclosure cards at the ASUCLA Campus Photo Studio (150 Kerckhoff Hall) through mid-May. Discount packages are available for purchase through a joint effort by the UCLA Alumni Association and ASUCLA.
Colleges and Schools

Organization

This catalog is organized into the 13 colleges and schools which are the University's component parts. Each of the following chapters is devoted to a single college or school. Each is introduced by general information on scope and emphasis, the academic departments it encompasses, admission standards, and requirements for undergraduate and graduate degrees.

The overall college or school description is followed, in alphabetical sequence, by its departmental listings. Here you will find faculty rosters, departmental degree requirements, requirements for the major, and descriptions of all courses (lower division, upper division, and graduate) offered by that department or interdepartmental degree program. (If you are not certain which college or school offers a particular program, see the organization chart on the inside front cover.)

Since the great majority of UCLA's students and degree programs are housed within the College of Letters and Science, that unit is presented first. It is followed by the other general campus units offering undergraduate programs: the College of Fine Arts and the School of Engineering and Applied Science. The graduate professional schools of Architecture and Urban Planning, Education, Law, Library and Information Science, Management, and Social Welfare follow in alphabetical sequence. The health science disciplines, which include the Schools of Dentistry, Medicine, Nursing, and Public Health, are the final chapters before the Appendix.

Courses of Instruction

Because the catalog must be prepared well in advance of the academic year it covers, it may not reflect recent changes in courses, curricula, and faculty listings. For more current information, consult the quarterly Schedule of Classes available in the Students' Store shortly before the beginning of each new quarter.

Courses listed in this catalog represent the total nonclinical offerings of each college, school, and department at UCLA. Certain courses listed may not be offered every quarter or every year. Where possible, the quarters in which a course is offered have been indicated in parentheses after the instructor's name (F = Fall, W = Winter, Sp = Spring, Sum = Summer).

Academic Credit

A course has a credit value of four quarter units unless otherwise specified in parentheses after the course title.

A listing such as History 1A-1B-1C, Introduction to Western Civilization, indicates three full four-unit courses, 1A, 1B, and 1C. The listing Dance 1A-1F, Fundamentals of Modern Dance (2 units each), indicates six half-courses at two units each. A course may not be prerequisite to the next in the series unless so designated, but since policies vary among departments, you should check with the departmental counselor or adviser. Credit for a specific course may be dependent on completion of a subsequent course, as noted in the description.

Prerequisites

Education is a building process. It is difficult or impossible to learn advanced principles without first understanding elementary ones. Therefore, one or more lower division courses may be prerequisite to taking another lower division or an upper division course. Prerequisites should be noted carefully — it is your responsibility to meet these requirements in preparation for more advanced work. A course has no prerequisites if none is designated in departmental requirements or course descriptions.

Undergraduate Courses

Undergraduate courses are classified as lower division and upper division. Lower division courses (numbered 1-99) are open to freshmen and sophomores, and are required for admission to upper division courses. Upper division courses (numbered 100-199) are open to juniors, seniors, and graduate students. To enroll, you must complete the appropriate petition.

Courses numbered 98 and 198 are group study courses set up on a one-time basis in subjects for which no regular courses have been established. Because they vary in content and are offered irregularly, they are not listed in the catalog.

Individual special studies courses (numbered 199, 199F, 199H, and 1991) involve supervised independent study and research requiring adequate background in the subject proposed for study. These courses are open to juniors (with a minimum 3.0 GPA in the major field), seniors, and graduate students. To enroll, you must complete the appropriate petition (available from the department) and have it approved by both the instructor in charge and the department chair.

Undergraduates may enroll in a maximum of eight units of 199, 199F, 199H, or 1991 courses per quarter. After completing 16 units of 199 and 199H credit on a letter grade basis, you must take any additional 199 or 1991 courses on a Passed/Not Passed basis. Independent field study courses (199F and 1991) must be taken on a Passed/Not Passed basis; a total of eight units is allowed. If you have an outstanding Incomplete grade in a 199, 199F, 199H, or 1991 course, you may not register for another until the 1 grade is removed. See departmental listings and individual course descriptions for specific prerequisites and credit limitations.
Graduate Courses*

Graduate courses numbered 200-299 are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree.

With departmental and instructor consent, and subject to requirements in the appropriate college or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If you take a graduate course as an undergraduate, you may not apply that same course later toward a higher degree.

Graduate courses numbered 300-399 are highly specialized teacher-training courses which are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor’s degree only at the discretion of the individual college or school.

Graduate courses numbered 400-499 are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements for the M.A. or M.S. degree but may apply as electives.

Individual study and research courses (numbered 500-599) are reserved for advanced study and are not open to undergraduates. Courses are numbered as follows: 595/596 = directed individual study or research; 597 = preparation for master’s comprehensive or doctoral qualifying examination; 598 = master’s thesis research and preparation; and 599 = doctoral dissertation research and preparation. (Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with other institutions.) See individual departmental listings for specific limitations on 500-series courses.

University Extension Courses

In general, you may not attend University of California Extension for degree credit if you are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the course listings, yield credit toward the bachelor’s degree. Graduate students may petition to apply up to two XLC courses toward the master's degree. For more details, see “Concurrent Enrollment” earlier in this chapter.

Concurrent and Multiple Listings

Concurrently scheduled courses (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels — undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through University Extension.)

Multiple-listed courses (identified by a capital M before the course number) are courses of the same format and level offered jointly by more than one department. For example, Byzantine Civilization is offered by the Department of Classics (Classics M170A) and the Department of History (History M122A). You will find that particular course listed under both departments in Chapter 5 on the College of Letters and Science.

Faculty Rosters

Faculty rosters in each academic department are listed in the following order:

- Professors
- Associate Professors
- Assistant Professors
- Lecturers
- Adjunct and Visiting faculty in each of the first three Academic Senate classifications

In the case of interdepartmental degree programs, all participating faculty members have appointments in regular academic departments. Participating faculty are listed in the above order, with the home department or specialty of each member indicated in parentheses.

---

*These definitions do not apply to the School of Law, which maintains its own course numbering system.
"'The Idea of a Multiversity' is a city of infinite variety. Some get lost in the city; some rise to the top within it; most fashion their lives within one of its subcultures. . . . It offers . . . a vast range of choices, enough literally to stagger the mind. In this range of choices . . . (one) encounters the opportunities and the dilemma of freedom."

Clark Kerr, *The Uses of the University*

With over 22,000 students and 900 faculty, UCLA's College of Letters and Science is the largest academic unit in the UC system. Underscoring the "multiversity" concept, its four academic divisions of humanities, physical sciences, social sciences, and life sciences provide the framework for more than 100 majors leading to the Bachelor of Arts or Bachelor of Science as well as to master's and doctoral degrees.

The undergraduate programs in the college stress a "liberal arts education" which brings together perspectives from many fields in a unified approach to learning. Students learn some of the ways issues are analyzed, questions posed, and knowledge organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they will pose their own questions, analyze academic issues of their own making, and, through their research, participate in the creation of knowledge.
College of Letters and Science

A316 Murphy Hall, (213) 825-1965

The primary units of the College of Letters and Science are the academic departments which are grouped in four divisions: humanities, physical sciences, social sciences, and life sciences. Each division is headed by a dean who reports directly to the provost.

In addition to departmental advising, the Division of Honors and Undergraduate Programs includes a network of student assistance within its two components: College Counseling Service and Preparatory Programs.

Undergraduate Study

The degree programs in the College of Letters and Science are designed to expose students to a variety of intellectual challenges by combining a wide distribution of courses and the opportunity to specialize in one particular field. To this end, you are required to select lower division courses that deal with the general foundations of human knowledge. In upper division courses you are relatively free to concentrate attention on one field of interest: your major.

You are expected to select a major by the beginning of your junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet your special need (individual major). Preparation for a major often requires prior completion of courses known as prerequisites.

Counseling Services

The College Counseling Service is located in A316 Murphy Hall. The staff is specially trained to assist you with questions pertaining to academic regulations and procedures, selection of courses, and the many options and alternatives available to enhance your university education.

Some questions can be answered at the college information window or by calling 825-1965. If you would like to confer with a counselor regarding overall degree requirements, academic difficulty, program planning, or assistance in selecting a major, you can arrange an appointment at the information window. Appointments with counseling assistants can be scheduled by calling 206-6681. Group counseling sessions on a variety of academic issues are offered throughout the year.

For information on the Learning Resource Centers, ASK peer counselors, and preparatory programs, see Chapter 2.

Your Major

Most entering freshmen are unsure about specific academic goals and request to be admitted to the college as "undeclared." These students then explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest (see "Choosing Your Major" in Chapter 2 of this catalog).

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When you are ready to do so, obtain approval on a Petition for Declaration of Major from the department or interdepartmental degree committee which governs your intended major and file the form at the College Counseling Service Office.

You can obtain help with your academic planning from a variety of resources, including the College Counseling Service in A316 Murphy Hall (825-1687 or 825-1965) and the Placement and Career Planning Center (825-2981). In addition, faculty members and counselors in each college department are available to discuss in detail the courses and programs in their respective fields. For further suggestions, see "Advising and Academic Assistance" in Chapter 2.

Assessing Progress Toward Your Degree

One of your responsibilities as a UCLA student includes a regular monitoring of all requirements necessary for the degree. It is imperative that you read this catalog carefully and consult regularly with the Letters and Science counseling staff for confirmation of the requirements you need. "Degree checks" are available by appointment. Departmental counselors can advise you regarding progress and completion of your major requirements. A final audit of degree requirements will be sent to you by the Registrar's Office toward the end of your studies. However, it is important that you maintain an accurate assessment of progress toward your degree by utilizing departmental and College Counseling Service resources.

Minimum Progress

UCLA is a full-time institution, and it is expected that students will complete their undergraduate degree requirements promptly. The recommended study load for an undergraduate in the College of Letters and Science is 12 to 16 units per quarter.

According to Academic Senate regulations, Letters and Science undergraduates who do not pass at least 36 units during any three consecutive terms will be placed on probation, and students who do not pass at least 32 units during three consecutive terms will be subject to disqualification from registration at the University. Exceptions may be granted by the college due to poor health, family responsibilities, or regular employment of 20 hours per week or more.

Letters and Science Majors

A major in the College of Letters and Science consists of at least nine and no more than 15 upper division courses (between 36 and 60 units). All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise stipulated by the department. If you have been away from the University for several terms, you should consult with your major department or curriculum adviser concerning the requirements under which you will graduate.

There are three categories of majors in the College of Letters and Science:

Departmental Majors

A departmental major consists of a group of related upper division courses, of which at least six courses are in one department. These majors are supervised by established campus departments. There are 80 departmental majors currently offered by the college.
Majors and Degrees Offered

African Area Studies (M.A.)
African Languages (B.A.)
Afro-American Studies (B.A., M.A.)
American Indian Studies (M.A.)
Ancient Near Eastern Civilizations (B.A.)
Anthropology (B.A., M.A., Ph.D.)
Applied Linguistics (C.Phil., Ph.D.)
Applied Mathematics (B.S.)
Arabic (B.A.)
Archaeology (M.A., C.Phil., Ph.D.)
Asian American Studies (M.A.)
Astrophysics (B.S.)
Atmospheric Sciences (B.S., M.S., C.Phil., Ph.D.)
Biochemistry (B.S., M.S., C.Phil., Ph.D.)
Biology (B.S., M.A., C.Phil., Ph.D.)
Chemistry (B.S., M.S., C.Phil., Ph.D.)
Chemistry/Materials Science (B.S.)
Chicano Studies (B.A.)
Chinese (B.A.)
Classical Civilization (B.A.)
Classics (B.A., M.A., C.Phil., Ph.D.)
Cognitive Science (B.A.)
Communication Studies (B.A.)
Comparative Literature (M.A., C.Phil., Ph.D.)
Cybernetics (B.S.)
Development Studies (B.A.)
East Asian Languages and Cultures (M.A., C.Phil., Ph.D.)
East Asian Studies (B.A.)
Economics (B.A., M.A., C.Phil., Ph.D.)
Economics/Business (B.A.)
Economics/International Area Studies (B.A.)
Economics/System Science (B.S.)
English (B.A., M.A., C.Phil., Ph.D.)
English/Greek (B.A.)
English/Latin (B.A.)
Folklore and Mythology (M.A., Ph.D.)
French (B.A., M.A., C.Phil., Ph.D.)
French and Linguistics (B.A.)
General Chemistry (B.S.)
General Mathematics (B.S.)
General Physics (B.A.)
Geochemistry (M.S., C.Phil., Ph.D.)
Geography (B.A., M.A., C.Phil., Ph.D.)
Geography/Ecosystems (B.A.)
Geology (B.S., M.S., C.Phil., Ph.D.)
Geology -- Engineering Geology (B.S.)
Geology -- Paleobiology (B.S.)
Geophysics -- Applied Geophysics (B.S.)
Geophysics and Space Physics (B.S., M.S., Ph.D.)
German (B.A., M.A.)
Germanic Languages (C.Phil., Ph.D.)
Greek (B.A., M.A.)
Hebrew (B.A.)
Hispanic Languages and Literatures (C.Phil., Ph.D.)
History (B.A., M.A., C.Phil., Ph.D.)
History/Art History (B.A.)
Indo-European Studies (C.Phil., Ph.D.)
Islamic Studies (M.A., C.Phil., Ph.D.)
Italian (B.A., M.A., C.Phil., Ph.D.)
Italian and Special Fields (B.A.)
Japanese (B.A.)
Jewish Studies (B.A.)
Kinesiology (B.S., M.S., Ph.D.)
Latin (B.A., M.A.)
Latin American Studies (B.A., M.A.)
Linguistics (B.A., M.A., C.Phil., Ph.D.)
Linguistics and Anthropology (B.A.)
Linguistics and Computer Science (B.A.)
Linguistics and East Asian Languages and Cultures (B.A.)
Linguistics and English (B.A.)
Linguistics and French (B.A.)
Linguistics and Italian (B.A.)
Linguistics and Philosophy (B.A.)
Linguistics and Psychology (B.A.)
Linguistics and Scandinavian Languages (B.A.)
Linguistics and Spanish (B.A.)
Mathematics (B.S., M.A., M.A.T., C.Phil., Ph.D.)
Mathematics/Applied Science (B.S.)
Mathematics of Computation (B.S.)
Microbiology (B.S., M.A., Ph.D.)
Molecular Biology (Ph.D.)
Near Eastern Languages and Cultures (M.A., C.Phil., Ph.D.)
Near Eastern Studies (B.A.)
Philosophy (B.A., M.A., C.Phil., Ph.D.)
Physics (B.S., M.S.*, M.A.T., Ph.D.)
Political Science (B.A., M.A., C.Phil., Ph.D.)
Portuguese (B.A., M.A.)
Psychobiology (B.S.)
Psychology (B.A., M.A.*, C.Phil., Ph.D.)
Public Administration (M.P.A.**)
Religion, Study of (B.A.)
Romance Linguistics and Literature (M.A., C.Phil., Ph.D.)
Russian Civilization (B.A.)
Russian Linguistics (B.A.)
Scandinavian (M.A.)
Scandinavian Languages (B.A.)
Slavic Languages and Literatures (B.A., M.A., C.Phil., Ph.D.)
Sociology (B.A., M.A., C.Phil., Ph.D.)
Spanish (B.A., M.A.)
Spanish and Linguistics (B.A.)
Spanish and Portuguese (B.A.)
Teaching English as a Second Language (M.A.)
Women's Studies (B.A.)
World Arts and Cultures (B.A.)

*The department admits only applicants whose objective is the Ph.D.
**Not admitting new students at this time.
Interdepartmental Majors

An interdepartmental major consists of at least 13 related upper division courses, of which no more than eight are in one department. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

The College of Letters and Science currently offers 25 interdepartmental majors. Although most lead to bachelor’s degrees, there are some which lead to graduate degrees only. Check the chart of majors and degrees for the programs which interest you.

African Area Studies
Afro-American Studies
American Indian Studies
Applied Linguistics
Archaeology
Asian American Studies
Chemistry/Materials Science
Chicano Studies
Communication Studies
Comparative Literature
Cybertech
Development Studies
East Asian Studies
Economics/System Science
Folklore and Mythology
History/Ant History
Indo-European Studies
Islamic Studies
Latin American Studies
Molecular Biology
Near Eastern Studies
Religion, Study of
Romance Linguistics and Literature
Women’s Studies
World Arts and Cultures

You can find a detailed description of each of these majors under their respective headings later in this chapter.

Individual Majors

If you have some unusual but definite academic interest for which no suitable major is offered at the University and you have completed at least three quarters of work (nine courses) at the University with a grade-point average of 3.4 or better, you may plan an individual major.

The consent of the dean of the Division of Honors and the assistance of a faculty adviser are required.

The major should consist of at least 12 and no more than 15 upper division courses, a majority of which are in departments offering a major in the college. A senior thesis is required. The title of the major will be entered in the memo column of your official transcript; your diploma will read “Individual Field of Concentration.” For further details about individual majors, contact the Division of Honors in A311 Murphy Hall (825-1553).

Supplemental Programs

If you are in good academic standing and wish to change your major, you may petition to do so provided you can complete the new major within the 216-unit limit (228 for double majors and special programs). Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if you are on probation or have begun your last quarter. If you fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses, you may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

Changing Your Major

For information on this program, see “Alternative Academics” in Chapter 2.

Double Majors

If you are in good academic standing, you may be permitted to have a double major consisting of departmental majors from two departments within this college. They must both be completed within the maximum limit of 228 units, and you must obtain the approval of both departments.

With few exceptions, double majors in the same department are unacceptable. You must designate one of the two majors as the principal one for the purpose of satisfying general education requirements. No more than five upper division courses may be common to both majors.

Courses outside the division of the principal major which are required in preparation for that major may be used to satisfy general education requirements. Courses required for the secondary major (including preparation for the major) also may satisfy general education requirements.

The Study List

The required study load for undergraduate students in the College of Letters and Science is 12 to 16 units (three to four courses) per quarter. For exceptions, see “Minimum Progress” earlier in this section. Three courses are recommended for students in the first quarter of the freshman year. All other students may carry four and one-half courses (18 units) without petition. After the first quarter, you may petition to enroll in as many as five courses if you attained at least a B average the preceding quarter in a program of at least three graded courses. First-quarter transfer students from any other campus of the University may carry excess Study Lists on the same basis as students who have completed one or more quarters at UCLA; however, they are not encouraged to do so.

Requirements for the Bachelor’s Degrees

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see “Undergraduate Degree Requirements” in Chapter 2.

College Requirements

The College of Letters and Science has eight requirements which must be satisfied for the award of the degree: unit, major, scholarship, residence, English composition, quantitative reasoning, foreign language, and general education course requirements.
Unit Requirements
You must satisfactorily complete for credit a minimum of 180 units (45 courses) for the bachelor's degree. At least 72 units (18 courses) of the 180 units must be upper division (numbered 100-199). A maximum of 216 (228 for double majors and special programs) units is allowed. If you have advanced placement (transfer) credit, you may exceed the unit maximum by the amount of that credit.

Structure of a Degree
Three types of degree requirements are included within the 180-unit minimum/216- or 228-unit maximum limits for the bachelor's degree:

University Requirements
(1) Subject A or English as a Second Language (ESL)
(2) American History and Institutions

College Requirements
(1) English Composition or ESL Composition
(2) College Proficiencies
   (a) Quantitative Reasoning
   (b) Foreign Language
(3) General Education Course Requirements

Department Requirements
(1) Preparation for the Major
(2) Major Requirements

Electives
The remaining units, defined as electives, are courses which vary according to your interests and goals. When selecting your courses, keep the following degree criteria in mind:

Scholarship
You must attain an overall 2.0 minimum grade-point average in the 180/216 or 228 units required and must satisfy the scholarship requirements of your major department (usually a 2.0 average in the preparation and major courses, but it may be higher in the former, according to departmental requirements).

Residence Requirement
See "Residence Requirements" later in this section.

Upper Division Unit Requirement
At least 72 units (18 courses) must be upper division (numbered 100-199).

Scholarship and Major Requirements
You must attain at least a 2.0 (C) grade-point average in all courses undertaken at this University for receipt of the bachelor's degree. You must also attain a 2.0 GPA in a major and satisfy both the course and scholarship requirements of that major (including preparation for the major) in the College of Letters and Science.

Residence Requirements
Sixty-eight of the last 80 units completed for the degree must be earned in residence in the college. No more than 16 of the 88 units may be completed in UCLA Summer Sessions. While enrolled in the college you must complete at least 10 upper division courses (40 units), including six courses in the major. These residence requirements apply to all students, both continuing and transfer.

English Composition Requirement
Note: You must complete the University’s Subject A or English as a Second Language (ESL) requirement prior to completing the college’s English Composition requirement.

You may satisfy the English Composition requirement by taking one course from English 3, 4, Humanities 2A, 2B, 2C. The course must be taken for a letter grade, and you must receive at least a C; a grade of C – is not acceptable. Humanities 2A, 2B, or 2C may be applied toward the humanities general education requirements; English 3 or 4 may not be applied.

The composition requirement may also be satisfied by scoring 4 or 5 on one of the College Entrance Examination Board (CEEB) Advanced Placement Tests in English or by passing the English 3 Proficiency Examination. Students scoring 660 or better on the CEEB English Composition Achievement Test are eligible for this proficiency exam.

You must satisfy the composition requirement within your first three quarters in residence.

Transfer Students: You may take the English 3 Proficiency Examination (1) if you have completed a transferable English composition course with a Passed grade rather than a letter grade or (2) if you have completed, with a grade of C or better, a college-level English composition course that the Office of Undergraduate Admissions and Relations with Schools does not accept as equivalent to English 3. Like eligible freshmen, you must register for the examination in the Freshman Writing Program Office, 271 Kinsey Hall, before the first day of enrollment for the quarter.

If you have credit for 90 or more units and have not satisfied the requirement, you are expected to include an acceptable composition course on your Study List during your first quarter in residence. If you are required to take English B to satisfy the Subject A requirement, you should, on completion of that requirement, take an acceptable composition course in your second quarter in residence.

English as a Second Language (ESL) Students: If your native language is not English, you may satisfy the English Composition requirement by completing English (ESL) 36 with a grade of C or better (C – or a Passed grade is not acceptable). Admission into course 36 is determined by a Composition Placement Test administered the first day of class each quarter.

College Proficiency Requirements
In the College of Letters and Science you must demonstrate basic proficiency in quantitative reasoning and foreign language.

Note: All courses taken to satisfy GE basic proficiency requirements must be completed with a grade of Passed or C or better.

Quantitative Reasoning: May be satisfied by achieving an SAT mathematics score of 600 or better, a CEEB mathematics score of 550 or better, or by completing one of the following courses: Anthropology 186A; Computer Science 10C or 10F; Economics 40; Mathematics 2 or any higher numbered course except 38A, 38B, and 104; Philosophy 31; Political Science 6; Program in Computing 10A, 10B, 10C; Public Health 100A, 100B, 100C, 100D; Sociology 18; or Statistics 50.

Foreign Language: All students entering UCLA in Fall Quarter 1988 or thereafter must complete the foreign language proficiency requirement by one of the following methods: (1) completing a college-level foreign language course equivalent to UCLA's level three or above OR (2) scoring 3, 4, or 5 on the CEEB Advanced Placement (AP) foreign language examination in French, German, or Spanish, thereby earning college credit OR (3) presenting a UCLA foreign language departmental proficiency examination score indicating competency through level three. The following language courses may be used to fulfill the foreign language proficiency requirement:

African Languages (Linguistics) 1A-1B-1C (Swahili); 7A-7B-7C (Zulu); 11A-11B-11C (Yoruba); 31A-31B-31C (Bambara); 41A-41B-41C (Hausa); 51A-51B-51C (Amharic) Afrikaans (Germanic Languages) 105A, 105B Ancient Near East (Near Eastern Languages) 120A-120B-120C (Ancient Egyptian); 140A-140B (Sumerian) Arabic (Near Eastern Languages) 1A-1B-1C Armenian (Near Eastern Languages) 101A-101B-101C, or 130A-130B and 131A Berber (Near Eastern Languages) 101A-101B-101C
Bulgarian (Slavic Languages) 103A-103B-103C
Czech (Slavic Languages) 102A-102B-102C
Dutch (Germanic Languages) 103A, 103B, 103C
East Asian Languages and Cultures 1A-1B-1C (Chinese); 7A-7B-7C (Korean); 9A-9B-9C (Japanese)
French 1, 2, 3
German (Germanic Languages) 1, 2, 3
Greek (Classics) 1, 2, 3
Hebrew (Near Eastern Languages) 1-1B-1C or 10A-10B-10C
Hungarian (Germanic Languages) 101A, 101B, 101C
Indigenous Languages of the Americas (Linguistics) 18A-18B-18C (Quechua)
Iranian (Near Eastern Languages) 101A-101B-101C (Persian)
Italian 1, 2, 3
Latin (Classics) 1, 2, and 3, or 16
Lithuanian (Slavic Languages) 101A-101B-101C
Polish (Slavic Languages) 102A-102B-102C
Portuguese (Spanish and Portuguese) 1, 2, 3
Romanian (Slavic Languages) 101A-101B-101C
Russian (Slavic Languages) 1, 2, and 3, or 11A-13B (two units each)
Scandinavian 1, 2, 3 (Swedish); 11, 12, 13 (Norwegian); 21, 22, 23 (Danish)
Semitics (Near Eastern Languages) 140A-140B, 141 (Akkadian)
Serbo-Croatian (Slavic Languages) 103A-103B-103C
Spanish (Spanish and Portuguese) 1, 2, 3
Turkic Languages (Near Eastern Languages) 101A-101B-101C (Turkish); 111A-111B-111C (Uzbek)
Ukrainian (Slavic Languages) 101A-101B-101C
Yiddish (Germanic Languages) 1, 2, 3

General Education (GE) Course Requirements

The general education requirements of the college are intended to introduce undergraduates to the richness and diversity of the various academic disciplines. Within the four major divisions of the college—humanities, social sciences, life sciences, and physical sciences—you are encouraged to explore the different possibilities for further university study. Whether or not you have a specific educational goal, general education requirements are designed to broaden your intellectual perspective and to set you on the path to becoming an educated member of society.

The college has approved a revised set of GE course requirements effective Fall Quarter 1987 for all entering freshmen. As specified on the chart labeled "Courses to Fulfill GE Requirements" on the next pages, you must earn units in four courses in the humanities (literature, philosophy, language and linguistics, culture and civilization, the arts), three courses in the physical sciences, four in the social sciences (two from historical analysis and two from social analysis), and three courses in the life sciences. In the humanities, at least one course must be from literature and no more than two may be from any single subgroup. In the physical sciences, two courses must be complementary and one must include a laboratory and/or demonstration component. In the life sciences, one course must include a laboratory and/or demonstration component.

Courses required to satisfy the major or other courses taken in the major department may not be used to satisfy the general education requirements. However, courses outside the major which are required as preparation for a major may be used to satisfy these requirements.

All students entering UCLA in Fall Quarter 1988 with less than 45 quarter units must satisfy the GE requirements as listed in this catalog. Those entering in Fall Quarter 1988 with 45 or more quarter units are not required to complete either the laboratory and/or demonstration component requirement in physical sciences and life sciences or the complementary course requirement in physical sciences.

Course Exemptions: Students majoring in the humanities are exempt from two courses, one in their major subgroup and one other humanities course. Students majoring in the physical sciences are exempt from two courses in the physical sciences group. Students in the social sciences are exempt from two courses in the subgroup of their major, and students in life sciences are exempt from two courses in the life sciences grouping. At least 14 courses (12, with exemptions) must be completed.

Course Substitutions: Two lower division seminars which have been approved for GE credit may be substituted for courses on the "Courses to Fulfill GE Requirements" list. You may make no more than one such substitution per group (humanities, physical sciences, social sciences, life sciences). An annual list of GE seminars is published in the General Education Handbook, and descriptions are listed in the quarterly Schedule of Classes under "Seminars and Special Programs for Undergraduates."

Advanced Placement Credit: For application of advanced placement (AP) credit on the general education requirements, see the chart later in this section or consult the College Counseling Service.

Reciprocity with Other UC Campuses: Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to arriving at UCLA are not required to complete the college's GE requirements at UCLA. Written verification from the college dean at the other UC campus is required. Consult a Letters and Science counselor regarding your eligibility for this option.

General Education Groupings by Major

For the purpose of these requirements, departmental and interdisciplinary majors are classified in the divisions listed below. Not all courses within a department apply on GE requirements in the division of the major (e.g., psychology is listed as a life science; however, Psychology 10 appears as a social science under social analysis).

(A) Humanities

A1: Literature
- African Languages
- Arabic
- Chinese
- Classics
- English
- English/Greek
- English/Latin

French
- German
- Greek
- Hebrew
- Italian (including Italian and Special Fields)
- Japanese
- Latin
- Portuguese
- Scandinavian Languages
- Slavic Languages and Literatures
- Spanish
- Spanish and Portuguese
- World Arts and Cultures

A2: Philosophy

Philosophy

A3: Language and Linguistics
- French and Linguistics
- Linguistics (including all Linguistics and special fields majors)
- Russian Linguistics
- Spanish and Linguistics

A4: Culture and Civilization

Ancient Near Eastern Civilizations
- Classical Civilization
- Jewish Studies

Near Eastern Studies

Religion, Study of

Russian Civilization

(B) Physical Sciences

Applied Mathematics
- Astrophysics
- Atmospheric Sciences
- Biochemistry
- Chemistry
- Chemistry/Materials Science
- Cybernetics
- Economics/System Science

General Chemistry
- General Mathematics
- General Physics

Geology (including all specialization options)

(continued on page 81)
Courses to Fulfill GE Requirements

See “College Proficiency Requirements” on page 77 for courses to fulfill the quantitative reasoning and foreign language GE requirements.

(A) Humanities
Four courses, with at least one from Group A1 and no more than two courses from any single group:

(1) Literature

Classics 40. Survey of Greek Literature in Translation
41. Survey of Latin Literature in Translation
English 10A. English Literature to 1660
10B. English Literature, 1660-1832
70. Major British Authors before 1800
75. Major British Authors, 1800 to the Present
80. Major American Authors
85. The American Novel
90. Shakespeare

95A. Introduction to Poetry
95B. Introduction to Drama
95C. Introduction to Fiction
95D. Introduction to Drama

French 12. Introduction to the Study of French Literature (in French)

German (Germanic Languages) 50A. Masterworks of German Literature in Translation
50B. Masterworks of German Literature in Translation, Romanticism to the Present
101A. Introduction to German Poetry (in German)
101B. Introduction to German Drama (in German)
101C. Introduction to German Narrative Prose (in German)

Humanities 1A. World Literature: Antiquity to Early Middle Ages
1B. World Literature: Early Middle Ages to the 17th Century
1C. World Literature: Age of Enlightenment to the 20th Century
1D. Great Books from the World at Large
2A. Survey of Literature: Antiquity to Early Middle Ages
2B. Survey of Literature: Early Middle Ages to the 17th Century
2C. Survey of Literature: Age of Enlightenment to the 20th Century

Portuguese (Spanish and Portuguese) 40A, 40B. Portuguese, Brazilian, and African Literature in Translation
120A, 120B. Survey of Portuguese Literature (in Portuguese)
130A, 130B. Survey of Brazilian Literature (in Portuguese)

Russian (Slavic Languages) 25. The Russian Novel in Translation
Scandinavian 50. Introduction to Scandinavian Literature

Spanish (Spanish and Portuguese) 60A, 60B, 60C. Hispanic Literature in Translation
120A, 120B. Survey of Spanish Literature (in Spanish)
136A, 136B. Survey of Spanish-American Literature (in Spanish)

(2) Philosophy

Philosophy 1. The Beginnings of Western Philosophy
2. Introduction to the Philosophy of Religion
4. Philosophical Analysis of Contemporary Moral Issues
5A. Philosophy in Literature
6. Historical Introduction to Moral and Political Philosophy
7. Introduction to the Philosophy of Mind
8. Introduction to the Philosophy of Science
10. Virtues and Vices
21. Skepticism and Rationality
22. Introduction to Ethical Theory

(3) Language and Linguistics

Linguistics 1. Introduction to the Study of Language
10. The Structure of English Words

Language: Formal University foreign language instruction at level four or higher; no more than one course at level four or higher may be used

Spanish and Portuguese M35. Spanish, Portuguese, and the Nature of Language

(4) Culture and Civilization

East Asian Languages and Cultures 40A. Chinese Civilization
40B. Japanese Civilization
41. Introduction to Buddhism

Folklore and Mythology 15. Introduction to American Folklore Studies

German (Germanic Languages) 100A. German Civilization and Culture before 1700
100B. Modern German Civilization and Culture from 1700 to 1919
100C. German Civilization and Culture in the 20th Century

History *9A. Introduction to Asian Civilizations: History of India
9C. Introduction to Asian Civilizations: History of Japan
9D. Introduction to Asian Civilizations: History of the Near and Middle East

Italian 42A, 42B. Italian Civilization or Italy through the Ages

Jewish Studies (Near Eastern Languages) 10. Social, Cultural, and Religious Institutions of Judaism

Russian (Slavic Languages) 99A. Introduction to Russian Civilization

Slavic (Slavic Languages) 99. Introduction to Slavic Civilization

Spanish and Portuguese M42. Civilization of Spain and Portugal

M44. Civilization of Spanish America and Brazil

(5) The Arts

Art History (Art, Design, and Art History) 50. Ancient Art
51. Medieval Art
54. Modern Art
55A. Africa, Oceania, and Native America
55B. Arts of Pre-Columbian America
56A. Art of India and Southeast Asia
56B. Introduction to Chinese Art

Classics 51. Art and Archaeology of the Classical World

Dance 134A. History of Dance in Western Culture, Origins to 1600
134B. History of Dance in Western Culture, 1600 to the Present
181A. Dance Cultures of Asia
182A. Dance Cultures of Africa

187A. Dance Cultures of Native American Indians

Design (Art, Design, and Art History) 30A. Nature of Design

Film and Television (Theater, Film, and Television) 106A. History of the American Motion Picture
106B. History of the European Motion Picture
106C. History of African, Asian, and Latin American Film
106D. The Development of Film in Europe and the U.S. from WWI through the Depression
106E. The Development of Film in Europe and the U.S. from WWII to the Present

Music (no more than one course from a single grouping):
(a) 2A, 2B. Introduction to the Literature of Music
138. Aesthetics of Music
(b) 133. Bach
134. Beethoven
135A, 135B, 135C. History of the Opera
(c) 131A, 131B. Music of Hispanic America
140A, 140B, 140C. Musical Cultures of the World
152. Survey of Classical Music in India
157. Music of Brazil

Theater (Theater, Film, and Television) 5A. History and Drama of the Theater from Primitive Times to 1640
5B. History and Drama of the Theater from 1640 to 1900
5C. History and Drama of the Theater from 1900 to the Present
102E. Theater of the Non-European World
104F. History of the American Theater

*Cross-listed courses can fulfill the GE requirement in only one group.
Courses to Fulfill GE Requirements (continued)

(B) Physical Sciences
Three courses from the following, two of which must be complementary and one of which must have a laboratory and/or demonstration component:

Astronomy 3: Astronomy: The Nature of the Universe
4: The Universe of Stars and Stellar Systems
5: Life in the Universe
6: Cosmology: Our Changing Concepts of the Universe
81: Astrophysics I: Stars and Nebulae
82: Astrophysics II: Stellar Evolution, Galaxies, and Cosmology
Atmospheric Sciences 2: Air Pollution
3: Introduction to the Atmospheric Environment
4: California Weather and Climate
5: Climates of Other Worlds
6: Climate and Climatic Change
Chemistry 2: Introductory Chemistry
11A, 11B: General Chemistry
11BL: General Chemistry Laboratory
15: Organic Chemistry and Biochemistry for Pre-nursing and Kinesiology
Earth and Space Sciences 1: Introduction to Earth Science
2: Earth History
5: Earth Science and Society: Geologic Ecological Interactions
9: Origin and Evolution of the Solar System
*15: Introduction to Oceanography
Geography 1: Physical Environment
Mathematics 2: Finite Mathematics
3A, 3B: Calculus for Life Sciences Students
3E: Calculus for Economics Students
31A, 31B: Calculus and Analytic Geometry
Physics 3A: General Physics: Mechanics of Solids and Fluids
3B: General Physics: Heat, Sound, Electricity and Magnetism
3C: General Physics: Light, Relativity, and Modern Physics
6A: Physics for Life Sciences Majors: Mechanics
6B: Physics for Life Sciences Majors: Electricity and Magnetism
6C: Physics for Life Sciences Majors: Light and Modern Physics
8A: Physics for Scientists and Engineers
8B: Physics for Scientists and Engineers: Waves, Sound, Heat
8C: Physics for Scientists and Engineers: Electricity and Magnetism
10: Physics

Courses with a laboratory and/or demonstration component include Astronomy 3, 81, 82, Atmospheric Sciences 3, 4, Chemistry 11BL, 15L, Earth and Space Sciences 1, 2, 15, Geography 1, Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A, 8B, 8C, 10.

(C) Social Sciences
Four courses, two from each group:

1) Historical Analysis
Two courses from a single sequence are recommended:
Classics 10: Survey of Classical Greek Culture
20: Survey of Roman Civilization
History 1A, 1B, 1C: Introduction to Western Civilization
3A, 3B, 3C: Introduction to the History of Science
3D: Themes in the History of Medicine
4: Introduction of the History of Religions
5A, 5B: Survey of British History
6A, 6B, 6C: History of the American Peoples
7A, 7B: Survey of the Political History of the U.S.
8A: Latin America: Reform and Revolution
8B: Latin American Social History
8C: Central America: The Struggle for Change
*5A: Introduction to Asian Civilizations: History of India
*9C: Introduction to Asian Civilizations: History of Japan

*9D: Introduction to Asian Civilizations: History of the Near and Middle East
*10A, *10B: Introduction to the Civilizations of Africa
*11A, *11B: History of China
Political Science 10: Introduction to Political Theory

2) Social Analysis
Anthropology 5 (Principles of Cultural Anthropology or 22 (General Cultural Anthropology)
6: World Archaeology: An Introduction
Communication Studies 10: Introduction to Communication Studies
Economics 1, 2: Principles of Economics
5: Introductory Economics
Geography 3: Cultural Geography
4: Human Location and Behavior
Political Science 20: World Politics
40: Introduction to Politics
50: Introduction to Comparative Politics
Psychology 10 (Introductory Psychology) or 11 (Principles of Psychology)
Social Sciences 20: Racial Minorities in the U.S.
Sociology 1: Introductory Sociology
2: Changing Society and Making History
3: The Sociology of Everyday Life
4: Jobs and Careers: A Sociological Approach
Women's Studies 10: Perspectives on Women and Men in Society

3) Life Sciences
Three courses from the following, one of which must have a laboratory and/or demonstration component:
Anthropology 1: The Principles of Human Evolution: Genetic Basis
2 (The Principles of Human Evolution: Comparative Analysis) or 11 (Human Evolution)
Biology 2: Principles of Modern Biology
3: Introduction to Human Physiology and Disease
5: Biology of Organisms
5L: Organismic and Environmental Biology Laboratory
6: Ecology, Evolution, and Behavior
7: Introductory Cellular and Molecular Biology
8: Introductory Genetics
10: Plants and Civilization
13: Evolution of Life
20: Introduction to Human Heredity
25: The Oceans
40: AIDS and Other Sexually Transmitted Diseases: The Modern Plague
70: Genetic Engineering and Society
Earth and Space Sciences 15: Introduction to Oceanography
16: Principles of Paleontology
Geography 2: Biogeography
5: People and the Earth's Ecosystems
Kinesiology 13: Introduction to Human Anatomy
Microbiology 6: Introduction to Microbiology
Psychology 15: Introductory Psychobiology

Courses with a laboratory and/or demonstration component include Biology 2, 3, 5, 6, 7, 8, 10, 20, Earth and Space Sciences 15, 16, Geography 2, 5, Kinesiology 13.

All honors sections of the above courses also fulfill GE requirements.

Honors Collegium: Inquire at the Division of Honors (A311 Murphy Hall) for information on courses which satisfy any of the areas of the general education requirement.

*Cross-listed courses can fulfill the GE requirement in only one area.
Geophysics (including all specialization options)
Mathematics
Mathematics/Applied Science
Mathematics of Computation
Physics

(C) Social Sciences
C1: Historical Analysis
History
History/Art History
C2: Social Analysis
Afro-American Studies
Anthropology
Chicano Studies
Communication Studies
Development Studies
East Asian Studies
Economics (including all specialization options except Economics/System Science)
Geography
Geography/Ecosystems
Latin American Studies
Political Science
Sociology
Women's Studies

(D) Life Sciences
Biology
Cognitive Science
Kinesiology
Microbiology
Psychobiology
Psychology

Credit Limitations

Note: Transfer students with credit from other institutions (advanced standing credit) receive an evaluation from the Office of Undergraduate Admissions and Relations with Schools indicating the transferrable units from their former institution(s); however, the following credit limitations may reduce the total number of transferred units which will apply toward the degree in the College of Letters and Science. Consult with a counselor in the College Counseling Service regarding these limitations.

The following credit limitations apply for all students enrolled in the college. In most cases units are not deducted until the final quarter before graduation. Consult a counselor in the College Counseling Service if you have questions.

Subject A
If you do not satisfy the Subject A requirement prior to enrolling at UC, you must pass an approved course or other program prescribed by your UC campus of residence. Only after satisfying the Subject A requirement can you take for transfer credit an English composition course after enrolling at UCLA. Consult a college counselor regarding Subject A equivalent courses from other UC campuses.

Community College
After completing 105 quarter units (26 2/3 courses) toward the degree in all institutions attended, you are allowed no further unit credit for courses completed at a community college.

Physical Education
No more than four units in physical education activities courses may be applied toward the bachelor's degree.

300- and 400-Level Courses
No more than two courses (eight units) in the 300 and 400 series of courses may be applied toward the bachelor's degree. Credit is not granted for X300 and X400 courses taken in University Extension unless you have petitioned the college for approval before enrollment. Such petitions are rarely granted.

Performance Courses
No more than 12 units of music and/or dance performance courses (Dance 71B through 79Z, 171B through 179Z, and Music 90A through 90N and 91A-91Z) may be applied toward the bachelor's degree whether taken at UCLA or another institution.

Note: You may not repeat for units or grade points any AP Test credit that has been given UCLA course number equivalency (e.g., History 7A-7B).

* All UCLA course equivalents consist of lower division advanced placement units.
** Students who take both tests receive a maximum of eight units of credit.
Foreign Language
Credit will not be allowed for a less advanced course in grammar and/or composition after you have completed a more advanced course. College credit for an international student's native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division (advanced language courses only) and graduate courses taken at the University of California or another English-speaking institution of approved standing (no credit is allowed for lower division courses).

College Level Examination Program
Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor's degree.

Advanced Placement (AP) Tests
Advanced Placement (AP) Test credit may not be applied toward a degree unless you had less than 36 units of credit at the time of the examination(s).

ROTC Courses
No more than 36 units of credit in aerospace studies or 24 units in military science or naval science may be applied to the 180-unit minimum required for the degree.

Independent Study Courses
No more than two courses (eight units) of credit may be taken per quarter in special independent study courses. The total number of units allowed in such courses for a letter grade is 16; see specific restrictions under each departmental listing.

Chemistry 2
No unit credit is granted toward the degree for Chemistry 2 if one year of high school chemistry was completed with a grade of C or better. Effective Fall Quarter 1984 and thereafter, units and grade points are deducted at graduation for the duplicated chemistry courses. The maximum deduction is four units.

Physics 3A, 6A, 8A, 10
Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to a total of six units of credit.

Statistics
No credit is allowed for more than one lower division course in statistics (Economics 40, Geography 40, Political Science 6, Psychology 41, Sociology 18, Statistics 50) or for more than one sequence of such courses whether taken at UCLA or another institution.

Education Abroad Program
Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the eight units maximum allowable for the Intensive Language Program.

Credit by Examination
Within the College of Letters and Science, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or the Division of Honors.

You may petition for credit by examination for one course at a time. The examination for that course must be taken successfully before you may petition for credit by examination in another course. Petitions for credit by examination ($5 each) are available only through an appointment with a counselor in the Division of Honors. Approval is given or withheld by the dean of the Division of Honors who may limit the number of such petitions you present.

Honors
College Honors
The Certificate of College Honors is the highest academic recognition the College of Letters and Science confers on its undergraduates. The College Honors program provides the exceptional Letters and Science undergraduate an opportunity to pursue individual excellence.

The certificate is awarded to graduating seniors with an overall University of California grade-point average of 3.5 or better who have completed either 44 units of honors coursework or 36 units of honors coursework that include a senior research project/thesis based on original research. With the assistance of Division of Honors counselors, you integrate this coursework throughout your undergraduate education with other University, college, and major requirements for the bachelor's degree. In this way, these units need not be above and beyond your other academic commitments.

Students in the College Honors program are entitled to specialized counseling within the division, preferential preenrollment in classes each quarter, access to specially designed honors classes, eligibility for unique scholarships and research stipends, attendance at special forums, speeches, and events, counseling on graduate and preprofessional programs, graduate library privileges, access to the honors computer facility, and a filing and mailing service for letters of recommendation. Incoming freshmen who are eligible for College Honors based on SAT scores and GPA are also assisted in obtaining on-campus student housing for the first year.

To qualify for College Honors, entering freshmen must (1) have an overall GPA of 3.85 or better and an SAT score of 1,300 or better (on one test date) or an ACT score of 30 or better or (2) graduate in the top three percent of their high school class or (3) qualify through the Division of Honors Educational Enhancement Program (see below). Continuing UCLA and transfer students with at least 12 or more graded units at UCLA and a cumulative UC GPA of 3.5 or better who can complete the honors course requirements prior to graduation are encouraged to participate, as are both regularly qualified and potentially successful underrepresented minority students.

The Educational Enhancement Program offers low-income, minority, disabled, and other nontraditional students who might not otherwise be able to participate an opportunity to qualify for UCLA's College Honors program. Contact the Division of Honors for more information.

You may apply for admission to College Honors at A311 Murphy Hall. For further information, attend one of the group meetings offered regularly by the Division of Honors.

Honors Status
A student in the College of Letters and Science who has demonstrated superior academic achievement is eligible to apply for admission to Honors Status, which is recorded on the transcript. Admission may be granted by the dean of the Division of Honors after completion of 12 or more graded units at UCLA with a cumulative UC grade-point average of no less than 3.5. Continued superior academic performance is required for students to remain in Honors Status. Apply at A311 Murphy Hall.

Students with Honors Status are entitled to specialized counseling within the division, access to the honors computer facility, and a filing and mailing service for letters of recommendation. Honors Status students are also eligible for research funding through the Division of Honors. For details on these programs, contact the Division of Honors or departmental advisors.

Honors with the Bachelor's Degree
Honors with the Bachelor's Degree are awarded according to your overall grade-point average at the beginning of your last quarter of academic work or, if not then eligible, at graduation. To be eligible, you must have completed 90 or more graded units at the University of California. Coursework taken on the Education Abroad Program may not be applied toward Honors with the Bachelor's Degree. The levels of honors and the requirements for each level are: Cum laude, an overall average of 3.5; Magna cum laude, 3.65; Summa cum laude, 3.85.
Dean's Honors List

The Dean's Honors List recognizes high scholastic achievement in any one quarter. The following criteria are used to note Dean's Honors List on the student records: (1) a 3.75 GPA in any one quarter with at least 12 graded units and no grade of NP or I; or (2) a 3.66 GPA and at least 56 grade points during the quarter, with no grade of NP or I. Dean's Honors List is automatically recorded on your transcript.

Departmental Scholar Program

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as Departmental Scholars to pursue bachelor’s and master’s degrees simultaneously.

Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and a UC cumulative GPA of 3.5 or better. You must also have at least one quarter's coursework remaining at UCLA. To obtain both the bachelor’s and master’s degrees you must be provisionally admitted to the Graduate Division, fulfill requirements for both degrees. If you are not accepted by a professional school, you must declare a major in the College of Letters and Science and complete the requirements for a degree without exceeding 216 units.

New students entering these curricula are listed as “undeclared” majors and are advised in the college unless an adviser is named below in the presentation of the curriculum.

Prehealth Care Advising Office

Information and counseling on preparing for health care professional schools and assistance in filing an application are available through the Prehealth Care Advising Office, College of Letters and Science. Open counseling sessions are held weekly for premeds, prenurses, and other prehealth students (time and place are announced in the “What's Bruin” section of the Daily Bruin and are posted outside A328 Murphy Hall, 825-1817). Application blanks for AMCAS, MCAT, DAT, etc., may also be obtained from this office. Students in the Division of Honors can make counseling appointments in A311 Murphy Hall.

Predental Curriculum: Three Years

The College of Letters and Science offers a predental curriculum designed to fulfill the basic educational requirements for admission to several dental schools and the general educational requirements of the College of Letters and Science. You should determine and satisfy the specific requirements of the dental schools to which you expect to apply.

To be adequately prepared for the predental curriculum, you should take the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and foreign language.

The 135 quarter units of work required for admission to the UCLA School of Dentistry in this curriculum include the following:

General University Requirements: (1) Subject A; (2) American History and Institutions.

Specific UCLA School of Dentistry Requirements: (1) English 3 and 4; (2) Chemistry 10.

4A, 8B, and 8C, Biology 5, 5L, 7, 8, 8L; (3) Psychology 10.

Social sciences and humanities courses such as anthropology, history, economics, psychology, political science, appreciation of art and music, and philosophy should also be included.

For further information, consult Admissions Requirements of U.S. and Canadian Dental Schools, AADS, 1625 Massachusetts Avenue NW, Washington, DC 20036. Sample copies of the Dental Admission Test (DAT) are available in the Prehealth Care Advising Office; open counseling sessions are held weekly (call 825-1817 for details).

Predental Hygiene Curriculum: Two Years*

The University offers a four-year program in dental hygiene leading to the degree of Bachelor of Science. The first two years may be taken at Los Angeles; the last two years must be taken at the School of Dentistry at the University of California, San Francisco. Admission to UCSF is by competitive application.

The 90 quarter units of work required for admission to the School of Dentistry at UCSF include specific requirements as follows (the courses referred to are UCLA courses which fulfill the requirements):

Curriculum Requirements: (1) Subject A; (2) American History and Institutions (the examination in American History and Institutions may be taken at the UCSF School of Dentistry, but it is preferable to satisfy the requirements in the predental program); (3) one year of English which includes English 3; (4) Chemistry 11A, 11B/11BL, 21, 23, 25; (5) Biology 5, 5L, 7, 8, 8L; (6) Psychology 10 and one additional psychology course; (7) 16 units in social sciences and humanities, including foreign language (one course in speech and one in sociology are required). Courses in anatomy and physiology are strongly recommended.

Open counseling sessions are held weekly; call 825-1817 for details.

Premedical Studies: Four Years

If you intend to apply for admission to a medical school and wish to complete the requirements for a bachelor's degree before such admission, you should select a major within the College of Letters and Science. Medical schools have no preference as to major. You should choose the major in which you are most interested and can do best. In addition to fulfilling the requirements of the selected major, you should satisfy the specific requirements for medical schools to which you expect to apply.

---

*The UCSF School of Dentistry reserves the right to limit enrollment if applications exceed available facilities and to require interviews and aptitude tests if they are necessary in the selection of the class. For further information, see the Announcement of the School of Dentistry, UC San Francisco.
High school preparation for premedical studies at the University should include English, three units; U.S. history, one unit; mathematics, three and one-half units; chemistry, one unit; physics, one unit; biology, one unit; foreign language (preferably French or German), two units. It is desirable that a course in freehand drawing be taken in high school.

The following courses are usually required for admission to the UCLA Medical School: (1) 12 quarter units of English, including at least one course in English composition; (2) Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; (3) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C; (4) two years of college biology to include the study of cellular, molecular, developmental, and genetic biology, including at least one year of upper division courses. Required lower division courses are Biology 5, 5L, 7, 8, 8L; suggested upper division courses are selected from Biology 110, 138, 144, CM156, 166. Courses in physical chemistry and calculus are strongly recommended. Course requirements for admission to other University of California medical schools vary slightly. Because requirements for admission to medical schools outside the University of California also vary somewhat, you should consult the following publications: *Medical School Admission Requirements, U.S. and Canada*, Association of American Medical Colleges, 1 Dupont Circle NW, Washington, DC 20036; *The Education of Osteopathic Physicians*, AACOM, 6110 Executive Boulevard, Suite 405, Rockville, MD 20852; and *The New MCAT Student Manual* (also an AAMC publication available at the above AAMC address). Open counseling sessions are held weekly; call 825-1817 for details.

Prenursing Curriculum: Two Years

The University offers a four-year course leading to the Bachelor of Science degree in Nursing. The prenursing curriculum in the College of Letters and Science is designed to prepare you for the program in the UCLA School of Nursing. You should apply to the School of Nursing when you have completed or have in progress 84 quarter credits of liberal arts courses with a grade-point average of at least 2.8. Since you must apply during the Fall Quarter of the year prior to the year in which you wish to be enrolled, you must present your proposed curriculum for the remaining quarters.

Because enrollment in the UCLA School of Nursing is limited, you should become familiar with the admission requirements of other nursing programs as early as possible. Contact schools of nursing directly and attend open counseling sessions in UCLA's School of Nursing (times are posted in the Office of Student Affairs, 2-200 Factor Building) and those given by the Prehealth Care Advising Office (posted outside A328 Murphy Hall, 825-1817).

New students admitted to the college in this curriculum are counseled in the college as "undeclared" majors but may seek additional advisement during posted weekly open counseling sessions. Students in the college who do not transfer to the UCLA School of Nursing must declare a major and be able to complete all degree requirements within 216 units.

Prepharmacy Curriculum: Three Years

A three-year program designed to prepare you for admission to optometric schools may be completed in the College of Letters and Science. If you are planning to transfer to the School of Optometry at Berkeley, you should contact Assistant Dean Carter of the School of Optometry, University of California, Berkeley, CA 94720, (415) 642-9537, as early in your preprofessional studies as possible.

You will be adequately prepared for preoptometric studies if you have taken the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and two years of one foreign language.

The 135 quarter units of work required for admission to the School of Optometry, UC Berkeley, include the following: (1) Subject A; (2) American History and Institutions.

Specific UC Berkeley School of Optometry Requirements: (1) English 3, 4; (2) Chemistry 11A, 11B/11BL, 11C/11CL; (3) trigonometry and intermediate algebra (if not completed in high school); (5) 28 quarter units of electives selected from courses in foreign language, social sciences, and humanities (within the two-year preparation).

Prepharmacy Curriculum Requirements (First Year): (1) Subject A; (2) English 3, 4; (3) Chemistry 11A, 11B/11BL, 11C/11CL; (4) trigonometry and intermediate algebra; (5) 28 quarter units of electives selected from courses in foreign language, social sciences, and humanities (within the two-year preparation).

Curriculum Requirements (Second Year): (1) Biology 5, 7, 8, 8L; (2) Physics 3A and 3B, or 6A and 6B, or 8A and 8B; (3) Mathematics 3A and 3B, or 31A and 31B; (4) Chemistry 21, 23; (5) American History and Institutions.

For further information, contact Robert LeWinter, Director of Pharmaceutical Services, 17-135 Center for the Health Sciences (206-6555). Open counseling sessions are held weekly; call 825-1817 for details.

Prephysical Therapy Curriculum: Three or Four Years

Students who intend to apply for admission to a physical therapy school should select a major (kinesiology and psychology are commonly selected) and complete the following prerequisite courses: Kinesiology 12A, 12B, and 13 or 14; Biology 5, 7; Chemistry 11A, 11B/11BL, 15, 15L; Physics 3A, 3B, 3C; Psychology 10, 115, 127, 130. Recommended: one course in statistics and one in computing. The prerequisite courses should be taken for a letter grade; GPAs for these courses should not be lower than 3.0, with no grade lower than a C.

Information on physical therapy programs in California may be obtained from the Student Affairs Office in the Department of Kinesiology, 2834 Slichter Hall (825-3891). You should
write each school early in your sophomore year for specific admission requirements and application deadlines. Information concerning out-of-state programs may be obtained from the American Physical Therapy Association, 1156 15th St. NW, Washington, DC 20005.

Prepublic Health Studies
The professional and academic fields of public health need individuals from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds and training, including mathematics and the physical, biological, and social sciences. Preparation typically includes a minimum of two courses each in mathematics, biological sciences, and career goals.

Interested students and those who wish to apply to the UCLA School of Public Health should review the school's announcement booklet for additional requirements or recommendations for entry into the various programs of study.

Prelaw Studies
Law schools have no preference with regard to specific majors or particular courses. Admission to law school is based on the quality of your academic work, LSAT scores, and other qualities as reflected in letters of recommendation, in the written application, and in interviews. The College of Letters and Science offers advising on preparing for and applying to law schools through weekly drop-in counseling sessions. For the time and place of the drop-in sessions, see the "What's Bruin" section of the Daily Bruin or call 825-1965. Students in the Division of Honors can make counseling appointments in A311 Murphy Hall.

For additional information, see the Law School Admission Bulletin within the "Law School Admission Service Packet" (available at the Admissions Office, UCLA Law School).

Graduate Study
The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master's and doctoral degrees. See the departmental listings which follow for specific requirements and procedures.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Kobla Ladzekpo, B.F.A. (Music)

Adjunct Assistant Professor
Joseph J. Lauer, Ph.D. (Library and Information Science)

Scope and Objectives
The basic objective of the African Area Studies Program is an intellectual one — to provide interested students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers high quality African area courses in a wide range of fields, including not only the social sciences and humanities, but increasingly in the professional fields as well. The Master of Arts is not a professional degree, but students are encouraged to enroll in courses in the several professional schools on campus. Articulated degree programs are also offered.

Academic flexibility draws many students to the program. Because there are more than 65 faculty members on campus with African interest and experience in approximately 20 different disciplines, students have multiple options to design individual programs.

According to a recent survey, 37 percent of the program's graduates are continuing study at the postgraduate level, 25 percent are employed in higher education, and 24 percent work with international or foreign organizations in 20 countries.

Master of Arts Degree
Admission
In addition to the University minimum requirements, applicants are required to (1) take the Graduate Record Examination (GRE), (2) submit three letters of recommendation from academic referees, one of which may be from an employer if the applicant has been away from school for some time, (3) submit a sample research project as evidence of serious scholarly potential, and (4) present a resumé describing both academic and professional experience.

In addition to meeting the requirements of the Graduate Division, you must have adequate preparation in undergraduate fields related to the program. Required preparation for the M.A. degree in African Area Studies is a Bachelor of Arts in the social sciences or arts and humanities.

Major Fields or Subdisciplines
Studies are concentrated in a major and minor discipline in the social sciences, arts and humanities, or professional schools. For more information and a brochure describing the program, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall, UCLA, Los Angeles, CA 90024-1310.
Foreign Language Requirement
You are required to satisfy the language requirement by one of the following methods: (1) taking three courses (12 units) in an African language with an average grade of B or better (these courses may not be applied toward the nine courses required for the degree), (2) passing a Linguistics Department examination in an African language not regularly offered, (3) proving that you are a native speaker of an African language, or (4) proving that you have a Foreign Service Institute rating of three or above in an African language.

Course Requirements
A minimum of nine courses is required for the M.A., at least five of which must be at the graduate level. The courses must be distributed among disciplines as follows: (1) major discipline — a minimum of five courses, of which three must be at the graduate level. Sociology and anthropology may be taken as a combined major. Other combined majors must be approved by the graduate adviser; (2) minor discipline — a minimum of three courses, of which two must be at the graduate level; (3) third discipline — a course on Africa, preferably either in an African language, or (4) proving that you have demonstrated competence in your minor field, you must successfully complete the three required courses with grades of B or better. In individual cases, if competence is not demonstrated by the coursework, a question on the minor field is included in the comprehensive examination.

Thesis Plan
The program normally requires a written comprehensive examination for the M.A. degree. In exceptional cases, and with consent of the graduate adviser, a thesis may be substituted for the comprehensive examination. If you wish to follow the thesis plan, you should select, in consultation with the graduate adviser, a faculty committee to supervise your thesis. The thesis must reflect both the major and minor areas of emphasis. Normally the thesis should be submitted to the committee at the beginning of your fourth quarter in residence and should be approved before the end of that quarter. If the committee does not approve the thesis, you will have failed the requirement and are not allowed to resubmit the thesis.

Comprehensive Examination Plan
If you select the comprehensive examination plan, you are required to take a written examination administered by a three-person committee. It is your responsibility to make arrangements for this examination with faculty members in appropriate departments. Exceptions are granted only with consent of the graduate adviser. The examination normally is three hours in length.

An oral examination may be held at the discretion of the examining committee after it has read the written examination. If you fail the comprehensive examination, you may retake it only once with consent of the graduate adviser.

Minor Field Certification: To effectively demonstrate competence in your minor field, you must successfully complete the three required courses with grades of B or better. In individual cases, if competence is not demonstrated by the coursework, a question on the minor field is included in the comprehensive examination.

African Development Studies within the M.A. in African Area Studies
Students interested in an interdisciplinary program in African development studies within the existing master's program should consult the graduate adviser. Coursework focuses on planning and development.

Cooperative Degree Programs
In the articulated degree programs described below, no course may be used for credit toward more than one degree. Thus, courses that have been applied toward the completion of the M.A. degree in African Area Studies may not also be applied toward any other degree.

For more information on any of the cooperative degree programs, contact the Graduate Adviser or Assistant Graduate Adviser, M.A. Program in African Area Studies.

M.F.A./M.A.-African Area Studies
The African Area Studies Program and the Motion Picture/Television Division of the Department of Theater, Film, and Television have an articulated degree program which allows students to combine study for the M.A. in African Area Studies and the M.F.A., with a specialization in motion picture/television. Additional information is available from Teshome Gabriel, Graduate Adviser, African Area Studies Program, and the Graduate Adviser, Graduate Student Affairs Office, Motion Picture/Television Division, UCLA Theater, Film, and Television Department.

M.P.H./M.A.-African Area Studies
The African Area Studies Program and the School of Public Health have an articulated degree program whereby you can work sequentially for the master's degree in African area studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees. Potential applicants may also contact the Office of Student Affairs, UCLA School of Public Health.

Graduate Courses
M229B. Africana Bibliography and Research Methods. (Same as Library and Information Science M229B) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using the full range of available information resources, including library collections of books, serials, and computerized data bases.

Mr. Lauer
375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

African Area Studies Course List
All courses are not offered every academic year. You should verify courses with the respective departments.

African Languages (Linguistics) 1A-1B-1C. Elementary Swahili
2A-B2-2C. Intermediate Swahili
7A-7B-7C. Elementary Zulu
8A-8B-8C. Intermediate Zulu
11A-11B-11C. Elementary Yoruba
31A-31B-31C. Elementary Bambara
41A-41B-41C. Elementary Hausa
42A-42B-42C. Intermediate Hausa
103A-103B-103C. Advanced Swahili
143A-143B-143C. Advanced Hausa
150A-150B. African Literature in English Translation
190. Survey of African Languages
199. Special Studies in African Languages
270. Seminar in African Literature
Afrikaans (Germanic Languages) 105A. Elementary Afrikaans
105B. Intermediate Afrikaans
114. Afrikaans Language in Translation
135. Introduction to Afrikaans Literature
Anthropology 112. Old Stone Age Archaeology
M115S. Historical Archaeology
118A, 118B. Museum Studies
121A. Fossil Man and His Culture
121B. The Australopithecines
121C. Evolution of the Genus Homo
133P. Social and Psychological Aspects of Myth and Ritual
133R. Aesthetic Anthropology
135Q. The Individual in Culture
Berber (Near Eastern Languages) 101A-101B-101C. Elementary Berber
102A-102B-102C. Advanced Berber
130. The Berbers
Dance 172B. Dance of Ghana
182A. Dance Cultures of Africa
Economics 110. Economic Problems of Underdeveloped Countries
111. Theories of Economic Growth and Development
112. Policies for Economic Development
266A. Economic Development
266B. Analysis and Appraisal of Development Projects
267A-267Z. Topics in Development Economics
Education 204C. Education and National Development
238. Cross-National Analysis of Higher Education
235B. Seminar: African Education
253F. Seminar: Education in Revolutionary Societies
462. Seminar: The Community College
English 114. World Literatures in English
261. Studies in African Literature in English
English (ESL) 109J. Introduction to Literature for ESL Students
109K. Literature in the ESL Context
220K. Materials Development for Language Teaching
221K. Media for Language Teaching
222K. Role of English as a Second Language in Bilingual Education
280K. Language Policy in Developing Countries
285K. Studies in African Literature in English
Film and Television (Theater, Film, and Television) 106C. History of African, Asian, and Latin American Film
108. History of Documentary Film
112. Film and Social Change
M209C. Ethnographic Film
219. Seminar in Film and Society
221. Seminar in Film Authors
M265A-M265B. Ethnographic Film Direction
276. Seminar in Non-Western Films
Folklore and Mythology M154A-M154B. The Afro-American Musical Heritage
M155. Oral Traditions in Africa
M235. African Myth and Mythology
Geography 101. Coastal Geomorphology
108. World Vegetation
109. Ecology of Vegetation
112. Animal Geography: Biophysical Aspects
117. Animal Geography: Cultural Aspects
118. Medical Geography
122. Man and Environment in Africa
128. The World's Ecosystems: Problems and Issues
133. Cultural Geography of the Modern World
169. The Earth from Above
188. Northern Africa
189. Middle and Southern Africa
202. Fluvial Geomorphology Seminar
203. Glacial Geomorphology Seminar
212. Advanced Biogeography: Animals
229. Seminar: Man and Environment
232. Advanced Cultural Geography
233. Seminar: Cultural Geography
242. Advanced Population Geography
269. Remote Sensing of Environment
M278. Dating Techniques in Environmental Sciences and Archaeology
288. Northern Africa
289. Middle and Southern Africa
291. And Lands
History 10A-10B. Introduction to the Civilizations of Africa
M158B-M158C. Introduction to Afro-American History
175A. Topics in African History: Prehistoric Africa — Technological and Cultural Traditions
175B. Topics in African History: Africa and the Slave Trade
175C. Topics in African History: Africa in the Age of Imperialism
176A-176B. History of West Africa
178A-178B. History of Eastern Africa
179A-179B. History of Southern Africa
197. Undergraduate Seminars
200N. Advanced Historiography: Africa
201N. Topics in History: Africa
275. Introduction to the Professional Study of African History
276. African Archaeology: Field Techniques
277. Afro-American Archaeology: Data Analysis
278A-278B. Seminar in African History
Music 91E. Music and Dance of Ghana
140B. Musical Cultures of the World
143A-143B. Music of Africa
M154A-M154B. The Afro-American Musical Heritage
157. Music of Brazil
290. Seminar in Ethnomusicology
297. Seminar in African Music
C290A-C290B. Proseminar in Ethnomusicology
Political Science 139A-139Z. Special Studies in International Relations
165. Government and Politics in North Africa
166A-166B-166C. Government and Politics in Sub-Saharan Africa
167. Ideology and Development in World Politics
C250E. Seminars in Regional and Area Political Studies: African Studies
C271. Seminar in Political Change
Public Health 112. Principles of Epidemiology
114. Epidemiology I
160. Principles of Food and Nutrition
161. Nutrition and Health
171B. Family Health and Population: Principles and Issues
212H. Epidemiology of Arthropod-Borne Disease
214. Infectious and Tropical Disease Epidemiology
218A. 218B. Protozoal Diseases of Man
220A. 220B. helmintic Diseases of Man
222. Seminar in Epidemiology: Infectious and Tropical Disease
240. Health Care Issues in International Perspective
270. Maternal and Child Nutrition
272. Seminar on Current Issues in Maternal and Child Health
M274A-M274B. Population Policy and Fertility
M274C. Seminar in Population Policy and Fertility
275. Human Lactation: Biological and Public Health Significance
470A. International Health Agencies and Programs
470B. Advanced Issues in International Health
472A. Maternal and Child Health in Developing Areas
472B. Recent Developments in Maternal and Child Health in Disadvantaged Countries
African Studies
(Interdepartmental)

10244 Bunche Hall, (213) 825-2944

Professors
Christopher Ehret, Ph.D. (History), Chair
Richard L. Sklar, Ph.D. (Political Science)

Associate Professor
Thomas J. Hinnebusch, Ph.D. (Linguistics and African Languages)

Scope and Objectives

This special undergraduate program is designed primarily for (1) students who plan to live and work in Africa or who are interested in government and public service careers involving African affairs and (2) students who plan to pursue graduate work in one of the social sciences or Near Eastern and African languages, with primary concentration on the African field.

The philosophy of the specialization is that people with a solid background in one of the established disciplines can make the best contribution to an understanding of Africa and its problems. Thus, the specialization can be taken only jointly with work toward the bachelor's degree, normally in one of the following fields: anthropology, economics, geography, history, linguistics, political science, or sociology. Students completing this special program receive a degree with a major in a selected discipline and specialization in African studies. The chair of the committee in charge certifies completion of the program.

Special Undergraduate Program

Preparation for the Specialization

Required: Two courses from History 10A, 10B, and African Languages 190. Training in Arabic, French, Portuguese, or an African language is highly recommended.

Upper Division

Students are required to take a departmental major in the social sciences or, by special arrangement with the committee chair, in the humanities or arts. In addition, they are required to take a course related to Africa in each of four departments. One required upper division course related to Africa may, however, be replaced by a three-quarter sequence of any African language.

For more information, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall (825-2944) or Professor Christopher Ehret, History, 6265 Bunche Hall (825-4093, 825-4561).

Bevery J. Robinson, Ph.D. (Theater, Film, and Television)

Lecturers
Barbara A. Bass, M.S.W. (Psychiatry)
Kenny Burrall, B.A.

Scope and Objectives

The Afro-American studies major is a relatively new major at UCLA. Originally born during the late 1960s and early 1970s, the program was designed to fill a void that existed at UCLA in terms of social science material relevant to the black experience. Students and faculty currently associated with the program see the Afro-American studies major as meeting a number of academic, personal, and social needs.

The program offers both a Bachelor of Arts and a Master of Arts degree. While it is important that students become expert within a traditional discipline, it is even more important that students examine both the truth and the fiction regarding the Afro-American experience in the U.S. For Afro-American students, this leads to a heightening of self-awareness and self-pride. For non-Afro-American students, such a major provides a broadening of perspectives to take into account more than a singular cultural view.

The fundamental goal of the curriculum is to provide students with a comprehensive and multidisciplinary introduction to the crucial life experiences of Afro-Americans. This goal is achieved in two primary ways. First, it provides an interdisciplinary exposure to particular features of the Afro-American experience. Majors gain an in-depth understanding of the historical, anthropological, sociological, psychological, economic, and political aspects of Afro-America. The curriculum also provides opportunities to study the literary, musical, and artistic heritage of peoples of African descent. Second, students gain expertise in the concepts, theories, and methods of a traditional academic discipline. Majors are required to select an area of concentration in one of the following fields: anthropology, economics, English, history, philosophy, political science, psychology, or sociology (concentrations in departments not listed must be approved by the program adviser).

Bachelor of Arts Degree

The B.A. program in Afro-American Studies is periodically revised; check with the program office for changes and/or updates. Majors should also closely consult the 1987-88 Afro-American Studies Catalog and Directory, available from the program office.

Preparation for the Major

Required: History 10A and the lower division courses listed in one of the following concentrations, plus three courses from at least two additional concentrations (prerequisites for the courses listed must be completed before enrolling in a given course; this is especially important for the quantitative courses in economics and psychology): anthropology: Anthropology 1 (or 11), 2, 5, 6; economics: Economics 1,
Admission

Applicants for admission must possess a bachelor's degree in the social sciences or humanities and demonstrate an interest in Afro-American studies either through their previous course of study or in their future plans. Students are selected on the basis of the following criteria: (1) an official transcript; (2) three academic letters of recommendation; (3) a minimum 3.0 (B) average in the junior/senior years of college; (4) a statement of purpose describing the applicant's background in Afro-American studies, proposed program of study, and future career goals; (5) scores on the verbal and quantitative sections of the Graduate Record Examination (GRE); (6) an original term paper or research paper which best expresses the applicant's interests and abilities; (7) other evidence of promise deemed relevant such as work experience, accomplishments, or community and public service.

Admission to the program is limited to the Fall Quarter. The application deadline for the 1989-90 academic year is January 15, 1989 (earlier for international students). Prospective students may request applications from the M.A. Degree Program in Afro-American Studies, Center for Afro-American Studies, 3111 Campbell Hall, UCLA, Los Angeles, CA 90024-1545.

Major Fields

The M.A. in Afro-American Studies is interdisciplinary, with formal support linkages to nine disciplinary departments: Anthropology, English, History, Linguistics, Music, Philosophy, Political Science, Psychology, and Sociology. Related courses are also offered in the following schools and departments: Art, Dance, Economics, Geography, Psychiatry and Biobehavioral Sciences, Theater, Film, and Television, Folklore and Mythology, Latin American Studies, African Studies, Education, Library and Information Science, Management, Public Health, and Social Welfare.

Foreign Language Requirement

You are required to satisfy the language requirement by one of the following methods: (1) successfully completing two years of coursework in a foreign language at the college level, (2) passing a foreign language proficiency examination approved by your guidance committee and deemed appropriate by the program committee, or (3) demonstrating competence in the use of the computer as an aid in social research.

Master of Arts Degree

The Master of Arts program in Afro-American Studies is international in scope, focusing on Afro-American cultures in the U.S., the Caribbean, and South America. The program prepares students for positions in the job market, as well as further graduate study (i.e., Ph.D. level) in their traditional disciplines.
Course Requirements

A total of 14 upper division and graduate courses are required for the degree. Of that number, only four may be selected from upper division listings. The program has a structured core of seven required courses. You are required to take Afro-American Studies M200A and three courses from 200B through 200F. These courses should normally be taken in your first year of study. The second year is devoted to acquiring disciplinary competence in your cognate field, and six courses must be selected from that discipline. Finally, course 270A is required, and courses 270B-270C are to be taken in conjunction with work in the discipline of your choice. These seminars are expected to facilitate completion of your thesis. One course (four units) in the 500 series may be applied toward either the total course requirement or the minimum graduate course requirement.

Thesis Plan

The thesis is the final report on the results of your original investigation. Before beginning work on the thesis, you should consult closely with your academic adviser and the thesis committee. See the 1988-89 Afro-American Studies Catalog for details concerning thesis requirements.

Comprehensive Examination Option

You may elect to complete the M.A. degree through the comprehensive examination option. The written examination is administered by a committee consisting of at least three faculty members appointed by the program and is offered on a regular basis.

Upper Division Courses

100B. Psychology from an Afro-American Perspective. A survey of psychological literature relevant to Afro-Americans, with emphasis on contributions of Afro-American psychologists. Topics include the history of psychology, testing and intelligence, the family, personality and motivation, racism and race relations, education, community psychology, and the future of Afro-American psychology.

C101A-C101Z. Special Topics in Afro-American Studies. Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C201A-C201Z.

M104A. Early Afro-American Literature. (Formerly numbered M104A) (Same as English M104A.) Prerequisite: satisfaction of Subject A requirement. An introductory survey of the Afro-American literary tradition from the 18th century to World War I, including oral and written forms (folktales, spirituals, sermons, prose, poetry). Emphasis on the use of literature in the antislavery movement and the rise of black writing at the turn of the century. Writers studied include Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Paul Laurence Dunbar, Charles W. Chesnutt, Booker T. Washington, Pauline Hopkins, W.E.B. DuBois, and James W. Johnson.

Mr. Yarborough

M104B. Afro-American Literature since the 1920s. (Formerly numbered M104B) (Same as English M104B.) Prerequisite: satisfaction of Subject A requirement. An introductory survey of the Afro-American literary tradition from the 1920s to the present, including oral and written forms (ballads, blues, speech, prose, poetry). Emphasis on the Harlem Renaissance and black writing in the 1960s. Writers studied include Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Richard Wright, James Baldwin, Gwendolyn Brooks, Ralph Ellison, Toni Morrison, Amiri Baraka (LeRoi Jones), and Alice Walker.

Mr. Yarborough

145. Ellingtonia. The music of Duke Ellington, his life, and the far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers many of the contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johny Hodges, Cookies Williams, and Mercer Ellington.

Mr. Burrell (W)

M147. Minority Group Politics. (Same as Political Science M147B.) Lecture, three hours; discussion, one. Prerequisite: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Emphasis on the dynamics of minority group politics in the U.S.: the impact of the conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about the social, political, and economic conditions of the black community, (2) to analyze the important political issues facing black Americans, (3) to sharpen students' analytical skills.

Mr. Gilliam

M150A. Comparative Slavery Systems. (Same as History M150A.) Lecture, three hours. An examination of the slavery experience in various New World slave societies, with emphasis on outlining the similarities and the differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M150B-M150C. Introduction to Afro-American History. (Same as History M150B-M150C.) Lecture, three hours. A survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: the transition from Africa to New World slavery, the transition from slavery to freedom, and the transition from rural to urban milieus.

Mr. Hill

M164. The Afro-American Experience in the U.S. (Same as Anthropology M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative, dialectic, psychological, political, and economic forces which impact on the interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

Ms. Mitchell-Kernan (F)

M172. The Afro-American Woman in the U.S. (Same as Psychology M172 and Women's Studies M172.) Prerequisite: upper division standing. The impact of the social, psychological, political, and economic forces which impact on the interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

M197. Topics in Afro-American Literature. (Same as English M197.) A variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance, Afro-American Literature in the Nineteenth Century, Afro-American Fiction. May be repeated for credit.

Mr. Yarborough

197B. Special Studies in Comparative Literature: Caribbean Literature. A general introduction to the literature of the English-speaking Caribbean by reviewing its historical and geographical background. To analyze the historical process toward self-determination in the literature, the following topics are included: (1) "internal" relationships (the family, the kinship network in the literature, the following topics are included: (2) "external" relationships (the ancestor, the kinship network in the literature, the following topics are included: (3) the "other" and language. An intensive directed research project. Eight units may be applied toward the major requirements.

Graduate Courses

M200A. Advanced Historiography: Afro-American Studies. (Same as History M200A.) Seminar, three hours. May be repeated for credit.

200B. Seminar in the Political Economy of Race. Prerequisite: consent of instructor. A seminar on political economy, with special reference to black political economy and with focus on the dynamics of allocation of wealth and power resources among social classes and racial and ethnic groups in the U.S. Presented in a context that is at once comparative and international, the seminar emphasizes internationalist and transnationalist perspectives advanced by African-American scholars: African philosophy, perspectives on racism in psychology, and research in the black community.

M200C. Selected Problems in Urban Sociology. (Same as Sociology M200C.) Seminar. Prerequisite: consent of instructor. May be repeated for credit.

200D. Afro-American Sociolinguistics: Black English. (Same as Anthropology CM243Q.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black English American, an important minority dialect in the U.S. The social implications of minority dialects examined from the perspectives of their genesis, maintenance, and social functions. General problems and issues in the fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor, as well as participate in group discussion.

Ms. Mitchell-Kernan (W)

M200E. Studies in Afro-American Literature. (Same as English M200E.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on the aesthetic, cultural, and social backgrounds of Afro-American literature. May be repeated for credit.

C201A-C201Z. Special Topics in Afro-American Studies. Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C201A-C201Z.

270A. Research Methods. Seminar. Prerequisite: consent of instructor. An introduction to a variety of research methods, including experimental, quasi-experimental, observational, and survey research methodologies. The functions of research, research proposal writing, theory development and hypothesis testing, sampling theory, data collection, data processing and analysis, the ethics of research and preparing the research report.

John Red Horse, Ph.D. (Social Welfare)

Assistant Professor
Duane Champagne, Ph.D. (Sociology)

Scope and Objectives
Because UCLA possesses a substantial number of faculty in the humanities and social sciences interested in teaching and conducting research on American Indians, the nation's first interdisciplinary M.A. in American Indian Studies was established here.

The M.A. program draws primarily on existing courses in the participating departments, where research and research methodologies are of primary concern. Students are exposed to Indian-related research in a number of different disciplines; demonstration of research skills is required. They will graduate with the training they need to teach Native American studies or to serve in an administrative capacity in Indian programs. The M.A. program is coordinated by the American Indian Studies Center and ranks among the top Indian studies programs in the country.

Master of Arts Degree

Admission
A bachelor's degree from an accredited undergraduate institution is required for admission to the M.A. program in American Indian Studies. You must demonstrate interest in American Indian studies either by formal coursework, independent study, or practical experience. As part of the application, you must submit a detailed account of your background, potential career plan, and interest in American Indian studies. Preference is given to individuals with undergraduate majors relevant to the proposed areas of concentration within the M.A. degree: anthropology, English, history, linguistics, literature, sociology, fine arts, or American Indian studies.

Entering students must meet the University’s minimum admission requirement of a 3.0 grade-point average in all work completed during the last two undergraduate years and in all prior graduate work. The Graduate Record Examination (GRE) is not required, but you are encouraged to take the examination and submit test results as part of the documents supporting your enrollment application. At least three faculty letters of recommendation must be submitted. Admission to the program is limited to the Fall Quarter. You may obtain application forms and further information from the Committee to Administer the M.A. Degree in American Indian Studies, American Indian Studies Center, 3220 Campbell Hall, UCLA, Los Angeles, CA 90024-1548.

Major Fields or Subdisciplines
The American Indian Studies M.A. is an interdepartmental program with 10 participating academic schools and departments: Anthropology, Art, Dance, English, History, Law, Library and Information Science, Linguistics, Music, and Sociology. The 10 disciplines are grouped into four areas of concentration: history and law; expressive arts; social relations; and language, literature, and folklore. Courses related to the American Indian Studies M.A. are also offered in the following schools and departments: Architecture and Urban Planning, Education, Political Science, Social Welfare, and Psychology.

Linguistics Requirement
Students in the M.A. program must successfully complete one of the following: (1) Linguistics 114, (2) Anthropology 243P, or (3) for native speakers of an American Indian language, an independent study course (approved by the instructor) in either linguistics or anthropology in which a structural knowledge of the student's language is learned. These courses are designed to show how American Indian languages and communicative norms are primary vehicles for understanding American Indian cultures.

Course Requirements
(1) A minimum of 10 courses is required, at least seven of which must be graduate courses. Four courses are required: American Indian Studies M200A, M200B, M200C (which must be taken in the first year), and one of the linguistics requirement options described above, which must be taken by the end of the second year. In addition, one of the remaining six courses must be a graduate course concerned with research methodology.

(2) All M.A. candidates select one of the following areas of concentration: (a) history and law, (b) expressive arts, (c) social relations, (d) language, literature, and folklore. You can petition for optional combinations of interdisciplinary work through the program committee. In addition to the required courses, you must complete a minimum of four courses in your area of concentration. Three of these must be grade-level courses. Two additional courses are to be chosen from other areas of concentration. Courses must be selected from an approved list maintained by the program.

(3) Two courses in the 500 series may be applied toward the total course requirement; however, only one 596 course may be applied toward the minimum graduate course requirement.

Thesis or Comprehensive Examination Plan
You may select either (1) a thesis plan or (2) a comprehensive examination plan to complete the degree program. The committee members supervising the thesis or administering the comprehensive examination are selected by you with the consent of the program committee. Copies of the thesis must be submitted to each member of the committee by the fifth week of the quarter in which you expect to graduate. If you choose the comprehensive examination plan, you must demonstrate in a written and/or oral examination your competency in the major and minor areas of study.

Upper Division Course
197. Special Topics in American Indian Studies. Variable topics selected from the following: Myths and Folklore of Indian Societies; Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and the American Indian; History of the American Indians (cultural areas); Dance and Music of the American Indians (cultural areas); American Indian Policy. Consult Schedule of Classes for topics and instructors. May be repeated twice for credit. (F,W,S)
Anthropology

341 Haines Hall, (213) 825-2055

Professors
C. Rainer Berger, Ph.D.
Nicholas Blton Jones, Ph.D.
Christopher B. Donnan, Ph.D.
Timothy Earle, Ph.D.
Robert B. Edgerton, Ph.D.
Peter B. Hammond, Ph.D.
James N. Hill, Ph.D.
Allan W. Johnson, Ph.D.
John G. Kennedy, Ph.D.
Lewis L. Langness, Ph.D.
Jacques Maquet, Ph.D.
Clement W. Meighan, Ph.D.
Claudia Mitchell-Kerman, Ph.D.
Michael Moerman, Ph.D.
Henry B. Nicholson, Ph.D.
Wendell H. Oswalt, Ph.D.
Merrick Posansky, Ph.D.
Douglas R. Price-Williams, Ph.D.
Dwight Read, Ph.D.
James R. Sackett, Ph.D.
Susan C. Scrimshaw, Ph.D.
Thomas S. Weisner, Ph.D.
Johannes Wilbert, Ph.D.
Bobby Joe Williams, Ph.D.
Joseph B. Birdsell, Ph.D., Emeritus
William O. Bright, Ph.D., Emeritus
Walter R. Goldschmidt, Ph.D., Emeritus
Hilda Kuper, Ph.D., Emeritus
William A. Lessa, Ph.D., Emeritus

Associate Professors
Francesca Bray, Ph.D., Acting
Gail E. Kennedy, Ph.D.
Paul V. Krook, Ph.D.
Nancy E. Levine, Ph.D.
Philip L. Newman, Ph.D.
Michael Raleigh, Ph.D.
Karen B. Sacks, Ph.D.

Assistant Professors
Robert C. Bailey, Ph.D.
Robert Boyd, Ph.D.
Nadine Peacock, Ph.D.
Nazif M. Shahrani, Ph.D.
Joan Silk, Ph.D.

Adjunct Professors
Bernard G. Campbell, Ph.D.
Gerardo Reichel-Dolmatoff, Ph.D.

Adjunct Associate Professor
Donald Lindburg, Ph.D.

Adjunct Assistant Professor
Jeanne Arnold, Ph.D.

Scope and Objectives

Anthropology today is classed as a social science, but its roots are in both the biological sciences and humanistic studies. It still constitutes a bridge linking these three areas of knowledge, and the department has strong ties with other disciplines ranging from anatomy and genetics to linguistics, classics, and fine arts.

The department recognizes the following five fields in anthropology:

Archaeology is the study of cultures of the past, where knowledge of their characteristics is obtained primarily from material evidence left in the ground, supplemented in some cases by historical and inscriptive records.

Biological anthropology studies the diversity of the human physical characteristics and the biological characteristics underlying human behavior. The faculty in this field specializes in one of four subfields: (1) primatology or the study of the characteristics of monkeys and apes, (2) paleoanthropology, the study of fossil hominids and the evolution of man, (3) human genetics, and (4) evolutionary ecology of human and nonhuman primates.

Cultural anthropology is the investigation of ideational systems, including religious beliefs and mythologies, philosophical and other cognitive conceptions, world views and aesthetic configurations, and technologies transmitted from generation to generation.

Linguistic anthropology examines the diversity of natural languages and other communicative systems, the sociocultural patterning of their use, and their relationship to the cultural knowledge of their speakers.

Social anthropology, closely tied to sociology, studies the structure of human communities and the institutionalized social interaction systems. It examines the diversity of family forms and kinship, governance and political systems, law and the resolution of conflict, economic collaboration, social status and role, and certain aspects of religion.

Cutting across the five fields are three other categories of course offerings: applied anthropology, regional cultures, and history and theory.

The department offers Bachelor of Arts and Bachelor of Science degrees in Anthropology for undergraduates; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as medicine, public health, nursing, law, education, and social welfare. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

Bachelor of Arts Degree

Preparation for the Majors

Required: Anthropology 1, 2, 5, 6. All courses must be taken for a letter grade.

All undergraduate anthropology majors must earn a minimum grade of C in all anthropology courses required for the major and must maintain a minimum 2.0 GPA in the major overall.

The Majors

The Department of Anthropology offers two undergraduate majors leading to the Bachelor of Arts degree:

(1) General major
(2) Preprofessional major

To provide a comprehensive understanding of the disciplines as a whole, you must take at least one course in each of the five fields (see "Scope and Objectives" above). One core course is offered in each field (archaeology offers a choice of two), but you may take any course to fulfill this requirement if the prerequisites have been met.

The general major is designed for students interested in an anthropological understanding of human behavior who plan to pursue personal or professional goals other than those of anthropologists. Students taking the general major must complete 14 (four-unit) upper division courses for a letter grade as follows:

(1) One upper division course in each of the five fields: archaeology, biological anthropol-

(2) One upper division course in the category of regional cultures.

(3) Four additional upper division anthropolo-

(4) Four upper division courses (unless other-

The preprofessional major is designed primarily for students planning a career in anthropology and is expected of students entering the graduate program in anthropology at UCLA. Students taking the preprofessional major must complete 16 (four-unit) upper division courses for a letter grade as follows:
(1) One upper division course in each of the five fields: archaeology, biological anthropology, cultural anthropology, linguistic anthropology, and social anthropology.
(2) One upper division course in the category of regional cultures.
(3) Two upper division courses in the category of history and theory.
(4) One statistics course (this requirement normally is met by taking Anthropology 186A but may also be met by courses selected from a list maintained in the department).
(5) Three or four additional upper division anthropology courses.
(6) Three or four upper division courses (unless otherwise designated) in related fields selected from a list maintained in the department.
(7) Competence in a foreign language (see below).

Foreign Language
For the preprofessional major the department requires proficiency in one foreign language to ensure that you have the communication skills and cultural insights offered by such proficiency. Any spoken language or any extinct language with a substantial body of literature is acceptable. This requirement may be met by (1) completing the fifth quarter of one foreign language or (2) demonstrating foreign language proficiency at level five. Courses taken to satisfy the foreign language requirement may be taken on a Passed/Not Passed basis and may be applied toward satisfaction of the Letters and Science general education requirements in the humanities.

Honors Program
The honors program is designed for majors who are interested in carrying out an independent research project that culminates in an honors paper. A special honors seminar is also offered during the junior year. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year. Anthropology 197H, 199HA, 199HB, and 199HC are required. Course 199HA should be taken in the Spring Quarter of your first year; honors students then take courses 199HB and 199HC in the Fall and Winter Quarters of their senior year (to write the honors paper).

Bachelor of Science Degree
Preparation for the Major
Required: Anthropology 1, 2, 5, 6; Biology 5, 7, 8; Chemistry 11A, 11B/11BL, 11C/11CL; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 6A, 6B, 6C. All courses must be taken for a letter grade.

All undergraduate anthropology majors must earn a minimum grade of C in all anthropology courses required for the major and must maintain a minimum 2.0 GPA in the major overall.

The Major
The following courses are required:
(1) One upper division course in each of the five fields: archaeology, biological anthropology, cultural anthropology, linguistic anthropology, and social anthropology.
(2) One upper division course in the category of regional cultures.
(3) Two statistics courses.
(4) Four additional upper division anthropology courses, at least two of which must be in one of the fields other than biological anthropology.
(5) At least one course in each of the following areas: anatomy (Kinesiology 14); ecology (Biology 122, Geography 112); human genetics (Biology CM156); physiology (Biology 166, 167, 170, Kinesiology 12A, 12B). Courses listed are recommended, but others may be substituted with consent of your adviser or counselor.

Graduate Study
Admission
Admission to the graduate program in anthropology is ordinarily restricted to the Fall Quarter. For admission in the Winter or Spring Quarters, you must make a formal written request to the departmental admissions committee. The department does not require an undergraduate major in anthropology, though this is desirable. Promising students with a B.A. or M.A. in another field may be admitted, in which case a program of background studies based on previous training and current objectives is formulated. Knowledge of a foreign language is not required for admission, but completion of the language requirement before beginning work is highly recommended, and such students are at an advantage in the selection process.

Applications and all supporting material must be submitted by the following dates to be considered for admission:
- Winter Quarter 1989 — October 1, 1988
- Spring Quarter 1989 — December 30, 1988
- Fall Quarter 1989 — December 30, 1988

The Graduate Admissions Office (Graduate Division, 1247 Murphy Hall, UCLA, Los Angeles, CA 90024-1428) requires submission of an official application, official transcripts of record, in duplicate, from each college or university at which work has been completed; and a statement of purpose.

In addition, you must submit the following directly to the Graduate Counselor, Department of Anthropology, 341 Haines Hall, UCLA, Los Angeles, CA 90024-1553:
(1) Three letters of recommendation (preferably from anthropologists).
(2) Graduate Record Examination (GRE) scores.
(3) A research or term paper.
The department requires two faculty members to sponsor an applicant before admission is recommended.

For further information on the departmental program, a graduate syllabus may be obtained without charge by writing to the above departmental address.

Master of Arts Degree
Foreign Language Requirement
M.A. language requirements may be met by:
(1) Passing the Educational Testing Service (ETS) examination in a foreign language with a score of 500 or better or
(2) Passing a departmental examination or other demonstrations of proficiency in a foreign language by petition to the department chair and the dean of the Graduate Division.

Students whose native language is not English may petition to have the requirement waived. Formal written petition for such waiver should be submitted to the guidance committee, department chair, and the Graduate Division.

Core Course Requirements
You may demonstrate basic knowledge in the five fields by one or a combination of the following: (1) passing the core course with a grade of B or better, (2) petitioning that work taken elsewhere constitutes the equivalent of such courses, or (3) passing a special examination in each, in the Spring Quarter of your first year in residence. Courses taken while in graduate standing to meet these field requirements may also serve to meet course unit demands for the M.A. degree.

Course Requirements
The minimum course load is three courses (12 units) per quarter, but this requirement may be waived by petition to the department chair. An M.A. degree requires 10 courses (40 units) taken for a letter grade with a minimum 3.0 grade-point average.

(1) Four courses may be upper division (100 series).
(2) One course must be a graduate core seminar in your chosen subfield of specialization (e.g., Anthropology M219A for archaeology, course 226 for biological anthropology, course 203 for sociocultural anthropology, course 240 for linguistic anthropology).
(3) In addition to the appropriate graduate core seminar, you must take five other graduate seminars (200 series).
(4) Three courses may be outside the major with consent of the guidance committee.

(5) Two courses may be anthropology independent studies (see department for course numbers) with consent of the guidance committee.

Eight units of course 596 taken for a letter grade may be applied toward the minimum graduate course requirement, with four of these units applicable toward the minimum graduate course requirement.

Thesis
By your fourth quarter of study, you select a thesis committee of departmental faculty to supervise your research and writing. The committee, as well as your thesis topic, must be approved by the department and the dean of the Graduate Division. Prior to completing the M.A. degree requirements, you file a Petition for Advancement to Candidacy form with the Graduate Division. The approved thesis must be typed and filed according to University regulations; information on regulations and procedures is available from the Graduate Division. Evaluation of the thesis provides the basis for the thesis committee's recommendation and departmental faculty vote regarding both the acceptability of the thesis for the M.A. degree and admission into the doctoral program.

Ph.D. Degree
Admission
If you are entering the department with an M.A. in Anthropology from another university or in a field other than anthropology, you have to satisfy all master's degree requirements with the exception of the thesis. To fulfill this requirement, you may submit your prior master's thesis or a research paper written as a graduate student (whether or not in anthropology). Only after satisfying these requirements is a student admitted into the Ph.D. program.

Foreign Language Requirement
You must satisfy the Ph.D. language requirement before formally nominating the five-member doctoral committee and before taking the qualifying examinations. Any language useful for field study and/or library research is acceptable. You must submit to your departmental committee a comprehensive annotated bibliography and demonstrate familiarity with its contents by taking a written or oral examination. The format of the examination is determined by your doctoral committee. Students who speak English as a second language may waive the language requirement by petition to their committee, the department chair, and the Graduate Division. Under unusual circumstances, the department will consider alternate means of fulfilling the requirement.

Course Requirements
You must be in residence for one year between receipt of the M.A. degree and advancement to doctoral candidacy. During this time, coursework must be done with at least three different members of the faculty. You must be enrolled in a minimum of 12 units (this requirement may be waived by petition to the department chair) or be on an official leave of absence.

Qualifying Examinations
Qualifying examinations are conducted in two parts: (1) a written examination and (2) the University Oral Qualifying Examination. The timing of the examinations is arranged with members of the doctoral committee, but they may not take place earlier than the third quarter after receiving the M.A. degree. The written examination must be completed within the first eight weeks of the given quarter; the University Oral Qualifying Examination is expected to be completed in the same quarter, but no later than the following term.

The format for the written examination is determined by the doctoral committee which examines you in three subfields of your choice. Two of these three subfields are selected from a list available in the department; the third is specific to your needs, interests, and dissertation plans. After you successfully complete the written examination, the doctoral committee administers the University Oral Qualifying Examination, in which you are required to present a defense of your dissertation proposal. The committee determines the conditions for reexamination should you fail either examination.

Final Oral Examination
This examination, administered by the doctoral committee, focuses on your dissertation and is required of all candidates. It may be waived by petition to the Graduate Division with consent of the doctoral committee.

Lower Division Courses

5. Principles of Cultural Anthropology. Lecture, three hours; discussion, one hour. Required as preparation for the major. Not open for credit to students with credit for course 22. The character of culture and nature of social behavior as developed through anthropological study of contemporary peoples.

6. World Archaeology: An Introduction. Lecture, three hours; discussion, one hour. Required as preparation for the major. The development of culture from its first beginnings to the advent of writing, as developed through archaeological investigation.

11. Human Evolution. Lecture, three hours; discussion. Does not satisfy major requirements. Not open for credit to students with credit for course 2. Emphasis on evolutionary processes and the evolutionary past of the human species.

22. General Cultural Anthropology. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 5. An introduction to the cultural understanding of human behavior designed for students who do not plan further work in anthropology. Emphasis on those concepts and theories that are applicable to everyday life and professional activities in the modern world. Examples of institutions and individual behavior of modern America, counterpoints against studies of primitive life.

33. Culture and Communication. Lecture, three hours. The role of culture in structuring how people communicate with one another, with emphasis on the importance of language as a symbolic guide to one's culture. Topics include cultural differences in verbal and nonverbal behavior, imagined and actual differences in male and female speech, language and education, verbal style and interactional strategy, language, taboo, and the sociocultural factors which promote and retard language change. Emphasis on patterns of language use, rather than details of language structure.

44. Culture and the Visual Arts. Lecture, two hours; discussion, one hour. In our contemporary urban societies, looking at art objects and other aesthetic forms is a significant part of our everyday cultural experience. The anthropological approach offered helps achieve a better understanding of the formal qualities and the symbolic meanings of Western and non-Western art objects present in our visual environment.

Mr. Maquet

Upper Division Courses
Courses 1 and 2, 5, 6, or upper division standing are prerequisite to all upper division courses, unless otherwise stated. All upper division courses with letter designations (A, B, P, Q, etc.) may be taken independently unless otherwise stated.

Archaeology
110. World Archaeology. Prerequisite: upper division standing or consent of instructor. A broad survey of human culture history from its Stone Age beginnings to the establishment of the primary civilizations of the Old and New Worlds. Intended for students with a general interest in archaeology and in an anthropological approach to the study of the past. (Alternate core course for archaeology field.) Mr. Sackett

111. The Study of Archaeology. A survey of contemporary prehistoric archaeology. Emphasis on what archaeologists do, and how and why they do it. Contributions of archaeology to the modern world. Intended for students with a desire to explore the nature of anthropological archaeology. (Alternate core course for archaeology field.) Mr. Hill

Mr. Sackett
113. P. Archaeology of North America. Prerequisite: course 5 or 6 or 22 or consent of instructor. Prehistory of the North American Indians; the evolution of Indian societies from earliest times to (and including) contemporary Indians; approaches and methods of American archaeology. Mr. Meighan

113Q. Prehistory of California Indian Cultures. Examination of the California archaeological record from prehistory to the early historic period. Emphasis on prehistoric technological change, landscape development, and interpreting data for scholarly publications. Studies with museum collections of California Indian artifacts. Three hours; seminar, three hours. Prerequisite: course 1 or consent of instructor. Mr. Meighan

114. Southwestern Archaeology. Examination of the prehistory of the American Southwest from Early Man to historic times. Emphasis on descriptive and explaining cultural variation and change, employing an ecological and evolutionary perspective. Special attention to the Great Events (agriculture, town living, and the Great Abandonment). Evolutionary processes generalized and related to contemporary world problems. Mr. Hill

115. Perspectives on Eastern U.S. Archaeology. Prerequisite: course 5 or 6 or 22 or consent of instructor. Overview of the archaeology of the Eastern U.S. from prehistory to the early historic period. Emphasis on orientations used by archaeologists to understand the past and recent developments in interpretation. Students complete a writing project. Mr. Meighan

116P. Laboratory Analysis in Archaeology. Lecture, three hours. Prerequisite: consent of instructor. Preparation of archaeological reports for publication. Laboratory techniques of preparation and analysis of bone, stone, and shell. Mr. Meighan

116Q. Dating Techniques in Environmental Sciences and Archaeology. Same as Geography M 178. Lecture, three hours; reading period, one hour. Prerequisite: course 5. Introduction to scientific dating methods such as radiocarbon dating, radiocarbon damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology. Mr. Berger

118A. Museum Studies. Prerequisite: consent of instructor. Method and theory of museum operation. Discussion and demonstration of acquisition accessions, storage, photography, conservation, and exhibition. Analysis of museum research, publication, and teaching, as well as museum administration and funding. Lectures and demonstrations structured to illustrate how the various aspects of museum operation are interrelated. Mr. Donnan and the Museum Staff

118B. Museum Studies. Prerequisites: course 118A, consent of instructor. Two areas of museum operation are selected by the students from those discussed and demonstrated in course 118A. Students are then required to develop expertise in these areas through a combination of library research and a series of assignments in the museum. Mr. Donnan and the Museum Staff

Biological Anthropology

120. Survey of Biological Anthropology. Prerequisites: courses 1, 2, or equivalent. Limited to majors and graduate students in anthropology. A survey of biological anthropology including all major subareas. Lecture/seminar format requires attendance at a recitation section in addition to lectures. Core course for biological field. Mr. Williams

120Q. Biological Anthropology in Review. Lecture, three hours, seminar, three hours. Corequisite: lecture portion of course 11. Limited to graduate students in anthropology. Designed for anthropology students who have a facility in biological anthropology. Seminar discussion based on basic evolutionary principles, the behavior of nonhuman primates, hominid evolutionary history, and contemporary human variation. Mr. Williams

121A. Fossil Man and His Culture. Recommended prerequisites: courses 1, 2. Course 121A should be taken before 121B and 121C. Introduction to method and theory in paleoanthropology. Primate evolution, Cretaceous through the Miocene. Ms. Kennedy

121B. The Australopithecines. Prerequisite: consent of instructor. Recommended: courses 1, 2, 121A. The morphology, ecology, and behavior of the genus Australopithecus. The history of their discoveries and their place in human evolution. Ms. Kennedy

121C. Evolution of the Genus Homo. Prerequisite: consent of instructor. Recommended: courses 1, 2, 121A, 121B. The origin and evolution of the genus Homo, including a brief survey of the Neanderthals. The morphology, ecology, and behavior of some of these groups. Course ends with the appearance of modern man. Ms. Kennedy

123. Human Genetics. Recommended prerequisite: course 1. Discussion of the nature and causes of human biological variation. Development and comparison of theoretical models of variation and sociocultural influences on biological variation. Emphasis on geographical and cultural contributions to the development of observed patterns of human biological variation. Mr. Silk

123P. Aging: An Anthropological Perspective. Lecture, three hours. Prerequisite: consent of instructor. Recommended: course 2 or 11 or equivalent. Examination of human sexual behaviors and social behaviors from an evolutionary perspective. Emphasis on theories of both sexes between men and women in their patterns of growth, maturation, fertility, mortality, and behavior. Mr. Bailey

124. Evolution of Human Sexual Behavior. Three hours. Prerequisite: upper division standing and/or consent of instructor. An overview of the sexual and social behaviors from an evolutionary perspective. An emphasis on theories of both sexes between men and women in their patterns of growth, maturation, fertility, mortality, and behavior. Mr. Bailey

124Q. Physiology of Human Behavior. Lecture, three hours. Prerequisite: upper division standing and/or consent of instructor. An overview of the sexual and social behaviors from an evolutionary perspective. An emphasis on theories of both sexes between men and women in their patterns of growth, maturation, fertility, mortality, and behavior. Mr. Bailey

124R. Laboratory Methods in Human Behavioral Endocrinology (6 units). Lecture, three hours; laboratory, three hours (plus time to complete project). Prerequisites: course 124Q or consent of instructor. An introduction to laboratory methods in neuroendocrinology for students in the social and behavioral sciences. Emphasis on field-compatible methods. Design and execution of a small research project. Ms. Peacock

125A-125B. Genetics of Human Diversity. Course 125A or equivalent is prerequisite to 125B. A survey of human biological diversity. Emphasis on genetics at the molecular level for both discrete and quantitative variation. Analytic methods and evolutionary hypotheses. Ms. Peacock

126. Introduction to Field Methods in Human Ecology. Lecture, three hours. Prerequisite: upper division or graduate standing. A survey of methods used in anthropological investigations emphasizing human biology and human ecology. Study design, physical measurement of nutritional status, growth and maturation, demographic surveys, systematic observation of behavior, energy expenditure, subsistence ecology, data analysis. Emphasis on ethnographic and evolutionary hypotheses. Ms. Peacock

127P. Primate Evolution. Prerequisite: upper division standing. A survey of the primate paleoanthropological and evolutionary record, encompassing prosimians, New and Old World monkeys, and hominoids. Attention is directed to relationships pertinent to the fossil record. Ms. Peacock

128A-128B. Primate Behavior Nonhuman to Human. Lecture, three hours. Prerequisite: upper division standing. Course 128A is prerequisite to 128B. Review of primate behavior as known from laboratory and field studies. Theoretical issues of animal behavior, its relevance to nonhuman primates, and the cultural construction of behavior as the product of such evolutionary processes. Ms. Peacock
129P. Laboratory Methods in Biological Anthropology: Skeletal. Prerequisites: courses 1, 2, consent of instructor. Limited to majors and graduate students. Laboratory methodology and analysis of human skeletal material.

129Q. Paleopathology. Lecture, one hour; laboratory, three hours. Prerequisites: course 129P, upper division standing, consent of instructor. Investigation into diseases, trauma, health status, subsistence activities, and ethnic mummification (i.e., cranial deformation, trepanation) through analysis of human skeletal materials. Course has a worldwide scope, although there is some emphasis on the New World.

Mr. Kennedy

Cultural Anthropology

130. The Study of Culture. Lecture, three hours. Prerequisite: one lower division anthropology course or equivalent. The 20th-century elaboration and development of the concept of culture from the Boasian period to the present. Survey of the major schools of anthropological thought, such as historical particularism, psychological anthropology, functionalism, cultural materialism, structuralism, and symbolic anthropology. A discussion of the utility of the culture concept in more applied areas of anthropology. (Core course for cultural field.)

130P. The Study of the Individual in Society and Culture. Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. Examination of the relationships between the individual and society and culture. Topics include the extent to which individuals shape and are shaped by social and cultural systems, the role of the individual among cultural change, assumptions about human nature and individual needs and goals in social theory, the relationship between personality and role and between "private" and "public" symbols, individual variation and change between cultures, and deviance and abnormality.

131. American Culture. Prerequisite: upper division standing. An examination of American life in historical and contemporary terms, with special reference to the individual life cycle, in order to offer a systematic analysis of American culture and society in a cross-cultural perspective. Mr. Osvald

132. Technology and Environment. Significance of material culture in archaeology and ethnology; problems of the interpretation of innovations; the ecological and sociological concomitants of technological systems; selected problems in material culture.

133P. Social and Psychological Aspects of Myth and Ritual. The social and psychological significance of myth, ritual, and symbol, with particular attention to anthropological theories and interpretations of religious belief systems. Ms. Levine

133Q. Symbolic Systems. Prerequisite: upper division standing or consent of instructor. An analysis of the anthropological research and theory on the cultural systems of thought, behavior, and communication expressed in a symbolic mode (as distinguished from the discursive, instrumental, and causal modes). Methods for the study of symbolic meaning, including the experiential approach. Mr. Maquet

133R. Aesthetic Anthropology. Prerequisite: upper division standing. Elaboration of a cross-cultural notion of art and aesthetics. Theoretical bases for the requirements of anthropological research. Aesthetic phenomena as cultural; their integration in a cultural system; their relationships with other elements in the interrelated social, political, and economic aspects of societies. Mr. Maquet

134. Personality and Cultural Systems: Enculturation. Prerequisite: upper division standing or consent of instructor. The relationship between individual and culture, with focus on enculturative learning as modality of personality forms and internal dynamics of culture change. Major emphasis on cultural influences of cognition, perception, thought processes, socialization, and development of value.

Mr. Wilbert

134P. Anthropology of Self and Identity. Lecture, three hours. Prerequisite: course 22 or equivalent. Survey of the anthropological literature on person, self, and identity. Examination of the conceptual and theoretical approaches among these topics as well as an exploration of their use in contemporary ethnography. P/NP or letter grading.

135A. Introduction to Psychological Anthropology: Historical Development. (Formerly numbered 135P.) Lecture, three hours. Prerequisite: courses 22 or consent of instructor. Survey of the field of psychological anthropology, with emphasis on the early foundations and historical development of the field. Topics include the intellectual development and diversity, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. P/NP or letter grading.

135B. Introduction to Psychological Anthropology: Current Topics and Research. (Formerly numbered 135P.) Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Survey of the field of psychological anthropology, with emphasis on current topics and research. Topics include the study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. P/NP or letter grading.

135C. Seminar in Psychocultural Studies. Seminars, three hours. Prerequisites: courses 22 or equivalent, consent of instructor. Firsthand exposure to current research in psychocultural studies. Various unifies and sociocultural theory are brought in to discuss ongoing research. Using these presentations as models, students develop proposals for future research. P/NP or letter grading.

135G. The Individual in Cultural Prerequisite: upper division anthropology, psychology, or psychiatry standing. The balance for freedom and determinism for individuals and societies in the interrelation of personality, social structure, and culture. Survey of the nature and limits of human plasticity, the variability and uniformity of personality within and between cultures; the relation of normal and abnormal conformity and deviance.

135R. Cross-Cultural Socialization and Childhood. Lecture, three hours. Introduction to ethnographic data on socialization and child training. Theories explaining cross-cultural variability in socialization practices. Current methods and research topics in the field. Mr. Weiser

135S. Anthropology of Deviance and Abnormality. Lecture, three hours. Prerequisites: course 22 or equivalent, consent of instructor. The relationship between culture and the recognition of, responses to, and control of deviant behavior.

136P. Ethnography: Field Training. Training in ethnographic field methods. Execution of individual and group ethnographic field research projects.

136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Psych 141.) Prerequisite: consent of instructor. The skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in the social sciences. Mr. Gallimore, Mr. Weisner (W)

137. Ethnography on Film. Lecture, three hours. Prerequisite: course 135P or equivalent. Concepts, principles, and techniques of fieldwork in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographical research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison. Mr. Wilbert

139. Field Methods in Cultural Anthropology. Lecture, three hours. Prerequisite: upper division standing. Corequisite: course 139L. An introduction to the skills and tools of data ascertaining through field-work in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographical research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison. Mr. Wilbert

Linguistic Anthropology

M140. Language in Culture. (Same as Linguistics M146.) Prerequisite: upper division standing or consent of instructor. The study of language as an aspect of culture; the relation of habitual thought and behavior to language; and the classification of cultural aspects of language, with emphasis on the relationship of linguistic anthropology to the fields of biological, cultural, and social anthropology. As well as archaeology. (Core course for linguistics field.) Mr. Kroskrity

141A. Introduction to Phonetics and Practicum. Prerequisite: upper division standing or consent of instructor. Course has two interrelated objectives: (1) to introduce students to the ethnography of communication—the description and analysis of situated communicative behavior and the sociocultural knowledge which it reflects and (2) to train students to recognize, describe, and analyze the relevant linguistic, prosodic, and kinetic aspects of face-to-face interaction.

Ms. Kroskrity

142A-142B. Human Social Ethology. Prerequisite: consent of instructor. Course 142A is a strongly recommended prerequisite to 142B. Students make primary records (sound tape, videotape, or film) of naturally occurring social interactions, which are analyzed in class for the interactive tasks, resources, and accomplishments displayed. Laboratory and fieldwork outside of class and minimal fees to offset costs of equipment maintenance and insurance.

Mr. Moerman

143A. Field Methods in Linguistic Anthropology: Practical Phonetics. Practice in elicitation from informants, the use of phonological systems and development of practice transcription, as a preliminary to learning to speak the native language and to the recording of ethnographic materials in the native language. No prior experience in linguistics assumed.

143B. Field Methods in Linguistic Anthropology: Syntax, Semantics, Textual Cohesion. Prerequisite: course 143A or equivalent experience or consent of instructor. The skills and strategies necessary for conducting investigations into the syntactic, semantic, and textual (or discourse) structures of field languages. Practice with native speakers of various non-Western European languages is an important aspect of student preparation.

Mr. Kroskrity

144. American Indian Ethnolinguistics and Sociolinguistics. Prerequisite: prior coursework in either anthropology, linguistics, or American Indian studies. Introduction to the sociocultural aspects of language use in Native American American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as societal-ethnic variation and its interaction with linguistic structure. Mr. Kroskrity

145. Aesthetic Anthropology. Prerequisite: prior coursework in either anthropology, linguistics, or American Indian studies. Introduction to the sociocultural aspects of language use in Native American American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as societal-ethnic variation and its interaction with linguistic structure. Mr. Kroskrity

146. American Indian Ethnolinguistics and Sociolinguistics. Prerequisite: prior coursework in either anthropology, linguistics, or American Indian studies. Introduction to the sociocultural aspects of language use in Native American American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as societal-ethnic variation and its interaction with linguistic structure. Mr. Kroskrity
Social Anthropology

150. The Study of Social Systems. Lecture, three hours. Prerequisite: course 5 or 6 or Sociology 1 or consent of instructor. The general principles of the organization of society; the relation of these to the technological complexity and ecological conditions of the culture; the principles of evolutionary development of social systems. (Core course for social field.) Mr. Shahrani

151. Marriage, Family, and Kinship. Prerequisite: course 5 or 22. A survey of marital patterns, descent, and family structure in a range of societies. Emphasis on the relationship between kinship and other aspects of the sociocultural system and on the importance of kinship for general anthropological research. Ms. Levine

152P. Comparative Systems of Social Inequality. Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. Exploration of the cultural causes and consequences of systems of social inequality based on rank, caste, class, ethnicity, or sex, with examples from Asian, Pacific, European, African, and American societies. Mr. Hammond

165. Illness in Non-Western Societies. Prerequisites: course 5 or 22 or Sociology 1 and upper division standing, or consent of instructor. An analysis of the cultural modes of thought and social structures associated with illness in non-Western societies. Emphasis on the social roles involved in the diagnosis and curing. Ms. Levine

156. Comparative Religion. A survey of various methodologies in the comparative study of religious ideologies and action systems, including the understanding of particular religions through descriptive and structural approaches, and the identification of social and psychological factors which may account for variation in religious systems cross-culturally. Mr. Newman

157. Intentional Communities. Prerequisite: upper division standing or consent of instructor. Communities and monasteries, ashram and kibbutz are voluntarily formed communities, both on and off the reservation. Topics include self-determination, land claims, activism, urban Indians, and role of the Bureau of Indian Affairs. M163. Women in Culture and Society. (Same as Women's Studies M163.) Prerequisite: course 5 or 22. A systematic approach to the study of sex roles from an anthropological perspective. A critical review of relevant theoretical issues supported by ethnographic material from traditional cultures and contemporary American culture. Ms. Bray

Regional Cultures

Africa

171. Civilization of Sub-Saharan Africa. Prerequisite: upper division standing or consent of instructor. A comprehensive overview of the sociocultural world of sub-Saharan Africa, interpreted as a broad cultural unit with its specific African configurations and as a plurality of civilizations, each based on a particular association of an environment (dry savanna, grassland, equatorial forest, highlands) with a dominant technique of acquisition/production (hunting/gathering, pastoral, agricultural, and industrial) and economy (crops, industry). Ms. Maquet

172Q. Cultures of the California Indians. An examination of the cultural diversity of the Indians of California: their technology, social organization, and religion. Mr. Meghan
172R. Cultures of the Pueblo Southwest. Prerequisite: course 5 or 6 or 22 or upper division standing or consent of instructor. A survey of ethnographic and ethnohistorical research of the Pueblo Indians (Hopi, Zuni, Tanoan, and Keresan) and their immediate neighbors. Basic information on the history, languages, social organization, and traditional cultural systems of these groups. Mr. Kroskity

172S. Theory and Method in the Pueblo South- west. Prerequisite: course 172R or consent of instructor. Selected problems in Western ethnology, viewing the Pueblo Southwest as an important locus for anthropological theory and method. Exploration of such theories as early culture and personal- ity theory, functionalism, and symbolic anthropology in their application to the Pueblos and the Navajo. Methodological considerations include the use of life histories, the problem of objectivity, and the use of native languages as field tools. Mr. Kroskity

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest. (Same as Chicano Studies M172T.) Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. An ethnography of the social and cultural adaptations of the Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/ NP (undergraduates), SU (graduates), or letter grading.

172U. Eskimos. Prerequisite: upper division standing. A survey on historical, ethnographic, and contemporary Eskimo life stressing their importance in anthropological theory and practice. Particular emphasis on Eskimo origins, technology, and modern administration. Mr. Oswalt

173P. Cultures of Middle America. An introduction to the social and cultural anthropology of Middle America, with emphasis on indigenous communities. Aspects of economics, society, politics, and religion reviewed in light of their historical development and current distribution.

173Q. Latin American Communities. An overview of the social and cultural anthropology of small communities in Latin America. Similarities and contrasts in social organization and interpersonal relations described in the context of economic, political, and cultural environments. Mr. Johnson

174P. Ethnography of South American Indians. Introduction to the ethnography of South American Indians with special emphasis on the varied cultures of South America. Survey of the history and development of man and society in this world area and examination of exemplary cultures symptomatic of the various levels of cultural achievement. Mr. Wilbert

174Q. Ethnography of South American Indians. Prerequisite: course 174P or consent of instructor. Introduction to the ethnography of South American Indians, with special emphasis on South America. The methodology of the study of man and culture on the continent, including biological anthropology, linguistics, and sociocultural anthropology. Mr. Wilbert

175P. Civilizations of South Asia. Examination of the civilizations of Sri Lanka, India, Pakistan, Bangladesh, and the Himalayan states. Ideational systems, social institutions, and techniques of production discussed in the major branches of archaeology, each focused on a major religious tradition (Hinduism, Buddhism, and Islam).

175Q. Civilizations of South Asia. Survey of the history of the French and British empires in South Asia, including India, Pakistan, Bangladesh, and Sri Lanka. The political, economic, and social forces which shaped the course of South Asian history. Mr. Levine, Mr. Maquet

175R. Civilizations of Inner Asia. Overview of cul- ture and society among the diverse peoples of Inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic ad- aptation, politics in traditional isolation and within the framework of recent national integration, kinship, forms of marriage and the status of women, religion and the social order in Hindu-Buddhist culture contact zone, and current problems of modernization.

175S. Japan. Prerequisite: course 22. An overview of contemporary Japanese society. General introduc- tion: kinship; marriage and family life; social mobility and education; norms and values; religions; patterns of social interaction. Mr. Levine

175T. Civilizations of East Asia. Lecture, three hours. A general anthropological introduction to the closely linked civilizations of China, Korea, and Japan, providing a comparative analysis of fundamental ideas such as family, status, and interaction and assessing the effects of urbanization and industrialization. Ms. Bray

175U. Cultures of the Indonesian Archipelago. Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. Introduction to past and contemporary civilizations and cultures of Indonesia, including Javanese, Balinese, Toraja, Dayak, and Minangkabau. Geographical, ecological, and historical aspects, with emphasis on such topics as religi- ous and political ideas and institutions, art, symbol- ism and ritual, illness and healing, and psychological issues and themes.

176. Cultures of the Middle East. Lecture, three hours. Prerequisite: course 5 or 22 or consent of instructor. Introduction to past and contemporary civilizations and cultures of the Near East, Israel, Turkey, Iran, and Afghan- stan. Mr. Shahrani

177. Cultures of the Pacific. The four major culture areas of Australia, Melanesia, Polynesia, and Micro- nesia. General geographical features, prehistory, and language distribution of the whole region. Distinctive sociocultural features of each culture area presented in the context of their adaptive significance.

178. History and Theory. A brief survey of the development of Western social science, particularly anthropology, from the Renaissance to the present. An introduction to major theoretical orientations in sociocultural anthropology, including functionalism, structuralism, and others.

179. History of European Civilization. The men, the events, and the spirit of the time which mark man's attempts to understand his origins and diver- sity. Mr. Williams

180. History of Social Anthropology. Prerequisites: courses 5 or 22 or Sociology 1. Historical development in anthropology or sociology. A systematic survey of the development of social anthropology in France and Britain from the Enlightenment to the present. Review of major theoretical concepts and a survey of the French and British schools of structural-functionalism and Smithian structural-functionalism and current concerns in social theory.

181A-181B. Quantitative Methods and Models in Anthropology. Prerequisite: upper division standing. Introduction to quantitative methods of data analysis and the modeling of sociocultural systems. 181A. Methods of data analysis and topics such as data description, sampling, estimation procedures, and hypothesis testing. 181B. Topics from statistical mod- eling (e.g., linear regression models) and determinis- tic modeling (e.g., network models, kinship struc- tures, systems, models). Mr. Read

182. History of Anthropology. A survey of the major theoretical orientations in sociocultural anthro- pology, with special emphasis on the research meth- ods that have been and are useful in each. Examina- tion of the relevance of the development of science to sociocultural anthropology; identification of theoreti- cal and methodological links to other social sci- ences.

181S. Simulation in Anthropology. Discussion, three hours; laboratory, three hours. Prerequisites: upper division standing, successful completion of courses 5 or 120, and 186A, or equivalent, consent of instructor. Introduction to the theory, approach, use, and validation of simulation; review of the history of simulation methods in anthropology; the use of the microcomputer as a research tool. Intensive introduc- tion to dynamic approximations of theoretical demo- graphic and population processes. Concurrently scheduled with course C288. P/NP or letter grading.

Special Studies

191. Writing for Anthropology. Prerequisite: course 5. Teaching of writing skills in various academic formats, including term papers, essay examinations, journal articles, and reports. Class projects require student writing and evaluation of professional writing. Emphasis on the organization and presentation of a scholarly argument.

192. Economic Development and Culture Change. Seminar, three hours. Prerequisites: courses 5 and 22, or consent of instructor. Exploration of the cultural dimensions of such Third World develop- ment issues as technological innovation, econom- ic change, politics, modernization, labor power train- ing, migration, population planning, disaster relief, refugee resettlement, and the protection of indig- enous peoples. Mr. Hammond

197A. Introduction to Development Studies. (Same as Development Studies M100A.) Seminar, three hours. Prerequisite: some beginning experi- ence in the social sciences at the college level. A seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. Emphasis on economic development and culture change.

197H. Departmental Honors Seminar, three hours. Prerequisites: a 3.5 GPA in at least two upper division anthropology courses and eligibility for Letters and Science Honors Status, or consent of instructor. Five discussion segments dealing with ma- jor debates, questions, and issues in each of the de- partmental fields (social, cultural, biological, and lin- guistic anthropology, and archaeology). Discussion each week in a seminar format of readings on a major topic.
213. Selected Topics in Problems in Old World Archaeology. Prerequisite: consent of instructor. May be repeated for credit.

Mr. Sackett

214. Selected Topics in Prehistoric Civilizations of the New World. Prerequisite: consent of instructor. The Mesoamerican and Andean civilizations normally constitute the major focus of the seminar. May be repeated for credit.

Mr. Donnan, Mr. Nicholson

215. Field Training in Archaeology (4 to 8 units). Prerequisite: prior experience in archaeology. Advanced training in archaeological excavation techniques including projects, supervision of field crews, methodology of field recording, and preliminary analysis of field data. May be repeated for credit.

Mr. Meighan

M216. Dating Techniques in Environmental Sciences and Archaeology. (Same as Geography M278.) Lecture, three hours. Prerequisite: consent of instructor. A colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit.

Mr. Berger

217. Explanation of Societal Change. Prerequisite: consent of instructor. Examination of the processes of societal change, with the useful insights from a variety of explanatory models from general systems theory, ecology, anthropology, and other sources. Specific research questions vary with each course offering. May be repeated for credit.

218. Style and Ethnicity. (Not the same as course 218 prior to Fall Quarter 1986.) Seminar, three hours. Prerequisite: consent of instructor. How stylistic variation in material culture informs on and mediates the shape, boundaries, and interrelations of ethnic groups. Aimed primarily toward archaeologists and ethnographers, seminar also welcomes students specifically interested in either material culture or style studies.

Ms. Spence (F, even years)

M219A-M219B. Graduate Core Seminars in Archaeology (6 units each). (Same as Archaeology M201A-M201B.) Seminar, three hours. Required of anthropology students in the archaeology field. Seminar discussions based on a carefully selected list of 30 to 40 major archaeological works. These core courses provide students with a foundation in the breadth of knowledge required by a professional archeologist. Archaeological histography, a survey of world archaeology, and archaeological techniques. Emphasis on an appreciation of the multidisciplinary and the relevant interpretative strategies. May be repeated for credit with consent of advisor.

Biological Anthropology

220. Current Problems in Biological Anthropology. Seminar, three hours. Prerequisite: consent of instructor. A detailed examination of current research in biological anthropology (specific topics to be announced). May be repeated for credit.

Ms. Kennedy

221A-221B. Fossil Evidence for Human Evolution. Prerequisite: consent of instructor. An examination and analysis of the fossil evidence for human evolution.

222P. Biology and Ecology of Foraging Peoples. Prerequisite: consent of instructor. Detailed discussions of topical issues in the study of foraging societies, including the perspectives of cultural ecology and ethnography. Primary emphasis on theoretical and practical aspects of cultural ecology and ethnography, including health and nutrition, growth and development, life history variables, foraging, and sex differences.

Mr. Bailey

223. Selected Topics in Field Training in Biological Anthropology. Prerequisite: consent of instructor. Examination of current hypotheses in student and faculty field research. Emphasis on new approaches to field and field-oriented laboratory investigations of primate ecology, behavior, anatomy, physiology, and evolution (specific topics to be announced). May be repeated for credit.

224. Analysis of Biological Anthropology Field Data. Prerequisite: course 223 or other field training course or consent of instructor. Pragmatic and theoretical aspects of research on wild primates from planning and expedition through final data analysis (discussion topics to be announced). May be repeated for credit.

225. Biological Anthropology Colloquium. Seminar, three hours. Selected topics on the status of current research in biological anthropology. May be repeated for credit. G-U or letter grading.

226. Mating Systems in Birds and Mammals. Lecture, three hours. Prerequisite: consent of instructor. A review of recent research on animal communication and its relation to the evolution of human language. Topics range from the use of signals to the physiological control of vocalization in a variety of species to the social function of communication, particularly among free-ranging primates. The "ape-language" projects examined in detail.

227. Methods in Anthropology Fieldwork. Lecture, three hours. Prerequisite: consent of instructor. An exploration of the archaeological, ethnographic, and biological research issues involved in the design and execution of a field research project. Emphasis on the problems faced by archaeologists and ethnographers in implementing and analyzing data; laboratory reports required.

Ms. Spence (F, even years)

COLLEGE OF LETTERS AND SCIENCE / Anthropology / 101

228P. Ecology of Human Reproduction. Seminar, three hours. Prerequisite: consent of instructor. Critical examination of current research concerning the responsiveness of the human reproductive system to a variety of biobehavioral and ecological influences, including stress, exercise, nutrition, and disease. Influence of reproductive hormones on human behavior, and cross-cultural perspectives. S/U or letter grading. Ms. Peacock

M229A. Seminar: Human Behavioral Ecology. (Same as Education M219A and Psychiatry M279A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology. Mr. Blumenton Jones

M229B. Seminar: Reproduction, Families, and Parenting. (Same as Education M281B and Psychiatry M279B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories and findings from social and biological sciences. Mr. Blumenton Jones

M229C. Seminar: Selected Topics in Human Ethology. (Same as Education M281C and Psychiatry M279C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in the study of human behavior. Analysis: describing and recording behavior; causation: development, especially longitudinal studies; adaptation; evolutionary origins. Mr. Blumenton Jones

Cultural Anthropology

230P. Ethnology. Prerequisite: consent of instructor. A seminar on ethnological method and theory concentrating on idealistic systems. May be repeated for credit. Mr. Wilbert

230Q. Cultural Anthropology. Prerequisite: consent of instructor. Special problems in cultural anthropology. May be repeated for credit. Mr. Goldschmidt

231. Asian Americans: Personality and Identity. Prerequisite: graduate standing. The effect of class, caste, and race on the Asian American personality within the framework of anthropological theories.

232. Cultural and Psychological Aspects of Rites of Passage. Prerequisite: graduate standing or consent of instructor. Examination of rites of passage from both sociocultural and psychological perspectives. Exploration of general aspects (those common to rites of passage in general) as well as specific aspects (e.g., of puberty rites, of the rites of a particular culture) through an examination of the early anthropological literature on the subject and more recent formulations. S/U or letter grading.

M232P. Cultural Modes of Thought. (Same as Psychology M212.) Lecture, three hours. Prerequisite: consent of instructor. An examination of the influences of culture on perception, thinking, and intelligence. The fields of cross-cultural psychology, in addition to cognitive anthropology. Focus on learning and thinking in non-Western cultures, including problems of education in ethnic areas within the framework of anthropological theories. Mr. Price-Williams

232Q. Myth and Ritual. Prerequisite: consent of instructor. The nature and function of myth and ritual in nonindustrialized societies. Its associated value systems and philosophies examined as infrastructure of culture rather than as phenomena proposed by structuralist rationalism and cultural material empiricism. May be repeated for credit. Mr. Wilbert

M232R. South American Folklore and Mythology Studies. (Same as Folklore M257.) Prerequisite: course 174P or consent of instructor. An examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people. Mr. Wilbert

M232S. Ethnography of Humor. (Same as Folklore M214.) Lecture, three hours. Prerequisite: graduate standing in folklore and mythology or anthropology. An examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on the major psychological and sociocultural approaches to their study and interpretation.

232T. Person, Self, and Identity in Contemporary Anthropology. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Survey of the anthropological literature on person, self, and identity. The conceptual and theoretical relationships among these terms and their use in contemporary ethnography. S/U or letter grading.

232U. Issues in the Anthropology of Emotion. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Issues and problems in the study of the anthropological study of emotion. The extent to which culture shapes emotional expression and expression in everyday contexts and in ritual and the ways in which concepts of emotion vary cross-culturally. S/U or letter grading.

232V. Current Issues in Ethnography. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. S/U or letter grading. Mr. Moerman

233P. Symbolic Anthropology. Prerequisite: course 133H or consent of instructor. Selected questions concerning the visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit. Mr. Maquet

233Q. Aesthetic Anthropology. Prerequisite: course 133H or consent of instructor. Selected questions concerning the visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit. Mr. Maquet

M234A-M234B. Seminar in Psychocultural Studies. (Same as Psychiatry M210A-M210B.) Lecture, three hours. Prerequisite: consent of instructor. A two-quarter sequence devoted to the present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. Mr. Edgerton, Mr. Price-Williams

M234P. Transcultural Psychiatry. (Same as Psychiatry M222.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatry, and the questions of "sick" societies. May be repeated for credit. Mr. Kennedy

M234Q. Psychological Anthropology. (Same as Psychiatry M272.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas covered include things such as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness processes as they are related to culture. Topics vary from quarter to quarter. May be repeated for credit. Mr. Edgerton

M234R. Sociocultural Perspectives on Mental Retardation. (Same as Psychiatry M211.) Lecture, three hours. Prerequisite: consent of instructor. Examination of various aspects of mental retardation, including relationship of language to competence, work, crime, deviance, sexuality, and marriage. May be repeated for credit. Mr. Edgerton

236P. Selected Topics in the Cross-Cultural Study of Socialization and Childhood. (Same as Psychiatry M214.) Lecture, three hours. Prerequisite: consent of instructor. Methods, ethnographic data, and theoretical orientations. Emphasis on current research. May be repeated for credit. Mr. Weisner

M237A-M237B. Basic Core Courses in Mental Retardation Research (2 units each). (Same as Psychiatry M219A-M219B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Required of all MRRC trainees. A systematic overview of mental retardation and the sciences basic to this field of study. The language, methods, aims, and contributions of the various disciplines that contribute to the field. The last two weeks of the second quarter are spent discussing and preparing multidisciplinary research designs with potential for the prevention or amelioration of mental retardation. S/U grading.

Mr. Buchwald, Mr. Edgerton

238. Evolution of Technology. Lecture, three hours. Description, analysis, and interpretation of technological developments from the time material culture originated to the Industrial Revolution. S/U or letter grading.

Osawt

239P. Selected Topics in Field Training in Ethnography (4 to 8 units). Prerequisite: consent of instructor. Supervised collection of ethnographic information in the field. Students spend full time in the field for most of the quarter.

239Q. Analysis of Field Data. Prerequisite: course 239P or other field training course. Supervised analysis of ethnographic materials by students who have participated in a related field training course. Students work with their own as well as general project data in the preparation of articles for professional journals. May be repeated for credit.

Linguistic Anthropology

240. Seminar in Language and Culture. Prerequisite: consent of instructor. The development of anthropological linguistics, modern linguistic theory, and its application to the study of nonlinguistic aspects of culture, including relationship of language to world view, comparative historical linguistics to prehistory, lexicostatistics, semantic analysis, linguistic acculturation, sociolinguistics, and ethnolinguistics. Mr. Kroskirty
M241. Topics in Linguistic Anthropology. (Same as Linguistics M246.C.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

242. Ethnography of Communication. Prerequisite: graduate standing or consent of instructor. Seminar devoted to examining representative scholarship from the fields of sociolinguistics and the ethnography of culture. Particular attention to theoretical developments including the relationship of the ethnography of communication to such disciplines as anthropology, linguistics, and sociology.

243P. American Indian Ethnolinguistics and Sociolinguistics. Prerequisites: prior coursework in either anthropology, linguistics, or American Indian studies, consent of instructor. The social and cultural aspects of language use in Native North American speech communities. Specific topics include both micro-sociolinguistics (one word variation, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistics (such as language contact, language change, and language in American Indian education). Graduate students conduct library and/or other research and participate in group discussion.

244. Topics in Language Socialization. Prerequisite: consent of instructor. Selected topics in the study of language socialization, with special focus on the development of discourse skills and the mastery of situationally appropriate speech. May be repeated for credit. Ms. Mitchell-Kernan (W)

245. Linguistic and Intracultural Variation. Prerequisite: consent of instructor. The problem of variation as it impinges on the disciplines of anthropology and linguistics. Among the objectives of the course are the following: to acquaint the importance of speech variation in anthropological linguistics research, to critically assess a broad and representative sample of points of view on the study of variation, and to evaluate the utility and potential applicability of recent linguistic models to anthropological linguistics and anthropological theory.

Mr. Kroskrity

246. Research, Design and Field Training in Linguistic Anthropology. Prerequisite: consent of instructor. Supervised collection of linguistic information in the field. Students spend full time in the field for most of the quarter. May be repeated for credit. S/U or letter grading.

247. Analysis of Linguistic Field Data. Prerequisite: course 246 or other field training course or consent of instructor. Supervised analysis of linguistic field data by students who have participated in a related field training course. Students work with their own as well as general project data in the preparation of articles for professional journals. May be repeated for credit. S/U or letter grading.

M247A. Ethnographic Film. (Same as Film and Television M209C.) Lecture/discussion, four hours; laboratory, to be arranged. Prerequisite: graduate standing, consent of instructor. Discussion of the history, methods, and criteria for the use of film as a medium for the preservation and communication of human cultures. Filming assignments are given to increase the understanding of the theoretical and practical aspects of ethnographic filming. Consideration of the potential of both film and video for fieldwork.

Mr. Boehm, Mr. Hawkins, Mr. Moerman (F)

248. Practicum In A Field Language (4 to 8 units). Prerequisite: consent of instructor. Intensive training in an indigenous language as preparation for work in the field.

Social Anthropology

250. Social Anthropology. Prerequisite: consent of instructor. Extensive examination of current theoretical views and literature. Ms. Levine

251P. Cultural Ecology of Lowland South America. Prerequisite: consent of instructor. Seminar on traditional adaptations to the lowland environment, with special emphasis on the tropical forest. Explora-
tory principles accounting for cultural differences, with emphasis on effects of modern changes on the people and their environment. Mr. Johnson

252. Special Topics In Social Process. Prerequisite: consent of instructor. Selected aspects of the literature on social and cultural process. The signifi-
cance of repeated and/or cumulative sequences of events in a variety of social and cultural contexts. Understanding of social processes compared with normative concepts and ideal models. May be repeated for credit.

252P. Social Inequality. Lecture, three hours. Prerequisite: course 152P, upper division standing, consent of instructor. Analysis of particular problems in understanding systems of structured social in-
equality based on rank, caste, class, ethnicity, or sex. Participants serve as seminar discussion leaders and present a research paper. S/U or letter grading. Mr. Hammond

253. Economic Anthropology. Prerequisite: consent of instructor. May be repeated for credit.

253P. Technology and Economy. Seminar, three hours. Prerequisite: consent of instructor. Analysis of technoeconomic systems and the development in the context of contemporary and social and economic change (e.g., in labor organization, kinship, property rights), using examples mainly from Asian peasant societies, past and present. Ms. Bray

254. Kinship. Prerequisite: consent of instructor. May be repeated for credit.

255. Comparative Political Institutions. Prerequisite: consent of instructor. May be repeated for credit.

256. Social Interaction. Prerequisite: consent of instructor. Emphasis on issues for ethnographic theory and practice raised by developments in anthropological sociology, political science, and the Euro-Slavic continent.

Mr. Johnson

257. Comparative Political Institutions. Prerequisite: consent of instructor. Emphasis on issues for ethnographic theory and practice raised by developments in anthropological sociology, political science, and the Euro-Slavic continent. May be repeated for credit. Ms. Levine

258. Comparative Studies of Intentional Communities. Prerequisite: course 157 or consent of instructor. Comparative study of the ideological structure, and individual significance of intentional communities selected and discussed in depth, with reference to particular collectivities. May be repeated for credit. Mr. Maquet

259. Cultural Ecology of Nomadic Pastoral Societies. Seminar, three hours. Prerequisite: upper division standing or consent of instructor. Examination of nomadic pastoralism both as a form of subsistence and economic strategy, and a mode of sociopolitical adaptation to ecologically marginal and sociopolitically heterogeneous regions of Asia and Africa.

Mr. Shahrai

Applied Anthropology

260. Urban Anthropology. Prerequisite: course 167 or consent of instructor. An intensive anthropological examination of the urban setting as a human environment.

261. Comparative Minority Relations. Prerequisite: consent of instructor. Analysis of the major theoretical and methodological issues in the study of minority relations from a comparative perspective. Consensus, conflict, and pluralistic constructs analyzed and their strengths as explanatory devices investigated. As they pertain to dependent populations in North America, Latin America, Southern Africa, India, Asia, and the Euro-Slavic continent. May be repeated for credit.

261P. Issues in Development Anthropology. Lecture, three hours. Prerequisite: course 160 or 161 or consent of instructor. Selected problems in economic development in Third World countries in the context of related issues such as health and education, environmental protection, housing and urbanization, promotion of local participation, women's roles, protection of indigenous minorities, infrastructural development, diplomacy, warfare and revolution, and migration and refugee resettlement, with recommendations for action. Mr. Hammond

262. Cultural Context of Health Care. Prerequisite: consent of instructor. Concepts and treatment of illness and disease in cross-cultural perspectives, with emphasis on research problems and methods. The anthropological approach to health-related research and the intersections of anthropology and problem areas in public health and psychiatry (such as epidemiology, fertility regulation, socialization, and developmental disabilities). Mr. Johnson

262P. Culture and Human Reproduction. (Same as Public Health M267.) Lecture, two hours; discussion, two hours. Prerequisite: course 120 or 124P, Public Health 112, 171A, M274A, consent of instructor. Exploration of human behavior related to repro-
duction. Cross-cultural exploration of biological and behavioral factors, with particular reference to human adaptations to the environment. Mr. Scrimshaw

263. Medical Anthropology. (Same as Nursing M217.) Lecture, three hours. Prerequisite: course M168 or consent of instructor. Any of the topics cov-
ered in course M168 are selected each quarter for intensive literature review and independent projects. May be repeated for credit.

263P. Gender Systems. Discussion, three hours. Prerequisite: graduate standing or consent of instruc-
tor. Current theoretical developments in understand-
ing gender systems cross-culturally, with emphasis on the relationship between systems of gender, econ-
omy, ideational systems, and social inequality. Select-
on of ethnographic cases from the recent literature. S/U or letter grading. Ms. Browner

263Q. Advanced Seminar In Medical Anthropology. (Same as Nursing M273, Psychiatry M273, and Public Health M279H.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of the interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

Ms. Browner, Ms. Scrimshaw (Sp)
283R. Medicine in Chinese Culture, Seminar, three hours. Prerequisite: consent of instructor. Use of the rich historical and contemporary material of Chinese culture to analyze the theoretical and symbolic complementarity of different therapeutic systems and current attempts at syncretization with Western biomedicine. S/U or letter grading. Ms. Bray

284. Ethnohistory and the Mexican/Chicano People in North America, Prerequisite: graduate standing or consent of instructor. Recommended: course M127T. A research course on topics in the ethnohistory of the Mexican/Chicano people in North America, including social organization, economic and political systems, belief and value systems, linguistic and expressive adaptations, and individuals and their cultural contexts. Topics vary according to interest and are announced prior to the beginning of the quarter. May be repeated for credit.

285. Public Archaeology, Prerequisite: consent of instructor. Archaeology as part of the national heritage, both in the U.S. and other countries. Legal, ethical, cultural, and scholarly aspects of salvage and contact archaeology. Designed for researchers and managers of cultural resources. Mr. Meighan

286. Medical Anthropology in Public Health, same as Psychology M2650 and Public Health M2177. Prerequisites: Public Health 112, 130, one upper division psychology, sociology, or anthropology course, or equivalent consent of instructor. Cross-cultural aspects of human behavior as they relate to perception, treatment, incidence, and prevalence of disease and illness. Ms. Scrimshaw

267B-267C. Ethnographic Film Direction (4 or 8 units each). (Same as Film and Television M265A-M265B). Lecture, four hours; laboratory, to be arranged. Prerequisites: course M247A, graduate standing, consent of instructor. Further consideration of the methods and criteria for the use of film as a medium for the preservation and communication of human cultures. Production of films and videotapes on topics selected by students. Mr. Boehm, Mr. Hawkins, Mr. Moerman (W, M267B; Sp, M267C)

M269. Contemporary Issues of the American Indian. (Same as American Indian Studies M200C and Sociology M227S). Introduction to the most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on the historical background presented in American Indian Studies M200A and the cultural and expressive experience of American Indians presented in American Indian Studies M200B. Mr. Bierlein

M295P. Sociocultural Perspectives on Women and Health, (Same as Nursing M280, Psychiatry M280, and Public Health M276D.) Seminar, three hours. Prerequisite: consent of instructor. Literature from industrialized and developing societies on topics such as the relationship between women’s social roles and their health, women as patients and healers, and women’s reproductive health issues, including the development and use of new reproductive technologies. Ms. Browner

Regional Cultures

271. African Cultures, Prerequisite: consent of instructor. Survey of the literature and problems of African culture.

M272. Indians of South America, (Same as Latin American Studies M250A.) Lecture, three hours. Prerequisite: consent of instructor. Survey of the literature and research topics related to Indian cultures of South America. May be repeated for credit. Mr. Wilbert

273. Cultures of the Middle East, Prerequisite: course 176 or consent of instructor. Survey of the literature and problems of the various cultures of the Middle East.

274. Cultures of the Pacific Islands. Prerequisite: consent of instructor. Topics in the contemporary sociocultural anthropology and classic ethnography of Melanesia, Polynesia, and Micronesia. Recommended: course 166A or equivalent. Mr. Newman

275. Ethnicity in the Southwest, Discussion, three hours. Prerequisite: graduate standing. Comparative focus on ethnic relations among Indian, Mexican American, and Anglo populations with special concern for the regions of the U.S. Southwest: the lower Rio Grande Valley of South Texas, the Rio Arriba of northern New Mexico, western Arizona, and Southern California.

276. Cultures of South Asia, Prerequisites: consent of instructor. Discussion of recent and current anthropological research in Southeast Asia. Depending on their level of preparation, students produce a topical annotated bibliography, critique, or proposal for research. S/U or letter grading. Mr. Moerman

277. Aspects of Chinese Society, Seminar, three hours. Prerequisite: consent of instructor. An anthropological perspective on the historical evolution of and contemporary changes in such key institutions of Chinese society as family, lineage, and associations, setting individuals and groups in the larger political, economic, and class framework of society and state. S/U or letter grading. Ms. Bray

History and Theory

280. Anthropology Theory, Prerequisite: graduate standing in anthropology or consent of instructor. The range of theories that anthropologists have employed in describing and explaining variability in sociocultural phenomena. The organization of particular theories, as well as issues that separate divergent theories. Emphasis on up-to-date examples of different theoretical perspectives. Major perspectives include: evolutionism, cultural ecology, British functionalism, French functionalism, structuralism, cultural and personality, psychological anthropology (Freudian, neo-Freudian, non-Freudian), behavioral anthropology, cognitive anthropology, and ethnomusicology.

281. Selected Topics in the History of Anthropology, Prerequisite: consent of instructor. Particular problems in the history of anthropology as dictated by the interests of students and faculty. May be repeated for credit.

282. Research Design in Cultural Anthropology, Prerequisite: consent of instructor. Primarily intended for graduate students preparing for fieldwork. The unique position of anthropology as one of the sciences and the resulting problems for scientific research design. The process of finding and using appropriate design and methodology. Students prepare their own research designs and present them for class discussion. Mr. Johnson

283. Mathematical Models in Anthropology, Prerequisite: consent of instructor. Current topics and issues in mathematical anthropology. An overview of a variety of mathematical approaches relevant to theory, systems theory, decision theory, Markov processes, etc. Mr. Read

M284. Qualitative Research Methodology, (Same as Public Health M273.) Discussion, three hours; laboratory, one hour. Prerequisites: Public Health 100A and 125 or 181, one undergraduate or graduate social psychology, sociology course, consent of instructor. Intensive seminar-course field in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. Mr. Scrimshaw

285. Schools, Domains, and Strategies in World Archaeology. (Not the same as course 285 prior to Fall Quarter 1986.) Seminar, three hours. Prerequisites: consent of instructor. A comparative examination of the schools of world archaeology, contrasting their respective data bases, research strategies, and relations to allied intellectual disciplines. Archaeologists from all departments are welcome, and students interested in the history or philosophy of science. Mr. Sackett

286. Quantitative Methods in Anthropology, Laboratory, three hours. Prerequisites: courses 166A-166B or equivalent, consent of instructor. Computer and mathematical tools of quantitative data analysis, including multivariate techniques, in the context of student research data sets. Mr. Read

288. Selected Topics in Computer Simulation and Modeling, Seminar, three hours. Prerequisites: courses 166A and C186A-C288, permission of instructor. Recommended: course 166B. Application of computer simulations and/or models to specific problem areas of interest to anthropologists. Problems may be selected in consultation with each offering and include computer as a research tool. Introduction to the theory, appropriate use, and validation of simulation; review of the history of simulation methods in anthropology; the use of the microcomputer as a research tool. Intensive introduction to dynamic approximations of theoretical demographic and population processes. Concurrently scheduled with 166A and C186A-C288. Graduate students may meet one additional hour each week to discuss relevant simulation literature. S/U or letter grading.

M289. Computer Methodologies in Latin American Studies and Anthropology. (Same as Latin American Studies M250P.) Lecture, three hours. Prerequisite: consent of instructor. Basic principles of computing and information processing, along with their potential application in Latin American research. Examination of the impact that computers are having in Latin American society. Mr. Behrens

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Anthropology (2 units). Prerequisite: graduate standing. Required of all new teaching assistants. A workshop and seminar in teaching techniques, including evaluation of each student’s own performance as a teaching assistant. A four-day workshop precedes the beginning of the quarter, followed by a 10-week seminar during the quarter designed to deal with the problems and techniques of teaching anthropology. Unit credit may be applied toward full-time equivalence but not toward the nine-course requirement for the M.A. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Individual Studies for Graduate Students (2 to 12 units). Prerequisite: consent of individual studies instructor. Direct individual studies. S/U or letter grading.

597. Preparation for Ph.D., Qualifying Examinations (2 to 12 units). Prerequisite: consent of department. Students must complete the qualifying examinations and ordinarily take no other coursework.
Scope and Objectives

Since language permeates every aspect of our social, economic, political, and academic pursuits, it is small wonder that we have deep abiding curiosity about its origin, its use, and its acquisition. The UCLA doctoral program in applied linguistics provides a rich and supportive environment for graduate students and faculty to define and resolve questions that satisfy that curiosity.

The combined faculties of the Department of Linguistics and the English as a Second Language (ESL) Section, as well as professors in Psychology, Sociology, and Education, represent a wide range of expertise and experience in language-related research. Their guidance and collaboration with students as they apply relevant elements of linguistics, psycholinguistics, and sociolinguistics result in substantial research findings in the area of language use, education, acquisition, and analysis. Graduates of the program are well prepared to pursue academic and professional careers at the highest level of service and inquiry.

Ph.D. Degree

Admission

The basic requirement for admission is completion of the UCLA Master of Arts degree in Teaching English as a Second Language (TESL) or in Linguistics or the equivalent of one of these. Applicants with a graduate degree in TESL, linguistics, applied linguistics, psycholinguistics, or sociolinguistics from another recognized institution may be admitted provided they then make up the courses in one or the other of the two UCLA M.A. programs whose equivalents they have not yet taken. Students with graduate degrees in other related disciplines (such as a foreign language, English, education, psychology, sociology, or anthropology) are advised to complete the UCLA M.A. in Linguistics or TESL before seeking admission to the Ph.D. program.

Prospective candidates are required to submit (1) three letters of recommendation from professors who are well acquainted with their academic background, (2) a definite and complete statement of the type of dissertation they hope to prepare, and (3) copies of any relevant professional publications, M.A. theses, or substantial papers they may have written. The General Test of the Graduate Record Examination (GRE) should also be taken (required only of applicants whose native language is English). Applications for admission to Fall Quarter, which is when most students are admitted, should reach the Graduate Admissions Office by the preceding December 30; the supporting materials should reach the Applied Linguistics Program (3300A Rolfe Hall, UCLA, Los Angeles, CA 90024-1531) no later than February 15.

Admission criteria include graduate and undergraduate grade-point averages, relevant professional experience, command of a foreign language, the quality of the M.A. thesis, and any language-related publications the candidate may have written.

Major Fields and Specializations

Four areas of specialization are available: language acquisition, language analysis, language education, and language use. For details on each specialization, contact the program office.

Foreign Language Requirement

Before advancement to candidacy, students whose native language is English must demonstrate proficiency in two foreign languages by one of the following methods: (1) a reading examination, (2) a research paper based on extensive sources in the language, (3) a conversation examination showing knowledge in depth, or (4) an Educational Testing Service (ETS) graduate examination. You may substitute three graduate courses in research design and statistics for one of the two foreign languages; however, courses so used cannot be used to fulfill any other requirement. In consultation with the interdepartmental committee, you must select the most appropriate means of fulfilling the requirement.

Course Requirements

In addition to fulfilling the general University requirements, candidates for the Ph.D. in Applied Linguistics must meet the program requirements listed below. All courses taken to fulfill breadth and specialization requirements must be approved by your faculty adviser.

Basic Preparation: Any of the following courses not already taken must be completed as early as possible and before advancement to candidacy for the degree. For basic preparation in linguistics, you can select either a phonetics and phonology track or a syntax and semantics track. For both tracks, you must take Linguistics 120A and either Linguistics 120B, 127, or English 122K. Students selecting the phonetics and phonology track would then take Linguistics 165A/B/C200A, followed by Linguistics 201 or 203. Students selecting the syntax and semantics track would take Linguistics C165B/C200B, followed by Linguistics 206 or 207 or 211. For basic preparation in TESL, you must take English 241K, 370K, and 380K. Course 370K, which is organized as a general orientation to the ESL field, must be taken at UCLA. If you have taken courses equivalent to any of the remaining courses at another institution, you are not required to take them at UCLA. If you have at least two years of experience in teaching a second language, you may be exempt from course 380K.
Research Papers
In lieu of a written qualifying examination, two original research papers of publishable quality in different areas of specialization are required. These may be revised or extended seminar papers but must be prepared after admission to the Ph.D. program. The topics of these papers are to be selected by the student, in consultation with appropriate faculty members and with consent of the Ph.D. program adviser. Each of the finished papers is evaluated by two faculty members.

All candidates are required to prepare a dissertation as a demonstration of their ability to carry out original research under the guidance of their doctoral committee. The doctoral committee also administers the University Oral Qualifying Examination before advancement to Ph.D. candidacy.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
As the dissertation nears completion, you must make a public report on the results of your research. This may be done, at your choice, at a meeting of the colloquium of either the Department of Linguistics or the ESL Section. You must, therefore, enroll in either English 400K or Linguistics 275 during the appropriate quarter. The public report determines whether a final oral examination is required.

Graduate Courses

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA Ph.D. program adviser and graduate dean, and host campus instructor; department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading. (F,W,Sp)

596. Directed Individual Study (4 to 8 units). Prerequisite: doctoral standing. Independent study in an area of applied linguistics. Up to eight units may be applied toward the Ph.D. course requirements. May be repeated for credit. (F,W,Sp)

597. Preparation for Ph.D. Candidacy Examination (4 to 6 units). Prerequisite: completion of at least six courses of the 32-unit requirement for the Ph.D. May not be applied toward the 32-unit requirement. May be repeated for credit. S/U grading. (F,W,Sp)

599. Research for and Preparation of Ph.D. Dissertation (4 to 16 units). Prerequisite: advancement to Ph.D. candidacy. Required of all Ph.D. candidates each quarter they are registered and engaged in dissertation preparation. May be repeated for credit but may not be applied toward the Ph.D. course requirements. S/U grading. (F,W,Sp)

Applied Linguistics Course List

Language Acquisition

English 227K. Experiential Seminar in Second Language Learning
251K. Advanced Seminar in Interlanguage Analysis
260K. Psycholinguistics and Language Teaching
261K. Second Language Acquisition
269K. Current Issues in Language Acquisition
271K. Cross-Linguistic Topics in Second Language Acquisition

Linguistics 213. Survey of Psycholinguistics
C235. Theoretical Issues in Disorders of Language Development
254. Topics in Linguistics I: Proseminar
259A, 259B. Topics in Linguistics II: Proseminar
264A-264B-264C. Seminar in Special Topics in Linguistic Theory

Additional Courses in Other Departments

Education 217D. Language Development and Education
227B. Research on the Cognitive and Language Characteristics of Exceptional Individuals

Psychiatry 257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders

Psychology 240A-240B. Developmental Psychology
242F. Seminar in Developmental Psychology: The Development of Language and Communication
260A-260B-260C. Proseminar in Cognitive Psychology

262. Human Learning and Memory

263. Psycholinguistics

268D. Seminar in Human Information Processing: Language and Thought

Language Analysis

English 241. Studies in the Structure of the English Language
249K. Current Issues in Language Analysis
250K. Advanced Seminar in Cohesion Analysis of English Structure
252K. Advanced Seminar in Contextual Analysis of English Structure
283K. Discourse Analysis

Linguistics 201. Survey of Current Issues in Phonological Theory
202. Survey of Current Issues in Language Change
203. Survey of Phonetic Theory
204. Survey of Experimental Phonetics
205. Survey of Current Issues in Morphological Theory
206. Survey of Current Issues in Syntactic Theory
207. Survey of Formal Semantics
209. Survey of Natural Language Processing
210A, 210B. Field Methods I, II
211. Survey of Discourse and Functional Foundations of Grammar
212. Survey of Lexical Semantics and Pragmatics
214. Survey of Current Syntactic Theories
215. Survey of Syntactic Typology
220. Linguistic Areas
225. Linguistic Structures
251. Topics in Phonetics and Phonology I: Proseminar
Language Education
Curriculum and Instruction
English 220K. Materials Development for Language Teaching
221K. Media for Language Teaching
222K. Role of English as a Second Language in Bilingual Education
229K. Teaching of English for Minority Groups
235K. Program Evaluation in Applied Linguistics
227K. Experiential Seminar in Second Language Learning
284K. English for Specific Purposes

Additional Courses in Other Departments
Dutch (Germanic Languages) 234. Structure of Modern Standard Dutch
Spanish (Spanish and Portuguese) 256A-256B.
Studies in Spanish Linguistics

Archaeology
(Interdepartmental)

288 Kinsey Hall, (213) 825-4169

Professors
C. Rainer Berger, Ph.D. (Anthropology, Geography, and Geophysics), Chair
Giovanni Buccellati, Ph.D. (Ancient Near East and History)
Christopher B. Donnan, Ph.D. (Anthropology)
Susan B. Downey, Ph.D. (Art History)
Timothy Earle, Ph.D. (Anthropology)
Marija Gimbutas, Ph.D. (European Archaeology)
James N. Hill, Ph.D. (Anthropology)
Clement W. Meghan, Ph.D. (Anthropology)
Henry B. Nicholson, Ph.D. (Anthropology)
Wendell H. Osowalt, Ph.D. (Anthropology)
Merrick Posnansky, Ph.D. (History and Anthropology)
Donald A. Preziosi, Ph.D. (Art History)
Dwight Read, Ph.D. (Anthropology)
James R. Sackett, Ph.D. (Anthropology)
Stanislaw Segert, Ph.D. (Near Eastern Languages and Cultures)
George H. Sines, Ph.D. (Materials Science and Engineering)
Kan Lao, B.A., Emeritus (East Asian Languages and Cultures)
Katharina Otto-Dorn, Ph.D., Emeritus (Art History)
Richard C. Rudolph, Ph.D., Emeritus (East Asian Languages and Cultures)

Associate Professors
Elizabeth Carter, Ph.D. (Near Eastern Languages and Cultures)
Hung-Hsiang Chou, Ph.D. (East Asian Languages and Cultures)
Michael J. DeNiro, Ph.D. (Geochemistry and Archaeological Sciences)
Bernard D. Frischer, Ph.D. (Classics)

Gail E. Kennedy, Ph.D. (Anthropology)
Cecelia F. Klein, Ph.D. (Art History)
Willie Klement, Jr., Ph.D. (Materials Science and Engineering and Archaeological Sciences)
Steven Lattimore, Ph.D. (Classics)

Assistant Professors
Robert C. Bailey, Ph.D. (Anthropology)
Irene A. Bierman, Ph.D. (Art History)
Robert L. Brown, Ph.D. (Art History)

Adjunct Assistant Professor
Jeanne Arnold, Ph.D. (Anthropology)

Scope and Objectives
The interdisciplinary program offers M.A. and Ph.D. degrees in Archaeology. It brings together interests and specialties represented by those departments offering courses in archaeology, as well as others offering courses relevant to archaeology. Qualified undergraduates may enroll in courses offered by the program provided they receive consent of the instructor.

The primary purpose of the program is to train scholars in archaeology for university-level teaching and research and other professional aims. Its resources are intended for those archaeology students whose academic goals cannot be met within any single department and who, consequently, require an individually planned plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, geology, mathematics, statistics, zoology, etc.). There are opportunities for participation in a variety of field, laboratory, and computer studies on a worldwide scale.

Requirements for Graduate Degrees

Admission
Any undergraduate major may be considered for admission to the program although those applicants who have had little previous archaeological education may be admitted under probationary status and may be required to take a series of courses to make up deficiencies. A Graduate Record Examination (GRE) General Test report is required. The following application materials should be submitted directly to the chair of the program: an acceptable plan of study (including a statement of objectives, an outline of projected coursework, and a general indication of an M.A. paper or dissertation topic); three letters of recommendation; a research paper preferably relevant to archaeology or comparable evidence of scholarly work. Applicants are accepted for admission to the Fall Quarter only. The program's "Study Guidelines" brochure will be sent to applicants on request to the Chair, Archaeology Program, 288 Kinsey Hall, UCLA, Los Angeles, CA 90024-1510.
Major Fields or Subdisciplines

Africa; analysis of archaeological materials; ancient Near East; Andean South America; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; Europe; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Fieldwork

No graduate degree is awarded until you have worked in the field and have demonstrated your competency to direct field research in archaeology. Both theoretical and practical knowledge of methods and techniques used in the field are necessary.

This requirement may be met in several ways. Ordinarily you take a regular UCLA field course such as Anthropology 115P, Archaeology 259, Ancient Near East 261, or History 276, or similar courses offered by other departments. Comparable courses offered by other institutions may also be accepted. An informal report, submitted by the director of an excavation, describing work performed by the students under supervision, may be sufficient. Excepting the four courses listed above, any given formula to fulfill the requirement must be cleared in advance with the chair of the program.

Master of Arts Degree

The structure of the M.A. program includes the successful completion, within seven academic quarters, of fieldwork (described above) plus the following requirements.

Foreign Language Requirement

The ability to read at least one modern foreign language, relevant to your field of interest and approved by your adviser, is required for the M.A. You may meet this requirement by (1) passing an examination administered by the Educational Testing Service (ETS) with a score of 500 or better, (2) completing the third course in an introductory, regular sequence of the selected language at UCLA with a minimum grade of A, or (3) taking a reading examination (in Spanish, French, or German) administered by the program.

The foreign language requirement must be completed by the end of your sixth quarter in residence, unless an earlier deadline is imposed by your adviser.

Course Requirements

A minimum of 42 units (at least nine courses, of which five must be graduate) taken for a letter grade, are required to be distributed as follows: a minimum of five courses (25 units) in the 200 and 500 series, including Archaeology 200 (six units), M201A-M201B (six units each), and two elective graduate courses*, one of which may be course 596. Course 596 (letter-graded) may be taken twice for a maximum of 12 units, but only six units may be applied toward the minimum graduate course requirement. Four upper division elective courses* (a minimum of 16 units, excluding 199s) are also required.

Comprehensive Examination Plan

You are required to take a comprehensive core examination during your third quarter in residence. This written examination is based largely on a reading list of about 30 volumes which have been the focus of the seminar discussions in Archaeology M201A-M201B. The examination is graded high pass, pass, or no pass and may be repeated once.

M.A. Paper

A master's-level research paper, normally no longer than 20 to 35 pages and graded by the three members of the M.A. committee, is to be submitted by the end of the third week of the seventh quarter to the chair of the program.

Ph.D. Degree

Admission

Completion of a master's program is required. Applicants who do not have a UCLA M.A. in Archaeology should refer to the admission section under "Requirements for Graduate Degrees" above. Admission to the doctoral program for students completing a UCLA M.A. in Archaeology is based on written recommendation by all three members of the M.A. committee and at least a high pass on either the M.A. core examination or the M.A. paper.

Doctoral students entering the program with an M.A. from another university are required to pass the comprehensive core examination (see "Master of Arts Degree") unless they can demonstrate to the chair and the members of the admissions committee that the examination should be waived.

Foreign Language Requirement

Reading competence in two modern foreign languages relevant to your interests is normally required and may be demonstrated as outlined for the master's degree.

Course Requirements

You must be enrolled in a minimum of 12 units per quarter. Archaeology 200 is required. There are no other restrictions or requirements concerning courses.

Qualifying Examinations

By the end of your fourth quarter in the doctoral program, after the foreign language requirement has been fulfilled, you must take a written qualifying examination in the following three areas: (1) topical specialization, (2) analytical theory, method, and technique, and (3) regional culture history. If you pass this examination, you may then make arrangements to take the oral examination. If the written examination or any portion thereof is failed, you may make one further attempt if your committee deems it appropriate.

The University Oral Qualifying Examination must be taken by the end of your sixth quarter in the doctoral program. You are required to submit to the doctoral committee a formal dissertation proposal (of about 10 pages), including the particular research problem on which you will be examined during the oral qualifying examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination may be waived by your doctoral committee.

Upper Division Course

Graduate Courses

200. Archaeology Colloquium (1 or 6 units). Discussion, two hours. Prerequisite: archaeology major or consent of instructor. Required of all students. The development of archaeology as a discipline. Major intellectual trends and current issues in archaeology. Scientific and humanistic viewpoints presented by archaeologists from different academic departments. May be repeated for credit but may be applied only once toward the departmental M.A. requirements. Sr U grading only for students enrolled for one unit.

M201A-M201B. Graduate Core Seminars in Archaeology (6 units each). (Same as Anthropology M219A-M219B.) Seminar, three hours. Required of all M.A. students. Seminar discussions based on a carefully selected list of 30 to 40 major archaeological works. These compulsory core courses provide students with a foundation in the breadth of knowledge required by a professional archaeologist. Archaeological biography; a survey of world archaeology and archaeological techniques. Emphasis on an appreciation of the multidisciplinary background of modern archaeology and the relevant interpretative strategies. May be repeated for credit with consent of adviser.

*Of the six combined elective courses, no more than four may be offered by the same department. At least one must be outside your sphere of regional interest to be selected from a pool of eligible courses by your adviser.
Methodology and History

Ancient Near East (Near Eastern Languages) 261. Practical Field Archaeology

Anthropology 115P. Archaeological Field Training
115Q. Archaeological Research Techniques

Strategy of Archaeology M115S. Historical Archaeology
116P. Laboratory Analysis in Archaeology
M116Q. Dating Techniques in Environmental Sciences and Archaeology
118A, 118B. Museum Studies
121A. Fossil Man and His Culture
121B. The Australopithecines
121C. Evolution of the Genus Homo

129P. Laboratory Methods in Biological Anthropology: Skeletal
132. Technology and Environment
138. Methods and Techniques of Ethnohistory
158. Hunting and Gathering Societies
183. History of Archaeology

186A-186B. Quantitative Methods and Models in Anthropology

210. Analytical Methods in Archaeological Studies
211. Regional Analysis in Archaeology

Paul Ong, Ph.D. (Urban Planning)

Scope and Objectives
The Asian American Studies Program, an interdepartmental program supported by the Asian American Studies Center, promotes the study of Asian and Pacific peoples in the U.S. from several disciplines. The undergraduate program provides a general introduction to Asian American studies for those who anticipate advanced work at the graduate level or careers in research and community work related to the Asian American. Although no undergraduate major is offered in Asian American studies, students may participate in the program through a departmental major or an interdepartmental major such as East Asian studies. The graduate program leads to an M.A. degree.

A major goal of the program is to communicate the experiences of Asians as an American ethnic group. Courses examine the important issues and concerns of Asian Americans, including their history, mental health, social organization, and culture.

Special Undergraduate Program

Preparation for the Specialization
Required: Asian American Studies 100A-100B.

Upper Division
Since this is not a degree-granting program, students participating in it must complete an organized major.

For further information on the undergraduate specialization, contact the Curriculum Coordinator, Asian American Studies Center, at the above address.

Master of Arts Degree

Admission
In addition to the University's minimum requirements, applicants are expected to present evidence of their previous interest in Asian American studies through courses taken at the undergraduate level, by research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the Asian American Studies Program (3232 Campbell Hall, UCLA, Los Angeles, CA 90024-1546) as part of their application. Three letters of recommendation are also required.

Major Fields
Since the program is interdepartmental, its major fields are determined by the participating faculty from various departments.

Research Tool Requirement
The research tool requirement may be satisfied by one of two options:

(1) Asian Language: A minimum of two full years of study in a language at the university level or equivalent. This requirement may be fulfilled before entering the program, but you must pass a proficiency examination administered by the Asian American Studies Center and the interdepartmental committee.

(2) Research Methods: Three upper division or graduate courses in research methods (e.g., statistics, computer science, field and observational techniques, archival methods). Specific courses must be approved by the interdepartmental committee.

You must justify your choice of option in a written statement. The rationale must specify the courses selected and how they directly relate to research and career goals.

Course Requirements
A total of 11 upper division and graduate courses is required for the degree. Of that number, seven must be graduate courses, including the required Asian American Studies 200A, 200B, 200C. Three of the graduate courses must be selected from Anthropology 231, M232P, Education 204D, 253G, History 201H, 245, Sociology 261, 263. The remaining four courses of the 11-course total, three of which may be upper division, must be approved by your faculty adviser and should be selected to give you additional training in a discipline or greater understanding of a particular topic.

Two courses in the 500 series may be applied toward the required 11 courses; however, only one of the two may be applied toward the required seven graduate courses.

Thesis Plan
The thesis committee is normally constituted at the beginning of your second year in residence, at which time you are expected to submit a plan for approval. After approval and completion of the thesis, the committee conducts an oral examination on its subject.

Upper Division Courses

100A-100B. Introduction to Asian American Studies. An introduction to Asian American studies. 100A. The history of Asians in America. 100B. Contemporary Asian American communities.

M102. Asian American Literature. (Same as English M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by Americans of Chinese, Japanese, Filipino, and Korean origins. Study of the interaction of autobiography and fiction, the nourishing and limiting influences of mainstream American and Asian literary traditions, and the conflict between ideological and literary criteria.

Ms. Cheung (F)
103. Asian Americans and the Law. Survey of major federal and California case and legislative law directed specifically toward Asian Americans from 1850 to World War II and relocation. Major subject areas include Japanese relocation orders, anti-Asian labor legislation, legal prohibitions against Asians’ right to testify, case law on Asian women, and equal educational opportunity for Asians.

105. Asian American Women. Lecture, three hours. The condition of Asian women in America. Topics include racial and cultural stereotypes, women in Asian American history, and contemporary issues and concerns of Asian American women. Current approaches to Asian American women presented and evaluated.

M107. Asian American Personality and Mental Health. (Formerly numbered 197.) (Same as Psychology M107.) Lecture, three hours. Prerequisite: Psychology 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors/resources, and immigrant and minority group status. Mr. Sue

199. Special Topics in Asian American Studies (2 to 4 units). Prerequisites: course 100A or 100B or comparable knowledge in Asian American studies, junior or senior standing, consent of instructor. Special individual study on topics such as ethnic literature, public policies, economic development, immigrant education, and/or social policies related to Asian American studies. May be repeated for a maximum of eight units.

Graduate Courses

200A. Critical Issues in Asian American Studies. Prerequisites: graduate standing, consent of instructor. Examines and seeks to develop a critical appreciation of the research literature on Asians in America and to develop alternative interpretations of the Asian American experience. Topics include Asian American history and economic/political and social/psychological issues. Ms. Matsumoto

200B. Critical Issues in Asian American Communities. (Formerly numbered 200C.) Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Evaluation of traditional and contemporary theories and models of community for their appropriateness to understanding Asian Pacific American communities. Consideration of specific topics which explicate the development, structure, and dynamics of Asian Pacific American communities in studying community issues and concerns. Mr. Ong

200C. Critical Issues in Asian American Studies. (Formerly numbered 200B.) Lecture, three hours. Prerequisites: graduate standing, consent of instructor. A critical review of research methods, strategies, and philosophies in Asian American studies. Ms. Nakamichi

297. Topics in Asian American Studies. M297A. Topics in Asian American Literature. (Same as English M297A.) Lecture, three hours. A graduate seminar that examines and critically evaluates writings of Asian Americans.

490. Writing Workshop for Graduate Students (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Practice in writing reports, grant proposals, abstracts, theses, and articulate-length research papers. Analyzing rhetorical and stylistic features of essays in various Asian American journals helps students improve both their prose style and editorial abilities. Four units may be applied toward the M.A. degree requirements. May be repeated once for credit. S/U grading. Ms. Cheung

596. Directed Individual Study or Research (2 to 8 units). Hours to be arranged. Prerequisite: consent of instructor.

Assistant Professors
Matthew Malkan, Ph.D.
Jean L. Turner, Ph.D.

Scope and Objectives

Astronomy, the oldest science, has now become a meeting place of nearly all physical sciences. It is difficult for any educated person to escape the awe and wonder of such things as the nature of the other planets, the likelihood of black holes in space, the origin and future of the universe, and the possibility of life elsewhere.
The Astronomy Department, therefore, has several educational missions: to develop skills in graduate students which will enable them to make contributions at the frontier of astronomical research, to prepare undergraduate majors for entry into a graduate program, and to provide insight and understanding for nonmajors and nonscience students.

Graduate training of future astronomers, up to the Ph.D. level, is the department's first responsibility. Applicants must have solid backgrounds in physics and mathematics. The program provides training in both theoretical and observational astronomy; its strengths, at present, are in solar physics, stellar structure and evolution, magnetohydrodynamics, gaseous nebulae and interstellar medium, optical design, galaxies, quasars, and observational and theoretical cosmology.

The department's second responsibility is to the undergraduate astrophysics major who hopes for a career in astrophysics. Some Bachelor of Science degree recipients go on to graduate work; some opt for teaching careers, for which their training in physics, astrophysics, and mathematics is most useful; still others find excellent jobs in industry, where their broad background in physical science with a specialty in astrophysics makes them particularly valuable (especially in computer science, space, and aeronautical fields).

Classes for Nonmajors

The department offers general courses to all University students, including those who are not science oriented. Astronomy 3, 4, 5, and 6 are nonmathematical courses open to the general University student normally not intending to major in the physical sciences.

Astronomy 3 is the fundamental course recommended for every University student who does not major in physical sciences and should be taken in the first or second year. If you had an astronomical introductory course in high school, you should take either course 3H or 4, 5, or 6.

Astronomy 4, 5, and 6 are nonmathematical courses which develop the topics covered in course 3 to somewhat greater depths. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses the structure and evolution of the universe and the historical development of our ideas about it. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in astrophysics or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They represent a serious and systematic introduction to astrophysics and require a good background in physics and mathematics (at least two quarters of the Physics 8 series and two quarters of the Mathematics 31/32 series).

Students of junior and senior standing in physics or related sciences are invited to select any of these courses: 115, 117, 127, 140, 180.

Bachelor of Science in Astrophysics

Preparation for the Major

Required: Astronomy 81, 82, Physics 3A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E, Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 3 or 10A. Recommended: Chemistry 11A. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year.

The Major

Honors Program

Senior majors in astrophysics with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, you must complete two quarters of Astronomy 199. To receive honors and highest honors at graduation, your grade-point average must remain at 3.4 or better, and your work in course 199 must reflect original research and be accepted by the departmental honors committee.

Graduate Study

Admission

The basic requirement for admission is a bachelor's degree in physics or astronomy. Students in closely related fields (e.g., mathematics or chemistry) may be admitted at the discretion of the department. All students who apply should submit at least three letters of recommendation and take the Graduate Record Examination (GRE) General Test and Subject Test in Physics. For further information, contact the Graduate Adviser, Department of Astronomy, 8979 Math Sciences, UCLA, Los Angeles, CA 90024-1562.

New students and those who have not been admitted to candidacy for the Ph.D. should consult with the graduate adviser at the beginning of Fall Quarter to determine a program for the year.

Master of Science in Astronomy

Course Requirements

Nine courses are required for the master's degree, of which at least five must be at the graduate level in astronomy (excluding Astronomy 200). The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

Comprehensive Examination Plan

To receive the master's degree, you must obtain at least a B average in all the departmental written comprehensive examinations taken. The examinations are divided into sections, with one section for each course in the A or B series that you may apply toward the M.S., M.A.T., or Ph.D. requirements. The examination is scheduled at the time the final examination for the course would normally be scheduled and is letter graded. You may repeat failed courses for credit but may not repeat the departmental examinations for departmental credit.

Master of Arts in Teaching

Course Requirements

Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy (excluding Astronomy 200), mathematics, or physics, or 100- or 200-series courses in education required for the teaching credential. The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, should be taken.

Comprehensive Examination Plan

This plan is the same as for the M.S. degree.
Ph.D. in Astronomy

Course Requirements
Required for the degree are Astronomy 200, 204A, 208A, 217A, 219A, 227A, 230A; at least four courses from 204B, 208B, 217B, 219B, 227B, 230B; and at least two courses (projects) from 204C, 208C, 217C, 219C, 227C, 230C. You are required to take course 225 each quarter in residence.

Teaching Experience
Before receiving a Ph.D., you are required to spend at least three quarters as a teaching assistant at UCLA or have equivalent experience elsewhere.

Comprehensive Examinations
The departmental written comprehensive examinations are the same as described under the M.S. degree. To be qualified to go on to the Ph.D., you must receive a minimum score on these examinations.

After the written comprehensive examinations are completed, you must then fulfill the normal University requirements for a dissertation and pass the University Oral Qualifying Examination.

Projects
During the Fall Quarters of your second and third years, you are expected to complete a research project. You should work closely with one of the staff both when the project subject is selected and throughout the course of the work. The projects may be a continuation of work begun during the preceding Spring Quarter; the goals of the project should be selected to reflect the amount of work completed in the Spring Quarter.

Evaluation of the projects is based as much on the quality of the written report as on the quality of the research itself. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques selected to attack the project problem, and the reasons for this choice. If the project is original and interesting, but incomplete, you are encouraged to complete it later, but the grade assigned is based on the portion completed by the end of the Fall Quarter.

Final Oral Examination
You must pass a final examination after completing your dissertation.

Lower Division Courses

3. Astronomy: The Nature of the Universe. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special preparation required beyond that necessary for admission to the University in freshman standing. A course for the general University student, normally not intending to major in astronomy. The development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments.

Mr. Epps, Mr. Malkan
Mr. Piavce, Ms. Turner (F,W,Sp)

3H. Introductory Astronomy and Astrophysics. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3. Introduction to astronomy and astrophysics for freshmen who are seriously interested in science. Requires the ability to understand mathematical and physical concepts, but high school algebra and trigonometry classes provide sufficient qualification. Particularly recommended for declared or potential majors in astrophysics or in physical and mathematical sciences.

Mr. Jura (F)

4. Universe of Stars and Stellar Systems. Lecture, three hours; discussion, one hour. Prerequisite: courses 3 or 3H or equivalent. An essentially nonmathematical course for the general University student with previous introduction to astronomy: a sequel to course 3, dealing in greater detail with stars and stellar systems. Various observed types of stars in relation to their internal structure and evolutionary state. Interacting binary stars, pulsating stars, explosive stars (novae and supernovae). Mass loss from stars, stellar wind. Galactic and planetary nebulae and their relation to stars. Interstellar medium. Initial stages of stellar evolution (protostars, T Tauri stars) and final stages (dengenerate and collapsed stars). Stellar systems from clusters to galaxies.

Mr. Epps, Mr. Piavce (F)

5. Life in the Universe. Lecture, three hours; discussion, one hour. Prerequisite: prior introduction to astronomy or consent of instructor. Life on Earth and the prospects for life elsewhere in the context of the evolution of the universe from the simple to the complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics.

Mr. Zuckerman (W)

6. Cosmology: Our Changing Concepts of the Universe. Lecture, three hours; discussion, one hour. Prerequisite: course 3 or 3H or equivalent. An essentially nonmathematical exposition of our understanding of the structure and evolution of the universe. Historical development of the ideas up to the present time. Problem of cosmic center and cosmic edge. Space and time. Curvature of space. General relativity. Black holes. The expanding universe and cosmological redshift. Early stages of the universe, Big Bang, current ideas of the inflationary universe.

Mr. Malkan, Mr. Wright (Sp)

10. Practice in Observing (2 units). Laboratory, two and one-half hours one evening per week. Prerequisites: knowledge of plane trigonometry and prior or concurrent course in astronomy or consent of instructor. Practical work for beginners, including telescopic observations and laboratory exercises cognate to an introductory course in astronomy.

F

81. Astrophysics I: Stars and Nebulae. Lecture, three hours; laboratory, one hour. Prerequisites: Mathematics 31A, 31B, and Physics 8A, or equivalent, or consent of instructor. Open to qualified sophomore and upper division students. A survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Methods and importance for astrophysics. Variable stars. Planetary and gas-nebulae.

Mr. Morris, Mr. Plavec (W)

117. Radiation and Fluids in Astrophysics. Lecture, three hours. Prerequisites: course 115 or equivalent and junior standing in astrophysics or physics or consent of instructor. Emission and absorption of radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to the interstellar and intergalactic media, and to the early universe.

Mr. Epps, Mr. Jura (W)

127. Stellar Atmospheres, Interiors, and Evolution. Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Properties of star clusters and galaxies, with particular emphasis on the Milky Way galaxy. Clusters and superclusters of galaxies. Extragalactic distance scale. Quasars and active galaxies. Topics in cosmology, including the expansion of the universe, microwave background, galaxy formation from primordial fluctuations, and observational constraints on the Big Bang.

Mr. Jura, Mr. Morris (Sp)

180. Astrophysics Laboratory. Lecture, two hours; laboratory, four hours. Prerequisites: junior or senior standing in astrophysics, physics, or a related field, consent of instructor. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involving astrophotometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for the automatic collection of data and for processing 2-D astronomical images.

Mr. Wright (F)

190. Special Studies (2 or 4 units). Prerequisite: senior standing in astrophysics or physics (with an outstanding record), consent of instructor. Special studies with an individual faculty member. With prior consent, course may be used to carry out a meritorious observing program at the UCLA students’ observatory or, in special cases, with the 24-inch reflector.
Graduate Courses

Prerequisite to all graduate courses is consent of instructor. Courses 204A through 230C are offered in alternate years and consist of three quarters according to the following scheme: level A (Winter Quarter, four units) — a basic survey course presenting the minimum knowledge in the field expected of all students who wish to obtain the Ph.D., but who do not necessarily plan to specialize in the field covered by the course; level B (Spring Quarter, six units) — advanced level for those considering the possibility of taking up a research project in the field; level C (Fall Quarter, following academic year, 10 units) — individual research projects supervised by the instructor in the form of a laboratory. Course 240 is equivalent to the B courses.

201. Introduction to Graduate Study of Astronomy. Required of all new graduate students. Survey of the various fields of astronomy and astrophysics; first acquaintance with working methods and with the department. Survey of basic astronomical nomenclature; the background in physics and mathematics outlined as required in graduate course.

202. Astrophysics of the Solar System. Prerequisite: graduate standing or consent of instructor. The sun, solar phenomena, and solar-terrestrial relationships. The interplanetary medium and astronomical plasma physics, comets, meteors, meteors, satellites and planets, planetary atmospheres. Origin and evolution of the solar system. Mr. Ulrich

204A-204B-204C. Observational Astronomy (4 units, 6 units, 10 units). Star catalogs and charts. Radiation measurements, photometric photometry, and solid-state detectors. Radio and infrared techniques. Spectroscopic observations. Includes laboratory work. Mr. Epps, Mr. Ulrich, Mr. Wright

230A-230B-230C. High-Energy Astrophysics (4 units, 6 units, 10 units). High-energy radiation processes and observational techniques of X-ray and gamma ray astronomy. Theory and observational results of X-ray and gamma ray sources, pulsars, radio galaxies, and quasars.

240. Modern Problems in Astronomy and Astrophysics. Open to qualified graduate students in astronomy and in related fields (physics, atmospheric science, Earth and space sciences). Special topics offered by distinguished visiting professors. May be repeated for credit.

M285. Origin and Evolution of the Solar System. (Same as Earth and Space Sciences M285.) Dynamic problems of the solar system; chemical evidences from geochemistry, meteorites, and the solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of the planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading. Mr. Kaulla, Mr. Newman

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses may be repeated at the discretion of the department:

596A. Directed Individual Studies (4 to 10 units)

596L. Advanced Study and Research at Lick Observatory (4 to 12 units). Intended for graduate students who require observational experience, as well as those working on observational problems for their thesis. Mr. Kraft

599. Ph.D. Research and Writing (10 to 12 units)

Scope and Objectives

The atmospheric sciences present a wide variety of problems of compelling scientific interest and increasing social concern. This is exemplified by the efforts to improve air quality, the dependences caused by severe storms and floods, the attempts to control or modify weather phenomena, the problems of long-range weather forecasts and climate change, the expanding scientific frontiers into our outer atmosphere and the atmospheres of other planets.

The department offers a broad curriculum in dynamic and synoptic meteorology, upper atmospheric and space physics, cloud microphysics, atmospheric chemistry, and radiative transfer in planetary atmospheres.

The Bachelor of Science degree qualifies students for entry-level technical positions or represents valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

Preparation for the Major

The Major

Required: Atmospheric Sciences 104A, 104B, 104C, M140, 161, Physics 131; three courses from Atmospheric Sciences 141, 142, 143, 144, 145, 1514; two courses from Physics 110A, 110B, 112, 122, 132, 140, Chemistry 110A, 110B, Mathematics 135A, 135B, 136, 140A, 140B. Students preparing for graduate studies in atmospheric chemistry should take Chemistry 11B, 11C, 110A, 110B; students preparing for graduate studies in cloud physics, precipitation, and atmospheric chemistry should take Atmospheric Sciences 145, Physics 140, Mathematics 135A-135B, 140A; students preparing for graduate studies in upper atmospheric and space physics should take Atmospheric Sciences 145, M154, Physics M122; students preparing for graduate studies in dynamics/synoptics should take Atmospheric Sciences 141, 142, Physics 132.

Graduate Study

The Department of Atmospheric Sciences offers the M.S., C.Phil., and Ph.D. degrees.
Admission
There are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by the Graduate Admissions Office. Three letters of recommendation are required. For departmental brochure and information, write to Department of Atmospheric Sciences, 7127 Math Sciences, UCLA, Los Angeles, CA 90024-1565. In addition to students holding bachelor's degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines—astronomy, chemistry, engineering, geophysics, mathematics, oceanography, and physics—are encouraged to apply for graduate standing in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of the candidate's previous education.

Major Fields or Subdisciplines
Dynamic and synoptic meteorology; cloud physics, precipitation, and atmospheric chemistry; radiation; upper atmospheric and space physics.

Master of Science Degree
Course Requirements
A total of nine courses must be completed, five of which must be in the 200 or 500 series. You must also attain a grade of B (3.0) or better in one course in each of two fields other than your field of specialization. The only formal course requirement beyond the UCLA general requirements is Atmospheric Sciences 260 in which you must present a formal seminar attended and graded by all faculty. Only one 500-series course (four units) may be applied toward the minimum graduate course requirement for the M.S. degree.

Comprehensive Examination Plan
The written comprehensive examination is based on selected coursework and is conducted at the end of Fall and Spring Quarters. On an examination scale which uses a grade-point average (GPA) system, a 3.0 GPA is required for a pass at the M.S. level; a GPA of 3.5 or better allows you to continue toward entry into the Ph.D. program. You are permitted two attempts to obtain the requisite grade either for termination at the M.S. level or for continuation toward a Ph.D. You are encouraged to take the examination as soon as possible. You must, however, attempt the examination by the end of your first two years of study and, if necessary, retake the examination at the earliest available time.

Thesis Plan
If you have a grade-point average of 3.5 or better, you may petition the department to obtain the M.S. by writing an original thesis. This petition must be received by the graduate advisers at least one year before you complete the degree (at the end of your first year of study). Provided you maintain a high academic standard in coursework, the accepted thesis may be used instead of the comprehensive examination for continuation toward the Ph.D. program.

Ph.D. Degree
Course Requirements
Students entering the department with an M.S. degree have no specific course requirements. The graduate advisers may, at their discretion, prescribe courses in areas in which they deem students to have insufficient background to help them in preparing to pass the comprehensive examination.

Teaching Experience
There is no formal requirement for teaching experience, but it is strongly encouraged, and approximately 65 percent of our graduate students serve as teaching assistants for one or more quarters.

Qualifying Examinations
If you selected the M.S. comprehensive examination plan, you must also take an in-depth oral examination in your area of research specialization. Subsequently, a doctoral committee is appointed to conduct the University Oral Qualifying Examination on your selected dissertation topic and related areas, and the final dissertation defense which is required of all students. Each of these examinations must be passed in no more than two attempts.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
This examination is required of all students.

Lower Division Courses
1. Introduction to Weather Maps and Weather Forecasting. Lecture, three hours. An introduction to weather maps and satellite imagery and their use in making a weather forecast. Discussions also include the structure of the National Weather Service and the services it provides to the general public. Course allows students to make weather forecasts for Los Angeles and one city east of the Rocky Mountains.

Mr. Grebe (F), Mr. Wakimoto (W)

1A. Introduction to Weather Maps and Weather Forecasting. Lecture, three hours; discussion, one hour. Prerequisite: atmospheric sciences major. A course for majors parallel to course 1.

Mr. Wakimoto (W)

2. Air Pollution. Lecture, three hours; discussion, one hour. A Letters and Science general education requirement course for all students interested in the causes and effects of high concentrations of pollutants in the atmosphere. Topics include the natural sources of gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interactive relation with the biosphere and the oceans; stratospheric pollution.

Mr. Lew (F), Mr. Sirosse (Sp)

3. Introduction to the Atmospheric Environment. Lecture, three hours; discussion, one hour. A course specifically designed to satisfy in part the Letters and Science general education requirement of students majoring outside the physical sciences. The nature and causes of weather phenomena, including winds, clouds, rain, lightning, tornados and hurricanes, solar and terrestrial radiation; phenomena of the higher atmosphere; the ionosphere and the auroras; causes of air pollution; proposed methods and status of weather modification.

Mr. Lew, Mr. Neel, Mr. Venkateswaran (W,Sp)

3A. Introduction to the Atmospheric Environment. Lecture, three hours; discussion, one hour. Prerequisite: atmospheric sciences major. A course for majors parallel to course 3; discussion section includes use of calculus.

Mr. Lew, Mr. Neel, Mr. Venkateswaran (W,Sp)

4. California Weather and Climate. (Not the same as course 4 prior to Fall Quarter 1986.) Lecture, two hours; laboratory, two hours; field trips. The climate and weather in California. Topics include marine layer, sea-land breeze, low-level temperature inversion, severe weather, satellite interpretation, weather forecasting, and use of interactive computing in weather analysis.

Mr. Grebe (W)

5. Climates of Other Worlds. Lecture, three hours; discussion, one hour. Introduction to the atmospheres of planets and their satellites in the solar system using information obtained during the recent planetary exploration program. An elementary description of the origin and evolution of atmospheres on the planets. Climates on the planets, the conditions necessary for the evolution of life, and its resulting effect on the planetary environment.

Mr. Thorne (W)

6. Climate and Climatic Change. Lecture, three hours; discussion, one hour. A course specifically designed to satisfy in part the Letters and Science general education requirement of students majoring outside the physical sciences. Introduction to the physical causes of climate, the classification of climate, and the global distribution of climate types. Description of climate changes over time scales ranging from the lifetime of Earth to niño events. Discussion of the causes of climatic change (e.g., the long-term steady increase in solar luminosity, short-term fluctuations in solar luminosity, changes in the Earth's orbit, changes in atmospheric composition, volcanoes, anthropogenic changes such as increased CO2 and nuclear war). State of the art in modeling and predicting climate.

Mr. Mechem, Mr. Thorne (W,Sp)

7. Meteorology in History and Art. Lecture, three hours; discussion, one hour. The impact of weather and climate on society, their dominant role in mythology and religion, their prominence in art, literature, and music. The major developments in man's understanding of nature as reflected through his reaction to and thoughts about the sky and its phenomena.

Mr. Sirosse (Sp)

8. Clouds, Rain, and Storms. (Formerly numbered 4.) Lecture, three hours; discussion, one hour. The raindrop and the ice crystal. Relation of meteorological conditions to cloud types. Precipitation mechanisms from clouds. Differences of atmospheric and cloud organization. Description and dynamics of spectacular weather systems, ranging from tornadoes to hurricanes. Severe weather forecasting.

Mr. Venkateswaran
Upper Division Courses

101. Meteorology and Society. Lecture, three hours; discussion, one hour. Prerequisite: upper division or graduate standing. Students learn to interpret air mass trajectories, urban planning, law, and engineering, and all students interested in the impact of weather on society. The impacts on and uses of meteorology in society Climates, atmospheric and engineering structures. Forensic meteorology in civil cases. The uses and abuses of short- and long-term weather forecasts and their current validity. The status of attempts to modify climate in particular, air pollution legislation and acid rain investigations. Mr. Wurtele (W)

104A. Atmospheric Thermodynamics. Lecture, three hours; discussion, one hour. Prerequisites: courses 11A, 11B. Basic thermodynamics, including the first, second, and third laws. Atmospheric statics. Dry adiabatic processes. Phase changes of water and moisture processes. Introduction to cloud microphysics. Gravitational stability. Mr. Thorne (F)

104B. Introduction to Dynamic and Synoptic Meteorology I. Lecture, two hours; laboratory, three hours. Prerequisites: courses 10H, 11. Analysis of the atmospheric circulation in the geostrophic wind, gradient wind, ageostrophic wind, and thermal wind. Mr. Neelin (W)

104C. Introduction to Dynamic and Synoptic Meteorology II. Lecture, two hours; laboratory, three hours. Prerequisite: course 104B. Analysis of the atmospheric circulation in the geostrophic wind, gradient wind, ageostrophic wind, and thermal wind. Mr. Wurtele (W)

141. Atmospheric Motion I. Lecture, three hours; discussion, two hours. Prerequisite: course 140. Structure and dynamics of large-scale motions in the atmosphere. The quasi-geostrophic equilibrium. Quasi-geostrophic motions. Rossby waves. Extratropical cyclones. Fronts and frontogenesis. The general circulation of the atmosphere. Mr. Wurtele (W)

142. Atmospheric Motion II. Lecture, three hours; discussion, one hour. Prerequisite: course 141. Small-scale nonhydrostatic motions in the atmosphere. Internal gravity waves. Atmospheric turbulence and convective overturning. Elementary cumulus dynamics. Mesoscale weather systems. Hurricanes and tropical disturbances. Mr. Arakawa (SP)

143. Physical Oceanography. Lecture, three hours; discussion, one hour. Prerequisite: course 141. Physical oceanography of the sun and the earth. Transfer of thermal radiation through planetary atmospheres. Radiation budget. Scattering of electromagnetic radiation by atoms. Molecules, dust, and aerosols. Remote sensing. Meteorological optics. Mr. Turco (F)

200A. Atmospheric Radiation. (Formerly numbered 153.) Lecture, three hours. Thermore radiation from the sun and the earth. Transfer of thermal radiation through planetary atmospheres. Radiation budget. Scattering of electromagnetic radiation by atoms. Molecules, dust, and aerosols. Remote sensing. Meteorological optics. Mr. Turco (F)

M200C. Introduction to Atmospheric Oceanography. (Formerly numbered 200C.) (Same as Civil Engineering M262A.) Lecture, three hours. Chemical composition and history of the atmosphere; natural cycles of important minor constituents; relevance and application of elementary chemical kinetics, thermochromistry, spectroscopy, and photochemistry to chemical processes in the lower and upper atmosphere; chemical aspects of air pollution and aerosol formation. Mr. Turco (W)

Dynamic and Synoptic Meteorology

201. Mesometeorology. Lecture, three hours. Prerequisite: consent of instructor. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, arnass thundertorms, multicell storms, supercells, gust fronts, downbursts, microbursts, and the dry line. Discussions on the design of a field project.

203. Dynamics of Fronts. Lecture, three hours. Prerequisites: courses 209, 210A. Margules relations; early Norwegian cyclone models; quasi-geostrophic and semi-geostrophic frontogenesis; orography and surface friction; mesoscale organizations near fronts: observations and theory; frontogenesis as a problem in nonlinear dynamics. Mr. Arakawa (W)

206. Atmospheric Convection. Lecture, three hours. Prerequisite: course M140 or consent of instructor. Rayleigh convection. Buoyant convection from isolated sources. Thermodynamics of moist air. Theory of moist convection. Observations of atmospheric convection. Models of cumulus convection. Mr. Yanai (F)

208A. Atmospheric Turbulence. Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Turbulence and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. Mr. Wurtele

M208B. Atmospheric Diffusion and Air Pollution. (Formerly numbered 208B.) (Same as Civil Engineering M262B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution control. Mr. Wurtele

210A. Atmospheric Wave Motions. Lecture, three hours. Prerequisite: course 209. Oscillations of a compressible, stratified, and rotating atmosphere. Scale analysis and dynamics of quasi-geostrophic motion. Quasi-geostrophic wave instability. Vertical propagation of wave energy. Mr. Arakawa (W)

212A. Numerical Methods in Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite or corequisite: course 209. Basic numerical methods for initial-boundary value problems in fluid dynamics, with emphasis on applications to atmospheric and oceanographic problems. Finite difference methods and truncation error. Linear and nonlinear computational stability. Computational modes and computational boundary conditions. Spectral methods.

Mr. Mechoo (W)

212B. Numerical Modeling of the Atmosphere. Lecture, three hours. Prerequisites: courses 210A and 212A, or consent of instructor. Physical and computational design of numerical weather prediction and climate simulation models. The basic dynamical models. Vertical, horizontal, and time differencing. Parameterizations of sub-grid scale processes.

Mr. Arakawa (F)

213. General Circulation of the Atmosphere. (Formerly numbered 151.) Lecture, three hours; discussion, one hour. Observed mean circulations of the atmosphere. The momentum, heat, and moisture budgets and the energy cycle. Laboratory experiments. Basic dynamics of the Hadley and Rossby regimes. Vertical propagation of planetary waves. Stratospheric sudden warming. Mr. Neelin (Sp)

Mr. Ghil

Mr. Ghil

215A. Tropical Motions with Moist Processes. Lecture, three hours. Prerequisite: course 206. Cumulus convection and the boundary layer in the tropics. Interaction of cumulus convection with the large-scale motions. Tropical cyclones. Monsoon meteorology.

Mr. Yanai (Sp)

219. Special Topics in Dynamic Meteorology (2 to 4 units). Content varies from year to year. S/U grading.

Cloud Physics, Precipitation, and Atmospheric Chemistry

221A. Atmospheric Chemistry I. Lecture, three hours. Prerequisite: course M200C or consent of instructor. Aerial chemistry: concentration of the tropospheric and stratospheric trace gases of biogenic and anthropogenic origin; tropospheric air pollution chemistry; physical and chemical properties of atmospheric aerosols; wet and dry deposition of pollutant gases and aerosols. Mr. Venkateswaran

221B. Atmospheric Chemistry II. Lecture, three hours. Prerequisite: course M200C or consent of instructor. Composition of the stratosphere, mesosphere, and ionosphere; chemistry of ground and ex- citing state neutrals and of ions in the upper atmosphere; stratospheric pollution; chemistry of the air-glow and nightglow; chemistry of other atmospheres.

223A. Cloud and Precipitation Physics I. Lecture, three hours. Prerequisite: course 200A or consent of instructor. Microstructure of atmospheric clouds; structure of the three phases of water substance; cloud physics; cloud microphysics; radiation transfer in clouds; microphysical growth and evaporation of water drops; and ice particles; and atmospheric ice particles; and atmospheric ice particles by collision.

Mr. Wakimoto (F)

223B. Cloud and Precipitation Physics II. Lecture, three hours. Prerequisite: course 223A. Theory of the growth and evaporation of water drops and ice crystals; cloud physics; cloud microphysics; cloud hydrometeors; cloud hydrometeors in a viscous medium; thermodynamics of cloud drops, rain drops, and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collision.

224. Atmospheric Electricity. Lecture, three hours. Prerequisites: courses 223B, Physics 110A, 110B. Fair weather electricity; atmospheric ions; electric structure of stormy and nonstormy clouds; electric charge generation and distribution in clouds; physics of thunder and lightning; electric effects on fields and charges on cloud and precipitation formation.

228B. Radar Meteorology. Lecture, three hours. Radar detection of spherical and nonspherical particles; use of radar in studying sizes of clouds and precipitation particles; precipitation intensity, amount, updraft velocities, horizontal wind speed, and turbulence; radar observations of convective clouds, thunderstorms, tornadoes, hurricanes, squall lines, and fronts; clear air echoes.

229A. Radiative Transfer. Lecture, three hours. Prerequisite: course 228B. Theory of radiative transfer. Approximate solutions to the solutions of the radiative transfer equation. Band models of the atmosphere. Radiation budget of cloudy atmospheres, including boundary conditions for radiative transfer. Absorption spectroscopy; band models; absorption by atmospheric gases; fluxes and heating rates. Satellite radiation measurements.

236. Scattering Processes in the Atmosphere. Lecture, three hours. Prerequisite: course 228B. Beam model of atmospheric scattering. Scattering of light by atmospheric aerosols and meteoric smoke. The scattering of ultraviolet, visible, and infrared radiation by atmospheric aerosols and water drops. Radiative transfer in a multiple-scattering atmosphere.

238. Radiative Transfer in the Earth’s Atmosphere. Lecture, three hours. Prerequisite: course 228B. Critical review of methods available for calculating the transfer of radiation (visible, ultraviolet, and infrared) through the atmosphere. Computational methods for the calculation of fluxes and heating rates using various methods. Familiarity with the available techniques in the literature provided.

Upper Atmospheric and Space Physics

240A. Solar System Magnetohydrodynamics. Lecture, three hours. Prerequisite: course M154 or consent of instructor. Derivation of the MHD equation for the solar wind. Applications of the equations to the solar wind. Mr. Venkateswaran

240B. Solar System Microscopic Plasma Processes. Lecture, three hours. Prerequisite: course M154 or consent of instructor. Adiabatic charged particle dynamics; incoherent radiation processes; collective effects in a plasma; propagation characteristics of electromagnetic waves; resonant interaction between charged particles and plasma waves. Mr. Thorne (Sp)

242C. Ionospheric Plasmas. Lecture, three hours. Prerequisites: courses M154, 240B. Formation of planetary ionospheric layers; transport processes; currents and electric fields; ionospheric plasma instabilities; nonlinear effects and artificial modification.

246. Physics of the Ionosphere. Lecture, three hours. Prerequisites: Physics 110A and 110B, or consent of instructor. Structure, composition, and dynamics of ionospheric layers. Mr. Venkateswaran

247. Radiation Belt Plasma Physics. Prerequisite: course 240B or consent of instructor. Turbulent plasma instabilities and their relation to satellite observations and magnetospheric structure. Processes responsible for the source, loss, and transport of energetic radiation belt particles. Mr. Thorne

248. Advanced Topics in Interaction between Lower and Upper Atmospheres. Lecture, three hours. Content varies from year to year.

255. Dynamics of the Stratosphere and the Mesosphere. Lecture, three hours. Prerequisite: course 210A. Chemistry and radiation regime of the middle atmosphere; propagation of waves of tropospheric origin; radiative and photochemical damping effects; excitation and propagation of atmospheric tides; vertical-wind oscillations; internal instabilities; theory of circulation features, including annual, semiannual, and quasi-biennial oscillations and the buildup and breakdown of polar vortex.

Mr. Venkateswaran

Mr. Venkateswaran (W)

257. Radiation, Pollution, and Climate. Lecture, three hours. A breadth requirement for graduate students; specific background in radiation not assumed. External and feedback influences of radiation and climate/ carbon dioxide and climate/cloud albedo problems. Effects of photochemical, thermal, and particulate pollution on urban and global climates. Mr. Venkateswaran

Special Studies

260. Seminar in Meteorology (2 units).

261. Seminar in Atmospheric Dynamics (2 units).

262. Seminar in Cloud and Precipitation Physics (2 units).

263. Seminar in Atmospheric Radiation (2 units).

264. Seminar in Physics of the Upper Atmosphere (2 units).

William M. Hamner, Ph.D.

Scope and Objectives

Studies in biology touch every aspect of life, and seeking answers to the problems of living organisms is a major challenge to modern biology. To meet this challenge, the Biology Department offers a wide spectrum of undergraduate and graduate instruction in population, organismic, developmental, cell, and molecular biology. All of these subject areas relate in some way to practical problems facing contemporary society, and all influence individual and collective decisions on matters ranging from environmental degradation to viruses and cancer.

The Bachelor of Science degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of these biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

Bachelor of Science Degree

The Bachelor of Science degree is divided into three areas of concentration which build on similar lower division introductory courses and differ primarily in the upper division requirements. The first area of concentration — general biology — is designed for students who desire exposure to a wide range of biological subjects and for most students who will later seek admission to health sciences-related professional schools. The program offers great flexibility and can serve as adequate preparation for subsequent graduate study in any field of biology. The remaining two areas of concentration — molecular, cellular, and developmental biology (MCD) and ecology, behavior, and evolution (EBE) — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.
Pre-Biology Major

Students who have not completed all the courses required as preparation for the major are considered pre-biology majors. After completing those courses with a grade of C– or better in each, students must petition to enter the biology major in the Undergraduate Advising Office, 2312 Life Sciences.

In order to be admitted as pre-biology majors, transfer students who have 80 or more units must have completed one year of general chemistry with laboratory, biology 5 and 7, or equivalent, and at least one of the following: (1) one year of calculus, (2) one year of calculus-based physics, or (3) two courses in organic chemistry with laboratory.

General Biology Concentration

Preparation for the Major: Biology 5, 5L, 6, 7, 8, 8L; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: One course in morphology and systematics (Biology 100, 101, 105, 110, 113, or Microbiology 101); one course in developmental and molecular biology (Biology 138, 141, 143, 144, or 146); one course in physiology (Biology 158, 162, 166, 167, or 170); two additional upper division biology courses; four additional upper division courses in biology, chemistry, mathematics (except Mathematics 104, 106), microbiology, physics, or from Anthropology 125A, 125B, Biomatics 110, Earth and Space Sciences 115, 120, Geophysics 108, 110, 112, Public Health 100B, 100C.

Molecular, Cellular, and Developmental Biology (MCD) Concentration

Preparation for the Major: Biology 5, 5L, 7, 8, 8L; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: Three courses in developmental and molecular biology (Biology 138 or 141, 143, 144); four courses in biological chemistry (Chemistry 110A, 133A, 156, 157A); one of the following laboratory courses or sets of laboratory courses: Biology 158, 162, 166, M185/M186/M187, 145A and 157, or 171 and 172A; two additional upper division courses from the following list not used to satisfy another requirement: Biology 110, 138, 141, 145A, C149, CM156, 157, 158, 162, 166, 171, 177, M185, 190A through 190D, 199, Microbiology 101.

Ecology, Behavior, and Evolution (EBE) Concentration

Preparation for the Major: Biology 5, 5L, 6, 7, 8, 8L; Chemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL; Chemistry 21, 23, and 25, or Chemistry 15, Mathematics 32B, and 33A.

The Major: One course in morphology and systematics (Biology 100, 101, 105, 110, or 152); one course in physiology (Biology 162, 166, 167, or 170); three courses in ecology, behavior, and evolution (Biology 111, 120, 122, 129, 135); one field course consisting of two to four courses from the Field Biology Quarter (FBQ), Catalina Marine Biology Quarter (CMBQ), or equivalent; additional upper division courses in biology, chemistry, mathematics (except Mathematics 104, 106), microbiology, or physics, as necessary to bring the total number of upper division courses to nine (recommended: Biology 119, M127, 130, 146, 168 in ecological and behavioral processes and Biology 103, 107, 112, 113A, 114, 115 in taxonomy-oriented biology).

Additional Requirements

(1) A six-unit course counts as only one course toward requirements for the major.
(2) A maximum of eight units of Biology 190 or four units of Biology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.
(3) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C– or better in each course, with at least a 2.0 (C) overall average in all courses applied toward the major.

Honors

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 GPA in the major at graduation and who have successfully completed Biology 190A-190B.

Field Biology

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Catalina Marine Biology Quarter (CMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter occurs during Spring Quarter and involves some combination of Biology 103, 107, 113B, 114, 115, 124, 126, 128, 131, and 132. The Catalina Marine Biology Quarter occurs during Fall Quarter and includes some combination of Biology 102, C104, 123, 147, 148, 164, and 165. To participate, you must enroll in all courses in the respective program. Participants in both programs are selected by personal interview during Winter Quarter. Although most participants are upper division biology majors, both programs are available to any upper division student with adequate biological background. Information and applications are available in the Undergraduate Advising Office.

Graduate Study

The department offers M.A. and Ph.D. degrees in biology, with specialization in a wide spectrum of fields. Students who plan to enter graduate school are urged to seek the advice of staff members in their field of interest.

Admission

The department encourages applications from students in all areas of science, but expects successful applicants to have or to acquire a background comparable to the requirements for the bachelor's degree in biology at UCLA. A background in chemistry, physics, and mathematics is desirable. Deficiencies in these or other subjects must be made up at the earliest opportunity. Undergraduates who are prospective graduates should remedy their deficiencies by preparatory study at an appropriate institution. The Graduate Division or the department may initially restrict applicants with less distinguished accomplishments.

The department is organized for administrative purposes into two divisions based on mutual interest. Applications should be directed to either Division I (molecular, cellular, and developmental biology) or Division II (organismic and population biology). The major fields and subdisciplines are listed under faculty interests in the departmental brochure. All applicants must take the General Test (verbal, quantitative, and analytical) of the Graduate Record Examination (GRE). The Subject Test in Biology is also required. Three letters of recommendation are required. These should be from professors, supervisors, or others who may provide an evaluation of motivation, accomplishments or potential in research, scholarly activities, teaching, and related academic functions.

Applications, departmental brochures, and additional information may be obtained from the Graduate Affairs Office, Department of Biology, 2316 Life Sciences, UCLA, Los Angeles, CA 90024-1606.
Program of Study
Study consists of coursework and research within the department and within related programs in biochemistry, geology, microbiology, and molecular biology on campus. Opportunities are also available off campus for intensive study of marine biology at the Catalina Marine Science Center in the Fall Quarter (CMBQ), field biology in the Spring Quarter (FBQ), and tropical biology through courses offered by the Organization for Tropical Studies.

You also are required to complete the departmental written qualifying examination, given twice a year, at an early point in your graduate career.

Foreign Language Requirement
No foreign language is prerequisite to admission to the M.A. or Ph.D. program, and there is no uniform language requirement for obtaining the Ph.D. However, in the pursuit of certain subspecialties of biology, you may be required to gain proficiency in one or more foreign languages.

Master of Arts Degree
Admission
Applications are evaluated by the appropriate divisional admissions committee and are accepted for admission to Fall Quarter only.

Course Requirements
The program consists of at least nine courses completed in graduate standing, of which at least five must be graduate (200 series) courses. The remainder may be courses in the 100, 200, or 500 series as noted below. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum graduate course requirement. Courses graded S/U (six units) may be applied toward the minimum requirement, except that an S/U-graded course outside the major and applicable to the degree may be applied, provided that no more than one such course is taken per quarter.

Specific course requirements are established for you by your guidance committee.

Thesis Plan
A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master's thesis committee of three faculty members. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the faculty members concerned and from the thesis committee.

Comprehensive Examination Plan
If you select this plan, you must take a three-hour examination prepared and graded by your committee or committee chair and approved by the graduate adviser. The examination is graded pass or fail. If you fail, recommendation for or against a second examination must be made by the graduate adviser.

Ph.D. Degree
Admission
Each division determines admission of students to the Ph.D. program separately. Ph.D. students in Division I (molecular, cell, and developmental biology) are admitted in the Fall Quarter. Applications to Division II (organismic and population biology) are reviewed by the division's admissions committee which advises prospective sponsors about the desirability of admission.

Course Requirements
There are no formal course requirements for the Ph.D. in Division II, although specific requirements may be established individually by your guidance committee. Division I students are required to take a minimum of four graduate-level courses, preferably in the first year (contact the Graduate Affairs Office for a course list). You must enroll for full-time study, as defined by the Graduate Division.

You are strongly encouraged to rotate laboratory and/or course experience with several faculty members during your first year of study as an aid to selecting a permanent adviser.

Teaching Experience
Each student is required to complete one academic year as a teaching assistant.

Oral Qualifying Examination
The University Oral Qualifying Examination is conducted by the doctoral committee as prescribed by the Graduate Division. It includes your preparation, presentation, and defense of an original written research proposal. The examination is graded pass, fail, or repeat. A failure requires dismissal. The second attempt at the examination is graded pass/fail. The examination must be completed by the end of the third year following first registration. You are advanced to candidacy following successful completion of this examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
Final approval of the dissertation in the department is accomplished when the committee approves the written form and is satisfied with the final oral examination.

Lower Division Courses
2. Principles of Modern Biology. Lecture, three hours; laboratory, two hours. Designed for nonmajors. Courses 2 and 3 may be taken independently, concurrently, or in either sequence. Not open to students with credit for course 5 or 7. The major themes in biology, including evolution, behavior, ecology, cell biology, photosynthesis, genetics, organismal diversity, and energetics as they relate to events occurring on our Earth today.

3. Introduction to Human Physiology and Disease. Lecture, three hours; laboratory, two hours. Designed for nonmajors. Courses 2 and 3 may be taken independently, concurrently, or in either sequence. Not open to students with credit for course 7. Presentation of an integrative approach to basic anatomy and physiology of the major organs and organ systems, including correlative aspects of health, development, and disease.

6. Ecology, Evolution, and Behavior. Lecture, three hours; discussion, two hours. Prerequisites: course 5 and Mathematics 3A or 31A. A survey of the principles of population and community ecology, behavioral ecology, population genetics, and evolution.

7. Introductory Cellular and Molecular Biology. Lecture, three hours; discussion/laboratory, two hours. Prerequisites: course 5 and Mathematics 3A or 31A. An introduction to the origin of crop plants; man's role in the development of agriculture, and population biology. Included in the major themes in biology, including evolution, behavior, ecology, cell biology, photosynthesis, genetics, organismal diversity, and energetics as they relate to events occurring on our Earth today. (F, W, Sp)

8. Cellular and Molecular Biology Laboratory (2 units). Laboratory, three hours. Prerequisites: courses 5L, 6, and 7 may be taken concurrently. Introduc- tory laboratory experience, including bacterial growth, mitosis and meiosis, genetics, molecular biology, and developmental biology.

10. Plants and Civilization. Lecture, three hours; demonstration, one hour. Designed for nonmajors. The origin of crop plants; man's role in the development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history. Mr. A. Gibson (F, Sp)

13. Evolution of Life. Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. An introduction to biology within the framework of evolutionary theory. The relationships of evolutionary thought to other areas of knowledge and society. Natural selection and the origin of variation examined in the context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on the critical role of historical processes.
20. Introduction to Human Heredity. Lecture, two hours; discussion, one hour; laboratory, two hours. Not open to students with a prior college course in genetics; not intended to satisfy the requirements of medical or dental schools. Man's inheritance and its biological basis introduced through lectures, readings, and laboratory exercises with 
Drosophila. Topics include prenatal development, Mendelizing factors, the role of chromosomes in heredity, and the role of genes in disease and population structure. (Sp)

25. Oceans. Lecture, three hours; discussion, one hour. Not open to students in the sciences or to students with credit for Earth and Space Sciences 15. Limited to 40 students. Physical and chemical processes that take place in the oceans, with emphasis on their effects on organisms. (W)

35. Mathematical Ideas in Biology. Lecture, three hours; discussion, one hour. Prerequisites: one year of calculus, consent of instructor. The use of mathematical ideas and analysis in the formulation and evaluation of theories of biological phenomena such as growth, growth control, biological rate processes, and applications of random walk theory. Coverage of topics tailored to specific student interests. Mr. Kavanau

40. AIDS and Other Sexually Transmitted Diseases: The Modern Plague. Lecture, three hours. An introduction to the interdisciplinary debate surrounding the personal and societal response to AIDS and other sexually transmitted diseases. Presentation by prominent invited lecturers of information useful for formulating responsibilities of both the individual and the citizen. P/NP grading.

70. Genetic Engineering and Society. Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for course 7 or 8. Basic principles of genetic engineering. Overview of genetic engineering techniques and the relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its impact on society. Mr. Siegel

80A. Lower Division Seminar: Conservation of Biology. (Formerly numbered 88B.) Discussion, three hours; one weekend field trip. Introduction to patterns of biodiversity; selection, management, and use of natural reserves; human aspects on diversity; and the effects of governmental and nongovernmental actions on biological conservation. Ms. Mathias

88B. Lower Division Seminar: Origin of Life. Seminar, three hours. Training in methods of research in biological evolution as a central element in Earth history: theories of the origin of life based on observations, experimental simulations, and speculations. Students are guided in making class presentations and in writing papers. P/NP or letter grading. Mr. Biale

Upper Division Courses

100. Biology of Lower Plants (6 units). Lecture, four hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. An introduction to the biology of algae, fungi, and bryophytes, with emphasis on life functions, plant development, and the role of lower plants in the environment. Students are strongly encouraged to take both courses 100 and 101 since these represent a course sequence surveying the entire plant world and providing background for upper division courses in plant biology. Mr. Chapman

101. Biology of Vascular Plants (6 units). Lecture, three hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. An introduction to the diversity in form and reproduction of vascular plants, with emphasis on development, evolution, and function. Students are strongly encouraged to take both courses 100 and 101 since these represent a course sequence surveying the entire plant world and providing background for upper division courses in plant biology.

102. Biology of Marine Invertebrates. Five-week intensive course, with lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Morphology, systematics, life histories and natural history, ecology, behavior, and evolution of invertebrates; emphasis on local invertebrates of Southern California and their habitats. Given at the Catalina Marine Science Center. Mr. Morin, Mr. Muscatine

103. Taxonomy of Flowering Plants (4 or 8 units). Offered either as a quarter-long course for four units or as an eight-unit course as part of the Field Biology Quarter. The four-unit course has lecture, two hours; laboratory, six hours. The evolution, systematics, morphological principles of taxonomy, phylogenetic systems, nomenclature, and modern methods of investigation. The eight-unit course covers the same basic lecture and laboratory material in five intensive weeks, followed by an extended field trip where students do individual field projects. Mr. A. Gibson

C104. Experimental Invertebrate Zoology (6 units). (Formerly numbered 106A.) Lecture, two hours; laboratory, two hours; field trips, six hours. Prerequisites: courses 105, 129, and 166 or 167 (either may be taken concurrently). Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212. Mr. Morin

114. Ornithology (6 units). Lecture, three hours; laboratory, three hours; field trips, six hours. Prerequisites: completion of preparation for the major courses or consent of instructor. Introduction to the systematics, evolution, natural history, morphology, and physiology of the invertebrates. Mr. Morin, Mr. Muscatine

115. Mathematical Ecology. Lecture, three hours; discussion, two hours. Mathematical models to describe population growth and interspecies interactions, formulated as difference or differential equations, to explore the structure and dynamics of ecological populations and communities. Laboratory exercises include simulation of dynamical systems on personal computers. Mr. Vance

120. Evolution. Lecture, three hours; discussion, two hours. Prerequisite: completion of preparation for the major courses. Highly recommended. Prerequisites: courses 6 and Mathematics 32A, or consent of instructor. Recommended: course 122. Use of models of population growth and interspecies interactions, formulated as multidimensional, nonlinear differential, or difference equations, to explore the structure and dynamics of ecological populations and communities. Laboratory exercises include simulation of dynamical systems on personal computers. P/NP

110. Vertebrate Morphology. Lecture, three hours; laboratory, four hours. Prerequisites: courses 5, 5L, 6. A study of vertebrate morphology and evolution from the viewpoint of comparative anatomy of adult forms, developmental anatomy, and paleontology. Laboratory study of selected vertebrates. Ms. Van Valkenburgh (F, W)

111. Biology of Vertebrates. Lecture, three hours; demonstration/field trips/discussion, three hours. Prerequisites: courses 5L, 5, 6. The adaptations, behavior, and ecology of vertebrates. Mr. Vitt

112. Ichthyology. Lecture, two hours; laboratory, seven hours; field trips. Prerequisites: courses 5, 6, and 110 or 111 or consent of instructor. Limited to 24 students. The biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphology, zoogeography, and ecology. Field trips examine the fisheries of the Southern California shoreline, tidepools, and coastal waters. Mr. Brot, Mr. Cody, Mr. Hespenheide (W)

113A. Herpetology. (Formerly numbered 113) Lecture, three hours; laboratory, four hours; two field trips. Prerequisites: courses 5, 6. A vertebrate zoology course restricted to the biology of reptiles and amphibians. Introduction to the current systematics, history, ecology, behavior, morphology, and physiology of these animals. Ms. Vitt

113B. Field Herpetology. (Formerly numbered 113.) Prerequisites: courses 5L, 5, 6. Recommended: courses 111 or 111A. The three-week independent research projects followed by a two-week lecture course (three hours per day) and offered only as part of the Field Biology Quarter. The biology, particularly ecology and behavior, of organisms inhabiting their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion. Ms. Vitt

114. Ornithology. Lecture, two hours; laboratory-discussion, four hours; field trips. Prerequisites: course 111, consent of instructor. Limited enrollment. The systematics, distribution, physiology, behavior, and ecology of birds.

115. Mammalogy. Lecture, three hours; laboratory, four hours; field trips. Prerequisites: course 111 or equivalent, consent of instructor. The classification, ecology, behavior, and physiology of mammals. Ms. Van Valkenburgh

117. Vertebrate Paleontology. (Formerly numbered M117.) Lecture, three hours; laboratory, three hours. Prerequisite: course 110. Recommended: a course in general geology. Limited enrollment. The fossil record of the evolution of the vertebrates, with emphasis on the systematics, paleobiology, and paleoecology of families in the series from fish to mammal. Ms. Van Valkenburgh (Sp) M118. Paleobotany. (Same as Earth and Space Sciences M118.) Lecture, three hours; laboratory, three hours. Prerequisites: course 5 or equivalent or consent of instructor. Survey of morphology, paleoecology, and evolution of vascular and nonvascular plants during geologic time, with particular emphasis on major evolutionary events.

119. Mathematical Ecology. Lecture, three hours; laboratory, three hours. Prerequisites: course 6 and Mathematics 32A, or consent of instructor. Recommended: course 122. Use of models of population growth and interspecies interactions, formulated as multidimensional, nonlinear differential, or difference equations, to explore the structure and dynamics of ecological populations and communities. Laboratory exercises include simulation of dynamical systems on personal computers. P/NP

120. Evolution. Lecture, three hours; discussion, two hours. Prerequisite: completion of preparation for the major courses. Highly recommended. Mathemacic 31A, 31B, 32A. Recommended for biology majors specializing in environmental and population biology. Introduction to the mechanics and processes of evolution, with emphasis on natural selection. Population genetics, speciation, evolutionary rates, and patterns of adaptation. P/NP

Mr. Buth, Mr. Cody, Mr. Hespenheide (W)
121. Seminar in Ecology (2 units). Prerequisites: course 120 or 122, consent of instructor. Undergraduate seminar in ecology and discussion of current research, including preparation of review paper or annotated bibliography. May be repeated twice for credit. Mr. Hespenheide

122. Ecology. Lecture, three hours; laboratory, three hours. Prerequisite: completion of preparation for the major courses. Highly recommended: Mathematics 31A, 31B, 32A. Recommended for biology majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on the growth and distribution of populations, interactions between species, and the structure, dynamics, and functions of communities and ecosystems. Mr. Corly, Mr. Vance (F)

123. Ecology of Marine Communities. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Field study of the natural history and ecology of marine organisms and communities, involving an independent research project. Given at the Catalina Marine Science Center. Mr. Vance

124. Field Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, 10 hours. Prerequisites: courses 5, 6. Recommended: courses 111, 120, 122. Offered either as a quarter-long course with weekend field trips or as a single field trip conducted between quarters, followed by laboratory activities for three weeks. When the course is given as part of the Field Biology Quarter, it is eight units and lasts for five weeks. Field and laboratory research in ecology, the collection, analysis, and write-up of numerical data, with emphasis on design and execution of field studies. Mr. Cody

125. Behavioral Ecology (4 or 8 units). Prerequisites: courses 5, 6. Offered either as a quarter-long course for the quarter or as an eight-unit course as part of the Field Biology Quarter. The four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. The eight-unit course covers the same basic lecture material in five intensive weeks, followed by an extended field trip where students do individual projects in behavioral ecology.

Mr. Narins

M127. Soils, Plants, and Society. (Same as Geography 127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B, and 11C, or equivalent, or consent of instructor. A general treatment of soil development, the plant-chemical, and physical-chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on the field trip to explain developmental phenomena. Mr. Lunt

128. Plant Physiological Ecology (4 or 8 units). Lecture, three hours; laboratory/field, three hours. A study of plant-environmental interactions under natural conditions. Emphasis on transpiration and photosynthesis, leaf temperatures, and water movement in the soil-plant-atmosphere continuum. Individual student projects. When the course is given as part of the Field Biology Quarter, it is eight units and lasts for five weeks. For the individual research project is correspondingly expanded. Mr. Nobel

129. Behavior of Animals. Lecture, three hours; discussion, three hours. Prerequisite: course 111 or consent of instructor. An examination of the mechanical and evolutionary principles of behavior, with special reference to animal sociobiology under natural conditions.

130. Behavior Research Problems. Lecture, three hours; discussion, two hours. Prerequisite: course 111 or consent of instructor. Consent of instructor. Controls systems and nonobtrusive sensitive procedures for behavior studies in the laboratory and field. Rationale, design, and limitations of laboratory studies of behavior. Mr. Kavanau

131. Insect Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, eight hours. Prerequisites: course 120 or 122, consent of instructor. Offered either as a quarter-long course with weekend field trips or as part of the Field Biology Quarter (eight units). Emphasis on fieldwork increased accordingly in the summer field quarter. Field study in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects.

Mr. Greenfield, Mr. Hespenheide

132. Field Behavioral Ecology (8 units). Lecture, two hours; laboratory/field trip, 10 hours. Prerequisites: courses 5, 6. Recommended: course 129. A five-week course offered only as part of the Field Biology Quarter. Field research in behavioral ecology, emphasizing animal communication. The design and execution of individual and small group field projects during an extended field trip.

Mr. Greenfield, Mr. Narins (F)

C134. Physiological Ecology of Desert Animals (2 units). Prerequisites: courses 111, and 166 or 167. A consideration of ecologically relevant aspects of animal physiology, with emphasis on desert animals. Concurrently scheduled with course C214.

Mr. Nagy

C135A-C135B-C135C. Seminar in Genetics (2 units each). Prerequisites: course 8, consent of instructor. Undergraduate seminar in genetics; reading and group discussion of current research in genetics.

Mr. Siegel (F, W, Sp)

138. Developmental Biology. Lecture, three hours; discussion, one hour. Prerequisite: completion of preparation for the major courses.Synopsis of fundamental concepts in embryology and a survey of current topics in developmental biology.

Ms. Lengyel, Mr. Tobin

141. Molecular Basis of Plant Differentiation and Development. Lecture, three hours; discussion, one hour. Prerequisites: courses 5, 7, 8. An in-depth study of the basic processes of development and the molecular aspects of the developmental process as it relates to the plant kingdom. Discussion of a variety of developing systems (protoplasts, fungus, and higher plants), with the goal of developing a unified concept of differentiation. (Sp)

143. Molecular Cell Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 5, 7, 8, chemistry courses through Chemistry 25. Molecular biology as applied to the study of eukaryotic cells. Molecular aspects of organelles such as the nucleus, mitochondria, cytoskeleton, golgi apparatus, plasma membrane, and extracellular matrix. Other topics include cellular organization, the cell cycle, and the cell biology of cancer. Ms. Bulinski, Mr. Simpson

144. Molecular Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 7, 8. Strongly recommended: Chemistry 25. A course in molecular biology emphasizing the synthesis, structure, function, and interactions of biological macromolecules.

145A-145B-145C. Molecular Biology Laboratory. Laboratory, 12 hours. Prerequisite: consent of instructor. Highly recommended: courses 143A-143B. A course in experimental molecular biology in which students carry out original research under supervision. Space is limited, and arrangements must be made in advance with the instructor. Mr. Salser (F, W, Sp)

146. Physiological Biochemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 5 and 7, or consent of instructor. A course in the biochemistry of essential nutrients and energy transduction. A physiological analysis of the physiology of cells and organelles with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction.

Mr. Nobé (F)

147. Biological Oceanography. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses. Given at the Marine Science Center. Lectures include physical, chemical, and biological factors affecting the composition and distribution of plankton. Natural history of major phytoplankton and zooplankton taxa; production in marine food chains; adaptation to pelagic habitats. Laboratory includes systematic, morphology of major plankton taxa; experimental studies of local marine plankton, with emphasis on measurement of feeding, primary and secondary productivity, and nutrient flux. Given at the Catalina Marine Science Center. Mr. Muscatine

148. Biology of Marine Plants. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses or consent of instructor. An introduction to the general biology of marine algae, including basics of structure reproduction, life histories, systematics, and reproductive biology and ecology of marine algae. Techniques in culture and laboratory investigation and utilization of algae. Given at the Catalina Marine Science Center. Mr. Chapman

C149. Cell and Molecular Biology of Plants. (Formerly numbered 149.) Lecture, three hours; discussion, one hour. Prerequisite: completion of preparation for the major courses. Molecular and structural aspects of cells, with emphasis on plant-specific organelles (e.g., chloroplasts, cell walls) as metabolic processes (e.g., photosynthesis, nitrogen fixation). Comparison with the equivalent processes in algae and bacteria. Concurrently scheduled with course C220.

152. Functional Plant Anatomy. Lecture, three hours; laboratory, six hours. Prerequisites: courses 5 and 7, or equivalent, or consent of instructor. The structure and functional significance of the various cell and tissue types in higher plants, plus the patterns of growth and differentiation in roots, stems, leaves, flowers, and fruits.

153. Functional Histology. Lecture, three hours; laboratory, four hours. Prerequisite: completion of preparation for the major courses. An advanced study of function and structure in vertebrate organs and tissues at cellular and subcellular levels.

Mr. Cascaran, Mr. James

CM156. Human Genetics. (Same as Biostatistics CM156.) Lecture, three hours; discussion, one hour. Prerequisites: course 8, Chemistry 25. The application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, and medical genetics. Lecture, laboratory, and readings in the literature, with focus on current questions in the fields of medical and human genetics and the methodologies appropriate to answer such questions. Concurrently scheduled with course CM256.

Mr. Merriam, Ms. Spence (Sp)

157. Gene Manipulation: Genetic Engineering. Lecture, three hours; discussion, two hours. Prerequisite: course 138 or 144 or consent of instructor. A survey of the methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. Mr. Salser

158. Cell Biology (6 units). Lecture, three hours; laboratory, four hours. Prerequisite: completion of preparation for the major courses. The cell biology of eukaryotic cells, with emphasis on the correlation of structure and function at the molecular, organellar, and cellular levels. Mr. Cascaran, Mr. James

159. Human Anatomy. Lecture, three hours; laboratory, four hours. Prerequisite: consent of instructor. A study of the body systems and their function. Laboratory work in the gross anatomy laboratory. Mr. Aronson

160. Human Physiology. Lecture, three hours; laboratory, four hours. Prerequisite: consent of instructor. An introduction to the human body and its function. A study of the body systems and their function. Laboratory work in the physiology laboratory. Mr. Aronson

Mr. Latties (F)

164. Field Biology of Marine Fishes. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite for the major courses or consent of instructor. Selected aspects of the natural history, ecology, and behavior of the diverse assemblage of local marine fishes. Field work strongly emphasized. Given at the Catalina Marine Science Center.

Mr. Buth

165. Ecological Physiology of Marine Vertebrates. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Introduction to the physiological adaptations of marine vertebrates to the major physicochemical variables in the oceans of the world and to the major marine habitats. Laboratory for vertebrates emphasizes marine vertebrates of Southern California waters. Given at the Catalina Marine Science Center.

Mr. Gordon

166. Animal Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisite: completion of preparation for the major courses. Not open for credit to students with credit for course 167 or 170. An introduction to physiological principles, with emphasis on organ systems and intact organisms.

Mr. Engelmann

167. Regulatory Physiology (6 units). Lecture, three hours; laboratory, four hours. Prerequisites: courses 5, 6, 7, 8, 11 OA, 24. Not open for credit to students with credit for course 166 or 170. An introduction to the whole animal and organ physiology. Primary considerations to neuronal and endocrine regulations of body functions and integration of organ systems.

Mr. Engelmann

168. Insect Physiology. Lecture, two hours; laboratory, six hours. Prerequisite: course 158 or 166 or 167 or equivalent. Survey of the physiology of insects, with emphasis on functional adaptations.

Mr. Engelmann

170. Animal Environmental Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisites: completion of preparation for the major courses. Not open for credit to students with credit for course 166 or 167. Recommended for students concentrating in ecology, behavior, and evolution (EBE). An introduction to the physiology of organs, organ systems, and organisms, with emphasis on environmental interactions and adaptations.

Mr. Nagy, Mr. Narins

171. Principles of Neurobiology. Lecture, three hours; discussion, one hour. Prerequisite: course 166 or consent of instructor. An introduction to basic principles of neurobiology, including a description of the structure of neurons and nervous systems; the ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; the properties of synaptic transmission, the information transduction and coding in sensory pathways, and the neural control of movement; development of and tropic interactions of the various components of the nervous system.

Mr. O'Lague

172A-172B. Introductory Laboratory in Neurophysiology. Laboratory, eight hours. Prerequisite: course 166 or consent of instructor. Prerequisites: limited enrollment. Courses must be taken concurrently. Laboratory investigation of the function of central and peripheral nervous systems in invertebrates and vertebrates. Emphasis on electrophysiological approaches to neurobiological problems.

Mr. O'Lague

173. Anatomy and Physiology of Sense Organs. Lecture, three hours; discussion, one hour. Prerequisite: course 171 or equivalent. The anatomy and physiology of the sense organs, with emphasis on comparative aspects.

Mr. Narins

174. Advanced Molecular Biology. Lecture, three hours. Prerequisites: course 144 with a grade of B- or better or consent of instructor, Chemistry 23, 25, and 152 or 157A and 157B. A course in advanced molecular biology, with emphasis on advanced topics selected from emerging fields in all branches of molecular biology. P/NP or letter grading.

Mr. Lake, Mr. Ray

177. Introductory General Endocrinology. Lecture, three hours; discussion, one hour. Prerequisites: course 158 or 166 or equivalent, one biochemistry course. Principles of chemical integration in biological systems.

179. Invertebrate Endocrinology. Lecture, three hours. Prerequisite: course 158 or 166 or 167 or consent of instructor. A comprehensive treatment of invertebrate endocrinology.

Mr. Engelmann

161. Parasitology and Symbiosis (6 units). Lecture: three hours; laboratory: three hours. Prerequisites: courses 5, 7, 11 OA, 25. An introduction to the principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including a discussion of the vertebrate endocrinology. Mr. Engelmann

162. Experimental Parasitology. Laboratory, eight hours. Prerequisite: consent of instructor. Introduction to the use of parasites in experiments concerning basic biological problems and to problems concerning parasitism.

Mr. Macniss

185. Immunology. (Same as Microbiology M185 and Microbiology and Immunology M185.) Laboratory, 12 hours. Prerequisites: course 158, consent of instructor. Corequisites: courses 158, 167. Emphasis on a limited number of situations designed to train students in organizing and evaluating immunological laboratory experiments.

Mr. Clark, Mr. Sercarz (W)

185A. Immunology Seminar (2 units). (Same as Microbiology M186 and Microbiology and Immunology M186.) Laboratory, four hours. Prerequisites: course 158, consent of instructor. Corequisite: course 158. Student presentation of selected papers from the immunology literature. Designed to serve as a forum for the critical analysis of research papers.

Mr. Clark, Mr. Sercarz (W)

188. Seminar in Biology and Society (2 units). Prerequisite: consent of instructor. Investigations and discussions of current socially important issues involving substantial biological considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit.

Mr. Gordon, Ms. Tobin

190A-190D. Honors Research in Biology (2 to 4 units each). Prerequisites: senior standing, consent of undergraduate adviser. Individual research designed to broaden and deepen the student's knowledge of some phase of biology. May be taken for letter grading only. Students must be enrolled for a total of at least eight units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading only). Open only to students who have consent of the undergraduate adviser each quarter a 190 course is taken. A maximum of eight units may be applied toward the biology major.

(F.W.Sp)

199. Special Studies (2 to 16 units). Prerequisite: consent of instructor and undergraduate adviser based on a written proposal outlining the study or research to be undertaken. The proposal should be worked out in consultation with the instructor and submitted for approval to the undergraduate adviser before the day instruction begins in that quarter. At the end of the quarter a report describing the progress of the student must be sent signed by the student and the instructor must be presented to the undergraduate adviser. Students who wish to take more than eight units of course 199 in any one quarter must obtain authorization from the department chair and the appropriate dean. Only one 199 course may be applied toward the biology major.

(F,W,Sp)

Graduate Courses

Consent of instructor is required for admission to all graduate courses. Additional prerequisites are stated in the course descriptions.

201. Topics in Organismal Plant Biology. Lecture, three hours; laboratory, three hours. Topics in organismal plant biology, including plant cell and tissue characteristics, plant growth and development, transport, photosynthesis, and the physiology of plants.

Mr. Phinney

202. Principles of Systematics and Taxonomy. Lecture, three hours; discussion, two hours. Prerequisite: course 120. The concepts, principles, and methods involved in the inference of evolutionary relationships and the application of biological nomenclature.

Mr. Buth

Mr. Chapman

204A. Advanced Algae. Lecture, three hours; laboratory, six hours. Designed to introduce students to current concepts in algal systematics. Laboratory section designed to teach students, by practical application to unknowns, how to identify algae by appropriate application of keys.

Mr. Chapman

205. Marine Invertebrate Biology (8 units). Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on the living animal and its habitat. Given at the Catalina Marine Science Center.

Mr. Chapman

206. Advanced Ichthyology. Lecture, three hours; laboratory, three hours. Prerequisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit.

Mr. Buth

207. Molecular and Cellular Biophysics. Lecture, three hours. Prerequisites: Chemistry 25, 110A, Mathematics 28A or equivalent, and Physics 6C; or consent of instructor. Strongly recommended: Chemistry 110B or 116. Development of areas of physics, including thermodynamics, diffusion, statistical mechanics, and molecular forces. Application to areas of molecular and cellular biology, including macromolecular characterization, enzyme catalysis, assembly of biological structures, membrane properties, active transport, cell biology, and energy transduction. Biological applications of probability, statistics, and fluctuations.

Mr. Jackson
208. Advanced Vertebrate Morphology. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 207 or equivalent, consent of instructor. Emphasis on a functional approach to evolution of the vertebrate locomotor system, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit. Ms. Van Valkenburgh

209. Behavior of Arthropods. Lecture, three hours; discussion, one hour. Prerequisites: courses 105 or 107 or equivalent, consent of instructor. Laboratory studies of topics in the behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches to understanding behavior. Independent project required. Mr. Greenfield

210. Advanced Ornithology. Lecture, two hours; laboratory, two hours; fieldwork, two hours. Prerequisites: course 113 or equivalent, consent of instructor. Advanced study of topics in avian biology, including systematic, distribution, behavior, and ecology. Students carry out individual study projects in laboratory, field, or museum. Mr. Greenfield

211. Animal Sociology. Lecture, two hours; discussion, two hours. Prerequisites: course 129 or equivalent. The description, analysis, physiology, ecology, and evolution of different social systems in animals.

C212. Experimental Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105, 129, and 166 or 167 (either may be taken concurrently). Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C104. Mr. Moin

213. Community Ecology (2 units). Lecture, three hours. Prerequisites: course 122 or equivalent, one year of calculus. Investigations of the structure and function of animal communities, in theory and in practice (includes the concepts of coexistence, competition, niche, and diversity).

C214. Physiological Ecology (2 units). (Formerly numbered 214.) A consideration of ecologically relevant aspects of animal physiology. Concurrently scheduled with course C134. Mr. Nagy

215. Theoretical Population Biology. Lecture, three hours. Prerequisites: courses 6, 8, and Mathematics 3C or 32A, or consent of instructor. Not open to students with credit for course 119. The use of mathematical models in studying ecological and evolutionary systems. Relevant mathematical techniques discussed include calculus, differential equations, linear algebra, and probability.

Mr. Taylor, Mr. Vance

216. Quantitative Methods in Behavior and Ecology. Lecture, two hours; laboratory, six hours. Prerequisites: course 122 or 129 or equivalent, consent of instructor. Quantitative methods of data collection and analysis in behavioral and ecological research. Lectures review the general nature of quantitative problems that arise in behavior and ecology and the statistical methods used to solve them. Laboratory exercises emphasize the analysis, using comprehensive statistical software routines on personal microcomputers, of the kinds of data that frequently arise in field biological research. Mr. R. Gibson

217. Marine Ecology (8 units). Structure, diversity, and energetic of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanographic and atmospheric processes. Given at the Catalina Marine Science Center. Mr. Vance

218. Oceanology (8 units). Ecology and dynamics of pelagic and benthic associations; physiological properties of seawater; oceanographic studies and their biological significance; qualitative and quantitative methods of oceanology. Given at the Catalina Marine Science Center.

219. Animal Behavior in Laboratory and Field. Discussion, two hours; laboratory, six to eight hours. Prerequisites: course 129 or equivalent, consent of instructor. Laboratory and field studies of selected problems in animal behavior.

C220. Cell and Molecular Biology of Plants. Lecture, three hours; discussion, three hours. Prerequisites: graduate standing. Molecular and structural aspects of cells, with emphasis on plant-specific organelles (e.g., chloroplasts, cell walls) as metabolic processes (e.g., photosynthesis, nitrogen fixation). Comparison with the equivalent processes in algae and bacteria. Concurrently scheduled with course C149. Mr. Thorner

221. Genetic Analysis. Lecture/discussion, three hours. Prerequisites: course 8 or equivalent. Examples of genetic analysis in eukaryotic organisms by means of mutation and chromosome changes. Readings in the literature are provided. Topics include Drosophila chromosome behavior, techniques of gene localization, the one gene-one chromosome hypothesis, meiotic mutants, mosaic animals and cell lineage, behavior, and X chromosome inactivation.

Mr. Mieram

222A-222F. Topics in Genetics. Prerequisites: course 8. Intensive study of selected topics.

223A-223B. Advanced Genetics Laboratories. Laboratory, nine hours. Prerequisites: course 8 or equivalent, consent of instructor. Original research with supervision in eukaryotic genetics. Topics include graduate standing. Molecular and behavioral genetics. May not be repeated for credit.

Mr. Mieram, Mr. Siegel

224. Developmental Biology of Marine Organisms (8 units). Descriptive and experimental studies of developmental stages of marine plants and animals; patterns of reproductive biology; larval biology; metamorphosis. Given at the Catalina Marine Science Center.

225. Special Topics in Development. Lecture, three hours. Variable topics emphasizing the control of eukaryotic gene expression and morphogenesis. Special attention to the role of hormones in the modulation of gene expression during development.

M226A. Principles of Microbial Pathogenesis. (Same as Microbiology M226A and Microbiology and Immunology M226A.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, and 202C, or equivalent, or consent of instructor. A lecture/discussion form designed to analyze the basic pathogenesis of bacterial and mycotic infections. Emphasis on molecular and cellular approaches to understanding host-microbial interaction. Mr. Miller and the Staff (W)

M226B. Principles of Microbial Pathogenesis. (Same as Microbiology M226B and Microbiology and Immunology M226B.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. A lecture/discussion form designed to analyze the basic pathogenesis of parasitic and viral infections. Emphasis on molecular and cellular approaches to an understanding of host-microbial interaction.

Mr. Ahmed and the Staff (Sp)

227. Chromosome Structure and Replication. Lecture, three hours. Prerequisites: course 8 or Chemistry 157A or 157B or consent of instructor. A survey of biochemical and biophysical investigations of the structure and replication of chromosomal nucleic acids, with emphasis on bacterial and viral systems.

Mr. Ray

Mr. Grunstein, Mr. Ray

229. Structural Macromolecules. Lecture, three hours; discussion, one hour. The comprehensive molecular biology of selected structural proteins and polysaccharides, including cellular structure, structural and physical properties, and integrated biological functions.

Mr. Fersether

M230A. Structural Molecular Biology Laboratory. (Same as Chemistry M230A and Microbiology and Immunology M230A.) Lecture, two hours; discussion, one hour. Prerequisites: consent of instructor based on written research proposal. Fundamentals of electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high-resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.

Mr. Eisinger, Ms. Kasamatsu, Mr. Lake (Alternating years)

M230C. Structural Molecular Biology Laboratory. (Same as Chemistry M230C and Microbiology and Immunology M230C.) Lecture, 10 hours. Prerequisites: consent of instructor based on written research proposal. Practical experience with electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microscopy, high-resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.

Mr. Eisinger, Ms. Kasamatsu, Mr. Lake (F; alternate years)

M230D. Structural Molecular Biology Laboratory (2 units). Lecture, 10 hours. Corequisites: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building.

Mr. Eisinger, Mr. Lake (W)

M231A. Paradigms of Evolution. (Same as Anatomy M232.) Lecture, four hours; discussion, two hours. Prerequisites: consent of instructor. The range of conceptual foundations underlying evolutionary studies in various fields of biology, biochemistry, geology, and physics today. S/U or letter grading.

Mr. Brunk, Mr. Campbell (W)

231B. Molecular Evolution. (Formerly numbered 231.) Lecture, three hours; discussion, one hour. Current topics in molecular evolution. Concepts and methodology in lectures, discussion, and student presentations. S/U or letter grading.

Mr. Brunk

232. Experimental Molecular Developmental Biology (8 units). Lecture, one hour; discussion, two hours; laboratory, 12 hours. Prerequisites: courses 138, 144, and/or consent of instructor. A laboratory course in the biochemical expression and regulation of differentiation in eukaryotes.

Mr. Fersether, Ms. Lengyel, Mr. Tobin

233A-233B. Electron Microscopy of Cells (8 units each). Lecture, four hours; laboratory, 20 hours; demonstration, three hours. Electron microscopic techniques applied to structure of cells and to molecular structure of cellular components. Intensive training in electron microscope techniques and in use of the electron microscope for high resolution electron microscopy.
234A. Genetic Control of Development. Especially intended for first- and second-year graduate students as an overview of research questions on development. Emphasis on the Biology Department and of the significant new advances in the discipline. Fundamental questions in developmental biology, with examples from current literature. Topics include genetic activity, gene localization, maternal effect and homeotic mutations, the determined cell state, cell identification, hormone receptors and hormone-mediated responses, and development of model systems and the analysis of genes implicated in development. Students strongly encouraged to take both courses 234A and 234B, since these represent a survey of modern biology as appropriate preparation for graduate study. S/U or letter grading.

234B. Advanced Topics in Cell Biology. Lecture, two hours; discussion, two hours. Especially intended for first- and second-year graduate students as an overview of research questions on cell biology available within the Biology Department and of the significant new advances within the discipline. Fundamental questions in cell biology, with examples from current literature.

255. Current Topics in Escherichia coli Genetics (2 units). (Formerly numbered 246.) Prerequisite: course 596. Seminar on topics from current literature in Escherichia coli molecular genetics, with emphasis on using nonsense suppression to effect protein engineering and to study mechanisms of metabolism.

256. Experimental Cell Biology. Lecture, two hours; discussion, one hour; laboratory, four hours. Prerequisites: course 158, consent of instructor. Theoretical and experimental analysis of systems utilized in the study of cellular metabolism and physiology; cell organelles, cell populations, and organized tissues.

279. Biological and Clinical Applications of Cytometry (2 units). Lecture, one hour; discussion, one hour. Prerequisite: graduate standing or consent of instructor. A discussion of recent advances in flow cytometry. Cell sorting and image analysis. S/U or letter grading.

283. Structure, Function, and Biogenesis of the Mitochondrion. Lecture, three hours. Prerequisites: course 158, consent of instructor. Origin, maintenance, and function of the mitochondrial genome as an example of a highly organized subcellular organelle in the eukaryotic cell.

M239. Techniques in Nucleic Acid Research (2 units). (Same as Microbiology M239.) Highly recommended corequisite: course M239L. Advanced methods in characterization of genes, including sequence determination. Isolation of nucleic acids by centrifugation, chromatography, and electrophoresis, and characterization by restriction mapping and blot hybridization. Cloning in bacterial and plasmid vectors, sequence determination by the dideoxy technique, computer analysis of sequences.

M245. Lecture, laboratory, and discussion, one hour. Prerequisite: consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis is on the use of genetic techniques for addressing fundamental questions in biochemistry and molecular biology. Topics include mutagenesis, mutation selection, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.

M246. Computer Analysis of Genetic Organization. (Same as Microbiology M246.) Lecture, two hours; laboratory, six hours. Prerequisites: courses 6, and 144 or Microbiology 119 or equivalent. Lectures and laboratory instruction in contemporary procedures for the analysis of nucleic acid and protein sequence data with the computer. No prior computer experience or specific course work is required of graduate students.

M247. Advanced Plant Biology. Lecture, three hours; discussion, two hours. Prerequisite: course 141 or equivalent. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

M248. Molecular Genetics. (Same as Biological Chemistry M248.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis is on the use of genetic techniques for addressing fundamental questions in biochemistry and molecular biology. Topics include mutagenesis, mutation selection, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.

M249. Biochemistry of Parasitism. Lecture, three hours. Biochemical and physiological aspects of parasite-host relationships.

M251. Seminar in Systematics (2 units). Mr. Buch, Mr. A. Gibson

253. Seminar in Plant Structure (2 units). Mr. Pinney

254. Seminar in Invertebrate Zoology (2 units). Mr. Morin, Mr. Muscatine

256. Human Genetics. (Same as Biostatistics CM256.) Lecture, three hours; discussion, one hour. Prerequisites: course 6, Chemistry 25. The application of genetic principles in human population genetics, with emphasis on using nonsense suppression to effect protein engineering and to study mechanisms of metabolism.

257. Gene Manipulation: Advanced Course (2 units). Lecture, 90 minutes; discussion, one hour. Prerequisite: course 157 or 257. Additional topics in the methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.

M258A. Molecular Genetics of the Immune System (2 units). (Formerly numbered M250A.) Lecture, laboratory, and discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. A discussion of the methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. S/U or letter grading.

M258B. T and B Cell Function (2 units). (Formerly numbered M250B.) (Same as Microbiology M258B and Microbiology and Immunology M258B.) Lecture, laboratory, and discussion, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on the function of T and B cells, S/U or letter grading.

M258C. Major Histocompatibility Complexes (2 units). (Formerly numbered M250C.) (Same as Microbiology M258C and Microbiology and Immunology M258C.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on the function of T and B cells, S/U or letter grading.

M259. Advanced Immunology: T-Cell Function (2 units). Mr. Bonavida and the Staff (W, five weeks)

M259B. T and B Cell Function (2 units). (Formerly numbered M250B.) (Same as Microbiology M258B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on the function of T and B cells, S/U or letter grading.

M260. Major Histocompatibility Complexes (2 units). (Formerly numbered M250C.) (Same as Microbiology M258C and Microbiology and Immunology M258C.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on the function of T and B cells, S/U or letter grading.

Mr. Clark, Ms. Scofield (Sp, five weeks)
258D. Immunopathology (2 units). (Formerly numbered 250D.) (Same as Microbiology 258D and Microbiology and Immunology 258D.) Lecture, six hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.

Mr. Porter (Sp, five weeks)

258E. Immunoregulation (2 units). (Formerly numbered 250EE.) (Same as Microbiology 258E and Microbiology and Immunology 258E.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on idiotype networks, tolerance and self-tolerance, current research articles on tolerance and autoimmunity, Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on idiotype networks, Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, current research articles on the immunochemistry of antibodies, antigens, and complement, antigenic recognition, antibody regulation. S/U or letter grading.

Mr. Schumaker, Ms. Wisnieski (Sp, five weeks)

259. Seminar in Herpetology (2 units). Discussion, three hours. Prerequisite: consent of instructor. Seminar in current herpetology trends. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology, etc.

Mr. Nagy, Mr. Taylor

260. Seminar in Biology of Terrestrial Vertebrates (2 units).

261. Molecular Neurobiology. Lecture, two and one-half hours; discussion, one hour. Prerequisites: courses 144 and 171, or consent of instructor. Examination of the structural and functional aspects of the nervous system, neural development, learning behavior, and neurological disease. S/U or letter grading.

Mr. Tobin

262. Seminar in Vertebrate Paleontology (2 units).

263. Seminar in Population Genetics. Discussion, three to six hours. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc.

Mr. Taylor

264. Evolutionary Concepts (2 units). Lecture, three hours. Exploration of depth in evolutionary concepts, their diversity, biological interpretations, and impact on social and humanitarian patterns of today and the past.

Mr. Witt

265. Seminar in Biophysical Plant Ecology (2 units).

Mr. Nobel

266A-M266B-M266C. Seminar in Molecular Embryology (2 units each). (Same as Biological Chemistry M266A-M266B-M266C.) Prerequisite: consent of instructor. Advanced study in biochemistry. Emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

Mr. S. Yu

267. Seminar on Current Topics in Evolutionary Biology (2 units).

Mr. Cody, Mr. Vance

268. Seminar in Population Biology (2 units).

Mr. Cody

269. Seminar in Animal Ecology (2 units). Discussion, three hours. Advanced study of specific topics in animal ecology and related fields.

270. Seminar in Environmental Physiology (2 units). S/U grading.

Mr. Nagy

271. Seminar in Phyiology and Mycology (2 units). Prerequisites: course 100 or equivalent, consent of instructor. Structure and function of the fungal cell wall, fungal development, fungal physiology, and fungi. Topics in physiological ecology, physiology, and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eukaryotic organisms. Evolutionary origin of chloroplasts. Mr. Chapman

272. Seminar in Marine Biology (2 units).

Mr. Gordon, Mr. Morin, Mr. Muscatine

273. Seminar in Entomology (2 units). Discussion of specific topics in entomology and related fields. Main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution.

Mr. Greenfield

274. Seminar in Behavioral Ecology (2 units). Discussion of the theoretical and empirical aspects of topics in behavioral ecology.

Mr. R. Gibson (W)

275. Seminar in Behavior Research Problems. Lecture, three hours; laboratory, two hours. Prerequisite: course 130.

Mr. Kavanau

276. Seminar in Molecular Genetics (2 units). Topics: Gene Expression and Regulation.

Mr. Salser

277. Seminar in Genetics (2 units).

Mr. Ebersold, Mr. Merriam, Mr. Siegel

278. Seminar in Information Processing in Eukaryote Cells (2 units). Discussion, three hours. Prerequisites: course 8, Chemistry 157A, and 157B, or consent of instructor. Structure and organization of eukaryote DNA; nuclear RNA species; definition and properties of eukaryote mRNA; translation of mRNA; current related topics.

Mr. Clark

279. Seminar in Molecular Neurobiology (2 units).

Mr. Tobin

280. Seminar in Chromosome Structure and Replication (2 units). Prerequisite: course 227. Current topics in the field of control and mechanism of DNA replication.

Mr. Ray

281. Seminar in Molecular Biology (2 units).

Mr. Brunk, Mr. Fessler, Mr. Ray

282. Seminar in Ichtymology (2 units). (Formerly numbered 258.) Prerequisite: course 111 or 112. Students present their papers and discuss specific topics in ichthyology. Theme varies from year to year to vary.may be repeated for credit.

Mr. Buth

283. Seminar on Topics in Cell Biology (2 units). A discussion of various topics on the biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function.

Mr. Simpson

284. Seminar in Structural Macromolecules (2 units).

Mr. Fessler

285. Seminar in Molecular Evolution (2 units). Discussion, three hours. Prerequisites: courses 138, 144, and/or consent of instructor. In-depth analysis of current problems in the biology, biochemistry, and molecular biology of structural and functional evolution. Emphasis on recent findings and publications on the biosynthesis, structure, and biodegradation of these molecules.

Mr. Fessler

286. Seminar in Molecular Evolution (2 units). Discussion, three hours. Prerequisite: course 138, and/or consent of instructor. A detailed analysis of the current understanding of the evolution of molecular sequences and structures.

Mr. Lake

287. Seminar in Plant Development (2 units). Lecture, one hour; discussion, two hours. Prerequisites: a course in plant physiology, at least one advanced undergraduate or graduate plant development or biochemistry course, and Chemistry 157A, 157B, or equivalent. Seminar on specific topics in plant development. Content varies each quarter.

Mr. Phinney, Ms. Tobin

288. Seminar in Comparative Cell Physiology (2 units).

Mr. Casaccano, Mr. James

Ms. Gonzalez

290. Seminar in Plant Physiology (2 units).

Mr. Lattes

291. Seminar in Comparative Physiology (2 units).

Mr. Gordon, Mr. Narins

292. Seminar in Physiology and Biochemistry of Arthropods (2 units).

Mr. Engelmann

293. Seminar on Topics in Ultrastructure (2 units).

Mr. Thorner

295. Seminar in Neurophysiology (2 units).

Mr. O'Tuague

296. Seminar in Biological Applications of Flow Cytometry (2 units). Lecture, two hours; demonstration, one hour. Prerequisite: graduate standing or consent of instructor. Initial lecture focuses on instrumentation design and operation. Subsequent lectures present specific biological paradigms whose unresolved questions can best be answered by means of fluorescent flow cytometry. The latter portion of the seminar is topical and varies from year to year.

297. Seminar in Molecular Endocrinology (2 units).

298. Seminar in Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Chemistry M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

299. Seminar in Parasitology (2 units).

Mr. Macniss

300. Teaching Apprentice Practicum (1 to 4 units).

301. Cooperative Program (2 to 8 units).

302. Directed Individual (or Tutorial) Studies (2 to 12 units).

303. Directed Individual (or Tutorial) Studies (2 to 8 units). Given at the Catalina Marine Science Center.

304. Preparation for the Teaching of Biology in Higher Education (2 units). Prerequisites: graduate standing, consent of instructor. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

305. Comprehensive Examination (2 to 12 units).

306. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examination (2 to 12 units). May not be applied toward the M.A. or Ph.D. course requirements. S/U grading.

307. M.A. Thesis Research and Writing (2 to 12 units).

308. Ph.D. Dissertation Research and Writing (2 to 12 units).
Business and Administration (Interdepartmental)

A316 Murphy Hall, (213) 825-1965

Additional Coursework for Students Interested in Business and Administration

The specialization in business and administration is not a major, but a sequence of supplemental courses designed to prepare students for the complexities of a career in business and administration. Students complete one of the many majors in the College of Letters and Science, as well as a sequence of courses.

For example, if you are interested in international business, you might major in a foreign language to become familiar with the literature and culture of other countries, and then add this program to gain a basic understanding of foreign language and culture. Other students interested in working for a governmental agency or nonprofit corporation might add this program to a social science major. Students with an interest in a liberal arts area, who are not planning to go to graduate school, may want to complete this program to prepare for the complexities of a career in business and administration. Students with a particular interest in accounting, banking, and finance are directed to the economics/business major.

Completion of this program in addition to a Letters and Science major will give you the basic skills and knowledge most employers seek. Courses used to satisfy either the major or general education requirements may also be applied toward the requirements of this program.

A minimum grade of C – is necessary to apply courses to this program, with an overall C average in the specialization. All courses must be taken for a letter grade; the P/NP option is not acceptable. You may satisfy one of the field studies course requirements by completing an independent study course (199), taken in an appropriate department with prior consent of the program faculty adviser. You also are required to seek guidance from a field studies coordinator in choosing and researching your topic.

To enter the specialization, you must file a petition with the College Counseling Service in the College of Letters and Science by the time you have completed 120 units. If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate. All degree requirements, including the specific requirements for this specialization, must be fulfilled within 228 units. When you have successfully completed all requirements, you receive a certificate of completion. A statement of completion is also noted on your transcript.

For further information and help in assessing the appropriateness of this program and how it relates to your career/education goals, contact the College Counseling Service in the College of Letters and Science.

The following requirements are in effect for students entering UCLA in Fall Quarter 1987 or thereafter (check with the College Counseling Service regarding requirement changes).

Core Courses
Required: Economics 1 and 2, or 100; Management 1A, 1B; one course in statistics; one course in mathematics (except Mathematics A, 1, 38A, 38B, 104, Statistics 50); two courses from English 4, 30, 100W, 131A through 131J, 136A, 136B, Speech 1 (English 136A and 136B are In Progress courses; credit is given only on completion of both courses).

Analytical Skills
Required: Three courses from one of the following areas: (1) quantitative methods: Program in Computing 10A, 10B, 10C; Computer Science 141, Anthropology 186A, 186B; Economics 141, 147A, 147B, Geography 171, Political Science 102, Psychology M142, 144, 150, 151, Sociology 104, 112, 113; (2) critical reasoning: Engineering 11, 12, Philosophy 9, 31, 32, Philosophy 112C.

Field Studies
Required: Any three courses from the following list:

Business and Administration Communications and Interactions: Communication Studies 100, 101, Geography 146, Psychology 136A, 137A, 174, 178, Sociology 135

Business Logistics: Geography 145, 148, 149

Cognitive Science: Linguistics 1 or 100, 10, Materials Science and Engineering M107A or Psychology M153, Psychology 110, 111, 120, 121, 187

Contemporary Administration: Anthropology 150, Geography 148, Political Science 173, 180, Psychology 148, Sociology 173

Contexts: Honors Collegium 57, 60A, 60B, 61

Government and Business: Political Science 142, 173

National and International Business and Administration: History 125E, 148C, 149B, Political Science 124, 129, 130

Urban and Metropolitan Administration: Anthropology 160, 160P, 167, Geography 145, 150, Political Science 183A, 183B, Psychology 175, Sociology 158

U.S. Business Institutions: History 149A, Political Science 173, Sociology 168, 173

Chemistry and Biochemistry

Professors
Frank A. L. Anet, Ph.D. (Organic Chemistry)
Daniel E. Atkinson, Ph.D. (Biochemistry)
Mario E. Baur, Ph.D. (Physical Chemistry)
Kyle D. Bayes, Ph.D. (Physical Chemistry)
Richard B. Bernstein, Ph.D. (Physical Chemistry)
Paul D. Boyer, Ph.D. (Biochemistry)
Orville L. Chapman, Ph.D. (Organic Chemistry)
Steven G. Clarke, Ph.D. (Biochemistry)
Donald J. Cramp, Ph.D. (Saul Winsten Professor of Organic Chemistry)
Richard E. Dickerson, Ph.D. (Biochemistry and Molecular Biology)

Christopher S. Foote, Ph.D. (Organic Chemistry and Biochemistry)
William M. Gelbart, Ph.D. (Physical Chemistry)
Jay D. Graff, Ph.D. (Biochemistry)
M. Frederick Hawthorne, Ph.D. (Inorganic and Organometallic Chemistry)
Kendall N. Houk, Ph.D. (Organic and Theoretical Chemistry)
Wayne L. Hubbell, Ph.D. (Biochemistry and Jules Stein Professor of Ophthalmology)
Michael E. Jung, Ph.D. (Organic Chemistry and Biochemistry)
Herbert D. Kaesz, Ph.D. (Inorganic and Organometallic Chemistry)
Daniel Kivelson, Ph.D. (Physical Chemistry)
Charles M. Knobler, Ph.D. (Physical Chemistry)
Harold G. Martinson, Ph.D. (Biochemistry and Molecular Biology)
William G. McMillian, Jr., Ph.D. (Chemical Physics)
Malcolm F. Nicol, Ph.D. (Physical Chemistry)
Emil Reisler, Ph.D. (Biochemistry and Molecular Biology)
Howard Reiss, Ph.D. (Physical Chemistry)
Verne N. Schumaker, Ph.D. (Biochemistry and Molecular Biology)
Robert L. Scott, Ph.D. (Physical Chemistry)
Charles E. Strouse, Ph.D. (Inorganic Chemistry)
Kenneth N. Trueblood, Ph.D. (Physical Chemistry)
Joan S. Valentine, Ph.D. (Inorganic Chemistry and Biochemistry)
John T. Wasson, Ph.D. (Geochemistry and Chemistry)
Richard L. Weiss, Ph.D. (Biochemistry)
Charles A. West, Ph.D. (Biochemistry)
R. Stanley Williams, Ph.D. (Physical Chemistry)
Jeffrey I. Zink, Ph.D. (Inorganic and Physical Chemistry)
Francis E. Blacet, Ph.D., D.Sc., Emeritus
Paul S. Faering, Ph.D., Emeritus
Clifford S. Garner, Ph.D., D.Sc., Emeritus
Undergraduate Study

Admission
Regular and transfer students who have the prerequisites for the various courses are not thereby assured of admission to those courses. The department may deny admission to any course if a grade of D or below was received in a prerequisite, or if in the opinion of the department the student shows other evidence of inadequate preparation.

Transfer students with more than 84 quarter units accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry 11 series, Mathematics 31A, 31B, 32A, Physics 8A, 8B/8BL, 8C/8CL (or a year of calculus-based physics). For biochemistry majors, a year of biology may replace the physics. For chemistry majors, Mathematics 32B is recommended.

Transfer students with more than 105 quarter units accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry 11 series and 21, Mathematics 31A, 31B, 32A, Physics 8A, 8B/8BL, 8C/8CL (or a year of calculus-based physics). Biochemistry majors also should have completed a course in the biology of organisms; chemistry majors should have completed Mathematics 32B.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 21. Transfer students should consult the department’s Undergraduate Office for assistance in planning their programs.

You may not take or repeat a chemistry or biochemistry course for credit if it is a prerequisite for a more advanced course for which you already have credit.

Courses used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, including at least one laboratory, may not be applied toward the requirements.

Each of the major programs is outlined below. Students may contact Dorothy Seymour, Undergraduate Counselor, for help and advice (4016 Young Hall).

Preliminary Examination for Chemistry 11A
If you wish to enroll in Chemistry 11A or 11AH, you must take the Chemistry/Mathematics Preliminary Examination in Chemistry during the enrollment period for the quarter in which you intend to take these courses. Enrollment usually is limited to students who have passed the examination. It will be given in 2250 Young Hall on Monday, September 26, 1988; Wednesday, November 2, 1988; Wednesday, February 8, 1989; and Saturday, June 3, 1989.

If your performance on the examination does not qualify you for immediate admission to Chemistry 11A, but you wish to enroll in a subsequent quarter, you may be eligible for enrollment in Los Angeles City College (LACC) Chemistry 17. This course is given at UCLA during the Fall Quarter (and occasionally other quarters) expressly for UCLA students preparing for Chemistry 11A. If you successfully complete LACC course 17, you are entitled to admission to Chemistry 11A for the next three quarters. Offered on a Passed/Not Passed basis, LACC course 17 carries no UCLA graduation credit but does displace four units on your Study List. It is not an acceptable substitute for course 11A.

Bachelor of Science in Chemistry
This program is for students who intend to pursue a career in chemistry.

Preparation for the Major
Required: Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, Biochemistry 25; Physics 8A, 8B/8BL, 8C/8CL (8D/8DL strongly recommended); Mathematics 31A, 31B, 32A, 32B, 33A. No specific foreign language is required, however, reading knowledge of German (at least at the level of German 3) is strongly recommended if you are planning to pursue graduate work in chemistry.

The Major
Required: Chemistry 110A, 110B, 113A, 114 (or 114H), 133A, 133B, 133C, 173, and two other upper division or graduate courses in the department, including at least one laboratory course from 136, 144, 154, 174, 184.

Bachelor of Science in Biochemistry
This program is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

Preparation for the Major
Required: Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; Biochemistry 25; Mathematics 31A, 31B, 32A, 33A; three courses (including laboratory) from Physics 8A*, 6B, 6C, 8A, 8B/8BL, 8C/8CL, 8D/8DL; Biology 5, 8, 8L.

*if physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.
The Major

Required: Chemistry 110A, 133A, 133B, 133C; Biochemistry 154, 156, 157A, 157B; one course from each of the following five categories: (1) Microbiology 101; (2) Biology 138, 141, 153, CM156, or Microbiology C111; (3) Biology 158, 162, 166, 167, or Microbiology 113; (4) one upper division or graduate-level course in biology, chemistry and biochemistry, or microbiology; (5) one upper division or graduate-level course in biology, biological chemistry, chemistry and biochemistry, mathematics, microbiology, or physics. Courses selected to satisfy categories 4 and 5 must be approved by the undergraduate adviser (Biochemistry).

Bachelor of Science in General Chemistry

This program is for students who wish to acquire considerable chemical background in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major may be appropriate for some students who plan to enter professional schools, such as those of medicine, dentistry, or public health.

Preparation for the Major

Required: Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; Biochemistry 25; Mathematics 31A, 31B, 32A, 33A; three courses (including laboratory) from Physics 6A*, 6B, 6C, 8A, 8B/8BL, 8C/8CL, 8D/8DL.

*If physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.

To enter the major, you must complete the preparation courses with at least a 2.0 average.

The Major

Required: Six upper division courses in the department, including at least one in physical chemistry and at least two with laboratory work; six additional upper division courses. A 2.0 average is required in all upper division courses in the department. The program should be coherent in terms of your interests and objectives and must be based on a written proposal and approved by the undergraduate adviser (Chemistry).

Graduate Study

The department offers programs of study and research leading to the M.S. and Ph.D. degrees in both Chemistry and Biochemistry. Candidates for advanced degrees may specialize in the following fields: biochemistry, inorganic, organic, or physical chemistry.

If you are planning to work toward the Ph.D., you should not seek an M.S. degree first, but should apply directly to the Ph.D. program. Application materials may be obtained by writing to Phylis Jergenson, Graduate Office, Department of Chemistry and Biochemistry, 4006 Young Hall, UCLA, Los Angeles, CA 90024-1569.

Admission

An excellent undergraduate record is required in addition to the University minimum requirements. Graduate Record Examination (GRE) General and Subject Tests are recommended. Each student admitted to graduate standing is given orientation examinations at the beginning of the first quarter in physical, organic, analytical, and inorganic chemistry or biochemistry. The main purpose of the orientation requirement is to help you and your adviser plan a suitable course program. The examinations include material covered in upper division courses in biochemistry, physical, organic, and inorganic chemistry. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

You are encouraged to become familiar with research activities of all faculty members in your area of interest and to join a research group as soon as possible. Biochemistry students rotate through at least two research groups during the Fall and Winter Quarters, with a final selection made during the Spring Quarter.

Foreign Language Requirement

Language requirements for the different areas of specialization are as follows: biochemistry — none; inorganic — German or a coordinated course in computer programming; organic — German; physical — German or French or, with consent of the research director, a substitute course program or a coordinated course in computer programming. Either the Educational Testing Service (ETS) examination (with a score of 500) or the departmental examination plan is used, an additional six units of course 597 and six units from course 22B, 248, or 278 may be applied toward the graduate course requirement and the total course requirement.

Biochemistry M.S.:
The M.S. in Biochemistry may be obtained by the thesis plan or the comprehensive examination plan. Course requirements vary for each plan, as follows.

Plan I (Thesis Plan): A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry M253, M255, M263, M267. Registration in course 268 is required for three quarters but is not applicable to the 36-unit requirement.

Up to 22 units of course 596 or 598 may be applied toward the total course requirement; up to eight units may be applied toward the minimum graduate course requirement.

After completion of course requirements, you should consult your research adviser to form a thesis committee.

Plan II (Comprehensive Examination Plan): A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry M253, M255, M263, M267. You may apply six units of course 268 and six units of course 597 to the graduate course requirement and the total course requirement. With the exception of Chemistry 268 and 597, all courses must be taken for a letter grade.

Master of Science Degrees

Course Requirements

Chemistry M.S.: At least nine courses (36 units) are required, of which at least five (20 units) must be graduate courses and the remainder upper division courses. You must take a minimum of two courses in your major area and one course in an outside area. Choices may be made from the following:

Inorganic — Chemistry 174, 207, C275, C276A, C276B, 277, 279

Substitutions may be made with consent of the area adviser. With consent of the graduate adviser, courses of directed individual study, but not research courses, may replace any of the courses listed above.

To up 24 units of course 596 or 598 may be applied toward the total course requirement; up to 20 units may be applied toward the minimum graduate course requirement.

Plan I (Thesis Plan): The preferred method of attaining the M.S. in Chemistry. However, in exceptional cases where Plan II (comprehensive examination plan) is used, an additional six units of course 597 and six units from course 22B, 248, or 278 may be applied toward the graduate course requirement and the total course requirement.

Biology M.S.: The M.S. in Biochemistry may be obtained by the thesis plan or the comprehensive examination plan. Course requirements vary for each plan, as follows.

Plan I (Thesis Plan): A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry M253, M255, M263, M267. Registration in course 268 is required for three quarters but is not applicable to the 36-unit requirement.

Up to 22 units of course 596 or 598 may be applied toward the total course requirement; up to eight units may be applied toward the graduate course requirement.

After completion of course requirements, you should consult your research adviser to form a thesis committee.

Plan II (Comprehensive Examination Plan): A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry M253, M255, M263, M267. You may apply six units of course 268 and six units of course 597 to the graduate course requirement and the total course requirement. With the exception of Chemistry 268 and 597, all courses must be taken for a letter grade.
Ph.D. Degrees

Course Requirements

Chemistry Ph.D.: Candidates in each area of specialization should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. If your projected research falls in an area which differs appreciably from that anticipated by the field requirements listed below, you may be permitted appropriate modifications. Required coursework must be completed prior to advancement to candidacy.

Inorganic Chemistry
(1) Required background material: Chemistry 173, (2) two courses from C276A, C276B, C277; (3) two courses from 174, 207, 271A through 271Z, C275, 279; (4) two courses from physical chemistry (C213B, C215A, C215B, 215D, C223A) or organic chemistry (232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, 246) or biochemistry (157A); (5) Chemistry 278.

Organic Chemistry
(1) Required background material: Chemistry 133A, 133B, 133C, 136, 144; (2) courses C243A, C243B; (3) one course from C213B, C245, C276A; (4) one additional course from physical chemistry (C215A, 221A through 221Z, C223A) or inorganic chemistry (173, 174, C275, C276A) or biochemistry (157A, 157B); (5) two courses from 207, 232, 236, 241A through 241Z, 242, C244A, 244B, 245, 246; (6) Chemistry 248.

Physical Chemistry
(1) Required background material: Chemistry 110A, 110B, 113A; (2) courses C215A, C215B, C223A, C223B, or equivalent; (3) course 228 each quarter; (4) one quarter of course 218 (for presentation of research); (5) two courses (for letter grade credit) from C210C, 215C, 215D, 223C, 225; (6) two courses (with S/U grading option) from C210C, 215C, 215D, 221A through 221F, 223C, 225, C243A, C276A, 277, Mathematics 146, Physics 213A, 105A, 110A, 110B, 131, 132, 140. Substitutions may be made with consent of the graduate adviser (physical chemistry).

Biochemistry Ph.D.: Candidates should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. Required coursework must be completed before advancement to candidacy.

(1) Required background material: Chemistry 110A, 133A, 133B, 133C, 156, 157A, 157B, some coursework in the life sciences, and some biochemistry laboratory experience. Deficiencies in background may be made up after admission. (2) Core courses M253, M255, M263, M267 — 18 units total. Students concentrating in bio-physical chemistry or other specialized areas may want to modify the core. In these cases, six units of the core courses may be replaced subject to consultation with and consent of the graduate adviser. (3) An additional 12 units of upper division or graduate courses subject to the consent of the graduate adviser. It is recommended that eight of these units be from other than biochemistry offerings. Advanced courses taken elsewhere or as an undergraduate may be substituted for some of these units in appropriate cases. Seminar courses are normally not applicable. (4) Chemistry 258 in the first four quarters.

Teaching Experience
One year of teaching experience is required.

Qualifying Examinations
Rather than a single comprehensive examination, the department gives all chemistry Ph.D. candidates a series of written tests called cumulative examinations. These are designed to encourage and test the continued growth of professional competency through coursework, study of the literature, departmental seminars, and informal discussions with colleagues.

Three examinations are given per quarter at approximately monthly intervals. If you enter directly into the chemistry Ph.D. program and perform satisfactorily on the orientation examination in your special area, you may begin writing the examinations immediately. You must begin by the start of your second quarter in residence and must continue until you have passed five. To remain in good standing, you should pass at least one of the first six examinations attempted and three out of nine. Fifteen attempts are normally the maximum.

The written examination requirement for all biochemistry Ph.D. candidates is coupled to the graduate student seminar, Chemistry 258. Beginning with Winter Quarter of your first year, you are required to submit the following written reports for grading to the instructor and other designated faculty members:

(1) Winter Quarter — A presentation and written report based on the Fall Quarter rotation research experience, to be submitted to the instructor and rotation supervisor for grading.

(2) Spring Quarter — A written report which summarizes the current state of knowledge in a small, well-defined area and which identifies the general types of experiments needed for progress in that field, to be prepared for grading by the course instructors.

(3) Fall Quarter, Second Year — At the end of the preceding Spring Quarter, you select a research topic from a list prepared by the division. An in-depth seminar on this topic which summarizes the current state of knowledge in a field and which indicates likely future directions must be presented. The written report should go beyond the information presented in the seminar and should propose specific experiments. This examination is graded by two faculty members other than the research supervisor.

A failed report may be revised once. The written examination requirement for the biochemistry Ph.D. program is fulfilled after you satisfactorily complete all three different types of reports.

At the end of the first and second year in either Ph.D. program, your overall progress is evaluated by the graduate study committee, taking into account performance in courses, written examinations, and research. The committee may recommend that you (1) proceed to the oral examination, (2) be redirected to the M.S. program, or (3) be terminated.

The University Oral Qualifying Examination is based on your research proposal which should represent independent work and should offer the doctoral committee an opportunity to judge your ability to think creatively and to formulate significant ideas for research. The examination is to be attempted by the end of the seventh quarter (sixth quarter for biochemistry). Failure to comply with this time schedule may result in disqualification from the Ph.D. program unless permission has been given by the area adviser. The committee's decision to advance you to candidacy, to allow you to repeat the oral, or to disqualify you is based on the quality of the written proposal, the adequacy of the oral presentation, your overall record at UCLA as reflected in coursework and examinations, and your research ability.

When a satisfactory report on the completion of the written and oral qualifying examinations, course requirements, and the departmental language requirement has been submitted, you are eligible for formal advancement to candidacy for the Ph.D.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination is optional with the doctoral committee.
Lower Division Courses

2. Introductory Chemistry. Lecture, two hours; discussion, two hours. Open to students with credit for course 11A. Designed to meet part of the Letters and Science requirements for nonscience majors and similar requirements in other colleges. The concept of the submicroscopic world of chemistry, ranging from protons to proteins in subject matter. Refer to "Requirements for the Bachelor's Degrees" in the College of Letters and Science section of this catalog for other credit limitations on this course.

Mr. Hardwick (F,Sp)

11A. General Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: high school chemistry or equivalent background and three and one-half years of high school mathematics, successful completion of the Chemistry/Mathematics Preliminary Examination. Recommended: high school physics. Required of all majors in chemistry and biochemistry. (Students lacking the prerequisites may qualify for admission by exceptional performance on the Chemistry/Mathematics Preliminary Examination.) Atomic theory and stoichiometry; states of matter and phase equilibria; gases, liquids and solutions; acids, bases, and salts; equilibrium; solubility and solubility equilibria; oxidation and reduction.

Mr. Baur, Mr. Farrington, Mr. Trueblood (F,Sp)

11AH. General Chemistry (Honors). Lecture, four hours; discussion, one hour. Prerequisites: high school chemistry or equivalent background and three and one-half years of high school mathematics. Recommended: high school physics. (Students lacking the prerequisites may qualify for admission by exceptional performance on the Chemistry/Mathematics Preliminary Examination.) All students who intend to take this course must take the Chemistry/Mathematics Preliminary Examination (enrollment is usually limited to students who have passed the examination). An honors course parallel to course 11A.

Mr. El-Sayed, Mr. Gebhart (F)

11B. General Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 11A or 11AH with a grade of C- or better or consent of instructor. Thermochemistry and thermodynamics; electrochemistry; chemical kinetics; quantum theory and electronic structure of atoms; periodicity of chemical properties.

Mr. Kaesz, Mr. Kivelson, Mr. Knobler (F,Sp)

11BH. General Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisite: course 11AH with a grade of B+ or better or consent of instructor. Corequisite: course 11B or must have already been passed with a grade of C- or better. Enrolment priority, if needed, to those taking course 11B concurrently. Use of the balance; volumetric techniques; equilibria; thermochromy; quantitative analysis using volumetric and potentiometric procedures; Beer's Law.

Mr. Baur, Mr. Nicol (W)

11BL. General Chemistry Laboratory (1 unit). Laboratory, four hours. Prerequisite: course 11A with a grade of C- or better or consent of instructor. Corequisite: course 11B (or must already have been passed with a grade of C- or better). Enrolment priority, if needed, to those taking course 11B concurrently. Rates of reactions; quantitative volumetric analysis; qualitative inorganic analysis; phase equilibria; column chromatography; colorometric analysis.

Mr. Williams (Sp)

15L. Organic Chemistry and Biochemistry for Pre-Nursing and Kinetics. Prerequisite: course 11A with a grade of C- or better. Not open to students with credit for course 21. Recommended for students in certain areas of kinesiology and in the prenursing, preprofessional hygiene curricula. Does not meet requirements for admission to medical and dental schools nor does it satisfy the requirements of any major in Letters and Science other than certain areas of kinesiology. An introduction to the structures and reactions of organic compounds, particularly with respect to their roles and their transformations in living systems.

Ms. Lamb (F, W)

11C. General Chemistry (Honors). Lecture, two hours; discussion, two hours. Prerequisites: high school chemistry or equivalent background and three and one-half years of high school mathematics, successful completion of the Chemistry/Mathematics Preliminary Examination. An honors course parallel to course 11C. Honors courses include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics.

Mr. Baur, Mr. Trueblood, Mr. Williams (W)

11D. General Chemistry Laboratory (Honors). Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics.

Mr. Baur, Mr. Trueblood, Mr. Williams (F,Sp)

110A. Physical Chemistry. Chemical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisites: course 11C, Physics 8B or 6C (may be taken concurrently). Mathematics 31A, 31B, 32A or, for life science majors, Mathematics 3C. An understanding of partial differentiation such as that obtained in Mathematics 3C or 32A is very desirable. Properties of gases; laws of thermodynamics; free energy; entropy; chemical potential and chemical equilibrium; thermodynamics of solutions.

Mr. Bernstein, Mr. McMillan, Mr. Trueblood (F,Sp)

110B. Physical Chemistry. Chemical Equilibrium, Electrochemistry, and Kinetics. Lecture, four hours; discussion, one hour. Prerequisites: course 110A, Physics 8C. Introduction to statistical thermodynamics, kinetic theory of gases, chemical kinetics, phase equilibria, chemical equilibria in solutions, electrochemistry.

Mr. Kivelson, Mr. McMillan, Mr. Reiss (Sp)

C110C. Physical Chemistry: Charges, Fields, and Matter. (Formerly numbered 110C.) Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Topics include electromagnetic fields in matter — susceptibilities, molar polarization and refraction, multipole, van der Waals forces; classical EM waves — propagation, refraction, scattering, absorption, optical rotation and rotatory dispersion, magnetic effects; radiation — multipole, black-body, Einstein coefficients, lasers; scattering and diffraction — Rayleigh, Mie, Raman, laser spectroscopy; emission — by particles, molecules, lattices; resonance phenomena — light, EPR, NMR, Mössbauer; electrolytes — ion activity, conductivity, rate effects. May be concurrently scheduled with course C210C.

Mr. McMillan (Sp)

113A. Physical Chemistry: Introduction to Quantum Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: course 11C, Physics 6C or 8C, Mathematics 31A, 31B, 32A, 33A. An introduction to the principles and applications of quantum chemistry; atomic structure and spectra; harmonic oscillator; rigid rotor, molecular spectra.

Mr. Bayes, Mr. Gebhart, Mr. Scott (Sp)

C113B. Physical Chemistry: Introduction to Molecular Spectroscopy. Lecture/quiz, five hours. Prerequisite: course 113A or equivalent. Spectroscopic applications of basic quantum chemistry, including light-matter interaction, origin of selection rules, rotation-vibration spectra, harmonic and anharmonic effects, electronic spectra, Franck-Condon principle, and topics from Raman, microwave, ESR, NMR, laser spectroscopy, and radiationless transitions. May be concurrently scheduled with course C213B.

Mr. Bayes, Mr. Trueblood, Mr. Williams (Sp)

114. Physical Chemistry Laboratory. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics.

Mr. Bayes, Mr. Trueblood, Mr. Williams (F,Sp)

114H. Physical Chemistry Laboratory (Honors). Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, with grades of B or better, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes topics in physical chemistry to be selected in consultation with the instructor.

Mr. Bayes, Mr. Trueblood, Mr. Williams (F,Sp)
COLLEGE OF LETTERS AND SCIENCE / Chemistry and Biochemistry / 131

C115A-C115B. Quantum Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is a prerequisite to C115B. Students entering course C115A are normally expected to take course C115B the following quarter. Designed for chemistry students with a serious interest. Quantum chemistry: development of the postulate of quantum mechanics; expansion theories; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximate solutions of molecular problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B.

Mr. Farrell, Mr. Gelbart (W, C115A; Sp, C115B)

121. Special Topics in Physical Chemistry. Prerequisite: course 110B. Recommended: course 113A. Physics 8D. Topics of considerable research interest presented at a level suitable for students who have completed the junior-year courses in physical chemistry.

C123A-C123B. Classical and Statistical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisite: course 110B or 156. Recommended: course 113A. Introduction to the fundamental concepts of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic polycatomic gases, the solid and fluid states, thermal equilibrium, and finite temperature finite systems. Mr. Levine (F)

133A. Intermediate Organic Chemistry. Prerequisites: courses 152 and 157A, or equivalent. Students with grades of C or better, or consent of instructor. Structure, reactivity, and spectroscopic properties of organic compounds. Mr. Anet, Mr. Foote (F,Sp)

133B. Intermediate Organic Chemistry. Lecture, three hours; laboratory, four hours. Prerequisite: course 133A with a grade of C or better. Lectures include reactions, mechanisms, and synthesis in organic chemistry; common classes of compounds and reactions. Laboratory includes methods of organic reactions, synthesis, isolation, and characterization. Mr. Anet, Mr. Foote (F,Sp)

133BG. Intermediate Organic Chemistry (2 units). Lecture, quiz, three hours. Open only with consent of graduate adviser (Chemistry) to graduate students who have not taken course 133B at UCLA. Mr. Anet, Mr. Foote (F,W)

133C. Intermediate Organic Chemistry. Lecture, two hours; laboratory, four hours. Prerequisite: course 133B with a grade of C or better. Lectures include reactions, mechanisms, and synthesis in organic chemistry; complex molecules and natural products, polymers. Laboratory includes methods of organic reactions, synthesis, isolation, and characterization. Mr. Anet, Mr. Foote (W)

133CG. Intermediate Organic Chemistry (2 units). Lecture/quiz, three hours. Open only with consent of graduate adviser (Chemistry) to graduate students who have not taken course 133C at UCLA. Mr. Anet, Mr. Foote (W,Sp)

136. Organic Structural Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 133B and 157A, or equivalent. Consent of instructor. A laboratory course in organic structural determination by chemical and spectroscopic methods; microtechniques. Mr. Foote (F)

C143A. Structure and Mechanism in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110B, 113A, and 133C (may be taken concurrently), or equivalent, with grades of C or better, or consent of instructor. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C243A. Mr. Chapman (F)

C143B. Mechanism and Structure in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course C143A with a grade of C or better or consent of instructor. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C243B. Mr. Chapman (W)

144. Practical and Theoretical Introductory Organic Chemistry. Lecture, two hours; laboratory, eight hours. Prerequisite: course 133C or equivalent instruction. Lectures on modern synthetic reactions and processes, with emphasis on stereospecific methods of synthesis. Laboratory methods of synthetic organic chemistry, including reaction techniques, synthesis of natural products, and molecules of theoretical interest. Mr. Jung (Sp)

152. Biochemistry. Lecture, four hours; discussion, one hour. Prerequisite: course 25. Not open to students with credit for course 157A. Students with credit for this course are limited to two units of credit for course 157A. Survey of biochemistry. May not be applied toward the chemistry or biochemistry major. Mr. Boyer, Mr. Smith (F)

154. Biochemical Methods. Lecture/quiz, two hours; laboratory, eight hours. Prerequisite: course 25. Recommended: course 152 or 157A. Applications of biochemical procedures to metabolic reactions; properties of living systems; enzymes; proteins; nucleic acids and other tissue constituents. Mr. Clarke, Mr. Gralla, Mr. Martinson (F,W,Sp)

156. Biophysical Chemistry. Lecture, four hours; discussion, one hour. Prerequisite: course 110A. Solution thermodynamics of biochemical systems; bio-chemical kinetics; energy levels, spectroscopy, and bonding; topics from structural, hydrodynamic, statistical, and electrochemical methods of biochemistry. Mr. Eisenberg, Mr. Rees, Mr. Schumaker (F)

157A. Biochemistry. Lecture, four hours; discussion, one hour. Prerequisites: courses 25, 110A, 133B (may be taken concurrently). A combination of courses 152 and 157A is limited to six units of credit. Enzymes; metabolic pathways and their integration and regulation; biological energetics. Mr. Atkinson, Mr. Clarke, Mr. West (W)

157B. Biochemistry. Lecture, four hours; discussion, one hour. Prerequisite: course 157A. Biosynthetic metabolism; synthesis of nucleic acids and proteins and control of these processes. Mr. Altshuler, Mr. Clarke, Mr. Jordan (Sp)

173. Structural Inorganic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite or corequisite: course 110A. Recommended: courses 113A or 156, and 133B. An introductory survey of structure and bonding in inorganic compounds; nucleation and growth, chemical kinetics; donor-acceptor interactions; coordination compounds of the transition metals; elements of crystal-field and ligand-field theory. Mr. Hawthorne, Mr. Kaesz, Mr. Zink (F, W, Sp)

174. Inorganic and Metalorganic Laboratory Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 133A, 133B, and 173, or consent of instructor. Synthesis of inorganic compounds, including air-sensitive materials; dry-box, vacuum line, and high-pressure techniques; Schlenk methods; chromatographic and ion exchange separations. Mr. Hawthorne, Mr. Kaesz (W)

C175. Inorganic Reaction Mechanisms. Lecture/discussion. Prerequisites: courses 110A, 110B, 113A, 173, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C275. Mr. Hawthorne, Ms. Valentine (F)

C176. Group Theory and Applications to Inorganic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173, or equivalent. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C276A. Mr. Stroose, Mr. Zirk (F)

184. Chemical Instrumentation. Lecture/quiz, two hours; laboratory, eight hours. Prerequisite: course 110A. Theory and practice of instrumental techniques of analytical chemistry; instrumental analysis including atomic absorption spectroscopy, gas chromatography, mass spectrometry, nuclear magnetic resonance, polarography, X-ray fluorescence, and other modern methods. Mr. Stroose, Mr. Wasson, Mr. Williams (F,Sp)

190. Undergraduate Thesis Research. Prerequisites: two quarters of course 199 on related material, consent of undergraduate adviser and research director. Final quarter of an integrated one-year research project. May consist of experimental or theoretical research or, in some cases, a comprehensive review of a given area. A thesis embodying the totality of the year's work is to be submitted and an oral presentation made. Course suggested, but not required, for those seeking departmental honors at graduation. Mr. Hawthorne, Mr. Foote (F,Sp)

196A-196F. Special Courses in Chemistry (1 to 4 units each). Formerly numbered 196. Hours to be arranged. Prerequisite: consent of undergraduate adviser (F,Sp)

199A-199ZZ. Directed Individual Study or Research for Undergraduate Students (2 to 8 units each). To be arranged with faculty member who will direct the research. Prerequisites: advanced junior standing with a 3.0 GPA or senior standing in the major, consent of department chair. A proposal must be received one week prior to the first day of the quarter. Additional details on requirements and application may be obtained from the undergraduate counselor. P/NP grading. (F,Sp)

Graduate Courses

207. Organometallic Chemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Survey of synthesis, structure, and reactivity (emphasis on mechanistic approach) of compounds containing carbon bonded to elements selected from the main group metals, the metalloids, and the transition metals, including olefin complexes and metal carbonyls; applications in catalysis and organic synthesis. Mr. Hawthorne (Sp)
C210C. Physical Chemistry: Charges, Fields, and Matter. Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Topics include electrostatic and magnetic fields in matter—susceptibilities, molecular polarization and refractive index, multipole expansions, van der Waals forces; classical EM waves—propagation, refraction, scattering, absorption, optical rotation, and rotational dispersion; magnetic effects; radiation—multipole expansion, blackbody Einstein coefficients, lasers; scattering and diffraction—Rayleigh, Mie, Raman, X-ray, electron, neutron, nuclear—by particles, molecules, lattices; resonance phenomena—light, EPR, NMR, NQR, Mössbauer; electron capture—ion activity, conductivity, rate effects. May be concurrently scheduled with course C115C. S/U or letter grading.

Mr. McMillan (Sp)

C212B. Physical Chemistry: Molecular Spectroscopy. Lecture, quiz, five hours. Prerequisite: course 113A or equivalent. Spectroscopic applications of basic quantum chemistry, including light-matter interaction, origin of selection rules, rotation-vibration spectra, anharmonic effects, electronic spectra, Franck-Condon principle, and topics from Raman, microwave, ESR, NMR, laser spectroscopy, and radiation-less transitions. May be concurrently scheduled with course 113B. Independent study project required of graduate students. Mr. Bayes, Mr. Williams (W)

C215A-C215B. Quantum Chemistry: Methods. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C215A or Physics 115B is prerequisite to C215B. Students entering course C215A are normally expected to take course C215B the following quarter. Designed for chemistry students with a serious interest in quantum chemistry. Postulates and systematic development of relativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms, spectroscopy, magnetic resonance; chemical bonding. May be concurrently scheduled with courses C115A-C115B.

Mr. Farrell, Mr. Gelbart (W, C215A; Sp, C215B)

215C. Advanced Quantum Chemistry: Applications. Lecture, three hours; discussion, one hour. Prerequisites: course C215B, Physics 131, or equivalent. Topics in quantum chemistry selected from molecular structure, collision processes, theory of solids, symmetry and its applications, and theory of electromagnetic radiation. S/U or letter grading.

Mr. Bernstein (F)

215D. Molecular Spectra, Diffraction, and Structure. Lecture, three hours; discussion, one hour. Prerequisites: course C215B, Physics 131, or equivalent. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance spectra; X-ray, neutron, and electron diffraction; coherence effects. S/U or letter grading.

Mr. El-Sayed (W)

218. Physical Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

221A. Independent Study in Physical Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose research interests embrace that specialty. S/U or letter grading.

221A-221Z. Advanced Topics in Physical Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose research interests embrace that specialty. S/U or letter grading.

Mr. Reiss, Mr. Scott (F, C222A; W, C223B)

222C. Statistical Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses C215B, C222B, Physics 131, or equivalent. Fundamentals of statistical mechanics; classical equations of state; Coulomb systems; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. S/U or letter grading.

Mr. Bernstein (Sp)

226. Chemical Physics Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

Mr. Eiserling, Mr. Lake (W)

230A. Molecular Biological Seminar (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor based on a written research proposal. Fundamentals of electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microcopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.

Mr. Kasamatsu, Mr. Lake (F, alternate years)

230B. Structural Molecular Biology. (Same as Biology M230A and Microbiology M230A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor based on a written research proposal. Fundamental principles of electron microscopy, principles of cell biology, and molecular models for biological processes; synthetic models for biological processes; synthetic models for biological processes; synthetic models for biological processes. May be concurrently scheduled with course C143A. S/U or letter grading.

Mr. Eisenberg, Mr. Rees

230C. Structural Molecular Biology Laboratory. (Same as Biology M230C and Microbiology M230C.) Laboratory, 10 hours. Prerequisite: consent of instructor based on a written research proposal. Practical experience with electron microscopy of macromolecules and supramolecular structures, emphasizing quantitative microcopy, high resolution techniques, nucleic acid analysis, and studies on viruses and protein crystals.

Mr. Eisenberg, Ms. Jenkins, Mr. Lake (F, alternate years)

232. Stereochemistry and Conformational Analysis. Lecture/discussion, three hours. Prerequisite or corequisite: course C143A or consent of instructor. Molecular symmetry, chirality, prochirality, stereochemistry in vinyl polymers, atropoisomerism, diastereomeric interactions in solution, conformations of acyclic and cyclic molecules.

Mr. Jung

236. Spectroscopic Methods of Organic Chemistry. Lecture, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Problem solving using proton and carbon 13 nuclear magnetic resonance, infrared spectroscopy, and mass spectrometry; nmr, ir, and mrs emphasis on Fourier transform NMR. Mr. Hersh

241A-241Z. Special Topics in Organic Chemistry (2 to 4 units each). Prerequisite or corequisite: course C243A or equivalent or consent of instructor. Each course encompasses a recognized specialty in organic chemistry, generally taught by a staff member whose research interests embrace that specialty.

242. Organic Photochemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Interactions of light with organic molecules; mechanistic and preparative photochemistry.

C243A. Organic Chemistry: Structure and Mechanics. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. May be concurrently, or equivalent, with grades of C – or better, or consent of instructor. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry, pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading.

Mr. Chapman (F)

243B. Organic Chemistry: Mechanism and Structure. Lecture, three hours; discussion, one hour. Prerequisite: course C243A or consent of instructor. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C143B. S/U or letter grading.

Mr. Chapman (W)

244A. Practical and Theoretical Introductory Organic Synthesis (2 units). Open only with consent of graduate adviser to graduate students who have not taken course 144 at UCLA and who do not wish to take the laboratory portion of course 144. Modern synthetic reactions and processes, with emphasis on stereospecific methods for carbon-carbon bond formation.

Mr. Jung

244B. Strategy and Design in Organic Synthesis. (Formerly numbered 244.) Lecture, three hours. Prerequisite or corequisite: course C243A or consent of instructor. The theory behind the planning of syntheses as applied to complex molecules. Organic reactions and their use in the synthetic process. The reasoning and art involved in organic synthesis.

Mr. Jung

245. Applications of Electronic Theory in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite or corequisite: course C243A or consent of instructor. A review of molecular orbital theory; introduction to alternative theoretical methods; molecular orbital methods; Huckel and Möbius conjugation; Woodward-Hoffmann theory of concerted pericyclic reactions; through-bond and through-space interactions; an introduction to photoelectron spectroscopy; frontier molecular orbital theory; related special topics.

246. Bioorganic Chemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Organic chemical models for biological processes; stereochemical models for discussions in enzymic, catalysis, and inhibition; models for transport; solid support chemistry; mechanisms for differential complexation.

247. Organic Colloqium (2 units). Seminars in organic chemistry presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.
248. Organic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

250. Topics in the Biochemistry and Molecular Biology of Animal Cells. Lecture, three hours. Prerequisites: courses 133A, 133B, 133C, or equivalent, 157A, 157B, courses in genetics and molecular biology, consent of instructor. Structure and organization of animal cells, cell-cell contact, motility of cell and mobility of cellular components, chromosome structure, interactions between cytoplasm and nucleus, genetic analysis in higher eukaryotic cells, biochemistry of tissue development and organization. Mr. Jordan and Invited Speakers

251A-251Z. Advanced Topics in Biochemistry (2 units each). Prerequisite: consent of instructor. Each course encompasses a special topic in biochemistry, generally taught by a staff member whose research interests embrace that specialty.

252. Macromolecular Structure (6 units). (Same as Biological Chemistry 253.) Lecture or recitation, five hours. Prerequisites: courses 110A, 156, 157A, and 157B, or Biological Chemistry 202 or 203, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure cloning and analysis of DNA; biosynthesis and processing of RNA; bio-synthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. (F)

254. Advanced Biochemical Methods. Lecture/quiz, two hours; laboratory, eight hours. Prerequisite: course 156 or consent of instructor. Recommended corequisites: courses 157A, 157B. Theoretical and practical basis of metabolic, chromatographic, kinetic, electrophoretic, ultracentrifugal, isotopic, and other techniques as applied to biochemical systems. Mr. Eisenberg, Mr. Shumaker (W)

255. Biological Catalysis (2 units). (Same as Biological Chemistry 255.) Prerequisites: course 110A, one course from 157A, 157B, or Biological Chemistry 201 or 202, or equivalent, or consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for the study of enzymes, including kinetics, isotopic labeling, stereoch- emistry, chemical modification, and spectroscopy; the design of pharmacologically active agents and artificial enzymes. Mr. Sigman (Sp)

257. Physical Chemistry of Biological Macromolecules (2 units). (Same as Biological Chemistry 257.) Prerequisite: course 25 or 110A or consent of instructor. Theory of hydrodynamic, thermodynamic, and optical techniques used to study the structure and function of biological macromolecules. Mr. Schumaker (W)

258. Biochemistry Student Seminar (2 units). Seminars presented by graduate students on topics of current biochemical interest. May be repeated for credit. S/U grading.

259. Mechanisms in Regulation of Transcription. Lecture, three hours. Prerequisite: course M253 or M267 or consent of instructor. Prokaryotic operons: initiation and termination; DNA regulatory sequences and regulatory proteins; RNA polymerases; regulation of eukaryotic transcription; hormonal, differentiation, the cell cycle; role of chroma- in structure in mediating regulation. Mr. Gralla, Mr. Martinson (Sp)

261. Advanced Chemistry, Biochemistry, and Nutrition of Lipids. (Same as Biological Chemistry M261 and Public Health M260G.) Lecture, three hours; discussion, one hour. Prerequisites: courses 157A and 157B or Biological Chemistry 202 and 203, or equivalent, consent of instructor. Comprehensive treatment of lipid nutrition and metabolic-nutrient in- teractions. (W)

262. Biological Energy Transductions. Lecture, three hours. Prerequisite: course 157B or equivalent. Molecular basis of energy-transducing processes, including oxidative and photosynthetic phosphorylation, other energy-linked oxidative functions, membrane active transport, muscle contraction, and special sensory functions. Mr. Boyer (W)

263. Metabolism and Its Regulation. (Formerly numbered M255.) (Same as Biological Chemistry M263.) Lecture, three hours. Prerequisites: course 110A, one course from 156, 157A, 157B or Biological Chemistry 202 or 203, or equivalent, or consent of instructor. Thermodynamic and kinetic aspects of metab- olism; regulatory properties of enzymes; metabol- ic regulation; consideration of comparative aspects of metabolism in relation to physiological function. Mr. Atkinson, Mr. Weiss (Sp)

264A-M264B-M264C. Molecular Basis of Ant- hicancer Activity of Natural Products. (Same as Biological Chemistry M264A-M264B-M264C.) Prerequisites: course M261 or equivalent, consent of instructor. The biochemistry, morphology, and physiology of atherosclerosis. Emphasis on the chemistry of lipoproteins and the role of plasma lipoproteins in the regulation of tissue lipid metabo- lism and the development of atherosclerosis. Each course may be taken independently for credit. (F, M264A; W, M264B; Sp, M264C)

266. Seminar in Techniques for the Study of Gene Regulation (2 units). Prerequisite: course 259 or consent of instructor. A seminar to discuss specific experimental approaches being taken in the study of gene regulation. Emphasis on the specific biochemical techniques being used to study regulatory protein-DNA interactions in diverse biological model systems.

267. Macromolecular Metabolism and Subcellu- lar Organization (6 units). (Same as Biological Chemistry M267.) Lecture or recitation, five hours. Prerequisites: courses 157A and 157B or Biological Chemistry 202 and 203, or equivalent, consent of instructor. Recommended: course M263. Cell cycle DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Mr. Herschman, Mr. Martinson (W)

268. Biochemistry Research Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeat- ed for credit. S/U grading.

271A-271Z. Advanced Topics in Inorganic Chem- istry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in inorganic chemistry, generally taught by a staff member whose research interests embrace that specialty.

275. Inorganic Chemistry: Reaction Mecha- nisms, Lecture/discussion. Prerequisites: courses 110A, 110B, 113A, 173, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution; oxidation/reduction; redox reactions; stereochemistry; oxidation/reduction, free/ radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C175. Mr. Hawthorne, Ms. Valentine (F)

C276A. Inorganic Chemistry: Group Theory and Spectroscopy. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173, or equivalent. Group theoretical methods; molecular orbital theory; liquid-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C176. S/U or letter grading.

Mr. Strouse, Mr. Zink (F)

276B. Physical Methods for the Characterization of Inorganic Compounds. Lecture, three hours. Prerequisite: course C276A or consent of instructor. Applications of spectroscopic techniques, including 1R, Raman, visible, UV, NMR, ESR, and NQR, to the elucidation of structure and bonding in inorganic and organometallic compounds.

Mr. Strouse, Mr. Zink (W)

277. Crystal Structure Analysis. Lecture, three hours. Theory and practice of modern crystallography, with emphasis on practical experience in struc- ture determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refine- ment, error analysis, and common pitfalls. S/U or letter grading.

Mr. Dickerson, Mr. Eisenberg, Mr. Horsley, Ms. Valentine (W)

278. Inorganic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

279. Bioinorganic Chemistry. Lecture, three hours. Prerequisites: courses 110A and either 156 or 173. The role of metal ions in biology; introduction to ma- tollaltolenzymes and metalloproteins; metal ion interac- tions with nucleic acids; metal ion metabolism.

Mr. Valentin (W)

280. Solid-State Chemistry. Lecture, three hours. Prerequisite: course 173 or equivalent. A survey of important materials, their synthesis, and character- ization as single crystals, powders, or polymers. Chemical, optical, and magnetic properties and their relationship to band theory.

Mr. Kaner

M296. Seminar on Current Topics in Molecular Bi- ology (2 units). (Same as Biological Chemistry M298, Biology M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and gradu- ate advisor of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participa- tes in discussions on assigned topics. May be taken independently for credit.

Mr. M296, Mr. Wisse (W, Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticehip under the active guidance and super- vision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

396. Directed Individual Study or Research (2 to 16 units). May be repeated with faculty member who will direct the study or research. May be repeated for credit. S/U grading.

397. Preparation for M.S. Comprehensive Exami- nation or Ph.D. Qualifying Examinations (2 to 4 units). Prerequisite: consent of graduate adviser (Chemistry). S/U grading.

398. Research and Preparation of M.S. Thesis (2 to 16 units). Each faculty member supervises re- search of M.S. students and holds research group meetings, seminars, and discussions with the stu- dents.

399. Research and Preparation of Ph.D. Dis- sertation (2 to 16 units). Each faculty member su- pervises research of Ph.D. students and holds re- search group meetings, seminars, and discussions with the students.
Chemistry/Materials Science (Interdepartmental)

6532 Boelter Hall, (213) 825-5534

Professors
Bruce S. Dunn, Ph.D. (Materials Science and Engineering)
M. Frederick Hawthorne, Ph.D. (Chemistry)
John D. Mackenzie, Ph.D. (Materials Science and Engineering)
Malcolm F. Nicoll, Ph.D. (Chemistry)
R. Stanley Williams, Ph.D. (Chemistry)

Assistant Professors
Nancy M. Haegele, Ph.D. (Materials Science and Engineering)
Richard B. Kaner, Ph.D. (Chemistry)
Alexander Reckenfaden, Ph.D. (Materials Science and Engineering)
Jenn-Ming Yang, Ph.D. (Materials Science and Engineering)

Chicano Studies (Interdepartmental)

3121 Campbell Hall, (213) 825-2363

Professors
Juan Gómez-Quinones, Ph.D. (History)
David Hayes-Bautista, Ph.D. (Medicine)

Associate Professors
Leobardo Estrada, Ph.D. (Urban Planning)
Guillermo Hernández, Ph.D. (Spanish)
Raymond A. Rocco, Ph.D. (Political Science)

Lecturers
Richard Chabran, M.L.S. (Library and Information Science)
Judith Villanreal, M.F.A. (Theater, Film, and Television)

Scope and Objectives

Today there is a demand for individuals with extensive knowledge of the Chicano community. Opportunities are developing in both the public and private sector that call for men and women academically prepared and aware of the history, culture, and current problems facing Mexican communities. The Chicano studies major provides students with the language and cross-cultural studies background that will enhance their qualifications for positions in schools, governmental organizations, and private enterprise.

The program, coordinated by an interdisciplinary committee, is multidisciplinary and leads to the Bachelor of Arts degree.

Bachelor of Science Degree

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, Physics 6A, 6B, 8C/8CL, 8D/8DL, Program in Computing 10A, Materials Science and Engineering 14, Chemistry 11A or 11AH, 11B or 11BH, 11C or 11CH, 11BL or 11CL, 21 (may be replaced by 133A if offered as part of the major), English 3.

The Major

Required: Chemistry 110A, 110B, 113A, C113B or C115A-C115B, 114, 173, one or two courses from C123A, C123B, 133A, 133B, 133C, 174, 175, 176; Materials Science and Engineering 144A, 146A, 147A, three to four courses from 140D, 141, 142A, 143A, 145A, 145B, 146F, 147B, 147F, two courses from 142L, 144L, 146L.

For further information, contact Barbara E. Brooks, Materials Science and Engineering, 6532 Boelter Hall.

Bachelor of Arts Degree

The B.A. program in Chicano Studies is designed to provide systematic instruction for liberal arts and preprofessional majors who wish concentrated study of the Chicano experience. Viewed as developmental, the program seeks to prepare Chicano students for critical investigation, including the social, economic, educational, historical, political, and psychological analysis of the Chicano. The major is recommended for students preparing for graduate study as well as for public service careers.

Preparation for the Major

Required: One course from each of the following departments: Anthropology 5, 6, or 22; Economics 1 or 2; History 6A, 6B, or 6C; Political Science 1; Sociology 1; Spanish 5 or equivalent. You must complete prerequisites for all courses selected.

The Major

This consists of three elements, one of which is optional (you must complete prerequisites for all courses in the major):

(1) Major Core (nine courses): Chicano Studies M102, M105, M145, M147, M159A, M159B, M172T; History 197; Sociology 156* or 160*.

(2) Major Concentration: Four courses in one discipline, selected from Anthropology 115P, 135A, 135B, 135G, 136P, 138, M140, 150, 166, 167, 165; Economics 110, 120, 121, 150, 151, 152, 172; English M104A, M104B, 106, 171, 172, 173, 174, 188, 189, 190; History 147B, 153, 154B, 160, 162, 163; Library and Information Science 111C, Political Science 115, 142, 149, 172B, 173, 174, 180, 182A through 182D; Psychology 127, 130, 134, 135, 136A, 137A, 137C, 143, 175; Sociology 102, 104, 156* or 160*, 157, 158, M175, 182, 184; Spanish 100A, 100B, 105A, 105B, 107, 115, M118A, M118B, 136A, 136B, 137, 139, 142, 143, 144, M149. You may petition the committee in charge of the major to include one course not on the approved list. CED courses may be applied by petition.

(3) Optional Multidisciplinary Senior Thesis — Prerequisite: senior standing. Chicano studies majors have the option during their senior year to enroll in two 199 courses in their major concentration area, with the intention of producing a Chicano studies undergraduate thesis related to the major concentration. Enrollment in the two 199 courses is with the advice and consent of a faculty member. The first quarter includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second quarter entails completion of the data collection, analysis of the data, and termination of the thesis.

Course Limitations: No more than two 199 courses may be applied toward the major concentration; 199 courses applied toward the multidisciplinary senior thesis option may not also be applied toward the major concentration area. Registration in 199 courses must be approved in writing by the department chair and either the chair or adviser for the Chicano studies major. No more than two CED courses may be applied toward the major concentration.

Upper Division Courses

M102. The Mexican American and the Schools. (Same as Education M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on the development of Mexican American and Chicano youth and communities.

M103C. Origins and Evolution of Chicano Theater. (Same as Theater M103C.) Lecture, three hours. Prerequisite: upper division standing. An exploration of the development of Chicano theater from its beginning in the legends and rituals of ancient Mexico to the work of Luis Valdez (late 1960s).
M103D. Contemporary Chicano Theater. (Same as Theater M103D.) Lecture, three hours. Prerequisite: upper division standing. A study of recent trends in Chicano theater with a focus on contemporary Chicano dramatists and theater artists. Ms. Villarreal

M105. The Chicano Experience in Literature. (Same as English M105.) Prerequisite: satisfaction of Subject A requirement. The study of literature in English by and about Chicanos. Survey of the depiction of the Chicano experience in American literature generally, with emphasis on the development of Chicano literature itself, its cultural backgrounds, and distinctive uses of language. Mr. Paredes

M145. Introduction to Chicano Literature. (Same as Spanish M145.) Lecture, three hours. Prerequisite: Spanish 25 or 26. Recommended: Spanish 135B. Introduction to texts representative of the Chicano literary heritage. A sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to the characteristics and development of the Chicano literary corpus. Mr. Hernandez

M147. Minority Group Politics. (Same as Political Science M147A.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Introduction to the political economy of racial domination in the U.S., concentrating on the study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, the class and racial stratification systems, and the cultural codes and modes of ideological discourse in each historical period. Mr. Rocco

M150A. History of the Chicano Peoples. (Same as History M150A.) Lecture, three hours. A survey lecture course on the historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides an integrated understanding of change over time in the Mexican community by inquiry into the major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, economic, and labor conflict, ideas, domination and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper. Mr. Gomez-Quiñones

M150B. History of the Chicano Peoples. (Same as History M150B.) Lecture, three hours. A survey lecture course on the historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides an integrated understanding of change over time in the Mexican community by inquiry into the major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper. Mr. Gomez-Quiñones

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest. (Same as Anthropology M172T.) Lecture, three hours. Prerequisite: Anthropology 5 or 22 or consent of instructor. An ethnography of the social and cultural adaptations of the Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading.

7349 Bunche Hall, (213) 825-4171

Professors: Andrew R. Dyck, Ph.D.; Michael W. Haslam, Ph.D.; Richard Janko, Ph.D.; Philip Levine, Ph.D.; Bengt T.M. Löfstedt, Ph.D.; Joan P. Pusteh, Ph.D.; Milton V. Anastas, Ph.D., Emeritus; Alber H. Travis, Ph.D., Emeritus

Associate Professors: Ann L.T. Bergren, Ph.D.; David L. Blank, Ph.D.; Bernard D. Fincher, Ph.D.; Sander M. Goldberg, Ph.D.; Katherine C. King, Ph.D.; Steven Lattimore, Ph.D.

Lecturers: Barbara E. Kilian, M.A., Emeritus; Evelyn Venable Mohr, M.A., Emeritus

Scope and Objectives

The major objective of the Classics Department is to provide a thorough knowledge of the Greek and Roman languages and culture. To this end, it offers elementary and advanced courses in the languages, the reading and analysis of Greek and Roman authors, the history of Greek and Roman literature, classical art, archaeology, mythology, philosophy, and religion. The department is also strong in three fields which are not commonly taught in classics departments, namely classical linguistics, medieval Latin, and Byzantine studies.

Bachelor of Arts degrees are offered in Classical Civilization, in Greek, in Latin, and in the Classics (i.e., Greek and Latin). Other undergraduate degrees include the B.A. in English/Greek and in English/Latin, offered jointly with the English Department. Students considering a major in the department should consult the advisor as soon as possible in their University career, but in no case later than the point at which they are about to take upper division courses. Graduate degrees include the Master of Arts in Classics (Greek and Latin), Greek, and Latin, and the Ph.D. in Classics.

Bachelor of Arts in Classical Civilization

The purpose of the classical civilization major is to provide a balanced, yet focused, view of the ancient civilizations of Greece and Rome, both historically unique and universally typical human creations. The approach to the subject is accordingly both causal and comparative. The areas of study include the elements of culture — religion, mythology, philosophy, art, literature, language, the socioeconomic system, and politics. The requirements of the major encourage both breadth and depth: eight of the 14 required upper division courses (four from this department and four from other departments) must be taken in one of the four areas of concentration listed below, the remaining six upper division courses taken in this department may be selected to reflect your varied interests in the areas outside your concentration. The culmination of the program is a senior paper, written during your senior year under professorial supervision. While this major is not designed to qualify you for graduate study in classics, it does not preclude a transition to advanced study in classics or related fields.

Preparation for the Major

Required: Classics 10 and 20 and either 40 or 41.

The Major

Required: (1) Classics 195A-195B-195C and nine upper division courses in this department, of which no more than three may be selected from either Greek 101A through 130 or Latin 101 through 133 and of which four must be selected from the courses listed below under any one of the four areas of concentration; (2) any four related courses in other departments listed below in your chosen area of concentration. Total courses required: 14.

Areas of Concentration

Bachelor of Arts in Classics

Preparation for the Major

Required: (1) Nine upper division courses in Greek or Roman history (History 115B-115C, 116A-116B, 117A-117B); (2) two courses in Greek or Roman religion (Classics 166A, 166B); (3) two additional courses in one of the related areas: classical archaeology (Classics 151A, 151B, 151C, 151D), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145A, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170A, M170B), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in Classics (Greek and Latin)

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Twelve upper division courses, six in Greek and six in Latin, including Greek 110 and Latin 110A-110B; (2) one course from Classics 140, 141, 142, 143; (3) one course in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B); (4) one additional course in two of the related areas: classical archaeology (Classics 151A, 151B, 151C, 151D), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145A, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170A, M170B), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Note: Students in the classics, Greek, and Latin majors are permitted to take Greek 200A-200B-200C and Latin 200A-200B-200C. Two of these courses may replace one course in requirement 3 of the Greek and Latin majors and requirement 2 of the classics major, as well as two courses in requirement 1 of all three majors, thereby reducing the total number of required courses by one.

Bachelor of Arts in English/Greek

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Greek 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Greek, including courses 100 and either 101A or 101B, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

Bachelor of Arts in English/Latin

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Latin 1, 2, 3.
Course Requirements
For the Classics M.A., nine courses are required. These must include Greek 210 and Latin 210, one course each from the Greek 200A-200B-200C and Latin 200A-200B-200C series, and one course in the 201 through 229 series in each language. The three remaining courses are to be selected in consultation with the graduate adviser from the upper division and graduate courses offered by the department (or exceptionally by other UC departments or programs).

Nine courses are required for the Greek and Latin M.A. degrees. The University requires that at least five be graduate courses. For the Greek M.A., these must include Greek 210, two courses from the Greek 200A-200B-200C series, one course from the Greek 201 through 229 series, three additional upper division or graduate Greek courses, and two additional upper division or graduate courses to be selected in consultation with the graduate adviser. The Latin M.A. course requirements are identical except for the substitution of Latin for Greek courses.

No more than one 596 course may be applied toward the M.A. course requirements.

Comprehensive Examination Plan
The department follows the comprehensive examination plan for the M.A. degrees. Before the examination, you are expected to complete the departmental reading lists in Greek (for the Greek M.A.) or Latin authors (for the Latin M.A.) or in Greek and Latin authors (for the Classics M.A.). The examinations consist of three two-hour written tests on sight translations from Greek and prepared texts from the Greek reading list (for the Classics and Greek M.A.), eight translations from Latin and prepared passages from the Latin reading list (for the Classics and Latin M.A.), and the history of Greek and Latin literature (Greek or Latin for the Greek or Latin M.A.). The three examinations may be taken on three separate days, which need not be during the same quarter. The M.A. examinations are normally given at the beginning of each quarter. All examinations may be repeated once; in exceptional cases and with consent of the departmental faculty, more than once.

Ph.D. Degree
Admission
In addition to an M.A. degree (see below), the department requires a statement of purpose. Students without a UCLA M.A. must also submit three letters of recommendation, normally from previous instructors in the classics, and the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the department). The department uses the same application form as the Graduate Admissions Office, which may be obtained from the department or Graduate Admissions.

A UCLA M.A. degree in Classics (Greek and Latin), Greek, or Latin, with distinction, or an equivalent degree is required. In cases of doubt, equivalency to the UCLA M.A. degree, the department may allow provisional admission.

Major Fields or Subdisciplines
The department offers the Ph.D. degree in Classics with the following areas of specialization: classical literature and philology, classical linguistics, ancient history, ancient philosophy, classical archaeology, patristic and Byzantine studies, medieval Latin studies.

Foreign Language Requirement
New students in the doctoral program will normally have demonstrated proficiency in French, German, or Italian as described in the requirements for the M.A. degree. During the first year of study in the Ph.D. program, you must demonstrate proficiency in either French (Italian may be substituted with consent of the regular departmental faculty) or German, whichever was not used to satisfy the M.A. requirement. If Italian or French was used to satisfy the M.A. requirement, German must be taken.

Course Requirements
At least one full year of graduate study (normally eight to nine courses) is required as preparation for the qualifying examinations. You may choose any of the areas of specialization listed above and, if entering with a UCLA M.A. in Classics or the equivalent, may take courses entirely within the area of specialization; if you specialize in classical literature and philology, you may concentrate on Greek or Latin as research interests dictate. If you enter with a UCLA Greek M.A. or the equivalent, you must take, in addition, Latin 210, one course from the Latin 200A-200B-200C series, and one course from the Latin 201 through 229 series if you have not previously taken these courses. If you enter with a UCLA Latin M.A. or the equivalent, you must satisfy identical course requirements in Greek.

Qualifying Examinations
Before the qualifying examinations, you must complete the departmental Ph.D. reading list in either Greek or Latin authors, which is in addition to the M.A. reading lists and varies somewhat according to the area of specialization. In addition, students entering with the Greek M.A. must complete the Latin M.A. reading list; students entering with the Latin M.A. must complete the Greek M.A. reading list. Students are advanced to candidacy as a result of passing the qualifying examinations (which consist of written examinations covering translation, the reading lists, and your area of specialization) and the University Oral Qualifying Examination covering both the area of specialization and the general field of classical studies. Each examination may normally be repeated once.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
An oral defense of the dissertation, which is written under the supervision of the individual adviser and must contribute significantly to research on the subject, may be required or waived at the discretion of the doctoral committee.

Classics
Lower Division Courses
10. Survey of Classical Greek Culture. Knowledge of Greek not required. Lectures, many illustrated, on Greek life and culture from the age of Homer to the Roman Conquest. Discussion of art, literature, philosophy, and mythology.
   Mr. Blank, Mr. Lattimore (F,W)
   Mr. Blank, Mr. Frischer, Mr. Goldberg (W,Sp)
40. Survey of Greek Literature in Translation. (Formerly numbered 141.) Lecture, three hours; discussion, one hour. Readings in English of Greek literature from the beginning to Roman times to demonstrate the sweep of the Greek literary achievement and the foundations it laid for subsequent literary developments. P/NP or letter grading.
   Mr. Goldberg, Mr. Haslam
41. Survey of Latin Literature in Translation. (Formerly numbered 143.) Lecture, three hours; discussion, one hour. Readings in English to emphasize the unique achievements of Latin literature, particularly in such areas as drama, epic, satire, oratory, and history. P/NP or letter grading.
   Mr. Dyck, Mr. Goldberg
50F. Power and Imagination in Ancient Rome. Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. A freshman seminar designed to survey the major aspects of Roman civilization, including art, religion, literature, and politics. P/NP or letter grading.
   Mr. Frischer (F,W,Sp)
51. Art and Archaeology of the Classical World. Lecture, three hours; discussion, one hour. Survey of major period, theme, or medium of Greek and Roman art and archaeology at discretion of instructor. P/NP or letter grading.
   Mr. Frischer, Mr. Lattimore
M70. Survey of Medieval Greek Culture. (Same as History M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including the discovery of America).
   Mr. Dyck
88A. Socrates. (Formerly numbered 45F.) Discussion, three hours. Examination of the evidence for Socrates' life and thought, through texts from Plato, Xenophon, and Aristophanes, in an attempt to see how Socrates worked and affected those around him. Mr. Blank (Sp)

88B. Power and Imagination in Byzantium. (Formerly numbered 71F.) Discussion, three hours. Prerequisite: freshman standing. A study of the relations of authorship and the high centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform. Mr. Dyck (F,W,Sp)

88C. Lower Division Seminar on Comparative Mythologies. For students numbered one to four in the sequence: three hours. Ways of studying myth through history, especially in ancient Near Eastern and Indo-European cultures. Comparison of myths on both diffusionary and genetic models. Reconstruction of the high gods common to prehistoric Western Asia and Europe. Mr. Puhvel (F,W,Sp)

88D. Lower Division Seminar: The Greek Symposium. Seminar, three hours. A freshman seminar on the topic of the symposium, an institution that permits students to understand many major features of Greek culture and society. Ms. Bergren

Upper Division Courses

140. Topics in the History of Greek Literature. Lecture, three hours. Prerequisites: courses 10, 40. The investigation of a specific issue in the understanding of Greek literature, such as the definition of a genre or the evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading. Mr. Haslam, Mr. Janko

141. Topics in the History of Latin Literature. Lecture, three hours. Prerequisites: courses 20, 40. The investigation of a specific issue in the understanding of Latin literature, such as the definition of a genre or the evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading. Mr. Frischer, Mr. Goldberg

142. Ancient Epic. (Formerly numbered 144.) Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Homer's Iliad and Odyssey, Vergil's Aeneid, and Ovid's Metamorphoses, studied in translation. Mr. Bergren, Ms. King

143. Ancient Drama. (Formerly numbered 142.) Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. A study of Greek and/or Latin drama in translation. P/NP or letter grading. Mr. Goldberg, Mr. Haslam

144. Generic and Topical Studies in Ancient Literature. Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Investigation of a problem in ancient literature that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading. Mr. Frischer, Mr. Goldberg

145A. Ancient Greek and Roman Philosophy. (Formerly numbered 145.) Lecture, two hours; discussion, one hour. A study of some of the major Greek and Roman philosophical texts, including those of the Pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on the historical and cultural setting of the texts, their literary form, interrelations, and contribution to the discussion of basic philosophical issues. Mr. Blank

145B. Later Ancient Greek Philosophy. Lecture, two hours; discussion, one hour. Prerequisites: one course from 145A, Philosophy 1, 100A, 101B, or 102, or consent of instructor. A study of some of the major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stolcis, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading. Mr. Blank

150A. Origins of the Western View of Women: The Female in Greek Thought. Lecture, three hours. Prerequisites: course 10 or equivalent, consent of instructor. An interdisciplinary study of the concept of the female in the various forms of thought developed by the Greeks (e.g., epic, tragedy, comedy, history, political philosophy, gnecology). Special emphasis on how these texts lay the foundation for the Western view of women. Ms. Bergren

150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought. Lecture, three hours. Prerequisites: course 20 or equivalent, consent of instructor. An interdisciplinary study of the concept of the female in Roman and early Christian thought. Special emphasis on the status of the female with regard to sexuality, procreation, and the sacred. Ms. Bergren

151A. Classical Archaeology: The Aegean Bronze Age. Lecture, three to four hours. Prerequisites: course 10 or History 1A. Knowledge of Greek not required. A survey of the prehistoric art and archaeology of the Greek lands. Mr. Janko

151B. Classical Archaeology: Greco-Roman Architecture. Lecture, three to four hours. Prerequisites: course 10 or History 1A or equivalent. Knowledge of Greek and Latin not required. A general introduction to the study of Aegean, Greek, and Roman architecture. Mr. Lattimore

151C. Classical Archaeology: Greco-Roman Sculpture. Lecture, three to four hours. Prerequisites: course 10 or History 1A or equivalent. Knowledge of Greek and Latin not required. A general introduction to the study of Aegean, Greek, and Roman painting. Mr. Lattimore

152. The Ancient City. Lecture, three to four hours. Prerequisites: courses 10 and 20, or History 1A, or equivalent. A study of urban planning in the ancient world, with particular attention to the cities of classical Greece and Rome, but with consideration also to comparable developments in the ancient Near and Far East. Examination of questions of architectural space and organization, of the form, design, and function of the major municipal areas and buildings, and of the provision of public amenities by detailed reference to significant architectural spaces and contemporary sources. Mr. Frischer, Mr. Lattimore

161. Introduction to Classical Mythology. Lecture, three to four hours. Prerequisite: course 10 or History 1A or equivalent. The origins of classical myth: the substance of divine myth and heroic saga; the place of myth in religion; a survey of the study of classical mythology. Mr. Lattimore, Mr. Puhvel

162. Classical Myth in Literature. The use of myth in the principal authors and genres of Greek and Roman literature, with examples of its influence in later literature.

165. Ancient Athletics. Prerequisites: course 10 or History 1A or equivalent. A study of ancient Greek and Roman athletics and their connections with religious, political, literature, and art. Mr. Lattimore

166A. Greek Religion. A study of the religion of the ancient Greeks. Mr. Blank, Mr. Dyck, Mr. Janko

166B. Roman Religion. A study of the religion of the ancient Romans. Mr. Frischer

168. Introduction to Comparative Mythology. Prerequisites: course 161, or consent of instructor. The religious, mythical, and historical traditions of Greece and Rome compared with each other and with those of other ancient Near Eastern and European societies. Mr. Puhvel

180. Introduction to Classical Linguistics. Prerequisites: Greek 3, Latin 3. Studies of the comparative grammar of Greek and Latin in relation to one another and in the frame of Indo-European linguistics. Mr. Janko, Mr. Puhvel

195A-195B-195C. Senior Paper (4 units, 2 units, 2 units). (Formerly numbered 195.) Limited to seniors in classical civilization. Supervised through individual consultation with an appropriate faculty member; students write a research paper on a topic of their own choosing within their area of concentration in the major. In Progress grading

199. Special Studies in Classics (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

200. History of Classical Scholarship. Mr. Dyck

230A-230B. Language in Ancient Asia Minor. Prerequisite: consent of instructor. Survey of the language situation in Anatolia in the 2nd and 1st Millennium B.C., including Luwian, Hittite, Hieroglyphic, Lycian, and Lydian texts. Anatolian-Greek relationships and survivals in classical and Hellenistic times. Mr. Puhvel

240. Etruscology. Prerequisite: consent of instructor. A survey of scholarly research on Etruscan language and culture, with analysis of epigraphic material. Mr. Puhvel

244. Textual Criticism: Studies in the Preparation of a Critical Edition of Greek and/or Latin Texts. Seminar, three hours. The different steps required in the preparation of a critical edition of an ancient text: localizing the manuscripts; collation; establishing the stemma; selecting the reading on the basis of knowledge of the context, of the language of the author, and of the sources; emendations; formulation of the apparatus criticus and the apparatus fonts. Mr. Haslam, Mr. Levine, Mr. Löfstedt

246. Greek and Latin Meter. Prerequisite: consent of instructor. A comprehensive study of meter as it functions in classical poetry. Mr. Haslam, Mr. Janko

251A. Seminar in Classical Archaeology: The Aegean Bronze Age. Mr. Lattimore

251B. Seminar in Classical Archaeology: Greco-Roman Architecture. Mr. Frischer, Mr. Lattimore

251C. Seminar in Classical Archaeology: Greco-Roman Sculpture. Mr. Lattimore

251D. Seminar in Classical Archaeology: Greco-Roman Painting. Discussion, three hours. Prerequisite: consent of instructor. Studies in the style and iconography of various periods of ancient Greek and Roman painting. May be repeated for credit with consent of instructor.

252. Topography and Monuments of Athens. Detailed studies in the topography and monuments of Athens, combining the evidence of literature, inscriptions, and actual remains. Mr. Lattimore

253. Topography and Monuments of Rome. Detailed studies in the topography and monuments of ancient Rome, combining the evidence of literature, inscriptions, and actual remains. Mr. Frischer, Mr. Lattimore

260. Topics in Ancient Religion. Seminar, three hours. Prerequisite: consent of instructor. Ms. Bergren, Mr. Frischer, Mr. Lattimore

268. Seminar in Comparative Mythology. Prerequisites: course 168, consent of instructor. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies. Mr. Puhvel
287. Graduate Colloquium in Classical Literature. A survey of the basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Greek

Lower Division Courses

1. Elementary Greek. Lecture, five hours. (F)

2. Elementary Greek. Lecture, five hours. Prerequisite: course 1. (W)

3. Elementary Greek. Lecture, five hours. Prerequisite: course 2. (Sp)

40. The Greek Element in English. Knowledge of Greek not required. A study of the derivation and usage of English words of Greek origin: analysis into their component elements directed toward understanding of form and meaning. Mr. Blank

Upper Division Courses

Note: Greek 3 is prerequisite to 100, which is prerequisite to 101A through 106 and 110 through 124.

100. Readings in Greek Prose. Prerequisite: course 3. Reading of Plato’s Apology or a text of comparable difficulty. Ms. Bergren, Mr. Haslam, Mr. Janko

101A. Homer: Odyssey. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King, Mr. Puhvel

101B. Homer: Iliad. Mr. Haslam, Mr. Janko, Ms. King, Mr. Puhvel

102. Lyric Poets. Selections from Archilochus to Bacchylides. Ms. Bergren, Mr. Haslam, Mr. Janko

103. Aeschylus. Ms. Bergren, Mr. Blank, Mr. Haslam, Mr. Janko

104. Sophocles. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King

105. Euripides. Mr. Frischer, Mr. Haslam, Mr. Janko, Ms. King

106. Aristophanes. Ms. Bergren, Mr. Haslam, Mr. Janko

107. Hesiod. Lecture, three hours. Prerequisite: course 100. Reading of Theogony and excerpts from Works and Days, with emphasis on Hesiod’s place in Greek literature and his role in the transmission of Greek mythology. Mr. Goldberg, Mr. Janko

110. The Study of Greek Prose. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose. Mr. Blank, Mr. Haslam, Mr. Janko

111. Herodotus. Mr. Blank, Mr. Janko, Mr. Lattimore

112. Thucydides. Mr. Haslam, Mr. Janko, Ms. King, Mr. Lattimore

113. Attic Orators. Mr. Dyck, Mr. Haslam, Mr. Lattimore

121. Plato. Mr. Blank, Mr. Frischer, Ms. King

122. Plato: Republic. Ms. Bergren, Mr. Blank, Mr. Haslam

123. Aristotle: Poetics and Rhetoric. Mr. Blank, Mr. Haslam, Mr. Janko

124. Aristotelian Ethics. Mr. Blank, Mr. Dyck, Mr. Frischer

130. Readings in the New Testament. Prerequisite: course 3. Mr. Dyck, Mr. Haslam

131. Readings in Later Greek. Prerequisite: course 100. Topics vary from year to year and include "Longinus," "On the Sublime" Marcus Aurelius; Arian; the Second Sophistic; Plutarch; late epic; epigrammatist Graecia. Mr. Blank, Mr. Dyck, Mr. Haslam

132. Survey of Byzantine Literature. Prerequisite: course 100. Readings based on (1) Anthology of Byzantine Prose, ed. Nigel Wilson and (2) Oxford Book of Medieval and Modern Greek Verse, ed. C.A. Trypanis, or if unavailable, Poeti bizantini, ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures. Mr. Dyck

133. Readings in Byzantine Literature. Prerequisite: course 132. Topics vary from year to year and include Pseudo-Agathias, Michael Psellus, the Alexiad of Anna Comnena, and Digenis Akritas. Mr. Dyck

199. Special Studies in Greek (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 201A-201B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar.

200A-200B. History of Greek Literature. Prerequisite: consent of instructor. Lectures on the history of Greek literature, supplemented on the part of the student by independent reading of Greek texts in the original. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King

201A-201B. Homer: Iliad. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King

202A-202B. Homer: Odyssey and the Epic Cycle. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King

203. Hesiod. Ms. Bergren, Mr. Frischer, Mr. Janko

204. Homeric Hymns. Ms. Bergren, Mr. Janko

205. Seminar in Aeschylius. Ms. Bergren, Mr. Blank, Mr. Haslam, Mr. Janko

206A-206B. Sophocles. Ms. Haslam, Mr. Lattimore

207A-207B. Euripides. Ms. Haslam, Mr. King

208A-208B. Aristophanes. Ms. Bergren

209. Seminar in Hellenistic Poetry. Mr. Frischer, Mr. Haslam

210. Advanced Greek Prose Composition. Prerequisite: course 110 or equivalent. Mr. Haslam, Mr. Janko

211A-211B. Herodotus. Mr. Blank

212A-212B. Thucydides. Ms. Haslam, Mr. Lattimore

213. Seminar in Greek Historiography. Mr. Haslam

214. Demosthenes. Mr. Dyck

216. Menander. Prerequisite: reading knowledge of classical Greek. Mr. Frischer, Mr. Goldberg

217A. Greek Lyric Poetry: Archaic Lyric. Prerequisite: consent of instructor. A study of lyric poetry of the Archaic period, both choral and monodic, with elegiac and iambic included. Ms. Bergren, Mr. Haslam Mr. Janko

217B. Greek Lyric Poetry: Pindar and Bacchylides. Prerequisite: consent of instructor. A study of the choral odes of Pindar and Bacchylides, with special attention to the conventions of the epinician. Ms. Bergren, Mr. Haslam, Mr. Janko

220. Seminar in the Greek Novel. Lecture, three hours. A study of the Greek romance and its place in Greek literature. Two texts (Chantion: Chaerulas and Callimachus: Longus: Daphnis and Chloe) studied in some detail.

221. Seminar in the Pre-Socratic Philosophers. Mr. Blank, Mr. Frischer

222A-222B. Plato. Ms. Bergren, Mr. Blank

223A-223B. Aristotle. Mr. Blank, Mr. Dyck, Mr. Frischer

224. Seminar in Post-Aristotelian Philosophy. Mr. Blank, Mr. Frischer

231A-231B-231C. Seminar in Later Greek and Byzantine Literature. Prerequisite: consent of instructor. Studies in various aspects of Byzantine Greek language and literature. Topics vary from year to year. Each course may be taken independently and may be repeated for credit with topic change. Mr. Blank, Mr. Dyck

233. Byzantine Poetry. A survey of the main representatives of both religious and secular poetry. Mr. Dyck

240A-240B. History of the Greek Language. Prerequisite: consent of instructor. 240A. The linguistic history of classical Greek. 240B. Postclassical, medi eval, and modern Greek. Mr. Dyck, Mr. Janko

241. Greek Epigraphy. A survey of Greek historical inscriptions, chiefly Attic. Mr. Attic

242. Greek Dialects and Historical Grammar. Prerequisite: consent of instructor. The linguistic situation in early Greece. Readings in classical Greek dialectal texts. Greek grammar in the context of common Greek and Indo-European linguistics. Mr. Janko, Mr. Puhvel

243. Mycenaean Greek. Prerequisite: consent of instructor. Script, language, and grammar of the Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. Mr. Janko, Mr. Puhvel

244. Greek Papyrology. Prerequisites: reading knowledge of Greek, consent of instructor. An introduction to Greek papyri, considered both as historical documents and as carriers of literature. Mr. Haslam

245. Greek Paleography. Studies in the develop ment of the book hand in Greek manuscripts earlier than the invention of printing. Mr. Blank

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Latin

Lower Division Courses

1. Elementary Latin. Lecture, five hours. (F)

15. Elementary Latin for Graduate Students (No credit). Concurrently scheduled with course 14.

2. Elementary Latin. Lecture, five hours. Prerequisite: course 1. (W)

3. Elementary Latin. Lecture, five hours. Prerequisite: course 2. (Sp)

14. Elementary Latin: Intensive (8 units). All the declensions of nouns and adjectives, all conjugations in the indicative mood, and the primary uses of the subjunctive mood. Emphasis on the development of the ability to read easy selections of classical prose.
Upper Division Courses

Note: Latin 3 is prerequisite to 100, which is normally prerequisite to all other 100-series courses in classical Latin authors.

100. Readings in Latin Prose and Poetry. Lecture, three hours. Prerequisite: course 3 or equivalent. Close study of a prose text supplemented with related readings in poetry. Attention to historical and cultural context. Course is normally prerequisite to other courses in the Latin 100 series.

Mr. Blank, Mr. Frischer, Mr. Levine

101. Plautus. Mr. Goldberg, Mr. Löfstedt

102. Terence. Mr. Goldberg, Mr. Löfstedt

103. Lucretius. Mr. Blank, Mr. Frischer, Mr. Levine

104. Ovid. Ms. Bergren

105. Vergil: Selections from Aenid I-VI. (Formerly numbered 105A.) Mr. Frischer, Mr. Haslam, Ms. King, Mr. Levine

106. Catullus. Mr. Haslam, Mr. Levine

107. Horace. Mr. Frischer, Mr. Levine

108. Roman Elegy. Selections from Catullus, Tibullus, and Propertius. Mr. Frischer, Mr. Levine

109. Roman Satire. Selections from the Epistles of Horace, the Satires of Juvenal, and the Epigrams of Martial. Mr. Frischer, Mr. Levine

110A-110B. The Study of Latin Prose. (Formerly numbered 110.) Discussion, three hours. Course 110A is prerequisite to 110B. Work in sight reading and grammatical analysis of classical prose texts; writing of classical prose.

Mr. Blank, Mr. Levine, Mr. Löfstedt

111. Livy. Mr. Frischer, Mr. Löfstedt

112. Tacitus. Mr. Frischer, Mr. Löfstedt

113. Cicero: The Orations. Mr. Dyck, Mr. Frischer

114. Roman Epistolography: Cicero and Pliny. Mr. Blank, Mr. Dyck, Mr. Frischer

115. Caesar. Mr. Dyck

116. Petronius. Mr. Frischer, Mr. Löfstedt

117. Sallust. Mr. Frischer, Mr. Löfstedt

118. Seneca. A selection of Seneca’s works read in Latin. Mr. Blank, Mr. Löfstedt

120. The Vulgate. Lecture, three hours. Prerequisite: course 3 or consent of instructor. Reading of selected chapters of St. Jerome’s translation of the Bible, with emphasis on unclassical features of the Latin.

Mr. Löfstedt

130. Introduction to Medieval Latin. Prerequisite: course 3 or consent of instructor. Reading of easy prose texts, with emphasis on basic language training.

Mr. Löfstedt

131. Medieval Latin Prose. Prerequisite: course 130 or consent of instructor. Extensive reading of selected texts in prose, with emphasis on the idioms and syntax of medieval Latin.

Mr. Löfstedt

132. Medieval Latin Poetry. Prerequisite: one upper division Latin language course or consent of instructor.

Mr. Löfstedt

199. Special Studies in Latin (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 203A and 203B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar.

200A-200B-200C. History of Latin Literature. Prerequisite: consent of instructor. Lectures on the history of Latin literature, supplemented on the part of the student by independent reading of Latin texts in the original.

Mr. Frischer, Mr. Goldberg, Mr. Levine

201. Roman Epic Tradition. Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucretius, Valerius Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change.

Mr. Levine

203A. Elegiac Poetry. Mr. Frischer, Mr. Levine

203B. Propertius. Mr. Frischer, Mr. Levine

204A-204B. Vergil’s Aeneid. Mr. Frischer, Mr. Haslam, Ms. King

205. Seminar in Vergil’s Bucolics. Mr. Frischer, Ms. King

206. Horace. Mr. Frischer

207. Roman Comedy. Prerequisite: consent of instructor. Survey of the history of Roman comedy. Reading of one comedy by Plautus or Terence, with emphasis on language and meter.

Mr. Goldberg, Mr. Löfstedt

208. Ovid. Prerequisite: reading knowledge of classical Latin. A detailed study of the poetic works of Ovid. Readings in the original with discussion of the secondary literature and scholarship. May be repeated for credit with topic change.

Ms. Bergren

209. Seminar in Roman Satire. A detailed study of an individual satirist, with attention to his position in the development of the satirical genre in Roman literature. Choice of author varies from year to year. Close study of the text, of the characteristics of the writer as a social critic and artist, and of the contemporary literary and social environment.

Mr. Frischer

210. Advanced Latin Prose Composition. Prerequisite: course 110 or equivalent. Mr. Levine

211A-211B-211C. Seminar in the Roman Historians. A study of considerable portions of the writings of:

211A. Sallust.

211B. Livy.

211C. Tacitus.

215. Seminar in the Roman Novel. Works such as Petronius' Satyricon and Apuleius' Metamorphoses: a study of the literary problems. May be repeated for credit with topic change.

Mr. Blank, Mr. Frischer

216. Roman Rhetoric. Seminar, three hours. Close study of one rhetorical text (e.g., Rhetorica ad Herennium, Cicero's De Oratore, Seneca's Controversiae or Saturnalia, Quintilian's Institutio), with attention to its place in the rhetorical tradition. May be repeated with topic change.

Mr. Dyck, Mr. Frischer

220. Cicero's Orations. Seminar, three hours.

Mr. Dyck, Mr. Frischer

221A. Cicero's Philosophical Works. Mr. Dyck, Mr. Frischer, Mr. Levine

221B. Cicero: De Natura Deorum. Mr. Dyck, Mr. Frischer, Mr. Levine

222. Seminar in Roman Stoicism. Prerequisite: reading knowledge of Greek and Latin.

Mr. Blank, Mr. Dyck, Mr. Frischer

223. Lucretius. Mr. Blank, Mr. Frischer

224. Seneca. Seminar, three hours. Detailed study of one work of prose or poetry by the younger Seneca. Emphasis on literary and philosophical problems, with some attention to philosophical and historical matters as well. May be repeated with topic change.

Mr. Goldberg

231A-231B. Seminar in Medieval Latin. Prerequisite: at least one upper division course in Latin or consent of instructor. Studies in various areas of the language and literature of medieval Latin. May be repeated for credit with consent of instructor.

Mr. Löfstedt

232. Vulgar Latin. Prerequisite: consent of instructor. History and characteristics of popular Latin: its development into the early forms of the Romance languages.

Mr. Löfstedt

240. History of the Latin Language. Prerequisite: consent of instructor. The development of Latin from the earliest monuments until its emergence in the Romance languages.

Mr. Löfstedt

242. Italic Dialects and Latin Historical Grammar. Prerequisite: consent of instructor. The linguistic situation in early Italy. Readings in Oscan, Umbrian, and early Latin texts. Latin grammar in the context of Italic and Indo-European linguistics.

Mr. Puohvel

Mr. Levine

250. Teaching of Latin. Prerequisite: graduate standing or consent of instructor. Techniques for teaching; organization of courses; review of the content of the curriculum offered in junior and senior high schools.

255. College Teaching of Latin (2 units). Prerequisites: appointment as a teaching assistant, consent of instructor. Methodology of instruction in conjunction with classroom practice. May be repeated for credit.

S/U grading. Mr. Goldberg

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Scope and Objectives
The major in communication studies is an interdisciplinary program leading to a Bachelor of Arts degree. It seeks to provide students with a comprehensive knowledge of the nature of human communication, the symbol systems by which it functions, the environments in which it occurs, its media, and its effects. Employing critical and empirical approaches, the major draws its resources from the social sciences, humanities, and fine arts. Two areas of specialty are offered: the specialization in mass communication centers on formal and institutional communication systems and the macrocosmic social contexts in which they function; the specialization in interpersonal communication centers on face-to-face communicative interaction in the small group environment.

Bachelor of Arts Degree
Students selecting the major in communication studies must complete the required lower division prerequisites and a minimum of 15 upper division courses as set forth below. Enrollment in the major is limited. Admission to the major is by application to the committee in charge. Applications are available in the program office.

Students officially admitted to the communication studies major for Fall Quarter 1988 or thereafter must fulfill the following requirements. Those admitted prior to Fall Quarter 1988 have the option of fulfilling either the following requirements or those listed in the 1986-87 UCLA General Catalog.

Preparation for the Major
Required: Communication Studies 10, Psychology 10, Sociology 1, Speech 1, Anthropology 33 or Linguistics 1, Computer Science 5 or Program in Computing 1, one course from Economics 40, Sociology 18, or Statistics 50.

Writing Requirement
Required: English 131D.

The Major
Required Core Courses: Communication Studies 100 and 101 and one course from Anthropology M140, Communication Studies 102, or Linguistics 100.

Specializations
Mass Communication: (1) Required — Communication Studies 140, 152, and one course from Political Science 141, Psychology 137B, or Sociology 133: (2) systems, institutions, and policies — two courses from Communication Studies 153, 155, 165, 170, 180, 187, either Communication Studies 147 or Sociology 176; (3) media content/criticism/history — two courses from Communication Studies 160, 171, Film and Television 106A, 106, 110A, either Communication Studies 175 or Film and Television 116; (4) mass electives — two courses from Communication Studies 115, 120, 130, Psychology 135 or Sociology 132, Psychology 137A or Sociology 135, Sociology C124A, C124B, 160; (5) general electives — two courses from one of the following groups: (a) American studies — English 115A, History 148A, 148B, 148C, 150A, 150B, 156A, 156B, Political Science 114A, 114B; (b) language theory — Communication Studies 150, Linguistics 100, 170, Philosophy 172, Psychology 122 or 123; (c) social systematics — Anthropology 133P, 133R, 135A, 135B, 142A, 142B, Sociology C124A, C124B, either Anthropology 134 or Sociology 134.

Interpersonal Communication: (1) Required — four courses (at least one of which must be Communication Studies 115 or 120) from Communication Studies 115, 120, Sociology C124A, C124B, either Psychology 135 or Sociology 132, either Psychology 137A or Sociology 135; (2) heterogeneous groups communication — three courses from Anthropology 141, Communication Studies 130, Psychology 125, 137C, M165, 174, 177, 178, either Sociology 156 or 160 or Anthropology 166; (3) interpersonal electives — two courses from Communication Studies 140, 152, 153, 155, 165, 170, 180, 187, either Communication Studies 147 or Sociology 176; (4) general electives — two courses from one of the following groups: (a) media content/criticism/history — Communication Studies 160, 171, Film and Television 106A, 108, 110A, either Communication Studies 175 or Film and Television 116; (b) language theory — Communication Studies 150, Linguistics 100, 170, Philosophy 172, Psychology 122 or 123; (c) social systematics — Anthropology 133P, 133R, 135A, 135B, 142A, 142B, Sociology C124A, C124B, either Anthropology 134 or Sociology 134.

Lower Division Course
10. Introduction to Communication Studies. An introduction to the fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory.

Mr. Cole (F,W,Sp)

Upper Division Courses
100. Communication Theory. Prerequisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10 or consent of instructor. Analysis of the fundamental nature of human communication; its physical, linguistic, psychological, and sociological bases. Study of theoretical models explicating the process and constituents of the communicative act.

Ms. French

101. Freedom of Communication. Analysis of legal, political, and philosophical issues entailed in the rights of free expression, access to an audience, and access to information. Study of court decisions governing freedom of communication in the U.S.

Mr. Cowan, Mr. Rosenthal (F,Sp)

102. Code of Human Communication. Prerequisite: course 10 or Sociology 1 or Psychology 10 or Linguistics 1 or consent of instructor. The structural analysis and description of human communication codes; the development of language; characteristics of the source, channels, and destination in human communication.

Ms. French

115. Dyadic Communication and Interpersonal Relationships. Prerequisite: course 100. Developmental approach to the study of communication in dyadic relationships. Analysis of differences in the stages of relationships in terms of communication rules and verbal and nonverbal messages.

Ms. French, Ms. Henley

120. Principles and Types of Group Communication. Prerequisite: course 100 or consent of instructor. Analysis of the purposes, principles, and types of small group communication. Particular emphasis on the organization of and participation in problem-solving discussion.

Ms. French

130. Cultural Factors in Interpersonal Communication. Prerequisite: course 100 or consent of instructor. Study of cultural factors as they affect the quality and processes of interpersonal communication; exercises in the participation, analysis, and criticism of intersubjective and intercultural communications in the small group configuration.

Ms. French

140. Theory of Persuasive Communication. Prerequisite: course 100 or consent of instructor. The dynamics of communication designed to influence human conduct; analysis of the structure of persuasive discourse; integration of theoretical materials drawn from relevant disciplines of the humanities and social sciences.

Mr. Rosenthal

142. Rhetorical Theory. Prerequisite: course 100 or consent of instructor. Survey of the major classical and neoclassical treatises on rhetoric. Analysis of the theories of Plato, Aristotle, Cicero, Quintilian, St. Augustine, Blair, Whately, Campbell, and other leading works in the theory of rhetoric.
147. Mass Communication and Social Systems. Prerequisite: course 100 or consent of instructor. Comparative analysis of major theories about relationships between mass media and social systems from the interpersonal to the international level; emphasis on empirical research.

150. Analysis of Communication Content. Prerequisite: course 100 or consent of instructor. Study of methodologies for the qualitative and quantitative analysis of the content of communications.

Ms. French

152. Analysis of Communication Effects. Prerequisite: course 100 or consent of instructor. Survey of experimental and field research on the effects of communications. Study of source, message, and environmental factors affecting audience response.

Ms. Greenfield, Mr. Malamuth

153. The Media and Aggression Against Women. Lecture, two hours; discussion, two hours. Prerequisite: course 152 or consent of instructor. Study of the growing body of literature on the relationship between the mass media and aggression against women. Consideration of both the role of the media as reflecting cultural values and its potentially powerful role as a socializing agent of the culture. Analysis of research on the role of individual differences among members of a culture as mediators of the impact of the media.

Mr. Malamuth

155. Communication Technology and Public Policy. Prerequisite: course 10. An introduction to modern communication technology and policy, with special attention to current policy issues, the institutions which make policy decisions, and the social, economic, and technological trends which create policy problems. Modern communication technologies surveyed include cable television, teletext, videodisc, and satellite, microwave cellular, and subcarrier communication.

Mr. Case, Mr. Cole

160. Political Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of the nature and function of communication in the political sphere: analysis of contemporary and historical communications within established political institutions; state papers; deliberative discourses; electoral campaigns.

Mr. Nyergar

165. Agitational Communication. Prerequisites: courses 100 and 101, or consent of instructor. Theory of agitation; agitation as a force for change in existing institutions and policies in a democratic society. Intensive study of selected agitational movements and the techniques and content of their communications.

Mr. Rosenthal

170. Legal Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of the trial and appellate processes as systems of communication. Analysis of the elements of the judicial process as they affect the quality of communication content. Study of the rules of evidence, jury behavior, and the structure of legal discourse.

Mr. Rosenthal

171. Seminar in the Theories of Freedom of Speech and Press. Prerequisites: course 101, consent of instructor. An exploration of the relationship between the freedoms of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of the significance of these values examined in connection with issues such as obscenity, defamation, access to the media, and the control of commercial, corporate, and government speech.

Mr. Lowenstein

175. Criticism and the Public Arts. Prerequisite: course 10 or consent of instructor. An introduction to methods and problems of criticism in the public arts. Study of several types of critical methods: formalistic, analogical, pragmatic, and aesthetic criticism. Topics include the definition of art and criticism, the aesthetic media, genre and resources of film, television, theater, and public discourse, the varieties of critical method, the problems of critical judgment.

Mr. Rosenthal

177. Libel and Freedom of Expression. (Formerly numbered 198C.) Lecture, two hours; discussion, two hours. Prerequisite: course 101 or consent of instructor. Intensive study of the law of defamation and its relationship to the free flow of information in a democracy. Examination of the rationale, scope, and effects of libel laws. Topics include the application of libel laws to public officials, public figure, and private plaintiffs and media and nonmedia defendants; group libel, privileged libel, and libelous fiction.

Mr. Rosenthal

180. Politics of Censorship. Discussion, two hours; simulation teaching, three hours. Prerequisites: course 101, consent of instructor. Examination of the process and substance of debates over government and private censorship by having students become active participants in a term-long simulated battle over a current issue such as book censorship, pornography, or UNESCO's proposed "New World Information Order."

Mr. Cowan (W)

185. Field Studies in Communication (2 to 4 units). (Formerly numbered 199F.) Discussion, two hours, fieldwork, seven to 14 hours (depending on unit value). Prerequisites: senior standing in communication studies, consent of instructor. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each two units of credit. May be repeated for a maximum of six units. P/NP grading.

Ms. Gregory

187. Ethical and Policy Issues in the Institutions of Mass Communication. Prerequisites: courses 10, 101. An intensive examination of the ethical and policy issues arising from the interaction of media institutions (print, film, broadcasting, and the new technologies) and societal institutions (Congress, federal agencies, courts, the Presidency, schools, churches, political action groups, advertisers, and audiences).

Mr. Cole

197H. Undergraduate Honors Proseminar. (Formerly numbered 197.) Prerequisites: senior standing, 3.5 GPA in communication studies major, 3.3 GPA overall. Limited enrollment. Variable topics course involving specialized study of selected aspects of the field of human communication.

Mr. Malamuth

199. Special Studies (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior standing, consent of instructor. Independent study for seniors who desire an intensive or specialized investigation of selected research topics.

Mr. Cole

Special Studies for Honors Candidates (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior and honors program standing. Independent study for honors undergraduates who desire an intensive or specialized investigation of selected research topics.

Stephen I. Yenser, Ph.D. (English)
Pier-Maria Pasinetti, Ph.D., Emeritus (Italian and Comparative Literature)

Associate Professors

Jean-Claude Carron, Ph.D. (French)
Edward I. Condren, Ph.D. (English)
Albert D. Hutter, Ph.D. (English)
Shuhsi Kao, Ph.D. (French)
Katherine C. King, Ph.D. (Classics and Comparative Literature)
Kathleen L. Komar, Ph.D. (German and Comparative Literature)
Cheryl A. Litman, Ph.D. (Comparative Literature)
Ludmilla O. Pecora, Ph.D. (English)
Lucia Re, Ph.D. (Italian and Comparative Literature)
Shirleen S. Wong, Ph.D. (Chinese)

Assistant Professor

Vincent P. Pecora, Ph.D. (English)

Scope and Objectives

Standing at the forefront of innovative literary analysis and criticism, comparative literature is one of the most exciting fields in the humanities. As a discipline it requires exceptional linguistic ability and high intellectual caliber. UCLA's graduate interdepartmental program offers students the opportunity to work with faculty in any of the University's language and literature departments as well as with the Comparative Literature Program faculty.

Comparative literature at UCLA focuses on those elements which define literature in general, such as genre, period, theme, language, and theory. Courses are designed to provide students with a historical understanding of the concepts of genre and period by studying specific genres and periods or literary movements. Paradigmatic or thematic courses offer another way of examining literature synchronically or diachronically regardless of language boundaries.
Courses in literary criticism and theory inquire into the premises of specific critical approaches, and of criticism itself, in order to provide further insight into the intellectual and moral concerns of literature and the world it reflects. Thus, through the study of these various assumptions and aspects of literature and criticism, students learn not only to cross linguistic boundaries, but to join them — to compare and to contrast, to analyze and, finally, to synthesize the text and the subtext, the structure and the history which define, undermine, and transcend the text and its reader.

Master of Arts Degree

Admission

A bachelor’s degree in literature, ancient or modern, is a prerequisite for admission to the program. Students not having a literature major in their B.A. program are required to demonstrate the equivalent knowledge and comprehension of one literature before being considered a graduate student in good standing. Applicants are expected to have at least a 3.4 grade-point average in upper division literature courses, take the Graduate Record Examination (GRE), and submit three letters of recommendation to the Comparative Literature Program (334D Royce Hall, UCLA, Los Angeles, CA 90024-1536). Applicants should have literary proficiency in one foreign language and at least an elementary knowledge of a second.

Areas of Study

Your study plan should combine work in the major and minor literatures by focusing on a limited area in which these literatures may be explored. The area may be a literary period (e.g., Romanticism), a genre (e.g., the novel), or a theoretical problem.

The major literature is the area of your primary concentration. You specialize in one historically defined period (e.g., medieval, Renaissance, and baroque, neoclassicism and 18th century, Romanticism to modern), but a general knowledge of the major literature is a prerequisite for the specialization.

In the minor literature, you focus on a period comparable to the area of specialization in the major literature, although you may not have as much historical depth and breadth as in the major literature.

Foreign Language Requirement

Literary proficiency in the major and minor literatures is an essential prerequisite for courses and degrees in comparative literature. You should be able to take graduate classes conducted in the languages of your specialization, speak the major foreign language adequately, and read literary texts in that language with "literary proficiency" (i.e., with sensitivity to stylistic nuances).

Before completing the M.A., you must demonstrate knowledge of two foreign languages. Proficiency in one must be certified by completing two or more upper division and/or graduate literature courses in the appropriate language department. (You must prove more than elementary language competency in order to take these courses.) The second language requirement may be satisfied either by completing two years of language classes, by taking one upper division literature course, or by passing the Educational Testing Service (ETS) foreign language examination with a score of 600 or better. Translation examinations may be administered by departmental members in languages for which no ETS examination is available.

Course Requirements

The following 12 courses are the minimum course requirements. Some students will take extra courses to make up deficiencies.

1. Four comparative literature courses, including Comparative Literature 200 and one course in literary theory such as 201, 202, 203, or 204: the comparative study of one genre (e.g., the novel, the epic, the lyric, the drama); the comparative study of one period or movement (e.g., baroque, Romanticism).

2. Five courses (three must be graduate, two may be upper division) in your major literature.

3. Three courses, either graduate or upper division, in your minor literature. You should study periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in your major literature.

Of the above required courses, eight units at most may be in the 500 series. Course 596 or 597 may be applied toward the minimum course requirement and the graduate course requirement.

Comprehensive Examination Plan

The examination for the M.A. is both written and oral, testing both historical knowledge and comprehension of methodology. There are three possible results of the examination; you may receive an M.A. degree and be allowed to progress toward the Ph.D., be granted a terminal M.A., or fail the examination altogether. The program allows a maximum of two attempts to pass the M.A. examinations.

The written examinations test your skill in literary analysis and detailed knowledge of specified works in the major and minor literatures. The examinations are based on reading lists from the works of at least 15 authors in the major literature and the works of at least 10 authors in the minor literature. Normally, the reading list consists of approximately 24 to 30 works in the major literature and 12 to 15 works in the minor literature. For more details on the reading list, contact the program office.

Ph.D. Degree

Admission

For entrance into the Ph.D. program, an M.A. degree in Comparative Literature is normally required. Students with an M.A. degree in one national literature, extensive knowledge of a second, and the ability to read literary texts in a third language may be considered for admission. Applicants should submit three letters of recommendation. Students entering with any degree other than an M.A. in Comparative Literature from UCLA are required to pass a "permission to proceed" examination before being allowed to continue toward the Ph.D. It should be taken within your first year in residence.

Major Fields or Subdisciplines

The study plan for the Ph.D. should combine work in the major and two minor literatures by focusing on a limited area in which these literatures may be explored. This area may be a literary period or a particular aspect common to several literatures (e.g., a genre like tragedy or the novel, or a phenomenon like neoclassicism or the baroque). It may also be a critical or theoretical problem, involving analyses of styles or modes of interpretation; comparisons of classical and modern genres and themes; questions about the artistic process in different art forms; or problems in literary aesthetics or epistemology.

Foreign Language Requirement

You must have literary proficiency in at least two foreign languages before taking the qualifying examination. Reading knowledge of a third foreign language is strongly recommended. Two of the three languages offered for the Ph.D. must be from different language groups (e.g., Romance and Germanic, English and Slavic). If you intend to offer three literatures written in foreign languages for your Ph.D. degree, you are expected to have literary proficiency in the three pertinent foreign languages. A classical language is usually necessary for anyone majoring in a period prior to the 19th century. The language requirements for the Ph.D. are to be fulfilled in the same way as those for the M.A. degree.

Course Requirements

All students entering with an M.A. must take a minimum of six graduate courses, and often up to 12 courses. Those whose M.A. is not in Comparative Literature at UCLA must take three of the required six courses in comparative literature and one from each of the major and minor literatures. Other relevant or necessary courses are determined in consultation with a graduate adviser. None of the minimum required courses may be in the 500 series. Although only six courses are required, you are strongly advised to take at least two and usually three courses in each of your literatures.
Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Graduate Courses

200. Methodology of Comparative Literature (6 units). Seminar, four hours. Prerequisites: consent of instructor. A study of the methodology of comparative literature and the theory of literature.

201. Contemporary Theories of Criticism. Prerequisites: course 200 or equivalent. An advanced course in the theory of literature focusing on structuralist, psychoanalytic, and Marxist approaches.

202. Problems in the Theory of Literature. Prerequisites: course 201 or equivalent, reading knowledge of French or German. A study of specific topics in the theory of literature for advanced students in criticism and literary theory. May be repeated for credit.

203. Problems of the Sign in Literature. An inquiry into the theoretical bases and implications of the sign as metaphorical, logical, and grammatical categories. Many texts central to Western thinking dwell on the sign as a concept-tool in order to focus on the relationship between words and things, language and reality, the linguistic medium in its meaning-producing functions. Examples from Plato, Aristotle, Augustine, Locke, Vico, and Hegel lead to a discussion of the “sciences” envisioned by Saussure (semiology) and Peirce (semiotics) and propounded by contemporary theorists such as Barthes, Hjelmslev, and Greimas.

Ms. Kao

204. Psychoanalytic Approaches to Literature. Prerequisite: course 200 or the equivalent criticism course in English. A study of the development of modern psychoanalytic approaches to literature, with particular stress on affective theories of criticism. Readings include Freud and the early psychoanalytic critics, contemporary psychoanalytic critics of literature, and modern British and American psychoanalytic theorists (Winocock, Schaffer) whose work is applicable to literary theory.

Mr. Hutter

205. Comic Spirit. Prerequisite: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate the varieties of comic expression. May be concurrently scheduled with Humanities C105. Graduate students required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week.

Mr. Band

206. Reception Theory and Literary Hermeneutics. The major premises of reception theory and literary hermeneutics presented and analyzed in a seminar by one of the foremost proponents in the field. Students read some of the professor’s major published texts as well as parts of works in progress and discuss them within the context of modern literary theory. Seminar paper required.

C207. Classical Tradition: Epic. Seminar, three hours. Prerequisite: reading knowledge of Greek or Latin, or Italian. Analysis of the Iliad, the Odyssey, the Aeneid, the Jerusalemine Liberata, and Paradise Lost both in relation to their contemporary societies and to the literary traditions. Emphasis on how poets build on the work of their predecessors. May be concurrently scheduled with Humanities C107. Graduate students required to prepare papers based on texts read in the original language and to meet as a group one additional hour each week.

Ms. King

C209. Crisis of Consciousness in Modern Literature. Prerequisite: reading knowledge of one appropriate foreign language. Study of modern European and American works which are concerned with the subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on the works of Kafka, Kafka, Woolf, Sartre, and Beckett. May be concurrently scheduled with Humanities C109. Graduate students required to prepare papers based on texts read in the original languages and will meet as a group one additional hour each week.

Ms. Komar

C211. Classical Tradition: Tragedy. Seminar, three hours. Prerequisite: knowledge of one appropriate foreign language, usually Greek or French. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. May be concurrently scheduled with Humanities C111. Graduate students required to prepare papers based on texts read in the original languages and will meet as a group one additional hour each week.

Ms. King

C229. Archetypal Heroes in Literature. Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Survey and analysis of the function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. Concurrently scheduled with Humanities C129. Graduate students required to prepare papers based on texts read in the original languages and will meet as a group one additional hour each week.

Ms. King

C230. Translation Workshop. Prerequisites: solid reading knowledge of at least one foreign language, course 204 or equivalent, and two years of study in an appropriate foreign language. Undergraduates with proper language preparation. The theory and practice of literary translation. Analyses of significant theoretical contributions to the field. Weekly exercises in translation techniques with genres, periods, and authors at the discretion of the participants.

Mr. Heim

C239. Early Medieval Literature. Prerequisite: reading knowledge of one appropriate foreign language. A survey of the Latin and Germanic literatures from the fall of Rome to the beginning of the 12th century. May be concurrently scheduled with Humanities C139. Graduate students required to write papers based on texts read in the original languages and may meet as a group one additional hour each week.

Mr. Calder

C240. Medieval Epics. Prerequisite: reading knowledge of one appropriate foreign language. Consideration of five medieval epics (Browning, El Cid, Chanson de Roland, Nibelungenlied, and Njalssaga), with two objectives: first, a critical understanding of each work, and second, a self-consciousness of the nature of epic literature. Assignments consist of an extended seminar paper and short oral reports. May be concurrently scheduled with Humanities C140. Graduate students required to write papers based on texts read in the original languages.

Mr. Condran
C241. Literary Mediation of History in the Renaissance. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. An analysis of the presence and the treatment of history in the rhetoric of Renaissance authors ranging from the Italian humanists to Machiavelli and Shakespeare. May be concurrently scheduled with Humanities C141. Graduate students required to prepare papers based on texts read in the original languages and meet as a group one additional hour each week. Ms. Re Brahmuller

C245. Renaissance Drama. Prerequisite: reading knowledge of one appropriate foreign language. A broad introduction to the subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with Humanities C145. Graduate students required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Burwick

C271. Dramatic Theory and Criticism in German and English Romanticism. (Formerly numbered 271.) Seminar, three hours. Prerequisite: reading knowledge of German. The generic conception of drama in the classic essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on the role of the critic and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with Humanities C171. Mr. Burwick

C272. The Grotesque in Romantic Literature and Art. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. A study of the grotesque in the visual and verbal arts of the Romantic period: the aesthetics of tragic-comic interaction, the demonic vision, and the satirical sketches of man's abnormality and perversity. May be concurrently scheduled with Humanities C172. Graduate students required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Burwick

C273. Theory and Texts of the Fantastic. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. An attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffman, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with Humanities C172. Graduate students required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Ms. Re

C274. Search for Organic Forms. Prerequisite: reading knowledge of one appropriate foreign language. Study of the transition made between theories of the "organic" in the 18th and 19th centuries, with special emphasis on Rousseau and Goethe. Studies of the transition made between theories of nature and theories of state. Mr. Maniquis

C275. The 19th-Century Novel. Seminar, three hours. Prerequisite: reading knowledge of French or German. A comparative study of the 19th-century novel in English and on the continent. Novels are selected so as to allow the seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with Humanities C175. Mr. Lehman

C276. Fiction and History. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Analysis of the use of historical events, situations, and characters in literary works. Prereq: upper division standing. Texts and individual assignments range from Renaissance historical narratives (the Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendahl, Verge, Tomasi di Lampedusa, Carpenter, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence the authors choice and use of historical material. May be concurrently scheduled with Humanities C176. Graduate students required to prepare papers based on texts read in the original languages. Mr. Pasinetti, Ms. Re

C278. Darwinism and Literature. Seminar, three hours. Prerequisites: graduate standing or consent of instructor, reading knowledge of one appropriate foreign language. The impact of Darwin's theories on European and American literature. While texts include major works in the development of the novel such as novels by Zola, Hardy, Crane, or Dreiser and plays by Strindberg and Ibsen, the course moves forward into the continuing influence of other "determinist" and behaviorally oriented theories by authors such as Mann, Sartre, Camus, Stevens, and Skinner. May be concurrently scheduled with Humanities C178. Graduate students required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Mr. Shideler

C280. Symbolist Tradition in Poetry. Prerequisite: reading knowledge of either French or German. A study of the symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with Humanities C180. Graduate students required to prepare papers based on texts read in the original languages and may meet as a group one additional hour each week. Mr. Shideler

C284. Alternate Tradition: In Search of a Female Voice in Contemporary Literature. Seminar, three hours. Prerequisites: Reading knowledge of an appropriate foreign language. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on the development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Humanities C184. Graduate students required to prepare papers based on texts read in the original languages whenever possible. Ms. King, Ms. Komar

C295. The Modern Continental Novel. Lecture, three hours. Prerequisite: reading knowledge of at least one appropriate foreign language. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on the development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Humanities C185. Graduate students required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Lehman

C296. The Postmodern Novel. Lecture, three hours. Prerequisite: reading knowledge of an appropriate foreign language. Study of the postmodern novel as it developed out of modernism. Postmodernism defined and differentiated, its historical, scientific, and economically. Emphasis on relationship of recent novels to theories of structuralism and post-structuralism. Readings include such authors as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with Humanities C186. Graduate students required to meet as a group one additional hour each week. S/U or letter grading. Mr. Lehman

C298. The Psychological Novel. Prerequisites: major in literature, reading knowledge of French. A comparative study of French and English novels which both precede and follow the development of psychoanalysis. Selected readings of Freud, in addition to the required fiction. Mr. Hutter

C297. The Mystery Novel. Prerequisite: reading knowledge of French. A study of mystery and detective fiction in France, England, and the U.S. Development of the origin, form, and historical significance of mystery fiction through close readings of selected works. May be concurrently scheduled with Humanities C117. Graduate students required to prepare papers based on texts read in the original languages and to meet as a group one additional hour each week. Mr. Hutter
Scope and Objectives

The major in cybernetics is designed primarily for highly motivated undergraduates interested in interdisciplinary activities in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sciences — chemistry, biology, physics, and mathematics, plus introduction to psychology and computing. The major itself provides an introduction to modeling, information processing, control and system analysis, with emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Cybernetics majors have four options for in-depth studies: life sciences, behavioral sciences, engineering and applied mathematical sciences, or an integration of courses from these areas that form a coherent cybernetics curriculum. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in medicine, public health, management, dentistry, and engineering.

Bachelor of Science Degree

Pre-Cybernetics Major

You may apply for the pre-cybernetics major via petition if you are a sophomore and have taken at least three of the premajor mathematics courses with a 2.7 GPA or better and three other premajor courses. Together, all preparation for the major courses, including mathematics, must be completed with at least a 3.0 GPA and a minimum grade of C in all courses. Transfer students must meet the same academic requirements, based on all courses transferred from another institution which satisfy premajor requirements.

Preparation for the Major

Required: A minimum of 74 units, including Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23; Biology 5, 7; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 6A, 6B, and 6C, or 8A, 8B, and 8C; Psychology 10 or 11; Program in Computing 10A. Additional recommended courses are available in the program office and/or the College Counseling Service in the College of Letters and Science.

The Major

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 GPA in mathematics, 3.0 GPA overall, and a minimum grade of C in all courses). The major consists of a methodology core (five and one-half courses), a specialization area (seven courses), and a cybernetics breadth requirement (three courses). Each course in the major must be completed with a grade of C or better.

Methodology Core: Four subject areas as follows:

1. One overview course: Computer Science 196A.
2. Two courses in probability and statistics from one of the following groups: (a) Statistics 152A and 152B, or (b) Mathematics 150A and Statistics 152B, or (c) Electrical Engineering 131A and Statistics 152B.
3. Two courses in signals and control systems (one from each group): (a) Computer Science 170 or Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical, Aerospace, and Nuclear Engineering 171A.
4. One course in modeling and computer simulation: Computer Science M196B.

Applications/Specialization Areas: A minimum of seven courses in either life sciences, behavioral sciences, engineering and applied mathematics, or an integration of courses from these areas. A continually updated and approved list of courses in each specialization area is available in the program office and the College Counseling Service.

With few exceptions, courses in the life sciences area are in biology, microbiology, chemistry, and biochemistry, as well as in departments of the School of Medicine. Courses in the behavioral sciences area are in psychology, linguistics, and economics. And courses in the engineering and applied mathematics area are in engineering, computer science, and mathematics.

Cybernetics Breadth Requirement: One course from each of the applications/specialization areas selected from the current approved list.

Specialization in Computing

You may select this area as an option in the existing applications/specialization areas. Program in Computing 10B, 10C, 30, and Computer Science 141 are required, in addition to six courses selected from an approved list. You graduate with a bachelor's degree in cybernetics and a specialization in computing.

Honors Program

Junior and senior majors who have completed all preparation for the major courses and have an overall grade-point average of 3.0 or better and a 3.5 or better in required major courses may apply for admission to the honors program, in which honors-designated sections of selected courses are required. Students pursuing highest honors must, in addition, complete a senior thesis based on an approved
research topic. Those who successfully complete the program (3.0 GPA or better overall, 3.5 or better in major coursework, and a grade of B or better in required honors courses) are awarded a degree with honors. At the discretion of the faculty sponsor and the interdepartmental committee, students demonstrating exceptional ability on the senior research thesis are awarded highest honors.

Upper Division Course

195H. Honors Thesis. Limited to cybernetics honors majors. Students must have achieved a score of A or better in required honors courses and have a 3.8 grade-point average in all courses attempted toward the major. Maximum enrollment is 15. Grading: A, A-, B+, B, B-, C+, C, C-, D+. At the discretion of the faculty sponsor and the interdepartmental committee, students demonstrating exceptional ability on the senior research thesis of B or better in required honors courses are awarded a degree with honors. At the discretion of the faculty sponsor and the interdepartmental committee, students demonstrating exceptional ability on the senior research thesis are awarded highest honors.

Bachelor of Arts Degree

Preparation for the Major

You must be a sophomore in good standing to enter the major. No specific courses are required as preparation for the major, but you should have some beginning experience in the social sciences at the college level.

The Major

Required: Fifty-six units of upper division courses (including the four core courses, Development Studies 100A-100B, and Economics 110 or 111), taken for a letter grade, and the foreign language requirement. (For the quantitative methods requirement, some lower division courses are accepted in place of upper division courses.) Courses applied toward the major may be selected from the list in item 5 below. Substitutions may be made only with consent of the faculty adviser.

The major consists of six parts:

1. Development Studies 100A-100B.
2. Economics 110 or 111*.
3. Four core courses (two should be from the same discipline) from Anthropology 130, 150, Economics 112*, 191*, Geography 121, 133, Political Science 115, 167, 168L or 168S, Sociology 101, 184.
6. Two years of a modern foreign language (or test-demonstrated proficiency).

Honors Program

Development studies majors who have completed Development Studies 100A-100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, you must take courses 195A-195B-195C, in which you research, write, and present an honors thesis. To receive honors at graduation, you must have at least a 3.5 GPA in courses applied toward the major (including 195A-195B-195C) and an overall GPA of 3.0. Highest honors are awarded to students who complete the major (including courses 195A-195B-195C) with a 3.75 GPA and who produce an exceptional thesis.

Upper Division Courses

M100A-M100B. Introduction to Development Studies. (Formerly numbered 100A-100B.) Seminar, three hours. Prerequisite: some beginning experience in the social sciences at the college level. A two-quarter seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. M100A. (Same as Anthropology M197A.) Economic development and culture change. M100B. (Same as Political Science M197B.) Political economy of development. Mr. Hammond, Mr. Sklar (W,Sp).

195A-195B-195C. Directed Studies for Honors. Prerequisites: courses M100A-M100B, 3.5 GPA in courses offered for the major, formal application to the honors program, consent of instructor. 195A. Research, discussion, and planning of honors thesis. 195B-195C. Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

*Courses so marked have prerequisites.
Diversified Liberal Arts
(Interdepartmental)

A316 Murphy Hall, (213) 825-1965

Undergraduate Certificate Program

The Diversified Liberal Arts Program (DLAP) is not a major, but a special certificate program through which you may receive credit toward a minor or a major in the College of Letters and Science. You must complete the Instructional Credential Program in the Graduate School of Education. In addition, you must either earn a satisfactory score on the California State Teacher Certification Exam or complete the DLAP in the College of Letters and Science.

To earn the certificate in diversified liberal arts, you must complete a major in the College of Letters and Science. You must also complete DLAP requirements in four areas: (1) English, (2) mathematics and the physical and/or life sciences, (3) social sciences, (4) humanities, fine arts, and foreign language.

Requirements for one of these areas are normally satisfied by courses taken for your major; in addition, you must complete seven courses (28 units) in each of two other areas and eight courses (32 units) in a fourth area. A grade of C or better must be earned in all courses specifically required for the program (i.e., English 120A, Mathematics 38A, 38B, 104, History 7A or 7B). A grade of C – or a Passed grade is not acceptable in these courses. A minimum C (2.0) grade-point average is required in each of the four areas.

Courses in divisions outside the major, which are required as preparation for or as part of the major, may be applied toward the area course requirements. However, no course may be applied toward more than one area. You are expected to satisfy the general education requirements of the College of Letters and Science; courses used to satisfy these requirements may also be applied toward the Diversified Liberal Arts Program.

If you plan to pursue the program, you should begin to take courses in your freshman year to fulfill these requirements. You must petition for admission to the program and are advised to do so as soon as possible. Transfer students may petition to have suitable courses completed at other institutions applied toward the course requirements of this program. The college certifies completion of the program.

If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate.

For further information about the program and a complete list of courses that apply, contact a counselor in the College of Letters and Science Counseling Service, A316 Murphy Hall (825-3362). For information regarding the Teacher Credential Program in the Graduate School of Education, see a counselor in 201 Moore Hall (825-8326).

Area 1. English

Composition and Grammar (Required): Two courses: English 120A plus one course in satisfaction of the English Composition requirement. If you wish to complete the Area 1 requirements with additional composition and grammar, the courses must be selected from English 130A, Linguistics 1, 100.

Literature (Required): One course from English 10A, 10B, 10C, 70, 75, 80, 85, 90, 112, 113, Humanities 1A, 1B, 1C, or any other upper-division courses in English literature for which you have satisfied the prerequisites. You may complete more than one course from this list to satisfy the Area 1 course requirement.

Speech (Required): One course from Communication Studies 10, 100, Speech 1, 2, 107. You may complete more than one course from this list to fulfill the Area 1 course requirement.

Area 2. Mathematics and the Physical or Life Sciences

Mathematics (Required): Mathematics 38A, 38B, 104. Substitutions of other courses in mathematics may be made with the written consent of the College of Letters and Science.

Physical or Life Sciences (Required): A minimum of 12 units in physical sciences and/or life sciences, apart from mathematics.

The remaining courses for Area 2 may be selected from any courses in the physical or life sciences that satisfy the general education requirements (mathematics courses may be included).

Area 3. Social Sciences

History (Required): One course from History 7A, 7B. Other courses which may satisfy the Area 3 requirement are those listed as fulfilling the social science general education requirements.

Area 4. Humanities, Fine Arts, and Foreign Language

Although there are no specific course requirements, courses applied toward this area must be selected from those courses listed as fulfilling the humanities general education requirements. The following may also be applied toward Area 4: any courses in foreign language; Dance 1A, 1B, 1C; English 4, 30; Music 1A, 1B, 113A, 113B; Theater 118A, 118B, 119A.

Earth and Space Sciences

3806 Geology, (213) 825-3880

Professors
Orson L. Anderson, Ph.D. (Geophysics)
Peter Bird, Ph.D. (Geophysics and Geology)
Donald Carlisle, Ph.D. (Geology and Mineral Resources)
John M. Christie, Ph.D. (Geology)
Paul J. Coleman, Jr., Ph.D. (Geophysics and Space Physics)
Wayne A. Dollase, Ph.D. (Geology)
W. Gary Ernst, Ph.D. (Geophysics and Geology)
Clarence A. Hall, Jr., Ph.D. (Geology)
Raymond V. Ingersoll, Ph.D. (Geology)
David D. Jackson, Ph.D. (Geophysics)
Isaac R. Kaplan, Ph.D. (Geology and Geochemistry)
William M. Kaula, M.S. (Geophysics)
Margaret G. Kivelson, Ph.D. (Space Physics)
Robert L. McPherron, Ph.D. (Space Physics and Geophysics)
Arthur Montana, Ph.D. (Geochimistry and Geophysics)
Clemens A. Nelson, Ph.D. (Geology)
Gerhard Oertel, Dr. rer. nat. (Geology)
John L. Rosenfield, Ph.D. (Geology)
Bruce N. Runnegar, Ph.D. (Paleontology)
Christopher T. Russell, Ph.D. (Space Physics)
J. William Schoepf, Ph.D. (Paleobiology)
Gerald Schubert, Ph.D. (Geophysics and Planetary Physics)
Ronald L. Shreve, Ph.D. (Geology and Geophysics)
John T. Wasson, Ph.D. (Geochimistry and Geochemistry)
Robert Holzer, Ph.D., Emeritus
Helen Tappan Loeblich, Ph.D., Emeritus

Associate Professors
Paul M. Davis, Ph.D. (Geophysics)
Michael J. DeNiro, Ph.D. (Geochemistry)
William I. Newman, Ph.D. (Planetary Physics)
Walter E. Reed, Ph.D. (Geology)

Assistant Professors
Mark D. Barton, Ph.D. (Geochimistry and Geology)
David A. Paige, Ph.D. (Planetary Science)
An Yin, Ph.D. (Geology)

Lecturers
Robert E. Jones, B.S. (Geology)
Floyd F. Sabins, Jr., Ph.D. (Geology)
Gerhard Stumler, B.S. (Geology)
Takeo Susuki, D.Sc. (Geology)
David A. Winter, B.S. (Chemistry)

Adjunct Professor
Paul M. Menfield, Ph.D. (Environmental Geology)

Adjunct Assistant Professors
Jack Farmer, Ph.D. (Paleontology)
Scope and Objectives

The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, the Earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas which are emphasized at UCLA include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, the Earth's interior, planetary physics, space plasmas, and economic geology.

The variety of techniques applied lead to several specializations within the five main disciplines. Students completing their studies with a B.S. or M.S. degree are usually employed by industry. The greatest number go to oil companies, but many are also employed in other types of mineral exploitation, construction, and environment-related activities. Students attaining the Ph.D. degree are usually employed by universities or governmental and industrial research groups.

Bachelor of Science in Geology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 61; Biology 2; Chemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A; Physics 8A/8AL, 8B/8BL, and 8C/8CL or 8B; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences 103A, 103B, 111, 112, 121A-121B, 135, M139; Civil Engineering 108, 120, 121, 128L, 150; one course from Earth and Space Sciences 134, 136C, 137, 141, 150, Geography 100, Civil Engineering 151, 155.

Students with an interest in nonrenewable natural resources are advised to take Earth and Space Sciences 103C, 128A, 128B, 136C, 137, 138, M139, 141, and/or 150.

Bachelor of Science in Geology — Paleobiology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 61; Biology 5, 5L, and 6 or 7 or 8; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23. All courses must be passed with a minimum grade of C-.

The Major

Bachelor of Science in Geophysics — Applied Geophysics

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry 11A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Bachelor of Science in Geophysics — Geophysics and Space Physics

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 9; Chemistry 11A, 11B/11BL, 11C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences 122, M140, M154; Physics 105A, 105B, 110A, 110B, 112; Physics 131 or Mathematics 145; three courses from Earth and Space Sciences 101, 119, 131, 134, 136A, 136B, 150, 205, 233, Atmospheric Sciences 200B, one of Mathematics 140A, 140B, or 140C.

Students planning to do graduate work in specialized careers in Earth science should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth and Space Sciences graduate courses numbered from 200A through 249.

Honors in Geology or Geophysics

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a member of the faculty. Requirements for admission to candidacy are the same as those required for admission to the honors program of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative GPA of 3.5, who have completed at least 90 graded units at the University of California, and who have completed a minimum of two quarters (eight units) of Earth and Space Sciences 199H leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.
Graduate Study

Admission
Application may be made for admission to any quarter. Graduate Record Examination (GRE) scores are required; the examination should be taken at least six weeks before the deadline. Also required are three letters of recommendation which should be sent to the Graduate Adviser, Department of Earth and Space Sciences, 3683 Geology, UCLA, Los Angeles, CA 90024-1567. Application forms and a brochure giving information about the department may be obtained from the graduate adviser. Students who wish to apply for fellowships or teaching assistantships should be aware that these are allocated in February for the following academic year; completed applications should be received by January.

Major Fields and Subdisciplines
The Department of Earth and Space Sciences offers programs leading to the M.S. and Ph.D. degrees in Geochemistry, in Geology, and in Geophysics and Space Physics. The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, pænetology, and lunar geochemistry. The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, nonrenewable natural resources, organic geochemistry, paleobiology, paleontology, petrology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields. The program in geophysics and space physics offers study in applied geophysics, the Earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydro-magnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), and space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays). Other comparable areas of study are also possible.

Foreign Language Requirement
Advising committees may require one or more foreign language in special individual cases. The committees determine how the requirement is to be fulfilled.

Master of Science in Geochemistry

Admission
A bachelor's degree in chemistry, geology, physics, or a related field is required. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. The Graduate Record Examination (GRE) Subject Test may be in any appropriate field of science.

Course Requirements
A minimum of nine courses is required for the degree, at least six of which must be graduate-level courses. Each course of study is worked out individually between you and the advising committee. You are expected to attain, either through prior training or through prescribed coursework, a common mastery of the subject matter of Earth and Space Sciences 51A, 51B, 130, 131, 234A or 234B, and Chemistry 110A, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology. You must take course 235A, 235B, or 235C each quarter.

Sixteen units of 500-series courses (596, 597, 598) may be applied toward the total course requirement; 12 units may be applied toward the minimum graduate course requirement.

Thesis Plan
The thesis must be approved by the research director (usually the chair of your advising committee), as well as by the other members of the advising committee. No examination is required of students who write a thesis.

Comprehensive Examination Plan
If you elect this plan, the advising committee prepares and administers the final examination (normally oral). In most cases, a failed final examination can be repeated once.

Master of Science in Geology

Admission
A bachelor's degree in geology, biology, chemistry, physics, or other science is required. Applicants must have outstanding records in the relevant basic sciences and mathematics.

Course Requirements
Each course of study is worked out individually between you and the advising committee. It may include appropriate courses offered by other departments. Unless you have already passed Earth and Space Sciences 61 and 111, you are required to take either 195G or 61 and 111 during your first year in residence. Depending on your performance in course 195G, you may subsequently be required to take either 111 or 61 and 111.

Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate-level courses, of which at least four units must be a geology seminar (courses 251 through 260). Except for courses 597 and 598, those graded on an S/U basis may not be applied toward the requirements. The advising committees may require additional courses in light of individual educational objectives and backgrounds.

Eight units of 500-series courses (596, 597, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement.

Specialization in Nonrenewable Natural Resources
The objective of this program is to prepare students for professional careers in the geology of metallic, nonmetallic, and fossil energy resources. Individual courses of study are arranged in consultation with the committee for graduate study in nonrenewable natural resources. Relevant subjects include mineral deposits, mining and exploration geology, geophysical exploration, petroleum and coal geology, depositional systems, and basin analysis. Particularly relevant courses include Earth and Space Sciences 128A, 128B, 130, 131, 132, 136A, 136B, 136C, 137, 138, 144, 150, 227, 241, 254, 258, and 268, as well as selected courses in chemistry, engineering, the social sciences, law, and management.

Thesis Plan
This plan is normally required for students not continuing to the doctorate. The thesis subject may be selected at once and the research undertaken concurrently with coursework; in any event, it should normally be selected within your first year in residence. The completed thesis must be approved by the thesis committee. If it is not, the committee may recommend either termination of graduate study or further coursework or research or both, leading to a revised thesis. Revision and resubmission is not normally permitted more than once.

Comprehensive Examination Plan
This plan is recommended for those continuing to the Ph.D. The examination consists of a six-hour written part covering your major field of study and a subsequent oral part which may be more general in scope. If the examination is failed, the advising committee may recommend either termination of graduate study or further coursework followed by another examination. Reexamination is not normally permitted more than once.

Master of Science in Geophysics and Space Physics

Admission
A bachelor's degree in a physical science, engineering, mathematics, or other field is required. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Graduate Record Examination (GRE) Subject Test scores are preferable in physics, although mathematics or geology scores are also acceptable.
Qualified students may proceed directly toward the Ph.D. degree, although most obtain the M.S. degree in the process.

Course Requirements
Courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A, 200B, and 200C and at least 12 additional units of 200-series (graduate) courses. At least half of these must fall within a single field of concentration (applied geophysics; Earth’s interior, geophysical fluid dynamics, planetology, or space physics) selected in consultation with your faculty adviser, and the remainder must contribute to your general competence in geophysics and space physics. Courses from the 500 series and courses graded on an S/U basis may not be applied toward the minimum requirement; 500-series courses also may not be applied toward any other degree requirements.

Thesis Plan
This plan is an optional alternative to the comprehensive examination plan. At least two members of the thesis committee must be from the department.

Comprehensive Examination Plan
The examination is the comprehensive part of the written qualifying examination taken by doctoral students, but the passing level for the master’s degree is less rigorous. The examination is on the level of the introductory courses (200A, 200B, 200C). It lasts six hours and is given every June and December. It must be first attempted by the end of your fourth quarter of enrollment. If failed, it must be retaken the next time it is given. Permission to take it a third time may be granted by the graduate adviser in extenuating circumstances.

Specialization in Applied Geophysics
The objective of this program is to provide advanced technical training to students who plan to do detailed analysis of geophysical data. Emphasis is on theory, computation, data analysis, and inversion. Fieldwork and original measurements are strongly supported, but UCLA has no facilities for gathering or routine processing of reflection seismic data. Undergraduate preparation for admission is equivalent to a B.S. in Geophysics (applied geophysics specialty), including a common mastery of the subject matter of Earth and Space Sciences 61, 111, 112, 122, 136A, 136B, 136C, Physics 105A, 105B, 110A, 110B, and 114. Exceptions may be allowed, but in particular, deficiency in geophysical fieldwork must be made up.

Course Requirements: Courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A and 202, plus at least two courses from 203, 204, 205, 222. Eight additional units of graduate-level courses are required; courses 208B, 208, M224A, M224B are recommended. Eight units of 500-series courses (596, 598) may be applied toward the graduate course requirement.

Thesis Plan: A thesis is required for this specialization. A qualifying examination on the suitability of the proposed thesis should be taken by your fourth quarter in residence. You are also required to take a final examination on the adequacy of your completed thesis.

Ph.D. in Geochemistry
Admission
Admission requirements are the same as those for the M.S. in Geochemistry.

Course Requirements
Each course of study is worked out individually in consultation with your advising committee. You are expected to complete at least the minimum number of courses which are required for the M.S. in Geochemistry and to attain, either through prior training or through prescribed coursework, a common mastery of the subject matter of Earth and Space Sciences 51A, 51B, 130, 131, 234A or 234B, and Chemistry 110A, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology. You must take course 235A, 235B, or 235C each quarter.

Qualifying Examinations
The departmental written qualifying examination must be taken before the end of your first year of the doctoral program if you have a master’s degree; otherwise, it must be taken before the end of your second year of enrollment. It is given in either a question-answer format or in a proposal-proposition format, at your discretion. Contact the department for details of each format.

After passing the written qualifying examination, you must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination is normally required.

Ph.D. in Geophysics and Space Physics
Admission
Admission requirements are the same as those for the M.S. in Geophysics and Space Physics.
Course Requirements
There are no specific requirements.

Qualifying Examinations
In this program the written qualifying examination is divided into three stages: (1) the fundamental physical examinations, (2) the comprehensive examination, and (3) the field examination. Examinations 1 and 2 must be passed before undertaking examination 3. Students not passing these examinations within three years, two years, and four years, respectively, after entering the program are subject to dismissal. Contact the department for details on each of the three stages.

You must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination as soon as possible after passing the field examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee. If you do not pass this examination within five years after entering the program, you are subject to dismissal.

Final Oral Examination
The examination is required.

Lower Division Courses
1. Introduction to Earth Science. Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 1H or 100. Elements of Earth science; study of Earth materials; the nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology.

2. Earth History. Lecture, three hours; fieldwork. Prerequisite: course 1 or 1H. Methods of historical science; consideration of special problems relating to the physical and biological evolution of the Earth from earliest time to the present.

3. Earth Science and Society: Geological Ecological Interactions. Lecture, three hours; discussion, two hours; field trips. Geologic aspects of major environmental problems, with emphasis on lithosphere-biosphere interactions. Problems of exploration and exploitation of fossil fuel resources. Composition of society-produced materials and natural cycles.

4. Earthquakes. Lecture, three hours. The causes and effects of earthquakes, with special emphasis on the problems of living with earthquakes in Southern California. Topics include the relationship between earthquakes and local and regional geology, types of earthquakes, past and future earthquakes in California, earthquake engineering, disaster preparedness, and prospects for predicting or controlling earthquakes.

6. Geology of California. Lecture, two hours; laboratory, two hours; field trips. General survey of geologic features and history of California; its relationship to large-scale crustal motions of Western North America and the Eastern Pacific. Environmental geology; study of geologic hazards such as earthquakes, landslides; aspects of urban geology.

7. Introduction to Oceanography. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for Biology 25. Processes responsible for the chemical composition of the ocean and current circulation patterns. Seafloor spreading and morphology of the ocean floor. Biological productivity, marine ecology, and minerals forming in the ocean.

8. Elements of Field Geology. Lecture, two hours; laboratory, two hours; field trips. Designed for nonmajors. Introduction to the nature, occurrence, and use of fossils; the history of the biosphere as revealed through the fossil record.

9. Natural History of Southern California. Lecture, one hour; laboratory, three hours; seven field weekends. Identification, distribution, diversity of plants, animals, and communities; environmental factors influencing distribution in alpine to lower desert life zones. Identification, interpretation, and possible history of rocks, landforms, and structural geologic features within the physiographic regions of Southern California. Emphasis on field-based learning related to integrated aspects of natural history.

10. Principles of Paleontology. Lecture, three hours; laboratory, two hours; field trips. Designed for nonmajors. Introduction to the petrologic and biologic evolution of the Earth, moon, and other planets from their origin to the present.

11. Metamorphic Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103A. Introduction to metamorphic rocks based on field occurrence, mineralogical composition, texture, and the application of physical and chemical principles.

12. Principles of Geophysics and Space Physics. Lecture, three hours; discussion, two hours. Prerequisite: course 1 or 1H. Fundamentals of physical geology and Earth history; major problems of geology, such as continental drift and development of large-scale features of the Earth; physical and biological evolution of the planets, their atmospheres, and the interplanetary medium, with emphasis on topics of current research interest.

13A. Igneous Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisites: courses 51A, 51B, Chemistry 111B, Mathematics 31A, 31B, 32A. Designed primarily for students majoring in a physical science or mathematics major. A study of the physics of the planets, their atmospheres, and the interplanetary medium, with emphasis on topics of current research interest.

13B. Sedimentary Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103A. Recommended: course 61. Study of sedimentary rocks based on the characteristics of sedimentary particles and the dynamics of depositional processes. Focuses on development of depositional facies models, and laboratories emphasize recognition of sedimentary deposits from each major depositional facies.

14. Principles of Earth Science. Lecture, three hours. Designed for nonmajors. Not open to students with credit for or currently enrolled in course 1 or 1H. Fundamentals of physical geology and Earth history; major problems of geology, such as continental drift and development of large-scale features of the Earth; physical and biological evolution of the planets, their atmospheres, and the interplanetary medium, with emphasis on topics of current research interest.

Upper Division Courses
100. Principles of Earth Science. Lecture, three hours. Designed for nonmajors. Not open to students with credit for or currently enrolled in course 1 or 1H. Fundamentals of physical geology and Earth history; major problems of geology, such as continental drift and development of large-scale features of the Earth; physical and biological evolution of the planets, their atmospheres, and the interplanetary medium, with emphasis on topics of current research interest.

103A. Igneous Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisites: courses 51A, 51B, Chemistry 111B, Mathematics 31A, 31B, Physics 8B. Recommended: Mathematics 32A. Mineralogy, chemical composition, and field occurrence of igneous rocks with reference to their origin by melting in the Earth. Introduction to thermodynamics as applied to petrology. The formation of magma, its movement, eruption, crystallization, and chemical evolution. Petrologic structure of the crust and mantle and the development of the petrologic and chemical evolution of the Earth, moon, and other planets from their origin to the present.

103B. Sedimentary Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103A. Recommended: course 61. Study of sedimentary rocks based on the characteristics of sedimentary particles and the dynamics of depositional processes. Focuses on development of depositional facies models, and laboratories emphasize recognition of sedimentary deposits from each major depositional facies.

103C. Metamorphic Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103B. Interpretation of metamorphic rocks based on field occurrence, mineralogical composition, texture, and the application of physical and chemical principles.

105. Nonrenewable Resources and Society. Lecture, three hours; discussion, two hours. Prerequisite: course 1 or 1H and consent of instructor. Topics include geologic and economic characteristics of mineral resources, exploration, recovery, risks, exhaustibility, mineral law, and environmental conflicts, taxation, and environmental concerns.

111. Stratigraphic and Field Geology (6 units). (Formerly numbered 111B.) Lecture, two hours; laboratory, three hours; field work, one day per week. Prerequisites: course 61 or consent of instructor. Principles of stratigraphy; geologic mapping of a selected area; preparation of a geologic report.

111G. Field Geology (2 to 4 units). (Formerly numbered 111AG-111BG.) Prerequisite: graduate standing or consent of instructor. Geologic mapping, principles of stratigraphy, structural geology, and map interpretation.

112. Structural Geology. Lecture, three hours; laboratory, six hours. Prerequisite: course 1 or consent of instructor. Recommended: course 51B. Planar and linear structures at different scales in sedimentary, metamorphic, and igneous rocks. Faults and folds, their description, classification, and kinematic and dynamic analysis. Deformation, strain, fracture, and rheological properties of rocks.

114. Introduction to Stress and Deformation. Lecture, three hours; discussion, three hours. Prerequisites: course 112 or consent of instructor. An introduction to the quantitative treatment of strain in geological bodies, the stresses that cause them, and their rheological behavior. Stress and strain fields in folds, near faults, and in and near intruding magma bodies.

Mr. Oertel (W)
115. Micropaleontology. Lecture, three hours; labora-
tory, two hours. Prerequisite: Biology 5 or consent of instructor. A study of the morphology, paleo-
ecology, and ecological importance of the micro-organisms. (Sp)

116. Paleobotany. Lecture, three hours; laboratory, three hours; field trips. Prerequisite: Biology 5 or consent of instructor. A review of the fossil plants and their significance in paleobotany and geology. (Sp)

118. Petroleum Geology. Lecture, three hours; discussion, one hour. Prerequisites: courses 61 and 111, or consent of instructor. A study of the exploration and production of natural gas and petroleum; techniques of surface and subsurface geology; problems of petroleum geology. (W)

140. Computing in Earth and Space Sciences. Lecture, three hours; discussion, one hour. Prerequisite: course 131 or consent of instructor. A study of geologic, geophysical, and paleontic interpretive tools used in earth and space sciences. (Sp)

141. Basin Analytical. Lecture, three hours; laboratory, six hours. Prerequisites: courses 103B, 111. Interpretation of sedimentary rock records in terms of tectonics and basin evolution. Methodological patterns in modern plate settings serve to focus interpretation of deformed rocks in complex structural regions. (F)

144. Marine Geology. Lecture, three hours; field trips. Prerequisite: senior standing. Recent marine sedimentology and geochemistry; oceanography and marine geology. (Same as Architecture and Urban Planning M195.) Lecture, two and one-half hours. Prerequisite: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction, and control of settlement, surface/subsidence, landslides, and other geologic aspects of urban planning and subsurface disposal of liquid and solid wastes. (F)

150. Remote Sensing for Earth Sciences. Lecture, three hours. Open to upper division and graduate students. Remote sensing related to the development of natural resources. Characteristics of the electromagnetic spectrum and review of remote sensing devices. Applications of remote sensing, classification, soil survey, urban studies, vegetation classification, emphasis on geologic interpretation of imagery. (S)

154. Solar Terrestrial Physics. (Same as Atmospheric Sciences M154.) Lecture, three hours; discussion, one hour. Prerequisite: course M140 or consent of instructor. Basic concepts and examples of nonlinear wave behavior: limit cycles, attractors, bifurcations, relaxation, subharmonics, solitons, periodic versus chaotic behavior, Lorenz masks and phase bands. (F)

160. Field Geology for Graduate Students. (2 units) Lecture, three hours; discussion, two hours; laboratory, four hours; field trips. Prerequisite: course 61B. Geological principles applied to the exploration and evaluation of mineral deposits; geological techniques at operating mines; mine economics; exploration geology and mineral resource economics. (Spring)

170. Advanced Field Geophysics (6 units). Lecture, six hours; field work, six hours; laboratory, 12 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including field work, data reduction, and interpretation. Fieldwork on unsolved problems (week-long field trip). (Spring)

176C. Field Geophysics (6 units). Lecture, three hours; discussion, one hour; laboratory, two hours; fieldwork, 10 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including field work, data reduction, and interpretation. Fieldwork on unsolved problems (week-long field trip). (Spring)

178D. Advanced Field Geophysics (6 units). Lecture, six hours; laboratory, six hours; fieldwork, 12 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic reflection, seismic refraction, gravity, magnetic, electrical, and electromagnetic methods to geologic problems. Planning, data collection, and interpretation. Use of computer in applied geophysics. (Spring)

190. Earth and Space Sciences Colloquium (1 unit). Lecture, 90 minutes. Prerequisite: consent of instructor. Current topics of research in the department. May be repeated for credit. (P/NP grading)

195G. Field Geology for Graduate Students (2 units) Field mapping; preparation of a geologic report. (P/NP grading)

199. Special Studies in Earth and Space Sciences (2 to 8 units). May be repeated for credit.
Graduate Courses

204A. Introduction to Geophysics and Space Physics I: The Solid Earth and Planets. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Geochronology; constraints and methods of age determination; seismology; heat transfer, thermal and mechanical evolution of the mantle; the core and geomagnetism; lunar and planetary interiors. Mr. Davis (F)

208B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres. Mr. Page (W)

200C. Introduction to Geophysics and Space Physics III: Planetary Atmospheres and Planetary Medium. Lecture, three hours. Prerequisites: Physics 105A, 110B, 112, and 131, or consent of instructor. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of the solar wind with the Earth, magnetospheric phenomena. Mr. McPherron (Sp)

201. Classical Mechanics. Lecture, three hours. Planetary motions, Lagrange's equations, Hamiltonian mechanics, quantum mechanics. Mr. Kauta (F)

12. Electrodynamics and Electromagnetic Theory. Lecture, three hours. Electromagnetic theory course or consent of instructor. Maxwell's equations and boundary conditions; momentum, angular momentum, and energy of electromagnetic fields; plane electromagnetic and magneto-hydrodynamic waves and guided, propagating, and radiating systems, and diffraction. Mr. Coleman (W)

204. Time-Series Analysis and Spectral Estimation. Lecture, three hours. Prerequisites: intermediate courses in calculus (including linear algebra and complex variables) and computer programming (including FORTRAN). Basic methods in time-series analysis, including spectral estimation, prediction, and signal detection, in application to problems in geophysics, atmospheric physics, and space physics. Topics include Fourier transforms (continuous, discrete, FFT), time series (Z-transforms, deconvolution), maximum entropy spectral analysis, autoregressive and moving average methods (AR, MA, ARMA), and multichannel prediction and spectral analysis. Mr. Newman (W)

205. Inverse Theory and Data Interpretation. Lecture, three hours. Prerequisites: Mathematics 115A and 150A-150B-150C, or consent of instructor. The inverse modeling problem — determination of model parameters consistent with experimental data, considering the effects of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthogonal rotations, statistics, the principal axis transformation for rectangular data sets, and linear least squares; matrix rank, null space, and Lagrange multipliers. Examples from a broad range of physical sciences. Mr. Jackson (F)

208. Geothermics. Lecture, two and one-half hours; discussion, 30 minutes. Prerequisite: Mathematics 33A or consent of instructor. Basic concepts of heat transfer applied to the solutions of geophysical and geothermal problems, including continental heat flow, cooling of oceanic lithosphere, solidification of magmas, thermal and subsidence history of sedimentary basins, frictional heating on fault zones, mantle geotherms, temperature in descending slabs, thermal convection in geothermal regions. Mr. Schubert (F)

211. Hydrodynamic instabilities and Turbulence. (Same as Mathematics M263.) Lecture, three hours. An introduction to the theories of hydrodynamic instability and the nonstatistical description of turbulence; stability bounds by the energy method; linear theory of instability; finite amplitude theories of post-instability flows; bounds on properties of turbulent flows by variational techniques. (Alternate years) Mr. Hall

212. Paleozoology. Lecture, two hours; laboratory, six hours; field trips. Prerequisite: course 116 or advanced standing in biological sciences. How and where animals and plants lived in the past; study of habits and habitats of animals, changes in habits and habitats, and the dynamic changes in time and space. Content varies from year to year. May be repeated for credit. Mr. Hall

213. Archaeological and Paleontological Applications of Stable Isotopes (6 units). (Same as Archaeology M213.) Lecture, three hours. Application of natural variations in stable isotope ratios in fossilized biological and nonbiological materials to a variety of archaeological and paleontological problems. Topics include the basis for isotope distributions in archaeological and paleontological materials; analytical procedures for measuring isotope ratios; dietary reconstruction; paleoecological analysis; determination of provenance of archaeological materials; analysis of fossils of the biochemistry and physiology of fossil animals. Mr. DeNiro

214. Rotating Fluids and Geophysical Fluid Dynamics. (Formerly numbered 214.) (Same as Mathematics M227E.) Lecture, three hours. Prerequisites for Earth and space sciences students: courses 200B, 202, consent of instructor; for mathematics students: Mathematics 272A, consent of instructor. Rotational effects of Coriolis and fluid behavior. Inviscid flows, Taylor-Proudman theorem, Taylor columns, motion of bodies. Inertial waves in spheres and spherical shells, Rossby waves. Exman layers, shallow water waves, internal waves in thin layers, and driven oceanic circulation. Effects of stratification, Bénard convection, Baroclinic instability, Eddy model.

219. Planetary and Orbital Dynamics. Solar system dynamical evolution, figure and gravitational field of a planet; satellite orbits; Earth-moon system evolution; rotational dynamics, including effects of nonrigidity and energy dissipation. Mr. Kaula

220. Principles of Paleobiology. Lecture/discussion, three hours. Prerequisite: graduate standing in science. Open to qualified undergraduates in biological and physical sciences with consent of instructor. Current and classical problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit. Mr. Schopf

221. Field Geology. Lecture, one hour; discussion, one hour; fieldwork, 10 days. Prerequisites: course 121B, course 225B or consent of instructor. Planning, execution, and presentation of geologic mapping projects at the professional level. Resolution of problems in Southern California geology from synthesis of new data with existing databases and determination of stratigraphic and tectonic paleoclimatic and tectonic years of deposition of sedimentary successions. Mr. Yin (W)

222. Introduction to Seismology. Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograms; explosion seismology; seismograph design and operation; surface wave analysis; microseisms and tsunamis. Mr. Davis (Sp)

M224A. Elastic Wave Propagation I. (Same as Mechanical, Aerospace, and Nuclear Engineering M257A.) Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 158A or 166A or consent of instructor. Review of elasticity theory; elastic waves in unbounded media; reflection and refraction of plane elastic waves; surface waves and guided waves in multilayered media; waves generated by concentrated loads; radiation from dislocations; attenuation; representative applications in engineering and seismology. Mr. Knopoff

M224B. Elastic Wave Propagation II. (Same as Mechanical, Aerospace, and Nuclear Engineering M257B.) Prerequisite: course M224A. Diffraction and scattering of elastic waves by isolated and cracks and inclusions; normal mode theories for the vibration of finite elastic bodies; dynamic theories of fracture; representative applications in engineering and seismology. Mr. Knopoff

225A. Physics and Chemistry of Planetary Interiors. Lecture, three hours. Prerequisites: Earth and Planetary Science 116 and planetology courses. Structure and composition of the Earth and planets; high pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution. Mr. Hall

225B. Physics and Chemistry of Planetary Interiors II. Lecture, three hours. Prerequisites: Mathematics 33A and one elementary probability theory course, or consent of instructor. Analysis of the intellectual foundations and objectives of modern geomorphology, illustrated by selected past and present theories of river profiles, slope processes, and channel networks. Reading and discussion of original sources. Preparation of term paper. Mr. Shreve (Sp, approximately every third year)

227. Resource Evaluation Field Methods. Lecture, one hour; fieldwork, 10 days. Prerequisites: Mathematics 115A and 150A-150B-150C, or consent of instructor. courses 111 and 128A or 128B or 138, or consent of instructor. Techniques of mapping, sampling, appropriate laboratory studies, economic or socioeconomic evaluation of a variety of nonrenewable natural resources; preparation of reports. Mr. Carlson

M228. Dynamo Theory. (Formerly numbered 228.) (Same as Mathematics M272D.) Lecture, three hours. Prerequisites: Earth and space sciences students: course 200C, consent of instructor; for mathematics students: Mathematics 272C, consent of instructor. Motivation: planetary and stellar magnetism. Underlying theory: kinematic dynamo theory, antiflame dynamos, working models. Mr. Davis Planetary and stellar dynamos, solar cycle. Magnetohydrodynamic dynamo theory, Taylor's condition, convective dynamos, runaway field growth, numerical attempts. Mr. Davis

229. Planetary Atmospheres. Lecture, three hours. Prerequisite: course 200B or consent of instructor. Planetary atmosphere structure, dynamics, and composition. Topics include isentropic expansion; the composition of the Earth's atmosphere; the origin and evolution of atmospheres; photochemistry; radiation mechanisms, and transport; atmospheric waves and general circulation; wave-mean flow and turbulence; remote sensing and diagnostic techniques. Mr. Newman (Sp)
230. X-Ray Crystallography. Lecture, three hours; laboratory, three hours. Prerequisite: course 51B. Point, translation, and space group symmetry; interference of X-ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis. (Alternates yearly with course 231.) Mr. Dollase

231. Crystal Chemistry and Structure of Minerals. Lecture, three hours; laboratory, three hours. Prerequisite: course 51B. Bonding, interatomic configurations, polymorphic transformations, isomorphism, thermal and strain disorders; survey of the physical and chemical properties of crystal structure. (Alternates yearly with course 230.) Mr. Dollase

233. Mineral Physics and Equations of State. Lecture, three hours. Prerequisite: consent of instructor. Interrelationship of the properties of rock-forming minerals: optical reflectivity, refraction index, sound velocity, elastic constants, specific heat, and thermal expansivity. Determination of pressure, volume, and temperature relationships and planet-forming compounds. Variation of elastic constants with temperature and pressure. Application of shock-wave experiments to equations of state. Mr. Anderson

234A. Thermodynamic and Geometric Principles of Phase Equilibria. Prerequisites: course 51B and Chemistry 110B, or consent of instructor. Thermodynamic and geometric principles of phase equilibria. Mr. Oertel

235A-235B-235C. Current Research in Geochemistry (1 unit each). Prerequisite: graduate standing in Earth and space sciences. Seminars presented by staff, outside speakers, and graduate students stressing current research in Earth and planetary chemistry. May be repeated for credit. S/U grading.

236. Igneous Petrology. Lecture, two hours; laboratory, six hours. Prerequisite: an introductory course in petrology and petrography, knowledge of differentiation and fractionation. Geometric representation of multicomponent systems using pressure, temperature, chemical potential, molal volume, and the fugacity of oxygen, water, and other volatile components as variable parameters. Mr. Montana (F)

237A-237B-237C. Geochemistry of Solutions. Lecture, three hours. Prerequisites: courses 103A, 103C, Chemistry 110A, and 110B, or consent of instructor. Classical thermodynamics applied to mineral solutions, solute melts, and low- and high-temperature aqueous solutions and gases. Chemical kinetics and its application to geologic problems. Mr. Barton (Sp)

238. Metamorphic Petrology. Lecture, three hours; laboratory, six hours. Prerequisite: an introductory petrology and petrography course or consent of instructor. Interpretation of metamorphic rocks in the light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamic principles of phase equilibria, applications in metamorphic terranes. Mr. Ingersoll (Sp)

239. Structural Petrology of Deformed Rocks. Discussion, three hours; laboratory, three hours. Prerequisites: course 238, and one of 241 or 245A. The behavior of some common minerals, and relation of physical and chemical properties to crystal structure. Mr. Christle (F)

240. Space Plasma Physics. Lecture, three hours. Prerequisite: one of courses 230 or 2310A. The physics of plasmas in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds; steady-state magnetospheres; magnetospheric convection, solar substorms; magnetic merging; field-aligned currents and magnetosphere-ionosphere coupling; ring current dynamics; and wave particle instabilities. Mr. Christie (F)

241. Sedimentary Petrology. Lecture, two hours; laboratory, six hours. Prerequisites: courses 51B, 103B. Texture, composition, structure, and modes of origin of the sedimentary rocks. Content varies from year to year. Mr. Reid (F)

242. Sandstone Petrology. Lecture, two hours; laboratory, four hours. Prerequisite or corequisite: course 141. Petrography of sandstones, with emphasis on provenance, facies, and paleocurrent reconstructions. Mr. Ingersoll (Sp)

243. Tectonics of Sedimentary Basins. Lecture, two hours; discussion, two hours, field trips. Prerequisites: courses 103B, 119. Recommended: course 141. Plate-tectonic settings of sedimentary basins. Basin analysis, stratigraphy, paleoenvironmental sedimentology, and related subjects in the context of plate-tectonic controls on basin evolution. Mr. Ingersoll (W)

245A-245B. Stress and Deformation. Lecture, three hours. Prerequisites: Physics 51B, 6B, Mathematics 32A, and 32B, or consent of instructor. Recommended: Mathematics 33A. Scalars, vectors, tensors; subscript notation; rotation and inversion of axes, transformation matrix; stress; finite homogeneous strain; rotation; infinitesimal strain, strain rate; Mohr's circle construction and other graphical methods; flow laws. Mr. Oertel

246. Stress in the Lithosphere. Lecture, three hours; prerequisite course 245A or course 245C or Engineering 108 or Coreq. Engineering 108 and Consent of Instructor. Stressing and deformation, hydromechanics, fault plane solutions, seismic stress drops; effects of erosion, cooling, Earth ellipticity, topography and density anomalies. State of stress in plate boundaries and interiors. Application of finite element and analytic methods to stress determination. Mr. Bird (W)

247. Glaciology. Lecture, three hours. Prerequisite: course 245A or equivalent or consent of instructor. Occurrence and classification of glaciers; accumulation and ablation; glacier budget; mechanical properties of ice; glacier flow; crevasses; textural and structural features; thermal relationships; bed slip; climatic response; catastrophic advances. Mr. Shreve (Sp, every third year)

248. Advanced Structural Geology. Lecture, three hours; discussion, two hours. Prerequisite: course 245A, 51B, or permission of instructor. Structural geology, structural geology and tectonics, regional tectonic problems. Mr. Oertel (Sp)

249. Structural Analysis of Deformed Rocks. Discussion, three hours; laboratory, three hours. Prerequisites: courses 111 and 112, or consent of instructor. Recommended: course 248. Geometrical analysis of the mechanics of deformation of rocks. Geometric analysis of the development of deformable primary features. Interpretation of structural history in metamorphic terranes. (Alternates yearly with course 239.) Mr. Christle (F)

251. Seminar in Mineralogy. Lecture, three hours. Examination of groups of rock-forming minerals (e.g., feldspars, integrating such aspects as mineral chemistry, crystal structure, chemical equilibrium, and petrogenesis. Mr. Dollase

252. Seminar in Geochemistry. Lecture, two hours; discussion, two hours. Phase equilibria under constant conditions; chemistry of ocean waters, recent and ancient sediments, structure and chemistry of the upper mantle, geochronology, cosmochemistry, and cosmochemistry. Mr. Kaplan (W)

253. Seminar in Petrology. Lecture, two hours; discussion, two hours. Problem of igneous or metamorphic petrology: methods of evaluating physical conditions of metamorphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of the mantle; element fractionation; and other current subjects in the field. S/U or letter grading. Mrs. Reid (W)

254. Seminar in Sedimentology. Lecture, three hours. Processes of sediment transport and deposition; deep sea sediments; deltas and estuaries; petrology of carbonates, sandstones, and limestones; stratigraphy; paleoenvironmental studies. Mr. Farmer (Sp)

255. Seminar in Structural Geology and Tectonics. Lecture, three hours. Flow and fracture in the Earth's crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plumes, volcanoes, and consolidation of consolidated sediments. Modern concepts of the oceanic basins; processes leading to segregation of continental-type rocks. Mr. Yin (F)

256. Seminar in Glaciology and Geomorphology. Lecture, three hours. Glacier physics, theoretical geomorphology, river mechanics, statistical models, glacial paleoclimates. Mr. Shreve (F)

257. Seminar in Paleontology. Lecture/discussion, three hours. Prerequisite: consent of instructor. Advanced topics in paleobiology, biostratigraphy, paleoecology, and paleoecology, with emphasis on relations to other disciplines. Mr. Runnegar, Mr. Schopf

258. Seminar in Mineral Deposits. Lecture, three hours. Problems of distribution, composition, and formation of mineral deposits; mineral economics; investigations of opaque minerals by microscopic or other techniques. Mr. Barton (F)

259. Seminar in Paleoecology. (Not the same as course 259.) Lecture, two hours; discussion, two hours. Prerequisite: course 244 or consent of instructor. Basin evolution and paleoecology, with emphasis on the Phanerozoic in the Western U.S. Mr. Ingersoll (Sp)

260. Seminar in Advanced Topics in Geochemistry (2 to 4 units). (Formerly numbered 259.) Topics vary. May be repeated for credit.

261. Topics in Magnetostratigraphy. Lectures, discussions, and exercises on specific advanced topics in paleomagnetism. Previous courses examined magnetic storms, magnetic substorms, ultralow frequency waves, and diabatic particle motion in the Earth's radiation belts. Mr. McPherron (F)

265. Instrumentation, Data Processing, and Data Analysis in Space Physics. Lecture, three hours. Principles, testing, and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra. Mr. McPherron (F)

268. Seminar in Resource Analysis. Lecture, three hours. Prerequisite: consent of instructor. Geologic, geophysical, economic, and technological factors in studies of optimum use of mineral and energy resources. Emphasis on different mineral or energy sources from time to time. Mr. Carlisle (Sp)
East Asian Languages and Cultures

290 Royce Hall, (213) 206-8235

Professors
Robert C. Epp, Ph.D. (Japanese)
William R. LaFleur, Ph.D. (Japanese)
Peter H. Lee, Ph.D. (Korean), Chair
E. Perry Link, Jr., Ph.D. (Chinese)
Hartmut E. F. Scharte, Ph.D. (Sanskrit)
Kenneth K. S. Chen, Ph.D., Emeritus

Ben Befu, Ph.D. (Japanese)
Hung-hsiang Chou, Ph.D. (Chinese)
Herbert E. Plutschow, Ph.D. (Japanese)
Richard E. Strassen, Ph.D. (Chinese)
Shirleen S. Wong, Ph.D. (Chinese)

Assistant Professors
Robert E. Buswell, Ph.D. (Chinese)
Leslie Fincus, M.A., Acting (Japanese)

Lecturers
Yen-ling Lee, M.A. (Chinese)
Ikuyo Nishide, M.A. (Japanese)
Sung-ock Shin, Ph.D. (Korean)
Yihua Wang, M.A. (Chinese)
Y. C. Chu, M.A., Emeritus
Kuo-yi Pao (Unensecen), M.A., M.S., Emeritus

Scope and Objectives
The Department of East Asian Languages and Cultures aims to provide students with an exposure to the rich cultural heritage of China, Japan, Korea, and India. This is accomplished through courses in language, literature, religion, thought, archaeology, and other aspects of culture. For undergraduates the department offers a program leading to the B.A. degree in Chinese or Japanese, in which the emphasis is on the language and culture of China or Japan. The language program aims to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner.

Bachelor of Arts in Chinese

Preparation for the Major
Required: East Asian Languages and Cultures 1A-1B-1C, 11A-11B-11C, 40A, History 9B-9C. Anthropology 22, East Asian Languages and Cultures 113A, and English 4 are recommended.

The Major
Required: A total of 111/2 courses, of which seven must be upper division language courses, including at least two vernacular language courses from East Asian Languages and Cultures 121A, 121B, 121C, 124A, 124B, 124C, 151A, 151B, and at least four classical language courses from 113A, 113B, 113C, 139, 152A, 152B, 163A, 163B, 163C.

The remaining four and one-half required courses must include East Asian Languages and Cultures 140A or 140B or 140C; one course from 170A, 170B, 173, or 183; 199 (at least two units in the senior year); Art History C115D, C115E, or C115F; and either History 182A, 182B, 182C, or 183.

English 95A, 95B, 95C, and additional courses in Chinese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program additional courses in classical Chinese and beginning courses in Japanese. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Bachelor of Arts in Japanese

Preparation for the Major
Required: East Asian Languages and Cultures 9A-9B-9C, 19A-19B-19C, 40B, History 9B-9C. Anthropology 22 and English 4 are recommended.

The Major
Required: A total of 121/2 courses, of which seven must be upper division language courses selected from East Asian Languages and Cultures 119A, 119B, 129, 134A, 134B, 137, 139, 145, C166, C178, 179A, 179B, C181, C182. The seven courses must include 119B, 129, and 134A or 134B or C166 or C178.

The remaining five and one-half required courses must include East Asian Languages and Cultures 141A or 141B; CM176; one course from 174 or 184; 199 (at least two units in the senior year); Art History 114C; and either History 187A, 187B, or 187C.
English 95A, 95B, 95C, and additional courses in Japanese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program three courses in classical Japanese and beginning courses in Chinese. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

**Master of Arts Degree**

**Admission**

To qualify for admission you are expected to (1) meet general University requirements, (2) have taken a minimum of three quarter courses or the equivalent in classical Chinese or Japanese, and (3) present a B.A. degree from a Department of East Asian Languages and Cultures similar to UCLA's. Applicants with the B.A. in another field or from departments whose requirements are less rigorous are admitted to the Department of East Asian Languages and Cultures (290 Royce Hall, UCLA, Los Angeles, CA 90024-1540) only if they can meet the requisite standards within one year. Selection is based on (1) prior scholastic performance, (2) recommendations by professors, (3) score on the Graduate Record Examination (GRE) General Test, and (4) strength and suitability of purpose.

International students are also required to take the Test of English as a Foreign Language administered by the Educational Testing Service (ETS), unless this test is not offered in their country of residence. International students must also take a test in translation from Chinese or Japanese into English, either with the comprehensive examinations or earlier.

**Major Fields or Subdisciplines**

M.A. students may specialize in either Chinese language and culture or Japanese language and culture.

**Language Requirements**

Students majoring in Chinese must have completed at least one year of modern Japanese with a grade of B or better; those majoring in Japanese must have completed one year of classical or modern Chinese with a grade of B or better. This requirement may be fulfilled before admission to the M.A. program.

International students may also be required to take English (ESL) 33A, 33B, 33C, 34, 36, or other ESL courses.

**Course Requirements**

Nine courses are required for the degree, of which five must be graduate courses. East Asian Languages and Cultures 295 is required for the Chinese major; course 296 is required for the Japanese major. In unusual cases and with departmental consent, courses taken outside the department that are appropriate to

your program may be applied toward the nine courses but not toward the five graduate courses. Courses in the 500 series and those taken to meet admission standards and language requirements may not be applied toward the total course requirement.

**Ph.D. Degree**

**Admission**

An M.A. degree in the field or in a related field is required. Selection among qualified applicants from outside the department is based on the four criteria listed under admission to the M.A. degree, plus a recent research paper by the applicant. Students with an M.A. in the department are judged on their M.A. record, plus three letters of recommendation. Those with an M.A. from other institutions must also take a translation examination.

International students must meet the same requirements specified for such students in the M.A. program, including a translation examination at the time of the qualifying examinations or earlier.

**Major Fields or Subdisciplines**

The department emphasizes three major fields at the Ph.D. level: (1) Chinese language and literature with the subdisciplines of poetry, drama, fiction, and modern literature; (2) Japanese language and literature with the subdisciplines of ancient, medieval, early modern, and modern literature; (3) Buddhism with the subdisciplines of Chinese and Japanese Buddhism. In addition, a program in ancient Chinese civilization or Japanese linguistics may be arranged by petition. Departmental faculty will also participate in the design of individual Ph.D. programs.

**Foreign Language Requirement**

You must demonstrate reading knowledge of French or German by passing the Graduate School Foreign Language Test administered by the Educational Testing Service (minimum score of 500) or by passing a level five course with a grade of B or better. With the consent of the department, Russian may be substituted.

**Course Requirements**

Students entering the program with an M.A. in a different field, or in the same field but from another institution, must meet the standards of the department's M.A. coursework in addition to fulfilling Ph.D. course requirements. A minimum of five courses (not including courses taken to meet the language requirements listed below) beyond the M.A. degree is required. In addition, students majoring in Chinese must take three years of modern Japanese or the equivalent (i.e., one course beyond East Asian Languages and Cultures 119B); those majoring in Japanese must take two years of classical Chinese or the equivalent (i.e., three courses beyond East Asian Languages and Cultures 113C). Those majoring in Buddhist studies must also take appropriate courses in Sanskrit or Pali. A grade of B or better is required in courses taken to fulfill the language requirements.

**Qualifying Examinations**

You must take three written examinations, as follows:

(1) For students in Chinese literature:

(a) A general examination in Chinese literature.

(b) Examinations in two of the following approved fields (which cannot be from the same group): (1) Chinese poetry, Chinese drama, Chinese fiction, modern Chinese literature; (2) ancient Chinese civilization, Chinese Buddhism or another field of Chinese thought or religion; (3) Japanese literature; (4) a field offered in another department or interdepartmental program.

(2) For students in Japanese literature:

(a) A general examination in Japanese literature.

(b) Examinations in two of the following approved fields (which cannot be from the same group): (1) ancient, medieval, early modern, or modern Japanese literature; (2) Japanese Buddhism or another field of Japanese thought or religion; (3) Chinese literature; (4) a field offered in another department or interdepartmental program.

(3) For students in Buddhism, ancient Chinese civilization, or Japanese linguistics:

(a) An examination in your major language area.

(b) A general examination in your major field.

(c) An examination in an approved subfield within your major field.

(d) A general examination in another approved field inside or outside the department.

The qualifying examinations must be taken within a four-week period after satisfying all language and course requirements. With consent of the department, you may repeat the examinations once only.
Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
A final oral defense of the dissertation is optional at the discretion of the doctoral committee.

Lower Division Courses
No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1A-1B-1C. Elementary Modern Chinese. Lecture, three hours; discussion, three hours. Not open to students who have earned, from whatever source, enough Chinese to qualify for more advanced courses. Introduction to the fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Ms. Lee
7A-B-7C. Elementary Modern Korean. Lecture, three hours; discussion, two hours. Not open to students who, from whatever source, already know the language. An introduction to standard spoken Korean and Korean writing, with emphasis on conversation. Ms. Shin
9A-9B-9C. Elementary Modern Japanese. Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Introduction to modern Japanese with attention to conversation, grammar, and the written forms. Conversation drill based on material covered in class. Ms. Akatsuka
11A-11B-11C. Intermediate Modern Chinese. Lecture, two hours; discussion/laboratory, three hours. Prerequisite: course 1C or consent of instructor. Designed to strengthen the communicative skills of listening, speaking, reading, and writing. Grammar review; knowledge of idiomatic expressions, and both traditional and simplified characters. Ms. Wang

Upper Division Courses
113A-113B-113C. Introduction to Classical Chinese. Lecture, three hours. Prerequisite: course 1C or consent of instructor. Grammar and readings in selected texts. Ms. Wong
117A-117B. Advanced Modern Korean. Lecture, three hours. Prerequisite: course 1C or equivalent. Ms. Lee
121A-121B-121C. Advanced Modern Chinese. Lecture, three hours; discussion, one hour. Prerequisite: course 11C or consent of instructor. Materials selected from contemporary Chinese publications, with emphasis on social sciences. Texts analysis for their linguistic features and social and cultural background. Readings, compositions, informal debates on topical issues, and oral presentations. Ms. Wang
122A-122B. Readings in Modern Chinese Literature. Lecture, three hours. Prerequisite: course 121 B or consent of instructor. Readings and discussion of works of modern Chinese literature. 122A. Poetry and Prose; 122B. Drama and Fiction. Ms. Wang
124A-124B-124C. Readings in Modern English Chinese. Lecture/discussion, three hours. Prerequisite: course 121 B or consent of instructor. Selected readings in modern essays dealing with cultural, social, political, economic, and educational issues taken from editorials, commentaries, and literary texts. In addition, students work with material in the area of their professional interests. Ms. Lee
126. Post-1949 Chinese Literature. Prerequisite: course 121B or consent of instructor. Reading and discussion of selected works in contemporary poetry, drama, and fiction, with emphasis on the People's Republic of China. Mr. Link
128. Readings in Modern Korean Literature. Prerequisite: knowledge of modern Korean. Reading and discussion of selected works in modern Korean literature. P/NP or letter grading. Mr. Lee
134A. Introduction to Kawabata Yasunari. Lecture, three hours. Prerequisite: course 19C. Reading and analysis of the Nobel laureate's short stories, with particular emphasis on their emotional structure. Mr. Epp (F, even years)
134B. Introduction to Mushakoji Saneatsu. Lecture, three hours. Prerequisite: course 19C. Reading and discussion of Mushakoji's prose, fiction, and poetry. Mr. Epp (F, odd years)
135. Buddhist Themes in Asian Literature. Knowledge of Asian languages not required. A survey of selected works of Buddhist literature of India, China, and Japan, including canonical works such as the Lotus Sutra and noncanonical works of poetry, prose, and drama containing Buddhist themes. Mr. LaFleur
136. Japanese Folklore. Lecture, three hours. Prerequisite: consent of instructor. Knowledge of Japanese not required. Lectures/disussions on the native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto-Buddhist syncretism, and other non-Buddhist belief systems found in Japan. P/NP or letter grading. Mr. Plutschow
137. Introduction to Kambun and Other Literary Styles. Lecture, three hours. Prerequisite: course 119B or consent of instructor. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Mr. Buswell
138. Introduction to Korean Buddhist Texts. Lecture, three hours. Prerequisites: courses 113C and/or 117A. An introduction to reading Korean Buddhist texts written in Sino-Korean and taken from indigenous doxographic materials and philosophical writings. Korean Buddhist apocryphal scriptures, native exegetical commentaries, and Son (Zen) texts. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated for credit with consent of instructor. Mr. Buswell
139. Introduction to Chinese Buddhist Texts. Lecture, three hours. Prerequisites: course 113C or 119A or 121A. Readings in Buddhist texts written in literary Chinese and taken from translated Indian sutras, indigenous exegetical materials, Chinese apocryphal scriptures, and Ch'an writings. Problems in translation from Indo-European languages into Chinese; the evolution of Chinese Buddhist terminology; and periphrases. May be repeated for credit with consent of instructor. Mr. Buswell
140A-140B-140C. Chinese Literature in Translation. Knowledge of Chinese is not required. Open to freshmen and sophomores, as well as all other students. Lectures and collateral reading of representative works in English translation. 140A. Poetry from Earliest Times to the 19th Century; 140B. Narrative and Drama from Earliest Times to the 19th Century; 140C. 20th-Century Poetry, Drama, Fiction. Mr. Link, Mr. Strassberg, Ms. Wong
141A-141B. Japanese Language in Translation. Knowledge of Japanese not required. Open to freshmen and sophomores, as well as all other students. A survey of Japanese literature from the beginning to modern times, emphasizing Chinese, Buddhist, and Western influences. 141A. Beginning to 1600; 141B. 1600 to Modern Times. Ms. Pincus, Mr. Plutschow

142A-142B. Korean Literature in Translation. Lecture, three hours. Knowledge of Korean not required. Open to freshmen and sophomores, as well as all other students. A survey of Korean literature from the beginning to the present day, with all readings from English translations. 142A. Poetry and Prose to the End of the 19th Century; 142B. Literature of the 20th Century. Mr. Lee

145. Readings in Modern Expository Japanese. Prerequisite: course 119A. Readings in contemporary affairs, including politics, economics, trade, and social issues, taken from current Japanese newspapers and journals. Ms. Pincus

151A-151B. Readings in Traditional Chinese Fiction. Prerequisite: course 113C or equivalent or consent of instructor. Selected readings from the classic Chinese novels. Discussion of the major literary works as a whole and lecture and assignment of an extra lecture course; emphasis on translation and obtaining a command of the various literary styles, as well as on critical interpretation of the texts. Mr. Strassberg

152A-152B. Readings in Classical Chinese Poetry and Prose. Lecture, three hours. Prerequisite: course 113C or consent of instructor. Discussion and collateral reading of representative works selected on the basis of such critical concerns as thematic patterns, image clusters, genres, and the characteristics of major poets. Ms. Wong

154A-154B. Mongolian. Lecture, three hours; laboratory, one hour. To be offered when requested by a sufficient number of students. Mr. Pao

160. Elementary Sanskrit. Introduction to script and grammar, with reading exercises and attention to the significance of Sanskrit for the understanding of other Indo-European languages. Mr. Scharfe

161. Intermediate Sanskrit. Prerequisite: course 160 or equivalent. Advanced aspects of grammar and the reading of literary texts. Mr. Scharfe

162. Advanced Sanskrit. Prerequisite: course 161 or equivalent. Reading of the entire Bhagavadgita or a comparable amount of other Sanskrit literature. Ms. Scharfe

163A-163B-163C. Readings in Chinese Literary Texts. Lecture, three hours. Prerequisite: course 113C.

165. Readings in Sanskrit. Prerequisite: course 162 or equivalent. Extensive reading in such texts as best serve the purpose of the student. Mr. Epp

166. Kawabata’s Contemporaries. (Formerly numbered 153A.) Lecture, three hours. Prerequisite: course 119A or 134A or 134B. Readings in the fiction and poetry of such writers as Ibuse Masaji, Manyauma Kaoru, Ozaki Kazuo, Tsusui Sakae, and Yokomitsu Richi. Concurrently scheduled with course C266. Mr. Epp (W, odd years)

167. Introduction to Indic Philosophy. A survey of the main trends in Indian philosophy from ancient to modern times. Ms. Maitri

170A-170B. Archaeology in Early and Modern China: 170A. Introduction to Chinese Archaeology. Early Chinese study of their own past, types of artifacts, antiquarianism, and the beginnings of scientific archeology in China before 1949. Mr. Scharfe

170B. Archaeology in the People’s Republic of China. Survey of major excavations of sites of all periods, carried out under the intensive archaeological program of the PRC, and the interpretation of the archaeological findings. Mr. Chou

171. Buddhist Meditation Traditions. Lecture, three hours. Knowledge of Asian languages not required. A survey of the theory and practice of meditation in Buddhism, with emphasis on the Theravada and Zen schools. Topics include various typologies of meditation, the symbolic relationship between meditation and soteriology, and the processes by which doctrinal innovation prompts changes in meditative praxis. Mr. Buswell

173. Chinese Buddhism. Knowledge of Asian languages not required. The introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of the Chinese schools of Buddhism such as Pure Land and Zen, contributions to Chinese culture. Mr. Buswell

174. Japanese Buddhism. Knowledge of Asian languages not required. The development of Buddhism in Japan and its influence on Japanese culture, with emphasis on the arts. Mr. LaFleur

175. Korean Buddhism. Lecture, three hours. Knowledge of Asian languages not required. Introduction and development of Buddhism in Korea, interactions between indigenous Korean culture and the Sinic traditions of Buddhism, Korean syntheses of imported Buddhist theological systems and native in- teractive techniques, and the independent Son (Zen) schools of Korea. Mr. Buswell

177. Introduction to the Structure of Japanese. (Formerly numbered 175.) (Same as Linguistics M175.) Lecture, three hours. Prerequisites: two years of Japanese, Knowledge of linguistics not required. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in line with the fundamental concepts of modern linguistics, often in the form of a contrastive analysis of Japanese and English. Concurrently scheduled with course C276. Ms. Akatsuka

178. Introduction to Shiga Naoya. (Formerly numbered 153B.) Lecture, three hours. Prerequisite: course 119A or 134A or 134B. Reading and discussion of Shiga’s short stories, with special emphasis on his literary technique until 1918. Concurrently scheduled with course C278. Mr. Epp (W, even years)

179A. Readings in Medieval Japanese Literature. Lecture, three hours. Prerequisites: course 129 or consent of instructor, reading knowledge of modern and some classical Japanese. Readings and discussion in prose and poetry from the 13th to 15th century, using original texts in classical Japanese. Mr. Plutschow

179B. Readings in Edo Literature. Lecture, three hours. Prerequisite: course 129. Reading and discussion in prose, poetry, and drama from 1600 to 1858. Mr. Belu

181A. Readings in the Japanese Family System. (Formerly numbered 142A,) Lecture, three hours. Prerequisite: course 119B or equivalent. Analysis and discussion of post-World War II articles criticizing the family system and the way it has functioned in the past. Concurrently scheduled with course C277.

181B. Human Problems in the Modernization of Japan. (Formerly numbered 142B,) Lecture, three hours. Prerequisite: course 119B. Analysis and discussion of articles dealing with the modernization in Japanese society and the relation of modernization to traditional values, self-awareness, and the role of the intellectual. Concurrently scheduled with course C292. Mr. Epp (Sp, every second or third year)

182. Introduction to Chinese Thought. Lecture, three hours. Knowledge of Asian languages not required. A general survey of indigenous Chinese thought from the Chou period to around 1800, covering Confucianism, Taoism, Mo-tzu, the legalists, the influence of Buddhism, and the development of neo-Taoism and neo-Confucianism. Mr. Scharfe

184. Introduction to Japanese Thought. Lecture, three hours. Knowledge of Asian languages not required. A general survey of Japanese thought from early to modern times, including Shinto, Buddhism, Confucianism, and the development and evolution of indigenous religions. Mr. Plutschow

185. Introduction to Korean Thought. Lecture, three hours. A general survey of Korean thought from the earliest records to the 20th century, including shamanism, Taoism, Buddhism, Christianity, and the role of the Korean intellectual. Mr. LaFleur

188. Chinese Etymology and Calligraphy. Prerequisite: one year of classical Chinese or consent of instructor. Covers (1) the development of the Chinese writing system from the "Pottery Inscriptions" 6,000 years ago to the modern "Simplified Forms" and the studies of the Six Scripts principles which were used to form Chinese characters and (2) the aesthetic training of calligraphic art and its appreciation, with focus on the ways of recognizing and interpreting the "Cursive Style," a common form of handwriting. Mr. Chou

189. Chinese Brush Painting. Lecture, two hours; studio, two hours. A combination studio-lecture course surveying the aesthetics and techniques of Chinese literati painting. Emphasis on realizing the philosophical ideals of critical treatments through mastery of the traditional materials and elements of landscape. Mr. Strassberg

199. Special Studies in East Asian Languages and Literatures. Prerequisite: one year of Chinese or Japanese, consent of instructor. Required of senior majors. Special individual study. May be repeated once with consent of instructor.

Graduate Courses

203A-203B. Chinese Philosophical Texts. May be repeated for credit with consent of instructor. Mr. Strassberg

212. Korean Buddhist Texts. Lecture, three hours. Prerequisite: consent of instructor. Selected topics in Korean Buddhist texts. Coverage varies. 

213. Chinese Buddhist Texts. May be repeated for credit with consent of instructor. Mr. Buswell

214A-214B. Pali and Prakrits. Prerequisites: knowledge of Sanskrit equivalent to course 161, consent of instructor. Grammatical studies and reading of texts. Comparative considerations. Mr. Scharfe

221A-221B. Introduction to Panini’s Grammar. Prerequisite: course 162 or equivalent. Reading of selected passages of the text, with an introduction to Panini’s technique. Mr. Scharfe
M222A-M222B. Vedic. (Same as Iranian M222A-M222B.) Prerequisites: knowledge of Sanskrit equivalent to courses 122A, consent of instructor. Characteristics of the Vedas, their significance in the development of mythology and religious concepts. May be repeated for credit. 

223. Seminar: Linguistic Analysis of Japanese Narrative. For students: course CM176 or consent of instructor. Analysis of the development of modern Japanese narrative, especially in the literature of the Edo period. May be repeated for credit with consent of instructor. 

250. Seminar in Medieval Japanese Literature. Prerequisite: one year of classical Japanese. Selection of readings for travel poetry, travel diaries, and other genres of Japanese literature of the Heian, Kamakura, Nambokucho, and Muromachi periods. May be repeated for credit with consent of instructor. 

251. Seminar: Selected Topics in Modern Chinese Literature. Prerequisite: consent of instructor. Selections from 20th-century Chinese literature. May be repeated for credit with consent of instructor. 

252. Seminar: Selected Topics in Japanese Literature. May be repeated for credit. 

255. Seminar: Selected Topics in Buddhist Studies. May be repeated for credit with consent of instructor. 

M238. Graduate Seminar in the Japanese Ritual Arts. (Same as Folklore M238.) Reading knowledge of Japanese not required. Lectures, discussions, and readings on the ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and the competitive as well as acrobatic arts, with special emphasis on the religious purposes and symbolic structures of these arts. 

240. Advanced Chinese Classics. Reading and discussion of selected works in classical Chinese, including various types of literary prose and historical narratives, with attention to stylistic features and historical development. May be repeated for credit with consent of instructor. 

242B. Prose and Poetry from 1600 to 1868. May be repeated for credit with consent of instructor. 

243. Seminar in No and Kyogen. Lecture, three to four hours. Prerequisite: knowledge of classical Japanese. Readings of selected No and Kyogen texts from the Muromachi and Edo periods, as well as readings of critical writings and discussion of theories. May be repeated for credit with consent of instructor. 

244. Seminar in Traditional Chinese Fiction and Drama. Prerequisite: reading knowledge of colloquial and literary Chinese. Seminar topics alternate yearly between traditional fiction and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in fiction selected from narrative genres such as the Chou (Chou chapter), or from the Ch'in period, or from the period of Tsa-chu and Ch'in-ch'u. May be repeated for credit with consent of instructor. 

245. Seminar in Modern Japanese Fiction. Lecture, three hours. May be repeated for credit with consent of instructor. 

246. Modern Japanese Poetry. Lecture, three hours. Studies of individual poets who became established between World War I and World War II and who consequently illustrate the transitional artists trying to modernize their tradition. May be repeated for credit. 

247. Selected Readings in Sanskrit Texts. May be repeated for credit with consent of instructor. 

248. Classical Korean Fiction. Lecture, three hours. Prerequisite: reading knowledge of Korean. Formal and thematic study of tales of the marvelous, romance, satirical stories, diaries, and p'ansori fiction. Status of fiction in society and culture, fiction as the imaginative representation of the writer's relationship to real conditions of existence. The latest Western theory of narratology applied in analysis. May be repeated once with consent of instructor. 

C276. Introduction to Shiga Naoyu. Lecture, three hours. Prerequisite: course 119A or 134A or 134B. Study of selected works by a 20th-century Japanese novelist. 

278. Seminar: Selected Topics in Buddhist Studies. May be repeated for credit with consent of instructor. 

279. Seminar: Topics in East Asian Literary History. Prerequisite: reading knowledge of at least one East Asian language. Critical issues common to literary historiography in East Asia, including periodization, canon, ideology, interaction between high and low culture, the written and the oral, etc. New interpretations and methods required in the ideological dimensions of literary works. 

281. Readings in the Japanese Family System. Lecture, three hours. Prerequisite: course 119B or equivalent. Not open for credit to students with credit for course C181 or former course 142A. Analysis and discussion of post-World War II literature critizing the nuclear family and the way it has functioned in the past. Concurrently scheduled with course C181. 

282. Human Problems in the Modernization of Japan. Lecture, three hours. Prerequisite: course 119B. Not open for credit to students with credit for course C182 or former course 142B. Analysis and discussion of articles dealing with the definition of modernization in Japanese society and the relation of modernization to traditional values, self-awareness, and the role of the individual. 

285. Selected Topics in Japanese Buddhist Studies. May be repeated for credit with consent of instructor. 

286. Kawabata's Contemporaries. Lecture, three hours. Prerequisite: course 119A or 134A or 134B. Not open for credit to students with credit for course C166 or former course 153A. Readings in the fiction and poetry of such writers as Ibusu Masaji, Murayama Karo, Otsuki Kazuo, Tsuboi Sakae, and Yokomitu Richi. 

287. Seminar: Selected Topics in Chinese Archaelogy. Prerequisite: course 170A or 170B or consent of instructor. Discussion and research on major problems about Chinese archaeology and the different interpretations to the most important archeological finds. May be repeated for credit with consent of instructor. 

288. Seminar: Selected Topics in Chinese Cultural History. Prerequisite: consent of instructor. Discussion and research on the major problems related to Chinese culture, such as beginnings of the Chinese civilization and the Chinese dynastic history. Other topics include the cultural developments of ancient and medieval China. May be repeated for credit. 

289. Seminar: Literary Translation from Korean. Prerequisite: reading knowledge of Korean. In consultation with instructor, students select works to be translated. Devoted to the skill of producing accurate and readable translations, with emphasis on problems and techniques unique to poetry and prose. 

290. Seminar: Literary Translation from Korean. Prerequisite: reading knowledge of Korean. In consultation with instructor, students select works to be translated. Devoted to the skill of producing accurate and readable translations, with emphasis on problems and techniques unique to poetry and prose. 

291. Bibliography and Methods of Research in Chinese. Required of all graduate students in Chinese. Lectures and discussions on the research methodology dealing with traditional Chinese materials, with emphasis on bibliography training (including the most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism, and rare book editions. 

295. Independent Study. Prerequisite: graduate standing, reading knowledge of Korean or Chinese. A review of basic Western and modern Korean reference books, with a concentration on Korean literature and language, and a survey of basic bibliographical material. In addition, introduction to the most important primary sources in the student's field of specialization. 

299. Independent Study. Prerequisite: graduate standing, reading knowledge of Korean or Chinese. A review of basic Western and modern Korean reference books, with a concentration on Korean literature and language, and a survey of basic bibliographical material. In addition, introduction to the most important primary sources in the student's field of specialization.
Curriculum and instruction at the University. May be repeated with consent of instructor; however, none may be applied toward the minimum course requirement for the M.A.

Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. S/U grading.

Bachelor of Arts Degree

Preparation for the Major

Required: History 9C, 11A-11B; East Asian Languages and Cultures 1A-1B-1C or 9A-9B-9C or a parallel Cantonese sequence; East Asian Languages and Cultures 11A-11B-11C or 19A-19B-19C. Students planning to pursue classical Chinese in the major need East Asian Languages and Cultures 113A-113B-113C in addition to the above courses.

The Major

This consists of three parts:

2. Five courses from the following: any upper division courses in the social sciences listed above not being used to satisfy that requirement; any upper division courses in the Department of East Asian Languages and Cultures not being used to satisfy other parts of the major requirements; any new upper division courses relevant to East Asian or Asian American studies (including no more than three CED courses) which may be approved by the Executive Committee of the college on the recommendation of the advisory committee: Art History 114C, 114E, C115B, C115C; Music 140C, 141, 145, 146A, 146B, 146C, 147A, 147B*

3. The prescribed courses in one of the following areas (courses offered to satisfy this requirement may not be applied toward other parts of the major requirements): (a) archaeology: any four courses from East Asian Languages and Cultures 170A, 170B, Anthropology 112*, 115Q*, 115R*; (b) geography: Geography 133, 185, and two additional upper division geography courses; (c) history: four upper division or graduate courses in East Asian or Southeast Asian history (History 182A, 182B, 183A, 183B, 184, 187A, 187B, 187C, 190A, 190B, 197 when in the East Asian field); (d) political science: Political Science 115* and three courses from 135, 136, C137A, 137B, 159, 160, 161, C197 when in the East Asian field; (e) sociology: Sociology 156* and three courses from 102*, 116*, 132, 134*, 188.

*Courses so marked have prerequisites which are not included among the courses mentioned here.

Sunil Sharma, Ph.D.
Carol Simon, Ph.D.
Guido Tabellini, Ph.D.
Michael Waldman, Ph.D.

**Scope and Objectives**

UCLA’s Economics Department is ranked among the 10 best in the nation according to a recent survey conducted by the Conference Board of the Associated Research Councils. Its undergraduate program is designed for students who wish to gain a thorough understanding of economic analysis. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specializations in the discipline, the analytic core of the major in economics is closely structured. Some courses are appropriate for nonmajors, but the curriculum is most suitable for students who wish to make the study of economics the primary focus in their undergraduate education.

The undergraduate major provides analytical training in reference to socioeconomic phenomena and provides an excellent theoretical background for those pursuing graduate education in law, management, public administration, journalism, social welfare, architecture and urban planning, and education, as well as economics.

The graduate program is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students’ ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas. A Master of Arts program is also offered, which involves coursework and comprehensive examinations designed for the Ph.D. student.

**Bachelor of Arts in Economics**

**Pre-Economics Major**

While you are completing the lower division preparation courses for the major, you may be classified as a pre-economics major. When you have completed the preparation courses for the major and before you reach 100 quarter units (but no later than 135 quarter units), you must petition to enter the major at the undergraduate counselor’s office in 2253 Bunche Hall.

**Preparation for the Major**

**Required:** English 4 or 30 or two 100W courses; Economics 1, 2, 40 (or Statistics 50 as a substitute for course 40); two courses in calculus (i.e., Mathematics 3A and 3B, or 3A and 3E, or 31A and 31B. Mathematics 3E is specifically designed for economics). All courses must be completed for a letter grade. A 2.0 (C) grade is required in each major course, with a combined 2.5 GPA required in the economics and mathematics courses. You must petition for major standing by the time you attain 135 quarter units.

Repitition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

**Major Fields**

Economic theory (courses 101A, 101B, 102, 103A-103Z, 104, 105AH, 105BH, 107), economic development (courses 111, 112), regional economics (courses 120, 121), public finance (courses 130, 133, M135, M136); statistics, mathematical economics, and econometrics (courses 141, 142, 143, 144, 145, 146, 147A, 147B); labor economics (courses 150, 151, 152); money and banking (courses 160, 161); government and industry (courses 170, 171, 172, 173, 174, 175, 176); economic institutions (courses 180, 181A, 181B, 182, 183, 184); international economics (courses 191, 192).

**Bachelor of Arts in Economics/Business**

This program offers students a business orientation in their undergraduate studies and is designed to prepare students for careers in business and for graduate education in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see “The Major”).

**Admission**

Enrollment in the program is limited. Applications for admission are handled exclusively by the Department of Economics. To apply you must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit quarter of residence in regular session at UCLA, and all courses listed under “Preparation for the Major.” In addition, you must be enrolled in UCLA regular session at the time of application and have an overall UCLA grade-
Preparation for the Major

**Required:** Economics 1, 2, 40 (or Statistics 50); English 4 or 30 or two 100W courses; Management 1A, 1B; Mathematics 3A and 3B, or 3A and 3E, or 31A and 31B (Mathematics 3E is specifically designed for economics). All courses must be completed for a letter grade.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the economics/business counselor in 2250B Bunche Hall before enrolling in any courses for the major.

The Major

**Required:** Economics 101A, 101B, 102, and at least two courses from 104, 173, 174, 184; four other upper division courses in economics in at least two different fields; four upper division courses from Management 108, 120A, 120B, 122, 123, 124, 127, 130, 133, 140, 175. Learning Center courses or courses transferred from other institutions, including UCLA Extension, may not be applied toward the management part of the major. All major courses must be completed for a letter grade. Transfer credit for any of the major courses is subject to department approval; consult the economics/business counselor before enrolling in any courses for the major.

You must maintain a UCLA 3.0 grade-point average throughout your program and must have a 3.0 GPA (computed separately) for both upper division management and upper division economics courses in order to remain in the major (i.e., a grade-point deficiency in economics courses cannot be offset by grade points earned in management courses and vice versa when computing the upper division grade-point minimum).

**Bachelor of Arts in Economics/International Area Studies**

This program is for students who wish to attain a specialized knowledge of a particular geographical area in addition to the economics analysis provided by the major. It should be useful to those who plan careers in international business or government service. The department encourages participation in the University of California Education Abroad Program or other recognized international study programs. Experience in foreign firms or institutions would be an advantage but yields no academic unit credit toward the major.

**Admission**

Qualified students must submit written applications to the undergraduate counselor in 2253 Bunche Hall to be admitted. To apply you must have completed at least 72 quarter units, one 12-unit quarter of residence in regular session at UCLA, and all courses listed under "Preparation for the Major." In addition, you must be enrolled in UCLA regular session at the time of application. All courses must be completed for a letter grade. A minimum 2.0 (C grade) is required in each premajor course, with a combined 2.5 GPA in the economics and mathematics courses. Language course preparation need not be completed at the time of admission but must be completed before preparing the research paper required in Economics 199. Your program as a whole must be approved by the Economics Department faculty adviser before you are admitted to the major; you must apply before you reach 135 quarter units.

**Preparation for the Major**

**Required:** Economics 1, 2, 40 (or Statistics 50 as a substitute for course 40); two courses in calculus (i.e., Mathematics 3A and 3B, or 3A and 3E, or 31A and 31B. Mathematics 3E is specifically designed for economics). You also must complete the sixth quarter course (or equivalent) of any modern language (e.g., French 6, German 6, Russian 6, Spanish 25); these are most frequently offered in fulfillment of this requirement, but also see the offerings under Portuguese, Italian, Germanic Languages, Near Eastern Languages, African Languages, and East Asian Languages and Cultures).

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

**The Major**

**Required:** A total of 15 upper division courses selected from economics and the list of "Approved Noneconomics Courses" below. Eleven must be from economics, including Economics 101A, 101B, 102 (with a grade of C or better in each), 191, 192, 199, and five courses from at least two different fields in economics (selected from the "Major Fields" listed under the regular economics major). Four of the remaining upper division courses must be chosen from the approved list below and must include selections from at least two different departments. Economics 199 must be completed in your last quarter before graduation and includes the preparation of a research paper on the economy of the country or region of your specialization, sponsored and supervised by an Economics Department faculty member. Sources in the language of the region or country must be utilized. The noneconomics courses, the research paper, and the language learned must show consistency of purpose.

One or two of the five upper division economics electives may include Management 120A and/or 120B and/or 130 and/or 133 (Learning Center courses or courses transferred from other institutions may not be applied toward this option). A 2.5 GPA (computed separately from the economics courses) is also required in the management courses applied to this option.

Transfer credit for any courses to be applied toward the upper division requirements is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

To remain in the major you must maintain a 2.5 GPA for both economics and noneconomics courses, computed separately (i.e., a grade-point deficiency in economics courses cannot be offset by grade points earned in noneconomics courses and vice versa).

**Approved Noneconomics Courses**

Specialization in Computing

Majors in economics, economics/business, and economics/international area studies may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61, (3) completing at least two courses from Economics 104, 145, 146, 147A, 147B, 198 (course 198 must be approved as relevant to both the specialization in computing and economics by the vice chair for Undergraduate Affairs). A grade of C or better is required in each course. You graduate with a bachelor's degree in your major and a specialization in computing.

Bachelor of Science in Economics/System Science

The degree is described following the Economics Department courses.

Honors Program

The departmental honors program is open to junior or senior majors in economics, economics/business, economics/international area studies, and economics/system science who (1) have completed Economics 101A, 101B, and 102, (2) have a 3.5 grade-point average in economics courses, and (3) are eligible for the departmental honors committee. Total enrollment is limited to approximately 40 students. Applications are available from the undergraduate counselor in 2253 Bunche Hall or in each half of the theory comprehensive.

Economics 104, 145, 146, 147A, 147B, 198 (course 198 must be approved as relevant to both the specialization in computing and economics by the vice chair for Undergraduate Affairs). A grade of C or better is required in each course. You graduate with a bachelor's degree in your major and a specialization in computing.

Graduate Study

Admission

Applicants for graduate study who satisfy the University minimum requirements are eligible to apply. It is strongly recommended that you have undergraduate training in economics, mathematics, and statistics. You must also submit a full record of prior university experience, three letters of reference, and your scores in the Graduate Record Examination (GRE) General Test and the Subject Test in Economics.

The Department of Economics (2263 Bunche Hall, UCLA, Los Angeles, CA 90024-1477) admits students only for the Fall Quarter of each academic year. The deadline for submitting the admission/fellowship application is December 31.

Major Fields or Subdisciplines

Economic theory; economic development; urban and regional economics; public finance; mathematical economics; statistics and econometrics; labor economics; money and banking; industrial organization; economic institutions; international economics; uncertainty and information.

Master of Arts Degree

Course Requirements

Candidates for the Master of Arts degree in Economics should have completed the equivalent of an undergraduate major in economics. The department requires nine upper division and graduate-level courses in economics completed in graduate standing at UCLA. These courses must include Economics 101A, 101B, 102 with a grade of B or better and 107 with a grade of C or better.

Graduate-level courses in economic theory and history of economic thought may be substituted for these undergraduate courses. At least five of the nine courses must be strictly graduate economics courses.

You must also complete, if not previously taken, two courses in calculus and one in statistics. Economics 144 may be used as one of the calculus courses and Economics 40 as the statistics course.

With consent of the graduate chair, you may offer a maximum of two courses in other social sciences such as history, management, mathematics, psychology, education, or philosophy in partial satisfaction of the degree requirements; however, you must still take five graduate economics courses.

Four units of course 596 may be applied toward the total course requirement and the minimum graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination requirement for the master's degree may be met in one of the following three ways:

(1) A master's pass (M) or better in each of two full doctoral comprehensive examinations.

(2) Two master's passes (M) or better in each of two doctoral examinations, with one of the examinations being either the micro or macro half of the theory comprehensive.

(3) Three grades of master's pass (M) or better in the quantitative methods examination in each half of the theory comprehensive. If you achieve a B+ average in Economics 203A, 203B, and 203C, you automatically receive a pass (P) grade in the quantitative methods examination.

The macro and micro parts of the theory examination may be taken or repeated either separately or together, and the grades on each part are recorded separately for meeting the requirements for the M.A. and Ph.D. degrees.

Ph.D. Degree

Foreign Language Requirement

Ph.D. candidates must offer one foreign language or a substitute program in mathematics prior to sitting for the University Oral Qualifying Examination. If the language option is selected, you are required to show proficiency in one language — French, German, Russian, or Spanish — by passing the Educational Testing Service (ETS) examination with a grade of 500 or better. Students whose native language is not English may substitute English for the language requirement by petitioning the dean of the Graduate Division. If the mathematics substitute is selected, you must show proficiency in mathematics above that ordinarily required of Ph.D. candidates. Since elementary calculus is, as noted above, considered basic for all economists, the three required language-substitute courses must be at a level above first-year calculus. Specifically, Mathematics 32 and 110 or above fulfill the requirement.

Course Requirements

The specific course requirements which must be fulfilled prior to taking the University Oral Qualifying Examination are the following:

(1) Quantitative Methods: The requirement may be satisfied in any of the following ways: (a) achieving a B+ average in Economics 203A, 203B, and 203C; (b) achieving a B average in at least two quarters of the advanced econometrics sequence (courses 231A, 231B, M232A); (c) passing the quantitative methods waiver examination administered at the beginning of Fall Quarter.

(2) U.S. or European Economic History: You must take one upper division undergraduate course in either U.S. or European economic history with a grade of B or better. Economics 181A, 181B, or 183 may be taken to satisfy this requirement.

(3) History of Economic Theory: You must take one upper division undergraduate course in the history of economic theory with a grade of C or better. Economics 107 may be taken to satisfy this requirement.

You may petition the graduate committee to substitute any one of the above requirements with comparable coursework taken at a previous institution.
Qualifying Examinations
You are responsible for contacting the graduate adviser for additional regulations covering these examinations. You are expected to take the theory comprehensive at the end of the Spring Quarter of your first year or in the beginning of the Fall Quarter of your second year. During the second and third years, you have to pass further written examinations in three elective fields.

Written examinations are graded H (honors pass), P (pass at the Ph.D. level), M (pass at the M.A. level), and F (fail). You are considered to have completed your theory and elective field examinations when you have earned at least four P grades.

The macro and micro parts of the theory examination may be taken or repeated separately or together, and the grades on each part are recorded separately for meeting the requirements for the M.A. and Ph.D. degrees.

In order to be advanced to candidacy, you are required to present a paper in a departmental workshop. It is recommended that this be done by the end of your third year.

The University Oral Qualifying Examination, administered by your doctoral committee, is scheduled after successful completion of all the written examinations, other course requirements, and the foreign language requirement, and after the submission of a written dissertation proposal. The examination focuses on, but is not limited to, the dissertation proposal.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
A final oral examination on the doctoral dissertation is required unless it is waived by the committee that supervises the dissertation.

Lower Division Courses

1. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. An introduction to the principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economic analysis, including national income, monetary and fiscal policy, and international trade.

2. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. An introduction to the principles of economic analysis, economic institutions, and issues of economic policy.

3. Introductory Economics. Lecture, three hours. Not open to students with credit for course 1 2, 3, or 100. The principles of economics as tools of analysis. Presentation of a set of concepts with which to analyze a wide range of social problems that economic theory illuminates. May not be used to fulfill entrance requirements for any Economics Department major.

4. Introduction to Statistical Methods. Lecture, three hours; discussion, one hour. Not open to students with credit for Mathematics 150A-150B-150C or Statistics 50 or 152A-152B. Statistical methods and the use of statistical software for the presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation.

5.8A. Lower Division Research Seminar in Microeconomics. Formerly numbered 3. Discussion, three hours. Prerequisite: course 1. Limited to 10 freshmen or sophomores. Seminar in which students do an intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to materials covered in course 1), write papers, and present them at the seminar.

5.8B. Lower Division Research Seminar in Macroeconomics. Formerly numbered 4. Discussion, three hours. Prerequisite: course 2. Limited to 10 freshmen or sophomores. Seminar in which students do an intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in course 2), write papers, and present them at the seminar.

99. Lower Division Seminar (2 or 4 units). Prerequisites: courses 1 and 2 with a grade of B or better in each, overall 3.0 grade-point average, consent of instructor. A seminar designed to provide an instructional vehicle for student research projects. May not be used to fulfill entrance requirements for any Economics Department major.

Upper Division Courses

Courses 1 and 2, or 100 are prerequisites to all upper division courses in economics.

100. Economic Principles and Problems. Lecture, three hours. Prerequisite: upper division standing. Not open to students with credit for course 1, 2, or 5. The principles of economics with application to current economic problems. May not be used to fulfill entrance requirements for any Economics Department major.

101A. Microeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisite: course 100. Theory of factor pricing and income distribution; general equilibrium; implications of the pricing process for the optimum allocation of resources; interest and capital.

101B. Microeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisite: course 101A. Theory of factor pricing and income distribution; general equilibrium; implications of the pricing process for the optimum allocation of resources; interest and capital. Special topics may be included, as well as special assignments for regular faculty. Students select topics in consultation with instructor.

102. Macroeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisite: two courses in calculus or consent of instructor. Theory of income, employment, and the price level. Analysis of secular growth and business fluctuations; introduction to monetary and fiscal policy.

103A-103Z. Upper Division Research Seminar: Applications of Economic Theory. Prerequisites: courses 101A-101B, 144, departmental honors program standing or consent of instructor. A seminar in which students do an intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in courses 1-2), write papers, and present them at the seminar.

103A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Political Science M139A.) An interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of the acquisition of nuclear weapons and economic aspects of nuclear energy. Treatment of technological, bargaining, and stability issues.

103B. Economics of Energy. Prerequisites: courses 101A, 101B, and 102. Topics include pricing and taxation of exhaustible resources, interactions between energy systems and economic policy, and energy and the environment. Elements of statistical and computational methods. Topics include oil price controls, oil debt and the balance of payments, energy conservation, and future technologies.

104. Managerial Economics. Lecture, three hours. Prerequisite: course 101A. Enrollment priority to economics majors. Applications of economic principles to business decisions. Allocating joint costs. Implicit costs of capacity constraints. Problems in capital budgeting, financing, and pricing. The role of interest rates in business decisions.

105AH, 105AH. Topics in Microeconomics (Honors). Lecture, three hours. Prerequisites: courses 101A, 101B, 102, 144, departmental honors program standing or consent of instructor. Introduction to Walrasian and Nash equilibrium. Modeling of selected applied topics such as peak load pricing, pricing of externalities, strategic pricing.

107. History of Economic Thought. Lecture, three hours. Prerequisite: course 101A. Limited to non-Economics Department majors. A survey of economic analysis from Grecian antiquity to the early 20th century, concentrating on the 18th and 19th centuries; special attention to selected writers, including Aristotle, the mercantilists, the Physiocrats, Hume, David Ricardo, Marshall, Smith, Malthus, Marx, marginalists, and Marshall.

110. Economic Problems of Underdeveloped Countries. Lecture, three hours. Prerequisite: course 101A. Limited to non-Economics Department majors. A survey of economic analysis from Grecian antiquity to the early 20th century, concentrating on the 18th and 19th centuries; special attention to selected writers, including Aristotle, the mercantilists, the Physiocrats, Hume, David Ricardo, Marshall, Smith, Malthus, Marx, marginalists, and Marshall.

111. Theories of Economic Growth and Development. Lecture, three hours. Prerequisite: course 101A. Growth models, theory of production under conditions of factor prices and their impact on the choice of technology, investment criteria, role of the market, economic planning in less developed areas.

112. Policies for Economic Development. Lecture, three hours. Prerequisite: course 101A or consent of instructor. A survey of the broad range of policy and theoretical issues that are raised when economic analysis is applied in an urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and the local public sector.

121. Urban Economic Analysis. Lecture, three hours. Prerequisites: courses 101A, 101B, and 102, or consent of instructor. Urban economic analysis requires the development of analytical tools that are different in some respects from the standard methodology presented in course 101A or 101B. The construction and implementation of these tools, with applications to urban location decisions, housing, transportation, labor markets, and the local public sector. Not open to students with credit for course 102B or 104.
130. Public Finance. Lecture, three hours. Prerequisites: courses 101A and 101B, or consent of instructor. The role of government in a market economy. Alternative justifications for government intervention. Principles and effects of spending programs (especially social insurance and health), taxation, deficit financing, and federal credit programs. Taxation in an open economy. Properties of public choice mechanisms. Mr. Gale

133. State and Local Finance. Lecture, three hours. Prerequisite: course 130. The division of functions and revenues between state and local governments; the revenues, expenditures, and indebtedness of these governments. Analyses of state and local tax systems. Mr. Hirshleifer

M135. Economic Models of Public Choice. (Formerly numbered M135A.) (Same as Political Science M105.) Prerequisites: course 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor. Analysis of the methods and consequences of arriving at collective decisions through political mechanisms. Topics include the free-rider problem, majority choice, demand revelation, and political bargaining. Mr. Hirshleifer, Mr. Rogowski, Mr. Stein, Mr. Wallerstein

M136. Economic Models of Political Conflict and Conflict Resolution. (Formerly numbered M135B.) (Same as Political Science M106.) Prerequisites: course 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor. Biological, cultural, behavioral, and historical approaches to political conflict. The role of threats, promises, commitments. Models of the onset and termination of conflict. The conduct of war: strategy and tactics. Mr. Hirshleifer, Mr. Stein

141. Principles of Statistical Decision. Lecture, three hours. Prerequisite: course 40 or equivalent. Errors of the first and second kind; economic loss functions; prior probabilities and Bayes' theorem. Analysis of classical and Bayesian approaches. Application to inventory and production problems. The value of information and implications for sampling designs. Mr. Ellickson, Mr. Hirshleifer, Mr. McCull, Mr. Ostroy

142. Probabilistic Microeconomics. Lecture, three hours. Prerequisites: courses 40, 101A, 101B. Combination of the basic probability introduced in course 40 with the microeconomic models presented in courses 101A and 101B. Two courses in calculus, and course 143 (or Mathematics 150A-150B or Statistics 152A-152B), or consent of instructor. An introduction to econometrics, including a review of matrix algebra and statistical theory; the linear regression model; model specification; data collection; estimation and hypothesis testing; and an introduction to simultaneous equations models. Original econometric paper required. Mr. Ellickson, Mr. Intriligator, Mr. Levine

147B. Applications of Econometrics. Lecture, three hours. Prerequisite: course 147A. Econometric models and data; forecasting, policy analysis, estimation of simultaneous equations models, applications of econometrics. Major original econometric paper required. Mr. Ellickson, Mr. Intriligator, Mr. Levine

148. Linear Models in Economics. Lecture, three hours. Prerequisite: a course in linear or matrix algebra. Not open for credit to students with credit for Mathematics 144, Electrical Engineering 136, or former Electrical Engineering 123A. Possible topics include the duality theory of linear programming and the simplex algorithm, input-output analysis, and two-person zero-sum games. Mr. McCall, Mr. Ostro

147A. Introduction to Econometrics. Lecture, three hours. Prerequisites: course 101A and course 143 (or Mathematics 150A-150B or Statistics 152A-152B), or consent of instructor. An introduction to econometrics, including a review of matrix algebra and statistical theory; the linear regression model; model specification; data collection; estimation and hypothesis testing; and an introduction to simultaneous equations models. Original econometric paper required. Mr. Ellickson, Mr. Intriligator, Mr. Levine

150. Wage Theory. Lecture, three hours. Prerequisites: courses 101A and 101B, or consent of instructor. The role of government, union, and other constraints on the competitive system of wage determination. Wages and human capital theory. Mr. Waizman

151. Labor, Wages, and Income. Lecture, three hours. Prerequisite: course 150 or consent of instructor. Selected topics in labor theory; income distribution; business cycles and unemployment; investments in human capital and life cycles; migration; human fertility; marriage and divorce, etc.

152. Trade Unions and Professional Associations. Lecture, three hours. Comparative behavior of unions and professional associations; criteria for wage maximization; quantification of gains; analysis of legal framework applying to such organizations. Mr. Hilton

161. Monetary Theory. Lecture, three hours. Prerequisite: course 160. The nature of money and monetary institutions; the role of government; central banks and money creation. Mr. Demsetz, Mr. Klein

170. Monopoly and Competition. Lecture, three hours. Prerequisite: course 101A. A comparison of economic and legal treatments of the competitive process. Monopoly competition, and collusion as economic theory, as antitrust doctrine, and as fact. Source of monopoly: Predatory behavior. Misleading practices in theory and policy. The general problem of the relationship between private rights of action and competitive entry. Mr. Demsetz, Mr. Klein

171. Industrial Organization: Theory and Tactics. Lecture, three hours. Prerequisite: course 170. Study of pricing and output decisions of firms under conditions of less than perfect competition or monopoly; theories of oligopoly and monopolistic competition; information costs and advertising; examination of pricing practices such as price discrimination, tie-in selling, predatory pricing, and resale price maintenance. Mr. Demsetz, Mr. Klein

172. Economic Analysis of Laws and Legal Institutions. Lecture, three hours. Prerequisite: course 101A. Application of economic theory to legal rule formulation: study of the economic nature and consequences of legal rules. Mr. Demsetz, Mr. Hirsch
182. Development of Economic Institutions in the U.S. Lecture, three hours. A study of the changing economic conditions in the U.S. from Colonial times to the early 20th century and the effects of these changes on American society. Mr. Sokoloff

184. History of Enterprise and Entrepreneurship in the American Economy. Lecture, three hours. Enrollment priority to economics/business students. A study of the role of innovation in the history of American enterprise. Examination of specific episodes of salient entrepreneurial innovation, as well as general theoretical and empirical treatments.

190. International Economics. Lecture, three hours. Prerequisite: course 1 or 100. Limited to non-Economics Department majors. Not open to students with credit for course 191 or 192. A general introduction to international economics, based on an examination of the theory of trade and the means and significance of balance of payments adjustments, with analysis of major issues of international commercial and monetary policy confronting national and international agencies. May not be applied toward any Economics Department major.

191. International Trade Theory. Lecture, three hours. Prerequisite: course 101B. Not open to students with credit for course 190. The theory of international trade: the bases, direction, terms, volume, and gains of trade. The effects of tariffs, quantitative restrictions, and international integration. The effects of free and restricted trade on economic growth and political stability. Mr. Dollar

192. International Finance. Lecture, three hours. Prerequisite: course 102. Not open to students with credit for course 190. Emphasis on the interpretation of the balance of payments and the adjustment to national and international equilibria through changes in price levels, exchange rates, and national income. Other topics include making international payments, determination of exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organization.

M. Osler

193H. Honors Thesis Seminar. Seminar, three hours. Limited to seniors in the departmental honors program. A seminar in which students present the results of their senior theses.

199. Special Studies in Economics (2 or 4 units). Prerequisites: courses 101A, 101B, junior/senior standing, consent of instructor. May be repeated but may be applied only once toward the major requirements.

Graduate Courses
Foundations of Economics

201A-201B-201C. Microeconomics:

201A. Theory of Consumption and Exchange. Preferences, demand, exchange, pricing, and markets in an exchange economy. Emphasis on derivation and interpretation of theorems, illustrated by applications. Mr. Hirshleifer

201B. Theory of Production and Distribution. Theory of the firm, with particular attention to the demand for factors of production and long-run production. May cover an introduction to general equilibrium theory and welfare economics. Mr. Welch

201C. Theory of Interest and Capital. Intertemporal choice and equilibrium, interest, and accumulation of capital, decisions under uncertainty, and the allocation of risk.

202A-202B-202C. Macroeconomics:

Mr. Leijonhufvud

Mr. Leijonhufvud

203A. Probability and Statistics for Econometrists, Single Equation Models. (Formerly numbered 246B.) Lecture, three hours. Provides the statistical tools necessary for an understanding of econometric techniques. Random variables, distribution and density functions, sampling, estimators, estimation techniques, hypothesis testing, and statistical inference. Use of economic problems and examples. S/U or letter grading.

204A-204Z. Applications of Economic Theory. (Formerly numbered 204A-204H.) Lecture, three hours.

205. Economic Modeling. (Formerly numbered 246C) Lecture, three hours. Development of modeling skills by considering a sequence of economic issues (e.g., peak load pricing, regulation, monopoly, capital asset pricing, Pareto efficiency). Emphasis on multivariable constrained optimization. S/U or letter grading.

Mr. Intriligator, Mr. McCall, Mr. Sharma

207. History of Economic Thought. Lecture, three hours. Topics from classical economics, including the work of Smith, Ricardo, and Mill, and developments from 1870s, including the contributions of Nobel laureates. Mr. Leijonhufvud

211A-211B-211C. Microeconomics. (Formerly numbered M205.) Lecture, three hours. Emphasis on theoretical aspects of microeconomics, the core, location models, and other models with nonconvex preferences and/or technology. Mr. Ostro

M214. Game Theory. (Formerly numbered M242A.) Same as Political Science M242A. Prerequisites: course 213A or suitable mathematics courses. Bargaining theory, the Nash equilibrium, solution concepts. Applications to oligopoly, general exchange and production economics, and the allocation of joint costs.

Mr. Shapley

M214C. Large Economies. (Formerly numbered M242B.) Same as Political Science M242B. Prerequisites: course 213A or suitable mathematics courses. Emphasis on economics of a continuum of consumers and with a continuum of goods. The basic model applied to perfectly competitive equilibrium, the core, location models, and other models with nonconvex preferences and/or technology.

Mr. Ellickson

M215. Topics in Applied Game Theory. (Formerly numbered M205.) Same as Political Science M241. Lecture, three hours. Prerequisites: calculus or introductory probability, and graduate standing in economics or consent of instructor. Survey and applications of the major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

Mr. Shapley

Also see Management 200 (game theory and information economics), 203A (decision theory), 203B (economics of information)

Monetary Economics

221A. Monetary Economics I. (Formerly numbered 261.) Lecture, three hours. Prerequisite: course 202C. Emphasis on empirical studies in money and banking. Topics: The role of money, implications of rational expectations, random vs. deterministric trends, unemployment, central bank operating procedures, and the evolution of monetary institutions.

S/U or letter grading.

221B. Monetary Economics II. (Formerly numbered 262.) Lecture, three hours. Prerequisite: course 221A. Emphasis on theoretical aspects of monetary economics. Financial intermediation, models of balance sheets, asset prices and institutional factors, credit market failures, and financial systems. Game theoretic models of policy, and Keynesian models with monopolistic competition, search, and coordination failures. S/U or letter grading.
22A. Workshop in Monetary Economics. (Formerly numbered 204-A-204Z.) Lecture, three hours. Current research in monetary economics. Content varies. May be repeated for credit. S/U or letter grading.

222A. Control and Coordination in Economics. (Formerly numbered M240.) (Same as Computer Science M222.) Prerequisite: graduate standing in economics or engineering or consent of instructor. Recommended: appropriate mathematics course. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. Mr. Aoki

229A-229B-229C. Workshop in Monetary Economics. (Formerly numbered 263A-263B-263C.) Lecture, three hours. Prerequisite: consent of instructor. Workshop for dissertation and predissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Mr. Leijonhufvud, Mr. Tabelini

Also see Management 239A, 239B, 239C (Ph.D. sequence in finance), 239D (advanced topics in finance), 239K-239Y-239Z (finance workshop)

Econometrics

231A. Econometrics: Single Equation Models. (Formerly numbered 247.) Lecture, three hours. The linear regression model, specification error, functional form, autocorrelation, nonlinear estimation, distributed lags, nonnormality, univariate time series, qualitative form, autocorrelation, nonlinear estimation, distribution of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading. Mr. Harberger

231B. Cost-Benefit Analysis of Public Projects and Programs. (Formerly numbered 232.) Lecture, three hours. Prerequisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading. Mr. Harberger

252. Economics of Federalism. (Formerly numbered 249B.) Lecture, three hours. Theories of federal systems and public choice. The role of government component, collective decision, local public goods, spillovers, and intergovernmental relations. S/U or letter grading.

253A-253Z. Topics in Econometrics. (Formerly numbered 249A-249Z.) Lecture, three hours. Prerequisites: courses 231A, 231B. Current research in econometrics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

232A-232Z. Topics in Econometrics. (Formerly numbered 204A-204Z.) Lecture, three hours. Prerequisites: courses 231A, 231B. Current research in econometrics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

232BA. Bayesian Econometrics. (Formerly numbered M249.) (Same as Political Science M249.) Subjective probability, introduction to decision theory, Bayesian decision analysis, regression, sensitivity analysis, simplification of models, criticism of Mr. Leamer

232B. Time Series. (Formerly numbered M249.) Stationary stochastic processes, Box-Jenkins methods, spectral analysis, forecasting, rational expectation models, the analysis of macroeconomic data. Mr. Sharma

Economic History

241. Economic History of Western Europe. (Formerly numbered 281.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Seminar on European economic history, with emphasis on the evolution of institutions and growth. Serfdom, medieval agriculture and the agricultural revolution, demographic change, the industrial revolution, imperialism, and the debate of Britain. S/U or letter grading. Mr. Sokoloff

242. Economic History of the U.S. (Formerly numbered 283.) Lecture, three hours. A seminar on American economic history. The onset of industrialization, the relative economic backwardness of the South before the Civil War, the agricultural revolution, and the impact of the industrial and farm women in the labor force, the development of financial markets. S/U or letter grading. Mr. Sokoloff

243A-243Z. Topics in Economic History. (Formerly numbered 204A-204Z.) Lecture, three hours. Current research in economic history. Content varies. May be repeated for credit. S/U or letter grading.

244A-244B-244C. Von Gramp Workshop in the History of Entrepreneurship in the U.S. Economy. Lecture, three hours. Prerequisite: graduate standing, consent of instructor. Workshop for advanced graduate students. Research in progress discussed by visiting experts, UCLA faculty members, graduate students. S/U grading. Mr. Sokoloff

Public Finance

251A. Theory and Policy of Taxation. (Formerly numbered 231.) Lecture, three hours. Examination of the influence of taxation on economic efficiency and the incidence of taxation in first part of course. Topics include tax equivalences, Ramsey rules, and alternative taxation proposals, public provision of public goods, administrative efficiency and legislative incentives, and progresivity in taxation in second part of course. S/U or letter grading. Mr. Harberger

251B. Cost-Benefit Analysis of Public Projects and Programs. (Formerly numbered 232.) Lecture, three hours. Prerequisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading. Mr. Harberger

252. Economics of Federalism. (Formerly numbered 249B.) Lecture, three hours. Theories of federal systems and public choice. The role of government component, collective decision, local public goods, spillovers, and intergovernmental relations. S/U or letter grading.

253A-253Z. Topics in Econometrics. (Formerly numbered 249A-249Z.) Lecture, three hours. Prerequisites: courses 231A, 231B. Current research in econometrics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

254A-254B-254C. Workshop in Economic Organization. (Formerly numbered 254A-254B-254C.) Lecture, three hours. Prerequisite: consent of instructor. Workshop for advanced graduate students. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, visiting experts. S/U grading.

Labor Economics

261B. Labor Economics II. (Formerly numbered 252.) Lecture, three hours. Prerequisite: course 261A. Models of life cycle learning and work behavior, with emphasis on empirical literature and the labor force behavior and experience of women. S/U or letter grading. Mr. Welch

262A-262Z. Topics in Labor Economics. (Formerly numbered 253.) Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

269A-269B-269C. Workshop in Labor Economics. (Formerly numbered 254A-254B-254C.) Lecture, three hours. Prerequisite: consent of instructor. Workshop for dissertation and predissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Mr. Welch

Industrial Organization

271A. Industrial Organization, Price Policies, and Regulation I. (Formerly numbered 271.) Lecture, three hours. Major contemporary research in the public utility pricing rights system. The firm and the market compared from the perspective of alternative arrangements for allocating resources. Traditional problems of competition, monopoly, and industrial concentration. Brief analysis of those portions of antitrust policy bearing on industrial structure. S/U or letter grading. Mr. Demsetz

271B. Industrial Organization, Price Policies, and Regulation II. (Formerly numbered 272.) Lecture, three hours. Prerequisite: course 271A. Study of firm organization and pricing under conditions of less than perfect competition: information costs and advertising; economic and legal analysis of marketing practices such as discrimination, tie-in selling, resale price maintenance, exclusive dealing, and territorial arrangements. S/U or letter grading. Mr. Klein

271C. Mathematical Theory in Industrial Organization. Lecture, three hours. Prerequisites: courses 201A-201B-201C. Formal modeling of the theory of industrial organization: the principal-agent problem, entry deterrence, endogenous price discrimination, monopolistic competition, new approaches to rationality. S/U or letter grading. Mr. Waldman

272A-272Z. Topics in Industrial Organization. (Formerly numbered 204A-204Z.) Lecture, three hours. Prerequisites: current research in industrial organization. Content varies. May be repeated for credit. S/U or letter grading.

273A. Public Utility Regulation. (Formerly numbered 273.) Lecture, three hours. Theory, practice, and consequences of regulation in electric power, gas, water, telecommunications, broadcasting, and other regulated industries; experiences of unregulated monopoly and public enterprises by way of contrast. S/U or letter grading. Mr. Hilton

273B. National Transport Policy. (Formerly numbered 275.) Lecture, three hours. Regulation of surface and air carriers, pricing and investment in public transport facilities, policy toward the merchant marine. S/U or letter grading. Mr. Hilton

Also see Management 262 (pricing policy)

International Economics

281A. International Trade Theory. (Formerly numbered 281.) Lecture, three hours. Theoretical and empirical analysis of the microeconomic relationships among countries. The determinants of commodity and factor flows, the balance of payments and factor rewards. The effects of trade barriers. S/U or letter grading.

281B. International Finance. (Formerly numbered 292.) Lecture, three hours. Theory and evidence on the balance of payments, exchange rate determination, capital mobility, business cycles, macroeconomic policy in open economies, alternative monetary systems. S/U or letter grading. Mr. Dollar, Mr. Edwards
Urban Economics

291A-291B. Urban Economics. (Formerly numbered 221, 222.) Lecture, three hours. Prerequisite: Course 291A. The implications of urbanization for economic analysis. Development of the theory in course 291A; emphasis on policy in 291B. Use of the monocentric model of urban land use to introduce location and transportation costs. Examination of housing, transportation, and local public services.

Ms. Cameron, Mr. Ellickson, Mr. Hirsch

293A-293Z. Topics in Urban Economics. (Formerly numbered 204A-204Z.) Lecture, three hours. Current research in urban and regional economics. Content varies. May be repeated for credit. S/U or letter grading.

Ms. Cameron, Mr. Ellickson, Mr. Hirsch

Special Studies

299A-299C. Workshop for Preparing a Dissertation Proposal. Lecture, three hours. Workshop for third-year graduate students who are preparing for the oral qualifying examination. Presentation of journal articles for critical analysis to develop students' analytical skills. Presentation of students' own research for critical analysis by fellow students and faculty. Workshop open to research in all fields of economics. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: candidate personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching of College Economics (2 units). Discussion, one hour; laboratory, three hours. Prerequisite: consent of instructor. Workshop for students preparing to teach economics. May be repeated for credit. S/U grading.

Bachelor of Science Degree

Admission

Written applications are accepted from April 1 to May 15 only. Ten to 15 students are admitted based on space availability, completion of preparation for the major courses, and the GPA in those courses. Minimum qualifications for admission include the completion of six preparatory courses (four of the mathematics courses with a minimum GPA of 3.0 exclusive-ly must be included) and an overall 2.75 GPA in the preparatory courses. Any transfer credit applied to the major is used in GPA calculations; physics grades are not calculated into the GPA.

Preparation for the Major

Required: Economics 1 and 2; Computer Science 10C or 10F or Program in Computing 3 or 10A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Strongly recommended but not required: Physics 8A, 8B, 8C, 8D. All courses must be completed for a letter grade of C- or better.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor in 2253 Bunche Hall before enrolling in any courses for the major.
The Major  
**Required:** Fourteen upper division courses as follows: six courses in economics selected from Economics 101A and above, including 101A, 101B, 102, and one course from 141, 142, 144, 145, 146, 147A, 147B; six courses in system science selected from Computer Science 170, Electrical Engineering 102, 103, 131A, 131B, 136, 141, 142, including 131A (or Mathematics 150A or Statistics 152A) and 131B (or Mathematics 151 or Statistics 152B); two courses in mathematics selected from Mathematics 110A and above (such mathematics courses may not also be applied toward the system science requirements).

Recommended courses include Computer Science 170 and Electrical Engineering 141 and 142 in the area of dynamic systems analysis and Electrical Engineering 136 in the area of optimization.

All upper division major courses must be completed for a letter grade of C- or better, with an overall 2.0 GPA.

---

Education

The College of Letters and Science offers a program of courses through which you may receive credit toward a credential to teach in California elementary schools. For details, see "Diversified Liberal Arts" earlier in this chapter.

---

English

2225 Rolfe Hall, (213) 825-4173

**Professors**
- Michael J. B. Allen, Ph.D., D.Litt.
- Martha Banta, Ph.D.
- Calvin Bernard Bedient, Ph.D.
- Charles Ashton Berst, Ph.D.
- A. R. Braumuller, Ph.D.
- Frederick Lorrain Burwick, Ph.D.
- Daniel G. Calder, Ph.D., Chair
- Michael J. Colacurcio, Ph.D.
- Vinton A. Dearing, Ph.D.
- Reginald A. Foakes, Ph.D.
- Patrick K. Ford, Ph.D.
- Robert A. Georges, Ph.D.
- Gerald Jay Goldberg, Ph.D.
- George Robert Guffey, Ph.D.
- Charles Bennett Gullans, Ph.D.
- Henry Ansar Kelly, Ph.D., Vice Chair
- Jascha Kessler, Ph.D.
- Robert Starr Kinsman, Ph.D.
- Gordon L. Kipling, Ph.D., Vice Chair
- V.A. Kolve, Ph.D. (The UCLA Foundation Professor)
- Richard Alan Larramendy, Ph.D.
- Richard D. Lehan, Ph.D.
- Kenneth Robert Lincoln, Ph.D.
- Anne Kostelanetz Mellor, Ph.D.

Maximilian Erwin Novak, D.Phil., Ph.D.
Jonathan F.S. Post, Ph.D., Vice Chair
Joseph N. Riddel, Ph.D.
Florence Ridley, Ph.D.
Alan Roper, Ph.D.
George S. Rousseau, Ph.D.
William David Schaefer, Ph.D.
Paul Roland Sellin, Ph.D.
Paul Douglas Sheats, Ph.D.
George Bernard Tennyson, Ph.D.
Peter Larson Thorlsey, Jr., Ph.D.
Robert Nathaniel Watson, Ph.D.
Alexander Weish, Ph.D.
D. K. Wiligus, Ph.D.
Thomas Richard Wortham, Ph.D.
Ruth B. Yeazell, Ph.D.
Stephen Irwin Jensen, Ph.D.

**Emeritus Professors**
- Robert Martin Adams, Ph.D.
- Robert William Dent, Ph.D.
- John Jenkins Espey, B.Litt., M.A.
- Robert Paul Falk, Ph.D.
- Charles V. Hartung, Ph.D.
- Paul Alfred Jorgensen, Ph.D.
- Blake Reynolds Nevius, Ph.D.
- Ada Blanche Nisbet, Ph.D.
- Waldo Woodson Phelps, Ph.D.

**Associate Professors**
- Walter Eldon Anderson, Ph.D.
- Charles Linwood Batten, Jr., Ph.D.
- Edward Ignatius Condren, Ph.D.
- Donald J. Cosentino, Ph.D., Acting
- James Edward Goodwin, Ph.D.
- Christopher Waldo Grose, Ph.D.
- Albert David Hutter, Ph.D.
- Jack Kolb, Ph.D.
- Robert M. Maniquis, Ph.D.
- Joseph F. Nagy, Ph.D.
- Michael Andrew North, Ph.D.
- Barbara Lee Packer, Ph.D.
- Raymud Arthur Paredes, Ph.D.
- Karen Elizabeth Rowe, Ph.D.
- Richard Alan Yarborough, Ph.D.

**Assistant Professors**
- King-Kok Cheung, Ph.D.
- Jayne Lewis, M.A., Acting
- Donka Minkova, Ph.D.
- Vincent P. Pecora, Ph.D.
- J. Fisher Solomon, Ph.D.
- Seth Joshua Weiner, Ph.D.

**Senior Lecturers**
- David Stuart Rodows, Ph.D.
- Jerome Cushman, A.B., B.S.L.S., Emeritus
- Everett L. Jones, M.A., Emeritus

**Adjunct Professor**
- Brian Moore

**Scope and Objectives**

An interest in English and American literature draws many students to the Department of English, which also offers courses in other fields, including the history and structure of the English language itself. Although committed to no single method or approach, the department encourages an emphasis on literary history and requires of its undergraduate majors a firsthand acquaintance with such influential writers as Chaucer, Milton, and Shakespeare. Students may range outward from this core to a rich variety of other fields — literary criticism, for example, or the ethnic literatures and popular culture of America, or the relation of literature to such complementary disciplines as history, sociology, psychology, and philosophy. Qualified students may elect a concentration in creative writing or an interdisciplinary program in American studies.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require six years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

**Bachelor of Arts Degree**

**Admission to Courses in English**
You must have completed the Subject A requirement before taking any courses in English (other than English A or B). For further information regarding Subject A, see "Undergraduate Degree Requirements" in Chapter 2.

**Preparation for the Major**

**Required:** English 3, 4, 10A, 10B, 10C taken in the stated sequence (each course is a prerequisite for the next course).

**Extra-Departmental Requirement in Foreign Language or Foreign Literature:** All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) any combination of five courses in foreign language and foreign literature, including foreign literature in translation (see course listings later in this section of the catalog). Italian 46 may not be applied. For option 2, the department especially recommends Classics 142, Humanities C107, 116, C145. These courses may be taken on a P/NP grading basis.

**The Major**

**Required:** English 141A or 141B, 142A, 142B, 143, at least one course from the 180 series, and a minimum of seven additional upper division English courses. At least five of the seven courses must be selected from 140A, 140B, 142C, or 150 through 190. At least one of the seven courses must be in literature before 1800 (the 150 series).
You are encouraged to choose additional electives from courses 140A through M197. English 140A is especially recommended if you plan to graduate work in literature. You may wish to select several courses in the relevant classical and postclassical foreign literatures and thought; the department especially recommends Classics 142, 161, Humanities C107, 116.

Special Programs

The department offers special programs in American studies and general literature. For both programs, the regular "Preparation for the Major" sequence as well as the departmental foreign language requirement apply. Because of the specialized nature of these programs, students planning to do graduate work in English should consult the departmental counselor before selecting either of these.

American Studies: This program consists of nine upper division courses in English and six related upper division courses taken in other departments. The nine English courses must include 109 and 178; two courses from 142A, 142B, 143; three courses from the 170 series, with at least one course from 170, 171, or 172, and no more than one course from 176 or 177; and one course pertaining to American studies selected from 187, 188, or 189, taken preferably in the senior year. Of the six upper division courses in other departments, four must be in a selected discipline (history, political science, sociology, etc.). One of the four courses must deal with the methodology of the discipline, while the other three must explicitly treat American culture. The courses must be selected in consultation with the English departmental counselor.

General Literature: This program consists of nine upper division courses in English or American literature and six upper division courses in foreign literatures (at least one of which must be taught in the original language). The nine English courses must include 142A and 142B; 141A, 141B, or 143; at least one course from the 150 series; and four electives selected from courses 140A through M197 (students intending graduate work in literature are especially encouraged to take English 140A). A listing of acceptable courses may be obtained from the department.

Creative Writing Major

For this major, you must satisfy all requirements listed under "Preparation for the Major," including the foreign language requirement. The major consists of English 142A and 142B and a minimum of 10 additional upper division English courses: three creative writing courses from the 133A through 135C series, taken in a single genre (poetry, short story, or drama), three literature courses paralleling the creative writing specialization, and four electives selected from courses 140A through M197. If you are planning to choose this major, you are encouraged to take course 20; for further details, contact the departmental counselor.

Major for International Students

The department offers a special major in English to bona fide international students whose native language is other than English. For this major, you must satisfy all requirements listed under "Preparation for the Major"; you may fulfill the departmental foreign language requirement with your own native language. The following 12 courses are required for the major itself: English (ESL) 103J, 106J, 109J; two courses from English 100 through 199; 122; 142A, 142B; and four additional courses from those numbered 140A through 199. If you complete this major and wish to pursue graduate study, you should consult the departmental counselor about programs of study and requirements for admission.

Instructional Credential in English

If you wish to obtain a credential to teach English, you should declare your intention at the beginning of your junior year and seek the advice of the departmental counselor in planning a coherent program. The department requires English 120A or 120B, 130A or 130B, and at least one American literature course selected from 170 through 174 as part of, or in addition to, the major. You must also complete English 300 before you can be certified to begin student teaching. You are encouraged to select additional courses in language, children's literature, literature for adolescents, American literature, and literature for minorities as some of your electives. Note: Students who enter the Graduate School of Education seeking a credential to teach English must, before beginning their required practice teaching assignment, be certified by the Department of English as prepared to teach this subject; the department will not certify any student who has not completed the courses specified above. For additional information on courses leading to the instructional credential, consult the Graduate School of Education (201 Moore Hall) or the Department of English.

Honors Program

Admission: The honors program is open to English majors with a 3.5 departmental and a 3.25 overall grade-point average. If you have a lower GPA, you may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. You should apply by the second quarter of your junior year. For application forms and further information, contact the departmental counselor.

Requirements: All honors students are required to take English 140A during the junior year and one seminar from the English 180 through 189 sequence, preferably before the senior year. In the Fall Quarter of your senior year, you must take course 199HA. During the Winter and Spring Quarters, you take courses 199HB and 199HC, in which you write a thesis under the direction of a faculty member. The thesis determines whether you receive high honors, honors, or no honors.

M.A. and Ph.D. Degrees

All students admitted into the UCLA English graduate program with a B.A. must enter the M.A. course of study, which also serves as the first phase of the doctoral program for those who wish to pursue the Ph.D. The M.A. degree may be obtained either by passing the first qualifying examination (which also grants admission into the second phase of the doctoral program) or by writing a thesis. Students admitted with a master's degree may waive most course requirements but must pass the first qualifying examination.

Admission

Admission to the program is based on a thorough review of the student's academic record. Ordinarily, students holding the B.A. are expected to meet these minimum requirements: an undergraduate major or program that provides preparation for advanced study of literature; a grade-point average in all English courses and in the junior and senior years of at least 3.5; and a recent (within the last five years) score on the Graduate Record Examination (GRE) of 650 on both the verbal section of the General Test and the Literature in English Subject Test or a combined score of 1,300. Applicants holding the M.A. are expected to have a grade-point average of at least 3.7 in all graduate courses and correspondingly higher scores on the verbal GRE and the Literature in English Subject Test. A minimum of three letters of recommendation attesting to your ability to succeed in graduate study are also required. Care should be taken with the statement of purpose, since it is considered a sample of your writing ability. For a descriptive brochure, write to the Graduate Counselor, Department of English, 2225 Rolfe Hall, UCLA, Los Angeles, CA 90024-1530.

If you are limited on admission to the M.A. program, you may continue in the doctoral program by passing the first qualifying examination. If you elect the M.A. thesis option, you may, on completion of that course of study, petition to enter the doctoral program provided you have maintained a grade-point average of at least 3.7 in your graduate studies and are recommended by your thesis committee. Such petitions are not automatically approved and should be accompanied by appropriate supporting materials.
Foreign Language Requirement
If you are pursuing only the M.A. degree, you may fulfill the language requirement by demonstrating reading knowledge of two foreign languages, or to demonstrate superior proficiency in a single language. The departmentally approved languages are French, German, Italian, Spanish, Latin, and Greek, but other languages may be substituted by petition on the basis of a special research interest.

Teaching Experience
Although teaching experience is not required, most students in the Ph.D. program have the opportunity to serve as teaching assistants after passing English 495A and being in the program for at least one year. Teaching assistants are expected to have fulfilled the nine-course requirement but must take course 201 or its equivalent prior to the first qualifying examination. You are also urged to begin fulfilling the second-stage requirements at this time.

Course Requirements
Nine letter-graded English courses from the 200 series are required for the M.A., including one course in literary criticism (course 201). If you enter the program with an M.A. in English, you are presumed to have fulfilled the nine-course requirement but must take course 201 or its equivalent prior to the first qualifying examination. You are also urged to begin fulfilling the second-stage requirements at this time.

Qualifying Examinations
The doctoral program is divided into three stages, the first two of which culminate in the first and second qualifying examinations.

First Stage
First Qualifying Examination Option: If you select the examination option for the M.A., you may take the first qualifying examination after passing the nine required courses and fulfilling at least one of the foreign language requirements. The examination consists of four written tests of four hours each. The four parts are graded high pass, pass, low pass, or fail; in order to pass the examination as a whole, you must have maintained a passing grade on each of the parts. A grade of low pass on all four parts is considered a failure; the graduate faculty determines in each case whether to grant an M.A. and whether you will be admitted to the second stage of the Ph.D. program. Further details on breadth and philology requirements are available from the department.

Second Stage
In this stage of the program, you must take five courses from the 200 series in English, including a minimum of three seminars. You are encouraged to take as many seminars as possible (any graduate seminar may be repeated for credit), as well as suitable courses in other departments. When sufficiently well prepared and after satisfying the second language requirement, you take the second qualifying examination.

Second Qualifying Examination: The University Oral Qualifying Examination, at least two hours in length, consists of two parts. The first covers a 100-year period or longer in English or American literature. The second part deals with your prospectus, a substantially researched paper which has been approved by the committee chair and distributed to the committee at least one week before the scheduled examination. The committee must certify both that you are competent in the historical field and that the prospectus has been approved. If you fail one or both parts of the examination, you may, at the discretion of the committee, repeat it once only.

Third Stage
Once you have passed the second qualifying examination, you may advance to candidacy and, on application, receive the Candidate in Philosophy (C.Phil.) degree. You may then proceed with the writing of the dissertation.

Final Oral Examination
A final oral defense of the dissertation is optional with the doctoral committee but is usually not required.

Lower Division Courses
A. Basic Review of English Usage (No credit). See listing under "English Composition."
B. Fundamentals of Exposition (No credit). See listing under "English Composition."
C. 3H. English Composition, Rhetoric, and Language. See listing under "English Composition."
D. 4H. English Composition, Rhetoric, and Language (Honors). See listing under "English Composition."
E. Critical Reading and Writing. Prerequisities: satisfaction of Subject A requirement, course 3 or equivalent, consent of department. An introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six pages (three to five pages each).
F. Critical Reading and Writing (Honors). Discussion, three hours. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, consent of department. An introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six pages (three to five pages each).
G. English Literature to 1660. Prerequisites: satisfaction of Subject A requirement, courses 3, 4. A study of selected works of the period, beginning with Old English poetry and including writings by Chaucer, Spenser, Shakespeare, Donne, and Milton. Minimum of three pages (three to five pages each) or equivalent.
H. Critical Reading and Writing (Honors). Discussion, three hours. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, consent of department. An introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six pages (three to five pages each).
I. Mr. Allen, Mr. Condren, Mr. Rodes
J. 10B. English Literature, 1660-1832. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A. A study of selected works of the period, including writings by Dryden, Pope, Swift, Wordsworth, and Keats. Minimum of three pages (three to five pages each) or equivalent.
K. Mr. Batten, Mr. Burwick, Mr. Novak
L. 10C. English Literature, 1832 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B. A study of selected works of the period, including writings by Tennyson, Arnold, Browning, Wells, Joyce, and Eliot. Minimum of three pages (three to five pages each) or equivalent.
M. Mr. Berst, Mr. Kolb, Mr. Solomon
N. 20. Introduction to Creative Writing. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, submission of creative or expository writing samples to a screening committee. Designed to introduce the fundamentals of creative writing. Emphasis either on poetry, fiction, or drama, depending on the wishes of the instructor(s) during any given quarter. Readings from assigned texts and weekly writing assignments required.
O. Intermediate Exposition. See listing under "English Composition."

Major British Authors before 1800. Prerequisites: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for courses 10A or 10B. A study of selected masterpieces of English literature before 1800, including the works of such writers as Chaucer, Spenser, Shakespeare, Donne, Milton, Swift, Pope, Johnson, and Fielding.

Mr. Rousseau

Major British Authors, 1800 to the Present. Prerequisites: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for courses 10A or 10B. A study of selected masterpieces of English literature from 1800 to the present, including the works of such writers as Wordsworth, Coleridge, Keats, Tennyson, Dickens, Browning, Yeats, Joyce, and Eliot.

Mr. Berst, Mr. Hutter, Mr. Kolb

Major American Authors. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. An introduction to the chief American authors, with emphasis on the poetry, nonfiction prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway.

Mr. Wortham

The American Novel. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 171, 172, or 174. The development, with emphasis on form, of the American novel from its beginning to the present day. Includes works of such novelists as Hawthorne, James, Fitzgerald, and Faulkner.
M104B. African-Amercan Literature since the 1920s.
(Formerly numbered M104.) Prerequisite: satisfaction of Subject A requirement. A study of African-American literature from the 1920s to the present, emphasizing the development of African-American literature itself, its cultural backgrounds, and distinctive uses of language in drama, methods of evaluation, and aesthetic issues, including evaluative criteria, followed by the close critical analysis of a selection of representative poems. P/NP or letter grading.

Mr. Grose, Mr. Sheats, Mr. Thorslev

M104B. Modern American Drama.
(Formerly numbered 100B.) Prerequisite: satisfaction of Subject A requirement. Examination of representative plays, readings may range from Greek to modern drama. Emphasis on formal approaches to the dramatic text; study of plays such as plot construction, characterization, special uses of language in drama, methods of evaluation, and letter grading. P/NP or letter grading.

Mr. Dodek, Mr. Rowe, Mr. Watson

M104B. Modern American Literature.
(Formerly number 100B.) Prerequisite: satisfaction of Subject A requirement. A study of modern American literature, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievements.

Mr. Grose, Mr. Sheats, Mr. Thorslev

M110. Introduction to Poetry.
(Formerly numbered 100A.) Prerequisite: satisfaction of Subject A requirement. Recommended for teaching credential candidates. A study of critical issues (metrics, diction, figurative language, style, form, and ambiguity) and aesthetic issues, including evaluative criteria, followed by the close critical analysis of a selection of representative poems. P/NP or letter grading.

Mr. Grose, Mr. Sheats, Mr. Thorslev

M110. Introduction to Drama.
(Formerly numbered 100B.) Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 142A or 142B. A survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievements.

Mr. Grose, Mr. Sheats, Mr. Thorslev

M110. Introduction to Fiction.
(Formerly numbered 100C.) Prerequisite: satisfaction of Subject A requirement. A study of the use of language in drama, methods of evaluation, and aesthetic issues, including evaluative criteria, followed by the close critical analysis of a selection of representative poems. P/NP or letter grading.

Mr. Anderson

M96. The Short Story in England and America.
(Formerly numbered 101.) Prerequisite: satisfaction of Subject A requirement. An introductory survey of the short story as a genre, from the 19th century to the present. P/NP or letter grading.

Mr. Anderson

Upper Division Courses

100. Introduction to Special Topics and Genres.
(Formerly numbered 100D.) Prerequisite: satisfaction of Subject A requirement. A study of a particular topic, genre, or subgenre in literature such as satire, biography, poetry, or a specialized classification of literature. May be repeated for credit. P/NP or letter grading.

Mr. Tennyson, Mr. Thorslev

100W. Intensive Writing (2 units). See listing under "English Composition." P/NP or letter grading.

100WH. Intensive Writing (Honors) (2 units). See listing under "English Composition." P/NP or letter grading.

102. Asian American Literature.
(Former as Asian American Studies M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by Americans of Chinese, Japanese, Filipino, and Korean origin.

Mr. Ford

102. American Indian Literature.
(Formerly as American Indian Studies M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American Indians.

Mr. Ford

102. American Popular Literature.
(Formerly as American Popular Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American popular culture writers.

Mr. Ford

102. American Speculative Literature.
(Formerly as American Speculative Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American speculative writers.

Mr. Ford

(Formerly as American African Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American African writers.

Mr. Ford

102. American Blues Literature.
(Formerly as American Blues Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American blues writers.

Mr. Ford

102. American Folk Literature.
(Formerly as American Folk Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American folk writers.

Mr. Ford

102. American Popular Literature.
(Formerly as American Popular Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American popular culture writers.

Mr. Ford

102. American Speculative Literature.
(Formerly as American Speculative Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American speculative writers.

Mr. Ford

(Formerly as American African Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American African writers.

Mr. Ford

102. American Blues Literature.
(Formerly as American Blues Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American blues writers.

Mr. Ford

102. American Folk Literature.
(Formerly as American Folk Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American folk writers.

Mr. Ford

102. American Popular Literature.
(Formerly as American Popular Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American popular culture writers.

Mr. Ford

102. American Speculative Literature.
(Formerly as American Speculative Literature M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by American speculative writers.
118. Film and Literature. Prerequisite: satisfaction of Subject A requirement. A study of the interdisciplinary relationships between film and literature, including theme and structure, and focusing on cinematic adaptations of works by Jane Austen, F. Scott Fitzgerald, and William Faulkner.

120A. Language Study for Teachers: Elementary School. See listing under "English Composition."

120B. Language Study for Teachers of English: Secondary and Postsecondary. See listing under "English Composition."

120C. Language Study for Teachers of Subjects Other Than English: Secondary and Postsecondary. See listing under "English Composition."

121. History of the English Language. Prerequisite: satisfaction of Subject A requirement. A study directed toward English majors of the main features "English Composition."

122. Introduction to the Structure of Present-Day English. Prerequisite: satisfaction of Subject A requirement. An introduction to the techniques of linguistic description as applied to the pronunciation, grammar, and vocabulary of modern English.

130A. Composition for Elementary School Teachers. See listing under "English Composition."

130B. Composition for Secondary School Teachers. See listing under "English Composition."

131A-131J. Advanced Exposition. See listing under "English Composition."

133A-133B-133C. Creative Writing: Poetry. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Weekly exercises in the writing of poetry, with practice in the standard forms and meters and the study of techniques. Classroom discussion based on student use. Only one course in the sequence may be repeated for credit.

134A-134B-134C. Creative Writing: Short Story. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). An exploration of the capacity of each student to write for the theater. Class discussion of student writing, individual conferences, re-readings, and laboratory productions. Only one course in the sequence may be repeated for credit.

135A-135B-135C. Creative Writing: Drama. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). An exploration of the capacity of each student to write for the stage. Class discussion of student writing, individual conferences, rehearsed readings, and laboratory productions. Only one course in the sequence may be repeated for credit.

136A-136B-136C. Practical Writing and Editing. See listing under "English Composition."

137. Advanced Computer Techniques for Students of English. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A Program in Computing 1 and 10A or consent of instructor. Concurrent instruction in writing computer programs for literary study and in the kinds of literary work that require such programs. BASIC is taught; students must know how to operate a computer. Principles of computer science neither assumed nor taught. Mr. Dearing

140A. Criticism: History and Theory. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of some of the major historical documents and theoretical statements in the history of literary criticism, from antiquity to the Present. Readings may be selected from works of Plato, Aristotle, Horace, Sidney, Dryden, Johnson, Kant, Coleridge, Wordsworth, Shelley, Arnold, James, Croce, and T. S. Eliot, with emphasis on the major critical positions posed and developed by these writers, the basis of their theoretical positions, and the practical consequences of those positions. Possible discussion of recent trends in criticism.

Mr. Kolb, Mr. Barren, Mr. Solomon

140B. Criticism: Special Topics. Prerequisites: satisfactory of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Area of limited periods and specialized issues and approaches in the history of literary criticism, including moral, biological, sociological, psychological, formal, structural, and deconstructionist. Area of concentration determined by instructor and listed in the Schedule of Classes. Some study of literary texts, to illuminate the value and practical application of the approach, may be required.

Mr. Pecora, Mr. Riddell, Mr. Solomon

141A. Chaucer: The Canterbury Tales. Prerequisites: satisfactory of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An intensive study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, The Canterbury Tales. Satisfies the department's Chaucer requirement.

Mr. Condren, Mr. Kolbe, Ms. Ridley

141B. Chaucer: Troilus and Criseyde and Selected Minor Works. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An intensive study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, The Canterbury Tales. Satisfies the department's Chaucer requirement.

Mr. Condren, Mr. Kolbe, Ms. Ridley

142A. Shakespeare: The Poems and Early Plays. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An intensive study of selected poems and representative comedies, histories, and tragedies through Hamlet.

Mr. Allen, Ms. Cheung, Mr. Post

142B. Shakespeare: The Later Plays. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, 142A. Reviews Shakespeare's major works, his relationship to his contemporaries, and his impact on literature.

Mr. Braunneller, Mr. Foakes, Mr. Watson

142C. Shakespeare: Selected Topics. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, 142A. An intensive study of representative plays, drama, major works of literature, and plays not written by Shakespeare.

Mr. Braunneller, Mr. Foakes, Mr. Watson

143. Milton. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the major works of Milton, with emphasis on Paradise Lost.

Mr. Grose, Mr. Guffey, Mr. Lewis

150. Later Medieval Literature. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Readings in British literature of the 14th and 15th centuries (e.g., the Gawain-poet, Langland, Gower, Malory, miracle and morality plays, prose, and lyric). The more difficult texts read in connection with minor topics.

Mr. Condren, Mr. Kinsman, Mr. Kipling

151. Elizabethan Literature. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of English literature of the 16th century, with special emphasis on the development of the poetic traditions of the English language, prose, poetry, fiction, and literary theory and criticism during the reign of Elizabeth I.

Mr. Kipling, Mr. Weiner

152A. Drama from the Beginning to 1576. (Formerly numbered 152.) Prerequisites: courses 3, 4, 10A, 10B, 10C. English drama from its Latin and Anglo-Norman roots to the opening of the first public playhouse. P/NP or letter grading.

Mr. Kipling, Mr. Kolbe

152B. Drama, 1576-1642. (Formerly numbered 152.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Non-Shakespearean English drama from the opening of the first permanent public playhouse to the closing of the theaters. P/NP or letter grading.

Mr. Braunneller, Mr. Foakes

153. Literature of the Early 17th Century, 1600-1660. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10B, 10C. A study of the major works as literary documents and as products of the Restoration and earlier 17th-century thought.

Mr. Dearing, Mr. Roper, Mr. Rousseau

154. Literature of the Restoration and Earlier 18th Century, 1660-1720. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the major works as literary documents and as products of the Restoration and earlier 18th-century thought.

Mr. Dearing, Mr. Novak, Mr. Roper

155. Drama, 1660-1842. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An intensive study of the poetry and prose of Blake, Wordsworth, and Coleridge, with collateral readings from such authors as Godwin, Burne, Burns, Southey, Lamb, DeQuincey and Scott.

Mr. Maniquis, Ms. Melior, Mr. Sheats

156. 16th Century, 1509-1599. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the poetry and prose of Keats, Shelley, and Byron, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, and Peacock.

Mr. Burwick, Mr. Maniquis, Mr. Thorsfield

157. Earlier Romantic Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the major English novelists from Defoe through Scott.

Mr. Bartten, Mr. Lehan, Mr. Rousseau

158. Earlier Victorian Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the poetry and prose of the Victorian age from the passage of the first Reform Bill through the high Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman.

Mr. Kolb, Mr. Tennyson

159. Later Victorian Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the poetry and prose of the Victorian age from the passage of the first Reform Bill through the high Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman.

Mr. Kolb, Mr. Tennyson

160. Victorian Drama. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the major English novelists from Dickens through Hardy.

Mr. Anderson, Mr. Hutter, Mr. Yeazell

161. 20th-Century British Poetry. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A survey of the major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to the present.

Mr. Bedient, Mr. Kolb, Mr. North
166. 20th-Century British Fiction. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A survey of the major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present. Mr. Lincoln, Mr. Pecora

167. Drama, 1842-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C (for theater, film, and television majors the 10A, 10B, 10C prerequisites are waived). A survey of British and American drama, with its principal continental influences, from 1842 through World War II. Mr. Berst, Mr. Braunmuller, Mr. Goodwin

168. Drama, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of British and American drama, with its principal continental influences, since World War II. Mr. Berst, Mr. Braunmuller, Mr. Goodwin

170. American Literature to 1800. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A historical survey of American literature through the Colonial and early national periods. Mr. Colacurcio, Ms. Rowe

171. American Literature, 1801-1865. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A historical survey of American literature, including fiction, from the beginning of the 19th century to the end of the Civil War. Mr. Colacurcio, Ms. Packer, Mr. Wortham

172. American Literature, 1866-1912. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A historical survey of American literature from the end of the Civil War to the founding of Poetry magazine. Ms. Banta, Mr. Wortham

173. American Poetry, 1912-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. The development of American poetry from 1912 through World War II, including the works of Frost, Eliot, Pound, Williams, and Stevens. Mr. Bedient, Mr. Riddel, Mr. Yenser

174. American Fiction, 1912-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. The development of the American novel and short story from 1912 through World War II, including the works of Hemingway, Fitzgerald, Faulkner, and Stein. Mr. Goodwin, Mr. Lehan, Mr. Yarborough

175. American Poetry, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of contemporary American poetry. Mr. Bedient, Mr. Yenser

177. American Fiction, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. A study of the contemporary novel and short story. Mr. Goldberg, Mr. Kessler

178. Perspectives in the Study of American Culture. (Formerly numbered 175.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. An interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on the application of literary methodology to a historical survey of American culture. Mr. Goodwin, Mr. Paredes

Courses 180 through 189 are designed to permit a small number of students (normally 15) to engage in concentrated study in an area in which they have a particular interest and in which they have taken adequate upper division background courses. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. For the author, period, genre, or subject to be studied, see the Schedule of Classes for any given quarter. For further details, see the departmental counselor. Courses may be repeated for credit.

M197. Topics in Afro-American Literature. (Same as Afro-American Studies M197.) A variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nineteenth Century; Contemporary Afro-American Fiction. May be repeated for credit. Mr. Yarborough

197F. Rhetoric in Modern American Culture. See listing under "English Composition."

197H. Honors Seminar for Freshmen and Sophomores. Seminar, three hours. Prerequisites: courses 3, 4, Limited to 15 students. Recommended for lower division students who anticipate entering the honors program in English during their junior year. Consent varies; see departmental counselor for information. Mr. Batten

199. Special Studies in English (2 to 4 units). Prerequisite: consent of instructor. An intensive directed research project. To enroll or obtain information, see departmental counselor.

199A. Honors Seminar. Prerequisite: course 140A. An introduction to research techniques and a study of various approaches and applications of critical methodology as it relates to the interpretation and evaluation of texts. Mr. Solomon (F)

199B-199HC. Honors Tutorial. Prerequisites: course 199A, consent of instructor. A tutorial in which students write a thesis under the direction of a faculty member. In Progress grading. (W,Sp)

199I. Independent Study for Internships (2 to 4 units). Prerequisite: consent of instructor. An independent study course to be supervised jointly by the Field Studies Office and the faculty supervisor. Further supervision to be provided by the business for which the student is doing the internship. P/NP grading.

Graduate Courses

200. Approaches to Literary Research. The bibliographical tools of English and American literary scholarship; an introduction to descriptive bibliogra phy and basic methods of research. Mr. Batten, Mr. Kipling

201. History of Literary Criticism. The study of the major documents in Western literary theory from Plato to the present. Mr. Lehan, Mr. Pecora, Mr. Solomon

202. Enumerative and Descriptive Bibliography. Problems in bibliography, texts, and editions, with practical application in compiling bibliographical, editing texts, and approaching literature through textual criticism. Mr. Dearing

203. Computers and Literary Research. Prior knowledge in this area not required. Practice in writing and using computer programs for the analysis of literary style, content, and authorship. Mr. Dearing

204. History of Rhetoric. Reading of the basic texts in the history of rhetoric and selections from standard commentaries. Survey of the classical period and the medieval-to-modern period in alternate years. Mr. Lanham

M205. Perspectives in American Folklore Research. (Same as Folklore M205.) Prerequisites: Folklore 101, one other upper division folklore course. An examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on the principal conceptual schemes and research orientations employed in the study of folklore in American society. Mr. Georges, Mr. Jones, Mr. Stern

210. History of the English Language. A detailed study of the history, characteristics, and changing forms of the language from its origin until 1900. Ms. Minkova

211. Old English. Study of Old English grammar, lexicology, phonology, and pronunciation to enable students to read the literature silently and aloud. Reading of as much of the more interesting Old English prose and poetry as can be read in a quarter. Mr. Calder, Mr. Condren

212. Middle English. Prerequisite: course 211. Detailed study of the linguistic aspects of Middle English and of representative examples of the better prose and poetry. Ms. Minkova, Ms. Ridley

213. Early Modern English. (Not the same as course 213 prior to Fall Quarter 1985.) Detailed study of the phonology, morphology, syntax, and vocabulary of English between 1450 and 1750. Description and analysis of the changes in the language in relation to the intellectual, political, and social characteristics of the period. Ms. Minkova

214. Modern English. (Formerly numbered 213.) Description and analysis of modern English phonology, grammar, and vocabulary, using the theory and techniques of contemporary linguistics. A survey of the evolution of American English and an account of the characteristic phonological and grammatical features of the major regional varieties of English around the world. Ms. Minkova
The following courses stress wide reading in languages. Mr. Ford

214. Celtic Linguistics. Prerequisite: consent of instructor. A survey of salient features of the Celtic linguistic stock in its Gaelic and British branches, with reference to the position of Celtic within Indo-European languages. Mr. Ford

The following courses stress wide reading in major authors, works, and intellectual developments.

220. Readings in Medieval Literature. Mr. Kelly, Mr. Kolve, Ms. Ridley

221. Readings in Renaissance Literature. Mr. Allen, Mr. Kinsman

222. Readings in Earlier 17th-Century Literature. Mr. Guffey, Mr. Gullans, Mr. Sellin

223. Readings in Restoration and 18th-Century Literature. Mr. Novak, Mr. Roper, Mr. Rousseau

224. Readings in Romantic Literature. Mr. Burwick, Ms. Mellor, Mr. Thorslev

225. Readings in Victorian Literature. Mr. Tennyson, Mr. Welsh

226A. Readings in Earlier American Literature. Mr. Colacurcio, Mr. Wortham

226B. Readings in 19th-Century American Literature. Ms. Packer, Mr. Wortham

227. Readings in 20th-Century American Literature. Mr. Lehan, Mr. Paredes, Mr. Riddel

228. Readings in 20th-Century British Literature. Mr. Bedient, Mr. Kessler

229A. Readings in the Novel. Mr. Lehan, Mr. Novak

229B. Readings in the Drama. Mr. Berst, Mr. Braunmuller

230. Workshop in Creative Writing (2 to 4 units). Prerequisite: consent of instructor. Following submission of writing samples in the specified genre (poetry, fiction, or drama). May be repeated but not may satisfy more than one of the nine courses required for the first qualifying examination nor any of the five courses required for the second qualifying examination. Mr. Kessler, Mr. Yenser

M235. African Myth and Mythology. (Same as Folklore M235.) Prerequisite: graduate standing. A graduate seminar that examines and appreciating African myths and mythological systems. Mr. Kolb, Mr. Tennyson

238. Colloquium (2 to 4 units). Special topics from various fields in lecture, proseminar, or seminar format. S/U grading.

239. Explanation (2 units). Lecture, one hour; discussion, one hour. Recommended for first-stage Ph.D. candidates. Provides training in practical criticism. May be repeated for credit. S/U grading. Mr. Roper, Mr. Yenser

Seminar courses (240 to the end of the 200 series) are open to all graduate students with adequate preparation and may be repeated for credit. Enrollment is with consent of instructor; continuing students must sign up for seminars before the end of the preceding quarter. A prospectus announcing topics for all seminars is available in the department office in early summer for the ensuing academic year.

240. Studies in the History of the English Language. Individual seminars dealing with any single historical period from the Old English period to the present or the development of a particular linguistic characteristic (phonology, semantics, sociolinguistics) through various periods. Ms. Minkova

214. Celtic Linguistics. Prerequisite: consent of instructor. A survey of salient features of the Celtic linguistic stock in its Gaelic and British branches, with reference to the position of Celtic within Indo-European languages. Mr. Ford

241. Studies in the Structure of the English Language. Prerequisite: consent of instructor. Topics in various aspects of the structure of modern English, especially syntax and semantics. Ms. Minkova

242. Language and Literature. The application of linguistics to literary analysis. Individual seminars dealing with a historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or the contributions of specific groups of linguists to literary analysis.

Mr. Grose, Mr. Lanham

M243A. The Ballad. (Same as Folklore M243A.) Prerequisite: consent of instructor. A study of the English and Scottish popular ballads and their American derivatives, with some attention to European analogues. Mr. Wilgus

M243B. Problems in Ballad Scholarship. (Same as Folklore M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in the study of the popular ballad. Mr. Wilgus

244. Old and Medieval English Literature. Studies in the poetry and prose of Old and Medieval English literature; limits of investigation set by individual instructor. Mr. Calder, Mr. Kelly, Mr. Kolve

245. Chaucer. Mr. Kelly, Mr. Kolve, Ms. Ridley

246. Renaissance Literature. Studies in the poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. Mr. Allen, Mr. Kinsman, Mr. Kipling

247. Shakespeare. Mr. Braunmuller, Mr. Foakes, Mr. Watson

248. Earlier 17th-Century Literature. Studies in the poetry and prose of 17th-century English literature up to the Restoration; limits of investigation set by individual instructor. Mr. Guffey, Mr. Gullans, Mr. Sellin

249. Milton. Studies in the poetry and prose of John Milton; particular emphasis set by individual instructor. Mr. Grose, Mr. Post, Mr. Sellin

250. Restoration and 18th-Century Literature. Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor. Mr. Novak, Mr. Roper, Mr. Rousseau

251. Romantic Writers. Mr. Burwick, Mr. Sheats, Mr. Thorslev

252. Victorian Literature. Studies in English poetry and prose of the Victorian period; limits of investigation set by individual instructor. Mr. Kolsby, Mr. Tennyson

253. Contemporary British Literature. Mr. Bedient, Mr. Kessler, Mr. Yenser

255. Contemporary American Literature. Studies in contemporary American poetry and prose; limits of investigation set by individual instructor. Mr. Berst, Mr. Braunmuller, Mr. Foakes

256. Studies in the Drama. Studies in the drama as a genre from its beginning to the present; limits of investigation set by individual instructor. Mr. Bedient, Mr. Braunmuller, Mr. Riddell

257. Studies in Poetry. Studies in various themes and forms of poetry from Old English to the present; limits of investigation set by individual instructor. Mr. Bedient, Mr. Kessler, Mr. Riddel

258. Studies in the Novel. Studies in the evolution of the genre from its beginning to the present; limits of investigation set by individual instructor. Mr. Lehan, Mr. Novak, Mr. Weish

259. Studies in Criticism. Mr. Guffey, Mr. Hutter, Mr. Riddell

260. Studies in Literature and Its Relationship to the Arts and Sciences. Studies in the interrelationship of literature, the arts, and the sciences; limits of investigation set by individual instructor. Mr. Guffey, Mr. Lincoln, Mr. Rousseau

M260A. Topics in Asian American Literature. (Same as Asian American Studies M260A.) Lecture, three hours. A graduate seminar that examines and critically evaluates writings of Asian Americans.

M261. Studies in African Literature in English. (Same as English as a Second Language M224K.) Prerequisite: consent of instructor. Special problems and trends of African literature in English. Mr. Povey (W)

M262. Studies in Afro-American Literature. (Same as Afro-American Studies M200E.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on the aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

263. Celtic Literature. Lecture, three hours. Prerequisite: knowledge of one of the ancient or modern Celtic languages. Studies in the poetry and prose of early and modern Celtic literatures, chiefly Irish and Welsh; limits of investigation set by individual instructor. Mr. Ford, Mr. Nagy

264. Studies in Rhetoric. Discussion, three hours. Special topics in classical and modern rhetoric, including substantial practice in the rhetorical analysis of literary texts. Mr. Lanham

265. Seminar in Literary Data Processing. Prerequisites: courses 200, 203. Subjects alternate between (1) team writing of a large program to solve or help solve a research problem proposed by a faculty member (who usually joins in supervising the seminar) and (2) compilation and interpretation of literary statistics (with cooperation of a member of the Statistical/Biometamathematical Consulting Clinic). Mr. Dearing

M266. Cultural World Views of Native America. (Same as American Indian Studies M266.) Seminar, three hours. Exploratory seminars, seminars and workshops drawn from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches drawn from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology.

270A-270B. English for the Two-Year College. Prerequisite: course 120B or 275. Discussion and practice of two-year college instruction in reading and composition. In Progress grading.

272. Current Issues in the Teaching of English. Prerequisite: course 120B or Linguistics 100. Focus on one of a variety of topics of special current interest. Mr. Lanham

M274. Teaching of English for Minority Groups. (Same as English as a Second Language M224K.) Prerequisites: English (ESL) 370K and Linguistics 100, or consent of instructor. In-depth description of the dialects of English and of other languages (such as Spanish) used by groups of students in American schools. The origins, variations within, and current status of language varieties such as Black English and Chicano Spanish, relevant research, and educational implications. Ms. McCarthey
Students need writing proficiency at every stage of their university careers. Although UCLA does not have a composition major, the UCLA Writing Programs and the Composition Section of the English Department offer a series of courses introducing the varieties of university discourse and providing basic to highly skilled instruction. Besides courses which satisfy the University's Subject A and English Composition requirements, the program offers writing courses linked with courses in other departments, intermediate and advanced courses in exposition, language and composition courses for teachers, and a sequence of courses in professional writing and editing.

**Subject A**

Every student who does not satisfy the Subject A requirement by presenting transfer credit or acceptable test scores is required to take, in the quarter immediately following admission to the University, either English A or B. Placement in these courses is determined by performance on the Subject A Examination. For more information regarding Subject A, see "Undergraduate Degree Requirements" in Chapter 2.

**Composition Requirement**

Each of the University's colleges and schools sets its own composition requirement. Completing English 3 with a grade of C or better meets the requirement in all divisions. For further information about the composition requirement, see the introductory copy for your college or school.

Students who score 660 or better on the CEEB English Composition Achievement Test are eligible to take the English Proficiency Examination. Outstanding performance on this examination fulfills the composition requirement. For further information, contact the Freshman Writing Program.

**Lower Division Courses**

A. Basic Review of English Usage (No credit). Lecture, five hours. Prerequisite: placement into English A determined by performance on the Subject A Examination. English A places four units on the student's Study List but yields no credit toward a degree. A preliminary course in academic writing, offering workshop exercises in reading, writing, and revision. Students learn grammar and mechanics primarily through practice and imitation. Completion of this course with a grade of C or better or demonstration of minimum competence on the Subject A Examination is prerequisite to English B.

B. Fundamentals of Exposition (No credit). (Formerly numbered 1 A.) Prerequisite: English A or qualifying score on Subject A Examination. English B displaces four units on the student's Study List but yields no credit toward a degree. Designed to develop the proficiency in expository writing required for successful University work. Lectures, readings, class discussions, and assignments in writing and revision. Completion of this course with a grade of C or better satisfies the English Composition requirement.

3. English Composition, Rhetoric, and Language. Lecture, three hours. Prerequisite: satisfaction of Subject A requirement by examination or by completion of course B with a grade of C or better. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each). Completion of this course with a grade of C or better satisfies the English Composition requirement.

4H. English Composition, Rhetoric, and Language (Honors). Lecture, three hours. Prerequisites: satisfaction of Subject A requirement, consent of department. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each).

**Upper Division Courses**

100W. Intensive Writing (2 units). Prerequisite: course 3. Students must be concurrently enrolled in a course offered in conjunction with English 100W (refer to "Schedule of Classes" for courses so designated). Designed to teach analytic paper writing, with emphasis on revision techniques. Material for writing assignments comes from adjunct course, and assignments reflect and develop writing skills needed in that course. May be repeated for credit with consent of instructor.
100WH. Intensive Writing (Honors) (2 units). Prerequisite: course 3. Students must be concurrently enrolled in an honors course offered in conjunction with English 100WH (refer to the Schedule of Classes for courses so designated). Designed to teach analytic paper writing, with emphasis on revision techniques. Material for writing assignments comes from adjunct course, and assignments reflect and develop writing skills needed in that course. May be repeated for credit with consent of instructor.

110W. Intensive Writing for the Discipline. Prerequisite: satisfaction of Subject A and English Composition requirement. Students must be concurrently enrolled in a course offered in conjunction with English 110W (refer to the Schedule of Classes for courses so designated). Designed to teach analytic writing, with emphasis on critical use of sources and revision techniques. Material for writing assignments comes from adjunct course, and assignments reflect and develop writing skills needed in that course. (Formerly numbered 130.) Prerequisite: satisfaction.

179F. Rhetoric in Modern American Culture. Seminar, three hours. Prerequisites: satisfaction of Subject A and English Composition requirements, course 4 or 30 or one course from the 131 series, upper division standing. A one-quarter field studies course designed to provide students with an academic background in and firsthand knowledge of media writing. P/NP or letter grading.

Graduate Courses

300. Teaching of English. Required of candidates for the single subject credential in English. Study of theories of rhetoric, composition, reading, and literature as they apply to the secondary school English curriculum.

495A-495B. Supervised Teacher Preparation (2 units each). Discussion, one hour; laboratory, 30 minutes. Required of all applicants for a teaching assignment in English. The practical concerns of designing a course, creating assignments, grading papers, and holding conferences for English 3 classes. Must be taken concurrently with the first teaching assignment. Examines the specialized problems which occur in teaching English 3 and introduces students to techniques for teaching English B and ESL. In Progress and S/U grading.

English as a Second Language Section

Professors
Russell N. Campbell, Ph.D.
Marianne Celce-Murcia, Ph.D.
Evelyn R. Hatch, Ph.D.
John F. Povey, Ph.D.
John H. Schumann, Ed.D., Chair
J. Donald Bowen, Ph.D.; Emeritus
Clifford H. Pratt, Ph.D.; Emeritus

Associate Professors
Roger W. Andersen, Ph.D.
Earl J. Rand, Ph.D.

Assistant Professor
Mary E. McGroarty, Ph.D.

Lecturers
Donna Brinton, M.A.
Janet Goodwin, M.A.

Adjunct Assistant Professor
Brian K. Lynch, Ph.D., Academic Director, ESL Service Courses

Staff
Roann Altman, Ph.D.; Assistant Director, ESL Service Courses

Scope and Objectives

The Teaching English as a Second Language (TESL) Program is designed for students who wish to develop research skills related to the teaching and learning of English as an additional language. The program is a two-year course of graduate study leading to a Master of Arts degree.

The first year of the program is designed to improve teachers' performance in the ESL classroom. The second year provides an opportunity to investigate in depth some particular aspect of teaching and learning English as a second language. The course of study includes a practical element: observing classes, preparing lesson plans, and actual classroom teaching. There is, however, a greater emphasis on theory in the program. Students are expected to become familiar with current theories regarding the nature of language, as well as the ways in which people acquire and use language. They are also expected to be able to relate theoretical guidelines to practical procedures. The program is therefore not appropriate for the student who is interested exclusively in receiving vocational training. Admission preference is granted to applicants with strong research interests.

In addition, the ESL Section and the Linguistics Department offer an interdisciplinary degree program leading to a Ph.D. in Applied Linguistics. For information, write to the Applied Linguistics Program, 3300A Rolfe Hall, UCLA, Los Angeles, CA 90024-1531. (Also see the section on Applied Linguistics earlier in this chapter.)

A limited number of teaching assistantships are available to qualified M.A. and Ph.D. students. For information and applications, write to the Academic Director, ESL Service Courses, 3312 Rolfe Hall, UCLA, Los Angeles, CA 90024-1531.

Master of Arts in Teaching English as a Second Language

Admission

Students normally apply for the M.A. in TESL if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only at the beginning of Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree.

After admission, you must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is required in order to continue into the second year of the M.A. program and must be maintained throughout the second year.
Applications for admission may be obtained from the graduate adviser and are due by December 30 of the year prior to admission. The program requires three letters of recommendation in support of the application. You are requested to submit the letters of recommendation directly to the Graduate Adviser, English as a Second Language Section, 3300A Rolfe Hall, UCLA, Los Angeles, CA 90024-1531. Since admission is limited to approximately 30 students per year, it is important that supporting papers be submitted by February 15.

The admissions committee screens all applications, using the following criteria: grade-point average (must be 3.0 or better), Graduate Record Examination (GRE) scores (required only of applicants whose native language is English), letters of recommendation, statement of purpose, and relevant professional experience. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study TESL at UCLA; (2) special qualifications and experience as a teacher; (3) knowledge of languages other than English; and (4) knowledge of other cultures.

International students who hold a bachelor’s or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from both the Test of English as a Foreign Language (TOEFL) and the UCLA English as a Second Language Placement Examination (ESLPE). The UCLA English as a Second Language Placement Examination (ESLPE). All other applicants must take the TOEFL, submitting the scores as part of the application process.

Foreign Language Requirement

Students whose native language is English generally use their Fall and Winter Quarter electives to acquire or perfect knowledge of the native language or dialect of the pupils to whom they expect to teach English. This can be done by taking any one of four combinations of two courses: (1) two foreign language courses; (2) one foreign language course plus a corresponding course in the Linguistics 220 or 225 series; (3) one foreign language course plus English M274; (4) English 227K plus an unrestrictive elective.

Those particularly interested in working with Mexican American, Asian American, or American Indian pupils normally choose the third of these alternatives. When there is doubt as to which language is most appropriate, a non-European language should be selected because of the greater broadening of linguistic horizons that such a selection offers. Foreign language courses that deal with linguistic structure should be selected whenever possible.

Nonnative speakers of English, depending on the results of the UCLA English as a Second Language Placement Examination (ESLPE), may be required to take a course to improve their practical command of English.

Exemption from the foreign language requirement may be granted if you can demonstrate a strong need to take other electives and have an unusually extensive background of previous foreign language study. For more information, contact the graduate adviser.

First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows (descriptions of the English courses mentioned here may be found at the end of this section):

Fall Quarter: Linguistics 100, English 370K, foreign language requirement or elective (course depends on language requirement plan)

Winter Quarter: English 122K, 241K, foreign language requirement or elective (course depends on language requirement plan)

Spring Quarter: English 106K or 107K or 109K, 380K, Linguistics 103 or English 103K

Exceptions to the above requirements are made only after consultation with the graduate adviser.

Of the nine courses required the first year, at least seven must be in TESL, English, linguistics, or structure of language courses in language departments.

Successful completion of the above courses qualifies students for a TESL certificate (which is not a California State Teaching Credential).

Teaching Experience

One quarter of supervised teaching is required during the first year unless you have had extensive teaching experience. If this requirement is completed at UCLA in an adult education setting, you are eligible for the California Adult Education Credential in ESL (call 825-4581 for more information). The California Basic Educational Skills Test is required of all applicants for the credential.

Second-Year Curriculum

A total of 14 courses is required for the M.A. degree, including a minimum of four 200-series courses. Four of the nine courses taken during the first year (usually Linguistics 100, Linguistics 103 or English 103K, English 122K and 241K) and, in special cases, two of the electives (100 or 200 series only) may be applied toward the University’s nine-course minimum requirement for master’s degrees. This leaves five courses, at least two of which must be at the graduate level, to be completed in consultation with the graduate adviser during the second year.

Eight units of 500-series courses may be applied toward the M.A. degree. You must enroll in course 598K each quarter you are registered; however, only four units may be applied toward the degree (to be taken either in Spring Quarter of your first year or Fall Quarter of the second year).

English 400K is a seminar in which TESL M.A. candidates present and defend the results of their thesis research. Enrollment is required in the Spring Quarter but does not count as one of the 14 courses required for the M.A.

The electives taken during the second year should be selected, in consultation with the faculty M.A. adviser and the chair of your thesis committee, as a sequence of related courses relevant to your thesis topic. Any changes in the program must be approved by both the committee chair and the M.A. adviser.

Thesis Plan

By the end of the fourth quarter, your thesis proposal, signed by two faculty members, is submitted to the faculty. At this time, plans for the thesis are approved and the thesis committee is established.

Undergraduate Courses

Courses 32, 33A, 33B, 33C, 34, 35, 36, 103J, 106J, 107J, 109J are only for students whose native language is other than English. Placement in these courses is established on the basis of the UCLA English as a Second Language Placement Examination (ESLPE), which students whose native language is not English must take in addition to the Subject A Examination (see “Subject A” in Chapter 2). Depending on the results of this examination, entering students are (1) exempt from any special ESL requirement, (2) required to take course 35, (3) required to take course 33C, followed by course 35, (4) required to take course 33B followed by courses 33C and 35, (5) required to take course 33A followed by courses 33B, 33C, and 35, or (6) required to spend a quarter studying elementary English exclusively, through UCLA Extension, followed by courses 33A, 33B, 33C, 35. You must enroll in the course(s) during your first term in residence at UCLA and each subsequent term until you complete course 35 with a grade of C or better.

You may satisfy the English Composition requirement by completing English (ESL) 36 with a grade of C or better (C- or a Passed grade is not acceptable). Admission into course 36 is determined by a Composition Placement Test administered the first day of class each quarter.
Lower Division Courses

32. Oral Communication Skills for ESL Students. Prerequisite: grade of C or better in course 33B or proficiency demonstrated on the English as a Second Language Placement Examination. Course 33C may be taken concurrently. Develops oral skills that prepare nonnative speakers of English to participate in class discussion, make oral presentations before an audience, ask and answer questions, participate appropriately in conversations with members of the academic community, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

33A. Low Intermediate English as a Second Language. Recitation, eight hours; laboratory, two hours. Prerequisite: grade of C or better in Extension course X1B or proficiency demonstrated on the English as a Second Language Placement Examination. Displaces eight units on the student's Study List but yields only four units of credit toward a degree. Intensive instruction in the structure of English, with focus on vocabulary building, listening and speaking skills, and basic composition techniques.

33B. High Intermediate English as a Second Language. Recitation, five hours. Prerequisite: grade of C or better in course 33A or proficiency demonstrated on the English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills.

33C. Advanced English as a Second Language. Recitation, five hours. Prerequisite: grade of C or better in course 33B or proficiency demonstrated on the English as a Second Language Placement Examination. Emphasis on academic writing, reading, research skills, and lecture comprehension.

34. Advanced Oral Communication Skills for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. Develops oral skills that prepare nonnative speakers of English to present ideas extemporaneously, lead class discussions, give lectures or speeches before an audience, respond to questions posed by the audience, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

35. Developmental Composition for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. Developmental composition skills for ESL students, with focus on the mechanics of writing, grammatical structures, and recognition of and practice with the major academic discourse modes.

36. Intermediate Composition for ESL Students. Prerequisite: grade of C or better in course 33C or 35 or proficiency demonstrated on the English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Designed to improve English language writing skills for nonnative speakers of English. Special attention to grammatical structures, principles and methods of exposition, and writing for academic purposes.

Upper Division Courses

103K. Phonetics for Teachers of English as a Second Language. Prerequisite: consent of instructor. Analysis of the phonological structure of contemporary English, with attention to its differences between British and American speech. Drill directed toward individual needs. Mr. Andersen

106J. Advanced Composition for ESL Students. Prerequisites: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Exercises in writing based on readings, with the aim of developing idiomatic control of expression. Ms. Brinton, Mr. Rand

108K. Writing in the ESL Context. Provides opportunities for practice and improvement in writing skills and thus fulfills the composition requirement for the TESL M.A. degree. Survey of important theoretical and methodological issues related to the teaching of writing/composition to ESL students and examination of appropriate classroom materials and authentic student compositions.

107J. Advanced Reading for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. Identification through example of the essential cognitive strategies necessary for effective reading in academic purposes. Development of these strategies through exercises and guided practice using authentic university texts from a variety of content areas.

109K. Literature in the ESL Context. Provides opportunities for practice and improvement in reading and writing skills and thus fulfills the composition requirement for the TESL M.A. degree. Survey of important theoretical and methodological issues related to the teaching of reading and writing to ESL students and examination of appropriate classroom materials.

110J. Introduction to Literature for ESL Students. Prerequisite: grade of C or better in course 33C or proficiency demonstrated on the English as a Second Language Placement Examination. Selections from English and American literature presented so as to make full allowance for the students' linguistic and cultural problems and to contribute to an increasing command of the English language. Ms. Hatch

110K. Literature. Survey of the literature, presentation of appropriate classroom materials and authentic student compositions focusing on the application to ESL instruction. Ms. Hatch

117K. Reading in the ESL Context. Provides opportunities for practice and improvement in reading and writing skills and thus fulfills the composition requirement for the TESL M.A. degree. Survey of important theoretical and methodological issues related to the teaching of reading and writing to ESL students and examination of appropriate classroom materials.

120K. Materials Development for Language Teaching. Prerequisites: course 370K, at least two years of ESL/EFL teaching experience. Planning and preparation of original sets of language teaching materials geared to the needs of a specified group of learners. Revision of first drafts and evaluation of one's own work and that of one's peers.

221K. Media for Language Teaching. A rationale and pedagogical application for using media equipment and materials in the language classroom. Training in standard classroom media equipment operation and basic materials production techniques, focusing on the application to ESL instruction. Ms. Brinton

222K. Language Testing for Teachers of English as a Second Language. Prerequisites: course 370K, Linguistics 100. Theories and techniques for language assessment across the skill areas. Emphasis on classroom testing and the functions of testing within a language program. Basic statistical concepts and hands-on experience with the construction of language tests.

223K. Role of English as a Second Language in Bilingual Education. Prerequisites: course 370K, Linguistics 100. Survey of the literature, presentation of appropriate classroom materials and authentic student compositions focusing on the application to ESL instruction. Ms. Rand

Graduate Courses

All graduate courses are open to qualified graduate students from other departments with consent of department.

209K. Current Issues in Experimental Design and Statistical Analysis. Specialized topics in the differences between graduate students in TESL and applied linguistics. Emphasis varies according to current topical concerns in the field.

212K. Advanced Seminar in the Construction and Administration of Language Tests. Prerequisite: course 222K or consent of instructor. Designed to explore current issues in language testing research from both theoretical and practical perspectives, to provide practical experience in addressing a current issue. Specific topics vary according to trends in the field.

214K. Contrastive and Error Analysis in the ESL Context. Prerequisites: course 370K, Linguistics 100. Analysis of English and other languages at the phonological, grammatical, lexical, and cultural levels. Preparing analyses of interlanguage for research purposes. Preparation of lesson plans for helping specific groups of students overcome common errors identified through the analyses. Observation of ESL classes.

220K. Methods Development for Language Teaching. Prerequisites: course 370K, at least two years of ESL/EFL teaching experience. Planning and preparation of original sets of language teaching materials geared to the needs of a specified group of learners. Revision of first drafts and evaluation of one's own work and that of one's peers.
249K. Current Issues in Language Analysis. Specialized topics in language analysis of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical import in the field. Mr. Andersen, Ms. Celce-Murcia, Mr. Schumann

250K. Advanced Seminar in Cohesion Analysis of English Structure. (Formerly numbered M250K.) Prerequisite: course 222K or consent of instructor. Investigation in depth of selected linguistic features of oral and written texts that go beyond the basic level and thus signal cohesion. Study of structures to determine their function in a variety of English texts representing several discourse types. Ms. Celce-Murcia (F)

251K. Advanced Seminar in Interglossic Language Analysis. Prerequisite: course 241K. Analysis of interlanguage from various points of view (e.g., topic-comment structure, tense, aspect, modality, thematic structure of utterances), with the aim of understanding how interlanguage is organized. Original research projects. Mr. Andersen, Ms. Hatch, Mr. Schumann

252K. Advanced Seminar in Contextual Analysis of English. Prerequisite: consent of instructor. Examination of selected words and structures in oral and written English to determine when and why the word or structure occurs. Emphasis on factors such as meaning, discourse genre, and relative frequency. However, the starting point in the analysis is syntax (i.e., what are the structural properties — form, distribution — of the word(s) or structure(s) under consideration?). Mr. Ms. Celce-Murcia (F)

260K. Psycholinguistics and Language Teaching. Prerequisites: course 370K and Linguistics 100, or consent of instructor. An exploration of those areas of psycholinguistics covering foreign language acquisition; types and theories of bilingualism; learning theories underlying the current methods of teaching foreign languages. Ms. Hatch, Ms. Schumann (F)

261K. Second Language Acquisition. Prerequisite: consent of instructor. Review of the literature on child and adult second language acquisition. Language variables (phonological, morphological, sentential, and discourse levels) and social and psychological variables which may account for differences in learning. Mr. Andersen, Ms. Hatch, Mr. Schumann (F)

269K. Current Issues in Language Acquisition (2 to 4 units). Specialized topics in language acquisition of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical concern in the field. Mr. Andersen, Ms. Hatch, Mr. Schumann (W)

271K. Cross-Linguistic Topics in Second Language Acquisition. Lecture, one hour; discussion, three hours. Prerequisites: course 261K. Linguistics 100. Advanced seminar on second language acquisition in which a particular linguistic topic (e.g., development of tense-aspect, reference, subordination, agreement) is pursued from cross-linguistic and cross-disciplinary perspectives. Focus on language-specific vs. universal (i.e., cross-linguistically valid) mechanisms of second language development. Readings from research on a variety of languages in second language acquisition and related research on first language acquisition, pidgins and creoles, language contact, and language loss. May be repeated for credit with topic change. Mr. Andersen

280K. Language Policy in Developing Countries. Prerequisite: consent of instructor. Use of and need for English for English-speaking countries such as Nigeria and the Philippines; factors affecting language policy in their school systems; applicability of research techniques of sociolinguistics and psycholinguistics to problems of language policy. Mr. Povey

281K. Language Policy in the U.S. Prerequisite: consent of instructor. Use of and need for the teaching of languages, both English and others, in the U.S. Issues related to matters of language choice and language planning undertaken for various purposes; factors affecting language use, change, and standardization in the U.S. Ms. McGroarty

282K. Intercultural Communication and the Teaching of English as a Second Language. Prerequisite: consent of instructor. An introduction to the field of cross-cultural communication, with special attention to the cultural influences on language use. Presentation of theoretical frameworks describing variations in language use; discussion of literature and development of awareness and knowledge regarding cultural norms of language learning and use. Ms. McGroarty

283K. Discourse Analysis. A survey course covering language teaching and discourse analysis; discourse analysis and syntax; planned and unplanned conversations; analysis of speech events; unequal power discourse; and analysis of classroom discourse. Ms. Hatch (W)

284K. English for Specific Purposes. Study of need for specific English courses, curriculum development, and testing for specific academic, professional, and vocational groups who require English as a foreign or second language. Mr. Campbell (Sp)

M285K. Studies in African Literature in English. (Same as English M7621.) Prerequisite: course 210K. Emphasis on special problems and trends of African literature in English. Mr. Povey (W)

289K. Current Issues in Language Use. Specialized topics in language use and related areas of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of concern in the field. Mr. Campbell, Ms. Hatch, Ms. McGroarty (Sp)

370K. Teaching of English as a Second Language. Lecture, six hours. Prerequisite: consent of instructor. Bibliography, survey, and evaluation of methods and materials. The nature of language learning. Analysis of the differences between two languages as a basis of instruction. Mr. Campbell, Mr. Schumann (F)

375K. Teaching Apprenticeship Practicum (1 to 4 units). Prerequisite: apprentice personnel employed as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Ms. Altman (F,Sp)

380K. Supervised Teaching: English as a Second Language or Dialect. Prerequisite: course 370K. Team teaching at the elementary, secondary, or adult level under the supervision of a senior staff member. S/U grading. Ms. Binnon (Sp)

400K. TESL Colloquium. Prerequisite: consent of TESL M.A. adviser. M.A. candidates present and defend the results of their thesis research. Required of all candidates but may not be applied toward the M.A. degree requirements. Candidates for the Ph.D. in Applied Linguistics may also use this course to report on their dissertations. S/U grading.

Mr. Andersen, Ms. Celce-Murcia, Mr. Rand (Sp)

495K. Training and Supervision of Teaching Assistants (2 units). (Formerly numbered 495K/495SL.) Lecture, two or more hours. Corequisite: appointment as a teaching assistant. Orientation, preparation, and supervision of graduate students who have responsibilities for teaching ESL courses at UCLA. May be repeated for credit.

Mr. Andersen, Ms. Celce-Murcia, Mr. Rand (Sp)

598K. Directed Individual Study. Prerequisite: graduate standing. Independent study in an area related to English as a second language. May not be repeated for credit.

598K. M.A. Research and Thesis Preparation (4 to 8 units). Prerequisite: graduate standing. Survey of research needs and thesis preparation. Includes optional section on experimental design and statistical methods in Fall Quarter. Credit (four units) toward the degree is allowed only once, but all M.A. candidates must enroll in the course each quarter they are registered and engaged in thesis preparation. S/U grading. (F,Sp)

Environmental Science and Engineering (Interdepartmental)

This interdisciplinary graduate program, which leads to the Doctor of Environmental Science and Engineering (D.Env.) degree, provides scientific training in the enlightened management of the environment through a broad range of environmental disciplines. For details on this program, see Chapter 17 on the School of Public Health.

Folklore and Mythology (Interdepartmental)

Stanley L. Rote, Ph.D., Emeritus (Spanish and Portuguese)
Scope and Objectives

The interdisciplinary Folklore and Mythology Program, which leads to the Master of Arts and Ph.D. degrees, provides coordinated study of the traditional life-styles of specific societies and culture areas, on the one hand, and systematic training in the research methods and investigative techniques of cross-cultural study, on the other. Courses focus on the nature, history, and functions of such traditional forms as narrative, song, music, art, dance, and speech and consider the part they play in human development and cultural existence. The program examines the ways in which human traditions both reflect and contribute to continuity and consistency in thought and life. Trained folklorists pursue careers in teaching, research, governmental agencies, museum work and administration, performing groups and arts management, social work, the medical and legal professions, and business. Their responsibilities include documenting cultural and ethnic traditions, introducing traditional artists and their works to interested audiences, describing transformations of traditional processes and forms, and preserving on tape and film the customs and mores of social groups and individuals.

Although no undergraduate degree program is offered in folklore and mythology, students majoring in world arts and cultures may select folklore and mythology as their area of concentration. A variety of undergraduate courses offered by departments or by faculty participating in the interdepartmental program is also available to all University students. Those with undergraduate preparation in folklore and mythology studies may continue their work on the graduate level. For planning coursework, you should consult departmental counselors and the chair of the committee which administers the interdepartmental program.

Master of Arts Degree

Admission

Two letters of recommendation from former instructors or other comparable references are required and should be sent to the Chair, Folklore and Mythology Program, U.C.L.A., Los Angeles, California 90024-1459.

Foreign Language Requirement

Reading knowledge of French, German, or Spanish is required. You have the option of demonstrating proficiency either by:
(1) Passing the fifth quarter or fourth semester course in the selected foreign language at a college or university with a grade of B or equivalent no more than five years before graduate enrollment or
(2) Successfully completing the Educational Testing Service GSFLT examination with a score of 550 or better or
(3) Passing a reading examination administered and evaluated by members of the program faculty (or by outside faculty for languages not familiar to the program faculty).

Course Requirements

All degree candidates, whether electing the thesis or the comprehensive examination plan (see below), must complete the following courses: Folklore and Mythology 200, 201A, 201B, and at least one course from each of the following groups:

Group 1: One course in folk song or folk music.
Group 2: One course in the folklore and mythology of a specific culture or culture area.
Group 3: One course in the mythology of a specific culture or in the principles of mythology.

Group 4: One graduate seminar in an area of folklore and mythology.

Only eight units of course 596 may be applied toward the minimum course requirements.

Thesis Plan

If you select this plan, you must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included) and submit an acceptable thesis, prepared under the direction of a member of the program faculty. Submission of the thesis is followed by an oral examination covering the fields of folklore and mythology studies. You must complete all degree requirements in a maximum of six regular academic quarters.

The thesis committee, composed of three or more faculty members selected with the approval of the chair of the interdepartmental committee, is appointed no later than the quarter before you expect to complete the requirements. No outside members are required.

Ph.D. Degree

Admission

Requirements for admission to the doctoral program include completing the requirements for the M.A. degree in Folklore and Mythology (or equivalent) and the written comprehensive examination. You are admitted to the doctoral program on the recommendation of the interdepartmental committee (you may secure provisional admission in order to complete the admission requirements).

Major Fields or Subdisciplines

You must develop competency in (1) a major field of folklore and mythology and (2) an area of concentration within a related discipline. These areas are selected with the approval of the guidance committee.

Foreign Language Requirement

Reading knowledge of German and another language approved by the guidance committee is required. You may demonstrate proficiency by any of the three methods described above under "Foreign Language Requirement" for the master's degree.

The foreign language examinations must be completed before you attempt the qualifying examinations.

Course Requirements

Before attempting the qualifying examinations, you must complete a minimum of nine courses or seminars in the 200 series (or substitutes recommended by the guidance committee) in (1) folklore and mythology and (2) an area of concentration within a related discipline. At least five of the nine courses must be selected from Folklore and Mythology 200 through M286B, and at least two of the nine are to be folklore seminars (i.e., course 259). No more than two 596 courses may be applied toward the minimum graduate course requirement.

Qualifying Examinations

After the required preparation, you complete a written examination covering (1) your specialization in folklore and mythology and (2) your related area of concentration. The examination is administered by a committee appointed with the approval of the interdepartmental committee and includes one or more members from your related discipline.
The written examination is followed by the University Oral Qualifying Examination covering the same two areas listed above, which you must pass in order to be advanced to candidacy. The oral examination is administered by the doctoral committee, which also considers and approves your dissertation topic.

Final Oral Examination
An oral defense of the dissertation may be required, to be determined by your doctoral committee after you complete the oral qualifying examination.

Lower Division Course

15. Introduction to American Folklore Studies. Lecture/discussion. A cultural-social survey of folklore with an emphasis on the role of folklore in the development of American civilization and of the influence of the American experience in shaping folklore in American society; attention also to representative areas of inquiry and analytical procedures.

Upper Division Courses

101. Introduction to Folklore. A survey of the various forms of folklore and an examination of their historical and social significance.

CM105. Anglo-American Folk Song. (Same as English M111B.) Prerequisite: satisfaction of Subject A requirement, junior or senior standing. A survey of the American ballad and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course C205.

C107. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 15 or 101 and/or consent of instructor. Exploration of the expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through the dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C207.

108. Afro-American Folklore and Culture. Prerequisite: course 101 or consent of instructor. A study of the traditional genres or forms of Afro-American folklore and their cultural functions.

109. Mexican and Chicano Folklore in Context. (Same as Anthropology M166P.) Lecture, three hours. Prerequisite: consent of instructor. A historical and sociocultural survey of the folklore of peoples of Mexican cultural background within Mexico and the U.S. Emphasis on folklore as indices of Mexican and Chicano identity, as communicated through such traditional forms as narrative, song, music, customs, beliefs, crafts, and foodways.

111. Literature of Myth and Oral Tradition. (Same as English M111A.) Prerequisite: satisfaction of Subject A requirement. A study of myth, dramatic origins, oral epic, folklore, and ballad, emphasizing Indo-European and Semitic examples.

112. Survey of Medieval Celtic Literature. (Same as English M111E.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. A general course dealing with Celtic literature from the earliest times to the 14th century.

113. The Arthurian Tradition. Prerequisite: consent of instructor. A survey of the traditions relating to the British King Arthur from medieval times to the present day. Coverage includes: the Arthurian cycles, as well as ten texts; attention also to modern versions of Arthurian material in other mediums (e.g., opera, film).

118. Folk Art and Technology. Prerequisite: junior standing. A general course concerned with the material manifestations of folk culture and the theoretical concepts and methodologies utilized in their analysis.

M121. British Folklore and Mythology. (Same as English M111C.) Prerequisite: satisfaction of Subject A requirement, junior standing. A survey of the folklore of the peoples of Britain, with attention to their history, function, and regional differences.

M122. Celtic Mythology. (Same as English M111D.) Prerequisite: course 101 or consent of instructor. A survey of the early materials, chiefly literary, for the study of the mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

M123A. Finnish Folklore and Mythology. (Same as Scandinavian M123A.) The methods and results of Finnish folklore studies and the mythic traditions of the Finns. Special attention to the oral epic, beliefs, and myths.

M123B. Finnish Folk Song and Ballad. (Same as Scandinavian M123B.) Course M123A is not prerequisite to M123B. A survey of Finnish balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

124. Finnish Folk Art and Technology. Material manifestations of Finnish folk culture: village layout and architecture, folk technology, arts and crafts, textiles, costumes, and design.

125. Folklore and Mythology of the Lapps. (Same as Scandinavian M125.) Survey of Lappish beliefs, customs, and various genres of oral tradition, including tales, legends, songs, and music. Attention also to the material manifestations of Lappish culture: arts and crafts, textiles, costume, folk technology, and architecture.

M126. Baltic and Slavic Folklore and Mythology. (Same as Slavic M179.) Lecture. Three hours. A general course for students interested in folklore and mythology, and for those interested in Indo-European mythic antiquities.

M127. Celtic Folklore. (Same as English M111F.) Prerequisite: course 101 or consent of instructor. The folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

M128. Hungarian Folklore and Mythology. (Same as Hungarian M135.) A general course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research.

M219. Folklore and Mythology of the Ugric Peoples. (Same as Hungarian M136.) Survey of the traditions of the smaller Ugric nationalities (Voguls, Ostyaks, etc.).

130. North American Indian Folklore and Mythology Studies. Prerequisite: course 101 or consent of instructor. An examination of folkloristic and mythological data recorded from various North American Indian peoples with the contexts of the principal ideological frameworks which have been evolved historically for the analysis of such data.

131. Folklore of India. Prerequisite: course 101 or consent of instructor. An examination of folkloristic and mythological data recorded from various North American Indian peoples with special reference to the context and dissemination of oral epics, ballads, legends, and beliefs.

M136. Japanese Folklore. (Same as East Asian Languages and Cultures M136.) Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Lectures/discussions on the native religious rituals (festivals) and observances of the Japan- ese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto-Buddhist syncretism, and other non-Buddhist belief systems found in Japan. Prerequisite: NP or letter grading.

M140. From Boccaccio to Basile (in English). (Same as Italian M140.) Lecture. Three hours. A study of the development of the Italian novella in its themes, in its structure, in its historical context, and in its European ramifications. Designed for students in other departments who wish to become acquainted with the premises or the growth of similar literary genres. Also intended for students majoring in folklore and mythology, who are given an insight into Italian popular tales when these (as in the case of Boccaccio) were translated into highly sophisticated literary forms. Only when work is done (as in the case of Basile) they become embedded into the folk tradition of the Western world.

M142. Introduction to Jewish Folklore. (Same as Jewish Studies M143.) The nature of Jewish folklore: narrative, folk song, folk art, folk religion, and the methods and perspectives used in their analysis.

149. Folk Literature of the Hispanic World. (Same as Spanish M149.) Lecture, three hours. A study of the history and present dissemination of the principal forms of folk literature throughout the Hispanic countries. Prerequisite: course 101 or consent of instructor.

M154A-M154B. The Afro-American Musical Heritage. (Same as Music M154A-M154B.) Prerequisite: Music 5A-5B or equivalent. A course of study in the African musical elements, rhythm, dance, music, field hollers, work songs, spirituals, blues, and jazz; the contrast between Western Afro-American, and Afro-Brazilian musical traditions.

163. Folklore and Oral History. Prerequisite: junior standing. An examination of the relationships between folk tradition and oral history; how history may be derived from tradition; how traditions are embedded in historical sources; how the folk traditionalist history to reflect their point of view.

M170. Russian Folklore. (Same as Russian M170.) Lecture, three hours. A general introduction to Russian folklore, including a survey of genres and related folkloristic phenomena. Lectures and readings in English.

172. Folklore in Ethnic Context. Prerequisite: course 15 or 101 or consent of instructor. The role of folklore in ethnic relations; the processes by which ethnfolktale is generated, transmitted, and maintained by immigrant groups and subsequent generations.

M180. Analytical Approaches to Folk Music. (Same as Music M180.) Prerequisite: Music SA-SB or consent of instructor. An intensive study of the methods and techniques necessary to the understanding of Western folk music.

M181. Folk Music of Western Europe. (Same as Music M181.) Prerequisite: consent of instructor. In introduction to the forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with numerous recorded examples from the major cultural subdivisions of Europe.

190. Selected Topics in Folklore and Mythology Studies. Prerequisite: course 15 or 101 or consent of instructor. A proseminar focusing on selected problems, data, or themes in folklore and mythology studies.

199. Special Studies in Folklore (2 to 4 units). Prerequisite: senior standing, consent of instructor.
Graduate Courses

200. Folklore Bibliography, Theory, and Research Methods. A basic course in theory and bibliography for folklore studies, including the techniques of research necessary for serious folklore study.

Mr. Georges, Mr. Ward

201A. Folklore Collecting and Field Research. Prerequisite: course 200. Discussion/demonstration concerning concepts, methods, and techniques of folklore research. Mr. Jones, Mr. Stern, Mr. Wilgus

201B. Folklore Collecting and Field Research. Prerequisite: course 201A. The supervised completion of a fieldwork project developed in courses 200 and 201A.

Mr. Jones, Mr. Stern, Mr. Wilgus

202. Folklore Archiving. (Formerly numbered M202A-M202B.) Same as Library and Information Science M202A. Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing data bases, utilizing both manual and computerized techniques.

Mr. Georges, Mr. Stern

205. Perspectives in American Folklore Research. (Same as English M205.) Prerequisites: courses 201A and 201B or consent of instructor. An examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on the principal conceptual schemes and research orientations employed in the study of folklore in American society. Mr. Georges, Mr. Jones, Mr. Stern

206. Anglo-American Folk Song. Prerequisite: graduate standing. A survey of Anglo-American ballad and folk song, with attention to historical development, traditional elements, folklore/musical and ritual characteristics. May be concurrently scheduled with course CM106.

Mr. Wilgus

207. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 200 and/or consent of instructor. Exploration of the expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through the dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C107.

Mr. Jones, Mr. Stern

208. Afro-American Folklore and Culture. Prerequisite: graduate standing. The theoretical and methodological constructs which have contributed to the body of black cultural expression in the U.S.

Ms. Robinson

211. Traditional Festivals and Festive Events. (Same as Italian M211.) Lecture, three hours. Prerequisite: consent of instructor. Analysis of traditional expressive forms and behaviors inherent in selected festivals and festive events (e.g., carnival, community folk festivals, small festival gatherings), with emphasis on their structure and human dynamics.

Mr. Faissi, Mr. Wilgus

213. Folk Belief and Custom. Prerequisites: course 201 and one course from 118, 121, 122, 123A, 123B, 124, 125, 126, 128, 149, 150, Anthropology 156, German 134, 240A, 240B, 240C. A study of beliefs and customs in the folk community: the life cycle, calendrical and agricultural customs, and legal antiques.

Mr. Jones, Mr. Ward

214. Ethnography of Humor. (Same as Anthropology M232.) Lecture, three hours. Prerequisite: graduate standing in folklore and mythology or anthropology. An examination and analysis of selected humorous expressions and events in cross-cultural perspectives with emphasis on its role in major sociocultural and sociocultural approaches to their study and interpretation.

215. Popular Legend. Prerequisite: course 200 or consent of instructor. A study of the categories of legend and their relation to myth, custom, ritual, popular beliefs, and ballads.

Mr. Ward

216. Folktales. Prerequisite: course 200 or consent of instructor.

Mr. Georges, Mr. Ward

217. Folk Speech. Prerequisite: course 101, CM106, or M111. Recommended: Anthropology M140, English M145, or Linguistics 100. A study of the graphy of communication and its relevance to the study of social and regional dialects, proverbial, riddles, onomatopoeia, folk poetry and verse, and traditional humor.

Mr. Georges

218. Folk Art, Craft, and Aesthetics. Lecture, three hours. Prerequisite: course 200. An examination of research orientations and findings in regard to what has been called folk art, craft, and aesthetics. Major perspectives and areas of inquiry from the latter part of the 19th century to the present.

Mr. Jones

219. Seminar in the Puppet Theater. (Same as Theater M217B.) Lecture, three hours. Prerequisite: consent of instructor. Studies in the puppet theaters of the world: techniques, literature, aesthetics.

Mr. Ford, Mr. Nagy

220. Anglo-American Folk Song. Prerequisite: graduate standing. A survey of Anglo-American ballad and folk song, with attention to historical development, traditional elements, folklore/musical and ritual characteristics. May be concurrently scheduled with course CM106.

Mr. Wilgus

227. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 200 and/or consent of instructor. Exploration of the expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through the dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C107.

Mr. Jones, Mr. Stern

M229. African Myth and Mythology. (Same as English M235.) Prerequisite: graduate standing. The methods of analyzing and appreciating African myths and mythological systems. Topics discussed include African traditional cosmologies and their relationship to later forms of thought. A study of myth that approaches the African experience from a thematic perspective.

Mr. Plutschow

230. Introduction to Jewish Folk Literature. Prerequisites: upper division standing and consent of instructor, or graduate standing. An examination of both contemporary and traditional texts and methods used in the study of Jewish folk literature.

Mr. Stern

231. Folklore and Mythology of the Near East. (Same as Near Eastern Languages M241.) A study of folklore and mythological systems. S/U grading.

Mr. Wilgus

234A. The Ballad. (Same as English M243A.) Prerequisite: consent of instructor. A study of the English and Scottish popular ballads and their American derivatives, with some attention to European analogues.

Mr. Wilgus

234B. Problems in Ballad Scholarship. (Same as English M243B.) Prerequisite: course 234A or consent of instructor. Intensive investigation of a problem or problems in the study of the popular ballad.

Mr. Wilgus

248. Theory and Method in Latin American Folklore Studies. A historical survey of folklore scholarship in Latin America, with emphasis on the theoretical bases, methods, and techniques employed in the study of selected traditional tales, songs, music, linguistic expression.

Mr. Moseley

249. Folk Literature of the Spanish and Portuguese Worlds. (Same as Portuguese M249 and Spanish M249.) Lecture, three hours. An intensive study of the folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

Ms. Arora
Foreign Literature in Translation

The following courses offered in the departments of language and literature do not require reading knowledge of any foreign language.

African Languages (Linguistics) 150A-150B. African Literature in English Translation

Afrikaans (Germanic Languages) 114. Afrikaans Literature in Translation

Ancient Near East (Near Eastern Languages) 150A-150B. Survey of Ancient Near Eastern Literatures in English

Arabic (Near Eastern Languages) 150A-150B. Survey of Arabic Literature in English

Armenian (Near Eastern Languages) 150A-150B. Survey of Armenian Literature in English

Bulgarian (Slavic Languages) 154. Survey of Bulgarian Literature

Classics 40. Survey of Greek Literature in Translation

41. Survey of Latin Literature in Translation

40. Topics in the History of Greek Literature

141. Topics in the History of Latin Literature

Arabic Epic

142. Ancient Epic

143. Ancient Drama

144. Generic and Topical Studies in Ancient Literature

Czech (Slavic Languages) 155A-155B. Czech Literature

Dutch (Germanic Languages) 113. Modern Dutch and Flemish Literature in Translation

East Asian Languages and Cultures 140A-140B-140C. Chinese Literature in Translation

141A-141B. Japanese Literature in Translation

142A-142B. Korean Literature in Translation

English 108A-108B. The English Bible as Literature

French 142. Contemporary French Theater in Translation

143. Modern French Thought

144A-144B-144C. The French Novel in Translation

145. Topics in French Literature

German (Germanic Languages) 50A. Masterworks of German Literature in Translation, Medieval Period through Classicism

50B. Masterworks of German Literature in Translation, Romanticism to the Present

51. Masterworks of Germanic or East Central European Literatures in English Translation

119A. German Literature in the Age of Chivalry, in English Translation

119B. Wessen Classicism and Its Influence, in English Translation

119C. The Faust Tradition from the Renaissance to the Modern Age, in English Translation

119D. Romantic Heritage in German Literature, in English Translation

119E. Pattern and Chaos: Modern German Literature and Thought, in English Translation

119F. From Dåem to Nightmare: The German-Jewish Experience, in English Translation

Humanities All courses

Hungarian (Slavic Languages) 121A-121B. Survey of Hungarian Literature in Translation

Iranian (Near Eastern Languages) 150A-150B. Survey of Persian Literature in English

Italian 42A-42B. Italian Civilization or Italy through the Ages

46. Italian Cinema and Culture

50A-50B. Main Trends in Italian Literature

110A-110B. Divine Comedy in English

150. Modern Italian Fiction in Translation

Jewish Studies (Near Eastern Languages) M150A-150B. Hebrew Literature in English

151A-151B. Modern Jewish Literature in English

Old Norse Studies (Germanic Languages) 40. The Heroic Journey in Northern Myth, Legend, and Epic

139. The Saga

140. Viking Civilization and Literature

Polish (Slavic Languages) 152A-152B. Survey of Polish Literature

160. Polish Romanticism

Romanian (Slavic Languages) 152. Survey of Romanian Literature

Portuguese (Spanish and Portuguese) 40A-40B. Portuguese, Brazilian, and African Literature in Translation

Russian (Slavic Languages) 25. The Russian Novel in Translation

118. Survey of Russian Literature to Pushkin

119. Survey of 19th-Century Russian Literature

120. Survey of 20th-Century Russian Literature

124A-124F. Studies in Russian Literature

125. The Russian Novel in Its European Setting

126. Survey of Russian Drama
The lower division program is designed to provide a minimal competence in French after one year and a thorough basic knowledge of the language after two years. From the first day of French 1 all instruction is conducted in French.

The upper division program is chiefly devoted to perfecting linguistic skills and to the study of French literature. Courses in civilization and linguistics are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French literature and civilization.

The graduate program comprises training in the various fields of French literature and thought, as well as in literary criticism and analysis. A number of courses in linguistics and stylistics are also offered. The department offers both the M.A. and Ph.D. degrees and admits several new graduate students each year, including many from France and a wide variety of other countries.

**Bachelor of Arts Degrees**

**Preparation for the Majors**

*Required: French 1, 2, 3, 4, 5, 6, 12, and 15, or equivalent. You normally take course 6 before undertaking course 12 or 15. If you received a grade of A in course 5, you may enroll in course 12 concurrently with course 6, with consent of instructor.*

**The Majors**

Four majors are offered by the department:

- **Plan A** leads to the Bachelor of Arts in French and subsequently to the standard elementary or secondary credential. *Required: Fifteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B-114C; six courses in French literature from 115A through 120D***. Five upper division elective courses in the fields relevant to French studies to be selected in consultation with an adviser.

- **Plan B**, with emphasis on literature, leads to the Bachelor of Arts in French and subsequently to the master's degree. *Required: Fifteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B-114C; six courses in French literature from 115A through 120D***. Two elective upper division courses to be selected in consultation with a major adviser, either from the Department of French, or from the Humanities or Social Sciences division of the College of Letters and Science, or from the College of Fine Arts.

**Plan C (French Studies) is a core program in French allowing for individual selection of relevant courses in related fields in the humanities, social sciences, linguistics, etc. Required: Fifteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B-114C; three courses in French literature from 115A through 120D***. Five upper division elective courses in the fields relevant to French studies to be selected in consultation with the undergraduate adviser. This program does not normally prepare you for admission to the master's program in French at UCLA.

- **Plan D (French and Linguistics) leads to a Bachelor of Arts degree in French and Linguistics. In addition to the normal preparation for the major, you are required to complete the sixth quarter of work in one other foreign language or the third quarter in each of two other foreign languages. Required: French 100A, 100B, 100C, 103, 114A-114B-114C; two courses from French 105, 106, 107, 108A, Linguistics 100, 103, 110, 120A, 120B, and 164 or C165A or C165B.* It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If your knowledge of French exceeds the preparation usually received in courses preparing for the major and if you demonstrate the requisite attainment in French 100A, 100B, or 100C, you may substitute for those courses in grammar and composition an equivalent number of upper division courses in the Department of French in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA Department of French. A maximum of eight units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. You must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult a major adviser before registering for upper division courses.

---

* A course in French history may be substituted for one of these with consent of the major adviser.

** In all major plans one course from the 121 series and/or one undergraduate seminar (French 150 through 160) may be substituted for courses in the 115A through 120D offerings.
Honors Program
The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average (students with a lower GPA may also apply for admission to the program). If you are interested, contact the department during your junior year.

To graduate with departmental honors, you must take French 140A and 140B and/or two upper division literature courses for honors credit. In order to receive honors credit for a nonhonors upper division literature course, you must arrange with the professor to do an extra honors project. On the basis of your coursework, you are expected to choose a research topic you wish to pursue in greater depth. You must then take course 140C where you receive personal supervision from a faculty member in researching and writing the topic. The three courses count as literature courses for the purpose of satisfying major requirements.

Instructional Credential in French
If you wish a single subject instructional credential in French, you must have the consent of the French Department in order to gain admission to student teaching. For the single subject credential, consent is contingent on a major (or equivalent) in French and the successful completion of French 370. For additional information, consult the Graduate School of Education (201 Moore Hall) and/or the Department of French.

Master of Arts Degree
Admission
The Graduate Record Examination (GRE) General Test, a sample of written work in French, and three letters of recommendation are required and should be sent to the Department of French, 222 Royce Hall, UCLA, Los Angeles, CA 90024-1550. A Bachelor of Arts in French is desirable but not mandatory.

Major Fields or Subdisciplines
The corpus of French literature is divided into three chronological periods: (1) medieval/Renaissance, (2) classical (roughly the 17th and 18th centuries), and (3) modern (since 1800), with Franco-African literature as an option.

Foreign Language Requirement
The foreign language requirement is fulfilled by passing a course of at least level three in either German, Latin, Spanish, or Italian; by passing the University reading examination in one of these languages; or by passing the Educational Testing Service (ETS) language examination with a score of 500 or better. In special cases, substitution of another foreign language is accepted if approved by the graduate adviser. You must complete the foreign language requirement before you submit your M.A. thesis (Plan I) or take the M.A. examination (Plan II). All candidates for the M.A. must be proficient in spoken French.

Plans of Study
The department offers two master's programs: Plan I (thesis plan) and Plan II (comprehensive examination plan).

Plan I and II Course Requirements: French 201, 202, and 203A or 203B are required and should be taken as early as possible. A total of 12 courses in French is required, including at least three courses in each of two periods. At least eight of the courses must be at the graduate level. Students in Plan I may include four units of credit for course 598.

Plan I Admission Requirements and Oral Qualifying Examination: You may apply to the chair of the department for admission into Plan I after completing at least six graduate courses (200 series), four of which must be literature courses in the French Department. The minimum admission requirements are a 3.5 graduate GPA in French and letters from two graduate professors in the department specifically recommending admission into this plan.

Final admission into Plan I (i.e., permission to write the thesis) is contingent on passing a one-hour oral examination in the two periods prepared. If you fail this examination, the examining committee determines whether you may be permitted another attempt or be advised to take the comprehensive examination (Plan II).

The thesis should demonstrate proficiency in the methods and concepts of literary research; a suitable length is normally about 50 pages. A tentative outline of the proposed thesis must be approved by the thesis committee in writing before work on the thesis is begun. Final approval of the thesis by the committee is also required.

Plan II Comprehensive Examination: You must pass written examinations of four hours in length in each of the two periods prepared, a two-hour explication de texte, and an oral examination in French. The examinations are given in the Fall and Spring Quarters and may be retaken once.

Terminal M.A. Degree
Decision to award a terminal M.A. degree is made by the department on the basis of (1) M.A. examination papers, (2) oral examination, and (3) overall appraisal of record.

Ph.D. Degree
Admission
Completion of a master's degree with recommendation for continuance by the M.A. committee is required; outside applicants need an M.A. degree or equivalent and three letters of recommendation, as well as the Graduate Record Examination (GRE) General Test and a sample of written work in French.

Admitted students holding the M.A. or Maîtrise from another institution must take an oral examen de passage in two periods of literary history in order to be formally admitted to the doctoral program. This examination, administered by the M.A. committee, should be taken during your first year in residence. In case of failure it may be repeated once.

Major Fields or Subdisciplines
The corpus of French literature is divided into three chronological periods: (1) medieval/Renaissance, (2) classical (roughly the 17th and 18th centuries), and (3) modern (since 1800), with Franco-African literature as an option.

Foreign Language Requirement
(1) Languages are divided into three groups: Latin; German and Russian; and other Romance languages. You must study two languages up to levels five and six respectively, with no more than one from any one group. The languages selected must be approved by your guidance committee. Language requirements may also be satisfied by taking the Educational Testing Service (ETS) examination with level five corresponding to a score of 550 and level six, 600. Substitution of another language, when warranted by the nature of your specialization, must be recommended by the guidance committee and approved by the graduate adviser.

(2) When the nature of your specialization requires the knowledge of a third language (in addition to the two normally required), the guidance committee is expected to take into account the extra work implied in making its other recommendations.

(3) Language requirements are to be completed before taking the doctoral qualifying examination.

Course Requirements
The following courses are required: (1) French 201, 202, and 203A or 203B, (2) at least four seminars, two of which should be in your proposed period of specialization, (3) at least two graduate courses in other departments related to the area of specialization. In addition, you are expected to follow the guidance committee's suggestions in taking courses in preparation for the doctoral qualifying examination.
Qualifying Examinations
Four written examinations of four hours each are required as follows: (1) focused specifically in the area of the prospective dissertation topic; (2) dealing with a more general subject related to the dissertation topic; (3) in a cognate field related to the methodology or approach you plan to employ in the dissertation; (4) in the period not covered at the M.A. level.

The topics to be dealt with in parts 1, 2, and 3 are determined by prior consultation with the doctoral guidance committee. At the discretion of the department, you may be permitted to retake a failed examination once.

After passing the written examinations, you are admitted to the University Oral Qualifying Examination. This examination, normally of two hours duration, bears chiefly on parts 1 and 2 of the written examinations and on the proposed dissertation subject. You are expected to submit a written outline of research plans before the oral examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
This examination is no longer required but may be imposed at the discretion of an individual doctoral committee.

Lower Division Courses
Students who have had special advantages in preparation may, through placement examinations or with recommendation of the instructor, be permitted a more advanced program. No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary French. Lecture, five hours.
2G. Elementary French for Graduate Students (3 units). Preparation for ETS or other language examinations. A passing grade does not imply satisfaction of language requirements. S/U grading. Ms. Brichant
2. Elementary French. Lecture, five hours. Prerequisite: course 1 with a grade of C- or better or one year of high school French.

2G. Elementary French for Graduate Students (3 units). Prerequisite: course 1G or equivalent. Preparation for ETS or other language examinations. A passing grade does not imply satisfaction of language requirements. May be repeated. S/U grading. Ms. Brichant
3. Elementary French. Lecture, five hours. Prerequisite: course 2 with a grade of C- or better or two years of high school French or advanced placement standing.

4. Intermediate French. Lecture, five hours. Prerequisite: course 3 with a grade of C- or better or three years of high school French or advanced placement standing.

5. Intermediate French. Lecture, five hours. Prerequisite: course 4 with a grade of C- or better or four years of high school French or advanced placement standing.

6. Intermediate French. Lecture, five hours. Prerequisite: course 5 with a grade of C- or better or advanced placement standing.

10A-10D. French Conversation (2 units each). Discussion, three hours. Prerequisite: course 3 with a grade of A or B or consent of department.

12. Introduction to Oral Study of French Literature. Lecture, three hours. Prerequisite: course 6 or equivalent or consent of instructor. Principles of literary analysis as applied to selected texts in poetry and prose.

15. Theory and Correction of Diction. Prerequisite: course 6 or consent of instructor. French pronunciation, diction, intonation in theory and practice; phonetic transcription, phonetic evolution of the modern language; remedial exercises; recordings. Ms. Korol-Ward in charge

Upper Division Courses
Prerequisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, 15, or equivalent. Credit is ordinarily not allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Courses 105, 106, 107, and 108 are not sequential and may be taken in any order, provided the prerequisites for each course are fulfilled.

100A. Advanced Grammar I. Prerequisites: courses 6 and (normally) 15, or equivalent. A placement examination is administered, and qualified students are advanced to course 100B or 100C. Ms. Brichant

100B. Advanced Grammar II. Prerequisite: course 100A or equivalent. A placement examination is administered, and qualified students are advanced to course 100C or 103. Ms. Brichant

100C. Advanced Grammar III. Prerequisite: course 100B or equivalent. A placement examination is administered, and qualified students are advanced to course 100B or 103. Ms. Brichant

103. Advanced Stylistics. Lecture, three hours. Prerequisite: course 100C or equivalent. Required of all majors, as well as of all candidates for the standard credential in elementary or secondary teaching. Ms. Korol-Ward in charge

105. French Linguistics. Lecture, three hours. Prerequisite: consent of instructor.

106. Advanced French Phonetics. Lecture, two hours. Prerequisite: consent of instructor. Ms. Korol-Ward

107. Contemporary Spoken French. Discussion, three hours; laboratory, added as needed. Prerequisite: course 103 or consent of instructor.

108A-10B-10C. Advanced Practical Translation. Lecture, three hours:

108A. Prerequisite: course 103 with a grade of B or consent of instructor. An introduction to the translation of advanced texts of general interest, with work in the theory of translation.

108B. Prerequisite: course 108A or consent of instructor. Practice in the translation of technical documents and texts; comparative stylistics of translation.

108C. Prerequisite: course 108B or consent of instructor. Advanced work in areas of general and specialized interest, with exercises in consecutive and simultaneous translation.

114A. Medieval and Renaissance Literature.

114B. Literature of the Classical Era (17th and 18th Centuries).

114C. Modern Literature (19th and 20th Centuries).

115A-115D. Medieval French Literature:

115A. Invention of Love in the 12th Century. Lecture, three hours. Selections from the broad range of lyric poetry and narrative romance in which is first elaborated "romantic" (sometimes called "courtly") love. Readings include works of the troubadours and the trouveres, different versions of the Tristan-myth, a romance of Chretien de Troyes, and the first part of the Romance of the Rose.

115B. Medieval Romance.

115C. Medieval Theater.

115D. Medieval Lyric Poetry. Mr. Haidu

116A. Rabelais and His Time.

116B. Ronsard and His Time.

116C. Montaigne and His Time.

116D. Renaissance Theater. Mr. Bensimon, Mr. Carron

117A-117D. 17th Century.

117A. Corneille and the Baroque.

117B. Classical Theater: Racine and His Contemporaries.

117C. Moliere and the Comedy of the 17th Century.

117D. Philosophers, Moralists, and Novelists of the 17th Century. Ms. Melzer

118A-118D. 18th Century.

118A. Comedy and Drama.

118B. Voltaire and the Encyclopedia.

118C. Diderot and Rousseau.

118D. The Novel. Mr. Coleman, Mr. Werner

119A. Romanticism.

119B. Generation of 1848.

119C. Naturalism and Symbolism.

119D. Turn of the Century. Mr. el Nouty, Mr. Gans

120A-120D. 20th Century.

120A. Gide, Proust, and Their Time.

120B. Post-World War I French Writers.

120C. Sartre, Camus, and Their Time.

120D. Contemporary French Writers. Ms. Kao

121A-121B. Contemporary Literature of French Expression. Lecture, three hours. 121A. Franco-African Literature; 121B. French-Canadian Literature. Mr. Coleman, Mr. el Nouty

122. French Folklore and Young People's Literature. Ms. Korol-Ward

124. Dramatic Interpretation. Study of the techniques of stage direction and interpretation of French drama. A survey of some of the different theories and approaches used on the French stage. Each student acts in or directs a scene from a play to be performed under rehearsal conditions. Ms. Korol-Ward

130A-130B-130C. History of French Civilization and Institutions. Prerequisites: courses 6, 12, 15:

130A. France from Prehistoric Times to the End of the Middle Ages. (Formerly numbered 135.) Lecture, three hours. A fourth hour may be required for the viewing of films and other laboratory activities. Ms. Brichant
Graduate Courses

201. Literary Research and Composition. (Formerly numbered 201D.) Lecture, three hours. Practical work of an advanced nature in the expression and presentation of literary research.

202. Techniques of Literary Analysis. Lecture, three hours. Practice in the close analysis of literary texts.

203A-203B. French Literary Criticism. (Formerly numbered 203A-203B-203C.) Lecture, three hours:
203A. History of Literary Theory. The evolution of literary theory from classical times to the 20th century.
203B. Modern Theories of Criticism.

205A-205D. The Intellectual Background of French Literature:
205A. Scholasticism (with Ancient Sources), Humanism.
205B. Rationalism, Empiricism, Positivism.
205C. Criticism, Idealism, Dialectical Materialism.
205D. Phenomenology, Existentialism, Structuralism.

215A-215F. Medieval Language and Literature:
215A. Old and Middle French. Course 215A is prerequisite to 215B through 215F. Phonology and morphology of the language. Introduction to Old French texts.
215B. Chanson de geste.
215C. Romance.
215D. Medieval Theater.
215E. Provençal Poetry.
215F. Medieval French Poetry.

216A-216H. Renaissance:
216A. Topics in Early 16th-Century French Literature.
216B. Topics in the Pleiade.
216C. Topics in Late 16th-Century French Literature.
216D. Ronsard.
216E. Rabelais and Prose Writers.
216F. Baroque Poetry.
216G. Montaigne.
216H. Theater.

217A. Topics in Classical Theater.
217B. Topics in Non-dramatic Literary Genres.
217C. Topics in Classical Prose and Thought.
217D. Molière.
217E. Corneille.
217F. Racine.
217G. The Novel.
217H. Moralists.
217I. Religious Thought.

218A-218D. 18th Century:
218A. Topics in the Enlightenment, 1680-1747.
218B. Topics in the Enlightenment, 1748-1765.
218C. Topics in the Late Enlightenment, 1766-1791.
218D. Theater.

219A-219K. 19th Century:
219A. Topics in Romanticism.
219B. Topics in Realism and Naturalism.
219C. Topics in Symbolism.
219D. Poetry.
219E. The Novel.
219F. Theater.
219G. Historians and Critics.
219H. Victor Hugo.
219I. Balzac.
219J. Independent Novelists.

220A-220P. 20th Century:
220A. From Symbolism to Surrealism: Selected Topics.
220B. From Surrealism to Existentialism: Selected Topics.
220C. From Existentialism to the Present: Selected Topics.
220D. Paul Valéry.
220E. Marcel Proust.
220F. Andre Gide.
220G. Andre Malraux.
220H. Theater.
220I. Anti-Theater.
220J. The Novel.
220K. The Antinovel.
220L. Surrealism.
220M. Existentialism.
220O. Poetry.
220P. Cinema and Literature.

221A-221D. French-African Literature:
221B. French-African Literature of Madagascar and Bantu Africa.
221C. French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa.
221D. Franco-Caribbean Literature.

Courses 250A through 250B may be repeated for credit.

250A-250B. Studies in Medieval Literature.

251A-251B. Studies in the Renaissance.
251A. Mr. Bensimon and the Staff
251B. Mr. Bensimon and the Staff

252A. Mr. Bensimon and the Staff
252B. Mr. Coleman and the Staff

253A. Ms. Melzer
253B. Ms. Kao

254A-254B. Studies in the 18th Century.
254A. Mr. Coleman, Mr. Werner
254B. Mr. el Nouty, Mr. Gans

255A. Mr. el Nouty, Mr. Gans
255B. Ms. Kao

256A-256B. Studies in Contemporary Literature.
256A. Ms. Kao
256B. Ms. Kao

257A. Mr. el Nouty and the Staff
257B. Ms. Kao

258A-258B. Studies in Literary Criticism.
258A. Ms. Gans and the Staff
258B. Ms. Gans and the Staff

259A-259B. Studies in Philosophy and Literature.

370. Teaching of French in the Secondary School and at the College Level: Observation. Prerequisite: course 103. Observation of language teaching in the secondary school and at the college level.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
The research and teaching interests of the faculty, ranked sixth nationally by the Conference Board of the Associated Research Councils, cover major areas of geographical knowledge and underlie both the undergraduate and graduate instructional programs. These areas of interest may be broadly grouped into basic environmental studies, applied environmental studies, cultural and historical geography, economic and urban geography, political and social geography, geographical procedures, and regional geography.

The undergraduate program is designed for students who wish to gain a thorough understanding of geographical analysis, with emphasis on ecological, physical, social-spatial, and historical theories and methods of analysis applied to a wide range of biophysical, material, and social questions. The department offers two undergraduate majors that lead to the Bachelor of Arts degree: (1) the major in geography and (2) the major in geography/ecosystems. The majors prepare students for employment opportunities in both the public and private sectors (in environmental analysis, assessment, and management, map making and remote sensing, regional analysis, economic and urban spatial analysis, and teaching) and for graduate study in law, management, urban and regional planning, education, other biophysical and social sciences, and applied programs, as well as in geography.

Producing geographers of high quality is the principal goal of the graduate program, designed primarily for students pursuing the Ph.D. degree. The Master of Arts program, which involves coursework and a thesis, serves as an essential building-block of the doctoral program. The doctorate is awarded to those students who have achieved the level of geographical knowledge and training required of a professional geographer. The degree recognizes the ability of students to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

The Major

Required: A minimum of 10 upper division courses in geography taken for a letter grade. In meeting this requirement, you must take three courses from Group I — The Environment; three courses from Group II — Human Geography; one course from Group III — Procedures; two courses from Group IV — Regions; and one elective upper division course in geography. You are encouraged to take more than 10 upper division courses. A C average in the major is required for graduation.

Foreign Language/Mathematics Requirement

Every geography major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. In mathematics, only Mathematics 2, 3A, 3B, 3C, 5, 31A, 31B, 32A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

Allied Fields

You must develop some competence in one or two allied fields. This requirement consists of at least four upper division courses selected from at least one but not more than two of the following disciplines: anthropology, atmospheric sciences, biology, chemistry, Earth and space sciences, economics, folklore, history, management, philosophy, physics, political science, psychology, public health, sociology. Architecture and Urban Planning 187, 190, and M195 are also acceptable. Other disciplines require departmental consent.

Honors Program

Honors in the geography major may be obtained through procedures described under Geography 199HA-199HB.

Bachelor of Arts in Geography

Geography majors are encouraged to consult with the undergraduate adviser for the planning of a program suitable to their particular and individual objectives.

Preparation for the Major

Required: Geography 1, 2, 3, 4, 40. A mathematics background, such as Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, is recommended. All courses must be completed for a letter grade.

Susan W. Beatty, Ph.D.

Scope and Objectives

Geographical knowledge deals with the description and analysis of the spatial distribution of those conditions (either naturally occurring or humanly produced) that form the material basis for the reproduction of social life. It also entails understanding the relationships between such conditions and the qualities of social life achieved under given economic, political, social, and cultural systems.
Plan 3 (Environmental Engineering) has a physical geography/technological orientation and is designed primarily for students interested in the physical and technological aspects of environmental conservation and management.

All three plans have certain features in common: (1) a high degree of emphasis is placed on student input and interaction with the faculty — particularly with respect to seminars; (2) you are encouraged to consult with the undergraduate adviser in planning a program; (3) all courses required for the major, both geography and non-geography, must be taken for a letter grade. A C average in the major is required for graduation.

Plan 1 (Environmental Policy)
Preparation for the Major: Biology 5, Economics 1, 2, Engineering 11, Geography 1, 2, 5, 40, Program in Computing 10A. Geography 3, 4, and 6 are recommended. A mathematics background, such as Mathematics 2, 3A, 3B, and 3C, or 31A, 31B, and 32A, is also recommended.

The Major: Geography 129, three courses from Group Ia, two courses from Group Ib, one course from Group II.

Electives: Six courses from the following: Anthropology 132, 150, 153, 187; Architecture and Urban Planning 190; Communication Studies 120; Economics 110, 111, 170; English 131A through 131J; Geography: no more than three courses from 100 through 199; one course only from History 195A through M195G; Political Science 141, 142, 167, 170; Psychology M138; Public Health 150, 152, 154; Sociology 158, 184.

Plan 2 (Natural Resources)
Preparation for the Major: Biology 5, 6, Chemistry 11A, Economics 1, Engineering 11, Geography 1, 2, 5, 40, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Program in Computing 10A. Economics 2, Geography 3, 4, 6, and Microbiology 6 are recommended.

The Major: One course from Biology 103, 111, M118; Earth and Space Sciences 150; Geography 129, three courses from Group Ia, two courses from Group Ib, two courses from Group II.

Electives: No more than three courses may be taken in any one department to satisfy the elective requirement. Six courses should be selected from the following: Anthropology 132, 167; Biology 103, 111, M118, 120, 122, 131, 135, 147; Civil Engineering 150, 155, 163; Earth and Space Sciences M139; Economics 111, 170; English 131A through 131J; Geography: no more than three courses from 100 through 199; Materials Science and Engineering M107A; Mechanical, Aerospace, and Nuclear Engineering 180A; Public Health 103, 152, 154. Biology courses taken for elective requirements may not be applied toward the major requirement in biology.

Plan 3 (Environmental Engineering)
Preparation for the Major: Biology 5, 6, Chemistry 11A, Earth and Space Sciences 1 or 100, Economics 1, Engineering 11, Geography 1, 2, 5, 40, Mathematics 3A, 31B, 32A, 33A, Program in Computing 3 or 10A. Chemistry 11B/11BL, 11C/11CL, Geography 3, 4, 6, Mathematics 33B, Physics 8A, 8B are recommended.

The Major: Earth and Space Sciences M139, 150; Geography 129, five courses from Group I (100, 104, 105, 124, and 106 or M127), two courses from Group II, including 167 or 168 or 171.

Electives: Six courses from the following: Atmospheric Sciences 144; Civil Engineering 150, 151, 155, 156, M161, 163; Earth and Space Sciences 105; Economics 110; Electrical Engineering 103; English 131A through 131J; Geography: no more than three courses from 100 through 199; Mathematics 115A, 141A, 141B; Mechanical, Aerospace, and Nuclear Engineering 103, M105A, 105D, 153A, 180A; Public Health 150.

Honors Program
Honors may be awarded if you attain and maintain at least a 3.4 GPA in the major (including the senior thesis) from the beginning of your senior year to graduation. The thesis (Geography 196) is a substantial thorough not necessarily lengthy contribution to ecosystem analysis that must be submitted no later than early in your final quarter.

Specialization in Computing
Majors in geography and geography/ecosystems may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), (3) completing at least two courses from Geography 104, 167, 168, 171. You graduate with a bachelor's degree in your major and a specialization in computing.

Graduate Study
Admission
Application may be made for admission to any quarter. You must submit an official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, and three letters of evaluation. You should normally have (1) completed the undergraduate major in geography or its equivalent, (2) received a B.A. degree, (3) attained at least a 3.3 grade-point average in courses taken in your junior and senior years and in the major for admission to the M.A. program and a 3.5 GPA for the Ph.D. (exceptions may be made if your record indicates unusual promise), (4) attained a high GRE score (normally well above 1,100) in the combined verbal and quantitative sections, (5) strong letters evaluating past academic, and possible professional, performance and potential for high achievement in the graduate program.

Non-geography majors entering the graduate program are required to make up identified deficiencies. Normally this entails completing from three to six upper division courses during your first year in residence. Under most circumstances these courses are to be distributed evenly between Groups I and II and are in addition to those required for the M.A. or Ph.D. degree.

Admission to the Ph.D. program usually requires an M.A. or M.S. degree. You must provide clear evidence of your ability to conduct substantive research and to articulate your ideas clearly in writing. In addition, a faculty member must be willing to serve as your inter- im adviser, so it is advisable to establish prior contact with potential advisers before the decision to admit is made. Under rare circumstances, you may proceed directly toward the Ph.D. degree without taking a master's degree.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

Information and graduate brochures may be obtained by writing to the Graduate Adviser, Department of Geography, 1255 Bunche Hall, UCLA, Los Angeles, CA 90024-1524.

Major Fields or Subdisciplines
Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, political, cultural, historical, urban, and regional geography. At the M.A. level students emphasize at least one of these specialized areas; the written qualifying examinations for the Ph.D. include three papers in the major fields or subdisciplines. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, you are expected to refine and deepen your research interests further, in consultation with knowledgeable faculty members, within, across, and beyond these organized research and teaching areas.
Master of Arts Degree

Course Requirements
You must complete at least nine courses, seven of which must be at the graduate level, including the required core courses (Geography 298A, 298B, 298C). The core courses must be completed within two years and with a grade of B— or better in each (if you enter with a geography major, you should complete them in your first year). Your program must have the approval of your committee chair and the graduate adviser each quarter.

Only one 500-series course may be applied toward the minimum course requirement for the master's degree and toward the minimum graduate course requirement.

Research Tool Requirement
At least one research tool (a foreign language or a series of mathematics or statistics courses) is required. The requirement varies according to each subdisciplinary area or region. At least a B average must be attained in any series of courses taken, and the requirement must be met prior to approval of the thesis proposal by your guidance committee. If a foreign language is selected, the requirement may be met by (1) passing a series of courses, (2) passing the Educational Testing Service (ETS) examination with a score of 500 or better, or (3) passing a formal departmental written examination.

Thesis Plan
You must present a thesis, based in whole or in part on original investigation. Selection of a thesis topic, creation of a scientific design, and conduct of the investigation proceed initially under the supervision of the informal guidance committee, and later under the official thesis committee. The thesis proposal should include the exact nature of the problem to be researched, an outline of the subject matter, the proposed methods of research, the degree of originality involved, and the anticipated time of completion of the study.

Ph.D. Degree

Course Requirements
You must successfully complete, within two years and with a grade of B—or better in each, the required core courses (Geography 298A, 298B, 298C) if these have not already been taken at the M.A. level. If you enter with a geography degree, you should complete them in your first year. You are also required to take at least three graduate geography courses in addition to your M.A. coursework (excluding 298A, 298B, 298C, 375, 495, and the 500 series) and three upper division or graduate courses in one or two fields (outside of geography) allied to your major research area or subdisciplinary specialization, subject to approval of your committee. The allied field requirement must be met before you can take the oral qualifying examination. Your total program must be approved by the graduate adviser each quarter.

Research Tool Requirement
At least one research tool (a foreign language, statistics, mathematics) is required. The requirement varies according to each subdisciplinary area or region and is required in addition to the M.A. tool requirement. Students who receive their M.A.s elsewhere need to fulfill the UCLA tool requirement for the M.A. (credit may be given for research tools acquired at other institutions). At least a B average must be attained in any series of courses taken, and the requirement must be met prior to approval of the thesis proposal by your guidance committee. If a foreign language is selected, the requirement may be met by (1) taking a series of courses, (2) passing the Educational Testing Service (ETS) examination with a score of 500 or better, or (3) passing a formal departmental written examination.

Qualifying Examinations
You are expected to take the written qualifying examination, which consists of five written papers and is administered by your guidance committee, no later than the sixth quarter of the Ph.D. program (exceptions may be made in case you are entering from disciplines outside geography). The examination may be taken over a period of no more than two weeks. In case of failure, you may make one further attempt, but no sooner than three months nor longer than one year after the first examination. Preparation of your dissertation proposal follows successful completion of the written qualifying examination.

The University Oral Qualifying Examination, conducted by your official doctoral committee, focuses on your dissertation proposal. Once you have successfully completed the oral qualifying examination, you are eligible for advancement to candidacy. In instances of failure, the oral examination may be repeated once.

The dissertation is the ultimate focus of your Ph.D. program and demonstrates an ability for independent investigation in a selected field of study. The dissertation should be designed and executed in such a way as to make a significant original contribution to geographic research, a contribution that is worthy of publication, in part or as a whole, in a reputable scientific medium.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree in advancement to candidacy for the Ph.D.

Final Oral Examination
A final oral defense of the dissertation may be required by the dissertation committee.

Lower Division Courses
Contact the department office to learn of additional offerings, seminar topics, and specific instructors for the quarter you wish to enroll in courses in geography.

1. Physical Environment. Lecture, three hours; laboratory, two hours. A study of the Earth's physical environment, with particular reference to the nature and distribution of landforms and climate.

2. Biogeography. Lecture, three hours; laboratory, two hours. Prerequisite: course 1 or equivalent. A study of the Earth's biosphere, with particular reference to the distribution of plants, animals, and soils.

3. Cultural Geography. Lecture, three hours; discussion, 90 minutes. A broad examination of the basic cultural variables in the human occupancy of the Earth's surface. Ecological, spatial, and historical approach.

4. Human Location and Behavior. Lecture, three hours; laboratory, one hour. Emphasis on giving a better understanding of the effects of location on human behavior. Discussion and practical exercises on the analysis of problems in the Los Angeles urban environment.

5. People and the Earth's Ecosystems. Lecture, three hours; laboratory, two hours. An examination of the historical and contemporary roles of man as a major agent of biological change in the Earth's ecosystem.

6. Maps and Mapping. Lecture, two hours; laboratory, two hours; independent study, one hour. Introduction to maps and their role in society. Fundamentals of reading and use of both reference and thematic maps. Influence of maps on attitudes toward and images of the geographic environment. Introductory survey of the fields of cartography and remote sensing.

40. Geographical Statistics. Lecture, three hours; laboratory, two hours. Prerequisites or corequisites: courses 1, 4. Satisfies statistics requirement for the geography major. Presentation and interpretation of data, descriptive statistics and measures of spatial patterns, introduction to statistical inference and measures of association.

88. Lower Division Seminar in Geography. (Formerly numbered 10.) Staff-student discussion, three hours; reading period, one hour. Prerequisite: course 1 or 2 or 3 or 4 or 5 as befits the theme. A seminar designed to explore various themes and issues pertinent to environment and people. Seminar topics advertised in the department during previous quarter.

Upper Division Courses

Group I: The Environment

100. Principles of Geomorphology. Lecture, three hours; reading period, one hour. Prerequisite: course 1 or Earth and Space Sciences 1 or 102 or consent of instructor. Corequisite: course 102A. Strongly recommended: introductory physics and chemistry. A study of the processes that shape the world’s landforms, with emphasis on weathering, mass movement, and fluvial erosion, transport, deposition, energy and material transfers; space and time considerations.

Mr. Orme
100A. Principles of Geomorphology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisite: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena.

Mr. Orme

101. Coastal Geomorphology. Lecture, four hours; reading period, one hour. Prerequisite: course 100. Corequisite: course 101A. A study of the origin and development of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seaciffs, and coral reefs, together with coastal zone management.

Mr. Orme

101A. Coastal Geomorphology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisite: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, and seaciff, together with coastal zone management.

Mr. Orme

103. Glacial Geomorphology. Lecture, three hours; reading period, one hour. Prerequisite: course 100. Upper division standing. Corequisite: course 103A. An introduction to both mountain and continental glaciers, glacial processes, and deposits. Topics include the classification of glaciers; ice balance, glacier motion, erosion processes, glacialicoll and glacioclaste deposition.

103A. Glacial Geomorphology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisite: course 100, 103. Field and laboratory investigations of glacial and glaciofluvial processes of erosion, transport, and deposition.

104. Climatology. Lecture, three hours; reading period, one hour. Examination of the many relations between climate and the world of man. Emphasis on the basic energy budget concepts to the microclimates of relevance to the ecosystems of agriculture, animals, man, and urban places.

Mr. Tejung

105. Hydrology. Lecture, three hours; reading period, one hour. Prerequisites: course 1 or equivalent. Corequisite: course 105A. The role of water in geographic systems; hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes; the impacts on the landscape. Field projects required.

Mr. Trimble

105A. Hydrology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisite: course 105. Field and laboratory investigations into the role of water in geographic systems; hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Students solve applied hydrology problems in lab and make hydrologic measurements in the field.

Mr. Trimble

106. Soils. Lecture, three hours; reading period, one hour. Prerequisites: course 1 or equivalent and Chemistry 11A or consent of instructor. Corequisite: course 106A. A study of the origins, evolution, properties, and utilization of soils, with special emphasis on the world's major soil groups.

Ms. Beatty

106A. Soils: Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisite: course 106. A study of the natural development of soils, physical and chemical properties of soil, and uses of soil. Analysis of pH, moisture, texture, nutrients, and organics. Includes a one-day field trip.

Ms. Beatty

107. Advanced Water Conservation. Lecture, three hours; discussion, one hour. Prerequisite: course 105 or Civil Engineering 150 or equivalent. Recommended: courses 100, 106, 160. A systematic study of the processes of and the hazards posed by erosion, sedimentation, and pollution and the techniques needed to conserve soil and maintain environmental quality. The scope includes agriculture, forest engineering, mining, and other rural uses of land.

Mr. Trimble

108. World Vegetation. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 2, or consent of instructor. Corequisite: course 108A. A study of the unique ecosystems of the world's principal vegetation patterns.

Mr. Sauer

109. Ecology of Vegetation. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 40, or consent of instructor. Corequisite: course 109A. A study of plant ecology at the community and ecosystem levels. Emphasis on structure, dynamics, and measurement of the characteristics of terrestrial vegetation.

Ms. Beatty

109A. Ecology of Vegetation: Laboratory (2 units). Laboratory/fieldwork, six hours. Prerequisites: courses 1, 2, and 40, or consent of instructor. Corequisite: course 109A. A study of plant ecology at the community and ecosystem levels. Emphasis on structure, dynamics, and measurement of the characteristics of terrestrial vegetation.

Ms. Beatty

110. Plant Migration. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, and Biology 2, or equivalent, or consent of instructor. Mechanics of geographic patterning of natural and artificial vegetation, with special emphasis on the causes and effects of present changes for which there is direct fossil or documentary evidence.

Mr. Sauer

111. Forest Community Ecology. Lecture, three hours; reading period, one hour. Field trips. Prerequisites: courses 1, 2, or consent of instructor. Recommended: courses 109, 109A, or equivalent. Evaluation of ecological principles as they apply to forests. Emphasis on constraints of the physical environment, biotic interactions, succession, disturbances, and long-term environmental change.

112. Animal Geography: Biophysical Aspects. Lecture, three hours; laboratory, two hours. Prerequisites: courses 1, 2, Biology 2. A study of the factors and principles of animal distribution and dispersal on continents and islands of the Earth in time and space.

Mr. Bennett, Mr. Walter

113. Clastic Sedimentation Processes in Geomorphology. Lecture, three hours. Prerequisites: courses 1, 100, and 105, or equivalent, or consent of instructor. Recommended: courses 101, 103, 107, or equivalent. A study of clastic sedimentation transport and deposition processes in geomorphology. Topics include basic fluid mechanics and sediment transport; the tectonic framework of sedimentation; a general overview of depositional environments; and a more detailed discussion of selected environments.

(b) Applied Environmental Studies

116. Origins and Histories of Crop Plants. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, and Biology 2, or equivalent, or consent of instructor. Geographic patterns of domestication and diffusion of useful plants from antiquity to the present, based on detailed case histories of selected species.

Mr. Sauer

117. Animal Geography: Cultural Aspects. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 5, Biology 2, or equivalent. A study of human cultural factors influencing animal distributions; the roles of animals in human societies; origins and diffusion of domesticated animals.

Mr. Bennett, Mr. Walter

118. Medical Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 108 or equivalent. An examination of patterns of population-place-disease interactions and some effects of change and development on disease etiology and problems of health care.

119. Agricultural and Pastoral Ecologies. Lecture, three hours; reading period, one hour. Prerequisites: course 1 and 117, or equivalent. An introduction to the interrelationships between human and environmental factors which have contributed to the identified ecological disequilibria.

120. Conservation of Resources: North America. Prerequisites: courses 1 and 2, or equivalent, or upper division standing. An analysis of the basic problems and problems associated with the conservation of natural resources in the U.S. and Canada.

Mr. Bennett, Mr. McKnight, Mr. Trimble

121. Conservation of Resources: Underdeveloped World. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, and 120, or equivalent. Upper division standing. An analysis of the problems and problems of the conservation of natural resources of the underdeveloped world.

Mr. Bennett

122. Man and Environment in Africa. Lecture, three hours; discussion, one hour. Prerequisites: courses 1, 2, and 105A. An analysis of the unique ecosystems of tropical and subtitropical Africa, with respect to traditional and modern human impacts on vegetation, wildlife, and other natural resources. A discussion of development goals in relation to socioeconomic policies and Africa's environmental heritage.

Mr. Walter

123. Bioresource Management. Lecture, three hours; discussion, one hour. Prerequisites: courses 2, 5. Recommended: course 40. Theory and practice of the management and conservation of bioresources. Introduction to wildlife management, endangered species conservation, and the design and maintenance of National Parks and ecological reserves.

124. Environmental Impact Analysis. Lecture, three hours; discussion, one hour. Prerequisites: course 40, at least two courses from 100 through M127. Recommended: courses 2, 5. Introduction to the interdisciplinary analysis of local and regional impacts on environmental systems. Evaluation of state and federal concepts for the analysis of environmental impact.

125. Marine Ecosystems. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 5. Biology 5, 7, or equivalent. Description and analysis of the principal marine ecosystems, with particular emphasis on the ones which are chiefly affected by human activity. Detailed evaluation of the ecological and conservation problems associated with human use of marine ecosystems.

M127. Soils, Plants, and Society. (Same as Biology M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B, and 11C, or equivalent, or consent of instructor. A general treatment of soil development and morphology and the physical and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on the field trip to explain developmental phenomena.

Mr. Lunt

128. The World's Ecosystems: Problems and Issues. Lecture, three hours; discussion, one hour. Prerequisite: course 120 or 121. Identification of past, current, and projected problems associated with man-induced ecological disturbances. Identification and distribution of the specific human-nature factors which have contributed to the identified ecological disequilibria.
128. Problems of the Environment: Seminar. Lecture, three hours; reading period, two hours. Prerequisites: senior standing, four courses from Group I. Highly recommended: Statistics 152A. Limited enrollment. Qualitative-quantitative analysis of problems associated with rational protection and use of selected environmental systems (urban, rural, forest, desert, coastal, water, soil, or others).

Mr. Thrower

133. Cultural Geography: The Modern World. Lecture, three hours; reading period, one hour. Prerequisite: course 3 or equivalent. An evolutionary and structural approach to the sociocultural geography of the modern world system, with particular emphasis on the structure and functioning of its core, semi-periphery, and periphery.

Mr. Entrikin, Mr. Hale, Mr. Salter

135. The Cultural Landscape: Perspectives and Processes. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Understanding personal and societal environmental preferences begins with an analysis of the landscape. Attitudes toward the cultural or humanized landscape, methods of landscape analysis, problem landscapes, and environments of the future through lectures, readings, and field study.

Mr. Salter

136. Historical Geography of the U.S. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. The analysis of political geography as developed throughout the world. Current problems in historic and international affairs.

Mr. Hale

140. Political Geography. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. The political geography of the world. Problems in international relations with special reference to the Frostbelt-Sunbelt shifts and offshore relocation.

Mr. Scott

152. World Cities. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. A discussion of the growth and structure of selected cities as illustrations of the processes of urbanization in different countries and societies. Topics include rural to urban migration, cities as centers of power, spatial organization, and the tendency to megalopolization.

Mr. Clark

153. World Cities. Lecture, three hours. Prerequisite: consent of instructor. The interface between cartography and remote sensing. By means of a wide variety of imagery from maps and satellite photos, different landscapes analyzed and explained.

Mr. Thrower

171. Quantitative Analysis. Lecture, three hours; laboratory, one hour. Prerequisite: course 40 or consent of instructor. An introduction to the methods of mathematical and statistical analysis of geographic data. Recommended: course 167. Theory and methods of mapping quantitative information, with a computer. Problems of acquiring and processing machine-readable data and representing them as point symbols and surfaces.

Mr. Thrower

180. North America. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Delimitation and analysis of the principal geographic regions of the U.S. and Canada.

Mr. Bennett

181. Middle America. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of the geographic factors, physical and cultural, that are basic to an understanding of the historical development of Middle America and of the contemporary economic and cultural geography of Mexico and the countries of Central America and the West Indies.

Mr. Bennett

182A. Spanish South America. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of the geographic factors, physical and cultural, that are basic to an understanding of the historical development of Spanish South America and of the contemporary economic and cultural geography of the individual Spanish-speaking countries.

Mr. Bennett

182B. Brazil. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of the geographic factors, physical and cultural, that are basic to an understanding of the historical development of Brazil.

Mr. Bennett

183. Europe. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of geographic conditions and their relation to economic, social, and political problems in Europe.

Mr. Thrower

184. Soviet Union. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. A study of geographic conditions and their relation to economic, social, and political problems in the Soviet Union.
185. South and Southeast Asia. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 or 3, or equivalent, or upper division standing. A regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation. Mr. Salter

186. Contemporary China. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. An analysis of the economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times. Mr. Hale

188. Northern Africa. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. An analysis of the economic, social, and political geography of the area including Morocco, the Maghreb, the Sahara, the Sudanic belt, and the eastern Horn. Emphasis on geographical themes and problems during historical and modern times. Mr. Hale

189. Middle and Southern Africa. Prerequisites: courses 1 or 3, or equivalent, or upper division standing. The regions of Africa south of the Sahara (middle and southern Africa) in terms of physical features, human settlement, economic production, and political patterns. Mr. McKnight

190. Australasia. Prerequisites: courses 1 or 3, or equivalent, or upper division standing. A regional synthesis of the physical and cultural features which characterize Australia, New Zealand, and the islands of the South Pacific. Mr. McKnight

191. California. Prerequisites: courses 1 or 3, or equivalent, or upper division standing. A systematic and regional treatment of the geography of California, including the physical, cultural, and economic aspects and detailed studies of the various regions. Mr. McKnight

Special Studies

196. Senior Thesis in Ecosystems Analysis. Hours to be arranged. Prerequisites: courses 129, 160 or 163, senior standing. Preparation and data collection and analysis for a senior thesis under the guidance and assistance of a faculty sponsor. (F.W.Sp)

199. Special Study (2 to 8 units). Hours to be arranged. Prerequisites: junior standing with a B average in the major or senior standing, consent of instructor.

199HA-199HB. Honors in Geography I, II. Hours to be arranged. Prerequisites: a 3.25 overall GPA, at least five upper division geography courses with a 3.5 GPA. 199HA: An independent study course taught by a team of faculty members. Assistance to student with bibliographic research and/or field research on a topic of mutual interest to the student and the faculty members. Successful completion of course 199HA entails the preparation of a detailed bibliography and outline (to be evaluated by the two faculty members) for the writing of a substantial paper during course 199HB. If that work is determined to be of A quality, the student is allowed to continue in the honors program. If that work is graded B or below, credit is awarded, but the student is not permitted to continue in the honors program. 199HB: Devoted to the writing of the honors research paper and graded in course 199HA. It also is evaluated by the two faculty members. If the paper is determined to be of A quality, the student graduates with honors in geography. If the paper is graded B or below, credit is awarded, but the student does not receive honors.

199L. Independent Study for Internships (2 to 4 units). Prerequisite: consent of instructor. An independent study course to be supervised jointly by the Field Studies Office and the faculty adviser. Further supervision to be provided by the placement for which the student is doing the internship. May not be applied toward major requirements. P/NP grading.

Graduate Courses

Group I: The Environment

200. History and Paradigms of Geomorphology. Lecture, two hours; discussion, one hour; reading period, eight hours. Prerequisites: course 100 and two courses from 101, 103, 105, 106, 107. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in a contemporary milieu. Mr. Orme

201. Coastal Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 101. Discussion of historic and current processes and responses observable in the coastal zone. May be repeated for credit. Mr. Orme

202. Fluvial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100 and 105, or Civil Engineering 150. Discussion of selected topics pertaining to the action of running water in shaping the physical landscape. May be repeated for credit. Mr. Trimble

203. Glacial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 103. Discussion of selected topics pertaining to the action of snow and ice in arctic and alpine environments. May be repeated for credit.

204A-204B-204C. Advanced Climatology. Lecture, three hours; laboratory, one hour. Prerequisites: course 104, first year of calculus, and acquaintance with FORTRAN IV, or consent of instructor. Courses must be taken in sequence. An introduction to the tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such tools include statistical, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects. Mr. Mr. Terjung

205. Seminar: Climatology. Discussion, three hours; reading period, one hour. Prerequisites: courses 204A-204B-204C or equivalent, consent of instructor. Selected topics. May be repeated for credit. Mr. Terjung

208. Advanced Biogeography: Plants. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 108 and 110 or 116, or equivalent, or consent of instructor. An intensive review and analysis of physical and cultural factors influencing plant distributions. Mr. Sauer

212. Advanced Biogeography: Animals. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 112 or 117 or equivalent or consent of instructor. An intensive review and analysis of biophysical and cultural factors influencing animal distributions. Mr. Bennett, Mr. Walter

213. Seminar: Biogeography. Discussion, three hours; reading period, two hours. Prerequisites: course 208 or 212 or equivalent, consent of instructor. Related research projects growing out of course 208 or 212. May be repeated for credit.

215. Quaternary Studies: Physical Aspects. Discussion, three hours; reading period, two hours; fieldwork, three hours. Prerequisite: at least one course from 200 through 205 or an appropriate graduate course in atmospheric sciences or Earth and space sciences. An analysis of the changing physical environment of the Quaternary period. Mr. Orme

217. Quaternary Studies: Ecological Aspects. Discussion, three hours; reading period, two hours. Prerequisites: courses 204A-204B-204C or 208 or 212 or an appropriate graduate course in anthroplogy, botany, Earth and space sciences, or zoology, or consent of instructor. An analysis of the ecological aspects of environmental change during the Quaternary period. May be repeated for credit. Mr. Orme

218. Advanced Medical Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: consent of instructor. An in-depth study of selected topics in medical geography and an intense review of recent research.

223. Seminar: Humid Tropics. Discussion, three hours; reading period, two hours. Prerequisite: consent of instructor. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. Mr. Bennett

227. Water Quality Management. Discussion, three hours; reading period, one hour. Prerequisites: graduate standing. Discussion of the basic technical, regional planning, and public policy issues in water quality management.

229. Seminar: Man and Environment. Discussion, three hours; reading period, two hours. Prerequisites: course 199HA. It also is evaluated by the two faculty members. If the paper is determined to be of A quality, an analysis of man's perception of the environment throughout history and in different parts of the world and its impact on past, present, and future ecosystems.

Group II: Human Geography

232. Advanced Cultural Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 133 or equivalent or consent of instructor. Lectures and discussions around specific aspects of the development of cultural landscape in different geographic environments.

233. Seminar: Cultural Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 232 or 236 or equivalent, consent of instructor. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit.

236. Advanced Historical Geography of the U.S. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 136, consent of instructor. Some major themes in American historical geography.

237. Seminar: Historical Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 236, consent of instructor. Theory and practice of historical geography in North America and Europe. May be repeated for credit.

240. Advanced Political Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 142 or equivalent or consent of instructor. Selected regions used as specific examples of differing techniques of study in geopolitics.

241. Seminar: Political Geography. Discussion, three hours; reading period, one hour. Prerequisites: course 240 or equivalent, consent of instructor. Related research projects growing out of course 240. May be repeated for credit.

242. Advanced Population Geography. Lecture, three hours; reading period, one hour. Prerequisites: course 142 or equivalent or consent of instructor. A study of population dynamics and migration, spatial variation in population composition, and population resource problems, diffusion, and epidemiology.
248. Location and Space Economy. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 145 and 146, or consent of instructor. Methods of locational analysis as applied to problems of regional growth and development. Mr. Scott

249. Seminar: Economic Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 248 or equivalent, consent of instructor. Related research projects growing out of course 248. May be repeated for credit. Mr. Scott

250. Urban Systems. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 145 and 146, or consent of instructor. A general study of the hierarchy of urban places, including diffusion within the urban hierarchy and theories to account for the location and size distribution of cities. Mr. Clark

251. Seminar: Urban Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 250 or equivalent, consent of instructor. Related research projects growing out of course 250. May be repeated for credit.

252. Location and Social Structure within the City. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 145 and 146, or consent of instructor. A study of the links between urban social and urban spatial structure, emphasizing urban residential land use, social areas of the city, and accessibility and urban form. Mr. Scott

254. Migration and Residential Mobility. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: consent of instructor. The description and modeling of national, regional, and intra-urban migration. Mr. Clark

Group III: Procedures

260. Advanced Field and Laboratory Analysis in Geomorphology. Laboratory/fieldwork, 10 hours. Prerequisites: graduate standing, two courses from 201, 202, 203, 215. Examination of advanced field and laboratory procedures used in contemporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation.

Mr. Orme, Mr. Trimble

261. Advanced Field Analysis: Cultural Geography (8 units). Fieldwork, once a week from 8 to 5. Prerequisites: one of courses 232, 233, 250, 251. Field methods and analysis applied to the cultural landscape, especially in Southern California, with particular reference to settlement, agriculture, and environmental modification. Mr. Saltzer

262. Advanced Field Analysis: Biogeography (8 units). Fieldwork, 10 hours. Prerequisite: consent of instructor. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

265. Geographical Bibliography. Lecture, one hour; discussion, two hours; reading period, one hour. Prerequisite: consent of instructor. A survey of the literature of geography, with special reference to periodicals. Intended for beginning graduate students.

267. Advanced Cartography. Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Advanced work in the theory and practical application of modern cartographic principles. Special emphasis on terrain representation, quantitative and computer mapping, scribing, color separation, and reproduction of maps. Mr. Thrower

268. Geographic Information Systems. Lecture, two hours; laboratory, two hours. Prerequisites: courses 167, 168, and 171, or consent of instructor. Recommended: Earth and Space Sciences 150. The encoding, storage, analysis, and display of spatial data in digital format using geographic information systems. Emphasis on geographic data (including remote sensing imagery and digital terrain models), and vector data structures, and spatial analysis/spatial modeling using GIS.

269. Remote Sensing of Environment. Laboratory, three hours; independent study, two hours. Prerequisite: course 157 or equivalent or consent of instructor. The study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention to the analysis of landscapes and the interpretation of interrelationships of individual features in their physical and cultural context.

Mr. Thrower

M270A-M270B-M270C. Seminar in Climate Dynamics (2 to 4 units each). (Same as Atmospheric Sciences 270A-270B-270C and Earth and Space Sciences M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. The archeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle, and climatic effects on oceans. The modeling, simulation, and prediction of modern climate on the monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

Mr. Berger, Mr. Ghi, Mr. Schubert

M272. Spatial Statistics. (Same as Architecture and Urban Planning M215B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: course 171 or Statistics 50, consent of instructor. Specific techniques useful in the analysis of spatial distributions, including both point and areal patterns and emphasizing spatial descriptive statistics, probability models of spatial distributions, and statistical surfaces.

273. Seminar: Model Building for Spatial Analysis. Discussion, three hours. Prerequisite: consent of instructor. Discussions of the philosophy and methodology of model building, with emphasis on the problems unique to the study of individual research topics. May be repeated for credit.

Mr. Berger, Mr. Ghi, Mr. Saltzer

M278. Dating Techniques in Environmental Sciences and Archaeology. (Same as Anthropology M210B.) Lecture, three hours. Prerequisite: consent of instructor. A colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit.

Mr. Berger, Mr. Ghi, Mr. Saltzer

Group IV: Regions

Courses 280 through 291 may be repeated for credit (lecture, two hours; discussion, two hours).

280. North America. Prerequisite: course 180 or consent of instructor. Mr. McKnight

281. Middle America. Prerequisite: course 181, consent of instructor. Mr. Bennett

282. South America. Prerequisite: course 182B, consent of instructor. Mr. Bennett

283. Europe. Prerequisite: course 183, consent of instructor. Mr. Thrower

284. Soviet Union. Prerequisite: course 184, consent of instructor.

285. South and Southeast Asia. Prerequisite: course 185, consent of instructor.

286. Eastern Asia. Prerequisite: course 186, consent of instructor. Mr. Saltzer

287. Middle East. Prerequisite: course 187, consent of instructor. Mr. Hale

288. Northern Africa. Prerequisite: course 188, consent of instructor. Mr. Hale

289. Middle and Southern Africa. Prerequisites: course 189, consent of instructor.

290. Australia. Prerequisite: course 190, consent of instructor. Mr. McKnight

292. Advanced Regional Geography: Selected Regions. Lecture, three hours; discussion, one hour. Prerequisite: appropriate upper division regional course. A lecture series devoted to a specific region at the discretion of instructor. May be repeated for credit.

Seminar

295. Seminar: Geographic Thought. Discussion, three hours; reading period, two hours. Prerequisites: graduate standing, consent of instructor. Discussion and study of topics significant to the growth of the modern philosophy of geography. Mr. Entikin

Core Courses

296A. Philosophical Issues in Geographical Inquiries. Lecture, three hours. Prerequisite: consent of instructor. A discussion of geographical research within the context of philosophical debates concerning the nature of scientific inquiries. Mr. Entikin

296B. History of Modern Geography. Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. The evolution of the field of geography in the 19th and 20th centuries, with emphasis on the professionalization of geography and its emergence as a modern academic discipline.

296C. Statistical Methods for Geographic Research. Lecture, three hours; laboratory, two hours. Prerequisite: course 171 or equivalent. The use of linear models, discriminant functions, and factor analysis to analyze problems in geography.

Mr. Clark

Special Studies

375. Teaching Apprenticeship Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching of College Geography (2 units). Discussion, one hour; laboratory, three hours. Prerequisite: consent of instructor. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 6 units). Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units). Prerequisite: consent of instructor. Independent study.
Germanic Languages

Scope and Objectives

The Department of Germanic Languages offers an extraordinary scope of Germanic languages and literatures, including philology, linguistics, and folklore. The Department of Germanic Languages offers training in specialized fields, in addition to providing a strong background in the literary and cultural traditions. The courses of instruction are designed to enable students to become effective teachers and productive scholars in either German or Germanic languages and literatures, including Germanic folklore, Hungarian, and Finnish. Undergraduate majors in both German and Scandinavian languages lead to Bachelor of Arts degrees. The graduate program offers Master of Arts degrees in German and Scandinavian, and a Ph.D. in Germanic Languages, with a variety of specialized fields available. The department also offers courses in Afrikaans, Dutch, Hungarian, Old Norse studies, and Yiddish, and a program in Finno-Ugric languages and literatures, which are open to all students.

Bachelor of Arts in German

The undergraduate program in German is comprised of lower division courses in the German language and upper division courses in German language, linguistics, literature, civilization, and folklore. While the nucleus of the undergraduate program consists of training in language and literature, students majoring in German will be prepared for a wide range of graduate studies and activities in related fields.

Preparation for the Major

Required: German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed two semesters of college German should enroll in course 4. Placement examinations may be given in instances where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

The Major

Required: Fifteen upper division German courses as follows: Group I — German 100A or 100B or 100C, 108A, 108B, 128; Group II — four courses from 100A or 100B or 100C (whichever has not been taken to satisfy the Group I requirement), 101A, 101B, 101C, 121A, 128, 134; Group III — three courses from 103, 105, 106, 107, 137; Group IV — four courses from 121B, 122, 123, 124, 126, 127, 130, 132. Native speakers of German should consult the undergraduate adviser before enrolling in course 108A, 108B, or 128. German majors, especially those who wish to pursue graduate studies in German, are encouraged to enroll in courses in German history and philosophy in those respective departments and are strongly urged to acquire reading knowledge of French.

Departmental Honors

To qualify for graduation with departmental honors, you must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 195 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

Instructional Credential in German

Students desiring the general secondary credential in German should consult the Graduate School of Education (201 Moore Hall) and the Department of Germanic Languages.

Graduate Study

The Department of Germanic Languages offers the advanced degree candidate a scope and variety of studies unique among departments of German in the U.S. The department provides programs of study leading to the M.A. in German, the M.A. in Scandinavian, and the Ph.D. in Germanic Languages, with specialized fields in all areas of German literature, Germanic philology and linguistics, Germanic folklore, Scandinavian literature and philology, Netherlandic languages and literatures, and Yiddish studies. In addition, the department offers a program in Finno-Ugric languages and literatures. This wide range of studies within the Germanic languages and cultures enables the Ph.D. candidate to acquire competence in several specialized fields.

For brochures and other information, contact the Department of Germanic Languages, 302 Royce Hall, UCLA, Los Angeles, CA 90024-1539.

Master of Arts in German

Admission

A bachelor's degree in German with a minimum grade-point average of 3.0 from an accredited U.S. institution or the equivalent is required. Candidates deficient in their undergraduate preparation may be admitted but are required to take remedial courses, as recommended by the graduate adviser. A placement examination in German language or literature may be required. Three letters of recommendation are also required.

Major Fields or Subdisciplines

There are two M.A. plans that differ with respect to the course requirements and the comprehensive examinations. Plan A is for students who plan to terminate their studies with the M.A. and an instructional credential. Plan B is for students whose main interests are literary and linguistic rather than pedagogical and for students who plan to proceed toward the Ph.D.

Foreign Language Requirement

Before advancement to candidacy for the M.A., you must pass the Graduate School Foreign Language Test reading examination in French with a score of 500 or better. The test is administered through University Extension at the beginning of each quarter, including the summer.

Course Requirements

Plan A requires a minimum of nine upper division and graduate courses, of which at least five courses must be graduate level (200 or 500 series). German 128, 129 (or equivalent), and 370 are required. Undergraduate credit for these courses (or equivalent) is applicable in satisfaction of these requirements.
Plan B requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). One seminar must be included.

Course 596 may be taken twice; course 597 may be taken once before the M.A. degree; course 598 may be taken three times. However, only one 500-series course may be applied toward the M.A. course requirements.

**Thesis Plan**

If you choose this plan, a thesis committee is established no later than the end of your fourth quarter of graduate study to evaluate the proposal for the thesis. After acceptance of the thesis you must pass a two-hour oral examination in the field of the thesis, as well as in the fields listed below under the comprehensive examination plan.

**Comprehensive Examination Plan**

Examinations are offered each quarter, beginning with the written part during the fifth week of each quarter. Under exceptional circumstances the chair of the department will receive petitions for M.A. examinations during the summer recess.

One examination committee is appointed for each quarter. The members of the committee administer the written and oral examinations. The M.A. examination consists of two written examinations of three hours each, followed by a one-hour oral examination.

Part I of the written examinations covers various fields. In the case of Plan A, the origin and development of the standard German language and contemporary standards of the German language are included. In the case of Plan B, bibliography, Middle High German, and the history of the German language are included. Part II of the written examinations covers major works and authors of German literature from earliest times to the present and concepts of literary criticism. After you have taken the written examinations, the M.A. committee decides whether you may proceed to the oral examination. If you fail the oral examination, the M.A. committee decides whether you must repeat the entire examination or only the oral portion.

If you apply for an M.A. under Plan B (to proceed toward the Ph.D.) and are awarded a terminal M.A., you may repeat the examinations if you choose not to have the M.A. degree officially awarded before the reexamination.

**Ph.D. in Germanic Languages**

**Admission**

An M.A. degree in German from an accredited U.S. institution or equivalent (e.g., Staatsexamen in German) is required. In case of significant deficiencies in prior training, the graduate advisers make appropriate study or course recommendations. All deficiencies must be removed prior to application for admission to candidacy for the qualifying examinations. Applicants without an M.A. in German (e.g., with an M.A. in Comparative Literature or in Linguistics) are required to pass the written part of the M.A. comprehensive examination before beginning doctoral work in the department. Applicants with an M.A. in Scandinavian who wish to major in Scandinavian literature and philology must take a formal minor in German. Three letters of recommendation are also required.

**Major and Minor Fields of Study**

The department offers two Ph.D. programs. The first program requires a major and a minor field in order to give students the broadest possible education and preparation for professional flexibility in research and teaching. The second program does not require a minor and is designed to enable students to complete their studies toward the Ph.D. more expeditiously.

If you select the first program, you must, as soon as possible after admission, declare your major and minor fields. The field in which you plan to present a dissertation is your major field and is selected from the four fields in which the degree is offered: (1) German literature, (2) Germanic philology and linguistics, (3) Scandinavian literature and philology, or (4) Germanic folklore.

If you select German literature as your major field, you must choose one of the following: (1) German literature before 1700 or (2) German literature from 1700 to the present.

The minor field may be selected from the following options: (1) German literature before 1600; (2) German literature from 1600 through Romanticism; (3) German literature from Romanticism to the present; (4) German philology and linguistics; (5) modern Scandinavian literature; (6) Germanic folklore; (7) Yiddish; (8) Dutch and Afrikaans; (9) Old Norse studies. If your major field is German literature, you may not choose options 1 through 3. As a special option, you may select an extra-departmental minor which must be individually endorsed by a majority of the departmental faculty members on the basis of your dissertation plans.

The second Ph.D. program allows specialization in either of the following two areas: (1) modern German literature (1600 to the present) or (2) Germanics — older German literature (to 1600), Germanic philology and linguistics (including Old Norse and Dutch linguistics), Germanic folklore. If you select the latter area, you are expected to choose two of these three fields, with special emphasis on one.

**Foreign Language Requirement**

In addition to French, a second language examination is required either in a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (substitution of another language may be approved by petition).

**Course Requirements**

There are no course requirements per se for the Ph.D. in Germanic Languages. However, the following rules apply: (1) you must have successfully completed at least three seminars in residence before taking the qualifying examinations for the Ph.D.; (2) specific course requirements may be assigned to new students by the graduate adviser.

**Qualifying Examinations**

The written examinations consist of three parts for the first Ph.D. program and two parts for the second program: (1) first half of major field (three hours); (2) second half of major field (three hours); (3) minor field (three hours).

You may take the written examinations in the major or minor field any time after admission to the doctoral program and fulfillment of all prerequisite requirements. The major field examinations are given within a period of seven school days and completed no later than four weeks before instruction ends in a given quarter.

Written examinations may be repeated in case of failure. A repetition of the major examination includes both parts of the major field. When you have completed the written examinations successfully, the chair of the guidance committee schedules the University Oral Qualifying Examination to be administered by the doctoral committee as soon as possible after completion of the written examinations.

Advancement to candidacy takes place when you have (1) passed the graduate reading examination in French, (2) passed a departmental reading examination either in a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (or an approved substitute language), (3) successfully completed three seminars, and (4) passed the qualifying examinations. When you pass the oral examination, you advance to candidacy and proceed to the writing of the dissertation.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**

After your completed dissertation is accepted by the certifying members of the doctoral committee, you may be required to defend the dissertation in a final oral examination.
German

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

1. Elementary German. Lecture, five hours; laboratory, one hour. Ms. Bopp

1G. Elementary German for Graduate Students. Preparation for the Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

2. Elementary German. Lecture, five hours; laboratory, one hour. Prerequisite: course 1.

2G. Elementary German for Graduate Students. Preparation for the Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

3. Elementary German. Lecture, five hours; laboratory, one hour. Prerequisite: course 2 or two years of high school German.

4. Intermediate German. Lecture, five hours. Prerequisite: course 3 or three years of high school German.

5. Intermediate German. Prerequisite: course 4 or four years of high school German.

6. Intermediate German. Prerequisite: course 5 or equivalent.

12. German Conversation (2 units). Prerequisite: course 1 or one year of high school German. Use of German language teaching films; students have the opportunity to practice spoken German in small groups.

14. Intermediate Conversation (2 units). Prerequisite: course 3 or three years of high school German. Use of German language teaching films; students have the opportunity to practice spoken German in small groups.

50A. Masterworks of German Literature in Translation, Medieval Period through Classicism. Lecture, three hours. Study and analysis of selected masterworks in English translation, including works from the earliest period, such as the heroic and courtly epic, to authors such as Grimmelshausen, Lessing, Schiller, and Goethe. Fulfills the general education literature requirement. May not be applied toward completion of the major in German.

50B. Masterworks of German Literature in Translation, Romanticism to the Present. Lecture, three hours. Study and analysis of selected masterworks in English translation, including authors such as E.T.A. Hoffmann, Heine, Fontane, Rilke, Kafka, Brecht, Thomas Mann, Hesse, Grass, Böll, Christa Wolf. Fulfills the general education literature requirement. May not be applied toward completion of the major in German.

51. Masterworks of Germanic or East Central European Literatures in English Translation. Lecture, three hours. Study and analysis of masterworks of Germanic or East Central European literatures (Dutch and Afrikaans, Hungarian, Old Norse, or Yiddish). Examination of one particular literature per quarter.

88. Lower Division Seminar. (Formerly numbered 95) Discussion, three hours. Course of variable content limited to topics of current interest and offered whenever a staff member is available.

Upper Division Courses

Prerequisite for all upper division courses (except 100A, 100B, 100C, 119A through 119F, 121A, 121B) is course 6 or equivalent or consent of instructor.

Courses in the German literature series may not be applied toward completion of the major in German.

Courses Open to Majors and Nonmajors; No Credit to Graduate Students in German

100A. German Civilization and Culture before 1700. Lectures, discussions, and readings in English; knowledge of German not required. A study of the development of German civilization and institutions from the earliest times to 1700. Study of German culture as represented in its literature, art, music, and architecture. Mr. Bäuml, Mr. Wagener, Mr. Ward

100B. Modern German Civilization and Culture from 1700 to the Present. Lectures, discussions, and readings in English; knowledge of German not required. A study of the development of German civilization and institutions from 1700 to 1919. Study of German culture as represented in its literature, art, music, and architecture. Mr. Bäuml, Mr. Wagener

100C. German Civilization and Culture in the 20th Century. Lectures, discussions, and readings in English; knowledge of German not required. A study of the development of German culture and institutions from 1919 to the present, emphasizing developments in literature, the arts, and architecture.

Mr. Bahr, Mr. Wagener

101A. Introduction to German Poetry. Close analysis of representative examples of German lyric poetry from early as well as modern literary periods, including a systematic consideration of poetic conventions and forms, diction, tone, imagery, symbolism, and metrics. Course should be taken at the beginning of literary studies.

Mr. Bahr, Ms. Komar, Mr. Wagener

101B. Introduction to German Drama. Analysis of selected examples of drama (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, etc.), including a systematic introduction to dramatic forms, techniques, and theories. Texts selected from modern literature as well as from other periods. Course should be taken at the beginning of literary studies.

Mr. Bahr, Mr. Nehring

101C. Introduction to German Narrative Prose. Analysis of significant examples of narrative prose (e.g., short story, novel, novel, fairy tale, etc.), including a systematic introduction to narrative forms, techniques, styles. Texts selected from modern literature as well as from other periods. Course should be taken at the beginning of literary studies.

Mr. Bahr, Mr. Nehring

102. Business German. Prerequisites: courses 1, 2, 3, 4, 5, 6. German for business studies: exercises in German business correspondence, terminology of export and import, readings and translations in the field of business German. Ms. Landa

103. Introduction to German Enlightenment, Sturm und Drang, and Classicism. Reading and discussion of representative works by Lessing, Goethe, and Schiller; their historical and social background, their relationship to music (Bach, Mozart) and philosophy (Leibniz, Kant), as well as their place in the history of ideas.

Mr. Bahr

105. Introduction to 19th-Century German Literature. Reading and analysis of selected works from Romanticism to realism.

Ms. Komar, Mr. Nehring

106. Introduction to Modern Literature. Analysis of selected works of the period from 1890 to 1945.

Mr. Nehring, Mr. Wagener

107. Introduction to Contemporary Literature. Analysis of selected works of the period from 1945 to the present time.

Ms. Mundt

108A. Composition and Conversation. Ms. Landa

108B. Composition and Conversation. Prerequisite: course 108A or consent of instructor.

Courses Not Open for Credit to Majors or Graduate Students in German

119A. German Literature in the Age of Chivalry, In English Translation. Lecture, three hours. Study and analysis of literary monuments in English translation in their social and cultural settings, including courtly love lyrics, Arthurian epics, and heroic epics. May not be applied toward completion of the major in German.

Mr. Bäuml, Mr. Ward

119B. Weimar Classicism and Its Influence, In English Translation. Lecture, three hours. Study and analysis of works in English translation from the classic age of German literature and concentrating on the major works of Lessing, Goethe, and Schiller and their reflection in the modern period. May not be applied toward completion of the major in German.

Mr. Bahr

119C. The Feast Tradition from the Renaissance to the Modern Age, In English Translation. (Formerly numbered 119J.) Lecture, three hours. Readings and discussions in English of the Feast theme and tradition in European literature and intellectual history, including the chapbook of Doktor Faustus, Christopher Marlowe's and Goethe's Faust dramas, and Bulgakov, as well as Thomas Mann's novel, Doktor Faustus: The Life of the German Composer Adrian Leverkuhn. May not be applied toward completion of the major in German.

Mr. Bahr

119D. Romantic Heritage in German Literature, In English Translation. (Formerly numbered 119C.) Lecture, three hours. Study and analysis of literary works in English translation that reflect German Romantic imagination from the end of the 18th century into the 20th century. May not be applied toward completion of the major in German.

Ms. Komar, Mr. Nehring

119E. Pattern and Chaos: Modern German Literature and Thought, In English Translation. (Formerly numbered 119D.) Lecture, three hours. Selected works in English translation of German authors, poets, and thinkers from the late 19th into the 20th century, such as Nietzsche, Thomas Mann, Kafka, Brecht, Grass, Christa Wolf. Topics vary from quarter to quarter. May not be applied toward completion of the major in German. May be repeated for credit.

119F. From Dream to Nightmare: The German-Jewish Experience, In English Translation. (Formerly numbered 119G.) Lecture, three hours. Study and analysis of works in English translation reflecting the process of German-Jewish assimilation and disenfranchisement, including authors such as Mendelsohn, Heine, Schnitzler, Kafka, Feuchtwanger, Anne Frank, Sachs, Celan, and Becker.

Ms. Hadda

Courses Open for Credit to Majors, Nonmajors, and Graduate Students in German

211A. Special Problems in Literature. Lecture or seminar, three hours. Prerequisite: upper division standing. Varying topics of current importance and immediate relevance to literary study. Designed to introduce students to contemporary trends in literary study and predominantly concerned with topics related to German literature and criticism.
121B. German Film in Cultural Context: Early German Film. Lecture, one hour; discussion, one hour; screenings, two to two and one-half hours. A survey of German film from the Weimar to the Adenauer era. Viewing and discussion of films by Lang, Murnau, Sternberg, Wiene, Staudte, etc., with respect to their cultural, sociopolitical, and cinematic codes. Ms. Jutta, Ms. Landa

121C. German Film in Cultural Context: New German Film. (Formerly numbered 121B.) Lecture, one hour; discussion, one hour; screenings, two to two and one-half hours. A survey of new German film as it evolved in the late 1960s. Viewing and discussion of films by Fassbinder, Herzog, Schindorf, Sanders-Brahms, Wenders, and other German-speaking filmmakers, with respect to their cultural, sociopolitical, and cinematic codes. Ms. Jutta, Ms. Landa

121D. Selected Topics in German Culture and Civilization. (Formerly numbered 121C.) Lecture, three hours. Required of all German majors who are candidates for the standard credential in secondary teaching.

122. Studies in German Literature before 1750. Prerequisites: three upper division courses (including course 100A) or consent of instructor. Readings and analysis of major works from the Middle Ages to the baroque. Mr. Bäuml, Mr. Wagener, Mr. Ward

123. Goethe. Prerequisites: courses 100A or 100B and consent of instructor. Reading and discussion of representative works of this key figure in German literature. Mr. Bahr

124. Romanticism. Prerequisites: courses 100A or 100B and 105, or consent of instructor. Reading and analysis of major works of the Romantic period. Authors include Tieck, Novalis, E.T.A. Hoffmann, and Eichendorff. Mr. Komar, Ms. Nehring

125. Advanced Study in German Literature. Prerequisites: courses 100A or 100B or 100C and 106, or consent of instructor. Reading and analysis of range of major works from 1890 to 1945. Mr. Nehring, Mr. Wagener

126. Advanced Study in German Literature. Prerequisites: courses 100A or 100B or 100C and 107, or consent of instructor. Analysis of wide range of German literature from 1945 to the present. Ms. Mundt

127. Advanced Composition, Grammar, and Conversation. Prerequisites: courses 108A and 108B. or consent of instructor. Ms. Landa

129. German Phonetics. Study of the articulatory basis of the sounds of German and practice in standard pronunciation. Ms. Bahr, Mr. Bäuml

130. Methodology of Literary Criticism. Prerequisite: senior standing or consent of instructor. Introduction to the methodology of literary criticism, including a systematic study of motifs, tropes, plot, space and time, semantics, stylistics, rhetoric, metrics, imagery (emblem, metaphor, allegory, symbol), structural elements (act, stanza, book, flashback, anticipation, interior monologue), narrator and reader response, humor and irony, hermeneutics. Mr. Bahr, Mr. Bäuml

132. Goethe's Faust. Prerequisites: courses 100A or 100B and 123, or consent of instructor. Detailed interpretation of Goethe's Faust, Parts I and II, together with discussions of new critical treatments of the Faust theme in European literature. Mr. Bahr

134. German Folklore. A survey of the various genres of German folklore. Mr. Ward

137. Language and Linguistics. Prerequisites: courses 100A or 100B, 108A. Introduction to the historical development of the German language; theories and methods of linguistics.

190. Senior Thesis Course. Extensive reading, research, and writing of senior thesis. May be used for writing honors thesis.

190A-190ZZ. Special Studies (2 to 4 units each). Prerequisite: consent of instructor. To be arranged with faculty member who will direct the study (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for I.D. number). Courses independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite.

Graduate Courses

201A. Bibliography, Research Methods, and Scholarly Writing. Lecture, three hours. Introduction to the research process; criteria for the study of analysis of literary and philological materials, with emphasis on bibliographies and such tools of research as reference works, series publications, journals, archives, literary histories, and computer data banks. Practical exercises in the analysis of sources, compilation, and presentation of bibliographies, and the writing of research papers. Mr. Bahr, Mr. Ward

201C. Theories of Literary Criticism. Analysis and discussion of major theories of literary criticism by Marxists, Feminists, and other contemporary authors. Mr. Bahr, Mr. Bäuml

202A. Middle High German. Introduction to the grammar, syntax, and vocabulary of the Middle High German language. Exercises in reading Middle High German texts combined with a study of the sociocultural contexts in which the works of the medieval period were produced and performed. Mr. Bäuml

202B. Readings in Middle High German Literature. Extensive reading of the literary monuments of the medieval period in Germany. Introduction to the cultural and literary history of the Middle Ages. Mr. Bäuml, Mr. Ward

203A. The Courtly Epic. An analysis of the major epics of the medieval period in Germany. Works by authors such as Hartmann's Erec and Iwein, Wolfram's Parzival, and Gottfried's Tristan. A study of courtly society, as well as an introduction to methods of interpretation and analysis. Mr. Mehler

203B. The Courtly Lyric. Analysis of the medieval songs of courtly performers, beginning with Der von Kürenberg and ending with Johannes von Hadlau. Study of the sociocultural context in which the songs were produced and performed and an introduction to methods of interpretation and analysis. Mr. Bär

204. Renaissance and Reformation Literature. The literature of the 15th and 16th centuries, including an introduction to and the study of the early New High German language. Selected readings from the works of such authors as Sebastian Brant, Martin Luther, Hans Sachs, and Johann Fischart. Mr. Bahr, Mr. Ward

205. Baroque Literature. Definition of the term baroque; development of modern baroque scholarship; influence of Baroque; an analysis of some of the literary texts (prosopody) and of representative poems, dramas, novels, and prose satires of the 17th century. Mr. Wagener

206A. Enlightenment and Sentimentalism. Study of representative authors of the early part of the 18th century from Gottsched through Lessing, including such authors as Leibniz, Thomassius, Wolf, Bodmer and Breitinger, Johann Elias Schlegel, Haller, Brokes, Anacreontic poets, Gessner, Klipstorff, Mendelssohn, and Wieland. Mr. Bahr

206B. Sturm und Drang. Study of representative authors of the Sturm und Drang period, such as Herder, Forster, Gerstenberg, Leisewitz, Klinger, Wagner, R.M. Lenz, Montiz, Heinse, Schubart, and the young Goethe and Schiller. Mr. Bahr

207A. Classicism: Goethe. Selected topics from the works of Goethe and his circle. The Sturm und Drang period, the period from 1786 to 1832, such as Iphigenie auf Tauris, Torquato Tasso, Wilhelm Meisters Lehrjahre, Die natürliche Tochter, Pandora, and poetry selections. Mr. Bahr

207B. Classicism: Schiller. Selected topics from the works of Schiller and other major writers of the Sturm und Drang period. Mr. Bahr

208. Romanticism: Selected works of German Romantic period by authors such as Wackenroder, Tieck, the brothers Schlegel, Novalis, Hölderlin, Brentano, Arnim, the brothers Grimm, "Bonnaventura," E.T.A. Hoffmann, Eichendorff, and others. Course may be 2 to 4 units each. Mr. Komar, Ms. Nehring

209A. 19th-Century Lyric. The development of German lyric poetry from the classic/Romantic period to symbolism. Discussion of forms, attitudes, tendencies, critical theory, and representative works of lyric and narrative writers of the 19th century. Aspects may include poetry by Romantic and Classicists, Goethe, and Bürger. Mr. Komar, Ms. Nehring

209B. 19th-Century Drama. Reading and analysis of selected dramas by Kleist, Büchner, Hebbel, Grillparzer, and others. Discussion and analyses may include topics such as Schicksalsagörlage, bourgeois trivial dramas, sociopolitical drama, historical drama, Viennese Volkstheater. Mr. Komar, Ms. Nehring

209C. 19th-Century Narrative Prose. Analysis of German prose works from Romanticism to naturalism. Discussion of the problem of reality and literary realism with respect to narrative techniques. Authors may include Heine, Büchner, Droeß-Hüfstedt, Stifter, Goltz, Keller, C.F. Meyer, Nietzsche, and the early naturalists and realists. Mr. Komar, Ms. Nehring

210A. Naturalism and Symbolism. Sociocultural background and theoretical writings concerning naturalism and symbolism. Analysis of representative poems, dramas, and shorter narratives by authors such as Holz, G. Hauptmann, George, Hofmannsthal, Rilke, and others. Mr. Komar, Ms. Nehring, Mr. Wagener

210B. Expressionism and Neorealism. Historical and sociological background in the period from 1910 to 1933. Literary magazines, theoretical writings, poetry of expressionism and Dadaism, expressionist drama, and naturalistic and realist contemporary novels. Works may include Heine, Büchner, Droeß-Hüfstedt, Stifter, Goltz, Keller, C.F. Meyer, Fontane, and the early realists. Ms. Komar, Mr. Wagener

210C. 20th-Century Novel to 1945. Analysis of selected 20th-century novels written prior to 1945. Authors of different literary and historical eras, such as Broch, Döblin, Hesse, Kafka, Heinrich Mann, Thomas Mann, and Rilke. Ms. Komar, Mr. Wagener

211A. Contemporary Novel. Study of selected novels in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Böl, Grass, Handke, Frisch, and Christa Wolf, analyzed and placed in the context of literary, cultural, and political trends. Ms. Mundt

211B. Contemporary Lyrics and Drama. A study of selected dramas and poems in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Dürrmenz, Frisch, Handke, Celan, and Brecht, analyzed and placed in the context of literary, cultural, and political trends. Ms. Mundt

212. History of the German Language. A historical survey of the development of the standard literary German language from the time of Indo-European unity through proto-Germanic, West Germanic, the medieval period, the Reformation, the baroque period, and the Enlightenment until its final codification at the end of the 19th century. Mr. Wilbur
220. Survey of Germanic Philology. A systematic survey of the major problems in the field of Germanic linguistics: the origin and historical diffusion of the Germanic dialects; and phonological classification problems in the evolution of the nominal and verbal morphology of the various dialects; problems in the phonological evolution of the various dialects. Mr. Wilbur

221. Goetie. A systematic study of the philosophy and grammar of the Gothic language, with readings in Wulff's translation of the Bible and an introduction to the history of the Goths and their place in the development of the Germanic languages. Mr. Wilbur

222. Old High German. An introduction to the earliest phases of German literature, with extensive readings in the major documents of that period (750–1050). Emphasis on the grammatical interpretation of these documents and the identification of the dialects used in their composition. Mr. Wilbur

223. Old Saxon. An introduction to the study of the earliest documents in Old Low German. Readings in the Old English and the study of the Old Saxon Genesis. Mr. Wilbur

240A. Theories, Methods, and History of Germanic Folklore. The history of Germanic folklore studied in the context of European cultural history. The evolution of the theories and methods of the discipline as developed by Herder, the Grimm, Bothe, Mannheim, Bausinger, and others. Mr. Ward

240B. Folk Song and Ballad. Analysis of the poetic and musical aspects of German folk songs and ballads. Study of thematic and formalistic evolution of the songs and music, combined with an introduction to the theories and methods of analysis of folk music and the function of folk song in its social context. Mr. Ward

245B. Germanic Antiquities. Survey of the prehistoric and early history of Germanic civilization from the Bronze Age to the end of the migrations on the basis of archaeological, historic, and philological evidence. Use of methods of comparative ethnography, religion, and myth to interpret the evidence. Mr. Ward

251. Seminar in Syntax and Phonology of German. Topics selected from the field of contemporary Germanic syntax and phonology; the needs and preparation of the students enrolled (e.g., Dalekteglogenie, generative phonology, generative syntax, Valenztheorie, Texttheorie). Mr. Wilbur

252. Seminar in Historical and Comparative German Linguistics. Topics selected from the field of historical Germanic phonology and syntax according to the needs and preparation of the students enrolled (e.g., the West Germanic problem and the classification of the Germanic languages, the development of Germanic verbal and nominal morphology, proto-Germanic syntax). Mr. Wilbur

253. Seminar in Medieval Literature. Selected topics in medieval literature, with emphasis on problems in literary analysis and the applicability of various types of analysis to medieval texts. Mr. Bäuml, Mr. Ward

254. Seminar in Renaissance and Reformation. Seminar on selected literary or philological problems, with the emphasis on the needs of a particular group as a particular research project in textual analysis or pertinent research to apply the methods of literary history to the literature of the 15th and 16th centuries. Mr. Bäuml, Mr. Ward

255. Seminar in Baroque Literature. Seminar on selected problems of German baroque literature, such as a particular genre, author, or theme. Textual analysis supplemented by critical review of research and the application of methods of literary analysis pertinent to the literature of this age. Mr. Wagener
Dutch

Upper Division Courses

100. Modern Dutch Culture and Society. Lecture, three hours. Lectures, discussions, and readings in English. Survey of art, architecture, literature, film, Dutch cinema. Emphasis on literature (including "Pilgrimage"—zwevend). the two World Wars, housing policy, the mass media, and the rise of a multicultural society. Mr. Kirsner

103A. Elementary Dutch. (Formerly numbered Dutch and Afrikaans 103A.) Lecture/language laboratory. Introduction to the standard language of the Netherlands and one of the three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing. Mr. Kirsner

103B. Elementary Dutch. (Formerly numbered Dutch and Afrikaans 103B.) Lecture/language laboratory. Prerequisite: course 103A or equivalent. Mr. Kirsner

103C. Intermediate Dutch. (Formerly numbered Dutch and Afrikaans 103C.) Lecture/language laboratory. Prerequisite: course 103B or equivalent. Grammatical exercises, conversation, reading and analysis of simple texts. Mr. Kirsner

113. Modern Dutch and Flemish Literature in Translation. Lecture, three hours. Readings and analysis of works by selected authors of the Netherlands and northern (Flemish) Belgium such as Boon, Claus, Couperus, Hermans, Mulsch, Muntz, and selected poets such as Campert, Geelkerken, Gorter, Kloos, Lucbet, NHoff, Van Ostaijen, and Vroman. Mr. Kirsner

120. Introduction to Dutch Studies. (Formerly numbered Dutch and Afrikaans 120.) Prerequisite: consent of instructor. Brief review of Dutch grammar. Reading and discussion of selections from contemporary Dutch literature, contemporary Dutch literary criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and an appreciation of the scope of 20th-century Neerlandistiek. Mr. Kirsner

131. Introduction to Modern Dutch Literature. (Formerly numbered Dutch and Afrikaans 131.) Discussion, three hours. Prerequisite: course 103B or 120 or equivalent. Selected works of the literature of the Netherlands and northern (Flemish) Belgium from the mid-1650s to the present, including novels by such writers as Multatuli, Couperus, Hermans, Mulsch, and Reve and poetry by such groups as the symbolism Beweging van Taalhij and the post-War Beweging van Vlijt. Mr. Kirsner

199. Special Studies in Dutch (2 to 4 units). (Formerly numbered Dutch and Afrikaans 199.) Prerequisite: consent of instructor. A course of independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Mr. Kirsner

Graduate Courses

234. Structure of Modern Standard Dutch. (Formerly numbered Dutch and Afrikaans 234.) A detailed examination, from contrasting theoretical viewpoints, of central problems in Dutch phonology, grammar, and semantics, with attention to related phenomena in German, English, and Afrikaans. Equivalent to Linguistics 225. Mr. Kirsner

596. Directed Individual Study or Research in Dutch. (Formerly numbered Dutch and Afrikaans 596.) To be arranged with faculty member who will direct the study or research (course section to be identified by a two- letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Mr. Kirsner

Hungarian

Upper Division Courses

101A. Elementary Hungarian. Introduction to grammar and reading exercises, with emphasis on the spoken language. Ms. Birnbaum

101B. Elementary Hungarian. Prerequisite: course 101A or equivalent. Grammatical exercises, conversation, and reading of texts. Ms. Birnbaum

101C. Elementary Hungarian. Prerequisite: course 101B or equivalent. Conversation and readings in literary texts. Ms. Birnbaum

101E. Advanced Hungarian. Prerequisites: courses 101A through 101D or equivalent. Conversation, reading, and discussion of literary texts. Ms. Birnbaum

101F. Advanced Hungarian. Prerequisites: courses 101A through 101E or equivalent. Conversation and review of Hungarian grammar from a typological point of view. Ms. Birnbaum

120A-120B. Readings in Hungarian. Prerequisite: course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Ms. Birnbaum

200. Readings in Hungarian Literature. Prerequisites: reading knowledge of Hungarian, course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Discussion conducted in Hungarian. Ms. Birnbaum

210. Survey of Hungarian Literature in Translation. Intended for students in general and comparative literature, as well as students interested in Finno-Ugric studies. Survey of main trends and contacts with other literatures. Ms. Birnbaum

130. Hungarian Civilization and Culture. A study of Hungarian civilization and institutions from the earliest times to the present. Study of Hungarian culture as represented in its arts (literature, fine arts, music). Ms. Birnbaum

M135. Hungarian Folklore and Mythology. (Same as Folklore M128.) A general course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research. Ms. Birnbaum

M136. Folklore and Mythology of the Ugric Peoples. (Same as Folklore M129.) Survey of the traditions of the smaller Ugric nationalities (Moguls, Ossyks, etc.). Ms. Birnbaum

199. Special Studies in Hungarian (2 to 4 units). Prerequisite: consent of instructor. A course of independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Ms. Birnbaum

Old Norse Studies

Lower Division Course

40. The Heroic Journey in Northern Myth, Legend, and Epic. A comparison of the journeys of heroes. Readings in mythology, legend, folktales, and epic, including the Nibelungenlied, the Volsunga saga, the Eddas, and Beowulf. Cultural and historic backgrounds to the texts. Ms. Byock

Upper Division Courses

139. The Saga. Lecture, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of literary forms and from the different nationalities. Consideration to the history and culture produced this literature. Mr. Byock

140. Viking Civilization and Literature. Readings in the history, society, and culture of the early Scandinavians. All texts in English: Old Norse sagas, Eddas, and early ballad literature. Mr. Byock

C145. Old Norse Literature and Society. Lecture, three hours. Readings in primary texts in conjunction with the critical literature. Specific issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C223. Mr. Byock

151. Elementary Old Norse. Introduction to the grammar and pronunciation of Old Norse. Selected readings from the sagas and the Prose Eddas. Ms. Birnbaum

152. Intermediate Old Norse. Prerequisite: course 151 or equivalent. Continued grammar, pronunciation, and readings from the Eddas and the sagas of the sagas of the heathen heroes, the Norwegian kings, and the legendary heroes. Mr. Byock

153. Modern Icelandic. Prerequisite: course 152 or equivalent. Grammar, readings, and conversation. Mr. Byock

199. Special Studies in Old Norse (2 or 4 units). Prerequisite: consent of instructor. A course of independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Mr. Byock

Graduate Courses

221. Advanced Old Norse Prose. Prerequisite: course 153 or equivalent. Readings of major saga texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandinavian history. Mr. Byock

222. Advanced Old Norse Poetry. Prerequisite: course 153 or equivalent. Readings of mythological and heroic poems from the Poetic Eddas. Secondary sources used where appropriate. Mr. Byock

C223. Old Norse Literature and Society. Lecture, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Mr. Byock

245A. Germanic and Scandinavian Mythology. Lecture, three hours. A study of Northern myth and religion through a close reading of the Eddic texts and secondary sources. Ms. Hadda

596. Directed Individual Study or Research. To be arranged with faculty member who will direct the study or research (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward the M.A. graduate course requirement. S/U grading. Mr. Byock

597. Preparation for Ph.D. Qualifying Examination. To be arranged with faculty member who will direct the study (see department for I.D. number). S/U grading. Mr. Byock

Yiddish

Lower Division Courses

1. Elementary Yiddish. Introduction to grammar, instruction in listening, speaking, reading, and writing skills. Ms. Hadda

2. Elementary Yiddish. Prerequisite: course 1 or equivalent. Ms. Hadda

3. Elementary Yiddish. Prerequisite: course 2 or equivalent. Ms. Hadda
Upper Division Courses

104. Intermediate Yiddish. Prerequisite: course 3 or equivalent. Grammatical exercises, reading and linguistic analysis of texts, conversation. Ms. Hadda
121A. 20th-Century Yiddish Poetry in English Translation. Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yiddish poetry and drama. Ms. Hadda
121B. 20th-Century Yiddish Prose and Drama in English Translation. Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yiddish prose. Ms. Hadda
121C. Special Topics in Yiddish Literature in English Translation. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. Ms. Hadda
131A. Modern Yiddish Poetry. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish poetry. Ms. Hadda
131B. Modern Yiddish Prose and Drama. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish prose and drama. Ms. Hadda
131C. Special Topics in Yiddish Literature. Prerequisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. Ms. Hadda
199. Special Studies in Yiddish (2 to 4 units). Prerequisite: consent of instructor. A course of independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Ms. Hadda

Graduate Courses

596. Directed Individual Study or Research in Yiddish. To be arranged with faculty member who will direct the study or research (course section to be identified by a two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Ms. Hadda
597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for I.D. number). S/U grading. Ms. Hadda

Scandinavian Section

332 Royce Hall, (213) 825-2432

Professors
Ross P. Shvedler, Ph.D.
Kenneth G. Chapman, Ph.D., Emeritus
Erik Wahlgren, Ph.D., Emeritus

Associate Professors
James R. Massengale, Ph.D.
Mary Kay Norseng, Ph.D., Vice Chair

Lecturer
Jules L. Zentner, Ph.D.

Scope and Objectives

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between the West and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden, as well as a strong set of course offerings in Finnish language, literature, and folklore. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

Bachelor of Arts in Scandinavian Languages

Preparation for the Major
Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, 25, and 30, or equivalent.

The Major
Required: Twelve upper division courses in Scandinavian, including 105 and 106 or 110 for two quarters and 141, 142, 143. As an option, three upper division courses in a related field may be taken. These three courses must be approved in advance by the undergraduate adviser. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

Master of Arts in Scandinavian Languages

Admission
In addition to the University minimum requirements, prospective students in the M.A. program in Scandinavian must have an undergraduate major in Scandinavian languages or equivalent. If you are deficient in the undergraduate major, you must complete it by taking the appropriate courses as recommended by the graduate adviser. A placement examination in the Scandinavian languages, as well as in German, may be required.

Three letters of recommendation are required by the Graduate Division.

For a brochure describing the program and requirements, write to the Scandinavian Section, 332 Royce Hall, UCLA, Los Angeles, CA 90024-1537.

Major Fields or Subdisciplines
There are no specifically designated major fields or subdisciplines in the M.A. program, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

Foreign Language Requirement
Reading knowledge of French or German is required (in addition, of course, to knowledge of the Scandinavian languages). You must pass the Graduate School Foreign Language Test reading examination in French or German with a score of 500 or better or must pass at least one upper division course in French or German.

Course Requirements
A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandinavian languages, at least five of which must be graduate courses. Three upper division or graduate-level courses may be taken in a related field of study to be determined in consultation with the graduate adviser; at least one of these must be at the graduate level. Comparative Literature 200 or English 201 or an equivalent course in methodology is required as one of the 12 courses.

Three 596 courses (12 units) may be applied toward the total course requirement, but only one (four units) may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan
A comprehensive examination, based on the required coursework and a reading list, is required of all candidates for the M.A. degree. The examination is given whenever you have completed the course requirements and, in consultation with the graduate adviser, your general and reading list preparation is deemed adequate.

The comprehensive examination is both written and oral; students who fail may be reexamined once without petitioning.

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the "Ph.D. in Germanic Languages."

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor.
Native speakers of Norwegian, Swedish, or Danish may not enroll in any language course (including courses 105, 106, 110) in the Scandinavian Section, except by petition in writing to the section. Non-Southwestern students with knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student's linguistic background and the reason for wanting to take the language course in question.

1. Elementary Swedish.
   - Mr. Massengale, Mr. Shideler

2. Elementary Swedish. Prerequisite: course 1 or equivalent.

25. Intermediate Danish. Prerequisite: course 24 or equivalent.
   - Mr. Massengale

30. Intermediate Danish, Norwegian, and Swedish.
   - Mr. Massengale, course 5 or 15 or 25 or equivalent. Readings in Danish, Norwegian, and Swedish. Written and oral exercises. P/NP (undergraduates), S/U (graduates), or letter grading.

50. Introduction to Scandinavian Literature. Lecture, three hours. Intended for students in general and for those wishing to prepare for more advanced and specialized studies of Scandinavian literature and culture. Selected works from the literature of Sweden, Norway, Denmark, Iceland, and Finland, ranging from myth, national epic, saga, and fokkale through modern novel, poem, play, short story, and film script, read in English and critically discussed.

60. Ingar Bergman and Other Swedish Film-makers. Discussion, three hours. Knowledge of a Scandinavian language or of film not required. Intended for students in general and for those preparing for more advanced studies in Scandinavian literature or culture. A history of Swedish film, emphasizing how it reflects social and cultural aspects of Scandinavian life. Discussion and analysis of representative Bergman and other Swedish films.

Upper Division Courses

105. Advanced Swedish. Discussion, three hours. Prerequisite: course 30 or equivalent. Readings, composition, and conversation in Swedish.
   - Mr. Massengale, Mr. Shideler

106. Advanced Swedish. Discussion, three hours. Prerequisite: course 105 or equivalent. Readings, composition, and conversation in Swedish.
   - Mr. Massengale, Mr. Shideler

110. Advanced Danish and/or Norwegian. Discussion, three hours. Prerequisite: course 30 or equivalent. Readings, composition, and conversation in Danish and Norwegian. May be repeated once for credit.
   - Mr. Massengale, Ms. Norseng

M123A. Finnish Folklore and Mythology. (Same as Folklore M123A.) The methods and results of Finnish folklore studies and the mythic traditions of the Finns. Special attention to the oral epic, beliefs, and legends.

M123B. Finnish Folk Song and Ballad. (Same as Folklore M123B.) Course M123A is not prerequisite to M123B. A survey of Finnish balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

M125. Folklore and Mythology of the Lapps. (Same as Folklore M125.) Survey of Lappish beliefs, customs, and various genres of oral tradition, including tales, legends, songs, and music. Attention also to the material manifestations of Lappish culture: arts and crafts, textiles, costume, folk technology.

130. Elementary Finnish. Introduction to pronunciation and grammar.

131. Intermediate Finnish. Prerequisite: course 130 or equivalent. Grammatical exercises and readings.

132. Advanced Finnish. Prerequisite: course 131 or equivalent. Readings, composition, and conversation.

138. Survey of Finnish Literature. Conducted in English; knowledge of Finnish not required. Intended for students in general and comparative literature, as well as students interested in Finnish studies. Readings and discussions of selected works from the literature of Finland in the 19th and 20th centuries.

141. Backgrounds of Scandinavian Literature. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works from the literature of the medieval, Renaissance, baroque, and Enlightenment periods.

142. Scandinavian Literature of the 19th Century. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works from the Romantic, realist, and post-Romantic literature of Scandinavia in the 19th century.

143. Scandinavian Literature of the 20th Century. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works of modern Scandinavian literature from the beginning of the century to the present.

144. Henrik Ibsen. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected plays by Henrik Ibsen. May be concurrently scheduled with course C251.

145. August Strindberg. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected plays by August Strindberg. May be concurrently scheduled with course C252.

146. Soren Kierkegaard. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works by Soren Kierkegaard. May be concurrently scheduled with course C253.

C147. Knut Hamsun. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works by Knut Hamsun. May be concurrently scheduled with course C254.

C180. Theory of the Scandinavian Novel. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Analysis of the predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Emphasis on the works of such writers as Kierkegaard, Andersen, Hamsun, and Hansen. May be concurrently scheduled with course C264.

C183. Scandinavian Ballads. Lecture, May hours. Prerequisite: reading knowledge of a Scandinavian language. A survey of Danish, Norwegian, and Swedish ballads, with attention to their historical development, poetic content, and musical/ poetic structure.

C184. Hans Christian Andersen. Lecture, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Conducted in English; study of the works of Hans Christian Andersen, the Danish novelist, dramatist, and writer of tales, including a consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

C185. Seminar in Scandinavian Literature. Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C265.

C190. Honors Course in Scandinavian. Prerequisites: senior standing with a minimum 3.0 GPA in the major, consent of the honors committee. Intensive study of a selected special topic in Scandinavian. Readings, oral and written reports.

199A-199Z. Special Studies in Scandinavian (2 or 4 units each). Prerequisites: senior or graduate standing, consent of instructor. To be arranged with faculty member who will direct the study (course section to be identified by a two-letter code using initials of sponsoring instructor ---- see section for I.D. number). A course of independent study designed for graduates or senior undergraduates who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite.
Graduate Courses

C251. Henrik Ibsen. Discussion, three hours. Prerequisite: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of the works of Henrik Ibsen. May be concurrently scheduled with course C144. Ms. Norseng

C252. August Strindberg. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of the works of August Strindberg. May be concurrently scheduled with course C145. Mr. Massengale, Mr. Shideler

C253. Seren Kierkegaard. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of the works of Seren Kierkegaard. May be concurrently scheduled with course C146. Mr. Massengale, Ms. Norseng, Mr. Shideler

C254. Knut Hamsun. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of the works of Knut Hamsun. May be concurrently scheduled with course C147. Ms. Norseng

C263. Seminar in Scandinavian Studies. Prerequisites: graduate standing or consent of instructor, knowledge of a Scandinavian language. Intensive study of selected aspects of Scandinavian society based on readings in the literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate adviser) with topic change. May be concurrently scheduled with course C180. Mr. Massengale, Ms. Norseng, Mr. Shideler

C264. Theory of the Scandinavian Novel. Prerequisites: advanced knowledge of a Scandinavian language, consent of instructor. Analysis of the predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Emphasis on the works of such writers as Kierkegaard, Andersen, Almquist, Jacobsen, Hamsun, and Hansen. May be concurrently scheduled with course C182. Mr. Massengale, Ms. Norseng, Mr. Shideler

C265. Seminar in Scandinavian Literature. Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185. Mr. Massengale, Ms. Norseng, Mr. Shideler

C375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 6 units). Prerequisite: graduate standing in Scandinavian. To be arranged with faculty member who will direct the study or research. Twelve units may be applied toward the total course requirement, but only four units may be applied toward the minimum graduate course requirement. May be repeated twice. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). To be arranged with faculty member who will direct the study or research. May be repeated once. May not be applied toward the M.A. minimum course requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. To be arranged with faculty member who will direct the study or research. May be repeated. S/U grading.

Richard von Glahn, Ph.D.

Lecturers
Ludwig Laufferhass, Ph.D.
Albert Hose, M.A., Emeritus

Adjunct Associate Professor
S. Scott Barthy, Ph.D.

Adjunct Assistant Professor
Jame Lee, Ph.D.

Scope and Objectives

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, history is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers — law, teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees. There is also a joint master's program with the Graduate School of Library and Information Science. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.
Bachelor of Arts Degree

Preparation for the Major and the Major

The History Department's undergraduate program consists of 16 courses in history (six lower division - the "Preparation for the Major"; 10 upper division - the "Major") and four courses in the social sciences outside the department. The following courses are required in the program:

1. History 1A-1B-1C.
2. Two courses in U.S. history.
3. Two courses in non-Western history from the same area (i.e., Latin America, Asia, Near and Middle East, Africa) or in science and technology. Candidates for the California Standard Instructional Credential may not choose science and technology to fulfill their non-Western requirement.
4. History 100 or 101.
5. History 197 or 199.
6. Four courses in the social sciences outside of history or in other related disciplines as explained below.

The requirements for U.S. and non-Western history may be met with either upper or lower division courses. Normally only six lower division courses in history need to be included in your program, so if you meet the U.S. history requirement at the lower division level, you have to meet the non-Western requirement at the upper division level (or vice versa). If you choose to meet both requirements at the lower division level, you are still required to take 10 upper division courses to fulfill upper division requirements. The department recommends the following lower division courses to meet the U.S. history and non-Western requirements: History 2; 3A-3B-3C; 3D; 6A-6B-6C; 7A-7B; 8A, 8B; 9A, 9C; 9D plus one suitable upper division course; 10A-10B. If one non-Western course is taken in lower division, an appropriate upper division non-Western course must be included in the major.

All history majors are required to take at least four courses in other departments in the social sciences, whether lower or upper division (anthropology, geography, economics, political science, sociology, psychology). These courses may not be taken on a Passed/Not Passed basis. A one-quarter course from the History 6A-6B-6C sequence may be applied toward this requirement, provided the same quarter course is not used to satisfy any other requirement of the major.

By petition, you may replace up to two social sciences courses with courses in humanities, fine arts, or natural sciences relevant to your program in history. Courses in communication studies do not fulfill this requirement.

Only two courses offered outside the History Department may be applied as major courses without petition: Anatomy (Medical History) 107A-107B.

Transfer students with deficiencies in lower division courses may petition to substitute appropriate upper division courses in history for the lower division requirements. See the undergraduate counselor.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

Advanced Placement Credit in History: The College of Letters and Science allows eight quarter units toward the B.A. for each Advanced Placement Test in History. The History Department applies this credit to the "Preparation for the Major" as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows eight units of History 7A-7B credit on the history preparation. The excess units may be applied only toward the degree.

Honors Program

The honors program is designed for history majors who are interested in carrying out a year-long independent research project that culminates in an honors thesis. Special honors seminars are also offered during the junior year. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee. Application should be made at the beginning of the junior year.

History 101H is required, as are History 199HA-199HB-199HC, which count as three of the 10 required upper division courses. Course 199HA is taken in the Spring Quarter of the junior year; honors students then take courses 199HB and 199HC in the Fall and Winter Quarters of their senior year under the guidance of the sponsoring professor. A prize is awarded for the outstanding honors thesis.

Instructional Credential in History

If, based on your history major program, you would like a waiver of the national teacher examination for the single subject credential in history, you must complete (1) History 7A-7B or two quarters of courses 6A-6B-6C; (2) courses 1A-1B-1C; (3) course 163; and (4) two upper division courses in modern European history from the 125A-125F or 126A-126E sequences. You may not select history of science as a non-Western field.

Master of Arts Degree

Admission

For admission to graduate standing in the Department of History, you should normally have completed the undergraduate major or its equivalent, have received a Bachelor of Arts degree or its equivalent from an accredited college or university, and have maintained at least a B + average in upper division work. You also need three letters of recommendation and the scores of the General Test of the Graduate Record Examination (GRE) submitted to the department. Students not meeting the grade-point average requirements may be admitted in exceptional cases if their letters of recommendation, GRE scores, or other factors indicate unusual promise. Applicants with a year or more of graduate study at other institutions should have attained a GPA of 3.5 or better if they wish to work toward the Ph.D. degree. Applications should be submitted before December 31; notification is made on or before May 1. Except for extraordinary cases, students are expected to begin their graduate work in the Fall Quarter.

There is no screening examination. Nonhistory majors may be required to take specified courses, depending on their background and fields of specialization. Because applicants are admitted to pursue graduate work in a specific field, a change of fields after admission requires the approval of the relevant field committee.

An annual Guide to Graduate Study in History which explains the requirements and procedures of the graduate program in detail is mailed to all new graduate students who have filed a Statement of Intent to Register (prior to registration). The guide lists faculty, their representative publications, and descriptions of courses offered during the year, and is available from the Graduate Adviser, Department of History, 6265 Bunche Hall, UCLA, Los Angeles, CA 90024-1473.

Major Fields or Subdisciplines

The comprehensive examination covers one of the following fields: (1) ancient (includes ancient Near East); (2) medieval (includes Byzantine and medieval Jewish history); (3) European, 1550 to present (includes British history and the British Empire); (4) Africa; (5) Near East (includes Armenia); (6) India and Southeast Asia; (7) East Asia; (8) Latin America; (9) U.S.; (10) history of science; (11) special fields (students in the history of religions, Russian history, and modern Jewish history are normally examined in one of the above fields, but with consent of the faculty in these fields may petition the graduate guidance and curriculum committee for an M.A. examination in their field of specialization).
Foreign Language Requirement
If you are contemplating graduate work in history, you should begin study of a foreign language as an undergraduate since reading knowledge of one foreign language approved by the department is required. For French, German, Russian, or Spanish, a score of 500 on the Graduate School Foreign Language Test (GSFLT) is required. Students of U.S., Near East, and African history may use departmentally administered translation examinations in French, Spanish, or German in place of the GSFLT. Students of European history must pass departmentally administered examinations in one of these three languages no later than the beginning of the sixth quarter of full-time study. For other languages, certification is required by the department teaching the language according to that department's standards.

Course Requirements
The department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. No course in the 300 series may be applied toward this requirement, and only one in the 500 series may be applied. For students in U.S. history and European history, a minimum of seven of the nine courses must be at the 200 level. For U.S. history, seven of these seven courses must include at least two two-quarter seminars and History 245. For European history, the seven courses must include three two-quarter seminars and course 225. Africanists must take course 275.

Comprehensive Examination Plan
The department follows the comprehensive examination plan. Individual fields specify fulfillment of the examination requirement by (1) a three-hour written examination designed to assess your ability to synthesize a broad field of knowledge or (2) the submission of three essays written for at least two different professors as part of your program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. Students in the U.S. field must submit the paper from the two-quarter research seminar in U.S. history. The European field requires a comprehensive examination in the form of a research paper of approximately 15,000 words, to be submitted at the beginning of the sixth quarter of full-time study.

Field examiners administer the M.A. comprehensive examinations in November, March, and May of each academic year. The committee recommends the following examination results: pass to continue, pass subject to reevaluation, terminal pass, fail. In cases where the M.A. is awarded pass subject to reevaluation, the field M.A. committee reevaluates your progress after an additional three quarters of study. Only in exceptional cases are oral examinations required for the M.A. degree.

M.L.S./M.A.—History
This concurrent degree program of the Department of History and the Graduate School of Library and Information Science allows you to combine historical study with the tools of the information professional and to obtain two degrees—the M.L.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from this department and the Graduate School of Library and Information Science.

Ph.D. Degree
Admission
Admission requirements for the Ph.D. program are the same as those for the M.A., but applicants for the doctorate are urged to seek an interview or to correspond with a member of the faculty in the field in which they intend to work. Students may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree.

While no examination is required for admission to a Ph.D. program, evaluation examinations are given to determine your continuance to the Ph.D. degree.

An annual Guide to Graduate Study in History, which explains the requirements and procedures of the graduate program in detail, is mailed to all new graduate students who have filed a Statement of Intent to Register (prior to registration). The guide lists faculty, their representative publications, and descriptions of courses offered during the year, and is available from the graduate adviser.

Major Fields or Subdisciplines
Ancient Greece; ancient Rome; medieval constitutional and legal; medieval social and economic; medieval ecclesiastical and religious; medieval intellectual and cultural (medieval history specialists may offer no more than two of these fields in medieval history); Byzantine; Russia since 862; Southeast Europe (Balkans); England, 1485-1763; England since 1763; the British Empire; the Near East, 500-1500; the Near East since 1500; ancient Near East; Armenian; survey of African history; topics in African history (preferably on a regional basis); history of science to 1600; history of science since 1600; Europe, Renaissance-Reformation; Europe, Renaissance to the French Revolution; Europe since 1740; European socioeconomic history; European intellectual and cultural history; psychohistory; China, 900-1800; China since 1800; modern Japan; South Asia; Southeast Asia; Latin America, 1492-1830; Latin America since 1759; history of religions; Jewish history; history of Christianity; comparative history; U.S.: (1) mastery of the general field of U.S. history sufficient to teach a college-level survey course and (2) a specialized field selected from the following: Afro-American, American diplomatic, American West, American Indian, California, history of the South, Civil War and Reconstruction, Colonial, cultural, economic, immigration, intellectual, Jeffersonian and Jacksonian American (1800-1850), labor, Mexican-American, social, the new nation (1763-1800), 20th century, urban, women's history. Both the general and a specialized field must be offered by specialists in U.S. history, and only two fields in U.S. history are permitted. Either field 1 or 2 both may be selected as minor fields for the Ph.D.

Candidates offering a field in comparative history as a fourth field for the Ph.D. degree should select a topic for comparison which would usually coincide with time-area spans of the other three fields defined for the Ph.D. qualifying examinations.

Candidates in the history of science program must select three of the above fields and either the history of medicine or an allied field. All candidates may offer for examination an approved allied field outside the Department of History.

Foreign Language Requirement
Foreign language requirements vary according to the major field, although reading knowledge of the prescribed language(s) (one for U.S. history students, at least two for all others) is required. For details, consult the Program Requirements for UCLA Graduate Degrees, 1988-89: Department of History or your graduate adviser.

Course Requirements
You must meet (1) the special requirements for admission listed above and (2) the general requirements set forth under the Graduate Division. A program, extending over the full time of study, must be approved by the department. You are required to complete at least one continuing two- or three-quarter seminar or, alternatively, a continuing sequence of at least two graduate courses approved by the graduate guidance and curriculum committee, which results in a substantial research paper based at least in part on primary sources. If this requirement is met entirely or in part by a sequence of directed study courses (History 596), you must take the course(s) for a letter grade. Students in U.S. history should complete course 245. Students in European history must complete course 225, and students in African history must complete course 275 unless exempt by special petition. Courses taken to fulfill M.A. degree requirements may also be used to satisfy Ph.D. requirements.

Teaching Experience
The department cannot provide teaching experience for all Ph.D. candidates and cannot therefore require it for the degree. You should, however, be able to demonstrate ability to give instruction in your field.
Qualifying Examinations

Full-time graduate students must schedule the written part of the examination by the end of the ninth quarter of graduate work. The written examination includes the major field only, is normally prepared and administered by the chair of your doctoral committee, and is read by the entire committee before you take the oral qualifying examination. The members of the doctoral committee determine whether or not an examination may be repeated (normally only once).

The written examination must be passed and a dissertation prospectus (approved by the doctoral committee chair) must be written before taking the University Oral Qualifying Examination. In the oral examination you are examined in four fields, one of which may be an approved allied field. You should select fields in consultation with your faculty sponsor and must receive the department's approval of all four fields. If you fail the oral qualifying examination, you may repeat it once (normally within a period of six months) with the consent of the doctoral committee. After passing the oral qualifying examination, you are advanced to candidacy and may begin work on the dissertation.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

If required by the qualifying examination committee, a final oral examination is conducted after completion of the dissertation to cover the field within which the dissertation was written. After approving a dissertation, the chair of the doctoral committee may, with the unanimous consent of the entire committee, recommend a waiver of the final oral examination.

Lower Division Courses

1A-1B-1C. Introduction to Western Civilization. Lecture, two hours; discussion, two hours. A broad, historical survey of major elements in Western heritage from the Greeks to that of the 20th century. Designed to further beginning students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest. 1A. Ancient Civilizations from Prehistory to ca. A.D. 943; 1B. Circa A.D. 943 to ca. 1715; 1C. Circa 1715 to the Present.

1A-1B-1CH. Introduction to Western Civilization (Honors). Lecture, two hours; discussion, two hours. An honors sequence parallel to courses 1A-1B-1C.

2. History of Technology from Antiquity to the 20th Century. Lecture, three hours. Designed for students in the natural sciences, social sciences, and fine arts. A survey of the development of man's ability to understand more fully and to utilize more efficiently the natural environment, stressing technology's changing social, economic, scientific, and cultural relations.

3A-3B-3C. Introduction to the History of Science. Lecture, three hours; discussion, two hours. History majors may not apply these courses on the science major.

3A. The Scientific Revolution. A survey of the beginnings of the physical sciences involving the transformation from Aristotelian to Newtonian cosmology, the mechanization of the natural world, the rise of experimental science, and the origin of scientific sociability.

Mr. Wise

3B. Physical Sciences since the Enlightenment. A broad survey of the development of ideas in classical and modern physical science since Newton. Theories of matter, but mostly specifically chemistry, thermodynamics, electromagnetic theory of light, energy conservation, relativity, and quantum mechanics.

Mr. Wise

3C. Biological Sciences, 1800-1955. A survey of the development of the biological sciences from the period of Bichat and Müller to the discovery of the double helix.

Mr. Frank

4. Introduction to the History of Religions. Lecture, three hours; discussion, two hours. A discussion of the various systems, ideas, and fashions of thought that have dominated Western approaches to the religions of the world since antiquity. Survey of the development from classical Greek and early Christian theorems to modern history with its discoveries of the religions of India, China, the ancient Near East, etc., and the problem of the encounter of various religions in the 19th and 20th centuries.

Mr. Boileau

5A-5B. Survey of British History. Lecture, three hours; discussion, two hours. Designed for students wanting a general orientation to British history and those in English literature and prelaw. A survey of the history of England and (after the union between England and Scotland) Great Britain, 5A. The Middle Ages to the Glorious Revolution in 1688; 5B. 1688 to the 20th Century.

Mr. Urndank, Mr. Waugh

6A-6B-6C. History of the American Peoples. Lecture, two hours; discussion, two hours. A survey of the American peoples from the advent of aboriginal society to the present, emphasizing racial and ethnic interaction, industrialization, urbanization, and cultural change.

6A. To 1800; 6B. 1800 to 1900; 6C. 1900 to the Present.

Mr. Appleby, Mr. Nash, Mr. Saxon

6BH. History of the American Peoples (Honors). Lecture, two hours; discussion, two hours. A survey of the American peoples from the advent of aboriginal society to the present, emphasizing racial and ethnic interaction, industrialization, urbanization, and cultural change.

Mr. Monkkonen

7A-7B. Survey of the Political History of the U.S. Lecture, two hours; discussion, two hours. This sequence (or two quarters of course 6) is strongly recommended for history majors planning to take more advanced courses in U.S. history. Designed for students in the social sciences and other departments who desire a thorough grounding in American political history. A survey of the history of the U.S. from the Revolutionary era to the present. Emphasis on political developments and the social, cultural, and economic bases of American politics. 7A. To 1776; 7B. 1776 to the Present.

Ms. Appleby, Mr. Gatell, Mr. Howe, Mr. Saxton

8A. Latin America: Reform and Revolution. Lecture, three hours; discussion, two hours. A general introduction to Latin America emphasizing those institutions from the past which have shaped the present and the struggle for change in the 20th century. Movies and discussions complement the topical lectures.

Mr. E.B. Burns and the Staff

8B. Latin American Social History. Lecture, three hours; discussion, two hours. Course 8A is not a prerequisite to 8B. The historical and contemporary perspectives of ordinary people in Latin American society. Each lecture/film session centers on a major Latin American movie illustrative of a theme in social history.

Mr. E.B. Burns and the Staff

8C. Central America: The Struggle for Change. Lecture, three hours; discussion, two hours. The economic growth and accompanying dependency of Central America from independence until the Great Depression and the turbulent consequences of that combination from 1930 to the present. Attention to the common characteristics of the five nations, as well as their individuality.

Mr. E.B. Burns

9A-9D. Introduction to Asian Civilizations

9A. History of India. Lecture, three hours; discussion, two hours. An introduction to the history of the Muslim world from the spread of Islam to the present day.

Mr. Marston

10A-10B. Introduction to the Civilizations of Africa. Lecture, three hours; discussion, two hours. Intended for students with a general interest in Africa, but also strongly recommended for those intending to take upper division courses in African history. Exploration of African cultures on a thematic basis within a wider framework of political change over time.

11A-11B. History of China. Lecture, three hours; discussion, two hours.

11A. To 1000. Survey of the early history of China — the genesis of characteristic Chinese institutions and modes of thought from antiquity to 1000. Focus on social, political, intellectual, and economic aspects of the early and middle empires.

Mr. Elman, Mr. von Glahn

11B. 1000 to 1900. Survey of the later history of China — the evolution of characteristic Chinese institutions and modes of thought from 1000 to 1900. Focus on social, political, intellectual, and economic aspects of the late empires and the rise of modern China in the contemporary era.

Mr. Elman, Mr. von Glahn

11A-11BH. History of China (Honors). Lecture, three hours; discussion, two hours. An honors sequence parallel to courses 11A-11B.

Mr. Elman, Mr. von Glahn

M70. Survey of Medieval Greek Culture. (Same as Classics M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and continuity to the Renaissance (including the discovery of America).

Mr. Dyck

88A-88U. Lower Division Seminars (5 units each), Seminar, three hours. Prerequisite: freshman or sophomore standing. Limited to 15 students. Open to non-major history majors. Readings, discussions, papers. Sign-ups and descriptions of offerings each quarter are available in the Provost's office (6248 Bunche Hall). Ten units may be taken for credit.

88A. Ancient Greece; 88B. Ancient Rome; 88C. Medieval; 88D. Early Modern Europe; 88E. Modern Europe; 88F. Mediterranean; 88G. Britain; 88H. Britain; 88I. U.S.; 88J. Latin America; 88K. Near East; 88L. India; 88M. Japan; 88N. Africa; 88O. Science/Technology; 88P. History of Reformation; 88Q. Theory of History; 88R. Jewish History; 88S. Armenia and the Caucasus; 88T. Southeast Asia; 88U. Psychohistory.
97H. Three Trials. (Formerly numbered 98H-7.) Discussion, three hours. Prerequisite: consent of instructor. Limited to 20 students. An intensive study of three trials, each of which led to the execution of the accused: Socrates, Jesus of Nazareth, and Joan of Arc. View of each trial as a conflict between legitimate but irreconcilable interests and world views. For each trial, the class constitutes itself as a court (prosecution, defense, jury) and reviews the verdict of the original trial.
  Mr. Benson

Upper Division Courses

Prerequisite for all upper division courses is upper division standing and consent of instructor, unless otherwise stated. Certain graduate courses (200 series) are open to students with upper division standing and consent of instructor.

100. History and Historians. Lecture, three hours. A study of historiography, including the intellectual processes by which history is written, the results of these processes, and the sources and development of history. Attention also to representative historians.
  Mr. Reill

101. Introduction to Historical Practice. Seminar, three hours. Limited to juniors and seniors. Discussion classes of no more than 15 students meeting with a faculty member. Exploration of how works of history are written, with emphasis on problems of historiography and method.

101H. Introduction to Historical Practice (Honors). Seminar, three hours. Limited to juniors and seniors in the history honors program. Discussion classes of no more than 15 students meeting with a faculty member. Emphasis on problems in the philosophy of history, historiography, and historical method.

102. Explorations in Psychoanalysis and History. Lecture, three hours. The art of psychological and historical interpretation; assessment of recent writings in the field of psychohistory.
  Mr. Lowenberg, Mr. Wohl

M103. Historical Archaeology. (Same as Anthropology M115S.) A survey of the aims and methods of historical archaeology as practiced on both sides of the Atlantic, with case studies from North America, the Caribbean, Africa, and Europe.
  Mr. Posansky

M104A-M104B. Ancient Egyptian Civilization. (Same as Ancient Near East M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. The political and cultural institutions of ancient Egypt and the ideas on which they were based.

M104A. Chronological discussion of prehistory, the Old and Middle Kingdoms. M104B. The New Kingdom and the Late period until 332 B.C. (Alternate years)

105. History of Ancient Mesopotamia and Syria. Lecture, three hours. The political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period.
  Mr. Buccellati

106A-106B-106C. Survey of the Middle East from 3000 to the Present. Lecture, three hours. Background and circumstances of the rise of Islam, the creation of the Islamic Empire, and its development. The rise of Dynastic Successor States and the Modern Nation States. Social, intellectual, political, and economic development:
  106A. 500 to 1300. Mr. Morony
  106B. 1300 to 1700. Ms. Marsot
  106C. 1700 to the Present. Ms. Keddie

107A-107B. Islamic Civilization. Lecture, three hours. Emphasis on key figures, developments, and institutions.

107A. Premodern Islam. Origins of Islamic civilization, Muhammad and the Quran; development of Islamic doctrine, ritual, piety and law, sectarianism, and mysticism.
  Mr. Morony

  Ms. Keddie, Ms. Marsot

108A-108B. History of the Arabs. Lecture, three hours. Course 108A is prerequisite to 108B. Political, social, intellectual, and economic history of the Arabs from the 3rd century to the present.
  Mr. Marsot

109A. To 1578. Mr. Morony

109B. 1578 to the Present. Ms. Marsot

110A-110B. Iranian History. Lecture, three hours. Political, social, and cultural history of Persia:

110A. Islamic Iran to 1800. Mr. Banani

110B. Iran from 1800 to the Present. Ms. Keddie

111A-111B. History of the Turks. Lecture, three hours. A preliminary introduction to the history of the Ottoman Empire, 1300-1923. The religious experience of Christians - conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. The religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders.
  Mr. Lowenberg

121A-121B. Medieval Europe. Lecture, three hours. Survey of the Church and Religion in the Early Middle Ages.
  Mr. R.I. Burns

122A-122B. Byzantine Civilization. Lecture, three hours. The history and institutions of the Church from the 5th to the 11th century; the religious experience of Christians - conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. The religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders.
  Mr. Chamber, Mr. Mellor

123A-123B. Byzantine History. Lecture, three hours. Historical and institutional questions of authority on the eve of the Reformation.
  Mr. Lowenberg

124A-124B. Islamic Civilization. Lecture, three hours. The religious experience of Christians - conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. The religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders.
  Mr. Mellor

125A-125F. Modern History. Lecture, three hours. The history and institutions of the Church in the modern world.

125A. Renaissance: Power and Culture in the Italian Renaissance. Lecture, three hours. The political, economic, social, and cultural history of Italy from the 13th to the 16th century. The rise of nationalism and the decline of the papacy;
  Mr. Mellor

125B. The Reformation. Lecture, three hours. The political, economic, social, and cultural history of Europe from the 16th to the 18th century. The rise of nationalism and the decline of the papacy.
  Mr. Mellor

125C. The Enlightenment. Lecture, three hours. The political, economic, social, and cultural history of Europe from the 18th to the 19th century. The rise of nationalism and the decline of the papacy.
  Mr. Mellor

125D. The French Revolution. Lecture, three hours. The political, economic, social, and cultural history of Europe from the 18th to the 19th century. The rise of nationalism and the decline of the papacy.
  Mr. Mellor

125E. The American Revolution. Lecture, three hours. The political, economic, social, and cultural history of Europe from the 18th to the 19th century. The rise of nationalism and the decline of the papacy.
  Mr. Mellor

125F. The Industrial Revolution. Lecture, three hours. The political, economic, social, and cultural history of Europe from the 18th to the 19th century. The rise of nationalism and the decline of the papacy.
  Mr. Mellor

126A-126B. History of the Modern World. Lecture, three hours. The political, economic, social, and cultural history of the world from the 19th to the 20th century. The rise of nationalism and the decline of the papacy.
  Mr. Mellor
125C. Absolutism and Enlightenment: Europe under the Old Regime. State, society, and culture in Europe from the mid-17th century until the eve of the French Revolution.

Mr. Reill, Mr. Silverman

Mr. Loewenberg, Mr. Wohl

125F. Europe, 1939 to the Present. The Second World War and its legacy. Collaboration and resistance during World War II. The breakup of the Grand Alliance, the Eastern European revolution, and the restructuring of Western Europe. The trauma of decolonization. De-Stalinization and its limits. Europe in an integration, the new society, and the political configurations of contemporary Europe. Mr. Wohl

126A-126E. Cultural and Intellectual History of Modern Europe. Lecture, three hours. Climates of taste and climates of opinion. Educational, moral, and religious attitudes; the art, thought, and manners of the time in a historical context.

126A. 16th Century. Mr. Clasen

126B. 17th Century. Mr. Funkenstein

126C. 18th Century. Mr. Reill

126D. 19th Century. Mr. Loewenberg, Mr. Weber

126E. 20th Century. Mr. Loewenberg, Mr. Weber, Mr. Wohl

127A-127B. War and Diplomacy in Europe. Lecture, three hours:

127A. 1650 to 1815. Survey of military and diplomatic history, seen in relation to social and economic developments and the growth of the state.

127B. 1815 to 1945. The balance of power; the international system, and its role.

Mr. Symcox

128A-128C. History of France. (Formerly numbered 128A-128B.) Lecture, three hours:

128A. France, 1500-1715. Social history of 16th- and 17th-century France; growth of the state; wars of religion; peasant uprisings; popular culture; Catholic resurgence; Louis XIV and achievements in arts and literature.

Ms. Norberg

128B. France, 1715-1771. "Ancien Régime" and the time of revolutions. Critical discourse leading to the French Revolution, the collapse of the state, the Napoleonic era, the reconstruction of society through the monarchy and revolutions of the 19th century.

Mr. Berenson

128C. The Making of Modern France, 1871 to the Present. From oligarchy to democratic bureaucracy in two wars and three republics. Mr. Weber

129A-129B-129C. History of Modern Germany and Austria. Lecture, three hours:

129A. 1500 to 1648. The political structure of empire and territories, the economy, social classes, daily life, book publishing and universities, the Reformation and Counter Reformation, the Thirty Years' War, military entrepreneurship, population losses, the Peace of Westphalia.

Mr. Clasen

129B. 1648 to 1848. Survey of social, economic, cultural, and political history. Including the rise of absolutist and bureaucratic government, Enlightenment and revolution, the French Revolution and the German reform movement. Revolution and Metternichian reaction, the rise of Romanticism, and the causes and failure of the Revolutions of 1848.

Mr. Reill

129C. 1848 to the Present. Revolutions of 1848, Russian constitutional struggle, German unification, the Bismarckian and Wilhelmine state and society, the Ausgleich in Austria, liberalism, industrialism, anti-Semitism, social democracy, the World Wars, revolutions, republics, Fascism and Nazism, occupation, and the Austrian, German Federal, and German Democratic Republics.

Mr. Loewenberg

130A-130B-130C. Europe in the Age of Revolution, 1750-1850. Lecture, three hours:

Mr. Symcox

130B. Crisis of the Old Regime and the Revolution. The revolution in France, 1787-1799. Spread of revolution to other parts of Europe and varying responses. The impact of war on revolutionary France after 1792 and the spread of the revolution by military force. Jacobinism in France and outside. Parallel movements abroad (e.g., Ireland, Haiti, Poland). Satellite regimes 1792-1799.

Mr. Symcox

130C. Napoleonic Europe and the Restoration. Napoleon's ascendancy in France from 1799: internal effects. Restructuring of Europe under Napoleon and the nationalist revolution in Spain and Italy. Political and social change in Britain: Anglo-French world rivalry to 1815. The restoration: what could be restored and what could not. Rising national consciousness against Metternich's system. The continuing revolutionary tradition: 1821, 1830, 1848. Romanticism at its apotheosis: conclusion: how the world of 1850 differed from that of 1750.

Mr. Symcox

131A-131D. History of Russia. Lecture, three hours:

131A. From the Origins to the Rise of Muscovy. "Ancien Régime" and the time of revolutions. Critical discourse leading to the French Revolution, the collapse of the state, the Napoleonic era, the reconstruction of society through the monarchy and revolutions of the 19th century.

Mr. Rogger

131B. Imperial Russia from Peter the Great to Nicholas II. Westernization of state and society; centralization at home and expansion abroad; the peasant problem; beginnings of industrialization: movements of political and social protest; the non-Russian peoples; political reforms and social changes; the Revolution of 1905; Russia in World War I; the fall of the old regime.

Mr. Rogger

131C. Revolutionary Russia and the Soviet Union. The Revolutions of 1917, Civil War, consolidation of the national revolution; industrial and political change in Britain: Anglo-French world rivalry to 1815. The restoration: what could be restored and what could not. Rising national consciousness against Metternich's system. The continuing revolutionary tradition: 1821, 1830, 1848. Romanticism at its apotheosis: conclusion: how the world of 1850 differed from that of 1750.

Mr. Symcox

131D. Intellectual History. Social thought and movements in modern Russia, late 18th to early 20th century.

Mr. Rogger

131E. Science, Technology, and Soviet Society. Lecture, three hours. Designed for nonscientists and nontechnical specialists. Examination of the role of science and technology in Soviet history since 1917. Analysis of the institutional structure, problems faced by professionals, their relationship to the political elite and the general population.

Mr. Bailes

132A-132B. History of Italy. Lecture, three hours:

132A. 1559 to 1871. "Ancien Régime" and the time of revolutions. Critical discourse leading to the French Revolution, the collapse of the state, the Napoleonic era, the reconstruction of society through the monarchy and revolutions of the 19th century.

Mr. Symcox

132B. 1848 to the Present. Political, economic, social, diplomatic, and ideological developments.

Mr. Wohl
141A-141B. History of Britain. Lecture, three hours. Analyses of the British economy, society, and polity, focusing on the dynamics of both stability and change.

141A. Tudor-Stuart Times, 1485-1660. (Formerly numbered 140A-140B.) Mr. Brenner, Mr. Martines

141B. Early Modern Times, 1660-1800. (Formerly numbered 141A.) Mr. Brenner

141C. Modern Britain since 1832. (Formerly numbered 141B.) Mr. Urdank

142A-142B. British Empire since 1783. Lecture, three hours. The political and economic development of the British Empire, including the evolution of colonial nationalism, the development of the commonwealth idea, and changes in British colonial policy. Mr. SarDesai

143. History of Canada. Lecture, three hours. A survey of the growth of Canada into a modern state from its beginnings under the French and British colonial empires.

144. History of Australasia. Lecture, three hours. The history of Australia and New Zealand from the European settlement of the continent to the present. Mr. Laslett

145A. Colonial America, 1600-1763. Lecture, three hours. An examination of the molding of an American society in English North America from 1600 to 1763. Emphasis on the interaction of three converging cultures: Western European, West African, and American Indian. Mr. Appleby, Ms. Bloch, Mr. Nash

145B. Revolutionary America, 1760-1800. Lecture, three hours. An inquiry into the origins and consequences of the American Revolution, the nature of the revolutionary process, the creation of a constitutional national government, and the development of a capitalistic economy. Ms. Appleby, Ms. Bloch, Mr. Nash

146A-146B. U.S., 1800-1850. Lecture, three hours.

146A. Jeffersonian America. Jeffersonian Republican ascendancy and the Era of Good Feelings, 1800-1828; disintegration of the Federalist opposition; the testing of American nationality in the second war with Britain; beginnings of the transportation and industrial revolutions; restructuring of politics in an increasingly urban nation. Mr. Appleby, Ms. Bloch, Mr. Nash

146B. Jacksonian America and Beyond. The "Jacksonian Revolution" and its aftermath, 1825-1850; the problem of national power versus state sovereignty; problems of rapid social change through industrialization and urbanization; reform and antireform, antislavery movements; territorial expansion as focus for sectional rivalry. Mr. Gatell, Mr. Howe

147A. U.S.: Civil War and Reconstruction. Lecture, three hours. The rise of sectionalism, the antislavery crusade; the formation of the Confederate States; the war years; political and social reconstruction. Mr. Howe

147B. U.S., 1875-1900. Lecture, three hours. American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of the role of government and the responses to that alteration. Mr. Saxton

148A-148B. U.S.: The 20th Century. Lecture, three hours. The political, economic, intellectual, and cultural aspects of American democracy in the 20th century. Mr. Coben, Mr. Schulman, Mr. Weiss

148C. U.S. since 1945. Lecture, three hours. A history of the political, social, and diplomatic developments that have shaped the U.S. since 1945. Mr. Dallek, Mr. Weiss

149A-149B. American Economic History. Lecture, three hours.

149A. 1790 to 1910. The roles of economic forces, interests among individuals, and groups in promoting or impeding effective change in the American economy, 1790-1910. During this period the technical skeleton of the modern industrial structure was formed. Why and how the American economy evolved into a dual economy, characterized by a center of firms large in size and influence and a periphery of smaller firms. Ms. Yeager

149B. 1910 to the Present. The dynamics of change in the dual economy, focusing in greater detail on interrelationships between macro and micro developments in the economy and on the growing interdependence between the U.S. and the world economy, 1910 to the present. Ms. Yeager

150A-150B. Intellectual History of the U.S. Lecture, three hours. The principal ideas about humanity and God, nature and society, which have been at work in American history. The sources of these ideas, their conceptions, with one another; their relationship to American life, and their expression in great documents of American thought. Mr. Howe

150C. History of Religion in the U.S. Lecture, three hours. Consideration of the religious dimension of people's experience in the U.S. Examinations of a number of religious traditions which have been important in this country, with emphasis on relating developments in religion to other aspects of American culture. Mr. Howe

151A-151B. Constitutional History of the U.S. Lecture, three hours:

151B. Constitutionalism since the Civil War. Particular emphasis on the development of the Supreme Court, the due process revolution, the Court and political questions, and the fact of judicial supremacy within self-prescribed limits.

152A-152B. American Diplomatic History. Lecture, three hours:

152A. The establishment of an independent foreign policy, the territorial expansion of the U.S., and the emergence of a world power. Mr. Dallek

152B. Role of the U.S. in the 20th-Century World. Mr. Dallek

152BH. American Diplomatic History (Honors). Lecture, three hours; discussion, one hour. Greater role of the U.S. in the 20th-century world. Mr. Dallek

153. The U.S. and the Philippines. Lecture, three hours. Recommended: knowledge of Southeast Asian or U.S. history, or both. An examination of the interrelationships of immigration and of colonialism and independence between the U.S. and the Philippines, focused mainly within the time period from 1898 to the present. Mr. Saxton

154A-154B. U.S. Urban History. Lecture, three hours:

154A. U.S. Cities: An Overview. The demographic, geographic, political, economic, and social development of U.S. cities in relation to broad trends in U.S. history as well as to their own more special histories. Emphasis on a mastery of facts and chronology, and an awareness of major theoretical issues and fundamental concepts in urban history. Mr. Monkkonen

154B. Topics in U.S. Urban History. Prerequisite: course 154A. Exploration of one aspect of U.S. urban history in depth without the incurring some of the usual problems inherent in writing a book or an article. Topics include crime and police, urban economics, and urban government. Students do primary research papers based on local materials in addition to written examinations. Mr. Monkkonen

154C-154D. History of American Architecture and Urban Planning, 1600 to the Present. Lecture, three hours. Aspects of American cultural history as explored through architecture, urban planning, landscape, and the allied arts, with emphasis on the development of an architectural consciousness in America, ways in which the built environment has affected its users and observers, and the extent to which it has reflected their values and ways of living. 154C. 1600 to 1890; 154D. 1890 to the Present. Mr. Hines

155A-155B. American Working Class Movements. Lecture, three hours. Major episodes in the social, trade union, and cultural history of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor; the history of the Knights of Labor, the A.F. of L. and the C.I.O., and the development of labor politics. Mr. Laslett

156A-156B. American Social History, 1750-1960. Lecture, three hours. A historical analysis of American society and culture, with emphasis on the family, religious values, Afro-American life, women's work, urbanization and industrialization, immigration and nativism, and movements for social reform. 156A. 1750 to 1860; 156B. 1860 to 1960. Mr. Dallek

156C-156E. Social History of American Women. Lecture, three hours. A survey of the major demographic, economic, social, and intellectual factors shaping the lives of women in families, at work, and in larger social activities. Emphasis on class, regional, racial, and ethnic contexts. 156C. Colonial and Early National, 1600-1820; 156D. Victorian and Industrial, 1820-1920; 156E. 20th Century, 1900-1975. Mr. Matsumoto

157A-157B. North American Indian History. Formerly numbered 157A-157B-157C.) Lecture, three hours. History of Native Americans from contact to the present, with emphasis on the historical dimensions of culture change, Indian political processes, and the continuity of Native American cultures. Focus on selected Indian peoples in each period. 157A. Precontact to 1830; 157B. 1830 to the Present.

158A. Comparative Striary Systems. (Formerly numbered 158A.) (Same as Afro-American Studies M158A.) Lecture, three hours. An examination of the slavery experience in various New World slave societies, with emphasis on outlining the similarities and the differences among the legal status, treatment, and slave rebellions, and Latin American slave societies. Mr. Laslett

158B-158C. Introductory to Afro-American History. (Formerly numbered 158B-158C.) (Same as Afro-American Studies M158B-158C.) Lecture, three hours. A survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: the transition from Africa to New World slavery, the transition from slavery to freedom, and the transition from rural to urban milieu. Mr. Hill

158D. Afro-American Urban History. Lecture, three hours. An examination of Afro-American urban life prior to 1945, with emphasis on the transformation from slavery to freedom and the shift from Southern to Northern areas. The forces which both propelled Afro-Americans to the cities and which also inhibited their adjustment to them.

158E. Afro-American Nationalism in the First Half of the 20th Century. Lecture, three hours. A critical examination of the Afro-American search in the first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. Mr. Hill
M159A. History of the Chicano Peoples. (Same as Chicano Studies M159A.) Lecture, three hours. A survey lecture course on the historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides an integrated understanding of change over time in the Mexican community by inquiry into the major transformative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper. Mr. Gómez-Quírones

M159B. History of the Chicano Peoples. (Same as Chicano Studies M159B.) Lecture, three hours. A survey lecture course on the historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides an integrated understanding of change over time in the Mexican community by inquiry into the major transformative historical and policy issues affecting the community. Social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper. Mr. Gómez-Quírones

162. American West. Lecture, three hours. A study of the politically troubling question of entry into the U.S. by immigrants ineligible for citizenship and their children in American history.

163. History of California. Lecture, three hours. The economic, social, intellectual, and political development of California from the earliest times to the present. Mr. Hundleby

165A-165B. Colonial Latin America. Lecture, three hours. Studies in the general development of Latin America prior to 1825, with emphasis on social history.

165C. Indians of Colonial Mexico. Lecture, three hours. A survey of the social and cultural history of the Indians of Mexico, especially central Mexico, from the time of the European conquest until Mexican independence, emphasizing an internal view of Indian groupings and patterns on the basis of records published by the Indians themselves.

166. Latin America in the 19th Century. Lecture, three hours. An intensive analysis of the economic, social, and political problems of the Latin American nations from their independence to around 1910. Mr. E.B. Burns, Mr. Burr

167A-167D. Latin America in the 20th Century. (Formerly numbered 167A-167B-167C.) Lecture, three hours. Experiments in national development analyzed to relate the timing of social changes to economic, political, cultural, and geographic context. Successive country case studies each focus on world pressures and interplay of overlapping themes: the struggle between centralized and decentralized government agencies (emphasized in course 167A), the role of personalized leaders (emphasized in course 167B), definition of the national polity (emphasized in course 167C), and "leftist" and "liberal" models of development (emphasized in course 167D). Mexico is treated in course 167I. Within each course, country studies are according to the chronological contributions to the theme emphasized. 167A. Haiti, Uruguay, Costa Rica, Cuba, Chile; 167B. Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; 167C. Panama, Colombia, Ecuador, Honduras, El Salvador; 167D. Brazil, Guatemala, Peru, Nicaragua. Mr. Wilkie

168. History of Latin American International Relations. Lecture, three hours. Emphasis on the Latin American nations in their relationship with one another and with other peoples of the world, beginning with 19th-century independence.

169. Latin American Elitelore. Lecture, three hours. Prerequisite: course 167A, 167B, 167C, or 171. Elitelore (defined as oral or noninstitutionalized knowledge involving the leaders' conceptual and perceptual life history views) in contrast to folklore (the followers' traditional or popular views). Elitelore genres include oral history, literature, and cinema.

170A. Latin American Cultural History. Lecture, three hours. Intellectual, artistic, and folk expressions of the Latin American spirit and character examined in relation to geographic and temporal vantage points. Comparison of published works to photographic series to analyze the great variety of geographic regions, peoples, customs, occupations, dress, food, architecture, and transportation in the 20 countries of the area.

170B. Classic Travel Accounts of Latin America since 1600. Lecture, three hours. Recommended for prospective researchers before they select their region of study. Introduction to "enlightened traveler" accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Mr. E.B. Burns, Mr. Wilkie

171. Mexican Revolution since 1910. Lecture, three hours. Examination of the concept of "permanent crisis" to describe and explain the structure of "permanent revolution" under "one-party democracy." Analysis of unresolved colonial and 19th-century problems and crises that have influenced modern-day Mexico, if in modified form.

173. Modern Brazil. Lecture, three hours. Selected topics in the political, economic, social, and cultural development of Brazil, with emphasis on modernization and the struggle for change. 1850 to the present. Discussions, films, slides, and guest speakers supplement and complement the lectures.

174. Brazilian Intellectual History. Lecture, three hours. The general intellectual development of Brazil, with emphasis on those introspective movements in which the Brazilians attempted to interpret themselves, their nation, and their civilization.

175A-175Z. Topics in American History. Lecture, three hours. Prerequisite: one prior course in American history. Elitelore and/or minority expression is the defining characteristic of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis.

175A. Prehistoric America - Technological and Cultural Traditions. A survey of the nondocumentary sources of early Latin American history, with particular reference to technological, economic, and cultural development from the origins of Man until the colonial period. Mr. Posansky

175B. Africa and the Slave Trade. The social, economic, political, and cultural impact of the slave trade on African society, with emphasis on the Atlantic trade without neglecting those of the ancient Mediterranean, Islamic, and Indian Ocean worlds. Abolition and the African diaspora.

Mr. Alpers, Mr. Obichere

175C. Africa in the Age of Imperialism. Topics include the penetration of pre-capitalist social formations by the capitalist, the emergence of classes, the nature of the colonial and postcolonial state, and the struggle for national liberation in a global context.

Mr. Alpers, Mr. Obichere

175E. Africa from 1945 to the Present. History of Africa south of the Sahara from the end of World War II to the present. The last phases of colonial rule in Africa, African nationalism, Pan-Africanism, liberation movements, and the achievement of independence. Political, social, and economic change in the colonies and in the independent states of Africa. Neocolonialism, ex-colonialists in national development, apartheid in South Africa, ideological conflict in contemporary Africa, and Africa in world affairs since 1957. Mr. Obichere

176A-176B. History of West Africa. Lecture, three hours:

176A. West Africa from Earliest Times to 1800. Mr. Obichere, Mr. Posansky

176B. West Africa since 1800. Mr. Obichere

176C. Social and Economic History of West Africa since 1600. Lecture, three hours. An analysis of the many factors that have affected the social, cultural, and economic history of Africa since the fall of the Songhai Empire, with emphasis on the family, religious values, education, urbanization, migrations, the arts, slavery, and the slave trade. The roles of economic forces and institutions in promoting or inhibiting economic change in West Africa; ethnic diversity and socio-political integration; colonial economic systems and the efforts at economic planning and development since the 1950s. Mr. Obichere

Mr. Alpers, Mr. Ehret

178A-178B. History of Eastern Africa. Lecture, three hours:

178A. The cultural diversity of Eastern African societies, the growth of more complex political systems, and the impact of international trade to the later 19th century.

Mr. Alpers, Mr. Ehret, Mr. Posansky

178B. The economic, social, and political history of Eastern Africa since the imposition of colonial rule, with emphasis on underdevelopment and protest.

Mr. Alpers, Mr. Ehret, Mr. Posansky

179A-179B. History of Southern Africa. Lecture, three hours:

179A. From the Origins to 1870. The origins of the Southern African peoples and their interactions to 1870. Attention to social and economic as well as political aspects.

Mr. Alpers, Mr. Posansky

179B. Since 1870. The interactions between the inhabitants of Southern Africa since 1870. Attention to social and economic as well as political aspects.

Mr. Obichere

182A-182B. Thought and Society in China. (Not the same as courses 182A-182B prior to Fall Quarter 1988.) Lecture, three hours:

182A. To 1000. Recommended prerequisite: course 115. Elitelore and/or minority expression is the defining characteristic of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis.

182B. To 1000. Elitelore and/or minority expression is the defining characteristic of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis.

Mr. Elman, Mr. von Glahn
182B. Since 1000. Recommended prerequisite: course 11B or equivalent. Elite and popular expres-
sions of Chinese cultural life from 1000 to the 20th-
century. Emphasis on the social, political, and eco-
nomic conditions within which Chinese orthodox and heterodox values evolved and changed. Evaluation of conceptions of Chinese intellectual life in the 20th-
century in light of earlier currents of thought.

Mr. Elman

183A-183B. Society and Economy In China. (Not the same as course 183 prior to Fall Quarter 1988.) Lecture, three hours.

183A. To 1500. Recommended prerequisite: course 11A or equivalent. Survey of the main features of Chinese society and economy in the premodern era, with emphasis on the interplay of economic forces, ideas, and social and political developments within the structure of the imperial state; the medieval economic revolution; gentry society. Mr. Huang, Mr. von Glahn

183B. Since 1500. Recommended prerequisite: course 11B or equivalent. Social-economic change and involution of the late imperial period in compara-
tive perspective; the Western impact and Chinese development and underdevelopment; change and con-
tinuity in revolutionary China.

Mr. Huang, Mr. von Glahn

184, 20th-Century China. (Not the same as course 184 prior to Fall Quarter 1988.) Lecture, three hours. Recommended prerequisite: course 11B or equivalent. Political events and intellectual developments seen in the context of the interrelationships of human agency, structural change, and historical conjunc-
tures in the 20th century. Mr. Huang, Mr. von Glahn

187A-187B-187C. Japanese History. Lecture, three hours. The political, economic, and cultural develop-
ment of Japan from prehistory to the present. 187A. Ancient: Prehistory to 1600; 187B. Early Modern: 1600 to 1868; 187C. Modern: 1868 to the Present.

Mr. Nishihara, Mr. Ooms

188A. Early History of India. Lecture, three hours. Introduction to the civilization and institutions of In-
dia. A survey of the history and culture of the South Asian subcontinent from the earliest times to the
foundation of the Mughal Empire.

Mr. Wolgert

188B. Recent History of India and Pakistan. Lecture, three hours. History of the South Asian subconti-
inent from the founding of the Mughal Empire through the era of European expansion, British rule, and
the national movement to the present.

Mr. Wolgert

190A-190B. History of Southeast Asia. Lecture, three hours:

190A. Early History of Southeast Asia. A political and cultural history of the peoples of Southeast Asia from the earliest times to about 1400 AD. Mr. DasSai

190B. Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on the expansion of Euro-
pean influence in the political and economic spheres, growth of nationalism, and the process of decoloniza-
tion.

Mr. SatDevi

M191A-M191B. Survey of Jewish History. (Same as Jewish Studies M191A-M191B.) Lecture, three hours. A survey of social, political, and religious de-
velopments. M191A. From Biblical Times to the End of the Middle Ages. M191B. From the End of the Middle Ages to the Present.

Mr. Funkenstein, Mr. Zipperstein

M191C-M191D. Focal Themes in Jewish History. (Same as Jewish Studies M191C-M191D.) Lecture, three hours. A treatment of selected movements in Jewish history (such as the history of Messianic Movements, the structure of the Jewish communities) through the ages.

Mr. Funkenstein, Mr. Zipperstein

191F. Second World War. Implementation of Nazi plans for the extermination of Jews in Nazi-dominat-
ed Europe. Life in the Nazi-imposed ghettos. Forms of Jewish resistance. The fate of the Jewish popula-
tions in the occupied territories. Mr. Friedlander

M192A-M192B. Jewish Intellectual History. (Formerly numbered 192A-192B.) (Same as Jewish Stud-
ies 192A-M192B.) Lecture, three hours. The deve-
lopment of Jewish self-understanding in relation to the
intellectual climate of the environment as expressed in the halacha, in philosophy, and in cabbalism.

M192A. Medieval Period; M192B. Mr. Funkenstein

193A. History of Religions: Myth. Lecture, three hours. The nature and function of myth in the history
of religion and culture. Examples selected from non-li-
terate as well as from other Asian and European tra-
tions.

Mr. Bolle

193B. Religions of South and Southeast Asia. Lecture, three hours. Prerequisite: course 4 or 193A. Topics vary from year to year and include religion of the Veda, Brahmans and the continuity. See Schedule of Classes for specific.

May be taken independently for credit.

Mr. Bolle

193C. Religions of South and Southeast Asia. Lecture, three hours. Prerequisite: course 4 or 193A. Topics vary from year to year and include Buddhism in India; the religions of Java and Bali; the non-literate traditions of India and Southeast Asia. See Schedule of Classes for specific.

May be taken independently for credit.

Mr. Bolle

193D. Religions of the Ancient Near East. Lecture, three hours. The three polytheistic systems of the ancient Near East, with emphasis on Mesopotamia and Syria and with reference to the religion of ancient Israel: varying concepts of divinity, modern. Period man,
gods, prayer and cult, magics, wisdom, and moral
conduct.

Mr. Buccellati

193E. Special Topics in the History of Religions. Lecture, three hours. Topics announced in Schedule of Classes and include ancient Germanic cults; Re-
naissance mysticism; mystics of the low countries; goddesses; religion in a secular age.

Mr. Bolle

194A. History of the Early Christians. Lecture, three hours. The Christian movement from its origins to ca. 160 C.E.; strength of continuity/discontinuity with Judaism, the various responses to Jesus of Nazareth, the writings produced during this period, the movement’s encounter with its religious, social, and political world, and methods of research.

Mr. Bartch

194B. Religious Environment of the Early Chris-
tians. Lecture, three hours. The rich variety in reli-
gious practice and thought in the Mediterranean world of the 1st century C.E. as in the context of the developing Christian movement. Topics include the Pharisees, Qumran, Philo, Stoics, Epicureans, tradi-
tional Greek and Roman religions, “mysteries,” as-
trology, magic, gnosticism, and emperor-worship.

Mr. Bartch

195A-195B-195C. History of Science. (Formerly numbered 195A-195C.) Lecture, three hours. Prer-
xquisite: course 3A or consent of instructor.

195A. Medieval and Renaissance Science. Continu-
ity and discontinuity in scientific traditions from the
12th to the 17th century; interrelationships between
theology, scientific thought, and social conditions.

Thesuperceforts,modermspace,andsomeattention to the occult sciences.

195B. Perspectives on Early Modern Physical Science. A detailed view of selected topics in the develop-
ment of the physical sciences from 1650 to 1800. Typical subjects include chemistry, social and political aspects of scientific change, and science in the En-
lightenment.

Mr. Wise

195C. Perspectives on Modern Physical Science. Selected aspects of 19th- and 20th-century physical
science, typically including science and industrializa-
tion, thermodynamics, electromagnetism, relativi-
ty, quantum mechanics, and the atom bomb.

Mr. Wise

M195F-M195G. History of Biological Sciences. (Same as History/Afro-Amer. Hist. M195A-M195B.) Lecture, three hours. M195F. Biological Sciences from Ancient Times to the Early 19th Century; M195G. Biological Sciences from the Early 19th Cen-
tury to the Mid-20th Century.

Mr. Frank (F.W)

197. Undergraduate Seminars. Seminar, three hours. Limited to 15 students meeting with a faculty member. Organized on a topics basis with readings, discussions, papers. Signups and descriptions of of-
terings each quarter are available in the undergradu-
ate counselor's office (6248 Bunche Hall). May be repeated once for credit. When concurrently sched-
uled with courses 201A-201U or 203, undergradu-
ates must obtain consent of instructor to enroll.

199. Special Studies in History. An intensive direct-
ly-research program. Eight units may be applied to-
ward the major requirements.

199A-199B-199HC. Directed Studies for Hon-
sors. Limited to history honors majors. In Progress grade during first year. May be repeated.

199A. Extensive reading and research in the field of the proposed honors thesis. Report on work in progress to be made to the sponsoring professor at regular intervals.

199B. Seminar meetings on research methods with continued reading and research culminating in a draft of the honors thesis.

199C. Revisions of the draft and preparation of pol-
ished honors thesis; oral examination on thesis.

199D. Independent Study for Internships. Prer-
xquisite: maintenance of a 3.0 grade-point average in the major. An independent study course to be supervised jointly by the Field Studies Office and the faculty ad-
viser. Further supervision to be provided by the busi-
ness for which the student is doing the internship. May not be used to satisfy the requirement for course 197 or 199. Normally, only four units of internship with the History Department are allowed. P/N grading.

Graduate Courses

Admission to all graduate courses is subject to the consent of instructor and to appropriate language qualifications. For mutilterm courses, credit and grades are given only on com-
pletion of the full seminar sequence, with In Progress grading until the last term unless oth-
erwise noted. Topics courses and seminars may be repeated.

200A-200U. Advanced Historiography. Seminar, three hours. May be repeated for credit. 200A. Ancient Greece; 200B. Ancient Rome; 200C. Medi-
evial; 200D. Early Modern Europe; 200E. Modern Eu-
rope; 200F. Russia/Eastern Europe; 200G. Britain; 200H. U.S.; 200J. Latin America; 200K. Near East; 200L. Europe; 200M. South Asia; 200N. Afri-
ca; 200O. Science/Technology; 200P. History of Reli-
gions; 200Q. Theory of History; 200R. Jewish History; 209. Armenia and the Caucasus; 209. Southeast Asia; 209U. Psychohistory

M200V. Advanced Historiography: Afro-Ameri-
can. (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit.
21A. Paleography I. Seminar, three hours. Prerequisite: reading knowledge of Latin or German or French. A history of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading.

Mr. Rouse (alternate years)

219B. Paleography II. Seminar, three hours. Prerequisite: reading knowledge of Latin or German or French. A history of the manuscript book from the Carolingian renaissance through the invention of printing, with emphasis on dating and localization as well as on proficiency in reading.

Mr. Rouse (alternate years)

220A-220B. Seminar in Church and Monarchy in the Middle Ages. Seminar, three hours. Textual studies and interpretative problems in the constitutional, legal, and intellectual history of the Latin church and of the Western European monarchies, with special attention to the German monarchy, from the 11th to the 14th century.

Mr. Benson

221A-221B. Seminar in Medieval History. Seminar, three hours. Mr. R.I. Burns

222A. Seminar in Medieval Intellectual History and History of Science. Seminar, three hours. Selected problems from medieval and early modern philosophy, science, political theory, theology.

Mr. Funkenstein

225. Colloquium for Entering Graduate Students. A seminar in historical methods and theory of historical research of modern European history.

Mr. Bucellati

226A-226B. Seminar in the Italian Renaissance. Seminar, three hours. Mr. Martinis

227A-227B. Seminar in the Reformation. Seminar, three hours. Mr. Clasen

229A-229B. Seminar in Early Modern European History. Seminar, three hours. Mr. Martines, Mr. Symcox

230A-230B. Seminar in Modern European History. Seminar, three hours. Mr. Loewenberg and the Staff

231A-231B. Seminar in Modern European Intellectual and Cultural History. Seminar, three hours. Mr. Loewenberg, Mr. Weber, Mr. Wohl

232A-232B. Seminar in French History of the 19th and 20th Centuries. Seminar, three hours.

Mr. Weber

233A-233B. Seminar in Russian History. Seminar, three hours. Mr. Rogger

234A-234B. Seminar in the Modern History of Spain, Portugal, and Italy. Seminar, three hours. Mr. Wohl

236A-236B. Seminar in Psychohistory. Seminar, three hours. An exploration of individual and group psychological processes and their uses in historical research.

Mr. Friedlander, Mr. Loewenberg, Mr. Wohl

239A-239B. Seminar in English History: Middle Ages. Seminar, three hours.

240A-240B. Seminar in English History: Modern History. Seminar, three hours.

244A-244B. Seminar in British Empire History. Seminar, three hours.

245. Colloquium in U.S. History. Seminar, three hours. Normally limited to and required of all modern European history graduate students. An introduction to the topics, methods, and historiography of modern European history.

246A-246B-246C. Introduction to U.S. History. Seminar, three hours. A graduate survey of the significant literature dealing with U.S. history from the Colonial period to the present. Each course may be taken independently for credit.

246A. Colonial Period. Mr. Appleby, Mr. Nash

246B. 1790 to 1900. Mr. Gatell, Mr. Howe, Mr. Saxton

246C. 20th Century. Mr. Coben, Mr. Dallek, Mr. Weiss

247A-247B. Seminar in Early American History. Seminar, three hours. Ms. Appley, Mr. Nash

249A-249B. Seminar in Jacksonian America. Seminar, three hours. Mr. Gatell

250A-250B. Seminar in U.S. History of the Middle 19th Century. Seminar, three hours.

Mr. Gatell, Mr. Howe

252A-252B. Seminar in Recent U.S. History to 1930. Seminar, three hours. Mr. Coben, Mr. Hines, Mr. Schulman

253A-253B. Seminar in Recent U.S. History since 1930. Seminar, three hours. Mr. Hines, Mr. Weiss

254A-254B. Seminar in U.S. Social and/or Intellectual History. Seminar, three hours.

Mr. Howe, Mr. Saxton

255A-255B. Seminar in the History of Business and Government in the American Economy. Seminar, three hours.

Mr. Rouse

256A-256B. Seminar in American Diplomatic History. Seminar, three hours.

257A-257B. Seminar in U.S. Urban History. Seminar, three hours. Mr. Hines, Mr. Monkston

258A-258B. Seminar in Working Class History. Seminar, three hours. Mr. Laslett, Mr. Saxton

259A-259B. Seminar in Social History of Women in the U.S. Seminar, three hours.

260A-260B. Seminar in Native American History. Seminar, three hours.

261A-261B. Seminar in Afro-American History. Seminar, three hours. Social and political history of the Afro-American, including emphasis on the development of structure of relations in America; racial concepts and dilemmas, black and white.

Mr. Hill

262A-262B. Seminar in Chicanos History. Seminar, three hours.

263A-263B. Seminar in the History of the Americas West. Seminar, three hours. Mr. Hundley

264. History of American Education. (Same as Education M201C.) Seminar, three hours. The intellectual and social forces impinging on American education from the 1860's to the present. Analysis of the relation between these forces and the values, curriculum, structural organization, and functions of education.

Mr. S. Cohen

265. Latin American Research Resources. (Same as Latin American Studies M268A and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide the experience and competency required for future bibliographic and research sophistication as the basis for enhanced research results.

Mr. Lourash

266A-266B. Seminar in Colonial Latin American History. Seminar, three hours.

267A-267B. Seminar in Latin American History: 19th and 20th Centuries. Seminar, three hours.

268A-M268B. Seminar in Recent Latin American History. (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. A seminar devoted to selected topics of an interdisciplinary nature. In Progress grading.

Mr. Wilke

275. Introduction to the Professional Study of African History. Seminar, three hours. Required of entering graduate students in African history. Strongly recommended for students with a history concentration in the African Area Studies M.A. program. Source identification, research methodologies, historical and graphic traditions, historical interpretation, and approaches to teaching.
276. African Archaeology: Field Techniques (2 to 8 units). Seminar, three hours. Prerequisites: any introductory course in archaeology and preferably an African history course. A field course on an African excavation to provide the basic skills-reconnaissance, surveying, excavation techniques, conservation, and scientific sampling required by an archaeologist in Africa, together with an introduction to ethnographic survey and oral data collection.

Mr. Posnansky

277. African Archaeology: Data Analysis (2 to 8 units). Seminar, three hours. Prerequisite or corequisite: course 276. A field course to equip students to handle finds from excavations. Analysis, description, illustration, and interpretation of an actual archaeological and/or ethnographic collection.

Mr. Posnansky

276A-277B. Seminar in African History. Seminar, three hours.

282A-282B. Seminar in Chinese History. (Formerly numbered 282A-282B-282C.) Seminar, three hours.

286A-286B. Seminar in South Asia. Seminar, three hours.

290A-290B. Seminar in Southeast Asia. Seminar, three hours.

291A-291B. Seminar in Jewish History. Seminar, three hours. Studies in the intellectual and social history of the Jewish people from ancient times to the modern period.

Mr. Funkenstein

293A-293B. Seminar in the History of Religions. Seminar, three hours.

295. Theories of Scientific Change. Seminar, three hours. Historical and philosophical perspectives on science, focusing on the rationality of scientific change and the logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, Toulmin, Lakatos, Holton, Buchdahl, Feyerabend, and others.

297A-297B. Seminar in the History of Science. Seminar, three hours.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Ms. Wise

400. Writing Workshop for Graduate Students (2 units). Prerequisite: consent of instructor. Writing workshop on students’ papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students’ own and in professional historians’ work, helps students improve their own writing. May be repeated once. S/U grading.

Mr. Bolle

495. Teaching of History. Prerequisite: graduate standing. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for the M.A. degree. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisites: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

599. Ph.D. Research and Writing (1 to 8 units). Prerequisite: advancement to Ph.D. candidacy.

---

History/Art History (Interdepartmental)

6248 Bunche Hall, (213) 825-3720

Scope and Objectives

The interdisciplinary major in history/art history allows students to study the relationship between art history and the history of society, politics, and culture.

Bachelor of Arts Degree

All applicants are processed and screened by the interdepartmental committee. History courses may be applied toward the general education requirements; a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major. No course for the major may be taken on a P/NP grading basis except Art History 125.

If you wish to confer with a counselor regarding program planning and major requirements, contact the history/art history counselor at 825-3720.

Preparation for the Major

Required: History 1A-1B-1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

The Major

Required: History 100 or 101; 197 or 199; and courses as indicated in the following groups:

Group F: Two elective courses from Art History 125, 127, 197, 199, or any other upper division lecture course.

---

Honors Collegium

A311 Murphy Hall, (213) 825-1553

The Honors Collegium is an unusual educational alternative designed primarily for students in their freshman and sophomore years. Entering freshmen with at least a 580 SAT verbal score who have satisfied the Subject A/English B requirement and continuing students with a UCLA grade-point average of 3.0 who have satisfied the Subject A/English B requirement may enroll in specially devised Honors Collegium courses with an interdisciplinary emphasis. The Collegium offers small classes and individual attention. It encourages animated discussion among students, as well as between students and professors. It seeks to provoke scholarly exchange across the major disciplines in the University. Continuing courses are offered regularly to provide a foundation in the physical and life sciences, humanities, and social sciences. A wide selection of special courses, varied each year, completes the curriculum.

Each Collegium course is staffed by a director who is distinguished in teaching and scholarship, by a variable number of guest lecturers, and by additional specialists in their fields. Many Collegium courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Division of Honors, A311 Murphy Hall, to advise and help you plan an integrated academic program.
In 1988-89 the Honors Collegium will offer the following one-quarter courses, most of which carry four units of credit each (the six-unit courses are so indicated). Those courses marked “CONTINUING” are part of the continuing curriculum.

Lower Division Courses

40. Origin and Evolution of the Solar System and the Earth. (CONTINUING) Lecture/discussion, three hours. Prerequisite: consent of department. An examination of the nature of space (astronomical) and time (geological) of the solar system, including comparative planetology; a study of the formation of the Earth, its geological time scale, and the development of its atmosphere and hydrosphere. P/N/P or letter grading. Mr. Ernst, Mr. Morris (F)

42. The Making of a Scientific Culture. (CONTINUING) Lecture, three hours; discussion, one hour. An examination of the way in which science has shaped modern perceptual modes, institutions, and modern political systems, including such material as Darwinian evolution, thermodynamics, genetics, and the problems of quantum physics. P/N/P or letter grading. Mr. Wise (Sp)

43. Mind, Brains, Humans, and Computers. Seminar, three hours; computer laboratory, three hours. Prerequisite: consent of instructor and department. Investigation into the mind/body problem and into current theories of what constitutes the mind, including a study of artificial intelligence and the essentials of programming in LISP (an artificial intelligence program). P/N/P or letter grading. Mr. Taylor (F)

49. Computers, Science, and Computer Science. Seminar, three hours. A study of computers and the nature of automatic computation, both in theory and in current practice, including discussion of information, processing, artificial intelligence, social effects of computerization, and the capabilities and limitations of computer technology. Mr. Kay (Sp)

50. Greek Views of Humanity. (CONTINUING) Lecture, three hours; discussion, one hour. Prerequisite: consent of department. Greek views of human experience as expressed in the literary forms invented or developed by the Greeks: epic, history, tragedy, comedy, and philosophy; study of the way in which Greek texts provide a foundation for subsequent Western literature and thought. P/N/P or letter grading. Mr. Bergen (F)

51. Renaissance Views of Humanity. (CONTINUING) Lecture, three hours; discussion, one hour. Prerequisite: consent of department. A study of the ideals and literary forms of the Renaissance and the interplay between Christian theology and re-born classical aspirations. Investigation, through authors ranging from Erasmus to Shakespeare, of individualism, authority, and the concepts of history and honor. P/N/P or letter grading. Ms. King (W)

52. Rise and Fall of the 19th-Century Novel. (CONTINUING) Lecture, three hours; discussion, one hour. Prerequisite: consent of department. A study of the ideals and literary forms of the 19th century and the interplay between Christian theology and re-born classical aspirations. Investigation, through authors ranging from Erasmus to Shakespeare, of individualism, authority, and the concepts of history and honor. P/N/P or letter grading. Mr. Wiseman (W)

54. Enlightenment and the French Revolution: An Introduction to Social Science. (CONTINUING) Lecture, six hours; discussion, six hours; writing seminar, two hours. Prerequisite: consent of department. Courses 60A and 60B must be taken concurrently. An interdisciplinary examination of the social sciences. Topics include philosophical, psychological, and sociological theories that will and did shape the development of social and cultural policies, relativist social thought, social evolution and social structures, psychoneurotic problems, and problems of heredity and environment. Readings from Plato, Thoreau, Darwin, and Freud; contemporary theorists, Émile Durkheim, Édouard Lebon, and others. P/N/P or letter grading. Mr. Parducci (F)

61. Social Theory in the 20th Century. (CONTINUING) Lecture, three hours; discussion, one hour. Prerequisite: consent of department. An examination of the strikingly subjective thrust of 20th-century social thought which has emphasized cultural and emotional structures rather than the material, objective world. Focus on psychoanalysis, structuralism, functionalism, existentialism, and phenomenology in readings from Durkheim to Jean-Paul Sartre. P/N/P or letter grading. Mr. Alexander (F)

62. Community and Self-Interest in the History of American Culture (6 units). (CONTINUING) Lecture, four hours; discussion, one hour. An examination of the historical origins of the frequently contradictory values which inform American thought and culture: hierarchy and equality, institutional constraints and voluntarism, a collective sense of mission and belief in the autonomous individual. Mr. Howe (W)

68. History of Social Thought. (CONTINUING) Lecture, three hours; discussion, one hour. A study of the significant forms of social theory and social change from the English Revolution to the beginning of the 20th century, including readings from Hobbes, Rousseau, Smith, Tocqueville, Marx, and Freud. P/N/P or letter grading. Mr. Prager (W)

72. Elementary Particles and the Universe. Lecture, two hours; discussion, 90 minutes. No special mathematical knowledge required. Examination of elementary particle physics, including the status of its current study in laboratories around the world and its role in assessing the early evolution of the universe. P/N/P or letter grading. Dr. Cline (F)

74. Physical Foundations for Unified Social Science: A Concerto in Nine Disciplines. Lecture, four hours; discussion, two hours; writing seminar, six hours. Examination of the unified field theory formulated by physicist Arthur S. Libradus: use of principles from mechanics, thermodynamics, and chemistry to trace the evolution of complex biosystems and of human social systems. P/N/P or letter grading. Mr. Bart (F)

75. Peace and War in Our Nuclear Age. Lecture, two hours; discussion, two hours. The origins of nuclear discourse and psychology, the impact of nuclear technology on the society and its citizenry, and potential future responses. P/N/P or letter grading. Mr. Rabow (W)

76. The Modern Self in Modern Society. Seminar, two hours; individual consultations, one hour. Examination of modern life as it is defined by (1) the division between contemporary life and pre-Enlightenment society, (2) the contemporary attention to the details of everyday experience, and (3) the dialectical complexities in the contrast between preindustrial and industrial societies. P/N/P or letter grading. Mr. Katz (Sp)

77. Intellectual Life in Japan: Classics, Moderns, and Postmoderns (6 units). Lecture, two hours; discussion, two hours; writing seminar, two hours. An examination of the current modernity/postmodernity debate about contemporary Japanese art and culture in the context of Japan’s intellectual tradition since the 17th century. Comparison of modernist and East Asian cultural assumptions and beliefs. P/N/P or letter grading. Mr. LaFleur (W)

78. Writing in the Age of Revolution (6 units). Lecture, four hours; discussion, one hour; writing seminar, two hours. Part of the UCLA French Revolution bicentennial program. Examination of the major debates of 1780 to 1820 in America and Europe through historical, rhetorical, and literary study. P/N/P or letter grading.

79. Literature of Diversity: Cultural Experience in America. Seminar, three hours. An examination of the richness and variety of American culture as revealed in literary works generally neglected in traditional treatments. Theoretical and political aspects of cultural diversity as presented in such works as Black Elk Speaks, Their Eyes Were Watching God, Mexican Corns in Immigration, and China Men. P/N/P or letter grading. Mr. Paredes (Sp)

82. Greek Tragedy and Performance. Seminar, three hours; film viewing, three hours. Examination of Greek tragedy through the double prism of literary analysis of the text and performance criticism of the production, developing skills of both the literary and the theater critic. Mr. Goldberg (W)

86. Federico Garcia Lorca and the Literature of New York. Lecture/discussion, three hours. Designed to place Lorca in the international current of urban literature. Examination of his political actions by study of his production, developing skills of both the literary and the theater critic. Mr. Morris (W)

88. Cognitive Revolution: Mind and Language, Culture and Creativity. An examination of the "cognitive revolution" in the history of ideas, particularly the attempt to assimilate linguistics to the Galilean style of the natural sciences and in the social sciences. Mr. Otero (W)

91. Intervention and Democracy. A study of the U.S. intervention — whether by means of overt threat such as economic sanctions or by means of covert action — in the affairs of other countries, such as China, Vietnam, Zaire, Chile, Greece, Iran, and Cuba. P/N/P or letter grading. Mr. Zeitzin (Sp)

92. Technological Hazards. Seminar, three hours. The scientific study of hazards and disasters resulting from failure or misapplication of technology which threaten the social, physical, and biological support systems of the Earth. Hazards range from asbestos in hair dryers to the threat of nuclear war. Mr. Johnson (W)

94. American Presidency: Psychocultural Perspectives. Seminar, three hours. Focus on six American presidents, all of whom have been influenced by a combination of liberal and conservative ideas. Exploration of their psychological actions by study of their mental personalities and the national and political culture in which they functioned. P/N/P or letter grading. Mr. Dallek (F)

96. Cultural Dimensions of Apartheid South Africa. An examination of the cultural ferment that is the product of apartheid South Africa, a ferment expressed in the literary output of both black and while South African authors, as well as in popular cultural forms such as people's theater and township jazz. P/N/P or letter grading. Mr. Alpers (Sp)

97. Issues in American Foreign Policy: The Methodology of Assessment. Lecture辩论, three hours; discussion, one hour. Exploration of a wide range of views on contemporary foreign policy issues to train students how to discern the ideological origins of policy arguments. Examination of material in major foreign policy journals, using a debate format. P/N/P or letter grading. Mr. Spiegel (Sp)

199. Directed Honors Studies. Prerequisite: minimum of four units completed in the Honors Collegium with a grade of B or better, an overall UCLA GPA of 3.0 or better, consent of instructor and dean of the Division of Honors. A special research-writing tutorial with a director of one of the Honors Collegium courses in order to pursue in greater depth a significant topic from one of the Collegium courses. May not be repeated for credit.
Humanities

334D Royce Hall, (213) 825-7650

Professors
Arnold J. Band, Ph.D. (Hebrew and Comparative Literature)
Ross P. Shideler, Ph.D. (Scandinavian and Comparative Literature)
Pier-Maria Pasinetti, Ph.D., Emeritus (Italian and Comparative Literature)

Associate Professors
Katherine C. King, Ph.D. (Classics and Comparative Literature)
Kathleen L. Komar, Ph.D. (German and Comparative Literature), Chair
Lubia Re, Ph.D. (Italian and Comparative Literature)

Lower Division Courses

The following courses are made up of selected masterpieces of world literature. Humanities 1A, 1B, 1C, 2A, 2B, 2C satisfy the humanities general education requirement in the College of Letters and Science.

1A. World Literature: Antiquity to Early Middle Ages. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. A study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as the Iliad or the Odyssey, Greek tragedies, portions of the Bible, Virgil, Petronius, St. Augustine, and others such as Gilgamesh or Tristan and Isolde.

1B. World Literature: Late Middle Ages to the 17th Century. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. A study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as Chaucer's Canterbury Tales, Dante's Divine Comedy, Boccaccio's Decameron, Cervantes' Don Quixote, Shakespeare, Calderon, Moliere, and Racine.

1C. World Literature: Age of Enlightenment to the 20th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. A study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as Chaucer's Canterbury Tales, Dante's Divine Comedy, Boccaccio's Decameron, Cervantes' Don Quixote, Shakespeare, Calderon, Moliere, and Racine.

2A. Survey of Literature: Antiquity to Early Middle Ages. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1A. Fulfills the College of Letters and Science English Composition requirement and the College of Fine Arts Critical Reading and Writing requirement. The study of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as the Iliad, Greek tragedies, the Aeneid, Petronious, St. Augustine, or Tristan and Isolde.

2B. Survey of Literature: Late Middle Ages to the 17th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Fulfills the College of Letters and Science English Composition requirement and the College of Fine Arts Critical Reading and Writing requirement. The study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's Divine Comedy, Cervantes' Don Quixote, Shakespeare, Calderon, Moliere, and Racine.

2C. Survey of Literature: Age of Enlightenment to the 20th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1C. Fulfills the College of Letters and Science English Composition requirement and the College of Fine Arts Critical Reading and Writing requirement. The study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, and James Joyce or Wallace Stevens.

Upper Division Courses

102. Satire. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. The changing nature of satire as illustrated by examples of the genre from Horace and Juvenal to lonesco and Nabokov.

104. The 20th-Century Continental Novel: Mann and Proust. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. An intensive study of the Magic Mountain and the Remembrance of Things Past as works of art and as expressions of the spirit of society and cultural dissolution felt in early 20th-century Europe.

105. Comic Spirit. Prerequisites: upper division standing, literature major. Literature masterpieces, both dramatic and nondramatic, selected to demonstrate the varieties of comic expression. May be concurrently scheduled with Comparative Literature C205. Undergraduates read all works in translation.

106. Hebrew Literature in English — Literary Traditions of Ancient Israel: Bible and Apocrypha. (Same as Jewish Studies M150A.) Lecture, three hours. A study of the literary culture of ancient Israel and an examination of the principal compositional strategies of the Hebrew Bible and the Apocrypha (read in translation).

107. Classical Tradition: Epic. Seminar, three hours. Prerequisites: upper division standing, literature major, consent of instructor. Analysis of the Iliad, the Odyssey, the Aeneid, the Germanenmeme Liberata, and Paradise Lost both in relation to their contemporary societies and to the literary traditions. Emphasis on how poets build on the work of their predecessors. May be concurrently scheduled with Comparative Literature C207.

C109. Crisis of Consciousness in Modern Literature. Prerequisites: upper division standing, literature major. Study of modern European and American works which are concerned both in subject matter and literary techniques with the fragmented, self-consciousness of human beings and their society, focusing on the works of Kafka, Rilke, Woolf, Satre, and Stevens. May be concurrently scheduled with Comparative Literature C209. Undergraduates read all works in translation.

110. Man and His Fictions. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. The art of tale-telling and the nature of narrative. Examination of the wisdom or knowledge the tales possess, how the exchange of tales defines and sustains a community, and how a narrator clarifies form and meaning for the audience.

C111. Classical Tradition: Tragedy. Seminar, three hours. Prerequisite: upper division standing or consent of instructor. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in modern periods. May be concurrently scheduled with Comparative Literature C211.

114. The Short Novel. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Selection of short novels as works of literary art and as relevant intellectual statements. Texts by Melville, Flaubert, Dostoevsky, Kafka, etc. May be concurrently scheduled with Comparative Literature C214.

115. Four Modern Dramatists. A study of several works by four major modern dramatists, focusing on understanding specific elements in each work and the authors' possible interrelations. Pirandello, Beckett, and Pinter are read; the fourth author is selected from Ionesco, Giraudoux, Cocteau, etc.

116. Man and Society in the Renaissance. Lecture, three hours; discussion, one hour. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Explorations of a change in Western man's relationship to his world, himself, and his art; reading of such works as Don Quixote, the Essays of Montaigne, Gargantua and Pantagruel, The Praise of Folly, Utopia. Mr. Alien

C117. The Mystery Novel. Prerequisites: upper division standing and literature major, or consent of instructor. A study of mystery and detective fiction in England, France, and the United States. Development of the origin, form, and historical significance of mystery fiction; study of selected works. May be concurrently scheduled with Comparative Literature C297. Undergraduates read all works in translation.

C118. Archetypal Heroes in Literature. Lecture, three hours. Prerequisite: upper division standing. Survey and analysis of the function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. Concurrently scheduled with Comparative Literature C229. Undergraduates read all works in translation.

C129. Archetypal Heroes in Literature. Lecture, three hours. Prerequisite: upper division standing. Survey and analysis of the function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. Concurrently scheduled with Comparative Literature C229. Undergraduates read all works in translation.

C138. Ancient and Medieval Oral Poetry. Prerequisites: upper division standing, literature major. A study of primary texts believed to be orally composed, their origins, characteristic forms, and function. Readings include such primary texts as the Odyssey, Beowulf, The Song of Roland, and selections of Norse poetry as well as comparative material such as the Aeneid, the Norse sagas, and discussions of modern African and Yugoslavian oral poetry.

C139. Early Medieval Literature. Prerequisites: upper division standing, literature major. A survey of the Latin and Germanic literatures from the fall of Rome to the beginning of the 12th century. May be concurrently scheduled with Comparative Literature C239. Undergraduates read all works in translation.
C140. Medieval Epics. Prerequisites: upper division standing, literature major. Consideration of five medieval epics (Beowulf, El Cid, Chanson de Roland, Niбелунгенгез, and Njáls saga), with two objectives: first, a critical study of the various epic traditions; second, an understanding of the nature of epic literature. Assignments consist of an extended seminar paper and short oral reports. May be concurrently scheduled with Comparative Literature C240. Undergraduates read all works in translation. Mr. Condren

C141. Literary Mediation of History in the Renaissance. Seminar, three hours. Prerequisites: upper division standing, literature major. An analysis of the presence and impact of the challenge of the history of rhetoric of Renaissance authors ranging from the Italian humanists to Machiavelli and Shakespeare. Other authors include Poliziano and Lorenzo de' Medici. May be concurrently scheduled with Comparative Literature C241. Undergraduates read all works in translation. Ms. Re

C145. Renaissance Drama. Prerequisites: upper division standing and literature major, or consent of instructor. A broad introduction to the subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Logio, Racine, Jonson, Shakespeare. May be concurrently scheduled with Comparative Literature C245. Undergraduates read all works in translation. Mr. Braunmuller

C160. Literature and the Visual Arts, 1700 to the Present. Lecture, three hours. Prerequisites: upper division standing or consent of instructor. Knowledge of art history valuable but not required. Assuming that literature and the visual arts are to some degree expressions of cultural and philosophical patterns of areas, one could study relationships between primarily English writers from 1700 to the present and movements in painting, architecture, and sculpture. An interdisciplinary comparison of the development of visual and verbal art from a comparative study. May be concurrently scheduled with Comparative Literature C260. Undergraduates read all works in translation. Mr. Re

C165. The French Revolution and European Literature. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Part of the UCLAI French Revolution Bicentennial celebration, a seminar exploring the relationship between the poems, plays, plays, poetry, popular tracts, etc., to explore the context and connections of the French Revolution to European culture. Authors range from Voltaire and Rousseau to Tomé, Richardson, Wordsworth, Goethe, and Kant. Concurrently scheduled with Comparative Literature C265. Undergraduates read all works in translation; term paper required. Mr. Maniguis

C168. Romantic Autobiography. Discussion, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. The evolution of the autobiography from spiritual (Augustine and secular (Cillon) sources to the translation in the 18th century which blended features of the epic poem and the quest for knowledge. Wordsworth's Prelude came to represent the best example of this mixture. Major examples by Matthew Arnold, Thoreau, Ruskin, Emerson, Thoreau, Rousseau, and Goethe are studied. Mr. Re

C170. The Dream in English and German Romantic Literature. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. A study of the use of the dream as a standard narrative technique in English and German Romantic literature. (In this seminar, the study will be limited to specific narratives in prose and film. Mr. Haidu

C171. Dramatic Theory and Criticism in German and English Romanticism. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. The generic conception of the drama and the work of the German philosophers and thinkers Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on the role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with Comparative Literature C271. Undergraduates read all works in translation. Mr. Burwick

C172. The Grotesque in Romantic Literature and Art. Prerequisites: upper division standing and literature major, or consent of instructor. The study of the grotesque in the visual and verbal arts of the Romantic period; the aesthetic of tragic-comic interaction, the demonic vision, and the satirical sketch of man's abnormity. May be concurrently scheduled with Comparative Literature C272. Undergraduates read all works in translation. Mr. Burwick

C173. Theory and Texts of the French Epic. Seminar, three hours. Prerequisites: upper division standing, literature major. An attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Prerequisites by Hoffman, Nerval, Sade, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with Comparative Literature C273. Undergraduates read all works in translation. Mr. Re

C175. The 19th-Century Novel. Seminar, three hours. Prerequisites: upper division standing, literature major. A comparative study of the 19th-century novel in England and on the continent. Novels are selected so as to allow the seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with Comparative Literature C275. Undergraduates read all works in translation. Mr. Re

C176. Fiction and History. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Analysis of the use of historical events, situations, and characters in literary works of the Renaissance and/or the modern period. Texts and individual assignments range from Renaissance historical narratives (the Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Vergha, Tomasi Dampedusa, Céline, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence the authors' choice and use of historical material. May be concurrently scheduled with Comparative Literature C276. Mr. Pasinetti, Ms. Re

C178. Darwinism and Literature. Seminar, three hours. Prerequisites: upper division standing or consent of instructor. The impact of Darwin's theories on European and American literature. While texts include major works in the development of naturalism, such as novels by Zola, Hardy, Crane, and Dreiser and plays by Strindberg and Ibsen, the course moves forward into the continuing influence of other "determinists" and behaviorally oriented theories in works by authors such as Mann, Sartre, Camus, Stevens, and Sigmund Freud. May be concurrently scheduled with Comparative Literature C278. Mr. Shidefer

C180. Symbolist Traditions in Poetry. Prerequisites: upper division standing and literature major, or consent of instructor. A study of the symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with Comparative Literature C280. Undergraduates read all works in translation. Mr. Shidefer

C181. Poetry and Poetics of the Post-Symbolist Period. Prerequisites: upper division standing and literature major, or consent of instructor. A study of some of the dominant poetic trends and figures in American and European poetry in the first half of the 20th century, including such surrealists as Pound, Eliot, Valery, Rilke, George, and Stevens. May be concurrently scheduled with Comparative Literature C281. Undergraduates read all works in translation. Ms. Komar, Mr. Shidefer

C182. Semiotics of Story and Film: An Introduction to Narrative Semiotics. Discussion, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. An investigation of the theoretical aspects of semiotics and their application to specific narratives in prose and film. Mr. Haidu

C184. Alternative Traditions: In Search of a Female Voice in Contemporary Literature. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with Comparative Literature C284. Undergraduates read all works in translation. Ms. King, Ms. Komar

C185. The Modern Continental Novel. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the modern novel's development from naturalism toward a more symbolic level of literature. Use of such authors as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on the development of themes such as primitivism, authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Comparative Literature C285. Undergraduates read all works in translation. Mr. Lehan

C186. The Postmodern Novel. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the postmodern novel as it developed out of modernism in postmodernism defined in three different ways. Philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with Comparative Literature C286. Undergraduates read all works in translation. PNP or letter grading. Mr. Lehan

Indo-European Studies (Interdepartmental)

1037 Graduate School of Management, (213) 825-4242

Professors
Raimo A. Anttila, Ph.D. (Linguistics)
Henrik Bernbaum, Ph.D. (Slavic Languages and Literatures)
Patrick K. Ford, Ph.D. (Celtic Languages and Literatures)
Marija Gimbutas, Ph.D. (Slavic Languages and Literatures, Archaeology)
Bengt T. M. Löfstedt, Ph.D. (Classics)
Jaan Puhvel, Ph.D. (Classics, Indo-European Studies)
 Harmut E. F. Scharte, Ph.D. (East Asian Languages and Cultures)
Hanss-Peter Schmidt, Ph.D. (Near Eastern Languages and Cultures)
Terence H. Wilbur, Ph.D. (Germanic Languages)

Associate Professor
Joseph F. Nagy, Ph.D. (Celtic Languages and Literatures)
Scope and Objectives
The prime aim of this graduate program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with three alternative major emphases: Indo-European linguistics, Indo-Iranian or other specialized language area studies, and European and related archaeology.

Ph.D. Degree
Admission
Students admitted to graduate standing must have a B.A. degree with a major in an Indo-European language field (e.g., German, Slavic, Celtic, Romance languages, Latin, Greek), linguistics (with concentration in historical and comparative linguistics), anthropology, or archaeology. Letters of recommendation (at least two, preferably three or four) are required; Graduate Record Examination (GRE) scores are not required. Potential applicants may request a brochure by writing to the Indo-European Studies Program, c/o Folklore and Mythology Center, 1037 GSM, UCLA, Los Angeles, CA 90024-1459.

Admission to the program itself constitutes admission to the doctoral program; there is no master's degree offered. Should deficiencies exist in prerequisites to specific work at the graduate level, you may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

Major Fields or Subdisciplines
The Ph.D. in Indo-European Studies is offered with three alternative major emphases: (1) Indo-European linguistics; (2) Indo-Iranian or other specialized language area studies; (3) European and related archaeology.

Foreign Language Requirement
French and German are required, one during the first year. A third language is added only when relevant to your field of specialization. Proficiency in a language may be demonstrated by (1) passing the Educational Testing Service (ETS) examination with a score of 600 or better, (2) completing a level five course with a grade of B or better, or (3) passing a departmental reading examination.

Course Requirements
The course requirements vary among the three major fields of specialization. General requirements for all students regardless of specialization include knowledge of Vedic Sanskrit and Homeric Greek, basic competence in Indo-European linguistics (including Indo-European Studies M150 and 210), mythology (e.g., Classics 168), archaeology (including Indo-European Studies 131, 132). Additional requirements by field are as follows:

(1) Linguistics: An advanced seminar in comparative grammar, a minimum of four ancient Indo-European languages from different subbranches, and additional units in courses offered by Linguistics (e.g., phonetics, structural linguistics) and related departments. These additional units should be selected in consultation with your adviser.

(2) Indo-Iranian or Other Specialized Language Area: An advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different subbranches, and additional units in the area of specialization, to be selected in consultation with your adviser.

(3) European and Related Archaeology: A minimum of one ancient Indo-European language, an advanced seminar in European archæology, a course in analytical methods in archaeology, and additional units in archaeology, anthropology, and related fields, to be selected in consultation with your adviser.

Teaching Experience
Teaching experience is highly desired, but not available within the program and therefore is not required. The program works closely with its constituent departments in an attempt to provide some teaching experience.

Qualifying Examinations
When you have completed the required coursework, a series of written examinations covering the major and minor fields are administered. These consist of translation and analysis of set texts from the ancient Indo-European languages and diagnostic examinations in the other fields. Following successful completion of the written examinations, the University Oral Qualifying Examination, based on the written examinations and the dissertation prospectus, is administered by the doctoral committee. It is intended to probe your grasp of the entire field. Should you fail either the written or oral examinations, the interdepartmental degree committee may allow reexamination. After successful completion of the written and oral examinations, you are advanced to doctoral candidacy and begin work on the dissertation.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination is designed to allow the committee to evaluate the dissertation within the discipline and within your own specialization. Although it is stated as a requirement, individual circumstances have on occasion dictated waiver of the final oral examination.

Upper Division Courses
131. European Archaeology: Proto-Civilizations of Europe. A survey of European cultures from the beginning of the food-producing economy in the 7th Millennium B.C. to the beginning of the Bronze Age in the 3rd Millennium B.C. Mrs. Gimbatts
132. European Archaeology: The Bronze Age. Prerequisite: course 131 or consent of instructor. A survey of European cultures from around 3000 B.C. to the period of the destruction of the Mycenaean culture about 1200 B.C. The Aegean area and the rest of Europe. Mrs. Gimbatts
M150. Introduction to Indo-European Linguistics. (Same as Linguistics M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. A survey of the Indo-European languages from ancient to modern times; their relationships and chief characteristics. Mr. Anttila (Sp)
199. Special Studies (2 to 8 units).

Graduate Courses
210. Indo-European Linguistics: Advanced Course. Prerequisite: course M150 or equivalent. Comparative study of phonology, morphology, syntax, and lexicon. Problems in analysis and reconstruction. Mr. Anttila (F)
250A-250B. European Archaeology. Prerequisite: consent of instructor. Studies in ancient European archaeological materials and their relationship to the Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress grading. Mrs. Gimbatts
596. Directed Individual Studies (2 to 8 units).
597. Preparation for Ph.D. Qualifying Examinations (2 to 8 units).
599. Research for Ph.D. Dissertation (2 to 8 units).

Related Courses in Other Departments
Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under Portuguese, Italian, Germanic Languages, Near Eastern Languages and Cultures, African Languages, and East Asian Languages and Cultures. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

All courses must be taken for a letter grade.

Area Focus

Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Latin America, Africa, the Atlantic area, the Soviet sphere, East Asia, Southeast Asia, South Asia, or the Middle East.

For further information, contact Vicki Waldman, Political Science Counselor, in the program office.

Ioli Kiliaevzou-Maxen, Ph.D. (Art History)
Michael G. Morony, Ph.D. (History), Chair
Thomas Penchoen, Ph.D. (Near Eastern Languages and Cultures)
A. Jihad Raey, Ph.D. (Music)
Scope and Objectives

The undergraduate major in this discipline is called "Near Eastern Studies." For details, see the program by that name later in this chapter.

The designation of this interdepartmental degree program is meant to convey the broadest cultural concern with peoples and places influenced by Islam, rather than a narrow approach to Islam as religion alone. Islam as a culture-forming force in history may be studied and understood through the literate sources of Islamic civilization and/or through systematic observation and examination of behavioral patterns and social relations of Muslim peoples. The commonality of an "idealized" and a "functional" or "practical" Islam does not produce a multiple number of valid and varied approaches to Islamic studies. The program, with its core emphasis on the major languages of the Islamic Middle East, is intended to provide an internal view of the dynamics of Islamic culture.

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an academic career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

Master of Arts Degree

Admission

In addition to the general University requirements, a Bachelor of Arts degree in Near Eastern Studies or equivalent is required. The interdepartmental degree committee passes on your application for admission to the program. You are normally expected to have completed the equivalent of Arabic 102A-102B-102C and Iranian 102A-102B-102C or Turkic Languages 102B-102C. In addition, you should have completed the equivalent of two years of Near Eastern history (classical and modern). Some coursework in Islamic culture and institutions may be applied toward the history requirement. Deficiencies in any of these prerequisites have to be removed by taking the appropriate courses without credit toward the advanced degree. No special application form is required.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants. No screening examination is required.

A departmental brochure may be obtained by writing to the Von Grunebaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA, Los Angeles, CA 90024-1480.

Major Fields or Subdisciplines

Arabic, Persian, Turkish, history of the Near East, political science, anthropology, sociology, Islamic art, Near Eastern music.

Foreign Language Requirement

You are required to show proficiency in either French or German. You are expected to pass the Educational Testing Service (ETS) graduate foreign language reading examination in French or German by the end of your third quarter in residence.

Course Requirements

A minimum of nine courses is required, five of which must be at the graduate level. You must take no fewer than four courses on the appropriate level in one Near Eastern language of your choice, and no fewer than five courses selected from the relevant upper division and graduate courses in history, political science, or any of the other fields represented in the program. The selection must be limited to two of these disciplines. The omission of history may be approved only in exceptional cases. Eight units of 500-series courses may be applied toward the total course requirement, as well as toward the minimum graduate course requirement, provided they are not in the same discipline. If you intend to proceed to the Ph.D. in Islamic Studies, you should show proficiency in a second Near Eastern language (Arabic, Persian, Turkish). One of the two languages required for the Ph.D. is Arabic.

Comprehensive Examination Plan

The thesis plan is not available in this program. You must pass written examinations in one Near Eastern language, one in its literature, one in the history of the Near East, and one other in social sciences. The examinations are constructed by the instructor responsible for each discipline. Reexamination in exceptional cases is determined by the interdepartmental degree committee. The examiner or examiners are appointed by the chair of the interdepartmental degree committee.

Ph.D. Degree

Admission

Students intending to work for the Ph.D. in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Those who enter the program with an M.A. from another university should have attained a level of preparation in languages, history, and social sciences equivalent to that required for the M.A. at UCLA. In addition, students are expected to show proficiency in a second Near Eastern language (one of the two required languages is Arabic.) Those who have not done so should make up any deficiencies by taking the appropriate courses without credit toward the degree. No special application form is required, but applications must be accompanied by three letters of recommendation.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants.

A departmental brochure may be obtained by writing to the Von Grunebaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA, Los Angeles, CA 90024-1480.

Major Fields or Subdisciplines

Arabic, Persian, Turkish, history, anthropology, sociology, political science, Islamic art, Near Eastern music.

Foreign Language Requirement

At the beginning of your first quarter in residence, you must present to the chair of the interdepartmental degree committee a written statement explaining your preparation in one of the two modern languages required by the University (generally French and German). You are expected to pass the graduate foreign language reading examination in both languages by the end of your second year in residence. For work in some fields, reading knowledge of Italian, Spanish, or Russian may be substituted for one of the above European languages after satisfactory advisement. The Educational Testing Service (ETS) examination is acceptable.

Course Requirements

If you are entering directly into the Ph.D. program, course requirements are the same as in the M.A. program. Beyond this, you continue advanced courses in your two Near Eastern languages, in Near Eastern history, and in one of the social sciences, on specific advisement of the interdepartmental degree committee.
Qualifying Examinations
Written qualifying examinations in four fields are required: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history, and one other social sciences field (anthropology, political science, sociology). After successfully completing the written examinations, you must pass the University Oral Qualifying Examination in order to be advanced to doctoral candidacy. Reexamination in any field is at the discretion of the doctoral committee in consultation with the chair of the program.

Research proposals, dossiers, research papers, propositions, etc., are not permitted as alternatives to the written qualifying examinations.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
With the approval of the doctoral committee at the time of the oral qualifying examination, the final oral examination may be waived.

Islamic Studies Course List

**Anthropology**
- 130. The Study of Culture
- 133P. Social and Psychological Aspects of Myth and Ritual
- 150. The Study of Social Systems
- 156. Comparative Religion
- 161. Development Anthropology: Green Revolutions
- M163. Women in Culture and Society
- 167. Urban Anthropology
- 176. Cultures of the Middle East
- 215. Field Training in Anthropology
- 220P. Ethnology
- 230Q. Cultural Anthropology
- M232P. Cultural Modes of Thought
- 232Q. Myth and Ritual
- 239P. Selected Topics in Field Training in Ethnography
- 239Q. Analysis of Field Data
- 273. Cultures of the Middle East
- Arabic (Near Eastern Languages) 102A-102B-102C. Intermediate Literary Arabic
- 111A-111B-111C. Elementary Spoken Egyptian Arabic
- 112A-112B-112C. Advanced Spoken Egyptian Arabic
- 113A-113B-113C. Elementary Spoken Levantine Arabic
- 114A-114B-114C. Spoken Moroccan Arabic
- 120. Islamic Texts
- 130. Classical Arabic Texts
- 132. Philosophical and Kalam Texts
- 140. Modern Arabic Texts
- 141. Modern Arabic Literature
- 150A-150B. Survey of Arabic Literature in English
- 199. Special Studies in Arabic
- 220. Seminar in Islamic Texts
- 230. Medieval Literary Texts
- 240. Seminar in Arab Historians and Geographers
- 250. Seminar in Arabic Literature

**Archaeology**
- 259. Fieldwork in Archaeology

**Armenian**
- 239. Cultures of the Middle East
- 2390. Analysis of Field Data
- 113A-113B-113C. Intermediate Classical Armenian
- 131A-131B. Intermediate Classical Armenian
- 132A-132B. Advanced Classical Armenian
- 210. History of the Armenian Language
- 220. Armenian Literature of the Golden Age (A.D. 5th Century)

**Art History**
- 104A. Western Islamic Art
- 104B. Eastern Islamic Art
- 200. Problems in Islamic Art
- 201E. Byzantine Art
- 213. Advanced Studies in Islamic Art
- 214. Problems in Islamic Art

**Berber**
- 101A-101B-101C. Elementary Berber
- 102A-102B-102C. Advanced Berber
- 130. The Berbers
- 199. Special Studies in Berber Languages

**Classics**
- M170A-M170B. Byzantine Civilization
- French 121A. Franco-African Literature
- 257A-257B. Studies in French-African Literature

**Geography**
- 187. Middle East
- 188. Northern Africa
- 287. Middle East
- 288. Northern Africa

**Greek (Classics)**
- 231A-231B-231C. Seminar in Later Greek and Byzantine Literature
- Hebrew (Near Eastern Languages)
- 230. Seminar in Medieval Hebrew Literature
- 231. Texts in Judeo-Arabic

**History**
- 106A-106B-106C. Survey of the Middle East from 500 to the Present
- 107A-107B. Islamic Civilization
- 108A-108B. History of the Arabs
- 109A-109B. History of North Africa from the Moslem Conquest
- 110A-111B. Islamic History
- 111A-111B. History of the Turks
- 123A-123B. Byzantine History
- 188B. Recent History of India and Pakistan
- 190A-190B. History of Southeast Asia
- 204A-204B. Seminar in Near and Middle Eastern History
- 205A-205B. Seminar in Medieval Middle Eastern History
- 206A-206B. Seminar in the Social History of the Middle East
- 209A-209B. Seminar in Ottoman and Modern Turkish History
- 216A-216B. Seminar in Byzantine History
- 596. Directed Studies
- 597. Directed Studies for Graduate Examinations

**Irish**
- 150A-150B. Survey of Persian Literature in English
- 169. Civilization of Pre-Islamic Iran
- 170. Religion in Ancient Iran
- 190A-190B. Introduction to Modern Iranian Studies
- 199. Special Studies in Iranian
- 220A-220B. Classical Persian Texts
- 221. Rumi, the Mystic Poet of Islam

**Islamic Arts**
- 250. Seminar in Classical Persian Literature
- 251. Seminar in Contemporary Persian Literature
- 596. Directed Individual Study
- 597. Examination Preparation
- 599. Ph.D. Dissertation Research and Preparation

**Islamics (Near Eastern Languages)**
- 110. Introduction to Islam
- 596. Directed Individual Study
- 597. Examination Preparation
- 598. M.A. Thesis Research and Preparation
- 599. Ph.D. Dissertation Research and Preparation

**Linguistics**
- 220. Linguistic Areas
- 225. Linguistic Structures

**Music**
- 152. Survey of Classical Music in India
- 282. Music of Iran and Other Non-Arabic-Speaking Communities
- 284. Music of the Arabic-Speaking Near East

**Near Eastern Languages**
- 200. Bibliography and Method of Near Eastern Languages and Literatures
- 210. Survey of Afro-Asiatic Languages
- 250F. Seminars in Regional and Area Political Studies: Middle Eastern Studies
- 250K. Seminars in Regional and Area Political Studies: North African Studies

**Semiotics (Near Eastern Languages)**
- 215B. Syriac

**Sociology**
- 134. Culture and Personality
- 187. Population and Society in the Middle East
- 236. Social Change in the Middle East
- 237. Social Stratification in the Middle East

**Turkic (Near Eastern Languages)**
- 101A-101B-101C. Elementary Turkish
- 102A-102B-102C. Advanced Turkish
- 111A-111B-111C. Elementary Uzbek
- 112A-112B-112C. Advanced Uzbek
- 114A-114B-114C. Bashkir
- 160. Cultural History of the Turks
- 180. Modern Turkic Languages and Peoples
- 199. Special Studies in Turkic Languages
- 210A-210B-210C. Introduction to Ottoman
- 211. Ottoman Diplomatics
- 220A-220B-220C. Chagaitay
- 230A-230B-230C. Historical and Comparative Survey of the Turkic Languages
- 235A-235B. Middle Turkic
- 240A-240B-240C. Advanced Ottoman
- 250A-250B-250C. Islamic Texts in Chagaitay
- 280A-280B. Seminar in Modern Turkish Literature
- 290A-290B. Seminar in Classical Turkic Literature
- 596. Directed Individual Study
- 597. Examination Preparation
- 599. Ph.D. Dissertation Research and Preparation
Italian

Lecturers
Mirella Cheeseman, Dottore in Legge
Althea Reynolds, B.A., Emeritus

Scope and Objectives

Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdepartmental graduate programs in Romance Linguistics and Literature, Comparative Literature, and Folklore and Mythology.

Bachelor of Arts in Italian

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature. While literature courses constitute the bulk of the program, good knowledge of the language is prerequisite to all upper division literature courses credited toward the major in Italian. The use of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available in the department publication, Programs in Italian Studies, and in the department office.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, or equivalent.

The Major

Required: Fourteen upper division courses out of 16 courses regularly offered every year or every other academic year, including Italian 102A-102B-102C, 113A-113B, 130, 190. An additional seven are to be selected from courses 114A through 122.

Three upper division courses from other departments are strongly recommended, as follows: History 132A or 132B, and English 110. Also recommended: Art History 106A, 106B, or 106C; upper division courses in another literature and philosophy and a second language (Latin, French, Spanish, or German, at least on level three). Programs must be organized in consultation with the departmental undergraduate adviser.

Study in Italy

You are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. You are also urged to take advantage of summer language workshops and study programs, either at American campuses or in Italy. The Department of Italian offers an intensive, eight-week summer Italian studies program. For information on Casa Italiana, contact the department or the Summer Sessions Office, 100 Dodd Hall.

Honors Program

Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are eligible to participate in the honors program. Prerequisites: Italian 102A-102B-102C. Candidates select three upper division literature courses in which additional readings are required. In the last quarter of your senior year, you are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses should not fall below A-. Applications should be made during the last quarter of your junior year.

Bachelor of Arts in Italian and Special Fields

Study programs fulfilling requirements for the major have been developed with the Departments of Anthropology, Art, Design, and Art History, Classics (Latin), English, French, History, Linguistics, Music, Philosophy, Political Science, Spanish and Portuguese, and Theater, Film, and Television. Consult the Italian undergraduate adviser for requirements in the various fields of specialization.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, or equivalent, plus additional required courses associated with the field of specialization selected in consultation with the undergraduate adviser.

The Major

Required: Fourteen upper division courses, seven of which must be in Italian. Italian 102A-102B-102C are required, while the remaining four may be selected from courses 113A through 122 as determined by your area of specialization. The other seven courses are to be selected from offerings in another department, as determined by the field of specialization.

Study Lists each quarter must be planned in consultation with the undergraduate adviser. Courses are assigned in accordance with your needs as determined by the area of specialization pursued. In certain cases, as many as two courses (eight units) at the graduate level may be applied toward the 14-course minimum requirement.

Master of Arts Degree

Admission

Three letters of recommendation should be sent to the Graduate Adviser, Department of Italian, 340 Royce Hall, UCLA, Los Angeles, CA 90024-1535.

Files of prospective graduate students meeting the University minimum requirements are screened by the departmental committee on admissions. Because the department offers the master's degree as a step toward the Ph.D. degree, all students admitted to the M.A. program are designated as "first-stage doctoral students" in order to distinguish them from students in terminal master's degree programs. This is for administrative purposes only and has no bearing on your acceptance in the program if you do not indicate on the application that your final degree objective is the Ph.D. Admission on a provisional basis may be recommended in case of deficiencies in preparation.

Major Fields or Subdisciplines

The M.A. degree is available with specializations in Italian literature and language.

Foreign Language Requirement

Reading knowledge of one other foreign language approved by the graduate adviser or successful completion of courses through at least level three is required. This requirement must be met at least one quarter before the comprehensive examination.
Course Requirements

**Italian Literature Specialization**

(1) For the thesis plan, 12 courses are required, including Italian 200A, 200B, 200C, and 205B. At least nine courses must be in the 200 series.

(2) For the comprehensive examination plan, 12 courses are required, including Italian 200A, 200B, 200C, and 205B. The other eight courses must be distributed in three main literary periods — Middle Ages, Renaissance, modern (at least two courses in each period).

Three of these courses may be upper division if approved by the graduate adviser. Related courses in other departments, such as History 205A-205B and Art History 230, are strongly recommended.

**Italian Language Specialization**

(1) For the thesis plan, 12 courses are required, including Italian 130, 200A, 200B, 200C, 259A-259B, Latin 232, and Linguistics 100 or 140 or both. At least nine courses must be in the 200 series.

(2) For the comprehensive examination plan, 12 courses are required, including Italian 130, 200A, 200B, 200C, 259A-259B, and Latin 232 or Italian 210A or both. The others should be courses on the Middle Ages (seminar on Dante strongly recommended), Renaissance, and modern times.

No 500-series courses may be applied toward the M.A. course requirements.

**Thesis Plan**

This plan is recommended for research-oriented students of exceptional merit. If you have completed your first year of graduate work with at least a 3.7 grade-point average, you may be nominated by one of the faculty members of the department for application to the thesis plan.

At this point you must have completed Italian 200A, 200B, 200C, 205B, and at least two other graduate courses in Italian. On acceptance, the guidance committee helps you select six more graduate courses in preparation for the thesis.

The thesis must be at least 50 pages long and follow the rules and style of the UCLA Ph.D. dissertation regulations. It must be submitted in the Spring Quarter of your second year of graduate work. After completion of the thesis, you must pass an oral examination testing your knowledge in the field of the thesis and your general competence in Italian literature.

**Comprehensive Examination Plan**

In general, the department favors the comprehensive examination plan, which consists of a minimum four-hour written examination to be given before the final examination period of the Fall and Spring Quarters. The examination tests your general competency and does not have major and minor fields of emphasis. After the written examination, you are required to take an oral examination. In case of failure, you may be reexamined once, subject to approval by the examination committee and the chair of the department.

**Ph.D. Degree**

**Admission**

Three letters of recommendation from professionals in the field of Italian studies should be sent to the Graduate Adviser, Department of Italian, 340 Royce Hall, UCLA, Los Angeles, CA 90024-1535.

Prerequisite for entering the department's doctoral program is an M.A. in Italian literature from UCLA or another university in the U.S. or the equivalent. Students with a master's degree from another institution, or the equivalent, are required to pass part 1 of the Ph.D. qualifying examinations by the end of their third quarter in residence. They should expect to take part 2 of the examinations after approximately eight quarters.

Students admitted to the Ph.D. program without the M.A. degree must take the qualifying examinations (part 2) at the end of the twelfth quarter in residence, carrying a normal course load.

Students holding the M.A. from UCLA normally take part 2 of the qualifying examinations at the end of their sixth quarter in residence.

**Major Fields or Subdisciplines**

Two centuries of Italian literature in the medieval, Renaissance and baroque, or modern areas comprise the major fields, while two centuries of Italian literature from any of these areas make up the minor fields.

You may select a major in a literary genre or a minor outside the department, provided that it relates to your major field of specialization and has the department's approval.

**Foreign Language Requirement**

This requirement is normally met by passing courses through level three in at least two of the following languages: Latin, French, German, Spanish (subject to departmental approval). A foreign language used to satisfy the requirement for the master's degree in Italian may be applied toward fulfillment of this requirement. The language requirement must be satisfied before taking part 2 of the qualifying examinations, either by Educational Testing Service (ETS) or departmental examination or by petition for course credit to the Graduate Division.

**Course Requirements**

In addition to those required for the master's degree, at least 10 other quarter courses, of which no more than two 596 courses may apply, are required. You also take such courses as your guidance committee may prescribe for the qualifying examinations (such as Italian 596 or 597). All courses from Italian 201 on may be applied toward the Ph.D. degree.

**Qualifying Examinations**

The comprehensive examination for the M.A. in Italian at UCLA corresponds to part 1 of the Ph.D. qualifying examinations.

The department also requires both written and oral qualifying examinations (part 2), which must be taken during the same academic year, although not necessarily during the same quarter. Normally taken six quarters after the M.A. degree, the written examination consists of two parts: an eight-hour examination in your major field and a six-hour examination in your minor field. Additionally, a two-hour University Oral Qualifying Examination is required for advancement to doctoral candidacy. A summary of requirements entitled "Regulations for the Ph.D. Examination" is available in the department. In case of failure, you may be reexamined on unanimous approval of the guidance committee, after at least one academic quarter of additional residence.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**

After acceptance of the dissertation in its final form, you may be required to take an oral examination which covers principally the field within which the dissertation falls.

**Lower Division Courses**

Enrollment in the Italian open language laboratory is required of all students in Italian 1, 2, 2A, and 3.

1. Elementary Italian — Beginning. Lecture, five hours; laboratory, one hour. Mrs. Cheeseman in charge

1A. Elementary Italian — Accelerated (8 units). Lecture, 10 hours; laboratory, two hours. Designed for those students having the capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 1 and 2. Mrs. Cheeseman in charge

1G. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Mrs. Cheeseman in charge

2. Elementary Italian — Continued. Lecture, five hours; laboratory, one hour. Prerequisite: course 1 or one year of high school Italian. Mrs. Cheeseman in charge
Upper Division Courses

Sixteen quarter units in Italian or equivalent are required for admission to any upper division course. Upper division courses for the majors are conducted in Italian.

102A-102B-102C. The Italian Cultural Experience. Lecture, three hours. A study of the cultural development of Italy conducted especially with a view to contemporary situations:
102A. From the Disruption of Roman Unity to Feudal and Communal Society and Culture.
102B. From Renaissance Civilization to the Baroque Age.
102C. Historical and Cultural Issues from the Age of Enlightenment to Our Day.

105. Tradition and Innovation in Italian Culture. Lecture, three hours. Italy's basic social structures and cultural institutions delineated through their historical development and as they are manifest in the stresses to which the industrializing state currently is subject.
Mr. Tuttle
110A-110B. Divine Comedy in English. Lecture, three hours.

113A-113B. Dante's Divine Comedy. Lecture, three hours. Focus on the Divine Comedy: Selected readings from the text integrated with relevant information on scholasticism, classical tradition, medieval literature and poetic, and the sociopolitical structure of Dante's world.

113A. General Introduction and Readings from Inferno.
113B. Readings from Purgatorio and Paradiso.
Mr. Cecchetti

114A-114B. Italian Literature of the Middle Ages. Lecture, three hours. Emphasis on Sti Novo, Dante's minor works, Petrarach, and Boccaccio.
Mrs. Cottino-Jones, Mr. Tuttle

Mr. Betti

118. Italian Literature of the 19th Century. Lecture, three hours. Emphasis on Goldoni, Parini, Alfieri.
Mr. Betti

119. Italian Literature of the 19th Century. Lecture, three hours. Survey of the Romantic Age as it expresses values and national aspirations of 19th-century Italy. Emphasis on the innovative approach to poetry as seen in the works of Foscolo and Leopardi and to the sociohistorical novels of Foscolo, Manzoni, and Verga.
Mr. Betti

120. Italian Literature of the 20th Century. Lecture, three hours. A brief introduction to Italian literature after unification of the country, followed by concentration on selected writers seen in their political, social, and artistic contexts.
Mr. Cecchetti, Ms. Re

121. Italian Cinema. Lecture, three hours. A comparative study of specific literary works and their translations into films and of the different techniques in the two forms of expression. Texts include literary works, screenplays, and works on literary and film theory.

122. Italian Theater. Lecture, three hours. Emphasis on what is alive today (read and performed) in the Italian theater. Texts range from the Renaissance to the present.
Mrs. Cottino-Jones, Ms. Re

130. Advanced Grammar and Composition within a Literary Context. Lecture, three hours. Prerequisite: course 25. A study in depth of the idiomatic phenomena of the language from both the grammatical, and syntactical points of view within a literary context.
Mrs. Cheeseman

Graduate Courses

200A. Readings in Italian Literature. Lecture, three hours. Prerequisite: graduate standing. The literature of the generation dominated by the Franciscan movement, proceeding through the culture of Frederick II to the three classics of the 14th century — Dante, Petrarach, and Boccaccio. The early humanists, the postclassic generation, and the cultural boom under Lorenzo il Magnifico.
Mr. Chiappelli, Mrs. Cottino-Jones

200B. Readings in Italian Literature. Lecture, three hours. Prerequisites: course 200A, graduate standing. The literature of the High Renaissance of Italy in its three most popular genres (lyric poetry, chivalric romance, and comedy), proceeding through the Counter-Reformistic culture, especially of northern and southern Italy. The main Enlightenment figures and the cultural evolution stemming from them.
Mr. Betti, Mr. Chiappelli
Scope and Objectives
Kinesiology is the study of the biochemical, morphological, and general physiological responses of the human to exercise and environmental conditions; the description of movement and the neuromuscular and biomechanical determinants of motor performance; and the development, acquisition, and modification of motor performance. The purpose of this study is intended to develop and integrate principles and concepts of human movement.

Bachelor of Science Degree
Pre-Kinesiology Major
All students intending to major in kinesiology are identified as pre-kinesiology majors until the premajor requirements have been satisfied. Transfer students with 80 or more units must have completed one year of general chemistry with laboratory in order to be admitted as pre-kinesiology majors.

The pre-kinesiology major requirements are Kinesiology 12A, 12B, 14; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; Biology 5 or 7; Mathematics 3A, 3B, 3C (or 31A, 31B, 32A); Physics 6A, 6B (or 8A, 8C); one introductory statistics course; Psychology 10; and an additional course from one of the following departments: Anthropology, Psychology, or Sociology.

Premajor courses outside the department may be taken for a letter grade or on a P/NP basis. Kinesiology 12A, 12B, and 14 must be taken for a letter grade (certain certification and graduate programs also require letter grades for courses). All premajor courses must be passed with a grade of C− or better or a P and must be completed with an overall grade-point average of 2.0 or better.

The Student Affairs Office in 2834 Slichter Hall petitions you into the major after you complete the premajor courses.

If you are in the kinesiology major or premajor, you must confer with the departmental counselor on a regular basis. If you are interested in this major and are transferring from another college or university, you should consult with the departmental counselor at least six months prior to your expected enrollment date at UCLA. Call the Student Affairs Office for an appointment.

Transfer credit for UCLA Extension coursework and for any departmental courses (including courses 12A, 12B, 14) is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required Core Courses: Kinesiology 120, 122, 124, 126.

A total of five upper division electives (20 units) is required. Although all five courses may be taken in kinesiology, three upper division courses (12 units) must be taken in the department. Courses 193, 196A-196B, and 400-level courses may not be applied toward this requirement. One or two of the five courses (up to eight units) may be taken in other departments related to your course of study. A list of approved extra-departmental courses is available in the Student Affairs Office.

A C average must be maintained in all upper division courses taken in the department. All upper division courses required for the major (including extra-departmental electives) must be taken for a letter grade.

Honors Program
The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.5 GPA in upper division kinesiology courses, completion of the premajor courses, and identification of a sponsoring faculty adviser. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

Graduate Study
The department offers Master of Science and Doctor of Philosophy degrees in the following areas of concentration: (1) biomechanics, (2) cardiorespiratory function and adaptation, (3) movement performance and learning, (4) musculoskeletal function and adaptation, (5) neural control of movement, (6) social psychological aspects of human movement.

When applying for graduate work, you should specify an interest in one of these areas of concentration.

Admission
Applicants for graduate study are expected to have completed an undergraduate degree in kinesiology or the equivalent as outlined below under the master’s and doctoral programs. A grade-point average of at least 3.0 (B) in all upper division undergraduate coursework is required. A departmental faculty committee considers applicants on the following bases: (1) prior scholastic performance, (2) three letters of recommendation, and (3) applicant’s statement of purpose, which should include (a) relevant background or preparation, (b) field of emphasis, specific study interests, and type of research sought, (c) expectations, goals, degree objective, (d) specific courses in the department to be taken and one or two departmental faculty members whose research area parallels the study interest.

A list of faculty names and research interests is available from the Department of Kinesiology, 2834 Slichter Hall, UCLA, Los Angeles, CA 90024-156B. Applicants are encouraged to communicate directly with the faculty; personal interviews are required for Ph.D. applicants.

Aptitude tests, including the Graduate Record Examination (GRE) or Miller’s Analogies, are not required but may be submitted for consideration.

Applications for all quarters must be submitted by Fall Quarter deadlines, since applications for all quarters are reviewed only in January/February each year.

Master of Science Degree
Applicants without an undergraduate degree in kinesiology will receive serious consideration, particularly if undergraduate or other experiences provide a strong relationship to kinesiology. However, applicants are expected to complete minimum undergraduate preparation prior to graduate work. Completion of course deficiencies may take as much as an additional year of coursework, which may not be applied toward the master’s degree. Required undergraduate preparation is equivalent to the following: (1) four required courses selected from cellular biology, inorganic chemistry, organic chemistry, introductory psychology, physics (mechanics), physics (electricity), calculus (differential), and calculus (integral), (2) one course each in statistics, human anatomy, and human physiology required for the B.S. degree in Kinesiology, (3) the four kinesiology core courses required for the B.S. degree, and (4) one elective from the proposed area of graduate study. Additionally, applicants in the physiologically based fields (cardiorespiratory, musculoskeletal, and neural) are required to have one year of inorganic chemistry, one year of organic chemistry/biochemistry, and two quarters of calculus.

Course Requirements
The Master of Science in Kinesiology requires nine courses: five graduate-level kinesiology courses, two courses from a related field, one second-level statistics or research design course, and one other course from either kinesiology or a related field.

A minimum of six of the nine courses must be graduate-level (200) courses, toward which one 596 course may be applied. Lists of approved related field and statistics or research design courses may be obtained from the department.

A total of eight units of Kinesiology 596 may be taken for credit; only one course (four units) may be applied toward the minimum course requirement for the master’s degree. Courses 597 and 598 may not be applied toward any of the course requirements for the degree. There is no limit on the number of times a master’s student may enroll in course 597 or 598.
Thesis Plan
Students who elect the thesis plan for the master's degree must report the results of an original research investigation. Under the guidance of the thesis committee, you must propose a problem area or outline of study, conduct original research in a specific area, and report the results. With committee approval, you may submit either a thesis manuscript or a manuscript suitable for publication.

Comprehensive Examination Plan
Students who elect this plan must achieve a passing mark on a comprehensive examination. The general purpose of the plan is that students acquire a thorough understanding of a reasonably broad problem area, which must be specified in consultation with an advisor. The selection of courses in the department and the related field must be pertinent to the problem area, and justification is required with the petition for advancement to candidacy.

While a written examination is required, the committee may utilize additional means to evaluate the competency of the candidate. If you fail the comprehensive examination, you may not repeat it until the following quarter. Only one repetition is allowed.

Ph.D. Degree
Doctoral students are expected to have the basic preparation coursework in kinesiology required of master's students. Six of the eight preparation courses required for the M.S. are required of doctoral students. You must show solid educational background in one of the six kinesiology areas of concentration, and undergraduate and prior graduate work is evaluated in terms of your declared area of interest.

Major Fields or Subdisciplines
You select one of the six areas of concentration as a major and one area as a minor. These areas are expected to relate to your proposed dissertation problem.

Course Requirements
Fourteen courses are specified for the doctoral degree, some of which may be satisfied by prior graduate work. Selection of all courses must be approved by the guidance committee and is determined in part by the selection of major and minor areas of concentration.

A total of eight departmental courses is required, two of which must be seminars. One seminar course requirement may be met by enrolling in two quarters of Kinesiology 290. Two 596 courses may be applied toward the degree requirements.

A minimum of three courses or 12 units in a related field outside the department is required. An approved list of courses in anatomy, biochemistry, biology, biomechanics, education, engineering, immunology, neuroscience, pharmacology, physiology, psychology, public health, and radiological sciences is maintained by the department. A fourth course, either departmental or in a related field outside the department, and two department-approved advanced statistics courses are also required.

First-Year Doctoral Review
After completion of three summers of coursework, the graduate affairs committee conducts a doctoral review to determine whether you (1) continue in the doctoral program, (2) enter the master's program, or (3) discontinue graduate study in the department. The review must be completed by the end of the fourth quarter of graduate work as a doctoral student.

Teaching Experience
Each candidate must complete two quarters as a teaching assistant. All teaching evaluations become a permanent part of your departmental record.

Qualifying Examinations
Each doctoral student must take two written qualifying examinations: one in a major area and one in a minor area. These examinations, administered in Fall, Winter, and Spring Quarters, are scored (1) passed at the Ph.D. level of achievement, (2) passed at the master's level of achievement, or (3) failed. To continue in the doctoral program, you must pass each examination at the Ph.D. level of achievement. If you fail to complete (1) the master's degree, (2) discontinue graduate work in the department, or (3) restructure the area examinations once at the discretion of the guidance committee.

After successfully passing the departmental written qualifying examinations, a University Oral Qualifying Examination is conducted by the doctoral committee. Normally, the examination is held immediately following the completion of written examinations, all coursework, and two quarters of research work with your major professor. If you do not pass, the examination may be rescheduled at the discretion of the doctoral committee.

After advancement to candidacy, you must complete and submit a dissertation which meets the approval of the doctoral committee.

Final Oral Examination
A final oral examination is generally required, although the members of the doctoral committee who are to approve the dissertation have the option to waive it in exceptional cases. The major emphasis in this examination is a defense of the dissertation.

Lower Division Courses
12A. Introduction to Human Physiology. Formerly numbered 12B. Lecture, three hours; laboratory, 90 minutes. Prerequisite: Biology 5 or 7, Chemistry 25, or Physics 3B. An introduction to human physiology. Topics include cell and muscle physiology, cellular neurophysiology, and endocrinology.

Mr. Chudler, Mr. Vailas
12B. Introduction to Human Physiology. Formerly numbered 12B. Lecture, three hours; laboratory, 90 minutes. Prerequisite: course 12A. An introduction to human physiology. Topics include respiration and cardiovascular, renal, and gastrointestinal physiology.

Mr. Feldman, Mr. Gaesser
13. Introduction to Human Anatomy (6 units). Lecture, four hours; laboratory, four hours. Not intended for kinesiology majors; a combination of courses 13 and 14 is equivalent to nine units. A structural survey of the human body, including the skeletal system, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens.

Ms. Phillips
14. Human Neuromuscular Anatomy (6 units). Lecture, four hours; laboratory, four hours. A thorough study of the skeletal, articular, muscular, and nervous systems. Special emphasis on relating these body structures to human movement capabilities. Laboratory includes examination of dissected human cadaver specimens.

Ms. Phillips

Upper Division Courses
112. Mechanism of Adaptation in Mineralized Tissues. Prerequisite: course 124. Recommended prerequisite or corequisite: course 122 or consent of instructor. An introduction to physiological mechanisms associated with adaptation of cartilage and bone. Emphasis on biochemical, biomechanical, and structural modifications of mineralized tissues for accommodating alterations of tissue load history and some diseases. Special topics include adaptive processes associated with exercise, osteoporosis, immobilization, and space flight.

Mr. Vailas
115. Aquatic Kinesiology. Lecture, three hours; laboratory, two hours. Prerequisite: course 124. A study of man's adaptation to the aquatic environment.

Mr. Egstrom

Mr. Barnard
117. Conditioning for Maximum Performance. Prerequisite: course 124. Study of factors and conditions accelerating and retarding levels of performance and work under various physiological and environmental conditions.

Mr. Egstrom
118. Cellular Dynamics of Exercise. Prerequisites: courses 124, 126. Cellular responses to acute and chronic exercise.

Mr. Gaesser
120. Behavioral Bases of Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework (except for course 128). An examination of motor performance and motor learning and the influence of selected psychological variables on human movement.

Mr. Scanlan, Mr. Schmidt
122. Biomechanical Bases of Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework (except for course 128). Kinematic and kinetic principles underlying human movement, focusing on the human neuromuscular and skeletal systems.

Mr. Gregor, Mr. Zerhnie
124. Cardiorespiratory Bases and Environmental Factors Affecting Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework. Response of the cardiovascular and respiratory systems to acute and chronic exercise, environmental stress, and adaptation. Mr. Barrand, Mr. Egstrom, Mr. Feldman

125. Neuromotor and Metabolic Bases of Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: course 124 or consent of instructor. Movement problems of the musculoskeletal system, including abnormal motor control and metabolic processes underlying movement and adaptation to exercise. Mr. Chandler, Mr. Edgerton, Ms. Smith

C132. Biomechanics of Musculoskeletal Injury (Formerly numbered 132.) Prerequisites: course 122, consent of instructor. Analysis of electromyographic signals in relation to muscle activity. Mr. Schmidt

134. Electromyographic Assessment. Lecture, two hours; laboratory, three hours. Prerequisite: course 122. Techniques of electromyographic analysis combining theoretical aspects with laboratory experiences in the regulation of muscle fiber properties and adaptation to regular exercise. Ms. Phillips (F, Sp)

139. Dissection Anatomy. Lecture, two hours; laboratory, six hours. Prerequisites: course 122, consent of instructor. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply. Ms. Sides (F, H)

140. Mechanisms of Neuromuscular Control. Prerequisite: course 126. Recommended: Psychology 15 or 115. Advanced topics in the neurophysiology of the sensorimotor systems. Mr. Chandler, Ms. Smith

141. Neuromotor Control of Posture and Movement. Prerequisites: courses 120 and 122 (may be taken concurrently), 125. An examination of the theories for the neuromotor control of posture, locomotion, and voluntary arm movements. Ms. Smith

C153. Acquisition of Motor Skills. Prerequisite: course 120. An investigation into the principles of the acquisition of motor skills, such as those applicable to industry, musical performance, or sport. Major topics include methodological considerations, the structure of practice sessions, feedback and knowledge of results, theories of motor learning and retention, and the elective requirements for the major. Ms. Smith

C160. Motor Movement and Motor Control. Prerequisite: course 120. An analysis of primary human movement behavior and control, with emphasis on the behavioral level of analysis. Topics include methodological issues, open- and closed-loop control, and individual differences. May be concurrently scheduled with course C253. Mr. Schmidt

165. Perceptual Motor Education. Prerequisites: course 120, consent of instructor. Examination of group dynamics in sport. Prerequisites: consent of instructor. Mr. Cratty

C178. Group Dynamics in Sport. Prerequisite: course 120 or consent of instructor. Examination of group dynamics in sport. Prerequisites: consent of instructor. Mr. Cratty

191A-1912. Proseminars in Kinesiology. Prerequisites: upper division standing, consent of instructor. Limited to 15 students. Advanced study of special topics. May be repeated for credit with topic change.
29.5A-295B. Seminars in Movement Performance and Learning (2 to 4 units each). Prerequisites: courses 250 or C253 and C256, or consent of instructor. Selected topics on current issues in acquisition and performance of motor skills. Students required to present a two-hour seminar.

297A-297B. Seminars in Social Psychological Aspects of Human Movement (2 to 4 units each). Prerequisite: course 272 or M273 or consent of instructor. Selected topics on current issues in the social psychological aspects of human movement. Students required to present a two-hour seminar.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. In-Service Practicum for Teaching Assistants in Kinesiology (2 units). Prerequisite: consent of instructor. Required of all teaching assistants. Supervised practicum in teaching laboratory courses in kinesiology; material preparation and use of teaching aids. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent: of UCLA graduate adviser and graduate dean. Consists of two hours of supervised work each week for up to eight units. May not be repeated for credit. S/U grading.

596. Individual Studies for Graduate Students (2 to 4 units). Maximum: 12 units. May be concurrently scheduled with course C178. Yes. Mr. Cratty, Ms. Scanlan

290. Research Issues in Kinesiology (2 units). Seminar. Prerequisite: consent of instructor. Discussion of current research issues. Topics selected by participants in the seminar. Two 90-minute periods may be used to satisfy one seminar course requirement for the graduate program.

291A-291B. Seminars in Cardiorespiratory Function and Adaptation (2 to 4 units each). Prerequisites: courses 230A, 230B, consent of instructor. Selected topics on cardiorespiratory function and adaptation. Students required to present a two-hour seminar.

292A-292B. Seminars in Biomechanics (2 to 4 units each). Prerequisites: courses 230A, 230B, consent of instructor. Selected topics in biomechanics of movement. Students required to present a two-hour seminar.

293A-293B. Seminars in Musculoskeletal Function and Adaptation (2 to 4 units each). Prerequisites: courses 218 and M206, or consent of instructor. Selected topics on the musculoskeletal determinants of movement, the metabolic aspects of exercise, and the mechanics of connective tissue. Students required to present a two-hour seminar.

598. Research for and Preparation of M.S. Thesis (2 to 16 units). To be arranged with faculty member serving as the student's comprehensive examination chair or doctoral committee chair. Course section identified by a two-letter code using faculty member's initials (see department for code). May not be applied toward the M.S. or Ph.D. course requirements. May be repeated for credit. S/U grading.

599. Research for and/or Preparation of Ph.D. Dissertation (2 to 16 units). Course section identified by a two-letter code using faculty member's initials (see department for code). May not be applied toward the Ph.D. course requirements. May be repeated as necessary. S/U grading.

Scope and Objectives
UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These course offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.

The Latin American Studies Program, coordinated through UCLA's Latin American Center, offers the Bachelor of Arts and Master of Arts degrees. In the undergraduate major students develop a program combining language and methodological training with interdisciplinary studies in one of three areas: arts and humanities, social sciences, or ecology and environment. At the graduate level, students pursue more specialized coursework and interests, culminating in an interdisciplinary research study. Cooperative degree programs with the UCLA Schools of Architecture and Urban Planning, Education, Engineering and Applied Science, Library and Information Science, Management, and Public Health provide the opportunity to combine the M.A. in Latin American Studies with a master's degree in a professional field.

Bachelor of Arts Degree
Undergraduate studies of the Latin American region are designed to serve the needs of (1) students desiring a general education focused on the Latin American cultural region, (2) students planning to enter business, government, or international agency service, (3) students preparing to teach social sciences or language, and (4) students preparing for advanced academic study of Latin America.

Preparation for the Major
You must complete all preparation courses with a C (2.0) in each course; the courses are applicable toward the Letters and Science lower division general education requirements.

Foreign Language Requirement
Language requirements are uniform for all students in the major regardless of core area. Proficiency in two languages equivalent to (1) Spanish 25 and Portuguese 3 or (2) Portuguese 25 and Spanish 5 is required. In lieu of Portuguese 1, 2, and 3, you may take Portuguese 102A-102B which is designed for students with a background in Spanish. An indigenous language of Latin America (i.e., Quechua) may be substituted for the minor language.

Course Limitations
You may not take more than eight units of Latin American Studies 199 for letter-grade credit nor more than eight units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, you must have advanced junior standing and an overall GPA of 3.0, or senior standing.

Double Majors
Through judicious use of electives, you may find it possible to obtain the B.A. degree with two majors (e.g., Latin American studies and history). Interested students who have achieved junior standing should consult the undergraduate advisers of both departments involved, initiating the appropriate petition with the undergraduate adviser in Latin American Studies.

Study in Latin America
You are encouraged to spend up to one year in Latin America either (1) to study with an education abroad program, (2) to study in Latin American universities, (3) to conduct research, or (4) to complete an internship in an international or development agency. Full credit is granted according to the individual programs arranged in consultation with the undergraduate adviser. Proposals must be presented in writing to the interdepartmental committee.

Core Areas
You select one of three core areas as the focus of your major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

Core I: Arts and Humanities
Preparation: Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Spanish and Portuguese M44; Art History 55A or 55B or Music 91K and Dance 73B.

Core Area: Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) Core Concentration: Five courses from literature and folklore or fine arts (art, music, dance, theater arts) or linguistics. Only one course from the electives list may be applied toward the core concentration.

(2) Theory and Methods: One course from theory and methods.

(3) Internal Breadth: Four additional courses from the arts and humanities core area but outside the core concentration. No more than two of these may be electives.
External Breadth: From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the social sciences core (e.g., history) and at least one is developed within the ecology and environment core (e.g., public health). No more than three external breadth courses may be electives.

Approved Undergraduate Course List

(1) Literature and Folklore

Folklore and Mythology M109. Mexican and Chicano Folklore in Cultural Context
M149. Folk Literature of the Hispanic World
History 169. Latin American Etiology
Portuguese (Spanish and Portuguese) 130A-130B. Survey of Brazilian Literature
C131. Colonial Brazilian Literature
C132. Romanticism in Brazilian Literature
C133. Naturalism, Realism, and Symbolism in Brazilian Literature
C134. 20th-Century Brazilian Literature: Poetry and Drama
C135. 20th-Century Brazilian Literature: Novel
Spanish (Spanish and Portuguese) 136A-136B. Survey of Spanish-American Literature
137. Literature of Colonial Spanish America
139. Romanticism and Realism in Spanish-American Literature
142. 20th-Century Spanish-American Literature: Fiction and the Essay
143. 20th-Century Spanish-American Literature: Poetry and Drama
144. Mexican Literature
M149. Folk Literature of the Hispanic World
170B. Senior Honors Seminar: Topics in Spanish-American Literature

Theory and Methods

Folklore and Mythology 101. Introduction to Folklore
190. Selected Topics in Folklore and Mythology Studies
199. Special Studies in Folklore
Portuguese (Spanish and Portuguese) 199. Special Studies
Spanish (Spanish and Portuguese) 119A. Introduction to the Study of Literature: Prose
119B. Introduction to the Study of Literature: Poetry and Drama
199. Special Studies

(2) Fine Arts

Art History (Art, Design, and Art History) C117A. Pre-Columbian Art of Mexico
C117B. Pre-Columbian Art of the Maya
C117C. Pre-Columbian Art of the Andes
Dance 173B. Dance of Mexico
183A. Dance in Latin America
Film and Television (Theater, Film, and Television) 106C. History of African, Asian, and Latin American Film
Music 131A-131B. Music of Hispanic America
157. Music of Brazil

Theory and Methods

Anthropology 118A, 118B. Museum Studies
133R. Aesthetic Anthropology
137. Ethnography on Film
Art History (Art, Design, and Art History) *199. Special Studies in Art
Dance *199. Special Studies in Dance
Film and Television (Theater, Film, and Television) 199. Special Studies in Theater Arts
Music *M180. Analytical Approaches to Folk Music
*190A-C190B. Proseminar in Ethnomusicology
*199. Special Studies in Music

(3) Linguistics

Portuguese (Spanish and Portuguese) 100A. Phonology and Morphology
*100B. Syntax
*M118A. History of Portuguese and Spanish: Phonology
*M118B. History of Portuguese and Spanish: Morphology and Syntax
Spanish (Spanish and Portuguese) *100A. Introduction to the Study of Spanish Grammar: Phonology and Morphology
*100B. Introduction to the Study of Spanish Grammar: Syntax
*115. Applied Linguistics
*M118A. History of Portuguese and Spanish: Phonology
*M118B. History of Portuguese and Spanish: Morphology and Syntax
*119A. Introduction to the Study of Literature: Prose
*119B. Introduction to the Study of Literature: Poetry and Drama
*170C. Senior Honors Seminar: Topics in Hispanic Linguistics

Theory and Methods

Anthropology *143A, 143B. Field Methods in Linguistic Anthropology
Linguistics *100. Introduction to Linguistics
*103. Introduction to General Phonetics
*110. Introduction to Historical Linguistics
*120A. Linguistic Analysis: Phonology
*120B. Linguistic Analysis: Grammar
*164. Modern Theories of Language
*C165A. Linguistic Theory: Phonology
*C165B. Linguistic Theory: Grammar
*170. Language and Society: Introduction to Sociolinguistics
*199. Special Studies in Linguistics
Portuguese (Spanish and Portuguese) *199. Special Studies
Spanish (Spanish and Portuguese) *199. Special Studies

(4) Electives

Anthropology *M140. Language in Culture
Film and Television (Theater, Film, and Television) 112. Film and Social Change
Folklore and Mythology *118. Folk Art and Technology
*190. Selected Topics in Folklore and Mythology Studies
Latin American Studies 197. Interdisciplinary Topics in Latin American Studies
199. Special Studies in Latin American Studies
Music *140A. Musical Cultures of the World
*M154A-M154B. The Afro-American Musical Heritage

Core II: Social Sciences

Preparation: Two courses from History 8A, BB, BC; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Economics 40 or Sociology 18 or Statistics 50.

Core Area: Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) Core Concentration: Five courses from anthropology and sociology or economics or geography or history or political science. Only one course from the electives list may be applied toward the core concentration.

(2) Theory and Methods: One course from theory and methods.

(3) Internal Breadth: Four additional courses from the social sciences core area but outside the core concentration. No more than two of these may be electives.

External Breadth: From the approved list, six upper division courses outside the social sciences core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the arts and humanities core (e.g., fine arts) and at least one is developed within the ecology and environment core (e.g., public health). No more than three external breadth courses may be electives.

Approved Undergraduate Course List

(1) Anthropology and Sociology

Anthropology 114P. Ancient Civilizations of Western Middle America (Nahua Sphere)
114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)
114R. Ancient Civilizations of Andean South America
166. Comparative Minority Relations
M172T. Ethnography of the Old World
173P. Cultures of Middle America
173Q. Latin American Communities
174P. Ethnography of South American Indians
174Q. Ethnography of South American Indians
Sociology 186. Latin American Societies

Theory and Methods

Anthropology *115P. Archaeological Field Training
*115G. Archaeological Research Techniques
*115R. Strategy of Archaeology
116P. Laboratory Analysis in Archaeology
*M116Q. Dating Techniques in Archaeology
*118A, 118B. Museum Studies
136P. Ethnology: Field Training
*M136O. Laboratory for Naturalistic Observations: Developing Skills and Techniques
137. Ethnography on Film
138. Methods and Techniques of Ethnology
139. Field Methods in Cultural Anthropology
186A-186B. Quantitative Methods and Models in Anthropology
*199. Special Studies in Anthropology
Sociology *104. Introduction to Sociological Research Methods
*112. Introduction to Mathematical Sociology
*199. Special Studies

(2) Economics
Economics *110. Economic Problems of Underdeveloped Countries
*111. Theories of Economic Growth and Development
*112. Policies for Economic Development
*190. International Economics
*191. International Trade Theory
*192. International Finance

Theory and Methods
Economics *103A-103Z. Upper Division Research Seminar: Applications of Economic Theory
*M135. Economic Models of Public Choice
*M136. Economic Models of Political Conflict and Conflict Resolution
*199. Special Studies in Economics
Management *197. Special Topics in Management

(3) History
History 165A-165B. Colonial Latin America
165C. Indians of Colonial Mexico
166. Latin America in the 19th Century
167A-167D. Latin America in the 20th Century
168. History of Latin American International Relations
169. Latin American Eliteolore
170A. Latin American Cultural History
170B. Classic Travel Accounts of Latin America since 1735
171. Mexican Revolution since 1910
173. Modern Brazil
174. Brazilian Intellectual History
197. Undergraduate Seminar: Latin America

Theory and Methods
History *101. Introduction to Historical Practice
*199. Special Studies in History

Library and Information Science 111C. Ethnic Groups and Their Bibliographies: Latino History and Culture

(4) Political Science
Political Science 130. Politics of Latin American Economic Development
131. Latin American International Relations
*139A-139Z. Special Studies in International Relations: Latin America
*149A-149Z. Special Studies in Politics: Latin America
163A-163B. Government and Politics in Latin America
169A-169Z. Special Studies in Comparative Politics: Latin America
199. Readings in Political Science: Latin America

Theory and Methods
Political Science *102. Statistical Analysis of Political Data
*104A-104B. Introduction to Survey Research
*M105. Economic Models of Public Choice
*119A-119Z. Special Studies in Political Theory
*G137A-137B. International Relations Theory
*146. Political Behavior Analysis
*168S. Comparative Political Analysis

(5) Geography
Geography 121. Conservation of Resources: Underdeveloped World
*129. The World's Ecosystems: Problems and Issues
*142. Population Geography
181. Middle America
182A. Spanish South America
182B. Brazil
*199. Special Study

Theory and Methods
Geography *171. Quantitative Analysis

(6) Electives
Anthropology *132. Technology and Environment
*134. Personality and Cultural Systems: Enculturation
*150. The Study of Social Systems
*153. Evaluation of Human Societies
*161. Development Anthropology: Green Revolutions
*M163. Women in Culture and Society
*167. Urban Anthropology
*M168. Health in Culture and Society
Economics *120. Introduction to Urban and Regional Economics
*121. Urban Economic Analysis
*180. Comparative Economic Systems
Geography *108. World Vegetation
*129. Problems of the Environment: Seminar
*140. Political Geography
*148. Economic Geography
*150. Urban Geography
*152. World Cities
History M159A, M159B. History of the Chicano Peoples
Latin American Studies 197. Interdisciplinary Topics in Latin American Studies
199. Special Studies in Latin American Studies

Political Science *124. International Political Economy
*167. Ideology and Development in World Politics
*181. Comparative and Development Administration
*183C. Comparative Urban Government
Sociology *116. Social Demography
*157. Social Stratification
*182. Political Sociology
*184. Social Change

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Core III: Ecology and Environment
Preparation: Two courses from History 8A, 8B, 8C; Latin American Studies 99; Geography 5; Statistics 50.
Core Area: Ten upper division courses from the approved list of Latin American courses distributed as follows:
(1) Core Concentration: Five courses from the core area. Only one course from the electives list may be applied toward the core concentration.
(2) Theory and Methods: One course from theory and methods.

(3) Internal Breadth: Four additional courses from the ecology and environment core area to be selected from theory and methods core courses or electives.
External Breadth: From the approved list, six upper division courses outside the ecology and environment core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the arts and humanities core (e.g., fine arts) and at least one is developed within the social sciences core (e.g., history). No more than three external breadth courses may be electives.

Approved Undergraduate Course List
Geography 121. Conservation of Resources: Underdeveloped World
128. The World's Ecosystems: Problems and Issues
*142. Population Geography
181. Middle America
182A. Spanish South America
182B. Brazil
*199. Special Study
Public Health M115. Disease Problems of Socioeconomic and Political Impact in Latin America
174E. Health, Disease, and Health Services in Latin America

Theory and Methods
Anthropology *186A-186B. Quantitative Methods and Models in Anthropology
Geography *171. Quantitative Analysis
Public Health 100A, 100B, 100C. Introduction to Biostatistics
181. Introduction to Social Research Methods in Health

Electives
Anthropology *132. Technology and Environment

Latin American Studies 197. Interdisciplinary Topics in Latin American Studies
199. Special Studies in Latin American Studies

Public Health *161. Nutrition and Health
Sociology *116. Social Demography

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.
Master of Arts Degree

Admission
In addition to University minimum requirements, the B.A. degree in Latin American Studies constitutes the normal basis for admission. Applicants with a degree in another field can be admitted but must complete certain undergraduate prerequisites subsequent to admission. Applicants with Latin American field experience or special methodological studies are given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

(1) Three academic letters of recommendation, unless you have been away from school for some time, in which case one of the letters may be from an employer.

(2) A minimum of a 3.0 or B average in the junior/senior years of college.

(3) A statement of purpose discussing your background in Latin American studies, proposed program of study, and future career plans.

(4) A minimum score of 1,000 on the General Test (combined verbal and quantitative sections) of the Graduate Record Examination (GRE).

(5) A résumé or curriculum vitae describing academic and Latin American experience.

Students are admitted each quarter. Application deadlines are November 1 for Winter Quarter, February 1 for Spring Quarter, and January 15 (to be considered for financial assistance) or May 15 for Fall Quarter.

Fellowship applications for the academic year are due on January 15 prior to the Fall Quarter for which application is made. Prospective students may write for departmental brochures to the Academic Programs Office, Latin American Center, 10347 Bunche Hall, UCLA, Los Angeles, CA 90024-1483.

Major Fields or Subdisciplines
You are expected to develop and integrate three fields in Latin American studies, to be selected from the following: anthropology, art, economics, engineering, education, folklore, geography, history, law, library science, linguistics, management, music, political science, Portuguese, public health, sociology, Spanish, theater arts, and urban planning. At least one of the selected fields must be a social science.

Foreign Language Requirement
Proficiency equivalent to 24 quarter units of university-level Spanish and 12 quarter units of university-level Portuguese or 16 quarter units of university-level Portuguese and 20 units of university-level Spanish is required. Since these courses may not be applied toward the M.A. degree, you are encouraged to pass these proficiency levels by examination. A major Indian language of Latin America (i.e., Quechua) may be substituted for either Spanish or Portuguese. You must fulfill the foreign language requirement by examination or petition for a waiver of the examination if you have gained competency in another manner (i.e., native speaker, upper division coursework, Peace Corps service).

Course Requirements
Two plans are available. For the comprehensive examination plan, a minimum of nine courses is required, to be distributed among three fields or disciplines either on a 3-3-3 or 4-3-2 basis. Of the nine courses, five must be at the graduate level, with at least one in each of the three fields.

For the thesis plan (which requires prior approval), a minimum of 10 courses is required, to be distributed on a 4-3-3 basis among three fields. Three graduate-level courses are required in the first field, with one each in the two minor fields.

All courses must be selected from the department-approved list of courses. Other courses must be petitioned in advance.

Courses numbered in the 300 and 400 series are not applicable toward the M.A. degree.

No more than eight units of 500-series courses may be applied toward the total course requirement for the M.A. degree; no more than four units may be applied toward the five graduate courses required for the degree.

Graduate courses may be repeated unless they are lecture courses.

Comprehensive Examination Plan
In addition to course requirements, you must prepare a research paper on an approved topic that integrates two of the three fields in which coursework has been undertaken. Your research paper committee must approve your topic in advance and must receive a draft of the paper at least five weeks prior to the end of the quarter in which you plan to graduate. Committee members make recommendations for revision, evaluate the final draft and, if your work meets the University standards of scholarship, recommend the award of the M.A. degree.

Thesis Plan
Although you are generally expected to follow the M.A. comprehensive examination plan, in special cases you may be allowed to follow the M.A. thesis plan. You must develop a carefully prepared proposal that provides sound justification for the thesis plan, including provisions for funding any planned field research.

Once the thesis plan option has been approved, you select a three-member faculty thesis committee to work with you in the development of the thesis and to read, evaluate, and approve the drafts and final version. Once the final version is approved, the thesis committee recommends the award of the M.A. degree. By the end of the quarter before graduation, you must file for advancement to candidacy with the Graduate Division.

Cooperative Degree Programs
Several options are available to combine the M.A. in Latin American Studies with a professional degree. After acceptance by both the Latin American Studies Program and the respective professional school, you may pursue both degrees simultaneously. Articulated degree programs are currently available with the Schools of Education (M.Ed. in Curriculum), Engineering and Applied Science (M.S. in Environmental Science, Library and Information Science (M.L.S.), and Public Health (M.P.H.); articulated programs do not allow course credit to be applied toward more than one degree. Concurrent degree programs are available with the Graduate Schools of Architecture and Urban Planning (M.A. in Urban Planning) and Management (M.B.A.).

Lower Division Course
99. Introduction to Latin American Problems. Limited to 15 students. An interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

Upper Division Courses
M155. Disease Problems of Socioeconomic and Political Impact in Latin America. (Same as Public Health M115.) Lecture, six hours; discussion, six hours. Prerequisite: one upper division Latin American studies course. Social, economic, and political impact of important disease problems in Latin American countries.

197. Interdisciplinary Topics in Latin American Studies. Advanced interdisciplinary course for upper division students. May be repeated for credit with topic change.

200. Latin American Research Resources. (Same as History M265 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide the experience and competency required for future bibliographic and research sophistication as the basis for enhanced research results.

Graduate Courses
201. Statistical Resources for Latin American Research. The contemporary statistical materials important for research in Latin American studies. Discussion on the qualitative and interpretative aspects of the material, especially as it relates to data developed for publication in the Latin American Center's Statistical Abstract of Latin America and its Supplement Series.

| M225. Computer Methodologies in Latin American Studies and Anthropology (Same as Anthropology M225). Lecture, three hours. Prerequisite: consent of instructor. Basic principles of computing and information processing, along with their potential application in Latin American research. Examination of the impact that computers are having in Latin America. Mr. Behrens. May be repeated for credit. Mr. Wilbert. |
| M250A. Indians of South America. (Same as Anthropology M252.) Lecture, three hours. Prerequisite: consent of instructor. Survey of the literature and research topics related to Indian cultures of South America. May be repeated for credit. Mr. Bohrens. |
| 250B. Interdisciplinary Seminar in Latin American Studies. Lecture, three hours. Prerequisite: consent of instructor. Problem-oriented seminar on critical areas stressed in the University's cooperative programs in Latin America. |
| 250C. Interdisciplinary Topics in Latin American Studies. Prerequisite: consent of instructor. Reading knowledge of Spanish or Portuguese normally required. A seminar devoted to selected topics of an interdisciplinary nature. |
| M258A-M258B. Seminar in Recent Latin American History. (Same as History M258A-M258B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. A seminar devoted to selected topics of an interdisciplinary nature. In Progress grading. Mr. Wilkie. |
| 501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading. |
| 596. Directed Individual Study or Research. May be repeated, but only four units may be applied toward the minimum graduate course requirement. S/U grading. |
| 597. Preparation for M.A. Comprehensive Examination (2 to 8 units). Ordinarily taken only during the quarter in which the student is being examined. S/U grading. |
| 598. Research for and Preparation of M.A. Thesis. Only four units may be applied toward the minimum graduate course requirement. S/U grading. |

### Approved Graduate Course List

Refer to the Latin American Studies under-graduate section for the lists of approved undergraduate courses.

### Fine Arts

| Art History (Art, Design, and Art History) * | 201. Historiography of Art History |
| C218A. Pre-Columbian Art of Mexico |
| C218B. Pre-Columbian Art of the Maya |
| C218C. Pre-Columbian Art of the Andes |
| 220. Oceanic, Pre-Columbian, African, and Native North American Art |
| Dance *280A-280E. Advanced Studies in Dance Ethnology |
| Film and Television (Theater, Film, and Television) * | M200C. Ethnographic Film |
| *S28A-28B. Special Studies in Theater Arts |
| Music *280. Seminar in Ethnomusicology |

### Professional

| Architecture and Urban Planning *232A. Introduction to Regional Planning: Evolution of Regional Planning Doctrines |
| *232B. Spatial Planning: Regional and International Development |
| *235A-235B. Urbanization and Rural Development in Third World Countries |
| *236A. Urban and Regional Economic Development I |
| *236B. Urban and Regional Economic Development II |
| *236C. Urban and Regional Economic Development III |
| 239. Special Topics in Urban and Regional Development Policy |
| 246. Housing in Social and Economic Development Policy |
| 253. Social Theory for Planners |
| 266. City and Countryside in the Third World |
| 267A. Resource-Based Development Planning |
| 267B. Rural Development Issues |

### Education * | 203. Educational Anthropology |
| *204B. Introduction to Comparative Education |
| *204C. Education and National Development |
| *204D. Minority Education in Cross-Cultural Perspective |
| *204E. International Efforts in Education |
| 204F. Nonformal Education in Comparative Perspective |
| *207. Politics of Education |
| *238. Cross-National Analysis of Higher Education |
| *253B. Seminar: Education and Social Change |
| *253A. Seminar: Current Problems in Comparative Education |
| 253D. Seminar: Latin American Education |
| *253F. Seminar: Education in Revolutionary Societies |
| *253H. Seminar: The Chicano/Hispanic and Education |
| *256. Directed Independent Study |
| *259. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations |
| *258. Thesis Research |

### Engineering * | 259. Directed Individual or Tutorial Studies (selected from any of the engineering departments) |
| *259A. Preparation for M.S. Comprehensive Examination (selected from any of the engineering departments) |

### Law * | 270. International Law |
| *271. International Business Transactions |

Law and Society

4256 Bunche Hall, (213) 825-3862

Scope and Objectives

The undergraduate specialization in law and society can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in law and society. The program is designed to allow students to explore the relationships of law with ethics, economics, crime, and social and political institutions and theories.

Special Undergraduate Program

Preparation for the Specialization

Required: Political Science 10, 40, 70, and 20 or 50; two courses from History 7A, 7B, Philosophy 4, 6, 22.

Upper Division

The political science major should be completed as follows: Political Science 117; one course in Field I other than course 117; two courses in Field III; four courses in Field V; two other political science electives; six courses from Anthropology 152, Economics 172, History 151A, 151B, Philosophy 150, 151A, 151B, 157A, 157B, 166, Sociology 145, 146, 147, 169.

For further information, contact Vicki Waldman, Political Science Counselor, in the program office.
The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules which characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA’s Linguistics Department was judged second best in the nation in the quality of its faculty. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

Undergraduate Study

The majors described below are of three types: (1) a major which concentrates entirely on general linguistics, (2) several majors which combine the basic courses of the general program with a language concentration or other related fields, and (3) a major which concentrates entirely on an African language area. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have non-university teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

Bachelor of Arts in Linguistics

This major is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables the undergraduate to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

Preparation for the Major

Required: Completion of the equivalent of the sixth quarter in each of two foreign languages or the sixth quarter in one foreign language and the third quarter in each of two other foreign languages. In addition you must take two of the following: Philosophy 31, Psychology 10, one course in cultural anthropology.

The Major

Required: A minimum of 11 upper division or graduate courses, including Linguistics 100, 103, 110, 120A, 120B, and either 164, C165A, or C165B (both C165A and C165B are strongly recommended for students planning linguistics graduate work; course 164 is recommended for students not planning linguistics graduate work). The remaining five courses are electives, three of which must be linguistics courses. The other two may be in linguistics or in certain other fields as listed below. Electives have generally been selected from the following list (courses not on the list may be used as electives only in consultation with an adviser): Linguistics 104, 125, 127, 130, C135, 140, M146, M150, 160, 164, C165A, C165B, 170, 175, M176, C180, 185, 196A, 196B, 199 (if four units), African Languages 190, Anthropology 143A, 143B, Philosophy 127A, 127B, 172, Psychology 122, 123, English 121, 122, or upper division courses in a foreign language beyond the sixth quarter. In addition to the 11 upper division courses, at least three courses (which may be either upper or lower division) are required in a language other than those in the Romance, Slavic, or Germanic families. These courses may be applied toward the foreign language requirement described above under “Preparation for the Major.” If you complete an advanced language course, you are considered to have completed the equivalent of whatever courses are prerequisite to that one (e.g., if you complete French 100A, you have automatically satisfied the requirement of the sixth quarter of work in one language).

Linguistics 195, or 196A and 196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, you must consult with the department’s senior essay and honors counselor.

Specialization in Computing

Students in any of the linguistics majors (except linguistics and computer science) may select a specialization in computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 60, Linguistics C180, 185. You graduate with a bachelor’s degree in your major and a specialization in computing.

Honors in Linguistics

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or 196A/196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.
Bachelor of Arts in Linguistics and Anthropology

Preparation for the Major

Required: Completion of the sixth quarter in each of two foreign languages or the sixth quarter in one foreign language and the third quarter in each of two other foreign languages (at least three quarters must be in a language other than those in the Romance, Slavic, and Germanic families). Anthropology 33 is strongly recommended, when offered.

Bachelor of Arts in Linguistics and East Asian Languages and Cultures

Preparation for the Major

Required: Completion of the sixth quarter in either Chinese or Japanese; Philosophy 31; one course in cultural anthropology; either East Asian Languages and Cultures 40A or 40B, as appropriate; completion of the sixth quarter in one other foreign language or the third quarter in each of two other foreign languages.

The Major

Required: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two upper division electives in linguistics, French 100A, 100B, 100C, 103, 105, 106, and two elective upper division French literature courses.

Bachelor of Arts in Linguistics and Italian

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, Latin 1, 2, 3, completion of the third quarter in one other foreign language or the sixth quarter in Latin, Philosophy 31, one course in cultural anthropology.

The Major

Required: Thirteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two upper division electives in linguistics, Italian 102A, 190, and three upper division electives in Italian.

Bachelor of Arts in Linguistics and Computer Science

Premajor in Linguistics and Computer Science

Admission to the major is contingent on passing the following courses, which constitute the linguistics and computer science premajor, with a grade-point average of 3.3 or better and no grade lower than a C: Linguistics 100, Philosophy 31, Program in Computing 10A, 10B, 10C.

Preparation for the Major

Required: Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A, 10B, 10C, 30, completion of the sixth quarter in one foreign language and the third quarter in a second foreign language. Mathematics 31A and 31B must be passed with grades of C or better. Mathematics 61 is strongly recommended.

The Major

Required: Fourteen upper division courses as follows: Linguistics 100, 103, 104, 120A, 120B, either 164, C165A, or C165B (the last of these being most strongly recommended for this major), C180, 185, one upper division elective in linguistics, Computer Science 111 or 181, 131, 132, 141, 163.
Bachelor of Arts in Linguistics and Scandinavian Languages

Preparation for the Major

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, 30, completion of the sixth quarter in one other foreign language or the third quarter in each of two other foreign languages.

The Major

Required: Fourteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two upper division electives in linguistics, Scandinavian 105 and 106, or 110 twice, 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

Bachelor of Arts in Linguistics and Spanish

Preparation for the Major

Required: Spanish 1, 2, 3, 4, 5, 25, M42, M44, completion of the sixth quarter in one other foreign language or the third quarter in each of two other foreign languages.

The Major

Required: Fifteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either 164, C165A, or C165B, two additional upper division courses in linguistics (preferably 130 and 170), Spanish 100A, 100B, 115 or M118A, 119A, 119B, and two additional upper division courses in Spanish.

Bachelor of Arts in African Languages

Preparation for the Major

Required: Nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

The Major

Required: A minimum of 15 upper division courses, including three courses in an African language; African Languages 150A-150B, 190, 192; Linguistics 100, 103; three courses selected from English 114, Geography 199, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, 140, M146, 170; Music 143A, 143B, Political Science 166A, 166B, 166C. Linguistics 164 and completion of the sixth quarter in one of the following non-African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.

Graduate Study

The programs leading to the M.A. and Ph.D. degrees in Linguistics are open to qualified graduate students who are interested in descriptive, theoretical, and historical linguistics. Preparation for graduate study in linguistics should be equivalent in as many respects as possible to the undergraduate curriculum in linguistics.

There is also a graduate program leading to a Ph.D. in Applied Linguistics. It is administered by an interdepartmental committee, not by the Department of Linguistics. The requirements of the program are stated earlier in this chapter.

Master of Arts Degree

Admission

Students are normally admitted to begin residence in the Fall Quarter only (exceptions may be made by the chair). The deadline for submission of applications for the Fall Quarter is December 31 of the previous year. This deadline may occasionally be extended for applicants who do not wish to be considered for fellowship support.

Applicants are asked to submit a statement of purpose, which should include their background for graduate study in linguistics and their immediate and long-range goals in the field. They should also have three scholars under whom they have studied submit letters to the department about their qualifications. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination (GRE) must be submitted with the application. There is no minimum score requirement. In addition, applicants must submit a copy of some research paper or other piece of writing in linguistics or a closely related field.

While not required for admission, Linguistics 100, 103, 110, 120A, 120B, C165A, C165B are prerequisites to graduate courses in their respective areas. At the time of admission, students are notified which, if any, of the above courses are required due to deficiencies. However, if there is any question of whether courses taken elsewhere are equivalent to the above courses, students must discuss this with their advisers.

Prospective students may request an information brochure from the Administrative Analyst, Department of Linguistics, 2113 Campbell Hall, UCLA, Los Angeles, CA 90024-1543. This brochure explains, in particular, advising procedures and procedures for the formation of M.A. and Ph.D. guidance committees.
The following undergraduate courses or the equivalent are prerequisite to graduate courses in the corresponding areas: Linguistics 100, 103, 110, 120A, 120B, C165A, C165B. Course 103, or an examination in practical phonetics, must be passed with a grade of B or better as a prerequisite to course 210A, a required course for the Ph.D. that may be taken at the pre-M.A. level. A proficiency examination in elementary logic, which may be waived on the basis of appropriate coursework, is prerequisite to course 206.

No more than two courses (with grades of B or better) from institutions outside the University of California may be applied toward the M.A.

Thesis Plan
After completing the required courses and the foreign language examination, students selecting this plan submit a thesis based on original research to a thesis committee for approval. All students intending to proceed to the Ph.D. must adopt this plan.

If you wish to be considered for advancement into the doctoral program, a copy of the thesis, complete and clearly legible, but not necessary in final typed form, must be in the hands of the committee at least two weeks before the last day of classes in the quarter. Limits on the length of the thesis are stipulated in the departmental brochure.

Requirements for receiving an M.A. include the filing of a Petition for Advancement to Candidacy form early in the quarter during which you expect to take the degree. The thesis must be typed according to regulations set by the University. Information on these regulations and procedures is available from the Graduate Division.

Comprehensive Examination Plan
After completing the required courses and the foreign language examination, you must pass a comprehensive examination administered by a four-member committee of the faculty, appointed by the chair. This is normally an oral examination, general in scope, and results in a terminal M.A. degree.

Ph.D. Degree
Admission
General admission requirements are the same as those listed for the M.A. Students who have done their earlier graduate work at UCLA are considered for admission into the Ph.D. program on the basis of the following: (1) completion of all requirements for the M.A. and (2) the faculty’s evaluation of the quality of the M.A. thesis and of the student’s overall work and promise.

If you have already received an M.A. in linguistics from another department or institution, you must fulfill all the requirements expected of an M.A. candidate, including the coursework, unless work elsewhere is equivalent and satisfies the course requirements. There are two possible procedures: (1) you may submit a master’s thesis written at another institution or department or (2) if you have not written a thesis elsewhere, you must submit a paper equal in depth and scope to a thesis. In either case an evaluation committee is appointed and, once the committee has approved the thesis or paper, it is submitted to the entire faculty who evaluate its quality and your accomplishments and promise.

Major Fields or Subdisciplines
You may specialize in syntax, semantics, phonology, phonetics, language change, morphology, typology, socio linguistics, neurolinguistics, psycholinguistics, computational linguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

Foreign Language Requirement
A doctoral committee cannot be officially appointed until the foreign language requirement has been met. Details are given above under the “Foreign Language Requirement” for the M.A. degree.

Course Requirements
Candidates for the Ph.D. are required to have taken 36 units of graduate coursework beyond the M.A. requirements. These units must include Linguistics 210A, 210B, and 230, unless they have been used to fulfill the M.A. requirement, and eight units in an area distinct from that of the student’s major area of concentration. The 36 units may not include courses 275, 597, or 599. Of the 36 units, no more than 12 units may be in course 596A. A maximum of four two-unit seminars may be included in the 36 units. At some time, you are expected to present some of the results of your research at a meeting of the Linguistics Department Colloquium. This is a requirement for the degree.

Qualifying Examinations
In order to be advanced to candidacy, you are required to prepare two substantive research papers of publishable quality in different areas or fields of linguistics. These papers are to be submitted to and approved by a doctoral guidance committee. A written prospectus of the dissertation must be submitted to the guidance committee, with a copy for the department file, one month prior to the oral examination. At this time, provided the language requirement has been met, an official doctoral committee must be established.
M150. Introduction to Indo-European Linguistics. (Same as Indo-European Studies M150.) Prerequisite: one year of college-level study (course 3 or better) in Greek or Latin and either German or Russian. A survey of the Indo-European languages from ancient to modern times; their relationships and chief characteristics.

185. Introduction to Computational Linguistics. (Formerly numbered 145.) Prerequisites: courses 120B, C180, Program in Computing 108. Recommended: course C2006. Basic training in computational linguistics. Overview of the field and discussion of some applications, focusing on computational models and parsing algorithms, including translation networks and chart parsers. Students expected to complete programming exercises.

Mr. Wehrli

195. Senior Essay. Prerequisite: consent of instructor. Limited to senior linguistics majors. An extended piece of writing is undertaken on a linguistic topic selected by the student to be completed under the supervision of a faculty member. Consult professor in charge to enroll.

196A. Honors Essay. Prerequisites: 3.5 GPA, course C165A or C165B (may be taken concurrently). Recommended (but not required): completion of both courses C165A and C165B before or during the quarter in which course 196A is taken. A draft of an extended piece of writing on a linguistic topic selected by the student is prepared under the supervision of a faculty member. Consult professor in charge to enroll. In Progress grading (credit to be given only on completion of course 196B).

196B. Honors Essay (2 units). Prerequisite: course 196A. The piece of writing drafted in course 196A is presented in a seminar, revised, and put into final form under the supervision of a faculty member. Consult professor in charge to enroll.

Mr. Anderson, Ms. Hayes

200B. Linguistic Theory: Grammar. Prerequisite: course 120B. Recommended for students who plan to do graduate work in linguistics. The form of grammars: word formation and sentence formation; formal and substantive phonological universals. Concurrently scheduled with course C2006.

Mr. Anderson, Mr. Hayes

C165A. Linguistic Theory: Phonology. Prerequisite: course 120B. A survey of the central claims and types of supporting evidence put forward by transformational theory and by at least one other influential school of contemporary linguistics. About one third of the course deals with phonology, the remainder with syntax and semantics. Students who plan to take courses C165A, C165B should not take 164.

Mr. Anderson, Mr. Bedell, Mr. Schachter

C165B. Linguistic Theory: Grammar. Prerequisite: course 120B. Recommended for students who plan to do graduate work in linguistics. The form of grammars: word formation and sentence formation; formal and substantive phonological universals. Concurrently scheduled with course C2006.

Mr. Anderson, Mr. Hayes

Graduate Courses

C200A. Linguistic Theory: Phonology. Prerequisite: course 120A. The theory of generative phonology; the form of phonological rules; formal and substantive phonological universals. Concurrently scheduled with course C165A. While the topics of coverage are the same for undergraduate and graduate students, the depth of reading required of graduate students is greater; with more primary sources included. Also, graduate students expected to produce a substantially deeper and more thorough research paper.

Mr. Anderson, Ms. Hayes

C200B. Linguistic Theory: Grammar. Prerequisite: course 120B. The form of grammars; word formation and sentence formation; formal and substantive universals in syntax; relation between syntax and semantics. Concurrently scheduled with course C196B. While the topics of coverage are the same for undergraduate and graduate students, the depth of reading required of graduate students is greater; with more primary sources included. Also, graduate students expected to produce a substantially deeper and more thorough research paper.

Mr. Schachter, Mr. Stowell

201. Survey of Current Issues in Phonological Theory. (Formerly numbered 201.) Prerequisites: course C165A/C200A. Survey of current theories and research problems in phonology.

Mr. Anderson, Mr. Bedell, Mr. Hayes

Mr. Anttila, Ms. Munro, Mr. Schuh, Mr. Stockwell

Ms. Koopman, Ms. Munro

164. Modern Theories of Language. Prerequisites: courses 120A, 120B. A critical and historical survey of some of the central claims and types of supporting evidence put forward by transformational theory and by at least one other influential school of contemporary linguistics. About one third of the course deals with phonology, the remainder with syntax and semantics. Students who plan to take courses C165A, C165B should not take 164.

Mr. Anderson, Mr. Bedell, Mr. Schachter

Ms. Hyams, Ms. Keating

Theoretical Issues in Disorders of Language Development. (Formerly numbered CM135.) Prerequisites: courses 1 or 100, and 130, or consent of instructor. Discussion of many seemingly idiosyncratic pieces of writing on a linguistic topic selected by the student is prepared under the supervision of a faculty member. Consult professor in charge to enroll. In Progress grading (credit to be given only on completion of course 196B).

Mr. Anderson, Ms. Hayes

110. Introduction to Historical Linguistics. Prerequisites: courses 100, 103, 120A, and 120B or 127. The methods and theories appropriate to the historical study of language are introduced. The historical method and method of internal reconstruction. Sound change, grammatical change, semantic change.

Mr. Anttila, Mr. Schuh, Mr. Stockwell

114. American Indian Linguistics. (Formerly numbered 114A, 114B.) Strongly recommended prerequisite: course 100. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail.

Ms. Munro (W or Sp)

120A. Linguistic Analysis: Phonology. Prerequisites: courses 100, 103. Descriptive analysis of phonological structures in natural languages; emphasis on insight into the nature of such structures rather than linguistic formalization.

Mr. Bedell, Mr. Hayes

120B. Linguistic Analysis: Grammar. Prerequisite: course 100. Course 120A is not prerequisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into the nature of such structures rather than linguistic formalization.

Mr. Bedell, Mr. Hayes

130. Child Language Acquisition: Introduction. Prerequisites: courses 103, 120A, 120B, 3.5 grade-point average. Analysis of a language unknown to the speaker of the language.

Mr. Kroskrity

M146. Language in Culture. (Same as Anthropology M140.) Prerequisite: upper division standing or consent of instructor. The study of language as an aspect of culture; the relation of habitual thought and behavior to language; and language and the classification of experience. A holistic approach to the study of language, with emphasis on the relationship of linguistics and anthropology to the fields of biology, cultural anthropology, and social anthropology, as well as archaeology.

Mr. Kroskrity
203. Survey of Phonetic Theory. Prerequisite: course 120A. The preliminaries to speech analysis. Functional anatomy of the vocal organs; fundamental principles of acoustics and of acoustic theory of speech production; issues in the generation of speech; the nature and design of feature systems for phonetic and phonological analysis.

Ms. Keating, Mr. Ladefoged

204. Survey of Experimental Phonetics. (Formerly numbered C204.) Use of laboratory equipment to investigate articulatory, acoustic, and perceptual properties of speech. Topics include experimental design and statistics; theoretical basis of acoustic structure of speech sounds; computer-based speech processing, analysis, and modeling; perceptual and acoustic evaluation of synthetic speech.

Ms. Keating, Mr. Ladefoged

Mr. Anderson, Mr. Hayes

206. Survey of Current Issues in Syntactic Theory. (Formerly numbered 206A.) Prerequisites: course C165B/C200B, a passing grade on a proficiency examination in a current area of syntactic theory and research problems within a major current syntactic theory.

Ms. Koopman, Mr. Stowell

Ms. Heim, Mr. Keenan

C208. Survey of Mathematical Backgrounds for Linguistics. Prerequisites: courses 120A, 120B, C165B/C200B (may be taken concurrently). Prior mathematics knowledge not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each quarter. Concurrently scheduled with course C160. Graduate students expected to complete additional problem sets.

Mr. Keenan

209. Survey of Natural Language Processing. Recommended prerequisites: courses C165B/C200B, C160/C280, 185, or equivalent. Computational models of language processing, with emphasis on syntactic processing. Overview of field. Artificial vs. natural language processing techniques. Discussion and evaluation of several parsing strategies (ATN, two-stage parsers, deterministic parsers, etc.) from computational and psychological points of view.

Mr. Wehri

210A. Field Methods I (6 units). Prerequisites: courses C165A/C200A, C165B/C200B, grade of B or better in course 103 or 203, and basic practical phonetics. Analysis of a language unknown to members of the class from data elicited from a native speaker of the language. Term papers to be relatively full and written in the language. May be repeated for credit with topic change.

Ms. Munro, Mr. Schachter

210B. Field Methods II (5 units). Prerequisite: course 210A in preceding quarter. Because different languages are investigated in different years, course 210B can only be taken as a direct continuation of 210A in the same year. When there are multiple sections, continuation must be in the same section. May be repeated for credit with topic change.

Ms. Munro, Mr. Schachter

211. Survey of Discourse and Functional Foundations of Grammar. (Formerly numbered 206B.) Prerequisite: course C165B/C200B. Survey of current research seeking to explain why grammars are as they are, with a focus on the nature of language. Topics include information flow, genre, research methods. Functional issues include functional correlates of grammar; motivation, grammaticalization. Relation to other courses in the linguistics minor.

212. Survey of Lexical Semantics and Pragmatics. Theories and issues in the study of meaning, with emphasis on integration of meanings into lexical-semantical systems and into contexts of use. Semantic theories of component, field, markedness, role, frame, prototype, metaphor. Pragmatic theories of deixis, speech act, implicature, discourse comprehension.

213. Survey of Psycholinguistics. Survey of recent empirical and theoretical research in several sub-areas of psycholinguistics, including grammatical and lexical development in first language acquisition; psycholinguistic models of grammatical processing, especially syntactic parsing; brain bases for language acquisition; language breakdown.

Ms. Hyams

214. Survey of Current Syntactic Theories. Prerequisite: course 206. Survey of several current syntactic theories and their relationship to the theory discussed in course 206, from the point of view of the theories' relative descriptive and explanatory power.

Mr. Schachter, Mr. Stowell

215. Survey of Syntactic Typology. Prerequisite: course C165B/C200B. Current status of typological work and the theory discussed in course 206, from the point of view of the theories' relative descriptive and explanatory power.

Mr. Schachter, Mr. Stowell

220. Linguistic Areas. Prerequisites: courses 120A, and 120B or 127. Recommended: courses C165A/C200A, C165B/C200B. Analysis and classification of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Aboriginal North America, Aboriginal Latin America, Far East, etc.). May be repeated for credit with topic change.

225. Linguistic Structures. Prerequisites: courses 120A, and 120B or 127. Recommended: courses C165A/C200A, C165B/C200B. Phonological and grammatical structures of selected languages, with an emphasis on the genetic relationships to others of its family. May be repeated for credit with topic change.

230. History of Linguistics. Prerequisites: courses C165A/C200A, C165B/C200B. Aspects of the history of linguistics. Different course offerings may deal with different areas of linguistics (e.g., phonology, syntax) or with different historical periods. May be repeated for credit with topic change.

Mr. Anderson, Mr. Schachter

235. Theoretical Issues in Disorders of Language Development. (Formerly numbered CM235.) Prerequisites: courses 1 or 100, and 130, or consent of instructor. Introduction to the field of language disorders of children. Some clinical syndromes which are associated with delayed or deviant language acquisition: aphasia, autism, mental retardation. Theories regarding etiology and the relationship of these disorders to each other. Such questions as the relationship of cognition to linguistic ability. Concurrently scheduled with course C135. Graduate students expected to apply more sophisticated knowledge and produce a research paper of greater depth.

Mr. Anderson, Mr. Schachter

M246C. Topics in Linguistic Anthropology. (Same as Anthropology M241.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

Prosemnars numbered 251 through 254 may be taken for either two or four units. If a seminar is taken for four units, a paper is required. Prosemnars and seminars numbered 251 and above may be repeated for credit, having been approved by the Graduate Council as nonrepetitive in content.

251. Topics in Phonetics and Phonology I: Prosminar (2 or 4 units). Lecture, four hours. Prerequisites: course C165B/C200B. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. Meets with course 257A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

252. Topics in Syntax and Semantics I: Prosminar (2 or 4 units). Prerequisite: course 110. Course 252 may be taken as a seminar. Specialized topics in language variation. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. Meets with course 257A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

253. Topics in Language Variation I: Prosminar (2 or 4 units). Specialized topics in language variation. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. Meets with course 257A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

254. Topics in Linguistics I: Prosminar (2 or 4 units). Lecture, four hours. Prerequisites: courses C165A/C200A, C165B/C200B, consent of instructor. Course 201, 202, 203, 204, 205, 206, 207, C200, 209, 211, 212, 213, 214, or 215 may be required. Individual seminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. Meets with course 257A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

255A. Topics in Phonetics and Phonology II: Prosminar (2 or 4 units). Specialized topics in phonetics and phonology. May be repeated for credit.

256A. Topics in Phonetics and Phonology II: Prosminar (2 units). Prerequisite: course 256A. Specialized topics in phonetics and phonology. May be repeated for credit.

257A. Topics in Syntax and Semantics II: Prosminar. Prerequisite: course C165B/C200B. Course 206, 207, 211, 212, 214, or 215 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 252. In Progress grading (credit to be given only on completion of course 257B).

257B. Topics in Syntax and Semantics II: Prosminar (2 units). Prerequisite: course 257A. Specialized topics in syntax and semantics. May be repeated for credit.

258A. Topics in Language Variation II: Prosminar. Prerequisite: course 110. Course 202 may be required. Specialized topics in language variation. May be repeated for credit. Meets with course 253. In Progress grading (credit to be given only on completion of course 258B).

258B. Topics in Language Variation II: Prosminar (2 units). Prerequisite: course 258A. Specialized topics in language variation. May be repeated for credit.
529A. Topics in Linguistics II: Proseminar. Prerequisites: courses C165A/C203A, C165B/C200B, consent of instructor. Two-hour course 259A. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May be repeated for credit. Meets with course 254, In Progress grading (credit to be given only on completion of course 259B).

529B. Topics in Linguistics II: Proseminar (2 units). Prerequisites: course 259A. Individual proseminars on topics such as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit.

Seminars numbered 260A through 264C may be taken for either two or four units. If a seminar is taken for four units, an oral presentation is required. Seminars may be taken for two units credit only by students who have been formally admitted to the doctoral program. All others must enroll for four units.

260A-260B-260C. Seminar in Phonetics (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

261A-261B-261C. Seminar in Phonology (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

262A-262B-262C. Seminar in Syntax and Semantics (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

263A-263B-263C. Seminar in Language Variation (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

264A-264B-264C. Seminar in Special Topics in Linguistic Theory (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. May not be applied toward the M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

275. Linguistics Colloquium. Prerequisite: completion of M.A. requirements. Varied linguistic topics, generally presentations of new research by students, faculty, visiting scholars. S/U grading.

276. Linguistics Colloquium (No credit). Prerequisite: graduate standing. Same as course 275, but taken without credit by students not presenting a colloquium. S/U grading.

403. Practical Phonetics Training (1 unit). Extensive practice in the production, perception, and transcription of all units of wide range of languages. Concurrently scheduled with the practical sections of course 103. S/U grading.

Ms. Keating, Mr. Ladefoged
411A-411B-411C. Research Orientation (1 unit each). Prerequisite: graduate standing. Sequence of lectures by all faculty of the department, plus faculty from closely related departments and programs, to acquaint new graduate students with the research directions and resources of the department and elsewhere on campus. May not be applied toward the M.A. or Ph.D. degree requirements. S/U grading.

422. Practicum in Phonetic Data Analysis (2 units). Prerequisite: graduate standing. Workshop in the examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward the M.A. or Ph.D. degree requirements. S/U grading.

433. Use of Computers in Linguistics (2 units). Prerequisite: graduate standing in linguistics. Guided use of the departmental computer facilities. May not be applied toward the M.A. or Ph.D. degree requirements. S/U grading.

444. M.A. Thesis Preparation Seminar. Student presentations, two hours. Student presentations of proposed topics for M.A. theses, with discussion and criticism by other students and faculty. May not be applied toward the M.A. or Ph.D. degree requirements. S/U grading.

495. College Teaching of Linguistics (2 units). Prerequisite: graduate standing. Required of all new teaching assistants. Seminars, workshops, and preparation of course topics, including curricular development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596A. Directed Studies (1 to 8 units). Prerequisite: consent of instructor. Independent study. Directed individual study or research. May be repeated for credit. S/U grading.

596B. Directed Linguistic Analysis (1 to 8 units). Prerequisite: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations (1 to 8 units). Prerequisite: at least six graduate courses in linguistics. May be taken only in the quarters in which students expect to take the comprehensive or qualifying examination. May not be applied toward the M.A. course requirements. May be repeated for credit. S/U grading.

598. Research for M.A. Thesis (1 to 8 units). Prerequisite: consent of guidance committee chair. Research and preparation of M.A. thesis. May not be applied toward the M.A. course requirements. May be repeated for a maximum of eight units. S/U grading.

599. Research for Ph.D. Dissertation (1 to 16 units). Prerequisite: advancement to Ph.D. candidacy. May not be applied toward the Ph.D. course requirements. May be repeated for credit. S/U grading.

African Languages

Lower Division Courses

1A-1B-1C. Elementary Swahili. Lecture, five hours. The major language of East Africa, particularly Tanzania. Mr. Hinebusch

2A-2B-2C. Intermediate Swahili. Prerequisites: courses 1A-1B-1C or consent of instructor. Mr. Hinebusch

7A-7B-7C. Elementary Zulu. Lecture, five hours. The most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Mr. Kunene

8A-8B-8C. Intermediate Zulu. Prerequisites: courses 7A-7B-7C or consent of instructor. Mr. Kunene

11A-11B-11C. Elementary Yoruba. Lecture, five hours. Prerequisite: consent of instructor. The major language of Western Nigeria. Mr. Schuh

12A-12B-12C. Intermediate Yoruba. Prerequisites: courses 11A-11B-11C or consent of instructor.

31A-31B-31C. Elementary Bambara. Lecture, five hours. Prerequisite: consent of instructor. Mr. Schuh

32A-32B-32C. Intermediate Bambara. Prerequisites: courses 31A-31B-31C or consent of instructor.

41A-41B-41C. Elementary Hausa. Lecture, five hours. The major language of Northern Nigeria and adjacent areas. Mr. Schuh

42A-42B-42C. Intermediate Hausa. Prerequisites: courses 41A-41B-41C or consent of instructor. Mr. Schuh

51A-51B-51C. Elementary Amharic. Lecture, five hours (15 hours for intensive course). The major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

52A-52B-52C. Intermediate Amharic. Lecture, five hours (15 hours for intensive course). Prerequisites: courses 51A-51B-51C or consent of instructor. P/NP (undergraduates), S/U (graduates), or letter grading.

97. Elementary and Intermediate Studies in African Languages. Prerequisite: consent of instructor. Instruction at an elementary or intermediate level, based on the needs of the students, in any language for which appropriate facilities are available. Those taught in the past included Akan, Efik, Fula, Igbo, Lingala, Luanga, and Xhosa.

Upper Division Courses

103A-103B-103C. Advanced Swahili. Prerequisites: courses 2A-2B-2C or consent of instructor. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili. Mr. Hinebusch

123A-123B-123C. Advanced Yoruba. Prerequisites: courses 12A-12B-12C or consent of instructor. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba.

143A-143B-143C. Advanced Hausa. Prerequisites: courses 42A-42B-42C or consent of instructor. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa. Mr. Schuh

150A-150B. African Literature in English Translation. (Formerly numbered 150A-150B-150C.) Prerequisite: History 10A or 10B. Course 150A is prerequisite to 150B. Rationalization of poetry and prose of sub-Saharan Africa and written prose and poetry of South Africa. Mr. Kunene

**Scope and Objectives**
Gauss has called mathematics the “Queen of the Sciences.” It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics aims to provide courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

**Undergraduate Study**

**Preliminary Examination in Mathematics**
If you wish to enroll in Mathematics A or 1, you are required to take the mathematics section of the Chemistry/Mathematics Preliminary Examination; if you wish to enroll in Mathematics 3A or 31A, you must pass the examination.

This examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It will also be given on Monday, September 26, 1988, for Fall Quarter 1988; Wednesday, November 2, 1988, for Winter Quarter 1989; and Wednesday, February 8, 1989, for Spring Quarter 1989. For information, contact the Mathematics Student Services Office, 6356 Math Sciences.

**Advanced Placement in Calculus**
Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 3 or higher receive four units of credit and Mathematics 31A equivalency. Those who take the BC Test and obtain a score of 3 or higher receive eight units of credit and Mathematics 31A, 31B equivalency.

If you have had calculus in high school but do not have Advanced Placement Test credit, you may take beginning calculus (Mathematics 3A or 31A), or you may seek advanced placement by passing examinations in the subject. Consult the Student Services Office for further details.

**Credit Limitations**
Credit is given for at most one course in each of the following groups: (1) 3A, 31A, 31AH; (2) 3B, 3E (if completed Fall Quarter 1987 or thereafter), 31B, 31BH; (3) 3C, 3E (if completed Fall Quarter 1987); (4) 3C, 32A, 32AH; (5) 140A, 141A; (6) 131C, 131CH, 132; (7) 140A, 141A; (8) 150A, Statistics 152A.

Mathematics 2, 38A, 38B, and Statistics 50 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 140A-140B-140C and 141A-141B are not open for credit to students with credit for Electrical Engineering 103 (or former course 124A.)

Mathematics 150A and Statistics 152A are not open for credit to students with credit for Electrical Engineering 131A (or former course 120A.)

You may not take a mathematics course for credit if you have credit for a more advanced course which has the first course as a prerequisite. This applies in particular to the repetition of courses (e.g., if you wish to repeat Mathematics 31B, you must do so before completing course 32A).
Pre-Mathematics Major
All students who wish to enter one of the majors offered by the Mathematics Department must first register as pre-mathematics majors. After completing all required preparation courses for the major of your choice and before accumulating a total of 135 quarter units, you should apply for admission to the major by filling out a change of major petition in the Student Services Office, 6356 Math Sciences. Transfer students must have completed a minimum of three preparation for the major and major courses at UCLA before petitioning to enter the major.

Admission requirements for the operations research plan under the mathematics/applied science major differ from those stated above (see "Operations Research Plan" later in this section). Petitions to enter the operations research plan and the mathematics of computation major are processed once per year and must be submitted by the deadlines indicated in the descriptions of those programs.

Admission Requirements: Students entering UCLA directly from high school who declare themselves as pre-mathematics majors at the time they apply for admission are automatically admitted as such.

UCLA students who wish to enter the pre-mathematics major must have a minimum grade of C– in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter the pre-mathematics major.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter the pre-mathematics major.

Undergraduate Majors
The Mathematics Department offers five majors: mathematics, applied mathematics, mathematics of computation, mathematics/applied science, and general mathematics.

The mathematics major is designed for students whose basic interest is mathematics; the applied mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the mathematics of computation major for individuals interested in the mathematical theory and the applications of computing; the mathematics/applied science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the general mathematics major for students planning to teach mathematics at the high school level. As part of the mathematics/applied science major, the department offers programs for students interested in the fields of actuarial science and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

If you plan to pursue graduate study in mathematics, you are strongly encouraged to take a three-quarter sequence of graduate-level courses during your senior year.

Bachelor of Science in Mathematics

Preparation for the Major
Students officially admitted to the mathematics major for Fall Quarter 1985 or thereafter must fulfill the following preparation requirements. Those admitted prior to Fall Quarter 1985 may fulfill the preparation requirements listed in the 1984-85 UCLA General Catalog.

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry 11A, 11B. Each course must be passed with a minimum grade of C–, and you must have a minimum overall GPA of 2.0 for the courses.

The Major
Students officially admitted to the mathematics major for Fall Quarter 1985 or thereafter must fulfill the following major requirements. Those admitted prior to Fall Quarter 1985 may fulfill the preparation requirements listed in the 1984-85 UCLA General Catalog.

Required: Mathematics 110A, 110B, 115A, 120A, 131A-131B, 131C, and at least five additional courses from 106 through 199 and Statistics 152A through M153B. The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Applied Mathematics

Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry 11A, 11B. Each course must be passed with a minimum grade of C–, and you must have a minimum overall GPA of 2.0 for the courses.

The Major
Required: Mathematics 115A, 131A, either 137A or 137B, 140A-140B, 142, two two-quarter sequences from two of the following categories: numerical analysis — courses 140A-140B or 141A-141B, probability and statistics — course 150A or Statistics 152A, and course 150B or Statistics 152B, differential equations — courses 135A-135B; four additional courses from 110A through 199 and Statistics 152A through M153B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Mathematics of Computation

Applications for admission are accepted during Spring Quarter only and must be submitted by May 15. All preparation courses for the major must be completed by the end of the quarter in which you apply for admission. Resources for the program are limited, and the number of students admitted may be restricted accordingly.

Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C or 30, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry 11A, 11B. Each course must be passed with a minimum grade of C–, and you must have a minimum overall GPA of 2.0 for the courses.

The Major
Required: Eleven Mathematics Department courses, including Mathematics 115A, 117, 131A, two additional courses from 110A through 199 and Statistics 152A through M153B, and six courses from Plan A (scientific computing) — courses 131B or 132, 140A-140B-140C, and 135A-135B or 145-146, or Plan B (computation theory) — courses 114A-114B-114C and 118A-118B-118C, or Plan C (computational statistics) — courses 140A or 141A, 150A or Statistics 152A, Statistics 152B-152C, and M153A-M153B; three upper division computer science courses (12 units) selected from an approved list available in the Student Services Office.

Bachelor of Science in Mathematics/Applied Science

The major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. You
may also select one of the established programs: the actuarial plan, the mathematics/economics plan, or the operations research plan. In the past, mathematics/applied science majors have combined the study of mathematics with fields such as physics, biology, chemistry, biochemistry, economics, and geography.

If you are interested in designing an individual program, you should meet with the undergraduate faculty adviser, 6356 Math Sciences, during your sophomore year. A proposed program is drawn up and then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

The Major

Required: Fourteen courses, seven in the Mathematics Department selected from Mathematics 110A through 199 and Statistics 152A through M153B and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall GPA of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. If you will have 135 or more units by the end of the quarter in which you plan to enter the program, you will not be admitted to the major.

Actuarial Plan

Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 1 and 2, or 100. Economics 100 may not be applied as one of the upper division courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses.

The Major: Seven Mathematics Department courses, including Mathematics 115A, 140A or 141A, 144, 150A-150B or Statistics 152A-152B, and two courses from 113, 140B or 141B, 151, and Statistics 152C, M153A; seven outside courses, including Economics 101A, 101B, 102, 147A, 160, and two additional courses from Management 130, 190, English 131A through 131J, Economics 145 through 199.

Mathematics/Economics Plan

Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, Program in Computing 10A, and one other social science course.

The Major: Seven Mathematics Department courses, including Mathematics 110A or 117, 115A, 131A, 144, 150A or Statistics 152A, Statistics 152B, and one additional course from 110A through 199 and Statistics M153A, M153B; seven economics courses, including Economics 101A, 101B, 102, 144, 145, 147A, and one additional course from 103A through M136 and 147B through 199.

Operations Research Plan

Enrollment in this plan, designed for students interested in careers and graduate study in operations research and management science, is limited. You must have completed Mathematics 33A and one economics course before the application deadline of April 15, 1989. You graduate with a bachelor's degree in your major and a specialization in computing.

Bachelor of Science in General Mathematics

The major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the mathematics, applied mathematics, or mathematics of computation major.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, and three courses from the Physics 6 or 8 sequence, the Chemistry 11 sequence, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

Honors

Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics. Call the department (206-1286) for further details.

Honors Program

Students majoring in mathematics and applied mathematics who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. You may apply at any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall GPA of 3.6 or better. The program entails taking a specified sequence of courses as part of your major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

If you complete the program, you are awarded honors at graduation; if you demonstrate exceptional achievement, you are awarded highest honors. Consult the department for further information.
Graduate Study

Admission

Prospective graduate students in mathematics need not have an undergraduate mathematics major, but they should have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics — particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For admission to a master's degree program, you must have earned in those upper division mathematics courses a cumulative grade-point average of at least 3.2; for direct admission to the doctoral program, at least 3.5.

If you have already obtained a master's degree, you must have maintained an average of better than 3.6 in graduate study.

You must take the Graduate Record Examination (GRE) General Test and Subject Test in Mathematics and must submit three letters of recommendation from mathematicians who know your recent work.

Applications and a booklet, *Graduate Studies in Mathematics* at UCLA, are available from the Graduate Adviser, Department of Mathematics, 6356 Math Sciences, UCLA, Los Angeles, CA 90024-1555.

Master of Arts Degree

You may earn the M.A. degree under the comprehensive examination plan, either in the basic (pure mathematics) program or an interdisciplinary program in applied mathematics.

Foreign Language Requirement

There is no foreign language requirement for master's students.

Course Requirements

Eleven courses are required, as follows:

**Core Courses:** You must take Mathematics 201A-201B-201C and 202A-202B. Normally, you also take one quarter of course 596 while fulfilling the essay requirement described below.

**Credit Requirements:** If you plan to teach in secondary schools and do not already have valid credentials for such teaching, you should enroll in the single subject credential program in the Graduate School of Education. Of the courses required by this program, you may receive M.A.T. credit for the following: Education 100, 112, 312, 330A, 330B. Actual receipt of the credential is not a degree requirement. You should check with the Graduate School of Education for a full and up-to-date description of credential requirements and should submit a Graduate School of Education application for admission to the credential program.

At present, no education courses or practice teaching are required for the community college credential. To qualify for this credential, it is sufficient to have the M.A.T. degree. In exceptional cases, an M.A.T. program may be individually designed for candidates for a credential other than the two already mentioned.

**Additional Courses:** Besides the six core courses described above, you must take a seventh upper division or graduate course in mathematics. Particularly recommended are Mathematics 106, 110B, 110C, 111A, 111B, 131B, 135A, and Statistics 152B. Candidates on the junior college track normally take five 100- or 200-level courses in mathematics in addition to the six core courses. However, with prior approval of the graduate vice chair, such students may present for degree credit one course of a predominantly mathematical nature taken in another department.

You may not receive degree credit for Mathematics 104 or 370. In addition, you may not receive degree credit for more than two quarters of course 596 or for more than two quarters of any 300-series courses.

**Essay Requirement:** You must prepare a master's essay on some subject in mathematics related to your prospective teaching. You write this under the direction of a faculty member while enrolled in Mathematics 596.

Teaching Experience

Teaching experience is not a formal requirement for the M.A.T. degree, although students working for a secondary credential must take the supervised teaching course. M.A.T. students are eligible for teaching assistantships.

**Comprehensive Examination Plan**

In the M.A.T. program, you take one examination in mathematical subject matter and one in content and philosophy of secondary school mathematics. Ordinarily, these are administered in conjunction with Mathematics 201A-201B-201C and 202A-202B. Reexamination after failure is allowed.

**Ph.D. Degree**

Students may earn the Ph.D. degree in Mathematics at UCLA either in the classical, pure mathematics program or under an interdisciplinary program in applied mathematics. There are many possible choices of fields within both of these programs, and you are urged to read the booklet, *Graduate Studies in Mathematics* at UCLA, where the specialties of the faculty and the active research areas in the department are described in some detail.

**Foreign Language Requirement**

You are required to pass two written departmental language examinations in French, German, or Russian (with the consent of the graduate vice chair, students in the applied program may substitute a computer language project for one of the languages). International students whose principal language of instruction in elementary and secondary education was not English may substitute English for one of the foreign languages, but their other language must be one of French, German, or Russian (even if they are in the applied program).

These examinations, offered in the Fall and Spring Quarters, require the translation of material in some basic field of mathematics without the use of a dictionary. They may be re-taken any number of times until passed. One of the language examinations must be passed within seven quarters of registered full-time study, the second within 13 quarters. In any event, one examination must be passed before taking the first oral qualifying examination.
Course Requirements
In the pure mathematics program, you must pass (with a grade of A or B) at least 12 courses from Mathematics 205A through 285L, but excluding the basic courses 210A-210B, 245A-245B, and 246A-246B. At most, three of these courses may be in the 285 series. You must also satisfy a seminar participation requirement by participating actively in at least two advanced seminars (normally you lecture twice for a total of 90 minutes). Credit for one seminar must be obtained within three registered quarters after passing the written qualifying examinations, the other within five quarters.

In the applied mathematics program, you must pass (with a grade of A or B) at least 18 approved graduate courses, including at least 12 courses from Mathematics 205A through 285L. At most, three of these may be in the 285 series.

Qualifying Examinations
In the pure mathematics program, you are required to take four written qualifying examinations in the following fields: algebra, real analysis, complex analysis, and one field selected from geometry-topology, statistics-probability, logic, or numerical analysis. The examinations are given in the Fall or Spring Quarter. You must pass two examinations within a period of six registered quarters and all four examinations within a period of nine registered quarters after being admitted to graduate study.

In the applied mathematics program, you must pass four qualifying examinations. The first three consist of one written examination in applied real and complex analysis and two written examinations selected from three areas (applied differential equations, numerical analysis, and probability-statistics). Two of these three examinations are to be completed by the end of six quarters after being admitted to graduate study; the third by the end of nine quarters. The fourth qualifying examination, either written or oral, is in your specialized "outside" field, testing your competence at a research level.

After passing the four qualifying examinations, you may set up the doctoral committee which administers the University Oral Qualifying Examination for advancement to candidacy. 

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination may be waived by the doctoral committee, with the approval of the graduate vice chair.

Program in Computing
Program in Computing I is designed for students who wish to pursue a general introduction to the topics of computers and computation. It is strongly recommended for those who wish to take course 3 or 10A, but who have no prior experience in computing.

Students who would like one course in programming should take either course 3 (uses FORTRAN) or 10A (uses PASCAL), depending on the advice of their major department.

The sequence (courses 10A, 10B, 10C, 30, 60) provides an extensive education in basic computer science. It is intended for Students and Science majors who are completing a specialization in computer science and for those planning to take upper division coursework in computer science. These students should take all or part of the sequence, depending on the advice of their major department.

Lower Division Courses
1. Introduction to Computers and Programming. Lecture, three hours; discussion, one hour; computer terminals, five hours. Fundamentals of computer and computing; applications software, editors, spreadsheets, file manager; organization and computer hardware. Brief introduction to programming. (CSE 10A P)

2. Introductory FORTRAN Programming. Lecture, three hours; discussion, two hours; computer terminals, 10 hours. Students with credit for course 10A will receive only two units of credit for this course. Basic principles of programming, using FORTRAN as the example language. A terminal course intended for physical sciences and engineering majors who need to use the extensive library of existing FORTRAN programs.

3. Introductory PASCAL Programming. Lecture, three hours; discussion, two hours; computer terminals, 10 hours. Students with credit for course 10A will receive only two units of credit for this course. Basic principles of programming, using PASCAL as the example language. A terminal course intended for physical sciences and engineering majors who need to use the extensive library of existing PASCAL programs.

4. Advanced Programming. Lecture, three hours; discussion, two hours. Prerequisite: course 10B. Review of simple sorts; shellsort; heapsort; external merging sort; binary tree; linear search; quicksort.

5. Machine Organization. Lecture, three hours; discussion, two hours. Prerequisite: course 10B. Review of simple sorts; shellsort; hash sort; external merging sort; binary tree; hashing; multiway tree; lexical analysis; parsing; C language.

6. Machine Organization and Assembly Language Programming. Lecture, three hours; discussion, two hours; computer terminals, 15 hours. Prerequisite: course 10B. Not open for credit to students with credit for Computer Science 36. Description of machine organization and operation. Representation of information, instruction sets and formats, addressing modes, memory management and organization, I/O processing and interrupts.

Mathematics
Lower Division Courses
A. Intermediate Algebra (No credit). Formerly numbered 1A.) Lecture, five hours. Prerequisite: Level I Chemistry/Mathematics Preliminary Examination. Mathematics A displaces four units on the student's Study List but yields no credit toward a degree. May not be applied toward Letters and Science general education requirements. Not open to students with credit for other mathematics courses. Designed for students requiring a review of elementary and intermediate algebra. Arithmetic operations on the real numbers, algebraic notation, polynomials, rational exponents, linear and quadratic equations and inequalities, coordinate geometry. (F.W.Sp)

1. Precalculus. Formerly numbered 1B.) Lecture, three hours; discussion, two hours. Prerequisites: course A with a grade of C− or better, or and one-half years of high school mathematics and successful completion of the Level I Chemistry/Mathematics Preliminary Examination. The function concept, Linear and polynomial functions and their graphs, zeros of polynomials. Inverse, exponential, and logarithmic functions. Trigonometric functions.

2. Finite Mathematics. Lecture, three hours; discussion, one hour. Prerequisite: course 1 with a grade of C− or better. Designed for business and social science majors who are completing a specialization in computing and for those planning to take upper division coursework in computer science. These students should take all or part of the sequence, depending on the advice of their major department.

3A. Calculus for Life Sciences Students. Lecture, three hours; discussion, one hour. Prerequisites: three and one-half years of high school mathematics (including trigonometry) and successful completion of the Level II Chemistry/Mathematics Preliminary Examination, or completion of course 1 with a grade of C− or better. Not open for credit to students with credit in another calculus sequence. Techniques and applications of the differential calculus.

3B. Calculus for Life Sciences Students. Prerequisite: course 3A with a grade of C− or better. Techniques and applications of the differential calculus.

3C. Calculus for Life Sciences Students. Prerequisite: course 3B with a grade of C− or better. Functions of several variables, vectors, partial differentiation, and multiple integration.

3E. Calculus for Economics Students. Lecture, three hours; discussion, one hour. Prerequisite: course 3D with a grade of C− or better. Not open for credit to students with credit for course 3B, 31B, or 31BH. Calculus with applications to economics. Differentiation and integration of logarithmic and exponential functions, the definite integral, probability, differential equations.

5. Introduction to Calculus. Lecture, three hours; discussion, one hour. Not open for credit to seniors with credit for courses 3A, 3E, or 31A. Satisfies the Letters and Science quantitative reasoning requirement. A brief look at the source of many of the quantitative methods in the physical, biological, and social sciences. The concepts, techniques, and applications of the differential and integral calculus of polynomial, rational, and exponential functions. Applications. With emphasis on the use of calculus in business and economics.
Upper Division Courses

Mathematics 110A, 113, 115A, 117, 131A-131B, 132, 141A-141B, 142, 144, and 147 are offered each quarter. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

General and Teacher Training

104. Fundamental Concepts of Geometry. Lecture, three hours; discussion, one hour. Prerequisite: two years of high school mathematics including geometry. Designed for prospective elementary teachers (also see Mathematics 38A, 38B). The following topics may be included: the number lattice and Pick's theorem; graphs of equations and relations in the Cartesian plane, including examples with a finite field; the Pythagorean theorem from several points of view; an introduction to the theory of area, volume, and similarity; regular polygons and polyhedra, regular tilings of the plane, enumerative and counting problems, including some in spaces of four or more dimensions; selected topics in topology such as the Euler characteristic of the plane and an introduction to synthetic and analytic plane geometry. Although primary emphasis is on the subject itself, rather than its social setting, in recent years the course has illustrated a number of current teaching strategies that have been successful with school-age children.

106. History of Mathematics. Prerequisite: course 32A. Topics in the history of mathematics, with emphasis on the development of modern mathematics.

Algebra, Number Theory, and Logic

110A-110B-110C. Algebra. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. 110A. Not open for credit to students with credit for course 117 or former courses 101A-101B. The ring of integers, integral domains, fields, polynomial domains, unique factorization.

110B. Groups, structure of finite groups. 110C. Further topics in rings and modules; field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

110A-110B-110C. Algebra (Honors Sequence). Prerequisite: consent of instructor. An honors sequence parallel to courses 110A-110B-110C.

111A-111B-111C. Theory of Numbers. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A or 117, and 115A, or consent of instructor. Divisibility, congruences, Diophantine analysis, selected topics in the theory of primes, algebraic number theory, Diophantine equations.

112A-112B-112C. Set Theory and Logic. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 112A. Informal axiomatic set theory presented as a foundation for modern mathematics. 112B-112C. Predicate logic, formalized theories; Gödel's completeness and incompleteness theorems.

113. Combinatorics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Permutations and combinations, counting principles, recurrence relations and generating functions; combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey's theorem.

114A-114B-114C. Computation Theory and Logic. (Formerly numbered 114A-114B.) Lecture, three hours; discussion, one hour. Prerequisites: courses 33B, 61, 115A (latter may be taken concurrently with course 114A). Finite automata; Turing machines and other models of computation; recursive functions; Church's thesis; Gödel numbering of computations; universal machines; unsolvability results. Recursive and recursively enumerable sets; reducibilities; relative recursiveness. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; effective enumerability of valid sentences. Formal number theory; representation of recursive functions; incompleteness and undecidability; theorems of Gödel, Tarski, Church. Completeness and incompleteness of formal systems; analysis of self-referencing theorems; undecidability; theorems of Goedel, Tarski, Church.

115A. Linear Algebra. Lecture, three hours; discussion, one hour. Prerequisite: course 33A. Abstract vector spaces; linear transformations and matrices; determinants; inner product spaces; low dimension eigenvectors.

115B. Linear Algebra. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Linear transformations, conjugate spaces, duality; the theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric skew and orthogonal linear transformations, polar decomposition.

117. Algebra for Applications. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Not open for credit to students with credit for course 110A or former course 101A. Integers, congruences; fields, applications of finite fields; polynomials, permutations, introduction to groups.

118A-118B-118C. Combinatorial Algorithms. (Formerly numbered 118A-Leaves, 118B-118C.) Lecture, three hours; discussion, one hour. Prerequisites: courses 33B, 61, 115A, 115B. Combinatorial optimization, algorithms as used in computer science and related fields. Topics include asymptotic analysis, arithmetic algorithms, computer-oriented algorithms, graphs and matrices, coding theory and designs.

Geometry and Topology

120A-120B. Differential Geometry. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A, 131A. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature.

121. Introduction to Topology. Prerequisite: course 131A. Metric and topological spaces, topological properties, completeness, mappings and homeomorphisms, the metrization problem.

122. Projective Geometry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A-110B, 115A. Projective spaces, especially lines and planes; homogeneous coordinates; the principles of duality; projectivities, the fundamental theorem, and the theorems of Desargues, Pappus, Steiner, and Pascal.

123. Foundations of Geometry. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Axioms and models, Euclid's geometry, Hilbert's axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré's model, independence of the parallel postulate.
Analysis
131A-131B. Analysis. Lecture, three hours; discussion, one hour. 131A. Prerequisites: courses 32E, 33B. Real numbers, point set topology in IR^n and in metric spaces, basic topology of metric spaces, convergence of sequences and series. 131B. Prerequisites: courses 115A, 131A. Functions of bounded variation, Riemann-Stieltjes integral, sequences and series of functions, continuity, uniform continuity, equicontinuity and inverse function theorems, extremum problems.

131AH-131BH. Analysis (Honors Sequence). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. An honors sequence parallel to courses 131A-131B. Courses 131AH-131BH and 131CH form a full honors sequence in analysis.

13C. Complex Analysis. Lecture, three hours; discussion, one hour. Prerequisite: course 131A. Not open for credit to students with credit for course 132.

140A-140B-140C. Numerical Analysis. Lecture, three hours; discussion, one hour. Prerequisites: courses 32E, 33B, 115A, and Program in Computing 3 or 10A or equivalent. Not normally open for credit to students with credit for courses 141A, 141B, Electrical Engineering 103 (or former course 124A). Emphasis on both theory with error analysis, and applications. Analysis of numerical methods for the following areas: 140A. Nonlinear equations, systems of linear equations, and eigenvalue problems. 140B. Interpolation, approximation, fast Fourier transforms, differentiation, and integration. 140C. Differential equations, systems of nonlinear equations, and optimization.

141A-141B. Applied Numerical Methods. Lecture, three hours; discussion, one hour. Prerequisites: courses 32E, 33B, 115A, and Program in Computing 3 or 10A or equivalent. Not open for credit to students with credit for courses 140A, 140B, Electrical Engineering 103 (or former course 124A). Introduction to scientific computing, with emphasis on programming, algorithms, and applications. Case studies. Numerical methods and computer implementation for the following areas: 141A. Nonlinear equations, numerical optimization, interpolation, differentiation, and integration. 141B. Differential equations, least-squares approximation, Monte Carlo methods, and linear programming.

142. Mathematical Modeling. Lecture, three hours; discussion, one hour. Prerequisites: courses 32E, 33B and 131A, or consent of instructor. An introduction to the fundamental principles and the spirit of applied mathematics. Emphasis on the manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor (e.g., physical sciences, biology, economics, traffic dynamics, etc.).

143. Analytic Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32E, 33B. Not open for credit to students with credit for course 131C. Introduction to the basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy-Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

144. Linear Programming. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or 131B, or consent of instructor. Not open for credit to students with credit for Electrical Engineering 136 (or former course 129A). Principles of linear programming, the duality theorem, the simplex methods; applications to industrial and business problems. Additional topics such as sensitivity analysis, integer programming, distribution and transportation algorithms, and applications to game theory.

145. Fourier Methods for Differential Equations. Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Fourier series and integral transforms, separation of variables, eigenfunction expansions. Applications from such areas as mechanical vibrations, fluid dynamics, heat conduction, and electromagnetics.

150A-150B-150C. Probability. Lecture, three hours; discussion, one hour. 150A. Prerequisites: courses 32E, 33B. Not open for credit to students with credit for courses 150A or Statistics 152A. Probability distributions, random variables and vectors, expectation, normal approximations. 150B. Prerequisite: course 150A or Statistics 152A. Convergence in distribution, laws of large numbers. Poisson processes, random walks.

151. Stochastic Processes. (Formerly numbered 150C.) Lecture, three hours; discussion, one hour. Prerequisites: course 150A, or Statistics 152A and consent of instructor. Discrete Markov chains, continuous-time Markov chains and semi-Markov processes, renewal theory, Brownian motion.

Special Studies
190. Honors Mathematics Seminar. Lecture, three hours. Prerequisite: consent of instructor. A participating seminar on advanced topics in mathematics. Content varies from year to year. May be repeated for credit by petition.

191. Upper Division Seminars (2 to 4 units). Prerequisites: courses 32E, 33B, 33C, consent of instructor. Limited to 15 students. Each quarter the department offers a limited number of seminars in various branches of mathematics. Substantial student participation. May be repeated for credit.

199. Special Studies in Mathematics (1 to 4 units). Prerequisite: consent of department chair and instructor. At the discretion of the chair and subject to the availability of staff, individuals or groups may study topics suitable for undergraduate course credit but not specifically offered as separate courses. May be repeated for credit, but no more than one 199 course may be applied toward the upper division courses required for a major offered by the Mathematics Department.

Graduate Courses
Teacher Preparation
201A-201B-201C. Topics in Algebra and Analysis. Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in the mathematics-education program. Important ideas of algebra, geometry, and calculus leading effectively from experience to written proof. More of the material may be exchanged with the number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward the M.A. degree requirements.

202A-202B. Mathematical Models and Applications. Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in the mathematics-education program. A development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, gamete selection, learning models, models in social and life sciences. May not be applied toward the M.A. degree requirements.

Number Theory
205A-205B-205C. Number Theory. Prerequisites: courses 210A and 246A, or consent of instructor. Topics include algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Selected topics from additive number theory, Diophantine approximation, partitions, class-field theory, lattice point problems, valuation theory, etc.

Algebra

210A-210B-210C. Algebra. Prerequisites: courses 110A-110B-110C or consent of instructor. Students with credit for courses 110B and/or 110C will not receive M.A. degree credit for courses 210B and/or 210C. Group theory, including the theorems of Sylow and Jordan-Hölder-Schreier; rings and ideals; factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, the radical, irreducible modules.

211. Group Theory, including the theorems of Sylow. Configurations, polyhedra. Ramsey theory, finite arities, recursively enumerable sets, hierarchies: courses 220A-220B-220C or consent of instructor. Students with credit for courses 220A-220B-220C or consent of instructor. Emphasis on low-dimensional manifolds. Structure and classification of manifolds, automorphisms of manifolds, submanifolds (e.g., knots and links). Topics vary from year to year. May be repeated for credit by petition.

212. Homological Algebra. Prerequisite: course 210B or consent of instructor. Topics from the theory of commutative rings and algebras. Prerequisite: course 210A or consent of instructor. Topics from the theory of commutative rings and algebras. Algebraic groups. Lecture, three hours. Prerequisites: courses 212A and 212B, or consent of instructor. Topics from algebraic groups and differentiable manifolds. Lie groups, Lie algebras. Lecture, three hours. Prerequisites: courses 212A and 212B, or consent of instructor. Topics from algebraic groups and differentiable manifolds. Lie groups, Lie algebras. Lecture, three hours. Prerequisites: courses 212A and 212B, or consent of instructor. Topics from algebraic groups and differentiable manifolds. Lie groups, Lie algebras. Lecture, three hours. Prerequisites: courses 212A and 212B, or consent of instructor. Topics from algebraic groups and differentiable manifolds. Lie groups, Lie algebras. Lecture, three hours. Prerequisites: courses 212A and 212B, or consent of instructor. Topics from algebraic groups and differentiable manifolds. Lie groups, Lie algebras.

220A-220B-220C. Mathematical Logic and Set Theory. Prerequisites: courses 112A-112B-112C or equivalent. Model theory: compactness theorem; Lowenheim-Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: Church's thesis; recursively enumerable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidability and undecidable theorems; quantifier elimination. Set theory: Zermelo-Fraenkel and von Neumann-Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing.

222A. Lattice Theory and Algebraic Systems. Lecture, three hours. Prerequisites: course 212A or consent of instructor. Partially ordered sets, lattices, distributivity, modularity, completeness, intersection with combinatorics, topology, and logic; algebraic systems, congruence lattices, sublattice decomposition, congruence laws, equational bases, applications to lattices.

223A. Model Theory. Prerequisites: courses 220A-220B-220C. Topics include ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

223B. Set Theory. Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinational set theory. Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinational set theory. Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinational set theory. Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinational set theory.
Applied Mathematics

250C. Advanced Topics in Ordinary Differential Equations. Prerequisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations. 251A. Introductory Partial Differential Equations. Prerequisite: consent of instructor. Classical theory of heat, wave, and potential equations; fundamental solutions, characteristics and Huygens principle, propagation of singularities, potential operators, second-order differential operators. Maximum principles, energy methods, uniqueness theorems. Additional topics as time permits.

251B-251C. Topics in Partial Differential Equations. Prerequisite: consent of instructor. An in-depth introduction to topics of current interest in partial differential equations or their applications.

252A-252B-252C. Advanced Topics in Complex Analysis. Prerequisites: courses 245A-245B-245C or 246A-246B-246C, or consent of instructor. Introduction to analytic functions of several complex variables. The fundamental theorem of instability; finite amplitude solutions of equations in the plain, special functions, asymptotic series, Fourier and Laplace transforms, singular integral equations.

255A-255B. Real Analysis for Applications. Prerequisites: courses 131A-131B or consent of instructor. Topics include Fourier analysis, Hilbert space theory, distributions, fundamental solution of Laplace's equation in bounded domains, first-order equations, wave equations, Cauchy problem, energy conservation, heat equation, fundamental solution, equations of fluid mechanics and magnetohydrodynamics.

271A. Tensor Analysis. Prerequisite: course 131A or consent of instructor. Algebra and calculus of tenors on n-dimensional manifolds. Curvilinear coordinates, tensor fields, covariant and contravariant differentiation. Green-Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

M274A. Asymptotic Methods. (Same as Civil Engineering M292A.) Lecture, three hours. Prerequisites: course 132, Chemical Engineering M192A, or equivalent. The fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems.

M274B-M274C. Perturbation Methods. (Formerly numbered M274A-M274B.) Lecture, three hours. Prerequisites: course 266A or equivalent. Boundary layer theory, matched asymptotic expansions, WKTh theory. Problems with several time scales: Poincaré's method, averaging techniques, multiple-scale analysis. Application to eigenvalue problems, nonlinear oscillations, wave propagation, and bifurcation problems. Examples from various fields of science and engineering.

Probability and Statistics

M275A-M275B. Probability Theory. Prerequisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory. M275C. Stochastic Processes. Prerequisites: courses 275A-275B. Selected topics such as Brownian motion and potential theory, Markov processes, infinite particle systems, Gaussian processes. Content varies from year to year. May be repeated for credit.

M276A-M276B. Statistical Theory. Lecture, three hours. Prerequisite: Statistics 152C or consent of instructor. 276A. Sufficiency, exponential families, least squares, maximum likelihood estimation, Fisher information, the Cramer-Rao inequality, confidence intervals. 276B. Asymptotic properties of tests and estimates, consistency and efficiency, likelihood ratio tests, chi-squared tests. M276C. Statistical Decision Theory. Prerequisite: course 276A. Invariant tests and estimates; best unbiased tests; decision problems; application to the general linear model; other topics.

M277A-M277B. Nonparametric and Robust Statistics. (Formerly numbered 277A.) Lecture, three hours. Prerequisites: courses 275B and 276B, or consent of instructor. Robustness, nonparametric statistics, and confidence intervals for statistical procedures. M277C. Decision Theory. (Formerly numbered 278A.) Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes, admissible, and minimax decision rules. Invariant tests and estimates; locally best tests. Application to the general linear model.

M278A-M278B-M278C. Linear Statistical Models. (Same as Public Health M205A-M205B-M205C.) Lecture, three hours; discussion, one hour. Prerequisites: Public Health 101C, Statistics 152C, or equivalent. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, the Gauss-Markov theorem, fixed and random component models, balanced and unbalanced designs.

M280. Computational Statistics. (Same as Bioinformatics M280 and Public Health M207F.) Lecture, three hours; discussion, one hour. Prerequisites: courses 152A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: pivoting and other technologies used in stepwise regression, nonlinear regression algorithms, algorithms for balanced and unbalanced analysis of variance, including the mixed model, iterative rescaling, and other methods for log-linear models.

Special Studies

Microbiology

5304 Life Sciences, (213) 825-8482

Professors
Arnold J. Berk, M.D.
Frederick A. Eiserling, Ph.D.
C. Fred Fox, Ph.D.
June Lascelles, Ph.D.
Rafael J. Martinez, Ph.D.
Sherie L. Morrison, Ph.D.
Donald P. Nierich, Ph.D.
William R. Romig, Ph.D.
Eli E. Sercarz, Ph.D.
Jack Stevens, Ph.D.
Bernadine J. Wisnieski, Ph.D.
Owen N. Witte, M.D.
M. J. Pickett, Ph.D., Emeritus
Donald P. Nierich, Ph.D., Emeritus

Associate Professors
Robert P. Gunsalus, Ph.D.
Joan E. McEwen, Ph.D.
M. J. Pickett, Ph.D., Emeritus
Sydney C. Rittenberg, Ph.D., Emeritus

Assistant Professors
Joan E. McEwen, Ph.D.
Virginia L. Miller, Ph.D.
Robert W. Simons, Ph.D.

Lecturer
Ralph Robinson, Ph.D.

Adjunct Professors
Keichi Itakura, Ph.D.
Gary Wilcox, Ph.D.

Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, genetics, and molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in microbiology prepare for careers in medicine or dentistry, medical technology, industrial microbiology (including biotechnology and genetic engineering), and agricultural or environmental sciences, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in chemistry, biology, physics, and mathematics. They provide preparation for careers in microbiology or for further advanced study leading to the doctorate.

The graduate program emphasizes the areas of cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host-parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology at the undergraduate level and depth and training in independent study and research for the graduate microbiologist.

Note: Several upper division and graduate courses in this department are multiple-listed with those in the Microbiology and Immunology Department in the UCLA School of Medicine. If you are interested in a fundamentally disease-oriented approach to microbiology, see the Microbiology and Immunology Department description in Chapter 15.

Bachelor of Science Degree

Pre-Microbiology Major

While you are completing the lower division preparation courses for the major, you are considered a pre-microbiology major. After completing the preparation courses for the major with at least an overall C– grade-point average and Microbiology 101 with a grade of C or better, you should petition to enter the major in the Student Affairs Office, 5205 Life Sciences.

All preparation courses must be taken for a letter grade. If you enter with 80 or more units of credit, in order to specify pre-microbiology as your major, you must have completed one year of general chemistry; Biology 5, 7, or equivalent; one of the following: organic chemistry with laboratory (two courses), calculus-based physics, calculus (one year).

Preparation for the Major

Required: Biology 5, 7, 8; Chemistry 11A, 11B/111L, 11C/11CL, 21, 23, 25; Mathematics 3A, 3B, 3C (or 31A, 31B, 32A); Physics 6A, 6B, 6C (or 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL).

The Major

Required: A total of 41 upper division units, including Microbiology 101, 102, C103A or C103B, 119, M185; Chemistry 152; four additional upper division courses from the departmental list or from related departments selected with approval of your faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 GPA. A maximum of four units of Microbiology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied. In addition, you must earn a C or better in courses 101 and 102 before continuing with further departmental upper division work. If you repeat one of these courses, you must earn a grade of B or better to remain in the major.

Honors Program

An overall grade-point average of 3.2 and a 3.5 in the premajor and major are required to apply for departmental honors. In addition you must have junior standing and the sponsorship of a faculty adviser. The core of the program consists of three quarters (minimum) of Microbiology research, culminating in a thesis. If the thesis is accepted by the honors committee, you are awarded the bachelor's degree with honors. The department also offers honors-designated courses each quarter for the elective program. For further information, contact the Student Affairs Office, 5205 Life Sciences.

Master of Arts Degree

Admission

Requirements for admission are the same as for the Ph.D. degree, with the addition of a research proposal. Students who select this program must obtain sponsorship for a laboratory research problem prior to submitting an application. The department accepts relatively few students whose objective is a master's degree; applicants must contact a potential faculty sponsor at the time of application.

Ph.D. Degree

Admission

For admission, you must have completed an undergraduate major in bacteriology, microbiology, or a related field with superior scholastic achievement. You should have preparation in calculus, physics, biology, genetics, organic and biological chemistry, and microbiology. Physical chemistry is strongly recommended. You may be admitted with background deficiencies to be remedied prior to or concurrent with graduate study. Submit scores of the Graduate Record Examination (GRE) General Test directly to the department. The Subject Test in Biology or Chemistry is recommended. Evidence (via letters of recommendation, interviews, or direct knowledge) of superior research potential and motivation is also required. Completion of a master's degree is not normally required.

Applications, brochures, and additional information on the master's and Ph.D. programs are available from the Graduate Adviser, Student Affairs Office, Department of Microbiology, 5205 Life Sciences, UCLA, Los Angeles, CA 90024-1489.

Course Requirements

Formal Lecture/Laboratory Courses

Biochemistry: Chemistry M253 (six units; offered only in the Fall Quarter; to be completed during the first year) and Microbiology 225/225L or M239/M239L (lecture and laboratory, eight units each; offered in the Winter and Spring Quarters respectively; to be completed during the first year) are required.

Genetics and Regulation: One 200-level, four-unit course to be selected from the current course listings maintained in the Student Affairs Office is required.
A total of eight additional units of 200-level coursework to be selected from at least two of the following three subject areas is required: (1) general microbiology and cell biology, (2) host-parasite interactions and virology, (3) immunology. Acceptable courses are listed in the Student Affairs Office.

You are expected to complete a course in physical chemistry (Chemistry 156). This requirement can be waived on the basis of work done before entering UCLA.

Student-Participation Seminar Courses

Each quarter, seminar courses in which students read and report on current scientific research literature are organized. You must enroll in five such courses (10 units) during your first two years in residence.

Laboratories

During your first 15 months in residence, you rotate for one quarter each through three laboratories within the department (outside laboratories are permissible with consent of the advisory committee). You normally enroll in Microbiology 596 for four units of credit for each laboratory.

First-Year Proposal

By June 30 of your first year of study you must submit an original research proposal of approximately five pages. The topic may be based on a subject presented in a departmental professional seminar or on material from one of the seminar courses. Suggestions and evaluations are returned to you and used by the faculty to evaluate continuation into the second year.

Teaching Experience

The department considers teaching experience to be an integral part of the graduate program. All Ph.D. candidates are required to serve as teaching assistants or in some other formal teaching capacity for three quarters. Prior experience at another institution is acceptable when approved by the departmental graduate adviser.

Qualifying Examinations

The written examination must be taken within 24 months of entry into graduate school and must be passed, if reexamination is required, no later than 27 months from the date of entry. (These periods may be extended with the written consent of the departmental graduate adviser and your mentor.)

The examination is administered by the doctoral committee which normally serves as the thesis committee as well. As a major part of the examination, you prepare and defend a written research proposal. Before presentation to the doctoral committee, you are encouraged to present the proposal before a student seminar group.

The University Oral Qualifying Examination covers both your proposal and general scientific background. It is not restricted to the topics of the proposal. The committee may arrange alternate ways to assess your preparation and qualifications.

Final Oral Examination

A dissertation on a subject of your choice selected in consultation with your major professor is required. The final oral examination, administered by the doctoral committee, is a defense of the completed dissertation, presented as a professional seminar and open in part to the public.

Lower Division Courses

6. Introduction to Microbiology. Lecture, three hours. Not open for credit to students with credit for course 101, former courses 7, 10, Biology 5, 6, 7, 8, or equivalent courses taken elsewhere. Designed for the nontechnical student; an introduction to the biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. (F,W,Sp)

6L. Microbiology Laboratory (2 units). Laboratory, four hours. Corequisites: course 6, enrollment in a prehealth program (e.g., premedical, consent of instructor. An optional laboratory, with emphasis on basic principles of diagnostic microbiology for students preparing to enter the allied health professions (e.g., nursing, public health, kinesiology). Focus on purposes and functions of the clinical microbiology lab in the diagnosis of infectious diseases, as well as the application of aseptic disinfectant techniques. Practical insight and experience in modern medical procedures and new technologies.

Mr. Robinson, Ms. Wisnieski (Sp)

Upper Division Courses

101. Fundamentals of Bacteriology. Lecture, three hours; laboratory, six hours. Prerequisites: Biology 5, 7, Chemistry 25. The historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology. Mr. Gunalsus (Sp), Ms. Lascelles (F), Ms. McEwen (Sp), Mr. Romig (F)

102. Introductory Virology. Lecture, three hours; laboratory, four hours. Prerequisite: course 101. Biologic properties of bacterial and animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts.

Mr. Berk, Mr. Romig (W)

C103A. Biochemistry and Biology of Bacterial Infection. Lecture, three hours. Prerequisites: course 101, Chemistry 152. The biochemical properties of bacteria which afford the potential for pathogenicity. The epidemiology and transmission of disease; chemotherapy and drug resistance. Concurrently scheduled with course C203A.

Mr. Martinez (W)

C103B. Biochemistry of Host Defense Mechanisms. Lecture, three hours. Prerequisites: courses 101, M185, Chemistry 152. The biochemical basis of host defense mechanisms, with emphasis on the role of immunoglobulins in combating microbial invasion; the biology and biochemistry of phagocytic cells and constitutive mechanisms of host defense. Concurrently scheduled with course C203B.

Mr. Martinez (Sp)

C104A. Mammalian Cell as a Microorganism (2 units). (Formerly numbered C104C.) Lecture, three hours. Prerequisite: Chemistry 152, consent of instructor. The cultured mammalian cell as an experimental system for the study of normal regulatory processes and disease mechanisms. Contents include regulation of growth in chemically defined media; establishment of cell lines; characterization of cell lines, cultured cells as model systems in the study of normal growth and development, disease mechanisms and cancer. May be concurrently scheduled with course C204A.

Mr. Fox (F, first five weeks)

C104B. Biochemical Genetics of Eukaryotic Cells (2 units). Lecture, three hours. Prerequisites: prior background in biochemistry and genetics. Concepts in biochemical genetics, illustrated with recent research papers dealing with genetic analysis in yeast, drosophila, and mammalian systems. Topics include somatic cell genetics, gene mapping, mitochondrial genetics, hereditary elements, transposable elements, gene amplification, and other diseases. May be concurrently scheduled with course C204B.

Mr. Luisi (F, second five weeks)

C104E. RNA Tumor Viruses (2 units). Lecture, three hours. Prerequisites: Chemistry 152; consent of instructor. The interactions of RNA tumor viruses with differentiating tissues, such as the immune system and erythroid development. May be concurrently scheduled with course C210B.

Mr. Witte (Sp, five weeks)

105AH-105BH-105CH. Honors Laboratory in Bacterial Pathogenesis. Laboratory, 12 hours. Prerequisites: honors standing, consent of instructor. Highly recommended; course C103A. Limited enrollment. Current research projects on the biochemistry and genetics of the bacterial infectious process under direct supervision of instructor. 105AH. The pathogen's genetic component, focusing on plasmid encoded functions. 105BH. Effects of genetic alterations on the pathogen's proteins and LPS. 105CH. Examination of the interaction of genetically modified pathogens with the host and host-denied components.

Mr. Martinez (F, 105AH; W, 105BH; Sp, 105CH)

108. Hematology (2 units). Prerequisites: senior standing, consent of department. Diagnostic procedures used for the study of normal and pathological blood cells.

C111. Biology of the Prokaryotic Cell. Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 152, or consent of instructor. A review of current knowledge of the structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211.

Mr. Eisinger, Ms. Wisnieski (Sp)

C112. Molecular Biology of Bacterial Growth. Lecture, three hours. Prerequisites: course 101, Biology 6, and Chemistry 25, or equivalent, or consent of instructor. An analysis of the growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of the complex regulatory mechanisms that underlie the cell cycle and other macromolecular systems from the perspective of contemporary research techniques. Concurrently scheduled with course C212.

Mr. Gunalsus, Mr. Nierlich, Mr. Simons (W)

113. Bacterial Metabolism. Lecture, three hours. Prerequisites: course 101 and Chemistry 152, or consent of instructor. Aspects of energy generation and biosynthesis in relation to bacterial growth in pure culture and natural environment. Selected topics on readings from the current literature.

Ms. Lascelles (W)
119. Microbial Genetics and Molecular Biology (5 units). Lecture, three hours; discussion, one hour. Prerequisites: courses 101, 102, Biology 6, Chemistry 23, 25. Recommended: Chemistry 152. An integrated, conceptual analysis of classical and modern molecular genetics of microbes, especially bacteria and their viruses, with emphasis on the nature of the gene and the control of gene expression.

Mr. Simons (Sp)

M185. Immunology. (Same as Biology M185 and Microbiology and Immunology M185.) Lecture, three hours; discussion, one hour. Prerequisites: courses 214, 251, Chemistry 152. Chemistry 23, 25. Recommended corequisite: Chemistry 152 or 156. Introduction to experimental immunobiology and immunology: cellular and molecular aspects of humoral and cell immune reactions.

Mr. Clark, Mr. Sercarz (F)

M186. Experimental Design in Immunology. (Same as Biology M186 and Microbiology and Immunology M186.) Laboratory, 12 hours. Prerequisites: course M185, consent of instructor. Corequisite: course M187. Emphasis on analysis of research papers designed to train students in organizing and presentation of selected papers from the literature. Designed to serve as a forum for the critical analysis of research papers.

Mr. Clark, Mr. Sercarz (W)

M187. Immunology Seminar (2 units). (Same as Biology M187 and Microbiology and Immunology M187.) Prerequisites: course M185, consent of instructor. Corequisite: course M186. Student presentation of assigned selected papers from the relevant literature. Required for students preparing for research in immunology.

Mr. Clark, Mr. Sercarz (W)

Graduate Courses

C203A. Biochemistry and Biology of Bacterial Infection. Lecture, three hours. The biochemical properties of bacteria which afford the potential for pathogenicity. The epidemiology and transmission of disease; chemotherapy and drug biology. Concurrently scheduled with course C103A. Graduate term paper on a topic approved by the instructor required.

Mr. Martinez (W)

C203B. Biochemistry of Host Defense Mechanisms. Lecture, three hours. The biochemical basis of host defense mechanisms, with emphasis on the role of immunoglobulins in combating microbial invasion; the biology and biochemistry of phagocytic cells and their components.

Mr. Martinez (Sp)

C204A. Mammalian Cell as a Microorganism (2 units). (Formerly numbered C204C.) Lecture, three hours. Prerequisites: Chemistry 152 or consent of instructor. The cultured mammalian cell as an experimental system for the study of normal regulatory processes and disease mechanisms. Concepts in nucleic acid chemistry; control of gene expression.

Mr. Fox (F, first five weeks)

C204B. Biochemical Genetics of Eukaryotic Cells (2 units). Lecture, three hours; discussion, one hour. Prerequisites: prior background in biochemistry and genetics. Concepts in biochemical genetics, illustrated with recent research papers dealing with genetic analysis in yeast, drosophila, and mammalian systems. Topics include somatic cell genetics, gene mapping, mitochondrial genetics, homeotic genes, transposable elements, gene amplification, and other diseases. May be concurrently scheduled with course C104B. Includes an additional discussion section for graduate students on the research literature and methodology. S/U or letter grading.

Mr. Fox (F, second five weeks)

C211. Biology of the Prokaryotic Cell. Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 152, or consent of instructor. A review of current knowledge of the structural organization of prokaryotic cells. Emphasis on isolation, characterization, and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C111. Term paper on research topic selected by each graduate student required.

Mr. Eisinger, Ms. Wisnieski (Sp)

C212. Molecular Biology of Bacterial Growth. Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 152, or consent of instructor. An analysis of the growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of the complex regulatory mechanisms that control the cell cycle and other multicomponent cellular systems from the perspective of contemporary research techniques.

Mr. Gunasalu, Mr. Nierich, Mr. Simons (W)

C214. Methods in Membrane Biology. Lecture and discussion, three hours; laboratory, nine hours. Prerequisite: consent of instructor. Emphasis on the basic techniques for isolating biological membranes and component molecules. Basic and advanced techniques of membrane biochemistry and biophysics. Instructors: Ms. Wisnieski (W, alternate years) Ms. Kasamatsu, Mr. Lake (F, alternate years)

221B-221Z. Seminar and Special Topics in Molecular Biology (2 to 4 units each). Lecture, two hours; discussion, three hours. Prerequisite: consent of instructor. Seminar courses which integrate topically with current literature and methodology. Instructors: Mr. Ahmed and the Staff (Sp)

225. Biochemical Methods in Microbial and Cell Biology (2 units). Prerequisite: consent of instructor. Emphasis on techniques for purification and characterization of proteins, including cell disruption, column chromatography, gel electrophoresis, ultracentrifugation, various optical methods, and use of radiotopes. Instructors: Mr. Lusis (W, alternate years)

225L. Laboratory in Biochemical Methods in Microbial and Cell Biology (6 units). Laboratory, 12 hours. Prerequisite: consent of instructor. Corequisite: course 225. Laboratory in techniques for purification and characterization of proteins, including cell disruption, column chromatography, gel electrophoresis, ultracentrifugation, various optical methods, and use of radiotopes. Instructors: Mr. Lusis (W, alternate years)

M226A. Principles of Microbial Pathogenesis. (Same as Biology M226A and Microbiology and Immunology M226A.) Lecture, four hours; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. A lecture/discussion format designed to analyze the basic pathogenesis of parasitic and viral infections. Emphasis on molecular and cellular approaches to an understanding of host-microbial interaction.

Mr. Miller and the Staff (W)

M226B. Principles of Microbial Pathogenesis. (Same as Biology M226B and Microbiology and Immunology M226B.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. A lecture/discussion format designed to analyze the basic pathogenesis of parasitic and viral infections. Emphasis on molecular and cellular approaches to an understanding of host-microbial interaction.

Ms. Kasamatsu, Mr. Lake (F, alternate years)

M230A. Structural Molecular Biology (2 units). (Same as Biology M230A and Chemistry M230A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor based on a written research proposal. Emphasizes structure and function of macromolecules and supramolecular structures, emphasizing modeling and computer analysis, and studies of viruses and protein crystals.

Ms. Eisinger, Ms. Kasamatsu, Mr. Lake (F, alternate years)

M230C. Structural Molecular Biology Laboratory. (Same as Biology M230C and Chemistry M230C.) Laboratory, 10 hours. Prerequisite: consent of instructor based on a written research proposal. Practice with electron microscopy of macromolecules and supramolecular structures, emphasizing modeling and computer analysis, and studies of viruses and protein crystals.

Ms. Kasamatsu, Mr. Lake (F, alternate years)

235. Synthesis and Application of Oligonucleotides. Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Chemical methods for the synthesis of oligonucleotides and use of them for studies of molecular biology.

Mr. Akita (Sp)

235L. Laboratory Synthesis and Application of Oligonucleotides (6 units). Laboratory, 12 hours. Corequisites: course 235, consent of instructor. Laboratory in advanced methods in oligonucleotide synthesis and application. Oligonucleotides are synthesized chemically by either the phosphotriester or phosphoramidite method and used for site specific mutation experiments. The resultant mutant is screened by the oligonucleotides.
M239. Techniques in Nucleic Acid Research (2 units). (Same as Biology M239.) Highly recommended for students considering graduate work in molecular biology. Emphasis on hands-on practical methods in characterization of genes, including sequence determination. Isolation of nucleic acids by centrifugation, chromatography, and electrophoresis, and characterization of restriction and blot hybridization. Cloning in bacterial and plasmid vectors, sequence determination by the dideoxy technique, computer analysis of sequences.

Mr. Nierlich, Mr. Simpson (Sp, alternate years)

M239L. Laboratory in Nucleic Acid Research (6 units). (Same as Biology M239L.) Laboratory, 12 hours. Corequisite: course M239. Laboratory in advanced methods in characterization of genes, including sequence determination. Isolation of nucleic acids by centrifugation, chromatography, and electrophoresis, and characterization by restriction mapping and blot hybridization. Cloning in bacterial and plasmid vectors, sequence determination by the dideoxy technique, computer analysis of sequences.

Mr. Nierlich, Mr. Simpson (Sp, alternate years)

M246. Computer Analysis of Genetic Organization. (Same as Biology M246.) Lecture, two hours; laboratory, six hours. Prerequisites: consent of Biology 144 or equivalent, and Biology 8. Lectures and laboratory instruction in contemporary procedures for the analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

Mr. Nierlich, Mr. Simpson (Sp, alternate years)

250. Seminar in Microbial Metabolism (2 units). Prerequisite: consent of instructor. Discussion and student presentations of recent work in the areas of genetic regulation and physiology of bacterial metabolism.

Mr. Gunsalus (F,W)

251. Seminar in Regulation and Differentiation (2 units). S/U grading.

Mr. Gunsalus, Mr. Nierlich (F)

255. Seminar in Microbial Cell Biology (2 units). Prerequisite: consent of instructor. Student presentations and critical discussion of current literature on various aspects of prokaryotic and eukaryotic cell biology and morphogenesis. May be repeated for credit.

Ms. EeCowan (F)

256. Seminar in Microbial Molecular Genetics (2 units). Prerequisite: consent of instructor. Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic molecular genetics. Emphasis on the nature of the gene and the control of gene expression. May be repeated for credit. S/U or letter grading.

Mr. Romig, Mr. Simons (F,W)

M258A. Molecular Genetics of the Immune System (2 units). (Same as Biology M258A and Microbiology and Immunology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of the immune system, T cell antigen receptor, and J chain affecting differentiation. S/U or letter grading.

Mr. Wall and the Staff (W, five weeks)

M258B. T and B Cell Function (2 units). (Same as Biology M258B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or equivalent or consent of instructor. Reading and discussion of current research articles on oncoptogenes activation and effector function of T and B cells. S/U or letter grading.

Mr. Bonavida and the Staff (W, five weeks)

M258C. Major Histocompatibility Complexes (2 units). (Same as Biology M258C and Microbiology and Immunology M258C.) Lecture, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on the structure of human and murine MHC chromosomal regions and genes, MHC polymorphism, MHC-like systems, MHC-linked genes, MHC and disease, and nonimmune function of MHC. S/U or letter grading.

Mr. Clark, Ms. Scofield (Sp, five weeks)

M258D. Immunopathology (2 units). (Same as Biology M258D and Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.

Mr. Porter (Sp, five weeks)

M258E. Immunoregulation (2 units). (Same as Biology M258E and Microbiology and Immunology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on idiotype immunology and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.

Mr. Sercarz (F, five weeks)

M258F. Immunochimistry (2 units). (Same as Biology M258F and Microbiology and Immunology M258F.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on the immunonchimistry of antibodies, antigens, and complement, antigenic recognition, antibody restriction. S/U or letter grading.

Mr. Schumaker, Ms. Winolesi (F, Sp, five weeks)

M259. Immunology Forum (2 units). (Same as Microbiology and Immunology M259.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on the structure of human and murine MHC and disease, and nonimmune function of MHC. S/U or letter grading.

Mr. Sercarz (F, W, Sp)

M260. Cellular Immunology Seminar (2 units). (Same as Microbiology and Immunology M260.) Prerequisite: consent of instructor. Critical discussions of the current literature in T and B cell immunology, with emphasis on molecular mechanisms.

Mr. Sercarz (F, W, Sp)

270. Seminar in Molecular Virology (2 units). Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U grading.

Mr. Berk, Mr. Witte (F, W, Sp)

280. Seminar in Molecular and Cellular Endocrinology (2 units). Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and cellular endocrinology. S/U grading.

Mr. Fox (Sp)

290. Seminar in Molecular Genetics (2 units). Lecture, one hour; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and cellular endocrinology. S/U grading.

Mr. Berk, Mr. Witte (F, W, Sp)

M298. Seminar in Current Topics in Molecular Biology (2 units). (Same as Biology Chemistry M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

(F, W, Sp)
Scope and Objectives

The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are drawn from departments and from the Molecular Biology Institute. Areas for study include structure and function of macromolecules, molecular genetics, and virology; bioenergetics, catalysis, and control; molecular basis of chromosome replication and gene expression and of cancer and its control.

Ph.D. Degree

Admission

Recommended undergraduate training for the Ph.D. program includes a major in a biological or physical science. Coursework should include mathematics through calculus, one year of general and organic chemistry, one year of physics, two quarters of physical chemistry based on the use of calculus, and one year of biology. Undergraduate requirements may be modified for qualified candidates with interests in certain areas. Candidates who enter the program with course deficiencies are expected to fulfill these early in the graduate program. In addition to University requirements, six quarters of Molecular Biology M298 are required.

Only superior students are admitted, and in addition to the application, transcripts, and statement of purpose, three letters of recommendation are required along with Graduate Record Examination (GRE) scores. Copies of materials sent to the Graduate Admissions Office should also be sent directly to the Graduate Office, Molecular Biology Program, 108 MBI, UCLA, Los Angeles, CA 90024-1570.

Course Requirements

The usual program is two regular courses per quarter in addition to laboratory research, or the equivalent of 12 quarter units of upper division or graduate work. Six quarters of Molecular Biology M298 are required.

Teaching Experience

Teaching experience is encouraged, as it is a skill needed for a future career.

Qualifying Examinations

Examinations are given in Molecular Biology M298, and four must be passed. The University Oral Qualifying Examination on original research proposed by the candidate independent of the Ph.D. adviser and on a topic distinct and separate from thesis research is held usually during the second year in the program. A "midstream seminar" must be presented during the third year in the program.

Final Oral Examination

The final oral examination is required of all students for the degree.

Graduate Course

M298. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M236, Biology M298, Chemistry M298, Microbiology M296, and Microbiology and Immunology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

Related Courses in Other Departments

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the guidance committee or research supervisor, other related courses may be included in the program.

Microbiology 250, 251, 256, M258A, M258B, M260, M263, 270, 290, M298

Microbiology and Immunology 250, M256, M258A, M258B, M260, 261, 262, M263, 264, M298

Near Eastern Languages and Cultures

376 Kinsey Hall, (213) 825-4165

Professors

Amin Banani, Ph.D. (Persian and History)
Arnold J. Band, Ph.D. (Hebrew)
Andras Bodrogi, Ph.D. (Turkic and Iranian)
Seeger A. Bonebakker, Ph.D. (Arabic)
Giorgio Buccellati, Ph.D. (Near Eastern History and History)
Herbert A. Davidson, Ph.D. (Hebrew), Chair
Ismael Poonawala, Ph.D. (Arabic)
Yona Sabar, Ph.D. (Hebrew)
Avedis K. Sanjany, Ph.D. (Narekatsi Professor of Armenian Studies)
Hannes-Peter Schmidt, Ph.D. (Indo-Iranian)
Stanislav Segert, Ph.D. (Near Eastern Archaeology and Northwest Semitics)
Wolf Leslau, Docteur es Lettres, Emeritus
Moshe Perlman, Ph.D., Emeritus

Associate Professors

Elizabeth Carter, Ph.D. (Near Eastern Archaeology)
Lev Hakak, Ph.D. (Hebrew)
Thomas Penchoen, Ph.D. (Berber and Arabic)

Lecturers

Shirone Breman (Hebrew)
David L. Lieber, D.H.L. (Hebrew)

Scope and Objectives

The mission of the department is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area which was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in ancient Near Eastern civilizations, Arabic, Hebrew, and Jewish studies. Masters and Ph.D. programs are offered in ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.
Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

Undergraduate Study

The department offers the Bachelor of Arts degree in four fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, and (4) Jewish Studies. In each of these fields you must meet the prerequisites and take the courses prescribed. Your adviser assists in selecting a plan of study developed around your interests.

Bachelor of Arts in Ancient Near Eastern Civilizations

There are four options for a major in ancient Near Eastern civilizations: (1) Mesopotamia, (2) Egypt, (3) Syria-Palestine, and (4) biblical studies.

Preparation for the Major

Prerequisites for options 1 and 2 are German 1 and 2; prerequisites for options 3 and 4 are Greek 1, 2, Hebrew 1A-1B-1C, 102A-102B-102C. Majors in all four fields are expected to continue their study of German or Greek beyond the prerequisite levels.

The Major

Majors in all four options are required to take 14 courses selected in consultation with the program adviser.

Majors selecting options 1, 2, and 3 are required to take four language courses as follows: option 1: Semitics 140A-140B, 141, 142; option 2: Ancient Near East 120A-120B-120C, 121A; option 3: Semitics 130 and three quarters of Hebrew 120. The remaining 10 courses for all options are to be selected from the following: three literature courses from Ancient Near East M150A; three courses in history and religion from Ancient Near East M104A, M104B, 130, 170, History 105, M191A, 193D, 203, Iranian 169, 170; three courses in archaeology and art from Ancient Near East 160A, 160B, 161A, 161B, 161C, 162, Art History 101A, 101B; one course in research methodology (such as Anthropology 115Q, 115R, 116P, M116Q, or Linguistics 120A, 120B, or English 140A) taken preferably in another department with the consent of the adviser.

Majors selecting option 4 are required to take 14 courses as follows: three quarters of Hebrew 120; Ancient Near East 150C, 162, 170; English 108B or History 194A; Greek 130; Jewish Studies M150A; History M191A; Semitics 130. The remaining three courses may be selected from Ancient Near East M104A, M104B, 130, 150A, 150B, 160A, 160B, Art History 101A, 101B, 105A, Classics 168, Greek 131, History 105, 193D, 194B, Iranian 169, 170, Latin 120.

Bachelor of Arts in Arabic

Students majoring in Arabic may combine the major with the interdepartmental specialization in business and administration to enhance their career opportunities. Due to the number of additional courses required, you are advised to consider this option early in your academic career.

Preparation for the Major

Required: Arabic 1A-1B-1C, 150A-150B

The Major

Bachelor of Arts in Hebrew

Preparation for the Major

Required: Hebrew 1A-1B-1C, 102A-102B-102C, Jewish Studies M150A-150B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 103A-103B-103C; three quarters of Hebrew 120; two courses from Hebrew 130, 135; two courses from Hebrew 140, 160; Hebrew 190A-190B; two additional courses in Hebrew or Aramaic to be approved by the adviser; two courses from History M191A, M191B, M192A, M192B.

Bachelor of Arts in Jewish Studies

Preparation for the Major

Required: Hebrew 1A-1B-1C, History M191A-M191B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 102A-102B-102C, 103A-103B-103C, Jewish Studies M150A-150B, 151A-151B, 199, and five other upper division courses. At least two of the five must be courses in the areas of Hebrew, Jewish history, or Yiddish. The remaining three may be selected either from those areas or from courses with Jewish content given in other departments and approved by the adviser.

Master of Arts Degree

Admission

In addition to the regular University requirements, a bachelor's degree or its equivalent in the language area selected for the degree, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required. The GRE must be taken within 24 months prior to receipt of your admission application by the department. As a rule, you are not admitted if your grade-point average is below 3.25 or if your GRE score is below 1,600. Prospective students may write to the Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA, Los Angeles, CA 90024-1511.

You are assigned an adviser after being admitted. Subsequently, an examining committee is established to administer the comprehensive examination.

Major Fields or Subdisciplines

Ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

You may concentrate on either language or literature in your selected field but are required to do work in both. In the case of the ancient Near Eastern field, you may concentrate on a combination of both language and literature with Near Eastern archaeology.

Foreign Language Requirement

You are required to pass an examination in one major modern European language other than English by the beginning of your fourth quarter in residence. The choice of the language is determined in consultation with your adviser. You may satisfy this requirement by one of the following methods: (1) Educational Testing Service (ETS) examination with a minimum score of 550, (2) departmentally administered examination, (3) two years of language instruction at a UC campus, with grades of B or better. It is strongly recommended that if you intend to continue toward a Ph.D. degree, you acquire knowledge of a second major European language other than English while still a candidate for the M.A. degree.

Course Requirements

A minimum of nine upper division and graduate courses is required, at least six of which must be at the graduate level. All candidates are required to take one quarter of Near Eastern Languages 200.

Students in ancient Near Eastern civilizations are required to study two ancient languages of the ancient Near East and the history and archaeology of the related area. Languages available include ancient Egyptian (including Coptic), Akkadian, Aramaic (including Syriac), Hebrew (with Ugaritic and Phoenician), Hittite, Old Persian, and Sumerian. The area of concentration may be either the linguistic, literary, or archaeological aspect of the discipline.
Students in Hebrew are required to study Hebrew and another Semitic language; in Semitics, three Semitic languages; in Turkish, two Turkic languages; in Arabic and Armenian, the major language and one culturally related Near Eastern language; in Iranian, either Persian and Arabic, or Persian and Sanskrit and Old and Middle Iranian.

Twelve units of course 596 may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan
After completion of course requirements and the foreign language examination, you are required to take a written comprehensive final examination in your major and related fields.

Ph.D. Degree
Admission
In addition to the regular University requirements, an M.A. or equivalent in your field, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required. The GRE must be taken within 24 months prior to receipt of your admission application by the department. As a rule, you are not admitted if your grade-point average is below 3.25 or if your GRE score is below 1,600. Prospective students may write to the Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA, Los Angeles, CA 90024-1511.

The M.A. program need not have been completed at UCLA. You are assigned an adviser after being admitted. Subsequently, an examining committee is established to administer the qualifying examinations.

Major Fields or Subdisciplines
Ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

You may concentrate on either language or literature in your selected field but are required to do work in both. In all areas of specialization, your program of study is selected in consultation with your adviser.

Foreign Language Requirement
Two modern major European languages other than English are required. The choice of languages must be approved by the adviser, who may also require additional language skills in modern and/or ancient languages if such skills are needed for scholarly work in the area of your interests.

The requirement is fulfilled by one of the following methods: (1) passing the Educational Testing Service (ETS) examination with a minimum score of 550, (2) departmentally administered examination, (3) two years of language instruction at a UC campus, with grades of B or better.

You are expected to pass one of the two required European languages at the beginning of your first quarter in residence and the second language no later than the beginning of your fourth quarter.

Course Requirements
If you are specializing in the languages of the Near East, you are expected to take the equivalent of one year of general linguistics and one year of grammar in your field of concentration (e.g., Semitics or Turkic). You must also achieve competence in three culturally related languages within your field of concentration, with particular emphasis on two. You are also advised to acquaint yourself with the historical, literary, religious, and social background of the various language areas selected.

If you are specializing in the literatures of the Near East, you are required to achieve competence in two languages; your second language must be a literary language from the cultural area related to the first (e.g., a Hebraist can choose Akkadian, Arabic, Aramaic, or Yiddish; an Arabist can choose Persian, Turkish, or Berber, and so on). You must also be familiar with the history of literary criticism and methods of literary research. This requirement may be fulfilled by taking courses offered by various departments at UCLA, particularly the course in literary criticism offered by the English Department or the course in the methodology of comparative literature.

If you are specializing in ancient Near Eastern civilizations, you are required to achieve competence in two ancient languages. You may concentrate in either the linguistic, literary, or archaeological aspect of the discipline.

Qualifying Examinations
You must pass the written qualifying examinations before your doctoral committee is formed.

Candidates in languages are examined in three Near Eastern languages and the literary and historical background of at least two of them. Candidates in literature are examined in the literatures written in two languages within the cultural area of concentration and the historical and cultural background of these languages, with emphasis on one of them. Candidates in ancient Near Eastern civilizations are examined in two ancient languages and the history and archaeology of the ancient Near East.

When you have passed the written examinations, your doctoral committee administers the University Oral Qualifying Examination. Passing this examination allows you to advance to candidacy and begin work on your dissertation.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The department does not require an oral defense of the dissertation except when deemed necessary by the doctoral committee.

Ancient Near East
(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

Upper Division Courses
M104A-M104B. Ancient Egyptian Civilization. (Same as History M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. The political and cultural institutions of ancient Egypt and the ideas on which they were based. M104A. Chronological discussion of Prehistory, the Old and Middle Kingdom. M104B. The New Kingdom and the Late period until 332 B.C. (Alternate years)

120A-120B-120C. Elementary Ancient Egyptian. Lecture, three hours; laboratory, two hours. Prerequisites: consent of instructor. Grammar and texts.

121A-121B-121C. Intermediate Ancient Egyptian. Lecture, three hours. Prerequisites: courses 120A-120B-120C. Readings in ancient Egyptian literature.

123A-123B. Coptic. Lecture, three hours. Prerequisite: consent of instructor. An introduction to Coptic grammar and reading of Coptic texts.

124. Middle Egyptian Technical Literature. Prerequisite: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included.

130. Ancient Egyptian Religion. Lecture, three hours. An introductory survey of various ancient Egyptian religious beliefs and practices, their origin, and development. Discussions of religious polities, such as divine kingship and pious foundations.

140A-140B. Elementary Sumerian. Lecture, three hours. Prerequisites: Semitics 140A-140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from the Ur III period.

145. Sumerian Literary Texts. Lecture, three hours. Prerequisites: courses 140A-140B or consent of instructor. Reading and interpretation of selected Sumerian literary texts.

150A-150B-150C. Survey of Ancient Near Eastern Literatures in English. Lecture, three hours. Each course may be taken independently for credit. 150A. Mesopotamia; 150B. Egypt; 150C. Syria and Palestine.

160A-160B. Introduction to Near Eastern Archaeology. Lecture, three hours. Terminology, geography, principles, strategy of research, bibliography, and a general survey of Near Eastern archaeology.

161A-161B-161C. Archaeology of Mesopotamia. Prerequisite: consent of instructor. Survey of the major archaeological periods in Mesopotamia, with special emphasis on late prehistoric and early historical periods and with reference to neighboring cultural areas. Each course may be taken independently for credit.

162. Archaeology of Palestine. Lecture, three hours. A survey of the archaeology of Palestine and the Sinai Peninsula from the Bronze Age to the destruction of Jerusalem in A.D. 70, with emphasis on the geographic setting and relationships to other cultures of the Near East.
163A-163B. Archaeology of Iran. Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. 163A. The prehistoric and protohistoric phases of Iranian archaeology. 163B. The archaeology of Elam, the Iron Age, and the Achaemenid Empire. Ms. Carter

164A-164B-164C. Archaeology of the Historic Periods in Mesopotamia. Prerequisites: courses 161A-161B-161C and History 105, or consent of instructor. Survey of the main archaeological periods in Mesopotamia, with special emphasis on the historic periods and with reference to neighboring cultural areas. Each course may be taken independently for credit. Ms. Carter

170. Introduction to Biblical Studies. Lecture, two hours. Knowledge of original languages not required. The Bible (Old and New Testaments) as a book. Carson, text, and versions. Linguistic, literary, historical, and religious approaches to Bible study. Survey of history of interpretation from antiquity to the present. Mr. Segert

199. Special Studies in the Ancient Near East (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

210. Late Egyptian. Lecture, three hours. Prerequisite: courses 121A-121B-121C, consent of instructor. Late Egyptian grammar and orthography. Reading of literary and hieratic texts. May be repeated for credit.

211A-211B. Texts of the Greco-Roman Period. Prerequisite: course 121C. Introduction to the grammar and orthography of hieratic texts from Graeco-Roman temples. Text readings and translation of various textual types.

220. Seminar in Ancient Egypt. Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit.

221A-221B. Demotic. Prerequisite: course 121C. Introduction to Demotic grammar and orthography. Reading of texts from various genres.

240A-240B-240C. Seminar in Sumerian Language and Literature. Lecture, two hours. Prerequisite: consent of instructor. Readings from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history.

M250. Seminar in Ancient Mesopotamia. (Same as History M207.) Seminar, three hours. Selected topics on the political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit. Mr. Buccellati

250X. Seminar in Ancient Mesopotamia (1 unit). Prerequisite: consent of instructor. Selected topics on the political, social, and intellectual history of ancient Mesopotamia. A course for students who participate regularly in class meetings but without the homework required in course M250. May be repeated for credit. S/U grading. Mr. Buccellati

260. Seminar in Ancient Near Eastern Archaeology. Lecture, two hours. Prerequisite: consent of instructor. May be repeated for credit.

261. Practical Field Archaeology (2 to 8 units). Fieldwork, two hours. Prerequisite: consent of instructor. Participation in archaeological excavations or other archaeological research in the Near East under supervision of the staff. May be repeated. Mr. Bueller

262. Seminar in Object Archaeology. Discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Selected topics in the analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in the Heeramaneck Collection of the Los Angeles County Museum of Art. Ms. Carter

272. Semitic Background of the New Testament. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C, Semitics 130, Greek 1, and, or consent of instructor. Study of the Semitic elements in the Greek New Testament; traditions transmitted in Aramaic, relations to the Old Testament and to the post-Biblical literature, and Palestinian Judaism. Mr. Segert

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

201A-201U. Topics in History

Arabic

Lower Division Courses

1A-1B-1C. Elementary Literary Arabic. Lecture, six hours. Basic grammar and syntax.

Upper Division Courses

102A-102B-102C. Intermediate Literary Arabic. Lecture, four hours; discussion, one hour. Prerequisites: courses 1A-1B-1C or consent of instructor. Grammar and syntax; readings of excerpts from literary texts; composition.

111A-111B-111C. Elementary Spoken Egyptian Arabic. Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. Grammar and syntax; excerpts from literary texts using colloquial Arabic.

112A-112B-112C. Advanced Spoken Egyptian Arabic. Lecture, three hours. Prerequisites: courses 111A-111B-111C or consent of instructor. Grammar and syntax; excerpts from literary texts using colloquial Arabic.

113A-113B-113C. Elementary Spoken Levantine Arabic. Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. Grammar and syntax; excerpts from literary texts using colloquial Arabic.

114A-114B-114C. Spoken Moroccan Arabic. Lecture, two hours; laboratory, one hour. Introduction to the spoken Arabic dialect of Morocco. Phonology, morphology, and syntax. Emphasis on developing oral skills.

120. Islamic Texts. Prerequisite: course 102C or equivalent. Readings from Koran, Tafsir, Hadith, Fiqh. May be repeated for credit. Mr. Poonawala

130. Classical Arabic Texts. (Formerly numbered 130A-130B-130C.) Lecture, three hours. Prerequisite: course 102C or equivalent. Readings from medieval and early Islamic literary texts, with grammatical and syntactical analysis. May be repeated for credit. Mr. Bonebakker

132. Philosophical and Kalam Texts. (Formerly numbered 132A-132B-132C.) Lecture, three hours. Prerequisite: course 120 or consent of instructor. Readings in medieval and kalam texts. May be repeated for credit. Mr. Davidson

140. Modern Arabic Texts. (Formerly numbered 140A-140B-140C.) Lecture, three hours. Prerequisite: course 102C or equivalent. Readings in contemporary Arabic texts, including newspapers and journals. May be repeated for credit.

141. Modern Arabic Literature. Lecture, three hours. Prerequisites: two quarters of course 140 or consent of instructor. Reading in selected texts representing the most important trends in contemporary Arabic literature with an outline of literary history from the beginning of the 19th century to the present. Conducted in Arabic. May be repeated for credit.

150A-150B. Survey of Arabic Literature in English. Lecture, three hours. Knowledge of Arabic not required. Survey of Arabic literature from its beginning to the present, with selected readings in translation. Each course may be taken independently for credit. Mr. Bonebakker (F)

151. Survey of Modern Arabic Literature in English. Lecture, three hours. Readings of selected texts covering basic literary trends from the middle of the last century to the present. Ms. Fayad

199. Special Studies in Arabic (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

220. Seminar in Islamic Texts. (Formerly numbered 220A-220B-220C.) Lecture, three hours. Prerequisite: consent of instructor. Doctrines and hermeneutics of various schools of thought in Islam, with selected readings from major works. May be repeated for a maximum of 24 units. Mr. Poonawala (F,W,Sp)

230. Medieval Literary Texts. (Formerly numbered 230A-230B-230C.) Lecture, two hours. Prerequisite: consent of instructor. Readings in Arabic prose and poetry, survey of prosody. May be repeated for a maximum of 24 units. Mr. Bonebakker (F,W,Sp)

240. Seminar in Arab Historians and Geographers. (Formerly numbered 240A-240B-240C.) Lecture, three hours. Prerequisite: consent of instructor. Selected readings from the works of major historians, geographers, and travelers. May be repeated for a maximum of 24 units. Mr. Poonawala (F,W,Sp, alternate years)

250. Seminar in Arabic Literature. (Formerly numbered 250A-250B-250C.) Lecture, two hours. Prerequisite: consent of instructor. Selected topics from Arabic literature. Readings of texts from manuscript. May be repeated for a maximum of 24 units. Mr. Bonebakker (F,W,Sp)

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

Related Courses in Another Department

Mr. Band

150B. Rabbinic and Medieval Literature. Mr. Davidson

151A-151B. Modern Jewish Literature in English. Lecture, three hours. Each course may be taken independently for credit.

151A. Diaspora Literature. A study of the literary responses of Jews to modernity, its challenges and threats. Readings in texts originally written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work. 

Mr. Band

151B. Israeli Literature. A study of translations from Hebrew literature written in Israel and reflecting the cultural and political contexts of Israeli society, focusing on the nature, style, and impact of its influence on modern world literature.

Mr. Haikak

190. Undergraduate Seminar in Jewish Studies. Examination of a single topic in depth with the object of encouraging and guiding students' research in the area of Jewish studies. Literary, cultural, and historical subjects included. 

(FSp)

M191A-M191B. Survey of Jewish History. (Same as History M191A-M191B.) Lecture, three hours. A survey of Jewish social, political, and religious development. M191A. From Biblical Times to the End of the Middle Ages; M191B. From the End of the Middle Ages to the Present. 

Mr. Finkenstein, Mr. Zippierstal
141. Advanced Akkadian. Lecture, three hours. Prerequisite: consent of instructor. Old Babylonian syntax; reading of basic Old Babylonian texts.
   Mr. Buccellati

142. Akkadian Literary Texts. Lecture, three hours. Prerequisite: consent of instructor. Selected readings from Akkadian myths and epics, with an introduction to the historical tradition of the works and their literary structure.
   Mr. Buccellati

199. Special Studies in Semitics (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

210. Ancient Aramaic. Lecture, two hours. Prerequisite: course 130 or consent of instructor. Reading of the surviving inscriptions and papyri. May be repeated for credit.
   Mr. Segert

215B. Syriac. Lecture, two hours. Morphology and syntax of the Syriac language; readings in the Syriac translation of the Bible and Syriac literature. May be repeated for credit.
   Mr. Segert (alternate years)

220A-220B. Ugaritic. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of the Ugaritic language and literature. Only course 220B may be repeated for credit.
   Mr. Segert

240. Seminar in Akkadian Language (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in the linguistic analysis of Akkadian dialects. May be repeated for credit.
   Mr. Buccellati

240X. Seminar in Akkadian Language (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in the linguistic analysis of Akkadian dialects. A course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit.
   S/U grading.

241. Seminar in Akkadian Literature. Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.
   Mr. Buccellati

241X. Seminar in Akkadian Literature (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. A course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit.
   S/U grading.

280A-280B-280C. Seminar in Comparative Semitics. Seminar, two hours. Prerequisite: consent of instructor.

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units).

599. Ph.D. Dissertation Research and Preparation (2 to 8 units).

Semitics

Upper Division Courses

110. Neo-Aramaic. Lecture, three hours. Grammar and reading of selected texts (folktales, homilies, songs) in the modern Aramaic dialects of the Jews and Christians of Kurdistan.
   Mr. Sabar

   Mr. Segert

130. Biblical Aramaic. Lecture, three hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Grammar of biblical Aramaic and reading of texts.
   Mr. Segert (alternate years)

140A-140B. Elementary Akkadian. Lecture, three hours. Elementary grammar and reading of texts in standard Babylonian.
   Mr. Buccellati

   Mr. Jaecckel (F,W,Sp)

   Mr. Jaecckel

111A-111B-111C. Elementary Uzbek. Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Elementary grammar, reading, and composition exercises; elementary conversation.
   Mr. Bodrogligeti

112A-112B-112C. Advanced Uzbek. Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.
   Mr. Bodrogligeti

114A-114B-114C. Bashkir. Lecture, three hours. Prerequisite: course 102A or consent of instructor. Grammar, reading of literary and folkloric texts.
   Mr. Bodrogligeti

160. Cultural History of the Turks. Lecture, three hours. Prerequisite: consent of instructor. A survey of the cultural history of the Turks, as seen primarily through their literature, from their early history to the present.
   Mr. Bodrogligeti

170. Turk-Mongolian Nomadic Empires. Lecture, three hours. Prerequisite: consent of instructor. Requirements of students in the Turkic program and recommended for students in Soviet studies. An ethnic and linguistic survey of the Turkic peoples.
   Mr. Bodrogligeti

199. Special Studies in Turkic Languages (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

210A-210B-210C. Introduction to Ottoman. Lecture, three hours. Prerequisite: consent of instructor. Introduction to the literary language of the Ottoman Empire, from its foundation in the 14th century to its overthrow in the 20th century. For students of the history, literature, and religion of the Balkans, the Near East, and Central Asia. Topics include the Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts.
   Mr. Jaecckel (F,W,Sp)

211. Ottoman Diplomatics. Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent. Organization and contents of the Ottoman archives; reading and discussion of documents and registers. Introduction to the use of Ottoman archive materials as a source for historical research.
   Mr. Shaw

220A-220B-220C. Chagatay. Lecture, three hours. Prerequisites: courses 101A-101B or 112A-112B-112C or 114A-114B-114C or consent of instructor. Introduction to Chagatay: descriptive grammar; Arabic, Persian, and Tajik elements in grammar and vocabulary. Readings and composition drills.
   Mr. Bodrogligeti

225A-225B-225C. Old Turkic: Turk and Uygur. Lecture, three hours. Prerequisites: course 180, consent of instructor. Textual and linguistic analysis of Turk and Old Uygur documents: inscriptions, Manichean and Buddhist literary works.
   Mr. Bodrogligeti (alternate years)

5353 Bunche Hall, (213) 825-1374, 825-4601

Professors
Nikkie Keddie, Ph.D. (History)
Ismail Poonawala, Ph.D. (Near Eastern Languages and Cultures)
Georges Sabagh, Ph.D. (Sociology)
Stanford J. Shaw, Ph.D. (History), Chair

Assistant Professors
Irene A. Bierman, Ph.D. (Art History)
Nazi M. Shahraeeni, Ph.D. (Anthropology)

Scope and Objectives
The graduate major in this discipline is called "Islamic Studies." For details, see the program by that name earlier in this chapter.

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this particular area, (2) those who plan to live and work in the Near East whose careers will be aided by a knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.

Bachelor of Arts Degree
Preparation for the Major
Required: The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. You must also obtain reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or their equivalent in the language of your choice. You may substitute for the European language requirement Program in Computing 1 and one course from Economics 40, Political Science 6, Psychology 41, Sociology 18, or Statistics 50, plus one course from Economics 141, Geography 171, Political Science 102, Psychology M142, or Sociology 112. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 5, 6, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

The Major
Required: Sixteen courses as follows: (1) completion of the advanced level or equivalent in the same language taken in lower division; (2) History 106A-106B-106C and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Anthropology 110, 176, Art History 102A, 102B, 104A, 104B, C104C, Economics 110, 111, 112, 190, Geography 187, 188, Political Science 132A, 132B, 164, 165, Sociology 187. This program may be modified in exceptional cases with consent of the adviser.

If you are interested in doing graduate work in this field, see the M.A. and Ph.D. programs offered under "Islamic Studies" earlier in this chapter.

For further information, contact Professor Stanford J. Shaw at the program address.

Philosophy

321 Dodd Hall, (213) 825-4641

Professors
Marilyn McCord Adams, Ph.D.
Robert Merrifield Adams, Ph.D.
Rogers Albritton, Ph.D.
Roderick Bagur, Ph.D.
Stanford J. Shaw at the program address.

Scope and Objectives
The term "philosophy" means "lover of wisdom." The term has been translated from the Greek, literally means "lover of wisdom." The term has come to mean someone who seeks knowledge, enlightenment, truth. The undergraduate program in philosophy is not directed at career objectives (although it is traditionally a good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed — whether history, religion, government, or science.
The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

**Bachelor of Arts Degree**

**Preparation for the Major**

*Required:* Philosophy 7 or 21, 22, 31, and one other lower division course in philosophy.

**The Major**

*Required:* Thirteen upper division or graduate philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.

Courses listed under “Special Studies” may be applied toward the major but not toward a group requirement. A maximum of eight units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

**Honors at Graduation**

On the recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses (eight units) in philosophy with an average GPA of 3.5.

**Master of Arts Degree**

**Admission**

It is the policy of the department to admit only those who plan to earn the Ph.D. degree. For admission requirements, see the description under “Ph.D. Degree.”

**Foreign Language Requirement**

You must demonstrate reading knowledge of French, German, Latin, or Greek. (When relevant to your research, another language may be substituted with consent of the department.) This requirement can be satisfied by passing, with a score of at least 500, the Educational Testing Service (ETS) Graduate School Foreign Language Test in an approved language. Alternatively, it can be satisfied by either of the methods in which the Ph.D. language requirement can be satisfied.

**Course Requirements**

You must complete at least nine upper division or graduate courses (35 units), excluding Philosophy 199, of which five courses (20 units) must be in the 200 series.

Courses in the 500 series may not be applied toward the course requirements for the M.A. in Philosophy.

**Comprehensive Examination Plan**

Students seeking the M.A. must pass the master’s comprehensive examination (see the “Ph.D. Degree”). In case of failure, the examination may be repeated.

**Ph.D. Degree**

**Admission**

Admission to UCLA as a graduate student in philosophy requires approval both by the Graduate Division and by the Department of Philosophy. The University application and one official transcript from each institution attended should be sent directly to Graduate Admissions; the departmental application, three letters of recommendation (on the official forms), a statement of purpose, a sample of your written work, official scores from the Graduate Record Examination (GRE) General Test (the Subject Test in Philosophy is not required), official Test of English as a Foreign Language (TOEFL) scores for applicants whose native language is not English, and one official transcript from each institution attended should be sent to the department graduate counselor. Departmental information and applications can be obtained by writing to the Graduate Counselor, Department of Philosophy, 321 Dodd Hall, UCLA, Los Angeles, CA 90024-1451.

Admission to graduate study in philosophy is not probationary. At the end of your first year of study, the department conducts a review of your work; results are discussed in a meeting between you and your graduate adviser.

**Foreign Language Requirement**

You must demonstrate reading knowledge of French, German, Latin, or Greek. (Another language may be substituted with consent of the department, if it is used in your doctoral work.) You may satisfy this requirement by completing, with a grade of C or better, the final course in a two-year sequence of college courses in an approved language. Alternatively, you may satisfy the requirement by passing the department language examination. Completion of the foreign language requirement is not required for admission to the doctoral program but is required by the University for advancement to candidacy.

**Course Requirements**

A Ph.D. candidate must complete, with a grade of B or better, the three first-year seminars, plus nine additional upper division and graduate courses in philosophy (not including individual studies courses), distributed as follows:

- **Logic:** Two upper division or graduate courses in logic in either the Philosophy or Mathematics Department (approved by your adviser).
- **History of Philosophy:** One graduate course in history of philosophy, plus Philosophy 100A, 100B, 100C (or equivalent graduate or undergraduate courses taken at UCLA or elsewhere).
- **Ethics and Value Theory:** One graduate-level course.
- **Metaphysics and Epistemology:** One graduate-level course.
- **Electives:** As many courses as needed to fulfill the requirement of nine additional upper division or graduate courses in philosophy.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor on the basis of its content and the departmental guidelines. Normally, no substitutions for these courses are allowed, but if you have done graduate coursework elsewhere, you may be permitted to substitute previous graduate coursework in exceptional cases.

**Teaching Experience**

Before receiving a Ph.D., you are required to spend five quarters as a teaching assistant at UCLA.

**Qualifying Examinations**

The master’s comprehensive examination consists of four different examinations. One is in logic on the materials covered in Philosophy 31 and 32. Consult the Manual for Graduate Students in Philosophy for further information about this examination.

There are also examinations on each of the three first-year seminars. These examinations last two hours and each occurs soon after the completion of the seminar to which it applies. The examination is passed or failed as a whole, which does not necessarily require passing of all four parts. A grade of B− is the lowest passing grade on the whole examination or any of its parts; C+ is a failing grade.

In the second and third years, you must write two substantial papers, prepared in accordance with specific formats, called “propositions.” One must be on a topic in metaphysics and epistemology and the other on a topic in ethics and value theory.
The first proposition should be submitted before the end of your second year; the second, before the end of your third year. Both propositions must be accepted by the department before you can take the University Oral Qualifying Examination. Consult the Manual for Graduate Students in Philosophy for further details.

In the third year, you begin a new series of individual studies courses (Philosophy 596) with your dissertation supervisor to develop a well-defined dissertation project. A doctoral committee is selected and the University Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether you are able to complete the dissertation successfully. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of your preliminary investigations. In case of failure, the doctoral committee makes a recommendation for or against allowing a second oral examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination may be waived by the doctoral committee. This determination is usually made at the time of the oral qualifying examination.

Lower Division Courses

1. Beginnings of Western Philosophy. Lecture, three hours; discussion, one hour. The origins of Greek cosmology and philosophy, the beginnings of systematic thought and scientific investigation concerning such questions as the origin and nature of the material world, the concept of laws of nature, the possibility and extent of knowledge. Concentration on the pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and the atomists. During the second thirds of the course and on Socrates and some earlier works of Plato in the last few weeks.

2. Introduction to the Philosophy of Religion. Lecture, three hours; discussion, one hour. An introductory study of such topics as the nature and grounds of religious belief, the relation between religion and ethics, the nature and existence of God, the problem of evil, and what can be learned from religious experience.

3. Personal and Social Ideals. Lecture, three hours; discussion, one hour. A study of various conceptions of human perfection and social utopias. Readings from such authors as Freud, Thomas More, Marx, B.F. Skinner, and Sartre.

4. Philosophical Analysis of Contemporary Moral Issues. Lecture, three hours; discussion, one hour. A critical study of principles and arguments advanced in current moral issues. Related topics include revolutionary violence, rules of warfare, sexual morality, the right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women.

5A. Philosophy in Literature. Lecture, three hours; discussion, one hour. A philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and the meaning of life through examination of great literary works in the Western tradition.

6. Historical Introduction to Moral and Political Philosophy. Lecture, three hours; discussion, one hour. A study of some classic works in moral and political philosophy. Questions that may be discussed include What is justice? Why be moral? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society?

7. Introduction to the Philosophy of Mind. Lecture, three hours; discussion, one hour. An introductory study of philosophical issues about the nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, and free will, the nature of psychological knowledge.

8. Introduction to the Philosophy of Science. Lecture, three hours; discussion, one hour. An introduction to philosophical questions about the nature of science, drawing examples from specific scientific theories and controversies that can be understood without much mathematical or technical background. What role do observation and explanation play in building and evaluating scientific theories? How should we view the relation between science and common sense?

9. Principles of Critical Reasoning. The nature of arguments and how to assess the soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include the use of language in argumentation to arouse emotions as contrasted with conveying thoughts, the logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).

10. Virtues and Vices. Lecture, three hours; discussion, one hour. A study of the traditional theory of the virtues and vices, and an inquiry into its truth. Readings in Aristotle, Aquinas, and contemporary authors; discussion of concepts such as courage, wisdom, and justice. Should we accept the traditional list of the virtues and vices, or should it be revised?

11. Skepticism and Rationality. Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? An introduction to the study of these and related questions through the figures of some great philosophers of the modern period, such as Descartes, Leibniz, Berkeley, and Hume.

12. Introduction to Ethical Theory. Lecture, three hours; discussion, one hour. Recommended or required for many upper division courses in Group III. A systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, the meaning of ethical terms, relativism, etc.

13. Law, First Course. Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in law. The elements of symbolic logic, semantic and quantificational; forms of reasoning and structure of language.

14. Logic, Second Course. Lecture, three hours; discussion, one hour. Prerequisites: course 31 (preferably in the preceding quarter). Symbolic logic: extension of the systematic development of course 31. Quantifiers, identity, definite descriptions.

15. Philosophy in Literature. Lecture, three hours; discussion, one hour. A philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and the meaning of life through examination of great literary works in the Western tradition.

Upper Division Courses

100A. History of Greek Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Survey of Greek philosophy, with emphasis on the metaphysics and epistemology of Plato and Aristotle.

100B. Medieval and Early Modern Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Strongly recommended: course 100A. Survey of the development and transformation of Greek metaphysics and epistemology within the context of philosophical, theological, and the transition from the medieval to the early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.

100C. History of Modern Philosophy, 1650-1800. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course. Strongly recommended: course 100B. Courses 100A, 100B, and 100C should be taken in this sequence. Survey of the development of metaphysics and the theory of knowledge from 1650 to 1800, including Locke and Berkeley, Malebranche and/or Leibniz, and Cartesianism. In your plan to pursue more advanced studies in logic. The development of early medieval philosophy within the framework of Judeo-Christian theology and its assimilation and criticism of the Greek philosophical heritage. Focus on the problem of universals, the existence and nature of God, the problem of evil, and the doctrines of the Trinity and atonement. Selected readings from Augustine through Maleonides in English translation.

Group I: History of Philosophy

101A. Plato — Earlier Dialogues. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. A study of selected topics in the early and middle dialogues of Plato.

101B. Plato — Later Dialogues. Lecture, three hours; discussion, one hour. Prerequisite: course 101A. A study of selected topics in the middle and later dialogues of Plato.

102. Aristotle. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. A study of selected works of Aristotle.

104. Topics in Islamic Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. The development of Muslim philosophy in its great age (from 9th to 15th centuries) considered in connection with Muslim theology and mysticism.

105. Medieval Philosophy from Aquinas to Maimonides. Prerequisite: one philosophy course or consent of instructor. The development of medieval philosophy within the framework of Judeo-Christian theology and its assimilation and criticism of the Greek philosophical heritage. Focus on the problem of universals, the existence and nature of God, the problem of evil, and the doctrines of the Trinity and atonement. Selected readings from Augustine through Maimonides in English translation.

106. Later Medieval Philosophy. Prerequisite: one philosophy course or consent of instructor. Medieval philosophy within the framework of Judeo-Christian theology and its assimilation and criticism of the Greek philosophical heritage. Focus on the problem of universals, the existence and nature of God, the problem of evil, and the doctrines of the Trinity and atonement. Selected readings from Augustine through Maimonides in English translation.

107. Topics in Medieval Philosophy. Prerequisite: one philosophy course. Recommended: course 105 or 106. A study of the philosophy and theology of one medieval philosopher (e.g., Augustine, Abelard, Aquinas, Scotus, or Ockham, or the study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each quarter. May be repeated for credit with consent of instructor.

108. Philosophy in Literature. Lecture, three hours; discussion, one hour. A philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and the meaning of life through examination of great literary works in the Western tradition.
C109. Descartes. Prerequisites: course 21 or two philosophy courses or consent of instructor. A study of the works of Descartes, with special emphasis on his theories such as the problem of skepticism, the foundations of knowledge, the existence of God, the relation between mind and body, and the connection between science and metaphysics. May be concurrently scheduled with course C209.

Mr. Burge

C110. Spinoza. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. A study of the philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is a weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

Mr. Adams

C111. Leibniz. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. A study of the philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is a weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

Mr. Adams

C112. Locke and Berkeley. Prerequisite: one philosophy course or consent of instructor. A study of the philosophies of Locke and Berkeley; emphasis may sometimes vary from one figure to the other. May be concurrently scheduled with course C212.

Mr. Donnellan

C114. Hume. Prerequisite: one philosophy course or consent of instructor. Selected topics from the metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.

Mr. Donnellan

115. Kant. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. A study of Kant’s views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.

116. 19th-Century Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in 19th-century thought.

117. 19th and Early 20th-Century Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. A historical introduction to the philosophy of science. Several general topics discussed in the context of actual episodes in the development of the natural sciences.

120B. Philosophy of Science. Lecture, three hours; discussion, one hour. Prerequisite: course 31 or 125A or consent of instructor. An introduction to contemporary philosophy of science, focusing on problems of central importance.

126C. Philosophy of Science: Social Sciences. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. A discussion of topics in the philosophy of social sciences (e.g., the methods of the social sciences in relation to the physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, the nature of social laws).

Group II: Logic, Semantics, and Philosophy of Science

126A. Philosophy of Science. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. An introduction to the philosophy of science. Several general topics discussed in the context of actual episodes in the development of the natural sciences.

126B. Philosophy of Science. Lecture, three hours; discussion, one hour. Prerequisite: course 31 or 125A or consent of instructor. An introduction to contemporary philosophy of science, focusing on problems of central importance.

126C. Philosophy of Science: Social Sciences. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. A discussion of topics in the philosophy of social sciences (e.g., the methods of the social sciences in relation to the physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, the nature of social laws).

127A. Philosophy of Language. Prerequisite: course 31 or consent of instructor. Syntax, semantics, pragmatics. The semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.

Mr. Almog, Mr. Burge, Mr. Church, Mr. Kaplan

127B. Philosophy of Language. Prerequisite: course 32 or consent of instructor. Course 127A is not prerequisite to 127B. Selected topics similar to those covered in course 127A, but at a more advanced and technical level.

Mr. Almog, Mr. Church, Mr. Kaplan

128A. Philosophy of Mathematics. Prerequisites: courses 31, 32, and preferably one additional logic course. The philosophy of mathematics; logicism of Frege and Russell; arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincare, the early Weyl).

Mr. Almog, Mr. Church

128B. Philosophy of Mathematics. Prerequisite: course 128A or consent of instructor. Intuitionism of Brouwer, Heyting, and the later Weyl; proof theory of Hilbert.

Mr. Church

129. Philosophy of Psychology. Lecture, three hours; discussion, one hour. Prerequisites: one four-unit philosophy course, one philosophy course or consent of selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning, relations between semantic theory and learning theory; psychological aspects of the theory of syntax; behaviorism, functionalism, and alternatives: physiology and psychology.

Mr. Burge

130. Philosophy of Space and Time. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or one philosophy course and one physics course, or consent of instructor. Selected philosophical problems concerning the nature of space and time. The philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include the nature of geometry, conventionalism, absolutist versus relationalist views of space and time, philosophical impact of relativity theory.

131. Science and Metaphysics. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. An intensive study of the philosophical aspects of the theory of science. May be repeated for credit with consent of instructor.

132. Topics in Logic and Semantics. Prerequisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.

Mr. Kalish, Mr. Kaplan, Mr. Martin

134. Introduction to Set Theory. Prerequisites: course 32 or upper division standing in mathematics, consent of instructor. Introduction to axiomatic set theory; sets, natural numbers, relations, functions, cardinality, infinity.

Mr. Kalish, Mr. Martin

135. Introduction to Metamathematics. Prerequisite: course 32. Recommended: course 134 or equivalent. Models, satisfaction, truth, definability; logical truth and logical consequence; consistency and completeness.

Mr. Church, Mr. Kaplan, Mr. Martin

136. Modal Logic. Prerequisites: courses 31, 32. The first course in a two-quarter sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, possible worlds semantics and generalizations, Lemmon-Scott completeness, incompleteness in tense and modal logic, quantification extension.

Mr. Almog, Mr. Kaplan, Mr. Martin

Group III: Ethics and Value Theory

150. Society and Morals. Lecture, three hours; discussion, one hour. Prerequisite: course 22 or consent of instructor. A critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiar with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

151A-151B-151C. History of Ethics. (Formerly numbered 115A-115B-115C.) Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Course 151A is not prerequisite to 151B, which is not prerequisite to 151C. 151A. Selected Themes in Ancient Ethics. 151B. Selected Themes in Classical Ethics: Hume, Kant, Mill, etc. 151C. Selected Themes in Medieval Ethics. 151D. Selected Themes in Renaissance Ethics. 151E. Selected Themes in Modern Ethics. 151F. Selected Themes in Contemporary Ethics.

Mr. Lawrence, Mr. Quinn

153A. Topics in Ethical Theory: Normative Ethics. Prerequisite: course 22 or consent of instructor. A study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, personal fulfillment, useful ends, selflessness and self-sacrifice, responsibility and the theory of right action. May be repeated once for credit with consent of instructor.

153B. Topics in Ethical Theory: Metaethics. Prerequisite: course 22 or consent of instructor. A study of selected problems in metaethics. Topics may include the analysis of moral language, the justification of moral beliefs, moral realism, skepticism, etc. May be repeated once for credit with consent of instructor.

Mr. Almog, Mr. Kaplan, Mr. Martin

155. Medical Ethics. An examination of the philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation.

156. Topics in Political Philosophy. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Recommended: course 22. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor.

157A-157B. History of Political Philosophy. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. May be repeated with consent of instructor. 157A. Reading and discussion of classical works in political theory, especially those by Hobbes, Locke, Hume, and Rousseau. 157B. Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

161. Topics in Aesthetic Theory. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Philosophical theories about the nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

Mr. Quinn

166. Introduction to Legal Philosophy. Prerequisite: one philosophy course or consent of instructor. An examination, through the study of recent philosophical writings, of such topics as the nature of law, the relationship of law and morals, legal reasoning, punishment, and the obligation to obey the law.

Mr. Morris

Group IV: Metaphysics and Epistemology

170. Philosophy of Mind. Lecture, three hours; discussion, one hour. Prerequisites: two relevant philosophy courses or consent of instructor. An analysis of various problems concerning the nature of mind and mental processes such as the relation between the mind and body, our knowledge of other minds. May be repeated once for credit with consent of instructor.

Mr. Donnellan
172. Philosophy of Language and Communication. Prerequisites: two relevant philosophy or linguistics courses or consent of instructor. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries. Mr. Donnellan

175. Topics in Philosophy of Religion. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or its equivalent. An intensive investigation of one or two topics or works in the philosophy of religion, such as the attributes of God, arguments for or against the existence of God, or the relation between religion and ethics. Topics announced each quarter. May be repeated for credit with consent of instructor. Mr. Albritton

187. Philosophy of Action. Prerequisites: two philosophy courses or consent of instructor. A study of various concepts employed in the understanding of human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception. Mr. Albritton, Mr. Burge, Mr. Donnellan

189. Major Philosophers of the 20th Century. Prerequisites: two philosophy courses or consent of instructor. A study of the writings of one or more modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor. Mr. Albritton, Mr. Almog, Mr. Burge, Mr. Donnellan

Special Studies

M192. Philosophical Analysis of Issues in Feminist Theory. (Formerly numbered 192.) (Same as Women's Studies M110D.) Lecture, three hours. Prerequisite for women's studies majors: Women's Studies 10; for other students: one philosophy course or consent of instructor. An examination in depth of different theoretical positions on gender and women as they have been applied to the study of philosophy. Emphasis on the theoretical contributions made by the new scholarship on women in philosophy. A critical study of concepts and principles which arise in the discussion of women's rights and liberation. A philosophical approach to feminist theories. Mr. Adams

193. Christian Ethical Thought. Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment of their views on morality and the religious life. Mr. Adams

195. 19th- and 20th-Century Religious Thought. Lecture, three hours; discussion, one hour. A philosophical approach to Western religious thought of the last 200 years, through study of selected works by various authors such as Kant, Schleiermacher, Kierkegaard, Husserl, Heidegger, Buber, and Tillich. Mr. Adams

196. Undergraduate Seminar in Philosophy. Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Variable topics; consult Schedule of Classes or "Department Announcements" for current topics. May be repeated for credit with consent of instructor.

197. Reading and Writing Philosophy. Prerequisites: two lower or upper division philosophy courses. Designed to help philosophy students improve their ability to read philosophical texts and write philosophical essays. Selected texts used to illustrate problems of reading and writing; students required to do and redo written work. Mr. Quinn

199. Special Studies (2 to 8 units). Prerequisite: consent of instructor. Eight units may be applied toward the degree requirements, but course cannot be substituted for a course in one of the four groups on the basis of similarity of subject matter.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. Limited to and required of all first-year graduate students in philosophy. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

Group I. History of Philosophy

201. Plato. Prerequisite: consent of instructor. A study of the later dialogues. Mr. Furth

202. Aristotle. Prerequisite: consent of instructor. Analysis of major problems in Aristotle's philosophy based on the reading, exposition, and critical discussion of relevant texts in English translation. Mr. Furth

203. Seminar: History of Ancient Philosophy. Prerequisite: consent of instructor. Selected problems in the works of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers. May be repeated for credit with consent of instructor. Mr. Furth

206. Topics in Medieval Philosophy. Prerequisite: consent of instructor. The study of the philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or the study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each quarter. May be repeated for credit with consent of instructor. Mr. Adams

207. Seminar: History of Medieval and Renaissance Philosophy. Prerequisite: consent of instructor. Selected problems in medieval and Renaissance philosophy. May be repeated for credit with consent of instructor. Mr. Adams

208. Hobbes. Prerequisite: consent of instructor. Hobbes' political philosophy, especially the Leviathan, with attention to its relevance to contemporary political philosophy.

C209. Descartes. Prerequisite: consent of instructor. A study of the works of Descartes, with discussion of issues such as the problem of skepticism, the foundations of knowledge, the existence of God, the relation between mind and body, and the connection between science and metaphysics. May be concurrently scheduled with course C109. Mr. Burge

C210. Spinoza. Prerequisite: consent of instructor. Selected topics in the philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and a longer term paper for graduates. Mr. Adams

C211. Leibniz. Prerequisite: consent of instructor. Selected topics in the philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and a longer term paper for graduates. Mr. Adams

C212. Locke and Berkeley. Prerequisite: consent of instructor. Selected topics in the philosophy of Locke and Berkeley. May be repeated for credit with consent of instructor. Mr. Burge

C214. Hume. Prerequisite: consent of instructor. Selected topics in the philosophy of Hume. May be repeated for credit with consent of instructor. Mr. Donnellan

215. Kant. Prerequisite: consent of instructor. An intensive study of selected writings of Immanuel Kant. Mr. Adams

216. 19th-Century Philosophy. Prerequisite: consent of instructor. Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

219. Seminar: History of Modern Philosophy. Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor. Mr. Adams

220. Seminar: Topics in History of Philosophy. Seminar, three hours. Prerequisite: consent of instructor. Selected problems and philosophers which may be drawn from different periods. May be repeated for credit with consent of instructor. Mr. Adams, Mrs. Adams
Group II. Logic, Semantics, and Philosophy of Science

221A. Topics in Set Theory. Prerequisite: Mathematics 112A or consent of instructor. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, the continuum hypothesis, inaccessible numbers. Formalization of set theory; Zermelo-Fraenkel von Neumann-Godel theory. May be repeated for credit with consent of instructor. Mr. Kalish, Mr Martin

221B. Non-Neumannian Set Theory. Prerequisite: course 221A or consent of instructor. Standard (so-called Z-F) set theory relies on a principle of limitation of size as a means of avoiding antinomy. As this principle was first formulated explicitly as an axiom of set theory by von Neumann, sets in which it fails may appropriately be spoken of as non-Neumannian. Possibilities in regard to non-Neumannian set theories explored; proposed axiomatizations and relative consistency proofs based on the assumed consistency of Z-F set theory or of Z-F set theory plus a strong axiom of infinity. Mr. Church

221C. History of Set Theory. Prerequisite: consent of instructor. The development of the concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Godel, and several others. The origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatizations, type theory and the ramification hierarchy, predicativity and predicativity, proper classes and sets as small classes, and the particular Zermelo-Fraenkel axiomatic set theory. Emphasis on the actual expressed ideas and views of various influential authors. Mr. Martin

222A-222B-222C. Godel Theory.

222A. Prerequisite: several courses in logic, preferably including course 135. First in a series of three courses leading to Godel's incompleteness theorem and Tarski's definition of truth.

222B. Prerequisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Godel's incompleteness theorem and Tarski's definition of truth.

222C. Prerequisite: course 222B. Godel numbering and Godel theory. Final course in the Godel theory series. Mr. Church, Mr Martin

224. Philosophy of Physics. Prerequisite: consent of instructor. Selected philosophical topics related to physics, depending on interests and background of the participants, including space and time, observation in quantum mechanics, foundations of statistical mechanics. May be repeated for credit with consent of instructor.

225. Probability and Inductive Logic. Prerequisites: course 134 or Mathematics 112A-112B or consent of instructor.

226. Topics in Mathematical Logic. Prerequisite: consent of instructor. Content varies from quarter to quarter. May be repeated for credit with consent of instructor. Mr. Kalish, Mr. Kaplan, Mr. Martin

227. Philosophy of Social Science. Prerequisite: consent of instructor. An examination of philosophical problems concerning concepts and methodology in the social sciences. Topics may include the relation between social processes and individual psychology, the logic of explanation in the social sciences, determinism and spontaneity in history, and the interpretation of cultural phenomena in modern society. Students with a primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.

230. Seminar: Logic. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Almog, Mr. Church, Mr. Kaplan, Mr. Martin

231. Seminar: Intensional Logic. Prerequisite: consent of instructor. Topics may include the logic of sense and denotation, modal logic, the logic of demonstratives, epistemic logic, the intensional logic of Principia Mathematica, possible worlds semantics. May be repeated for credit with consent of instructor. Mr. Almog, Mr. Church, Mr. Kaplan, Mr. Martin

232. Philosophy of Science. Prerequisite: consent of instructor. Selected topics in the philosophy of science. May be repeated for credit with consent of instructor.

233. Seminar: Philosophy of Physics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Group III. Ethics and Value Theory

241. Topics in Political Philosophy. Prerequisites: course 150 or 156A or 157A or 157B or any two philosophy courses or consent of instructor. An examination of one or more topics in political philosophy (e.g., justice, human rights, political institutions, alienation). May be repeated for credit with consent of instructor.

245. Seminar: History of Ethics. Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

246. Seminar: Ethical Theory. Prerequisite: consent of instructor. Selected topics. Content varies from quarter to quarter. May be repeated for credit with consent of instructor.

247. Seminar: Political Theory. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

248. Problems in Moral Philosophy. Prerequisite: consent of instructor. An intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.

255. Seminar: Aesthetic Theory. Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

256. Topics in Legal Philosophy. (Same as Law M217.) Lecture, three hours. Prerequisite: consent of instructor. An examination of topics such as the concept of law, the nature of justice, problems of punishment, legal reasoning, and the obligation to obey the law. May be repeated for credit with consent of instructor.

257. Seminar: Philosophy of Law. (Same as Law M524.) Lecture, three hours. Prerequisite: consent of instructor. Selected topics in the philosophy of law. May be repeated for credit with consent of instructor.

282. Seminar: Metaphysics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Almog

283. Seminar: Theory of Knowledge. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Donnellan

284. Seminar: Philosophy of Perception. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

285. Philosophy of Psychoanalysis. Prerequisite: consent of instructor. An examination of topics such as the nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, metapsychological concepts such as the unconscious, the ego, id, super ego, defense mechanisms, and the psychoanalytic conception of human nature. Mr. Morris

286. Philosophy of Psychology. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology. Mr. Burge

287. Seminar: Philosophy of Language. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

288. Seminar: Wittgenstein. Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Albritton

289. Seminar: Philosophy of Religion. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Adams, Mrs. Adams, Mr. Albritton

Special Studies

275. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching of College Philosophy (2 to 4 units). Prerequisite: consent of instructor. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

599A-599B. Directed Individual Studies (2 to 8 units each). Properly qualified graduate students who wish to pursue a problem through reading of advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U (course 599B) and letter (course 596A) grading.

599. Research for Ph.D. Dissertation (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.
Scope and Objectives

Physics is a basic science with actual and potential applications in many fields. The undergraduate curriculum is broad and general with respect to physics but includes an introduction to theoretical and experimental work in specialized subfields of physics in the senior year. The Physics B.S. degree program is primarily directed at providing a basic foundation for students who intend to go on to graduate school in physics or related fields such as engineering or other physical sciences. However, for many this is a terminal degree preparatory to working as an engineer or technician in industry. The B.A. program in General Physics provides flexibility for students who are interested in fields outside of physics in which a strong background knowledge of physics would be helpful.

The department offers a comprehensive graduate program leading to the Master of Science degree, the Master of Arts in Teaching (M.A.T.), and the Ph.D., which is offered in theoretical or experimental work in a choice of subfields. It is the policy of the department to admit only students who plan to earn the Ph.D. degree.

Undergraduate Study

The Department of Physics offers a choice of two undergraduate majors: the B.S. degree program in Physics and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for either major must be taken for a letter grade.

Bachelor of Science in Physics

This major should be taken if you intend to continue toward the Ph.D. in Physics.

Preparation for the Major

Required: Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry 11A, 11B/11BL, 11C (11CL is recommended but not required); Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available in the Undergraduate Office.

The Major

Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 131, three courses from the 180 series; three additional upper division lecture courses selected from 108, 114, M122, 123, 124, 126, 132, 140. An upper division mathematics course may be substituted for Physics 132 with consent of an adviser. A C average is required in the above courses. Reading knowledge of Russian, German, or French is recommended.

If you are preparing for graduate school, you should take additional courses in physics and mathematics. Physics M122, 123, 124, 126, 132, and 140 are recommended.

Transfer Students: Junior transfer students should preferably have completed (1) a two-year calculus-analytic geometry sequence or equivalent and (2) the calculus-based physics course at their previous college, but in no case should less than three semesters or four quarters of the mathematics and one year of the physics sequence be completed before transferring to UCLA. At least C grades in all mathematics and physics courses taken are required.

Honors Program

The department offers three honors programs leading to graduation with honors or highest honors in physics. You are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

Bachelor of Arts in General Physics

The major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If you intend to continue work toward the Ph.D. in Physics, you are advised to work for the B.S. in Physics as described earlier.

Preparation for the Major

Required: Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry 11A, 11B/11BL, 11C (11CL is recommended but not required); Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available in the Undergraduate Office.

The Major

Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 131, one course from the 180 series, two upper division physics electives (excluding 185 and 199), and five upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

Instructional Credentials

You may earn credentials for teaching physical sciences and other subjects in California elementary and secondary schools. Completion of the Instructional Credential Program in the Teacher Education Laboratory is required. Consult the Graduate School of Education (201 Moore Hall) for information.
Graduate Study

The Department of Physics offers opportunities for graduate study leading to the M.S., M.A.T. (Master of Arts in Teaching), and Ph.D. degrees. Special emphasis is given to preparation in the following fields of physics: acoustics/low-temperature, elementary particles, intermediate energy and nuclear physics, plasma and astrophysics, solid-state and condensed matter, spectroscopy.

Admission

You must have an excellent undergraduate record in addition to meeting the University minimum requirements. You are required to take the Graduate Record Examination (GRE) Subject Test in Physics and to submit three letters of recommendation. International applicants who are applying for financial support (fellowships, teaching assistantships, and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English.

Application materials may be obtained by writing to the Graduate Office, Department of Physics, 3-145G Knudsen Hall, UCLA, Los Angeles, CA 90024-1547.

Master of Arts in Teaching

Major Fields or Subdisciplines

It is not required to designate an area of specialization for the M.A.T. degree.

Course Requirements

This degree leads to qualification for instructional credentials at the secondary school or junior college level. Five graduate courses, five professional (300 series) courses, and 12% total courses are required.

(1) The five graduate physics courses must include Physics 370 and four courses from 210A, 210B, 215A, 221 A, 221 B.

(2) Also required are the courses necessary for completion of the preliminary State of California Single Subject Instructional Credential, K-12: Education 100, 112, 312, 315A-315B, 330B, 330C, Public Health 187.

Courses in the 500 series may not be applied toward the M.A.T. degree.

Teaching Experience

Teaching experience is required insofar as the required education courses are concerned (supervised teaching at the secondary or junior college level).

Comprehensive Examination Plan

A passing grade on a written comprehensive examination is required. M.A.T. candidates who fail to qualify at the master's level of achievement may take the examination a second time. Permission to take it a third time may be granted only under exceptional circumstances.

Master of Science Degree

Except for the Master of Arts in Teaching program, the department does not offer a terminal master's degree. The M.S. degree is awarded to students in the Ph.D. program after they satisfy the requirements described below.

Course Requirements

The University requires a total of nine courses with an average grade of B or better for the M.S. degree. The Physics Department requires that a minimum of six of the nine be graduate courses in physics of which you must pass the five fundamental (core) courses: Physics 210A, 210B, 215A, 221 A, 221 B. To complete the minimum six graduate courses you are required to pass one of the following courses with a grade of B or better: 220, 221C, 231 A. The remaining three courses (to complete the nine courses for the M.S. degree) may be satisfied by upper division or graduate courses, not necessarily in physics, which are acceptable to the Physics Department. No more than two of the three may be from course 596 or seminar courses. Only eight units of 500-series courses may be applied toward the total course requirement for the M.S. degree (courses 597 and 598 may not be applied).

Major Fields or Subdisciplines

Ph.D. degrees are granted in the following fields of specialization: elementary particles, intermediate energy and nuclear physics, low-temperature/acoustics, plasma and astrophysics, solid-state and condensed matter, and spectroscopy.

Arrangements can be made to obtain a Ph.D. in Physics while doing research in interdisciplinary fields such as biophysics, astrophysics, geophysics, etc. The details of each program should be established in consultation with the graduate affairs officer.

Course Requirements

By the end of your first year of graduate study you are expected to acquire a mastery of the core graduate physics material presented in Physics 210A, 210B, 215A, 221A, 221B. Since knowledge of this material is tested on the written comprehensive examination, usually all or most of the five courses constitute your main course load in your first year of graduate study. Detailed syllabi for the courses are available in the Graduate Office, 3-145G Knudsen Hall.

You must fulfill a breadth requirement by passing course 220 or 221C or 231C with a grade of B or better. In addition, if you have not taken course 132 or its equivalent as an undergraduate, you must do so at the beginning of your graduate program. The core and breadth requirements should be completed by your fifth quarter in residence.

Qualifying Examinations

All departmental graduate students (master's and Ph.D.) take the same written comprehensive examination, which is graded as follows: (1) pass at the Ph.D. level of achievement, (2) pass at the master's level of achievement, or (3) fail. This examination is normally taken prior to your fourth quarter in residence.

All students in the Ph.D. program must pass the examination at the Ph.D. level of achievement. Permission to take it a third time may be granted only under exceptional circumstances.

By no later than your fourth quarter in residence you are expected, in consultation with your advisor, to begin taking a series of courses, seminars, and tutorials to prepare you for original research in a given area of specialization. By no later than your fifth quarter in residence you are expected to begin taking a sequence of Physics 596 courses with a faculty member in your chosen field of specialization. By the third quarter of the 596 sequence you are expected to make a substantive oral presentation describing the results of a problem in your 596 program before an audience which includes the faculty member(s) with whom you are taking course 596 and three other faculty members. No later than the end of your eighth quarter in residence you are expected to make a formal arrangement with a faculty member to serve as your Ph.D. research sponsor.
The doctoral committee conducts the University Oral Qualifying Examination, which may include (1) material in your field of specialization, (2) related material that members of the committee from other departments may wish to ask, and (3) discussion of the proposed dissertation problem. Committee members guide, read, approve, and certify the dissertation. At least two members from the Physics Department and at least one outside member must act in this capacity. A decision is also made at this time as to whether a final oral examination is required.

When a satisfactory report on the completion of the written and oral qualifying examinations has been submitted, you are eligible to be formally advanced to candidacy for the Ph.D.

Final Oral Examination
This examination ordinarily is a discussion of your original work, including your dissertation and other related matters to be determined by the committee. It may be, if the committee so desires, a survey or comprehensive examination.

Lower Division Courses
Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take either Physics 10 or 3A if only one course is to be taken, or 3A and 3B as a two-course sequence.

Physics 10 is intended for entering freshman physics majors and normally is taken in your first quarter in residence. Although it is not a required course or a part of or prerequisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics.

Physics 3A, 3B, 3C form a one-year sequence of courses in general physics (with laboratory). In this sequence only algebra and trigonometry are used in providing a mathematical description of physical phenomena; calculus is not used.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences. However, unlike Physics 3A, 3B, 3C, calculus is used throughout, and successful completion of basic calculus courses is a prerequisite for admission to this sequence.

The department takes into account prior preparation in physics. If you feel your background would permit acceleration, you may be exempted from courses 8A through 8E by taking the final examination with a class at the end of any quarter. These serve as placement examinations. You should discuss such possibilities with your departmental adviser.

Physics 10 is a one-quarter, non-laboratory course which surveys the whole field of physics. Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to six units credit.

1Q. Contemporary Physics (2 units). Limited to physics majors. A review of current problems in physics, with emphasis on those being studied in the research laboratories at UCLA. The significance of the problems and their historical context. P/NP grading. (F)

3A. General Physics: Mechanics of Solids and Fluids. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisites: three years of high school mathematics including trigonometry or two years of high school mathematics and a one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 8A or equivalent. The fundamentals of classical mechanics: Newton's laws; conservation of momentum, angular momentum, energy; Kepler's laws; dynamics of systems of particles; fluid mechanics. (F,W)

3B. General Physics: Heat, Sound, Electricity and Magnetism. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 3A or equivalent. Temperature, heat, and the laws of thermodynamics. Introduction to wave motion, resonance. Sound and acoustics. Electric power, Elements of DC and AC circuits. (W,Sp)

3C. General Physics: Light, Relativity, and Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 3B or equivalent. Light, optical instruments. Introduction to relativity. The electron and the atom. Matter waves. Nuclear and particle physics. (F,W)

6A. Physics for Life Sciences Majors: Mechanics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisites: Mathematics 3A, 3B, 3C (may be taken concurrently), or equivalent. (F,W)

6B. Physics for Life Sciences Majors: Electricity and Magnetism. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 6A. (W)

6C. Physics for Life Sciences Majors: Light and Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 6B. (F,Sp)

8A. Physics for Scientists and Engineers: Mechanics. Lecture/demonstration, four hours; discussion, one hour. Prerequisite: Mathematics 31A or equivalent. Recommended: high school physics and chemistry. Corequisites: course 8AL, Mathematics 31B. Motion, Newton's laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation. (F,W,Sp)

8AL. Physics Laboratory for Scientists and Engineers: Mechanics (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 8A or consent of instructor. (F,W,Sp)

8B. Physics for Scientists and Engineers: Waves, Sound, Heat. Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8A, Mathematics 31B. Corequisites: course 8BL, Mathematics 32A (or equivalent). Harmonic oscillators, standing and traveling waves, fluid dynamics, sound, kinetic theory of gases, laws of thermodynamics. (F,W,Sp)

88H. Physics for Scientists and Engineers (Honors). (Formerly numbered 88H.) Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8BH with a grade of A or recommendation of 8A instructor and Mathematics 31B completed and 32A concurrent, or consent of instructor. Not open for credit to students with credit for course 8B or equivalent courses. The same material as course 8B but in greater depth. (Sp)

8BL. Physics Laboratory for Scientists and Engineers: Waves, Sound, Heat (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 8B or consent of instructor. (F,W,Sp)

8C. Physics for Scientists and Engineers: Electricity and Magnetism. Lecture/demonstration, four hours; discussion, one hour. Prerequisites: course 8BH or 8B with a grade of A or recommendation of 8A instructor and Mathematics 32A completed and 32B concurrent, or consent of instructor. The same material as course 8C but in greater depth. (F,W,Sp)

8CL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 8C or consent of instructor. (F,W,Sp)

8D. Physics for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity. Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8DH or 8B with a grade of A or recommendation of 8A instructor and Mathematics 32A completed and 32B concurrent, or consent of instructor. The same material as course 8D but in greater depth. (F)

8DL. Physics Laboratory for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 8D or consent of instructor. (F,Sp)

8E. Physics for Scientists and Engineers: Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisites: course 8D, Mathematics 33A. Corequisites: Mathematics 33B or equivalent. Wave-particle duality, quantum theory, Schrodinger equation, hydrogen atom, exclusion principle. (W,Sp)

10. Physics. Lecture/demonstration, three hours; quiz/discussion, one hour. Not open for credit to students with credit for course 3A or 6A or 8A or an equivalent course in mechanics. Special mathematical preparation beyond that necessary for admission to the University in freshman standing not required. Satisfies in part the Letters and Science requirements in the physical sciences for nonphysical science majors. Topics include planetary motion, Newton's laws, gravitation, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, atoms, and subatomic particles. As time permits, the development of physical ideas is placed in cultural and historical perspective. (F,Sp)
11. Modern Physics for Nonscience Majors. Lecture/demonstration, three hours; quiz/discussion, one hour. Prerequisite: course 10. Topics include the concept of energy, quantum theory, nuclear physics, relativity.

14A-14B. Mechanics: Preparatory Courses. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3A, 3B, and 3C, or 31A. Corequisite for course 14A: Mathematics 31B. Introductory courses in mechanics that satisfy the physics prerequisite for course 6B or 6B. Primarily intended for students who are inadequately prepared for course 6A or 6A. Lectures, demonstrations, discussions, laboratory, and small group problem-solving sessions.

Upper Division Courses

Prerequisites for all upper division courses: Physics 8A through 8E, Mathematics 31A, 31B, 32A, 32B, 33A, and (except for Physics 105A, 116) 39B, or consent of instructor. It is recommended that students take the 180 laboratories in their senior year.

105B. Analytic Mechanics. Prerequisite: course 105A. Relativity with four vectors, non-inertial reference frames, dynamics of rigid bodies, coupled oscillators, normal modes of oscillation, vibrating strings, and wave propagation.

106. Optical Physics. Prerequisite: course 110B. Interaction of light with matter; dispersion theory, oscillator strength, line widths, molecular scattering. Coherence theory. Kehroff and diffusion of interaction theory; quantum optics, optical rotation, electron and magneto optical effects. Additional topics of fundamental or current interest.

110A. Electricity and Magnetism. Lecture, three hours. Prerequisite: course 131. Electrostatics and magnetostatics.

112. Thermodynamics. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Fundamentals of thermodynamics, including the first, second, and third laws. The statistical mechanical point of view and its relation to thermodynamics. Some simple applications.

115A. Elementary Quantum Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 8E, 105B (may be taken concurrently), 131. The classical background, basic ideas, and methods of quantum mechanics.

115B. Elementary Quantum Mechanics. Prerequisite: course 115A. Development of the methods and concepts of quantum mechanics.

116. Electronics. Lecture, three hours; laboratory, three hours. Alternating current circuits, vacuum tube characteristics and parameters, transistor characteristics and parameters, amplifiers, oscillators, nonlinear tube and transistor circuits.

M122. Plasma Physics. (Same as Electrical Engineering M185.) Prerequisite: course 110A or Electrical Engineering 101. Senior-level introductory course to physics of plasmas and ionized gases and fundamentals of controlled fusion. Particle motion in magnetic fields; fluid behavior, plasma waves; resistivity and transport; equilibrium and stability; kinetic effects. Discussion of illustrative laboratory experiments.

124. Nuclear Physics. Lecture, three hours; discussion, one hour. Prerequisite: course 115B. Nuclear charge, mass, radius, spin, and moments; nuclear models; nuclear forces; alpha, beta, and gamma emission.

125. Elementary Particle Physics. Prerequisite: course 115B. Experimental determination of the properties of elementary particle states. Relativistic kinematics and phase space; angular momentum and isotopic spin formalism; relativistic and inelastic scattering; invariance principles and conservation laws; strong, electromagnetic, and weak interactions. Survey of important experiments.

131. Mathematical Methods of Physics. Lecture, three hours; discussion, one hour. Vectors and fields in physics, tensors, linear transformations, matrices, and curved surfaces in space; Fourier series and integrals. (W,SP)

132. Mathematical Methods of Physics. Lecture, three hours; discussion, one hour. Prerequisite: course 131. Green's functions and boundary value problems, complex variables, and topics selected from tensors, Laplace transforms, probability theory, approximation techniques.

140. Introduction to Solid-State Physics. Prerequisite: course 115B or equivalent. Introduction to the basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; distortion of electron, neutron, and electromagnetic waves in a lattice; the reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands.

150. Numerical Analysis Techniques and Particle Simulations. Lecture, three hours; computer terminal, six hours. Prerequisites: courses 105A, 105B, 110A, 110B, minimum knowledge of computer programming (FORTRAN). Introduction to the field of computer modeling of physical systems using particle models; numerical methods and methods of debugging results, experience with running interesting physical problems.

180A. Nuclear Physics Laboratory.

180B. Physical Optics and Spectroscopy Laboratory.

180C. Solid-State Laboratory.

180D. Acoustics Laboratory.

180E. Plasma Physics Laboratory.

180F. Elementary Particle Laboratory.

185. Foundations of Physics, Prerequisite: senior standing in physics or consent of instructor. The historical development and philosophical sources of classical and modern physics.

189. Special Studies in Physics (2 to 4 units). May be repeated, but no more than 12 units may be applied toward the Physics B.S. degree requirements.

Graduate Courses

213B. Advanced Atomic Structure. The n-j symbols, and angular group theoretical parentage coefficients, n electron systems.

215A. Statistical Physics. Thermodynamics and statistical mechanics with applications.

215C. Quantum Statistical Mechanics and the Many Body Problem. Applications of quantum mechanics to physics of interacting systems; quantum field theory techniques in statistical mechanics; Green's function approach; the Coulomb gas; the imperfect Bose gas; electron-phonon coupling; quantum fluids, nonlinear phenomena.

221B. Quantum Mechanics. Lecture, three hours. Prerequisite: course 221A. Rotations and other symmetry operations, perturbation theory.

221C. Quantum Mechanics. Lecture, three hours. Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.

223. Advanced Classical Mechanics. Prerequisite: course 220. Topics include nonlinear mechanics, ergodic theory, mechanics of continuous media.

224. Introduction to the Strong Interaction. Evidence concerning the strong interaction, particularly as exemplified in nucleon-nucleon and pion-nucleon systems. Isospin, the scattering matrix, the density matrix and polarization, the properties of pions, the one pion exchange potential, phase shift analysis.

225A-225B. Advanced Nuclear Physics. Prerequisites: courses 221A, 221B. Normally preceded by course 224. An advanced course in the structure of complex nuclei, nuclear models, scattering and reactions.

230A-230B-230C. Relativistic Quantum Theory (6 units each). Lecture, four hours. Prerequisites: courses 221A, 221B, and 221C, or equivalent, or consent of instructor. Modern quantum field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breakdown, monopoles and other solitons.

231A. Methods of Mathematical Physics. Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.

231B. Methods of Mathematical Physics. Not open for credit to students with credit for Mathematics 266A. Perturbation theory. Singular integral equations. Numerical methods.

232A-232B. Relativity. The special and general theories, with applications to elementary particles and astrophysics.

232C. Special Topics in General Relativity.

235. Group Theory and Quantum Mechanics. Prerequisite: course 221A. Group representation theory and applications to the quantum mechanics of atoms, molecules, and solids.

241B. Solid-State Physics. Prerequisite: course 241A. Transport theory with applications, electron-phonon interactions.

241C. Solid-State Physics. Prerequisite: course 241A. Semiconductors, magnetism, phase transitions, superconductivity.

250. Introduction to the Acceleration of Charged Particles. Lecture, three hours. Prerequisites: courses 210A, 210B, 215A. The principles of charged-particle acceleration, including principles of synchrotrons and storage rings, beam parameter determination, statistical behavior of beams and beam cooling techniques, synchrotron light sources, colliding beam storage rings, medical accelerators, and free electron lasers.

261. Seminar in Special Problems in Theoretical Physics.

265. Seminar in Propagation of Waves in Fluids.

266. Seminar in Spectroscopy.

269A. Seminar in Nuclear Physics (2 to 4 units).

269B. Seminar in Elementary Particle Physics (2 to 4 units).

280E. Advanced Plasma Laboratory. Lecture, two hours, laboratory, four hours. Prerequisites: courses M122, E180E. Laboratory experiments on the behavior of plasmas in magnetic fields. Study of the basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.

284. Advanced Laboratory in Acoustics and Cryogenics. Selected advanced experiments in acoustics and cryogenics designed to train students in the techniques and instrumentation used in acoustic research and low-temperature physics.

290. Research Tutorial in Plasma Physics (2 or 4 units). Seminars and discussion by staff and students on recent research interest in the plasma physics group, both experimental and theoretical. Each graduate student doing research in this field is required to take three quarters of this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

291. Research Tutorial in Elementary Particle Theory (2 or 4 units). Prerequisites: courses 226A, 230A-230B. Seminars and discussion by staff, post-doctoral fellows, and graduate students. Each graduate student doing research in this field is required to take this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

292. Research Tutorial in Spectroscopy, Low-Temperature, and Solid-State Physics (2 or 4 units). Seminars and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. Each graduate student doing research in these fields is required to take this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

295. Research Tutorial in Solid Earth Physics (2 or 4 units). Seminars and discussion on solid earth physics. Each graduate student doing research in this field is required to take this course (or course 292 if appropriate), ordinarily in the second or third year. May be repeated for credit. S/U grading.

296. Research Tutorial in Experimental Elementary Particle Physics (2 or 4 units). Limited to six students. Seminars and discussion by staff and students on current problems in experimental elementary particle physics. Each graduate student doing research in this field is required to take this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

299. Research Tutorial in Nuclear Physics (2 or 4 units). Seminars and discussion on nuclear physics by staff and students, in both experiment and theory. Each graduate student doing research in this field is required to take this course, ordinarily during the second or third year. May be repeated for credit. S/U grading.

495. Teaching of College Physics (2 units). Lecture/discussion (five or more one-hour meetings during the quarter, plus intensive training week at the beginning of Fall Quarter). Required of all new teaching assistants. A special course for teaching assistants designed to deal with the problems and techniques of teaching college physics. The ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

596. Directed Individual Studies (2 to 12 units). May be repeated for credit. S/U grading.

597. Preparation for Master's Comprehensive Examinations (2 to 8 units). May be repeated for credit. S/U grading.

598. Master's Thesis Research and Writing (2 to 8 units). May be repeated for S/U or letter grading.

599. Ph.D. Research and Writing (8 to 12 units).
You must complete all pre-major courses with a 2.0 grade-point average by the time you attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

The Major

Required: Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. You are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150, 190), psychology (except Psychology 115, 116, 117), sociology.

These courses must be taken for a letter grade. You are required to maintain a 2.0 over-all grade-point average in all upper division political science courses.

Upper division political science courses are organized into six fields: (I) political theory, (II) international relations, (III) politics, (IV) comparative politics, (V) public law, and (VI) public organization and policy.

In fulfilling the requirement of 10 upper division political science courses, you must satisfy the following:

1. A concentration in one field by completing the lower division course and at least four upper division courses in that field. It is recommended that one of these courses be an undergraduate seminar (C197A-C197F; see field concentration requirements below).

2. A distribution of the two lower division courses and two courses in each of two other fields (four upper division courses).

3. Two additional elective courses in political science to comprise the total of 10.

Students who entered prior to Fall Quarter 1984 should consult the departmental counselor.

Field Concentration Requirements: The lower division course is prerequisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for field concentration are as follows:

I. Political Theory: Political Science 10 and any four courses in Field I.

II. International Relations: Course 20 and any four upper division courses in Field II. Four units from courses 175A-175B may be applied as one of the four courses in Field II. Only one of the defense studies courses—136A, 138B, 138C—may be applied toward the field concentration requirement.

III. Politics: Course 40 and any four courses in Field III.

(iv) Comparative Politics: Courses 50, 168, and any three additional courses in Field IV. Course 115, 181, or 183C—but no more than one of them—may also be applied toward concentration in this field.

(v) Public Law: Course 70 and any four additional courses in Field V. Course 70 is prerequisite to 172A and 172B.

(vi) Public Organization and Policy: Course 80 and any four courses in Field VI. Course 138C, 173, or 174—but no more than one of them—may also be applied toward concentration in this field.

Note: No course may be applied toward both concentration and distribution requirements.

Also, courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 195A-195B-195C and 199 may not be applied toward either the concentration or distribution requirement.

Undergraduate Seminars

Each quarter the department offers a series of seminars (Political Science C197A-C197F) in each field. The prerequisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

Honors Program

The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. You should have substantial experience in writing research papers and take at least one seminar course in the Political Science C197 series before you enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A-195B-195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, 169, 179, and 189) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.
M.A. and Ph.D. Degrees
The aim of the graduate program is to train scholars in the discipline of political science, while also providing the additional professional skills relevant to their particular career objectives. The department ordinarily accepts only students who are seeking the Ph.D. degree (a master's degree may be earned as part of the process of completing the requirements for the Ph.D.).

The program, unless you choose the M.A. thesis option, consists of three fields of study (two major fields in political science and a minor field which may be outside the department). You take coursework in these fields during the first two years of the program, at the end of which you take qualifying examinations in your two major fields. If you qualify for the Ph.D. on the basis of these examinations, you take an examination the following year in your minor field and complete the course requirements for the Ph.D. You also prepare a research design for your dissertation and, finally, complete the dissertation.

You are eligible to receive a master's degree when you qualify for the Ph.D. If you do not qualify for the Ph.D., you still receive a master's degree if your qualifying examinations merit it and you have completed the coursework required for the first two years. If you choose the thesis program, you do not have a minor field and write a thesis at the end of two years instead of taking examinations. You receive a master's degree after successfully completing the program.

Admission
In addition to University minimum requirements, the department requires three letters of recommendation, scores of the General Test of the Graduate Record Examination (GRE), and a sample of your analytical writing skills (e.g., senior or M.A. thesis, term paper). Applicants are selected on the basis of perceived promise irrespective of their preference for the M.A. or Ph.D. degree. Prospective students may write for departmental brochures to the Graduate Studies Office, Department of Political Science, 4289 Bunche Hall, UCLA, Los Angeles, CA 90024-1472. The department does not have an application form in addition to the one used by the Graduate Admissions Office. The deadline for receipt of all application materials is December 31 prior to the Fall Quarter in which you plan to register.

Fields of Study
Seven fields of study are offered to graduate students in the department: political theory; international relations; politics; comparative politics; public law; public organization and public policy; and methodology.

Foreign Language or Research Methodology Requirement
There is no foreign language requirement for the M.A. degree.

For the Ph.D., you must fulfill one of the following requirements:
(1) Foreign language proficiency may be demonstrated by passing the Educational Testing Service (ETS) examination with a minimum score of 550. In languages for which no ETS examination is given, you must take a department examination to test your proficiency at a level comparable to an ETS score of 550. You may also satisfy the requirement by completing, with a grade of B or better, the final course in a two-year sequence of college courses in a foreign language.

(2) Research methodology proficiency may be demonstrated by completing either (a) a sequence of three courses in mathematics or mathematical economics at or above Mathematics 31A (Mathematics 38A, 38B may not be applied) or (b) a sequence of three courses in statistics at or above the level of Political Science 204B. The same courses may not be applied toward both the research methodology requirement and either the major or minor field requirement.

You are required to pass the foreign language or methodology requirement before you can be advanced to candidacy for the Ph.D., but you may pass the requirement after the University Oral Qualifying Examination.

Course Requirements
During the first two years of the program you are required to take a minimum of 12 substantive courses (exclusive of Political Science 597 and 598), of which eight must be in two major fields in political science. If methodology is one of your major fields, one of the courses may be taken outside the department. The 12 courses must be distributed as follows:
(1) A minimum of four graduate courses is required in each of your two major fields. Each field designates the core courses needed to fulfill a major in that field. Where approved by a field, you may take one designated concepts and methods (CAM) course (Political Science 203A or 203B) to satisfy one of the four course requirements in either of the two major fields, but not in both fields.
(2) In addition, you are required to take one course in statistics (normally course 204A). Graduate statistics courses in other departments may be substituted by petition.
(3) Unless you select the thesis plan, you must take a minimum of two courses in a minor field, of which at least one must be at the graduate level. The minor field may be taken in one of the seven fields of political science, in the CAM series offered by the department, or in an outside discipline, area studies program, or professional school. If the minor is outside the Political Science Department, your plan of study must be approved by the graduate studies committee. If methodology is a major field, the minor must be taken within the department.

(4) If you select the M.A. thesis plan, you must take two courses related to your thesis in lieu of the minor field requirements.
(5) All students must take an additional graduate course for an elective, selected from within or outside the department. If your minor is taken outside the department, the elective must be in one of the seven fields, excluding the two major fields. It may not be course 596.

(6) A maximum of three 596 courses may be applied toward the requirement of 12 substantive courses, but no more than two 596 courses may be taken in any of the two major fields.

Transfer Students: With the approval of the relevant field committee and the dean of the Graduate Division, a maximum of two graduate courses taken at another institution may be applied toward the 12-course requirement in the first two years of the program. If the courses were taken at another UC campus, the number is increased to four, and if you already have an M.A. in Political Science, to six. Although you may have a master's degree at entrance, you must go through the qualifying examination process to qualify for the Ph.D.

After the two-year program is completed and you have qualified to pursue the Ph.D. as a result of the qualifying examinations, you select your individual research adviser and chart the plan of study to be followed. You must be in residence for a minimum of two quarters, during which time you are to satisfy the following minimum requirements:
(1) Minor Field: You must complete your third course in the minor field and take a written examination or submit a paper appropriate for determining proficiency in the minor field. In case of failure you may retake the examination once.
(2) Elective: With the approval of your research adviser and graduate adviser, you take one elective course within or outside the department. The elective should be relevant to the dissertation topic and may be a 596 course provided it is a substantive course.
(3) Directed Reading and Research: You must take Political Science 590A to research your proposed dissertation topic and 590B to prepare your research design for the dissertation. Normally, course 590B is taken preceding or during the quarter in which the oral examination is taken. With the approval of your research adviser, you may take more than one elective or 590A or 590B course.
Thesis Plan

If you select the thesis plan, you qualify solely for the M.A. degree. The two courses you take instead of a minor field are under the direction of your thesis adviser. They usually are Political Science 596, normally taken in the Fall and Winter Quarters of the second year, followed by course 598 in Spring Quarter.

You must decide on the thesis plan by the middle of the Spring Quarter of your first year and must form a thesis committee. You begin researching and writing the thesis by the Fall Quarter of your second year, working closely with members of the committee. The final version of the thesis must be submitted to the committee no later than the sixth week of the Spring Quarter so that the M.A. degree can be conferred by the end of that quarter, provided all requirements have been met and the thesis has been approved.

If the committee does not receive or does not approve the thesis, you are considered to have failed the requirement and are not allowed to resubmit the thesis. If you have received the M.A. on the thesis plan, you may register for the Ph.D. program without reapplying, but you must take the qualifying examinations in the two major and one minor fields by the Spring Quarter of your third year at UCLA.

Qualifying Examinations

You must take the qualifying examinations in your two major fields by the Spring Quarter of your second year unless you have selected the M.A. thesis plan. Retake examinations are taken in the Fall Quarter of the subsequent year.

The outcome of the spring examinations determines whether you (1) qualify for the Ph.D. and obtain an M.A., (2) obtain an M.A. degree but do not qualify for the Ph.D., (3) obtain an M.A. but must retake an examination in one or both fields to qualify for the Ph.D., or (4) fail to obtain an M.A.

Written examinations are given in each of the major fields. Each field committee provides assessments of the examinations as to whether (1) your performance is sufficient for the M.A. degree and (2) also qualifies you to begin work on the Ph.D. level. The following two-tier grading system is used for each examination: for the M.A., grades are pass and not pass; for the Ph.D., grades are not qualified, qualified, and qualified with distinction. To obtain an M.A. degree only, you must receive a grade of pass on at least one field examination. If you obtain a pass on both field examinations, you receive a departmental letter certifying competence in both fields.

To qualify for the Ph.D., you must receive a grade of qualified or qualified with distinction in both examinations.

Any failed (i.e., not pass or not qualified) examination may be retaken one time only at the next regular examination period.

Once you have successfully completed all course and examination requirements and have prepared a formal research design for the proposed dissertation acceptable to the research adviser, you may proceed to the University Oral Qualifying Examination. The research design must be submitted to the oral examination committee at least two weeks before the examination. The purpose of the oral examination is to assess the adequacy of your preparation in undertaking the proposed dissertation, to suggest ways in which the research design may be strengthened, and to determine whether the proposed dissertation is feasible and can be completed successfully. After successful completion of the University Oral Qualifying Examination and the language or methodology requirement, you are advanced to candidacy.

Approval of a written dissertation by your doctoral committee constitutes the final requirement for the Ph.D. degree in Political Science.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The doctoral committee for each candidate decides whether or not a final oral examination should be required.

Lower Division Courses

1. Introduction to American Government. Lecture, three hours; discussion, one hour. An introduction to the principles and problems of government, with particular emphasis on national government in the U.S. Fulfills the American History and Institutions requirement but does not fulfill a preparation for the major requirement.

2. Introduction to Quantitative Research. Lecture, three hours; discussion, one hour. An introduction to the collection and analysis of political data, with emphasis on the application of statistical reasoning to the study of relationships among political variables. Use of the computer as an aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration.

3. DeNardo, Ms. Geddes, Mr. Petrocik, Mr. Rivers.

15. Introduction to Political Theory. Lecture, three hours; discussion, one hour. An exposition and analysis of selected political theorists and concepts from Plato to the present.

4. Ashcraft, Mr. Campbell, Mr. Rapoport, Mr. Smith.

20. World Politics. Lecture, three hours; discussion, one hour. Required of all students concentrating in Field II. Introduction to problems of world politics.

5. Wilkinson.

40. Introduction to Politics. Lecture, three hours; discussion, one hour. The basic institutions and processes of democratic politics. A treatment of themes such as constitutionalism, representation, participation, and leadership coupled with particular emphasis on the American case.

50. Introduction to Comparative Politics. Lecture, three hours; discussion, one hour. A comparative study of constitutional principles, governmental institutions, and political processes in selected contemporary states, with emphasis on the major European governments.
Field I: Political Theory

111A. History of Political Thought: Ancient and Medieval Political Theory. An exposition and critical analysis of the major political philosophers and schools from Plato to Machiavelli. Mr. Campbell

111B. History of Political Thought: Early Modern and Contemporary Political Theory. An exposition and critical analysis of the major political philosophers and schools from Hobbes to Bentham. Mr. Ashcraft, Mr. Campbell

111C. History of Political Thought: Late Modern and Contemporary Political Theory. An exposition and critical analysis of the major political philosophers and schools from Hegel to the present. Mr. Ashcraft, Mr. Wolfenstein

112. Nature of the State. A systematic analysis of modern concepts and problems of political association.

113. Problems in 20th-Century Political Theory. A study and interpretation of theorists who have focused their analyses on the social and political problems of the 20th century. Mr. Flocco

114A-114B. American Political Thought: 114A. An exposition and critical analysis of American political thinkers from the Puritan period to 1865. Mr. Smith

115. Theories of Political Change. A critical examination of theories of political change, the relation of political change to changes in economic and social systems, and the relevance of such theories for the experience of both Western and non-Western societies. May be applied toward either Field I or IV. Mr. Lofchie

116. Marxism. A critical analysis of the origins, nature, and development of Marxist political theory. Mr. Ashcraft, Mr. Wolfenstein

117. Jurisprudence. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. May be applied toward either Field I or IV. Mr. Rocco

118. Political Violence. Examination of one or several different uses of violence in the revolutionary process: demonstrations, mass uprisings, coup d'etat, assassination, and terrorism. May be applied toward either Field I or IV. Mr. Gerstein

119A-119Z. Special Studies in Political Theory. Prerequisite: 10, one additional course in Field I, consent of instructor. Special studies in political theory. Sections offered on a regular basis, with topics announced in the preceding quarter. Courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Field II: International Relations

120. Foreign Relations of the U.S. Lecture, three hours; discussion, one hour. A survey of the factors and forces entering into the formation and implementation of American foreign policy, with special emphasis on contemporary problems.

121. Studies in Formulation of American Foreign Policy. A study of the formation of American foreign policy with respect to individual cases. Specific topics announced in the Schedule of Classes each quarter. Mr. Frieden, Mr. Spiegel, Mr. Stein

122. World Order. (Formerly numbered 21.) Lecture, three hours; discussion, one hour. Prerequisite: course 20. A study of the problems of the international system seen as a community capable of cooperation and development. Mr. Wilkinson

123. American Politics and the World Order. A critical analysis of the major political philosophers and schools from Hegel to the present. Mr. Frieden, Mr. Lake

124. Arms Control and International Security. A study of the international system of general arms control and of the international security system. Mr. Zoppo

125. Peace and War. Prerequisites: courses 6, 20. Theory and research on the causes of war and the conditions of peace. Mr. Wilkinson

127A-127B. Latin American and International Relations. 127A. Western Europe. The external relations of the United Kingdom, West Germany, France, Italy, and other European members of NATO, in relation to European security in the context of the Atlantic Alliance. Mr. Zoppo

127B. U.S. and Europe. Prerequisite: course 127A or consent of instructor. Relations between the U.S. and European members of the Atlantic Alliance, in the context of U.S.-Soviet relations. Mr. Zoppo

128A-128B. Soviet Sphere in World Politics. Prerequisite: course 20. Course 128A or consent of instructor. Prerequisite is course 128B. A contemporary survey of the foreign policies and aspirations of the Soviet Union and other states in the Soviet bloc; analysis of constraints and effects of Communist doctrine affecting relations between the Soviet and democratic spheres. Mr. Kollwitz, Mr. Korbuski

129. Comparative Foreign Economic Policy. An examination of the foreign trade, monetary, and investment policies of the U.S., Japan, France, and the Federal Republic of Germany since 1945. Mr. Lake

130. Politics of Latin American Economic Development. The interaction of international and domestic factors in the political and economic evolution of Latin America. Mr. Frieden

131. Latin American International Relations. Prerequisite: course 20. The major problems of Latin American international relations and organization in recent decades. Mr. Gonzalez

132A-132B. International Relations of the Middle East: 132A. Contemporary regional issues and conflicts, with particular attention to Arab-Israeli politics, the Arab-Israeli problem, and the Persian Gulf area. Mr. Binder

132B. Role of the great powers in the Middle East, with emphasis on American, Soviet, and West European policies since 1945. Mr. Binder

133. International Relations of Sub-Saharan Africa. Contemporary regional issues and conflicts, foreign policies of African states; the role of external powers. Mr. Lofchie, Mr. Sklar

134. Foreign Policy Decision Making and the Tools of Statecraft. Prerequisite: course 120 or consent of instructor. Contrasts purposive and process models of individual and group decision making. The impact of strategic interaction and situational factors on foreign policy decision making. Implications for policy choice of the tools of statecraft (i.e., threats/promises, military/economic/diplomacy). P/NP or letter grading. Mr. Stein

135. International Relations of China. Prerequisite: course 20. The relations of China with its neighbors and the other powers, with emphasis on contemporary interests and policies of China vis-a-vis the U.S. and the Soviet Union. Mr. Baum

136. International Relations of Japan. Prerequisite: course 20. The foreign policies of Japan and the interests and policies of other countries, particularly the U.S., as they relate to Japan. Mr. Baerwald

Field III: Politics

137A-137B. International Relations Theory. 137A. An examination of various theoretical approaches to international relations. May be completed concurrently with course 20. Mr. Lake

137B. Alternative approaches to the analysis of international politics and their application to historical and contemporary cases. Mr. Stein

138A. Defense Strategy and Policies. Analysis of national and international security problems in the nuclear era, with special emphasis on the U.S.

138B. Conduct of Modern War: A study of recent and contemporary wars, with special emphasis on military and strategic problems.

138C. Military Policy and Organization. A study of the institutional and policy framework in the national military field. May be applied toward either Field II or VI.

139A-139Z. Special Studies in International Relations. Prerequisites: two courses in Field II, or course 20 and one course in Field II, and consent of instructor. Intensive examination of one or more special problems appropriate to international relations. Sections offered on a regular basis, with topics announced in the preceding quarter. Courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

139A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Formerly numbered M139.) Mr. Zoppo

139B. Problems of the Nuclear Deterrent. An interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of the acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues. Mr. Ingriliter (alternate years)

Also see courses 175A-175B

Field III: Politics

140. Political Psychology. (Same as Psychology M138.) Prerequisite: Psychology 10. Examination of political behavior, political socialization, personality and politics, racial conflict, and the psychological analysis of public opinion on these issues. Mr. Sears

141. Public Opinion and Voting Behavior. Lecture, three hours; discussion, one hour. A study of the characteristics and formation of political attitudes and public opinion. The role of public opinion in elections, the relationship of political attitudes to the vote decision, and the influence of public opinion in public policy formulation. Mr. Petrock, Mr. Zoller

142. Politics of Interest Groups. A systematic investigation of the role of political interest groups in the governmental process, with attention to the internal organization, leadership, and politics of such groups to the goals and functions of various types of groups and to the strategy and tactics of influence. Mr. Orren

143. Legislative Politics. A study of those factors which affect the character of the legislative process and the capacity of representative institutions to govern in contemporary society. Mr. Marvick, Mr. Snowiss

144. The American Presidency. A study of the nature of the role of the chief executive in contemporary American government, focusing on the major problems of national leadership, evaluating the impact of the bureaucracy, congress, public opinion, interest groups, and the party system on the presidency and national policy-making. Mr. Orren, Mr. Snowiss

145. Political Parties. The organization and activities of political parties in the U.S. Attention to the historical development of the parties, the nature of party change, campaign functions and the electoral role of the major parties, membership problems and party activists, political finance, and party formulation practices. Mr. Marvick, Mr. Petrock
146. Political Behavior Analysis. Prerequisites: courses 6, 141. An advanced course in the use of quantitative methods in the study of political behavior, especially in relation to voting patterns, political party organization, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141 and similar courses. Mr. MacRae, Mr. Petrick, Mr. Zeller

M147A. Minority Group Politics. (Formerly numbered M147.) (Same as Chicano Studies M147.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Introduction to the political economy of racial domination in the U.S., concentrating on the study of the Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, the class and racial stratification systems, and the cultural codes and modes of ideological discourse in each historical period.

M. Rocco

M147B. Minority Group Politics. (Formerly numbered M147.) (Same as Afro-American Studies M147.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Course M147A is not prerequisite to M147B. Emphasis on the dynamics of minority group politics in the U.S., touching on the conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about the social, political, and economic conditions of the black community, (2) to analyze the important political issues facing black Americans, (3) to sharpen students’ analytical skills.

M. Gilliam

149A-149Z. Special Studies in Politics. Prerequisites: two courses in Field III, consent of instructor. Intensive examination of one or more special problems appropriate to politics. Sections offered on a regular basis, with topics announced in the preceding quarter. Courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Field IV: Comparative Politics

152. British Government. The government and politics of the United Kingdom; the British constitution, parliament, parties and elections, foreign policies, administrative problems, and local government. Mr. Freedman

153. Governments of Western Europe. The constitutional and political structure and development of France and other states of continental Western Europe, with particular attention to contemporary problems.

M. Dogan, M. Rogowski, M. Tsebelis

154. Governments of Central Europe. The constitutional and political structure and development of Germany and other Central European states, with particular attention to contemporary problems.

M. Korbonski, M. Rogowski

155. Advanced Pluralist Democracies. Main features and basic problems of the economically advanced democracies, analyzed in a comparative framework, topic by topic. The Northern European and Western Atlantic comparisons, not only political but also sociological.

M. Dogan, M. Wallerstein

156. Government of the Soviet Union. An intensive study of the political and institutional organization of the Soviet Union and its component parts, with special attention to contemporary political issues, as well as party and governmental structures.

M. Kolkowicz, M. Korbonski

157. Governments of Eastern Europe. A study of the political and governmental organization of the Communist countries of Eastern and Central Europe (except the U.S.S.R.), with special attention to the institutions, practices, and ideologies including interregional relations.

M. Korbonski

159. Chinese Government and Politics. Organization and structure of Chinese government, with particular attention to the policies, doctrines, and institutions of Chinese Communism; political problems of contemporary China.

M. Baum

160. Japanese Government and Politics. The structure and operation of the contemporary Japanese political system, with special attention to domestic political forces and problems.

Mr. Baerwald

162. Government and Politics in South Asia. A comparative study of political change and the development and performance of public institutions in Southern Asia, with special emphasis on India, Pakistan, and Bangladesh.

Mr. Sisson

163A. A comparative study of governmental and political development, organization, and practices in the states of Middle America.

Mr. Gonzalez

163B. A comparative study of governmental and political development, organization, and practices in the states of South America.

Ms. Geddes, Mr. Gonzalez

164. Government and Politics in the Middle East. A comparative study of government in the Arab States, Turkey, Israel, and Iran.

Mr. Binder

166A. Western Africa; 166B. Eastern Africa; 166C. Southern Africa.

Mr. LoFchio, Mr. Sklar

Mr. Sklar

168L. Comparative Political Analysis. Lecture. Prerequisites: two courses in Field IV, or course 50 and one course in Field IV. Either course 168L or 168S is required of all students concentrating in Field IV (students with credit for course 168S will not receive credit for this course). Conducted as a lecture course.

M. Dogan

168S. Comparative Political Analysis. Seminar. Prerequisites: two IV courses, or course 50 and one course in Field IV, and consent of instructor. Either course 168L or 168S is required of all students concentrating in Field IV (students with credit for course 168L will not receive credit for this course). Conducted as a seminar. Major approaches to the study of comparative politics. Concepts and methodology of comparative analysis.

Mr. Baum

169A-169Z. Special Studies in Comparative Politics. (Formerly numbered M169A-M169Z.) Prerequisites: two courses in Field IV, consent of instructor. Intensive examination of one or more special problems appropriate to comparative politics. Sections offered on a regular basis, with topics announced in the preceding quarter. Courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Also see courses 115, 181, 183C

Field V: Public Law

170. Anglo-American Legal System. Lecture, four hours; discussion, one hour. Evolution of the English common law courts and their legal system, with emphasis on the development of the basic concepts of law which were received from that system in the U.S. and remain relevant today.

Mr. Gerstein

172A-172B. American Constitutional Law. Prerequisite: course 70.

172A. Constitutional questions concerning the separation of powers, federalism, and the relationship between government and property.

Mr. Gerstein, Mr. Hobbs

172B. The protection of civil and political rights and liberties under the constitution.

Mr. Gerstein, Mr. Hobbs

173. Government and Business. The nature of the corporation; the regulation of competition; government promotion of economic interests; regulation of industries which have a public interest; government ownership and operation. May be applied toward either Field IV or VI.

Mr. Orren

174. Government and Labor. The labor force and the nature of the trade union; regulation of labor relations; programs to encourage full employment and to mitigate unemployment; protective labor legislation. May be applied toward either Field IV or VI.

175A-175B. International Law. A study of the nature and place of international law in the conduct of international relations. May be offered in consecutive terms or simultaneously. If offered consecutively, course 175A is prerequisite to 175B, and a student may take 175A alone for four units credit. If offered simultaneously, a student must take both courses for eight units. A maximum of four units may be applied toward Field II.

179A-179Z. Special Studies in Public Law. Prerequisites: course 70, one additional course in Field V, any special requirements, consent of instructor. Intensive examination of one or more special problems appropriate to public law. Sections offered on a regular basis, with topics announced in the preceding quarter. Courses 119, 139, 149, 169, 175, and 189 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Also see courses 117, 165

Field VI: Public Organization and Policy

180. Theories of Organization and Decision Making. (Formerly numbered 190.) An examination of the theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns, and concepts of organization. P/NP or letter grading.

Mr. Fried

181. Comparative and Development Administrations. (Formerly numbered 188.) An analysis of bureaucratic structures and function in the U.S., other industrialized, and less developed countries, primarily at the national level. Special attention to methods of comparative analysis and the utility of various models. May be applied toward either Field IV or VI. P/NP or letter grading.
C224C. Politics and Society. The application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with course C197C.

C224D. Group Theories of Politics. Critical appraisal of “group theory” approaches to the study of political decision making, with special attention to empirical research problems, and their interpretation.

C224E. Legislative Behavior. The analysis of the major approaches to the study of representative institutions, with special emphasis on the assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

Mr. Marciv, Mr. Snowiss

C224F. Executive Politics and the Presidency. An analysis of executive organization and leadership, with emphasis on the American Presidency. Special attention to theories of organization and personality and the relationship between the executive and other institutions and groups. May be concurrently scheduled with course C197C.

Mr. Snowiss

M224G. Political Psychology. (Same as Psychology M228) Discussion, three hours. Prerequisite: course 214A or Psychology 220A. Examination of political behavior, political socialization, personality and politics, social control, and the analysis of political public issues. Mr. Sears

C224H. Mass Attitudes and Behavior. Prerequisite: course 141 or 214A or consent of instructor. An analysis of the development and change of political attitudes and behavior in the mass publics and their psychological bases. Special attention to the topics of opinion formation, political protest, and violence. May be concurrently scheduled with course C197B.

Mr. Petrock, Mr. Zaller

C224J. Political Parties. A critical examination of the literature on party systems and organization. Special attention to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with course C197C.

Mr. Marciv, Mr. Petrock

M224K. Political Environment of the Federal Executive. Seminar, three hours. Examination of the political environment of the federal executive in the U.S. Special attention to executive-legislative relations. Mr. Aberbach

C225A. Modern Political Economy. Seminar, three hours. A discussion of the implications for understanding the politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microfoundations for macroeconomics, forms of political participation, the state and government regulation, the growth of government, bureaucracy elections, public policy, inflation. Mr. Stein

C226. Economic Methods in Political Economy. Discussion, three hours. Prerequisite: knowledge of elementary calculus. Introduction to techniques of economic analysis and survey of major topics in formal political economy. Investigation of models of regulation, trade protection and rent-seeking, the growth of government, and class conflict as time permits. Mr. Wallstein

C227. Seminar on Social Class and Political Analysis. (Formerly numbered 235.) Seminar, three hours. An investigation of the concept of social class as a tool of political analysis, with emphasis on current debates regarding the definition and utility of class as an analytic category. S/U or letter grading.

Mr. Wallstein

C228. National Administrative Systems. (Formerly numbered C228B.) Seminar, three hours; discussion, one hour. An examination of the formulation and implementation of policy at the federal level. The consequences of administrative performance for American government and social life. May be concurrently scheduled with course C197F.

Mr. Wallstein

C229. Subnational Administrative Systems. (Formerly numbered C228E.) An analysis of state administrative systems, their local subsystems, and their outputs. May be concurrently scheduled with course C197F.

Mr. Fried

C230. Comparative Development Administration. Discussion, three hours. An examination of the role and performance of national government bureaucracies. Emphasis may be on comparisons among developed countries, on the development of administrative institutions, or on the administration of development programs. May be concurrently scheduled with course C197F.

C231A-C231D. Studies in International Relations:

C231A. Contemporary Problems in U.S. Foreign Policy. An intensive analysis of the policy formulation process and the substance of contemporary problems. Mr. Kolkowicz

C231C. Foreign Policy Process. (Formerly numbered 231C.) Discussion, three hours. Prerequisites: courses 120, and C201 or 212A or 212B, or consent of instructor. An analysis of foreign policy approaches to the national foreign policy process, with primary focus on the formulation and implementation of American foreign policy. May be concurrently scheduled with course 212B.

Mr. Spiegel

C231D. International Relations Theory. An introduction to contemporary problems in international relations theory. May be concurrently scheduled with course C197B.

Mr. Stein, Mr. Wilkinson

C232A-C232B. International Political Economy. (Formerly numbered C233J-C233K.) Discussion, three hours; discussion, one hour. Applications concern political economy, particularly as they relate to international trade and the study of advanced industrialized nations.

C232A. International Trade and Advanced Industrialized Nations. An intensive examination of various theoretical approaches to international political economy, particularly as they relate to international trade and the study of advanced industrialized nations.

Mr. Lake

C232B. International Capital and International Relations. The interaction of international lending and investment and the domestic political economies of both industrialized and industrializing societies.

Mr. Frieden

C233A-233B-233C. Political Economy Workshop (0 units, 0 units, 12 units). Discussion, two hours. Open to graduate students. Students must successfully complete the major field examinations. Workshop for those students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. A research paper of publishable length and quality required. In Progress grading.

Mr. Frieden, Mr. Lake

C234A-234B-234C. Workshop in National Security, Foreign Policy, and International Relations (0 units, 0 units, 12 units). Discussion, two hours. Course 234A is prerequisite to 234B, which is prerequisite to 234C. Courses must be taken in sequence. Open to graduate students who have successfully completed the major field examinations and intended for students preparing for or working on dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required. In Progress grading.

C235. Selected Topics in Comparative Politics. Lecture, three hours. A critical examination of a major problem in comparative politics.

C236A. An introduction to the literature on the development of elective institutions and their performance. An interdisciplinary approach emphasizing literature as well as contemporary cases and modes of analysis.

C236B. Prerequisite: course 236A or consent of instructor. A research seminar devoted to the analysis of particular problems and empirical topics.

Mr. Sisson, Mr. Snowiss

C238A-C238D. Studies in Public Law:

C238A. Evolution of Anglo-American Law Books. Surviving early records, Case reporting, from the year books to the reporter system, legal treatises, from Glanvill to today. Strategies for how to find them. The language of the law. The entire English-speaking world, with emphasis on American materials. May be concurrently scheduled with course C197E.

C238B. Making of the Constitution. An examination of the development of constitutional law during selected periods of American history, such as founding, the Marshall and Taney eras, and the New Deal. Emphasis on legal phenomena, research problems and findings. May be concurrently scheduled with course C197E.

Mr. Gerstein

C238C. Bill of Rights and the States. An examination of the problems surrounding the application to the states of Amendment I through 9. May be concurrently scheduled with course C197E.

Mr. Hobbs

C238D. Current Problems in Public Law. A discussion of selected contemporary problems in jurisprudence, administrative law, and policy, culminating in a public discussion of the central legal principles and political options. May be concurrently scheduled with course C197E.

Mr. Gerstein

C240. Game Theory in Politics. Seminar, three hours. A survey of game theory, with emphasis on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition. Designed to help students become informed consumers of game theoretical literature in political science and economics.

Mr. Tsebelis

M241. Topics in Applied Game Theory. (Same as Economics M215.) Lecture, three hours. Prerequisites: calculus or introductory probability, and graduate standing in economics or consent of instructor. Survey and applications of the major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

Mr. Shapley

M242A. Game Theory. (Same as Economics M214B) Lecture, three hours. Prerequisites: Economics 213A or suitable mathematics courses. Bargaining theory, the core, the value, and other solution concepts. Applications to oligopoly, general exchange and production economies, and the allocation of joint costs. S/U or letter grading.

Mr. Shapley

M242B. Large Economies. (Same as Economics M214C.) Lecture, three hours. Prerequisites: Economics 213A or suitable mathematics courses. Consideration of economics with a continuum of consumers and a continuum of goods. The basic model applied to perfectly competitive equilibrium and other models with nonconvex preferences and/or technology. S/U or letter grading.

Mr. Shapley

M247. Multivariate Analysis with Latent Variables. (Same as Psychology M257.) Prerequisite: consent of instructor. Introduction to models and methods for the analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analyses of individual mathematical models with unmeasured latent variables. Review of major solution methods, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

Mr. Bentler
Prerequisite for graduate seminars (C250A through C271) is advance consent of instructor.

C250A-C250L. Seminars in Regional and Area Political Studies:
C250A. Latin American Studies. Seminar, three hours; discussion, one hour. May be concurrently scheduled with course C197D.
Mr. Geddes, Mr. Gonzalez
C250B. Russian and Slavic Studies. May be concurrently scheduled with course C197C.
Mr. Kolkowicz, Mr. Korbonski
C250C. Chinese and East Asian Studies. May be concurrently scheduled with course C197D.
Mr. Baum
C250D. Japanese and Western Pacific Studies. May be concurrently scheduled with course C197D.
Mr. Baenwald
C250E. African Studies. May be concurrently scheduled with course C197D.
Mr. Lofchie, Mr. Sklar
C250F. Middle Eastern Studies. May be concurrently scheduled with course C197D.
Mr. Binder
C250G. Commonwealth Studies.
C250H. Western European Studies. Seminar, three hours; discussion, one hour. May be concurrently scheduled with course C197D.
Mr. Rogowski, Mr. Tsebelis
C250J. Southeast Asian Studies. May be concurrently scheduled with course C197D.
C250L. South Asian Studies. May be concurrently scheduled with course C197D.
Mr. Sisson
C252. Seminar in Public Law. May be concurrently scheduled with course C197D.
C253. Seminar in International Relations. May be concurrently scheduled with course C197B.
C254. Seminar in Public Organization and Policy. Seminar, three hours. May be concurrently scheduled with course C197F.
C257. Seminar in Political Theory. Discussion, three hours.
Mr. Ashcraft, Mr. Binder
C259. Seminar in Political and Electoral Problems. Prerequisites: two graduate courses in political science.

C260A-C280B. Advanced Practicum in Administrative Research. Discussion, three hours; fieldwork, to be arranged. Prerequisites: at least five political science courses (20 units) at the graduate and upper division levels, consent of instructor. An advanced laboratory/seminar in applied research on public agency operational and service delivery problems. An integrated case-study approach to task-force studies dealing with such problems as legislative and policy issues in mandated and nonmandated public functions; program and management organization; budget and finance performance measures; information systems; evaluation of outcomes; political impact analysis; and related problems in administrative decision making. S/U grading.

C275. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

C285. Teaching Political Science. A workshop in techniques, including evaluation of each student's own performance as a teaching assistant. Normally to be taken by all new teaching assistants in the first quarter of their assistantships. May be taken only in the quarter in which students are teaching assistants. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

C291. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

C590A. Directed Reading for Ph.D. Dissertation Proposal (0 units). Required of all Ph.D. students. Must be taken under the supervision of the research adviser prior to or during the quarter in which the oral examination is taken. Research for the proposed dissertation topic and submission of a bibliographic essay on that topic. In Progress grading (credit to be given only on completion of course 590B). S/U grading.

C590B. Directed Research for Ph.D. Dissertation Proposal (8 units). Prerequisite: course 590A. Required of all Ph.D. students. Must be taken under the supervision of the research adviser prior to or during the quarter in which the oral examination is taken. Development and writing of the research design for the Ph.D. dissertation. With consent of research adviser, courses 233A-233B-233C may, by petition, be accepted as equivalent to courses 590A and 590B. Directed Individual Study or Research (2 to 4 units). May be applied only three times toward the minimum course requirement in the first two years. May be repeated.

C597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). May be repeated. S/U grading.

C598. Research for and Preparation of M.A. Thesis (2 to 12 units). Course is rarely taken because students normally receive the M.A. degree under the comprehensive examination plan. S/U grading.

Program in Computer Science

Psychology

Joseph A. Gengerelli, Ph.D.
Dietmar Schulte, Ph.D.
Eliot H. Rodnick, Ph.D.

Emeritus Professors
Richard P. Bartholomew, Ph.D.

William E. Broen, Jr., Ph.D., in Residence
Jessie L. Rhulman, Ed.D.
John J. Jenson, Ph.D.
The undergraduate curriculum provides a basic liberal arts foundation. It does not focus on training students to be only professional psychologists, but rather helps them to understand the world and our place in it. A choice of three majors, leading to either the B.A. or B.S. degree, is offered.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in various fields. The program is designed to prepare psychologists to function effectively as scientific investigators, college and university teachers, and professional psychologists.

Undergraduate Study
To meet the diverse needs of students, there are three different major curricula: the psychology major, the cognitive science major, and the psychobiology major. The first two lead to a Bachelor of Arts degree; the third culminates in a Bachelor of Science degree.

All courses required for these majors (which include lower division courses and major courses) must be taken for a letter grade.

Bachelor of Arts in Psychology
The general psychology major emphasizes the experimental and research aspects of the field. It is a good choice for students with an interest in human behavior who wish to receive a general education in the liberal arts and sciences. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall, early in your career.

Preparation for the Major
You must file a petition in the Undergraduate Advising Office to declare the pre-psychology major; you are identified as a pre-psychology major until the preparation for the major requirements have been satisfied. The following required courses must be completed for a letter grade (a C— or better in each course and a 2.3 overall grade-point average in the preparation courses) before you reach 135 total units: Anthropology 1 or 2 or 11; Biology 2 or 5; Chemistry 2 (if you have completed one year of high school chemistry with a C or better, this requirement is waived) or 11A; Mathematics 2, 6A or 8A; one course from Philosophy 1, 3, 4, 6, 7, 8, 9, 10, 21, 22; Psychology 10, 42; Psychology 41 (recommended) or Statistics 50 or Economics 40. Psychology 41 and 42 should be taken early in your career.

These are minimum requirements in preparing for the major. More advanced courses in science and statistics would provide stronger preparation.

The Major
After completing the preparation courses, you must petition to enter the major at the Undergraduate Advising Office. You must have a 2.0 grade-point average in your upper division major courses, and each must be taken for a letter grade.

Required: (1) Psychology 110, 115, 120, 125, 130 (for students entering Fall Quarter 1987 or thereafter), 135; (2) one course from 111, 116, 121, 131, 143, 186 and one course 126, 136A, 136B, 170B, 174, 176; (3) three additional upper division elective courses (12 units) in psychology.

Bachelor of Arts in Cognitive Science
This major focuses on the study and implementation of intelligent systems, both human and artificial. Cognitive science involves the study of cognitive psychology, computer science, mathematics, and related disciplines. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall, early in your career.

Preparation for the Major
Admission to the major is limited. You are identified as a pre-cognitive science major until the preparation for the major requirements have been satisfied. The following required courses must be completed for a letter grade (a C or better in each course and a 2.5 overall grade-point average in the preparation courses): Anthropology 1 or 2 or 11; Biology 2 or 5; Chemistry 2 (if you have completed one year of high school chemistry with a C or better, this requirement is waived) or 11A; Mathematics 31A, 31B, 61; Philosophy 7 or 9; Physics 10 or 3A or 6A or 8A; Program in Computing 10A, 10B, 60; Psychology 10, 42; Psychology 41 (recommended) or Statistics 50 or Economics 40. Psychology 41 and 42 should be taken early in your career.

The Major
After completing the preparation courses, you must petition to enter the major at the Undergraduate Advising Office. You must have a 2.0 grade-point average in your upper division major courses. With the exception of Psychology 188, each course must be taken for a letter grade.

Required: (1) Psychology 110, 115, 120, 125 or 135, 185, 186, 188 (course 190C or 199 may be substituted for 188 if content is approved in advance by the Undergraduate Advising Office); (2) an additional three upper division elective courses (12 units) from Psychology 102 through 121, 123, 124A, 124B, 142, 150, 151, 153, 187, 189, 190B (if content is approved by the Undergraduate Advising Office), Computer Science 111 through M196B, Linguistics 100 through 185, Mathematics 110A through 151, Philosophy 126A through 136, Statistics 152A through M155B.
Quantitative Methods Concentration
This concentration is intended to give students more extensive preparation in statistics. The following additional courses are required: Mathematics 32A, 32B, 33A, 33B, and either 150A-150B and 151 or Statistics 152A-152B-152C. Psychology 41 is not required if you select this specialization.

Bachelor of Science in Psychobiology
This major is designed for students who plan to go on to postgraduate work in physiological psychology, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall, early in your career.

Preparation for the Major
You must file a petition in the Undergraduate Advising Office to declare the pre-psychobiology major; you are identified as a pre-psychobiology major until the preparation for the major requirements have been satisfied. The following required courses must be completed for a letter grade (a C— or better in each course and a 2.0 overall grade-point average in the preparation courses): Biology 5, 6, 7, 8; Chemistry 11A, 11B/11BL, 11C/11CL, 21, 23, 25; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, and 8C/8CL; Psychology 10, 42; Psychology 41 (recommended) or Statistics 50 or Economics 40. Psychology 41 and 42 should be taken early in your career.

The Major
After completing the preparation courses, you must petition to enter the major at the Undergraduate Advising Office. You must have a 2.0 grade-point average in your upper division major courses, and each must be taken for a letter grade.

Required: (1) Biology 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115, 120, (2) one course from Psychology 125, 127, 130, 135; (3) four courses from the following list: Psychology 117 (only one section may be used); Biology 107, 112, 113A, 114 (no more than one from this group); Psychology 119A, 119D, 119F, 119I, M119J, M119K, 128, 143, M131, 190C (only if content is approved by the Undergraduate Advising Office), Biology 102, C104, 105, 106, 110, 111, 115, 117, 119, 120, 122, 124, 131, 135, 138, 143, 144, 145A, 145B, 145C, 146, 153, CM156, 157, 158, 164, 166, 167, 168, 170, 171, 172A, 172B, 173, 177, 179, Kinesiology 191S, Chemistry 152.

Developmental Disabilities Immersion Program Concentration
To earn this concentration, majors in psychology, biological science, and psychobiology must be accepted into the Developmental Disabilities Immersion Program. Information and applications are available from Field Studies Development, 70 Powell Library. The following courses are required: Psychology 127 (can also be applied as one of the three upper division electives required for the psychology major), 130 (also satisfies a core requirement for the psychology major), M133B, M180A, M180B, M181A-M181B, 193 (two quarters). With the exception of course 193, each course must be taken for a letter grade. Students in the department who complete the requirements receive a certificate of completion from the department at graduation.

Specialization in Computing
Majors in psychology, psychobiology, and cognitive science may select a specialization in computing by (1) satisfying all the requirements for a bachelor’s degree in the specific major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 30, 60, (3) completing at least two courses from Psychology 150, 152, 185, 186. A grade of C or better is required in each course. You graduate with a bachelor’s degree in your major and a specialization in computing.

Honors
Honors Courses
Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports and small group discussions, and may include field or research experience. All such courses offer credit toward departmental honors and College Honors.

Departmental Honors
Psychology majors intending to continue study at the graduate level are encouraged to apply for departmental honors. In addition to the regular requirements for your major, you must take at least two courses from the list of honors-designated courses provided by the department. Different courses are designated for honors each year, and you may choose among them. You also must engage in advanced research and study leading to a formal bachelors thesis under the tutorial guidance of a faculty member while enrolled in Psychology 190A-190B-190C. If your thesis is judged acceptable by the honors committee, you are awarded the degree with honors or highest honors. Consult the Undergraduate Advising Office early in your educational planning for further information and application forms.

Developmental Disabilities Immersion Program
The Developmental Disabilities Immersion Program is cosponsored by the Department of Psychology and the Department of Psychiatry and Biobehavioral Sciences and by the Office of Instructional Development — Field Studies Development. Each year a group of 30 students is selected for the program which runs during the Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected community facilities serving persons with developmental disabilities.

Required core courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements (consult the Undergraduate Advising Office for details). Student individualized research projects are also part of the immersion experience.

To supplement their academic activities, students spend 10 hours a week assisting teachers in special education classes in nearby public schools or helping supervise at sheltered workshops. For more information, contact the Undergraduate Advising Office (1531 Franz Hall) or Field Studies Development (70 Powell Library).

Infant Development Program
The Infant Development Program is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, and their parents. In addition, the program provides an opportunity for students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers on an individual basis or in a group setting. The program is located in Franz Hall and provides child care for 13 infants ranging in age from four months to two and one-half years.

Clinic for the Behavioral Treatment of Children
The Clinic for the Behavioral Treatment of Children carries out diagnosis, treatment, and research on children with severe psychological problems, such as autistic and schizophrenic children and those with severe developmental disorders. The treatment philosophy is largely behavioral/educational, with emphasis on language acquisition, peer and school integration, and parent training. Students are taught behavioral treatment procedures and work in an apprenticeship relationship to senior staff. Prior research has focused on variables controlling
self-destructive behavior, perceptual deficits, language acquisition, and emotional/social attachments. The clinic serves as a teaching and research environment for both graduate and undergraduate students.

Preparation for Graduate Study

Although requirements for admission to graduate programs in psychology in most universities are satisfied by the above major requirements, both admission to graduate work and progress toward the degree may be impeded in certain areas of psychology if additional preparation is not obtained at the undergraduate level. For this reason, if you plan to do graduate work in psychology, you are advised to take additional work in methodology and statistics and to take advantage of the many advanced undergraduate courses in specific fields offered both by the Psychology Department and related departments. Consult the Undergraduate Advising Office for more information.

Ph.D. Degree

The graduate program in psychology leads to the Ph.D. degree. Although you may obtain the M.A. degree en route to the Ph.D., the department does not admit candidates for the M.A. degree only. For the Ph.D. degree, a thorough background in research methodology and psychological theory is required. Major specialized training is available in the areas of psychology listed below under "Major Fields or Subdisciplines."

A departmental brochure describing the graduate program in psychology is available in 3453 Franz Hall.

Admission

Admission to the Ph.D. program normally requires an undergraduate degree in psychology. However, students from other areas (particularly the mathematical, physical, biological, and social sciences) may be admitted. Admission is for Fall Quarter only and on a full-time basis only. Applicants must mail the following documents directly to the Psychology Department, 3453 Franz Hall, UCLA, Los Angeles, CA 90024-1563, by December 30 to be considered for admission the following Fall Quarter:

1. The departmental Application for Admission to the Doctoral Program, available in 3453 Franz Hall.
2. Three letters of recommendation.
3. One official transcript from each college attended.
4. Scores from the Graduate Record Examination (GRE) General Test and the Subject Test in Psychology (taken within the last three years).

During the third year, you must enroll in a minimum of three graduate-level courses, plus one quarter of course 596. At least one quarter of course 596 or 599 should be taken during the fourth year and each remaining year in the graduate program.

Major Area Course Requirements: Each area has its own specific requirements. A course may not be applied toward requirements in more than one major or minor area unless no other course options are designated. Requirements are as follows: clinical: Psychology 270A-270B-270C, 271A-271B-271C, two courses in the 272 series, 277A-277B, and at least two other advanced clinical courses beyond 277B; cognitive: courses 260A-260B, plus four courses, including at least two selected from 247A, 259, 261 through 266, and at least one from 268A through 268E or 269; developmental: courses 240A-240B, one course from 220A, 235, 286, one course from 200B, 205A, 261, 262, 263, 264, 266, two courses from 242A through 242F or 244, one of the quantitative courses listed under second-year requirements, and 299; learning and behavior: courses 200A, 200B, plus two courses from 204A, 204B, 204C, 208, 210, 281, 290, 293; measurement and psychometrics: five courses from 249, 252, 253, 254, 255, 256, M257, 258; personality: courses 232, 235, M239, 278; physiological: courses 205A-205B, three quarters of course 212, and two approved physiological seminars (it is expected that students will take Anatomy M206A, M206B as part of a minor in neuroscience); social: courses 220A-220B, 223A or 224, three social seminars taught by three different faculty members, and course 226 each quarter for the first three years of the program.

Minor Area Course Requirements: You must select two minor areas. These minors are normally satisfied by taking three to four specified courses. See departmental bulletins for further details.

Qualifying Examinations

The qualifying examination generally consists of three separate sections. The first is an examination administered by the major area, which examines in breadth your knowledge of the major field. The second section is an individualized examination which examines in depth your knowledge of your area of specialization within the major field. The third section is the University Oral Qualifying Examination. All Ph.D. requirements listed above must be completed before this section can be taken. After successful completion of the oral examination, you are advanced to candidacy and may begin work on the dissertation.

Contact the department for the specific examination requirements of the various areas of specialization.
Practicum and Internship Requirements for Clinical Students
(1) At least six quarters of approved supervised preinternship practicum (Psychology 401 — 12 to 15 hours per week) are required and are usually taken in the second and third years.
(2) The equivalent of one calendar year of supervised internship (Psychology 451) in an acceptable setting approved by the faculty, taken either full-time in one year or half-time in two years in one or two settings, is required. This is usually taken in the fourth or fifth year. Contact the department for further information on internship assignments.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination is required of all candidates for the Ph.D. degree.

Psychology Clinic
The Psychology Clinic in the Department of Psychology is a major training center for clinical psychology students in the Ph.D. program. It provides a broad range of psychological services for the campus and the community. Students and faculty members are also involved in a variety of clinical research projects.

Spanish Speaking Mental Health Research Center
The Spanish Speaking Mental Health Research Center (SSMHRRC) promotes basic and applied research on the mental health needs of the Hispanic population. SSMHRRC provides an interdisciplinary research environment for scholars, students, and professionals interested in Hispanic mental health. Previous research projects have included studies on acculturation and ethnicity, bilingualism, community studies, health and behavior, personality assessment, and psychosocial issues. In January 1984 the National Institute of Mental Health's Center for the Studies of Minority Development and Mental Health awarded the SSMHRRC a five-year grant to study the effects of stress on Mexican Americans.

Lower Division Courses
10. Introductory Psychology. Not open to students with credit for course 101. A general introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research.
11. Principles of Psychology (5 units). Lecture, three hours; discussion, one hour; laboratory, one hour. Recommended for premajors. Not open to students with credit for course 10. Introduction to psychology, with emphasis on critical analysis and reasoning. Readings include selections from the primary research literature. Discussion sections focus on writing assignments; labs focus on research simulation.
15. Introductory Psychobiology. Designed for nonmajors. A survey of genetic, evolutionary, physiological, pharmacological, and experiential factors affecting behavior. Using the comparative approach where appropriate, emphasis on the relevance of biological mechanisms to an understanding of man and his interaction with his environment.
41. Psychological Statistics. Lecture, five hours. Prerequisites: course 10, Mathematics 2; and psychology premajor standing or consent of instructor. Basic statistical procedures and their application to research and practice in various areas of psychology.
42. Research Methods in Psychology (6 units). Lecture, two hours; laboratory, four hours. Prerequisites: courses 10, 41, with grades of C or better. Introduction to research methods and critical analysis in psychology. Lecture content and lab topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues.

Upper Division Courses
102. History and Systems of Psychology. Prerequisite: senior standing or consent of instructor. A historical and systematic analysis of psychological thought and points of view.
102H. History and Systems of Psychology (Honors). Lecture, three hours. Prerequisite: consent of instructor. The history of basic psychological controversies, beginning with Greek philosophy, developed through the rise of science and different schools of philosophy and psychology, and ending with assessments of the current status of the field.
M107. Asian American Personality and Mental Health. (Formerly numbered M195.) (Same as Asian American Studies M107.) Lecture, three hours. Prerequisite: course 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors/resources, and immigrant and minority group status. M. Sue, M.D.
110. Fundamentals of Learning. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Experimental findings on animal and human conditioning; retention and transfer of learning; the role of learning and motivation, tended to provide an empirical basis for theory and research in this area.
111. Learning Laboratory. Lecture, two hours; laboratory, three hours. Prerequisites: courses 41, 120, 110 (may be taken concurrently). A general introduction to psychological major standing. Laboratory experience with techniques in the study of learning, especially with animals.
112A. Human Learning. Prerequisite: course 110. Acquisition, retention, and transfer of verbal and nonverbal learning human memory.
112C. Thinking. Prerequisite: course 110. An analysis of experimental studies of problem solving, reasoning, insight, concept formation, and related topics.
112E. Current Topics in Learning. Prerequisite: course 110. A study of related issues in the psychology of learning. Topics vary depending on the interests of the class and instructor. May be repeated for credit with consent of instructor.
114. Alcoholism. Prerequisite: upper division standing. Theories and research on the impact, causes, characteristics, and treatment of alcoholism considered from a biobehavioral point of view.
115. Physiological Psychology. Lecture, three hours; discussion, one hour. Prerequisites for majors: course 41, Biology 2, junior standing; for nonmajors: Biology 5, 7, consent of instructor. Integrative activities, receptor and effector processes in relation to neuromuscular structure and function. Facts, problems, and methods.
116. Physiological Psychology Laboratory. Lecture, one hour; laboratory, three hours. Prerequisites: courses 41, 115 (may be taken concurrently). Physiology major standing. Laboratory experience with various topics in physiological psychology.
117. Current Topics in Psychology. Prerequisites: course 115, junior standing. Advanced topics in brain and behavior may be repeated once for credit with consent of psychology undergraduate adviser.
118. Comparative Psychobiology. (Formerly numbered 118A.) Prerequisites: course 115, junior standing. Lecture, three hours. Prerequisites: course 115 and junior standing, or consent of instructor. Advanced topics of current interest in physiological psychology. May be repeated once with consent of psychology undergraduate adviser.
119B. Human Neuropsychology. (Formerly numbered 119B.) Lecture, three hours. Prerequisites: junior major standing. Exploration of the biological basis of human cognitive processing, with emphasis on the function of the cerebral cortex.
119C. Neuropsychopharmacology. (Formerly numbered 118E.) Lecture, three hours. Prerequisites: course 115, junior standing. Not open to students with credit for former course 118B with Dr. Butcher prior to Fall Quarter 1988. A study of basic pharmacological principles to include the interaction of drugs with neurochemically significant substances in the brain.
119D. Behavioral Pharmacology. (Formerly numbered 118B.) Prerequisites: course 115, junior standing. Not open to students with credit for former course 118B prior to Fall Quarter 1988. Experimental and theoretical treatment of drug-behavior relationships. Particular emphasis on behavior and pharmacological mechanisms of drug action and interaction with neuronal function.
119DH. Behavioral Pharmacology (Honors). (Formerly numbered 118B H.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Experimental and theoretical treatment of drug-behavior relationships; pharmacological approaches to mood, aggression, learning, motivation; experimental studies of addiction.
119E. Stress and Bodily Disease. (Formerly numbered 119E.) Lecture, three hours. Prerequisites: course 115, junior standing. Not open to students with credit for former course 118E with Dr. Grijalva prior to Fall Quarter 1988. Psychobiological processes as they pertain to the development of stress responses and disease states. Consideration of stress-related topics, including behavioral and pharmacological variables in stress and stress management.
119F. Neuron Circuitry and Behavior. (Formerly numbered 118G.) Prerequisites: course 115, Biology 171, and junior standing, or consent of instructor. A presentation of theories and data on how neuron circuits produce behavior. Mechanisms of perception, response selection, motor pattern generation, learning, and motivation, with emphasis on the operation of these processes in well-defined neural circuits.

119G. Psychobiology of Pain and Pain Inhibition. (Formerly numbered 118E.) Lecture, three hours. Prerequisites: course 115 and senior standing, or consent of instructor. Lectures and discussions on the neural mechanisms of pain and the problem of chronic pain disease.

119I. Psychophysiology of Motivation. (Formerly numbered 118C.) Lecture, three hours. Prerequisites: course 115, junior standing. The basic psychophysiology, including brain and endocrine mechanisms, involved in the control of motivation. Discussion of homeostatic drives such as hunger and thirst and nonhomeostatic drives such as reproduction behavior.

M119J. Ethology: Physiology of Behavior and Learning in Animals. (Formerly numbered M118F.) (Same as Psychiatry M100.) Prerequisites: course 115, junior standing. An introductory course for students which integrates a systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, endocrinological, and pharmacological studies) with a broad biological, evolutionary perspective. (W)

M119K. Evolution of Intelligence. (Formerly numbered M119.) (Same as Psychiatry M119.) Lecture, two hours; discussion, two hours. Prerequisites: course 15 or 115, an introductory statistics course, junior or senior standing, consent of instructor. Intelligence treated as neural information-processing capacity, with evolution in vertebrates correlated with the evolution of enlarged brains. Quantitative approaches in evolutionary biology and the neurosciences.

120. Human Information Processing. Lecture, three hours; discussion, one hour Prerequisites: courses 10, 41, junior standing. A survey of how people acquire and retain nonverbal and verbal information. Perception, attention, memory, and representation of knowledge.

121. Laboratory in Human Information Processing. Prerequisites: courses 10, 41, 42, 120 (may be taken concurrently). Laboratory experience with methods and phenomena from research on human perception, memory, and representation of knowledge.

122. Language and Communication. Lecture, three hours. Prerequisites: course 10. Introduction to psychology of language and communication; verbal and nonverbal channels; interlinguistic and intralinguistic variation; animal communication; biological bases of language; production and comprehension of speech and writing; relation to perception, memory, and thought; conversational interaction; language development.

123. Psycholinguistics. Prerequisite: junior standing. Current theory and research in psycholinguistics: a survey of language acquisition, language perception, and language production; language physiology and pathology; problems of representation; sequencing, and timing in language and other cognitive skills; errors in speech production and perception.

124A. Current Topics in Human Information Processing. Lecture, two hours; discussion, one hour. Prerequisites: consent of instructor. Advanced consideration of special topics in human information processing. May be repeated for credit with consent of instructor.

124B. Current Topics in Psycholinguistics. Lecture, one hour; discussion, two hours. Prerequisites: course 123 or consent of instructor. Advanced consideration of special topics in the psychology of language. May be repeated for credit with consent of instructor.

125. Personality. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. A survey of the major topics in the field of personality, including personality theory, personality assessment, and the physiological, behavioral, and cultural role of perception, learning, and motivation in personality.

126. Personality Laboratory: Emotions (Honors). Discussion, three hours; laboratory, three hours. Prerequisites: courses 10, 41, 42, psychology major standing. Laboratory experience with various topics in personality.

127. Abnormal Psychology. Lecture, three hours. Prerequisite: course 10. Study of the dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychosomatic reactions, and other abnormal personality patterns.

128. Behavioral Medicine. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, junior or senior standing. Psychophysiological (psychosomatic) disorders approached via a biopsychosocial model of disease, with emphasis on the interrelationships between the biological, psychological, social, and environmental factors. Major focus on behavioral assessment and treatment approaches (e.g., modifying Type A behavior, treatment of anorexia and enuresis).

129A. Personality Measurement. Prerequisite: course 125. The rationale, methods, and context of studies dealing with the problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions.

129B. Personality Dynamics. Prerequisite: course 125. Detailed conceptual examination of one or two areas of personality in which the main and interactive effects of personality variables (observed and unobserved) have been investigated. Personality as related to the study of psychological processes, particularly motivation. Examination of current research literature.

129C. Personality and Cognition. Prerequisite: course 125. Theoretical and experimental analyses of cognitive processes such as imagery, attention, language, and memory and their implication for theories of personality.

129D. Special Topics in Personality. Prerequisite: course 125. Study of selected topics in the psychology of personality. Topics vary with the interests of instructor and class. May be repeated for credit with consent of instructor.

129E. Human Sexuality. Lecture, three hours. Prerequisites: consent of instructor. An overview of the psychology of human sexuality. Psychological research, assessment, and therapy described in a formal which highlights their significance for improving human sexual functioning. The psychological mechanisms underlying the expression of human sexuality.

130. Developmental Psychology. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, 42, psychology major standing. An examination of current issues in developmental psychology. Specific topics vary depending on the interests of the class and instructor. May be repeated with consent of instructor.

131. Psychology and Education. Lecture, three hours. Prerequisites: courses 10, 130. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and education of the disadvantaged.

132. Learning Disabilities in Perspective. (Formerly numbered 132A.) Lecture, three hours. Prerequisite: upper division standing. Exploration of different orientations to persons with learning problems, emphasizing assessment and intervention approaches and the psychological impact of such approaches. Topics include the interaction of learner and environment, the sociopolitical nature of the classroom, the psychological impact of schooling, grades, and evaluations, process vs. goal focus in learning.

133A. Adolescent Development. Lecture, three hours. Prerequisite: course 130. An examination of the cognitive, social, physical, and physiological development of the adolescent.

133B. Exceptional Children. (Same as Psychiatry M133.) Prerequisite: course 130. Study of the issues and research problems in the areas of mental retardation, giftedness, learning disorders, emotional disorders, and childhood psychosis.

133C. Psychological Development in the Adult Years. Prerequisite: course 130 or consent of instructor. Theory and research on changes in motivation, abilities, and attitudes as related to genetics, age, sex, and sociocultural variables.

133D. Social and Personality Psychology. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, 130. An advanced course that surveys theory and research on social and personality development during childhood. Topics include parent-child attachment, temperament, self-control, aggression, sex-typing, sexuality, moral reasoning and behavior, social status and social skills, and peer group relations.

133E. Current Issues in Developmental Psychology. Prerequisites: course 130, upper division psychology standing. A critical examination of current issues in developmental psychology. Specific topics vary depending on the interests of the class and instructor. May be repeated with consent of instructor.

134. Psychology and Education. Lecture, three hours. Prerequisites: courses 10, 130. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and education of the disadvantaged.

135. Social Psychology. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Theories of social psychology focusing on individual and his social environment. Social influences on motivation, perception, and behavior. The development and change of attitudes and opinions. Psychological analysis of small groups, social stratification, and mass phenomena.

136A. Social Psychology Laboratory. Lecture, two hours; laboratory, two hours. Prerequisites: courses 41, 42, 135 (may be taken concurrently). Psychology major standing. Laboratory experience with such topics as small group behavior, attitude measurement, and interpersonal influence.

136B. Survey Methods in Psychology. (Formerly numbered C136B.) Lecture, two hours; laboratory, two hours. Prerequisites: courses 41, 42, psychology major standing. The nature of attitudes and opinions and their measurement by means of attitude scales and public opinion surveys. Class projects and fieldwork.

137A. Group Behavior. Lecture, three hours. Prerequisites: courses 10, 41, 135. Psychology of interdependence, group membership, leadership, and social influence.

137A. Group Behavior (Honors). Lecture, three hours. Prerequisite: consent of instructor. A critical examination of theory to interdependence and its application to small groups and interpersonal relationships; principles of exchange, structures of relationships, attribution of attitudes, and recurrent patterns of interaction.
137B. Attitude Formation and Change. Lecture, three hours. Prerequisites: courses 10, 41, 135. Effects of propaganda, personal influence, socialization, and social structure on private attitudes and public opinion.

137C. Interpersonal Relations. Lecture, three hours. Prerequisites: courses 10, 41, 135, consent of instructor. A study of the psychological facts, principles, problems, and theories concerned with interactions and relationships between persons. Focus on such phenomena as interpersonal attraction, exchange, aggression, conflict, control, power relations, and the initiation, development, and dissolution of relationships.

137D. Introduction to Health Psychology. Prerequisite: course 10. The areas of health, illness, treatment, and delivery of treatment that can be elucidated by an understanding of psychological concepts and research, the psychological perspective on these problems, and how the psychological perspective might be enlarged and extended in the medical area.

M137E. Work Behavior of Women and Men. (Same as Women's Studies M137E.) Prerequisite: course 10 or Women's Studies 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job finding, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

137F. Special Topics in Social Psychology. Prerequisite: course 135. Study of selected topics in social psychology. May be repeated for credit with consent of instructor.

M138. Political Psychology. (Same as Political Science M140.) Prerequisite: course 10. Examination of political behavior, political socialization, personality and politics, racial conflict, and the psychological analysis of public opinion on these issues.

139. Psychology of Social Issues. Prerequisite: course 10. An analysis of the contribution of current psychological theory and research to the understanding of selected historical, social, and political problems.

M142. Advanced Statistical Methods in Psychology. (Same as Psychiatry M142.) Lecture, two hours; discussion, two hours. Prerequisite: course 41. Chi square, special correlation methods, multiple regression, nonparametric methods, analysis of variance, reliability and validity.

143. Foundations of Psychological Investigation. Prerequisites: courses 41, 42, psychology major standing. Outline and examination of concepts associated with psychological investigation and the interpretation of results. Readings, discussions, and reports; individual and class projects.

144. Psychological Tests and Evaluation. Prerequisite: course 41. Further study of the principles of measurement, stressing basic concepts. Application to problems of test construction, administration, and interpretation.

148. Industrial and Organizational Psychology. Lecture, three hours. Prerequisite: course 10. Introduction to the applications of psychology in industrial and other organizations.

150. Mathematical Models in Psychology. Lecture, two hours; discussion, two hours. Prerequisites: Mathematics 3C or 31B, Computer Science 10C or 10F, or consent of instructor. Review of theoretical models and the experimental evidence for these models in various areas of psychology. Topics include mathematical computer models of learning, perception, cognition, and personality.

151. Computer Applications in Psychology. Lecture, two hours; discussion, two hours. Prerequisites: Computer Science 10C or 10F, consent of instructor. Topics include the use of computers to develop and solve problems in the design, control, and analysis of experiments; programming problems arising in the evaluation of models of psychological processes of the various content areas such as learning, perception, social, personality, and clinical.

M153. Principles of Biotechnology. (Same as Materials Science and Engineering M107A.) Prerequisite: upper division standing. The principles of biological and environmental processes in an engineering context. Emphasis on the psychological, sociological, and sociocultural factors affecting the integration of man into environmental, informational, and management systems through engineering design.

162. The Personological System of Henry A. Murray: An Undergraduate Seminar. Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. An analysis of the contribution of current psychological theories and their implications for understanding and solution of community problems, and of the role of the brain in learning and performance of skills and the utilization of Oriental philosophies and the martial arts in Western sport.

170A. Behavior Modification. Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Applied behavior theory; a study of the application of principles derived from learning theory, as in classical and instrumental (operant) conditioning, to the treatment of developmentally disabled, autistic, and schizophrenic children, adult schizophrenia, affecive disorders, alcoholism, drug abuse, behavioral disorders, etc. Lectures, discussions, and demonstrations.

170B. Fieldwork in Behavior Modification. Discussion, two hours; fieldwork, six hours. Prerequisite: course 110 with a grade of A or 170A, consent of instructor. Fieldwork in applied behavior theory, especially to problems of retarded and autistic children.

171A. Advanced Fieldwork in Behavior Modification for Psychology Majors. Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 170B, psychology major standing, consent of instructor. Advanced fieldwork in applied behavior theory, especially to problems of retarded and autistic children. Students design and carry out individualized experimental study to evaluate behavioral interventions with developmentally disabled clients.

171B. Practicum: Design and Implementation of Behavioral Interventions. (Formerly numbered 170C) Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 171A, consent of instructor. Design and implementation of behavioral interventions with developmentally disabled children. Topics include goal selection, ethical considerations, behavioral contracting, client right and human use procedures, home and community management, parent and staff training, working with schools, clinical issues.

M172. The Afro-American Woman in the U.S. (Same as Afro-American Studies M172 and Women's Studies M172.) Prerequisite: upper division standing. The impact of the social, psychological, political, and economic forces which impact on the interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

174. Interpersonal Process Analysis. Discussion, two hours; laboratory, three hours. Prerequisites: courses 41, 127, psychology major standing. Introduction to the conceptual tools for analyzing interpersonal structures and functions in goal-oriented human interaction such as psychotherapy, persuasion, courtship, etc. Small group exercises integrated with lecture and discussion (additional laboratory work to be arranged).

175. Community Psychology. Prerequisites: junior or senior psychology major standing, consent of instructor. The application of psychological principles to the understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation of prisoners.

176. Experimental Community Psychology. Lecture, three hours. Prerequisites: courses 42, 127, 175, psychology major standing, consent of instructor. Examination and experimental application of concepts and theories of community psychology for understanding the behavior of individuals in structured social systems (communities, schools, mental hospitals, prisons, etc.).

177. Counseling Relationships. Prerequisites: courses 10, 41, 127, junior or senior standing, and consent of instructor, or junior or senior psychology major standing. Conceptual and empirical foundations of psychological counseling; comparison of alternative models of counseling processes. Emphasis on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention.

178. Human Motivation. Prerequisite: upper division standing. Theories of human motivation, the experimental findings supporting the theories, and their applied value. Emphasis on motivation in the classroom, particularly the effects of success and failure on performance. Other topics include stress, conflict, frustration, and perceptions of control.

179. Health Promotion in Minority Populations. Lecture, three hours. Prerequisite: course 10 or consent of instructor. Theoretical models and the empirical evidence for these models in various areas of psychology. Topics include mathematical computer models of learning, perception, cognition, and personality.
M180A. Contemporary Problems in Mental Retardation. (Same as Psychiatry M180A.) Prerequisites: courses 10, 41, 42, 120, or consent of instructors. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of the concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning the causes and treatment of developmental disabilities, as well as systems for the care and training of retarded individuals. Lectures, discussions, and laboratory. 180A. Research experience in Progress grading.

M180B. Contemporary Issues in Mental Retardation. (Same as Psychiatry M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating to ongoing field experiences through lectures, discussions, media, and six student papers.

M182A. Advanced Statistical Methods in Mental Retardation. (Same as Psychiatry M182A.) Prerequisite: course M181B. Advanced statistical methods and design in experimentation principles of statistical inference and appropriate testing methods. Introduction to the use of computers and various software packages.

M182B. Survey of Biopsychosocial Rehabilitation and Statistics. (Same as Psychiatry M182B.) Prerequisites: courses M181A, M182A. Continuation of course M182A.

M182C. Perception. (Same as Psychiatry M182C.) Limited to Immersion Program students. Human in- formation processing, both physical and psychological, with special emphasis on pathologies in the mentally retarded.

M182D. Current Issues in Mental Retardation. (Same as Psychiatry M182D.) Limited to Immersion Program students. Advanced topics in mental retardation. May be repeated for credit with consent of instructor.

M183. Introduction to Neuroscience. (Same as Psychiatry M183.) Limited to Immersion Program students. Gross anatomy of the human brain and spinal cord.

M184. Human Genetics. (Same as Psychiatry M184.) Lecture, two hours; discussion, two hours. Limited to Immersion Program students. Application of general principles in human genetics, with special emphasis on cytogenetics, biochemical and population genetics, and family studies. Lectures and readings on the methodologies appropriate to answer current questions in the fields of medical and human genetics.

Mr. Fluharty

185. Cognitive Science. Lecture, three hours. Prerequisites: courses 10, 41, 42, and 120, or consent of instructor. Survey of theories and methods in the study of cognition. Topics include perception, attention, mental imagery, representation, elaboration and reconstruction of information in memory: schemata and prototypes; cognitive skills, problem solving and reasoning; comprehension, construction, and transformation of natural language; neuropsychology and models of brain function; artificial intelligence, knowledge representation, programming, and thinking.

186. Cognitive Science Laboratory. Lecture, one hour; laboratory, three hours. Prerequisites: courses 10, 41, 42, 120, 185 (may be taken concurrently). Individual and group computer-based projects: information processing methods and analyses; experimental tests of cognitive theories and models; simulation of cognitive processes.

187. Legalistic Psychology. Discussion, two hours; seminar, one hour. Prerequisite: junior standing. A study of new topics on legal psychology, including suspect interrogation; police procedures. Outside speakers utilized in the presentation of these materials. Students participate in presentations and/or discussions.

187H. Legalistic Psychology (Honors). Discussion, two hours; seminar, one hour. Prerequisite: junior standing. An honors course parallel to course 187.

188. Fieldwork in Cognitive Science. Lecture, two hours; fieldwork, six hours. Prerequisites: cognitive science major standing, department consent. Fieldwork (approved community setting) or research (approved community setting) in applications of cognitive science. Consult the Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units of course 188 may be substituted for 186 if content is approved in advance by the Undergraduate Office. P/NP grading.

189. Human Factors. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 110, sophomore standing. The principal objective of human factors psychology is the optimization of human-machine productivity and efficiency while ensuring human safety. Research from engineering, computer science, and psychology combined for the design of systems for human use. Contemporary applications include health care, safety systems, pollution control, transportation, and urban design.

190A-190B. Honors Course in Seminars. Seminar, two hours. Prerequisite: Prerequisite for honors program program standing. Opportunity for the development and analysis of creative ideas through conceptual or experiential research and discussion of student and faculty research presentation and applications may be obtained from the Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by the Undergraduate Office, four units of course 190 may be applied toward the elective course requirement for the psychology, psychobiology, and cognitive science majors.

192. Practicum in the Teaching of Psychology. Prerequisites: upper division psychology major, department consent. Training and supervised practical experience for advanced undergraduates in the teaching of psychology. Students serve as junior teaching assistants and assist in the preparation of materials and the development of innovative programs. Consult the Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward the undergraduate degree. May not be applied toward course requirements for any of the psychology majors. P/NP grading.

193. Fieldwork in Psychology. Seminar, two hours; fieldwork (approved community setting), six hours. Prerequisites: psychology major standing, department consent. Fieldwork in applications of psychology. Consult the Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward the undergraduate degree. May not be applied toward course requirements for any of the psychology majors. P/NP grading.

194. Research in Psychology. Seminar, one hour; internship (approved research setting), seven hours. Prerequisites: sophomore pre-psychology or psychology major standing, department consent. Practicum experience through research. Consult the Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward the undergraduate degree. May not be applied toward course requirements for any of the psychology majors. P/NP grading.

195. Current Issues in Psychology. Lecture, three hours. Prerequisite: junior or senior psychology major standing, department consent (juniors must have at least a 3.0 GPA in the major), consent of instructor and vice chair for Undergraduate Affairs (based on a written proposal outlining the course of study). Consult the Undergraduate Advising Office, 1531 Franz Hall, for further information and approval forms. Only one four-unit 195 course may be taken per quarter and only one for a letter grade (additional 195 may be taken on a P/NP basis). If approved in advance by the Undergraduate Office, four units of course 195 may be applied toward the elective course requirement for the psychology major and toward the Psychology 188 requirement for the cognitive science major.

Graduate Courses

200A. Animal Learning and Behavior. Basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning, and species-specific behavior.

208. Human Learning and Behavior. Topics include learning and conditioning principles, the psychology of learning, and the etiology and treatment of a variety of socially significant problems. Special emphasis on systematic desensitization of anxiety states, behavior modification programs for schizophrenia children and adults, behavioral pharmacology, control of autonomic behavior, among others.

204A-204B. Seminar on Critical Problems in Learning. Each course may be taken independently and in any order. Critical problems from the following: 204A. Psychophysiology of Attention and Learning. The study of research and theories concerned with the psychophysiology of attention and learning primarily in humans. Concepts and areas include the orienting reflex, dominant focus, classical conditioning, and their implications for the psychophysiology of psychopathology and psychotherapy.

Mr. Matzman

204B. Theories of Learning. Prerequisite: course 200A or equivalent. Critical discussion of the major theories in learning and their current status.

204C. Applied Learning. Lecture, three hours. Prerequisites: graduate standing in psychology, consent of instructor. Lectures and discussion on current research in applications of learning principles to clinical, social, and personal problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc.

205A-205B. Physiological Correlates of Behavior. Lecture, three hours. The physiological substrate of behavior and the neural and endocrine mechanisms which underlie psychological phenomena and behavior. New concepts of structural and functional organization in the nervous system and the ways these relate to behavioral and neurological dysfunction.

206. Psychophysiology of Brain Function. Modern concepts of the functional organization of the brain, with particular reference to psychological phenomena and behavior. Recent advances in neurophysiology and electroencephalographic bearing on perception, attention, drive, sleep-wakefulness, levels of consciousness, etc. Some emphasis on pathology of behavior resulting from brain injury.

Mr. Beaty

207A-207B-207C. Seminar in Physiological Psychology. Prerequisite: course 115 or equivalent.

Mr. Butler, Mr. Ellison, Mr. Krasne

208. Seminar in Comparative Psychology. Prerequisite: consent of instructor. Mr. Arnold

210. Comparative Psychology. Prerequisites: course 115 or equivalent, consent of instructor. A survey of the determinants of species-specific behavior, including genetic influences and learning.

Mr. Arnold
21. Seminar in Attitude Formation and Change. Discussion, three hours. Prerequisites: courses 220A-220B or consent of instructor. Social psychological research and theories on attitudes. Effects of mass communication, social factors, and individual differences in response to the same environment. Topics include sources and consequences of attitude change and the role of social influence. May be repeated for credit. S/U grading.

22A. Seminar in Interpersonal Relations. Discussion, three hours. Prerequisites: courses 220A-220B or consent of instructor. Theory and evidence on interpersonal communication, with intensive study of the theory of interdependence (interdependence, power, conflict, dispositions, and interpersonal processes). Mr. Gerard

22B. Interpersonal Influence, Social Power, and Health. Lecture, two hours; discussion, two hours. Prerequisites: courses 220A-220B or consent of instructor. A review of research on interpersonal influence and social power, with particular application to health issues such as the doctor/patient, doctor/nurse, and counselor/client relationships. Supervisor/worker, parent/child, wife/husband, and teacher/student applications also considered. Mr. Kelley, Mr. Raven

23A. Survey Research in Psychology. (Formerly numbered C223A.) Lecture, three hours. A critical review of the theory and practice of large-scale sampling, measurement, and analysis of beliefs, attitudes, and other psychological variables. Mr. Shure

23B. Social Survey Research Seminar. Seminar, three hours. Designed to provide a statistical analysis of survey data.

24. Experimental Methods in Social Psychology. Lecture, three hours. Prerequisites: courses 220A-220B or consent of instructor. A critical review of laboratory techniques and problems of experimental control and measurement encountered in research on social psychological phenomena. Mr. Collins

25. Seminar: Critical Problems in Social Psychology. Discussion, three hours. Prerequisites: courses 220A-220B or consent of instructor. May be repeated for credit with consent of instructor.

26. Current Literature in Social Psychology (2 units). Recent and current research papers in social psychology presented by members of the seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

27. Health Psychology. Lecture, two hours; discussion, one hour. Prerequisite: undergraduate degree or training in psychology. The psychological and social factors involved in the etiology of illness, the treatment and course of illness, the long-term care and adjustment of the chronically ill or disabled, and the practice of institutional health care and self-care. Ms. Taylor

28. Political Psychology. (Same as Political Science M224C.) Discussion, three hours. Prerequisites: courses 220A or Political Science 214A. Examination of political behavior, political participation, personal and political change, socialization and identification, social norms, and public policy. Mr. Sears

29. Social Cognition. Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social stimuli and respond to them. It is fundamental to understanding both the normal and deviant functioning of individuals and groups. Mr. Greenfield, Ms. Peplau

30. Human Sexuality. Lecture, three hours. Prerequisite: graduate standing. Designed to teach students how to carry out research on human sexual functioning. Includes content on research design, scale development, physiological and endocrinological implications, sexual arousal, fantasy, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning human sexual functioning. Mr. Abramson

31. Seminar in Environmental Psychology. Prerequisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify generic dimensions for the analysis of man-environment relationships. Use of human emotional responses to environments as intervening variables linking specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to the emotional response dimensions used to explain within-individual differences in response to the same environment over time or between-individual differences to the same situation. Review of literature relating information rate from environments to arousal and preferences for those environments. Mr. Mehrabian

32. Social Psychological Aspects of Competitive Youth Sport. (Same as Kinesiology M237.) Prerequisite: Kinesiology 120 or consent of instructor. Review of research concerning the social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influence and interaction, predictors of performance, determination of participation, and dropping out and socialization through sport. Mr. Scanlan

33. Personality. A survey of cognitive, analytic, and learning theory approaches to the study of personality. Emphasis on the intensive exploration of selected concepts and related research. Mr. Taylor

34. Seminar in Mental Measurements. Mr. Woodward

35. Personality, Motivation, and Attribution. (Same as Education M215.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliation contexts. Mr. Adelman

36. Developmental Psychology. (Formerly numbered 240.) Lecture, three hours. Prerequisites: one undergraduate course in developmental psychology, graduate standing. Consideration of variables influencing the nature and emotional development of the human organism from conception through adolescence. Emphasis on research methodology and the research base for current theories of development.

37. Seminar in Developmental Psychology. Seminar, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Each course may be taken independently and may be repeated for credit. Mr. Woodward

38. Cognitive Development. Ms. Greenfield, Mr. Jeffery

39. Socialization. Mr. Adelman

40. Development of Language and Communication. Mr. Callovilla

41. Seminar in Practical and Societal Issues in Developmental Psychology. Lecture, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Current problems: content varies depending on the interest of the class and instructor. May be repeated for credit with consent of instructor.

42. Personality Development and Education. (Same as Education M217.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of the status of emotional behavior in personality theory and research. Mr. Feshbach

43. Psychological Aspects of Mental Retardation. (Same as Psychiatry M246.) Prerequisite: consent of instructor. Discussion of the psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (e.g., law, religion, welfare systems). Mr. Tymchuk (F)

44. Theory and Methods of Computing in the Behavioral Sciences: Acquisitions and analysis of data, on-line analysis of behavior, and control of experiments in the diverse content areas of psychology (e.g., perception, social, clinical, personality, and physiological). Mr. Carterette

45. Experimental Design in Human Performance Research. Prerequisites: courses 270A, 270B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings. Mr. Woodward
250A. Advanced Psychological Statistics. Review of fundamental concepts. Basic statistical techniques as applied to the design and interpretation of experimental and observational research.

250B. Advanced Psychological Statistics. Advanced experimental design and planning of investigations.

Mr. Wikens, Mr. Woodward

251A-251B-251C. Research Methods. Limited to psychology graduate students. Students design and conduct original research projects under the supervision of the instructor in charge. It is anticipated that many students will complete their project in two quarters (normally three quarters allowed). S/U grading (corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C).

Mr. Wikens, Mr. Woodward

252. Multivariate Analysis: Prerequisites: courses 250A, 250B. Introduction to the analysis of data having multiple dependent measures. Topics include multivariate distributions, principal components analysis, multiple regression, canonical correlation, discriminant analysis, and the multivariate analysis of variance. Example applications from a variety of psychological areas of research, including clinical, cognitive, physiological, and social. Computer implementation includes APL and standard statistical packages.

Mr. Woodward

Mr. Comrey

Mr. Holman

Mr. Woodward

256. Seminar on Critical Problems in Psychological Measurement. Critical examination of issues in the major approaches to psychological measurement; relation in psychological methods and data to a general theory of measurement.

Mr. Mount

257. Multivariate Analysis with Latent Variables. (Formerly numbered 257.) (Same as Political Science M247.) Prerequisite: consent of instructor. Introduction to models and methods for the analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via the analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factory analytic models. Structure equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

Mr. Bentler

258. Special Problems in Psychological Statistics. Prerequisites: courses 250A and 250B, or consent of instructor. Special problems in psychological statistics and data analysis.

Mr. Wikens

259. Quantitative Methods in Cognitive Psychology. Prerequisites: courses 250A and 250B, or consent of instructor. A number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc.

Mr. Wikens

260A-260B-260C. Proseminar in Cognitive Psychology (1 unit each). (Formerly numbered 260A-260B.) Presentation of research topics by students, faculty, and visiting scholars. May be repeated for credit. S/U grading.

261. Perception. Lecture, three hours. Prerequisite: consent of instructor. Concepts, theories, and research in the study of perception. Considers the questions: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? How do these systems process information?

Mr. Thomas

262. Human Learning and Memory. Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in the analysis of memory; verbal and nonverbal learning and memory processes, the structure and organization of short- and long-term memory.

Mr. Bjork

263. Psycholinguistics. Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in psycholinguistics: coding and decoding, psycholinguistic parameters of language learning, speech recognition and perception.

Mr. French, Mr. MacKay

264. Judgment and Decision Processes. Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in judgment and decision processes: psychophysical scaling, contextual effects, evaluative scales, models for the analysis of value decisions.

Mr. Parducci

265. Thinking. Lecture, three hours. Contemporary theory and research in thinking, problem solving, inference, semantic memory, internal representation of knowledge, and metacognition.

Mr. Richards, Mr. Wickens

266A-266E. Seminar in Human Information Processing. Seminar, three hours. Prerequisite: consent of instructor. Major issues in cognitive science. The representation of cognitive structures and higher-level processes. Specific areas include perception, learning and memory, problem solving, and reasoning. Relationships to artificial intelligence.

Mr. Richards, Mr. Wickens

Mr. Richards, Mr. Wickens

268A-268E. Seminar in Human Information Processing. Seminar, three hours. Prerequisite: consent of instructor. Topics vary with the interests of the instructor. Each course may be taken independently and may be repeated for credit.

268A. Perception.

Mr. Thomas

268B. Human Learning and Memory.

Mr. Bjork

268C. Judgment and Decision Processes.

Mr. Parducci

268D. Language and Thought.

Mr. MacKay

268E. Human Performance.

Mr. Beatty, Mr. Carterette

269. Seminar in Cognitive Psychology. Seminar, three hours. Prerequisite: consent of instructor. A discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.

270A-270B-270C. Foundations of Clinical Psychology. (Corequisites: courses 271A-271B-271C.) Limited to graduate students in clinical psychology. Analysis of phenomenological, theoretical, and research issues regarding the etiology and mediating mechanisms in neurotic, affective, schizophrenic spectrum, and other personality disturbances.

270B. Principles and methods of psychological assessment and evaluation.

270C. Principles and methods of psychological intervention in individuals, families, and community settings.

Mr. Adelman

271D. Clinical Research Laboratory (2 units). Discussion, one hour; laboratory, one hour. Corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C. Limited to graduate students in clinical psychology. Minimum interest and involvement in research and involvement in their course 251 re- search at an early stage to insure completion. S/U grading.

Mr. Christensen

272A-272G. Advanced Clinical Psychological Methods. (Formerly numbered 272A-272F.) Seminar, three hours. Prerequisite or corequisite: course 401 or 451. Each course may be taken independently for credit.

272A. Behavior Modification with Children. Prerequisites: courses 271A-271B-271C or consent of instructor. A course in the series of clinical intervention and assessment offerings for second- and third-year clinical students that covers behavior modification research and practice in clinic, school, institution, and home settings.

Mr. Baker

272B. Psychotherapy with Adults.

272C. Clinical Interventions for Psychological Problems of Children.

272D. Family Therapy and Family Dynamics.

272E. Special Problems.

272F. Behavior Modification with Adults. Prerequisites: second-year graduate standing in clinical psychology. Current cognitive behavioral modification principles and techniques. Major conceptual issues; specific techniques demonstrated and practiced by students. A range of adult problems such as depression, stress and anxiety, anger management, assertion problems.

Ms. Hammen, Ms. Mays

272G. Marital Therapies. Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 271A-271B-271C-271Ex. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social-learning, psychodynamic, and systems theories, with relevant research findings.

Mr. Christensen

273. Interpersonal Communication Seminar. Prerequisite: course 282 or consent of instructor. Development of a design for studying help-oriented interchange in community and clinical settings. Initial focus on measuring interpersonal deficit, response styles, and training effects.

Mr. Goodman

274A-274B. Group Therapy Dynamics.

275. Family Process: Psychological and Social Perspectives. (Same as Social Welfare M275.) Various theoretical perspectives applicable to the analysis of family structure and dynamics. Critical issues in the application of family constructs to clinical problems.

Mr. Cohen, Mr. Goldstein

276. Clinical Approaches to Children with Learning and Related Behavior Problems. Lecture, three hours; discussion, one hour. Prerequisite: doctoral standing. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Practicum experiences to illustrate course content and provide opportunities to improve research and clinical competence.

Mr. Adelman

277A-277B. Advanced Clinical Assessment. (Formerly numbered 277.) Laboratory, two hours; additional hours to be arranged through the Psychology Clinic. Prerequisites: students with faculty research interests and involvement in their course 251 research at an early stage to insure completion.

Mr. Feshbach

278. Seminar on Research in Psychopathology.

Mr. Feshbach
294 / Psychology / COLLEGE OF LETTERS AND SCIENCE

M280A-M280B. Affective Disorders (2 or 4 units each). (Same as Psychiatry M234A-M234B.) Lecture, one hour; laboratory, one hour. Prerequisites: graduate standing, consent of instructor. General theories related to the primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper. Ms. Gittlin, Ms. Hammen

281. Seminar in Behavior Therapy. Mr. Lovass

282. Interpersonal Forms Analysis of Human Interaction Structures. Conceptual and experimental study of response modalities common to psychotherapy and everyday interaction: questions, silences, advice, interpretation, self-disclosure, and reflection. Laboratory work performed in conjunction with lecture and seminar sections. Mr. Goodman

283. Psychopathology. A survey of the dominant psychological attributes of particular forms of psychopathology, including an analysis of the status of various theories concerned with the etiology and mediating mechanisms of personality, neurotic, schizophrenic spectrum, and affective disturbances.

284. Seminar in Clinical Psychology and Communication. Mr. Broen

286. Critical Problems in Clinical Research Methodology. Prerequisites: courses 250A, 250B. Special problems of measurement and design in clinical research. Mr. Christensen

287. Seminar in Clinical Research Methodology. Mr. Broen

288. Seminar on Research in Personality (1 unit). Prerequisite: graduate standing in personality. Required of all students majoring in personality. Current research, theory, and professional issues within the area of personality. A broad-scope format utilized to foster intellectual exchange and discussion. Students make at least one presentation per quarter and participate in discussions with faculty and guest lecturers.

290. History of Psychology. Philosophical and historical context of contemporary psychology. Major trends from the 19th century to contemporary issues. Mr. Maltzman

291. Principles of Behavioral Pharmacology. Prerequisite: consent of instructor. Intensive analysis of drug, brain, and behavior relationships. Discussion of the nature and source of drugs, general aspects of pharmacology, neurotransmitters and basic neuropharmacology, principles of behavioral pharmacology, categories of psychopharmacological agents, and pharmacological approaches to the study of drug addiction, schizophrenia, and other behavioral processes, both normal and pathological. Mr. Butcher

292. Biobehavioral Mechanisms of Stress and Disease. Lecture, three hours. Prerequisite: graduate standing in psychology or consent of instructor. The behavior-physiology interactions of some major bodily systems: the nervous, cardiovascular, gastrointestinal, and endocrine systems. Usual and altered states of these systems (e.g., stress) as these can promote permanent tissue injuries, disease, or impaired bodily function, health enhancement.

Mr. Castro, Mr. Grijalva, Ms. Morell

293. Behavioral and Psychophysiological Problems of Alcoholism. Prerequisite: consent of instructor. Behavioral and psychophysiological characteristics of alcoholism, along with theories concerning their etiology and treatment. Experimental approaches. Mr. Maltzman

M294A-M294D. Seminars in Neural and Behavioral Endocrinology (3 units, 2 units, 3 units, 2 units). (Same as Anatomy M255A-M255B.) Lecture, three hours. Topics include hormonal biochemistry and pharmacology, endocrine-hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Agin of reproductive behaviors and function. Mr. Arnold (W, M294A, M294C; Sp, M294B, M294D)

M295. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M236Q, Education M222A, and Psychiatry M235.) Prerequisite: consent of instructor. The skills of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some of the uses of observations and their implications for research in the social sciences. Students expected to integrate observational work into their current research interests.

M296. Neurobiology of Sleep (3 units). (Same as Neuroscience M217.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning the neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena.

297. Issues in the Social Development of the Minority Child. (Formerly numbered 229A.) Seminar, three hours. Prerequisites: graduate standing, consent of instructor. A critical evaluation and integration of existing research on the social psychological development of the minority child. Emphasis on the socialization of cognitive and personality style, with the goal of empirically clarifying the issues raised in this area of developmental study.

298. Special Problems in Psychology. Content depends on the interests of the particular instructor. May be repeated for credit.

299. Developmental Methodology. Coverage of both theory and methods in measuring age-related changes in behavior. Experimental designs and data-analytic solutions to problems in the measurement of change. Some experience in analysis of actual data sets.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

401. Fieldwork in Clinical Psychology (4 or 8 units). Prerequisites: courses 271A-271B-271C. Students on practicum assignments are required to register for this course each quarter (except by consent of clinical program coordinator).

402. Fieldwork in Speech Pathology (4 or 8 units). Prerequisite: consent of instructor. Practical work in hospitals and clinics in diagnostic testing and psychotherapy with speech disorders.

410A-410B-410C. Clinical Teaching and Supervision. Prerequisites: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively undertaken, consent of instructor and clinic steering committee. Study and practice of the knowledge, concepts, and theories on teaching and supervision of applied clinical psychology.

Ms. Jacobs, Mr. Nakamura

420A-420B. Health Psychology Practicum (2 units each). Prerequisite: graduate standing. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by an understanding of psychological concepts and research; the psychological perspective on these problems; how the psychological perspective might be enlarged and extended in the medical area. Through a practical field placement, students apply the knowledge acquired in class to research observation and/or clinical work in the field.

Ms. Taylor

423. Social Survey Research Practicum. Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview surveys.

425. Health Psychology Lecture Series (2 units). Clinicians and researchers in health psychology from the Los Angeles area present their research, programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading.

451. Internship in Clinical Psychology (6 to 12 units). Prerequisite: course 401. Limited to students who have successfully completed departmental qualifying examinations. May be repeated for credit. S/U grading.

454. Internship in Industrial Psychology (2 to 4 units).

490. Scientific Writing for Psychologists (2 units). Lecture, two hours; laboratory, two hours. Prerequisite: consent of instructor. Gives graduate students the opportunity to improve their effectiveness in writing scientific papers for publication and proposals for dissertations or grants. May not be applied toward graduate degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

566. Directed Individual Research and Study in Psychology (2 to 12 units). One 596 course is required during the second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.)

597. Individual Studies (2 to 12 units). Intended primarily as preparation for Ph.D. qualifying examinations. May be required by some area committees as a prerequisite for taking the examinations.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations.

S. Scott Barchty, Ph.D. (History)

Scope and Objectives
The UCLA major in the study of religion has a twofold purpose. In the first place it is designed to give students a broad humanistic perspective. It introduces students to several religious traditions and thus to an appreciation of the very nucleus of civilization in various periods of history and various parts of the world, as well as to an understanding of fundamental human orientations. In the second place, the program asks the student to select one particular religious tradition for study in greater depth. Cohesion and integrity in the program are furthered by courses dealing with philosophical problems in religion and with general anthropological reflections.

Bachelor of Arts Degree

Preparation for the Major

Required: History 4; Philosophy 2; two courses from Anthropology 22, East Asian Languages and Cultures 41, History 1A, 1B, 1C, 9A, 9C, 9D, 10A, 10B, 11A, 11B.

The Major

Required: A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed).

No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 197) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to your course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Honors Program

The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. If you are admitted to honors, you should take three 199 courses under the guidance of the sponsoring professor. These courses are taken in the senior year and count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.

In order to qualify for admission, you should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor Daniel W. Howe at the program address.

Upper Division Course

100. Undergraduate Seminar in the Study of Religion. Prerequisite consent of instructor. Limited to 20 students. An interdisciplinary approach to some major topics in the study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor. Mr. Nagy

Study of Religion Upper Division Course List

Group I — Methods

Anthropology 133R. Aesthetic Anthropology 156. Comparative Religion
History 193A. History of Religions: Myth 193E. Special Topics in the History of Religions
Philosophy 175. Topics in Philosophy of Religion

Study of Religion 100. Undergraduate Seminar in the Study of Religion

Group II — Nonliterary and Ancient Religious Traditions

Ancient Near East (Near Eastern Languages) 130. Ancient Egyptian Religion
Anthropology 171. Civilization of Sub-Saharan Africa 174P. Ethnography of South American Indians
177. Cultures of the Pacific
Classics 166A. Greek Religion 166B. Roman Religion
168. Introduction to Comparative Mythology
Dance 181B. Dance in Southeast Asia
181D. Dance in South Asia
187A. Dance Cultures of Native American Indians
Folklore and Mythology M122. Celtic Mythology M123A. Finnish Folklore and Mythology
M126. Baltic and Slavic Folklore and Mythology
M128. Hungarian Folklore and Mythology M129. Folklore and Mythology of the Ugric Peoples
130. North American Indian Folklore and Mythology
131. Folklore of India
M155. Oral Traditions in Africa
History 193D. Religions of the Ancient Near East
Near Eastern Languages 170. Religion in Ancient Iran

Group III — Western and Near Eastern Religious Traditions

Christianity
Classics M170A. Byzantine Civilization
Greek (Classics) *130. Readings in the New Testament
History 119. The Christian Church, 100-1517
120. The Christian Religion, 100-1350
125B. History of Modern Europe: The Reformation
150C. History of Religion in the U.S.
194A. History of the Early Christians
194B. Religious Environment of the Early Christians
Philosophy 100B. Medieval and Early Modern Philosophy

*Courses so marked have readings in foreign languages. See departmental course listings for prerequisites.

Dominique L. Sportiche, Ph.D. (Linguistics)
Eric Wehrlé, Ph.D. (Linguistics)

Scope and Objectives
The Romance Linguistics and Literature Program emphasizes modern linguistic and literary theories in the study of Romance languages. Linguistic and literary theories can be pursued independently or jointly; however, the integration of linguistic and literary knowledge is taken to be one of the highest aims of this interdepartmental graduate program.

Master of Arts Degree
Admission
The UCLA Bachelor of Arts degree in French, Italian, Portuguese, or Spanish, or the equivalent, is required. Applicants are expected to have a grade-point average of at least 3.4 in upper division courses, especially in those judged germane to their proposed program. Three letters of recommendation and the General Test of the Graduate Record Examination (GRE) are also required and should be submitted to the Chair, Romance Linguistics and Literature Program, 359 Royce Hall, UCLA, Los Angeles, CA 90024-1535. Students admitted from elsewhere whose preparation is considered deficient in view of their intended specialization either in linguistics or in literature, must consult the program chair concerning the availability of teaching assistantships.

Teaching Experience
Teaching experience is not required but is desirable. Consult the chair regarding the availability of teaching assistantships.

Thesis Plan
The program favors the comprehensive examination plan but will approve M.A. theses for exceptionally well-qualified students under special circumstances. You may petition for authorization to write an M.A. thesis only after completion of six courses applicable toward the degree. It is your responsibility to select an appropriate topic and find a professor to direct the thesis. After completion of the thesis, you must pass a two-hour oral examination testing your knowledge of the field of the thesis and your general competence. Only those students who attain a high pass on the examination are encouraged to proceed to candidacy for the Ph.D. degree.

Comprehensive Examination Plan
The comprehensive examination is administered by three members of the guidance committee, appointed by the chair. The written examination, consisting of four four-hour examinations in the major field, one two-hour examination in the minor field, and one oral examination not to exceed one hour, is given each quarter two weeks prior to final examina-
tions. If you fail the examination or any part thereof, you may retake the failed portions once when the examination is next regularly offered. Only those students who attain a high pass grade on the master's examination are automatically eligible for the Ph.D. program.

**Ph.D. Degree**

**Admission**

The UCLA Master of Arts degree in Romance Linguistics and Literature or the UCLA M.A. in French, Italian, Portuguese, or Spanish, or the equivalent, is required. A strong academic record (normally a GPA of 3.4 or better), three letters of recommendation, and the Graduate Record Examination (GRE) General Test (normally with a combined verbal/quantitative score of 1,100 or better) are also required.

Formal application is required of all students. Entering students who have completed the UCLA M.A. in Romance Linguistics and Literature with a high pass grade are automatically eligible for admission to the Ph.D. program; those who received a middle pass are reviewed like candidates from other institutions; those who received a low pass grade are ineligible for admission. Students whose M.A. program registers deficiencies in scope or quality may be admitted but are required to complete three graduate courses (with grades of B or better) approved by the chair.

Following your formal admission, you select your guidance committee in consultation with the chair. You then meet as soon as possible with your committee to work out your program of courses and set a tentative date for the qualifying examinations. The guidance committee has final authority to prescribe the course of study. Until you have met with this committee and placed yourself under its direction, you are not officially in the Ph.D. program.

**Major Fields or Subdisciplines**

The program recognizes two fields of specialization: linguistics and literature.

**Linguistics:** Major fields include (1) the present-day grammar of the Romance language of your major interest and its relation to the grammar of its sister languages and to language in general, (2) the development of the Romance language of your major interest in relation to its sister languages (and possibly other interrelated cultural aspects) from the perspective of historical linguistics, and (3) the genetic and typological relationships of the Romance languages to other Indo-European languages and to language in general. The two minors may be other Romance languages, or one other Romance language plus a field of Romance literature.

**Literature:** Major fields include one of the following in the literatures of at least two Romance languages: (1) early Romance literature and philology; (2) Renaissance and baroque; (3) modern literature, preferably with emphasis in one century. The first minor may be one of the preceding fields not selected for the major. The second minor may be the same field or a new field in another Romance language, or some other related field in the major language or in Romance linguistics.

**Foreign Language Requirement**

In addition to the minimum of two Romance languages, Latin 3 or Italian 3 or the equivalent is required of all students in the program. Students selecting option 2 or 3 in linguistics or option 1 in literature must also take German, whereas those selecting option 1 in linguistics or option 2 or 3 in literature must take another foreign language to be determined by the guidance committee. In non-Romance languages, you must pass the Educational Testing Service (ETS) test. In languages where there is no such test, passing a departmental examination fulfills the requirement. This requirement may also be met by completing two years of college-level courses in the language with a grade of B or better or by fulfilling the foreign language requirement in connection with an M.A. obtained elsewhere. The foreign language requirement must be satisfied no later than the quarter before the qualifying examinations are taken.

**Course Requirements**

In each of the two specializations (linguistics or literature) the Ph.D. program consists of a major and two minors. These courses (a minimum program) are distributed as follows: major — five courses, first minor — three courses, second minor — two courses. At least one seminar is required in each of the three fields. In addition to those required for the master's degree (or equivalent) at least 10 other graduate courses (of which no more than two 596 courses may be applied), as well as such courses as the guidance committee may prescribe, are required. Linguistics 100 is required as a prerequisite of all students majoring in the linguistics field.

**Teaching Experience**

Teaching experience is not required but is desirable. Consult the chair regarding the availability of teaching assistantships.

**Qualifying Examinations**

The qualifying examinations, given by the doctoral committee during the Fall, Winter, and Spring Quarters, consist of (1) a three-hour written examination in the major field, (2) a two-hour examination in the first minor, (3) a one-hour examination in the second minor, and (4) a two-hour University Oral Qualifying Examination in the three fields, at which time your prospectus for the dissertation is also discussed and approved. Failed portions of the examination may be repeated once after any remedial preparation the committee may specify.

The dissertation may be on any subject within the general area of Romance linguistics and literature. If more than five calendar years elapse between advancement to candidacy and the presentation of the dissertation, the program may require revalidation of the qualifying examinations.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Graduate Courses**

211. Comparative Romance Syntax. Lecture, three hours. Prerequisite: French 204A or Portuguese 204A or Spanish 204A or consent of instructor. Comparative study of syntactic processes in Romance languages. Investigation of the parameters underlying linguistic variation. Mr. Otero, Mr. Quicoli

255. Topics in Romance Syntax (1 to 4 units). Prerequisite: consent of instructor. Topics in the syntax of Romance languages, with emphasis on recent developments in comparative studies; theoretical innovations based on Romance syntax. Mr. Sportiche

596. Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of instructor and program chair. Study or research in areas or on subjects not offered as regular courses. Eight units may be applied toward the M.A. degree requirements. S/U grading.

597. Preparation for Graduate Examinations (4 to 12 units). Prerequisite: consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in the quarter that comprehensive or qualifying examinations are to be taken. S/U grading.

**Romance Linguistics and Literature Course List**

In consultation with the appropriate adviser(s), courses should be selected with an eye to the organic relationship between them, preferably among those listed below and/or their prerequisites.

**Introductory Courses**

Italian 201. Bibliography and Methods of Research
Spanish M200. Research Resources

**Linguistics Courses**

Grammatical Theory: Linguistics 201. Survey of Current Issues in Phonological Theory
206. Survey of Current Issues in Syntactic Theory
211. Survey of Discourse and Functional Foundations of Grammar
Development of the Romance Languages
Hispano-Romance: Spanish M205A-M205B. Development of the Portuguese and Spanish Languages

280A-280B. Seminar in Indo-European Linguistics

Italic Dialects: Latin 242. Italic Dialects and Latin Historical Grammar

Italo-Romance: Italian 259A. History of the Italian Language
Latin History: Latin 240. History of the Latin Language

Medieval Latin: Latin 231A-231B. Seminar in Medieval Latin

Northern Gallo-Romance: French 204A. Phonology and Morphology from Vulgar Latin to French Classicism

204B. Syntax and Semantics from Vulgar Latin to French Classicism

Paleography: History 219A. Paleography I
219B. Paleography II

Romance Dialectology: Italian 259C. Italian Dialectology

Spanish 209. Dialectology

Romance Linguistics: Linguistics 225G. Linguistic Structures

Southern Gallo-Romance: French 215E. Medieval Language and Literature: Provencal Poetry

Vulgar Latin: Latin 232. Vulgar Latin

Studies in the History of the Romance Languages

Gallo-Romance: French 215A. Medieval Language and Literature: Old and Middle French

Hispano-Romance: Spanish M251A-M251B. Studies in Galician-Portuguese and Old Spanish

Italo-Romance: Italian 210A. Early Italian Literature: Origins of Italian Language and Early Texts

259A-259B-259C. Studies in the History of Italian Language

Synchronic Linguistics

Advanced Grammar: French 201. Literary Research and Composition

Italian 259B. Structure of Modern Italian

Portuguese 202. Synchronic Morphology and Phonology

204A-204B. Generative Grammar

Spanish 202. Phonology and Morphology

204A-204B. Generative Grammar

Studies in Linguistics and Dialectology: Spanish
256A-256B. Studies in Spanish Linguistics

257. Studies in Dialectology

Literature Courses

French Literature: French 205A-205D. Intellectual Background of French Literature

History of Ideas: French 260A-260B. Studies in the History of Ideas

Literary Criticism: French 203A-203B. French Literary Criticism

256A-256B. Studies in Literary Criticism

Italian 205A-205B. Methods of Literary Criticism

Spanish M201. Literary Theory and Criticism

Literary History: History 218. Medieval Latin Literary History

Philosophy and Literature: French 259A-259B. Studies in Philosophy and Literature

Early Romance Literature

Petrarca: Italian 214D. Italian Literature of the 14th Century: Petrarca

251. Seminar on Petrarca

Studies in Early Romance Literature: French 215B-215F. Medieval Language and Literature

250A-250B. Studies in Medieval Literature

Italian 210B-210C. Early Italian Literature

214A-214G. Italian Literature of the 14th Century

215A-215B-215C. Italian Literature of the 15th Century

250A-250D. Seminar on Dante

252. Seminar on Boccaccio

Portuguese C224. Medieval Portuguese Literature

Spanish 222. Medieval Epic and Narrative Poetry

223. Medieval Prose

262A-262B. Studies in Medieval Spanish Literature

Modern Romance Literature

Genre Studies: Portuguese 252. Studies in Early Portuguese Literature

253. Studies in Modern Portuguese Literature

254. Studies in Early Brazilian Literature

255. Studies in Modern Brazilian Literature

Studies in the 18th Century: French 218A-218D. 18th Century

254A-254B. Studies in the 18th Century

Italian 218A-218E. Italian Literature of the 18th Century

256A-256B. Seminar on the 18th Century

Portuguese C227. Romanticism and Realism in Portuguese Literature

C232. Romanticism and Realism in Brazilian Literature

Spanish 229. Romanticism

239. Romanticism and Realism in Spanish-American Literature

270A-270B. Studies in 18th-Century Spanish Literature

277A-277B. Studies in Colonial Spanish-American Literature

255A-255B. Studies in the 19th Century

Italian 219A-219F. Italian Literature of the 19th Century

257A-257B. Seminar on Romanticism

Portuguese C228. Post-Romanticism and Naturalism in Portuguese Literature

C233. Naturalism, Realism, and Symbolism in Brazilian Literature

Spanish 230. Realism and Naturalism

271A-271B. Studies in 19th-Century Spanish Literature

278A-278B. Studies in 19th-Century Spanish-American Literature

221A-221D. French-African Literature

256A-256B. Studies in Contemporary Literature

257A-257B. Studies in French-African Literature

Italian 220A-220B-220C. Italian Literature of the 20th Century

258A-258B. Seminar on Contemporary Italian Literature

Portuguese C229. 20th-Century Portuguese Literature

C234. 20th-Century Brazilian Literature: Poetry and Drama

C235. 20th-Century Brazilian Literature: Novel

Spanish 232. Spanish Prose Literature from 1898 to the Civil War

233. Spanish Prose Literature after the Civil War

234. Spanish Drama and Poetry from 1898 to the Civil War

235. Spanish Drama and Poetry after the Civil War

240. Major Currents in Modern Spanish-American Literature

243A-243B. Contemporary Spanish-American Poetry

244A-244B. Contemporary Spanish-American Novel

245. Contemporary Spanish-American Essay

272A-272B. Studies in 20th-Century Spanish Literature

280A-280B. Studies in Contemporary Spanish-American Literature

Renaissance and Baroque Literature

Cervantes: Spanish 227. Cervantes

Studies in Renaissance and Baroque Literature: French 216A-216H. Renaissance

217A-217L. 17th Century

251A-251B. Studies in the Renaissance

252A-252B. Studies in the Baroque

253A-253B. Studies in the 17th Century

Italian 216A-216E. Italian Literature of the 16th Century

217A-217B-217C. Italian Literature of the 17th Century

253A-253B-253C. Seminar on Chivalric Poetry in Italy

255A-255B. Seminar on the Baroque

Portuguese C225. Renaissance Portuguese Literature

C226. Baroque and Neoclassical Portuguese Literature

C231. Colonial Brazilian Literature

Spanish 224. Poetry of the Golden Age

225. Drama of the Golden Age

226. Prose of the Golden Age

237. Literature of the Spanish Conquest

264A-264B. Studies in Golden Age Spanish Literature

ROTC Programs

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Senior Division Reserve Officer Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920.

This voluntary training allows you to qualify for an officer's commission in the Army, Navy, or Marine Corps while completing your college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). They are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of your major. The ROTC program is also available through UCLA Extension.
All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for students who apply early in their sophomore year. All have leadership laboratories which help to build management skills.

Active duty obligation following commissioning varies depending on type of commission, type of financial aid received, and individual requests for Active or Reserve Duty assignments.

Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a monetary allowance of $100 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, 825-7384; Air Force, 825-1742; Navy, 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Completed applications should be received prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Three- and two-year scholarship applications may be obtained from the appropriate UCLA department and should be submitted prior to February 1.

Aerospace Studies

210 Men's Gym, (213) 825-1742

Professor

George P. Pehlvanian, M.A., Colonel, Chair

Adjunct Assistant Professors

Ronald J. Calloway, M.S., Major
Robert J. Feliz, M.A., Captain
Murray D. Johannsen, M.B.A., M.A., Captain

Air Force ROTC Scope and Objectives

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

Four-Year Program

The four-year program is available to first-quarter freshmen and those full-time students with at least four years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A-1B-1C and 20A-20B-20C), followed by a two-year Professional Officer Course (POC) described under "Two-Year Program." GMC participation requires two hours of academic class every other week and two hours of leadership laboratory on alternating weeks during the academic year. Students incur no military obligation for GMC participation unless they qualify and accept an Air Force ROTC scholarship during or after their sophomore year.

Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel expenses and are paid about $450 to cover incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

Two-Year Program

The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A-130B-130C and 140A, 140B, 140C. POC participation requires two hours of leadership laboratory every week and four or two hours of academic class (each week that laboratory does not meet) during the academic year.

Prerequisites for the two-year program are successful completion of the GCM and a four-week field training course (see "Four-Year Program" above), or successful completion of a six-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the six-week field training program are encouraged to apply to the department chair early during the Fall Quarter of their sophomore year. The application deadline is February 1, but earlier submission is recommended, as the selection board considers applications monthly. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, medical examination results, and performance during an officer board interview.

Students selected for the six-week summer field training are provided meals, quarters, clothing, travel expenses, and approximately $675 to cover incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see "Four-Year Program" above).

Students enrolled in POC incur a military obligation and are paid $100 per month during the academic year. Graduation and successful completion of POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

Freshman-Year Courses

1A-1B-1C. U.S. Military Forces in the Contemporary World (2 units each). Lecture, one hour. Air Force ROTC students should complete all three courses, preferably in sequence. Willingness to participate in class discussion required. P/NP or letter grading. 1A. Examination of the roles and norms expected from military officers, with emphasis on the characteristics of national power, the U.S. national security apparatus, and key elements of current strategic doctrine. The role of the U.S. Navy, Marine Corps, and Army. 1B. Focus on the roles, missions, and organization of the U.S. Air Force. Emphasis on basic elements of air doctrine and the functions of general purpose, strategic, and aerospace support forces. Emphasis on how aerospace forces are utilized during crises, as well as current problems in defense procurement. 1C. A "threat assessment" of U.S.S.R. military and political policies and the potential for military conflict in selected regions of the world. Examination of low-level conflict as represented by terrorism, actions and guerrilla warfare. Analysis of basic elements of strategy which deter war.

Capt. Johannsen (F, W, Sp)

Sophomore-Year Courses

20A-20B-20C. Developmental Growth of Air Power (2 units each). Lecture, one hour. The development of air power over the past 80 years. The development of various concepts of employment of air power, with emphasis on factors which have prompted research and technological change. Key events and elements in the history of air power, especially where these provide significant examples of the impact of air power on strategic thought. P/NP or letter grading.

Capt. Feliz (F, W, Sp)

Upper Division Courses

130A-130B-130C. Concepts of Air Force Management and Leadership. Lecture, three hours. Course 130A is prerequisite to 130B, which is prerequisite to 130C. An analysis of the principles and functions of management, leadership, and organizational behavior, with special reference to the Air Force as a model. Problem solving, information systems and models, quantitative methods, and computer systems. Group discussions, case studies, films, and role-playing used as teaching devices. Communicative skills strengthened through preparation of written reports and oral presentations. Maj. Calloway (F, W, Sp) 140A. Military Judicial System. Lecture, three hours. An introduction to the military justice system, international laws of armed conflict relating to air operations, and the foundations of military professionalism. Oral and written reports to strengthen communicative skills. P/NP or letter grading.

Col. Pehlvanian

140B. The Military in American Society. Lecture, three hours. Forces and issues in the social context of the American military. The influence of social norms, societal pressures, and cultural factors on the functions and role of the military professional in the U.S. Communicative skills strengthened through extensive classroom presentations. P/NP or letter grading.

Col. Pehlvanian
140C. American Defense Policy. Lecture, three hours. U.S. security policy with respect to factors that influence its formulation, the bureaucracy that formulates and implements it, and the forms it has taken and may take in the future. Communication techniques strengthened, and communication abilities oriented to Air Force requirements through preparation of papers and classroom presentation and discussion. P/NP or letter grading. Col. Pehlvanian

199. Special Studies in Aerospace Studies (2 or 4 units). Prerequisite: consent of instructor. A course of study for undergraduates who wish to engage in independent research under the direct supervision of a department faculty member. Col. Pehlvanian

Military Science

Richard Munnell, M.B.A., Captain
Carla J. Smith, M.A., Captain

Army ROTC Scope and Objectives

Army ROTC prepares selected students for leadership as commissioned officers in the U.S. Army, Army Reserve, or National Guard. This training includes an in-depth study of the military establishment, military history, doctrine, leadership principles, management, and many other basic skills necessary to build motivated, effective leaders.

Programs

The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower division study during which students must complete 12 units of coursework and (2) the Advanced Course, two years of upper division study consisting of 13 units of coursework and a six-week summer camp.

Transfer students and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see “Two-Year Program” below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance of $100 a month for 10 months during each of the two academic years, plus military science books and uniforms. After completion of the Advanced Course, students are commissioned as second lieutenants in one of the Army's 17 specialty areas in either the Army National Guard, Reserves, or Active Army. Students' desires are a major factor in determining which service is selected.

Students selected for Advanced ROTC must attend a six-week Advanced Camp between their Military Science III and IV years. Cadets receive an allowance for travel expenses and are paid for attendance.

The active duty obligation for those students selected to enter the Reserves or National Guard is only three months. Students accepting ROTC scholarships, a commission in the Regular Army, or who are selected to enter the Active Army serve longer terms. ROTC students wishing to obtain advanced degrees may be granted a delay in reporting to their initial assignment.

Four-Year Program

Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course, enlist in the U.S. Army Reserve for eight years, and accept a commission if offered.

Two-Year Program

This program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school junior ROTC, attending a paid ROTC summer camp, joining the Army Reserve or National Guard (veterans may receive VA benefits concurrently with Advanced Course subsistence allowances), completing two years of college-level Air Force or Navy ROTC, completing an ROTC compression course, or previous military service.

Commissioning

Successful completion of the Advanced Course leads to a commission as a second lieutenant in the Army Reserve, National Guard, or Active Army. Distinguished graduates may qualify for a commission in the Regular Army.

Lower Division Courses

12. U.S. Defense Establishment (2 units). A study of the military institution and other elements of national power as instruments of national policy and strategy in conditions of peace and war. (Sp)

14. Principles of Land Navigation Applicable to Maneuver (2 units). (Formerly numbered 114.) Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resolution, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS).

15. Introduction to Military Science (0 units). Lecture, one hour, practical, one hour; three field trips. Open to all students; designed to acquaint students with the profession of arms. Introduction to basic military skills, including techniques of survival in wilderness, winter, and desert environments, principles of orientation, basic map reading and compass skills, and knots and rappelling, as well as an overview of special operations forces and terrorism.

18. Modern Guerrilla Warfare (2 units). Lecture, one hour; discussion, one hour. Prerequisite: undergraduate standing. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurgenacies. Topics include nonmilitary responses, military tactics, interrelationships of the military and government, psychological warfare, and civic actions.

22. U.S. Military History, 1860-1919 (2 units). A survey of American military history during the period from 1880 to 1919. The causes of war, strategy, tactics, and technological developments. Economic, political, diplomatic, and social history is woven into the fabric of war, and a special effort is made to reveal the character and personalities of the leading political and military figures of the period.

24. Theory of Warfare (2 units). (Formerly numbered 13.) Inquiry into the theory, nature, causes, and elements of warfare, with attention also to the evolution of weapons and warfare.

Upper Division Courses

111. Psychology of Leadership I (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. The basis for understanding the relationships of individual differences and the leadership process, group dynamics, and their relationship to the leadership process, formal organizational constraints on the leadership process, and the impact of society on the leadership process. Introduction to the external environment in which a leader functions and the pressures that exist on a leader. The psychology of the individual as a follower, examined in the areas of motivation, peer pressure/conformity, and group norms to determine how they influence an individual.

(W)
Naval Science

123 Men's Gym, (213) 825-9075

Professor
Harold P. Sexton, Jr., M.S., Captain, U.S. Navy, Chair

Assistant Professor
Marilyn R. Hunt, M.A., Commander, U.S. Navy, Vice Chair

Adjunct Assistant Professors
Henry Rausch, B.S., Lieutenant, U.S. Navy

Capt. Sexton (F)

Lt. Westreich (F)

20B. Seapower and Maritime Affairs (2 units).

(Capt. Sexton (Sp)

Sophomore-Year Courses

20A. Naval Ship Systems II. (Formerly numbered 20B.) A study of naval weapons systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problems, and target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

Lt. Rausch (W)

20B. Seapower and Maritime Affairs (2 units).

(Capt. Sexton (Sp)

*Course to be taken by candidates for commissions in the Marine Corps or Marine Corps Reserve in lieu of courses 101A, 101B, 102B, 102C.

Junior-Year Courses

Lt. Mayer (W)

101B. Navigation II. Prerequisite: course 101A. A study of routes of the road, shiphandling, and basic concepts of multiple ship formations and maneuvering. In-depth analysis of problems associated with operations on high seas and inland waters applying to civil and U.S. Naval craft.

Lt. Mayer (Sp)

103. Evolution of Warfare. A study of the evolution of warfare, including historical and comparative consideration of the influence that leadership, political, economic, and sociological and technological development factors have had on warfare and the influence they continue to exert in the age of limited warfare.

Capt. Farrar (W)

Senior-Year Courses

102B. Naval Leadership and Management I. An examination of current and classical leadership and management theories, with emphasis on their application to the junior military officer's role as a leader-manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication.

Capt. Sexton (F)

102C. Naval Leadership and Management II (2 units). Prerequisite: course 102B. Current leadership and management in the U.S. Navy. Areas include human resources management, personnel management, material management, and personnel and career evaluation.

Lt. Westreich (W)

104. Expeditionary Military Operations. A study of the historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

Capt. Farrar (W)

199. Supervised Independent Studies (1 to 3 units). Prerequisites: upper division standing, consent of instructor. Supervised independent study and research for undergraduate students who desire to pursue topics of their own selection. P/NP or letter grading.
Slavic Languages and Literatures

115 Kinsey Hall, (213) 825-2676

Professors
Aleksandar Albijanić, Ph.D. (South Slavic Languages and Literatures)
Henrik Birnbaum, Ph.D. (Slavic Languages and Literatures)
Thomas Eekman, Ph.D. (Slavic Languages and Undergraduate Study)
Marija Gimbutas, Ph.D. (European Archaeology)
Michael Heim, Ph.D. (Czech Languages and Literatures)
Vladimir Ivanov, Ph.D. (Russian Literature)
Olga Kagan, Diploma (Russian Literature)
Gail Lenhoff, Ph.D., Acting (Polish and Russian Literature)
Edward Denzler, M.A.
Ronald Vroon, Ph.D. (Russian Literature)

Associate Professors
Peter Hodgson, Ph.D. (Russian Literature)
Emily Kienin, Ph.D. (Slavic Languages and Literatures)
Gail Henhoff, Ph.D., Acting (Russian Literature)
Rochelle Stone, Ph.D. (Polish and Russian Literature)

Lecturers
Edward Denzler, M.A. (Russian)
Olga Kagan, Diploma (Russian)

Scope and Objectives
The undergraduate program, leading to a Bachelor of Arts degree in Slavic Languages and Literatures, is designed to provide students with a basic mastery of the Russian language, a familiarity with the classics of Russian literature, and a general background in the cultural, political, and social history of the Slavic peoples. The program presents a considerable range of options to students with specialized interests.

Besides the traditional major in Slavic languages and literatures, the program also offers B.A. degrees in Russian Civilization (language, literature, history, economics, political science, geography, art, music, film) and Russian Linguistics (language, literature, Russian and Slavic linguistics, general linguistics, psychology).

The graduate program provides advanced training in Slavic linguistics and literature leading to the master's degree and the Ph.D. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include secondary language teaching, translation, interpreting, librarianship, and government service.

Undergraduate Study
The department offers three majors: (1) Slavic languages and literatures, (2) Russian civilization, and (3) Russian linguistics. The major in Slavic languages and literatures is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian civilization or Russian linguistics are expected to make up in order to receive graduate degrees in the department. Students who do not choose the major in Slavic languages and literatures but who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take several graduate courses numbered below 220 with consent of the instructor and the graduate adviser.

Work completed in the University's summer or semester Russian programs at Leningrad State University may be applied toward fulfillment of the Russian 101-series requirements in any of the following majors.

Bachelor of Arts in Slavic Languages and Literatures

Preparation for the Major
Required: Slavic 99, Russian 1, 2, 3, 4, 5, 6, 99A.

The Major

Note: Russian 118, 119, and 120 may be taken in the sophomore year.

Bachelor of Arts in Russian Civilization

Preparation for the Major
Required: Russian 1, 2, 3, 4, 5, 6, 99A.

The Major
Required: Russian 101A-101B-101C, 119, 120, three additional courses in Russian literature, seven courses from Russian M170, M180, Economics 182, Geography 184, History 131A, 131B, 131C, 131D, Political Science 128A, 128B, 156, or special courses in the Departments of Art, Design, and Art History, Music, Theater, Film, and Television, and Slavic Languages and Literatures approved by the undergraduate adviser.

Bachelor of Arts in Russian Linguistics

Preparation for the Major
Required: Russian 1, 2, 3, 4, 5, 6.

The Major

Graduate Study
The Department of Slavic Languages and Literatures at UCLA offers M.A. and Ph.D. degrees in Slavic Languages and Literatures.

Admission
In addition to the University minimum requirements, the department requires the equivalent of a UCLA B.A. in Slavic Languages and Literatures, or three years of Russian language and a sufficient number of Russian history, literature, and linguistics courses so that you do not need more than one year (nine courses) to make up deficiencies. For application to the Ph.D. program, the department requires a UCLA M.A. in Slavic Languages and Literatures or equivalent. If you do not hold a UCLA M.A. in Slavic Languages and Literatures, you are required to take the M.A. comprehensive examination as a screening examination within your first year and to make up any deficiencies in your background compared with that of a UCLA master's degree recipient.

For all applicants, three letters of recommendation are required from persons capable of judging your academic potential. No departmental admission test is necessary, but the Graduate Record Examination (GRE) is required.

A department brochure describing the curriculum in some detail (graduate and undergraduate) is available from the Graduate Adviser, Slavic Languages and Literatures, 115 Kinsey Hall, UCLA, Los Angeles, CA 90024-1502.

Major Fields or Subdisciplines
Candidates for the M.A. and Ph.D. degrees select a specialization in either literature or linguistics, with Russian as the principal language and literature. On the Ph.D. level, students may specialize in a language or literature other than Russian by special arrangement.
Master of Arts Degree

Foreign Language Requirement
There are two foreign language requirements which must be completed at least one quarter before the M.A. comprehensive examination: (1) you must pass a departmental Russian language proficiency examination which tests your ability to translate from Russian to English and vice versa. This examination may be retaken each quarter until a pass grade is achieved; (2) you must demonstrate ability to read scholarly literature in either French or German by one of three methods: (a) passing the appropriate Educational Testing Service (ETS) reading examination with a score of 500 or better, (b) passing the departmental reading examination, or (c) completing level five at UCLA in one of the languages with a grade of B or better (equivalent university-level coursework in French or German taken within two years before admittance may satisfy this requirement at the discretion of the graduate adviser).

Course Requirements
Slavic 201, Russian 201A-201B-201C, and 204 are required of all M.A. students.

Literature students must also take Russian 211, 212, 213, and one other literature course in the department.

Linguistics students must also take Slavic 202, Russian 221, 222, 225, and two courses from 211, 212, 213.

Courses in the 500 series may not be applied toward the M.A. course requirements.

Comprehensive Examination Plan
Application for advancement to candidacy must be made no later than the second week of the quarter in which the M.A. examinations are to be taken and is accepted only if you have satisfied the foreign language requirement in French or German and have passed the Russian Language Proficiency Examination. Examinations are offered at the end of each quarter. After you have declared your intention to take the examination in a given quarter, a committee consisting of three members is appointed by the chair and the graduate adviser. The comprehensive examination has two parts — written (three hours) and oral (two hours) — and is based on coursework and the departmental reading list. The examination covers either linguistics or literature. If you receive a pass grade on the written examination, you are admitted to a two-hour oral examination which is designed to test the fields of major interest and general background. It is conducted partly in Russian.

Your combined performance in the written and oral examinations is graded high pass, pass, or fail. A grade of high pass or pass is necessary to receive the M.A. degree; the grade of high pass is necessary to enter the Ph.D. program. Examinations may be repeated once, no later than one calendar year after the first attempt.

Ph.D. Degree

Admission
You are formally admitted to the Ph.D. program after (1) passing the UCLA M.A. comprehensive examination with a grade of high pass, (2) passing the reading examination in both French and German (see "Foreign Language Requirement"), and (3) taking one year (or the equivalent) of a second Slavic language.

The comprehensive examination serves as a screening examination for admission to the doctoral program if you are entering UCLA with an M.A. from another institution. You may retake the examination once in order to achieve the necessary high pass grade.

Foreign Language Requirement
You must demonstrate ability to read scholarly literature in both French and German by completing one of the three methods listed under the master's degree. With departmental consent, students specializing in linguistics may substitute reading knowledge in another language important to the study of Slavic linguistics (Finnish, Hungarian, Lithuanian, Latvian, Romanian, or a Turkic language relevant to East or South Slavic historical linguistics) and a score of 450 on the Educational Testing Service (ETS) examination in either French or German. Reading knowledge of two such languages may, by the same procedure, be substituted for the entire French or (more rarely) German examination.

Course Requirements
Before the formation of a doctoral committee, you must have been officially admitted to the doctoral program and have taken the following required courses.

Linguistics students must take Slavic 221, 222, 223, and four other advanced linguistics courses or seminars (numbered above 220).

Recommended preparation for linguists includes Linguistics 100, 103, 110, 120A, 120B, M150.

Literature students must take two courses from Slavic 230A-230B-230C; Russian 251A; and three additional seminars.

Candidates specializing in literature are advised to acquire sound general knowledge of modern Western European literature.

Qualifying Examinations
Candidates are required to submit to the examination committee a serious research paper of publishable quality. The paper must be received and approved no later than one quarter preceding the comprehensive written examination.

All students are expected to have sound general knowledge of both Slavic philology and Russian literary history equivalent to that required for the M.A. at UCLA. For linguistics students, there is one written three-hour qualifying examination given at the end of each quarter. For literature students, there are two written three-hour qualifying examinations given one week apart at the end of each quarter. If you receive a grade of pass on the written examination(s), you are admitted to a two-hour University Oral Qualifying Examination, which is designed to test the fields of major interest and general background, and which typically includes discussion of the dissertation topic.

After considering your overall performance in both the oral and written examinations, the committee assigns a cumulative grade. A pass grade entitles you to write a dissertation in order to receive the Ph.D. degree. At the committee's discretion, you may be required to retake any or all portions of the Ph.D. examinations within one calendar year after the first attempt.

Within two quarters (or one quarter and a summer) after passing the qualifying examinations, you must prepare a prospectus of the dissertation.

You are required to deliver a formal lecture in the Slavic colloquium no later than two calendar years after advancement to candidacy.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
A final oral examination is required except in case of geographically imposed hardship.

Slavic

Lower Division Course
99. Introduction to Slavic Civilization. Lecture, three hours. An introductory survey of the social and cultural institutions of the Slavic peoples and their historical background.

Upper Division Courses
177. Baltic Languages and Cultures (2 units). A general survey of the peoples speaking Old Prussian, Lithuanian, and Latvian; their linguistic, historical, and ethnic affiliations. Mrs. Gimbutas M179. Baltic and Slavic Folklore and Mythology. (Same as Folklore M126.) Lecture, three hours. A general course for students interested in folklore and mythology and for those interested in Indo-European mythic antiques. Mrs. Gimbutas
Graduate Courses

Linguistics

201. Introduction to Old Church Slavic. Lecture, three hours. Required for the M.A. (linguistics, literature). Introduction to phonology and grammar; readings.

223. Introduction to South Slavic Languages. Lecture, three hours. Prerequisite: course 202. Recommended: Serbo-Croatian 103A-103B-103C or Bulgarian 103A-103B-103C. Required for the Ph.D. (linguistics). Introduction to the structure and history of the South Slavic languages.

224. Introduction to Ukrainian and Belarusian. Lecture, three hours. Prerequisite: course 202. Introduction to the history and structure of Ukrainian and Belarusian.

241A-241B. Advanced Old Church Slavic. Lecture, three hours. Prerequisite: course 201. 241A. Advanced Readings in Canonical Texts; 241B. East, West, and South Slavic Recensions of Church Slavic.

251. Introduction to Baltic Linguistics. Lecture, three hours. Prerequisite: course 202. Introduction to Baltic linguistics, with special attention to the relationship between Baltic and Slavic.

261. Slavic Paleography. Lecture, three hours. Prerequisite: course 201. Introduction to Slavic paleography: inscriptions, birch bark letters, Glagolitic and Cyrillic texts.

262A-262B. West Slavic Linguistics. Lecture, three hours. Prerequisite: course 222. 262A. Lekhctic; 262B. Czechoslovak, Sorbian.

263A-263B. South Slavic Linguistics. Lecture, three hours. Prerequisite: course 223. 263A. Serbo-Croatian, Slovene; 263B. Bulgarian, Macedonian.

281. Seminar in Slavic Linguistics. Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

282. Seminar in Structural Analysis. Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

Literature

290. Seminar in Comparative Slavic Literature. Seminar, three hours. Prerequisites: courses 230A-230B-230C. Recommended: reading knowledge of one Slavic language in addition to Russian. Selected topics involving more than one Slavic literature or Slavic and Western literatures. May be repeated for credit with consent of instructor and graduate adviser.

295. Seminar in Literary Analysis. Seminar, three hours. Recommended prerequisite: reading knowledge of one Slavic language in addition to Russian. Selected topics from various Slavic literatures or Slavic and Western literatures, with emphasis on analytic methods. May be repeated for credit with consent of instructor and graduate adviser.

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor and graduate adviser.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of instructor and graduate adviser.

598. Research for Ph.D. Dissertation (2 to 12 units).

Bulgarian

Lower Division Course

99. Introduction to Bulgarian Civilization. Lecture, three hours. An introductory survey of the social and cultural development of the Bulgarian people and their historical background.

Upper Division Courses

103A-103B-103C. Elementary Bulgarian. Recitation, five hours. Basic courses in the Bulgarian language.

154. Survey of Bulgarian Literature. Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. A survey of Bulgarian literature from the Middle Ages to the present.

Czech

Upper Division Courses

102A-102B-102C. Elementary Czech. Recitation, five hours. Basic courses in the Czech language.

102D-102E-102F. Advanced Czech. Recitation, three hours. Prerequisite: course 102C.

155A-155B. Czech Literature. Lecture, three hours. Lectures and readings in English. 155A. Survey of Czech Literature from the Middle Ages to the Present; 155B. Selected Topics.

Polish

Upper Division Courses

102A-102B-102C. Elementary Polish. Recitation, five hours. Basic courses in the Polish language.

102D-102E-102F. Advanced Polish. Recitation, three hours. Prerequisite: course 102C.

152A-152B. Survey of Polish Literature. Lecture, three hours. Lectures and readings in English. 152A. From the Middle Ages to Romanticism; 152B. From Realism to Present.

160. Polish Romanticism. Lecture, three hours. Lectures and readings in English. Comparison of Polish Romanticism with that of other Slavic and Western European countries.

Graduate Course

280. Seminar in Polish Literature. Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

Russian

Language Courses

1. Elementary Russian. Recitation, five hours; laboratory, one hour.

2. Elementary Russian. Recitation, five hours; laboratory, one hour.

3. Elementary Russian. Recitation, five hours; laboratory, one hour.

4. Intermediate Russian. Recitation, four hours; laboratory, one hour.

5. Intermediate Russian. Recitation, four hours; laboratory, one hour.

6. Intermediate Russian. Recitation, four hours; laboratory, one hour.

10. Intensive Course in Russian (12 units). Intensive basic course in the Russian language equivalent to courses 1, 2, and 3.

11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian (2 to 12 units). Basic courses in the Russian language. Each two-unit course in the sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require the completion of or simultaneous enrollment in all courses lower in the sequence.

102A-102B-102C. Grammar and Reading. Prerequisite: course 101C. Advanced grammatical analysis; reading of difficult texts; conversation and composition.

107A-107B-108B-109A-109B. Russian for Social Scientists (2 to 12 units). Lecture, one hour (per each two units); discussion, one hour (per each two units). Prerequisite: course 3 or equivalent. Reading, oral practice, and translation of the Russian that is relevant for students of social sciences. May be repeated for credit.

Linguistics Courses

121. Russian Phonology. Lecture, three hours. Prerequisite: course 6. Introduction to transliteration and transcription, articulatory phonetics, phonemics.

122. Russian Morphology. Lecture, three hours. Prerequisite: course 121. Introduction to morphophonemics, inflection, derivation.

123. Historical Commentary on Modern Russian. Lecture, three hours. Prerequisites: courses 121, 122. Historical explanation of the phonological and morphological anomalies of modern Russian.
Literature and Civilization Courses

25. The Russian Novel in Translation. (Formerly numbered 100.) Lecture, three hours. Designed for nonmajors. A study of major works by the great 19th-century Russian novelists.

99A. Introduction to Russian Civilization. (Formerly numbered 99.) Lecture, three hours. An introductory survey of the social and cultural institutions of the Russian people and their historical background.

118. Survey of Russian Literature to Pushkin. Lecture, three hours. Prerequisite: upper division standing. Major authors should take this course during their sophomore year. Lectures and readings in English.

119. Survey of 19th-Century Russian Literature. Lecture, three hours. Prerequisite: upper division standing. Major authors should take this course during their sophomore year. Lectures and readings in English.

120. Survey of 20th-Century Russian Literature. Lecture, three hours. Prerequisite: upper division standing. Major authors should take this course during their sophomore year. Lectures and readings in English.

124A-124F. Studies in Russian Literature. Lecture, three hours. Lectures and readings in English. The following writers are alternately discussed: 124A. Pushkin; 124B. Gogol; 124C. Turgenev; 124D. Dostoevsky; 124E. Tolstoy; 124F. Chekhov.

125. The Russian Novel in its European Setting. Lecture, three hours. Prerequisite: upper division standing. Emphasis on the 19th- and 20th-century novel and its cultural and historical setting.

126. Survey of Russian Drama. Lecture, three hours. Prerequisite: upper division standing. Major plays from the 18th to 20th century. Lectures and readings in English.

128. Russian Science Fiction. Lecture, three hours. An introduction to Russian science fiction in the 20th century. Emphasis on the function of science fiction in the development of Russian culture before and after the October Revolution. Readings in English. P/NP or satisfactory grade.

130A-130B-130C. Russian Poetry. Lecture, three hours. Prerequisite: course 6. Lectures and readings in Russian. 130A. Introduction to Analysis of Poetic Texts; 130B. From Mid-18th Century through Precur-sors of Symbolism; 130C. From Late-19th Century through Contemporary Soviet Verse.

140A-140D. Russian Prose. Lecture, three hours. Prerequisite: course 6. Lectures and readings in Russian. 140A. Major Writers from Karamzin to Turgenev; 140B. Dostoevsky to Gorky; 140C. Contemporary Writers; 140D. Advanced Readings in Russian Prose.

150. Russian Folk Literature. (Same as Folklore M150.) Lecture, three hours. Lectures and readings in Russian.

170. Russian Folklore. (Same as Folklore M170.) Lecture, three hours. A general introduction to Russian folklore, including a survey of genres and related folkloric phenomena. Lectures and readings in English.

M180. Russian Art. (Formerly numbered 180.) (Same as Art History M113.) Lecture, three hours. Prerequisite: Art History 51, 54, 57. Knowledge of Russian not required. A survey of the art and architecture of Russia from its beginning to the present day. Emphasis on the development of Russian art in its religious, social, and political context.

193. Seminar in Russian Literature. Lecture, three hours. Prerequisite: course 6 or consent of instructor. Required for the M.A. (literature). Lectures and discussion of selected authors; written seminar papers usually required.

Graduate Courses

Linguistics

201A-201B-201C. Introduction to the Analysis of Russian Texts. Lecture, three hours. Prerequisite: course 102C or consent of instructor. Required for the M.A. (linguistics, literature). Introduction to literary and linguistic approaches to literary texts. Reading, translation exercises, analysis, composition. Contrast with Russian.

203. Practicum in Russian (2 units). Prerequisite: course 201C. Two quarters per year required of Ph.D. students. Reading of advanced texts; advanced composition, conversation; stylistics. May be repeated for credit. S/U grading.

210. Readings in Russian Historical Texts. Lecture, three hours. Prerequisite: Slavic 201 or consent of instructor. Readings in early Russian chronicles and other documents of historical interest.

221. Advanced Russian Phonology (2 units). Prerequisites: courses 102A-102B-102C, 121 (may be taken concurrently). Required for the M.A. (linguistics). Advanced study and analysis of problems in Russian phonology.

241. Topics in Russian Philosophy. Lecture, three hours. Prerequisite: course 221. Selected topics in Russian philosophy.

242. Topics in Russian Morphology. Lecture, three hours. Prerequisite: course 222. Selected topics in Russian inflection and derivation.

243. Topics in Historical Russian Grammar. Lecture, three hours. Prerequisites: course 123, Slavic 221. Selected topics in Russian historical phonology, morphology, and syntax.

263. Russian Dialectology. Lecture, three hours. Prerequisite: Slavic 221. Phonology and grammar of modern Great Russian dialects.

264. History of the Russian Literary Language. Lecture, three hours. Prerequisites: course 204, Slavic 201. The evolution of literary Russian from the 11th to the present day. Lectures and analysis of texts.

265. Advanced Russian Syntax. Lecture, three hours. Prerequisite: course 225. Traditional and generative approaches to Russian syntax.

266. Russian Lexicology. Lecture, three hours. Examination of the formal and semantic structure of the Russian lexicon.

Literature and Civilization

211. 18th-Century Russian Literature. Lecture, three hours. Required for the M.A. (literature). Lectures and readings in major and secondary writers. Analyzes major and select authors.

251A-251B. Old Russian Literature. Lecture, three hours. 251A. Required for the Ph.D. (literature). Survey of Old Russian literature from the beginning through the Kievan and the Muscovite periods up to the end of the 17th century. 251B. Detailed discussion of specific writers, periods, or genres.

270. Russian Poetics. Lecture, three hours. Prerequisites: courses 130A-130B-130C. Introduction to the technical study of Russian poetics and versification, with attention to metrics, stanza forms, rhyme, and the development of various verse types from the 18th into the 20th century.

290. Seminar in Russian Poetry. Seminar, three hours. Prerequisite: course 251B. Selection of texts from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

291A. Seminar in Old Russian Literature. Seminar, three hours. Prerequisite: course 102C or consent of instructor. Study of Russian texts from the 11th through the 17th century. May be repeated for credit with consent of instructor and graduate adviser.

291B. Seminar in 18th-Century Russian Literature. Seminar, three hours. Prerequisite: course 251B. Selected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

292. Seminar in 19th-Century Russian Literature. Seminar, three hours. Prerequisites: course 212. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

293. Seminar in 20th-Century Russian Literature. Seminar, three hours. Prerequisite: course 212. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

294. Seminar in Russian Literary Criticism. Seminar, three hours. Prerequisite: course 212. 211, 212, 213. Detailed study of a specific school of literary criticism, a single literary critic, or a period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate adviser.

296. Seminar in the History of Russian Culture. Discussion, three hours. Reading and discussion on selected topics in the history of Russian culture.

Serbo-Croatian

Upper Division Courses

103A-103B-103C. Elementary Serbo-Croatian. Recitation, five hours. Basic courses in the Serbo-Croatian language.

103D-103E-103F. Advanced Serbo-Croatian. Recitation, three hours. Prerequisite: course 103C.

113A-113B-113C. Advanced Reading and Composition. Recitation, three hours. Prerequisite: course 103F or consent of instructor. Reading and translation of difficult texts; advanced composition.

154A-154B. Yugoslav Literature. Lecture, three hours. Lectures and readings in English. 154A. Survey of Yugoslav Literature from the Middle Ages to the Present; 154B. Selected Topics.
Slovak

Graduate Course

222. Structure of Slovak. Lecture, three hours. Prerequisite: Slavic 202. Recommended: Slavic 222. Introduction to the phonological and morphological structure of the Slovak language, especially as contrasted with Czech.

Ukrainian

Upper Division Courses

101A-101B. Ukrainian. Lecture, recitation, five hours. Basic courses in the Ukrainian language.

152. Introduction to the phonological and morphological structure of the Ukrainian language, especially as contrasted with Czech.

Lithuanian

Upper Division Courses

152. Lithuanian Literature. Lecture, three hours. A survey of writers, literary trends, and issues in Lithuanian literature from the late 18th century to the present. Special attention to the works of such major figures as I. Kotlyarevsky, T. Shevchenko, I. Franko, L. Ukrainka, and P. Tychyna. Lectures and readings in English.

Non-Slavic Languages of Eastern Europe

Social Sciences

3232 Campbell Hall, (213) 825-2974

Professors

Lucie C. Cheng, Ph.D. (Sociology), Coordinator
David Hayes-Bautista, Ph.D. (Medicine)
Harry H. Kitano, Ph.D. (Social Welfare)
Kenneth R. Lincoln, Ph.D. (English)
Claudia Michelli-Kerman, Ph.D. (Anthropology)
Gary B. Nash, Ph.D. (History)
Amado M. Padilla, Ph.D. (Psychology)
Alexander P. Saxton, Ph.D. (History)
David O. Sears, Ph.D. (Political Science, Psychology)
Stanley Sue, Ph.D. (Psychology)

Associate Professors

Leobardo Estrada, Ph.D. (Urban Planning)
Robert A. Hill, M.Sc. (History)
Robert A. Nakamura, M.F.A. (Theater, Film, and Television)
Melvin Oliver, Ph.D. (Sociology), Coordinator
Raymund A. Paredes, Ph.D. (English)
John Red Horse, Ph.D. (Social Welfare)
Raymond A. Robb, Ph.D. (Political Science)
Richard A. Yarborough, Ph.D. (English)

Assistant Professors

Duane Champagne, Ph.D. (Sociology)
King-Kok Cheung, Ph.D. (English)
Paul Org, Ph.D. (Urban Planning)

There is no major in social sciences; however, the following undergraduate course is offered for interested students.

Lower Division Course

20. Racial Minorities in the U.S. (Formerly numbered American Studies M20, American Indian Studies M20, Chicano Studies M20.) Lecture, three hours; discussion, one hour. A multidisciplinary examination of the history and culture of Afro-Americans, Asian Americans, Chicano, and Native Americans in the U.S. Topics include origins and maintenance of inequality, ethnic images in literature and art, psychosocial dimensions of racism, social movements, and minorities in California.

Sociology

264 Haines Hall, (213) 825-1313

Professors

Jeffrey Alexander, Ph.D.
Rodolfo Alvaraz, Ph.D.
Richard Bark, Ph.D.
Judith Blake, Ph.D.
Phillip Bonacich, Ph.D.
Lucie C. Cheng, Ph.D.
Burton R. Clark, Ph.D.
Robert M. Emerson, Ph.D.
Howard E. Freeman, Ph.D., Chair
Oscar Grusky, Ph.D.
John C. Heritage, Ph.D.
Harry H. L. Kitano, Ph.D.
Gene N. Levine, Ph.D.

Ivan H. Light, Ph.D.
Michael Mann, Ph.D.
Valerie K. Oppenheimer, Ph.D.
Melvin Poliner, Ph.D.
Georges Sabagh, Ph.D.
Emanuel A. Schegloff, Ph.D.
Gerald H. Shore, Ph.D.
Ivan Szelenyi, Ph.D.
Warren D. TenHouten, Ph.D.
Donald J. Treiman, Ph.D.
Ralph H. Turner, Ph.D.

Scope and Objectives

Variety is the special characteristic both of the field of sociology and of the UCLA Department of Sociology, which was judged among the 10 best in the nation in a recent survey conducted by the Conference Board of the Associated Research Councils.

Sociology will have a particular appeal to those students whose interests are broad and unspecialized. At both undergraduate and graduate levels, students study history, politics, statistics and mathematics, race relations, demography, psychology, language, and many other topics. A sociology student becomes a member of an intellectual community in which all these interests are represented.

The primary purpose of the major in sociology is to enhance the student's capacity for critical analysis and understanding of social phenomena. It is intended, at the same time, to serve as preparation for careers in high school or junior college teaching, social work, architecture and urban planning, law, public health, and government service, among others. It also provides training for advanced graduate work in sociology and social psychology.

Related Courses in Other Departments

Dance 74B, 184B; Economics 162; Geography 184; Linguistics 100, 103, 110, 120A, 120B, M150, as well as several of the graduate courses in linguistics; Music 91C, 142A-142B; Political Science 128A-128B, 156, 157.
The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

**Bachelor of Arts Degree**

**Preparation for the Major**

**Required:** Sociology 1, 18 (or Statistics 50, Psychology 41, Economics 40, or Public Health 100A), one course from Group A (Mathematics 2, 3A), one course from Group B (Philosophy 8, 9, 31), one course from Group C (Anthropology 5, 6, 22, Economics, 1, 2, Geography 3, History 1A, 1B, 1C, Political Science 1, Psychology 10).

All courses required for the major in sociology, including lower division and allied field courses, must be taken for a letter grade. A 2.0 grade-point average is required for the preparation and for the major.

**The Major**

**Required:** Ten upper division sociology courses, not including former course 101. The 10 courses (40 units) must include the following:

1. Sociology 101 or 102, and 104. These courses, devoted to the systematic exploration of sociological methods and theories, should be completed as early as possible in your junior year.
2. Four upper division courses as required by one of the specialized “Concentrations for the Major” listed below.
3. Any four additional upper division sociology courses.
4. Four upper division allied field courses (16 units) in other departments to complete the major. The allied fields are anthropology, economics, geography, history, political science, and psychology.
5. English 100W (may be taken on a P/NP grading basis).

**Concentrations for the Major**

By the end of your junior year and no later than the beginning of your senior year, you are required to declare your specific concentration by filing a statement with the undergraduate counselor. The purpose of the concentration requirement is to expose you to systematic, in-depth work within a specific area of sociology. Completion of a concentration requires four upper division sociology courses. You must take a concentration’s required course (if any) before declaring that concentration. You must select one of the following concentrations and meet its course requirements:

1. **Comparative Studies of Nations and Societies**
   - Required: 183* or 184*
   - Two of the following: 116, 157, 158, 173, 182, 184*
   - One of the following: 183*, 185, 186, 187, 188

2. **Organizations and Work**
   - Required: 168* or 171*
   - Three of the following: 135, 147, 149, 157, 168*, 169, 170, 171*, 173, 182, 184

3. **Political Sociology**
   - Required: 182
   - Three of the following: 103, 133, 147, 156, 1M75, 184, 185

4. **Stratification, Race, and Ethnicity**
   - Required: 156* or 157*
   - Three of the following: 103, 112, 118, 134, 156*, 157*, 158, 159, 160, 171, 182, 184, 185

5. **Social Psychology**
   - Required: 132
   - Three of the following: 133, 134, 135, 136, 137, 160, 176

6. **Ordinary and Deviant Interaction**
   - Four of the following: 106, C124A, C124B, 125, 126, 127, 145, 146, 147, 148, 149, 150, 169, 170

7. **Quantitative Methods and Demography**
   - One of the following: 112, 113, 116
   - Three of the following: 105, 117, 118, 157, 187

A psychology course taken to fulfill the breadth requirement cannot also be used for the allied field requirement. Only eight units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

Courses 104, 210A, and 210B are recommended for students who intend to pursue graduate work in sociology.

**Specialization in Computing**

Majors in sociology may select a specialization in computing by (1) satisfying all the requirements for a bachelor’s degree in the major, (2) completing Program in Computing 10A, 10B, 10C, (3) completing two courses from Sociology 9, 112, 113. You graduate with a bachelor’s degree in sociology and a specialization in computing.

**Honors Program**

The honors program in sociology provides an opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member.

The project culminates with an honors thesis or paper. Students intending to obtain advanced degrees will find this program especially useful. If you are selected, you enroll in Sociology 199HA-199HB-199HC in your senior year. These courses may be applied toward the 10 upper division courses required of all sociology majors. After completing the program, you graduate either with departmental honors or highest honors.

**Qualifications:** You must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available in the Undergraduate Counselor’s Office, 254A Haines Hall. You should apply in the last quarter of your junior year.

**M.A. and Ph.D. Degrees**

The graduate program of the department takes as its primary aim the training of scholars who will conduct original research contributing to the advancement of sociological knowledge. For this reason, the department ordinarily accepts only students who are seeking the Ph.D. degree. A master’s degree may be earned as part of the process of completing the requirements for the Ph.D.

**Admission**

In addition to the minimum University requirements, the department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with your written work and research experiences, (2) transcripts from all colleges where you have studied, (3) a statement of purpose, outlining reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these, (4) copies of one or two term papers or research reports you have written, (5) an official statement of scores on the Graduate Record Examination (GRE), and (6) for applicants whose native language is not English, the Test of English as a Foreign Language (TOEFL).

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the department.

In addition to relatively formal criteria (such as analytic proficiency and articulateness), the department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women and minorities are therefore encouraged to apply. The deadline for receipt of applications is January 15. Application forms and more detailed information are available from the Graduate Affairs Assistant, Department of Sociology, 254C Haines Hall, UCLA, Los Angeles, CA 90024-1551.

---

*Course may not be used as both the required concentration course and an elective under the same concentration.
Major Fields or Subdisciplines

In the first two years you usually satisfy the course requirements for the M.A. degree and write a master's paper that is evaluated by the department in your sixth quarter of residence. During the first year of graduate study, and no later than the first quarter of the second year, you are expected to form a two-person master's committee to help you prepare the master's paper.

In the quarter following acceptance of your master's paper, usually at the beginning of the third year, you must affiliate with one of the department's five area programs in order to pursue more specialized, advanced study and research toward the Ph.D. The area programs represent the special strengths of the department in research and graduate instruction:

1. **Communities and Institutions:** Studies in community organization and local and institutional processes of deviance and social control, particularly as they are affected by race, ethnicity, gender, and class; social networks; ethnic conflict and cooperation; organization of immigrant communities; gender relations; social organization of work and occupations; institutional processes in criminal justice and medical settings. (This area program is being reviewed and is subject to change. Contact the graduate affairs assistant for information.)

2. **Ethnomethodological, Phenomenological, and Observational Sociologies:** Studies of work especially in the sciences and professions, sociology of knowledge, sociology of law, deviance, social control, conversational and other forms of ordinary interaction, and historical studies of everyday interaction and consciousness.

3. **Macrosociology:** Political sociology, economy and society, historical and comparative sociology, macrosociological theory, and comparative stratification.

4. **Quantitative Sociology:** Survey research methods, methods of applied and evaluation research, formal demography, social stratification, advanced social statistics, and mathematical sociology. (This area program is being reviewed and is subject to change. Contact the graduate affairs assistant for information.)

5. **Social Psychology:** Attitudes and social structure, collective behavior, socialization, social interaction and small group behavior, and organizational social psychology.

Foreign Language Requirement

Master's Degree: There is no foreign language requirement for the master's degree.

Ph.D. Degree: The foreign language requirement for the Ph.D. is one language or a substitute program approved by the executive committee. Students who plan to study toward the Ph.D. degree should complete the foreign language requirement as early as possible, so as to make use of foreign language sociological publications throughout graduate study. In any case, the foreign language requirement must be fulfilled before the doctoral committee is nominated and the oral examination is taken. Reading knowledge of one language, as demonstrated either by acceptable performance on a standardized test or by completing level five of that language (or the equivalent) with at least a grade of C, is required. You must submit your selected language to your area governing committee for approval.

With the approval of the department, an international student may offer English as a foreign language if the native language is other than English. Proficiency in English is evaluated by the level of performance on the UCLA entrance examination in English for international students, together with achievement in graduate work.

A second alternative is to study sources in an allied field such as history, political science, linguistics, psychology, economics, philosophy, or mathematics. You are permitted to substitute for the language requirement a set of three upper division or graduate courses offered at UCLA and passed with a grade of at least B. Contact the department for further information and guidelines for language substitutions.

Course Requirements

In addition to the departmental requirements, area programs and some subareas have their own course requirements for affiliated students.

**Before the Master's Paper Review:** Nine courses (36 units) are required.

- (1) Sociology 202A-202B (must be taken in the first year).
- (2) A two-quarter graduate-level methodology sequence of which there are several alternatives (e.g., the survey methods course, the demographic methods course, etc.). The methodology series is presently numbered 211A through 211B. In choosing a methodology sequence, you should note that some of the Ph.D. area programs and subprograms require particular methodology sequences.
- (3) Five 200-level courses in sociology, excluding Sociology 202A-202B, 211A through 211B, and the 289, 290, 292, 293, and 295 series. Because four of the five area programs require successful completion of Sociology 210A-210B, you would ordinarily take these courses in your first two years and are strongly urged to do so in your first year.

Students intending to affiliate with an area would do well to satisfy some of its requirements in the first two years. Contact the department for information about entering the area programs.

**After the Master's Paper Review:** Two courses (eight units) are required. An additional methodology sequence (from courses 211A through 211B) must be completed before the awarding of the Ph.D. degree.

Course requirements for the five area programs are listed below. Contact the graduate affairs assistant or area directors for more specific details and for other requirements such as special papers.

2. **Ethnomethodological, Phenomenological, and Observational Sociologies:** Sociology 222; at least three courses from 223, 229, 251, 252, 266, 267, 284; an additional methods sequence selected from courses 217A-217B, 218A-218B, or C244A/C244B (two of these sequences must be completed before the oral qualifying examination); courses 293A-293B-293C. If you plan to take one field examination in this area, you should take at least three additional courses significantly related to this field; if you plan to take two field examinations in this area, you should take six additional courses (courses 223, 229, 251, 252, 266, 267, and 284 may be applied toward this requirement).

3. **Macrosociology:** Sociology 211A-211B, 228A-228B, 294A-294B-294C, and three relevant graduate courses in any department approved by the director and your adviser.

4. **Quantitative Sociology:** Sociology 232 and 295A-295B-295C.

Advanced Statistics Specialty: Courses in calculus, linear algebra, and mathematical statistics (preferably taken as an undergraduate) and a program of coursework and supervised individual study, selected in consultation with the area faculty, designed to provide suitable depth of coverage of an appropriate range of statistical techniques.

Applied Sociology and Evaluation Research Specialty: Sociology 210C, 280, and courses in calculus and linear algebra (preferably taken as an undergraduate).

Mathematical Sociology Specialty: Sociology 281, courses equivalent to Mathematics 115A, and other mathematics courses that may be required for particular specialties.
Survey Research Method Specialty: Sociology 216A-216B and a graduate-level course in sampling, such as Public Health 201H.

(5) Social Psychology: Completion of an undergraduate program equivalent to at least two courses from Sociology 132 through 137 and 148 and 160, and at least two courses in psychology, selected from the fields of learning, language and communication, personality, social psychology, and abnormal psychology; Sociology 224A-224B, 289A-289B-289C; a second methods sequence, in addition to the one required for the M.A., selected from courses 214A-214B, 215A-215B, 216A-216B, or 217A-217B.

Courses in the 500 series (596, 597, 599) are not normally taken in preparation for the master's paper review, the field examinations, and for dissertation research. They may not be applied toward the course requirements for the degree.

Master's Paper Review
By the end of your second year of study, you must submit an acceptable master's paper for approval by the general faculty. The paper must demonstrate a general competence in sociological theory, methodology, and selected substantive areas and in intellectual attainment.

The paper should demonstrate that you (1) have an accurate grasp of the intellectual traditions of sociology, (2) can bring evidence to bear on theoretical problems, (3) can describe how some aspect of the social order works, and (4) can adequately handle research and methodological issues. The main concern is with your capacity to do Ph.D.-level work.

After review of the paper, any of the following options may be recommended:

(1) The paper is passed. You are granted the M.A. and permitted to proceed to the Ph.D.
(2) The paper is passed conditionally. You are granted the M.A. and permitted to proceed to the Ph.D. after completion of specified revisions of the paper.
(3) You are granted a terminal M.A.
(4) The paper is not acceptable (you may resubmit at a later time or may be asked to withdraw).

If you enter UCLA with an M.A. degree in Sociology from another institution, you normally come up for a master's paper review in your first quarter of residence at UCLA, and under no circumstances later than the third quarter of residence. In this review, the department determines whether you may proceed directly to preparation for the field examinations or whether additional work must be done, and if the methodology sequence requirement has been adequately satisfied. In addition to a paper, which can be an M.A. thesis written at another university, you should submit for the master's paper review a transcript from the university at which the M.A. degree was earned. Contact the department for further details on master's paper review.

Field and Qualifying Examinations
The department requires you to pass two field examinations before taking the University Oral Qualifying Examination for the Ph.D. The emphasis here is on mastery and depth of understanding in two areas of specialized study. Field examinations are administered and evaluated under guidelines established by area programs. You may take both or just one of your field examinations in the area with which you are affiliated. Each area program also has procedures enabling unaffiliated students to take field examinations in that area. Details are available from area directors and from the graduate affairs assistant.

If your performance on the field examination is satisfactory and the foreign language requirement has been fulfilled, you may nominate a doctoral committee and take the University Oral Qualifying Examination. You must prepare a two-page abstract of the dissertation proposal for distribution to the entire departmental faculty no later than one week before the examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The optional final oral examination for the Ph.D. degree is given by the doctoral committee no later than six months after the completion of the dissertation. A decision to waive the final examination is optional on the part of the Ph.D. committee.

Lower Division Courses

1. Introductory Sociology. Not open for credit to students with credit for former course 101. Survey of the characteristics of social life, the processes of social interaction, and the tools of sociological investigation.
   Mr. Horton, Mr. Lopez, Mr. Mann

2. Changing Society and Making History. Lecture, three hours; discussion, one hour. Leading question: how do politics, economics, and culture interact in changing society and making history? Answers provided by an introductory level of study of the contending substantive theories and contrasting methods of inquiry contained both in classic and exemplary contemporary works.
   Mr. Champagne, Mr. Prager, Mr. Zeitlin

3. Sociology of Everyday Life. Lecture, three hours; discussion, one hour. Examination of the ways in which taken-for-granted aspects of everyday life and relationships are shaped by interactional, cultural, and historical processes. Cultivation of the capacity to critically observe the tacit practices through which everyday life is constructed.
   Mr. Emerson, Mr. Katz, Mr. Pollner

   Mr. Light, Ms. Zucker

9. Computers and Social Change. Lecture, two hours; laboratory, three hours. The impact of technological change from computers and computing on people, jobs, business firms, industries, and educational and legal institutions. Whenever needed for an adequate understanding of those topics, course also provides information on selected aspects of contemporary computers and the history of computing. In addition to reading assignments and lectures, course involves direct experience in a computing laboratory.
   Mr. McFarland

18. Interpretation of Quantitative Data. Prerequisite or corequisite: course 1. Satisfies the statistics requirement for the major in sociology. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; the binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of American Sociological Review or other leading sociological journals.
   Mr. Lopez, Mr. Zeitlin 68A-68Z. Lower Division Seminars. Lecture, three hours. Limited to 15 freshmen and sophomores. Variable topics of current sociological interest. Consult Schedule of Classes or "Department Announcements" for current topics and instructors.

Upper Division Courses

101. Development of Sociological Theory. Formerly numbered 112.) A comparative survey of basic concepts and theories in sociology from 1500 to 1950; the methodological and philosophical issues of the discipline; a critical analysis of trends in theory construction.
   Mr. Horton, Mr. Lopez, Mr. Mann

102. Contemporary Sociological Theory. Formerly numbered 113.) A critical examination of significant theoretical formulations from 1920 to the present; an analysis of the relation between theoretical development and current research emphasis.
   Mr. Alexander, Mr. Champagne, Mr. Mann

103. Marxist Sociology. (Formerly numbered 114.) The fundamentals of Marxist theory and method and their historical development. Attention to continuing debates within Marxism and to differences between Marxism and other schools of sociological thought. May not be applied toward the theory requirement for the major.
   Mr. Horton

104. Introduction to Sociological Research Methods. (Formerly numbered 106.) A systematic treatment and some qualitative methods of use in sociological research (e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case materials). Fieldwork may be required.
   Mr. Bailey, Mr. Freeman, Mr. TenHouten

105. Research Methods in Policy Analysis and Evaluation. (Formerly numbered 110.) Prerequisite: course 144 or consent of instructor. Recommended: course 104. Approaches for identifying and analyzing social problems and for the assessment of policies and interventions for their control and management.
   Mr. Freeman, Ms. Zucker
106. Field Research Methods (5 units). (Formerly numbered 117.) Lecture, two hours; discussion, two hours; fieldwork, 12 hours. Prerequisites: upper division standing, consent of instructor. Fieldwork and extensive field notes of the theory and logical sequence of field research, with particular emphasis on the interrelations between fieldwork role and substantive findings.

Mr. Emerson

112. Introduction to Mathematical Sociology. (Formerly numbered 141.) Lecture, three hours; laboratory, one hour. Prerequisites: course 18. Mathematics 2, 3A (a course whose content includes introductions to probability theory, matrix algebra, and differential and integral calculus), or equivalent. Mathematical treatment of the sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both the deductive and computational aspects of mathematics).

Mr. Bonacich, Mr. McFarland

113. Statistical and Computer Methods for Social Research. (Formerly numbered 118.) Lecture, three hours; laboratory, one hour. Prerequisite: course 18. A continuation of course 18, covering more advanced statistical techniques such as multiple regression, analysis of variance, and factor analysis. Content varies: Students learn how to use the computer and write papers analyzing prepared data sets.

Mr. Bonacich, Mr. McFarland, Mr. TenHouten

Mr. Bailey, Ms. Oppenheimer, Mr. Sabagh

117. Sociology of Family Demographic and Economic Behavior. (Formerly numbered 127.) An examination of demographic behavior associated with the social organization of the family and future trends in population growth. Sociological theories of causes and consequences of population growth and redistribution are studied.

Mr. Oppenheimer

118. Demography and Sociology of Women’s Economic Roles. (Formerly numbered 160.) Prerequisites: courses 1 and 18 or Statistics 50 or Psychology 41. Students meet with Health, Arts, or computer of instructor. A demographic and sociological analysis of the factors affecting women’s economic roles in the world of work and family. Topics include demographic determinants of women’s economic roles, labor force participation, sex roles, the family and its occupational status, and women’s contribution to economic status of the family.

Ms. Oppenheimer

128. Study of Norms. (Formerly numbered 149.) Properties of norms, of normatively governed conduct, of lay and professional methods for describing, producing, using, and validating norms in contrasting sociological situations. Emphasis on the social structural explanations of these properties for the programmatic problems of analytic sociology. Fieldwork required.

Mr. Pollner

127. Sociology of Knowledge. (Formerly numbered 159.) Prerequisites: course 1 or equivalent. A study of the theories of knowledge and their social implications. The study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in every day, organizational, and extraordinary contexts.

Mr. Pollner, Mr. Ten Houten

129. Social Psychology: Sociological Approaches. (Formerly numbered 154.) A survey of the uses of sociological theory to the study of social psychology, including the analysis of social control; conformity and deviation; reference groups, and interaction process.

Mr. Bonacich, Mr. Rabow, Ms. Zucker

133. Collective Behavior. (Formerly numbered 150.) Prerequisites: from a variety of theoretical approaches to social theory, upper division standing. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and preserving social order.

Mr. Turner

134. Culture and Personality. (Formerly numbered 151.) Prerequisites: courses 1, 18, or equivalent, upper division standing. Theories of the variation in personality to culture and group life, in primitive and modern societies, and influence of social role on behavior.

Mr. Turner

135. Group Processes. (Formerly numbered 152.) Systematic study of the formation, structure, and functioning of groups: analysis of group processes and group products from a variety of theoretical approaches; implications of various research techniques.

Mr. Bonacich, Ms. Zucker

136. Process and Socialization in the Family. (Formerly numbered 153.) Prerequisites: courses 1, 18, or equivalent, upper division standing. Examination of the processes of interaction, decision making, role differentiation, conflict, integration, and socialization within the family and their interrelations with society.

Mr. Bailey

137. Psychoanalytic Sociology. (Formerly numbered 156.) Prerequisites: courses 1, 18, recommended prerequisite: course 101 or 102. In social psychology. Designed to review the models of integration between psychoanalysis and sociology. Analysis of the major sociological and psychological theories of the genesis of crime applied to criminal behavior by business and political elites, including a history and evaluation of criminal law enforcement against white-collar illegalities.

Mr. Alvarez, Mr. Kitano, Mr. Prager

138. Death and Suicide. (Formerly numbered 157.) Lecture, three hours. Description and analysis of suicide and its correlates to the social structure of community; the social organization of death; the new permissiveness and taboos in discussions of death; the status of the dying and others; ways in which ideas of death influence the conduct of lives; the impact of dying on the social structure surrounding the individual; preventive, intervention, and postventive practices in relation to death and suicide; partial death; megadeath; lethality; the psychological autopsy; the death of institutions and organizations. Designed to review the models of integration between psychoanalysis and sociology. Analysis of the major sociological and psychological theories of the genesis of crime applied to criminal behavior by business and political elites, including a history and evaluation of criminal law enforcement against white-collar illegalities.

Mr. Levy

139. Comparative Studies of Jewish Communities in the U.S. and Abroad. (Formerly numbered 137.) The history, distribution, structure, and functioning of major Jewish communities, with particular emphasis on the extensive field notes of the theory and logical sequence of field research, with particular emphasis on the interrelations between fieldwork role and substantive findings.

Mr. Bailey

145. Sociology of Deviant Behavior. An examination of the leading sociological approaches to the study of deviant and a general survey of the major types of deviation in American society.

Mr. Hopton, Mr. Surace

146. Criminology. Theories of the genesis of crime and the organization of criminal behavior from the point of view of the person and group: criminal behavior systems. (Formerly numbered 147.) Mr. Katz, Mr. Rabow

Mr. Emerson

148. Sociology of Mental Illness. (Formerly numbered 157.) Analysis of the major sociological and social psychological models of madness. Study of the social processes involved in the production, recognition, labeling, and treatment of "mental illness."

Mr. Emerson

149. Social Organization of Psychiatric Treatment. (Formerly numbered 161.) Strongly recommended prerequisite: course 148. Review of current research and theory on psychiatric treatment processes and treatment organizations serving mental hospitals and community mental health organizations.

Mr. Emerson

150. White-Collar Criminality. (Formerly numbered 164.) Lecture, three hours. Prerequisite: course 148 or equivalent. The study of the sociology of white-collar crime, the organization, acculturation, and differentiation. The development, operation, and effects of social control systems and organizations and their relationship to the social structure of American society.

Mr. Alvarez, Mr. Kitano, Mr. Prager

152. Social Stratification. (Formerly numbered 123.) An analysis of American social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, the composition of stratification systems, mobility, consequences of stratification, and problems of methodology.

Mr. Lopez, Mr. McFarland, Mr. Yamaguchi

156. Ethnic and Status Groups. (Formerly numbered 124.) The characteristics of the "ethnic" ethnic groups (e.g., Japanese, Mexican, and black); their organization, acculturation, and differentiation. The development, operation, and effects of social control systems and organizations and their relationship to the social structure of American society.

Mr. Alvarez, Mr. Kitano, Mr. Prager

159. Comparative Studies of Jewish Communities in the U.S. and Abroad. (Formerly numbered 137.) The history, distribution, structure, and functioning of major Jewish communities, with particular emphasis on the extensive field notes of the theory and logical sequence of field research, with particular emphasis on the interrelations between fieldwork role and substantive findings.

Mr. Bailey

160. Intergroup Conflict and Prejudice. (Formerly numbered 155.) A study of the causes and consequences of group conflict and the process of group organization. Major themes include minority relations, prejudice, and discrimination. Special attention to alternative sociological and psychological theories of prejudice: the effects of minority status on the individual, and the possibilities for attitude and behavior change.

Mr. Olver

161. Comparative American Indian Societies. (Formerly numbered 135.) Lecture, three hours. Prerequisite: course 1. The comparative and historical study of political systems, economic change, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies.

Mr. Champagne
215A-215B. Experimental Sociology. Prerequisite: course 210A or equivalent, consent of instructor. The basic fundamentals of the experimental method are presented, with emphasis on the methodological principles that are used in social psychology. In Progress grading.

Mr. Grusky, Mr. Rabow, Mr. Shure

216A-216B. Survey Research Methods. Course in methodology and techniques: formulation of research problems; hypotheses; sampling; measurement; questionnaire and schedule construction; interviewing and data collection; processing and tabulation; analysis and interpretation; presentation of findings; cross-national, replicative, panel, and other complex survey designs. Students participate in survey research project. In Progress grading.

Mr. Levine, Mr. TenHouten, Mr. Teiman

217A-217B. Ethnographic Fieldwork. Prerequisite: consent of instructor. Theories and techniques of ethnographic fieldwork. The kinds of problems amenable to ethnographic approaches, methods, and techniques for doing fieldwork, and ethnical problems involved in such research. In Progress grading.

Mr. Emerson, Mr. Katz, Mr. Poliner

218A-218B. Ethnomethodological Methods. Prerequisite: consent of instructor. Examination of techniques used in ethnomethodological research, practice in carrying out an essay in ethnomethodology, and directed experience in the conduct of an extended investigatory employing ethnomethodological procedures. In Progress grading.

Mr. Garfinkel

219A-219B. Advanced Statistical Methods I, II. Lecture, three hours; discussion, two hours. Prerequisite: courses 210A-210B or equivalent or consent of instructor. Not required. Advanced multivariate statistical methods: discrete variables and events, logit and probit models, event-history analysis, the general linear model, exploratory and confirmatory factor analysis, linear causal models, latent variables, reciprocal causation, classification and clustering, time-series analysis.

220. Role Theory. Prerequisite: graduate standing or consent of instructor. A review of theories and research dealing with social roles, with special emphasis on roles in social interaction and in formation of the social self.

Mr. Turner

221. Social Ecology. Prerequisites: courses 18, 126, or equivalent, and graduate standing, or consent of instructor. An examination of the various approaches to both microecology and macroecology, including classical and nonclassical; sociology of analysis, sociocultural ecology, city-size distributions, effects of population density on animals and humans, proxemics, territoriality, and the effects of the physical environment on human, replicative, panell, and Bailey

222. Foundations of Ethnomethodological, Phenomenological, and Analytic Sociology. Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Basic issues, methods, and topics of ethnomethodological, phenomenological, conversation-analytic, and related varieties of inquiry. Central themes such as the world of everyday life, the problem of rationality, rules/norms and tacit knowledge, the problem of social order, speaking and discourses, constitutive practices, and the production of ordinary interaction in the first part; guest presentations by affiliated faculty in the second part.

223. Phenomenological and Interactionist Perspectives on Selected Topics. Lecture, three hours. Comparison of phenomenological and symbolic interactionist perspectives by examining a particular body of literature or recently unresolved substantive issues. Topics vary. An emphasis on development of phenomenological and interactionist thought on the topic of concern, with special concern for ambiguities and divergences both within and between the two approaches. A lab is used to introduce students to the history of and historical relations of phenomenology and interactionism of pragmatist, existentialist, and ordinary language philosophers.

Mr. Katz

224A-224B. Problems in Social Psychology. Prerequisites: course 210A, consent of instructor. Basic course for graduate students intending to specialize in social psychology. Current research topics and methodologies: formulation of research questions for doing fieldwork, and ethnical problems in doing sociological fieldwork. The kinds of problems amenable to ethnographic approaches, methods, and techniques. A consideration of some of the more expanded sequence structures, story structures, topical sequences, and the overall structural organization of single conversations. May be concurrently scheduled with course 124A. Graduate students have additional assignments and/or meet as a group one additional hour each week.

M. McFerland

224A. Conversational Structures I, II. Lecture, three hours; discussion, one hour. An introduction to some of the structures which are employed in the organization of conversational interaction, such as turn-taking organization, the organization of repair, and some basic sequence structures with limited historical consideration. May be concurrently scheduled with course 124A. Graduate students have additional assignments and/or meet as a group one additional hour each week.

M. Schegloff

245. Cultural Studies. Discussion, three hours. Prerequisite: consent of instructor. Allows graduate students to become familiar with the range of contemporary studies of culture. Taking as its assumption that symptoms are merely analogues of the underlying causes, the reader is provided with an understanding of the social and institutional contexts within which the symptoms exist. The reader is provided with an understanding of the social and institutional contexts within which the symptoms exist. Mr. Emerson, Mr. Rabow, Mr. Surace

232. Survey Data Acquisition. Lecture, three hours. Prerequisites: courses 210A-210B. Traditional topics on survey research practice in study design, instrument design, sampling, interviewing, and data management. Parallel coverage of research literature on various sources of nonsampling response bias that influence survey results. An ongoing survey that employs Computer-Assisted Telephone Interviewing is available as a resource for the course.

Ms. O'Shea, Ms. Wingle

233. Foundations of Political Sociology. Lecture, three hours. Prerequisite: graduate standing or consent of instructor. A survey of the field of political sociology, oriented around critical themes in the major theoretical traditions and contemporary exemplars. Special attention to competing perspectives on political power, the theory of the state, and the relationship of class structure to politics.

Mr. Prager, Mr. Roy

234. Sociology of Community Organization. Prerequisites: graduate standing, consent of instructor. A survey of recent research and literature dealing with predominantly political institutions, the problem of order, and the organization of communal life in the village and the metropolis.

236. Social Change in the Middle East. An analysis of the sources, extents, and types of social change in the Middle East, with emphasis on the origin and consequences of industrialization and urbanization.

Mr. Sabagh

237. Social Stratification in the Middle East. Modes of social differentiation in traditional Middle Eastern societies, localism and tribalism, the counter influence of processes leading to the recurrent emergence of societies of large scale and their distinctive structural characteristics.

Mr. Sabagh

238A-238B. Fieldwork in Minority Communities. Seminar, two hours. Prerequisites, graduate standing, consent of instructor. Designed to supply graduate students with conceptual and methodological skills for studying minority communities. Mr. Los Angeles is the laboratory. Emphasis on both ethnographic and survey research techniques. In Progress grading.

Mr. Levine

240. Mathematics of Population. Prerequisite: prior knowledge of matrices, calculus, and probability theory. Discrete and continuous deterministic and probabilistic models of the growth and composition of a one-sexed population classified by age, plus selected topics on more complicated population models.

Mr. McFerland

241. Research Methods in Child Development. Seminar, two hours; discussion, one hour. An introduction to the use of qualitative methods in research on children, with a focus on new and emerging methods. Mr. Bailey

242. Social Problems in the Middle East. Lecture, three hours. Prerequisite: courses 210A-210B or consent of instructor. Designed to supply graduate students with conceptual and methodological skills for studying minority communities. Mr. Los Angeles is the laboratory. Emphasis on both ethnographic and survey research techniques. In Progress grading.

Mr. Levine

247. Neurosociology. Prerequisites: graduate standing, consent of instructor. Relations between aspects of social structure and higher cortical functions.

Mr. TenHouten

248. Sociology of Cognitive Development. Prerequisite: graduate standing or consent of instructor. Analysis of ways in which mental processes are structured and organized by positions and practices in the social world, and by change and development in society.

Mr. TenHouten

249A. Sociocultural Aspects of Health and Illness: Health Professions. (Same as Public Health M283F). Lecture, three hours. Prerequisites: Public Health 182, three psychology, sociology, or anthropological courses, or equivalent, consent of instructor. Sociocultural processes of the concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to the meaning of professionalization and professional-client relationships within a range of organization settings.

Mr. Goldstein
250. Methodological Problems.
Mr. Bailey, Mr. TenHouten

251. Topics in the Problem of Social Order.
Mr. Garfinkel

252. Criminology.
Mr. Katz, Mr. Rabow

Mr. Bailey, Mr. Bonacich, Mr. Freeman

254. Sociology of Law.
Mr. Light, Mr. Zeitlin

255. Critical Perspectives on the Societies and Institutions Area Program.
Mr. Emerson, Mr. Katz, Mr. Prager

256. Demography.
Mr. Bailey, Mr. Sabagh

257. Sociology of Religion.
Mr. Champagne

258. Sociology of the Family.
Mr. Mr. Garfinkel, Mr. Strauss

259. Sociology of Class and Economic Change: Historical and Comparative Perspectives.
Ms. Chang, Mr. Surace, Mr. Zeitlin

260. Economy and Society.
Mr. Messner, Mr. Spivack

261. Ethnic Minorities.
Mr. Levine, Mr. Seeman

262. Selected Problems in Urban Sociology.
(Same as Afro-American Studies M200C.) Seminar.
Prerequisite: consent of instructor.

263. Social Stratification.
Mr. Greenberg, Mr. Mr. Turner

264. Professions in the American Society.
Ms. Oppenheimer

265. Problems in Organization Theory.
Mr. Mizruchi, Ms. Zucker

266. Selected Problems in the Analysis of Conversation.
Prerequisite: course C144A or consent of instructor.

267. Selected Problems in Communication.
Mr. Polnir, Mr. Schegloff

268. Selected Problems in Psychoanalytic Sociology.
Mr. Polnir, Mr. Schegloff

269. Collective Behavior.
Mr. Turner

270. Selected Problems in Socialization.
Mr. Turner

271. Ethnomethodology.
Mr. Garfinkel

272. Topics in Political Sociology.
Mr. Roy, Mr. Surace, Mr. Zeitlin

273. Attitudes and Social Structure.
Mr. Seeman

274. Selected Problems in the Sociology of Africa.
Prerequisites: graduate standing, consent of instructor.
Selection of problems in the sociology of Africa from among the following fields: urbanization, racial and ethnic relations, national integration, and political change.

(Same as American Indian Studies M200C and Anthropology M269.) Introduction to the most important issues facing American Indians and Native Americans, communities, tribes, and organizations in the contemporary world, building on the historical background presented in American Indian Studies M200A and the cultural and expressive experience of American Indians presented in American Indian Studies M200B.
Mr. Mr. Champagne, Ms. Hath

276. Selected Topics in the Sociology of East Asia.
Mr. Mr. Warner, Mr. Drabkin

277. Sociology of Science.
Mr. Mr. Kornblum

278. Sociology of Race and Ethnic Relations.
Mr. Mr. Seeman

279. Social Change and Social Control.
Mr. Mr. Turner

280. Seminar in Evaluation Research.
Prerequisite: graduate standing. The technical and political aspects of evaluation research studies. May be repeated for credit. S/U or letter grading.

281. Selected Problems in Methodological Sociology.
Prerequisite: consent of instructor. An exploration of some mathematical models of sociological processes. Possible topics include models of small groups, social mobility, kinship relations, organizations, social interactions.
Mr. Mr. Turner

282. Organizations and the Professions.

283. Topics in Health Behavior.
Prerequisites: course 157 or equivalent, graduate standing. May be repeated for credit. S/U grading.

Mr. Mr. Low

Prerequisite: course C144A or consent of instructor. May be repeated for credit. S/U grading.

Prerequisite: apprentice personnel employment as a teaching assistant. A teaching assistant must make a presentation each quarter they are enrolled for credit. May be repeated for credit. S/U grading.

287. Seminar in Research Methods.
Prerequisite: graduate standing. Review of current literature in sociological methods area program. A forum for the presentation of advanced work in social psychology designed to develop an ability to understand, critically evaluate, and present research in fields relevant to the study of social psychology.

Prerequisite: graduate standing. Required of all students in the social psychology area program, but open to all graduate students in good standing. A forum for the presentation of advanced work in social psychology designed to develop an ability to understand, critically evaluate, and present research in fields relevant to the study of social psychology. May be repeated for credit. S/U grading.

289A. Seminar in Social Psychology (2 units each). Lecture, one hour; discussion, one hour. Prerequisite: graduate standing, consent of instructor. May be repeated for credit. S/U grading.

290A-290B-290C. Social Organization and Institutions Seminar (2 units each). Lecture, one hour; discussion, one hour. Prerequisite: graduate standing, consent of instructor. May be repeated for credit. S/U grading.

291. Moral Solidarity in Communities. Comparative analysis of social solidarity and the collapse of social solidarity in voluntary and traditional communities. Contrasts more and less solidarity types, with special reference to utopian communities and developmental processes.
Mr. Mr. Light

293A-293B-293C. Colloquium in Ethnomethodological, Phenomenological, and Observational Sociologies (2 units each). Prerequisites: courses C144 and C144B or 217A-217B or 218A-218B and 222, or consent of instructor. Participants present ongoing work and discuss exemplary past work as part of a discussion group. A continuing colloquium in which participation is expected of faculty and graduate students affiliated with the ethnomethodological, phenomenological, and observational sociologies area program. May be repeated for credit. May be used as a minor field examination (may be exempt on request). S/U grading.

294A-294B-294C. Research Seminar in Macrosociology. Discussion, two hours. Prerequisite: consent of instructor. Required of students in the macrosociology area program. A seminar for the presentation of advanced work in macrosociology and the cultural and expressive experience of American society. Review of current literature in sociological methods area program. A forum for the presentation of advanced work in social psychology designed to develop an ability to understand, critically evaluate, and present research in fields relevant to the study of social psychology. May be repeated for credit. S/U grading.

295A-295B-295C. Seminar in Models and Methods (2 units each). Ongoing seminar in the methods and models area program. A forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned or conducted or recently completed, including didactic presentations on important developments in the area. Students required to make a presentation each quarter they are enrolled for credit. May be repeated for credit. S/U grading.

375. Teaching Apprenticeship Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495A-495B. Supervised Teaching of Sociology (2 units each). Prerequisite: appointment as a teaching assistant in the Sociology Department or equivalent. A special course for teaching assistants designed to deal with the problems and techniques of teaching introductory sociology. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: program of students takes adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual Study and Research in Sociology (2 to 12 units).

597. Individual Study for Examinations (4 to 12 units). Preparation for M.A. degree paper or Ph.D. qualifying examinations. A continuing program in...
Preparation for the Majors

Required: Spanish 25 or equivalent as determined by the placement test; courses M35, M42, M44, or equivalent.

The Major, Plan A (Spanish Language and Literature)

The Major, Plan B (Spanish and Linguistics)

Required: Completion of six quarters of study in one other foreign language or three quarters in each of two other foreign languages, in addition to the preparation for the major courses. Portuguese is recommended.

The major consists of 15 upper division courses, including Spanish 100A, 100B, 105A, 105B, 119A, 119B, 120A-120B, 127, 136A-136B, and two electives in Spanish, at least one of which must be in literature.

Honors Program

To qualify for graduation with departmental honors, you must achieve a 3.0 overall grade-point average and a 3.5 grade-point average in the major and have completed two of the three senior honors seminars (Spanish 170A, 170B, 170C) with appropriate grades.

Bachelor of Arts in Portuguese

Preparation for the Major

Required: Portuguese 3, 25, M35, M42, M44, or equivalent.

The Major (Portuguese Language and Literature)

Required: Thirteen upper division courses, including Portuguese 100A, 100B, 105, 120A-120B, 130A-130B, and six elective courses in Portuguese, or four electives in Portuguese plus two courses from areas that complement your program approved by the undergraduate adviser in Portuguese.

Portuguese and Linguistics Concentration

Required: Completion of six quarters of study in one other foreign language or three quarters in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A, M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

Double Majors

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/ Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

Study in a Portuguese-Speaking Country

You are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with your individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

Bachelor of Arts in Spanish and Portuguese

Preparation for the Major

Required: Spanish 25, Portuguese 25, M35, M42, M44, or equivalent.

The Major

Required: Six upper division courses in language and linguistics, including Spanish 100A, 100B, Portuguese 100A, 100B, M118A or M118B, and either Spanish 105A or Portuguese 105; nine upper division courses in literature selected from one of the following groups: group A (peninsular literature to 1700) — Spanish 123, 124, 127, Portuguese C124, C125, C126, and three other literature courses, one of which must be in Spanish and one in Portuguese; group B (peninsular literature from 1700 to the present) — Spanish 128, 130,
133, Portuguese C127, C128, C129, and three other literature courses, one of which must be in Spanish and one in Portuguese; group C (Spanish-American and Brazilian literature from 1900) — Spanish 137, 139, 140, Portuguese C131, C132, C133, and three other literature courses, one of which must be in Spanish and one in Portuguese; group D (Spanish-American and Brazilian literature from 1900 to the present) — Spanish 142, 143, Portuguese C134, C135, and five other literature courses, two of which must be in Spanish and two in Portuguese.

Master of Arts in Spanish

Admission

Admission to the M.A. program is based on a careful review of your academic record by the graduate admissions committee. Minimum requirements include a B.A. in Spanish or the equivalent from UCLA or another recognized university, a satisfactory score on the Graduate Record Examination (GRE) General Test, and three letters of recommendation, preferably from professors with whom you have studied in the major field, who can comment on your potential as a graduate student. For admissions information, write to the Department of Spanish and Portuguese, 5310 Rolfe Hall, UCLA, Los Angeles, CA 90024-1532.

You may be required to take one or more comprehensive courses (which may not be applied toward the M.A.) if the committee determines that some area of your preparation in language or literature is deficient.

Foreign Language Requirement

You are required to study one of the following languages: French, German, Italian, Latin, Portuguese, or another language approved by your guidance committee. The requirement may be fulfilled by (1) passing the Educational Testing Service (ETS) language examination with a score of 500 or better, (2) passing the University reading examination in one of these languages when no ETS examination is available, or (3) passing at least a level three course at UCLA.

Course Requirements

Eleven graduate Spanish courses are required, at least one of which must be a seminar taken only after the appropriate preseminar. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

Three plans of study for the M.A. in Spanish are offered: Plan A, Linguistics; Plan B, Literature; Plan C, Linguistics and Literature.

Plan A (Linguistics): Spanish M200, one graduate course in literature offered by the department, and nine elective graduate courses are required. You must select one major field (five courses) and one minor field (three courses) from the following areas of specialization: phonology and morphology; syntax, diachronic or synchronic language variation. One additional course must be selected from an area outside your major and minor fields.

Plan B (Literature): Spanish M200, one course from 202 through 209, and nine elective graduate courses are required. You must select one major field (four courses) and one minor field (three courses) from the following areas of specialization: Spanish literature from its beginning to 1700; Spanish literature from 1700 to the present; Spanish-American literature from its beginning to 1900; Spanish-American literature from 1900 to the present. Two additional courses must be selected from areas outside your major and minor fields.

Plan C (Linguistics and Literature): Spanish M200 and 10 elective graduate courses, five in literature and five in linguistics, are required. The five literature courses are to be selected from three of the fields specified in Plan B, two courses from each of two areas and one from another. Of the five courses in linguistics, one must be in phonology and morphology, one in syntax, and one in diachronic or synchronic language variation.

Comprehensive Examination Plan

One quarter before you propose to take the comprehensive examination, you must present to your guidance committee reading lists which constitute the basis for your examination. Students in Plan A receive a list of essential reading when they enter the plan and must present one reading list for the major field and one for the minor field. If you are in Plan B, you must present for approval one reading list in your major field and one in your minor field. Plan C students must present for approval reading lists representing the literature fields (the reading list for linguistics is established by the guidance committee).

Thesis Plan

You may petition to present a thesis in lieu of taking the comprehensive examination only after you complete five graduate courses. The graduate adviser and your committee will approve your petition only if they find evidence of exceptional ability and promise in your term papers and coursework.

Master of Arts in Portuguese

Admission

The UCLA Bachelor of Arts in Portuguese or the equivalent is required. Other admission requirements are the same as those for the M.A. in Spanish.

Major Fields

You must select one major field and two minor fields from the following specialization areas: Portuguese literature; Brazilian literature; Portuguese linguistics.

Foreign Language Requirement

You are required to study one of the following languages: French, German, Italian, Latin, Spanish, or another language approved by your guidance committee. The requirement may be fulfilled by (1) passing the Educational Testing Service (ETS) language examination with a score of 500 or better, (2) passing the University reading examination in one of these languages when no ETS examination is available, or (3) passing at least a level three course at UCLA.

Course Requirements

Portuguese M200, M201, and eight elective graduate courses in Portuguese are required, at least one of which must be a seminar. You must select four courses in your major field and two courses in each of your two minor fields. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

Comprehensive Examination Plan

The examination consists of (1) a three-hour written test in your major field and (2) a 90-minute written test in each of your two minor fields. One quarter before you propose to take the comprehensive examination, you must present for approval to your guidance committee one reading list for your major field in literature (approximately 15 authors and 30 works) and one reading list for your minor field in literature (approximately six authors and 15 works). The reading lists form the basis of the literature section of the examination (the reading list for linguistics is established by the guidance committee).

Thesis Plan

You may petition to present a thesis in lieu of taking the comprehensive examination only after you complete five graduate courses, one of which must be a seminar. The graduate adviser and your committee will approve your petition only if they find evidence of exceptional ability and promise in your term papers and coursework.

Ph.D. in Hispanic Languages and Literatures

Admission

The UCLA Master of Arts in Spanish or in Portuguese, or the equivalent, is required. Three letters of recommendation are also required from professors familiar with your work as a graduate student, to be addressed to your capacity for research-oriented doctoral studies
Major Fields or Subdisciplines

The department recognizes the following areas of specialization, from which you select one major field and two minor fields, together with an optional complementary support area: (1) Spanish linguistics; (2) Portuguese linguistics; (3) diachronic Hispanic linguistics and philology; (4) medieval Spanish literature; (5) Renaissance and Golden Age Spanish literature; (6) 18th- and 19th-century Spanish literature; (7) 20th-century Spanish literature; (8) colonial and 19th-century Spanish-American literature; (9) 20th-century Spanish-American literature; (10) early Portuguese literature; (11) modern Portuguese literature; (12) Brazilian literature; (13) Spanish and Luso-Brazilian folklore.

Foreign Language Requirement

Reading knowledge of two foreign languages in addition to both Spanish and Portuguese is required. The languages are selected in consultation with your guidance committee. The requirement may be fulfilled by (1) passing the Educational Testing Service (ETS) language examination with a score of 500 or better, (2) passing the University reading examination in the language when no ETS examination is available, or (3) passing at least a level three course at UCLA. You must fulfill the requirement in one of the languages no later than the sixth quarter of graduate study.

Course Requirements

After the B.A., a minimum of 20 graduate courses is required. Spanish or Portuguese M201 may be required if you do not have prior credit for it. You normally take a minimum of six graduate courses in your major field, of which at least two must be seminars. In each of the minor fields, you normally take a minimum of four graduate courses, of which at least one must be a seminar.

Qualifying Examinations

The qualifying examinations, given during the fifth and sixth weeks of the Fall, Winter, and Spring Quarters, consist of (1) a four-hour written examination in the major field, (2) a two-hour written examination in each minor field, and (3) a two-hour University Oral Qualifying Examination on the three fields and at which your prospectus for the dissertation is discussed and approved. The written examinations are normally taken no later than nine quarters after receiving the B.A. and six quarters after receiving the M.A. Only students who pass the qualifying examinations are advanced to candidacy for the Ph.D.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is optional at the committee's discretion.

Spanish

Lower Division Courses

Spanish 1 through 3 use Shumway and Forbes' Esparolof en esparolof. The method is inductive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish—students simultaneously learn to understand, speak, read, and write Spanish.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Spanish. Discussion, five hours; laboratory, one hour.

10. Reading Course for Graduate Students. Lecture, three hours. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.

2. Elementary Spanish. Discussion, five hours; laboratory, one hour. Prerequisite: course 1 or equivalent as determined by the placement test.

20. Reading Course for Graduate Students. Lecture, three hours. Prerequisite: course 1G or equivalent. May not be applied toward degree requirements. S/U grading.

3. Elementary Spanish. Discussion, five hours; laboratory, one hour. Prerequisite: course 2 or equivalent as determined by the placement test.

4. Intermediate Spanish. Discussion, five hours; laboratory, one hour. Prerequisite: course 3 or equivalent as determined by the placement test.

5. Intermediate Spanish. Discussion, five hours; laboratory, one hour. Prerequisite: course 4 or equivalent as determined by the placement test.

6. Intermediate Spanish for Spanish Speakers. Prerequisite: proficiency as determined by the placement test. Concentration on the formal aspects of the language (i.e., spelling, punctuation, accentuation, composition, reading, and traditional grammar) in lieu of Spanish 5.

8A-8B. Spanish Conversation (2 units each). Discussion, three hours. Course 8A is open to students with credit for course 4 or equivalent. Students who have completed course 3 with a grade of B or better may be admitted.

9A-9B. Advanced Conversation (2 units each). Discussion, three hours. Prerequisite: course 8B or equivalent.

25. Advanced Spanish. Prerequisite: course 5 or equivalent. Concentration on the building of vocabulary and the attainment of a high degree of comprehension in preparation for the courses in literature.

26. Composition for Spanish Speakers. Lecture, three hours. Prerequisites: course 5 or equivalent, consent of instructor. Practice in the reading and writing of Spanish for students with oral proficiency in Spanish (in lieu of Spanish 25).

M35. Spanish, Portuguese, and the Nature of Language. (Same as Portuguese M35) Lecture, three hours. Introduction to language study within the context of Romance languages, focusing on Spanish and Portuguese. The nature of language: its structure, its diversity, its evolution, its social and cultural settings, its literary uses. The study of language and its relation to other areas of human knowledge.

M42. Civilization of Spain and Portugal. (Same as Portuguese M42.) Required of majors. Highlights of the civilization of Spain and Portugal, with emphasis on their artistic, economic, social, and historical development as a background for upper division courses. Conducted in English.

Mr. Cruz-Salvadores

M44. Civilization of Spain America and Brazil. (Same as Portuguese M44.) Required of majors. Highlights of the civilization of Spanish America and Brazil, with emphasis on their artistic, economic, social, and historical development as a background for upper division courses. Conducted in English.

Mr. Reeves, Mr. Skirius

60A-60B-60C. Hispanic Literatures in Translation. (Formerly numbered 160A-160B-160C.) Lecture, three hours. Class readings and analysis of selected works in translation. Classroom discussion, papers, and examinations in English. 60A. Spanish Literature; 60B. Spanish-American Literature; 60C. Don Quijote.

Upper Division Courses

Prerequisite to all upper division courses is Spanish 25 or equivalent as determined by the placement test.

100A. Introduction to the Study of Spanish Grammar: Phonology and Morphology. Lecture, three hours. Prerequisite: course M35. Analysis of the phonemic and morphological systems of Spanish.

Ms. Plann

100B. Introduction to the Study of Spanish Grammar: Syntax. Lecture, three hours. Prerequisite: course M35. A study of the syntactical systems of Spanish.

Mr. Otero, Ms. Plann

105A. Intermediate Composition. Lecture, three hours. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns.

105B. Advanced Composition. Lecture, three hours. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns.

107. The Spanish of Southern California. Lecture, three hours. Prerequisites: courses M35, 100A, and 100B, or consent of instructor. Analysis of pronunciation, word formation, syntax, and lexicon of the Spanish of Southern California, with attention to regional features, social and age levels of speech, and interference from English.

115. Applied Linguistics. Lecture, three hours. Prerequisites: courses M35, 100B. Survey of the major linguistic problems faced by the teacher of Spanish.

Ms. Plann
118A. History of Portuguese and Spanish: Phonology. (Formerly numbered 118A.) (Same as Portuguese M118A.) Lecture, three hours. Prerequisites: courses M35, 100A. Major features of the development of the Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. Ms. Arora, Mr. Quicoli, Mr. Smith

118B. History of Portuguese and Spanish: Morphology and Syntax. (Formerly numbered 118B.) (Same as Portuguese M118B.) Lecture, three hours. Prerequisites: courses M35, 100B. Major features of the development of the Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. Mr. Otero, Ms. Plann, Mr. Quicoli

119A. Introduction to the Study of Literature: Prose. Lecture, three hours. An introduction to the study of literary devices, figures of speech, and distinctive stylistic features in the prose literature of Spain and Spanish America, particularly in the novel and essay.

119B. Introduction to the Study of Literature: Poetry and Drama. Lecture, three hours. An introduction to the study of literary devices, figures of speech, and distinctive stylistic features in the poetry and drama of Spanish and Spanish America.

120A-120B. Survey of Spanish Literature. Lecture, three hours. An introduction to the particular periods, currents, and authors of Spanish literature. Mr. Gimeno, Mr. Johnson, Mr. Rodriguez-Cepeda

122. Medieval Literature: Prose. Lecture, three hours. Recommended prerequisite: course 120A. A study of the main genres through representative works. Mr. Johnson, Mr. Rodriguez-Cepeda

125. Golden Age: Prose. Lecture, three hours. Recommended prerequisite: course 120A. A study of the main genres through representative works of the Golden Age. Mr. Johnson, Mr. Rodriguez-Cepeda

127. Golden Age: Don Quijote. Lecture, three hours. Recommended prerequisite: course 120A. A study of the main genres through representative works of the Golden Age with particular reference to Don Quijote. Mr. Johnson, Mr. Rodriguez-Cepeda

128. The Enlightenment and Romanticism in Spain. Lecture, three hours. Recommended prerequisite: course 120B. A study, through representative works, of the main manifestations of thought and literature from 1700 to 1850. Mr. Benitez, Mr. Rodriguez-Cepeda

130. Post-Romanticism, Realism, and Naturalism in Spain. Lecture, three hours. Recommended prerequisite: course 120B. The development of the major trends of Spanish literature from 1850 to 1898. Mr. Benitez, Mr. Smith

132. 20th-Century Spanish Prose. Lecture, three hours. Recommended prerequisite: course 120B. A study of several representative works of Spanish prose literature since 1898. Mr. Morris

133. 20th-Century Spanish Poetry and Drama. Lecture, three hours. Recommended prerequisite: course 120B. A study of several representative works of Spanish poetry and drama since 1898. Mr. Morris

134A-136B. Survey of Spanish-American Literature. Lecture, three hours. An introduction to the principal periods, currents, and authors of Spanish-American literature. Ms. Arora, Mr. Luzuriaga, Mr. Reeve, Mr. Skirius

137. Literature of Colonial Spanish America. Lecture, three hours. Recommended prerequisite: course 136A. A study of the most important genres and authors from the Conquest to 1810. Ms. Arora

139. Romanticism and Realism in Spanish-American Literature. Lecture, three hours. Recommended prerequisite: course 136A. A study, through representative literary works, of the most important currents of thought and literary trends from 1810 to 1880. Mr. Luzuriaga, Mr. Reeve, Mr. Skirius

140. Modernismo. Lecture, three hours. Recommended prerequisite: course 136B. A study, through representative works, of the principal characteristics of modernismo in Spanish-American literature. Mr. Luzuriaga

142. 20th-Century Spanish-American Literature: Fiction and the Essay. Lecture, three hours. Recommended prerequisite: course 136B. A study, through representative novels, short stories, and essays, of Spanish-American prose literature since 1910. Mr. Luzuriaga, Mr. Reeve, Mr. Skirius

143. 20th-Century Spanish-American Literature: Poetry and Drama. Lecture, three hours. Recommended prerequisite: course 136B. A study of the principal poets, dramatists, and dramatic movements in Spanish-American literature from 1910 to 1990. Mr. Reeve, Mr. Skirius

144. Mexican Literature. Lecture, three hours. Recommended prerequisite: course 136B. A study of the major movements and authors of Mexican literature. Mr. Reeve, Mr. Skirius

145. Introduction to Chicano Literature. (Same as Chicano Studies M145.) Lecture, three hours. Prerequisite: course 25 or 26. Recommended prerequisite: course 136A. A study, through Chicano Chicano literature, of the development of Chicano identity and the formation of Chicano consciousness. Mr. Hernandez

146. Folk Literature of the Hispanic World. (Same as Folklore M146.) Lecture, three hours. A study of the history and present dissemination of the major forms of folk literature throughout the Hispanic world. Ms. Arora

161. Film and Literature of the Spanish-Speaking World. Lecture, three hours. A topical analysis (conducted in English) of the major literary and historical themes of Hispanic culture through films and literary texts. Course 197 may not be taken concurrently for credit.

170A. Senior Honors Seminar: Topics in Spanish Literature. Lecture, three hours. Prerequisite: senior Spanish major with a 3.5 GPA in the major. Directed research on topics within the general area of Spanish literature. Two senior seminars required for departmental honors.

170B. Senior Honors Seminar: Topics in Spanish-American Literature. Lecture, three hours. Prerequisite: senior Spanish major with a 3.5 GPA in the major. Directed research on topics within the general area of Spanish-American literature. Two senior seminars required for departmental honors.

170C. Senior Honors Seminar: Topics in Hispanic Linguistics. Lecture, three hours. Prerequisite: senior Spanish major with a 3.5 GPA in the major. Directed research on topics within the general area of Hispanic linguistics. Two senior seminars required for departmental honors.

197. Undergraduate Seminar. Lecture, three hours. Prerequisites: upper division Spanish major, consent of instructor. Limited to 15 students. A variable topis course with readings, discussions, and papers; consent of instructor. Limited to 15 students. A variable topis course with readings, discussions, and papers; consent of instructor.

197A. Studies In Hispanic Culture and Civilization. Lecture, three hours. Required of students preparing for a California state credential in Spanish. An advanced course that studies diverse aspects of Hispanic culture, civilization, and history. Classroom discussions, papers, and examinations in Spanish.

199. Special Studies (2 to 4 units). Prerequisite: consent of adviser and instructor. Eight units may be applied toward the major requirements.

Graduate Courses

M200. Research Resources. (Same as Portuguese M200.) Lecture, three hours. Directed and discussed interaction. Eight units may be applied toward the major requirements.

M201. Literary Theory and Criticism. (Same as Portuguese M201.) Lecture, three hours. Definition, discussion, and application of the major currents of contemporary literary theory and criticism. Mr. Benitez, Mr. Otero

M202. Phonology and Morphology. (Formerly numbered 206.) Lecture, three hours. The phonological and morphological systems of Spanish and their interaction. Mr. Otero, Ms. Plann

M204A-204B. Generative Grammar. Lecture, three hours. The rules for the derivation of sentences. Course 204A or consent of instructor is prerequisite to 204B. Mr. Otero

M205A-M205B. Development of the Portuguese and Spanish Languages. (Formerly numbered 202A-203B.) Lecture, three hours. An introduction to the historical development of the Portuguese and Spanish languages from their origin to the present. Mr. Otero, Mr. Smith

M209. Dialectology. Lecture, three hours. The major dialect areas of Iberian Spain, with the distinguishing features of each. Influence and contribution of cultural and historical features, including indigenous languages, to their formation.

M221. Medieval Lyric Poetry. (Formerly numbered 222.) Lecture, three hours. Readings and lectures on Spanish lyric poetry from the beginning to 1500. Mr. Gimeno

M222. Medieval Epic and Narrative Poetry. (Not the same as course 222 prior to Fall Quarter 1984.) Lecture, three hours. Readings and lectures on Spanish epic and narrative poetry from the beginning to 1500. Mr. Gimeno

M223. Medieval Prose. Lecture, three hours. Readings and lectures on Spanish prose from the beginning to 1500. Mr. Gimeno

M224. Poetry of the Golden Age. Lecture, three hours. Readings and lectures on Spanish poetry from 1500 to 1700. Mr. Morris, Mr. Rodriguez-Cepeda

M225. Drama of the Golden Age. Lecture, three hours. Readings and lectures on Spanish comedias. Mr. Rodriguez-Cepeda

M226. Prose of the Golden Age. Lecture, three hours. Readings and lectures on Spanish prose literature. Mr. Johnson

M227. Cervantes. Lecture, three hours. Readings and lectures on the works of Cervantes. Mr. Johnson

M228. The Enlightenment. Lecture, three hours. Readings and lectures on representative works of the period. Mr. Benitez

M229. Romanticism. (Formerly numbered 230.) Lecture, three hours. Readings and lectures on representative works of the period. Mr. Benitez
230. Realism and Naturalism. (Formerly numbered 231.) Lecture; three hours. Readings of and lectures on literary works, principally novels, from 1850 to 1898.
Mr. Benitez, Mr. Smith

231. Major Currents in Modern Spanish Literature. Lecture; three hours. An introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898.
Mr. Morris

232. Spanish Prose Literature from 1898 to the Civil War. Lecture; three hours. Readings of and lectures on representative essays, novels, and short stories of the period.
Mr. Morris

233. Spanish Prose Literature after the Civil War. (Formerly numbered 235.) Lecture; three hours. Readings of and lectures on representative essays, novels, and short stories of the period.
Mr. Morris

234. Spanish Drama and Poetry from 1898 to the Civil War. Lecture; three hours. Readings of and lectures on representative plays and poems.
Mr. Morris

235. Spanish Drama and Poetry after the Civil War. (Formerly numbered 233 and 234.) Lecture; three hours. Readings of and lectures on chronicles, poems, and indigenous accounts of the Spanish Conquest.
Ms. Arora

236. Realism, Enlightenment, and Neoclassicism in Colonial Literature. Lecture; three hours. Readings of and lectures on representative texts.
Ms. Arora

Mr. Skirius

Mr. Luzuriaga

241A-241B. Contemporary Spanish-American Short Story. (Formerly numbered 244.) Lecture; three hours. A study of the important short story writers from modernism to the present.
Mr. Reeves

243A-243B. Contemporary Spanish-American Poetry. (Formerly numbered 243.) Lecture; three hours. Intensive study of the important poets of Spanish America from modernism to the present.
Mr. Reeves

244A-244B. Contemporary Spanish-American Novel. (Formerly numbered 244.) Lecture; three hours. A study of the important novelists from modernism to the present.
Mr. Reeves

Mr. Skirius

Mr. Luzuriaga

247. Chicano Literature. Lecture; three hours. A study of the major movements and authors of Mexican-American literature.
Mr. Mr. Hernandez

248. Folk Literature of the Spanish and Portuguese Worlds. (Same as Folklore 249 and Portuguese M249.) Lecture; three hours. An intensive study of the folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.
Ms. Arora

Seminar courses (M251A through M266B) may be taken for a maximum of eight units each with consent of the appropriate guidance committee and with topic change.

49. Teaching of Spanish at the College Level. Prerequisite: graduate standing, consent of instructor. Seminar on teaching writing in Spanish language courses. Introduction to composition theory, instruction and practice in integrating writing into the curriculum, setting goals and standards, designing and sequencing course materials, evaluating and commenting on papers. May not be repeated for credit. S/U grading.

495. Teaching of Spanish at the College Level. Prerequisite: graduate standing in department. Basic concepts of modern theories of language and language acquisition which underlie modern methods of second language teaching. S/U grading.

56. Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of graduate advisor and chair. Study or research in areas not offered as regular courses. No more than four units may be applied toward the M.A. course requirements.
C133. Naturalism, Realism, and Symbolism in Brazilian Literature. (Formerly numbered 253.) Lecture, three hours. A study of representative trends and authors. May be concurrently scheduled with course C233. 

C227. Romanticism and Realism in Portuguese Literature. (Formerly numbered C242C.) Lecture, three hours. A study of the principal features through representative works. May be concurrently scheduled with course C127. 

C228. Post-Romanticism and Naturalism in Portuguese Literature. (Formerly numbered C242C.) Lecture, three hours. A study of the principal features through representative works. May be concurrently scheduled with course C128. 

C229. 20th-Century Portuguese Literature. (Formerly numbered C242D.) Lecture, three hours. A study of representative trends and authors. May be concurrently scheduled with course C129. 

C231. Colonial Brazilian Literature. (Formerly numbered C243A.) Lecture, three hours. A study of the most important authors to 1830. May be concurrently scheduled with course C131. 

C232. Romanticism in Brazilian Literature. (Formerly numbered C243B.) Lecture, three hours. A study of representative trends and authors. May be concurrently scheduled with course C132. 

C233. Naturalism, Realism, and Symbolism in Brazilian Literature. (Formerly numbered C243C.) Lecture, three hours. A study of representative trends and authors. May be concurrently scheduled with course C133. 

C234. 20th-Century Brazilian Literature: Poetry and Drama. (Formerly numbered C243D.) Lecture, three hours. A study of representative trends and authors. May be concurrently scheduled with course C134. 

C235. 20th-Century Brazilian Literature: Novel. (Formerly numbered C243E.) Lecture, three hours. A study of the most important Brazilian novelists. May be concurrently scheduled with course C135. 

C249. Folk Literature of the Spanish and Portuguese Worlds. (Same as Folklore M249 and Spanish M249.) Lecture, three hours. An intensive study of the folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech. 

M251A-M251B. Studies in Galegian-Portuguese and Old Spanish. (Formerly numbered M251A-M251B.) Lecture, three hours. A study of the problems related to the historical development of Galegian-Portuguese and Old Spanish. 

C252. Studies in Early Portuguese Literature. (Formerly numbered 252A-252B-252C.) Lecture, two hours. A study of the most important Brazilian novelists. May be concurrently scheduled with course C135. 

C254. Studies in Early Brazilian Literature. (Formerly numbered 253A-253B-253C.) Lecture, two hours. A study of the most important Brazilian novelists. May be concurrently scheduled with course C135.

C255. Studies in Modern Brazilian Literature. (Formerly numbered 253A-253B-253C.) Lecture, two hours. 

M375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching apprentice fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
Speech

Maris S. Gregory
Thomas E. Miller
Sonya H. Packer

There is no major in speech; however, the following undergraduate courses are offered for interested students:

Lower Division Courses

1. Principles of Oral Communication. Prerequisite: satisfaction of Subject A requirement. Theory and practice of informal public speaking, including selection of content, organization of ideas, language, and delivery; practice in extemporaneous and manuscript speaking; training in critical analysis through reading and listening to contemporary speeches.

2. Public Speaking and Discussion. Prerequisite: course 1. A continuation of course 1, with special emphasis on group discussions, panel discussions, debates, and formal public speaking. Critical analysis of speeches in both contemporary and historical settings.

Upper Division Courses

Urban Studies or Organizational Studies (Interdepartmental)

4256 Bunche Hall, (213) 825-3862

Scope and Objectives

Cities and organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in urban studies or organizational studies brings together students and faculty from the Departments of History, Political Science, Economics, Sociology, Psychology, and Geography who share an interest in the modern city or in modern organizations. The programs give students a solid grounding in the urban or organizational perspectives and methods of at least two departments. Each of the specializations must be taken in conjunction with a major in the social sciences.

Special Undergraduate Programs

You may elect to combine one of these programs with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in urban studies or organizational studies is also open to qualified students. For more information on individual majors, see the beginning of Chapter 5.

If you have a departmental major, you should seek advising in your major department. If you are interested in the individual major, consult a Letters and Science counselor.

Courses within each specialization must be taken for a letter grade. The specializations must be taken in conjunction with a major in the division of social sciences.

Preparation for the Specializations

Required: At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1 and 2; Sociology 18 and 104 or equivalent; Political Science 40 (urban studies), 80 (organizational studies); Psychology 10; Sociology 1; Geography 4.

Urban Studies Specialization

Required: Nine upper division courses, including (1) at least three courses outside your major department selected from Sociology 158, Economics 120, Geography 150, Anthropology 167, Psychology 168; (2) a minimum of three courses selected from one of the following suites within your major department: Political Science 181, 183A, 183B; Economics 121, 130, 133; Sociology 132, 156, 160; Geography 145, 146, 150, 151, 152, 156; History 154A, 154B, 154C, 154D; Psychology 127, 135, 137A; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside your major department; (4) internship experience in an urban governmental or community service organization.

Organizational Studies Specialization

Required: Nine upper division courses, including (1) at least three courses outside your major department selected from Political Science 180, Sociology 168, 173, Management 190; (2) a minimum of three courses selected from one of the following suites within your major department: Political Science 142, 145, 146, 182A, 182B, 182C, 182D; Economics 101A,

Scope and Objectives
The Women's Studies Program, established in 1975, is an interdisciplinary academic program spanning departments, disciplines, and ideologies and offering two options for study: an undergraduate major and a specialization. Students wishing to focus their studies on multidisciplinary perspectives in order to create a coherent and comprehensive analysis of women and gender may elect the major. Those wishing to enhance study in a traditional discipline may elect the women's studies specialization in addition to a major in their chosen discipline.

The field of women's studies has exploded over the past 20 years. It has developed a theoretical base, body of knowledge, and perspective which cannot be attained as a by-product of studying other fields. While it shares the aim of all liberal arts education in imparting information, sharpening analysis, and transforming students' perceptions, the field goes beyond those objectives. Where the study of women has been neglected or omitted, the field develops new knowledge through research and fills in gaps in the existing curriculum.

Further, women's studies generates new perspectives on existing knowledge of women and gender, offering a critique of accepted beliefs and ideas. Beyond these, the field intellectually challenges existing structures of knowledge and introduces new conceptual paradigms.

The core faculty members who teach women's studies courses come from various UCLA departments and professional schools. Many professionals within and outside the University contribute their time, expertise, and enthusiasm. The program sponsors a Student Association for Women's Studies and assists other student groups with extracurricular programming on feminist issues. Research in women's studies is sponsored in cooperation with the recently established Center for the Study of Women. A library of information related to women's studies is housed in the program office.

While no formal graduate program exists at UCLA at this time, graduate students are invited to use the program's resources, attend lectures and events, and participate in the faculty seminar on women, culture, and theory.

Requirements for the Undergraduate Programs

Admission
A women's studies committee composed of the director, faculty members, and a student representative sets program policies and curricula. To be admitted to either the major or specialization, you must have completed Women's Studies 10, have a grade-point average of 2.0 or better, and formally register with the program. You are encouraged to declare your major or specialization as early as possible and to discuss your proposed course of study with the director or undergraduate advisor.

You are encouraged to draw on the University's diverse resources in creating your major or specialization program. You may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women's studies approved list, you may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

Bachelor of Arts in Women's Studies
The interdisciplinary major in women's studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

All courses applied toward the major must be taken for a letter grade, and you must have a GPA of 2.5 or better in women's studies courses to receive credit for completing the program. Courses in which you receive a grade below C may not be applied toward the major.

Preparation for the Major
Required: Women's Studies 10.

The Major
Required: Thirteen upper division courses as follows:

(1) Three core courses, including Women's Studies 197 (departmental 197 courses may not be applied), one course from 110A or 110B or 110C or M110D, and one course on the study of American ethnic minority women from the approved list of women's studies credit courses issued each quarter by the program.

(2) Four distribution courses, one from each of four different departments, selected from the approved list of women's studies courses. For the purpose of the ethnic studies requirement and the distribution requirement, Council on Educational Development (CED), field studies, and Women's Studies 110A, 110B, 110C, 170, and 185 may be considered.

(3) Six additional concentration courses from one or two of the fields in which your distribution courses have been taken. You may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, or lesbian studies.

Four units of course 199 may be applied toward the distribution or concentration requirement for the major.

Women's Studies Specialization
The specialization augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the women's studies specialization.
You must take three core courses (Women's Studies 10, 197, and one course from 110A or 110B or 110C or M110D), plus five upper division elective courses from the approved list of women's studies credit courses issued each semester by the program. One course in American or an American minority women is strongly recommended. At least one of the five courses must be taken in a department other than the major department. Up to two may be experimental courses offered by the Council on Educational Development (CED). No more than four units of course 199 may be applied.

All courses applied toward the specialization must be taken for a letter grade, and you must have a GPA of 2.5 or better in women's studies courses to receive credit for completing the program. Courses in which you receive a grade below C may not be applied toward the specialization.

Supporting Upper Division Courses

M107A. American Women Writers. (Formerly numbered M107.) (Same as English M107.) Prerequisite: satisfaction of Subject A requirement. A survey of literary works by American women writers, with emphasis on the roles of women, the portrayal of nature and society, and the evolution of forms and techniques in writing by American women.

Ms. Banta, Ms. Rowe (F)

M107B. British Women Writers. (Formerly numbered M107.) (Same as English M107B.) Prerequisite: satisfaction of Subject A requirement. A survey of literary works by women writers, with emphasis on the roles of women, the portrayal of nature and society, and the evolution of forms and techniques in writing by British women.

Ms. Mellor, Ms. Yeazell (W)

M107C. Special Topics in Women and Literature. (Formerly numbered M107.) (Same as English M107C.) Prerequisite: satisfaction of Subject A requirement. A variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nontraditional literary grouping.

Ms. Cheung, Ms. Mellor (Sp)

130. Women of Color in the U.S. Lecture/discussion, three hours. Prerequisite: course 10. Exploration of the experiences of black, Chicana, Native American, and Asian American women in historical and contemporary perspective in order to assess intersections of race, class, and gender. The concept of triple oppression contrasted with a critique of feminism and feminist social movements to arrive at the fullest possible explanation of the conditions under which women of color in America find themselves.

M137E. Work Behavior of Women and Men. (Same as Psychology M137E.) Prerequisite: course 10 or Psychology 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

M148. Women in Higher Education. (Same as Education M148.) Prerequisite: upper division standing. The education and employment of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.

Ms. Astin

M158. Women in Italian Culture. (Same as Italian M158.) Lecture, three hours. Designed with the intent of examining the role that women have played in Italian society. Concentration alternatively on the world of the medieval and Renaissance "matriarch" and on the "liberated" women of our times. Historical and political documents and cultural and religious taboos presented and discussed, together with other data derived from literature and art. Italian majors required to read texts in Italian and to prepare papers written in Italian.

Mrs. Cottino-Jones

M162. Sex Roles and Society. (Formerly numbered M102.) (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Prerequisite: course 10 or Sociology 1 or consent of instructor. Consideration of sociological literature pertaining to the development and functions of sex roles in society from a critical perspective. Topics include socialization and gender norms, contemporary sex role strain, and the challenge to traditional notions of sex roles posed by feminism and sex roles within the family. Students must take one from M162 or M163.

M163. Women in Culture and Society. (Same as Anthropology M163.) Prerequisite: Anthropology 5 or 22. A systematic approach to the study of sex roles from an anthropological perspective. A critical review of relevant theoretical issues supported by ethnographic material from traditional cultures and contemporary American culture.

Ms. Levine, Ms. Sacks

M164. Gender and Health Care. (Same as Sociology M164.) Lecture, three hours; discussion, one hour. Introduction to basic issues relating to women's participation in the health care system as both consumers and providers.

Ms. Abel

M165. Psychology of Gender. (Same as Psychology M165.) Lecture, discussion, one hour. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, psychological and personality differences between men and women, sex differences in intellectual abilities and achievement, and the impact of gender on social interaction.

Ms. Peplau

170. Jurisprudence of Sexual Equality. Prerequisite: course 10 and one course from M110D or Political Science 10 or Philosophy 6 or 9 or consent of instructor. Exploration of models of equality described and/or advocated by legal theorists — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment or pregnancy leave policy) for purposes of comparison and critique.

Ms. Littleton

M172. The Afro-American Woman in the U.S. (Same as Afro-American Studies M172 and Psychology M172.) Prerequisite: upper division standing. The impact of the social, psychological, political, and economic forces which impact on the interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

Ms. Mays

185. Special Topics in Women's Studies. Prerequisites: at least two upper division women's studies courses, minimum 3.0 GPA, consent of instructor and program director. A directed program of independent readings and/or research on a specific topic within women's studies. No more than four units may be applied toward the women's studies specialization or major.

Supporting Courses in Other Departments

Check with the program office for additional course listings.

Anthropology 151. Marriage, Family, and Kinship

Asian American Studies 105. Asian American Women

Classics 150A. Origins of the Western View of Women: The Female in Roman and Early Christian Thought
Communication Studies 153. The Media and Aggression Against Women

English 180X. Specialized Studies in Literature

French 145. Topics in French Literature: From Nature (Female?) to Culture (Male?)

158. Woman in French Literature

History 137A-137B-137C. History of Women in Europe

156C-156D-156E. Social History of American Women

197. Undergraduate Seminars

Political Science 149A-149Z. Special Studies in Politics: Women and the Political Process

179A. Special Studies in Public Law: Women and Law

C197A-C197F. Seminars for Majors

Psychology 137C. Interpersonal Relations

137F. Special Topics in Social Psychology: The Lesbian Experience

Public Health 176E. Family and Sexual Violence

Sociology 195A-195Z. Special Topics in Sociology

197. Undergraduate Seminar

World Arts and Cultures (Interdepartmental)

An intercollege, interdepartmental major in world arts and cultures is open to students in both the College of Letters and Science and the College of Fine Arts. You enroll in the college of your choice and fulfill the general education requirements of that college. For details on this undergraduate major, see Chapter 6 on the College of Fine Arts.
UCLA's College of Fine Arts, the only undergraduate college of its kind in the University of California system, is a young, dynamic center for higher education in the arts. Its distinguished faculty of more than 200 includes visiting artists and scholars who bring a variety of exciting viewpoints to enrich the study of the arts. Its goal is to educate the artist who is connected to society.

The College of Fine Arts consists of nine departments: Art, Art History, Dance, Design, Ethnomusicology and Systematic Musicology, Film and Television, Music, Musicology, and Theater. The curriculum is designed to provide fine arts students with intensive training in their major within the broader liberal arts education of the University. The creative or performing artist, as well as the historian or critic, is provided an outstanding academic program.

Fine arts majors explore, through research and practice, the unique creativity of world cultures. Nonmajors are offered an educational program intended to foster a better understanding of the visual and performing arts. The college continues to support extracurricular programs in the arts for the benefit not only of the University community, but for the public as well. Such efforts include art gallery and museum exhibits, plays, films, and music and dance concerts.
College of Fine Arts

Bachelor of Arts Degrees

Admission

In addition to the University of California Undergraduate Application, departments in the College of Fine Arts require auditions, portfolios, or evidence of creativity. Detailed information on departmental requirements is mailed to you on receipt of the application. Deadline date for applications is November 30, 1988, for admission in Fall Quarter 1989.

The Study List

Each quarter the student Study List must include from 12 to 17 units. The college has no provision for part-time enrollment. After your first quarter, you may petition to carry more than 17 units (up to 20 units maximum) if you have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding quarter with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If you have not filed your Study List by the end of the second week of classes, you must obtain the consent of the dean of the college to continue for that quarter.

Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the college and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

Concurrent Enrollment

Enrollment at another institution or University Extension while enrolled at UCLA is not permitted.

Degree Requirements

Each student must meet six kinds of requirements for the B.A. degree: University, college, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see "Undergraduate Degree Requirements" in Chapter 2 of this catalog.

College of Fine Arts students enrolled in English (ESL) 3A, 3B, 3C must take the courses for a letter grade.

College Requirements

The general requirements of the College of Fine Arts must be completed with a grade-point average of 2.0 or better.

For specific courses that fulfill the general college requirements and for courses preceded by M, consult the college office before enrolling. Courses listed below are used only as a guideline for 1988-89. Note: Courses that include the review of film or television may not be applied toward any general college requirements.

English Composition and Rhetoric (4 Units)

English 3 with a grade of C (2.0) or better must be completed by the end of your freshman year and may not be taken on a Passed/Not Passed basis.

Critical Reading and Writing (4 Units)

One course from English 4, *Humanities 2A, 2B, or 2C with a grade of C (2.0) or better must be completed by the end of your sophomore year and may not be taken on a Passed/Not Passed basis.

*Majors and Degrees Offered

Art ................................................................. B.A.
Art (Art, Design) ............................................ M.A., M.F.A.
Art History .................................................... B.A., M.A., Ph.D.
Dance ......................................................... B.A., M.A.
Dance/Movement Theory ................................ M.A.
Design ......................................................... B.A.
Motion Picture/Television ................................ B.A.
Music ......................................................... B.A., M.A., M.F.A., Ph.D.
Theater ......................................................... B.A.
Theater Arts (Motion Picture/Television, Theater) .......................... M.A., M.F.A., Ph.D.
World Arts and Cultures ................................ B.A.
Foreign Language (12 Units)
Three quarters of one foreign language through level three are required. This requirement must be completed by the end of your sophomore year. If at least four quarter units of level three are completed without taking level one or two, an additional eight units must be completed from courses listed below in science, social sciences, or humanities. International students whose entire secondary education has been taken in a language other than English may petition to be exempt from the foreign language requirement.
Proficiency examinations may not be used to complete the foreign language requirement. Some majors may require completion of the language prior to entry into the major.

Science/Mathematics (8 Units)
One course in physical or biological sciences and one course in natural sciences, mathematics, or another physical/biological science are required.

Physical and Biological Sciences Courses:
- Astronomy 3, 4, 81, 82
- Atmospheric Sciences 2, 3, 10H, 11
- Biology (except Biology 10, 30, 35, 40; chemistry; Earth and space sciences (except Earth and Space Sciences 8, 20, 115); Honors Collegium 44; Kinesiology 12A, 12B, 13, 14; microbiology; physics (except Physics 10).

Other Natural Sciences and Mathematics Courses:
- Anthropology 1, 2, 11, 124, 127P; Atmospheric Sciences 1, 5, 6, 8; Biology 10, 35; Earth and Space Sciences 8, 20, 115; Geography 1, 2, 5; Honors Collegium 40, 41, 45; mathematics (no computer, remedial, historical, or statistical); Physics 10; Psychology 15, 115, 116.

Social Sciences (12 Units)
Two courses from the Department of History (one in any period prior to 1600, one in any period after 1600) and one other social sciences course are required. Note: Survey courses in history which cover "antiquity to present" may be applied only on history after 1600 or on other social sciences courses.

Other Social Sciences Courses:
- Anthropology (except Anthropology 1, 2, 11, 124, 127P, 156); economics (principles, history, and theory only); geography (except Geography 1, 2, 5); history (except medical or geological); Honors Collegium 42, 56, 61, 63, 64, 65; Near Eastern languages (Ancient Near East 162A, 163B, Jewish Studies 140A, 140B, 141, 142); political science (except courses dealing with civil rights and law); psychology (except Psychology 15, 115, 116, education, counseling, family life, or child care); sociology (except mass communications, civil rights, education, law, criminology, marriage, family life, or child care).

Humanities (12 Units)
One course in the arts, one course in literature, and one course in philosophy and/or religion are required. Performance, studio, or film and television courses and those in your major field do not meet this requirement.

The Arts Courses: Art History 50 series or 101A through 121B (except art, art history, and design majors); Classics 151A, 151B, 151C, 151D (except art history majors); Dance 134A, 134B, 160A through 187A (except dance majors); Film and Television 189 (except motion picture/television and theater majors); Folklore and Mythology 118, 124; Music 2A, 2B, 113A, 113B, 130 through 135C, 138 through 148, 151A through 153C, 157 through 159, 188A through 188F, 189 (except music majors, all specializations); Theater 5A, 5B, 5C, 102A through 103B, 104D through 105 (except motion picture/television and theater majors).

Literature Courses: Selected courses in English, ethnic, American, or foreign literature, including works in translation; Classics 10, 20, 40, 41, 142, 143, 161, 162; East Asian Languages and Cultures 129; Folklore and Mythology 15, 101, 108, 113, 130, 131; German 119A through 119F; Honors Collegium 51, 52, 54; humanities, except those that are M courses; Near Eastern languages (Arabic 140, Hebrew 120, Iranian 140, Jewish Studies 150B, 151A, 151B).

Philosophy/Religion Courses: Anthropology 156; Classics 166A, 166B; East Asian Languages and Cultures 41, 139, 173, 174, 183, 184, 185; Honors Collegium 50, 57; Near Eastern languages (Ancient Near East 130, Iranian 170, Islamics 110); Philosophy 1 through 32 and selected upper division courses.

A few course areas that may NOT be applied toward the general college requirements are multiple-listed courses (M), business, communications, creative writing, criminology, education, engineering, family life, marriage and child care, field studies, home economics, independent studies, interdisciplinary studies, journalism, law, mass media, public health, and speech. Also no 198, 199, or CED courses and no seminars, proseminars, or freshman seminars may be applied toward the general requirements of the college.

Additional Nonmajor Field Requirements
Three upper division courses (12 units) must be completed outside your major field. These courses may not be applied toward the general college requirements. Studio, performance, activity, independent study, debate courses, children’s theater, creative dramatics, internships, and field studies courses may not be applied as additional nonmajor courses. Consult your departmental or college counselor for clarification.

Unit Requirements
You must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

University Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Entrance Examination Board (CEEB) Advanced Placement Tests may be applied toward the general college requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If you take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

Residence Requirements
You are in "residence" while enrolled and attending classes at UCLA as a major in the College of Fine Arts. Of the last 45 units completed for the bachelor’s degree, 35 must be earned in residence in the College of Fine Arts (28 units must be upper division — 16 of which must be in the major department). No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in University Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

Major Requirements
A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). Most majors include both lower and upper division courses. Those listed under "Preparation for the Major" (lower division) must be completed before upper division major work is undertaken.

You must complete your major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major and must be recommended by the chair of your major department. All courses in your major department must be taken for a letter grade.

As changes in major requirements occur, you are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the college when necessary.

Any department offering a major in the College of Fine Arts may require a general final examination.
Scholarship and Minimum Progress
A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in University Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applying to the general college and University requirements.

Minimum Progress: You are expected to complete satisfactorily at least 36 units during any three consecutive quarters in residence: you are placed on probation if you fail to pass these units. You are subject to dismissal if you fail to pass at least 32 units in three consecutive regular quarters in residence.

World Arts and Cultures
The interdepartmental major in world arts and cultures is open to students in both the College of Fine Arts and the College of Letters and Science. You enroll in the college of your choice and fulfill the general education requirements of that college. Counseling is available — consult Silvily Kessler in the World Arts and Cultures Office, 120 Men's Gym. For details on the major, see the section later in this chapter.

Honors
To receive Dean's Honors in the College of Fine Arts, you must have at least 12 graded units per quarter with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on your transcript for the appropriate quarter. You are not eligible for Dean's Honors in any given quarter if you receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors with the Bachelor's Degree are awarded to students with superior grade-point averages. To be eligible, you must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are: Cum laude, an overall average of 3.551; Magna cum laude, 3.362; Summa cum laude, 3.77.

Counseling and Program Planning
The College of Fine Arts offers pre-admissions advising, program planning in the major and general degree requirements, and individual meetings with departmental counselors and faculty, including a yearly degree check sent to each student. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, College of Fine Arts, A239 Murphy Hall (825-9705).

Graduate Study
The advanced degree programs offered in the College of Fine Arts provide graduate students with unique research opportunities when combined with special resources, such as the UCLA Film and Television Archive, the University Research Library, the special collections of the Art, Music, and Theater Arts Libraries, and the University's exhibition and performance halls.

The College of Fine Arts cooperates with UCLA's John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Arts Management. Participating students serve quarter-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

The Producers Program is a relatively new M.F.A. management program in the Department of Theater, Film, and Television, with options in either theater or motion picture/television.

A program in teaching is offered by the Graduate School of Education in each of the fine arts areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division. The Graduate Affirmative Affairs Office provides counseling, academic support, and financial assistance to ethnic minority students.

Admission
In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the college has limitations and additional requirements. In general, samples of your work (dance audition, art portfolio, playwriting sample, etc.) are required. Detailed information can be found in the departmental listings which follow.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Other Requirements
Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings which follow for specific requirements and procedures.

Robert H. Gray, M.F.A. (Art)
Robert F. Heinecken, M.A. (Art)
J. Bernard Kester, M.A. (Design)
David M. Kunze, Ph.D. (Art History)
Vasa Mihich (Design)
Lee Mullican (Art)
Carlo Pedretti, M.A. (Art History and Armand Hammer Professor of Leonardo Studies)
Donald A. Princzanos, Ph.D. (Art History)
Jan Stussy, M.F.A. (Art)

Emeritus Professors
Laura F. Anderson, M.A.
E. Maurice Bloch, Ph.D.
Archine V. Fetty, M.A.
Thomas Jennings, M.A.
John A. Neuhart
Gordon M. Nunes, M.A.
Katharina Otto-Dorn, Ph.D.

Associate Professors
James W. Bassler, M.A. (Design), Chair
William C. Brown, M.A. (Design)
Ioli Kalavrezou-Maxeiner, Ph.D. (Art History)
Mitsuru Kataoka, M.A. (Design)
Cecilia F. Klein, Ph.D. (Art History)
Donald F. McCallum, Ph.D. (Art History)
Adrian Saxe, B.F.A. (Design)
Nathan Shapiro, Dottore in Architettura (Design)
Lois Swinnoff, M.F.A., Acting (Design)

Assistant Professors
Kathleen A. Bick (Design)
Irene A. Bierman, Ph.D. (Art History)
Robert L. Brown, Ph.D. (Art History)
Barbara Drucker, M.F.A. (Art)
Roger Herman, M.F.A. (Art)
Mark McFadden, M.F.A. (Art)
Charles Ray, M.F.A. (Art)
Cécile Whiting, Ph.D. (Art History)
Patricia Wickman, M.F.A. (Art)
Joanna Woods-Marsden, Ph.D. (Art History)
Alice E. McCloskey, M.A., Emeritus
Madeleine Sunkees, B.Ed., Emeritus

Adjunct Assistant Professors
James Cuno, Ph.D. (Art History)
Edith A. Tonell, Ph.D. (Art History)

Lecturers
Shelley M. Bennett, Ph.D. (Art History)
Leslie Biller, M.F.A. (Design)
C.C.Y. Lee, M.F.A. (Design)
Paul McCarthy, M.F.A. (Art)
Alexis Smith (Art)
Don Suppa, M.F.A. (Art)
Jean S. Weiss, Ph.D. (Art History)

Adjunct Assistant Professors
James Cuno, Ph.D. (Art History)
Edith A. Tonell, Ph.D. (Art History)
As a result of the complete reorganization of the Art, Design, and Art History Department currently underway, there may be substantive changes to the curricula and degree programs listed below. Students with degrees in progress at the time these changes are approved should work closely with the advisers in their area to determine how these changes affect their degree requirements and options.

As the department name indicates, art, design, and art history are largely autonomous divisions. Scope and objectives are different for each, although all fields lead to Bachelor of Arts and Master of Arts degrees and all benefit from the rich and varied art resources at UCLA and in the Los Angeles community. Also offered are a Master of Fine Arts in Art with specialties in art and design and a Ph.D. in Art History.

Art courses include painting and drawing, sculpture, printmaking, photography, and new forms and concepts (which include performance, installation, and video). Students are introduced to diverse media and ideas in lower division courses and have the opportunity to specialize in upper division. Individual expression is encouraged in a general way for those who wish careers requiring art-related knowledge and in a specific sense for those who go on to careers as professional artists.

Art history courses survey Western and non-Western art from earliest human history to the present. Students learn to treat artistic monuments and trends from a historical point of view, analytically rather than subjectively. This curriculum prepares students for careers in which a broad knowledge of art is important and provides students preparing for graduate study with a foundation for research requiring independent critical judgment.

Design courses teach skills and organizational concepts necessary to application of art in contemporary life, including studies in visual communication (graphics, video, electronic imagery), ceramics, textiles, fiber, industrial, product, and interior space design.

Bachelor of Arts in Art History

Preparation for the Major

Required: Art History 50, 51, 54, 55A or 55B, 56A or 56B, 57.

The Major

Required: Eleven upper division art history courses as follows:

(1) A total of eight courses (32 units) from the following 13 areas, distributed as follows: one course from three different areas in Group A (three courses total), one course from three different areas in Group B (three courses total), and two courses from any of the 13 areas:

(2) Three art history electives, which may include courses M113, 125, 197, 199, courses from the above 13 areas, and no more than four units from Classics 151A, 151B, 151C, 151D.

(3) Two quarters of one foreign language or equivalent. The language is in addition to the college foreign language requirements.

Art history majors should be aware that the upper division course requirements in the major (44 units) and in the college (12 units) do not meet the upper division requirement of 64 units for graduation. Additional upper division units must be taken to reach the 64-unit total.

It is recommended that you have each quarter's program approved by a departmental adviser.

Bachelor of Arts in Design

Preparation for the Major

The Major

Required: Twelve upper division courses, selected in consultation with an adviser, including Design 162A, 165A, 167A, 171A, three courses from 161A, 161C, 161E, 161H, and five upper division art, design, or art history electives.

Master of Arts in Art History

Admission

Students are admitted in Fall Quarter only. Regular admission requires a B.A. or equivalent and faculty consent following the annual review of creative work in February. Applicants must submit slides (maximum 20) or videotape (if applying to the video field) to the Graduate Assistant, Department of Art, Design, and Art History, 1300 Dickson, UCLA, Los Angeles, CA 90024-1615.

Provisional admission may be granted for work with faculty sponsors for three quarters, pending reconsideration of regular admission.

Bachelor of Fine Arts in Art History

Required:

- Courses as follows:
  - Art 5A, 5B, 5C, 15A, 15B, and two courses from Art History 50 through 57.
  - Required: Art History 50, 51, 54, 55A or 55B, 56A or 56B, 57.
  - The Major: Eleven upper division art history courses as follows:
    - A total of eight courses (32 units) from the following 13 areas, distributed as follows: one course from three different areas in Group A (three courses total), one course from three different areas in Group B (three courses total), and two courses from any of the 13 areas:
    - Three art history electives, which may include courses M113, 125, 197, 199, courses from the above 13 areas, and no more than four units from Classics 151A, 151B, 151C, 151D.
    - Two quarters of one foreign language or equivalent. The language is in addition to the college foreign language requirements.
    - Art history majors should be aware that the upper division course requirements in the major (44 units) and in the college (12 units) do not meet the upper division requirement of 64 units for graduation. Additional upper division units must be taken to reach the 64-unit total.
    - It is recommended that you have each quarter's program approved by a departmental adviser.

Bachelor of Fine Arts in Design

Preparation for the Major

The Major

Required: Twelve upper division courses, selected in consultation with an adviser, including Design 162A, 165A, 167A, 171A, three courses from 161A, 161C, 161E, 161H, and five upper division art, design, or art history electives.

It is recommended that you have each quarter's program approved by a departmental adviser.

Note: Consult the Schedule of Classes for courses restricted to majors only.
A preconcluding review of work precedes the final comprehensive examination. The examination, usually oral, includes a formal exhibition of work and a document of vita, photo records of works, and a statement of the artist. The document is retained as property of the University.

Design Specialty

Admission

Students are admitted in Fall Quarter only. An acceptable portfolio is required, in the form of slides (maximum 20) or videotape (if applying to the electronic imagery field). Acceptance is by a majority vote of the design faculty. Applicants who have a B.A. degree or equivalent may be admitted on an unconditional basis or on a provisional basis. If you are admitted on an unconditional basis, an initial advisory committee is formed to guide you in your studies. Provisional admission is recommended for two quarters when you show great promise, but your grade-point average is below 3.0, preparation for the graduate area of specialization is insufficient as demonstrated in your portfolio, or undergraduate preparation is inadequate as indicated in transcripts. An advisory committee is formed to outline a program of study that will allow you to continue on an unconditional basis.

Major Fields or Subdisciplines

Communication imagery, image transfer, electronic imagery, computer imagery, ceramics, fiber structures, textiles, industrial design, exhibition design.

Course Requirements

A minimum of 36 quarter units in the department (or nondepartmental courses with the graduate adviser’s consent) of art, design, or art history courses numbered 101A through 295 (and possibly 596) is required, with a B average or better. These must include a minimum of 20 quarter units of design courses numbered above 200. Of which at least four units must be from Design 290 and of which at least eight units must be devoted to a comprehensive project in your area of study. In addition, eight quarter units of art history are required (if you have a B.A. or B.F.A. in Art which includes a background in the history of art, you may substitute eight units in other courses that are germane to your graduate pursuit).

A total of eight units of course 596 may be applied toward the 36 units required for the degree; four units may be applied toward the graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination (offered each quarter) consists of an oral examination and a concentrated body of work which is presented as the master’s statement. Also required is an accompanying record of the project, consisting of documentation in the form of slides of physical work, research material, and other visual material, and which may include a written statement as determined by the graduate guidance committee.

Master of Arts in Art History

Admission

A minimum grade-point average of 3.25 overall and 3.5 in upper division art history courses is required. The Graduate Record Examination (GRE) is required, although no minimum score has been established. Three letters of recommendation (preferably from art historians) are required. The statement of purpose submitted with the application is given weight in the evaluation and should be as specific as possible about your interests in art history. In addition, you must have completed six full courses in the history of art (grades of B or better and not including studio courses), with at least two courses in each group noted below. Specific areas may not be offered in satisfaction of more than one requirement.

Group A: (1) ancient Near East, (2) classical, (3) medieval, (4) Renaissance, (5) baroque, (6) modern, (7) American, and (8) critical theory (minor only).

Applicants demonstrating exceptional promise but lacking some or all of the six required courses may, at the discretion of the graduate review committee, be admitted on condition that they make up those courses. Deficiencies must be made up during your first two quarters in residence and may not be applied toward the 10 courses required for the degree. Instead of taking a course, you may substitute a competence examination in the deficient area.

Prospective students may contact the Graduate Assistant, Department of Art, Design, and Art History, 1300 Dickson, UCLA, Los Angeles, CA 90024-1615, for brochures and information. The department has no special departmental application.

Major Fields or Subdisciplines

Fifteen major fields in two groups, as noted under "Admission" above.

Foreign Language Requirement

Reading knowledge of French and German is required of all students except those intending to major in Asian (i.e., Chinese, Japanese, South Asian), pre-Columbian, Islamic or, with consent of the adviser, Italian art history. Students majoring in Chinese or Japanese art history must substitute either Chinese or Japanese respectively for either French or German. Those majoring in South Asian or Islamic art history must substitute, for either French or German, an appropriate classical research language of South Asian or Islamic culture respectively. Those majoring in Italian art history may, with consent of their major adviser, substitute Italian for French. In all cases, the final decisions regarding choice must be made in consultation with, and with the consent of, the major adviser. Students majoring in pre-Columbian art history must substitute Spanish for French.

With the exception of Asian and Islamic art history majors, all students must demonstrate reading fluency in both foreign languages by any of the following methods: (1) passing the department language examination, (2) passing the Educational Testing Service (ETS) examination with a minimum score of 600, (3) enrolling in and completing with a minimum grade of B, UCLA’s French 5, German 5, Italian 5, and/or Spanish 25. One of these language requirements must be satisfied by the end of the second quarter in residence and the other by the end of the sixth. Students majoring in Asian or Islamic art history must satisfy their European language requirement by the end of the sixth quarter in residence and may do so by any of the three methods listed above. The Asian or Islamic language requirement, however, is normally satisfied by enrollment in a sequence for six consecutive quarters (normally beginning with the first quarter of graduate study) and by maintaining a grade of B or better in those courses. Details and/or exceptions must be worked out with the major adviser.

Course Requirements

The M.A. degree requires the completion of a major and two minors. You must select an unrelated minor from the group (A or B) which does not include your major area, and you are required to take a minimum of 10 graduate and upper division courses, of which at least eight must be in art history and of which at least six must be graduate courses (in the 200 and 500 series). At least four of these must be in the 200 series. No more than two 596 courses may be applied toward the graduate or elective course requirement. You must take Art History 201, four courses in the major, and two courses in each minor.
Thesis Plan
The thesis committee is established after completion of all course requirements. At the same time, you select a thesis topic in your major field. The thesis should deal succinctly with the topic in an independent, critical, and original fashion while taking fully into account the present state of research on the problem.

Master of Fine Arts in Art

Art Specialty

Admission
Students are admitted in Fall Quarter only. See “Admission” under the Master of Arts degree in Art (art specialty) above.

The M.A. is not prerequisite to the M.F.A. but may be elected as your stated degree objective. Usually, however, students proceed directly to the M.F.A. as a terminal degree. The unit requirements applied to the M.A. do not apply to the M.F.A., with the exception of the accumulative art history units.

Major Fields or Subdisciplines
Drawing, painting, sculpture, printmaking, photography, video, new forms and concepts. No limit to the variations, extent, or value of these designations is intended.

Course Requirements
A minimum of 72 quarter units of art, design, or art history courses numbered 101A through 295 is required, with a B average or better.

Within those 72 units, a minimum of 40 quarter units in the 200 series must be taken in the field of specialization.

Major Fields or Subdisciplines
A minimum of 40 quarter units of art history in undergraduate and/or graduate study is required. Art history courses completed at the undergraduate level may be applied toward the art area’s 40-unit art history requirement but may not be applied toward the 72 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be applied toward the 40-unit art history requirement and toward the total units required for the degree.

A total of 12 units of Art 596 may be applied toward the 72 units required for the degree; four units may be applied toward the graduate course requirement.

Comprehensive Examination Plan
The examination is also required to serve as your Ph.D. major adviser of willingness to supervise your Ph.D. work.

Comprehensive Examination Plan
Same as the plan offered for the Master of Arts degree in Art (art specialty), as noted above.

Ph.D. in Art History

Admission
The M.A. in Art History is usually required for admission to the Ph.D. degree program. However, students with an M.A. degree in other disciplines may apply for admission. The graduate examination committee determines the equivalency of the M.A. on an individual basis. An M.A. in Art History from another institution may be accepted as equivalent to that from UCLA or the holder may be accepted into the program at a stage determined by the graduate examination committee. All incoming Ph.D. students must have taken and passed with a grade of B or better at least two courses (upper division and/or graduate) in areas not related to the proposed major (as outlined in the M.A. in Art History course requirements). Deficiencies must be made up during your first two quarters in residence and may not be applied toward the eight courses required for the Ph.D.

The application must include, in addition to official transcripts and Graduate Record Examination (GRE) scores, all of the following:

1. A standard statement of purpose (approximately 400 words).
2. A copy of the M.A. thesis or, if no thesis was written, one major research paper written at the M.A. level in the major (or intended major) field.
3. Three or more letters of recommendation from individuals familiar with your scholarly work, one of which must be a detailed letter of assessment and endorsement from your major adviser for the M.A.
4. A written statement from the intended Ph.D. major adviser of willingness to supervise your Ph.D. work.
5. Evidence, prior to admission, of reading fluency in two appropriate foreign languages.

Students applying directly to the Ph.D. program from the M.A. in Art History program at UCLA follow a slightly modified procedure. For details, see the graduate assistant.

Reading knowledge of French and German is required for admission at the Ph.D. level for those majoring in all areas except Asian, Islamic, pre-Columbian, or Italian art history. You may demonstrate this knowledge by submitting an Educational Testing Service (ETS) score of 600 or better, taking and passing the relevant department language examination(s), or completing UCLA’s German 6, French 5, and/or Italian 5 with a grade of B or better.
Students intending to major in Asian or Islamic art history must demonstrate, by the methods outlined above, reading fluency in either French or German. In addition, they must complete with a grade of B or better six consecutive quarter courses (or equivalent) in an appropriate Asian or Islamic language. Determination of the appropriate language and acceptable equivalencies should be worked out in advance with the intended major adviser.

Students intending to major in pre-Columbian art history must demonstrate, by the means outlined above, reading fluency in German and Spanish. In the latter case, UCLA's Spanish 25, passed with a grade of B or better, fulfills the requirement.

Students who have passed a required foreign language at another institution must either take and pass the relevant UCLA departmental foreign language examination or submit an official recent (within two years) ETS score of 600 or better in that language.

Prospective students may contact the Graduate Admissions, Department of Art, Design, and Art History, 1300 Dickson, UCLA, Los Angeles, CA 90024-1615, for brochures and information. The department has no special departmental application.

**Major Fields or Subdisciplines**

See “Admission” under the Master of Arts degree in Art History above.

**Foreign Language Requirement**

You are normally required to demonstrate, no later than the time of your University Oral Qualifying Examination, reading fluency in one or more foreign languages in addition to those required for admission. Among those fields requiring such reading fluency are Egypt, ancient Near East, classical, medieval, Renaissance, Islamic, pre-Columbian, and all Asian areas. The applicability of this requirement, the language(s) required, and the exact methods of satisfying the requirement are determined in consultation with the major adviser.

**Course Requirements**

The Ph.D. requires demonstrated competence in a major and two minors. If you choose two art history minors, one must be selected from the group (A or B) which does not include the major area (see listings under Master of Arts in Art History above). If you choose one extra-departmental minor, it must be related to the major field in art history. The other minor may or may not be related to the major area.

You must have taken a minimum of four courses (at least one a graduate course) in one or more unrelated areas during the M.A. and/or Ph.D. program. Credit may be given for coursework at another institution.

In all, a minimum of eight graduate and upper division courses are required, of which at least three must be art history courses on the graduate (200 and 500 level). Of this total, you must take at least three, and may take up to five, extra-departmental upper division and/or graduate courses, which must be approved by the major adviser.

**Qualifying Examinations**

After completion of coursework and language study, you must take the Ph.D. written comprehensive examination to test your breadth and depth of knowledge in the major and both minor fields of study. If you fail the examination, or any part thereof, that portion may be repeated during the subsequent quarter in residence. No further repetition is allowed.

A dissertation topic is selected after you pass the written comprehensive examination; the members of your doctoral committee are then nominated, and the committee is appointed by the dean of the Graduate Division.

After having submitted a dissertation proposal, you then take the University Oral Qualifying Examination, given by your doctoral committee. Assuming there is no more than one no pass vote, you may initiate the procedure to advance to candidacy.

**Final Oral Examination**

The doctoral committee may decide, by unanimous agreement, to waive the final oral examination (not normally required). If a final oral examination is required, it is held after the final draft of the dissertation has been circulated among the committee members. In case of failure, the doctoral committee decides, by unanimous agreement, whether or not you may be reexamined.

**Art**

**Lower Division Courses**

- **5A. Introduction to Art.** Studio, eight hours; five hours arranged. Creative work in fine arts related to historical and contemporary issues selected from media such as drawing, painting, sculpture, printmaking, photography, and new forms and concepts (performance, video, nonobject art).
- **5B. Introduction to Art.** Studio, eight hours; five hours arranged. Prerequisite: course 5A. Continuation of course 5A.
- **5C. Introduction to Art.** Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B. Continuation of courses 5A, 5B.
- **15A. Intermediate Art.** (Formerly numbered 15.) Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A. Continuation of courses 5A, 5B, 5C, with increased emphasis on individual creative development.
- **15B. Intermediate Art.** Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A. Continuation of courses 5A, 5B, 5C, 15A, with increased emphasis on individual creative development.

**Upper Division Courses**

- **130. Drawing.** Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Selected fields in fine printmaking, historical and contemporary: woodcut, etching and engraving, lithography, silk screen, mixed media. May be repeated for a maximum of 16 units.
- **132. Photography.** Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Selected fields in photography, historical and contemporary: documentation, non-silver methods, extended forms, color, mixed media. Photography as a medium of artistic expression. May be repeated for a maximum of 16 units.
- **133. Painting.** Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Selected fields in sculpture, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units.
- **145. Sculpture.** Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Selected studies in sculpture, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units.
- **147. Photography.** Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Selected studies in photography, historical and contemporary: documentation, non-silver methods, extended forms, color, mixed media. Photography as a medium of artistic expression. May be repeated for a maximum of 16 units.
- **148. Advanced Analysis and Criticism.** Discussion, four hours; studio, nine hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Analysis and criticism of individual creative work and ideas. May be repeated for a maximum of 16 units.
- **149. Advanced Art and Artists/History and Theory.** Lecture/discussion, three hours. Prerequisites: consent of instructor. Discussion and analysis of artists and art, historical and contemporary. May be repeated twice for credit.

**Graduate Courses**

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.
Upper Division Courses

56A. Art of India and Southeast Asia. (Formerly numbered 56.) Lecture, three hours; discussion, one hour. A survey of major artistic monuments of the Indian subcontinent and Southeast Asian cultures, concentrating on formal and iconographical problems as well as the political and social conditions under which works were patronized and produced.

56B. Introduction to Chinese Art. (Formerly numbered 56.) Lecture, three hours; discussion, one hour. An introduction to the discipline of Chinese art history. Fundamentals of the methods, materials, and materials of Chinese art, visual and textual sources, peculiarities of patrons, traditional historical and art criticism, and approaches to representation in pre-modern China.

57. Renaissance and Baroque Art. (Formerly numbered Art 57.) Lecture, three hours; discussion, one hour. History of art and architecture in Western Europe from 1400 to 1750.

58A. Art of the Americas. (Formerly numbered Art 58A.) Lecture, three hours; discussion, one hour. Artistic traditions which developed outside the Mediterranean area. Examples include works of the Aztecs, Incas, and Maya.

58B. Art and Architecture of the Americas. (Formerly numbered Art 58B.) Lecture, three hours; discussion, one hour. Artistic traditions which developed outside the Mediterranean area. Examples include works of the Aztecs, Incas, and Maya.

62. Art of the Pre-Columbian Americas. (Formerly numbered 118B.) Lecture, three hours; discussion, one hour. Survey of the sequence of cultures which developed in the area between (and including) Mexico and Peru from ca. 1000 B.C. to the Conquest.

66. Introduction to Chinese Art. (Formerly numbered 56.) Lecture, three hours; discussion, one hour. A survey of major artistic monuments of the Indian subcontinent and Southeast Asian cultures, concentrating on formal and iconographical problems as well as the political and social conditions under which works were patronized and produced.

66B. Introduction to Chinese Art. (Formerly numbered 56.) Lecture, three hours; discussion, one hour. An introduction to the discipline of Chinese art history. Fundamentals of the methods, materials, and materials of Chinese art, visual and textual sources, peculiarities of patrons, traditional historical and art criticism, and approaches to representation in pre-modern China.

57. Renaissance and Baroque Art. (Formerly numbered Art 57.) Lecture, three hours; discussion, one hour. History of art and architecture in Western Europe from 1400 to 1750.

Art History

Lower Division Courses

50. Ancient Art. (Formerly numbered Art 50.) Lecture, three hours; quiz, one hour. Prehistoric, Egyptian, Mesopotamian, Aegian, Greek, Hellenistic, and Roman art and architecture.

51. Medieval Art. (Formerly numbered Art 51.) Lecture, three hours; quiz, one hour. Early Christian, Byzantine, Islamic, Carolingian, Ottoman, Romanesque, and Gothic art and architecture.

54. Modern Art. (Formerly numbered Art 54.) Lecture, three hours; quiz, one hour. Art and architecture from 1800 to the present in Europe and the U.S.

55A. Africa, Oceania, and Native America. (Formerly numbered 55A.) Lecture, three hours; discussion, one hour. Comparative art, emphasizing economic, cultural, and historical aspects of selected artistic traditions which developed outside the sphere of influence of the major European and Asiatic civilizations.

55B. Art of Pre-Columbian America. (Formerly numbered 118B.) Lecture, three hours; discussion, one hour. Survey of the sequence of cultures which developed in the area between (and including) Mexico and Peru from ca. 1000 B.C. to the Conquest.
110B. European Art of the 19th Century: Realism and Impressionism. (Formerly numbered Art 110B.) Lecture, three hours. Prerequisite: course 54. An inquiry into the problem of realism, with emphasis on French art, including developments in England and Germany. Mr. Boime, Mr. Kunzle

110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism. (Formerly numbered Art 110C.) Lecture, three hours. Prerequisite: course 5A. A study of the major developments in modern art, 1860 to 1930, including Seurat, Cézanne, Gauguin, Van Gogh, Art Nouveau, Fauvism, German expressionism. Mr. Kunzle

110D. Contemporary Art. (Formerly numbered Art 110D.) Lecture, three hours. Prerequisite: course 54. European and American art since World War II. Mr. Boime, Mr. Kunzle

110E. Contemporary Art and Politics in the Americas: Responses to Imperialism. (Formerly numbered Art 110E.) Lecture, three hours. Prerequisite: course 54. Synoptic view of the art and media of Latin America, with emphasis on Mexico, the Caribbean, and Nicaragua. Imperalist ideology in the Disney comic. Mr. Kunzle

110F. Selected Topics in Modern Art. Lecture, three hours. Prerequisite: course 54. Changing topics in modern art (post-1970) which reflect the interests of individual regular and visiting faculty members.

112A. American Art. (Formerly numbered Art 112A.) Lecture, three hours. Architecture in the U.S. from the Colonial period to the 19th century. Ms. Whiting

112B. American Art. (Formerly numbered Art 112B.) Lecture, three hours. Painting and sculpture in the U.S. from the Colonial period to the 19th century. Ms. Whiting

112C. American Art. (Formerly numbered Art 112C.) Lecture, three hours. Art and architecture in the U.S. in the 20th century. Ms. Whiting

113. Russian Art. (Same as Russian M113B.) Lecture, three hours. Recommended prerequisites: courses 51, 54, 57. Knowledge of Russian not required. A survey of the art and architecture of Russia from its beginning to the present day. Emphasis on the development of Russian art in its religious, social, and political context.

114A. Early Art of India. (Formerly numbered Art 114A.) Lecture, three hours. Not open to freshmen. Survey of Indian art from the Indus Valley cultures to the 10th century. Emphasis on the development of Buddhist art and its relationship with the culture. Mr. Flier

114B. Later Art of India. (Formerly numbered Art 114B.) Lecture, three hours. Prerequisite: course 114A or consent of instructor. Survey of Indian art from the 10th to the 19th century. The decline of Buddhist art, the last efflorescence of Hindu architecture, Muslim painting and architecture, and Rajput painting.

114D. Art of Korea. Lecture, three hours. The art and archaeology of Korea from the Neolithic Period through the Yi dynasty. Particular emphasis on early archaeology and state formation, Buddhist art, Koryo ceramics, and Yi literati painting.

114E. Arts of Southeast Asia. Lecture, three hours. Not open to freshmen. Southeast Asian art from its beginning in prehistory through the 19th century. A study of the art of selected cultures from Burma, Malaysia, Thailand, Cambodia, Vietnam, and Indonesia.

115A. Advanced Indian Art. (Formerly numbered Art 115A.) Lecture, three hours. Prerequisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course 257.

115B. Advanced Chinese Art. (Formerly numbered Art 115B.) Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course 258.

115C. Advanced Japanese Art. (Formerly numbered Art 115C.) Lecture, three hours. Prerequisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course 259.

115D. Art of Early China, Neolithic to A.D. 906. Lecture, three hours. Prerequisite: consent of instructor. The period generally known as “early China,” ranging from the earliest Neolithic artifacts to the end of the Tang dynasty (618-906). Concurrently scheduled with course 261B.

115E. Chinese Art of the Sung and Yuan Dynasties, 906-1368. Lecture, three hours. Prerequisite: consent of instructor. The evolution of Chinese painting and some of the sculpture from the Sung through the Yuan periods (906-1368). Concurrently scheduled with course 261B.

115F. Chinese Art from the Ming Dynasty to the People's Republic, 1368 to the Present. Lecture, three hours. Prerequisite: consent of instructor. The evolution of Chinese painting and graphic art from the Ming dynasty through the late 1970s. Concurrently scheduled with course C261C.

117A. Pre-Columbian Art of Mexico. (Formerly numbered Art 117A.) Lecture, three hours. Prerequisite: course 55B or consent of instructor. A study of the art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C218A.

117B. Pre-Columbian Art of the Maya. (Formerly numbered Art 117B.) Lecture, three hours. Prerequisite: course 55B or consent of instructor. A study of the art of selected cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C218B.

117C. Pre-Columbian Art of the Andes. (Formerly numbered Art 117C.) Lecture, three hours. Prerequisite: course 55B or consent of instructor. A study of the art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on the history and iconography of the art of Peru. Concurrently scheduled with course C218C.

118A. Arts of Oceania. (Formerly numbered Art 118A.) Lecture, three hours. Prerequisite: course 55A or consent of instructor. Survey of the arts of the major island groupings of the Pacific, emphasizing style-regions and broad historical relationships.

118B. Arts of Sub-Saharan Africa. (Formerly numbered Art 118B.) Lecture, three hours. Survey with emphasis on sculpture, of selected traditions within a style-region framework.

118D. Arts of Native North America. (Formerly numbered Art 118D.) Lecture, three hours. Prerequisite: course 55B or consent of instructor. Survey of the arts of painting, sculpture, and other arts from the Eskimo to the peoples of the Caribbean and the Northwestern U.S.

119A. Advanced Studies in African Art. (Formerly numbered Art 119A.) Lecture, three hours. Selected topics in the arts of peoples living west and north of Cameroon, with emphasis on special problems of theory and method. Concurrently scheduled with course C216A.

119B. Advanced Studies in African Art: Central Africa. (Formerly numbered Art 119B.) Lecture, three hours. Selected topics in the arts of peoples of equatorial, southern, and eastern Africa, with emphasis on selected regional styles and methods. Concurrently scheduled with course C216B.

120A. History of Prints. (Formerly numbered Art 120A.) Lecture, three hours. Development of style and techniques of expression in the graphic arts from the 15th to the early 16th century. Mr. Cuno

120B. History of Prints. (Formerly numbered Art 120B.) Lecture, three hours. Development of style and techniques of expression in the graphic arts from the 16th to the early 17th century. Mr. Cuno

120C. History of Prints. (Formerly numbered Art 120C.) Lecture, three hours. Development of style and means of expression in drawing from the late Middle Ages to the early Renaissance. Mr. Cuno

121A. Critical and Historical Studies in Drawing. (Formerly numbered Art 121A.) Lecture, three hours. Development of style and means of expression in drawing from the late Renaissance to the present. Mr. Cuno

121B. Critical and Historical Studies in Drawing. (Formerly numbered Art 121B.) Lecture, three hours. Development of style and means of expression in drawing from the late Renaissance to the present. Mr. Cuno

125. Tutorial Conferences. (Formerly numbered Art 125.) Tutorial conferences. Prerequisites: courses 5, 51, 54, 57. Limited to undergraduate art history majors. Discussion of selected art topics, with emphasis on related readings in music, literature, history, and philosophy. Oral reports. P/NP grading.

127. Undergraduate Seminar. Lecture, three hours. Prerequisite: junior standing or consent of instructor. Selected aspects of art history explored through readings, discussion, research papers, and oral presentations. May be repeated twice.

197. Honors Course. Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 in major, consent of instructor, junior or senior standing. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art (2 to 8 units). Hours to be arranged. Prerequisites: 3.0 GPA in major, consent of instructor, senior standing. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

201. Historiography of Art History. (Formerly numbered Art 201.) Seminar, two hours. A critical study of the various approaches to art history through the centuries, concentrating on one time period, on the work of one or more authors, or on a particular methodology.

202. Methodology of Art History (2 to 8 units). (Formerly numbered Art 202.) Sections oriented to the development and refinement of specialized research skills appropriate to particular periods and areas in the history of art.

203. Museum Studies. (Formerly numbered Art 203.) Seminar, two hours. Various aspects of museum activities: concepts and historical evolution of art museums and collecting; methodology of exhibitions; problems involved in acquisition and evaluation of works of art.

204. Conservation, and Preservation. (Formerly numbered Art 204.) Seminar, two hours. May not be repeated.
205. Studies in Prints. (Formerly numbered Art 205.) Seminar, two hours. Critical studies in the history and connoisseurship of the graphic arts in the Western world. Group or individual studies often culminate in professionally directed exhibitions produced by the Grunwald Center for the Graphic Arts. Ms. Cuno

206. Studies in Drawings. (Formerly numbered Art 206.) Seminar, two hours. Critical studies in the history and connoisseurship of draughtsmanship in the Western world. Individual studies emphasizing professional presentation. Group studies may culminate in exhibitions sponsored by the Grunwald Center for the Graphic Arts. Ms. Cuno

210. Egyptian Art. (Formerly numbered Art 210.) Seminar, two hours. Prerequisite: courses 101A, 101B, 102A. Art in Egypt during the Late period and the Greco-Roman period. Students should be ready to prepare for every meeting a briefing of a topic from archaeological memoirs, not to exceed 10 minutes. Some lectures.

211. Topics in Aegean Art. Seminar, two hours. Prerequisites: courses 102A and 102B, or consent of instructor. The art and architecture of the Aegean Bronze Age (3000-1000 B.C.) and the monuments or theoretical problems related to the art and culture of Crete, Greece, the Cyclades, or Western Anatolia. Mr. Preziosi

213. Advanced Studies in Islamic Art. (Formerly numbered Art 213.) Seminar, two hours. The art and architecture of the Islamic world (Spain to Iran) from the 7th to the 17th century. Critical studies in selected topics in the art of the Islamic world (Spain to Iran) from the 7th to the 17th century. Critical studies in selected topics. Ms. Boni

214. Problems in Islamic Art. (Formerly numbered Art C214.) Lecture, three hours. Prerequisite: consent of instructor. Monographic theoretical approach to topics related to Islamic culture and artistic production. Concurrently scheduled with course C110A. Ms. Biernan

216A. Advanced Studies in African Art: Western Africa. (Formerly numbered Art C216A.) Lecture, three hours. Selected topics in the arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. Concurrently scheduled with course C119A. Ms. Biernan

216B. Advanced Studies in African Art: Central Africa. (Formerly numbered Art C216B.) Lecture, three hours. Selected topics in the arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C119B. Ms. Biernan

218A. Pre-Columbian Art of Mexico. (Formerly numbered Art C218A.) Lecture, three hours. Prerequisite: course 55B or consent of instructor. A study of the art of selected cultures of central Mexico from ca. 3000 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C117A. Ms. Klein

218B. Pre-Columbian Art of the Maya. (Formerly numbered Art C218B.) Lecture, three hours. Prerequisite: course 55B or consent of instructor. A study of the art of the selected cultures of Mexico, Guatemala, Belize, and the Yucatan peninsula. Concurrently scheduled with course C117B. Ms. Klein

218C. Pre-Columbian Art of the Andes. (Formerly numbered Art C218C.) Lecture, three hours. Prerequisite: course 55B or consent of instructor. A study of the art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on the history and iconography of the art of Peru. Concurrently scheduled with course C117C. Ms. Klein

219A. Oceanic Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in the art of the Pacific islands. Ms. Klein

219B. Pre-Columbian Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in the art of Pre-Hispanic Latin America. Ms. Klein

219C. African Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in the art of sub-Saharan Africa. Ms. Klein

219D. Native North American Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in the art of the American Indian. Ms. Klein

220. Oceanic, Pre-Columbian, African, and Native North American Art. (Formerly numbered Art 220.) Seminar, two hours. Prerequisite: consent of instructor. Studies in selected topics in the art of the Americas. Ms. Klein

221. Topics in Classical Art. (Formerly numbered Art 221.) Lecture, two to three hours. Studies in Parthian art. A site-by-site survey of the Near East (Afghanistan, Iran, Iraq, Syria) during the period of Greek and Parthian control. Ms. Downey

223. Classical Art. (Formerly numbered Art 223.) Seminar, two hours. Studies in Greco-Roman art and archaeology. Studies of specific periods, sites, or artistic media. Ms. Downey

225. Medieval Art. (Formerly numbered Art 225.) Seminar, two hours. Studies in selected topics in Byzantine and European medieval art. Ms. Kalavrezou-Maxeiner

229. Renaissance and Baroque Architecture. (Formerly numbered Art 229.) Seminar. Prerequisites: knowledge of Italian. A workshop approach to documents pertaining to artistic commissions from the 16th to the 17th century in Italy to study various aspects of architectural and painting in official and private settings, correspondence, treatises, and inscriptions. Ms. Pedretti

230. Italian Renaissance Art. (Formerly numbered Art 230.) Seminar, two hours. Prerequisite: knowledge of Italian. A study of various aspects of Leonardo's theoretical approach to art in terms of sources and the impact on followers. Ms. Pedretti, Ms. Weiss, Ms. Woods-Marsh

231. Leonardo and Renaissance Theory of Art. (Formerly numbered Art 231.) Seminar, two hours. Prerequisite: knowledge of Italian. A study of various aspects of Leonardo's theoretical approach to art in terms of sources and the impact on followers. Ms. Pedretti

235. Northern Renaissance Art. (Formerly numbered Art 235.) Seminar, two hours. Prerequisite: knowledge of German. Emphasis on a selected topic (e.g., a particular artist, trend, or problem). Research papers and oral reports required. Ms. Pedretti

240. Baroque Art. (Formerly numbered Art 240.) Seminar, two hours. Emphasis on a selected topic (e.g., a particular artist, trend, or problem). Research papers and oral reports required. Language requirements depend on area of focus. Ms. Pedretti

244. Topics in European Art from 1700 to 1900. (Formerly numbered Art 244.) Seminar, two to three hours. Ms. Bennett

245. European Art from 1700 to 1900. (Formerly numbered Art 245.) Seminar, two hours. Ms. Bennett

255. American Art. (Formerly numbered Art 255.) Seminar, two hours. Advanced studies in the evolution of American art, chiefly architecture and painting from the 18th to the early 20th century. Critical and evaluation of scholarship and new research directed toward professional presentation. Ms. Tonelli, Ms. Whiting

257. Advanced Indian Art. (Formerly numbered Art C257.) Lecture, three hours. Prerequisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C115A.

258. Advanced Chinese Art. (Formerly numbered Art C258.) Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course C115B.

259. Advanced Japanese Art. (Formerly numbered Art C259.) Lecture, three hours. Prerequisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course C115C. Ms. McCallum

260. Asian Art. (Formerly numbered Art 260.) Seminar, two hours. Advanced studies in the secular and religious artistic traditions of India, China, Japan, and adjacent regions. Topics and geographic areas vary each term. Ms. McCallum

261A. Art of Early China, Neolithic to A.D. 906. Lecture, three hours. Prerequisite: consent of instructor. The period generally known as "early China," ranging from the Neolithic through the end of the Tang dynasty (618-906). Concurrently scheduled with course C115D.

261B. Chinese Art of the Sung and Yuan Dynasties, 906-1368. Lecture, three hours. Prerequisite: consent of instructor. The evolution of Chinese painting and sculpture from the Sung through the Yuan dynasties (906-1368). Concurrently scheduled with course C115E.

261C. Chinese Art from the Ming Dynasty to the People's Republic, 1368 to the Present. Lecture, three hours. Prerequisite: consent of instructor. The evolution of Chinese painting and sculpture from the Ming dynasty through the late 1970s. Concurrently scheduled with course C115F.

265. Fieldwork in Archaeology (2 to 8 units). (Formerly numbered Art 265.) Participation in archaeological excavations or other archaeological research under supervision of the staff.

275. Teaching Apprenticeship Practicum (1 to 4 units). Prerequisite: apprenticeship on a teaching assignment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curricular and instructional matters at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units). (Formerly numbered Art 597.) Prerequisite: consent of instructor. S/U grading.

598. Research and for Preparation of Master's Thesis (2 to 12 units). (Formerly numbered Art 598.) Prerequisite: consent of instructor. S/U grading.

599. Research and for Preparation of Ph.D. Dissertation (2 to 12 units). (Formerly numbered Art 599.) Prerequisite: consent of instructor. S/U grading.

**Design**

**Lower Division Courses**

30A. Nature of Design. (Formerly numbered Art 30A.) Lecture, three hours; discussion, one hour. Open to nonmajors. Understanding the design process, with emphasis on development of a visual language: a study of historic, scientific, technological, economic, and cultural factors influencing design in our physical environment.
31A. Fundamentals of Design: Color. (Formerly numbered Art 31A.) Lecture, two hours; laboratory, four hours. Course 32A may be taken concurrently. Exploration of color in theory and practice. Development and articulation of sensory concepts. Mr. Vasa in charge.

31B. Fundamentals of Design: Form. (Formerly numbered Art 31B.) Lecture, two hours; laboratory, four hours. Course 32B may be taken concurrently. Introduction of three-dimensional form concepts as a foundation for creativity; origin and solution of problems. Mr. Vasa in charge.

32A. Perceptual Drawing. (Formerly numbered Art 32A.) Demonstrating discussion-laboratory, eight hours. Course 31A may be taken concurrently. Translation of perception through delineation, drawing, and other descriptive media. Mr. Vasa in charge.

32B. Visual Presentation. (Formerly numbered Art 32B.) Lecture, two hours; studio, four hours. Course 31A or 31B may be taken concurrently. Translation of idea through delineation, drawing, and other descriptive media. Mr. Vasa in charge.

34A. History of Design I. (Formerly numbered Art 34A.) Lecture, three hours; discussion, three hours. Prerequisite: course 33A. Prerequisite: course 33A. Mr. Vasa in charge.

34B. History of Design II. (Formerly numbered Art 34B.) Lecture, three hours; discussion, one hour. Prerequisite: course 34A. Not open to seniors. Analysis of significant concepts of form in relation to social and technological developments from 1800 to the present. Mr. Lee.

35A. Introduction to Photography and the Computer. Lecture, two hours; studio, four hours. Introduction to camera operation, photo processing, laboratory and lighting procedures; introduction to the computer as a design tool and image development medium. Ms. Bick, Mr. W. Brown, Mr. Kataoka.

35B. Introduction to Media, Tools, and Processes. Lecture, two hours; studio, four hours. Introduction to use of tools for natural and industrial materials, including plastic, metal, wood, cardboard; use of drafting instruments and related tools. Orthographic and isometric projection as methods of design presentation. Mr. Shapira.

Upper Division Courses

(I) Comparative Studies in Design

161A. Ceramics. (Formerly numbered Art 161A.) Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. The evolution of ceramic form through geographic, social, and technological influences. Mr. Saxe.

161C. Comparative Studies in Communication Design. (Formerly numbered Art 161C.) Studio, three hours. Prerequisite: upper division standing. Open to nonmajors. Studies of symbol, sign, and image. Within social, cultural, and historical contexts, analysis of print and electronic forms. Mr. W. Brown, Mr. Kataoka.

161E. Industrialization. (Formerly numbered Art 161E.) Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. A historical survey of the development of Western industrial culture. Studies of the major factors influencing the transition from industrial societies to postindustrial information societies. Mr. Shapira.

161G. Shalat. (Formerly numbered Art 161G.) Lecture, three hours; laboratory, to be arranged. The development of interior spaces in relation to structure, visual quality, function, human needs, and behavior. Mr. Kester.

161H. Textiles. (Formerly numbered Art 161H.) Lecture, three hours. The development of textile forms through geographic, cultural, stylistic, and technological influences. Mr. Kester.

161J. Video Imagery. (Formerly numbered Art 161J.) Lecture, three hours; laboratory, to be arranged. Analysis of videographic form. Mr. Kataoka.

(II) Concept and Form in Design

162A. Ceramics. (Formerly numbered Art 162A.) Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to ceramic materials and processes as a medium of cultural and individual expression. Investigation of handforming methods. Mr. Saxe.

162B. Ceramics. (Formerly numbered Art 162B.) Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Introduction to the use of the potter’s wheel. May be repeated after completion of courses 162B through 162F. Mr. Saxe.

162C. Ceramics. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Creative development of ceramic materials and processes, with emphasis on indirect methods of forming such as the use of molds and mechanically produced ceramic elements. May be repeated after completion of courses 162B through 162F. Mr. Saxe.

162D. Ceramics. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Investigation of ceramic surface treatments and their relation to ceramic form; the study of traditional and experimental materials and processes to achieve appropriate functional surfaces required for function and as a means of creating decorative and expressive imagery. May be repeated after completion of courses 162B through 162F. Mr. Saxe.

162E. Primitive Ceramics. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Investigation of the materials and methods of Neolithic and other early ceramic traditions. Emphasis on the creative use of primitive ceramic technology to better understand the nature of clay and the effects of firing. Firing in the field without a kiln. May be repeated after completion of courses 162B through 162F. Mr. Saxe.

162F. Advanced Ceramics. Studio, six hours. Prerequisites: courses 162A, 162B, 165A, 167A, 171A. Introduction of advanced technique in the use of the potter’s wheel. Emphasis on individual creative experimentation with materials and methods introduced in courses 162A through 162F, in conjunction with advanced projects incorporating wheeled forms. May be repeated after completion of courses 162B through 162F. Mr. Saxe.

165A. Fundamentals of Communication Design. (Formerly numbered Art 165A.) Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to basic elements of graphic design and the development of visual communication concepts. Exploration of letterforms, typography, symbols, and imagery through graphic and electronic media. Mr. W. Brown, Mr. Kataoka.

165B. Communication Design: The Printed Image. (Formerly numbered Art 165B.) Studio, six hours. Prerequisite: course 165A. Development of concepts exploring the visual potential of the graphic image. Technologies include screen printing, xerography, laser printing, ink jet, electrostatic, thermography, offset lithography, video printing, and other reproduction processes. May be repeated after completion of courses 165B through 165E. Mr. W. Brown, Mr. Kataoka.

165C. Communication Design: The Video Image. Studio, six hours. Prerequisite: course 165A. Use of video technology (video systems, cameras, displays, editing, storage, and reproduction devices) to integrate image, sound, time, and motion. Emphasis on expression, continuity and sequential patterns for video communication. May be repeated after completion of courses 165B through 165E. Mr. Kataoka.

165D. Communication Design: The Computer Image. Studio, six hours. Prerequisite: course 165A. Exploration of the computer as an image-generating tool. The development of visual ideas for print, television, and film applications designing original images, videography, typography, and photography. May be repeated after completion of courses 165B through 165E. Mr. W. Brown, Mr. Kataoka.

165E. Advanced Communication Design: Special Studies I. Studio, six hours. Prerequisites: three courses from 165A through 165D. A synthesis of studies and media presented in courses 165A through 165D. Mr. Shapira in charge, with emphasis on the use of two or more media. May be repeated after completion of courses 165B through 165E. Mr. W. Brown, Mr. Kataoka.

165F. Advanced Communication Design: Special Studies II. Studio, six hours. Prerequisites: a minimum of three courses from 165A through 165E, consent of instructor. Emphasis on conceptual versatility based on experience in prior communication design courses. Students should be well-versed in all of the technologies available in the program. May be repeated once. Mr. W. Brown, Mr. Kataoka.

167C. Human Factors in Product and Space Planning. Studio, six hours. Prerequisites: courses 167A, 167B. Studies in the psychological and physical requirements for designing products and spaces. Interpretation of anthropometric ergonomic information. Development of design concepts relating to the needs and use of objects and spaces. Computer applications included. May be repeated after completion of courses 167B through 167F. Mr. Carter, Mr. Shapira.

167D. Industrial Design: Product Development I. Studio, six hours. Prerequisites: courses 167A, 167B. Intermediate-level product planning, research, and development as a design tool. Studies in the relation of design methodology to social and economic constraints. Development of design concepts and their realization at the model and prototype stage. May be repeated after completion of courses 167B through 167F. Mr. Shapira.

167E. Industrial Design: Product Development II. Studio, six hours. Prerequisites: courses 167A, 167B. Product planning, research, and design development as a design tool. Studies in the relation of design methodology to social, economic, and environmental impacts. May be repeated after completion of courses 167B through 167F. Mr. Shapira.

167F. Advanced Industrial Design: Product Design, Research, and Innovation. Studio, six hours. Prerequisites: course 167A. Further studies in computer applications in industrial design, from ideation, conceptualization, and programming to model building and manufacturing. Mr. Carter, Mr. Shapira.
170A-170B. Interior Spaces. (Formerly numbered Art 170A-170B.) Lecture, two hours; laboratory, four hours. Prerequisites: courses 30A, 31A, 31B, 32A, 32B, or equivalent. Course 170A is prerequisite to 170B. The definition of structure and space in relation to human needs. Each course may be repeated once.

Mr. Shapiro

171A. Textiles: Fundamentals of Fibre Form and Structure. (Formerly numbered Art 171A.) Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to the terminology and scope of the field; orientation to materials and equipment; expansion of design concepts and theories toward the making of fabrics; fundamental experiments in fabric making, dyeing, and patterning. Mr. Bassler, Mr. Kesler.

171B. Fabric Surface. (Formerly numbered Art 171B.) Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Not open to students with credit for course 171A prior to Fall Quarter 1987. Patterning through the use of linoprint and silk screen processes, including experiments in traditional and random patterning systems; experiments utilizing single and multiple lino and screen printings. May be repeated after completion of courses 171B through 171F.

Mr. Bassler, Mr. Kesler

171C. Fabric Dye Processes. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Not open to students with credit for course 171B prior to Fall Quarter 1987. Experimentation with essential dye systems and procedures, including immersion, direct application, and resist. May be repeated after completion of courses 171B through 171F.

Mr. Bassler, Mr. Kesler

171D. Textile Construction. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Experimentation utilizing the loom for structural patterning, including two- to eight-harness weaves; float and supplementary elements; introduction to computer-generated patterning. May be repeated after completion of courses 171B through 171F.

Mr. Bassler, Mr. Kesler

171E. Non-Loom Fabric Making. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Not open for credit to students with credit for former course 164B. Introduction to the terminology of the field, orientation to material and equipment, expansion of design concepts to construct fabrics without the loom as a tool, utilizing fiber and related pliable materials. May be repeated after completion of courses 171B through 171F.

Mr. Bassler, Mr. Kesler

171F. Textile Construction. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Development of two- and three-dimensional structures utilizing the loom, including experiments in construction of multiple-layer weaves, experiments in manipulation of the woven surface, experiments in architecturally scaled materials. May be repeated after completion of courses 171B through 171F.

Mr. Bassler, Mr. Kesler

(III) Proseminars in Design

189. Topics in Design. (Formerly numbered Art 189.) Lecture/discussion, three hours; laboratory, to be arranged. Prerequisite: consent of adviser and instructor. Examination by faculty members of specific problems relevant to design theory and performance. (Topics announced in advance. May be repeated for a maximum of 16 units.

193. Proseminar in Design: Senior Studies. (Formerly numbered Art 193.) Proseminar, three hours. Prerequisite: consent of adviser. Open to senior and advanced students through design faculty advisers. Examination by faculty members of specific problems relevant to design theory and performance. (Topics announced in advance. May be repeated twice.

197. Honors Course. Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 in major, consent of instructor, junior or senior standing. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art (2 to 8 units). Hours to be arranged. Prerequisites: 3.0 GPA in major, consent of instructor, senior standing. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduates.

M. W. Brown, M. Kataoka

284. Ceramics (2 to 8 units). (Formerly numbered Art 284.) Tutorial or tutorial/seminar, to be arranged. Prerequisite: consent of instructor: Advanced creative research utilizing ceramic media. Emphasis on development of original, expressive, individually produced ceramic art.

M. Saxe

287. Form and Structure Tutorial (2 to 8 units). (Formerly numbered Art 287.) Hours to be arranged. Exploration of form, with emphasis on expressive experimentation in materials and processes.

M. Vasa

288. Fiber Structures (2 to 8 units). (Formerly numbered Art 288.) Laboratory, two to four hours. Advanced formative work in traditional and experimental processes of fabric construction utilizing fiber media.

M. Bassler, M. Kester

290. Design Seminar: A Collaborative View. (Formerly numbered 290A-290B-290C.) Seminar, three hours. Critical and theoretical examination of concepts underlying the creative process, including the initiation of an idea, its development, and its social and historical context.

M. Kester, M. Swinoff

292. Shelter (2 to 8 units). (Formerly numbered Art 292.) Development of individual projects to investigate concepts of shelter. Exploration of traditional and contemporary forms, methods, and materials.

M. Shapira

293. Interior Space Design (2 to 8 units). (Formerly numbered Art 293.) The concept and practice of designing interior spaces. Evaluation of visual and functional needs for interior spaces (ranging from personal to social spaces) in two- and three-dimensional projects involving color, light, surface, materials, equipment, furniture, etc.

M. Kester, M. Shapira

294. Industrial Design (2 to 8 units). (Formerly numbered Art 294.) Laboratory, two to four hours. In-depth studies in topics such as design and management, person-object compatibility, visual identity programs, containing systems, transportation, design for developing countries, ergonomics, urban components, area studies, materials, and processes.

M. Shapira

295. Exhibition Design (2 to 8 units). (Formerly numbered Art 295.) Laboratory, two to four hours. Interpretation and presentation of materials for exhibition. Students may elect to work with instructor and gallery staff on regularly scheduled productions or they may outline their own project and proceed by producing studies, renderings, or schematics or by fabricating models.

M. Carter

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor.

Classics
Scope and Objectives

Bodily skill, artistry, and deep understanding are necessary for an intelligent and creative artist. Dancers at UCLA receive extensive movement experience in contemporary dance, ballet, improvisation, and ethnic forms through practical work in studios, workshops, and performances. The art of dance is explored in costume design, lighting and scenic design, music and sound, and video. The development and relevance of dance are studied through courses in dance history, ethnology, notation, therapy, kinesiology, and education. Modern choreography is the basis of the UCLA program in dance.

UCLA offers the Bachelor of Arts degree in Dance combining preprofessional training with the liberal study essential to the development of each dancer’s own creative potential.

The graduate program awards the Master of Arts degree in Dance, designed for students preparing to continue professionally as choreographers, performers, designers, teachers, and researchers, with specific areas of focus in choreography/performance, dance ethnology, and dance education. A Master of Arts degree in Dance/Movement Therapy is also offered. The therapy program is approved by the American Dance Therapy Association.

Bachelor of Arts Degree

The dance major offered through the College of Fine Arts leads to the Bachelor of Arts degree. Students who wish to confer with the departmental counselor regarding program planning and major requirements should contact Wendy Temple in the department office.

Preparation for the Major

The Major

Required: A total of 58 units of upper division coursework, including Dance 100A-100B-100C, 113A-113B-113C, C1020, 123A, 123B, 132A-132B, 134A, 134B, 141, 144, 146, 149, and six units selected from upper division dance electives.

Admission to the upper division major is determined by a screening and evaluation conducted during Spring Quarter of your sophomore year. All entering transfer students are auditioned for placement in technique and choreography classes.

Master of Arts in Dance

Admission

A bachelor’s degree with an undergraduate major in dance or equivalent experience is required. Some of this experience may have been gained outside the academic setting through such avenues as studio work. The department has its own application form (in addition to that used by the Graduate Admissions Office); three letters of recommendation and an audition are also required.

The audition looks at your technical proficiency and creative potential, which is expected to be no lower than the level of the UCLA undergraduate junior. Special attention is given to the creative aspects of dance. Because the department recognizes the importance of diversity and specialization at the graduate level, you are evaluated according to your primary focus (i.e., performance-choreography, education, therapy, or ethnology).

Prospective students may write to the Department of Dance, 124 Dance Building, UCLA, Los Angeles, CA 90024-1608, for departmental brochures which give additional information on the graduate program.

Foreign Language Requirement

There is no foreign language requirement at the graduate level. However, if you specialize in dance ethnology and plan to do fieldwork, it is recommended that, during your graduate study or before, you gain working knowledge of the language of your research area.

Course Requirements

Nine courses (or more depending on your specialization) are required, distributed as follows: (1) Dance 230; (2) four courses (16 units) in the department at the graduate level (200 series); (3) four courses (16 units) in or outside the department at the upper division or graduate level. These may not be classes taken to fulfill deficiencies nor technique or ethnic performance classes.

These requirements are to be partially fulfilled by one of the following patterns: (1) Dance 151, 211A through 211F (choreography/performance); (2) courses 151, 211A-211B-211C, 251A-251B (dance education); (3) courses 280A-280B-280C, 280E (dance ethnology).

Eight units of 500-series courses (596A, 596R, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement.

The following upper division courses may be applied toward the M.A. degree: Dance 103, 114, 123C, 126, 142, 151, 152, 153, 160, 181A, 181B, 181C, 181D, 182A, 183A, 184B, 187A, 190, 191. Other areas such as dance history, philosophy and criticism, dance kinesiology, dance production, dance and media, music for dance, and dance notation may be pursued on the advice of the chair or an adviser after you have been in the graduate program for several quarters and have identified a unique interest and competence in one of these areas.

While fieldwork is not a requirement for those specializing in the area of dance ethnology, it is strongly suggested as part of that program.

Teaching Experience

Teaching experience is not a requirement for the degree. It is highly recommended, however, for those graduating with a focus in dance education.

Thesis Plan

If you select the thesis plan, you prepare a report of the results of your original research or creative work. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the graduate faculty committee. If the thesis plan is accepted, a thesis committee is formed. Conditions for re-examination in case you fail the first presentation are based on the support of several faculty members.

Comprehensive Examination Plan

You must declare your intention to take the comprehensive examination plan in your third or fourth quarter by preparing a written proposal of the plan, which is to be presented and defended before a panel of faculty. The examination, administered by a committee of your choice selected from faculty in your specialization, Dance Department faculty outside your specialization, and faculty outside the department, consists of three written questions and an oral test and takes approximately three days to complete. Each committee member grades each question pass, pass with honors, or fail. In order to pass, each question must be graded pass or better by two of the three committee members. If any questions are failed, you may retake the failed portion(s) once only.

Master of Arts in Dance/Movement Therapy

An M.A. in Dance/Movement Therapy is required for registry as a therapist with the American Dance Therapy Association (ADTA).

Admission

In addition to the requirements listed above under the M.A. in Dance, an undergraduate course in abnormal psychology is required, and other courses in psychology (developmental, personality, and group dynamics) are highly recommended.
Course Requirements

During your second year, you are required to serve a three-day internship within a clinical facility, providing an opportunity to work with a variety of clinical populations.

Thesis Plan

A thesis of a theoretical, clinical, or empirical nature may be written under the supervision of senior faculty members in your major field and one faculty member from another department.

Comprehensive Examination Plan

You must declare your intention to take the comprehensive examination plan during your third or fourth quarter by preparing a written proposal of the plan, which is presented and defended before a panel of faculty. The examination, administered by a committee of Dance Department faculty, consists of three written questions and an oral section. Each committee member grades all questions. In order to pass, each question must be graded pass or better. If any questions are failed, you may re-take the failed portion(s) once only.

Lower Division Courses

1A-1F. Fundamentals of Modern Dance (2 units each). Studio, three hours. Designed for nondance majors. Courses must be taken in sequence. Study of dance technique, improvisation, and choreography. Critical viewing, reading, and discussion of modern dance artists’ historical/aesthetic styles. (F, W, Sp) Ms. Snyder

6F-6W-6S. Fundamentals of Ballet (0 units, 0 units, 2 units). Laboratory, four hours. Prerequisite: dance major or consent of instructor. Students admitted in Fall Quarter only. Study of ballet techniques and principles, including dance terminology. In Progress grading. Ms. Hills (F, W, Sp)

7F-7W-7S. Fundamentals of Ballet (0 units, 0 units, 2 units). Laboratory, four hours. Prerequisite: dance major or consent of instructor. Students admitted in Fall Quarter only. Study of ballet techniques and principles, including dance terminology. In Progress grading. Ms. Hills (F, W, Sp)

10. Introduction to Dance (2 units). An introduction to the many and varied theoretical aspects of dance as a discipline. (F, W, Sp)

11A-11F. Modern Dance Technique and Choreography (2 units each). Lecture, one hour; studio, three hours. Limited to dance majors. Experiences designed to achieve beginning to intermediate levels of kinesthetic awareness and technical and improvisational skills, as well as an understanding of the creative process of structure and form in dance compositions. Ms. Kalman, Ms. Leung, Mr. Quigley (F, W, Sp)

20. Music Analysis for Dance (2 units). Lecture, two hours; laboratory, one hour. Study of the elements of music, music structures, and their relationship to dance, with emphasis on rhythmic analysis, dance accompaniment, and teacher- accompanist roles. (F, W, Sp)

25A. Beginning Labanotation (2 units). Lecture, two hours; laboratory, one hour. Introduction to writing dance/movement in Labanotation. Basic skills in reading dances from the notated score. Mrs. Dunin, Ms. Leung, Mrs. Scothorn (F, W, Sp)

Upper Division Courses

100A-100B-100C. Modern Dance: Intermediate Technique and Choreography. Lecture, three hours; laboratory, four hours. Prerequisite: course 25A. Continued study of dance/movement in Labanotation. Emphasis on reading dances from the notated score. Mrs. Dunin, Ms. Leung, Mrs. Scothorn (F, W, Sp)

40. Introduction to Dance Theater (2 units). Lecture, two hours; laboratory, two hours. Prerequisite: course 25A or consent of instructor. Study of the creative elements of choreography, score, sound, and design and how they interact with the practical elements of personnel, materials, and procedures in presenting dance theater. Mrs. Siegel (W)

48. Laboratory in Dance Production (1 unit). Laboratory, two hours. Realization of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. Must be repeated once in another year. P/NP grading. Mr. Topi (F, W, Sp)

70. Survey of Dancing in Selected Cultures (2 units). Studio, three hours. Introduction to dances and their movement characteristics in Western and non-Western cultures. Mrs. Dunin, Mr. Ogley (F, Sp)

71B. Dance of Indonesia (2 units). Studio, three hours. Dance experience not required. Introduction to the technique and repertory of dance traditions (e.g., Javanese, Sundanese, Maori). Mrs. Dunin (W, Sp)

71C. Dance of Japan (2 units). Studio, three hours. Dance experience not required. Technique and repertoire from the court dance tradition (e.g., Gagaku). Ms. Topi (F, W, Sp)

71D. Dance of India (2 units). Studio, three hours. Dance experience not required. Introduction to dance in India, with emphasis on a particular tradition (e.g., Bharata Natyam). Ms. Yodh (F)

71E. Dance of Korea (2 units). Studio, three hours. Dance experience not required. Technique and repertoire of a selected dance tradition (e.g., Korean classical and folk). Ms. Yodh (F)

72B. Dance of Ghana (2 units). Studio, three hours. Dance experience not required. Introduction to dance in Ghana, with emphasis on contemporary trends. Music for the dance performance. May be concurrently scheduled with course C220. Ms. Siegel (F, W, Sp)

73B. Dance of Mexico (2 units). Studio, three hours. Dance experience not required. Introduction to forms and styles in dances of several ethnographic regions. Emphasis on identifying dance characteristics through actual dancing. Ms. Rios (F)

74B. Dance of Yugoslavia (2 units). Studio, three hours. Dance experience not required. Introduction to forms and styles in dances of several ethnographic regions. Emphasis on identifying dance characteristics through actual dancing. Ms. Rios (F)

75B. Dance of Spain (2 units). Studio, three hours. Dance experience not required. Technique and repertoire of dances from selected ethnographic regions. Ms. Gantz (F, W, Sp)

76B. Dance of Israel (2 units). Studio, three hours. Dance experience not required. Technique and repertoire from selected ethnographic regions. Ms. Gantz (F, W, Sp)

79A-79Z. Dance of a Selected Culture (2 units each). Studio, three hours. Introduction to dances and cultures major or consent of instructor. Studio, three hours. Dance experience not required. Technique and repertoire of a selected dance tradition (e.g., Korean classical and folk). Independent work in solo and group choreography culminating in a final performance project. Mrs. Dunin, Ms. Leung (Sp)

100A-100B-100C. Modern Dance: Intermediate Technique and Choreography. Lecture, two hours; laboratory, four hours. Prerequisite: course 25A. Continued study of dance/movement in Labanotation. Emphasis on increasing technical skill. Each course may be repeated once. Ms. Kalman, Ms. Leung, Mr. Quigley (F, W, Sp)

102A-102B-102C. Advanced Modern Dance Technique (2 units each). Lecture, one hour; studio, five hours. Techniques levels II and III. Emphasis on increasing technical skill. Each course may be repeated once. Mrs. Dunin, Ms. Leung, Mr. Quigley (F, W, Sp)

103. Improvisation in Dance (2 units). Studio, four hours. Prerequisite: dance major or consent of instructor. Development of an aesthetic perspective through the use of imagery, sound, and other art. Concentration and projection. May be repeated twice. Ms. Kalman (W)

106A-106B-106C. Intermediate Ballet (2 units each). Laboratory, three hours. Prerequisites: courses 7F-7W-7S or consent of instructor. Courses must be taken in sequence. Study of techniques and principles of classical ballet, including phrasing, combinatorial, and repertoire. Each course may be repeated once. Ms. Hills (F, W, Sp)

107A-107B-107C. Advanced Ballet (2 units each). Lecture, two hours; laboratory, two hours. Prerequisite: course 106C. Advanced technique and repertoire of classical ballet, with emphasis on performing skills. Each course may be repeated once. Ms. Hills (F, W, Sp)

113A-113B-113C. Advanced Modern Dance: Technique, Choreography, and Performance (2 units each). Lecture, three hours; laboratory, four hours. Prerequisite: course 100C. Advanced technique studies, with emphasis on developing performance qualities, traditional and modern, projection, expressive range. Independent work in solo and group choreography culminating in a final performance project. (F, W, Sp)

114. Form and Structure in Choreography. Lecture, two hours; laboratory, four hours. Prerequisite: dance major or consent of instructor. A study of the craft of choreography. Emphasis on breath movement, phrasing, ABA, theme and variations, rondo. Learning to discipline and shape the creative impulse into specific forms, with emphasis on starting. (F, W, Sp)

120. Music as Dance Accompaniment. Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation for dance. Choreographer-composer relationships. History of music/dance, with emphasis on contemporary trends. Music for the dance performance. May be concurrently scheduled with course C220. Ms. Gantz (W, Sp)

123A. Anatomy for the Dancer. Prerequisite: course 11F. Lecture, four hours. Prerequisite: anatomy laboratory course. Human muscular-skeletal system as related to dance. Ms. Gantz (F, W, Sp)

123C. Projects in Dance Kinesiology. Prerequisite: course 123B. Independent study with topics introduced in courses 123A and 123B. Ms. Gantz (Sp)

125. Principles of Movement Analysis: Laban Analysis. Lecture. Two hours; laboratory, two hours. Prerequisite: dance major or consent of instructor. Basic principles of Laban analysis. Emphasis on experiential understanding of movement through the study of motion factors and elementary concepts of spatial dynamics. Focus on the individual area of movement to further comprehension of dance as a creative art form. Ms. Gantz (F, W, Sp)

126. Advanced Labanotation. Lecture, two hours; laboratory, two hours. Prerequisite: course 25B. Skills in creating and writing complex movement reconstruction and score preparation in modern dance, ballet, and ethnic dance. Mrs. Dunin, Mrs. Scothorn (Sp)
132A-132B. Philosophical Bases and Trends in Dance (4 units; 2 units). Course 132A is prerequisite to 132B. Critical analysis of dance as a creative experience; function in society and relationship to contemporary artistic expression; ancient Egypt through European Renaissance. Ms. Alter, Mrs. Thomas (F, W).

134A. History of Dance in Western Culture, Origins to 1600. The development of dance styles in relation to human nature and culture; function in society and relationship to contemporary artistic expression; ancient Egypt through European Renaissance. Ms. Alter, Mrs. Thomas (W).

141. Lighting Design for Dance Theater. Lecture, four hours; laboratory, two hours. Prerequisite: course 11F or consent of instructor. Lighting for dance: examination of aesthetics, principles, and technical elements. Application to selected choreographies to be performed. Mrs. Siegel (F, Sp).

142. Advanced Studies in Dance Theater Lighting (2 or 4 units). Lecture, four hours; laboratory, four or more hours. Prerequisite: course 141 or consent of instructor. Analysis of diverse dance theater lighting problems at an advanced level and individual developmental potential. May be taken for a maximum of four units. Mrs. Siegel (W, Sp).

144. Costume and Scenic Design Concepts for Dance Theater. Prerequisite: course 11F or consent of instructor. Study of theory for conceptualizing dance performance environments, communication through visual elements, artistic properties of costuming, and sound, and techniques and procedures for producing dance costumes and sets in order to facilitate choreographer/designer communication. Ms. Schoelzel (F, Sp).

145. Advanced Dance Costuming. (Formerly numbered 198E.) Lecture, three hours; laboratory, six hours. Prerequisite: course 144 or consent of instructor. Theory of dance costume construction and its relation to design intent; enhancement, accommodation, and impact on movement. Choice of textiles, construction methodology, fabric modification, and accessories. Laboratories include design projects currently in production. Ms. Schoelzel (F).

148. Advanced Laboratory in Dance Production (1 unit). Laboratory, two hours. Prerequisites or corequisites: courses 144 and 141, or consent of instructor. Further development and application of concepts of lighting, sound, costume, scene design, and stage activities in departmental dance productions. May be repeated for a maximum of 19 hours. Ms. Alter (Sp).

151. Foundations of Dance Education. Lecture, two hours; laboratory, three hours. Prerequisite: dance major or consent of instructor. Introduction to movement concepts, skills, and teaching principles for modern dance instruction. Supervised teaching practicum included. Ms. Gantz, Ms. Leung (F, W).

152. Dance as Culture in Education. Lecture, two hours; laboratory, two hours. Prerequisite: course 140 or consent of instructor. Theoretical and practical aspects of teaching ethnic dance, especially in higher education. Mrs. Dunin (F).

153. Creative Dance for Children. Lecture, three hours; laboratory, one hour. Prerequisite: dance major or consent of instructor. Introduction to movement concepts, skills, and principles for teaching children's dance; emphasis on dance as a creative medium of expression. Ms. Leung (Sp).

154. Dance of the Americas. Lecture, one hour. Prerequisite: course 152 or consent of instructor. The dance cultures of the Americas, with emphasis on social, historical, and cultural context. Ms. Mitoma (F).

155. Dance of Asia. Lecture, three hours. Prerequisite: course 140 or consent of instructor. The dance cultures of Asia, with emphasis on social, historical, and cultural context. Ms. Mitoma (Sp).

156. Introduction to Dance/Movement Therapy (2 units). Formerly numbered 160A. Lecture, one hour; laboratory, three hours. Prerequisite: course 100C or consent of instructor. Group recreation and individual therapy; dynamics in both nonverbal (movement) and verbal modes of experience, so students achieve a significant level of psychological insight to assist in functioning professionally as effective dance/movement therapists. Ms. Goodman.

171B. Dance of Indonesia (2 units). Studio, three hours. Prerequisite: course 71B or consent of instructor. Technique and repertoire of a selected tradition (e.g., Java, Bali, or Sundan). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Ms. Mitoma (W, Sp).

171C. Dance of Japan (2 units). Studio, three hours. Prerequisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Mr. Togi (F, W, Sp).

171D. Dance of India (2 units). Studio, three hours. Prerequisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Ms. Yodh (W, Sp).

171E. Dance of Korea (2 units). Studio, three hours. Prerequisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Ms. Mitoma (W, Sp).

172B. Dance of Ghana (2 units). Studio, three hours. Prerequisite: course 72B. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Ms. Mitoma (W, Sp).

172C. Dance of Mexico (2 units). Studio, three hours. Prerequisite: course 72C. Dance techniques of selected ethnographic regions. May be repeated once. Mr. Rios (W, Sp).

172D. Dance of Yugoslavia (2 units). Studio, three hours. Prerequisite: course 72D. Dance techniques of selected ethnographic regions. May be repeated once. Ms. Yodh (W, Sp).

173A. Dance of Korea (2 units). Studio, three hours. Prerequisite: course 73A. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Ms. Mitoma (W, Sp).

173B. Dance of Israel (2 units). Studio, three hours. Prerequisite: course 73B. Dance techniques of selected ethnographic regions. May be repeated once. Ms. Alter (W, Sp).

173C. Dance of Spain (2 units). Studio, three hours. Prerequisite: course 73C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Ms. Yodh (W, Sp).

173D. Dance of Israel (2 units). Studio, three hours. Prerequisite: course 73D. Dance techniques of selected ethnographic regions. May be repeated once. Ms. Alter (W, Sp).

174A-174Z. Dance Perspectives (2 units each). Prerequisite: Upper division standing or consent of instructor. An introduction to the dance cultures of Asia. Prerequisite: course 181A or consent of instructor. A survey of dance in the East Asia. Prerequisite: course 181A or consent of instructor. A survey of the dance cultures of Japan, China, and Korea and the factors which have influenced their development and social function. Consideration of the relationship of dance to other art forms. Lectures illustrated with demonstrations, films, and slides. Ms. Alter (W).

182A. Dance Cultures of Africa. An illustrated survey of dance in sub-Saharan cultures, the role of dance in society, historical background, and related folklore. Ms. Alter (F).

183A. Dance in Latin America. Prerequisite: course 181A or consent of instructor. A survey of dance forms in Latin America, factors influencing their development and social function, consideration of the relationship of dance to other art forms. Lectures illustrated with demonstrations, films, and slides. Mr. Rios (Sp).

184B. Dance in the Balkans. Prerequisite: course 174B. An illustrated survey of dance, with attention to cultural and social contexts: Albania, Bulgaria, Greece, Turkey, Serbia, Romania, Yugoslavia. Mrs. Dunin (W). Ms. Alter (Sp).

187A. Dance Cultures of Native American Indians. An illustrated survey of Native American dance, the role of dance in society, historical background, and related folklore. Ms. Alter (F).

190. Advanced Dance Performance (2 units). Lecture, two hours; laboratory, three hours. The study and performance of major choreography. May be repeated twice. Ms. Alter (F).

191. Repertory Dance Tour (2 to 4 units). Prerequisite: dance major or consent of instructor. Creation and performance of dance concerts in the community, with special emphasis on the problems of the touring dance company with a variable repertoire. Ms. Alter (W).

197A-197B. Proseminar: Dance Perspectives (2 units each). Prerequisite: Upper division standing or consent of instructor. Consideration of the aesthetics evolving from the work of the great artists of our time. Ms. Alter (F).

199. Special Studies in Dance (2 to 8 units). Prerequisite: Senior standing, consent of instructor.

Graduate Courses

211A-211F. Advanced Choreography. Lecture, two hours; laboratory, two hours. Prerequisite: course 115 or consent of instructor. Theoretical aspects of advanced choreography for students who have reached the level of self-initiation of substantial creative works. Rehearsal and realistic self-evaluation; critical counsel by acknowledged choreographers. Ms. Gantz (F).

220. Music as Dance Accompaniment. Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation for dance. Choreographer-composer relationships. History of music for dance, with emphasis on contemporary trends. Music for the dance performance. May be concurrently scheduled with course C120. Graduate students must complete two internships for the degree, one to be applied toward the M.A. degree requirements. (W).

231A-231B. Philosophical Bases and Trends in Dance. Lecture, three required; prerequisite: course 100C. Critical analysis of dance as a creative experience and the role of professional and educational dance in our society. Research and extensive reading in contemporary philosophic literature. Study of present-day concepts and their relationships to other art forms and cultures. Evaluations of graduate students based on extended reading list and term papers. May be applied toward the M.A. degree requirements. Ms. Altschul (W,Sp).

234. Renaissance Dance: Analysis and Re-creation. Lecture, two hours; studio, two hours. Prerequisite: courses 134A and 134B, or consent of instructor. Analysis and re-creation of the study of 15th- and 16th-century dance styles from Domenico da Piacenza through Cesare Negri. Stylistic differences in Italy, France, England, Denmark, and Russia.

236. Dance in the 20th Century. Lecture, two hours; studio, two hours. Prerequisites: courses 134A and 134B, or consent of instructor. Seminar in historical development of 20th-century dance. Mrs. Thomas.

251A-251D. Advanced Studies in Dance Education. (Formerly numbered 251A-251D). Lecture, two hours; discussion, two hours. Prerequisite: course 151 or consent of instructor.

251A. Historical and Theoretical Framework for Dance Education. Development of a framework for the teaching-learning process in dance and application to varied settings and populations.

251B. Theories of Practice. Examination of current theories of artistic intelligence, body education systems, motor learning, and creativity and how they are related to study of present-day concepts and their analysis of traditional models for developing alternative methodologies.

251C. Curriculum Development in Varied Dance Settings. Issues include course/program materials planning, development, implementation, and evaluation, with emphasis on analyzing underlying educational values affecting the decision-making process.

251D. Dance Administration. Relation of theories and practice to dance settings, clarifying issues of hierarchial structures, chains of command, staffing, facilities, and budget and why and how dance courses/programs succeed or fail. Ms. Alter, Ms. Leung.

260A-260B-260C. Group Dynamics and Process (2 units each). Discussion, two hours; laboratory, two hours. Prerequisite: course 160A-160B-160C. An experimental-didactic exploration of unfolding group dynamics and process within an ongoing movement therapy group.

261A. Movement Therapy. Lecture, two hours; laboratory, two hours. Prerequisite: consent of instructor. 261A. Theory and practice: historical overview of the field; introduction to basic theoretical concepts and their translation into practice. 261B. Kinetic imagery: contribution of creative process and receptive knowing to therapy; unique functions served by movement and image modes explored theoretically and experientially. 261C. Theory and method: assumptions and methods of current clinical approaches; students expected to develop their own theoretical models.

262A-262B-262C. Seminar in Dance/Movement Therapy. Lecture, two hours; laboratory, two hours. Prerequisites: courses 261A-261B-261C. 262A. Development of framework for human movement and object relationships established from infancy through senescence; concepts applied to individual clients demonstrated by clinical specialists. 262B. Individual psychodynamics and Therapeutic Intervention. Relationships between individual psychodynamics and therapy objectives. 262C. Systems Perspective. System theory concepts applied to dyads, groups, families, and cultures.

Mrs. Dosamantes-Alperson. 

596A. Directed Individual Study or Research (2 to 8 units). 

596R. Directed Study or Research in a Hospital or Clinic (2 to 8 units). 

599. Preparation for M.A. Comprehensive Examination (2 to 8 units). 

460-460E-460F. Clinical Internship Supervision (2 units each). (Formerly numbered 497A-497B-497C). Lecture, one hour; discussion, two hours. Prerequisites: courses 460A-460B-460C. Practicum dealing with student internship: movement/observation, therapeutic goals, therapeutic process, and other clinical uses. S/U grading.

Ms. Rorick (F,Sp).

Scope and Objectives

As a result of the complete reorganization of the Music Department currently underway, there may be substantive changes to the curriculum and degree programs listed below. Students with degrees in progress at the time these changes are approved should work closely with the advisers in their area to determine how these changes affect their degree requirements and options.

The four-year Bachelor of Arts curriculum in Music is a classically oriented, balanced program of practical, theoretical, and historical studies, with related performance and academic studies in non-Western music. The major, designed for students who want to combine fine musicianship with academic excellence, is based on a core curriculum of theory, history, analysis, and individual and group performance. Given in the context of a liberal education, this provides a foundation for an academic or professional career and affords a valuable cultural background.

At the graduate level, specialized studies leading to the degrees of Master of Arts and Doctor of Philosophy are offered in composition, ethnomusicology, historical musicology, music education, and systematic musicology; specialized studies leading to the degree of Master of Fine Arts (performance practices) are offered in all classical solo instruments, voice, opera, and conducting.

Bachelor of Arts Degree

Admission

All applicants for admission and change of major are required to audition in their principal performing medium. Admission to the various specializations as well as to Music 60A through 65 is based on the level of skill demonstrated in the audition. Students who are not admitted to courses 60A through 65 by the beginning of their junior year may petition the faculty in their proposed area of specialization to substitute appropriate courses for the performance instruction requirement (see "Preparation for the Major").

Preparation for the Major

Required: Music 20A, 20B, 20C, 26A-26B, 26C, two courses from 60A through 65 or, if not eligible, two appropriate courses approved by the faculty of the proposed area of specialization, and two years (12 units) of professional or academic studies leading to the degree of Master of Fine Arts (performance practices) are required in all classical solo instruments, voice, opera, and conducting.

The Major

**Course Requirements**

You are required to complete a minimum of nine courses, five of which must be at the 200 level. Only four units of Music 596A, 596B, or 596C and four units of course 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. Upper division courses that may be applied toward the minimum of nine courses include 103A, 103B, 103C, 104A, 104B, 106B*, 106C*, 107A*, 107B*, 108A, 108B, 112A, 112B, 118A, 118B, 120A, 120B, 120C, and either 102 or 105.

---

*Does not apply to students whose emphasis is composition.*

Course requirements for each field are as follows:

**Composition:** Music 200A, one course from 251A through 251D, 252A, 252B, and 252C in sequence (with the option of substituting course 596A for 252C), 266A or 266B, and three electives on the recommendation of the graduate adviser. In addition to the thesis, you are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. You are also responsible for the campus presentation of one original work during each year of residency.

**Ethnomusicology:** Music 200B, 253, 254A, C290A-C290B, two courses in one musical culture, and two electives on the recommendation of your mentor. If you have not taken courses 140A-140B or their equivalent, you must audit or take them for credit, which may not be applied toward the degree. Course 280 may be taken but also may not be applied toward the M.A. (you are encouraged to participate in course 280, particularly in Spring Quarter when it serves as a division colloquium).

**Performance Requirement:** A minimum of two quarters of ethnomusicology performance organizations (courses 91A-91Z), which may not be applied toward the degree.

**Historical Musicology:** Music 200A, four courses from 201A through 201F, either 210 or 211 (students planning to enter the Ph.D. program are strongly advised to take both courses 210 and 211 in the first year of residence), 250A or 250B, and two quarters of 260A through 260F.

**Music Education:** You may choose either the thesis or comprehensive examination plan. Within each plan you must select a course of study that covers a special field of interest — choral, instrumental, or general topics — as listed below. For the thesis plan, Music 200A, 200B, C225, three courses from 118A, 118B, 270A through 270G (required in the special fields), and three elective courses from one of the special fields below are required. For the comprehensive examination plan, Music 200A, C225, four courses from 118A, 118B, 270A through 270G (required in the special fields), and three elective courses from one of the special fields below are required.

Course requirements for the special fields are as follows: choral: Music 118A (four units), 270E, and elective courses selected from 112B, 135A, 135B, 135C, 137B, 174A through 174D (four units only), 187, C227A through C227F, 596A, 596B, 596C, 596D, 598; instrumental: Music 118B (four units), 270F, and elective courses selected from 106A, 106B, 106C, 108, 112A, 137B, 175 (four units only), 187, C227A through C227F, 261A through 261F, 596A, 596B, 596C, 596D, 598; and general topics: two courses selected under advisement from Music 270A through 270G and elective courses selected from 137B, 140A, 140B, 140C, 175 (four units only), 187, C227A through C227F, 596A, 596B, 596C, 596D, 598.

**Systematic Musicology:** Music 200A, 200B, three quarters of 272, one course from 255, 269, 273, or 275, and three electives on the recommendation of the graduate adviser.

**Thesis Plan**
All M.A. students must use the thesis plan, except those specializing in music education or ethnomusicology who may follow either the thesis or comprehensive examination plan.

In all areas except composition and ethnomusicology, the thesis is an extended essay. In composition, the thesis is a work proposed by the student and approved by the composition and theory division. In ethnomusicology, the thesis is an extended essay or other equivalent presentation involving the original investigation of a problem or subject of limited scope, approved by the division.

The thesis topic and the master's committee members are approved by your division or area.

**Comprehensive Examination Plan**
In ethnomusicology the comprehensive examination consists of two written examinations, one in theory and method in ethnomusicology and one in a world music culture area or other approved topic reflecting your course of study. Failed examinations may be retaken only once during the following year. In addition, for advancement to the Ph.D. program, you must submit a research paper written during your master's studies as demonstration of writing and scholarly abilities.

In music education you may use the comprehensive examination plan in lieu of the thesis plan only if you are not going on to the Ph.D. in the Music Department. The plan has three components: (1) the realization in performance of a creative project appropriate to elementary, secondary, or higher education (e.g., choral or instrumental ensemble performance, original curricular design, original compositions or transcriptions); (2) a paper equivalent to a graduate seminar paper, including research, description of procedures, and analysis of the selected project; and (3) a final conference and evaluation.

**Final Examination**
The final examination is oral and includes discussion of both the thesis and related matters. This examination does not apply to music education students electing the comprehensive examination plan.

In ethnomusicology, under both plans, a final oral examination is required; providing an opportunity for you to defend your thesis or research paper and written examination responses, and for your committee to explore further your suitability for admission to the doctoral program.

**Master of Fine Arts Degree**

**Foreign Language Requirement**
Reading knowledge of French, German, or Italian is required. Foreign students may petition to substitute English. Candidates in the opera specialty must also be fluent in speaking one of these languages. The language requirement should be satisfied by the end of your first year in residence.

**Course Requirements**

You are required to complete a minimum of 18 courses, including at least six at the 200 level and six or more in the 400 series. Only four units of Music 596A, 596B, 596C, or 596D and eight units of course 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. The minimum residence requirement for the M.F.A. is two years.

Course requirements are as follows: Music 200A, two quarters of 261A through 261F, six quarters of 400-level performance instruction, two quarters (eight units) of 598, and seven elective courses. Conducting students declare either a choral or instrumental specialization. Six quarters of course 475 are required in the area of specialization (i.e., choral or instrumental) and at least two quarters in the other area. (On a two-year program, the ratio would be four to one.) Recommended electives include courses 108, 140A, 140B, 140C, 175, 187, 596A, 596B, 596C, 596D, and additional courses from the 200 and 400 series. A maximum of four units of chamber ensembles (course 175) may be applied toward the minimum 18 courses. Course 598 serves to guide the preparation of the final project and should normally be taken during your last two quarters in residence.

Each year you must complete a solo recital on campus (preferably a noon concert) with a faculty committee in attendance to evaluate the performance. Conducting students present a program, or a substantial portion thereof, approved by the conducting faculty, either on or off campus.

*Does not apply to students whose emphasis is composition.
The final project is to be completed during your last year in residence. A solo recital and appropriate scholarly paper are required in all areas. In addition, a major operatic performance is required in the area of opera. Conducting students present an on-campus program, or a substantial portion thereof, with one of the department’s performance organizations. The scholarly paper should be equivalent to a graduate seminar paper (15 to 25 pages in length) and should be concerned with performance problems which can be elucidated through research and analysis. The final version of the scholarly paper, with the accompanying recital program, must be submitted to the department in the format of a thesis.

The language requirement and a majority of the coursework must be completed before you submit the final project proposal and request for an M.F.A. committee. The proposal, which is to include the complete recital program and an abstract of the scholarly paper, should be submitted by the Fall Quarter of your last year in residence.

**Ph.D. Degree**

**Admission**

See “Admission” under Graduate Study above. In addition, applicants for the Ph.D. in music education must have two years of teaching experience at the elementary or secondary level to be considered for admission.

**Foreign Language Requirement**

Reading knowledge of foreign languages is required by each area as follows: **composition**: two languages selected from German, French, Latin, Italian, Russian, Spanish or, for students whose native language is not English, English (you may not use both English and the native language); **ethnomusicology**: French or German (unless otherwise justified) and a language relevant to your dissertation research (if the second language is your native language, English may be substituted); **historical musicology**: French, German, and a choice of Italian, Latin, or another language approved by the division; **music education and systematic musicology**: French and German.

**Course Requirements**

You may petition to your division or area, on the advice of your graduate adviser, for exemption from specific requirements on the basis of equivalent work done at the M.A. level. Course requirements for each field of study are listed below. In each area, you may complete the residence requirement by electing courses (with consent of the graduate adviser) from the 200 series or the list of 100-level courses under “Course Requirements” for the M.A.

**Composition**: Music 200A, one course from 251A through 251D, six quarters of 252A, 252B, 252C in sequence (with the option of substituting course 596A for 252C), and 266A or 266B. If you received the M.A. in composition from UCLA, you normally take a minimum of three quarters of course 252A in the Ph.D. program. If you received the M.A. in composition elsewhere, you normally take six quarters of courses 252A, 252B, 252C in sequence, with the option of substituting course 596A for either or both 252Cs. In addition to the dissertation, you are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. You are also responsible for the campus presentation of one original work during each year of residency.

**Ethnomusicology**: Music 200B, 253, 254A, C290A-C290B, two Fall or Winter Quarters of course 280, and eight courses from 248, 254B, 255, M252, 273, 275, 276, 280, 281A, 281B, 282, 284, 285, 286A, 286B, 287, 288, 289, and selected courses in Western music, a related discipline, or particular nonmusic area as recommended by your mentor. No more than two 500-series courses and two courses outside the program may be applied toward the degree. In addition, you must enroll in course 280 every Spring Quarter when it serves as a division colloquium. **Performance Requirement**: At least three quarters of ethnomusicology performance organizations (courses 91A-912).

**Historical Musicology**: Music 200A, 201A-201F, 210, 211, 250A or 250B, and five quarters of 260A through 260F. If you received the M.A. in historical musicology from UCLA, you normally take a minimum of three quarters of courses 260A through 260F in the Ph.D. program.

**Music Education**: Music 200A, 200B, C225, and five quarters of 270A through 270F. If you received the M.A. in music education from UCLA, you normally take a minimum of three quarters of courses 270A through 270F in the Ph.D. program. Under advisement, two of the three quarters of 270A through 270F may be completed under special studies (course 596C). If you wish to pursue the Ph.D. in music education with a minor in ethnomusicology, you are required to take courses 200A, 200B, C225, C290A-C290B, three quarters of 270A through 270F, and two courses from 141A through 143B, 145 through 149, 152, 153A, 153B, 153C, 281A through 288. Electives are to be selected from courses 140A, 140B, 140C, M180, M181, 187, 254A, 254B, 255, 280.

**Systematic Musicology**: Music 200A, 200B, five quarters of 272, and one quarter of 255, 269, 273, or 275. If you received the M.A. in systematic musicology from UCLA, you normally take a minimum of two quarters of course 272 in the Ph.D. program.

**Qualifying Examinations**

When you and your guidance committee believe you are ready to take the qualifying examinations, you should submit a schedule to the Student Services Office and the committee members listing the order in which the examinations are to be taken. The Student Services Office acts as proctor for the tests. Normally the written examinations are spread over a two-week period but should be completed within three weeks. Repeat examinations may be scheduled in consultation with the guidance committee and after a stipulated period of time. Contact the Student Services Office for details on the written examinations.

When you successfully complete the written examinations, the departmental oral qualifying examination can be scheduled. After passing this oral examination, you may submit your dissertation proposal and request for a doctoral committee; this committee administers the University Oral Qualifying Examination. In all fields but composition, the dissertation is an extended monograph. In composition, the dissertation consists of (1) an extended composition accompanied by a short description of the style and techniques of the work and (2) an analytical monograph dealing with some aspect of 20th-century music.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**

A final oral examination is required by the department.

**Lower Division Courses**

1A-1B. Fundamentals of Music. Lecture, three hours discussion, two hours. Designed for nonmusic majors. 1A. Introduction to the elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. 1B. Prerequisite: course 1A. Diatonic harmony; four-part writing, including inversions, seventh-, seconds-, and dominant, modulations; organization of melody and accompaniment; simple analysis; sight-singing and ear training.

Mr. Henderson, Ms. Karp

2A-2B. Introduction to the Literature of Music. Lecture, four hours; laboratory, one hour. Course 2A is not prerequisite to 2B. Designed for nonmusic majors. 2A. The technical and formal principles of music literature through the mid-18th century. 2B. Music literature from the mid-18th century to the present.

Mr. Dean

3A-3B. Preparatory Theory for Music Majors (2 units each). Lecture, two hours; discussion, one hour. Prerequisite: music major or consent of instructor. Course 3A is not open for credit to students with credit for course 1A; course 3B is not open for credit to students with credit for course 1B. A course for music majors in music fundamentals, including music theory, and terminology.

Mr. Anderson

4A-4B-4C. Basic Musicianship (2 units each). Laboratory, three hours. Class instruction in elementary ear training and keyboard skills. Miss Sheffield
Admission to courses 60A through 65 and the option of individual instruction or group instruction is based on the decision of the performance faculty at the time of the audition. Students may re-audition at the beginning of each academic year to gain admission to the classes. Permission to change from group instruction to individual instruction is based on the jury examination in Spring Quarter.

60A-65. Undergraduate Instruction in Performance. (2 units each). Limited to music majors (all lower division majors, and upper division majors not in the performance specialization). Individual instruction of one hour per week. Students must perform in a practicum once during the academic year. Grades are assigned by the assigned instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit.

60A. Violin. Ms. Kamei, Mr. Treger
60B. Viola. Mr. Wilson
60C. Cello. Mr. Oliver
60D. String Bass. Mr. Zibis
60E. Harp. Ms. Neill
60F. Classical Guitar. Mr. Norman, Mr. Yates
60G. Viola da gamba. Ms. Marcus
60K. Lute.
61A. Flute. Mr. Stokes
61B. Oboe. Ms. Northcutt
61C. Clarinet. Mr. Gray
61D. Bassoon. Mr. Steinmetz
61E. Saxophone. Mr. Gray
62A. Trumpet. Mr. Guerneri
62B. French Horn. Mr. Todd
62C. Trombone. Mr. Booth
62D. Tuba. Mr. Johnson
63. Percussion. Mr. Peters

64A. Piano. Ms. Harris-Heggie, Mr. Tzkerko, and the Staff
64B. Organ. Mr. Harmon
64C. Harpsichord. Ms. Karp
65. Voice. Mr. Mussard and the Staff

90A. Concert Choir (2 units). Activity, four hours. Prerequisite: audition. A selected mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choir, ensemble, with emphasis on music of all periods, but not modulations; more advanced two-part dictation; chromatonic notation; more advanced sight-singing; keyboard (three-part open score in homophonic textures, introduction to tenor clef).

90B. Collegiate Chorus (2 units). A nonaudition mixed chorus of 50 to 150 voices performing medium- and large-scale choral works from the Baroque to the present. College Chorus performs only as part of the "Choral Union," a large chorus made up of all of the choral ensembles. May be repeated for credit without limitation. P/NP or letter grading.

90C. Chamber Singers (2 units). Activity, three hours. Prerequisite: audition. A selected mixed ensemble of 16 to 20 voices performing chamber choral music of all periods, with emphasis on music of the Renaissance and baroque. May be repeated for credit without limitation. P/NP or letter grading.

90D. Opera Workshop (2 units). Activity, six hours. Prerequisite: audition. Performance of selected scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading. Mr. Hall, Mr. Krachmalnick

346 / Music / COLLEGE OF FINE ARTS

Upper Division Courses

100A-100B. History of Music (2 units each). Lectures, three hours; laboratory, one hour. Prerequisite: courses 20A, 20B, 20C. Courses 20A and 20B are prerequisites to 20C, which is prerequisite to 26B-26C. This history and literature of music from the beginning of the Christian era to 1750, with emphasis on analysis of representative works of each style period. Material selected to illustrate the history of style and changing techniques of composition.

Mr. Ashforth and the Staff
COLLEGE OF FINE ARTS / Music / 347

102. Instrumentation . Lecture, three hours. Prerequisite: course 1206 with a grade of C (2.0) or better.
Not open for credit to students with credit for course
106A. Intended for music majors in specializations
other than composition. Ranges and characteristics
of instruments, exercises in scoring.
Mrs. Barkin
103A-103B. Advanced Theory. Discussion, three
hours. Prerequisites: courses 20A, 20B, 20C, 120A,
120B, 120C. Course 103A or consent of instructor is
prerequisiteto 103B. Techniques of tonal coherence
studied through analysis and compositional exercises in the styles of given periods.
Ms. Girton
104A-104B. Advanced Counterpoint . Discussion,
three hours. Prerequisites: courses 20A, 20B, 20C,
120A, 120B, 120C. Course 104A or consent of instructor is prerequisite to 1046. Comparative contrapuntal practices and forms from all periods studied
through analysis and compositional exercises in the
styles of given periods.
Ms. Girton
105. Introduction to Composition. Lecture, three
hours. Prerequisites: courses 20A, 206, 20C, 120A,
120B, 120C. Intended for music majors in specializations other than composition. The nature of the
compositional process, with selected exercises in
specific techniques and styles.
Mrs. Barkin
106A. Instrumentation . Discussion, three hours.
Prerequisites: courses 20A, 206, 20C, 120A, 1206,
120C. Ranges and characteristics of instruments, exercises in scoring.
Mr. Ashforth
106B-106C. Advanced Orchestration . Discussion,
three hours. Prerequisite: course 106A. Course 106B
is prerequisite to 106C. Scoring and analysis for ensembles and full orchestra.
Mr. Ashforth
107A-107B-107C. Composition . Lecture, three
hours. Prerequisites: courses 20A, 20B, 20C, 120A,
1206, 120C. Course 107A is prerequisite to 107B,
which is prerequisite to 107C. Designed for students
specializing in composition. Vocal and instrumental
composition in the smaller forms, including style
composition and 20th-century techniques.
Mr. Travis
108. Acoustics . Lecture, three hours. Prerequisite:
consent of instructor. The interrelationship of acoustical and musical phenomena. Tuning systems, consonance and dissonance, tonal quality. Lecture, demonstration, discussion, and tours of instrumental collections and acoustical research facilities.
Mr. Kendall
109A-109B-109C. Composition for Motion Pictures and Television (2 units each). Prerequisites:
courses 20A, 20B, 20C, 120A, 1206, and 120C, or
consent of instructor. Course 109A is prerequisite to
1096, which is prerequisite to 109C. Composition of
music for the dramatic and documentary film in cinema and television. Techniques used in recording and
editing.
Mr. Raksin
112A-112B. Practical Scoring. Lecture, two hours;
laboratory, two hours. Prerequisites: courses 20A,
20B, 20C, 26A-26B-26C, 120A, 1206, and 120C, or
consent of instructor. Emphasis on practical problems
in scoring for small and large ensembles at various
educational levels. 112A. Band Scoring; 112B. Choral Scoring.
Mr. Henderson, Mr. Weiss
113A-1138 . Music Literature for Children. Lecture,
three hours; laboratory, one hour. Prerequisites:
courses 1A and 2A, or consent of instructor. Course
113A is not prerequisite to 113B. Designed for the
nonmusic major , particularly the elementary education student. A study of music literature applicable to
elementary school programs. 113A. Emphasis on listening analysis, movement, and improvisation. 113B.
Emphasis on class performance - music reading,
singing, and folk instruments.
Miss Hooper
115A-115F. Study of Instrumental and Vocal Techniques (1 unit each). (Formerly numbered 115A115E.) Laboratory, three hours. Prerequisites or
corequisites: courses 20A, 193, consent of instructor.
Applied studies in basic performance techniques and
tutorial materials. Each of courses 115A-115D may
be repeated once for credit. 115A. Strings; 1156.
Woodwinds; 115C. Brass; 115D. Percussion; 115E.
Voice; 115F. General Music.
Mr. Anderson, Mr. Hatcher

116. Introduction to Conducting (2 units). Lecture,
three hours. Prerequisites: courses 20A, 206, 20C,
120A. Fundamentals of conducting, including basic
skills, techniques, analysis, and repertoire.
Mr. Henderson
117A-117B. Study and Conducting of Choral and
Instrumental Literature (2 units each). Lecture,
threehours.Prerequisite:
course116 or consentof
instructor. The study and practice of conducting as
related to the study of choral and instrumental music.
117A. Choral; 117B. Instrumental.
Mr. Hatcher, Mr. Lee
118A-118B. Advanced Study and Conducting of
Choral and Instrumental Literature (2 units each).
Lecture, one hour; laboratory, two hours. Prerequisites: courses 116 and 117A-1178, or consent of instructor. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each
course may be repeated once for credit. 118A. Choral; 1188 . Instrumental.
Mr. Hatcher, Mr. Krachmalnick, Mr. Lee
120A. Music Theory IV. Lecture, four hours; discussion, four hours. Prerequisites: course 20C with a
grade of C (2.0) or better, passing score on departmental first-year examination. Not open for credit to
students with credit for both course 12B and former
course 11D (with grades of C or better). Theory: baroque counterpoint including chorale prelude; twopart invention; exposition and first modulation of a
three-part invention; canonic principles; analysis of inventions, canons, and fugues. Musicianship: sightsinging of extended chromatic melodies; advanced
harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading.
Mr. Ashforth and the Staff
1208 . Music Theory V. Lecture, four hours; discussion, four hours. Prerequisites: course 120A with a
grade of C (2.0) or better, consent of instructor. Not
open for credit to students with credit for both courses
11E and 14C (with grades of C or better). Theory:
advanced chromatic harmony including development
of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation; preparation for the departmental examination.
Mr. Ashforth and the Staff
120C. Music Theory VI. Prerequisites: course 120B
with a grade of C (2.0) or better, consent of instructor.
Not open for credit to students with credit for both
former courses 11F and 14D (with grades of C or
better). 20th-century harmonic language, including
nonfunctional harmony, polytonality, free atonality,
serialism, and minimalism.
Mr. Ashforth and the Staff
126A-126B-126C. Historyand Analysis of Music II.
Lecture, four hours; laboratory, one hour. Prerequisites: courses 20A, 206, 20C, 26A-26B-26C, 120A,
1206. Course 126A is prerequisite to 126B, which is
prerequisite to 126C. The history and literature of
music from 1750 to the present, with emphasis on
analysis of representative works of each style period.
Materials selected illustrate the history of style and
changing techniques of composition.
C127A-C127F. Selected Topics in the History of
Music. Seminar, three hours. Prerequisites to all
courses: courses 20A, 206, 20C, 26A-26B-26C,
120A, 120B; in addition, 126A is prerequisite to
C127D, 126B is prerequisite to C127E, and 126C is
prerequisite to C127F. Designed as a proseminar for
undergraduates
in preparation for graduate work.
Special aspects of the music of each period studied in
depth. May be concurrently scheduled with courses
C227A-C227F. C127A. Middle Ages; C127B. Renaissance; C127C. Baroque; C127D. Classic;
C127E. Romantic; C127F. 20th Century.
130. Music of the U.S. Prerequisite:course 2A or consent of instructor. A survey of art music from Colonial
times to the present.

131A-131B. Music of Hispanic America. Prerequisite: consent of instructor. Course 131A is not prerequisite to 131B. Survey of art music, including attention to ethnic developments and peninsular background. 131A. Mexico, Central America, and the Caribbean Isles; 131B. Hispanic South America.
Mr. Loza
132A- 132B. Development of Jazz. Lecture, three
hours; laboratory, one hour. Prerequisite: course 2A
or consent of instructor. Course 132A is prerequisite
to 1328. An introduction to jazz; its historical background and its development in the U.S.
Mr. Pinckney
133. Bach. Lecture, two hours; laboratory, two hours.
The life and works of Johann Sebastian Bach.
Mr. Harmon
134. Beethoven. Lecture, two hours; laboratory, two
hours. The life and works of Ludwig van Beethoven.
Mr. Dean
135A-135B-135C. History of the Opera. Lecture,
four hours; laboratory, one hour. 135A. Opera of the
Baroque and Classical Periods; 135B. Opera of the
Romantic Period; 135C. Opera of the 20th Century.
137A-137B. Psychology of Music. 137A. Designed
for nonmajors. An introduction to the psychology of
music; historical background and the broad field of
study, including the use of music as a stimulus, tests
and measurements, and related modes of musical
behavior. 137B. Prerequisites: courses 11A-11B11C, 12A, 14A-14B, and 26A-26B-26C, or consent of
instructor. A study of the psychological factors and
problems in music from the points of view of the listener, performer, and composer.
Mr. Kendall
aesthetic thought and practice. Selected readings
and musical examples.
139. History and Literature of Church Music. Prerequisite: course 2A or consent of instructor. A study
of the forms and liturgies of Western church music.
140A- 140B-140C. Musical Cultures of the World.
Prerequisite: consent of instructor. Course 140A is
not prerequisite to 1408, which is not prerequisite to
140C. A survey of the musical cultures of the world
(excluding Western art music), the role of music in
society and its relationship to other arts; consideration also to scale structure, instruments, musical
forms, and performance standards. 140A. Musical
Cultures of Europe and the Americas; 140B. Those of
the Near East and Africa; 140C. Those of South Asia,
Southeast Asia, and the Far East.
141A. Survey of Music in Japan. (Formerly numbered 141.) Lecture, three hours. A survey of the
main genres of Japanese traditional music, including
Gagaku, Buddhist chant, Biwa music, Koto music,
Shamisen music, and the music used in various theatrical forms.
141B. Studies in Japanese Court Music. Lecture,
two hours; laboratory, two hours. Prerequisite: minimal musical ability. An in-depth study of Japanese
court music, including historical background, with
emphasis on the understanding of the instrumental
techniques and notation of the various instruments of
the court orchestra.
Mr. Togi
142A-142B. Folk Music of Eastern Europe and the
Mediterranean . Prerequisite: consent of instructor.
Course 142A is not prerequisite to 1428. 142A. The
forms and styles of traditional music in Eastern Europe (including the Balkans). Historical and ethnological aspects of the music illustrated by numerous
recorded examples from the major cultural subdivisions of the area. 142B. The forms and styles of
traditional music in the Mediterranean basin, particularly those in which interaction between European
and Oriental styles is apparent.
Mr. Porter, Mr. Rice
143A- 143B. Music of Africa. Lecture, three hours;
laboratory, two hours. Prerequisites: courses 140A140B-140C or consent of instructor. Course 143A is
prerequisite to 143B. An investigation of the historical
aspects, social functions, and relationships of music
to other art forms in selected areas of Africa.
Ms. DjeDje


144. American Popular Music. Lecture, three hours; laboratory, two hours. Recommended prerequisite: course 1A or equivalent. A survey of the history and characteristics of American music and its relationship to American culture, with emphasis on 20th-century popular music and its major composers, including a comparison between traditional pre-1950 popular music and trends in post-1950 popular music.

145. History of Chinese Opera. Prerequisite: consent of instructor. A survey of dramatic elements in Chinese operas, incorporating singing, dance, and acrobatics. Emphasis on traditional and modern operas and their relation to Cantonese and other genres. Mr. Lui

146A-146B. Studies in Chinese Instrumental Music. Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Course 146A is not prerequisite to 146B, which is not prerequisite to 146C. 146A. A study of the literature, major sources, paleography, theory, and philosophy of the Ch'in and Pi Pa, including transcription and analysis. 146B. A comprehensive study of Chinese musical instruments, classification system, specific musical notation, and use in the context of Chinese society. 146C. A study of the rules of improvisation, particularly as found in the Shanghainese style, as well as the Pi Pa, Ti, Er Hu, San Shien, Sheo, and related instruments. Mr. Lui

147A-147B. Music of China. Lecture, three hours; laboratory, two hours. Examinations: lectures 140A-140B or consent of instructor. 147A. History and theory of the music of China, including a survey of various provinces. Instrumental techniques. 147B. Prerequisite: course 147A. Introduction to various national systems. Analysis of representative styles. Mr. Lui

148. Folk Music of South Asia. Prerequisite: consent of instructor. An illustrated survey of some of the regional genres, styles, and musical instruments found in India and Pakistan, with special reference to the religious, social, economic, and cultural context of their occurrence. Mr. Jairazbhoy

149. Anthropology of Music. A cross-cultural examination of music in the context of social behavior, and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure. Mr. Rice

151A-151B. History of Musical Performance Practice. Prerequisites: courses 20A, 20B, 20C, 26A-26B-26C, 120A, 120B. A general survey of musical interpretation and re-creation from the viewpoint of stylistic authenticity. 151A. Medieval through Baroque; 151B. Classic through 20th Century. Mr. Harmon

152. Survey of Classical Music in India. An examination of the melodic, metric, and formal structures of Indian classical music in the context of the religious, sociocultural, and historical background of the country. Mr. Jairazbhoy

153A-153B-153C. Music of the American Indians. American Indian music studied within the broader context of styles, cultural values, and sources. Films, recordings, lectures, and limited group singing and dancing, relating the music to the culture producing it. 153A. Musics of the Eastern, California-Yuman, Great Basin, and Northwest Coast Areas; 153B. Musics of the Atlantic, Pueblo, Plains, and Modern Pan-Indian Trends; 153C. Sociology of American Indian music, with specific reference to the manner in which cultural values, prescriptions, oral traditions, language, and technological advances have affected music of the Native American. Mr. Lui

154A-154B. The Afro-American Musical Heritage. (Same as Folklore M154A-M154B.) Prerequisite: course 1A or consent of instructor. Course M154A is prerequisite to M154B. A study of Afro-American rhythms, music, field hollers, songs, spirituals, blues, and jazz; the contrast between West African, Afro-American, and Afro-Brazilian musical traditions. Ms. DjeDje

155. Audio Technology for Musicians. Lecture, two hours; laboratory, three hours. Prerequisites: courses 20A, 20B, 20C, consent of instructor. The theory and practice of sound engineering in relation to concert and studio recording techniques. Mr. Cloud

157. Music of Brazil. Prerequisites: consent of instructor, some knowledge of Portuguese. History of ethnic and art music in Brazil, with some reference to Portuguese antecedents. Mr. Bourland

158. New Orleans Jazz. Lecture, three hours; discussion, two hours. Major black and Creole figures in the origin and development of jazz in New Orleans from the turn of the 20th century through the 1960s, with emphasis on polycultural roots, local municipal traditions, and stylistic analysis. Mr. Lui

159. Development of Rock. Prerequisite: consent of instructor. The history of rock from the 1950s to the 1970s. An in-depth survey of stylistic trends illustrated by pertinent examples and accompanied by extensive musical analysis. Mr. Lui

160A-165. Undergraduate Instruction in Performance for the Performance Specialist (2 units each). Limited to upper division music majors who have been accepted by audition into the performance specialization. Individual instruction of one hour per week. Students must perform in a noon concert once during their junior year and must present a full recital in their senior year. Grades are assigned by the applied instructor. Mr. Bourland

160A. Violin. Ms. Kamei, Mr. Treger

160B. Viola. Ms. Wilcox

160C. Cello. Mr. Olver

160D. String Bass. Ms. Neill

160E. Harp. Ms. Neill

160F. Classical Guitar. Mr. Norman, Mr. Yates

160G. Viola da gamba. Ms. Marcus

160K. Lute. Ms. Neill

161A. Flute. Ms. Stokes

161B. Oboe. Ms. Northcutt

161C. Clarinet. Mr. Gray

161D. Bassoon. Mr. Steinmetz

161E. Saxophone. Mr. Gray

162A. Trumpet. Mr. Guarnieri

162B. French Horn. Mr. Todd

162C. Trombone. Mr. Booth

162D. Tuba. Mr. Johnson

163. Percussion. Mr. Peters

164A. Piano. Mrs. Harris-Heggie, Mr. Tzerko, and the Staff

164B. Organ. Mr. Haynes

164C. Harpsichord. Ms. Karp

165. Voice. Mr. Mussard and the Staff

166. Musical Terminology and Diction for Musicians. Lecture, two hours; laboratory, one hour. A survey of the primary technical terms, pronunciation, diction, and musical terminology as applied to the performance and interpretation of vocal and instrumental scores to enable students to function in today's multicultural world of music. Students must enroll in two sections per quarter; a total of four units may be applied toward the degree requirements. Each course may be repeated once for credit. 174A. French; 174C. Spanish; 174E. English. Mrs. Hast

175. Chamber Ensembles (2 units). Prerequisite: audition. Students must be at the advanced level of their instrument to participate. Applied study of the performance practices of literature appropriate to the ensemble. Students may enroll in two sections per quarter; a total of 12 units may be applied toward the degree requirements. May be repeated for credit.

176. Electronic Music Composition. Lecture, three hours; studio, three hours. Prerequisites: course 156, advanced experience and accomplishment in serious composition (art music), consent of instructor: Limited enrollment. Analog and digital realization of musical ideas for solo and small group music, with emphasis on polycultural roots, local municipal traditions, and stylistic analysis. Mr. Bourland

177. Historical and Philosophical Foundations of Music Education. Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 26A-26B-26C, 120A, and 120B, or consent of instructor. Recommended for music majors in all specializations. Theories and processes in various modes of musical experimentation: physical, perceptual, psychological, pedagogical, quantification, statistical procedures, and their application. Mr. Porter

185. Historical, and Ethnomusicological Methods. Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 26A-26B-26C, 120A, and 120B, or consent of instructor. Recommended for music majors in all specializations. Theories and processes in various modes of musical experimentation: physical, perceptual, psychological, pedagogical, quantification, statistical procedures, and their application. Mr. Porter

186. Research Methods in Ethnomusicology. Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 26A-26B-26C, 120A, and 120B. Recommended for students in all music specializations. Critical approach to musical problems of aesthetic analysis, description, values, theories, including both Western and non-Western music. Mr. Bourland

188A-188F. The Master Composer. Lecture, three hours; laboratory, one hour. A survey of the works of an outstanding composer in Western art music, considered within the context of his/her life. Each course may be repeated for a maximum of 16 units. 188A. Early Middle Ages; 188B. Renaissance; 188C. Baroque; 188D. Classic; 188E. Romantic; 188F. 20th Century. Mr. Porter

190C. Historical, Ethnomusical Composition. Lecture, three hours. Prerequisites: courses 20A-20B-20C, 26A-26B-26C, 120A, and 120B. Recommended for students in all music specializations. Critical approach to musical problems of aesthetic analysis, description, values, theories, including both Western and non-Western music. Mr. Bourland
C219. Proseminar in Systematic Musicology. Lecture, three hours. Prerequisite: consent of instructor. An introduction to the broad field of systematic musicology, including basic readings in aesthetics/philosophy; anthropology, sociology, and ethnomusicology; psychology; and acoustics. May be concurrently scheduled with course C291. P/NP or letter grading. Mr. Kendall

193. Foundations of Music Education (2 units). Lecture, two hours; laboratory, two hours. Prerequisites or corequisites: course 20A, sophomore standing. A historical, philosophical, and practical introduction to the field of music education. Miss Hooper

199. Special Studies in Music (2 or 4 hours). Hours to be arranged. Prerequisites: senior standing, consent of instructor and department chair. Individual studies in music resulting in a research project. May be repeated for a maximum of eight units. Mr. Hutchinson and the Staff

Graduate Courses

200A. Research Methods and Bibliography (6 units). Lecture, three hours. Prerequisite: graduate standing. A survey of general bibliographic material in music.

200B. Research Methods and Bibliography (6 units). Lecture, three hours. Prerequisite: course 200A. Guided writing, utilizing specific bibliography, in systematic musicology, ethnomusicology, and music education.

201A-201F. Current Research Problems in Historical Musicology (6 units each). (Formerly numbered 201A-201B-201C.) Seminar, three hours. Prerequisite: graduate standing. An investigation at the graduate level of current questions and problems in the history of Western music designed to give beginning graduate students a unified background for the remainder of their studies and to employ their developing skills in research and bibliography. 201A. Medieval; 201B. Renaissance; 201C. Baroque; 201D. Classic; 201E. Romantic; 201F. 20th Century.

210. Medieval Notation (6 units). Lecture, three hours. Prerequisite: consent of instructor. Vocal and instrumental notation; paleography of the period.

211. Renaissance Notation (6 units). Lecture, three hours. Prerequisite: consent of instructor. Vocal and instrumental notation; paleography of the period.

222. Historical and Philosophical Foundations of Music Education. Lecture, two hours. Prerequisites: graduate standing, consent of instructor. The development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C165. Additional assignments, as well as evidence of a greater depth of study, required of graduate students.

226. Electronic Music Composition. Lecture, three hours; studio, three hours. Prerequisites: course 156, graduate standing, advanced experience and accomplishment in serious composition (art music), consent of instructor. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition of major proportions at least seven minutes in duration. May be concurrently scheduled with course C176. Mr. Bourland

227A-227F. Selected Topics in the History of Music. Lecture, three hours. Prerequisite: graduate standing. Special aspects of the music of each period studied in depth. Each course may be repeated once for credit. May be concurrently scheduled with courses C217A-C217F. Additional assignments, as well as evidence of a greater depth of study, required of graduate students. 227A. Middle Ages; 227B. Renaissance; 227C. Baroque; 227D. Classic; 227E. Romantic; 227F. 20th Century.

248. Seminar In Comparative Music Theory (6 units). Lecture, three hours. Prerequisite: consent of instructor. The comparative study of the codified music theories of select cultures—Western and non-Western—considered in themselves and as expressions of their societies. Theory considered as a science of music; its place between cultural values and artistic practice in different civilizations.

250A-250B. Seminar in the History of Music Theory (6 units each). Lecture, three hours. Prerequisites: courses 200A. Course 250A is not prerequisite to 250B. 250A. Music Theory through Zarlino. 250B. Music Theory from Rameau to the Present. Ms. Göliner, Mr. Reaney

251A-251D. Seminar in Special Topics in Composition and Theory. Seminar, three hours. An intensive exploration of specialized aspects of composition. May be repeated for credit. 251A. Orchestration; 251B. Specific Media; 251C. Specific Styles; 251D. Compositional Analysis. Ms. Bankin, Mr. Reale

252A. Seminar in Composition (6 units each). Lecture, three hours. Prerequisites: courses 106B, 107C. Course 252A is prerequisite to 252B, which is prerequisite to 252C. Courses may be taken out of sequence only with consent of instructor. May be repeated for credit.

253. Seminar in Notation and Transcription in Ethnomusicology (6 units). Lecture, three hours. Prerequisites: courses 190A-C190B, or consent of instructor. Ms. De Vale

254A-254B. Seminar in Field and Laboratory Methods in Ethnomusicology (6 units each). Lecture, three hours. Prerequisites: courses C190A-C190B or consent of instructor. Ms. De Vale

255. Organology (6 units). Seminar, three hours. Prerequisites: courses 140A-140B-140C and C256A-C256B, or consent of instructor. A seminar in the science of musical instruments: an investigation of the theories of systematic, analytic, and applied branch-es of organology using both Western and non-Western instruments.

256. Seminar in Musical Form (6 units). Lecture, three hours. Prerequisites: courses 125A-125B-125C. The analysis of structural organizations in music.

257. Seminar in Music of the U.S. and Canada. Seminar, three hours. Prerequisite: course 130.

258. Seminar in Folk Music. (Same as Folklore M258.) Seminar, three hours. Prerequisite: consent of instructor. Mr. Porter

260A-260F. Seminar in Historical Musicology (6 units each). Lecture, three hours. Prerequisites: courses 200A, 201A-201B-201C, and 210 or 211 (either may be taken concurrently). May be repeated for credit. 260A. Medieval Music; 260B. Renaissance; 260C. Baroque; 260D. Classic; 260E. Romantic; 260F. General Topics.

261A-261F. Problems In Performance Practices. Seminar, three hours. Prerequisites: courses 151A-151B or consent of instructor. An investigation of primary performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. 261A. Medieval; 261B. Renaissance; 261C. Baroque; 261D. Classic; 261E. Romantic; 261F. Contemporary.

266A-266B. Seminar in Music of the 20th Century. Seminar, three hours. Prerequisites: courses 126A-126B-126C. 266A. Discussion and analysis of the major works of the 20th century before World War II. Emphasis on the study of groups of works written at the same time in history. 266B. Discussion and analysis of composers and their works from 1945 to the present. Mr. Reale

267. Selected Topics in Keyboard Literature. Lecture, three hours. Corequisites: courses 146A or 146B and 146C. A study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performance by participants. May be concurrently scheduled with course C167. Ms. Karp, Mr. Moon

269. Seminar in the History of European Instruments. Seminar, three hours. Mr. Hammond

270A-270G. Seminar in Music Education (6 units each). Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit. 270A. History; 270B. Non-Western Musics; 270C. Curriculum Innovations; 270D. Tests and Measurements; 270E. Choral Literature; 270F. Instrumental Literature; 270G. General Topics.

272. Seminar In Systematic Musicology. Seminar, three hours. Prerequisites: course 106, consent of instructor. May be repeated for credit.

273. Seminar in Aesthetics of Music (6 units). Lecture, three hours. Prerequisite: course 187 or consent of instructor. May be repeated for credit.

274. Seminar in the Psychology of Music (6 units). Lecture, three hours. Prerequisite: course 184 or consent of instructor. Selected topics in the psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated for credit. Mr. Kendall

278. Seminar in Ethnomusicology (6 units). Lecture, three hours. Prerequisites: courses 140A-140B-140C, C190A-C190B, 200A, 200B. May be repeated for credit.

281A-281B. Music of Indonesia. Lecture, three hours. Prerequisite: consent of instructor. During the first quarter, emphasis on the music and related performing arts of Java. Focus on the music and performing arts of Bali and other Indonesian islands during the second quarter. Concurrent participation in one of the Indonesian performance groups required.

282. Music of Iran and Other Non-Arabic-Speaking Communities. Seminar, three hours. Prerequisite: consent of instructor. A comparative study of the music of Iran and other related areas, including Turkey, the Middle East, Afghanistan, and Pakistan; their historical and cultural backgrounds, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in the Near East performance group required. Mr. Racy

284. Music of the Arabic-Speaking Near East. Lecture, three hours. Prerequisite: consent of instructor. An investigation of the historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in the Near East performance group required. Mr. Racy

285. Music of Tibet. Seminar, three hours. Prerequisite: consent of instructor. A study of the traditional music of ethnic Tibet as ritual, art, and folklore in its cultural matrix and its relationship with other arts. Topoi of the main musical styles, the relationship between theory and practice and emphasis on mode and improvisation, and 20th-century trends. Concurrent participation in the Near East performance group required. Mr. Racy

286A-286B. Classical Music of India. Seminar, three hours. Prerequisite: consent of instructor. A study of the history, theory, and practice of north and south Indian music. May be repeated for credit for credit. Emphasis on music history and traditional theory; the second quarter, analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in the Indian performance group required. Mr. Jairazbhoy

C290A-C290B. Proseminar in Ethnomusicology. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Basic literature and schools of thought in the field of ethnomusicology from the late 19th century to the present. May be concurrently scheduled with courses C190A-C190B. Additional assignments, as well as evidence of a greater depth of study, required of graduate students. Mr. Loza, Mr. Racy

C291. Proseminar in Systematic Musicology. Lecture, three hours. Prerequisite: consent of instructor. An introduction to the broad field of systematic musicology, including basic readings in aesthetics, philosophy, anthropology, sociology, and ethnomusicology; psychology; and acoustics. May be concurrently scheduled with course C191. Mr. Kendall

370. Music in General Education (2 units). Prerequisite: graduate standing, consent of instructor. Basic literature and schools of thought in the field of ethnomusicology from the late 19th century to the present. May be concurrently scheduled with courses C190A-C190B. Additional assignments, as well as evidence of a greater depth of study, required of graduate students. Mr. Loza, Mr. Racy

371. The Marching Band in Secondary Education (2 units). Prerequisites: courses 192 and 195, or consent of instructor. The study of the contemporary marching band as a component of the music curriculum in secondary education, including current approaches, practices, and problems associated with the marching band, as well as historical perspective. Mr. Henderson

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

460A-465. Graduate Instruction in Performance (6 units each). Limited to M.F.A. students. Individual instruction of one hour per week, with performance laboratory at discretion of instructor. Intensive study and preparation of musical literature in the specialized field of conducting. May be repeated for credit. 460A. Violin; 460B. Viola; 460C. Cello; 460D. String Bass; 460E. Harp; 460F. Classical Guitar; 460G. Viola da gamba; 460K. Lute; 461A. Flute; 461B. Oboe; 461C. Clarinet; 461D. Bassoon; 461E. Saxophone; 462A. Trumpet; 462B. French Horn; 462C. Trombone; 462D. Tuba; 463. Percussion; 464A. Piano; 464B. Organ; 464C. Harpsichord; 465. Voice

472. Master Class in Opera (6 units). Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of opera literature. May be repeated for credit. Mr. Kramchnick

475. Master Class in Conducting (6 units). Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of musical literature in the specialized field of conducting. May be repeated for credit.

495. Introductory Practicum for Teaching Apprentices in Music (2 units). Eight weekly two-hour sessions, plus, intensive training session during Fall Quarter registration week. Prerequisite: appointment as a teaching apprentice in the Music Department. Required of all new teaching apprentices. A special course dealing with the problems and practices of teaching music at the college level. May not be applied toward degree requirements. S/U grading. Mr. Hutchinson

596A. Directed Individual Studies in Orchestration and Composition (2, 4, or 6 units). Only four units may be applied toward the M.A. or M.F.A. degree requirements. May be repeated for credit.

596B. Directed Individual Studies in Musicology (2, 4, or 6 units). Only four units may be applied toward the M.A. or M.F.A. course requirements.

596C. Directed Individual Studies in Music Education (2, 4, or 6 units). Only four units may be applied toward the M.A. or M.F.A. degree requirements.

596D. Directed Individual Studies in Performance Practices (2 to 12 units). Prerequisite: graduate standing. Only four units may be applied toward the M.A. or M.F.A. degree requirements. May be repeated for credit.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units). S/U grading.

598. Guidance of M.A. Thesis or M.F.A. Final Project (4, 8, or 12 units). M.A. candidates may apply four units toward degree requirements; M.F.A. candidates may apply eight units toward degree requirements. May be repeated for credit. S/U grading.

599. Guidance of Ph.D. Dissertation (4, 8, or 12 units). May be repeated for credit. S/U grading.

Scope and Objectives

As a result of the complete reorganization of the Theater, Film, and Television Department currently underway, there may be substantive changes to the curricula and degree programs listed below. Students with degrees in progress at the time these changes are approved should work closely with the advisers in their area to determine how these changes affect their degree requirements and options.

The UCLA Department of Theater, Film, and Television is considered among the finest of its kind in the country and is the only one that combines theater, motion picture, and television in a single department.

The department bases its work on a solid foundation in the liberal arts. The purpose of the curriculum is to develop in its students a scholarly, creative, and professional approach to the theater, film, and television arts. The aim of the department is to train graduates who will eventually make original contributions in the field of their work.

Each of the department's two divisions, Theater and Motion Picture/Television, offers an undergraduate program leading to the Bachelor of Arts degree, as well as graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees.

Bachelor of Arts in Motion Picture/Television

Preparation for the Major

Admission to this major is not automatic. You may not apply until just prior to achieving full standing as a junior at the University. You must have at least 84 quarter units (56 semester units) of credit and have completed the general University and College of Fine Arts requirements before entering the major. You must also obtain departmental consent by (1) filing a letter of intention, (2) giving evidence of creative or critical ability when requested, and (3) providing additional material as determined by the department.

The Major

The major in motion picture/television consists of 68 upper division units taken in the junior and senior years. These include Film and Television 134A, 166 (eight units), 185 (eight units); one of the following writing courses: 131, 133, 135 (eight units), 181B; two of the following film history courses: 106A, 106B, 106C, 106D, 106E, 108, 110A; two of the following film criticism courses: 107, 110A, 110C, 112, 113, 114, 116; one additional history or criticism course from the above lists; six film and television elective courses. It is recommended that the majority of the required courses be completed during the junior year.

You should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Note: Students are required to perform assignments on each other's projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Consult the Schedule of Classes for courses limited to majors only.

Bachelor of Arts in Theater

Preparation for the Major

Required: Theater 5A, 5B, 5C, 10, 20, English 90.

The Major

Required: A total of 60 upper division units, including Theater 130A, 140A, 141A, 142A, 180 or 161A*, 170, C172 (eight units); 28 units of approved upper division theater electives. Through certain of these required courses, you are responsible for completing specific production assignments related to production activity of the theater curriculum during each quarter in residence.

Graduate Study

The department offers the Master of Arts (M.A.), Master of Fine Arts (M.F.A.), and Doctor of Philosophy (Ph.D.) degrees in the following specializations: (1) motion picture/television and (2) theater.

Admission

Students are generally admitted in the Fall Quarter only. Applicants for another quarter should consult the Student Affairs Office (Motion Picture/Television Division, 2412 Melnitz Hall, or Theater Division, 1321 Macgowan Hall), Theater, Film, and Television, UCLA, Los Angeles, CA 90024-1622. Admission is competitive, and only a limited number of students are accepted each year in each program. The department does not have an application in addition to the one used by the Graduate Admissions Office, and no screening examination prior to admission is required.

In addition to satisfying minimum University requirements for graduate admission, you must:

(1) Have completed an undergraduate major in theater or motion picture/television comparable to that offered at UCLA. Students whose theater arts preparation is determined to be deficient are required to make up those deficiencies.

*(If course 161A is used to complete the requirement. 30 units of electives are required.)

Additional admission requirements are noted under each specific program.

Master of Arts Degree

Motion Picture/Television Specialty

Admission

You must submit a sample of scholarly or critical writing, a statement of purpose, and other information (resume, Graduate Record Examination scores, etc.) that may be required to establish the quality of your work in the specialization.

Major Fields or Subdisciplines

The program requires that you be conversant in both film and television, as you are tested on each in the comprehensive examination.

Foreign Language Requirement

You may be required to demonstrate competence in a foreign language if necessary to support the research in your area of specialization.

Course Requirements

A minimum of nine courses is required, five of which must be 200-level courses in film and/or television history, theory, and criticism. In addition, Film and Television 200 is required of all students. All six of the graduate-level courses must be completed with a grade of B or better.

Only eight units of courses 596A, 596B, 596C, and 598 may be applied toward the total course requirement; however, none of these courses may be applied toward the minimum graduate course requirement.

Thesis Plan

Before beginning work on the thesis, you must obtain approval of a subject dealing with history, aesthetics, or criticism in motion picture/television and a general plan of investigation from the film/television studies committee. A thesis committee is formed when you are within one quarter of completing the coursework, at which time you are eligible to advance to candidacy. You must present the adviser and the committee with a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If your thesis fails to pass the committee, you may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.
Comprehensive Examination Plan
The written examination consists of three days of testing, four hours each day, and examines a broad range of knowledge in motion picture/television. After completion, your committee grades you either pass or fail. You may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the quarter in which it was first taken. The examination is required of all M.A. students applying to the Ph.D. program.

Theater Specialty
NOTE: The department has under review the minimum course requirements for the M.A. theater program. Students admitted for the 1988-89 academic year or thereafter are advised to check with the department for descriptions of such changes.

Admission
Your must submit a sample of scholarly or critical writing, a statement of purpose, and other information (resume, portfolio, script interview, etc.) that may be required to establish the quality of your work in the specialization.

Major Fields or Subdisciplines
The program leads to a general graduate degree, though there are opportunities, through your electives and thesis or research paper topic, to stress a particular interest such as acting, children's theater, design, directing, playwriting, puppet theater, theater history and criticism, theater management, and theater technology.

Foreign Language Requirement
The program does not require a foreign language, but you are urged to develop proficiency in either French, German, Spanish, or Italian.

Course Requirements
You are required to complete a minimum of 10 courses (42 units), five of which must be at the graduate level, in at least one year of intensive study, laboratory exercises, and research leading to the successful completion of either the thesis or comprehensive examination plan. You are required to take an active part in the production program of the department as partial fulfillment of the degree requirements.

The required courses are Theater 200, 245, and C272 (a two-unit course to be taken three times). After consultation with your advisor, you select seven other courses, including one graduate course in theater history (205A, 205B, or 205C), one graduate course in theater production theory (240, 241, 290A, or 290B), and five other courses which emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs are required to take courses 205A, 205B, and 205C.

Only eight units from the 596 series may be applied toward the total course requirement, and only four of these units may be applied toward the minimum graduate course requirement. No 598 courses may be applied toward the total course requirement.

Thesis Plan
Before beginning work on the thesis, you must obtain approval of a subject dealing with the history, aesthetics, criticism, or techniques of the theater and a general plan of investigation from the M.A. committee. A thesis committee is formed when you are within one quarter of completing the coursework, at which time you are eligible to advance to candidacy. You must present the adviser and the committee with a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If your thesis fails to pass the committee, you may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.

Comprehensive Examination Plan
If you elect this plan, you must complete an examination consisting of a 50-page research paper which may be associated with four units of Theater 596A, a one-hour oral defense of the paper, and a two-part, six-hour written examination covering theater history and production practice. The examination normally occurs during your final quarter in residence, at which time you should have advanced to candidacy.

If you intend to concentrate in animation, a description of an animation project to be undertaken during graduate study must be submitted, preferably in storyboard form. Other creative work may be submitted.

If you intend to concentrate in the producers program, you must submit a comprehensive statement detailing your reasons for pursuing a career as a producer/executive in motion picture/television.

Major Fields or Subdisciplines
The program includes specializations in animation, filmmaking (fictional, documentary, education), screenwriting, and television production. Ethnographic film is a subdiscipline.

Foreign Language Requirement
There is no foreign language requirement for the M.F.A. degree.

Course Requirements
A total of 18 courses (72 units) is required, five of which must be at the graduate level. At least three courses must be in the 200 series in film history, aesthetics, or structure. Course requirements for each specialization are available in the Student Affairs Office, 2412 Melnitz Hall.

Only 16 units of Film and Television 596 may be applied toward the total course requirement, and only eight of these units may be applied toward the minimum graduate course requirement. Only four units of course 596A and four units of course 596B may be taken prior to advancement to candidacy. Courses 596C through 596F may be taken only after advancement to candidacy.

Fieldwork and internships are not required but may be taken as courses which may be applied toward the degree.

Comprehensive Examination Plan
The comprehensive plan is satisfied by fulfilling projects appropriate to your specialization. No later than the beginning of your final quarter in residence, you must submit for approval to the M.F.A. committee the appropriate documents for advancement to candidacy and a list of at least three faculty members who will serve on your committee. Consult the Student Affairs Office, 2412 Melnitz Hall, for further information.

M.A.-African Area Studies/M.F.A.
The Motion Picture/Television Division of the Department of Theater, Film, and Television and the African Area Studies Program have an articulated degree program which allows students to combine study for the M.A. in African Area Studies and the M.F.A., with a specialization in motion picture/television. Articulated programs do not allow course credit to be applied toward more than one degree. Interested
students should write to the Graduate Adviser, Graduate Student Affairs Office, Motion Picture/Television Division. UCLA Theater, Film, and Television Department, and to the Graduate Adviser, African Area Studies Program, UCLA African Studies Center.

Theater Specialty

NOTE: The department has under review the minimum course requirements for the M.F.A. theater program. Students admitted for the 1988-89 academic year or thereafter are advised to check with the department for descriptions of such changes.

Admission

Evidence of creative ability and professional intent is required. At the time of application to the Graduate Division, you must clearly state the degree objective (M.F.A.) and one of the following areas of specialization within the M.F.A. (Theater) program.

Acting: Submit strong letters of recommendation from directors familiar with your work, a complete resume of your experience, and photographs; audition for the M.F.A. faculty committee.

Design (scenic, costume, or both): Submit examples of creative work such as a portfolio of designs, sketches, working drawings, and photographs.

Directing: Submit evidence of motivation and talent through production and prompt books, reviews, critical commentaries, and strong letters of recommendation. An interview may be requested by the department.

Playwriting: Submit examples of creative writing such as full-length plays, one-act plays, and screenplays.

Producers Program: Submit a comprehensive statement detailing your reasons for pursuing a career as a producer/executive in theater.

Puppet Theater: Submit actual puppets and photographs; audition for the M.F.A. committee or its representative.

Theater Technology: Submit evidence of ability demonstrated through production books, working drawings, lighting plots, photographs, and strong letters of recommendation.

Major Fields or Subdisciplines

The areas of specialization for the M.F.A. program are as specified above.

Foreign Language Requirement

There is no foreign language requirement for the M.F.A. degree.

Course Requirements

A total of 18 courses (72 units) is required, five of which must be at the graduate level. Only 16 units of Theater 596 may be applied toward the total course requirement and the minimum graduate course requirement.

Specific course requirements for each specialization are available in the Student Affairs Office, 1321 Macgowan Hall.

Fieldwork: Occasionally, students fulfill project requirements in the field. As an example, a student might complete a directing or design project with a community or church organization or a municipal division such as the Parks and Recreation Department.

Internship: Some specializations, such as the producers program and puppet theater, may take advantage of opportunities offered by professional organizations.

Comprehensive Examination Plan

The comprehensive plan is satisfied by fulfilling a series of creative projects appropriate to your specialization. On completion of the final creative project or last quarter in residence, whichever is last, you must file for advancement to candidacy. The committee then reviews and evaluates your record for a degree. Your participation in the final review is at the discretion of the committee.

Ph.D. Degree

Motion Picture/Television Specialty

Admission

Completion of a master's degree (M.A. or M.F.A.) equivalent to those offered by the UCLA Department of Theater, Film, and Television is required. In exceptional cases, students with an M.A. outside the field are considered for direct admission to the program. Evidence of potential as a practicing scholar is indicated by (1) breadth and depth of advanced coursework in history, theory, and criticism, (2) imagination and quality of scholarly writing, and (3) academic achievements and potential as indicated by the grade-point average, Graduate Record Examination (GRE) scores, awards, scholarships, teaching assistantships, etc.

The dossier submitted for admission must contain a letter describing your reasons for wishing to earn the Ph.D., plus the master's thesis or writing samples that demonstrate a high level of ability to write criticism or historical narrative.

Note: Supporting material will be returned only if accompanied by postage, envelope, and shipping instructions. Further information is available from the Student Affairs Office, Theater, Film, and Television, 2412 Melnitz Hall, UCLA, Los Angeles, CA 90024-1822.

Major Fields or Subdisciplines

You are expected to understand film and television within their social contexts as significant forms of art and communication, and to achieve by disciplined study a mastery of their history, theory, and criticism.

Foreign Language Requirement

Mastery of one foreign language is required and must be demonstrated by one of the following methods: (1) passing the Educational Testing Service (ETS) examination in French, Spanish, German, or Russian with a score of 500 or better, (2) completing level five or equivalent, with a minimum grade of C, in any foreign language, or (3) passing a UCLA language examination given in any foreign language department. When mastery of more than one foreign language is necessary for your dissertation study, you are required to take courses or pass examinations in the additional language(s). Normally, the required foreign language examinations must be passed by the end of your first year in residence.

In certain cases with committee approval, a research tool such as statistics or computer science may be substituted for the foreign language.

Course Requirements

During the first six quarters in the motion picture/television specialization, you must take 13½ courses. During your first year in residence, Film and Television 211B, 215, and 273 must be completed, while course 274 is required in your last quarter in residence. In addition to this core sequence, course 496 is also required. Further, you must select nine graduate elective courses, at least six of which must be from film and television studies offerings. You must select from these elective courses three areas of concentration, chosen to broaden your familiarity and competence with various and diverse subject matters. A suggested list of concentrations is as follows: film theory, criticism, narrative studies, film and the other arts, authors, genres, documentary, film history, American film, European film, non-Western film/television, film studies, media and society, film/television as a business enterprise, and film/television production. It is expected that the dissertation topic will emerge from one of the concentrations.

Teaching Experience

Every student must complete Film and Television 495A or 496, depending on program requirements.

Qualifying Examinations

At the end of your second quarter in residence, you must take a preliminary oral examination to be conducted by a representative committee of the faculty of your specialization. The committee specifies the areas of review, tests your background preparation and progress to date, and determines your general fitness to continue in the doctoral program.
After completing all language and course requirements, approval of a dissertation prospectus, and appointment of a dissertation committee, you are required to pass a written qualifying examination administered in three-hour segments during two successive days. Information regarding the examination is available from the divisional Ph.D. committee. You may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the quarter in which it was first taken.

After you pass the written examination, a doctoral committee is formed to administer the University Oral Qualifying Examination. You are advanced to candidacy only on successful completion of this examination.

A dissertation demonstrating your ability to carry out independent and significant inquiry in a historical, theoretical, or critical field of theater arts is required. Final award of the Ph.D. depends on successful completion of the dissertation.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

A final oral examination, held after completion of the dissertation, may be required at the option of the dissertation committee.

### Theater Specialty

**NOTE:** The department has under review the minimum course requirements for the Ph.D. theater program. Students admitted for the 1988-89 academic year or thereafter are advised to check with the department for descriptions of such changes.

#### Admission

See admission requirements for the Ph.D. (motion picture/television specialty) above. In addition, theater applicants must submit evidence of artistic competence in some facet of theater production.

Simultaneous application may be made to both the M.A. and Ph.D. programs in theater.

#### Major Fields or Subdisciplines

The Ph.D. student in theater is expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production, and dramatic literature.

#### Foreign Language Requirement

See foreign language requirements for the Ph.D. (motion picture/television specialty) above.

### Course Requirements

During the first six quarters (two academic years), you must complete a minimum of 12 graduate courses (200 or 500 level) and two professional courses (Theater 495A and 495B). Courses 216A, 216B, 216C are required. The remaining nine courses are elective graduate courses, seminars, or tutorials. Of these electives, no more than four may be taken outside the division and no more than two may be tutorials. In addition, the distribution of electives must include at least one each in the areas of Western or non-Western theater study. These electives must augment the required courses so as to constitute a definable area of study associated with the dissertation topic. The dissertation is a historical, critical, analytical, or experimental study of a theater topic.

### Teaching Experience

Every student must complete Theater 495A or 496, depending on program requirements.

### Qualifying Examinations

See the description of qualifying examinations under the Ph.D. (motion picture/television specialty) above.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

A final oral examination, held after completion of the dissertation, may be required at the option of the dissertation committee.

### Film and Television

#### Upper Division Courses

**106D. Development of Film in Europe and the U.S. from W.W. II through the Depression.** (Formerly numbered Motion Picture/Theater 106D.) Lecture/screenings, eight hours; discussion, one hour. An interdisciplinary and comparative approach to the development of film in Europe and the U.S. from the end of World War II through the Depression. Particular emphasis on the relationship of film with its historical context and the social dimensions of film structure, aesthetics, and language.

**106E. Development of Film In Europe and the U.S. from W.W. II to the Present.** (Formerly numbered Motion Picture/Theater 106E.) Lecture/screenings, eight hours; discussion, one hour. Course 106D is not prerequisite to 106E. An interdisciplinary and comparative approach to the development of film in Europe and the U.S. from the end of the 1930s to the present. Particular emphasis on the interrelationship of film with its historical context and the social dimensions of film structure, aesthetics, and language.

**107. Experimental Film.** (Formerly numbered Motion Picture/Theater 107.) Lecture/screenings, eight hours; discussion, one hour. A study and analysis of unconventional developments in the motion picture.

**108. History of Documentary Film.** (Formerly numbered Motion Picture/Theater 108.) Lecture/screenings, eight hours; discussion, one hour. The philosophy of the documentary approach in the motion picture. The development of critical standards and an examination of the techniques of teaching and persuasion used in selected documentary, educational, and propaganda films.

**110A. History of Broadcasting.** (Formerly numbered Motion Picture/Theater 110A.) Lecture/viewing, six hours; discussion, one hour. Critical survey of broadcasting here and abroad. Consideration of the social responsibilities and educational implications of broadcasting.

**110B. Problems and Issues in Broadcast Media.** (Formerly numbered Motion Picture/Theater 110B.) Lecture, four hours; discussion, two hours; laboratory, to be arranged. Prerequisites: consent of instructor. Study of the current issues and problems related to public and commercial broadcasting programs and management, including analysis of contemporary criticism of the broadcast media.

**110C. World Media Systems.** (Formerly numbered Motion Picture/Theater 110C.) Lecture/viewing, four hours; discussion, one hour. Prerequisites: course 110A or equivalent, upper division standing, consent of instructor. Global analysis of internal and external broadcasting services, with emphasis on their motives, origins, technologies, and programming. Special attention to political, economic, and regulatory constraints and common world media issues.

**111. Film Distribution and Exhibition.** (Formerly numbered Motion Picture/Theater 111.) Lecture, three hours; laboratory, to be arranged. History and theory of organization of theatrical and nontheatrical distribution and exhibition of motion pictures and analysis of their interrelationships with production practices.

**112. Film and Social Change.** (Formerly numbered Motion Picture/Theater 112.) Lecture/screenings, eight hours; discussion, one hour. The development of documentary and dramatic films in relation to and as a force in social development.

**113. Film Authors.** (Formerly numbered Motion Picture/Theater 113.) Lecture/screenings, eight hours; discussion, one hour. An in-depth study of a specific film author (director or writer). May be repeated once for credit with departmental consent and with topic change.
114. Film Genres. (Formerly numbered Motion Picture/Television 114.) Lecture, screenings, eight hours; discussion, one hour. Study of a specific film genre (e.g., the Western, the gangster cycle, the musical, the silent epic, the comedy, the social drama). May be repeated once for credit with departmental consent and with topic change.

115. Producers and Their Films. (Formerly numbered Motion Picture/Television 115.) Lecture/screenings, eight hours; discussion, one hour. A consideration of the work of individual producers as they have affected the art and industry of the motion picture. Content varies; consideration of the work of a studio such as Paramount, Metro-Goldwyn-Mayer, Warner Brothers, etc. or of an individual such as Samuel Goldwyn, Stanley Kramer, Hal Wallis, etc. May be repeated once for credit.

116. Criticism. (Formerly numbered Motion Picture/Television 116.) Lecture, four hours; laboratory, to be arranged. Study of and practice in criticism for the theater, motion pictures, and television. May be repeated once for credit with departmental consent and with topic change.

126A. Advanced Acting for Television and Motion Picture Production. (Formerly numbered Motion Picture/Television 126A.) Laboratory, six hours. Prerequisite: Theater 20 or consent of instructor. Projects in acting for television and motion pictures. Videotape recording of selected acting exercises and readings. May be repeated twice for credit.

126C. Sportscasting. (Formerly numbered Motion Picture/Television 126C.) Lecture, two hours; laboratory, four hours. Prerequisite: consent of instructor. Intensive study of sportscasting; laboratory emphasis on studio and field training; videotaping and playback of straight sportscasts, play by play, color, interviews, commentary, and editorials. Students required to write original material for all exercises. Extensive training in field equipment; use of the remote truck. Field exercises. Students rotate in production positions. May be repeated twice for credit.

127. Film Image. (Formerly numbered Motion Picture/Television 127.) Lecture, one hour; discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Proseminar in the craft of film aesthetics. The visual revolution. Biophysical nature of perception. Lenses, perspective, graphic styles. Principles of composition, screenwriting, sound, editing. Problems of time and movement. How a director views his work and his world.

128. Media and Ethnicity. (Formerly numbered Motion Picture/Television 128.) Prerequisite: consent of instructor. An examination of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle, Egri, Bentley.

135. Advanced Motion Picture/Television Writing (8 units). (Formerly numbered Motion Picture/Television 135.) Lecture, four hours; laboratory, eight hours; discussion, one hour. Prerequisite: consent of instructor. Limited to motion picture/television majors. The completion of a motion picture, television series, or series of film scripts. May be repeated once for credit.

152. Motion Picture/Television Sound Recording. (Formerly numbered Motion Picture/Television 152.) Lecture, three hours; laboratory, to be arranged. Prerequisite: course 151. Limited to motion picture/television majors. The study of motion picture/television sound production. May be repeated once for credit.

153C. Color Cinematography. (Formerly numbered Motion Picture/Television 153C.) Lecture, three hours. Prerequisite: consent of instructor. History and theories of color photography, with emphasis on present-day methods in motion picture and television production. A comparative study of additive and subtractive systems as employed by Technicolor, Anso, Kodak, and others.

154. Motion Picture Editing. (Formerly numbered Motion Picture/Television 154.) Lecture, three hours; laboratory, to be arranged. Prerequisite: course 151, consent of instructor. Limited to motion picture/television majors. An introduction to the art of film editing, with practical experience in the editing of image and synchronized sound.

165. Direction for Television. (Formerly numbered Motion Picture/Television 165.) Lecture, six hours. Prerequisite: courses 134A, 166, consent of instructor. Limited to motion picture/television majors. The study of the problems faced by a motion picture director and various approaches to their solution. May be repeated twice for credit.

166. Undergraduate Production I (8 units). (Formerly numbered Motion Picture/Television 166.) Lecture, discussion, four hours; laboratory, eight hours; other, four hours. Prerequisite: consent of instructor. Limited to and required of motion picture/television majors. The completion of one or more short films, including their writing, production, and editing. May not be repeated.
187A-187B-187C. Producing and Directing Multi-camera Remote Television Programming. (Formerly numbered Motion Picture/Television 187A-187B-187C.) Laboratory (additional hours to be arranged). Prerequisites: courses 185, consent of instructor. Instruction and supervised exercise in the planning and recording of remote location television programs.

189. Overview of the Motion Picture Industry. (Formerly numbered Motion Picture/Television 189.) Discussion, three hours. Prerequisite: consent of instructor. Evolution of economic and business structure of motion pictures from early beginnings to present, stressing methods of operation and the influence of social and economic pressures that contributed to the changing financial, distribution, and exhibition practices.

192. Motion Picture, Television, and Theater Internship (2, 4, or 8 units). (Formerly numbered Motion Picture/Television 192.) Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Prerequisite: consent of instructor. Limited to senior Department of Theater, Film, and Television majors. An internship at various studios or theaters accentuating the creative contribution, organization, and working of professional specialities. May be taken for a maximum of eight units.

193A. Film Curatorship. (Formerly numbered Motion Picture/Television 193A.) Lecture, two hours; discussion, two hours; laboratory, four hours. Prerequisites: consent of instructor. Study of the principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to the application of new technology, equipment, and program materials to film archival-library design for research and teaching.

193B. Television Curatorship. (Formerly numbered Motion Picture/Television 193B.) Lecture, two hours; discussion, two hours; laboratory, four hours. Prerequisites: consent of instructor. Study of the principles and techniques of television curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to the application of new technology, equipment, and program materials to film archival-library design for research and teaching.

195A-195B-195C. Independent Production of Feature Films and/or Television Programming. (Formerly numbered Motion Picture/Television 195A-195B-195C.) Lecture, three hours. Prerequisites: course 189, consent of instructor. Survey of financial and business aspects of feature film and/or television production from the various perspectives of prominent industry leaders. May be taken in any sequence for a maximum of eight units with different letter designations and different instructors.

196. Senior Colloquium. (Formerly numbered Motion Picture/Television 196.) Lecture, three hours. Prerequisites: consent of instructor, senior standing. An advanced seminar investigating special topics in film and television studies (i.e., style, modes of adaptation, media and social effects, etc.).

199. Special Studies in Motion Picture/Television (2 to 8 units). (Formerly numbered Motion Picture/Television 199.) Hours to be arranged. Prerequisites: senior standing, 3.0 GPA in major courses (6 units) (another major). May be taken for a maximum of eight units.

Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit with the approval of the departmental graduate adviser. Graduate courses are not open to undergraduate students.

200. Bibliography and Methods of Research in Theater Arts. (Formerly numbered Motion Picture/Television 200.)

Section 1. Motion Pictures.

Section 2. Television/Radio.

203. Seminar in Film and the Other Arts. (Formerly numbered Motion Picture/Television 203.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Studies in the interactions between film and the fine arts, the performing arts, and the literary and visual arts, with emphasis on the ways these other arts have influenced film. May be repeated twice for credit.

206A. Seminar in European Motion Picture History. (Formerly numbered Motion Picture/Television 206A.) Discussion, three hours (additional hours as required). Prerequisites: course 106B, graduate standing, consent of instructor. Studies in selected historical movements such as expressionism, socialist realism, surrealism, neorealism, New Wave, etc. May be repeated twice for credit.

206C. Seminar in American Motion Picture History. (Formerly numbered Motion Picture/Television 206C.) Discussion, three hours (additional hours as required). Prerequisites: course 106B, graduate standing, consent of instructor. Study of central topics in American film history. May be repeated twice for credit.

207. Film and Video Style. (Formerly numbered Motion Picture/Television 207.) Seminar, three hours; screenings, to be arranged. Prerequisite: consent of instructor. Designed for students in film and video production. Examination of the concepts and constituent elements underlying film and video style, with emphasis on work of major directors, schools, periods, and countries. Students examine individual works on their own through tapes and video disks.

208A. Seminar in Film Structure. (Formerly numbered Motion Picture/Television 208A.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. An examination of various film conventions, both fictional and nonfictional, and of the role of structure in the motion picture.

208B. Seminar in Classical Film Theory. (Formerly numbered Motion Picture/Television 208B.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. A study of the principal topics and lines of inquiry that characterize the theoretical writings of Arnhem, Eisenstein, Bazin, and others, etc.

208C. Seminar in Contemporary Film Theory. (Formerly numbered Motion Picture/Television 208C.) Discussion, three hours (additional hours as required). Prerequisites: course 208B, graduate standing, consent of instructor. A study of the redefinition of the aims and methods of film theory through contemporary writings.

209A. Seminar in Documentary Film. (Formerly numbered Motion Picture/Television 209A.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. The nonfiction film and its relation to contemporary culture.

209B. Seminar in Fictional Film. (Formerly numbered Motion Picture/Television 209B.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Film as fiction and its relation to contemporary culture. May be repeated once for credit.

210. Seminar in Depth and Time. (Formerly numbered Motion Picture/Television 210.) (Same as Anthropology M247A.) Lecture/discussion, four hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Discussion of the history, methods, and criteria for the use of film as a medium for the preservation and communication of human cultures. Filming assignments are given to increase the understanding of the theoretical and practical aspects of ethnographic film. Consideration of the potential of both film and video for fieldwork.

209D. Seminar in the Animated Film. (Formerly numbered Motion Picture/Television 209D.) Discussion, three hours; laboratory, three hours. Prerequisites: consent of instructor. A critical study of the animated film: its historical development and its structure, style, and use.

210. Seminar in Contemporary Broadcast Media. (Formerly numbered Motion Picture/Television 210.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Consideration of issues raised by recent developments in television and radio, commercial and public mediated with innovations in satellite, cable, and cartridge systems.

211A. Seminar in Historiography. (Formerly numbered Motion Picture/Television 211A.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to motion picture/television Ph.D. candidates. Examination of the function and methods used in writing film and television history as seen in the works of key historians in the U.S. and European traditions.

211B. Seminar in Historiography. (Formerly numbered Motion Picture/Television 211B.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to motion picture/television Ph.D. candidates. An examination of the major modes of theoretical reflection that bear on film and television through study of central texts of such traditions as phenomenology, anthropology, semiotics, psychoanalysis, sociology, etc.

219. Seminar in Film and Society. (Formerly numbered Motion Picture/Television 219.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. A study of the ways film affects and is affected by social behavior, belief, and value systems; considered in relation to the role of media in society. May be repeated once for credit.

220. Seminar in Television and Society. (Formerly numbered Motion Picture/Television 220.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of the ways television forms affect and are affected by social behavior, belief, and value systems; study of the technological and economic aspects of the medium. May be repeated once for credit.

221. Seminar in Film Authors. (Formerly numbered Motion Picture/Television 221.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of the works of outstanding creators of films. May be repeated twice for credit.

222. Seminar in Film Genres. (Formerly numbered Motion Picture/Television 222.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Studies of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.

223. Seminar in Visual Perception. (Formerly numbered Motion Picture/Television 223.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. The aesthetic, psychological, and physiological principles of vision as they relate to the ways in which man "sees" film and the emphasis on the ways in which these are different from other visual experiences.
247. Production Planning in Motion Pictures/Television. (Formerly numbered Motion Picture/Television 247.) Discussion, three hours. Prerequisite: consent of instructor. Examination of current status of financing-production-distribution agreements, union agreements, artistic, economic and critical criteria for decision making in the production and distribution of motion pictures and entertainment programs. May be taken in a sequence.

292A-292B. Network Television Management and Decision Making. (Formerly numbered Motion Picture/Television 292.) Lecture; two hours, discussion, two hours. Prerequisites: course 247, graduate standing, consent of instructor. A study of the business structure and the economic, social, and artistic criteria currently utilized by network television management. Only eight units may be taken for credit.

292C Seminar in Film and Television Curatorship. (Formerly numbered Motion Picture/Television 292.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of the aesthetic and ideological impulses of the business and the curatorial functions. A limited number of units may be taken for credit.

296A-296B. Special Studies in Motion Picture/Television (2 to 4 units each). (Formerly numbered Motion Picture/Television 296A-296B.) Lecture; discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Limited to 10 students per section. The production of a 20-minute fictional film or documentary film project. Students plan, design, and work as crew for each other in rotating assignments. In second quarter students complete postproduction of their projects.

402A-402B. Advanced Workshop in Fiction. (8 units each). (Formerly numbered Motion Picture/Television 402A-402B.) Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Prerequisites: courses 401A-401B, 433, consent of instructor. Limited to 10 students per section. The production of a 20-minute fictional film or television project. Students preplan, test, and complete production on location and in the studio and complete postproduction and work as crew for each other in rotating assignments. In second quarter students complete postproduction of their projects.

404A-404B. Advanced Workshop in Experimental Media. (8 units each). (Formerly numbered Motion Picture/Television 404A-404B.) Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Prerequisites: courses 401A-401B, 433, consent of instructor. Limited to 10 students per section. The production of a 20-minute abstract or experimental film or video script in either fiction, documentary, or experimental medium, to be produced in one of the advanced workshops.
436. Script to Film. (Formerly numbered Motion Picture/Television 436.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Examination of all written material involved in creating a script of a major production and comparing these with the completed film. (Formerly numbered Motion Picture/Television 452A.) Laboratory, eight hours. Prerequisites: course 152 or 452A, graduate standing, consent of instructor. Techniques of preparation and execution of recording using multitrack pickup recording technology, including supervised operational experience.

437. Nontheatrical Writing for Motion Pictures/Television. (Formerly numbered Motion Picture/Television 437.) Discussion, three hours. Prerequisites: course 152 or 452A, graduate standing, consent of instructor. Advanced problems in the field of nontheatrical motion pictures, with emphasis on research and preproduction. May be repeated for a maximum of 16 units.

450A. Cinematography. (Formerly numbered Motion Picture/Television 450A.) Lecture, two hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Advanced study of the principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lens.

450B. Lighting for Motion Pictures and Television. (Formerly numbered Motion Picture/Television 450B.) Lecture, three hours; discussion, one hour; laboratory, four hours. Prerequisites: graduate standing, consent of instructor. Supervised filming of a short dramatic project on locations that explore the complexity of the process, emphasizing the balance essential to both directing and photographing in its varied technical and production aspects.

451. Advanced Design for Motion Pictures (2 to 4 units). (Formerly numbered Motion Picture/Television 451.) Laboratory, to be arranged. Prerequisites: consent of instructor. Advanced study of the techniques and procedures used in editing the fictional and nonfictional production, with emphasis on the techniques and procedures used in manipulation of the sound track in sync dialogue cutting, preparing stereo sound effects cutting, including offscreen narration, dialogue substitution, and playback tracks.

452A. Motion Picture Editing. (Formerly numbered Motion Picture/Television 452A.) Lecture, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Major study of editing the fictional and nonfictional production, with emphasis on the techniques and procedures used in manipulation of the sound track in sync dialogue cutting, preparing stereo sound effects cutting, including offscreen narration, dialogue substitution, and playback tracks.

452B. Motion Picture Editing. (Formerly numbered Motion Picture/Television 452B.) Lecture, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Major study of editing the fictional and nonfictional production, with emphasis on the techniques and procedures used in manipulation of the sound track in sync dialogue cutting, preparing stereo sound effects cutting, including offscreen narration, dialogue substitution, and playback tracks.

452C. Advanced Motion Picture/Television Directing and Photography (8 units). (Formerly numbered Motion Picture/Television 452C.) Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisites: graduate standing, consent of instructor. Supervised filming of a short dramatic project on locations that explore the complexity of the process, emphasizing the balance essential to both directing and photographing in its varied technical and production aspects.

453. Video Editing (4 or 8 units). (Formerly numbered Motion Picture/Television 453.) Lecture, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Limited to motion picture/television majors. A study of the role of editing the fictional and nonfictional production, with emphasis on the finishing stages, including title preparation. The use of optical effects and blowups, preparation for the supervision of the mix, and the cutting of opticals for single strip and AB printing.

459A-459B. Directing for Theater, Film, and Television. (Formerly numbered Motion Picture/Television 459A-459B.) Lecture, three hours. Prerequisites: consent of instructor. Limited to graduate students in the Department of Theater, Film and Television. Analysis and exploration with specific scenes, of the differences and many similarities in the directorial approach to the same literary material in three media.

464A-464B. Motion Picture Direction (4 or 8 units each). (Formerly numbered Motion Picture/Television 464A-464B.) Hours to be arranged. Prerequisites: consent of instructor. Limited to motion picture/television graduate students. Special problems in the direction of short fictional, animated and nonfictional films.

465A-465B. Television Direction (4 or 8 units each). (Formerly numbered Motion Picture/Television 465A-465B.) Lecture, two hours; laboratory, six hours. Prerequisites: graduate standing, consent of instructor. Special problems in the direction of dramatic and documentary television programs.

475. Film I (8 units). (Formerly numbered Motion Picture/Television 475.) Discussion, three hours; laboratory, to be arranged. Prerequisites: course 152 or 452A, graduate standing, consent of instructor. A study of the basic techniques of television and video production, including the completion of one or more projects.

476. Video I (8 units). (Formerly numbered Motion Picture/Television 476.) Discussion, three hours; laboratory, to be arranged. Prerequisites: course 152 or 452A, graduate standing, consent of instructor. A study of the basic techniques of television and video production, including the completion of one or more projects.

477. Film II (8 units). (Formerly numbered Motion Picture/Television 477.) Discussion, three hours; laboratory, to be arranged. Prerequisites: course 152 or 452A, graduate standing, consent of instructor. Group experience in film production with each member rotating on crew work in the production of individual or collective projects.

478. Video II (8 units). (Formerly numbered Motion Picture/Television 478.) Discussion, three hours; laboratory, to be arranged. Prerequisites: course 152 or 452A, graduate standing, consent of instructor. Group experience in video production with each member rotating on crew work in the production of individual or collective projects.

479A-479B-479C. Film III (4 or 8 units each). (Formerly numbered Motion Picture/Television 479A-479B-479C.) Laboratory, to be arranged. Prerequisites: course 475 or 476, graduate standing, consent of instructor. Group experience in film production, including the completion of a film (no longer than 10 minutes), including its writing, design, production, and editing.

480A-480B-480C. Workshop in Broadcast Journalism. (Formerly numbered Motion Picture/Television 480A-480B-480C.) Laboratory, eight hours. Prerequisites: graduate standing, consent of instructor. The practice of reporting, writing, editing, and producing news, public affairs, and documentary programs for broadcast.

480D-480E. Animated Animation Workshop (4 or 8 units each). (Formerly numbered Motion Picture/Television 480D-480E.) Lecture, three hours; laboratory, to be arranged. Prerequisites: courses 181A, 181B, 181C, consent of instructor. Orientation and preparation of graduate students for the teaching of undergraduate courses in the department; discussion of problems common to the teaching experience. May not be applied toward the M.A., M.F.A., or Ph.D. May be repeated. S/U grading.

483. Video Editing (4 or 8 units). (Formerly numbered Motion Picture/Television 483.) Lecture, four hours; laboratory, to be arranged. Prerequisites: course 476, graduate standing, consent of instructor. Individual instruction in electronic editing.

484A-484B-484C. Educational Television Workshop (4 or 8 units each). (Formerly numbered Motion Picture/Television 484A-484B-484C.) Laboratory, eight hours. Prerequisites: consent of instructor. Consent of instructor. Instruction and supervised exercises in directing and producing television programs for educational purposes.

485A-485B-485C. Computer Animation in Film and Video (8 units each). (Formerly numbered Motion Picture/Television 485A-485B-485C.) Lecture, three hours; laboratory, eight hours; other, to be arranged. Prerequisites: courses 181A, 181C, a complete animated film, consent of instructor. Supervised and instructed production of computer animation. May be repeated once.

489B. Production in Computer Animation (4 or 8 units). (Formerly numbered Motion Picture/Television 489B.) Lecture, three hours; Prerequisites: course 489A. Instruction in the creation, preparation, and production of a complete and original computer animation film or tape. May be repeated for a maximum of 16 units.

490A-490B-490C. The Teaching of Motion Picture/Television. (Formerly numbered Motion Picture/Television 490A-490B-490C.) Lecture/laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of and practice in the teaching of theater arts at the college and university level.

495A-495B. Problems in the Teaching of Motion Picture/Television (2 or 4 units). (Formerly numbered Motion Picture/Television 495A-495B.) Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Demonstration of competence in theater production through successful completion of a major teaching production assignment. May be repeated for a maximum of 12 units.

496. Practice of Teaching Motion Picture/Television (2 units). (Formerly numbered Motion Picture/Television 496.) Discussion. Required once of all teaching assistants or associates in the department. Preparation and evaluation of graduate students who are teaching in the teaching of undergraduate courses in the department; discussion of problems common to the teaching experience. May not be applied toward the M.A., M.F.A., or Ph.D. May be repeated. S/U grading.

498. Professional Internship in Film and Television (4, 8, or 12 units). (Formerly numbered Motion Picture/Television 498.) Full- or part-time at a studio or on a professional project. Prerequisites: graduate standing, consent of instructor. An internship at a film, television, or theater facilities accentuating the creative contribution, the organization, and the work of professional specialists in the field. (Formerly numbered Motion Picture/Television 485B-485C.) Laboratory, 16 hours. Prerequisites: course 476, graduate standing, consent of instructor. Creation, preparation, and production each quarter of a graduate advanced television program (no longer than 10 minutes).
501. Cooperative Program (2 to 8 units). (Formerly numbered Motion Picture/Television 501.) Prerequisite: consent of graduate adviser and graduate dean, and head of department, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596A. Directed Individual Studies: Research (2 to 12 units). (Formerly numbered Motion Picture/Television 596A.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596B. Directed Individual Studies: Writing (2 to 12 units). (Formerly numbered Motion Picture/Television 596B.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596C. Directed Individual Studies: Directing (2 to 12 units). (Formerly numbered Motion Picture/Television 596C.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596D. Directed Individual Studies: Design (2 to 12 units). (Formerly numbered Motion Picture/Television 596D.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596E. Directed Individual Studies: Acting (2 to 12 units). (Formerly numbered Motion Picture/Television 596E.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596F. Directed Individual Studies: Production (2 to 12 units). (Formerly numbered Motion Picture/Television 596F.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

597. Preparation for Ph.D. Qualifying Examinations in Theatre Arts (2 to 8 units). (Formerly numbered Motion Picture/Television 597.) May be repeated for a maximum of 12 units.

598. M.A. Thesis in Theatre Arts (2 to 8 units). (Formerly numbered Motion Picture/Television 598.) Prerequisite: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units.

599. Ph.D. Dissertation in Theatre Arts (2 to 8 units). (Formerly numbered Motion Picture/Television 599.) Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units.

10. Fundamentals of Theater, Film, and Television. (Formerly numbered Theater Arts 10.) Lecture, four hours; discussion, one hour; laboratory, two hours. Preparation: consent of instructor. A study of recent trends in residence. A basic study of the artistic relationship between management, writing, history, criticism, directing, acting, design, technical direction, cinematography, and animation in theater, film, and television production. Emphasis on understanding each of the arts which contribute to the final presentation.

20. Acting Fundamentals. (Formerly numbered Theater Arts 20.) Lecture/laboratory. Required of the majors. An introduction to acting through the art of the actor. Development of individual insights, skills, and disciplines in the presentation of dramatic material to an audience.

Upper Division Courses

100. Teaching of Theater. (Formerly numbered Theater Arts 100.) Lecture, three hours. Prerequisites: courses 160 or 161A, and 162A, or consent of instructor. Highly recommended for students pursuing a secondary instructional credential. Study of current methods and problems of production as related to the secondary level.

102A. Selected Topics on the History of the European Theater. (Formerly numbered Theater Arts 102A.) Lecture, three hours. Prerequisites: course 5A or equivalent, consent of instructor. An investigation in depth of a selected theatrical period from the Greeks through the Renaissance. May be repeated twice for credit.

102B. Selected Topics on the History of the European Theater. (Formerly numbered Theater Arts 102B.) Lecture, three hours. Prerequisites: courses 5B or equivalent and/or consent of instructor. An investigation in depth of a selected theatrical period from the Greeks through the Renaissance. May be repeated twice for credit.

102D. History of the European Theater. (Formerly numbered Theater Arts 102D.) Lecture, three hours. Prerequisite: consent of instructor. Not open for credit to students with credit for former course 117. Study of the history and practice of the art of puppetry. Emphasis on techniques and methods of construction. Staging of puppet productions as laboratory practice. May be repeated twice for credit. Concurrently scheduled with course C217A.

104D-104E-104F. History of the American Theater. (Formerly numbered Theater Arts 104D, 104E, 104F.) Lecture, three hours. 104D. From the Revolutionary War to the Civil War; 104E. From the Civil War to WWI; 104F. From WWI to the Present.

105. Main Currents in Theater. (Formerly numbered Theater Arts 105.) Lecture, five hours. Critical examination of the leading theories of theater from 1887 to the present. Study and discussion of modern styles of production.

C117. Puppet Theater (2 units). (Formerly numbered Theater Arts C117.) Lecture/laboratory, four hours. Prerequisite: consent of instructor. Not open for credit to students with credit for former course 117. Study of the history and practice of the art of puppetry. Emphasis on techniques and methods of construction. Staging of puppet productions as laboratory practice. May be repeated twice for credit. Concurrently scheduled with course C217A.

118A. Creative Dramatics. (Formerly numbered Theater Arts 118A.) Lecture/laboratory, six hours. Exploration of the principles and procedures of the improvisational approach to drama as done with children from nursery school to junior high.

118B. Advanced Creative Dramatics (2 units). (Formerly numbered Theater Arts 118B.) Discussion, one hour; laboratory, two hours. Prerequisite: course 118A or consent of instructor. Practical application of the methods and principles introduced in course 118A. May be repeated twice for credit.

119B. Theater for the Child Audience: Performance. (Formerly numbered Theater Arts 119B.) Lecture, two hours; laboratory, four hours. Prerequisites: audition and consent of instructor prior to first class meeting. Designed to provide an opportunity for students to work together as an ensemble, creating through improvisation a theater presentation for a young audience. Emphasis on testing theoretical concepts through the ensemble work, rehearsal, pre-testing, and evaluation of an original production for possible presentation outside the classroom.

121. Acting Workshop (2 units). (Formerly numbered Theater Arts 121.) Laboratory, to be arranged. Prerequisites: course 20, consent of instructor. Courses 120, 161A, 161B, and 161C may be taken concurrently. A workshop which provides students with an opportunity to rehearse, perform, and critique scenes. May be repeated once for credit.

122. Makeup for the Stage (2 units). (Formerly numbered Theater Arts 122.) Lecture, two hours. Prerequisites: consent of instructor. The art of makeup and its relation to the production as a whole. History, aesthetics, materials, and procedures of makeup.

123. Internship in Acting for the Stage. (Formerly numbered Theater Arts 123.) Lecture/laboratory. Prerequisites: course 20, consent of instructor. Study and practice of the art of acting through the perfecting of techniques and application of those techniques to acting problems.

M103D. Contemporary Chicano Theater. (Formerly numbered Theater Arts M103D.) (Same as Chicano Studies M103D.) Lecture, three hours. Prerequisite: upper division standing. A study of recent trends in Chicano theater as reflected in the works of contemporary Chicano dramaticists and theater artists.

103E. Black People's Theater in America: The Depression to the Present. Lecture, three hours. Prerequisites: upper division standing, consent of instructor. An exploration of extant materials on the history and literature of the theater as developed and performed by black artists in America from the Depression to the present.

103F. Native American Theater. (Formerly numbered Theater Arts 198B.) Prerequisite: consent of instructor. A study of American Indian theater as an evolving art form.

104D-104E-104F. History of the American Theater. (Formerly numbered Theater Arts 104D, 104E, 104F.) Lecture, three hours. 104D. From the Revolutionary War to the Civil War; 104E. From the Civil War to WWI; 104F. From WWI to the Present.

105. Main Currents in Theater. (Formerly numbered Theater Arts 105.) Lecture, five hours. Critical examination of the leading theories of theater from 1887 to the present. Study and discussion of modern styles of production.

C117. Puppet Theater (2 units). (Formerly numbered Theater Arts C117.) Lecture/laboratory, four hours. Prerequisite: consent of instructor. Not open for credit to students with credit for former course 117. Study of the history and practice of the art of puppetry. Emphasis on techniques and methods of construction. Staging of puppet productions as laboratory practice. May be repeated twice for credit. Concurrently scheduled with course C217A.

118A. Creative Dramatics. (Formerly numbered Theater Arts 118A.) Lecture/laboratory, six hours. Exploration of the principles and procedures of the improvisational approach to drama as done with children from nursery school to junior high.

118B. Advanced Creative Dramatics (2 units). (Formerly numbered Theater Arts 118B.) Discussion, one hour; laboratory, two hours. Prerequisite: course 118A or consent of instructor. Practical application of the methods and principles introduced in course 118A. May be repeated twice for credit.

119B. Theater for the Child Audience: Performance. (Formerly numbered Theater Arts 119B.) Lecture, two hours; laboratory, four hours. Prerequisites: audition and consent of instructor prior to first class meeting. Designed to provide an opportunity for students to work together as an ensemble, creating through improvisation a theater presentation for a young audience. Emphasis on testing theoretical concepts through the ensemble work, rehearsal, pre-testing, and evaluation of an original production for possible presentation outside the classroom.

121. Acting Workshop (2 units). (Formerly numbered Theater Arts 121.) Laboratory, to be arranged. Prerequisites: course 20, consent of instructor. Courses 120, 161A, 161B, and 161C may be taken concurrently. A workshop which provides students with an opportunity to rehearse, perform, and criticize scenes. May be repeated once for credit.

122. Makeup for the Stage (2 units). (Formerly numbered Theater Arts 122.) Lecture, two hours. Prerequisites: consent of instructor. The art of makeup and its relation to the production as a whole. History, aesthetics, materials, and procedures of makeup.

123. Internship in Acting for the Stage. (Formerly numbered Theater Arts 123.) Lecture/laboratory. Prerequisites: course 20, consent of instructor. Study and practice of the art of acting through the perfecting of techniques and application of those techniques to acting problems.
124A. Voice for the Stage. (Formerly numbered Theater Arts 124A.) Lecture/laboratory. Prerequisites: course 20, consent of instructor. Development of voice techniques for the stage. Includes work in relaxation, limbering, breathing, articulators, and respiration and their relationship to the stage. May be repeated once for credit.

124B. Speech for the Stage. (Formerly numbered Theater Arts 124B.) Lecture, four hours; laboratory, two hours. Prerequisites: courses 20, 123, 124A (with demonstration of high skills level), 125A, consent of instructor. Designed to acquaint students with the international phonetic alphabet and its uses and to exercise students' skills in pronunciation, enunciation, and the development of diction versatility. May be repeated once for credit.

125A. Movement for the Actor. (Formerly numbered Theater Arts 125A.) Lecture/laboratory. Prerequisites: course 20, consent of instructor. Physical awareness for the actor, concentrating on warming up the body, relaxation, control, stunts, and gymnastics.

125B. Advanced Movement for the Actor. (Formerly numbered Theater Arts 125B.) Lecture/laboratory. Prerequisites: course 20, course 125A, consent of instructor. An advanced and contemporary approach to classical and modern movement for the stage actor.

130A. Fundamentals of Playwriting I. (Formerly numbered Theater Arts 130A.) Lecture, three hours. Prerequisite: consent of instructor. Required of theater majors. Designed to stimulate students' critical and creative faculties through the preparation of original material for the theater. Guidance in the completion of a one-act play.

130B. Fundamentals of Playwriting II. (Formerly numbered Theater Arts 130B.) Lecture, three hours plus conference. Prerequisites: course 130A, consent of instructor. Study in original material for the theater, its preparation and development. Designed to give further insight into the critical and creating aspects of the short and full-length play and guidance in the completion of the one-act and full-length play. May be repeated twice for credit.

130C. Writing for the American Musical Theater. (Formerly numbered Theater Arts 130C.) Lecture, laboratory, three hours. Prerequisite: consent of instructor. Study of the practice and techniques used in writing a libretto for musical theater: opening numbers, romance, subplots, and comedy. May be repeated once for credit.

132. Manuscript Evaluation for Theater. (Formerly numbered Theater Arts 132.) Lecture, three hours. Prerequisites: course 130A, consent of instructor. Thoroughly practical lecture in the evaluation of manuscripts for the theater. May be repeated once for credit.

136. Advanced Acting for the Stage. (Formerly numbered Theater Arts 136.) Lecture/laboratory. Prerequisites: courses 123, 124A, 125A, consent of instructor. Study of the art of acting through a progression to more advanced acting problems. May be repeated twice for credit. Concurrent enrollment with the same instructor not permitted.

137A-137B-137C. Continuum Study in Acting for the Stage. (Formerly numbered Theater Arts 137A-137B-137C.) Lecture/laboratory. Prerequisites: courses 123, 124A, 125A, consent of instructor. The technique of characterization and performance in advanced and complex acting styles. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units.

137A. Research in Acting for the Stage. (Formerly numbered Theater Arts 137A.) Lecture/laboratory. Prerequisites: courses 123, 124A, 125A, consent of instructor. The technique of characterization and performance in advanced and complex acting styles. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units.

138. Special Problems in Performance Technology. (Formerly numbered Theater Arts 138.) Lecture/laboratory. Prerequisites: courses 123, 124A, 125A, consent of instructor. Study of complex problems in voice, movement, and acting. May be repeated twice for credit.

140A. Scenic Techniques for the Stage. (Formerly numbered Theater Arts 140A.) Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. An intensive study of stage scenery techniques, tools, hardware, and materials; and their relationship to the art of theatrical design related to the scenic design history, overall production concepts, and design styles.

140B. Advanced Scenery for the Stage. (Formerly numbered Theater Arts 140B.) Lecture/laboratory. Prerequisites: course 125A, consent of instructor. Advanced study of technical problems in staging theater productions, including design analysis and planning related to rigging, shifting, and construction techniques.

141A. Lighting Techniques for the Stage. (Formerly numbered Theater Arts 141A.) Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Required of theater majors. An intensive study of stage lighting, with emphasis on the relationship of lighting instruments and control equipment to lighting design. Courses 141A, 140A, and 142A may be taken in any sequence, but not concurrently.

141B. Advanced Lighting for the Stage. (Formerly numbered Theater Arts 141B.) Lecture/laboratory. Prerequisite: course 141A. The detailed study of stage lighting as an art, with emphasis on design concepts. The interpretation of a script or score through the control of light and color in relation to actor and audience.

142A. Theater Costuming Techniques. (Formerly numbered Theater Arts 142A.) Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Required of theater majors. The study of costume analysis and the interpretation of theatrical costume design through the use of patterns, fabrics, and related costume materials. Courses 142A, 142B, and 142C may be taken in any sequence, but not concurrently.

142B. Advanced Costuming for the Stage. (Formerly numbered Theater Arts 142B.) Lecture, three hours; laboratory, four hours. Prerequisites: course 142A, consent of instructor. Special problems in the procuring, designing, construction, and management of costumes used in theatrical productions.

143. Scenic Design for the Theater. (Formerly numbered Theater Arts 143.) Prerequisites: course 10, consent of instructor. Required of theater majors. The study of costume analysis and the interpretation of theatrical costume design through the use of patterns, fabrics, and related costume materials. Courses 142A, 142B, and 142C may be taken in any sequence, but not concurrently.

144A. Theater Sound Techniques. (Formerly numbered Theater Arts 144A.) Lecture, two hours; laboratory, two hours. Prerequisite: course 10 or an equivalent equivalent. A study of the equipment and techniques utilized in the recording and reproduction of sound for the theater.

144B. Advanced Theater Sound. (Formerly numbered Theater Arts 144B.) Lecture, three hours; laboratory, four hours. Prerequisite: course 144A or consent of instructor. A detailed study of theater sound, with emphasis on the composition and execution of theater sound tracks, recording techniques, and acoustic reinforcement.

145. Costume Design for the Theater. (Formerly numbered Theater Arts 145.) Lecture/laboratory. Prerequisite: consent of instructor. Design of costumes for theatrical presentations. The study of the use of silhouettes, fabrics, and colors related to theatrical characterization. May be repeated once for credit.

146. Scene Painting Techniques. (Formerly numbered Theater Arts 146.) Lecture/laboratory. Prerequisite: consent of instructor. The study of scenic painting techniques and materials and their relation to the realization of color design and elevations. May be repeated once for credit. Concurrently scheduled with course C446.

148. Special Courses in Design and Technical Theater. (Formerly numbered Theater Arts 148.) Lecture, three hours. Prerequisite: consent of instructor. Group study of selected subjects in design and technical theater. May be repeated twice for credit.

149A. Basic Draffing Techniques for the Stage (2 units). (Formerly numbered Theater Arts 149A.) Lecture/laboratory. Prerequisite: course 10 or consent of instructor. Studies of the basic skills and techniques of drafting for the stage through the execution of floor plans and elevation drawings.

149B. Advanced Drafting for Theater. (Formerly numbered Theater Arts 149B.) Lecture/laboratory. Prerequisite: course 149A or consent of instructor. An advanced course in the technical sketching and drafting of working drawings essential in the development of the design of sets and properties for theater, television, and motion picture productions.

150. Fundamentals of Play Direction. (Formerly numbered Theater Arts 150.) Lecture/laboratory. Prerequisite: consent of instructor. Required of theater majors. Course 151A may be substituted for this requirement (if substituted, an additional two upper division units required). Course 121 may be taken concurrently. The intensive development of primary directing skills and process, including text analysis and the exploration of craft fundamentals as a basis for director-actor communication and effective staging. Students work in proscenium configuration with scenes from plays of American realism. May be applied toward the major requirements.

151B. Continuum in Directing for the Stage. (Formerly numbered Theater Arts 151B.) Lecture/laboratory, six hours. Prerequisites: courses 160 or 161A, consent of instructor. Course 121 may be taken concurrently. The further development of craft elements of directorial method, with additional emphasis on the psychological aspects of director-actor communication. Students work in arena and proscenium configurations with scenes from the period of early realism through expressionism.

151C. Continuum in Directing for the Stage (6 units). (Formerly numbered Theater Arts 151C.) Lecture/laboratory, six hours. Prerequisites: courses 160 or 161A, consent of instructor. Course 121 may be taken concurrently. The intensive development of primary directing skills and process, including text analysis and the exploration of craft fundamentals as a basis for director-actor communication and effective staging. Students work in proscenium configuration with scenes from period plays (Greek through Romantic era) and from contemporary, nonrealistic plays.

162A. Intermediate Play Direction. (Formerly numbered Theater Arts 162A.) Lecture/discussion, two hours; laboratory, eight hours. Prerequisites: course 160 or 161A, consent of instructor. The application of stage direction techniques to the one-act play. Each student directs a one-act play to be performed under rehearsal conditions. Material taken from published sources.

C162B. Advanced Play Direction. (Formerly numbered Theater Arts 162B.) Lecture, four hours; laboratory, six hours. Prerequisites: course 160 or 161A, consent of instructor. Special problems in the direction of original plays. Concurrently scheduled with course C262.

170. Theater Laboratory. (Formerly numbered Theater Arts 170.) Lecture, four hours; laboratory, eight hours. Prerequisites: courses 125A, 141A, 142A, consent of instructor. Required of theater majors. Laboratory in theater production under supervision. The translation of ideas and concepts into the dramatic form.
171A. Advanced Theater Laboratory (2 or 4 units). (Formerly numbered Theater Arts 171A.) Hours to be arranged. Prerequisite: consent of instructor. Creative participation as an actor or stage manager in the public presentation of departmental productions. May be taken for a maximum of four units.

171B. Advanced Theater Laboratory (2 or 4 units). (Formerly numbered Theater Arts 171B.) Hours to be arranged. Prerequisite: consent of instructor. Creative participation in the realization of production elements related to the public presentation of departmental productions. May be taken for a maximum of four units.

C172. Technical Theater Laboratory (2 units). (Formerly numbered Theater Arts C172.) Hours to be arranged. Prerequisite: consent of instructor. Required of theater majors. A laboratory in various aspects of theater production. Must be repeated for a maximum of eight units, but no assignment may be repeated more than once. Concurrently scheduled with courses C272 and C472.

174. Techniques of Stage Managing (2 units). (Formerly numbered Theater Arts 174.) The professional duties of the stage manager. The problems of unions, professional auditions, organization, scheduling, out-of-town openings, Broadway openings, and the responsibilities of a last-minute manager.

C190A. Role of the Producer in the Professional Theater (2 units). (Formerly numbered Theater Arts C190A.) A study of the structure governing the economic and artistic decision-making processes in the professional theater of America. Concurrently scheduled with course C294B.

C190B. Role of Management in the Educational and Community Theater (2 units). (Formerly numbered Theater Arts C190B.) A study of the artistic, social, and economic criteria in the administration of educational and community theater. Concurrently scheduled with course C294B.

191. The Touring Company (2 to 12 units). (Formerly numbered Theater Arts 191.) Lecture, 20 hours; laboratory, 22 hours. Prerequisite: consent of instructor. Rehearsal and technical preparation of a theatrical work for touring and the performance of that work on tour.

192. Motion Picture, Television, and Theater Internship (2, 4, or 8 units). (Formerly numbered Theater Arts 192.) Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Prerequisite: consent of instructor. Limited to senior Department of Theater, Film, and Television majors. An internship at various studios or theaters accentuating the creative contribution, organization, and work of professionals in their various specialties. May be taken for a maximum of eight units.

199. Special Studies in Theater Arts (2 to 8 units). (Formerly numbered Theater Arts 199.) Hours to be arranged. Prerequisite: senior standing, 3.0 GPA in major, consent of instructor. May be taken for a maximum of eight units.

### Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate advisor. Graduate courses are not open to undergraduate students.

200. Bibliography and Methods of Research in Theater Arts. (Formerly numbered Theater Arts 200.)

202A. Seminar in Western Classical Theater. (Formerly numbered Theater Arts 202A.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. An examination of theatrical production and dramatic form in the Greek and Roman periods. May be repeated twice for credit.

202B. Seminar in Medieval Theater. (Formerly numbered Theater Arts 202B.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.

202C. Seminar in Renaissance and Baroque Theater. (Formerly numbered Theater Arts 202C.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

202D. Seminar in Bourgeois and Romantic Theater. (Formerly numbered Theater Arts 202D.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

202E. Seminar on the Modern Consciousness in Theater. (Formerly numbered Theater Arts 202E.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of the prototypes of modern experience as encountered in the work of Ibsen and Strindberg. May be repeated twice for credit.

202F. Seminar in Modern Realism. (Formerly numbered Theater Arts 202F.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in the theater’s response to science and technology, politics, and revolution. May be repeated twice for credit.

202G. Seminar in Modern Theatricalism. (Formerly numbered Theater Arts 202G.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in modernism and the avant-garde theater. Exploration of the dream experience and the private psyche, the religious experience, and the revitalization of myth and ritual. May be repeated twice for credit.

202H. Seminar in American Theater. (Formerly numbered Theater Arts 202H.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in the development of theatrical form and structure. May be repeated twice for credit.

202I. Seminar in Asian Theater. (Formerly numbered Theater Arts 202I.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in the development of the theater spaces, and critical writings. May be repeated twice for credit.

202K. Seminar in Southeast Asian Theater. (Formerly numbered Theater Arts 202K.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in the theater forms of Southeast Asia, including literary drama, costume, theater spaces, and critical writings. May be repeated twice for credit.

205A-205B-205C. Background of Theatrical Art. (Formerly numbered Theater Arts 205A, 205B, 205C.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. An analysis of major plays, commentaries, and historical materials. 205A. Classical and Medieval Periods; 205B. Renaissance, Baroque, and Rococo Periods; 205C. Romantic, Naturalistic, and Symbolist Periods.

216A. Critical and Historical Methods. (Formerly numbered Theater Arts 216A.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in theater historiography and sociological criticism.

216B. Critical Methods. (Formerly numbered Theater Arts 216B.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of the history and practice of the art of puppetry. An examination of the materials and methods of construction. May be repeated twice for credit. Concurrently scheduled with course C117. Graduate students required to present a “one-person” show of no less than 15 minutes, with puppets constructed and developed for the particular show (Fall Quarter, hand puppets; Winter Quarter, rod puppets; Spring Quarter, shadow puppets). Students develop the show concept with the advice of the instructor.

221B. Seminar in the Puppet Theater. (Formerly numbered Theater Arts M217B.) (Same as Folklore M219.) Lecture, three hours. Prerequisite: consent of instructor. Selected studies in the popular puppet forms of the world: techniques, literature, aesthetics.

230A-230B-230C. Advanced Playwriting. (Formerly numbered Theater Arts 230A-230B-230C.) Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Advanced study of the craft of playwriting. An introduction to the techniques of the playhouse and scenic environment, relating historical and contemporary concepts. May be repeated twice for credit.

230P. Seminar in Traditions of African Theater. (Formerly numbered Theater Arts 230P.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean) through an examination of character, structure, performance modes, and archetypes. May be repeated twice for credit.

230Q. Seminar in East Asian Theater. (Formerly numbered Theater Arts 230Q.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in the theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

241. Research in Technical Theater. (Formerly numbered Theater Arts 241.) Prerequisites: graduate standing, consent of instructor. Research in technical problem solving. May be repeated once for credit.

242. Contemporary Playhouse. (Formerly numbered Theater Arts 242.) Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit.

244. Research in Technical Theater. (Formerly numbered Theater Arts 244.) Prerequisites: graduate standing, consent of instructor. Research in technical problem solving. May be repeated once for credit.

245A-245B-245C. History of Style and Ornamentation. Prerequisites: graduate standing, consent of instructor. In-depth study of the history of costume, architecture, interiors, furnishings, and their interrelationships through the Middle Ages to the early 19th century. May be repeated twice for credit.
Prerequisites: graduate standing, consent of instructor. Advanced study and practice in the design of stage productions. Determination of practical problems in the direction of original one-act plays and three-person scenes. Through these efforts students begin to personalize the character's emotional needs and drives.

2020A. Role of Management in Artistic Decision Making in the Theater. (Formerly numbered Theater Arts 2020A) Prerequisite: consent of instructor. A descriptive study of the criteria for decision making in artistic institutions, including the role of the institution in society, the economic environment of the arts, and the organizational systems of the arts. Six hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater. 420A-421B-421C. Advanced Problems in Lighting Design. (Formerly numbered Theater Arts 425A-425B-425C.) Lecture/lab. Advanced study of lighting design related to the design, selection, operation, and execution of theatrical productions. S/U grading.

2020B. Programming and Planning Policies in the Theater. (Formerly numbered Theater Arts 2020B) Prerequisite: consent of instructor. Analysis of the social, artistic, and economic roles of the arts as reflected in programming policies. An examination of the social goals pursued in establishing relationships between the arts and their environment.

2024A. Artistic Control of Theatrical Production by the Professional Producer (2 units). (Formerly numbered Theater Arts C204A.) Prerequisites: graduate standing, consent of instructor. A study of the structure governing the economic and artistic decision-making processes in the professional theater of America and the historical development of the involvement of the producer in the artistic process. Concurrently scheduled with course C190A.

2024B. Organization and Operation of Community Theater (2 units). ( Formerly numbered Theater Arts C204B.) Prerequisites: graduate standing, consent of instructor. A study of the artistic, social, and economic aspects involved in the development of the small and community theater, with research in the history of current practices in operations, administration, and organization. Concurrently scheduled with course C190B.

2029A-2029B. Special Studies in Theater Arts (2 to 4 units each). (Formerly numbered Theater Arts 2029A-2029B.) Lecture/discussion. Prerequisites: graduate standing, consent of instructor. Seminar study of problems in theater arts, organized on a topic basis. May be repeated once for credit.

2035. Teaching Apprentice Practicum (1 to 4 units). (Formerly numbered Theater Arts 2035.) Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship in which the student finds and arranges a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

2041. Production Project for the Puppet Theater (4 units). (Formerly numbered Theater Arts 2041.) Laboratory, 30 hours; consultation, five hours. Prerequisite: consent of instructor. Limited to M.F.A. candidates. The design, construction, and performance of a puppet theater play utilizing as the underlining exercise for candidates for the M.F.A. degree in puppet theater. Students expected to present the full argument for the design style and techniques used in the construction of the puppets, the rationale for the use of a particular project presented, and a final justification and analysis of the completed work.

2042A-2042B-2042C. Advanced Techniques in Acting. (Formerly numbered Theater Arts 2042A, 2042B, 2042C.) Lecture/lab. Six hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater. 2042A. Exercises in sense memory, personalization, and the development of stage presence. Through these exercises students begin to personalize the character's emotional needs and drives. 2042B. Developed work in improvisations and exercises in order to apply these techniques to a role. Beginning with monologues, the work progresses to two-person scenes. Through these efforts students begin to personalize the character's emotional needs and drives. 2042C. Preparation and presentation of two-person scenes utilizing sensory work and "objectives" on a more refined basis. Students are able to find the similarities and differences between themselves and the characters and to play these elements truthfully and spontaneously.

2041A-2041B-2041C. Advanced Projects in Acting (4 or 8 units each). (Formerly numbered Theater Arts 2041A, 2041B, 2041C.) Lecture/lab. Six hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater. 2041A-2041B-2041C. Preparation, presentation, and critique of scenes. Systematic role analysis and exercises in acting. 2041C. Class exercises in acting. Preparation and presentation of roles under performance conditions.

2041A. Advanced Problems in Lighting Design. Lecture/lab.Prerequisites: graduate standing, consent of instructor:

2041A. Study and practice in lighting the actor, emphasizing textural and character analysis from the lighting designer's perspective, conceptual development, the effects of light on stage, the use of color, and the relationship of the lighting designer to the actor.

2041B. Study of the use of light and color to define spatial and dramatic relationships in the stage picture, including but not limited to the lighting of sets designed for television and film. Limited to M.F.A. candidates. A study of the effect of artistic and stylistic ideas on the mode and dress of men and women.

2041D. Advanced study and practice in scenic projection techniques and media techniques, with emphasis on design, and execution of theatrical projection and photographic technique for the stage.

2041E. Study of the design, selection, operation, and performance of lighting instruments, dimming equipment, and control systems as they relate to the design of performance lighting.
442D. Advanced Problems in Costume Design. Prerequisites: graduate standing, consent of instructor. 442D. Costume design and methodology for the large-scale production. Special problems and techniques unique to opera, ballet, and musical comedy costume design. 442E. Intensive study of professional design practice in film and television. 442F. A practical analysis of film and television production and fabric modification for theatrical costume design.

443. Problems in Design (2 or 4 units). (Formerly numbered Theater Arts 443.) Lecture/laboratory, four hours (additional hours as required). Prerequisite: consent of instructor. Study of design techniques for the theater. May be repeated for a maximum of 12 units.

444A-444B-444C. Advanced Problems in Sound Design. Lecture/laboratory. Prerequisites: graduate standing, consent of instructor.

444A. Technology. Study of sound and acoustics as they relate to theater sound design, audio technology, and the design and configuration of equipment and techniques associated with the recording, mixing, and processing of effects and music tracks.

444B. Recording. Advanced study and practice in the preparation and recording of theater sound designs, with emphasis on the analysis of script, conceptual development, and the application of multitrack recording techniques to realize the designs.

444C. Prerequisites: course 444B, graduate standing, consent of instructor. Study and practice in the processing and mixing of live and recorded sound; the mix-down of multitrack recordings; the preparation and editing of sound tracks; sound reinforcement in the theater.

C446. Research and Practice in Scene Painting Techniques (2 units). (Formerly numbered Theater Arts C446.) Lecture/laboratory, three hours. Prerequisites: graduate standing, consent of instructor. The study of scenic painting techniques and materials and their relation to the realization of color design and elevations. Concurrently scheduled with course C146. Each graduate student (1) researches a new painting method or technique (2) solves a specific scenic problem or examines a particular period. The result is a theatrical scene painting project relating to that research.

448. Computer-Aided Design and Drafting for Theater. Lecture, laboratory. Prerequisites: course 149B or consent of instructor, graduate standing. Study of the use of computer-aided design and drafting techniques for the designer.

459A-459B. Directed Individual Studies: Writing (2 to 8 units). (Formerly numbered Theater Arts 459A.) Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of a full-length original play under realistic production conditions. Discussion and critique of work in progress.

459F. Directed Individual Studies: Production (2 to 12 units). (Formerly numbered Theater Arts 596F.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

597. Preparation for Ph.D. Qualifying Examinations in Theater Arts (2 to 8 units). (Formerly numbered Theater Arts 597.) May be repeated for a maximum of 12 units.

598. M.A. Thesis in Theater Arts (2 to 8 units). (Formerly numbered Theater Arts 598.) Prerequisite: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units.

599. Ph.D. Dissertation in Theater Arts (2 to 8 units). (Formerly numbered Theater Arts 599.) Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units.

Associate Professors

Patricia M. Harter, Ph.D. (Theater, Film, and Television), Concentration Advisor

Judy Mitoma, M.A. (Dance), Chair and Concentration Advisor

Joseph F. Nagy, Ph.D. (English, Folklore and Mythology)

Philip L. Newman, Ph.D. (Anthropology), Concentration Advisor

A. Jihad Racy, Ph.D. (Music)

Carol J. Sorgenfrei, Ph.D. (Theater, Film, and Television)
The interdisciplinary major in world arts and cultures is available to students in both the College of Fine Arts and the College of Letters and Science. The course of study is designed to provide students with the conceptual tools and techniques. The program enforces that the arts not as isolated phenomena, but as dynamic aesthetic forms which embody culture, history, and belief systems. The program is unique in that it places an emphasis on cross-cultural study rather than the conventional focus on Western "high art" traditions. Techniques of inquiry and analysis are taken from both fine arts and letters and science frameworks and therefore require investigative research as well as aesthetic sensibility. The program encourages that both approaches be given equal consideration. In addition to these resources, the program utilizes UCLA's opportunities for participation in dance, music, and theater performance classes.

Students are encouraged to consider the Education Abroad Program during their junior year. Individuals interested in careers in elementary and secondary education should consult the program's student affairs officer.

Bachelor of Arts Degree

Admission

New students are admitted to the major only in the Fall Quarter. Procedures and guidelines for the selection of freshmen and transfer students are approximately the same. Application materials are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, and a personal essay. For freshman applicants, college placement test scores are also considered.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. An interview with the program chair is also required. You are advised to take world arts and cultures courses during the quarter in which you apply to the program and must submit grade cards to the student affairs officer for courses completed at the end of that quarter. You must have a minimum 3.0 overall grade-point average and no more than 120 quarter units. Change of major petitions are accepted in October for Spring Quarter and in April for Fall Quarter.

Concentrations

The anthropology concentration stresses both the empirical and theoretical foundations of cultural anthropology. The art history concentration has particularly strong offerings for students interested in Asia, Africa, and the Americas. The dance concentration includes studio opportunities, theory and research techniques, and history courses on both Western and non-Western dance. The folklore and mythology concentration exposes students to a wide range of folklore forms derived from a diversity of cultures. (UCLA offers no undergraduate degree in folklore.)

The music concentration focuses on basic theory and skill in both Western and non-Western music. The theory option requires skill levels equivalent to lower division music majors, while the general music option emphasizes history and literature. The theater concentration explores three fundamental aspects of Western and non-Western theater: (1) history and literature, (2) visual design, and (3) production and performance techniques.

Major in the College of Fine Arts should be aware that the upper division course requirements in the major and in the college do not meet the upper division requirement of 64 units for graduation. Additional upper division units must be taken to reach the 64-unit total.

Foreign Language Requirement

One year of a college-level foreign language or its equivalent is required of both College of Fine Arts and College of Letters and Science students. All courses in any foreign language, except foreign literature in English translation, may be applied toward this requirement.

If you plan to take the music concentration, you are advised to select French, German, or Italian.

General College Requirements

You must satisfy the general college requirements of your college (Fine Arts or Letters and Science). You may select either college regardless of your concentration.

If you wish to confer with the student affairs officer regarding planning and major requirements, contact Silvly Kessler in the program office (206-3696).

The Major

The major includes a core of 28 units (26 for the music concentration) from anthropology, art history, dance, folklore and mythology, music, and theater; a concentration consisting of 36 units (38 for the music concentration) in one of these six disciplines; an eight-unit senior colloquium; and 12 units of upper division elective coursework.

The following courses are required:

1. A core of seven interdepartmental courses (28 units): Anthropology 5, Art History 55A or 55B or 56A or 56B, Dance 70, 80A-80B, Folklore 15 or 101, Music 5A-5B-5C (SC is required for the music concentration; two additional units are added within the concentration), Theater 102E.

2. A concentration of nine courses (36 units) in one of the following areas (you must declare a concentration by the beginning of your junior year):

   Anthropology: Courses 130, 150, 160; group A: course 44 or 133R; group B: any five upper division courses from 110 through 186B, including one area course from 171 through 177.

   Dance: Courses 25B, 134A, 134B, 180A-180B; group A: one course from 181B, 181C, 181D, 183A, 184B; group B: two courses from 181A, 182A, 187A; group C: three two-unit courses from 171B through 176B (including one course each from Western and non-Western cultures; note that courses 71B through 76B are prerequisites for 171B through 176B).

   Folklore and Mythology: Course 172; group A: one course from M111, 118, M180; group B: two courses from CM106, M123B, 124, M181, Classics 161, 168; group C: five courses from Folklore and Mythology 112, M121, M122, M123A, M125, M126, M127, M128, M129, 130, 131, M149, M150, 190, German 134.

Students considering graduate study in ethnomusicology are strongly advised to select the theory option.

**Theory:** Theorizing, Analysis, and Composition of Music.

**Comparative Arts:** Group A: one course from 140A, 140B, 141A, 141B, 142A, 142B; group B: eight units from 21, 217, 118A, 119A, 119B, 130A, 160, C190A, C190B; group C: three courses from 102A, 102B, 103A through 103F, 104D, 104E, 104F, Film and Television 106C, 128.

(3) World Arts and Cultures 190A-190B.

These are the culmination of the major and focus on the ethnic communities of Los Angeles for field research. You select research topics on individual artists, community arts groups, or a genre of the arts.

(4) Three elective courses (12 units) which may be considered from the list below (you may petition to include courses not listed). In order to meet degree requirements, the electives must be related to the major and approved by the concentration adviser. The three courses selected to meet this requirement must be upper division courses from three areas outside the area of concentration.

**Honors Program**

Majors enrolled in the College of Letters and Science who have a cumulative GPA of 3.0 overall and a cumulative GPA in major coursework of 3.5 or better are eligible to participate in the College Honors program. Interested students should consult the student advisor and focus on the ethnic communities of Los Angeles. In Progress grading. (W,Sp)

**Upper Division Courses**

190A-190B. World Arts and Cultures Senior Colloquium. Limited to senior world arts and cultures majors. Comparative and integrative studies in world arts and cultures, with application of concepts and content from the six disciplines of the major. Lecture/ seminar format with the World Arts and Cultures faculty during first quarter; topics include the arts in a societal context, ethnicity and the individual, and problems and approaches to fieldwork. Faculty-directed individual projects during second quarter. Fieldwork on some aspect of the various arts/expressive behaviors found in the ethnic communities of Los Angeles. In Progress grading. (W,Sp)

**Upper Division Electives**

**Anthropology** 118A, 118B, Museum Studies.

135R. Aesthetic Anthropology.

135Q. The Individual in Culture.

137. Enthronology on Film.

185. History of Social Anthropology.

**Art History (Art, Design, and Art History)** 101A. Egyptian Art and Archaeology.

101B. Egyptian Art and Archaeology of the Middle and New Kingdoms.

102A. Minoan Art and Architecture.

102B. Mycenaean Art and Architecture.

102C. Hellenistic Art.

103C. Roman Art.

103D. Etruscan Art.

103E. Late Roman Art.

104A. Western Islamic Art.

104B. Eastern Islamic Art.

104C. Problems in Islamic Art.

114A. Early Art of India.

114B. Art of Japan.

114D. Later Art of India.

114E. Arts of Korea.

114F. Arts of Southeast Asia.

115A. Advanced Indian Art.

115B. Advanced Chinese Art.

115C. Advanced Japanese Art.

115D. Art of Early China, Neolithic to A.D. 906.

117A. Pre-Columbian Art of Mexico.

117B. Pre-Columbian Art of the Maya.

117C. Pre-Columbian Art of the Andes.

118A. Arts of Oceania.

118C. Arts of Sub-Saharan Africa.

118D. Arts of Native North America.

119A. Advanced Studies in African Art; Western Africa.

119B. Advanced Studies in African Art; Central Africa.

16B. Introduction to Comparative Mythology.

Dance. 123A. Anatomy for the Dancer.

123C. Projects in Dance Kinesiology.

126. Advanced Labanotation.

134A. History of Dance in Western Culture, Origins to 1600.

134B. History of Dance in Western Culture, 1600 to the Present.

152. Dance as Culture in Education.

171B. Dance of Indonesia (courses 71B through 76B are prerequisites for 171B through 176B).

171D. Dance of India.

172B. Dance of Ghana.

173B. Dance of Mexico.

174B. Dance of Yugoslavia.

174C. Dance of Spain.

176B. Dance of Israel.

181A. Dance Cultures of Asia.

181B. Dance in Southeast Asia.

181C. Dance in East Asia.

181D. Dance in South Asia.

182A. Dance Cultures of Africa.

183A. Dance in Latin America.

184B. Dance in the Balkans.

187A. Dance Cultures of Native American Indians.

East Asian Languages and Cultures. 135. Buddhist Themes in Asian Literature.

140A-140B. Chinese Literature in Translation.

170A-170B. Archaeology in Early and Modern China.

173. Chinese Buddhism.

183. Introduction to Chinese Thought.

184. Introduction to Japanese Thought.

189. Chinese Brush Painting.

English. 104A. Early Afro-American Literature.

104B. Afro-American Literature since the 1920s.

Film and Television. (Film, Television, and Film and Television)

106C. History of African, Asian, and Latin American Film.

110A. History of Broadcasting.

126. Media and Ethnicity.

Folklore and Mythology. CM106. Anglo-American Folk Song.

108. Afro-American Folklore and Culture.

M111. Literature of Myth and Oral Tradition.

M112. Survey of Medieval Celtic Literature.

M118. Folk Art and Technology.

M121. British Folklore and Mythology.

M122. Celtic Mythology.

M123A. Finnish Folklore and Mythology.

M123B. Finnish Folk Song and Ballad.

124. Finnish Folk Art and Technology.

M125. Folklore and Mythology of the Lapps.

M126. Baltic and Slavic Folklore and Mythology.

M127. Celtic Folklore.

M128. Hungarian Folklore and Mythology.

M129. Folklore and Mythology of the Ugric Peoples.

130. North American Indian Folklore and Mythology.

131. Folklore of India.

M149. Folk Literature of the Hispanic World.

M150. Russian Folk Literature.

M180. Analytical Approaches to Folk Music.

M181. Folk Music of Western Europe.*

190. Selected Topics in Folklore and Mythology.

199. Special Studies in Folklore.

German (Germanic Languages). 134. German Folklore.

130. Music of the U.S.

131A-131B. Music of Hispanic America.

132A-132B. Development of Jazz.

133. Bach.

134. Beethoven.

139. History and Literature of Church Music.

140A-140B-140C. Musical Cultures of the World.

141A. Survey of Music in Japan.

142A-142B. Folk Music of Eastern Europe and the Mediterranean.

143A-143B. Music of Africa.

147A-147B. Music of China.

148. Folk Music of South Asia.

149. Anthropology of Music.

152. Survey of Classical Music in India.

157. Music of Brazil.

158. New Orleans Jazz.

M180. Analytical Approaches to Folk Music.

M181. Folk Music of Western Europe.

Theater (Theater, Film, and Television). 102A, 102B. Selected Topics on the History of the European Theater.

103A. Black People's Theater in America: Slavery to Mid-1800s.

103B. Black People's Theater in America: Minstrel Stage to the Rise of the American Musical.

M103C. Origins and Evolution of Chicano Theater.

In Fall 1987 the School of Engineering and Applied Science launched a five-year expansion and renovation program of its facilities costing nearly $100 million. We take this occasion to ask ourselves what opportunities lie ahead for the school.

The 1985 report of the President’s Commission on Industrial Competitiveness states that America owes much of its prowess and standard of living to the U.S. preeminence in technology. In the years immediately ahead, however, the U.S. will continue to come under increasing pressure to remain competitive in the world market. We at the School of Engineering and Applied Science can make the greatest contributions to the economic well being of our country by (1) fostering the highest quality education and research in engineering and applied science, consistent with national, civil, and social ideals, (2) explicit encouragement of innovation (curricular and research), (3) achieving a balanced distribution of faculty and students among the various ethnic groups, coupled with a major drive to attract greater numbers of America’s bright students, especially graduate students, for engineering, and (4) building and expanding on the “industrial connection.”

Whatever the changes, the school will be ready for the challenges that a new century will hold. To the parent we ask you to entrust the future of your sons and daughters into our capable hands. To the student, we invite you to join this dynamic school in all of its excitement and promise. Be a part of the great success story of UCLA.
Office of Student Affairs:

Graduate: (213) 825-2682
Undergraduate: (213) 825-2826

Bachelloar of Science Degrees

Students in the School of Engineering and Applied Science may elect one of the eight four-year curricula listed below.

1. Bachelor of Science in Aerospace Engineering
2. Bachelor of Science in Chemical Engineering
3. Bachelor of Science in Civil Engineering
4. Bachelor of Science in Computer Science and Engineering
5. Bachelor of Science in Electrical Engineering
6. Bachelor of Science in Engineering with a specialization in bioengineering*
7. Bachelor of Science in Materials Engineering
8. Bachelor of Science in Mechanical Engineering

The school offers instruction in acoustical engineering, aerospace engineering, applied plasma physics and fusion engineering, bioengineering, ceramic engineering, chemical engineering, civil engineering, computer engineering, control systems engineering, earthquake engineering, electrical and electronics engineering, general engineering, environmental engineering, fluid mechanics, geotechnical engineering, information and communications theory, manufacturing engineering, materials science, mechanical engineering, metallurgy, nuclear engineering, soil mechanics, solid mechanics, structural engineering, systems science, and water resources.

Admission

Applicants for admission to the school must satisfy the general admission requirements of the University as outlined in the section entitled "Undergraduate Admission" in Chapter 2. You must select a specific major within the school when applying for admission. In the selection process many elements are considered, including grades, test scores, and academic preparation.

Applicants are encouraged to apply either at the freshman or junior level. Students who begin their college work at a California community college are expected to remain at the community college to complete the lower division requirements in chemistry, mathematics, physics, and the recommended engineering courses before transferring to the University. Experience indicates that transfer students who have completed the recommended lower division program in engineering at California community colleges are able to complete the remaining requirements for one of the B.S. degrees in six quarters (two academic years) of normal full-time study. Some students who select certain majors, such as computer science and engineering or chemical engineering, may be required to complete additional lower division courses as prerequisites for the major sequence.

Admission as a Freshman

While many students take their first two years in engineering at a community college, an applicant may qualify for admission to the school in freshman standing. It is anticipated that admission will require that the following subjects be taken when satisfying the University admission requirements:

- Algebra ............................................. 2 years
- Plane geometry ................................... 1 year
- Trigonometry ....................................... ½ year
- Chemistry and physics with laboratory ........ 2 years

It is also highly recommended that you take a course in technical drafting while in high school.

Freshman applicants whose entire secondary schooling was outside the U.S. must pass, with satisfactory scores, the College Board Scholastic Aptitude Test (verbal and mathematics sections) and Achievement Examinations in English composition, physics, and mathematics before a letter of admission to engineering can be issued. Arrangements to take the tests in another country should be made directly with the College Board, 1947 Center Street, Berkeley, CA 94704. Test scores should be forwarded to UCLA.

Admission as a Junior

Applicants for admission to the school in junior standing should have completed 21 to 23 courses (84 to 92 quarter units) in good standing, including the following minimum subject requirements:

1. Two and one-fourth courses in chemistry, equivalent to UCLA's Chemistry 11A, 11B, 11BL (chemistry is not a requirement for the computer science and engineering degree; the chemical engineering curriculum also requires Chemistry 11C/11CL, 21, 23, 25), but these courses are not the minimum requirements for admission; (2) six courses in mathematics, equivalent to UCLA's Mathematics 31A, 31B, 32A, 32B, 33A, 33B; (3) four courses in physics, equivalent to UCLA's Physics 8A, 8B, 8C, 8D, and physics laboratory courses (8AL, 8BL, 8CL, 8DL), depending on curriculum selected.

Students transferring to the school from institutions which offer instruction in engineering subjects in the first two years, particularly California community colleges, are given credit for certain engineering core requirements.

*Bioengineering is an interdepartmental program listed under "Schoolwide Programs, Courses, and Faculty" at the end of the departmental listings.
Students who have been admitted to senior standing in the school on the basis of credit from another institution, from University Extension, or from another college or school of the University must complete, after admission, eight upper division courses which satisfy part of their approved major field sequence.

**Degree Requirements**

The requirements for the Bachelor of Science degrees in Aerospace Engineering, Chemical Engineering, Civil Engineering, Computer Science and Engineering, Electrical Engineering, Engineering, Materials Engineering, and Mechanical Engineering consist of completing the minimum number of required units (from 185 to 201 units, depending on the curriculum selected), the general University requirements, and the school requirements for scholarship and senior residence. You must also satisfy the curricular requirements for the curriculum you choose to follow.

**University Requirements**

University requirements in scholarship, Subject A or English as a Second Language (ESL), and American History and Institutions are discussed in detail in the “Undergraduate Degree Requirements” section in Chapter 2.

**Scholarship and Minimum Progress Requirements**

At least a 2.0 grade-point average must be achieved in all upper division University courses offered in satisfaction of the subject and elective requirements of the curriculum. In addition, a 2.0 minimum grade-point average in upper division mathematics, upper division core courses, and the major field is required for graduation.

Full-time undergraduate students in the School of Engineering and Applied Science must complete a minimum of 36 units in three consecutive terms in which they are registered.

**Senior Residence Requirement**

Of the last 48 units completed for the bachelor's degree, 36 must be earned in residence in the School of Engineering and Applied Science on this campus. No more than 16 of the 36 units may be completed in Summer Sessions at UCLA.

**Study Lists and Credit Limitations**

Study Lists require approval of the dean of the school or a designated representative. It is your responsibility to present Study Lists which reflect satisfactory progress toward the Bachelor of Science degree, according to standards set by the faculty; advisers in the Office of Student Affairs are available to help you. Study Lists or programs of study which do not comply with these standards may result in enforced withdrawal from the University or other academic action. You are expected to enroll in at least 12 units each quarter. If you enroll in less than 12 units, you must obtain approval by petition to the dean prior to enrollment in courses. The normal program is 16 units per quarter. You may not enroll in more than 18 units per quarter unless an Excess Unit Petition is approved in advance by the dean.

You must attain a minimum grade of C to satisfy the English 3 requirement, which must be met before you have completed 90 quarter units (a grade of C- does not satisfy this requirement). The electrical engineering curriculum requires you to complete English 3 within your first 45 units.

After 213 quarter units, enrollment may not normally be continued in the school. You may petition the dean for special permission to continue work required to complete the degree. This regulation does not apply to Departmental Scholars.

After you have completed 105 quarter units (regardless of where these units have been completed), you will not receive unit credit or subject credit for courses completed at a community college.

Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor’s degree.

No credit may be applied toward the bachelor’s degree for Chemistry 2 or its equivalent after one year of high school chemistry has been completed with a grade of C or better.

No credit is granted toward the bachelor's degree for college foreign language courses equivalent to quarter levels one and two if the equivalent of level two of the same language was completed with satisfactory grades in high school.

---

---

*Laboratory, depending on curriculum selected.
**Chemistry is a requirement for the computer science and engineering degree.
***Chemical engineering curriculum also requires Chemistry 11C/11CL, 21, 23, 25.
†Computer Science 11 is a requirement only for the computer science and engineering degree.
††Civil Engineering 15A, 15B are requirements only for the civil engineering degree.
‡‡See specific undergraduate curriculum for core courses, humanities-social sciences-fine arts electives, and free electives, depending on curriculum followed.
#Depending on curriculum followed.
**Credit for Transfer Students**

A course in digital computer programming, using a higher-level language such as FORTRAN IV, PASCAL, or PL/I, satisfies the Computer Science 10 requirement. Many sophomore courses in circuit analysis, strength of materials, and properties of materials may satisfy Electrical Engineering 100, Civil Engineering 108, and Materials Science and Engineering 14 requirements respectively. Check with the Office of Student Affairs.

**Curricular Requirements**

The curricula for the bachelor's degrees include the following categories, depending on curriculum selected:

(1) Twelve to 16 courses (48 to 64 units) of upper division engineering major/major field courses, depending on curriculum followed.

(2) Engineering core courses, ranging from five to eight courses (20 to 32 units) depending on curriculum followed.

(3) One mathematics course (four upper division units); computer science and engineering requires three courses — 12 upper division units); see curricula in individual departments for approved courses to fulfill this requirement.

(4) Six or seven humanities, social sciences, and/or fine arts courses (24 to 28 units) to be selected from an approved list. At least three (12 units) must be upper division courses.

To provide some depth, at least three courses (12 units) must be in the same academic department or must otherwise reflect coherence in subject matter. This group must contain at least two upper division courses.

In most cases, courses intended primarily to develop specific skills should be avoided except when the particular "skill" course is prerequisite to another upper division course strictly in the humanities or social sciences (e.g., foreign language and literature courses taught in the language). A list of courses which are normally acceptable individually as humanities-social sciences-fine arts electives is available in the Office of Student Affairs. (See the electrical engineering curriculum for the history and literature requirement which must be completed within the first 90 units.)

(5) One course in engineering and science in society (four units). One of the humanities-social sciences-fine arts courses or one of the free electives must deal primarily with engineering and science in society (to be selected from an approved list).

(6) English 3, which must be completed with a minimum grade of C within your first 90 units.

(7) One life sciences course (four units) to be selected from an approved list (required in some curricula — see curriculum requirements).

(8) Three free elective courses (12 units) may be selected in some programs (see curriculum requirements in individual departments). The free electives may be selected from any courses yielding credit acceptable to the University of California except CLEP, certain remedial courses, and special courses designated by the school and posted in the Office of Student Affairs. However, in programs which include free elective units, it is strongly recommended that you select additional technical courses for some of these units.

(9) The engineering design content of your program must total at least one half-year of design experience.

(10) The engineering science content of your program must include a minimum of one year of engineering science units.

Lists of courses approved to satisfy specific curricular requirements, as well as specifying design and engineering science credit in engineering courses, are available in the Office of Student Affairs.

The aerospace engineering, chemical engineering, civil engineering, computer science and engineering, electrical engineering, engineering, materials engineering, and mechanical engineering curricula are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), the nationally recognized accrediting body for engineering programs.

**Advising and Program Planning**

As a new undergraduate, you must have your course of study approved by an engineering adviser. After the first quarter, curricular and career advising is accomplished on a formal basis. You are assigned a faculty adviser in your particular specialization in your sophomore year or earlier.

You may use the curriculum in effect when you begin full-time continuous study in engineering at UCLA, or you may select the curriculum in the *UCLA General Catalog* in effect at graduation. California community college transfers may also select the curriculum in the catalog in effect at the time they began their community college work in an engineering program, providing attendance has been continuous since that time.

Attend the Conference on Planning Electives conducted by the School of Engineering and Applied Science to help you plan your curriculum. The conference is held during the fourth week of each quarter. For time and place, consult the Office of Student Affairs.

The Elective Selection form approved by the faculty adviser must be submitted for approval by the Associate Dean, Student Affairs, Office of Student Affairs, during the third quarter of the sophomore year. The deadline is announced each term in the school's *Undergraduate Enrollment Instructions* brochure.

Members of the Office of Student Affairs staff are available to assist you with University procedures and to answer any questions you may have in regard to general requirements. Pay them a visit.

**Passed/Not Passed Grading**

You may take one course per quarter on a Passed/Not Passed basis if you are in good academic standing and are enrolled in at least three and one-half courses (14 units) for the quarter. Only humanities-social sciences-fine arts and free electives may be taken on a Passed/Not Passed basis. For more details on P/NP grading, see "Units and Grading Policy" in Chapter 4.

**Honors**

**Departmental Scholars**

If you are an exceptionally promising junior or senior, you may be nominated as a Departmental Scholar to pursue bachelor's and master's degree programs simultaneously. See "Academic Excellence" in Chapter 2 and the Announcement of the UCLA School of Engineering and Applied Science for details.

**Dean's Honors List**

Students following the engineering curriculum are eligible to be named to the Dean's Honors List each term. Minimum requirements are a course load of 16 units (12 units of letter grade) with a grade-point average equal to or greater than 3.7.

**Honors with the Bachelor's Degree**

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. Students eligible for University honors at graduation must have completed 90 or more units (for a letter grade) at the University of California and must have attained a grade-point average which places them in the top five percent of the school (GPA of 3.802 or better) for *Summa cum laude*, the next five percent (GPA of 3.685 or better) for *Magna cum laude*, and the next 10 percent (GPA of 3.514 or better) for *Cum laude*.

In addition to fulfilling the minimum criteria for honors established by the University, you must fulfill the School of Engineering and Applied Science criteria, which is based on an upper division grade-point average, to be awarded honors at graduation. For all designations of honors, you must have a minimum 3.25 grade-point average in your major field elective courses. To be eligible for an award, you should have completed at least 80 upper division units at the University of California.
Students entering the Engineer/Ph.D. program normally are expected to have completed the requirements for the master’s degree with at least a 3.25 grade-point average and to have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having an M.S. degree.

Graduate students without adequate preparation may be admitted provisionally and may be required to take certain remedial coursework which may not be applied toward the degree. After you arrive at UCLA, the adviser will help you plan a program which will remedy any such deficiencies.

For information on the proficiency in English requirements for international graduate students, refer to “Graduate Admission” in Chapter 3.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the department in which you are interested, School of Engineering and Applied Science, UCLA, Los Angeles, CA 90024-1600.

Course Requirements
A total of nine courses is required for the M.S. degrees, including a minimum of five graduate courses. No specific courses are required, but the majority of the total formal course requirement and a majority of the graduate course requirement must consist of courses in the School of Engineering. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 599 courses involving work on the thesis. In the comprehensive examination plan, at least five of the nine courses must be in the 200 series; the remaining four courses may be either 200-series graduate or upper division undergraduate courses. No 500-series courses may be applied toward the comprehensive examination plan requirements.

Thesis Plan
The thesis must either describe some original piece of research that you have done, usually but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic lying in your major field of study. You would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Comprehensive Examination Plan
The comprehensive examination, which is offered every quarter, is required in written form only. Your comprehensive examining committee may conduct an oral query after review of the written examination. In case of failure, you may be reexamined once with the consent of your departmental graduate adviser.

Cooperative Degree Programs
The School of Engineering and Applied Science has established two joint degree programs with other schools and departments on campus which allow you to earn two master's degrees simultaneously: the M.B.A./M.S.-Computer Science and the M.A.-Latin American Studies/M.S.-Engineering. Contact the Office of Student Affairs for details.

Master of Science Degrees

Major Fields or Subdisciplines
The M.S. program is centered around one major field. The major fields and subdisciplines offered at the M.S. level in most cases parallel those listed below for the Ph.D. program. There are some differences (e.g., environmental engineering in the Department of Civil Engineering and manufacturing engineering in the Department of Mechanical, Aerospace, and Nuclear Engineering are offered only at the M.S. level). Contact the department concerned regarding possible differences between the M.S. and Ph.D. fields and subdisciplines. You are free to propose to the school any other field of study, with the support of your adviser.

Graduate Study

Admission
In addition to meeting the requirements of the Graduate Division, applicants to the graduate engineering programs are required to take the General Test and Subject Test of the Graduate Record Examination (GRE) in Engineering, Mathematics, or a related area. Applicants for the graduate computer science programs are required to take the GRE General Test and Subject Test in Mathematics or Computer Science.

Special Programs and Activities

Extracurricular Activities
The faculty strongly encourages students to participate in the many extracurricular activities available on campus, especially those of most relevance to engineering. Among these are the student engineering society (the Engineering Society, University of California), student publications, and programs of the many technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school’s Executive Committee.

Women in Engineering
Women make up 19 percent of the undergraduate and 10 percent of the graduate enrollment in the School of Engineering and Applied Science. Today’s opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a “males only” field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE) has established a UCLA student chapter which sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers.

Continuing Education
Continuing Education in Engineering is under the academic leadership of the School of Engineering and Applied Science and is managed by UCLA Extension. The department offers evening classes, short courses, special programs, and in-plant training in education. The Extension Office (629 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. For information, call 825-4100 (evening classes) or 825-3344 (short courses).

The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs “to foster a spirit of liberal culture in engineering colleges.”

Extra-curricular Activities
The faculty strongly encourages students to participate in the many extracurricular activities available on campus, especially those of most relevance to engineering. Among these are the student engineering society (the Engineering Society, University of California), student publications, and programs of the many technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school’s Executive Committee.

Women in Engineering
Women make up 19 percent of the undergraduate and 10 percent of the graduate enrollment in the School of Engineering and Applied Science. Today’s opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a “males only” field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE) has established a UCLA student chapter which sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers.

Continuing Education
Continuing Education in Engineering is under the academic leadership of the School of Engineering and Applied Science and is managed by UCLA Extension. The department offers evening classes, short courses, special programs, and in-plant training in education. The Extension Office (629 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. For information, call 825-4100 (evening classes) or 825-3344 (short courses).

The Master of Engineering (M.Engr.) degree is granted to graduates of the Engineering Executive Program, a two-year work-study program consisting of graduate-level professional courses in the management of technological enterprises. For full details, write to the Office of Student Affairs, School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Los Angeles, CA 90024-1600 (825-1704).
Engineer Degree

The School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably in the sense that a student in the Ph.D. program may exit with an Engineer degree or even pick up the Engineer degree on the way to the Ph.D. degree; similarly, a student in the Engineer degree program may continue for the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs may also be applied toward the minimum residence requirement and time limitation for the other program.

Ph.D. Degrees

Major Fields or Subdisciplines*

Chemical Engineering Department: Chemical engineering.

Civil Engineering Department: Earthquake engineering, soil mechanics, structures, water resource systems engineering.

Computer Science Department: Artificial intelligence, computer network modeling and analysis, computer science theory, computer system architecture, programming languages and systems (software systems), scientific computing (dynamic systems modeling and optimization, physical systems).

Electrical Engineering Department: Applied plasma physics and fusion engineering, circuits and signal processing, communications and telecommunications engineering, control systems, electromagnetics, integrated circuits and systems, operations research, quantum electronics, solid-state electronics.

Materials Science and Engineering Department: Ceramics and ceramic processing, mechanical metallurgy and deformation processing, physical metallurgy and metal processing, science of materials.

Mechanical, Aerospace, and Nuclear Engineering Department: Applied dynamic systems control, applied plasma physics and fusion engineering, dynamics, fluid mechanics, heat and mass transfer, nuclear science and engineering, and structural and solid mechanics.

Schoolwide Fields: Applied mathematics (established minor field only), biocybernetics, man-machine-environment systems.

Schoolwide Programs: Biocybernetics, man-machine-environment systems.

Course Requirements

All candidates must fulfill the minimum requirements of the Graduate Division (see "Requirements for Graduate Degrees" in Chapter 3). For further information, contact the individual departments.

Qualifying Examinations

All candidates must fulfill the minimum requirements of the Graduate Division (see "Requirements for Graduate Degrees" in Chapter 3). For further information, contact the individual departments.

Final Oral Examination

All candidates must fulfill the minimum requirements of the Graduate Division (see "Requirements for Graduate Degrees" in Chapter 3). For further information, contact the individual departments.

Graduate Certificate of Specialization

A certificate of specialization is available in all areas, except computer science, offered by the School of Engineering and Applied Science. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100- or 200-series courses, at least two of which must be at the graduate level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three quarters of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed for a Certificate of Specialization in Engineering and Applied Science may subsequently be applied toward master's and/or doctoral degrees.

Chemical Engineering

Professors

Traugott H.K. Frederking, Ph.D.
Sheldon K. Friedlander, Ph.D. (Ralph M. Parsons Professor of Chemical Engineering)
Eldon L. Knuth, Ph.D.
Ken Nobe, Ph.D.
Lawrence B. Robinson, Ph.D., Associate Dean
Vincent L. Vitker, Ph.D.
A.R. Frank Wazzan, Ph.D., Dean
William D. Van Voret, Ph.D., Emeritus

Associate Professors

David T. Allen, Ph.D.
Yoram Cohen, Ph.D.
Owen I. Smith, Ph.D.

Assistant Professors

Robert F. Hicks, Ph.D.
Vasilios Manousiouthakis, Ph.D.
Harold G. Monbouquette, Ph.D.

Lecturer

Dwight A. Landis, M.S.

Adjunct Professor

Manuel M. Baizer, Ph.D.

Scope and Objectives

The Department of Chemical Engineering conducts active undergraduate and graduate programs of teaching and research in the areas of thermodynamics, mass transfer, complex mixture engineering and catalysis, electrochemistry and corrosion, combustion science, spectroscopy of complex systems, cryogenics and low-temperature processes, biochemical and biomedical engineering, computer-aided design, particle technology, pollution control, and polymer engineering. Students are trained in the fundamental principles of these fields while learning a sensitivity to society's needs — a crucial combination in addressing the question of how industry can grow and innovate in an era of economic, environmental, and energy constraints. Faculty members in the department are active in the Biotechnology Research and Education Program sponsored by the National Science Foundation and the State of California, the National Center for Intermedia Transport Research sponsored at UCLA by the Environmental Protection Agency, and the Engineering Research Center for the Control of Hazardous Substances established at UCLA by the National Science Foundation.

*You may propose to the school any other field of study with the support of your adviser. Instructions on the definition of acceptable ad hoc fields and procedures for their approval are available in each department office.
The undergraduate curriculum leads to a B.S. in Chemical Engineering, is accredited by ABET and AIChE, and includes a bioengineering option for students who wish to pursue careers in biotechnology or medicine. The department also offers graduate courses and research leading to M.S. and Ph.D. degrees. Both graduate and undergraduate programs closely relate teaching and research to important industrial problems.

Bachelor of Science in Chemical Engineering

The goal of the ABET-accredited chemical engineering curriculum is to provide a high quality, professionally oriented education in modern chemical engineering. The bioengineering option exists as a subset of courses within the accredited curriculum. Balance is sought between design and science.

The Major

Course requirements are as follows (189 minimum units required): (1) Four general engineering courses: Chemical Engineering M105A, Civil Engineering 108, Electrical Engineering 100, 103.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 106, 107, 108A (satisfies the chemical engineering economics requirement), 108B; 104A, 104B (satisfies the laboratory requirement); M192A; Chemistry 113A, 114.

(3) Two elective courses from Chemical Engineering 110, 111, 112, 113, 114, C115, C116 (other courses in engineering, mathematics, and the sciences may be selected in consultation with your adviser), and one upper division chemistry elective course (except Chemistry 110A selected in consultation with your adviser. If you specialize in the bioengineering option, substitutions are made, in consultation with your adviser, for some of the electives.

(4) English 3: Chemistry 11A, 11B/118L, 11C/11CL, 21, 23, 25 (satisfies the life sciences requirement); Computer Science 10C or 10F: Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL.

(5) Six courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science requirement).

Graduate Study

For information on graduate admission to the chemical engineering program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

Upper Division Courses

100. Introduction to Chemical Engineering. (Formerly numbered 137.) Prerequisites: Mathematics 32B (may be taken concurrently). Chemistry 11C/11CL, Physics 8B. Introduction to the analysis and design of industrial chemical processes. Material and energy balances. (F)

101A. Momentum Transfer. Prerequisites: course M105A, Mathematics 33A, 33B. Introduction to the analysis of fluid flow in systems of interest to chemical engineering practice. Fundamentals of momentum transport, Newton’s law of viscosity, Navier-Stokes equations, interphase momentum transport and friction factors, flows in conduits and around submerged objects. (W)

101B. Heat Transfer. Lecture, four hours; discussion, one hour. Prerequisite: course 101A. Introduction to the analysis of heat transfer in systems of interest to chemical engineering practice. Fundamentals of thermal conduction, forced and free convection, radiation, interphase heat transfer, heat exchanger analysis. (W)

101C. Mass Transfer. Lecture, four hours; discussion, one hour. Prerequisites: courses 100, 101B, 102. Application of the principles of heat, mass, and momentum transport to the design and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis. (Sp)

102. Chemical Engineering Thermodynamics. (Formerly numbered 137A.) Prerequisites: courses 100, M105A. Thermodynamic properties of pure substances and solutions. Phase equilibrium. Chemical reaction equilibrium. (W)

103. Separation Processes. (Formerly numbered 137C.) Prerequisites: courses 100, 101B, 102. Application of the principles of heat, mass, and momentum transport to the design and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis. (Sp)

104A. Chemical Engineering Laboratory I. (Formerly numbered 138A.) Laboratory, eight hours. Prerequisites: courses 101A, 101F. Basic introductory laboratory experiments applying applications of the principles of thermodynamics, chemical kinetics, and transport phenomena to practical systems. Experiments include examples of heat transfer, fluid flow, chemical thermodynamics, and homogeneous chemical kinetics. (W)

104B. Chemical Engineering Laboratory II. (Formerly numbered 139B.) Laboratory, eight hours. Prerequisites: courses 101A, 101F. Consists of four experiments, each of two or more weeks duration. After each experiment, students prepare a detailed report that includes sections on background material, theory, experimental procedures, experimental results, scale-up and design considerations, and error analysis. (F)

105A. Introduction to Engineering Thermodynamics. (Same as Mechanical, Aerospace, and Nuclear Engineering M105A.) Lecture, four hours; recitation, one hour. Prerequisites: Physics 8B, Mathematics 32B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in the analysis and design of closed and open systems. (F, W, Sp)

106. Chemical Reaction Engineering. (Formerly numbered 137D.) Prerequisites: courses 100, 101C, 102. Fundamentals of chemical kinetics and catalysis. Introduction to the analysis and design of homogeneous and heterogeneous chemical reactors. (F)

108A. Process Economics and Analysis. (Formerly numbered 137E.) Prerequisites: courses 103, 104B, 106. Integration of chemical engineering fundamentals such as transport phenomena, thermodynamics, separation operations, and reaction engineering and simple economic principles for the purpose of designing chemical processes and evaluating alternatives. (W)

108B. Chemical Process Computer-Aided Design and Analysis. (Formerly numbered 137F.) Prerequisites: courses 103, 106, 108A. Computer Science 10F. An introduction to the application of some of the mathematical and computing methods to chemical engineering design problems; the use of simulation programs as an automated method of performing steady state material and energy balance calculations. (Sp)

110. Introduction to Statistical Thermodynamics. (Formerly numbered 130A.) Prerequisite: course M105A. Calculations of expected values and variances of thermodynamic functions for perfect monatomic gas, Einstein monatomic crystal, photon gas, electron gas in a metal, perfect absorbed gas, perfect diatomic gas, and Debye monatomic crystal. Calculations of gross emission rates from surfaces. Mr. Knuth (F)

111. Introduction to Cryogenics and Low-Temperature Processing. (Formerly numbered 138A.) Prerequisite: course 101A. Liquefaction of gases, cooling to cryotemperatures, LNG processes, liquid hydrogen, and liquid He cryosystems for superfluids and applied superconductivity. Mr. Frederking (W)

113. Pollution Control Technology. (Formerly numbered 138C.) Prerequisites: courses 103, 106. Integration of chemical engineering fundamentals such as transport phenomena and chemical kinetics with environmental pollution concerns for the purpose of designing control devices and of analyzing the fate of pollutants in the environment. Mr. Cohen, Mr. Friedlander, Mr. Viler (W)

114. Electrochemical Processes and Corrosion. (Formerly numbered 138E.) Prerequisites: courses M105A, and 102 or Materials Science and Engineering 141. The fundamentals of electrochemistry pertinent to industrial processes and metallic corrosion. Primary emphasis on the fundamental approach in the consideration of complex electrochemical and corrosion processes. Specific topics include pitting, crevice corrosion, stress corrosion, hydrogen embrittlement, contamination control, electrochemical metal finishing, batteries and fuel cells, electroosmosis and biocorrosion processes. Mr. Nobe (Sp)

C115. Biochemical Engineering. Prerequisites: courses 101C, 103, 106. Use of previously learned concepts of thermodynamics, transport phenomena, reaction engineering, process dynamics, control, and economics to develop the tools needed for technical design and economic analysis in the biotechnology industries. May be concurrently scheduled with course 2125. Mr. Monbouquette, Mr. Viler
C116. Surface and Interface Engineering. Prerequisites: courses 101C, 102, 106. Description of the thermodynamics and kinetics of surface phenomena, nucleation, growth, and coalescence of films; adsorption, desorption, diffusion, and reaction of gases on surfaces. Application of these concepts to electronic materials processing and catalyst design. May be concurrently scheduled with course C115. Mr. Monbouquette, Mr. Vilkov

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor. Individual investigation of a selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. (F,W,Sp)

Graduate Courses

200. Advanced Engineering Thermodynamics. (Formerly numbered 230A.) Prerequisite: course 102 or equivalent. Phenomenological and statistical thermodynamics of gases and liquids with engineering applications. Presentation of the role of atomic and molecular spectra and intermolecular forces in the interpretation of thermodynamic properties of gases, liquids, solids, and plasmas. (F)

201. Nonequilibrium Thermodynamics. (Formerly numbered 230B.) Prerequisite: course 200. Interpretation of nonequilibrium phenomena in terms of the fourth law of thermodynamics, namely (1) linear interdependence of fluxes and driving forces and (2) Onsager reciprocal relations. Boltzmann transport equation; diffusion; electrical and heat currents; numerical calculation of parameters. Mr. Robinson (Sp)

210. Advanced Chemical Reaction Engineering. (Formerly numbered 230A.) Prerequisite: courses 101C, 106, or equivalent. Principles of chemical reactor analysis and design. Particular emphasis on simultaneous effects of chemical reaction and mass transfer on noncatalytic and catalytic reactions in fixed and fluidized beds. (W)

211. Cryogenics. (Formerly numbered 230C.) Prerequisite: course 102. The study of basic phenomena in low-temperature systems, including the third law, various cooling methods, and superfuid systems: Meissner state, type I and type II systems; applied superconductivity cryogenics. Mr. Frederking

215. Biochemical Engineering. (Formerly numbered 238D.) Prerequisites: courses 101C, 103, 106. Use of previously learned concepts of thermodynamics, transport phenomena, reaction engineering, process dynamics, control, and economics to develop the tools needed for technical design and economic analysis in the biological sciences. May be concurrently scheduled with course C115. Mr. Monbouquette, Mr. Vilkov

C216. Surface and Interface Engineering. Prerequisites: courses 101C, 102, 106. Description of the thermodynamics and kinetics of surface phenomena, nucleation, growth, and coalescence of films; adsorption, desorption, diffusion, and reaction of gases on surfaces. Application of these concepts to electronic materials processing and catalyst design. May be concurrently scheduled with course C115. Mr. Monbouquette, Mr. Vilkov

217. Electrochemical Engineering. (Formerly numbered 238E.) Prerequisite: course 114. Transport phenomena in electrochemical systems; relationship between molecular transport, convective mass transfer, electrode kinetics, along with applications to industrial electrochemistry, fuel cell design, and modern battery technology. Mr. Nobe (F)

219. Turbulent Flow and Mass Transfer. (Formerly numbered 238.) Prerequisite: course 101C or equivalent. Advanced treatment of mass transfer, with applications to industrial separation processes, gas cleaning, pulmonary bioengineering, controlled release systems, and reactor design; molecular and constitutive theories of diffusion, interfacial transport, membrane transport, convective mass transfer, concentration boundary layers, turbulent transport. (F)

230. Reaction Kinetics. (Formerly numbered 237A.) Prerequisites: courses 106, 200, or equivalent. Macroscopic descriptions: reaction rates, activation rates, responsiveness, the relationship between molecular transport, convective mass transfer, interfacial transport, membrane transport, convective mass transfer, concentration boundary layers, turbulent transport. Mr. Kruth, Mr. Smith

231. Molecular Dynamics. (Formerly numbered 237B.) Prerequisite: course 106 or 110. Analysis and design of molecular-beam systems. Molecular-beam sampling of reactive mixtures in combustion chambers or gas jets. Molecular-beam studies of gas-surface interactions, including energy accommodations and heterogeneous reactions. Applications to air pollution control and to catalysis. Mr. Knuth (W)

232. Combustion Processes. (Formerly numbered 237E.) Prerequisite: course 106, 200, or Mechanical, Aerospace, and Nuclear Engineering 132A. Fundamentals: change equations for multicomponent reactive mixtures, rate laws. Applications: combustion, including burning of (1) premixed gases or (2) condensed fuels. Detonation. Sound absorption and suspension. Mr. Knuth, Mr. Smith (Sp)

240. Fundamentals of Aerosol Technology. Prerequisite: course 101C. Technology of particle-gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Mr. Friedlander (W)

250. Computer-Aided Chemical Process Design. Prerequisite: course 108B. The application of optimization methods in chemical process design; computer aids in process engineering; process modeling; systematic flowchart invention; process synthesis; optimal design and operation of large-scale chemical processing systems. Mr. Manousouthishakis (F)

290A-298Z. Research Seminars (2 to 4 units each). (Formerly numbered 293EA-293EZ.) Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Lectures, discussions, student presentations, and projects in areas of current interest. May be repeated for credit. S/U grading. (F,W,Sp)

299. Departmental Seminar (2 to 8 units). Prerequisites: graduate standing in chemical engineering. Seminar by leading academic and industrial chemical engineers on the development or application of recent technological advances in the discipline. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

Chemistry/Matials Science
(Interdepartmental)

For details on this undergraduate program, see Chapter 5 on the College of Letters and Science.
Civil Engineering

4531 Boelter Hall, (213) 825-1346

Professors
Stanley B. Dong, Ph.D.
John A. Dracup, Ph.D.
Michael E. Fourney, Ph.D.
Gary C. Hart, Ph.D.
Poul V. Lade, Ph.D.
Chung Yen Liu, Ph.D.
Rokuo Muki, Ph.D.
Richard B. Nelph, Sc.D.
Richard L. Perrine, Ph.D.
Moshe F. Rubinstein, Ph.D.
Lucien A. Schmit, Jr., M.S.
Lawrence G. Selna, Ph.D.
Michael K. Stenstrom, Ph.D.
William W-G. Yeh, Ph.D., Emeritus

Associate Professors
Lewis P. Felton, Ph.D.
Sanford B. Roberts, Ph.D.

Assistant Professors
Guy Y. Felio, Ph.D.
Johannes B. Neethling, Ph.D.
Miaden Vuetic, Ph.D.

Senior Lecturer
George J. Tauxe, M.S., Emeritus

Adjunct Professors
Robert E. Englekirk, Ph.D.
Y. Marvin Ilo, Ph.D.
George E. Warren, Ph.D.

Scope and Objectives

The civil engineering programs at UCLA include structural engineering and design, geotechnical engineering, earthquake engineering, water resource systems engineering, environmental engineering, and decision making and engineering management.

The ABET-accredited civil engineering curriculum leads to a B.S. in Civil Engineering, a broad-based education in structural engineering, soil mechanics, and water resource systems. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study.

At the graduate level, M.S. and Ph.D. degree programs are offered in a number of areas, including structures, structural mechanics, earthquake engineering, mechanics of solids, soil mechanics, environmental engineering, and water resource systems engineering. In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to critical problems in earthquake engineering and in the development of new technologies for water treatment and pollution control.

Bachelor of Science in Civil Engineering

The objective of the civil engineering curriculum is to give graduating seniors an academically sound and practical background in civil engineering. A balanced program, including engineering science, design, and laboratory courses in civil engineering, is stressed. The ongoing goal of the program is to produce well-qualified graduates for the civil engineering profession or for graduate civil engineering schools in the U.S.

There are two distinct options, one for the study of basic civil engineering and one for biomechanics. The basic civil engineering curriculum follows.

The Major

Course requirements are as follows (191 minimum units required):

1. Seven core courses: Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A, Civil Engineering 108, Electrical Engineering 100, 103, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103.

2. Civil Engineering 106A, 120, 121, 130, 135A, 135B, 151, one course from 141, 142, one course from 155, 163, 164; one mathematics course from Mechanical, Aerospace, and Nuclear Engineering 191A, 192A (or Chemical Engineering M192A), 192B, 192C, 193A, 193B.

3. Twenty-four elective units, to be selected from the courses listed below, which must include at least 11 design units and eight units of laboratory:

Civil Engineering Mechanics: Civil Engineering 130, 130F, 130L, 139, Mechanical, Aerospace, and Nuclear Engineering 168.

Geotechnical Engineering: Civil Engineering 121, 128L, Earth and Space Sciences 100, 1139.

Structures: Civil Engineering 135B, 135C, 135L, M137, 137L, 141, 142, 142L, 142X, 143.

Systems Analysis: Civil Engineering M140, 175.

Water Resources and Environmental Engineering: Civil Engineering 150, 156, 157, M161, 163, 164.

4. English 3; Chemistry 11A, 11B/118L; Civil Engineering 15A, 15B; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C, 8D; one life sciences elective course.

5. Six courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter).

6. One humanities, social sciences, and/or fine arts course to satisfy the engineering and science in society requirement.

7. Three free elective courses.

Graduate Study

For information on graduate admission to the civil engineering program and requirements for the M.S. and Ph.D. degrees, see “Graduate Study” at the beginning of this chapter.

Lower Division Courses

15A. Introduction to Computing in Civil Engineering (2 units). Lecture, two hours; laboratory, two hours. Overview of operating systems for microcomputers, file editors, spreadsheets, data base programs, SEASnet facilities. Introduction to programming. Civil engineering applications. Mr. Neethling (F,W)

15B. Introduction to FORTRAN Programming (2 units). (Formerly numbered 15.) Lecture, two hours; laboratory, two hours. Prerequisite: course 15A. Introduction to programming using structured FORTRAN. Selected topics in programming, with emphasis on numerical techniques as applied to engineering problems. Mr. Dong, Mr. Stenstrom (F,W,Sp)

Upper Division Courses

106A. Problem Solving in Engineering Economy. Prerequisite: upper division standing. Problem-solving and decision-making framework for economic analysis of engineering projects. Foundation for understanding corporate financial practices and accounting. Decisions on capital investments and choice of alternatives for engineering applications in all fields. Mr. Dracup (F,W,Sp)

M115. Engineering and Policy: Resources and Risk. (Formerly numbered M109A.) (Same as Mechanical, Aerospace, and Nuclear Engineering 109A.) Lecture, two hours; recitation, two hours. Prerequisite: sophomore or higher standing in engineering. The philosophical, sociological, and institutional implications of engineering-based risk and decision making. Emphasis on opportunities for the useful development of resources, inherent risks, and the responsibilities of engineers in the decision process. Emphasis on thoughtful student discussion. Mr. Perrine (W)

120. Principles of Soil Mechanics. (Formerly numbered 185A.) Prerequisite: course 108. Recommended: Earth and Space Sciences 1. Soil as a foundation for structures and as a material of construction. Soil formation, classification, physical and mechanical properties, compaction, bearing capacity, earth pressures, consolidation and shear strength. Mr. Lade (F)

121. Design of Foundations and Earth Structures. (Formerly numbered 185B.) Prerequisite: course 120. Design methods for foundations and earth structures. Site investigation, including determination of soil properties for design. Design of footings and piles, including stability and settlement calculations. Design of slopes and earth retaining structures. Mr. Felio (W)
120L. Soil Mechanics Laboratory. (Formerly numbered 185L.) Lecture, one hour; laboratory, eight hours. Prerequisite: course 120 or consent of instructor. Laboratory experiments to be performed by the students to obtain soil parameters required for the design of shallow foundations, piles, slopes, and other geotechnical structures. Course 120L is not open to students who have completed course 120. Mr. Selina (Sp)

130. Elementary Structural Mechanics. (Formerly numbered 166.) Prerequisite: course 108. Analysis of stress, strain; phenomenological material behavior, fatigue, cumulative damage; bending, extension of beams, unsymmetrical sections, stiffened shell structures, torsion of beams, stress function, warping, thin-walled cross sections; shear stresses; plate analysis; instability, failure of columns, plates, approximate methods of engineering analysis. Mr. Selina (Sp)

130F. Experimental Fracture Mechanics. (Formerly numbered 157B.) Lecture, two hours; laboratory, four hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 157 or equivalent. Elementary introduction to fracture mechanics and experimental techniques used in fracture, crack tip stress fields, strain energy release rate, fracture characterization, compliance calibration, surface flaws, fatigue crack growth and fatigue life of structural components, mixed mode fracture, and fracture toughness. Mr. Fournier (W)

130L. Experimental Structural Mechanics. (Formerly numbered 166L.) Lecture, two hours; laboratory, four hours. Prerequisite: course 130 or equivalent. Lecture and experiments in limit analysis of various aspects of structures. Elastic and plastic analysis of structural elements in multiaxial stress states. Buckling of columns, plates, and shells. Effects of actual boundary conditions on structural performance. Evaluation of structural fasteners. Mr. Fournier (F)

135A. Elementary Structural Analysis. (Formerly numbered 165A.) Prerequisite: course 108. Equilibrium of structures; deformation analysis of structures by differential equation method, moment-area method, and the principle of virtual work; influence lines; analysis of statically determinate and indeterminate structures such as beams, frames, arches, and trusses; introduction to slope-deflection equations. Mr. Dong (F,Sp)

135B. Intermediate Structural Analysis. (Formerly numbered 165B.) Prerequisite: course 135A. Classical force, displacement methods of structural analysis; three moment equation, slope-deflection equations, moment distribution; virtual work, minimum potential energy, complementary potential theorems; Castigliano’s theorems, generalized displacements, forces. Rayleigh-Ritz method; introduction to matrix methods; stiffness, flexibility matrix for bars, beams. Mr. Neison (F, W)

135C. Computer Analysis of Structures. (Formerly numbered 165C.) Prerequisite: course 135A. Development of FORTRAN coding for matrix manipulation, inversion; solution of the linear algebraic equations, eigenvalue problems; structural applications; matrix displacement method for planar frames; stiffness, flexibility, compliance matrix for planar frames. Mr. Dong (Sp)

135L. Structural Design and Testing Laboratory. (Formerly numbered 165L.) Lecture, two hours; laboratory, eight hours. Prerequisites: courses 135 and 157 or equivalent. Computer-aided optimum design, construction, instrumentation, and test of a small-scale model structure. Use of computer-based data acquisition and interpretation systems for comparison of experimental and theoretically predicted behavior. Mr. Selina (Sp)

137. Introduction to Mechanical Vibrations. (Formerly numbered M169A.) (Same as Mechanical, Aerospace, and Nuclear Engineering M169A.) Prerequisites: course 108, Mechanical, Aerospace, and Nuclear Engineering 102. Recommended: Electrical Engineering 102. Introduction to mechanical vibration theory and applications. Free, forced, and transient vibration of one and two degrees of freedom systems, including damping and nonlinear behavior. Normal modes, coupling, and normal coordinate method. Elements of vibration and wave propagation in continuous systems. Mr. Fournier (F)

137L. Mechanical Vibrations Laboratory (2 units). (Formerly numbered 169L.) Corequisite: course M137. Calibration of instrumentation for dynamic measurements. Determination of natural frequencies and damping factors from free vibrations. Determination of natural frequencies, mode shapes, and damping factors from forced vibrations. Dynamic similarity. Mr. Fournier (F)

139. Introduction to Biostuctural Mechanics. (Formerly numbered 160.) Prerequisite: course 108 or equivalent. An introduction to biomechanics and the principles of the engineering analysis of structural characteristics and behavior of skeletal members. Response to mechanical trauma. Elastic and viscoelastic properties of hard and soft tissues. Mathematical modeling. Design characteristics of hip prostheses and anthropometric dummies. Mr. Roberts (Sp)

140. Numerical Optimization Methods for Engineering Design. (Formerly numbered M129F.) (Same as Mechanical, Aerospace, and Nuclear Engineering M129F.) Prerequisites: Computer Science 10F, Mathematics 32A, 33A. Recommended: Mathematics 115A. Systematic presentation of numerical optimization methods for engineering design: one-dimensional minimization, unconstrained minimization, linearly constrained minimization, general nonlinear problems, approximation concepts, duality. Optimization problem statements. Advantages and limitations of numerical optimization. Applications to general design in mechanical, aerospace, and manufacturing engineering. Mr. Fleury, Mr. Schmit (F)

141. Design of Steel Structures. (Formerly numbered 167A.) Lecture, three hours; recitation, three hours. Prerequisite: course 135A. Allowable stress design of tension members, compression members, beams, beam columns, and tension splices according to AISC specifications for buildings. Mr. Hart (F)

142L. Reinforced Concrete Structural Laboratory. (Formerly numbered 167L.) Laboratory, eight hours. Prerequisites: course 142, consent of instructor. Experimental verification of strength design methods used in reinforced concrete elements and their performance. Full- and near-full-scale slab, beam, column, and joint specimens tested to failure. Mr. Selina (Sp)

142X. Reinforced Concrete Construction Laboratory (2 units). (Formerly numbered 167X.) Laboratory, four hours. Prerequisite: junior standing. Design and fabrication methods used for construction of reinforced concrete structural elements. Full- or near-full-scale slab, beam, column, and joint elements formed, fabricated, and cast in the laboratory. Mr. Selina (F)

143. Design of Prestressed Concrete Structures. (Formerly numbered 167C.) Prerequisite: course 135A. Prestressing and post-tensioning techniques. Properties of concrete and prestressing steels. Loss of prestress. Analysis of sections for flexural stresses and ultimate strength. Design of beams by allowable stress and strength methods. Load balancing design of continuous beams and slabs. Mr. Selina (Sp)

150. Engineering Hydrology. (Formerly numbered 164A.) Prerequisite: senior standing or consent of instructor. Recommended: elementary probability, statistics. Precipitation, climatology, stream flow analysis, flood frequency analysis, groundwater, snow hydrology, hydrologic simulation. Possible field trips. Mr. Dracup, Mr. Yeh (F)

151. Introduction to Water Resources Engineering. (Formerly numbered 148B.) Prerequisite: Mechanics, Aerospace, and Nuclear Engineering 103 or consent of instructor. Principles of hydraulics, the flow of water in open channels and pressure conduits, reservoirs and dams, hydraulic machinery, hydroelectric power, introduction to system analysis and design applied to water resources engineering. Mr. Yeh (W)

155. Water Quality Control Systems. (Formerly numbered 164D.) Prerequisites: Mechanical, Aerospace, and Nuclear Engineering 103 and upper division standing in engineering, or consent of instructor. Biochemical oxygen demand, biological wastewater treatment and recycling, the flow of water and wastewater treatment systems, field trip. Mr. Stenstrom (F)

156. Water Quality Control Laboratory. (Formerly numbered 164E.) Laboratory, eight hours. Prerequisites: course 155 (may be taken concurrently), Chemistry 11A, 11B. Basic laboratory techniques and practice for the characterization and analysis of water and wastewaters. Selected experiments include measurement of biochemical oxygen demand, suspended solids, dissolved oxygen hardness, and other parameters used in water quality control. Mr. Stenstrom (F)

157. Design of Water Quality Control Systems. (Formerly numbered 184F.) Lecture, two hours; laboratory, four hours. Prerequisite: course 155. Design of water and wastewater treatment plants, hydraulic profiles, conceptual design, process design and control, economic evaluation of design. Field trip. Mr. Neethling, Mr. Stenstrom (W)

M151. New Energy Technology: Resources, Conversion, and Utilization. (Formerly numbered M134A.) (Same as Mechanical, Aerospace, and Nuclear Engineering M134A.) Prerequisite: Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A or equivalent in physics or chemistry or consent of instructor. Energy sources: fossil fuels, nuclear fuels, hydro, solar, wind, geothermal, and biomass sources. Conversion methods for power production and other energy uses. Consideration of thermodynamic, economic, and environmental constraints. Mr. Perrine (F)

163. Air Pollution Control. (Formerly numbered 181A.) Prerequisite: senior standing or consent of instructor. Waste sources and consent of instructor. Energy resources: fossil fuels, nuclear fuels, hydro, solar, wind, geothermal, and biomass sources. Conversion methods for power production and other energy uses. Consideration of thermodynamic, economic, and environmental constraints. Mr. Perrine (F)

164. Waste and Hazardous Waste Management. (Formerly numbered 181B.) Prerequisite: senior standing or consent of instructor. Waste sources and handling. Resource recovery processes and systems design. Site selection, design, and operation for landfill disposal. Leachate transport, monitoring, and design for groundwater protection. Mr. Perrine (W)
Graduate Courses

220. Shear Strength of Soil and Stability of Slopes. (Formerly numbered 285A.) Prerequisites: course 120. Detailed study of fundamental concepts of shear strength of soils, strength determining factors, methods of strength measurement. Slope stability and stability analysis techniques using circular and noncircular failure surfaces, effect of side forces, total and effective stress analysis. Mr. Lade (F).

221. Foundation Engineering. (Formerly numbered 285S.) Prerequisites: courses 120, 220. Principles of foundation design, including theory of consolidation, impeded drainage, stress distribution, settlement analysis, allowable bearing capacity for shallow foundations, piles, and piers; laterally loaded piles. Mr. Felo (W).

222. Soil Dynamics. (Formerly numbered 285C.) Prerequisites: courses 120, 220. Design of foundation for vibrating equipment. Stress and strain relations for soils under cyclic loading conditions. Fundamentals of earthquakes as applied to seismic response of earth structures and foundations. Design of embankments, retaining walls, and foundations for earthquake loading. Mr. Lade (Sp).

223. Earth Pressures and Earth Retaining Structures. (Formerly numbered 285D.) Prerequisites: course 120, graduate standing. The basic concepts of the theory of earth pressures behind retaining structures, with special application to the design of retaining walls, bulkheads, and excavation bracing; the effects of flexibility of bulkheads, creep in soils, and construction techniques. Mr. Lade (Sp).

228. Advanced Soil Mechanics Laboratory. (Formerly numbered 285L.) Prerequisites: courses 120, 121, 220, 221. Lectures and laboratory studies of advanced aspects of soil properties and their application to design. Permeability, consolidation, strength testing, pore water pressure measurements, advanced instrumentation and measurement techniques. Preparation of engineering reports. Mr. Lade (Sp).

229. Seminar on Advanced Topics in Soil Mechanics. (Formerly numbered 285E.) Prerequisites: graduate standing in engineering, consent of instructor. Topics may vary each quarter to cover areas such as earth dam design, seepage through soils, consolidation, constitutive laws, finite difference and finite element methods with special application in soil mechanics, theories of elasticity and plasticity, and case histories. Mr. Lade (Sp).

M230. Applied Linear Elasticity. (Formerly numbered M256B.) (Same as Mechanical, Aerospace, and Nuclear Engineering M256B.) Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 256A or consent of instructor. Review of general principles. Elasticity, linear and physical theories of elasticity and creep and their basic assumptions. Static and dynamic analysis of elastic beams, columns, frames, and plates. Localization of plastic deformation in materials. Mr. Lin (Sp).

M232. Theory of Plates and Shells. (Formerly numbered 264A.) Prerequisite: course 130 or Mechanical, Aerospace, and Nuclear Engineering 158A or consent of instructor. Small and large deformation theories and stress analysis in anisotropic plates and shells. Analysis of cylindrical and spherical shells, including bending. Mr. Roberts (W).
250A. Surface Water Hydrology. (Formerly numbered 284A.) Prerequisite: course 150 or consent of instructor. In-depth study of the surface water components of the hydrologic cycle. Instantaneous unit hydrograph, dynamic wave equations, rainfall-runoff models using system identification and physical hydrology. Stochastic hydrology: time-series analysis, Markovian streamflow generating models, and generation of multivariate synthetic streamflows. Applications. Mr. Dracup, Mr. Yeh (W)

251. Water Resources Systems Engineering. (Formerly numbered 284C.) Prerequisite: course 151. Application of mathematical programming techniques to water resources systems. Topics include reservoir regulation, optimal timing, sequencing and sizing of water resources projects, and real-time conjunctive operations of ground water and surface water resource systems. Emphasis on the management of water quality. Mr. Dracup, Mr. Yeh (Sp)

252. Engineering Economics of Water and Related Natural Resources. (Formerly numbered 284D.) Prerequisites: one or more courses from Economics 1, 2, 100, 101A, and 101B, or consent of instructor. Economic theory and applications in the management of water and related natural resources; applications of price theory to water resource management, electric power supply, petroleum and natural gas management, and renewable resources; benefit-cost analysis with applications to water resources planning. Mr. Dracup (Sp)

253. Mathematical Models for Water Quality Management. (Formerly numbered 284H.) Prerequisite: course 155 or consent of instructor. Development of mathematical models for water quality control systems. Emphasis on numerical techniques to solve the nonlinear partial differential equations arising out of water quality and chemical engineering research.

254. Aquatic Chemistry. (Formerly numbered 284J.) Lecture, three hours; laboratory, two hours. Prerequisites: course 184D, Chemistry 11B, Mathematics 33B. The dilute aqueous solution chemistry of acid-base reactions, precipitation, coprecipitation and dissolution reactions, and oxidation/reduction reactions, as applied to water and wastewater treatment processes as well as natural and polluted waters. Laboratory experiment. Mr. Neethling (F)

255A. Advanced Water Quality Control Systems I. (Formerly numbered 284K.) Prerequisite: courses 155 and 254 (latter may be taken concurrently), or consent of instructor. Physical, chemical, and biological bases for design of water quality control systems. Properties of water, water quality standards, reactions and stoichiometry, field trip.

255B. Advanced Water Quality Control Systems II. (Formerly numbered 284L.) Prerequisite: course 255A. Physical, chemical, and biological basis for design of water quality control systems. Principles and design of conventional and advanced water and wastewater treatment systems. Field trip.

258A. Membrane Separations in Aquatic Systems. (Formerly numbered 284M.) Prerequisite: course 254. Applications of membrane separations to desalination, brine disposal, and ultrasound water systems. Discussion of reverse osmosis, ultrafiltration, electrodialysis, and ion exchange technologies from both practical and theoretical standpoints. Mr. Stenstrom (Sp)

259. Selected Topics in Water Resources (2 units). (Formerly numbered 284F.) Prerequisites: graduate standing, consent of instructor. Review of recent research and development in the management of water resources. Water and hydroelectric power supply systems. Water quality management. Water law and institutions. Economic planning and optimization of water resources development. May be repeated once for credit.

M262A. Introduction to Atmospheric Chemistry. (Same as Atmospheric Sciences M200C.) Lecture, three hours. Nature and composition of the atmosphere; natural cycles of important minor constituents; relevance and application of elementary chemical kinetics, thermochemistry, spectroscopy, and photochemistry to atmospheric processes. Mr. Dracup, Mr. Stenstrom (F)

M262B. Atmospheric Diffusion and Air Pollution. (Same as Atmospheric Sciences M200B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological and chemical aspects of air pollution and aerosol formation.

M265. Geochemical Engineering. (Formerly numbered 265.) Prerequisites: courses 250B, graduate standing. The science and engineering underlying movement and fate of chemicals within the geospheres of the environment. Models for transport of contaminants to, within, and from groundwater and their application.

M275. Multiattribute Decision Making with Conflicting Objectives. (Formerly numbered 274J.) Prerequisite: course 176 or Computer Science 274A, or equivalent. The structuring of models for multiattribute decision problems. The theory of quantifying preferences over multiple objectives. Multiattribute utility functions. The structuring of models for conditional strategies under conflict situations. The theory of metagames and metarotation.

M292A. Asymptotic Methods. (Formerly numbered M292A.) Lecture, three hours. Prerequisites: Chemical Engineering M192A or Mechanical, Aerospace, and Nuclear Engineering M192A, Mathematics 132, or equivalent. The fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase. Watson's lemma, method of steepest descents, uniform asymptotic expansions, and stationary point problems. Mr. Muki (F)

296AA-296ZZ. Seminar: Current Topics in Civil Engineering (2 to 4 units). (Formerly numbered 296AAA-296ZZ.) Prerequisite: consent of instructor. Lectures, discussions, and student presentations and projects in areas of current interest in civil engineering. May be repeated for credit. S/U grading.

298. Seminar in Engineering (2 to 4 units). Prerequisite: graduate standing in civil engineering, consent of instructor. Seminars may be organized in addition to, within, and from groundwater and their application.

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examination (2 to 16 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

599. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

Bertram Russel, Ph.D., Emeritus
Thomas A. Rogers, Ph.D., Emeritus

Associate Professors
Michael G. Dyer, Ph.D.
Eliezer M. Gafni, Ph.D.
D. Stott Parker, Jr., Ph.D.
David A. Rennels, Ph.D.
Scope and Objectives
Computer science is concerned with computer-related information processing systems and applications. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of digital computers and digital systems. The programs provide comprehensive and strongly related studies of subjects in artificial intelligence, computer science theory, computer system architecture, computer network modeling and analysis, software systems, and scientific computing.

The undergraduate and graduate studies and research projects in computer science are supported by extensive computing resources. The Center for Experimental Computer Science (CECS) is composed of nearly a dozen laboratories specializing in areas such as computer communications, VLSI design, and artificial intelligence. The Cognitive Systems Laboratory is engaged in studying computer systems which emulate or support human reasoning. The Biocybernetics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

The Bachelor of Science degree may be attained through the computer science and engineering major described below. An additional computer science major for students without an engineering orientation is in advanced stages of planning.

The School of Engineering and Applied Science offers M.S. and Ph.D. degrees in Computer Science, as well as minor fields for graduate students seeking engineering degrees. The John E. Anderson Graduate School of Management and the Computer Science Department offer a concurrent degree program which enables students to obtain the M.S. in Computer Science and the M.B.A. (Master of Business Administration).

Bachelor of Science in Computer Science and Engineering
The ABET-accredited computer science and engineering curriculum at UCLA provides the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. This curriculum has major components from the Computer Science and Electrical Engineering Departments. Within the curriculum students study all aspects of computer systems from electronic design, based on solid-state physics concepts, through logic design, integrated circuit selection and design, MSI, LSI, and VLSI concepts and device utilization, machine language design, implementation and programming, operating system concepts, system programming, higher-level language skills, and application of these systems. Students are prepared for employment in the high-technology industries which interface with information and digital systems.

The Major
Course requirements are as follows (188 minimum units required):

(1) Five core courses: Computer Science 11, 12, 13, 30, Electrical Engineering 103.

(2) Computer Science 111 or 130, 131, 141, 151A, 151B, 181, Electrical Engineering 111A, 115A, 115B, 115C; eight laboratory units (Computer Science 152A, 152B, 171L, and Electrical Engineering 100L); Civil Engineering 106A (satisfies the engineering economics requirement — Economics 101A or 102 or 111 is also acceptable); Chemical Engineering M192A or Mechanical, Aerospace, and Nuclear Engineering M192A; one course in probability and statistics selected from Statistics 152A, Electrical Engineering 131A, or Computer Science 112.

(3) Three elective courses from Computer Science 111 through C196L or Electrical Engineering 116, 121A, or 123A. Course 199 may normally be taken only as a free elective; however, you may petition for exceptions in extraordinary situations.

(4) English 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; one life sciences course.

(5) Seven courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement).

(6) Three free elective courses.

Graduate Study
For information on graduate admission to the computer science program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

Computer Science Breadth Requirement
Candidates for the M.S. or Ph.D. degree in Computer Science must satisfy the computer science breadth requirement by the end of the fourth quarter in graduate residence at UCLA. This requirement is satisfied by mastering the contents of six undergraduate courses in computer science or related subjects selected from the following two groups:

Group 1 (four required courses or equivalent): Computer Science 141, 151A, 151B, 181.

Group 2 (two required courses or equivalent): Computer Science 111, 112, 130 or 131 or 132, 161 or 163, 168, 171 or 174, 172 or 173 or 270A.

Competence in any or all courses may be demonstrated by one of three methods:

(1) Satisfactory completion of the course at UCLA with a grade of B- or better.

(2) Satisfactory completion of an equivalent course at another university with a grade of B- or better.

(3) Satisfactory completion of a final examination in the courses at UCLA.

In addition, students must complete Computer Science 201 with a grade of Satisfactory.

M.B.A./M.S.-Computer Science
The Department of Computer Science in the School of Engineering and Applied Science and the John E. Anderson Graduate School of Management offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. (Master of Business Administration) in three academic years. Students should request all application materials from the M.B.A. Admissions Office, John E. Anderson Graduate School of Management.

Lower Division Courses
5. Computer Literacy and Appreciation. Lecture, three hours; laboratory, one hour. An introduction to computers for students without prior experience. Survey of computer technology, computer applications, and how machines represent and process information. Insight into the development, power, limitations, and social impact of modern computer systems. 

10C. Introduction to Programming/PASCAL. Lecture, four hours; discussion, two hours. Exposure to computer organization and capabilities. Basic principles of programming (using PASCAL as the example language): algorithmic, procedural problem solving. Program design and development. Control structures and data structures. Character strings and word processing.

Mr. Kay, Mr. Levine (Sum)
10F. Introduction to Programming/FORTRAN. Lecture, four hours; discussion, two hours. Open to mathematics and computer science majors; open to graduate students on S/U grading basis only. Description and use of FORTRAN programming language. Selected FORTRAN applications. Programming and running of several problems.

Mr. Kay, Mr. Levine (W)

11. Introduction to Computer Science I. Lecture, four hours; laboratory, two hours. Limited to computer science and engineering majors. Open to graduate students on S/U grading basis only. Not open to students with credit for course 10C, 10F, or Program in Computing 10A. Human factors in programming and program design. Exposure to computer organization and capabilities, data representation, professional ethics. Principles of programming (using PASCAL as the example language); algorithm design and procedural abstraction. Program design and development. Control structures and data structures.

Mr. Kay, Mr. Martin (F)

12. Introduction to Computer Science II. Lecture, four hours; recitation, two hours. Prerequisite: course 11 or consent of instructor. Limited to computer science and engineering majors. Open to graduate students on S/U grading basis only. Internal data structures (e.g., lists, trees, queues) and associated algorithms, described with examples in a very high-level language and an algorithmic language respectively (e.g., LISP and C). Sorting, searching, algorithm analysis, models of computation.

Mr. Kay, Mr. Martin (W)

13. Introduction to Computer Science III. Lecture, four hours; recitation, two hours. Prerequisite: course 12 or consent of instructor. Limited to computer science and engineering majors. Open to graduate students on S/U grading basis only. Design and development of programs solving problems of intermediate complexity taken from various disciplines, using high-level languages such as LISP and C. Software engineering, data abstraction, human-machine interface, external data structures. Survey of current topics in computer science.

Mr. Kay, Mr. Martin (Sp)

30. Systems Programming. Lecture, four hours; laboratory, two hours. Prerequisite: course 13. Introduction to operating systems and systems programming. Processes and interprocess communication, I/O programming, memory management, file systems.

Mr. Kay, Mr. Muniz (F,Sum)

Upper Division Courses

Mr. Jefferson, Mr. Muniz (F,Sp)

122. Computer Systems Fundamentals. Prerequisite: upper division standing. Basic tools necessary for performance evaluation and design of distributed computer systems. Includes such topics as, algorithms, combinatorics, generating functions, probability transforms, Markov chains, Markov reward theory, counting and graphs, network flow theory. Presentation of this set of tools in a fashion that is rich with examples from the computer systems field.

Mr. Kleinrock (F,Sp)

130. Software Engineering. Lecture, four hours; laboratory, two hours. Prerequisites: courses 11, 12, 13, or equivalent. Structured programming, program specification, program proving, modularity, abstract data types, composite design, software tools, software control system, software engineering. Principles of design and programming.

Mr. Avizienis, Mr. Bagrodia (Sp)

131. Programming Languages. Lecture, four hours; laboratory, two hours. Prerequisites: courses 13, 30. Study, comparison, evaluation of alternative strategies for language specification, data description, data control, program modularity, instruction sequencing, and language implementations. Use of a few representative set of languages: FORTRAN, ADA, SIMULA 2, and PROLOG to illustrate particular implementations of some of the above features.

Mr. Bagrodia, Mr. Jefferson (F,W)

132. Compiler Construction. Lecture, four hours; recitation, two hours. Prerequisites: courses 131, 141, 181. Compiler structure; lexical and syntactic analysis; semantic analysis and code generation; theory of parsing.

Mr. Bagrodia, Mr. Martin (Sp)

141. Computer Systems Architecture I (Intermediate). Lecture, four hours; discussion, two hours. Prerequisite: course 11 or consent of instructor. Fundamentals of computer hardware. Introduction to instruction set architecture. Computer design projects.

Mr. Cardenas, Mr. Geifa (F,Sp)

151A. Computer Architecture I. Lecture, four hours; recitation, two hours. Prerequisites: course 10C or 11, Physics 8C. Introduction to digital systems. Specification and implementation of combinational and sequential systems. SSI/MSI/LSI standard modules and their use in digital systems. Specification and implementation of algorithmic systems. Modules for the data and control sections. Hardwired and microprogrammed approaches. Arithmetic algorithms and their implementation.

Mr. Avizienis, Mr. Ercegovac, Mr. Rennels (F,Sp)

151B. Computer Systems Architecture II (Intermediate). Lecture, four hours; discussion, two hours. Prerequisite: course 151A. Design and implementation of computer systems. 30, 152A. Machine organization and design, formal descriptions, comparative study of machine instruction sets and formats, data representation and floating point, addressing structures, mechanization of procedure calls, memory organization and management, microprogrammed, I/O processing and interrupts, and reliability aspects.

Mr. Chu, Mr. Rennels, Mr. Tamir (F,Sp)

Mr. Ercegovac, Mr. Lang (Sp)

152A. Introductory Design and Design Laboratory (2 units). Laboratory, four hours. Prerequisite: course 151A. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation and testing of circuits using programmed array logic. Design projects.

Mr. Lang, Mr. Rennels (F,Sp)

152B. Computer Design and Interfacing Laboratory (2 units). Laboratory, four hours. Prerequisite: course 151B. Design and implementation of computer I/O interfaces and device controllers, implementation of microprogrammed machines.

Mr. Rennels, Mr. Tamir (F,Sp)

161. Fundamentals of Artificial Intelligence. Lecture, four hours; laboratory, two hours. Prerequisites: course 141, consent of instructor. Introduction to fundamental problem solving and knowledge representation paradigms of artificial intelligence. Introduction to expert system shells and programming. State-space and problem reduction methods, brute-force and heuristic search, planning techniques, two-player games. Knowledge structures including predicate logic, production systems, semantic networks, primitives, frames, scripts. Special topics in natural language processing, expert systems, vision, and parallel architectures.

Mr. Dyer, Mr. Korf (W,Sp)

162. Introduction to Natural Language Processing. Lecture, four hours; laboratory, two hours. Prerequisites: courses 130 or 131, and 141, consent of instructor. Role of syntax, semantics, and pragmatics in human language processing by computers. Natural language generators and parsers, inference, and conceptual analysis. Modeling conceptual processes and representing semantic knowledge by means of computer programs.

Mr. Dyer, Mr. Korf (W)

168L. Computer Vision Laboratory (2 to 4 units). Laboratory, eight hours. Prerequisites: course 168, senior standing, consent of instructor. Image acquisition, storage, processing, and analysis. Design and implementation of algorithms for low-level vision. Experiments in motion, texture, color, edge detection, binary and gray-level images. Scheme-based personal computer vision station.

Mr. Carlyle, Mr. Skrzypek (W)

170. Basic Methodologies for Computer Modeling and Analysis of Dynamic Systems. Prerequisite: Mathematics 33A, 33B. An introduction to computer-oriented techniques for modeling and analysis of systems which evolve with time, with emphasis on non-electrical engineering examples. Linearity, impulse response, stability, state variables, algorithms for filtering and control.

Mr. Aoki, Mr. Carlyle, Mr. DiStefano (W)

171. Real-Time Computer Systems. Prerequisite: senior standing or consent of instructor. A survey of fundamental and computer-oriented concepts in the design of computer systems. Documenting digital computer interfaces, multiprogramming, bus structure, interrupt, and time-sharing considerations. Digital communication, remote consoles, sampling, quantizing, multiplexing, analog-digital conversion, and data reconstruction.

Mr. Karplus, Mr. Levine (Sp)

171L. Real-Time Systems Laboratory (2 to 4 units). Laboratory, four to eight hours. Prerequisites: senior standing, consent of instructor. Analysis and design of computer systems. Location and implementation of operating systems and computer architecture. Use of computer-aided design tools: courses 171L may be taken concurrently. 152A. Tests and measurements of digital and analog signals, and analog and digital signals as encountered in data acquisition, on-line computer systems, sensor facilities, inter- systems and interfaces, and programming terminals, models, interfaces, and standards (e.g., RS-232, IEEE488). May be repeated for credit with consent of instructor.

Mr. Carlyle, Mr. Karp, Mr. W. (Karp) (W)

Mr. Karp, Mr. McNamara (F)
173. Random Data Analysis and Measurement Procedures. Prerequisite: Electrical Engineering 102 or equivalent. Practical aspects of random data analysis and measurement procedures. Statistical properties of random data, correlation, spectral density, input/output relationships, statistical errors, coherence functions, data smoothing, and approximating techniques.

Mr. Aoki, Mr. McInerney (F)

174. Elements of Computer Graphics. Lecture, two hours; laboratory, two hours. Prerequisite: course 141 or consent of instructor. Hardware and software components of computer graphics, software languages. Graphics workstations and specialized I/O devices. Design and development of interactive graphics programs.

Mr. Vidal (Sp)

181. Introduction to Formal Languages and Automata Theory. Lecture, four hours; discussion, two hours; laboratory, two hours. Prerequisites: Mathematics 61, and senior standing in computer science or consent of instructor. Grammars, automata, and languages. Finite-state languages and finite-state automata. Context-free languages and pushdown store automata. Unrestricted rewriting system (i.e., languages and Turing machines). Closure properties and pumping lemmas. Introduction to computability.

Mr. Carfty, Ms. Greibach (F,Sp)

196A. Introduction to Bioengineering and Cybernetics (2 units). Prerequisite: calculus. Strongly recommended for students with a potential interest in bioengineering or cybernetics as a major. Introduc-
tory survey to topics in systems and cybernetic disciplines. Lectures presented by faculty currently performing research in one of the areas; some sessions include laboratory tours. P/NP grading.

Mr. DiStefano (F)

M196B. Modeling and Simulation of Biological Systems. (Same as Medicine M196B.) Lecture, four hours; laboratory, two hours. Prerequisite: calculus. Introduction to classical and modern systems and modeling and simulation of biological systems. Multicompartamental modeling, multi-exponential curve fitting, and simulation labora-
tory projects. Applications in physiology and medi-
cine. Life science and medical students are encour-
aged to enroll.

Mr. DiStefano (F, Sp)

C196L. Biocybernetics Research Laboratory (2 to 4 units). (Formerly numbered C170L.) Lecture, one to two hours; discussion, one to two hours; laboratory, one to four hours. Prerequisite: course 141B, consent of instructor. Interdisciplinary experimental labora-
tory techniques. Care, use, and design of laboratory instrument. Specialized research hardware, software, and computational tools. Comprehensive experimental design, including simul-
ation. Radioactive isotope use and safety. Exper-
imental animals, controls, and kinetic stimulus-re-
ponse experiments. Concurrently scheduled in course C296L.

Mr. DiStefano (F, Sp)

199. Special Studies (2 to 8 units). Prerequisites: upper division standing, consent of instructor. Individu-
al investigation of a selected topic to be arranged with a faculty member. Enrollment request forms are available in departmental office. Occasional field trips may be arranged. May be repeated for credit.

(F, W, Sp)

Graduate Courses

201. Computer Science Seminar (2 units). Prerequisite: graduate standing in computer science. Lectures on current research topics in computer science. May be repeated for credit. S/U grading.

(F, W, Sp)

202. Advanced Computer Science Seminar. Prerequisite: completion of major field examination in computer science or consent of instructor. Current computer science research into theory of, analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original projects in the specialized area. May be repeated for credit.

Mr. Estrin (F, W, Sp)

209AA-209ZZ. Research Seminar in Computer Science (2 to 4 units each). Prerequisite: consent of instructor. Discussion of advanced topics and recent research in the algorithmic processes that describe and transform information: theory, analysis, design, efficiency, implementation, and application. May be repeated for credit. S/U grading.

Mr. Kleinrock (W)

212B. Queueing Applications: Scheduling Alg
erithms and Queueing Networks. Prerequisite: course 212A. Priority queueing. Applications to time-
sharing scheduling algorithms: FB, Round Robin, Conservation Law, Bounds. Queueing networks: defini-
tions; job flow models; product form solution; local balance and M/M/n problems for performance measures; asymptotic behavior and bounds; expression techniques — diffusion theory; iterative techniques; applications.

Mr. Kleinrock, Mr. Munzt (W)

214. Data Transmission in Computer Communica-
tions. Prerequisites: course 112, graduate standing in computer science. Discrete data streams, formats, rates, transductions; digital data communications via analog signaling in computer communication; media characteristics, systems methodologies, perfor-
mance analysis; modern designs; physical interfaces in computer communication links; national/interna-
tional standards; tests and measurements.

Mr. Carfty

215. Computer Communications and Networks. Prerequisite: course 112. Resource sharing; comput-
ter traffic characteristics; multiplexing; network structure; packet switching and other switching tech-
niques; the ARPANET and other computer network examples; network delay and analysis; network de-
sign and optimization; network routing and control; satellite and ground radio packet switch-
ing; local networks; commercial network services and architectures. Optional topics include extended error control techniques; modems; SDL, HDLC, X.25, etc.; ATM, virtual channels, and switching; local area networks; integrated networks; communication processors.

Mr. Chu, Mr. Kleinrock, Mr. Munzt (F, Sp)

216. Distributed Multilacess Control in Networks. Prerequisites: courses 212A, 215. Topics from the field of distributed control and access in computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and con-
trol.

Mr. Kleinrock (F, Sp)

218A. Network Protocol and Processor Design. Prerequisite: course 112. Recommended: course 215. Computer network architecture review. Protocol levels: subnet, network access, transport, applica-
tion. Protocol specification and verification. Network processor architectures (single processor; multi-

Mr. Gerla (W)

219. Current Topics in Computer System Model-
ing Analysis (2 to 12 units). Prerequisite: consent of instructor. Review of current literature in an area of computer system modeling analysis in which the instructor has developed special proficiency as a consequence of research interests. May be repeated for credit with consent of instructor.

Mr. Gerla

221. Economics of Computers. Prerequisite: consent of instructor. Basic economic factors in data pro-
cessing and computer systems; cost analysis and planning; major cost factors. Selection and operation of a data processing system.

Mr. Melkanoff (even years)

222. Control and Coordination in Economics. (Formerly numbered System Science M222G.) (Same as Economos M222A.) Lecture, three hours. Prerequisite: graduate standing in economics or en-
coreering or consent of instructor. Recommended: appropriate mathematics course. Stability poli-
icies, short- and long-run dynamics and stability anal-
ysis; decentralization, coordination in teams; certain-
ly equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading.

Mr. Aoki

231A. Advanced Topics in Programming Lan-
guages. Prerequisite: course 131. Presentation, analysis, and discussion of specialized programming languages, new higher-level languages, and new and/or advanced features of programming lan-
guages.

Mr. Melkanoff (odd years)

231B. Advanced Topics in Computer Language Design. Prerequisites: courses 132, 141, 181, 232A, 232B. Advanced topics in computer language design, including design goals of modern languages, levels of abstraction, methodologies for standardization, and proposals for new problem-oriented and ex-
tensible languages. Enrollment limited to allow indi-
vidual application of language design principles.

Mr. Berry

232A. Operational Semantics of Programming Languages. Prerequisites: courses 131, 181 (may be taken concurrently). Interpreter models of program-
ling language semantics: information structure models, logic calculus, LISP definition, interpreter equivalence and correct-
ness.

Mr. Berry

232B. Semantics of Programming Languages. Prerequisites: courses 131 and 181, or consent of instructor. Denotational semantics of programming languages. Notation and foundations. Expressions, commands, declarations, and other constructs. Envi-
ronments, stores, and continuations. Examples. Re-
lations between semantic definitions of programming languages. Applications of current research interest.

Mr. Martin

234A. Correctness Proofs. Prerequisite: consent of instructor. Theoretical and practical aspects of cor-
rectness proofs. Partial correctness, total correctness, and termination. Axiomatic semantics and proof systems. Abstraction and correctness of imple-
mentations. Formulation, execution, and assessment of correctness proofs. Topics of current research interest.

Mr. Martin

234C. High-Level Language Computer Architec-
ture. Prerequisites: courses 131 and 232A or 232B. A study of machine architectures to facilitate near or nearly direct execution of high-level languages: ALGOL-like machines, including Burroughs B6700, microprogramming and microprogrammable ma-
achines, measurements and their use in architecture design.

Mr. Berry

239. Current Topics in Computer Science: Pro-
gramming Languages and Systems (2 to 12 units). Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer sci-
ence programming languages and systems in which the instructor has developed special proficiency as a conse-
quency of research interests. May be repeated for credit with topic change.

241A. Data Management Systems (6 units). Lecture, four hours; laboratory, two hours. Prerequisites: courses 131, 141, or equivalent. File management in programm-
ing languages, storage devices, and oper-
ating systems. Secondary index organizations. Data base systems; architecture, design, and models (net-

Mr. Cardenas (F)

242A. Privacy and Security in Computer Information Systems. Prerequisite: course 111 or consent of instructor. Analysis of security and privacy issues in current computer systems and the design of future computer systems. Emphasis on the design of future computer systems. Emphasis on the design of cyber security. Mr. Rennels, Mr. Tamir (F)

242B. Knowledge-Based Systems. (Formerly numbered 274B.) Prerequisite: course 262A. Machine reasoning: decision making, constraint satisfaction, and unification. Artificial intelligence. Inference in expert systems. Rule-based systems (goals, principles, and limitations). Mr. Pearl (W)

254A. Computer Memories and Memory Systems. Prerequisites: courses 251A or consent of instructor. Functional and structural models of computer systems. Memory organizations. Implications for memory design and operation. Mr. Chu, Mr. Rennels (W)

255A. Distributed Processing and Distributed Data Base System. (Formerly numbered 255B.) Prerequisite: course 241A/L or 254A. Interprocess communication, bus structures, task partitioning and allocation, precedence relationships, response time models, computer-based distributed processing systems, system reconfiguration, error recovery. File allocation, directory design, deadlock, synchronization, commit protocols, query optimization, data translation. Examples, design, and trade-offs. Mr. Chu (W)

256A. Interactive Computer Graphics. Prerequisite: course 174 or equivalent. Current topics in interactive computer graphics system design, development, and applications. Mr. Chu (W)

257A. Computer System Design: Comparative Architectures and Synthesis Methods. Prerequisite: course 252A. Advanced topics in computer system architecture. Important properties of computer systems and methods for modeling, evaluating, and synthesizing them. Mr. Estnin (W)

258A, 258B, 258C. LSI in Computer System Design. (Same as Electrical Engineering M216A, M216B, M216C.) Lecture, four hours; laboratory, four hours. Prerequisites: graduate standing in computer science or electrical engineering, consent of instructor. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. Mr. Rennels, Mr. Tyree (F)

259A. Current Topics in Computer Science: System Design-architecture (2 to 12 units). Prerequisite: consent of instructor. Review of current literature in an area of data structures in which the instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. Mr. Rennels, Mr. Tyree (F)

263A. Artificial Intelligence Programming I. Prerequisite: courses 256A, 256B, 256C, LSI in Computer System Design. (Same as Electrical Engineering M216B, M216C.) Lecture, four hours; laboratory, four hours. Prerequisite: course 256A. LSI/VLSI design and application in computer systems. In-depth study of VLSI architecture and VLSI CAD programming. Mr. Rennells, Mr. Tyree (W)

263D. VLSI CAD Techniques. Prerequisite: graduate standing in computer science or electrical engineering or consent of instructor. In-depth study of advanced computer-aided VLSI design techniques, including building block layout, placement and routing algorithms, simulation, design verification and timing, analog/digital synthesis techniques, testing, and system level synthesis, and automatic performance optimization. Mr. McNamme (W)

264A, 264B. Artificial Intelligence Programming II. Prerequisite: course 264A. Introduction to artificial intelligence programming. Functional programming for artificial intelligence applications. Review of Lisp and introduction to lexically scoped LISP (e.g., T, Scheme). Lambda calculus, closures, data-driven and object-oriented programming, arrays, n-dimensional array processing, deduction systems. Mr. Dy, Ms. Flowers (F or W)

265A. Middleware. Prerequisites: courses 265A, 264A, consent of instructor. Introduction to middleware. Overview of middleware, techniques for middleware design, and design patterns for building reusable middleware. Mr. Dy, Ms. Flowers (W or Sp)

266A. Reasoning with Partial Beliefs. (Formerly numbered 274A.) Prerequisite: course 112, Electrical Engineering 131A, or equivalent. Review of several formalisms for representing and managing uncertainty in learning and reasoning. Use of belief networks for representing and reasoning with uncertain knowledge. Mr. Pearl (F)

268A. Advanced Topics in Fault-Tolerant Computing. Prerequisite: course 253A. Analysis and discussion of the modeling, design, and evaluation of fault-tolerant computer systems. Emphasis on current research challenges and new research directions in the design and development of fault-tolerant systems. May be repeated for credit with topic change. Mr. Arzianis, Mr. Rennells (Sp)

269A. Database Systems. Prerequisites: courses 131, 181. The relational model of data: definition and operations; relational language. Database organization and systems. Tolerance of man-made faults. Fault-tolerant computer systems. Emphasis on current research in fault-tolerant computer systems. Emphasis on current research in database systems. Mr. Rennells, Mr. Tyree (F)

270A. Language and Memory. Prerequisites: courses 131, 141, 151. The relational model of data: definition and operations; relational language. Database organization and systems. Tolerance of man-made faults. Fault-tolerant computer systems. Emphasis on current research in fault-tolerant computer systems. Emphasis on current research in database systems. Mr. Rennells, Mr. Tyree (F)

272A. Current Topics in Cognitive Systems. (Formerly numbered 274Z.) Prerequisites: course 262A, consent of instructor, additional prerequisites for each offering as announced in advance by department. Theory and practice of artificial intelligence. Current topics in artificial intelligence. Mr. Pearl (W)

273A. Current Topics In Cognitive Systems. (Formerly numbered 274Z.) Prerequisites: course 262A, consent of instructor, additional prerequisites for each offering as announced in advance by department. Theory and practice of artificial intelligence. Current topics in artificial intelligence. Mr. Pearl (W)

274A. Knowledge-Based Systems. (Formerly numbered 274B.) Prerequisite: course 262A. Machine reasoning: decision making, constraint satisfaction, and unification. Artificial intelligence. Inference in expert systems. Rule-based systems (goals, principles, and limitations). Mr. Pearl (W)

276A. Reasoning with Partial Beliefs. (Formerly numbered 274A.) Prerequisite: course 112, Electrical Engineering 131A, or equivalent. Review of several formalisms for representing and managing uncertainty in learning and reasoning. Use of belief networks for representing and reasoning with uncertain knowledge. Mr. Pearl (F)

278A. Knowledge-Based Systems. (Formerly numbered 274B.) Prerequisite: course 262A. Machine reasoning: decision making, constraint satisfaction, and unification. Artificial intelligence. Inference in expert systems. Rule-based systems (goals, principles, and limitations). Mr. Pearl (W)

279A. Current Topics In Cognitive Systems. (Formerly numbered 274Z.) Prerequisites: course 262A, consent of instructor, additional prerequisites for each offering as announced in advance by department. Theory and practice of artificial intelligence. Current topics in artificial intelligence. Mr. Pearl (W)

280A. Language and Memory. Prerequisites: courses 131, 141, 151. The relational model of data: definition and operations; relational language. Database organization and systems. Tolerance of man-made faults. Fault-tolerant computer systems. Emphasis on current research in fault-tolerant computer systems. Emphasis on current research in database systems. Mr. Rennells, Mr. Tyree (F)

282A. Current Topics in Cognitive Systems. (Formerly numbered 274Z.) Prerequisites: course 262A, consent of instructor, additional prerequisites for each offering as announced in advance by department. Theory and practice of artificial intelligence. Current topics in artificial intelligence. Mr. Pearl (W)

285A. Language and Memory. Prerequisites: courses 131, 141, 151. The relational model of data: definition and operations; relational language. Database organization and systems. Tolerance of man-made faults. Fault-tolerant computer systems. Emphasis on current research in fault-tolerant computer systems. Emphasis on current research in database systems. Mr. Rennells, Mr. Tyree (F)

286A. Artificial Intelligence Programming I. Prerequisite: consent of instructor. Recommended: knowledge of Lisp or PROLOG. Introduction to tools, techniques, and issues in artificial intelligence programming. Functional programming for artificial intelligence applications. Review of Lisp and introduction to lexically scoped LISP (e.g., T, Scheme). Lambda calculus, closures, data-driven and object-oriented programming, arrays, n-dimensional array processing, deductive systems. Mr. Dy, Ms. Flowers (F or W)

288A. Advanced Topics in Fault-Tolerant Computing. Prerequisite: course 253A. Analysis and discussion of the modeling, design, and evaluation of fault-tolerant computer systems. Emphasis on current research challenges and new research directions in the design and development of fault-tolerant systems. May be repeated for credit with topic change. Mr. Arzianis, Mr. Rennells (Sp)
267. Artificial Neural Systems and Connectionist Computing. Prerequisites: graduate standing, consent of instructor. Analysis of the major connectionist computing paradigms for solving problems of biological and physical processes. Examination of past and current implementations of artificial neural networks along with their applications to associative knowledge processing, general multi-sensor pattern recognition including speed and vision, and adaptive robot control. Students required to prepare a paper analyzing research in one area of interest.

Mr. Vidal (W)

268. Machine Perception. Prerequisite: graduate standing, consent of instructor. Course 168 may be taken concurrently. Computational aspects of processing visual and other sensory information. Unified treatment of early vision in man and machine. Integration of computational and biological aspects. Emphasis on research and applications of processing systems. Mathematically oriented. Course has changed; see course catalog.

Mr. Skrzypek (W)

269. Seminar in Computational Neuroscience (2 units). Prerequisite: consent of instructor. Intended for students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as a paradigm for parallel and concurrent computation in application to problems of perception, vision, multimodal sensory integration, and robotics. May be repeated for credit. S/U grading.

Mr. Skrzypek (W or Sp)

270. Computer Methodology: Advanced Numerical Methods. Prerequisites: graduate standing in computer science or engineering. Electrical Engineering 103 or Mathematics 141B or comparable experience with numerical computing. Principles of computer treatment of selected numerical problems in algebraic and differential systems, transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to modeling and simulation and the applicability of contemporary developments in numerical software. Computer exercises.

Mr. Carlyle, Mr. Karplus (F,Sp)

Mr. Karplus (Sp)

Mr. Karplus (W)

271C. Seminar in Advanced Simulation Methods (2 units). Prerequisite: course 271A or equivalent. Discussion of advanced topics in the simulation of systems characterized by partial and/or differential equations. Topics include (among others): constraints, control spaces, and variational techniques. Topics vary each quarter. May be repeated for credit. S/U grading.

Mr. Karplus (W) or Sp

272A. Digital Computer Modeling and Analysis of Dynamic Data Sources. Prerequisite: course 170 or equivalent or other introductory systems course or consent of instructor. Development of digital computer algorithms for interactive modeling of dynamic data sources and analytical tools for sequential decision procedures in approximate representation of empirical and perhaps nonstationary data generated by such data sources.

Mr. Aoki (F) or Sp

272B. Analytical and Computational Methods for Modeling and Optimization of Dynamic Systems. (Formerly numbered 270B.) Prerequisite: course 170 or equivalent. Recommended: intermediate-level knowledge of linear algebra. Development of analytical and computational methods for modeling, decision analysis, and optimization of dynamic systems. Linear and nonlinear systems methods, model selection and simplification, sensitivity analysis, system identification, and Kalman filtering; and optimal control algorithms.

Mr. Aoki, Mr. DiStefano (W)

Mr. McNamee (W)

276A. Pattern Analysis and Machine Intelligence. Prerequisites: graduate standing, consent of instructor. Fundamentals of pattern recognition, feature extraction and selection, autonomous learning, clustering, and machine intelligence.

Mr. Klinger (W)

276B. Structured Computer Vision. Prerequisites: graduate standing, consent of instructor. Methods for computer processing of image data. Systems, concepts, and algorithms for image analysis, radiologic and robotics applications.

Mr. Skrzypek (W or Sp)

276C. Speech and Language Communication in Artificial Intelligence. Prerequisite: course 276A or 276B or consent of instructor. Topics in human-computer communication: interaction with pictorial and linguistic systems, visual perception, auditory perception, natural language, and computer control algorithms.

Mr. Klinger (W)

277. Current Topics in Computer Science: Methodology (2 to 12 units). Lecture, four hours. Prerequisite: consent of instructor. Review of current literature and methodologies of computer science methodology in which the instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

Ms. Greibach (F, W)

281A. Computability and Complexity. Prerequisite: course 181 or comparable background. Concepts fundamental to the study of discrete information systems and theory of computing, with emphasis on regular sets, Turing-recognizable (recursively enumerable) sets, and primitive recursive functions, relations, and decision problems; nondeterminism, decidability, unsolvability of problems, "easy" and "hard" problems, PTIME/NTIME.

Ms. Greibach, Mr. Parker (F)

284A-D. Discrete State Systems. Prerequisite: consent of instructor. Recommended: course 181. Finite-state machines, transducers, and their generalizations; regular expressions, transduction expressions, reachability; decomposition, synthesis, and design considerations; topics in state and system identification and fault diagnosis, linear machines, probabilistic machines, applications in coding, communication, computing, system modeling, and simulation.

Mr. Carlyle

284A-284Z. Topics in Automata and Languages. Prerequisites: course 181, additional prerequisites for each offering as announced in advance by department. Selections from families of formal languages, graph analysis, basic studies of mechanical and computer, context-free languages and their generalizations, parsing; multidimensional grammars, developmental systems; machine-based complexity. Subtopics of current interest. May be repeated for credit with consent of instructor and with topic change.

Ms. Greibach (F)

287A. Theory of Program Structure. Prerequisite: course 181. Models of computer programs and their syntax and semantics; emphasis on programs and recursion schemes; equivalence, optimization, correctness, and translatability of programs; expressive power of program constructs and data structures; selected current topics.

Ms. Greibach (F)

288S. Seminar in Theoretical Computer Science (2 units). Prerequisites: courses 290A, 291A, consent of instructor. Intended for students undertaking thesis research. Discussion of advanced topics and current research in such areas as algorithms and complexity models for parallel and concurrent computation, and formal language and automata theory. May be repeated for credit. S/U grading.

Ms. Greibach (F, W)

289A-289Z. Current Topics in Computer Theory (2 to 12 units each). Prerequisite: consent of instructor. Review of current literature in an area of computer theory determined by the instructor. Most topics have developed special proficiency as a consequence of research interests. Students report on selected topics.

M296A. Modeling Methodology for Biomedical Systems. (Formerly numbered M270C.) Prerequisite: course 170 or Electrical Engineering 142 or Mathematics 115A or Mechanical, Aerospace, and Nuclear Engineering 171C or equivalent. Foundations of multicompartmental, noncompartmental, and dynamic systems modeling methods. Special emphasis on their applications and limitations in the biomedical sciences and other limited data environments. Models for experiment design, data analysis, basic studies of mechanical and computer control (therapy) of biomedical processes. Model parameter estimation algorithms.

Mr. DiStefano (F)

M296B. Optimal Experimental Design and Control for Biological and Other Dynamic Systems. (Formerly numbered M270D.) Prerequisite: courses 272B and M296A, or consent of instructor. Theory and algorithms for designing optimal experiments for quantifying the parameters of models for control of dynamic systems in engineering and life sciences. Optimal sampling schedules for parameter estimation. Control optimization and variations for designing optimal test-inputs. Algorithms, software, and applications in medicine and engineering.

Mr. DiStefano (W)
Economics/System Science
(Interdepartmental)

For details on this undergraduate program, see Chapter 5 on the College of Letters and Science.

Electrical Engineering

Professors
Nicoilaos G. Alexopoulos, Ph.D., Chair
Frederick G. Allen, Ph.D.
A.V. Balakrishnan, Ph.D.
Ezio Biglieri, Dr.Eng.
Francis F. Chen, Ph.D.
Robert S. Elliott, Ph.D.
Harold R. Fettermann, Ph.D., Associate Dean
Stephen E. Jacobsen, Ph.D.
Nhan Levan, Ph.D.
Neville C. Luhrmann, Jr., Ph.D.
Kenneth W. Martin, Ph.D.
H. J. Orchard, M.Sc.
Yahya Rahmat-Samii, Ph.D.
Izhak Rubin, Ph.D.
Oscar M. Starlaud, Jr., Ph.D.
Gabor C. Temes, Ph.D.
Chand R. Viswanathan, Ph.D.
Kang-Lung Wang, Ph.D.
Paul K.C. Wang, Ph.D.
Donald M. Wilberg, Ph.D.
Alan N. Willson, Jr., Ph.D., Associate Dean
Kung Yao, Ph.D., Assistant Dean
Cavour W. Yeh, Ph.D.
Louis L. Grandi, M.S., Emeritus
Ellis F. King, M.S., Emeritus
Frederick W. Schott, Ph.D., Emeritus

Associate Professors
Chandrashekar J. Joshi, Ph.D.
Jia-Ming Liu, Ph.D.
Richard E. Mortensen, Ph.D.
Dee-Son Pan, Ph.D.
Denham S. Ward, M.D., Ph.D.
Jack Willis, B.Sc., Emeritus

Assistant Professors
Asad A. Abidi, Ph.D.
Richard L. Baker, Ph.D.
Rajeep Jan, Ph.D.
Henry Samuei, Ph.D.
Jason C.S. Woo, Ph.D.

Senior Lecturer
Vance C. Tyree, M.S.

Adjunct Professors
Richard C. Booton, Jr., Ph.D.
Paul T. Greiling, Ph.D.
Jimmy K. Omura, Ph.D.
William A. Peebles, Ph.D.

Adjunct Associate Professors
Siegfried G. Knorr, Ph.D.
Lawrence E. Larson, Ph.D.

Scope and Objectives

The Electrical Engineering Department emphasizes teaching and research in a variety of fields ranging from telecommunications and fiber optics to solid-state devices, circuits, materials growth, quantum electronics, antenna design, electromagnetics, digital systems, plasma diagnostics, and millimeter wave technology. In each of these fields, the department has state-of-the-art research programs exploring exciting new developments and is organized into nine major fields of study. Undergraduate students receive a B.S. degree in Electrical Engineering. Graduate research and training programs leading to the M.S. and Ph.D. degrees are also offered.

Laboratories are available for research in the following areas: analog and digital electronics, hybrid integrated circuits, integrated semiconductor devices, microwaves and millimeter waves, fiber optics, lasers and quantum electronics, and applied plasma physics. The department is also associated with the Center for High-Frequency and High-Speed Electronics, the Institute of Plasma and Fusion Research, and the Crump Institute for Medical Engineering, three research centers at UCLA.

Bachelor of Science in Electrical Engineering

The ABET-accredited electrical engineering curriculum gives an excellent background for either graduate study or employment. The two main objectives are (1) to provide a deep and fundamental education in electrical engineering as well as in basic sciences and mathematics and (2) to provide specialized education in one branch of the electrical engineering field so that the student develops expertise in that branch.

Students officially admitted to the electrical engineering major for Fall Quarter 1988 must fulfill the following requirements. Continuing students admitted prior to Fall Quarter 1988 and following a program in an earlier UCLA General Catalog may change to the program listed below.

The Major

Course requirements are as follows (189 minimum units required):

(1) Five core courses: Electrical Engineering 101, 102, 103, and two courses from Materials Science and Engineering 14, Civil Engineering 108, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A (or Chemical Engineering M105A), 105D.
Students officially admitted to the electrical engineering major for Fall Quarter 1988 must fulfill the following requirements. Continuing students admitted prior to Fall Quarter 1988 and following a program in an earlier UCLA General Catalog may change to the program listed below.

The Major
Course requirements are as follows (189 minimum units required):

(1) Five core courses: Electrical Engineering 101, 102, 103, and two courses from Materials Science and Engineering 14, Civil Engineering 108, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A (or Chemical Engineering M105A), 105D.

(2) Electrical Engineering 10, 110, 115A, 121A, 121B, 132A, 141, 161, Computer Science 151A; four two-unit courses selected from the laboratory courses offered by the Electrical Engineering Department, Computer Science 152B and, by petition only, Electrical Engineering 199; Mechanical, Aerospace, and Nuclear Engineering M192A and either Electrical Engineering 131A or a course in statistical mechanics; Mathematics 132.

(3) Any five major field elective courses (20 units) selected from those offered by the Electrical Engineering Department. With approval of the adviser, two may be selected from courses related to electrical engineering in other departments.

(4) English 3; Chemistry 11A, 11B/11BL; Computer Science 10C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

(5) Four courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement) AND three courses from History 1A, 1B, 1C, Humanities 1A, 1B, 1C, 2A, 2B, 2C (selection of a course in the Humanities 2 sequence precludes the corresponding course in the Humanities 1 sequence and vice versa; courses must be completed within your first 90 units). If you select one of the courses in the Humanities 2 sequence, you may replace English 3 with a second free elective.

Laboratories are available for research in the following areas: analog and digital electronics, hybrid integrated circuits, integrated semiconductor devices, microwaves and millimeter waves, fiber optics, lasers and quantum electronics, and applied plasma physics. The department is also associated with the Center for High-Frequency and High-Speed Electronics, the Institute of Plasma and Fusion Research, and the Crump Institute for Medical Engineering, three research centers at UCLA.

Bachelor of Science in Electrical Engineering
The ABET-accredited electrical engineering curriculum gives an excellent background for either graduate study or employment. The two main objectives are (1) to provide a deep and fundamental education in electrical engineering as well as in basic sciences and mathematics and (2) to provide specialized education in one branch of the electrical engineering field so that the student develops expertise in that branch.

Lower Division Course

Upper Division Courses
100. Electrical and Electronic Circuits. Lecture, four hours; recitation, one hour. Prerequisites: Mathematics 31A, 31B, 32A, 33A, 33B, Physics 8C. Electrical quantities, circuit principles, signal waveforms, AC circuits, semiconductor devices, small signal models, amplifiers, electrical and electronic instrumentation. Prerequisite: Mr. Samueli (F,W,Sp)

100L. Circuit Analysis Laboratory (2 units). Laboratory, four hours. Prerequisite or corequisite: course 100 or 115A. Experiments with circuits containing linear and nonlinear devices; transient and steady state behavior of circuits. Mr. Samue (F,W,Sp)

101. Engineering Electromagnetics. (Formerly numbered 100B.) Lecture, four hours; recitation, one hour. Prerequisites: Physics 8C, Mathematics 32A and 32B, or 33A and 33B. Electromagnetic field concepts; Maxwell's equations; static and quasi-static fields; field energy; energy flow and the Poynting vector; electromagnetic interactions; waves in unbounded media and on two-way transmission lines; reflection and refraction; lossy media; skin effect; analogs to electromagnetic fields. Mr. Alexopoulos (F,W,Sp)

103. Applied Numerical Computing. (Formerly numbered 124A.) Lecture, three hours; recitation, two hours. Prerequisites: Computer Science 10C, Mathematics 33A, 33B, or equivalent. An introduction to numerical computing techniques: matrix computations, root finding, solutions of initial and boundary value problems of ordinary differential equations, interpolation and approximation. Prerequisites: Mr. Jacobson (F,W,Sp)

110. Circuit Analysis II. Lecture, four hours; discussion, one hour. Prerequisite: course 10. Corequisite: course 102. Analysis of second- and higher-order linear circuits. RLC circuits, characteristic roots, phasors, impedance, network functions, poles and zeros, coupled inductors, convolution, application of Laplace transforms to linear circuits. Prerequisites: Mr. Levin (F,W,Sp)

111A. Basic Circuit Theory I. (Formerly numbered 110A.) Lecture, four hours; recitation, one hour. Prerequisites: Physics 8C, 8D (or may be taken concurrently). The zero-input, zero-state, transient, steady state, and complete response of first-order and second-order circuits. Linear time-invariant networks: step response, impulse response, convolution integral. Sinusoidal steady state analysis. Coupling elements and coupled circuits. The Laplace transform. Mr. Willson (F,W,Sp)
Design techniques, including economics, reliability, interactions, with emphasis on multistage amplifiers.

stage, single-stage amplifiers, compound transistor stages, recommended: course 115A. Experimental determination of the effect of feedback on single-stage amplifiers.

116. Communication Circuits. (Formerly numbered 115E.) Lecture, four hours; recitation, one hour. Prerequisites: courses 102, 115B. Signals and spectra. Signal distortion in transmission filters, transmission bandwidth requirements. Random signals and noise, linear modulation, exponential modulation circuits and characteristics. Commercial communication systems. Mr. Willis (F)

117. Introduction to Power Electronics. (Formerly numbered 116F.) Lecture, four hours; recitation, one hour. Prerequisites: courses 115B, 121A. Electrical and thermal characteristics of power semiconductor devices, including diodes, transistors, and thyristors, and their application to power conditioning, conversion, and distribution. Emphasis on device limitations and design considerations. Examples from power amplifiers (switched and linear), inverters, and DC and AC motor drives. Mr. Schott (F)

118. Integrated Circuit Components and Design. (Formerly numbered 116G.) Lecture, four hours; discussion, one hour. Prerequisites: courses 115B, 121A. Realization of active and passive components in integrated circuit design. Passive components: resistors, capacitors, and interconnections. Active devices: NPN and PNP BJTs, design rules; FET devices. Device interactions and layout rules. Mr. Abidi (F,W)

121A. Physical Principles of Semiconductor Devices. (Formerly numbered 1155D.) Lecture, four hours; discussion, one hour. Prerequisites: courses 10 or 100, and 101. Introduction to quantum mechanics and solid-state fundamentals. Introduction to the principles of semiconductor devices, survey of semiconductor device physics, principles of operation of p-n junctions. Mr. Allen, Mr. Viswanathan (F,W)

121B. Principles of Semiconductor Device Design. Lecture, four hours; discussion, one hour. Prerequisite: course 121A. Introduction to the principles of operation of bipolar and MOS transistors, equivalent circuit, high-frequency behavior, device modeling and circuit simulations. Mr. Allen, Mr. Viswanathan (W,Sp)

122AL. Semiconductor Devices Laboratory (2 units). (Formerly numbered 1155F) Laboratory, four hours. Prerequisites: course 121A. Design, fabrication, and characterization of junction, field effect, and other semiconductor devices. In particular students perform various processing tasks such as wafer preparation, oxidation, impurity diffusion, metalization, sintering, and photolithography. Mr. K. Wang (F,Sp)

122B. Solid-State Electronics Laboratory (2 units). (Formerly numbered 1155E) Laboratory, four hours. Prerequisite: course 124. Experimental measurement of electronic, magnetic, thermal, and optical properties of p- and n-type semiconductors as used in the design of devices. Mr. Allen (W)

123A. Fundamentals of Solid-State I. (Formerly numbered 1155A) Lecture, four hours; recitation, one hour. Prerequisite: junior standing in engineering. Introductory atom concepts, quantum mechanical principles, energy level in complex atoms, quantum statistics, crystal structure, energy levels in solids, band theory. Mr. Fettermann, Mr. Viswanathan (W,Sp)

123B. Fundamentals of Solid-State II. (Formerly numbered 1155B) Lecture, four hours; recitation, one hour. Prerequisite: course 123A. A discussion of the solid-state properties, lattice vibrations, thermal properties, dielectric and magnetic properties. Mr. Fettermann, Mr. Stafsudd (W)

124. Semiconductor Physical Electronics. (Formerly numbered 1232A) Lecture, four hours; recitation, one hour. Prerequisite: course 123B. Band structure of semiconductors, homogeneous semiconductors, excess carriers in semiconductors, semiconductor superlattices and quantum wires, interactions of photons with semiconductors and quantum wires, applications of quantum systems. Mr. Allen, Mr. Pan (Sp)

131A. Probability. (Formerly numbered 120A.) Prerequisites: Mathematics 32B, 33B. An introduction to the theory and application of probability, including random variables and vectors, distributions and densities, characteristic functions, limit theorems, preliminary concepts of stochastic processes. Mr. Mortensen, Mr. Rubin (F,W)

131B. Introduction to Stochastic Processes. (Formerly numbered 120B.) Prerequisites: courses 102, 131A. Introduction to the theory and application of stochastic processes, emphasizing stationary processes — properties and operations, mean-square estimation. Random and pseudorandom generation of processes with application to simulation. Elements of spectral analysis and FFT. Mr. Mortensen, Mr. Yao (Sp)

132A. Introduction to Communication Systems. (Formerly numbered 1232.) Lecture, four hours; discussion, one hour. Prerequisites: courses 102, 131A. Properties of signals and noise. Baseband pulse and digital signaling. Bandpass signaling techniques. Communication systems: design, transmission, frequency-division multiplexing and telephone systems, satellite communication systems, television. Performance of communication systems in the presence of noise. Mr. Baker (W)

136. Introduction to Optimization Techniques. (Formerly numbered 1292A.) Lecture, four hours; recitation, one hour. Prerequisites: course 103, Mathematics 32A, and 33A, or consent of instructor. Minimization of unconstrained functions of several variables; steepest descent, Newton-Raphson, conjugate gradient, and quasi-Newton methods. Rates of convergence. Methods for constrained minimization: introduction to linear programming, gradient projection and reduced gradient methods, Lagrangian methods. Students are expected to use the school's microcomputers. Mr. Aoki, Mr. Jacobsen (B)

141. Principles of Feedback Control. (Formerly numbered 1232A.) Prerequisites: courses 121A, 122B or consent of instructor. Classical methods of analysis and design of feedback control systems as applied to problems selected from engineering, biology, and related areas. Mr. F.K.C. Wang (W)

142. Linear Systems: The State-Space Approach. (Formerly numbered 1232A.) Prerequisite: course 122B. State-space methods of linear system analysis and design, with application to problems in networks, control, and system modeling. Mr. Wirberg (W)

161. Electromagnetic Waves. (Formerly numbered 117A) Lecture, four hours; discussion, one hour. Prerequisite: course 101. Review of transmission line theory; guided waves in enclosed waveguide and on surfaces; Smith chart; excitation of guided waves; phase and group velocity; cavity resonators; concept of Q; perturbation theory; waves in complex media (ferries, crystals, semiconductors, plasmas). Mr. Yeh (Sp)

162A. Antenna Design I. (Formerly numbered 117B) Lecture, four hours; recitation, one hour. Prerequisite: course 161. Retarded potentials. Actual and equivalent sources. Far-field patterns of dipoles, loops, and helices. Reciprocity, directivity, beamwidth, and sidelobe characteristics. F and H patterns. Design of linear arrays. Schelkunoff unit circle. Design of feeding networks. Array design including mutual coupling. Mr. Elliott (Sp)
162B. Antenna Design II. (Formerly numbered 117X.) Lecture, four hours; recitation, one hour. Prerequisites: course 162A. Radiation patterns of horns, slots, and patch antennas. Equivalent source representations. Synthesis of sum and difference patterns. Dolph-Chebyshev excitation. Design of slot arrays with multiple feeds. Design of traveling-wave antennas, reflectors, and lenses. Mr. Elliott (F)

163A. Introductory Microwave Circuits. (Formerly numbered 117Y.) Lecture, four hours; recitation, one hour. Prerequisite: course 161. Equivalent mode vol- tage/current representation of guided waves in arbitrary rectilinear structures. Design of matching obstacles, attenuators, phase shifters, directional couplers, hybrid junctions, isolators, circulators, and microwave filters. Mr. Elliott (W)

163B. Microwave and Millimeter Wave Active Circuits. (Formerly numbered 117D.) Prerequisite: course 161. Analysis of microwave and millimeter wave tubes such as klystrons, TWT, WAG, Magnetrons, and Gyrotrodes, and solid-state circuits for IMPATT, BARITTS, TUNNETS, Gunn effect devices, GaAs FETs, and bipolar transistors. Mr. Luhmann (W)

163C. Microwave Amplifiers. (Formerly numbered 117C.) Lecture, four hours; laboratory, three hours. Prerequisite: course 161. Design and fabrication of klystron, TWT, WAG, and Gunn devices for power levels up to 10 kW, power gain up to 40 dB, and frequency range of 2 to 300 GHz. Mr. Elliott (W)

164A. Electromagnetics Laboratory (2 units). (Formerly numbered 117L) Lecture, one hour; laboratory, four hours. Prerequisite: course 164A. The appli- cation of contemporary analytic design techniques to the design of microwave amplifiers and oscillators incorporating state-of-the-art components. Lumped and distributed microwave transmission lines (aluminum, copper, and GaAs MESFET). Mr. Luhmann (Sp)

165. Fiber Optics and Fourier Optics. (Formerly numbered 117E.) Lecture, four hours; discussion, one hour. Prerequisite: course 161. Theoretical as well as practical aspects of fiber optics. Fundamentals of single-mode fiber guides and multimode fiber guides. Fiber optic systems. Theory of diffraction of optical waves. Analysis of optical image-formation and processing systems. Mr. Yeh (Sp)

172. Introduction to Lasers and Quantum Electronics. (Formerly numbered 113A.) Lecture, four hours; recitation, one hour. Prerequisite: course 101 or equivalent or consent of instructor. Physical principles and applications of lasers and other quantum electronic devices. Interferometers, crystal optics, gain and saturation phenomena, and gas discharges. Mr. Stafsudd (F)

172L. Laser Laboratory (2 units). (Formerly numbered 113L) Laboratory, four hours. Prerequisite or corequisite: course 172 or consent of instructor. Properties of lasers, including saturation, mode-locking, and relaxation effects. Laser applications, including optics, modulation, communication, holography, interferometry, and nonlinear effects. Mr. Stafsudd (F)

182. Electrical Power Systems. (Formerly numbered 111A.) Lecture, four hours; recitation, one hour. Prerequisite: course 101A (100) or nonelectrical engineering majors. Overall electrical power system requirements; typical systems; one-line diagrams. Per- unit quantities; characteristics of machines; transform- er design; steady-state analysis of systems. Power limits and stability; fault calculations; relay and relay systems. (W)

183. Electromechanical Energy Conversion. (Formerly numbered 111B.) Lecture, four hours; recitation, one hour. Prerequisite: course 111A (100) for non-electrical engineering majors. Energy conversion and power flow in electromechanical interac- tions; electromechanics of actuators and rotating AC synchronous and induction machines and DC ma- chines. Linear machines. (Sp)

M185. Plasma Physics. (Formerly numbered M118.) (Same as Physics M122.) Prerequisite: course 101 or Physics 110A. Senior-level introduc- tory course to physics of plasmas and ionized gases and fundamentals of controlled fusion. Particle motion in magnetic fields; fluid behavior, plasma waves; resistivity and transport; equilibrium and stability; ki- netics. Green’s functions and eigenvalue problems. Discussion of laboratory experiments. Mr. Chen (F, even years; Sp)

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor. Individual in- vestigation of a selected topic to be arranged with a faculty member. Direct enrollment in department office. Only two units may be applied toward the degree; the two units must be approved by petition and can be used only as a replacement for a required Electrical Engineering laboratory course. Stu- dents may take additional 199 courses, but they may not be applied toward the degree. (F,W,Sp)

Graduate Courses

201S. Electrical Engineering Seminar (2 units). (Formerly numbered 201.) Prerequisite: graduate standing in engineering. Lectures on current re- search topics in electrical engineering. S/U grading. (F,W,Sp)

210A. Advanced Circuit Theory I. Prerequisites: course 111B, knowledge of linear algebra and com- plex function theory. State equations for linear cir- cuits. Characterization of n-ports and multimode electrical circuits. Introduction to and applications of the scattering matrix and related topics. Mr. Orchard (F)

211B. Active, Passive, and Digital Filters. (Formerly numbered 210D.) Prerequisite: course 211A or consent of instructor. Approximation theory. Realiza- tion of passive and digital filters. Development of active filters with lumped and/or distributed elements. Switched and digital filters. Mr. Orchard (Sp)

215A. Analog Integrated Circuits. (Formerly numbered 216A.) Prerequisite: course 115B. High-speed linear circuits. Low-level CMOS, current and cross-coupled, and switched capacitance circuits. Mr. Abdil, Mr. Martin (W)

215B. Advanced Digital Integrated Circuits. (Formerly numbered 216B.) Prerequisite: course 115C. Modern logic families (description, analysis, and comparison). MSI digital circuits (flipflops, registers, counters, PLAs, etc.). VLSI memories (RAMs, ROMs, CCDs, bubble memories, EPROMs, EEPROMs) and VLSI systems (microcomputers, PLAs, ACIAs, etc.). Mr. Martin (Sp)

215C. Advanced Integrated Circuit Design. (Formerly numbered 216C.) Prerequisites: courses 118, 215A, 215B. Integrated circuit and system consider- ations: optimization and high-frequency effects, yield, reliability. Competing integrated circuit technol- ogies: trade-off in materials and circuit design, special functions, hardware/software trade-off, integrated circuit design project. Mr. Martin (F)

215D. MOS Analog Integrated Circuit Design. (Formerly numbered 216F.) Prerequisites: courses 112, 121A, 215A. Recommended course 113. MOS technology and its limitations for analog ICs. MOS devices as analog circuit elements: MOSFET’s MOS channel and distributed channel models. Switch- ced-channel MOS devices. Switched-capacitor filter design. A/D and D/A converters. Modulators, oscillators, other communication circuits. Applications in signal processing systems. Circuit analysis using computers. Mr. Tenne (Sp)

M216A. LSI in Computer System Design. (Formerly numbered M258A.) (Same as Computer Science M258A.) Lecture, four hours; laboratory, four hours. Prerequisites: graduate standing in computer science or electrical engineering, consent of instructor. LSI VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. Mr. Viswanathan (F,W)

M216B-M216C. LSI in Computer System Design. (Formerly numbered M258B-M258C.) (Same as Computer Science M258B-M258C.) Lecture, four hours; laboratory, four hours. Prerequisites: graduate standing in computer science or electrical engineering, consent of instructor. LSI VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress grading. Mr. Petschek (W)

219A. Special Topics in Electrical Circuit Theory. (Formerly numbered 219D.) Prerequisite: course 210B or 211A or 211B. Advanced treatment of topics selected from research areas in electrical circuit theory.
21A. Physics of Semiconductor Devices I. (Formerly numbered 215A.) Prerequisite: course 121A. Physical principles and design considerations of junction formation; work function, band bending, basic semiconductor concepts and devices. Mr. Fetterman, Mr. K. Wang (W)

21B. Physics of Semiconductor Devices II. (Formerly numbered 215B.) Prerequisite: course 121A. Principles and design considerations of microwaves solid-state devices. Shockley barrier mixer diodes, IMPATT diodes, transferred electron devices, tunnel diodes, microwave transistors. Mr. Feitnerman, Mr. K. Wang (W)

22. Integrated Circuits Fabrication Processes. Prerequisites: courses 118, 212A. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion implantation, chemical vapor deposition, dry etching, lithography, and metallization. Introduction of advanced process simulation tools. Mr. Pan, Mr. Fetterman, Mr. K. Wang (W)

222. Integrated Circuits Fabrication Processes. Prerequisites: courses 118, 212A. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion implantation, chemical vapor deposition, dry etching, lithography, and metallization. Introduction of advanced process simulation tools. Mr. Pan, Mr. Fetterman, Mr. K. Wang (W)

223. Solid-State Electronics I. (Formally numbered 215A.) Prerequisites: courses 124 and 270, or consent of instructor. Fundamentals of solid-state electronics, electronic band structure of various elementary, compound, and alloy semiconductors, defects in semiconductors, recombination mechanisms, transport properties. Mr. Pan (F), Mr. Fetterman, Mr. K. Wang (W)

224. Solid-State Electronics II. (Formerly numbered 215B.) Prerequisite: course 223. Techniques to solve Boltzmann transport equation, various scattering mechanisms in semiconductors, high field transport properties in semiconductors, Monte Carlo method in transport. Optical properties. Mr. Pan (W, even years)

229. Seminars on Advanced Topics in Solid-State Electronics. (Formerly numbered 219B.) Prerequisite: courses 223, 224. Current research areas, such as radiation effects in semiconductor devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electron emission. Mr. Pan, Mr. Fetterman, Mr. K. Wang (W)

225. Advanced Electrical Engineering Seminar (2 units). (Formerly numbered 219X.) Prerequisite: successful completion of Ph.D. major field examination or consent of instructor. Seminar on current research topics in solid-state and quantum electronics (Section 1) or in electronic circuit theory and applications (Section 2). Students report on a tutorial topic and on a research topic in their dissertation area. May be repeated for credit. Mr. Pan, Mr. Fetterman, Mr. K. Wang (W, Sp)

230A. Estimation and Detection in Communication and Radar Engineering. (Formerly numbered 230A.) Prerequisite: course 131A or equivalent. Not open for credit to students with credit for former Systems Science 227A. Linear algebra, detection theory in communication and radar engineering. Random signal and noise characteristics by analytical and simulation methods; mean square (MS) and higher order properties of signals and algorithms; detection under ML, Bayes, and Neyman-Pearson (NP) criteria; signal-to-noise ratio (SNR) and error probability evaluations. Mr. Rubin (F)

230B. Digital Communication Systems. (Formerly numbered 230B.) Prerequisite: course 230A. Basic concepts of digital communication systems and applications; representation of bandpass waveforms; geometry and optimum receivers in white Gaussian noise; comparisons of digital modulation schemes; transmission over real channels; applications to satellite systems. Mr. Yao (Sp)

230C. Algorithms and Processing in Communication and Radar. (Formerly numbered 234.) Prerequisite: course 230A. Algorithms and processing for digital communication and radar systems. Optimization of detection theory and processing. Mr. Yao (Sp)

231A. Information Theory: Channel and Source Coding. (Formerly numbered 231.) Prerequisite: course 230A. Not open for credit to students with credit for former System Science 227B. Fundamental concepts of information theory with application to digital communications. Block and convolutional codes analyzed from both theoretical and practical implementation viewpoints. Channel coding and the theory of data compression (rate distortion theory). Mr. Baker (W)

231B. Error Control Codes and Cryptography. (Formerly numbered 236.) Prerequisite: course 231A. Introduction to Galois fields with applications to error control codes and cryptography. Linear block codes, cyclic codes, BCH codes, Reed-Solomon codes, and Goppa codes. Digital circuit implementation of encoders, decoders, and cryptographic systems. Conventional and public key cryptosystems and key management. Mr. Yao (Sp)

231C. Rate Distortion Theory and Source Coding Techniques. Prerequisites: courses 230A and 231A, or consent of instructor. Sources and distortion measures, the rate distortion function and its evaluation for discrete and continuous sources, source coding theorems, comparisons of practical coding systems to theoretical bounds, speech and image quantization. Mr. Baker (Sp)

231D. Spread Spectrum Communications. (Formerly numbered 235.) Prerequisite: course 231A. Spread spectrum digital communication systems for antijam and multiple-access applications. Basic design approach, models, and a general analysis for spread spectrum systems. Direct sequence spread binary-phase-shift keying (BPSK) and frequency-hopped multiple-frequency-shift keying (MFSK) signals and their use in spread spectrum direct/delay networks. Mr. Baker (Sp)

231E. Algebraic Coding Theory. (Formerly numbered 227F.) Prerequisite: course 231A. Fundamentals of linear or parity-check codes and decoding algorithms based on the algebraic theory of finite groups and fields; cyclic codes; Hamming; Reed-Muller, Bose-Chaudhuri-Hocquenghem, and Reed-Solomon codes, and corresponding decoding algorithms. Mr. Yao (Sp)

232A. Stochastic Modeling with Applications to Telecommunication Systems. (Formerly numbered 232.) Prerequisite: course 131A or equivalent. Not open for credit to students with credit for former Systems Science 227B. Introduction to stochastic processes as applied to the study of telecommunication systems and traffic engineering. Renewal theory; discrete-time Markov chains; continuous-time Markov jump processes. Applications to traffic and queuing analysis of basic telecommunication system models. Mr. Rubin (F)

232B. Telecommunication Switching and Queueing Systems. (Formerly numbered 237.) Prerequisite: course 232A. Not open for credit to students with credit for former System Science 227A. Queue modeling and analysis with applications to space-time digital switching systems and to integrated-service telecommunication systems. Fundamentals of traffic engineering and queueing theory. Queue size, waiting time, buffer blocking and stochastic process analysis for Markovian and non-Markovian models. Mr. Rubin (W)

232C. Telecommunication Architecture and Network Protocols. (Formerly numbered 236.) Prerequisite: course 232B. Analysis and design of integrated-service telecommunication networks and multiple-access procedures. Stochastic analysis of priority-based queueing system models. Queueing networks; network protocol architectures; error control; routing, flow, and access control. Applications to local-area, packet-radios and satellite, and computer communications networks. Mr. Rubin (Sp)

232D. Telecommunication Networks and Multiple-Access Protocols. (Formerly numbered 227T.) Prerequisite: course 232B. Performance analysis and design of telecommunication networks and multiple-access communication systems. Topics include telecommunication networks, signal access and processing, message delays, error/flow control, switching, routing, protocols. Applications to local-area, packet-radio, local-distribution, computer and satellite communication networks. Mr. Rubin (Sp)

232E. Graphs and Network Flows. (Formerly numbered 220G.) Prerequisite: course 136 or consent of instructor. Solution to analysis and synthesis problems which may be formulated as flow problems in capacity constrained (or cost constrained) networks. Development of tools of network flow theory using graph theoretic methods; application to communication, transportation, and transshipment problems. Mr. Jacobsen (W)

236A. Linear Programming. (Formerly numbered 272A.) Prerequisite: Mathematics 115A or equivalent knowledge of linear algebra. Basic graduate course in linear and combinatorial programming. The simplex method, duality, geometry, decomposition, complementary pivot theory, and quadratic programming; introduction to computational complexity theory. Mr. Jacobsen (Sp)

236B. Nonlinear Programming. (Formerly numbered 273.) Prerequisite: course 236A or equivalent. Basic analytical techniques; convexity; optimality criteria; differentiable and non-differentiable, convex sets and functions and their basic properties; Kuhn-Tucker points, saddle points, and non-linear programming and conjugate duality theory. Development of algorithms and convergence theory. Mr. Jacobsen (W)

236C. Optimization Methods for Large-Scale Systems. (Formerly numbered 272C.) Prerequisite: course 236B. Theory and computational procedures for decomposing large-scale mathematical programming problems. Generalized linear programming, decomposition algorithms, column generation, economic lot sizing, and transportation models. Development of algorithms and optimal control. Topics in nonconvex programming; minimizing concave functions on convex polyhedra, reverse convex programming. Mr. Jacobsen (Sp)

237. Dynamic Programming. (Formerly numbered 273A.) Prerequisite: course 232A. Introduction to the mathematical analysis of sequential decision processes. The finite horizon model in both the deterministic and stochastic cases. The finite horizon, infinite horizon and Markovian model. Methods of solution. Detailed example from inventory theory, finance, and transportation systems. Mr. Jacobsen (W)
239S. Topics in Communication. (Formerly numbered 227EA-227EZ.) Prerequisite: consent of instructor. Topics in one or more special aspects of communication systems, such as phase-coherent communication systems, optical channels, time-varying channels, feedback channels, broadcast channels, networks, coding and decoding techniques. May be repeated for credit with topic change.

239AS. Topics in Operations Research. (Formerly numbered 272BA-272BZ.) Prerequisite: consent of instructor. Treatment of one or more selected topics from areas such as integer programming; combinatorial optimization; network synthesis; scheduling, routing, location, and design problems; implementation considerations for mathematical programming algorithms; stochastic programming; applications in engineering, operations research, and economics. May be repeated for credit with topic change.

240A. Linear Dynamic Systems. (Formerly numbered 200A.) Prerequisite: course 142 or equivalent. State-space description of dynamic systems. Deduction of state spaces from input-output data. State controllability and observability. Stability and state feedback stabilizability; state observer.

Mr. Balakrishnan (F)

240B. Linear Optimal Control. (Formerly numbered 221.) Prerequisites: courses 141 or equivalent and 240A, or consent of instructor. An introduction to optimal control, with emphasis on detailed study of LQR, or linear regulators with quadratic cost criteria. Relating the application of control theory to the modeling and analysis of biological control systems, such as the respiratory system, cardiovascular system, and neuromuscular system. Emphasis on solving problems of current interest in biomedicine.

Mr. Ward, Mr. Wiberg (Sp)

240S. Topics in Control. (Formerly numbered 222EA-222EZ.) Prerequisite: consent of instructor. Thorough treatment of one or more aspects of control theory and applications, such as computational methods for optimal control; stability of linear control systems; identification; adaptive control; nonlinear filtering; differential games; applications to flight control, nuclear reactors, process control, biomedical problems. May be repeated for credit with topic change.

Mr. Alexopoulos, Mr. Yeh (F, 260A; W, 260B)

251. Microwave and Millimeter Wave Circuits. (Formerly numbered 217C.) Prerequisite: course 163A or consent of instructor. Rectangular and circular waveguides, microstrip, stripline, and dielectric waveguide distributed circuits, with applications in microwave and millimeter wave integrated circuits. Substrate materials, surface wave phenomena. Analytical methods for discontinuity effects. Design of passive microwave and millimeter wave circuits.

Mr. Alexopoulos (Sp)

Mr. Elliott (W, even years)

270. Quantum Electronics I. (Formerly numbered 213A.) Prerequisite: course 123A or consent of instructor. Review of quantum mechanics, approximation methods, interaction of radiation and matter. (F, even years)

Mr. Stafsudd (F)

271. Quantum Electronics II. (Formerly numbered 213B.) Prerequisite: course 270 or consent of instructor. Optical beams and resonators, interaction of light with atoms (including amplification and saturation), properties of lasers (including power output and mode effects). (W)

Mr. Stafsudd (W)

272. Quantum Electronics III. (Formerly numbered 213C.) Prerequisite: course 271 or consent of instructor. Properties of laser oscillators, including transient phenomena, quantum-mechanical effects, and behavior of high-gain laser media. (S)

Mr. Stafsudd (Sp)

273. Quantum Electronics IV. (Formerly numbered 213D.) Prerequisites: courses 127 and 270, or consent of instructor. Quantization of fields, nonlinear effects, optical susceptibilities, electro-optical and magneto-optical effects, sum-frequency, difference-frequency, and harmonic generation, parametric amplification and oscillation, simulated Raman and Brillouin scattering, four-wave mixing, self-focusing, current research topics in nonlinear optics.

Mr. Liu (W)

279S. Quantum Electronics Seminar (2 units). (Formerly numbered 213S.) Prerequisite: consent of instructor. Current research in quantum electronics, lasers, nonlinear optics, optoelectronics, ultrafast phenomena, fiber optics, and lightwave technology. May be repeated for credit. S/U or letter grading.

Mr. Liu (F, W, Sp)

285A. Plasma Waves and Instabilities. (Formerly numbered 214A.) Prerequisites: courses 101, and M185 or Physics M122. Wave phenomena in plasmas described by the macroscopic fluid equations. Emphasis on properties and applications of mag- netic fields. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydro- magnetic waves, whistlers and helicon waves, and their classification. Illustrative experiments.

Mr. Chen, Mr. Luhmann (W)

285B. Advanced Plasma Waves and Instabilities. (Formerly numbered 214B.) Prerequisites: courses M185, and 285A or Physics 222A. Interaction of intense magnetic fields with plasmas: waves in inhomogeneous and bounded plasmas, nonlinear wave coupling and damping, parametric instabilities, anomalous resistivity, shock waves, echoes, laser guiding. Emphasis on experimental considerations and techniques.

Mr. Chen, Mr. Luhmann (Sp)

Mr. Chen (W)

Mr. Chen (W)

M388. Fusion Reactor Technology and Design. (Formerly numbered M214E.) (Same as Mechanical, Aerospace, and Nuclear Engineering 135, 137.) Magnetic fusion reactor concepts and technological components, solid and liquid breeder blankets, reactor physics, fusion power plants, reactor design, radiation shielding, plasma confinement, reactor design and optimization. (W)

Mr. Chen (Sp)

Seminar in Engineering (2 to 4 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Students may organize in groups to work on advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

175. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: permission personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for current instruction. May be repeated for credit. S/U grading. (F, W, Sp)

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examination (2 to 16 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. S/U grading.
Scope and Objectives

At the heart of materials science is an understanding of the microstructure of solids. "Microstructure" is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about.

Materials engineering, on the other hand, is concerned with the design, fabrication, and nondestructive testing of engineering materials. Such materials must fulfill simultaneously dimensional, property, quality control, and economic requirements. Several manufacturing steps may be involved: (1) primary fabrication, such as solidification or vapor deposition of homogeneous or composite materials; (2) secondary fabrication, including shaping and microstructural control by operations such as mechanical working, machining, sintering, joining, and heat treatments; (3) nondestructive testing, which measures the degree of reliability of a processed part.

The department has recently initiated a program in electronic materials which provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

The undergraduate program leads to the Bachelor of Science degree in Materials Engineering. Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the department's materials engineering major. A joint major field, chemistry/materials science, is offered to students enrolled in the Department of Chemistry (College of Letters and Science). Several courses in the undergraduate curriculum also play an important role in one of the options of the manufacturing engineering program.

The graduate program allows for specialization in one of the following fields: science of materials, physical metallurgy and metal processing, mechanical metallurgy and deformation processing, and ceramics and ceramic processing.

Bachelor of Science in Materials Engineering

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and plastics, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

Course requirements are as follows (155 minimum units required):

1. Six core courses: Chemical Engineering M105A (or Mechanical, Aerospace, and Nuclear Engineering M105A), Civil Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 105D.

2. Materials Science and Engineering 140E, 141, 142A, 144A, 145A, 146A, 147A; 142L and 146L, plus four additional laboratory units from 143L, 144L, 145B (one unit of lab credit), 147L, Mechanical, Aerospace, and Nuclear Engineering 191A, M192A or Chemical Engineering M192A (satisfies the mathematics requirement); Civil Engineering 106A (satisfies the engineering economics requirement).

4. English 3; Chemistry 11A, 11B/11BL; Computer Science 10C or 10F; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL (physics labs are optional); one life sciences elective course.

5. A minimum of seven courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement, which also may be satisfied within the free electives).

6. Two free elective courses.

Graduate Study

For information on graduate admission to the materials science and engineering program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.
Upper Division Courses

M107A. Principles of Biotechnology. (Same as Psychology M153S.) Prerequisite: upper division standing. The principles of biological science developed in an engineering design context. Emphasis on how physiological, psychological, and sociological factors affect the integration of man into environment for informed and managed design through engineering design. Mr. Lyman (F,W,Sp)

140A. Materials Science of Semiconductors. Lecture, four hours; discussion, one hour. Prerequisite: course 14. Structure and properties of elemental and compound semiconductors. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications. Mrs. Haegel (F)

140B. Principles of Microelectronics Processing. Prerequisite: course 14 or equivalent. Description of basic semiconductor materials for device processing; preparation and characterization of silicon, III-V compounds, and films. Discussion of the principles of CVD, MOCVD, LPE, and MBE; metals and dielectrics. Mr. Yue (W)

140E. Materials Selection and Engineering Design. Prerequisites: courses 144A, 146A, 147A. Explicits guidance among the myriad materials available for design in engineering. Properties and applications of steels, nonferrous alloys, polymeric, ceramic, and composite materials, coatings, Materials selection, treatment, and serviceability emphasized as part of successful design. Project.

Mr. Sines (Sp)

141. Phase Relations In Solids. Prerequisites: course 14, Chemical Engineering M105A or Mechanical Engineering M105A. Summary of thermodometric laws, equilibrium criteria, solution thermodynamics, mass-action law, binary and ternary phase diagrams, glass transitions, and time-temperature-transformation diagrams. Mr. Wagner (F)

142A. Diffusion and Diffusion-Controlled Reactions. Prerequisite: course 141. Diffusion in metals and solid solutions; nucleation and growth theory; precipitation from solid solution, eutectoid decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth. Mr. Douglass (F)

142L. Diffusion and Diffusion-Controlled Reactions Laboratory (2 units). Corequisite: course 142A. Design of heat-treating cycles and performing experiments to study diffusion, growth of intermediate phases, recrystallization, and grain growth in metals. Analysis of data. Comparison of results with theory. Mr. Douglass (F,Sp)

143A. Mechanical Behavior of Materials. Prerequisite: course 14 or equivalent. Recommended: Civil Engineering 106. Plastic flow of metals under simple and combined bending, shear, and torsion; stress. Strain effects, dislocations, fractions, microstructural effects, mechanical and thermal treatment of steel for engineering applications. Mr. Sines (F,W,Sp)

143B. Failure Analysis of Materials. Prerequisite: course 142A or 147A. The analysis and prevention of failure based on design deficiencies, material selection, metallurgical defects, processing, and fabrication errors, improper service conditions. Relationship to heat treatment, corrosion, joining technology, and mechanical behavior. Engineering and legal aspects. Case histories. Mr. Douglass (Sp, even years)

143L. Mechanical Testing Laboratory (2 units). Laboratory, four hours. Prerequisite or corequisite: course 143A. Experimental techniques for the measurements of mechanical properties of engineering materials. Elastic constants, tensile, compression and bending testing, fracture toughness, fatigue and creep testing. Mr. Cho, Mr. Sines (W,Sp)

144A. Polymer Science. Prerequisite: consent of instructor. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, spring polymers, elastomers, adhesives. Fiber forming polymers, polymer processing technology, plasticization. Mr. Yang (W)

144L. Laboratory Experiments in Polymer Synthesis and Characterization (2 units). Prerequisites: course 144A or consent of instructor. Synthesis of addition and condensation type polymers. Polymerization kinetics. Characterization of polymer molecular weights, glass transition temperature and melting temperature. Glassy polymers and elastomers. Correlation of polymer structure and molecular weight with properties. Effect of polymer additives (e.g., plasticizers). Mr. Yang (Sp)

145A. Introduction to Materials Characterization A (Crystal Structure and X-Ray Diffraction of Materials). Lecture, three hours; laboratory, two hours. Prerequisite: course 14. Modern methods of materials characterization: fundamentals of crystallography, properties of X rays, X-ray diffraction; powder methods, Laue method; determination of crystal orientation and crystal structure; phase diagram determination; X-ray stress measurements; X-ray spectroscopy; design of materials characterization procedures. Mr. Wagner (F)

145B. Introduction to Materials Characterization B (Electron Microscopy). Lecture, three hours, laboratory two hours. Prerequisites: courses 14, 145A. Characterization of microstructure and microchemistry of materials; electron emission microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals; replicas; scanning electron microscopy: emissive and reflective modes; chemical analysis; electron optics of both instruments. Mr. Ardel (W)

146A. Introduction to Ceramics and Glasses. Prerequisite: course 14 or equivalent. An introduction to ceramics and glasses being used as important materials of engineering, process and unique properties. Examples of design and control of properties for certain specific applications in engineering. Mr. Mackenzie (F)

146B. Processing of Ceramics and Glasses. Prerequisite: course 145A or equivalent. A study of the processes used in fabrication of ceramics and glasses, relationship to structure and properties. Processing operations, including materials preparation, forming, sintering, and melting. Design of processing to achieve desired characteristics of structure, properties, and applications. Mr. Mackenzie, Mr. Pechenik (W, even years)

146F. Electronic Ceramics. Prerequisites: course 14, Electrical Engineering 100, or equivalent. The utilization of ceramics in microelectronics; thick film and thin film technology; ferroelectric ceramics; dielectric materials; preparation and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optic devices; optical wave guide applications and devices. Mr. Dunn (F, odd years)

146L. Laboratory in Ceramics (2 units). Laboratory, four hours. Prerequisite: course 146A or equivalent. Recommended corequisite: course 146B. Processing of common ceramics and glasses. Attainment of specific properties through process control for engineering applications. Quantitative characterization and selection of raw materials. Slip casting and extrusion of clay bodies. Sintering of powders. Glass melting and fabrication. Determination of chemical and physical properties. Mr. Mackenzie (Sp)

147A. Introduction to Metallurgy. Prerequisites: course 14, a course in thermodynamics. Introduction to metallic alloys used in engineering design. Metallurgical thermodynamics, phases in metal systems, phase diagrams, metal forming, steels and cast iron, nonferrous alloys, design of metallic alloys for specific applications. Mr. Bunshah, Mr. Wagner (W)

147E. Modern Process Metallurgy. Prerequisites: course 147A, and/or Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A. Modern process metallurgy used in extraction and refining of metals and alloys. The role of vacuum processing in modernizing and enlarging the scope of extractive metallurgy. Design of extractive and refining processes. Properties of vacuum-processed materials. Mr. Bunshah (W, even years)

147L. Manufacturing Processes Laboratory. Laboratory, eight hours. Prerequisite: course 147B. Experimental investigation, analysis, and design of metal forming processes (forging, rolling, extrusion, and forging). Force measurements and energy calculation in metal cutting. Experimental investigation of hot and isostatic pressing of powder. Mr. Shabaik (Sp)
148A. Structure and Properties of Composite Materials. Prerequisites: course 14, at least two courses from 143A, 144A, 146A, 147A. Relationship between structure and mechanical properties of composite materials with fiber and particulate reinforcement. Applications of composites. Properties of fiber, matrix, and interfaces. Selection of macrostructures and materials systems. Mr. Dunn (Sp).

149A. Materials and Structures in Nature and in Civilization. Lecture, two hours; laboratory, four hours. Prerequisite for undergraduates: equivalent of preparation in natural sciences and competency in English and mathematics expected of entering college freshmen; for graduate students: consent of instructor. Not open to engineering or physical sciences students. A far-reaching effort at understanding mechanical properties of materials, especially as embodied in structures both by nature and throughout history. Laboratory techniques to determine mechanical behavior of selected materials and structures. Individual experimental project; report and presentation. Mr. Klement (Sp).

149E. Ceramic Materials in History and Archaeology. Lecture, two hours; laboratory, four hours. Prerequisite: consent of instructor. A technical introduction to the origins and evolution of ceramics and related materials, with emphasis on fabrication processes and raw materials. Laboratory exercises aimed at the development of skills necessary for analytical studies (for students in the humanities and sciences).

180B. Machine and Systems Biotechnology. Prerequisite: course M107A or consent of instructor. Quantitative and qualitative methods for assessing man as a component in engineering design applications. Limits and optimality of human psychophysiological capabilities applied to display-control design, decision-making problems, and task definition; problems of man-machine interactions in large-scale systems. Mr. Lyman (Sp).

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor. Individual investigation of a selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. (F,W,Sp)

Graduate Courses

240B. Principles of Materials Science B (Structure of Materials). Prerequisite: course 145A or equivalent. Atomic, electronic, and crystallographic structure of materials; particle and waves, free electron model, bound electrons in solids; crystal structure, real and reciprocal lattices; amorphous solids, kinematical theory of scattering, electrons in a periodic potential, pseudopotentials, conduction of electrons in solids. Mr. Dunn, Ms. Haegel (Sp).

241. Oxidation of Metals. Prerequisite: course 141 or equivalent or consent of instructor. The kinetics and mechanisms of oxidation of metals, theories of reaction and phase boundary reactions. Nucleation of reaction products, defect structure of oxides, crystal structure and morphology of oxide films, factors influencing adherence of surface films. Mr. Douglas (W).

242A. Plasticity Theory Applied to Metalworking I. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 158A. Fundamental concepts describing the mechanics of plastic deformation of homogenous solids. Yield criteria. Methods of solution, including slip line field, of problems involving plastic deformation, with examples involving plane strain and axisymmetric deformation. Extrusion problem. Application of methods of solution. Mr. Shabanik (F, odd years).

242B. Material Removal Processes. Prerequisite: course 147B. Classification of material removal processes; single-point, multipoint, and abrasive material removal operations; mechanics of orthogonal and oblique machining; stress, strain, strain rate, and temperature analyses; tool wear, tool life, and tool materials; optimization; automation; and NC machining. Mr. Shabanik (W).

242C. Structure of Structure Materials and Related Processes. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 158A or equivalent. The engineering and scientific aspects of crack nucleation, slow crack growth, and unstable fracture. Fracture mechanics, dislocation models, fatigue, fracture in reactive environments, alloy development, fracture-safe design. Mr. Ono (W, even years).

243B. Design for Fatigue Reliability. Prerequisites: one or more courses from 143A, Mechanical, Aerospace, and Nuclear Engineering 158A, and M158A, or equivalent. Prediction of fatigue life of machines, structures, and vehicles with statistical confidence. Design concepts and fabrication techniques to prevent premature failure. Long-cycle, long-life, and crack growth. Effects of environment, residual stress, over-stressing, and surface treatments. Air Force specifications. Mr. Sines (F, even years).

243C. Dislocations and Strengthening Mechanisms in Solids. Prerequisites: course 143A or Mechanical, Aerospace, and Nuclear Engineering 158A. Elastic and plastic behavior of crystals, the geometry, mechanics, and interaction of dislocations, mechanisms for yielding, work hardening, and fracture behavior. Mr. Ono (F, odd years).

244. Electron Microscopy. Prerequisite: course 145B or equivalent. Essential features of the electron microscope, geometry of electron diffraction, kinematical and dynamical theories of electron diffraction, including anomalous absorption, applications of theory to defects in crystals. Moiré fringes, direct lattice pictures. Mr. Ardel (Sp, even years).

245C. Diffraction Methods in Science of Materials. Prerequisite: course 145A or equivalent. Theory of the diffraction of waves (X rays, electrons, and neutrons) in crystaline and noncrystalline materials. Long- and short-range order in crystals, structural effects of plastic deformation, solid-state transformations, arrangements of atoms in liquids and amorphous solids. Mr. Wagner (Sp, odd years).

246A. Mechanical Properties of Nonmetallic Crystaline Solids. Prerequisite: course 146A. Material and environmental factors affecting the mechanical properties of nonmetallic crystaline solids, including adhesion, bonding and structure, thermal expansion, microstructural features, residual stresses, temperature, stress state, strain rate, and surface condition. Methods for evaluating mechanical properties. Mr. Mackenzie, Mr. Pechenik (W, odd years).

246B. Structure and Properties of Glass. Prerequisite: course 146A. Structure of amorphous solids and glasses; characterization methods of glass structure. Mechanical, electrical, and optical properties of glass and relationship to structure. Mr. Mackenzie (W, even years).

246D. Electronic and Optical Properties of Ceramics. Prerequisite: course 146A. Principles governing electronic properties of ceramic single crystals and glasses and effects of processing and microstructure of these properties. Electronic conduction, ferroelectricity, and photochromism. Ceramic ceramics, infrared, visible, and ultraviolet transmission. Unique applications of ceramics. Mr. Dunn, Mr. Mackenzie (Sp, even years).

247C. Advanced Solidification. Prerequisites: courses 141, 147A, or equivalent. Liquid state concept of constitutional supercooling; nucleation from the liquid; effect of solidification temperature; liquid and solidification transformation; fluid motion; interface morphology; eutectic growth; determination of phase diagrams. Students report on current topics in solidification research. Mr. Yue (Sp, even years).

248A. Experimental Methods in Materials Synthesis. Prerequisite: bachelor's degree in chemistry, physics, or engineering. Techniques used in materials synthesis temperature measurement, vacuum techniques, methods of heating and quenching, consolidation and refining of metals, crystal growth, thin film deposition and thick film deposition. Laboratory experiments and demonstrations. Mr. Bunshah (F).

248B. Deposition Technologies and Their Applications. Prerequisites: courses 146A, 147A, and 248A, or consent of instructor. Deposition methods used in high technology application. Theory and experimental details of physical vapor deposition (PVD), chemical vapor deposition (CVD), plasma spray, electrodeposition. Applications in semiconductors, chemical, optical, mechanical, and metallurgical industries. Mr. Bunshah (Sp, odd years).

248AA-248AZ. Seminars in Materials Science and Engineering (2 units each). Lectures on current research topics in materials science and engineering. May be repeated for credit. S/U grading.

250A. Analysis and Design of Composite Materials. Prerequisites: courses 143A, Electrical Engineering 165, Mechanical, Aerospace, and Nuclear Engineering 156A, or 158A. Mechanics of laminated composites, textile structural composites, strength and failure theory, fracture, fatigue and damage tolerance, environmental effects, microcomputer software for composites, analysis and design. Mr. Pang (F, odd years).

250B. Advanced Composite Materials. Prerequisites: course 148A and one course from 143A, Electrical Engineering 165, Mechanical, Aerospace, and Nuclear Engineering 156A, or 158A. Mechanics of laminated composites, textile structural composites, strength and failure theory, fracture, fatigue and damage tolerance, environmental effects, microcomputer software for composites, analysis and design. Mr. Yau (Sp, odd years).

280A. Advanced Biotechnology. Prerequisite: course 180B or Mechanical, Aerospace, and Nuclear Engineering 180A or consent of instructor. Review and analysis of contemporary bioscience research which bears on problems of engineering component and system design. Emphasis on methodological and scientific factors underlying man-machine-environment interactions. Mr. Lyman (W).
Mechanical, Aerospace, and Nuclear Engineering

5732 Boelter Hall, (213) 825-2855, 825-6041

Professors
Mohamed A. Abdou, Ph.D.
George E. Apostolakis, Ph.D.
Ivan Catton, Ph.D.
Andrew F. Charwat, Ph.D.
Robert W. Conn, Ph.D.
Vijay K. Dhir, Ph.D.
Peretz P. Friedmann, Sc.D., Chair
Nasr M. Ghoniem, Ph.D.
William E. Kastenberg, Ph.D.
Robert E. Kelly, Sc.D.
Cornelius T. Leondes, Ph.D.
Ajit K. Mal, Ph.D.
William C. Meecham, Ph.D.
Michel A. Meiklejohn, Ph.D.
Anthony F. Mills, Ph.D.
D. Lewis Minger, Ph.D.
Philip F. O'Brien, M.S.
David Okrent, Ph.D.
Gerard C. Pomraning, Ph.D.
Lucien A. Schmit, Jr., M.S.
Aly H. Shabaik, Ph.D.
George H. Sines, Ph.D.
Russell A. Westmann, Ph.D.

Emeritus Professors
Joseph S. Beggs, D. Ing.
Harry Buchberg, M.S.
Kurt Forster, Ph.D.
Walter C. Hurty, M.S.
Antony J. A. Morgan, Ph.D.
Russell R. O'Neill, Ph.D.
William T. Thomson, Ph.D.

Associate Professors
Claude G. Fleury, D.Sc.
James S. Gibson, Ph.D.
Peter A. Monkiewitz, Ph.D.
Daniel C. H. Yang, Ph.D.

Assistant Professors
Ann R. Karagopian, Ph.D.
Adrienne G. Lavine, Ph.D.
Vinod G. Mengle, Ph.D.
Denny K. Miu, Ph.D.
Zvi Shiller, Ph.D.

Lecturer
Alexander Samson, Ph.D., Senior

Adjunct Professors
R. Philip Hammond, Ph.D.
Rudolph X. Meyer, Ph.D.
Mitton S. Pietsch, Ph.D.
Robert J. Taylor, Ph.D.

Adjunct Associate Professors
Sukumar Chakravarty, Ph.D.
Charles L. Gustafson, Ph.D.

Adjunct Assistant Professor
James M. McDonough, Ph.D.

Scope and Objectives

The Mechanical, Aerospace, and Nuclear Engineering Department encompasses professional disciplines that are often divided into separate departments at other engineering schools. Curricula in aerospace engineering and mechanical engineering are offered on the undergraduate and graduate levels, while nuclear engineering is primarily a graduate program. The recent Conference Board of Associated Research Councils study ranked UCLA's mechanical engineering program ninth in the nation for both teaching and research.

Because of the scope of the department, faculty research and teaching cover a wide range of technical disciplines. Research in thermal engineering emphasizes basic heat and mass transfer processes as well as thermal hydraulics. Topics in the area of design, dynamics, and control include robotics, mechanism design, helicopter dynamics and aeromechanics, dynamics and control of large space structures. Studies in structural mechanics range from fracture mechanics and wave propagation, structural dynamics and aeroelasticity to structural optimization and synthesis, and mechanics of composite structures. In the area of fluid mechanics and acoustics, investigations are underway on combustion, flow instabilities, turbulence and thermal convection, aeroacoustics, and unsteady aerodynamics of turbomachines, helicopter rotors, and fixed-wing aircraft. Other areas of research include applied plasma physics and plasma technology, surface modification and coatings by plasma, fusion reactor design, experimental tokamak confinement physics; light water reactor safety; reliability and risk assessment methodology and application; societal risk management; and nuclear materials. The department also has research activity in computer-aided design and manufacturing.

At the undergraduate level, the department offers accredited programs leading to Bachelor of Science degrees in Aerospace Engineering and in Mechanical Engineering. The former includes opportunity to emphasize propulsion, aerodynamics, preliminary design, dynamics and control, or structures and space technology, while the latter includes opportunity to emphasize mechanical design, dynamics, and control; heat and mass transfer; power systems and thermal design; or manufacturing processes.

At the graduate level, the department offers programs leading to M.S. and Ph.D. degrees in Mechanical Engineering, Aerospace Engineering, and Nuclear Engineering. An M.S. in Manufacturing Engineering is also offered.
Bachelor of Science in Aerospace Engineering

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aerelasticity, dynamics, control and guidance, propulsion, and energy conversion.

Course requirements are as follows (188 minimum units required):

1. Eight core courses: Civil Engineering 108, Electrical Engineering 100, 102, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A, 105D.
2. Seven core courses: Materials Science and Engineering 147B, Mechanical, Aerospace, and Nuclear Engineering 131A, 132A, 150A, plus one course from 156A, 158A, 166A (or Civil Engineering 130), and two courses from 162A, M169A, 171A; Civil Engineering 106A (satisfies the engineering economics requirement); Mechanical, Aerospace, and Nuclear Engineering 162B and 162M (satisfy the design requirement); one mathematics course from Mechanical, Aerospace, and Nuclear Engineering 191A, M192A (recommended), 192B, 192C, 193A, 193B, or Electrical Engineering 103.
3. Eight laboratory units: Mechanical, Aerospace, and Nuclear Engineering 157, plus four additional units from one of the following subject areas:
   - Manufacturing Processes: Materials Science and Engineering 143L, 144L, 146L, 147L, Mechanical, Aerospace, and Nuclear Engineering 163L, 195L.
   - Mechanical Design, Dynamics, and Control: Civil Engineering 130F (two units of lab credit), 137L, Materials Science and Engineering 143L, Mechanical, Aerospace, and Nuclear Engineering 162C (two units of lab credit), 162L.
4. English 3; Chemistry 11A, 11B/11BL; Computer Science 10F; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL; one life sciences elective course.
5. A minimum of seven courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement).

Bachelor of Science in Mechanical Engineering

The ABET-accredited mechanical engineering program is designed to provide a basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers, with an option in mechanical design, dynamics, and control; power systems and thermal design; or manufacturing processes.

Course requirements are as follows (188 minimum units required):

1. Seven core courses: Civil Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A, 105D.
2. Eleven mechanical engineering core courses: Materials Science and Engineering 147B, Mechanical, Aerospace, and Nuclear Engineering 131A, 132A, 150A, plus one course from 156A, 158A, 166A (or Civil Engineering 130), and two courses from 162A, M169A, 171A; Civil Engineering 106A (satisfies the engineering economics requirement); Mechanical, Aerospace, and Nuclear Engineering 162B and 162M (satisfy the design requirement); one mathematics course from Mechanical, Aerospace, and Nuclear Engineering 191A, M192A (recommended), 192B, 192C, 193A, 193B, or Electrical Engineering 103.
3. Eight laboratory units: Mechanical, Aerospace, and Nuclear Engineering 157, plus four additional units from one of the following subject areas:
   - Manufacturing Processes: Materials Science and Engineering 143L, 144L, 146L, 147L, Mechanical, Aerospace, and Nuclear Engineering 163L, 195L.
   - Mechanical Design, Dynamics, and Control: Civil Engineering 130F (two units of lab credit), 137L, Materials Science and Engineering 143L, Mechanical, Aerospace, and Nuclear Engineering 162C (two units of lab credit), 162L.
4. English 3; Chemistry 11A, 11B/11BL; Computer Science 10F; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL; one life sciences elective course.
5. A minimum of seven courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement).

Graduate Study

For information on graduate admission to the mechanical, aerospace, and nuclear engineering programs and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

Lower Division Course

94. Introduction to Computer-Aided Design and Drafting. Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems. Students use one or more on-line computer systems to design and display various objects.

Mr. Melkanoff (F,Sp)

Upper Division Courses

102. Mechanics of Particles and Rigid Bodies. Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 33A, Physics 8A. Newtonian mechanics (statics and dynamics) of particles and rigid bodies. Fundamental concepts of mechanics. Statics, kinematics, and kinetics of particles and rigid bodies. Impulse-momentum and work-energy relationships. Applications.

Mr. Migon (F,W,Sp)

103. Elementary Fluid Mechanics. Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 32B, 33A, Physics 8B. An introductory course dealing with the application of the principles of mechanics to the flow of compressible and incompressible fluids.

Mr. Meecham (F,Sp)

*Unless taken as part of the core.
134. Fundamentals of Nuclear Power. (Formerly numbered 135A.) Prerequisite: junior standing. Introduction to the field of nuclear energy; elementary principles of nuclear systems; energy conversion systems; criticality and control; fuel cycle and environmental considerations. Mr. Kastenberg (F)

135. Nuclear Engineering. Prerequisite: course 135A or consent of instructor. Elementary nuclear reactor design, fuel cycle, and environmental considerations. Mr. Kastenberg (F)

136. Intermediate Fluid Mechanics. Prerequisite: course 103 or equivalent or consent of instructor. Pressure flow, compressible flow, and turbulence. Mr. Dhir (W)

137. Introduction to Fusion Engineering and Reactor Design. (Formerly numbered 136D.) Prerequisite: course 135 or consent of instructor. Fusion reactions, fuel cycle, and operating conditions. Magnetic and inertial confinement, tokamaks, magnetic mirrors, laser fusion, and target concepts. Mr. Dhir (W)

150A. Intermediate Fluid Mechanics. Prerequisite: course 103 or equivalent or consent of instructor. The basic equations governing fluid motion. Fundamental solutions of the Navier-Stokes equations. Lubrication theory. Mr. Kelly (F)

150B. Aerodynamics. Prerequisites: courses 103, 150A, or equivalent. Advanced aspects of potential flow theory. Incompressible flow around airfoils and bodies. Turbulent flow in pipes and boundary layers. Compressible flow: normal shocks, channel flow with friction or heat addition. Mr. Kelly (F)

150P. Jet Propulsion Systems. Lecture, four hours; laboratory, two hours. Prerequisites: courses 105A, 150A, or equivalent. Advanced thermodynamic properties of gases, aircraft jet engine components and cycle analysis, combustion systems, performance of rocket vehicles. Mr. Karagopian (F)

151. Performance of Vehicles. Prerequisites: courses 150A, 150B, or equivalent. Advanced thermodynamic properties of gases, aircraft jet engine components and cycle analysis, combustion systems, performance of rocket vehicles. Mr. Karagopian (F)

152A. Mass Transfer. Prerequisites: courses M105D, 131A. The principles of mass transfer by diffusion, convection, and radiation. Analysis of turbulent and laminar flows. Simultaneous heat and mass transfer. Applications including combustion of solids and volatile fuels, evaporation and condensation, aeration and transpiration cooling, gas absorption and catalysis. Mr. Mills (Sp)

153A. Theoretical Mechanics. Prerequisites: courses 103, 150A, 150D, Civil Engineering 108. Methods of analysis of and design for structures. Machines, simple and complex, and computer peripheral equipment. Mr. Yang (F)

154. Design of Aerospace Structures. Prerequisites: courses 154A, 168A. Design of aircraft, missile, and space vehicle components. Design of large scale structures. Mr. Friedmann (Sp)

154S. Design of Mechanisms and Mechanical Systems. Prerequisite: course 154A. The analysis and synthesis of mechanisms and mechanical systems, including both kinematics and dynamics aspects. Mechanisms from a wide range of applications, including automatic machinery, transportation systems, and computer peripheral equipment. Mr. Yang (F)
162B. Fundamentals of Mechanical System Design. Lecture, three hours; laboratory, three hours. Prequisite: course 162A, Civil Engineering 106A. Materials Science and Engineering 147B. Techniques of modern design and development of mechanical systems. Application and analysis of basic components and subsystems such as gears, bearings, hydraulic and pneumatic subsystems. The dynamics of connected machines. Students design a choice of their design. Mr. Yang (F,W)

162C. Electromechanical Systems Design Laboratory. Lecture, one hour; laboratory, five hours. Prequisite: course 162B or consent of instructor. Laboratory and design course for students interested in development of complex mechanical and electromechanical systems. Students, with consent of instructor, select a system which they develop, build, and instrument. Behavior of this system studied in detail. Mr. Yang (Sp)

162L. Computerized Machinery and Sensor Technology Laboratory. Laboratory, eight hours. Prequisites: course 157, upper division standing. Recommended: courses 162A, M169A, 171A. Hands-on experience with computer-controlled machines: the synergetic integration of computers, electromechanical actuators, and sensors. Emphasis on the effect of friction, backlash, hysteresis, etc. Introduction to the performance of electromechanical systems and the perception of real-world quantities (position, acceleration, force, vibration, etc.) with state-of-the-art sensors, including encoders, accelerometer, laser interferometer, machine vision, etc. Mr. Miu, Mr. Yang (Sp)

162M. Senior Mechanical Engineering Design. Lecture, one hour; laboratory, five hours. Prequisites: course 162B, Civil Engineering 106A, Materials Science and Engineering 147B. Must be taken during the last two quarters of the academic program. Students conceptualize, analyze, synthesize, and optimize group design projects. Consideration of constraints such as economics, safety, reliability, manufacturability, and social impact. Presentation, including a report with engineering specifications and drawings, made in competition among groups. Mr. Yang (Sp)

163. Dynamics and Control of Physical Systems. Prequisites: courses 155 or M169A (may be taken concurrently), 171A. Application of the principles of Dynamics and classical control theory to a wide range of physical systems, including simplified models of machines and electromechanical devices, space and ground transportation vehicles, and biomechanical systems. Mathematical modeling and computer simulation. Mr. Yang (Sp)

163B. Robotics Laboratory. Laboratory, eight hours. Prequisite: consent of instructor. Hands-on experience in programming and operating industrial robots. Research projects in industrial applications in robotics systems, languages, sensory systems, and artificial intelligence. Mr. Shiller (F)

166A. Analysis of Flight Structures. (Formerly numbered M166.) Prequisite: Civil Engineering 106F or introduction to the Laplace transformation; application to electrical and mechanical problems, convolution, type integral equations, difference equations, and similarity principles for solving certain nonlinear partial differential equations. Complex variable theory, contour integrals, residues; application to transform inversion and partial differential equations. Mr. Ghoniem (W,Sp)

169A. Introduction to Mechanical Vibrations. (Same as Civil Engineering M107.) Prequisites: computer experience and M169A. Introduction to the Laplace transformation; application to mechanical problems, convolution, type integral equations, difference equations, and similarity principles for solving certain nonlinear partial differential equations. Complex variable theory, contour integrals, residues; application to transform inversion and partial differential equations. Mr. Mihora (W,Sp)

171A. Introduction to Feedback and Control Systems: Dynamic Systems Control I. Prequisite: course 191A or M192A or Electrical Engineering 102 or equivalent. Introduction to feedback principles, control systems design, and system stability. Modeling of physical systems including electric circuits, mechanical systems, electrical circuits, control design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design. Mr. Fleury (F,W)

171C. Dynamic Systems Control II. Recommended prerequisite: course 171A or Electrical Engineering 141. State-space models of continuous and discrete-time dynamic systems. Linear algebra of systems; vector spaces; geometric concepts; transformations; matrices; canonical forms. Stability. Controllability and observability. State representation of non-linear systems; linearization. Emphasis on modeling control applications, and computer-aided design and simulation. Mr. Leondes (F,W)

175. Applications of Probabilistic Risk Analysis. (Formerly numbered M195A.) Prequisite: consent of instructor. Applications of probabilistic models for failure and fault propagation, and system safety analysis. Application and model of models for source terms, dispersion, dose-response relationships, and cost-benefit relationships. Emphasis on several case studies of large systems (nuclear power plants, energy systems, and high-level radioactive waste). Mr. Kastenberg, Mr. Okrent (Sp)

180A. Environmental Biotechnology. Prequisite: Materials Science and Engineering M107A or consent of instructor. Physical, chemical, and biological processes and systems, and the conceptual interactions of the interaction between man and thermal, atmospheric, radiant, and mechanical agents and energies in the environment. Biological and physical requirements for the biochemical and energy systems of the environment; applications to complex systems. Mr. O'Brien
Graduate Courses

210. Mechanical, Aerospace, and Nuclear Engineering Seminar (2 units). Prerequisite: graduate standing in engineering. Lectures on current research topics in mechanics and structures. May be repeated for credit. S/U grading.

Mr. Friedmann

Mr. Melkanoff

213A. Convective Heat Transfer Theory. Prerequisite: course 131A. The conservation equations for flow of real fluids. Analysis of heat transfer in laminar and turbulent, incompressible and compressible flows. Internal and external flows; free convection. Variable wall temperature; effects of variable fluid properties. Analogies among convective transfer processes. Ms. Lavine

Mr. Pomraning

Mr. Dhir

213D. Application of Numerical Methods to Transport Phenomena. Prerequisite: course 132A or consent of instructor. Numerical techniques for solving selected problems in heat and mass transfer. Applications include free convection, boundary layer flow, two-phase flow, separated flow, flow in porous media. Effects of concentration and temperature gradients, chemical reactions, radiation, electric and magnetic fields.

Mr. Dhir

Mr. Dhir

231F. Advanced Heat Transfer. Prerequisite: course 231A. Advanced topics in heat transfer from the current literature. Linear and nonlinear theories of thermal and hydrodynamic instability; variational methods in transport phenomena; phenomenological theories of turbulent heat and mass transport.

Mr. Catton

232B. Advanced Mass Transfer. Prerequisites: courses 131A, 132A. The formulation of the general convective heat and mass transfer problem, including equilibrium and nonequilibrium flow, and nonsimilar solutions for laminar flows; solution procedures for turbulent flows. Multicomponent diffusion. Application to the hypersonic boundary layer, ablation and transpiration, cooling combustion.

Mr. Mills

233B. Reactor Reactor Theory. Prerequisites: courses 135, 192A. The underlying physics and mathematics of nuclear reactor (fission) core design. Diffusion theory, reactor kinetics, slowing down and thermalization, multipgroup methods, introduction to transport theory.

Mr. Pomraning

Mr. Conn, Mr. Pomraning

235C. Methods of Nuclear Reactor Analysis. Prerequisite: course 235A or consent of instructor. The analysis of nuclear reactor systems by approximation techniques, analytical methods, and numerical methods. A synthesis of reactor physics and engineering, with applications to various systems.

Mr. Pomraning

236A. Nuclear Materials Engineering. Prerequisites: course 135 and Materials Science and Engineering 143A, or consent of instructor. Materials requirements for nuclear technologies; radiation effects on mechanical properties, void swelling and creep, fuel and solid breeder swelling and restructuring, gas release, computer codes for swelling and gas release, structural analysis of fission and fusion materials including radiation effects.

Mr. Glynos

236B. Radiation Effects and Applications in Advanced Technologies. Prerequisites: courses 135 and 192A, or consent of instructor. Fundamentals of radiation damage; atomic collision energy, and loss of energetic ions, atom displacement, the collision cascade. Bulk and surface effects of radiation; applications of radiation effects to fusion materials, microelectronic materials, and thin films and materials technologies.

Mr. Glynos

236C. Nuclear Reactor Safety. Prerequisites: courses 235A, 235B, 235C, or consent of instructor. Safety-related characteristics of thermal and fast nuclear power reactors; design criteria and siting considerations; methods of accident analysis; general risk considerations. Analysis of specific accidents; anticipated transients without scram, loss-of-coolant accidents, and reactivity transients.

Mr. Oktar

236D. Probabilistic Risk Assessment. Prerequisite: course 236A. Basic concepts of risk benefit probability—high consequence events; methods for the evaluation of risk; fault/event tree analysis; dependent failures; data evaluation; decision theory; applications to large technological systems (e.g., nuclear power reactors, chemical process systems, dams, etc.).

Mr. Apostolakis

236E. Advanced Problems in Reactor Design. Prerequisites: at least four courses from 235A, 235B, 235C, 236A, 236B, 236C, 239D. Methods of attack and solution for advanced problems in reactor design, including fuel elements, power reactor cores, pulsed reactors, fuel cycle and fuel management, thermal-hydraulic, shielding, and safety.

Mr. Kastenberg

Mr. Conn

Mr. Conn

M237C. Fusion Reactor Technology and Design. (Same as Electrical Engineering M288.) Prerequisites: courses 135, 137. Magnetic fusion reactor concepts and technological components, solid and liquid breeder blankets, control systems, fusion reactors, chemical process systems, radiation shielding, magnets, system design and optimization.

Mr. Abdou

239BA-239BZ. Seminar: Current Topics in Transport Phenomena (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, student presentations, and projects in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

(F,S,W)

239DA-239DZ. Seminar: Current Topics in Nuclear Engineering (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, student presentations, and projects in areas of current interest in nuclear engineering. May be repeated for credit. S/U grading.

239FA-239FZ. Special Topics in Transport Phenomena (2 to 4 units each). Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced and specialized study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurement techniques. May be repeated for credit with topic change.

(F,S,W)
252A. Advanced Dynamics. Prerequisites: courses 155 and M169A, or consent of instructor. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to a term paper or an oral presentation (possible help from guest lecturers).

256C. Plasticity, Creep, and Thermal Stresses. Prerequisite: course 156A or 158A or consent of instructor. Incremental plastic strain-stress relations. Stress-strain analysis of various classes of structures. Kinematic analysis. Unification of plastic strain, creep strain, and thermal strain. Elastic-plastic, and creep analyses of beams, columns, shafts, frames, and plates.

256D. Analytical Fracture Mechanics. Prerequisites: courses 156A, 158A, or 166A, and Materials Science and Engineering 243A. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells.

256E. Turbulent Flows. Prerequisite: course 150A or 166A or consent of instructor. Review of turbulence theory; turbulence in unbounded media; reflection and refraction of plane elastic waves; surface waves and guided waves in multilayered media; waves generated by concentrated loads; radiation from dislocations; attenuation; representative applications in engineering and seismology.

256F. Topics in Fluid Mechanics and Thermal Science. Prerequisite: consent of instructor. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to a term paper or oral presentation (possible help from guest lecturers).

256G. Seminar on Advanced Topics in Fluid Mechanics. Prerequisite: consent of instructor. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to a term paper or an oral presentation (possible help from guest lecturers).

256H. Seminar on Advanced Topics in Solid Mechanics. Prerequisite: consent of instructor. Advanced study of various fields of solid mechanics on topics which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids.

260AA-260ZZ. Seminar: Current Topics in Mechanical Engineering (2 to 4 units each). (Formerly numbered 259AA-259ZZ.) Prerequisite: consent of instructor. Lectures, discussions, and student presentations and projects in areas of current interest in mechanical engineering. May be repeated for credit, S/U or letter grading.

262A. Advanced Mechanics and Mechanical Systems. Prerequisite: course 162A. The kinematic analysis and synthesis of mechanisms and mechanical systems, with special emphasis on use of modern analytical methods. The use of computer techniques, with a broad group of example systems.

Mr. Yang (Sp)
263A. Dynamics and Control of Machines and Electromechanical Systems. Prerequisite: course 163 or consent of instructor. The analysis of complex machines and electromechanical systems. Emphasis on the design, implementation, and analysis of algorithms and methods for solving boundary value problems of optimal control. Applications in various fields.

Mr. Friedmann, Mr. Mingori (Sp, even years) 263C. Motion and Control of Industrial Robots. Prerequisite: course 163A or consent of instructor. Theory and implementation of industrial robots. Design considerations. Kinematic structure, modeling, trajectory planning, and systems dynamics. Control concepts and control computer algorithms.

Mr. Yang (W) M267A. Optimum Structural Design. (Same as Civil Engineering M240.) Prerequisite: course 261A or Civil Engineering 235A or consent of instructor. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization, application to aerospace and civil structures.

Mr. Felton, Mr. Schmit (W) M268B. Failure of Structural Systems. Prerequisite: Civil Engineering 165B. Philosophy of structural safety; Principles of design for prevention of failure (other than buckling). Fatigue, brittle failure, delayed cracking, creep, design of efficient joints, environmental effects. Emphasis on current problems in actual structures.

Mr. Sines (F) M269A. Dynamics of Structures. (Same as Civil Engineering M237A.) Prerequisite: course M169A. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation.

Mr. Friedmann (F) M269B. Advanced Dynamics of Structures. Prerequisites: course M269A, Civil Engineering 265A. Analysis of linear and nonlinear response of structures to dynamic loadings. Stresses and deflections in structures. Structural damping and self-induced vibrations.

Mr. Friedmann (W) M269C. Introduction to Probabilistic Dynamics. (Same as Civil Engineering M237C.) Prerequisite: course M169A. Response of structural and mechanical systems to random vibrations. Stationary and nonstationary excitations. Response of systems with random parameters. Discrete and continuous linear systems. Applications to earthquakes, wind sway of buildings, gust response, vibrations due to gearing inaccuracies, train vibrations.

Mr. Friedmann (Sp, even years) M269D. Aeroelastic Effects in Structures. Prerequisite: course M269A. Presentation of field of aeroelasticity from unified viewpoint applicable to flight structures, suspension bridges, buildings, and other structures. Derivation of aeroelastic operators and unsteady loadings from governing variational principles. Flow induced instability and response of structural systems.

Mr. Gibson, Mr. Mingori (F) 271B. Dynamic Systems Stochastic Estimation and Control. Prerequisites: courses 171C, 193A, and 271A, or consent of instructor. Applied treatment of optimal state estimation and stochastic control problems for continuous and discrete-time dynamic models with state-space descriptions. Kalman filtering, smoothing, and prediction algorithms. Stochastic optimal controllers; the separation principle. Emphasis on efficient numerical computations. Applications in various fields.

Mr. Leondes (W) 271C. Dynamic Systems Identification, Stability, and Adaptive Control. Prerequisite: course 271A or consent of instructor. Recommended: course 271B. Nonlinear system stability. Dynamic systems modeling, identification, and parameter estimation techniques. Combined identification and control and self-adaptive control.

Mr. Leondes (W) M291D. Seminar and Special Topics in Dynamic Systems Control. Prerequisite: consent of instructor. Seminar on current research topics in dynamic systems modeling, control, and applications. Topics selected from process control, differential games, non-linear estimation, adaptive filtering, industrial and aerospace applications, etc.

Mr. Gibson (Sp) 291C. Integral Equations in Engineering. Prerequisite: Mathematics 250B. Introduction to generalized function theory and Green’s functions. Conversion of partial equations to integral equations and classification of integral equations. Solution to integral equations with degenerate kernels; discussions of successive approximations and Fredholm and Hilbert-Schmidt theory.

Mr. Westman (Sp) M295A. Computer-Aided Manufacturing. Prerequisites: course 163C, 163L, 195L. Analysis of the use of the computer in manufacturing. Manufacturing information systems; group technology; computer-aided manufacturing process planning; flexible manufacturing systems.

Mr. Melkanoff (F) M295B. Computer-Integrated Manufacturing. Prerequisite: course 295A. Systems analysis and design of computer-integrated manufacturing, including automated factories and flexible manufacturing systems.

Mr. Melkanoff (W) M298. Seminar in Engineering (2 to 4 units). Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Seminar may be organized in advanced technical fields. If appropriate, field experience may be arranged. May be repeated with topic change.

Mr. Yang (Sp) M297A. Field Project in Manufacturing Engineering. Lecture, 1 to 2 units. Prerequisite: consent of instructor. Teams of students perform detailed system analysis and plan the design of manufacturing engineering systems at various manufacturing plants. In progress grading.

Mr. Melkanoff (W, F)
Schoolwide Programs, Courses, and Faculty

Schoolwide Programs, Courses, and Faculty

6426 Boelter Hall, (213) 825-2473

Bachelor of Science in Engineering

Bioengineering Major Field

The bioengineering major field is an interdepartmental program leading to an ABET-accredited Bachelor of Science degree in Engineering that may soon be replaced by several new programs in this area. Therefore, applicants may not be admitted to this major but may have an opportunity to pursue one of the new alternatives. For further information, contact the Associate Dean, Student Affairs, 6426 Boelter Hall.

Graduate Study

For information on graduate admission to the schoolwide engineering programs and requirements for the M.S., Engineer, and Ph.D. degrees and certificate of specialization, see "Graduate Study" at the beginning of this chapter.

M.A.-Latin American Studies/ M.S.-Engineering

The school and the Latin American Studies Program have established an articulated degree program through which students may complete requirements for the M.S. in Engineering and the interdepartmental M.A. in Latin American Studies. After successful completion of the program, students are awarded both degrees simultaneously. Articulated programs do not allow course credit to be applied toward more than one degree.

Lower Division Courses

11. Patterns of Problem Solving. An introduction to patterns of reasoning in the process of problem solution and decision making. Exposure to concepts, theories, and techniques in the analysis and synthesis of total systems in our complex technological civilization.

12. Applied Patterns of Problem Solving. Prerequisite: course 11. An application of the tools and methods discussed in course 11 to three specific problems of a social and technical nature.

Upper Division Courses

106C. Experimental Design Laboratory. Laboratory eight hours. Prerequisite: course 106B or equivalent. Creative experimental projects for student designs in any engineering domain where individual students have preparation and interest, exemplifying the professional method. Predicted idealized performance compared to experimentally achieved realities. Student prize competition entries encouraged.

106D. Engineering Systems Design Laboratory. Laboratory, eight hours. Prerequisites: course 106C, advanced senior standing. Similar to course 106C and normally a continuation thereof. Design projects generally emphasizing productivity, energy, environments, and process cost-benefit studies.

109. The Engineer and Society. Prerequisite: senior standing. Selected lectures, discussions, oral and written reports related to creative engineering, its sociological and ecological impacts, present, future, and past relationships. Maximum student participation in topical selection and class structuring. Creativity and original thinking emphasized.

Graduate Courses

375. Teaching Apprentice Practice (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

470A-470D. The Engineer in the Technical Environment (3 units each). Limited to students in the Engineering Executive Program. Theory and application of quantitative methods in the analysis and synthesis of engineering systems for the purpose of making management decisions. Optimization of outputs with respect to dollar costs, time, material, energy, information, and manpower. Case studies and individual projects.

471A-471C. The Engineer in the General Environment (3 units, 3 units, 1 1/2 units). Limited to students in the Engineering Executive Program. Influences of human relations, laws, social sciences, humanities, and fine arts on the development and utilization of natural and human resources. The interaction of technology and society past, present, and future. Change agents and resistance to change. In Progress grading for courses 471B-471C only.

472A-472D. The Engineer in the Business Environment (3 units, 3 units, 3 units, 1 1/2 units). Limited to students in the Engineering Executive Program. The language of business for the engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of the firm, the community, and the nation, provided through cooperation and participation with California business corporations and government agencies. In Progress grading (credit to be given on completion of courses 472B and 472D).

Emeritus Professors

Edward P. Coleman, Ph.D.
J. Morley English, Ph.D.
Warren A. Hall, Ph.D.
Alfred C. Ingersoll, Ph.D.
Herbert B. Nottage, Ph.D.
Arthur F. Pillsbury, Engineer
Bonham Spence-Campbell, E.E.

473A-473B. Analysis and Synthesis of a Large-Scale System (3 units each). Recitation, two and one-half hours. Limited to students in the Engineering Executive Program. A problem area of modern industry or government is selected as a class project, and its solution is synthesized using quantitative tools and methods. The project also serves as a laboratory in organization for a goal-oriented technical group. In Progress and S/U grading.

Mr. O'Neill

495. Teaching Assistant Training Seminar. Prerequisites: graduate standing in engineering, appointment as a teaching assistant. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean; and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

Schoolwide Engineering Faculty

Professor

Allen B. Rosenstein, Ph.D.

Emeritus Professors

Bonham Spence-Campbell, E.E.
In recent years Los Angeles has emerged as a dominant and growing center of finance and trade, reflecting the continued shift of the national agenda west to the Pacific Rim and south toward Mexico and Latin America. This growth of intense commercial activity has been linked to important developments in the arts, sciences, and communications, producing a regional culture of great ethnic diversity, energy, and momentum. The UCLA Graduate School of Architecture and Urban Planning (GSAUP) is playing an important role in understanding these changes and contributing to their direction.

Professional education and research are the central concerns of GSAUP. Our belief is that a focused curriculum in architecture and urban planning can make a great contribution to professional education, under conditions of rapid professional change and experimentation. The school has created the Urban Innovations Group (UIG) as an independent, nonprofit, professionally managed practice arm where faculty and students undertake projects on a contract basis. To supplement the classroom experience and to help bring the public and the professional community into active relationship with the school, a series of public lectures and various exhibits are scheduled throughout the academic year.

A noted regular faculty is supplemented by distinguished visitors, while the student body is international in character. Developed as a small school with an enrollment of 350, GSAUP encourages close interaction between faculty and student to maximize the educational experience.

Graduate School of Architecture and Urban Planning

1317 Perloff Hall, (213) 825-3791

The Graduate School of Architecture and Urban Planning (GSAUP) at UCLA offers programs of study leading to the degrees of Master of Architecture (M.Arch.), M.A. in Architecture, M.A. in Urban Planning, Ph.D. in Architecture, and Ph.D. in Urban Planning. Currently, the school offers educational opportunities for a broad spectrum of careers, including a number that are not yet common in practice, but which reflect emerging social needs. It offers a choice of two major programs: Architecture/Urban Design and Urban Planning.

Architectural and Urban Design

Barton Phelps, M.Arch.
Robert J. Yudell, M.Arch.

Scope and Objectives
Architecture/Urban Design at UCLA offers four degree programs tailored to the needs of different groups of students: M.Arch. I, M.Arch. II, M.A., and Ph.D.

M.Arch. I is a three-year first professional degree program which is accredited by the National Architectural Accrediting Board (NAAB). It does not assume any prior background in architecture. Students who do have some prior architecture background (e.g., a four-year undergraduate degree) may also enter the program and may petition to waive certain required courses and substitute more advanced electives in their place. M.Arch. I graduates normally pursue professional careers in architectural practice.

M.Arch. II is an advanced professional degree program for students who already hold a first professional degree in architecture. It provides opportunities for intensive concentration in a variety of areas of professional specialization.

The M.A. and Ph.D. degree programs provide opportunities to pursue research and scholarship in the field of architecture. Graduates typically pursue academic or applied research and consulting careers.

Master of Architecture I

Admission
The M.Arch. I program is open to students holding a bachelor’s degree (or its equivalent) comparable in standards and content to a bachelor’s degree from the University of California. Applications are accepted from students with a variety of backgrounds. No academic or experiential training in architecture is required, although some students have had experience in the field prior to admission.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a “creative” portfolio. No admission tests are required. In addition to the application for graduate admission, applicants should submit the “Departmental Supplement,” available from the Admissions Office, Architecture/Urban Design, Graduate School of Architecture and Urban Planning, B315 Perloff Hall, UCLA, Los Angeles, CA 90024-1467.

For information on the proficiency in English requirements for international graduate students, refer to “Graduate Admission” in Chapter 3.

Major Fields or Subdisciplines
No in-depth specialization is required within the context of the M.Arch. I program. However, you are required to concentrate several elective courses within a single curricular area. A minimum of three elective courses must be taken within this curricular area, including two courses in theory and one studio application, during the second year of study.

Specializations are currently available in the following areas: urban design; policy, programming, and evaluation (including social building); technology (including energy conserving design); design theory and methods (including computer-aided design); history, analysis, and criticism of architecture.

Course Requirements
You must complete a minimum of 27 courses, at least 24 of which must be four-unit courses at the graduate level (200 and 400 series). The total number of units required is 108. The required courses, listed below, must be taken in the sequence indicated.

First Year
Fall: Courses 200, 411, 421
Winter: Courses 412, 431, 436
Spring: Courses 413, 432, 442

Second Year
Fall: Courses 414, 433, elective (in sequence), elective
Winter: Courses 415, 441, elective (in sequence)
Spring: Courses 403, 201, elective

Degrees Offered

Architecture/Urban Design .................................................. M.Arch. I, M.Arch. II, M.A., Ph.D.
Urban Planning ............................................................... M.A., Ph.D.
Third Year
Fall: Courses 415 or 403, 291, elective
Winter: Courses 461, 498, elective
Spring: Course 597A

You must complete an elective sequence consisting of at least three related courses, terminating in a 403 advanced studio (normally in Spring Quarter of your second year). The elective sequence is intended to allow you to gain in-depth knowledge of a chosen area of specialization and to apply that knowledge in a design studio. Elective sequences are offered in the following areas: (1) urban design, (2) policy, programming, and evaluation, (3) technology, (4) design theory and methods, (5) history, analysis, and criticism of architecture. Details of currently available and approved elective sequences may be obtained from the graduate adviser.

In addition to completing an elective sequence, you are expected to explore a variety of topics by taking additional elective courses within the Architecture/Urban Design Program, in the Urban Planning Program, or outside GSAUP. You are required to take at least 28 units of elective coursework, including the elective sequence. At least 16 units must be taken within the Graduate School of Architecture and Urban Planning.

Students with undergraduate degrees in architecture or undergraduate degrees with majors in architecture may, at the end of their first quarter, petition the curriculum committee for advanced standing. Students granted advanced standing may have their residence requirement shortened to two years (six quarters), have their unit requirement reduced to 72 units, and may be permitted to waive specified required courses. If you can demonstrate that you already have adequate background in topics covered by specific required courses, you may petition to waive those courses and replace them with electives. However, permission to waive required courses does not reduce the minimum number of 27 courses required for the M.Arch. I degree nor does it reduce the nine-quarter residence requirement. The petition should be addressed to the faculty member responsible for that course and may be granted at the faculty member's discretion, possibly by means of a special examination.

You must enroll in eight units of Architecture and Urban Planning 597A, which may not be taken until all other required courses have been successfully completed. You may also apply eight units of course 596A toward the elective course requirements for graduation. Eight of the 16 units may be applied toward the graduate course requirement. All independent 500-series work must be undertaken with the guidance and approval of an Architecture/Urban Design faculty member and is graded on an S/U basis.

Comprehensive Examination Plan
You are required to successfully complete a comprehensive examination in any one of the following areas: (1) architectural design, (2) urban design, (3) policy, programming, and evaluation, (4) technology, (5) design theory and methods, (6) history, analysis, and criticism of architecture. The examinations are administered by the appropriate curriculum area committees.

Master of Architecture II
Admission
The M.Arch. II program emphasizes advanced studies in architecture and requires that applicants hold a five-year B.Arch. degree or equivalent.

You must state your major area of specialization and your choice of the comprehensive examination or thesis option on your application, as you are admitted to a specific major and option may change only by petition to the advanced graduate studies curriculum committee. A minimum of three academic quarters in residence is required. This is a full-time program, and you are expected to remain continuously in residence until all academic work is completed, unless a leave of absence is granted.

If your native language is not English, you are required to score at least 580 on the Test of English as a Foreign Language (TOEFL). In addition, you must take the English as a Second Language Placement Examination (ESLPE) on arrival at UCLA and, beginning in your first quarter in residence, take any required English (ESL) courses. Because such courses may not be applied toward the minimum course requirement, you should expect to spend additional time in residence. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

Major Fields
You are required to select your major area at the time of application to the program and must take a minimum of 24 units of coursework in that area. The six major areas include architectural design; urban design; policy, programming, and evaluation; technology; design theory and methods, including CAD; and history, analysis, and criticism of architecture.

Course Requirements
A minimum of 44 units of coursework (normally 11 four-unit courses) is required. At least 32 units must be at the graduate level; eight units of Architecture and Urban Planning 597A or eight units of course 596A are to be included in the 32 units. The remaining 12 units may be either upper division or graduate courses. No more than eight units of 596 courses may be applied toward the requirements for graduation.

Students in architectural design are required to complete at least 12 units of advanced design studio work plus 12 units of approved seminar courses.

Students in urban design must complete a year-long sequence of related urban design studio and seminar courses consisting of one studio and one seminar course each quarter.

Students in the other four major areas (policy, programming, and evaluation; technology; design theory and methods, including CAD; history, analysis, and criticism of architecture) are required to complete an approved sequence of three core courses consisting of two lecture/seminar courses which establish substantive foundations and a project course (Architecture and Urban Planning 403) which explores applications, plus 12 units of elective courses in the major area.

There may be more than one approved core sequence in each of the areas. The curriculum committee establishes and publishes a list of approved core sequences, which is reviewed and revised as necessary on a yearly basis. In special cases you may propose core sequences not on the list for approval by the committee.

Thesis Plan
Under this plan you may submit either a research project or a design project. A three-person thesis committee must be established at least one quarter before submission of the thesis, and you must take at least eight units of Architecture and Urban Planning 596A. The thesis may, in exceptional cases, be presented after three quarters in residence, but you should normally expect to take from four to six quarters to complete the thesis plan. The thesis must be submitted within two years after entry into the program.

Comprehensive Examination Plan
Under this plan you are required to establish a comprehensive examination committee at least one quarter before taking the examination and to receive approval of an examination topic from that committee. You are then required to take at least eight units of Architecture and Urban Planning 597A. The examination consists of a research project or design project on the approved topic. It may, in exceptional cases, be presented after three quarters in residence, but you should normally expect to take from four to six quarters to complete this plan. The examination must be submitted within two years after entry into the program.
Master of Arts in Architecture

Admission
This program offers an academic degree and prepares students to do specialized research or teaching in fields related to the architectural profession. Applicants are required to hold a bachelor's degree (or its equivalent) comparable in standards and content to a bachelor's degree from the University of California. They must possess the experience and knowledge that would allow them to do advanced research in whatever aspect of architecture they plan to explore within the context of the master's program.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a "creative" portfolio. No admission tests are required. In addition, the applicant is required to submit the "Departmental Supplement," available from the Admissions Office, Architecture/Urban Design, Graduate School of Architecture and Urban Planning.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Major Fields or Subdisciplines
You are required to focus your work on a specific academic area or professional issue. See "Major Fields" under the Ph.D. program for specializations currently available. In addition, you have the option of the Open M.A. wherein you structure your own area of interest from the courses offered by the school.

Course Requirements
(1) Candidates for the M.A. are expected to be in residence at UCLA for at least two years and undertake six quarters of study.
(2) A thesis or a comprehensive design project is required. When the committee members have signed the thesis proposal, you may take Architecture and Urban Planning 598A and begin work on the thesis itself. The course should be taken at some point during your last year of study.
(3) You are required to complete a minimum of 16 courses (64 units) of graduate or upper division work, at least 12 of which must be graduate courses.
(4) You must select and pursue one area of specialization.
(5) Up to seven courses may be taken from upper division or graduate courses offered campuswide.
(6) The University of California minimum requirements for the Master of Arts degree must be completed.
(7) You must enroll in at least four and no more than eight units of course 598A. You may also apply 12 units of course 596A toward the unit requirements for graduation with prior consent of your adviser. No more than 12 units may be applied without the consent of the curriculum committee; application of more than 16 units requires Graduate Division approval. A maximum of eight units of course 596 taken outside the school may be applied toward graduation. All independent work is graded on an S/U basis. (Courses in the 400 series may not be applied toward the graduate course requirement for the M.A. degree.)

Thesis or Comprehensive Examination Plan
M.A. students can choose to present a design project as a comprehensive examination (see M.Arch. I) or to do a research thesis. They should make this determination at least three months prior to the anticipated date of graduation.

Ph.D. in Architecture

Admission
Applicants must hold a bachelor's degree from an accredited college or university. It is anticipated that most applicants will have completed a first professional degree in architecture (a five-year B.Arch. or a professional M.Arch. degree). Students with degrees in other fields are also encouraged to apply but may, at the discretion of the Ph.D. program committee, be required to complete specific coursework as a condition of admission.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, a proposed program of studies, a short biographical résumé, and examples of research and/or creative work. An interview may also be required.

Applicants whose native language is other than English are required to pass the Test of English as a Foreign Language (TOEFL) before entering. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

Criteria considered for admission include: (1) evidence of capacity for original scholarship and research in architecture, and ability to achieve eminence in the field; (2) an outstanding academic record, including grades (3.5 minimum GPA), Graduate Record Examination (GRE) scores, and references; (3) demonstration in the work submitted of adequate communication skills, particularly writing skills; (4) presentation of a clear and realistic statement of purpose.

Preliminary Evaluation of Research Skills: Students who have any background deficiencies in research skills essential for work in their chosen areas of Ph.D. specialization (e.g., mathematics, statistics, or computing) are required to round out their knowledge early in their residence. The Ph.D. program committee conducts a formal evaluation of each student at an early stage to assure adequacy of research skills. You may apply for this evaluation no earlier than your second quarter in residence, and no later than the fourth quarter. In order to undergo the evaluation you must have made up any background deficiencies and present a research paper or other evidence of capacity for original work.

If you are unable to satisfy the committee of the adequacy of your research skills, you will either be given specific advice on how to make up remaining deficiencies and apply for reevaluation at a later date, or else be advised to leave the program. If you do not satisfy the committee by the end of the sixth quarter, you are subject to termination from the program.

Major Fields
Students are required to undertake programs of study that include one major area selected from the following: policy, programming, and evaluation; technology; design theory and methods; and history, analysis, and criticism of architecture.

Majors outside these areas, or combinations of some of them, may be undertaken, subject to the approval of the Ph.D. program committee if supported by qualified faculty members willing to provide the necessary instruction and guidance.

Minor Field Requirement
You are required to include in your program of study at least one minor field, which must be from outside the Architecture/Urban Design Program (i.e., outside the school or within the Urban Planning Program). The objectives of the minor field requirement are to assure adequate academic breadth in your preparation and to encourage participation in the general intellectual life of the University. Students planning their minor field courses are advised accordingly.

The normal method of demonstrating competence in the minor field is to complete at least 16 units of coursework, which represents a unified course of study in that field, with grades of B or better. If a qualified Architectural/Urban Design faculty member is willing to provide the necessary supervision, the Ph.D. program committee may accept an alternative method of completing this requirement (e.g., a substantial research project).
Mathematics, Computing, or Foreign Language Requirement

You are expected to develop adequate skills in mathematics, computing, or foreign languages, as appropriate to your field of specialization, and are strongly advised to complete this requirement as early as possible. One of the following is required:

(1) Proficiency in mathematics and computing as demonstrated by passing an approved group of four graduate or upper division courses in mathematics, statistics, and/or computing with grades of B or better. The courses must not overlap in content and normally require prerequisites which may not be applied toward the four-course requirement.

(2) Satisfactory reading knowledge of two foreign languages relevant to your field of specialization (a GSFLT score of 500 or better).

(3) Superior knowledge of one foreign language relevant to your field of specialization (a GSFLT score of 700 or better).

With approval of the Graduate Division, English may be used to satisfy the foreign language requirement if your language of education is not English.

Courses applied toward this requirement may not also be applied toward a major or minor field requirement.

Course Requirements

Generally you are required to take sufficient coursework to provide adequate preparation for the qualifying examination and the dissertation.

Each student in the program is required to take a proseminar in architectural theory, normally in the Fall Quarter of the first year. The proseminar is intended to establish a general orientation to the field of architecture that will ensure that you have an appropriate foundation for the acquisition of competence in the theory, methods, and history of architecture. In consultation with your adviser, you are expected to take whatever additional coursework is necessary to reach the required level.

Holders of a professional degree in architecture before admission to the program must complete four quarters in residence and 48 units of coursework in order to become eligible to take the qualifying examination. If you have an M.Arch. I, M. Arch. II, or M.A. degree in Architecture from UCLA, the Ph.D. program committee may, at its discretion, reduce these requirements to three quarters in residence and 36 units of coursework. All other candidates are required to complete six quarters in residence and 72 units of coursework.

Half of the units must be graduate courses in architecture/urban design, and an overall GPA of 3.0 or better must be maintained. In exceptional cases, and with prior approval of the Ph.D. program committee, upper division courses may be applied toward these requirements. At least 32 units must be in 200-series courses.

Each of the major field core sequences of three to five courses includes one project course (Architecture and Urban Planning 403), which focuses on the practical application of research results to architectural problems and provides an opportunity to explore interrelations between the research and professional concerns of the field.

Students who are admitted to the Ph.D. program without having the background of a professional degree in architecture are required to take, in addition to the other course requirements, at least 24 units of graduate-level courses in architecture as recommended by their adviser and approved by the Ph.D. program committee.

No more than eight units of course 596A may be applied toward degree requirements, but eight units of course 597A and as many units of course 599A as necessary may be applied.

Qualifying Examinations

After successful completion of the preliminary evaluation of research skills, the mathematics, computing, or foreign language requirements, and the course requirements, you may apply to take the qualifying examinations. They consist of a comprehensive written examination in the major field, a written examination in the minor field (this may be waived under certain circumstances), and an oral examination focusing primarily on your proposed dissertation. The qualifying examinations should be completed in one quarter and must not extend over more than two quarters.

The major and minor field examinations are conducted by a five-member examination committee. The written examination in the major field is a substantial exercise followed by an oral presentation to the committee. The work must demonstrate your ability to teach an introductory course in the field and contribute to the progress of the field through scholarship and research. The written examination in the minor field is a short exercise and may be waived for candidates who hold a recognized master’s degree in the field in which the minor is located, or at the discretion of the examination committee on the basis of outstanding grades (at least two A grades out of the four minor field courses).

The University Oral Qualifying Examination, conducted by the doctoral committee, takes place after successful completion of the two written qualifying examinations. It explores your proposed dissertation topic and your ability to undertake the proposed work successfully. After passing the oral examination, you are advanced to candidacy (the C.Phil. degree is not awarded) and may begin work on your dissertation.

Final Oral Examination

The examination involves a verbal defense of the completed dissertation before the doctoral committee.

Upper Division Courses

187. Planning and Designing Our Cities. An introduction to urban planning and urban design, with emphasis on methods and tools used in practice. An overview of the planning field; physical planning for redevelopment, for projects in expanding areas, and for new towns. Lectures (with illustrated examples), field visits, and presentation of students’ own projects create the framework for expanding the understanding of the urban planning and design process.

Mr. Kamnitzer

190. Human Environment: An Introduction to Architecture and Urban Planning. The kinds of problems that arise in creating and maintaining an environment for urban activities, and the approaches and methods of architecture and urban planning in helping to cope with such problems. The complexities involved in giving expression to human needs and desires in the provision of shelters and movement systems, to the possibilities and limitations of technology and building forms, and to the issues involved in relating the human-made to the natural environment. Students encouraged to comprehend the major urban issues both as citizens and as potential technical experts.

Mr. Rand

195. Special Studies (2 to 8 units). Prerequisite: consent of instructor. Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

Graduate Courses

200. Introduction to the History of Architecture. Lecture, three hours. A survey of Western architecture from prehistory to the present day. Examination of not only architectural styles, but also the aesthetic, social, political, economic, technological, and theoretical determinants of built form and different methods of analyzing our architectural heritage. Ms. Favro

201. Introduction to Architectural Theory. (Formerly numbered 203A-203B.) Lecture: three hours. A broad overview of major architectural theorists from antiquity to the early 20th century. Exposure to the content of theoretical writings and to the complex cultural, philosophical, and pragmatic concerns which stimulate the evolution of architectural ideas in different contexts. Ms. Favro

203. Decision Making in Planning and Design. (Formerly numbered 203A-203B.) Lecture: three hours. Exploration of the challenges of decision making in general and in the design professions, which have far-reaching effects not only on clients but also on professionals’ own prospects. Psychological and mathematical approaches for improving decision quality. Mr. Adelson
204. Imaging the Future. Seminar; three hours. Introduction to social and technological forecasting, including nature and limitations of forecasting, ideology and values in forecasting, review of integrative forecasting techniques, and role of forecasting in environmental planning, design, and management processes.

Mr. Adelson

219. Special Topics in the Built Environment (2 to 6 units). Lecture; three hours. Seminar on topics in the built environment selected by the faculty. May be repeated for credit.

224A-224B. Design Theory. (Formerly numbered 224.) Lecture; three hours. Examination of design as a cultural enterprise in which rules are adopted and then followed to compose, describe, and evaluate designs. Development in detail of contemporary and historical examples from architecture, painting, sculpture, and other fine and applied arts.

Mr. March, Mr. Stiny (F.W)

226A. Computer Graphics. (Formerly numbered 227A.) Lecture; three hours. Use of graphics examples and practical graphics programming exercises to introduce basic concepts of computer programming in the REAL language. Provides background necessary to undertake more advanced work in computer-aided design.

228B. Computer Applications in Architecture and Urban Planning. (Formerly numbered 227A.) Lecture; three hours. Examination of the logic of problem solving using the computer, with emphasis on algorithms and data structures specifically applicable to architecture, urban design, and planning.

227A. Computer-Aided Design I. (Formerly numbered 226B.) Lecture; three hours. Prerequisite: course 226A or consent of instructor. An introduction to geometric modeling and design data bases using interactive computer graphics systems: two-dimensional drawings, wireframe modeling, surface modeling, and solid modeling.

(W)

227B. Computer-Aided Design II. (Formerly numbered 226B.) Lecture; three hours. Prerequisite: course 227A or consent of instructor. Selected advanced topics in computer graphics and computer-aided design: three-dimensional geometrical modeling, color, realistic rendering, and interfaces for CAD systems. May be repeated for credit.

228A-228B. Computational Foundations of Architectural Design. Lecture; three hours. Prerequisite: consent of instructor. An introduction to the composition and description of architectural designs in algorithmic processes: alternative representations of shapes and their corresponding languages, shape grammars and languages of design, description schemes.

Mr. March, Mr. Stiny (F.W)

242. Climate Responsive Design. Prerequisite: professional degree in architecture or consent of instructor. The theory and method of design of buildings which specifically respond to local climate; an intensive course in building climatology for advanced graduate students.

Mr. Mine

243. Energy Modeling. Prerequisites: one course in building climatology and one course in environmental controls. The geometric description of a building and the computerized modeling of its instantaneous energy flows, using one of the large energy analysis computer programs such as DOE 2.1B.

Mr. Milne

247A. Introduction to Energy/Resource-Conserving Solar Design. (Formerly numbered 446.) Lecture; three hours. Energy and alternative resource-conscious design integration into architectural and urban design: passive, active, and photovoltaic solar/ wind systems; development conservation and limits to growth. Third World, U.S.

Mr. Schoen

247B. Energy-Resource-Conserving Solar Design and Practice. (Formerly numbered 446.) Lecture; three hours. Prerequisites: course 247A and one climatology course, or consent of instructor. Extension of concepts and effects of solar design to meet economic feasibility tests. Lecture course 247A; stand-alone approaches particularly in developing countries, integration of resource-responsive vernacular architecture with contemporary forces, programming for project studio 403B.

Mr. Schoen

248A. Passively Integrated Solar Systems: Heating. (Formerly numbered 443A.) Prerequisites: courses 242 and 442, or consent of instructor. Analysis of the different passively integrated solar systems for heating buildings, considering their anticipated performance and suitability for different climates and building types. Focus on qualitative aspects, including calculations of performance in terms of energy saving and expected indoor comfort conditions.

Mr. Givoni (W)

248B. Passively Integrated Solar Systems: Cooling. (Formerly numbered 443B.) Prerequisites: courses 242 and 442, or consent of instructor. Analysis of the different passively integrated solar systems for cooling buildings, considering their anticipated performance and suitability for different climates and building types. Focus on qualitative aspects, including calculations of performance in terms of energy saving and expected indoor comfort conditions.

Mr. Givoni (Sp)

255A-255B. Climatic Issues in Urban Design. (Not the same as course 255 prior to Fall Quarter 1986.) Seminar; three hours. An in-depth examination of the impact of urban design (e.g., urban density, urban profile, public parks) on some aspect of the urban climate, such as urban temperature, wind field, solar radiation availability, etc.

Mr. Givoni

258. Urban Morphology. (Formerly numbered 255.) Lecture; three hours. Exploration of urban space from a structurist perspective. Primary emphasis on the relationships between socioeconomic, experiential, and formal structures of the urban environment.

Mr. Aran

271. Elements of Urban Design. Lecture; three hours. Introduction of basic knowledge of elements and methods of urban design. A multidisciplinary approach leading to an understanding of the political, socioeconomic, and technological framework of urban systems and its dynamic interrelations.

Mr. Lang (F)

272. Real Estate Development for Planners and Architects. Introduction to the real estate development process specifically geared to students in planning, urban design, and architecture. Financial decision model, market studies, designs, loan package, development plan, and feasibility study. Lectures and projects integrate the development process with proposed design solutions which are iteratively modified to meet economic feasibility tests.

Mr. Kamitner, Mr. Schwartz (W)

274. Introduction to Physical Planning. Lecture; 90 minutes; discussion, 90 minutes. Four graphics sessions. Overview of physical planning, land use, construction of land-use/building surveys; social issues, various roles of the planner, and the major projects: planning issues in L.A. region. Graphics workshop: graphics in planning reports, presentations.

Ms. Eisenberg, Ms. Goldstein (F)

278. Qualitative Research Methods for Planners and Designers. Lecture; 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, user needs analysis, participatory process, design, and participatory action research. Seminar in qualitative research methodologies; design and implementation of qualitative research projects.

Ms. Leavitt, Ms. Aron (F)

279. Housing for Developing Countries. (Formerly numbered 279A.) Discussion; three hours. Considerations of sociocultural, economic, and political factors, materials, structural systems, stylistic accesso-
isms, and costs. Service considerations and priorities of developing countries in housing policies and the planning and design of shelter.

Mr. Aroni (Sp)

285. City Studies. Discussion; three hours. Through the writings of Instituto de Investigaciones Urbanas, Rowntree, and Rossi, course explores how this body of theory about design of cities evolved and was applied during the 19th and 20th centuries in London, Berlin, Paris, Vi-

enna, New York, Washington, and Chicago. In later part of course, Los Angeles and how it developed from 1900 on.

Mr. Vreeland

281A. Introduction to the History of the Built Environment in the U.S. (Formerly numbered 281B.) Lecture; two hours; discussion; one hour. Open to advanced undergraduates with consent of instructor. An introduction to the history of the physical forms of urbanization in America: a survey of economic, political, social, and aesthetic forces behind the creation of the built environments Americans have experienced in their daily lives.

Ms. Hayden (Sp)

281B. Advanced Seminar in the History of the Built Environment. Discussion; three hours. Prerequisite: course 281A. An extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on the history of the built environment in the U.S.

Ms. Hayden

282A. Roots of Modernism. (Formerly numbered 189B.) Lecture; three hours. An overview of developments in Western architecture during the 18th and 19th centuries, covering the Romantic and historicist trends of the 1700s, the eclectics preferences of the 1800s, and turn-of-the-century modern developments including art nouveau.

Mr. Jenkins

282B. Modern and Postmodern Architecture. (Formerly numbered 189.) Lecture; three hours. An examination of 20th-century architectural developments from the revolutionary concepts of the modern movement, including their manifestations in the international style, to the current eclectics trends of postmodernism.

Mr. Jenkins

283. History of the American Household and the American Home. Lecture; 90 minutes; discussion, 90 minutes. Prerequisite: course 281A or consent of instructor. An introduction to the history of housing during the U.S. and the changing role of women and men from Colonial times to the present and the effects of these social changes on the physical form of the dwelling and the settlement. Discussion of the concerns of professional architects and planners, as well as the activity of bankers, builders, and homemakers.

Ms. Hayden

286A-286B. Ancient Architecture. (Not the same as course 286 prior to Fall Quarter 1986.) Lecture; three hours. An examination of ancient architectural developments from archeaic Greece to the late Roman Empire. Examination of ancient buildings as functional constructs whose appearance was determined by aesthetic characteristics. Ms. Favro
289. Special Topics in Architecture and Urban Design (2 to 4 units). Prerequisite: consent of instructor. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit.

290. History and Theory of Landscape. Lecture, three hours. A historical introduction to principles of garden and landscape design. Exploration of key issues through case studies of gardens, landscape architecture, and the vernacular landscape. Mr. Phelps

291. Theory of Architectural Programming. Lecture, four hours. Prerequisite: consent of instructor. An exploration of methods of architectural programming and its interrelation to the design process; planning of the design process; various techniques for the determination of program contents, basic conditions, resources, and constraints; the identification of solution types for given situations. Mr. Rand (F)

292. Social Meaning of Space. (Formerly numbered 298.) Discussion, three hours. The evolution of the concept of space from its origins in ritual and primitive social organizations, concentrating on the child's evolving conception of space, literature on perceptual development, and studies of adaptation to the spatial environment of the human-made environment. Mr. Rand

294A-294D. Environments and Technology. Lecture, three hours. Introduction to models, concepts, and theories concerning the impact of the environment on human behavior, perception, and thought. Review of results concerning space perception, cognitive mapping, preferences and attitudes toward the environment, effects of crowding and stress, personal space and territoriality. Mr. Rand

296. Proseminar in Architectural Theory. (Not the same as course 298.) Seminar, three hours. An orientation for Ph.D. students to the tradition of architectural theory, scholarship, and research and to current research directions and questions, through intensive reading and critical discussion. Mr. Stiny

297. Group Process in Design. Lecture, two hours; discussion, two hours; laboratory, two hours. Prerequisite: consent of instructor. Designed to equip students with the knowledge and skills needed to work effectively in design processes with other professionals and with client and user groups in organizational and other settings where interaction is important in determining design outcomes. Mr. Adelson

298A-298D. Research Practicum in Architecture. Lecture, three hours. Prerequisite: consent of instructor. An in-depth examination of research methods in the various major fields. May be repeated for credit.

298A. Research Practicum in Policy, Programming, and Evaluation.

298B. Research Practicum in Technology.

298C. Research Practicum in Technology.

298D. Research Practicum in Design Theory and Methods.

298D. Research Practicum in History, Analysis, and Criticism of Architecture.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. SU grading.

401. Projects in Architecture. Studio, eight hours. Prerequisite: consent of instructor. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit. (F, W, Sp)

402. Projects in Urban Design. Studio, eight hours. Prerequisite: consent of instructor. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit. (F, W, Sp)

403A-403D. Project with Specific Topic. (Formerly numbered 403A-403H.) Studio, eight hours. Prerequisites: prior courses of particular sequence or consent of instructor. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit.

403A. Projects in Policy, Programming, and Evaluation.

403B. Projects in Technology.

403C. Projects in Design Theory and Methods.

403D. Projects in History, Analysis, and Criticism of Architecture. (F, W, Sp)

404. Joint Planning/Architecture Studio. Lecture, one discussion, one hour; studio, four hours. Opportunity for a joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; "New American House" for nontraditional households; guide to setting up shelters for homeless in Los Angeles County. Ms. Leavitt

411. Introductory Design Studio. Studio, 12 hours. Prerequisite: consent of instructor. Architectural composition is initially studied in terms of separate elements. After each is studied by means of a manipulative exercise which allows for experimentation of its intrinsic possibilities, students then undertake a series of exercises in which the elements are combined together. The elements are designed to develop basic design principles in which previously acquired knowledge is synthesized into a single design in latter part of course. (F)

412. Building Design Studio. Studio, 12 hours. Prerequisite: consent of instructor. Architectural composition is studied in terms of the separate elements. After each is studied by means of a manipulative exercise which allows for experimentation of its intrinsic possibilities, students then undertake a series of exercises in which the elements are combined together. The elements are designed to develop basic design principles in which previously acquired knowledge is synthesized into a single design in latter part of course. (F)

414. Major Building Design I. Studio, 12 hours. Prerequisite: second-year standing. Design projects which enable students to concentrate on specific architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, environmental controls, physical context, and the cultural environment in design of buildings and to present their ideas in graphic or model form. Mr. Hyman

415. Major Building Design II, Studio, 12 hours. Prerequisite: course 414. Design projects which enable students to concentrate on specific architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, environmental controls, physical context, and the cultural environment in design of buildings and to present their ideas in graphic or model form. Special emphasis on implementation of environmental control systems. Mr. Hyman

416. Comprehensive Design Studio. Studio, 12 hours. Prerequisite: completion of required coursework up to first quarter of third year, consent of instructor. Course completes the required sequence of design work, preparing students for the third- and fourth-year thesis design exercises. Design projects are structured to test students on integration of structural systems, mechanical systems, site planning, and climatic considerations within their designs. Mr. Hyman

421. Architectural Drawing. Discussion, three hours; laboratory, three hours. Description of architectural drafting techniques and skills, including sketching, diagramming, freehand drawing, drafting techniques, introduction to axonometric projection, and perspective. Mr. Hyman

422. Advanced Architectural Drawing (2 to 4 units). Discussion, three hours; laboratory, three hours. Prerequisites: course 421 or consent of instructor. Emphasis on the exploration of the design and presentation of architectural drafting. More advanced design strategies and methods of graphic exploration and presentation. (W)

431. Structures. Lecture, three hours. Prerequisites: basic algebra, geometry, trigonometry, consensus of instructor. Introduction to structural behavior and structural statics. Operations with forces and vectors, both algebraically and graphically. Equilibrium of force systems; polygon of forces and funicular polygon. Internal actions: axial force and bending moment. Reactions, stability, and statical determination. Determinate frames, plane trusses: analysis and design. Mr. Aron, Mr. Iyengar (W)

433. Structures III. Lecture, three hours. Prerequisites: course 432, consent of instructor. Introduction to statically indeterminate analysis. Structural materials and loads. Wind loads: distribution with height, design for comfort, comfort behavior under lateral loads. Steel construction and concepts for high-rise structures. Structural case studies in timber and steel. Introduction to earthquakes: seismology, magnitude, intensity, history. Seismic instrumentation. Case studies of recent earthquakes and damage. Earthquake design concepts and seismic code requirements. Mr. Aron, Mr. Iyengar (F)

436. Building Construction. (Formerly numbered 437.) Lecture/studio, eight hours. Limited to M.Arch. I students. Projects in structural analysis and design; basic nature, production, classification of primary building materials. Building elements explored for formal and functional properties; production and assembly possibilities in factory and field, application and role within a building. Hands-on project. Mr. Mills, Mr. Schoen (W)

437. Construction Documents. (Formerly numbered 436.) Studio, eight hours. Prerequisite: one course in basic building construction (such as 436) or consent of instructor. Office/field communications explored through design of simple structures and creation of key working drawings and outline specifications. Introduction to CAD (computer-aided drafting and design) systems. Mr. Schoen (Sp)

438. Systems Building. Prerequisite: consent of instructor. Discussion and survey of past and present developments in Europe, the U.S.S.R., and the U.S. Includes design of structural elements, mechanical systems, and functional properties; production and assembly possibilities in factory and field, application and role within a building. Mr. Mills, Mr. Schoen (W)
441. Environmental Control Systems. Prerequisite: consent of instructor. The design of the mechanical systems necessary for the functioning of large buildings: air handling, fire and life safety, plumbing, vertical and horizontal circulation, communication and electrical power distribution, analysis of the interaction of these systems and their integrated effects on the architectural form of a building. (W)

442. Building Climatology. Prerequisite: basic physics. The design of buildings which specifically respond to the local climate; utilization of natural energies, human thermal comfort; sun motion and sun control devices; use of plant materials and landform to modify microclimate. Mr. Givoni, Mr. Mîle (Sp)

444. Light and the Visual Environment. Prerequisite: a course in building climatology or consent of instructor. Exploration of the extent to which the physical form of a building controls the luminous environment of its occupants; the design of naturally and artificially illuminated interior spaces; parameters of human visual comfort. Mr. Milne

445. Architectural Acoustics (2 to 4 units). Lecture, three hours. Prerequisite: consent of instructor. An applied course in acoustical designing in architecture, including the design of partitions to provide good sound insulation. Acoustical materials. The acoustical design of auditoriums. The control of noise in HVAC systems. Mr. Harris

448. Communication and Diffusion of Innovation. Seminar, three hours. Innovation in the building industry and the design professions. Successful creation and introduction of innovative products, processes, and technologies. Students expected to contribute to the meager literature of the field through case studies and projects. Visitors and field trips. Mr. Schoen

460. Computer-Aided Design Practice. (Not the same course 460 prior to Fall Quarter 1986.) Lecture/semime, three hours. An introduction to professional practice in a context of computer technology — planning for introduction of computer technology, systems selection, education and training issues, operational issues, costs, benefits and financial implications, ethical issues.

461. Architectural Practice. Seminar, three hours. Historical development of the profession; the role of the architect in contemporary society, current forms of practice and emerging trends. Contractual relationships, ethical responsibility, office management and promotion. Case studies of the practical process. Mr. Phelps (W)

490. Urban Innovations Group Workshop (4 to 8 units). Laboratory. Prerequisite: consent of workshop staff. Applied research and development work in the Urban Innovations Group workshop under the supervision of the workshop staff. Client-oriented projects concerned with significant urban, social, or technical problems of the physical environment. May be repeated for credit. (F,W,Sp)

496. Special Projects in Architecture (2 to 6 units). Prerequisite: consent of instructor. Projects initiated by individual students or student teams and directed by a member of the faculty. May be repeated for credit.

497. Special Projects in Urban Design (2 to 8 units). Prerequisite: consent of instructor. Projects initiated by individual students or student teams and directed by a member of the faculty. May be repeated for credit.

597A. Preparation for Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

598A. Preparation in Architecture/Urban Design for Master's Thesis (2 to 8 units). Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

Urban Planning

1118A Perloff Hall, (213) 825-7331, 825-8957
Profsers
Leland S. Burns, Ph.D.
John Friedmann, Ph.D.
Dolores Hayden, M.Arch.
Peter Kamnitzer, M.P.
Peter Harris, B.A.
Donald Shoup, Ph.D.
Edward W. Soja, Ph.D.
Martin Wachs, Ph.D., Program Head

Associate Professors
Leobardo Estrada, Ph.D.
J. Eugene Grigsby III, Ph.D.
Allan Heskin, Ph.D., LL.B.
Jacqueline Leavitt, Ph.D., Acting
Robin Liggett, Ph.D.
Michael Storper, Ph.D.

Assistant Professors
Margaret Fitzsimmons, Ph.D.
Susanna B. Hecht, Ph.D.
Rebecca Morales, Ph.D.
Paul Ong, Ph.D.

Scope and Objectives

The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Urban Planning Program. Graduates have taken positions in local, state, and national government, and increasingly with private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers a two-year Master of Arts degree and a Ph.D. Concurrent degree programs are available which enable students to combine study for an M.A. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, and a J.D. in the School of Law, or an M.A. in Latin American Studies.

The Urban Planning Program at UCLA takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups. A number of student organizations provide an interesting program of extracurricular activities.

Requirements for Graduate Degrees

Admission

The Urban Planning Program admits students in the Fall Quarter only, and you should begin the application process a year in advance.

Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to Admissions, Urban Planning Program, Graduate School of Architecture and Urban Planning, B102 Perloff Hall, UCLA, Los Angeles, CA 90024-1467.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and are encouraged to submit Graduate Record Examination (GRE) scores. The Test of English as a Foreign Language (TOEFL) is required of applicants whose native language is not English, unless they have completed at least two years of university-level coursework at an English-language institution. A score of 600 on the TOEFL is expected; applicants with a score below 550 are not considered for admission. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

Work samples (research papers and/or copy of the master's thesis) are required of doctoral applicants. Work samples (reports, research papers, slides, etc.) for master's applicants are optional. A maximum of two work samples may be submitted and will be returned only on request. (Applicants in the U.S. must enclose a self-addressed, stamped envelope.)
Areas of Concentration

You should select an area of concentration by the end of your first quarter in the program. The areas of concentration distinguish between different kinds of issues and contexts in which planners characterize become engaged, as a professional career or a field of research. They are not meant to be mutually exclusive. The four areas of concentration are:

Urban and Regional Development: This area of concentration concerns the interrelated aspects of area development in both the U.S. and Third World nations. The perspective on questions of area development is that of political economy and spatial analysis. Industrialization, urbanization, and rural development are major focal points of interest. Within this area, you are expected to select an emphasis either on developments within the U.S. and other advanced industrial countries, with a focus on local community and labor market areas, or on problems of development in the Third World.

Social Policy and Analysis: This field of study concentrates on services, approaching questions of equity and social structure through the planning and analysis of services that are supplied publicly or semipublicly. It is concerned with the economic, political, and social context of service delivery systems, with analytic techniques for planning and evaluating them, and with the implications of different ways of financing them.

Natural Environment and Resources: The natural environment is both the context within which all human activities take place and a social product of those activities. Environmental planning begins as an attempt to mitigate often unforeseen consequences of economic growth and expansion, consequences which appear both as environmental hazards to human health and well-being and as problems in the management of natural resources. A special feature of this area of concentration is its emphasis on problems arising from the intensive use of environmental resources, viewed from the perspective of political economy.

The Built Environment: This area of concentration represents a blending of urban planning and architecture. It deals with the social and economic forces affecting the three-dimensional built environment on an urban scale. Within this area, you can select one of three specializations: history, theory, and criticism of the built environment; public policy and the built environment; or urban design and physical planning.

Additional Areas of Concentration: In special circumstances, you may devise your own area in consultation with appropriate faculty members. Final approval of the proposed additional area of concentration must be obtained from the program head.

International Development Studies

If you wish to focus your studies on policy and planning problems of newly industrializing countries, you can do so in the context of one of the major areas of concentration. Several faculty members have extensive experience abroad and a continuing research interest in this problem area. Coursework is currently offered in rural development, urbanization policies, housing, the environmental impacts of resource-based development, spatial policies for development, and the role of women in development. In addition, a number of courses are concerned with the evolving world economy, general development issues, and related ideological questions.

In its several area studies centers, UCLA has major institutional resources that facilitate research and furnish a rich environment in which to study development issues in a global context. Opportunities for work exist with international agencies, voluntary agencies, and foreign governments. Doctoral students generally pursue careers in teaching, research, and consulting.

Master of Arts in Urban Planning

The M.A. degree is fully accredited by the Planning Accreditation Board, a joint undertaking of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Course Requirements

You must complete a minimum of 72 units. Students generally take 12 units per quarter, completing the program in two years.

Core Course Requirement: The core areas comprise knowledge common to all areas of planning, regardless of your specific focus. Six core courses are required: Architecture and Urban Planning 207, 220A (waiver by examination), 220B, two core courses in theory and context, and one additional course (two if course 220A is waived) from a selection of 11 remaining core courses in methods, theory and context, and/or practice.

On entering the program, you must pass examinations indicating competence in basic mathematics and microeconomics before enrolling in courses 220A and 207 respectively. Copies of sample examinations are mailed with admission offers to applicants accepted into the program. An undergraduate course in college algebra or precalculus should provide suitable background to pass the basic mathematics examination. An undergraduate course in microeconomics should be sufficient preparation for the microeconomics examination.

You are strongly encouraged to prepare for the examinations before enrolling so you can take courses 207 and 220A (offered only once per year in Fall Quarter) during your first quarter of studies.

Area Course Requirement: You must select an area of concentration. A list of courses is prepared for each area of concentration, from which you are required to select at least six; two are generally specified.

Fieldwork Requirement: Two fieldwork courses (eight units) are required (subject to waiver).

You are encouraged to seek waivers for requirements which have been met in your previous education.

Thesis Plan

In partial fulfillment of the requirements for the M.A. degree, you are required to complete either a thesis or one of two comprehensive examinations plans during your second year of study. Each option has its own deadline for selection, and once a deadline has passed, you are limited to options with subsequent deadlines. The master’s thesis is intended to provide the opportunity for independent scholarly research and should be the length and quality of a publishable journal article. If you select this option, in order to meet established deadlines, you must begin thesis work no later than the Fall Quarter of your second year. Academic credit for thesis preparation is given through Architecture and Urban Planning 205 (four units in Fall Quarter) and 598P (four units each in Winter and Spring Quarters).

Comprehensive Examination Plan

If you select the comprehensive examination option, you may choose either Plan A or Plan B.

Plan A (Long-Term Project) — A client-oriented project is recommended for students who are more interested in practical application of what they have learned in their coursework than in scholarly research. The time span and magnitude of the final project approximates that of the thesis. Academic credit for project involvement is given through Architecture and Urban Planning 597P (four units each in Winter and Spring Quarters).

An alternative under Plan A, you may take courses 217A-217B (group comprehensive project sequence), offered Winter and Spring Quarters, to fulfill the comprehensive examination requirement.

Plan B (Two-Week Examination) — Examinations for all areas of concentration are normally offered during the break between Winter and Spring Quarters. A committee of three faculty members (appointed by the area of concentration coordinator) offers, reads, and grades the examination. No course credit is received.
Fieldwork
Master's students who come to the Graduate School of Architecture and Urban Planning without substantial prior experience in planning are required to complete eight units of fieldwork. Fieldwork is defined as clinical or "real world" experience with a planning office, a private organization involved in planning, a community action agency, or applied research within a clinical context (excluding conventional university-based research projects). Details on fulfilling this requirement are available in the program office.

Concurrent Degree Programs

J.D./M.A.-Urban Planning
The Graduate School of Architecture and Urban Planning and the School of Law offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both schools and receive both the J.D. and M.A. degrees at the end of four years.

Students interested in the program must apply and be admitted to the School of Law, the Urban Planning Program, and the Graduate Division. For additional information, contact the graduate counselor in the Urban Planning Program.

M.B.A./M.A.-Urban Planning
The Graduate School of Architecture and Urban Planning and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service.

Students should request all application materials from the M.B.A. Admissions Office, John E. Anderson Graduate School of Management. Further details may be obtained from the graduate counselor in the Urban Planning Program.

M.A.-Latin American Studies/M.A.-Urban Planning
The Urban Planning Program and the Latin American Studies Program offer a 2 1/2- to 3-year concurrent plan of study leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The concurrent degree program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Students should apply through the Urban Planning Program. Further details may be obtained from the graduate counselor in the Urban Planning Program.

Ph.D. in Urban Planning

Admission
Students admitted to the Ph.D. program in Urban Planning must have a master's degree in planning or a closely related field.

You must have a minimum 3.5 grade-point average in all graduate work completed for consideration for the Ph.D. program. Employment experience in planning or a closely related field is strongly recommended.

Foreign Language Requirement
A foreign language is not required either for admission to or completion of the doctoral program. However, students who are expecting to do dissertation research abroad are strongly advised to obtain the necessary language skills prior to beginning such research.

Research Methods Requirement

You must take a six-hour written examination on the theory and history of planning practice which is offered early in Spring Quarter each year and is prepared and administered by a three-person committee appointed by the program head. To prepare for the examination, you may obtain a comprehensive bibliography covering planning history and theory. The examination may be repeated once, in Fall Quarter of your second year, if the results are unsatisfactory. In addition, Architecture and Urban Planning 210A, 210B, and 212 are strongly recommended.

Fieldwork
Master's students who come to the Graduate School of Architecture and Urban Planning without substantial prior experience in planning are required to complete eight units of fieldwork. Fieldwork is defined as clinical or "real world" experience with a planning office, a private organization involved in planning, a community action agency, or applied research within a clinical context (excluding conventional university-based research projects). Details on fulfilling this requirement are available in the program office.

Qualifying Examinations

The major field examination tests your competence in an area of planning study and is defined as a subject in which you are prepared to teach two or three courses, as well as conduct advanced research. The field should be generally recognized by academics in other planning schools and should be substantially broader than a dissertation topic.

You are required to pass a major field examination no later than the end of your second year in the Ph.D. program.

Following a prescribed process (available in detail from the graduate counselor), a committee of three faculty members is appointed by the program head to supervise your preparation for the examination. Appointments should be made during the Spring Quarter of your first year and should in no case be postponed beyond the Fall Quarter of your second year. The time for the examination is set by agreement between you and the committee members and is normally one calendar year after formation of the committee.
The examination has two parts — one written, one oral. The written part is given each quarter simultaneously to all eligible students on Friday of the seventh week of classes; the oral part is given before the end of the same quarter. You may receive academic credit to prepare for the examination by enrolling in Architecture and Urban Planning 597P.

Minor Field Requirement

The minor field requirement is intended to provide a breadth of knowledge which extends beyond the specific area of the major field. This requirement is closely adjusted to your dissertation focus and is fulfilled by taking 12 units of coursework, with grades of B or better, in a related field approved by your principal adviser.

Oral Qualifying Examination

After successful completion of the planning theory, research methods, and major and minor field requirements, you may petition the Graduate Division for approval of your doctoral committee.

The doctoral committee administers the University Oral Qualifying Examination at which you defend your dissertation prospectus. To assist in the development of the proposal, you are required to complete Architecture and Urban Planning 208.

The University Oral Qualifying Examination is normally taken by the end of your third year of doctoral study.

Final Oral Examination

This examination, which is optional at the discretion of the doctoral committee, involves a defense of the completed dissertation.

Upper Division Courses

197. Planning for Minority Communities. Lecture, three hours. Introduction to inner-city policy issues on three separate levels: (1) the student developer. The function of comprehensive inner-city urban program using materials from the Alternatives Inner-City Future Exercise, (2) each student is expected to identify the value assumed and the justifications that are explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions that emphasize minority issues which affect implementation.

Graduate Courses

M202A. Public Control of Land Development (3 to 6 units). (Same as Law M286.) Analysis of the legal and administrative aspects of the regulation of land use and development, and the problems and techniques of urban planning: dwelling legislation, building codes, zoning, subdivision controls, public acquisition of land, tax controls, and urban development.

Mr. McGee (W)

M202B. Governance: State, Regional, and Local (3 to 4 units). (Same as Law M285.) Lecture, three hours. Legal problems involving local governmental entities; sources and extent of powers and duties with respect to personnel, finance, public works, community development, and related topics.

Mr. Marris (W)

202CC. Seminar: Urban Affairs (3 to 6 units). (Same as Law M526.) Exploration in a concrete case setting of the application of legal tools to the solution of planning and land-use problems. Real situations are selected in which significant planning problems exist that appear to be amenable to solution by careful analysis and application of legal tools. A number of case studies are selected so that students may choose one issue which directly interests them. For each case, a specific client works with the class in presenting the problem that client is facing and remains available through the course of the project for consultation; the end product for each case is the presentation of a formal report. Clients include the City Planning Commission, the Environmental Quality Board, the Housing Authority, and others.

205. Research Seminar for Master's Thesis. Discussion, three hours. Prerequisite: second-year standing in M.A. program. A required course for all second-year M.A. students who select the thesis option rather than one of the comprehensive examination options, aimed at aiding students in the preparation of their theses. Organized as a workshop with periodic reports and discussions of the proposed research. S/U grading.

Mr. Shachar (F)

206A. Urban Data Analysis: Demographic Applications. (Formerly numbered 206.) Lecture, three hours; laboratory, one hour. Prerequisites: one graduate-level statistics course, familiarity with one of the packaged statistics programs. Development of basic demographic methods of analysis in a policy context, providing a parallel development of content, data sources, and applications. Topics include data sources and errors, mortality, fertility, age structure, and their effects on planning policy.

Mr. Estrada (Sp)

206B. Urban Data Analysis: Planning Models. Lecture, three hours; laboratory, one hour. Prerequisite: course 206A or equivalent. An advanced course in urban data analysis which builds on course 206A. Examination of the relationship between demographic and other socioeconomic processes, with emphasis on planning models. Topics include internal and international migration, crime analysis, transportation demand, and economic activity forecasting.

Mr. Levine (F)

207. Public Resource Allocation. Lecture, three hours. Prerequisite: passing score on a microeconomics examination designated by the department. An understanding of the practical use of economics in analyzing public resource allocation problems. Topics include a review of marginal analysis, the difference between equity and efficiency, public goods and the free rider problem, environmental pricing, public service pricing, and conflicts between individual and collective rationality.

Mr. Shoup (F)

208. Seminar in Advanced Research Methods. Lecture, three hours. Prerequisite: doctoral standing, consent of instructor. Required of Ph.D. students in or following the second year. The process of developing a dissertation proposal; introduction to the alternative conceptions of science (or rigorous scholarship) now apparent in various social science paradigms. S/U grading.

Mr. Marris (Sp)

209. Social Indicators and Reports for Metropolitan Regions. Lecture, three hours. Prerequisite: second-year standing in M.A. program. A required course for all second-year M.A. students who select the thesis option rather than one of the comprehensive examination options, aimed at aiding students in the preparation of their theses. Organized as a workshop with periodic reports and discussions of the proposed research. S/U grading.

Mr. Friedmann (W)

210A. Colloquium in Planning Theory. Lecture, one hour; discussion, two hours. Prerequisite: course 201A. Limited to Ph.D. students. An introduction to some of the central theoretical issues of contemporary planning. S/U grading.

Mr. Sandercock (F)

211. Law and the Quality of Urban Life. Lecture, three hours. An introduction to law as an urban system, directed primarily toward those interested in social and advocacy planning. Urban problems such as employment, housing, social welfare, and land use; the law's role as a partial cause and cure of these problems. Examination of law as a changing process rather than a collection of principles, so that students develop a facility to interact with law and lawyers in a positive and forceful manner.

Mr. Heskun (F)

212. Comparative History of Planning Practice. Lecture, two hours. History of city planning, its critique, and the profession of planning through the 19th and 20th centuries. Comparison of the evolution of the field in several countries, especially English-speaking countries.

Mr. Sandercock (W)

213. Social Indicators and Reports for Metropolitan Regions. Discussion, three hours. Prerequisite: second-year standing. Seminar research concerned with the development of social indicators for evaluating and reporting the performance of complex urban systems.

Mr. Grigas (W)

214. Ethics in Planning. Examination of ethical dimensions of planning at many levels, including issues of bribery and corruption, aspects of client/sponsor and employer/employee relationships, collection, use, and release of information, and ethical aspects of administrative discretion. Ethical aspects of planning methods, the concept of environmental ethics, and the evolution of the code of ethics in the planning profession.

M215B. Spatial Statistics. (Same as Geography M272.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: Geography 171 or Statistics 50, consent of instructor. Specific techniques useful in the analysis of spatial distributions, including both point and areal patterns and emphasizing spatial descriptive statistics, probability models of spatial distributions, and statistical surfaces.

Mr. M. Ok

217A-217B. Comprehensive Planning Project. Prerequisite: second-year standing. The comprehensive project brings together students of varying backgrounds and interests in joint solution of an urban planning problem. Each project spans two quarters. Successful completion of the project meets the requirement of Comprehensive Examination Plan A of the master's program.

(WSp)
219. Special Topics in the Built Environment (2 to 8 units). See listing under "Architecture/Urban Design."

220A. Quantitative Analysis in Urban Planning I. Lecture, three hours. Prerequisite: passing score on a basic mathematics proficiency examination given the first day of class. An introduction to mathematical and statistical concepts and methods with applications in urban planning. Review of basic mathematical concepts fundamental to planning methods; descriptive statistics, probability, and sampling techniques. An introduction to the use of the computer as a tool in analysis of planning-related data. Ms. Liggitt (F)

220B. Quantitative Analysis in Urban Planning II. Lecture, three hours. Prerequisite: course 220A or equivalent (demonstrated by passing score on mathematics proficiency examination given the first day of course 220A). An introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include hypothesis testing, analysis of variance, correlation, regression, and causal modeling. Applications include such planning problems as forecasting population growth and change, estimating the use and need for public facilities, and analyzing the changing social and economic characteristics of urban populations. Case studies presented which cover the design and analysis of typical urban planning research projects. Use of the computer as a tool in statistical analysis and modeling. Ms. Liggitt (W)

221. Evaluation Methods. (Formerly numbered 221A, 221B.) Lecture, three hours. Prerequisites: courses 207, 220A. An examination of methods used to evaluate the efficiency and effectiveness of government programs and investment projects. Theory and practice of evaluation, with emphasis on techniques of cost-effectiveness analysis, cost-benefit analysis, discounting, sensitivity analysis, target efficiency, fiscal audits, and evaluation design.

222. Introduction to the Planning Profession. (Formerly numbered 223A.) Lecture, three hours. A lecture-project course offering an introduction to the planning profession and to the Urban Planning Program at UCLA. An overview of the forces that shaped its practice over time and an exploration of various professional roles for planners. Planning education viewed as a response to changing needs and as a catalyst for emerging roles for professional planners. Generally taken Fall Quarter of the first year of the M.A. program. Ms. Gilmore-Jaffe, Mr. Heskin (F)

223. Professional Development Seminar. (Formerly numbered 223B.) Lecture, 90 minutes; discussion, 90 minutes. Recommended prerequisite: course 222. Problems of professional practice. Development of methods which integrate theory and practice through readings and individual and collective analyses of each student's experience. Students must be working in a field setting to enroll. A job fair is held at the end of Fall Quarter to place students in field settings. Students combine course 223 with one quarter of course 490 or 490F to meet the fieldwork requirement. Mr. Grigsby (W)

229. Special Topics in Planning Methods (2 to 8 units). Seminar on topics in planning methodology selected by the faculty. May be repeated for credit.

M231. Urban Housing and Community Development (3 to 4 units). (Same as Law M287.) Lecture, three hours; discussion, one hour. Comprehensive consideration of the rebuidling and construction of American cities, with major emphasis on the "housing process" — the way in which shelter and related facilities are created by the institutions which direct housing activities in urban areas. Students encourage to conduct research projects with emphasis on field research, in lieu of a substantial portion of the final examination. Mr. McGee

232A. Introduction to Regional Planning: Evolution of Regional Planning Theories. Lecture, three hours. A critical and historical survey of the evolution of regional planning theory and practice, with particular emphasis on the relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, the territorial community, and the social production of space.

232B. Spatial Planning: Regional and International Development. An examination of the theory and practice of spatial planning at the regional, national, and international scales, including an evaluation of regional growth strategies, national settlement policy, group development for cooperation and development, and critical issues involved in international development planning. Generally taken in the first year.

233. Political Economy of Urbanization. An introduction to the basic concepts and analytical approaches of urban political economy, with major emphasis on American urban problems. Topics include the historical geography of urbanization, the development and transformation of urban spatial structure, suburbanization and metropolitan political fragmentation, urban fiscal crisis, and the role of urban social movements. Mr. Davis, Mr. Soja (W, 235A; Sp, 235B)

235A-235B. Urbanization and Rural Development in Third World Countries. Lecture, 90 minutes; discussion, 90 minutes. Prerequisite for course 235A: course 226 or consent of instructor; for course 235B: course 235A or consent of instructor. Questions of urbanization and planning in first quarter; rural development in second quarter. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates.

241A. Urban and Regional Economic Development I. Lecture, three hours. An introduction to basic principles of urban and regional economics as they bear on public policy formation and urban and regional planning. Students apply U.S. and international economic theories, models, and methodology to current economic problems, theoretical frameworks for analyzing these problems, and methods of analysis. Major topics include regional distribution of employment/innovation income and standards of living, with special attention to sectoral shifts in employment and demographic and migratory changes in the U.S. Emphasis on economic growth policies and development planning in cities and regions.

245. Urban and Regional Economic Development II. Lecture, three hours. A seminar focusing on local economic development, meaning job creation, growth of existing businesses, and the creation of new ones; growth centers and concepts, and the role of government for the purposes of developing or stabilizing a community's economy. Reasons for and measurement of unemployment and impoverishment, programmatic approaches for dealing with these problems, and a critical analysis of the objectives, outcomes, and public accountability of the different approaches. Topics include labor market considerations in economic development planning; incentives for private enterprise investment; alternative institutions for local economic development; and financing public and private investment. Ms. Morales (Sp)

236C. Urban and Regional Economic Development III. Discussion, three hours. Prerequisite: course 236B. An advanced seminar for students wanting to design or critically evaluate programs in economic development. Two- to three-week intensive workshops on financing techniques and economic development law in first part of course; individual student projects during remainder of course.

238. Advanced Seminar in Urban and Regional Development. Lecture, two hours; discussion, two hours. Prerequisite: doctoral standing or consent of instructor. An advanced research seminar on major issues in urban and regional development theories, methodology, or policy. Topics usually reflect faculty research projects and change from year to year. May be repeated for credit. Ms. Soja (Sp)

239. Special Topics in Urban and Regional Development Policy (2 to 6 units). Lecture, three hours. Seminar on topics in urban and regional development policy selected by the faculty. May be repeated for credit.

241A. Urban Transportation Planning I. Lecture, three hours. Historical development of urban transportation planning and the current political and administrative frameworks for planning; the relationship between transportation systems and urban form; the evolution of regional and public transit systems; urban highway and transit planning programs; the financing of urban transportation; environmental and social impacts of transportation systems; current policy dilemmas; controlling the automobile, using mass transit, energy issues, needs of elderly and handicapped.

241B. Urban Transportation Planning II. Prerequisites: courses 207, 220B, and 241A, or consent of instructor. Economic and social basis for travel; basic data sources for examining urban travel and transportation; techniques of forecasting and analyzing travel; mathematical models of travel, trip generation, trip distribution, modal split, traffic assignment, and route choice; uses of forecasts and approaches to transportation system and project evaluation.

241C. Urban Transportation Planning III. Prerequisites: courses 207, 220B, 241A, and 241B, or consent of instructor. Recent experience and case studies in transportation planning and policy. Planning a rail system and downtown people mover for Los Angeles; urban transit and small-scale dial-a-ride services; express bus systems; evaluation of freeway; the Santa Monica Freeway diamond lane project; decision making in the case of the Century Freeway; a parking management program for Los Angeles; evaluation of public transit programs, linkages to field trips and guest speakers. Mr. Wachs (F)

244. Housing Markets. Lecture, three hours. The ways that housing markets should but sometimes do not work in developed economies. Interaction of demand factors such as population distribution, house hold formation, income, and credit, as well as their particular impacts on groups of the population. Topics include filtering, housing search, segregation, pricing, production efficiency, organization of the construction industry, market failure, and appropriate policy responses. Mr. Burns

245. Urban Public Finance. Lecture, three hours. Prerequisites: courses 207 and 220A, or consent of instructor. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, the effects of taxes on land use, fiscal capacity and benefit assessments for finance new public goods, public choice, and intergovernmental contracting as a method of supplying urban public services, tax increment financing for urban redevelopment, and public choice and the public sector. The quality of public service delivery among and within cities; review of the results of lawsuits to equalize public services. Mr. Shoup (Sp)
246. Housing in Social and Economic Development Policy. Lecture, three hours. Seminar on the position of housing in national and regional development strategies, with focus on policies for Third World nations. Topics include the nature of housing, "need," market responses, evolution of housing policy, theory of intervention, alternative policies for increasing the housing supply. Numerous case studies. Ms. Burns (Sp)

249. Special Topics in Social Policy and Analysis (2 to 8 units). Lecture, three hours. Seminar on topics in social planning and analysis selected by the faculty. May be repeated for credit.

250. Introduction to Social Policy. Lecture, three hours. An analysis of the demographic changes, history, needs, and ideological debates which affect the development of social policy in the U.S., compared with Western Europe. Mr. Morris (W)

251. Planning for Multiple Publics. Lecture, three hours. Prerequisite: prior background in statistics and research design. Exploration of the planning needs of various social groups in urban settings, using existing literature and research studies to determine appropriate mechanisms of planning for multiple publics. Analysis of communities in the Los Angeles metropolitan area as a case study into the practical, theoretical, and methodological problems of planning for multiple publics. Generally taken in the first year. Mr. Grigsby (W)

253. Social Theory for Planners. Lecture, three hours. Prior knowledge of sociological material helpful but not essential. The sociological tradition as it relates to issues of change, the role of the state, and the relationship between knowledge and values as they affect planning. Insights and crucial issues which have arisen from social theory as they relate to the concerns of planning and social policy. Contemporary developments in urban sociology. Mr. Morris (W)

254. Survey Methods in Planning. Lecture, three hours. Prerequisite: course 220B or equivalent. The use of surveys in planning. Conducting of a small area survey, with emphasis on methods to obtain quality data appropriate for planning: questionnaire development, sample design, interviewing, data processing, and analysis. Presentation of survey to planners or public agencies. Mr. Levine (W)

256. Social Impact Analysis. Lecture, three hours. Prerequisite: consent of instructor. Recommended: courses 220A, 220B, one advanced statistics course, one survey research and methodology course. Limited enrollment. Exploration of ways of creating methods for assessing and determining social impacts on communities, in order to develop both evaluative strategies and policy formulation for assisting in community development. Generally taken in the second year. Mr. Grigsby (F)

260A. Political Economy and the Environment. Lecture, three hours. Debate about environmental policy is increasingly couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on the functioning of the market system. Examination of the assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental politics. Ms. Pincelli (Sp)

260B. Politics, Institutions, and the Environment. (Formerly numbered 261B.) Lecture, three hours. Planners face some important dilemmas in designing institutions and policies intended to correct or prevent disruptions of the environment. An exploration of these problems, focusing on the essential theoretical questions that must be addressed in attempts to control environmental problems in our society. Review of recent developments in political theory in light of the growing environmental movement. Evaluation of current approaches to environmental problems, considering their institutional forms and epistemological foundations. Ms. Pincelli (Sp)

261. Land-Use Control: Economic and Structural Perspectives. Lecture, two hours; discussion, one hour. Prerequisites: courses 260A and 260B, or consent of instructor. Examination of the economic and political processes by which land-use control is conducted. Ms. Leavitt

262A. Urban Environmental Problems: Wastes and Hazards. Lecture, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. An analysis of the demographic changes, historical, and policy formulation for assisting in community development more thoroughly of themes raised in earlier courses. Topics may include peasants, development and rural women, agricultural ecology, comparative land reform, agrarian revolution, and the special problems of tropical development. May be repeated for credit with consent of instructor. Ms. Hecht (W)

262B. Environmental Problems: Water Resources. Lecture, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Water is life and wealth in California, which has the world's most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments are increasing. Examination of the environmental impacts of water development; review of the geography of California water generally. The use of water in California: agricultural irrigation, water pricing, water rights, and water districts. Consideration of a resource planning perspective in contrast to a strict development orientation. Mr. Gottlieb (Sp)

263. Natural Resource Conservation. Discussion, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Exploration, through reading, discussion, and student presentations, of the meaning of resource conservation, its desirability, and ways of achieving it. Emphasis on the integrated management of the public lands, though students may attend particularly to a specific resource (minerals, water, timber, wilderness). M264. Environmental Law and Policy (3 to 4 units). (Same as Law M290.) Lecture, three hours. Exploration, from a planning perspective, of the legal institutions, of the nature of environmental problems. The means by which law has responded, and can and should respond, to problems of environmental quality. Focus on common law, administrative law, and particular case measures considered. The air pollution problem is the primary vehicle for study. Mr. Latin (F)

265. History of American Environmentalism. Discussion, three hours. Prerequisites: courses 260A, 260B. Readings, discussion, and student papers on the conservationist/preservationist division at the turn of the century, the environmental implications of those concepts of regional integration developed by the RPPA's in the 1920s which were institutionalized in the New Deal, the rise of environmental activism after World War II, and the emergence of a legislative and judicial framework for environmental policies. Mr. Gottlieb (F)

266. City and Countrywide in the Third World. (Not the same as course 266 prior to Fall Quarter 1984.) Lecture, three hours. Review of the basic literature and schools of thought on development theory through analysis of microeconomics, colonialism, capitalism, and socialism on various urban and rural social and economic structures in the Third World. Presentation, through an evaluation of theoretical writings and case studies, of the complexity and diversity of developing countries. Emphasis on the linkages between policy and the rural and urban impacts. Gives students important background for courses 267A, 267B, and many of the other planning courses addressing Third World issues. Ms. Hecht (F)

267A. Resource-Based Development Planning. Discussion, three hours. Prerequisites: courses 266, 268. Some of this class is focused on the development with the development of specific natural resources. Topics include the nature of the particular resource (or region associated with it), its previous management, the involvement of the state, corporations, and local groups, and the environmental and social impact of its development. Ms. Hecht

267B. Rural Development Issues. Lecture, three hours. Prerequisites: course 266. Development more thoroughly of themes raised in earlier courses. Topics may include peasants, development and rural women, agricultural ecology, comparative land reform, agrarian revolution, and the special problems of tropical development. May be repeated for credit with consent of instructor. Ms. Hecht (W)

268. Advanced Seminar in Natural Environment and Resources. (Formerly numbered 260.) Discussion, three hours. Prerequisite: consent of instructor. Exploration of broad issues related to environmental and resource planning. Generally intended for second-year M.A. and Ph.D. students. May be repeated for credit. Mr. Picket (W)

269. Special Topics in Natural Environment and Resources (2 to 8 units). Lecture, three hours. Seminar on topics in natural environment and resources selected by the faculty. May be repeated for credit.

270. Homelessness: Housing and Social Service Issues. Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of the current status of homelessness: who the homeless are, what social services and housing are available, programs — existing and proposed — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless. Ms. Leavitt

272. Real Estate Development for Planners and Architects. See listing under "Architecture/Urban Design." Mr. Kamnitzer, Mr. Schwartz (W)

273. Site Planning. (Formerly numbered 267.) Lecture, 90 minutes; laboratory, 90 minutes. Introduction to principles of site planning for urbanization. Mr. Kamnitzer (F)

274. Introduction to Physical Planning. See listing under "Architecture/Urban Design." Mr. Eigenberg, Mr. Goldstein (W)

275. Inner-City Housing Policies: Old and New Approaches. Lecture, 90 minutes; laboratory, 90 minutes. A study of abandonment, gentrification, and displacement in inner cities, with emphasis on New York City. A look at research on housing conditions and community development policies, with particular emphasis on limited equity cooperatives; analysis of rehabilitation policies; review of new concepts and current legislative proposals. Mr. Heskin, Ms. Leavitt (W)

276. Planning Workshop (4 to 8 units). Lecture, one hour; discussion, one hour; laboratory, four hours. Prerequisite: consent of instructor. Planning projects with a focus on physical planning.

277. Historic Preservation: Principles and Practice. Lecture, two hours; discussion, one hour. A broad overview of the preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, restoration techniques, structural reinforcement, and social issues. Ms. Lehrer (Sp)

278. Qualitative Research Methods for Planners and Designers. See listing under "Architecture/Urban Design." Ms. Leavitt
281A. **Introduction to the History of the Built Environment in the U.S.** (Formerly numbered 281.) Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. An introduction to the history of the physical forms of urbanization in America; a survey of the economic, political, social, and aesthetic forces behind the creation of the built environments Americans have experienced in their daily lives. Ms. Hayden (Sp)

281B. **Advanced Seminar in the History of the Built Environment.** Discussion, three hours. Prerequisite: course 281A. An extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on the history of the built environment in the U.S. Ms. Hayden (F)

283. **History of the American Household and the American Home.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: course 281A or consent of instructor. An introduction to the history of housing design in the U.S., emphasizing the changing roles of women and men from Colonial times to the present and the effects of these social changes on the physical form of the dwelling and the settlement. Discussion of the concerns of professional architects and planners, as well as the activity of bankers, builders, and homemakers. Ms. Hayden

284. **Looking at Los Angeles.** (Not the same as course 284 prior to Fall Quarter 1986.) Discussion, three hours. An introduction to the physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Ms. Hayden

285. **Great Planning Debates: Gender.** Lecture, 90 minutes; discussion, 90 minutes. A seminar on the substantial literature on the complex relationships between gender, race, and class in urban planning. Alternative theories describe an inadequate fit between American households, housing, and services and document environmental inequities women and children face in contemporary cities. Students prepare oral seminar reports on topics such as social service provision, housing, transportation planning, economic development, and safe public spaces. Ms. Leavitt, Ms. Sacks (Sp)

375. **Teaching Apprentice Practicum (1 to 4 units).** See listing under "Architecture/Urban Design."

404. **Joint Planning/Architecture Studio.** Lecture, one hour; discussion, one hour; studio, four hours. An opportunity to work on a joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; "New American House" for nontraditional households; guide to setting up shelters for homeless in Los Angeles County. Ms. Leavitt

490. **Urban Innovations Group Workshop (4 to 8 units).** See listing under "Architecture/Urban Design."

494. **Supervised Independent Teaching (2 to 8 units).** Supervised individual teaching experience. May be repeated for credit. S/U grading.

496F. **Field Projects (2 to 8 units).** May be repeated for credit. S/U grading.

501. **Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596P. **Research in Planning (2 to 8 units).** May be repeated for credit.

597P. **Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).** May be repeated for credit. S/U grading.

598P. **Preparation for M.A. Thesis in Urban Planning (2 to 8 units).** May be repeated for credit. S/U grading.

599P. **Ph.D. Dissertation Research in Planning (2 to 8 units).** May be repeated for credit. S/U grading.
As the number one public graduate school of education in the nation, the UCLA Graduate School of Education (GSE) is widely recognized for its integration of theory and practice. Since GSE is at the forefront in academic excellence, research, and innovative programs, all levels of education from kindergarten through graduate school are benefited.

The school attracts prominent scholars and is internationally known for its research centers in evaluation, higher education, and other fields. GSE endeavors to improve educational practice, enhance theoretical and applied research, expand the study and criticism of educational policy, and advance the education of professional leaders and specialists.

Students come from throughout the world to study with the school’s renowned faculty. Whether students choose to pursue a Ph.D., an Ed.D., a master’s degree, or a services, specialist, or instructional credential, they will graduate with a broad understanding of people, educational theory, and tested practice.

Alumni of the school can be found all over the world — on faculties of major universities, in research, in administration, in curriculum development, and in the classroom.

Philip Ender, Ph.D.

Adjunct Assistant Professor
Juan F. Lara, Ph.D.

Degrees Offered
Master of Education (M.Ed.)
Master of Arts in Education
Doctor of Education (Ed.D.)
Doctor of Philosophy in Education

Requirements for Graduate Degrees

Admission
Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are:

(1) Scores on the quantitative and verbal sections of the Graduate Record Examination (GRE). (Note: The Miller Analogies and Doppelt Mathematical Reasoning Test may be substituted for the GRE.)

(2) At least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience.

Admission to a degree program occurs simultaneously with admission to graduate standing and to the Graduate School of Education. No screening examination (other than described above) and no specific coursework are required for admission to a degree program.

The Graduate School of Education has an application form for both master's and doctoral degree programs which must be completed in addition to the one used by the Graduate Admissions Office.

Application forms and departmental brochures are available from the Office of Student Services, Graduate School of Education, 201 Moore Hall, UCLA, Los Angeles, CA 90024-1521.

For information on the proficiency requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Curricular Divisions

Administration, Curriculum, and Teaching Studies

Educational Psychology

Higher Education, Work, and Adult Development
Social Research Methodology

Social Sciences and Comparative Education

Teacher Education

Academic Interinstitutional Programs

Special Studies

Specific degree programs and participating divisions or emphases are indicated below. Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each program.

Master of Education — Administrative and policy studies in education; bilingual/cross-cultural education; curriculum and the study of schooling; teacher education.

Master of Arts in Education — All divisions, except administration, curriculum, and teaching studies.

Doctor of Education — All divisions, except social sciences and comparative education.

Doctor of Philosophy in Education — All divisions.

Master of Education
The Master of Education (M.Ed.) professional degree program is designed for individuals preparing for a mid-level professional position in schooling or for advanced professional study; it is the appropriate degree to provide professional foundation study in preparation for the Ed.D. program.

Admission
Requirements are applicable in accordance with a selected emphasis:

1. Administrative and Policy Studies in Education: Possession of a valid instructional credential is preferred. Students with a demonstrated commitment to improving American schooling are sought for admission.

2. Bilingual/Cross-Cultural Education: Completion of an approved program of professional preparation leading to a preliminary instructional credential is required, as is classroom experience — as a teacher or aide — for at least two years, at any level of schooling. Evidence of professional competence and conscientiousness, as well as the necessary second-language proficiency, are also required.

3. Curriculum and the Study of Schooling: Persons with above-average capabilities and interest in curriculum and instruction are sought. Experience as a practitioner in the emphasis field is advantageous.

4. Teacher Education: This is a four-quarter program leading to qualification for a Multiple or Single Subject Instructional Credential and a Master of Education degree. Individuals with the highest qualifications in all subject areas, particularly mathematics, science, and the humanities, are sought. Experience in working with children is advantageous.

Course Requirements
A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing, although no specific upper division courses are necessary. Six courses (24 units) must be taken in the Education 200 and 500 series. A maximum of two 500-series courses (eight units) may be applied toward the divisional course minimum and toward the graduate course minimum.

Two courses must be selected from Education 200A, 200B, 210A, 210B. Additional courses to complete the 36-unit requirement may be selected from offerings in Education and/or other departments with consent of the assigned faculty adviser.

Thesis Plan
Under this plan, you prepare a thesis which is a report of the results of original investigation. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the Graduate School of Education and the chair of your thesis committee.

The Theses and Dissertations Adviser and the Graduate Division publication, Regulations for Thesis and Dissertation Preparation, provide guidance in the final preparation of the manuscript. The department does not require a formal examination in connection with the thesis plan.

Comprehensive Examination Plan
The comprehensive examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as ability to focus that knowledge on specific problems.

The examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter, and may be repeated once if failed the first time.

Doctor of Education
The Doctor of Education (Ed.D.) professional degree program is designed to meet the needs of individuals preparing for careers of leadership and applied research in the schools and community educational programs. Major focus includes practice, applied studies, and knowledge related to professional skills.

Master of Arts in Education
The Master of Arts (M.A.) academic degree program in Education is designed to meet the needs of individuals preparing for careers in basic research or for advanced graduate study; it is the appropriate prerequisite education degree to the Ph.D. degree program.

Course Requirements
A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing, although no specific upper division courses are necessary. Six courses (24 units) must be taken in the Education 200 and 500 series. A maximum of two 500-series courses (eight units) may be applied toward the divisional course minimum and toward the graduate course minimum.

Two courses must be selected from Education 200A, 200B, 210A, 210B. Additional courses to complete the 36-unit requirement may be selected from offerings in Education and/or other departments with consent of the assigned faculty adviser.

Thesis Plan
Under this plan, you prepare a thesis which is a report of the results of original investigation. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the Graduate School of Education and the chair of your thesis committee.

The Theses and Dissertations Adviser and the Graduate Division publication, Regulations for Thesis and Dissertation Preparation, provide guidance in the final preparation of the manuscript. The department does not require a formal examination in connection with the thesis plan.

Comprehensive Examination Plan
The comprehensive examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as ability to focus that knowledge on specific problems.

The examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter, and may be repeated once if failed the first time.

Doctor of Education
The Doctor of Education (Ed.D.) professional degree program is designed to meet the needs of individuals preparing for careers of leadership and applied research in the schools and community educational programs. Major focus includes practice, applied studies, and knowledge related to professional skills.
Admission
To be admitted, you must have a master's degree in education or equivalent, at least two years of successful professional experience in education or equivalent (may be completed prior to advancement to candidacy for all divisions except administration, curriculum, and teaching studies which requires the experience as a prerequisite to admission), and demonstrated evidence of potential for professional leadership. You are admitted by a division and must petition for a change of division.

Course Requirements
A minimum of 18 courses is required, as follows:

1. Three research methods courses, with no more than two introductory (first tier) courses and at least one intermediate/advanced (second tier) course, selected from the departmental list approved for the Ed.D.

2. Nine education courses, of which at least six must be from the Education 400 series; all courses must be approved by the faculty adviser.

3. Three supplemental courses selected from offerings in the school or in another UCLA professional school or department.

4. A sequential three-quarter field practicum (Education 499A-499B-499C) in which you engage in field research activities and submit a field research paper or similar product by the end of the sequence.

Individual course requirements may be waived, under exceptional circumstances, at the discretion of the committee on graduate degrees, admissions, and standards; wherever academic background is needed, a faculty adviser may recommend additional coursework.

Qualifying Examinations
After satisfying the above requirements, you are eligible to take the following qualifying examinations:

1. A written examination which is offered twice yearly, once in Fall Quarter and once in Spring Quarter. The examination tests the core knowledge of the division and emphasis you have selected. The questions reflect a research and theoretical orientation. The examination may be repeated once if failed the first time.

2. The University Oral Qualifying Examination, conducted by the doctoral committee, which employs topics from both education and the cognate discipline(s) that are related to your written research proposal. In case of failure, the examination may be repeated once on the recommendation of your division.

For further information on the written and oral qualifying examinations, contact the Office of Student Services.

Cooperative Degree Programs
General information regarding the following cooperative degree programs is available in the Office of Student Services, 201 Moore Hall.

J.D./Education Program
The Graduate School of Education and the School of Law offer a concurrent plan which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both schools, students are awarded both degrees on its completion. (This program will not be offered in 1988-89.)
The Graduate School of Education and the Latin American Studies Program offer an articulated degree program which allows students to combine study for the M.A. in Latin American Studies and the M.Ed., with an emphasis in curriculum. Articulated programs do not allow course credit to be applied toward more than one degree.

UCLA/CSULA Joint Ph.D. in Special Education

A joint Ph.D. program in Special Education is offered by UCLA and California State University, Los Angeles. The goals of the joint program are (1) the stimulation and preparation of research workers of high competence in the various fields of special education, (2) improved preparation for potential teachers of exceptional individuals, and (3) improved preparation of personnel for research and in policy formation in the public schools of California. Students seeking information regarding emphases and requirements should consult the joint doctoral adviser at UCLA (126B Moore Hall) or the chair of the Department of Special Education at CSULA.

Certificate (Credential) Programs

The California Commission on Teacher Credentialing has authorized the Graduate School of Education to offer professional programs that lead to (1) the Multiple Subject Instructional Credential, (2) the Single Subject Instructional Credential, (3) the Bilingual Emphasis Instructional Credential, (4) the Administrative Services Credential, (5) the Pupil Personnel Services Credential, (6) the School Psychologist Services Credential, and (7) the Severely Handicapped Specialist Credential. Programs leading to items 5 and 6 above will not be offered in 1988-89.

Upper Division Courses

100. Cultural Foundations of Education. (Formerly numbered 100A, 100B.) Prerequisite: consent of instructor. Analysis of significant problems and issues in contemporary American education using historical, philosophical, sociological, and organizational perspectives, including those of particular minority groups in the U.S. Patterns of intergroup and school-community relations. Mr. Don-Bremme, Mr. Rust

102. The Mexican American and the Schools. (Same as Chicano Studies M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on the development of Mexican American and Chicano youth and communities. Mr. Don-Bremme, Mr. Rust

M108. Sociology of Education. (Same as Sociology M175.) Prerequisite: Sociology 1. Study of the process and interaction patterns in educational organizations; the relationship of such organizations to aspects of society, social class, and power; social relations within the school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Mr. O'Shea, Ms. Wrigley

112. Psychological Foundations of Education. Prerequisite: consent of instructor. Analysis of learning processes in school situations. Processes of human motivation, the affective, cognitive, social, and personal development of children and adolescents, the evaluation of learning, individual differences, and the implications of relevant theory and research for instructional practices. Ms. Graham, Ms. Kourilsky, Mr. Silberman

125A. Education of Exceptional Individuals. Prerequisite: Psychology 10 or equivalent. An introduction to the field of special education, with emphasis on the psychology of individual differences, the learning characteristics of exceptional individuals, and application of research and theory to special education problems. Mr. O'Shea, Ms. Wrigley

125B. Principles for Teaching Exceptional Individuals. Prerequisite: consent of instructor. Approaches for teaching exceptional individuals in special and regular education programs. Principles and assumptions underlying prescriptive approaches. Emphasis on individualizing curriculum and classroom management. Observation in schools.

M148. Women in Higher Education. (Same as Women's Studies M148.) Prerequisite: upper division standing. The education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation. Ms. Aslin

180. Social Psychology of Higher Education. An overview of significant studies in the social psychology of higher education. Focus on institutional characteristics and students' interpersonal and intrapsychic processes, with special emphasis on identifying and explaining the effects of the college experience on student development and achievement. Mr. Trent

197. Current Issues in Education. Prerequisite: consent of instructor. A variable topics course organized around a selected current issues basis, including field observations and readings through seminar discussions. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor.

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor. Independent study of individual problems.

Graduate Courses

200A. Historical Research and Writing. Techniques of historical research and writing for students who are or who will be engaged in research and in report or paper or thesis writing, regardless of their fields of interest. Mr. O'Shea, Mr. Rust

200B. Survey Research Methods in Education. Prerequisite: course 210A or equivalent. Problems of conceptualization, organization, and gathering non-experimental and quasi-experimental quantitative and qualitative data. Mr. O'Shea

200C. Analysis of Survey Data in Education. Lecture, three hours; laboratory, two hours. Prerequisite: course 200B. Introduction to techniques of processing and analyzing nonexperimental and quasi-experimental quantitative data. Mr. O'Shea

M201C. History of American Education. (Same as History M254.) The intellectual and social forces impinging on American education from the 1860s to the present. Analysis of the relation between these forces and the values, curriculum, structural organization, and functions of education. Mr. S. Cohen

203. Evaluating Educational Theory. (Formerly numbered 411B.) Prevalent evaluation theories, systems for categorizing these theories, and the process of theory development in educational evaluation. Mr. Alkin

203C. Educational Anthropology. Recommended prerequisite: Anthropology 1. Study of education through the research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enunciation, schooling, values, cognition, language, and cultural change.

204A. Introduction to Education and the Social Sciences. (Not the same as course 204A prior to Fall Quarter 1987.) Prerequisite: consent of division. An interdisciplinary course intended to introduce students to the study of educational issues, texts, and movements of thought through sociological, historical, and comparative perspectives.

Mr. Hawkins, Mr. Nakanishi, Mr. Rust

204B. Introduction to Comparative Education. An examination of conceptual and methodological questions underlying comparative education. Particular attention to the development of the field and to styles of social analysis which may be applied to comparative and cross-national studies in education.

Mr. Hawkins, Mr. Nakanishi

204D. Minority Education in Cross-Cultural Perspectives. Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems.

Mr. Hawkins, Mr. Nakanishi

204E. International Efforts in Education. Analysis of problems and concepts related to diffusion, borrowing, and adaptation across cultural and national boundaries. Activities of bilateral and multilateral agencies in promoting international education, as well as conceptual and practical curricular efforts which intend to increase international understanding.

Mr. Hawkins and the Staff

204F. Nonformal Education in Comparative Perspective. A comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. Types of programs include, among others, consciousness raising, community action, skills training, literacy, and extension programs.

Mr. Hawkins, Mr. Rust

205. Computers in the Educational Process. Introduction to the theory, experimentation, evaluation, and future of computer systems in education, with emphasis on computer-assisted instruction (CAI), and the use of computers to teach programming and to foster development of writing, computing, and filing skills.

Mr. Hawkins, Mr. Rust, Ms. Dorr

206A. Philosophy of Education: Introduction. Systematic introduction to the field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values.

Mr. Ericson, Mr. Weinberg
206C. Introduction to Conceptual Analysis. Conceptual analysis of recurrent and contemporary themes in the field. Emphasis on the development of logical and linguistic skills used in the research of educational problems and issues. Mr. Ericson

206D. Philosophy of Education: Ethics and Values. A study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Mr. Ericson

207. Politics of Education. Prerequisite: one approved research methods course required for master's or doctoral degree at GSE. Political dimensions of educational policy; relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in educational policies. Mr. Catterall, Mr. Hawkins

208A. Perspectives on the Sociology of Education. Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher-student relationships, reform in education at the elementary, secondary, postsecondary levels. Mr. O'Shea, Mr. Jones

208C. Explanation in the Social Sciences and Educational Research. Lecture, two hours; discussion, two hours. Prerequisite: graduate standing or consent of instructor. An overview of basic strategies and forms of explanation relevant to inquiry in education from the vantage point of the various social and behavioral sciences disciplines. Mr. Blurton Jones, Mr. Ericson

209C. Problems in Research and Evaluation in Higher Education. A critical review of research and evaluation studies of higher education, with special attention to the need for studies of new programs and problems, and to the design and methodology of evaluative research. Mr. Astin

209D. The System of Higher Education. An analysis of the structure and function of American post-secondary education from a systems perspective. Emphasis on the structure of the system and comparative characteristics (faculties, student bodies, finances, outputs) of different types of institutions. Mr. Astin, Mr. Clark

210A. Introduction to Research Design and Statistics. Fundamentals of research design. The language of research. Planning and conduct of research. Interpretation and reporting of research outcomes. Introduction to descriptive statistics: mean, median, mode, variance. Introduction to the normal curve. Mr. Levin, Mr. Skagert

210B. Statistical Inference. Prerequisite: knowledge of research designs and univariate descriptive statistics. Regression, correlation, inference, normal curve tests, t-tests, simple and factorial analysis of variance, and selected nonparametric tests. Mr. Skagert, Ms. Webb

210C. Analysis of Variance. Prerequisite: course 210B or equivalent. Completely randomized designs, randomized block designs, nested designs, and their combinations into advanced factorial designs; fixed, random, and mixed models. Analysis of covariance, introduction to multiple regression and quasi-experimental designs. Mr. Lewin, Ms. Webb and the Staff

210E. Factor Analysis. Prerequisites: courses 2102, 2103. Exploratory factor analysis, rotations, confirmatory factor analysis, multiple-group analysis. Mr. Mutshen

211A. Measurement of Educational Achievement and Aptitude. Prerequisite: course 210A. A critical study of tests of achievement and aptitude, with emphasis on group tests; the relation of achievement to aptitude; social implications of the measurement of intelligence; elements of validity and reliability. Mr. Popham, Mr. Skagert

211B. Measurement in Education: Underlying Theory. Prerequisite: course 211A. Measurement theory as applied to testing, focusing primarily on classical test theory; implications of theories for test construction and selection; current status of validity and reliability. Mr. Burstein, Ms. Webb

211C. Item Response Theory. Prerequisites: courses 210C, 211B, or equivalent. Item response theory, applications to educational achievement tests, item bias, test information, test equating, computerized adaptive testing. Mr. Wittrock

212A. Learning and Education. Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction. Mr. Wittrock

212B. Motivation and Affect in the Educational Process. Prerequisites: courses 210A, 212A. A review of the theoretical and empirical literature on motivational factors in school settings and the conditions for the acquisition of affective outcomes. Ms. Graham

212C. Cognition and Creativity in Education. Prerequisite: course 212B. A review of the theoretical and empirical literature on cognitive processes in school learning, including concept learning, problem solving, learning to learn, and creativity. Mr. Wittrock

2123. Fundamentals of Student Personnel Work. Prerequisite: graduate standing or consent of instructor. Analysis and in-class application of student personnel service theory and methods, with emphasis on student assessment and development, task groups, and evaluation. Mr. Healy, Mr. Skagert

212B. Legal and Ethical Bases of Student Personnel Work. Prerequisite: course 212A. Ethical and legal codes relevant to psychological services in schools and community; relation of value systems and personality; case studies in the implications of personal values in counseling situations. Ms. Berry

2123. Group Counseling Theory and Process. Lecture, three hours; discussion, one hour. Prerequisite: courses 212A, 2124A, and 214B, or consent of instructor. A critical review of the basic theories of group counseling, social perception, attitude formation, and the effects of behavior changes in individuals and groups. Evaluation of the social, psychological, and educational principles related to the therapeutic experiences of individuals in small groups. Mr. Berry, Ms. Tidwell

2124A. Counseling Theory and Practice. Application of concepts from cognitive psychology to the nomenclature problems which people encounter in everyday life, such as finding suitable employment, achieving satisfying interpersonal relationships, and making productive use of leisure time. Mr. Healy, Ms. Tidwell

2124B. Advanced Counseling Theory and Practice. Limited to advanced degree candidates whose major interest is counseling and to selected high school and college counselors. Counseling procedures, educational planning, and methods for helping students handle personal problems that interfere with school progress; critical evaluation of procedures. Mr. Healy

2124C. Principles of Career Planning. Examination of the nature of careers across ages and ethnic and sexual groups in order to determine implications for career planning in postindustrial society. Mr. Healy

214D. Career Counseling. Depth study of current theories, principles, problems, and practices of career counseling. Mr. Berry, Mr. Healy

214E. Substance Abuse and Addiction. Prerequisite: course 214A or equivalent. Theory and practice of prevention and intervention in substance abuse and addiction from the perspective of counseling and educational practice. Mr. Skagert

215. Personality, Motivation, and Attribution. (Same as Psychology M215B.) Current research and theory relating personality variables (e.g., attribution styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affirmative domains.

216. Counseling Models from a Cross-Cultural Perspective. Prerequisite: course 214A. A critical review of the research related to the psychological, educational, and sociological characteristics of counseling clients within a cross-cultural perspective and the implications for counseling models. Evolution of counseling practices through an analysis of school, community, and mental health settings. Mr. Berry, Ms. Tidwell

217A. Social Development and Education. Familial, school, and other influences on the child; development in the context of current research and theoretical models; consideration of methodological research on family, peer group, and school; application of developmental theory to research and educational practice. Mr. Ericson

217B. Cognitive Development and Education. Lecture, two hours; discussion, two hours. Prerequisite: graduate standing. A critical review of theories of thinking and inference, cognitive strategies, the development of concepts from cognitive psychology to the educational setting. Mr. Healy, Mr. Rieger, Ms. Vysotsky

217D. Language Development and Education. Research and theory on how children develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectical issues. Ms. Hecht, Ms. Valadez

217F. Human Development and the Educational Process. Cognitive and social development; cultural, familial, and school influences on human development; application of developmental theory and research to educational practice. Ms. Healy, Ms. Berry

218A. Multiple Regression Analysis. Prerequisite: course 210B. Regression-based techniques for analyzing quantitative data; multiple regression methods, multiple correlation, partial correlation; introduction to the general linear model, with direct application to educational inquiry. Mr. Burstein, Ms. Webb

218B. Advanced Quantitative Models in Non-experimental Research. Prerequisites: course 218A or equivalent, consent of instructor. Quasi-experimental designs, application of path analysis, factor analysis, analysis of categorical data. Mr. Burstein, Mr. Muthen

218C. Structural Equation Modeling. Prerequisites: courses 210D, 210E, 218B, or equivalent. Extension of path analysis (causal modeling) by considering models with measurement errors and multiple indicators of latent variables. Confirmatory factor analysis, covariance structure modeling, and multiple-group analysis. Identification, estimation, testing, and structural equation considerations. Mr. Muthen

218D. Analysis of Categorical and Other Nonnormal Data. Prerequisites: courses 210D, 210E. Regression analysis with dichotomous and polytomous dependent variables, log-linear models, coefficients of association for categorical variables, factor analysis, and structural equation modeling. Mr. Muthen

420 / GRADUATE SCHOOL OF EDUCATION
219. Laboratory: Advanced Topics in Research Methodology. Provides assistance in the design of research and interpretation of data for advanced students from other divisions. Coverage of special topics not included in other courses on research methods. Ms. Burstein, Ms. Webb

220A. Inquiry Into Schooling: Organization and Change. Critical analysis of: the relationship of organization and change. Coverage of special topics with emphasis on techniques of conducting observational work into their current research interests. Ms. Levine

221. Computer Analyses of Empirical Data in Education. Lecture, two hours; laboratory, two hours. Prerequisite: courses 209C (section 1), 210A, or equivalent. Designed to develop conceptual and technical skills needed for designing and executing empirical research utilizing statistical packages. Each student conducts two original studies. Equal emphasis on techniques of data analysis and interpretation of results. Ms. Hecht, Ms. Krupski, and the Staff

M222A. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M236Q, Psychiatry M235, and Psychology M295.) Prerequisite: consent of instructor. The skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some of the uses of observations and their implications for research in the social sciences. Students expected to integrate observational work into their current research interests. Ms. Levine

222B. Design Issues in Naturalistic Research. Lecture, three hours; discussion, one hour. Prerequisite: course M222A or consent of instructor. Issues in conceptualization and design of naturalistic research studies, particularly within educational settings. Specific topics include problem definition and focus, units of observation, sampling, controlled comparisons and meaningful variation, and reliability/validity concerns in observational research. Special attention to ethnographic studies. Ms. Levine

222C. Qualitative Data Reduction and Analysis. Lecture, three hours; discussion, one hour. Prerequisite: course M222A or 222B or consent of instructor. Theory of and practice in qualitative data reduction and analysis. Discussion of data storage and retrieval systems. Exploration of qualitative research techniques such as typologies and attribute spaces, and specific analytic competencies and attribute spaces, and specific analytic competencies and attribute spaces, and specific analytic perspectives. Interfacing qualitative and quantitative data. Ms. Levine

223. Aesthetics and the Curriculum. Lecture, two hours; discussion, two hours. An examination of various ideas and theories in aesthetics and the application of these in schooling contexts. Mr. Weinberg

224. Problems and Issues in Bilingual and Multicultural Education. Introduction to the development and implementation of bilingual and multicultural programs in the U.S. Analysis of program goals, models, typologies, and effectiveness. Ms. Valadez

225A. Issues in the Education of Exceptional Individuals. Prerequisite: graduate standing. Analysis of research and interpretation of data to advanced students, and programs for the exceptional; consideration of commonalities and differences among exceptional individuals. Ms. Webb, Ms. Krupski, and the Staff

225B. Advanced Issues in the Education of Exceptional Individuals. Prerequisite: consent of instructor. A synthesis of developmental and educational theory relevant to the study of exceptional individuals, including consideration of the historical context of current research and applied issues in special education. Ms. Keogh

226. Research in the Education of Learning Handicapped Individuals. Prerequisite: course 225A or consent of instructor. Research on the education of individuals with learning handicaps, with emphasis on assessment and instructional modifications. Ms. Krupski

227A. Research on the Learning Characteristics of Exceptional Individuals. Prerequisite: course 225B. An overview of research and theoretical learning characteristics of exceptional individuals and discussion of the application of this work to educational practice. Ms. Krupski

227B. Research on the Cognitive and Language Characteristics of Exceptional Individuals. Prerequisite: course 227A. Review of the empirical and theoretical literature regarding the language and cognitive development of exceptional individuals; focus on intervention programs developing language and cognition. Ms. Hecht

227C. Research on the Behavioral and Social Characteristics of Exceptional Individuals. Prerequisite: course 227B. Analysis of social and emotional development of exceptional individuals and the development of social competence in special education programs. Mr. Hewett

228. Observation Methods and Longitudinal Studies. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Basic seminar for graduates interested in designing and conducting longitudinal studies. An interdisciplinary course dealing with behavioral research in anthropology, biology, psychology, and the medical sciences. Proximate causation, development, and evolution in animal behavior. Physiology and the organization of behavior. Vertebrate social organization. Animal communication. The application of natural selection theory to human social behavior. In progress grading. Mr. Burton Jones

231. Structure of Occupations. (Same as Anthropology M231.) Lecture, two hours; discussion, two hours. Shifts in the occupational structure of the U.S., changing skill requirements for jobs, the effects of automation on work environments, computer training, and informal education in preparing people for occupation. Mr. O'Shea, Ms. Wrigley

232. Instructional Analysis. (Formerly numbered 41B.) Prerequisite: consent of instructor. Theoretical and empirical analysis of instructional variables as they relate to diverse types of instructional strategies. Development of skill in techniques of conducting instructional research. Ms. Baker

234. Education and Social Stratification. The relationship between education and components of social stratification, including occupations and earnings. Competing theories used in studying education and social stratification; relevant research. Conclusions regarding individual career decisions, social policies, and theories of social stratification. Mr. O'Shea, Ms. Wrigley

235. Education and Work. A review of the theoretical and empirical literature on issues concerning the interface of educational and work. A review of the theories concerning the interface of educational and work. A review of the careers of individuals in and out of school. An appraisal of present vocational training and manpower development programs. Mr. Silberman

236. Human Abilities. Prerequisite: course 210B or equivalent. An examination of the nature of human ability and the management of intellectual abilities and their relations to learning and instruction. Review of research and theories of models of ability and test development. Ms. Webb

237. Principles for Effective Media. Prerequisites: courses 205, 210A, and 212A, or consent of instructor. Education of the media: principles underlying the effective use of media content and media utilization. Consideration of particular differences among print, computer, and audiovisual media, and in and out of school. Role of research in development of such materials. Ms. Baker, Ms. Dorr

238. Cross-National Analysis of Higher Education. Comparative study of national systems of higher education: their division of work, basic values, structures, and cultural contexts; modes of national interaction, and types of change. Mr. Clark

239. Organization and Governance of Educational Systems. Academic organizations, precollege and postsecondary, are most appropriately studied as complex, professionalized organizations. Emphasis on characteristics of educational institutions and systems as organizations: environmental relations, governance structures, processes, and patterns of decision making and policy-making. Ms. Erickson, Mr. Williams, and the Staff

240. Research Methodology in School Administration. Prerequisite: consent of instructor. Examination of research problems and strategies in school administration. Ms. Baker, Mr. Clark

241. Economic Analysis for Educational Policy and Planning. Prerequisite: graduate standing. An introductory course focusing on concepts and quantitative methods from economics, statistics, and operations research as applied to educational policy and planning issues. Instruction in programming microcomputers for instruction in microeconomics and management information systems (dBASE). Mr. Bruno

244. Economics of Education. An introductory course that synthesizes microeconomic and microeconomic tools applied to educational. Methodologies such as marginal analysis, linear programming, Leontief I-O models, and Lorenz curve analysis, with application to school finance, underdeveloped countries, equality of educational opportunity, and credentialing. Ms. Bruno, Mr. Solmon

245. Seminar: Cost-Benefit Analysis in Education. Conceptual and theoretical underpinnings of cost-benefit analysis, critical analysis of current cost-benefit studies, and procedures for the conduct of cost-benefit studies. Ms. Akin, Mr. Solmon

246A. Seminar: Mathematical Modeling in Educational Policy Analysis. Prerequisite: course 242 or consent of instructor. An introduction to mathematical modeling techniques as applied to educational policy and planning issues. A mathematics review and instruction in the use of the MPS (Mathematical Programming System) and development of software for Monte Carlo computer simulation studies in education. Mr. Bruno

246B. Seminar: Operations Research — Systems Analysis in Education. Prerequisite: course 242 or consent of instructor. Application of advanced mathematical modeling techniques of operations research to educational policy and planning. Design of computer-based management information systems in education using dBASE. Mr. Bruno

247. Seminar: Personnel Training for the Corporate Setting. Lecture, two hours; discussion, two hours. Survey of major topics on personnel training methods used by organizations to facilitate the learning of job-related behavior on the part of their employees. Topics include needs assessment, maximizing trainees' learning, training methods, and evaluating training programs. Mr. Silberman

248. Seminar: Perspectives on Lifelong Learning. Prerequisite: consent of instructor. Lifelong learning is studied theoretically and as an area of educational research, policy, and practice. Conceptual distinctions among the major proponents of lifelong learning and implications for schooling.

317C. Principles and Methods for Teaching Elementary Science — 5-6 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 5-6. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

Mr. Lara

318A-318B. Principles and Methods for Multiple Subject Instruction (2 units each). Prerequisite: consent of instructor. Course 318A is prerequisite to 318B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in elementary schools. Observation and participation in schools. S/U grading.

Ms. Kourilsky

319. Principles and Methods for Teaching Composition — 1-12 (6 to 12 units). Prerequisite: consent of instructor. Drawing from current research and theories, participating teachers expand their repertoire of techniques for teaching writing and literature. Focus on drawing on expertise of classroom teachers and becoming teacher-writers in addition to writing teachers. S/U grading.

Mr. Lara

Mr. Lara

323. Teacher-Researcher: Principles of Classroom Research (6 to 12 units). Prerequisite: consent of instructor. Guidance of teachers conducting research in their language arts classrooms, focus on research methodologies in community college, with emphasis on naturalistic research techniques, relevant research to proposed studies, research conducted by other teacher researchers, publication of findings. S/U grading.

Mr. Lara

324A. Observation and Participation: Multiple Subject Instruction (2 to 6 units). Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which multiple subjects are taught, normally in elementary schools. Preparation for supervised teaching. S/U grading.

Mr. Lara

324B. Supervised Teaching: Multiple Subject Instruction (2 to 10 units). Prerequisite: course 324A, consent of instructor. Practice teaching under the daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading.

Ms. Kourilsky

324C. Supervised Teaching: Single Subject Instruction (2 to 10 units). Prerequisites: courses 324B, consent of instructor. Advanced practice teaching under the daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading.

Ms. Kourilsky

325. Laboratory in the Education of Exceptional Individuals. Prerequisite: course 125A or consent of instructor. Six to eight hours per week of fieldwork in the UCLA Neuropsychiatric Institute and Hospital School, other campus facilities, or public school special education programs.

Mr. Lara

Mr. Lara

327. Principles and Methods for Teaching Spanish Effectively (6 to 12 units). Prerequisite: consent of instructor. Emphasis on teaching a literature-based language arts program incorporating process skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

Mr. Lara

328. Principles and Methods for Integrating Content and Language Instruction (6 to 12 units). Prerequisite: consent of instructor. Theoretical rationale for integrating language teaching and content instruction for ESL students at the intermediate or advanced level in English. Various Sheltered English techniques developed, modeled, and used in hands-on workshops involving peer and expert coaching. S/U grading.

Mr. Lara

329. Integrating the Elementary School Curriculum — K-6 (6 to 12 units). Prerequisite: consent of instructor. Open to credentialled teachers. Interdisciplinary strategies emphasizing teaching and writing in the content areas, relating science and mathematics, and promoting enrichment follow-up activities in other disciplines such as social studies and art. S/U grading.

Ms. Kourilsky

330A. Observation and Participation: Single Subject Instruction (2 to 6 units). Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which one subject is taught, normally in a secondary school. S/U grading.

Ms. Kourilsky

330B. Supervised Teaching: Single Subject Instruction (2 to 10 units). Prerequisites: courses 330A, consent of instructor. Practice teaching under the daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading.

Ms. Kourilsky

330C. Supervised Teaching: Multiple Subject Instruction (2 to 10 units). Prerequisites: course 330B, consent of instructor. Advanced practice teaching under the daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in a secondary school. S/U grading.

Ms. Kourilsky

Mr. Lara

332. The Immigrant Experience (6 to 12 units). Prerequisite: consent of instructor. Readings, films, interviews, and field trips to foster understanding of the composition, origins, landscape expression, and ambitions of Los Angeles' new populations, since this city is the destination of many immigrant groups entering the U.S. S/U grading.

Mr. Lara

334. Supervised Teaching: Higher Education. Mr. A. Cohen

360. Teaching Clinical Practicum. Discussion, two hours; fieldwork, two hours. Prerequisite: consent of instructor and director of Teacher Education Laboratory. Emphasis on directed field experience. Examination and analysis of different methods of subject matter instruction. Ms. Kourilsky

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching apprentice associate, assistant, or fellow. A teaching apprenticeship under the active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Foundations of Education Policy Analysis. Prerequisite: consent of instructor. Principles of decision making and policy formation, implementation, and analysis in the context of the educational system. Critical reflection on the effectiveness and equity of educational delivery systems and programs, and the complex nature of educational governance in contemporary America. Mr. Bruno, Mr. Catterall

401. Structure and Functions of Schools as Complex Organizations. Prerequisite: consent of instructor. Critical analysis of alternative assumptions about organizations, how they function, and why people in organizations behave as they do. Application to the special circumstances of schools and to contemporary issues and problems in school leadership, improvement, and reform.

Mr. Erickson, Mr. Williams

410A-410B. Fundamental Issues in Higher Education, Work, and Adult Development. Course 410A is prerequisite to 410B. Two-course sequence de- signed to orient new students to issues, ideas, and literature that constitute the division. Emphasis on understanding social and political issues that shape high- er education, work, and adult development. Ms. Astin, Mr. Wilms.

411A. Introduction to Educational Evaluation. An introduction to systematic evaluation as it applies to appraising educational programs. Consideration of program evaluation as a means of improving the quality of educationally relevant decisions. Mr. Alkin, Mr. Popham.

411B. Procedural Problems in Evaluation. (For- merly numbered 411C.) Assessment methodologies appropriate for evaluation problems. Writing evalua- tion proposals, developing program monitoring pro- cedures, selecting appropriate evaluation design strategies, coping with ethical considerations in evalua- tion, framing the decision context, and reporting evaluation results. Mr. Alkin, Mr. Burstein.

412A. Criterion-Referenced and Norm-Refer- enced Test Construction. (Formerly numbered 230.) Prerequisite: course 211A. Construction of cri- terion- and norm-referenced assessment instru- ments. Appropriateness of different assessment de- vices considered in relation to research, develop- ment, and evaluation. Mr. Popham.

412B. Intersecting Dimensions of Teaching and Testing. Prerequisite: consent of instructor. Designed to develop the acquisition of insights and skills based on the theoretical and practical judgment and instruction when high-stakes educational achievement tests are used. Mr. Hunter, Mr. Popham.

415A. Appraisal of Intelligence. Prerequisites: courses 210A, 211A. Concepts and theories leading to development of individual cognitive assessment instruments; issues and implications relating to the application and current practices of utilizing such tests in a multicultural laboratory. Experience includes administration and interpretation of standard- ized instruments; case studies. Mr. Healy, Ms. Tidwell.

415B. Human Appraisal in School Counseling and School Psychology. Prerequisites: course 415A, consent of instructor. Survey and demonstra- tion of the major techniques of cognitive, affective, and achievement appraisal and their applicability to problems found in the school setting. Research and theoretical issues concerned with appraisal. Mr. Skager, Ms. Tidwell.

420A. Principles of Curriculum. Critical examina- tion of the basic concepts underlying the determina- tion of objectives, the selection and organization of learning experiences, and the evaluation process. Ms. Crabtree, Mr. McNeil.

421A. Programs and Research in Early Childhood Education. Prerequisite: one course from the devel- opment series. Examination of child care programs and their potential for improving the quality of child care and parental in- formation of programs and review of the relation of research in developmental psychology and education to goals of early childhood education. Ms. Howes.

421C. Research and Evaluation of Early Child- hood Education Programs. Prerequisite: course 421A and consent of instructor. Critical review of evaluation models (e.g., summative, formative, implementa- tion) and their utility for improving and evaluating the quality of child-related programs. Mr. Feshbach.

421D. Parents and Community Agents in Child Development. Prerequisites: two courses from the development series, one course from early childhood education, or equivalent. A critical review of the theo- retical basis and effectiveness of training programs for parents of young and elementary school-aged children; the relation of preschool parent programs to family development and the role of the programs in the community. Mr. Feshbach.

421F. Issues in the Application of Child Develop- ment and Educational Research to Social Policy. Relationships among policymakers and social scien- tists in the development, implementation, and evalua- tion of educational programs as an American so- ciety; school organization; schooling alternatives; problems in the management of educational change. Mr. McNeil.

424A. Social Studies in the Curriculum. Advanced study in social studies curriculum development; prob- lems in defining objectives and organizing single and multidisciplinary programs; critical review of literature on innovative and experimental social studies curriculum design; and emphasis on experimental study of instructional programs. Ms. Crabtree.

424B. Reading in the Curriculum. Prerequisite: course 210A. Study of reading curricula and instruc- tional procedures, with emphasis on the rationale and research underlying their development and the re- search comparing their effectiveness. Mr. McNeil.

424C. Language in the Curriculum. Advanced study in the school language curriculum; application to the improvement of the curriculum in the classroom. Ms. Crabtree.

424G. Curriculum Design for Bilingual Education. Prerequisite: consent of instructor. Advanced study of curriculum design for bilingual educational programs. Philosophical basis for bilingual programs; theories of learning and instruction applied to the bilingual learn- er; language assessment; development of instruc- tional component; program evaluation. Ms. Valadez.

430. Higher Education and the Labor Market. The benefits of education from an economic perspective; the labor market for college graduates; computerization, preparation for work; manpower forecasting and Ph.D. demand and supply; policies toward the doctor- al labor market and adults in postsecondary educa- tion. Mr. Solmon.

431A. Administration in Higher Education. Over- view of college and university administration and in- troduction to policy research and analysis in postsec- ondary institutions. Case studies of administrative problems, policies, and practices. Management in- formation systems, resource allocation, and issues re- lated to responsibility, authority, and participation in administration. Mr. Cohen.

431C. Innovative Forms and Practices in Higher and Continuing Education. New institutional forms (e.g., external degree programs and other nontradi- tional approaches to higher education, neighborhood learning centers, and peoples’ colleges). Method- ological innovations such as computer-assisted in- struction, credit by examination, and independent study. Mr. A. Cohen.

433B. Technological Development in Educational Media. Lecture, two hours; laboratory, four hours. Prerequisites: courses 210A, 212A. Theory, current problems, and anticipat- ed trends in instrumentation and systems develop- ment for instructional applications and research, in- cluding computer-assisted instruction, communication satellites, and other advanced systems; theory and laboratory practice with instrumentation in education- al research. Ms. Baker, Ms. Dorr.

437B. Corporate Educational Programs. History and scope of corporate training programs; current educational problems in training programs within in- dustry as they are affected by automation and technol- ogy change. Mr. Silberman.

440C. Administration of the Instructional Pro- gram. Examination of current educational problems in society and the strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs. Mr. Erickson and the Staff.

441A. Instructional Supervision A. Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rate and degree of learning, retention and transfer, monitoring and ad- justing instruction to meet the needs and capacities of learners. Mr. Hunter.

441B. Instructional Supervision B. Prerequisite: course 441A or equivalent. Basic techniques of script-taping, instructional materials, and planning teacher conferences through analysis of script-tapes, con- ducting and analyzing growth-awakening teacher con- ferences. Conducting mini-lessons to demonstrate elements of good instruction; planning superficial observation, hiring, and negotiating procedures; student attend- ance, control, and civil rights.
443. Introduction to Policy Analysis in Education. Prerequisite: consent of instructor. An overview of the political, economic, and legal context of educational policy formation. Included in this examination are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, the role of subordinates in the policy-making process).

444A. Legal Aspects of Access to a Public Education. Prerequisite: course 442B or consent of instructor. A study of access to public education focused on the issues of affirmative action, testing, tracking, bilingual/bicultural education, special education, correctional education, and malpractice suits.

444B. Equality of Educational Opportunity through Desegregation and Finance Case Law. Prerequisite: course 442B or consent of instructor. A concentrated review of the definition of equality of educational opportunity as it is being developed by the courts in cases concerning desegregation and educational finance.

447. Seminar: Educational Policy and Planning. Special Studies (1 to 4 units). Prerequisite: consent of instructor.

448A. Urban School Leadership. Prerequisite: consent of instructor. Analysis of the problems of urban school leadership. Emphasis on the changing nature of the urban principalship, with considerable attention to the roles of other school and community agencies that interact with the urban school leader.

448B. Urban Leadership Laboratory. Prerequisite: consent of instructor. Analysis of an opportunity to practice human and technical skills required for success as an urban school leader. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics.

460. Seminar: Special Issues in Evaluation. Topics and instructors vary each quarter. Recent emphases included evaluation utilization and cost-effectiveness evaluation.

461A. Seminar: Adult Education.

461B. Seminar: Adult Education in Other Countries.

461C. Seminar: Community Service and Development Programs in Postsecondary Education.

462. Seminar: The Community College. (Formerly numbered 261D.) Topics include problems and practices in community college curriculum formation, instruction, student flow, administration, and/or evaluation.

470A. Seminar: Large Systems and Individual Schools. Prerequisite: consent of instructor.

470B. Seminar: Educational Government. Prerequisite: consent of instructor.

481. Knowledge and Inquiry in the Classroom. Prerequisite: consent of instructor. The logical features of instruction and their application to inquiry techniques in teaching and learning. Various conceptions of truth, belief, and fact and opinion, and their application to classroom learning situations.

489. Instructional Strategies in Education. Prerequisite: consent of instructor. Methods for academic instruction, including research and active participation in the adversary approach, forms of debate, role playing, interaction process analysis, and feedback instruments. Practical emphasis on social sciences and humanities instruction, K-12.

490A. Instructional Decision Making. Prerequisite: consent of instructor. Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences in classroom settings permit students systematically to apply and evaluate alternative instructional strategies.

491A. Curricular Decision Making. Prerequisite: consent of instructor. Examination of alternative solutions for the practical problems that classroom teachers face in making curricular decisions. Analysis of the influence of psychological, societal, and institutional factors in curricular decisions.

492. Evaluation of Teaching and Learning. Prerequisite: consent of instructor. Relationship between appraisal instruments and information required for making decisions about teachers, pupils, and materials. Recent developments in the evaluation of teaching and learning; the use of modern appraisal techniques in classroom settings.

498A-498B-498C. Directed Field Experience (4 to 8 units each). May be repeated for credit.

499A-499B-499C. Advanced Directed Field Experience (4 to 8 units each). May be repeated for credit.

501. Cooperative Program in Special Education (2 to 8 units). Prerequisite: consent of UCLA academic adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with California State University, Los Angeles. S/U grading.

506. Directed Independent Study (6 to 12 units). Individual study or research for graduate students. May be repeated for credit.

597. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations (8 to 12 units). Individual study for master's comprehensive examinations or for Ph.D. or Ed.D. qualifying examinations. May be repeated for credit. S/U grading.

By any standard, the UCLA School of Law is recognized as one of the nation's great law schools. This reputation is based on excellence in scholarship, a rigorous educational program, and the quality of the faculty which includes eminent authorities in all major fields of law.

The educational program at the UCLA School of Law is rigorous and competitive, but it takes place in a humane environment where there is a genuine spirit of community. The student body of the school is intellectually distinguished, interesting, and culturally diverse.

The school's strong clinical program offers courses in lawyering skills such as interviewing, counseling, negotiation, and trial advocacy. UCLA students, alumni, and faculty have collaborated to pioneer clinical legal education. Students see more focus on the attorney/client relationship; they see more of what will ultimately face them as lawyers and policymakers.

An extensive and diversified student extern program, one of the most highly regarded moot court programs in the nation, and a basic philosophy that teaches law students to think clearly and analytically, but with compassion, all contribute to the distinction of the school.
School of Law

General Information: 1242 Law, (213) 825-4841
Admissions: 50 Dodd Hall, (213) 825-2060

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles which are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

Degrees Offered
Juris Doctor (J.D.)
Master of Laws (LL.M.)

Juris Doctor Degree
Admission
Students beginning their professional work are admitted only in the Fall Semester. You must have received a bachelor's degree from a university or college of approved standing before beginning work in the school. You are also required to take the Law School Admission Test (LSAT). The admissions committee considers grades and test scores, and, in appropriate cases, such additional factors as ability in languages other than English, work experience or career achievement, previous positions of leadership or other special achievements, ethnic background, prior community or public service, unusual life experiences, overcoming a physical handicap or other disadvantage, career goals, economic disadvantages, and any other characteristic which may indicate that you will contribute to the educational and other benefits of a diversified student body.

For detailed information about the academic programs offered by the School of Law, the fees, and the semester-system calendar by which it operates, obtain the Announcement of the UCLA School of Law by contacting the Admissions Office, School of Law, 50 Dodd Hall, UCLA, Los Angeles, CA 90024-1476.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Residence and Unit Requirements
The candidate for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 18 hours each semester. The second- and third-year curriculum is elective, except for a required course in professional responsibility. In addition to the courses in the regular law school curriculum, students may take two courses for credit in other disciplines within the University. Graduate students may enroll in upper division law courses on a limited basis. Law courses are not open to non-UCLA students.
Attendance and Grades: The right to take examinations and the privilege of continuing as a student in the school are conditioned on regular classroom attendance. Information on the grading system, which is based on a numerical scale of 50 to 100, may be obtained from the Office of the Assistant Dean for Students. Standards for satisfactory performance and for graduation are prescribed by the faculty and are published separately. They may also be obtained from the above office.

Curriculum
The school offers courses of instruction within the school and supervised educational experiences outside it in an effort to enable its students to think intelligently and to prepare them for careers of practice and public service. To this end the school employs several instructional techniques in a variety of subject areas.

In the first year of their legal education students are exposed to an intensive study of Anglo-American legal reasoning in a series of fields which have historically dominated legal thought. In conjunction with these courses students also receive training in the use of legal bibliography and in effective legal writing and oral advocacy.

In the second and third years students have an opportunity to engage in a number of different fields of law and law-related study.

Concurrent Degree Programs
The School of Law offers three concurrent degree programs which allow you to fulfill the requirements of the J.D. and another graduate degree simultaneously.

M.A.-Urban Planning/J.D.
The School of Law and the Graduate School of Architecture and Urban Planning offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and treatment of urban problems; education in law as it has historically dominated legal thought. Students pursue studies in both schools and receive both the J.D. and M.A. degrees at the end of four years.

Students interested in the program must apply and be admitted to the School of Law, the Urban Planning Program, and the Graduate Division.

Education Program/J.D.
The School of Law and the Graduate School of Education offer a concurrent plan which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both schools, students are awarded both degrees on its completion. (This program will not be offered in 1988-89.)

M.B.A./J.D.
The School of Law and the John E. Anderson Graduate School of Management offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Students interested in such a program should apply to both schools simultaneously.

Master of Laws Degree
The school offers a graduate law program leading to the Master of Laws (LL.M.) degree to outstanding American and international students interested in pursuing graduate studies. Law school graduates with outstanding records who may be interested in this program should contact the Admissions Office for further information.

Other Programs
Clinical Program
The school permits students to participate in clinical training. These activities consist of fieldwork in a variety of federal and state agencies accompanied by seminars in the school which seek to analyze and expand the agency experience.

Extern Program
The school offers an extern program which gives students the opportunity to work in legal agencies away from the school for as long as six months (including the summer), for which they receive academic credit. Extern programs have been offered in Washington, DC, San Francisco, New York, and Hawaii.

First-Year Courses
The first year of law school is designed to introduce students to legal analysis using a variety of substantive fields. Each of the following courses is required of all first-year students.

100. Contracts (5 units). The law governing private agreements. Analysis of the criteria for determining whether or not a particular promise or voluntary agreement is illegal and a survey of the major legal issues affecting enforceable agreements. Problems of interpreting contract language, the role of contract in a market society, the conflict between the commercial need for certainty and the demands of individual fairness, and the relationship between contract law and other areas of law.

Ms. Anderson, Mr. Asimow, Ms. Littleton, Mr. McGovern, Mr. Rosett

110. Legal Research and Writing (5 units). The year-long course teaches first-year students how to find the law, how to analyze it, and how to communicate their conclusions in writing. Focus on the skills of analyzing legal authority, developing arguments to solve specific problems where there is conflicting authority, and structuring legal writing which is clear, informative, and persuasive.

115. Facts, Clients, and Lawyers (3 units). Coverage of both the substantive law of products liability and the theory and practice of fact investigation, organized around simulated products liability case, with students representing the plaintiff and defendant in the case and half the class assigned to each party. Preparation of short research and writing assignments and exercises involving the doctrinal and factual aspects of the case. Discussion of interviewing techniques and the nature of the lawyer-client relationship. Opportunity to interview clients, lay expert witnesses from the witness program.

Mr. Binder, Ms. Wood

120. Criminal Law I (3 units). Selected topics in substantive criminal law. Consideration of principles underlying the definition of crime; an examination of various attempts to eliminate the requirement of mens rea and a consideration of such general doctrines as ignorance of fact and ignorance of law, causation, attempt, complicity and conspiracy, inquiry into principles of justification and excuse, with particular attention to the doctrines of necessity, intoxication, insanity, diminished capacity, and automatism. Emphasis on the basic theory of criminal law and the relationship between the doctrines of criminal law and the various justifications for imposition of punishment.

Mr. Abrams, Mr.Arenaella, Ms. Crenshaw, Mr. Dolinko, Mr. Garcia, Mr. McGee

121. Criminal Law II (3 units). The criminal process insofar as it is affected by constitutional and statutory prescriptions and proscriptions. The restraints on law enforcement officers, including such police activities as arrest, stop-and-frisk, inspection and detention of various kinds; taking of statements; the modern techniques of electronic surveillance; and seizure of property with and without a warrant. Emphasis on the judicial resolution of the tension between constitutional imperatives and the techniques used to prevent crime and apprehend and convict those who commit it.

Mr. Abrams, Mr. Arenaella, Ms. Dolinko, Mr. Goldstein, Mr. McGee, Mr. McGovern, Mr. Rosett

130. Property (6 units). An analysis of property as a social institution and particularly of the dynamics of the system for recognizing and protecting competing claims to resources. Major problem areas include the historical development of various kinds of interests in property, sale and financing of real estate, housing, landlord and tenant, and public and private land-use planning and development.

Ms. Blau, Goldstein, Mr. Garcia, Mr. McGee

140. Torts (5 units). Personal injury law as it has developed within the Anglo-American legal tradition. The concept of negligence, the refinements of negligence law, and the doctrine of intentional torts. Contemporary rules of strict liability. Effort to identify the basic purposes which our tort law system achieves or should achieve.

Mr. Abel, Ms. Anderson, Ms. Olsen, Mr. G. Schwartz
Elective Courses

200. Constitutional Law I. Ways in which the U.S. Constitution (1) distributes power among the various units of government in the American political system and (2) limits the exercise of those powers. Structural limitations on government: the division of powers between the nation and the states in the federal system, and the separation of powers among the three branches (legislative, executive, and judicial) of the national government. Civil War Amendments (13th, 14th, and 15th) as limits on the states and as sources of congressional power. The proper role of the judiciary in limiting the action of other branches of government.

Mr. Eule, Mr. Karst, Mr. Lowenstein, Mr. Varat

Mr. Eule, Mr. Karst, Mr. Lowenstein, Mr. Varat

205. Wills and Trusts. The law of wills, trusts, and future interests. The wealth transmission process from the perspectives of social critics and estate planners. The substantive law of wills and trusts. The administration of decedents' estates and of trusts.

Mr. Dukeminier, Mr. McGovern, Mr. Summer

207. Community Property. Detailed examination of the California community property system which regulates property relations between husband and wife during marriage and at its termination by divorce or death. Community property raises many questions about the nature of marriage and the various forms of gainful human activity.

Ms. Blumberg, Ms. Bryant, Ms. Prager

208. Real Property Secured Transactions. The use of land as security for debts, with the California cases and statutes presented as an example of an operating system. The real estate security device from its common law origins to the common modern deed of trust as it exists in California.

Mr. Jordan, Mr. Warren

211. Evidence. The law of evidence is concerned with the process by which parties may prove facts which are essential to the existence of rights and liabilities in civil and criminal litigation. Rules for determining the relevance of evidence, the qualifications which must be met by witnesses, the regulation of the form and manner of interrogating witnesses, privileges granted to certain persons and institutions to refuse to disclose information, the special status of expert witnesses and the problems of proving technical facts, and rules governing documentary proof. The rule excluding hearsay evidence and the exceptions to that rule.

Mr. Abrams, Mr. Bergman, Mr. Graham, Mr. Letwin

212. Federal Courts. Selected problems in the jurisdiction and lawmaking powers of the federal courts, including the appellate jurisdiction of the Supreme Court, federal habeas corpus, the federal-question jurisdiction of the federal district courts, intervention by federal courts in state court proceedings; and choice of law in the federal courts.

Ms. Goldberg-Ambrose, Mr. Karst, Mr. Varat

214. Civil Rights (Section 1). In-depth study of 42 U.S.C. § 1983. This provision, creating a cause of action for the deprivation of constitutional and federal statutory rights by state actors (i.e., state and local officials and municipalities), ranks as one of the most litigated actions in the federal courts. A historical review of the origins of § 1983 and its relation to other Reconstruction civil rights legislation and the 14th Amendment. The elements of action, defenses to action, and remedies for constitutional violations. Close attention to competing policies of controlling government abuse and allowing government to operate, and to the tensions in the judicial interpretation of § 1983 that arise from the use of federal power, especially the federal courts, to monitor state officials and government. Students intending to take this course in addition to courses 200 and/or 212 should take this course concurrently with or after the other course(s).

Mr. Goldstein, Mr. Varat

214. Civil Rights (Section 2). A survey course intended to review both the casual and remedial relationship of law to racial discrimination. A brief review of the historical development of the issue, past and current developments in housing, voting, employment, and education. Identification of the various competing visions of racial equality that are reflected in civil rights legislation, in case law, and in the very definition of discrimination. Review of several critiques of antidiscrimination law, with special attention to those questioning the effectiveness of seeking racial action through law.

Ms. Crenshaw

215. Law and the Poor. Major income-maintenance programs in the U.S.: Aid to Families with Dependent Children; Supplementary Security Income; Food Stamps; General Relief; Disability; and Social Security (OASDI). Basic sociological attitudes toward poverty related to welfare programs and policies, with emphasis on AFDC. Topics include the structure of programs, eligibility, constitutional boundaries, work requirements, standard of need, emergency assistance, and special needs, child support, remedies, social movements, public interest law, and welfare reform.

Mr. Handler

216. Administrative Law. Much of modern government is administered by agencies of government other than legislatures or courts. The substantive sources of (and limits on) administrative authority. The procedural norms with which agencies must comply in the course of administration or rule-making. Judicial review as a technique for correcting administrative error or abuse. The individual's rights to procedural due process in the individual's interactions with public agencies. Ms. Asimow

M217. Topics in Legal Philosophy. (Same as Philosophy M256.) Prerequisite: consent of instructor. An examination of topics such as the concept of law, the nature of justice, problems of punishments, legal reasoning, and the obligation to obey the law. May be repeated for credit with consent of instructor.

Mr. Dolinko, Mr. Munzer

220. Federal Taxation I. Fundamentals of federal income taxation, particularly as they apply to individuals. Gross income, the taxpayer as an atom: income subject to tax will be attributed, deductions and credits available in computing tax liability, the year in which income is properly reported and deductions properly taken, and characterization of income as ordinary income or capital gain. Issues of tax policy and reform and the provisions of the Internal Revenue Code and Income Tax Regulations. Ms. Asimow, Mr. Klein, Mr. Zolt

221. Federal Taxation II. Prerequisite: course 220. Counted in the course load concurrently. An application and extension of the principles of course 220 to the partner-partnership and shareholder-corporation relationships. The federal income tax consequences of the formation of partnerships and corporations, distributions to partners and shareholders, and liquidations and sales of partnerships or shareholder interests.

Mr. Zolt
224. Federal Taxation Ill. Federal taxation of gifts and decedents' estates; federal income taxation of trusts and estates; Empirical issues in tax planning techniques. Of considerable importance to anyone who expects to practice in the areas of tax planning, estate planning, family law, and probate, among others.

225. Taxation of Personal Income. Prerequisites or corequisites: courses 220, 221. Tax planning for personal and family income and for the choice of alternative forms of operation, partnership, and acquisition of U.S. real property. Use of income tax treaties and coordination with foreign tax requirements.

226. Federal Taxation of Partners and Partnerships. Advanced course on the establishment, structuring, and restructuring of business enterprises, primarily in the corporate form. Analysis of four or five realistically complex problems, examining the state and federal corporate problems, the federal income tax implications, and the financial and accounting aspects of each problem, in order to prepare specific and comprehensive plans for dealing with each problem, considering all realistic alternatives and justifying the selected methods.

236. Securities Regulation. Prerequisite: course 230 or consent of instructor. Federal and state regulation of the issuance of new securities and trading in existing securities. The Securities Act of 1933; the disclosure process as administered by the Securities and Exchange Commission; and exemptions from the prospectus requirements. Disclosure provisions of the Securities Exchange Act of 1934.

240. Antitrust I. Basic understanding of the federal antitrust law: the Sherman, Clayton, and Robinson-Patman Acts. Monopoly, cartels (price fixing, market division, boycotts), vertical restrictions (resale price maintenance, territory and customer allocation), mergers, price discrimination, joint ventures, life insurance, wire centers, and reciprocal arrangements, with an emphasis on the substantive aspects of law and doctrine. Mr. Liebeler, Mr. Wiley

242. Insurance Law. Basic introduction to the general principles of insurance law, including the definition of persons and interests protected, formation of the contract, contract terms, and enforcement of insurance agreements, indemnification, misrepresentation, warranties and conditions, limitations on coverage, waiver and estoppel, the measure of recovery, indemnity and subrogation. Obligations of the insurer and insured during the currency of the insurance contract; the occurrence of the risk insured against. Issues of current significance in insurance litigation, including the insurer's duty to settle, the insurer's duty to defend, the insurance of progressive diseases (asbestosis), the insurability of punitive damages, and problems arising out of the tripartite relationship between insurer, broker, and insured.

245. Antitrust II. Prerequisite: course 240. The historic Sherman Act monopolization and merger cases. The economic underpinnings of oligopoly theory, which presumably forms the basis for current anti-trust policy toward concentrated industries; the validity of the so-called "Market Concentration Doctrine." Current antitrust efforts aimed at monopoly and "starded" monopoly. Mr. Liebeler

247. Land and Economics. Economics background needed. The basic theory of voluntary exchange and the conditions necessary for a voluntary exchange system to maximize community welfare, applied to various types of legal problems in an attempt to gauge the extent to which legal rules contribute to or hinder the maximization of such welfare. Mr. Liebeler

250. Commercial Law: Chattel Security and Commercial Paper. A detailed examination of the Uniform Commercial Code, a study of Article 9 of the Code, the law governing security interests in personal property. Business collateral such as equipment, inventory, accounts receivable, and chattel paper, as well as the financing of purchases by nonbusiness consumers. Some aspects of bankruptcy law, primarily the law of preferences, applicable to secured creditors. Commercial paper, the law of negotiable instruments, checks, drafts, and cashier's checks (Article 4), documents of title (Article 7), letters of credit (Article 5), and aspects of sales law (Article 2) that bear on secured transactions and commercial paper. Mr. Jordan, Mr. Warren

251. Commercial Law: Sales. The law governing the sale of goods. Acceptance and rejection, contract cancellations, installment contracts, warranty, risk of loss, documentary sales, remedies for breach of contract, the seller's remedies on insolvency of the buyer. Emphasis on Article 2 of the Uniform Commercial Code, the use of bills of lading and warehouse receipts in sales transactions (Article 7), and letters of credit (Article 5).

252. Unfair Competition and Business Torts. Survey of five ways in which law regulates the competitive process, encourages innovation, and governs the rights of creators and consumers: patent, copyright, trademark, false advertising, and business tort law. Patent law covered very briefly, primarily for comparative purposes rather than as a complete introduction to that area. "Business torts" includes interference with contracts and business advantages, trade secret theft, the right of publicity, and RICO — the popular federal racketeering statute. Mr. Wiley

253. Regulated Industries. The theoretical justifications for, and fundamental criticisms of, leading types of economic regulation. Survey of the regulatory structure governing financial services, telecommunications, and energy utility sectors, using statutes, cases, and secondary material to introduce students to the legal issues that traditionally have dominated these fields. The intellectual foundations of the economic analysis of these fields and an empirical analysis of the actual results of the recent deregulation movement in these three sectors. Mr. Wiley

255. Tort Law and Economics. Prerequisites: a re- search paper in economics. Examination of the economic impact of tort law on the legal system and the effects of tort law on economic efficiency; examination of the relationship between tort law and economic theory; an economic analysis of the tort system; and an assessment of the economic implications of current tort law. Of considerable importance to anyone who is likely to be a lawyer or compensation in these fields. Mr. G. Schwartz

260. Labor Law I. Basic information concerning the laws and decisions which provide the framework for national labor policy in the private sector. The National Labor Relations Act, the Railway Labor act, and the Norris-La Guardia Anti-Injunction Act. Areas include collective bargaining; selection of bargaining representatives and determination of bargaining units; unfair labor practices; economics disputes; federal-state jurisdiction; application of antitrust laws; and grievance and arbitration procedures.

Mr. Allen, Mr. Jones

261. Labor Law II. Prerequisite: course 260 or consent of instructor. Collective bargaining in the public sector (government employment at the federal, state, and local levels). Differences and similarities in the public and private sectors, and the responsibilities of federal and state legislatures and of the courts to the public sector.

Mr. Alleyne

262. Law of the Collective Agreement. Prerequisite: course 260. Limited to 10 students. Enhance- ment of understanding of labor arbitration by a comparative study of the decisions of the National Labor Relations Board, the National Labor Relations Board and the National Labor Relations Board. Use of transcripts and exhibits of actual arbitration cases. Each student works with three case files, functioning as an advocate for one, an employer advocate for another, and an arbitrator in the third. Each student prepares two briefs, one arbitration opinion and award, and a research paper.

Mr. Jones

263. Employment Discrimination. Title VII of the 1964 Civil Rights Act and similar statutes prohibit dis- crimination based on race, sex, national origin, religion, age, and handicap. Examination of the substantive law of employment discrimination and consideration of the employer's duty to engage in good faith selection practices in accordance with these statutes; consideration of the social policy goals and assumptions underlying that development. Specific topics include disparate treatment and disparate impact theories of discrimination, employment testing and test validation, statistical proof, equal pay and comparable worth, affirmative defenses (business necessity, bona fide occupational qualifications, bona fide occupational qualifications, and executive status systems), affirmative action, reverse discrimination, obligations of government contractors, class actions, and administrative and ju- dicial remedies.

Mr. Alleyne, Ms. Littleton
264. Workers' Compensation and Workers' Injuries. Study of the ways in which the law responds to the phenomenon of workers' injuries and occupational disease. The labor market and unionization, workers' compensation, the federal OSHA job-safety regulation program, and the potential for a number of tort issues that workers' injuries provoke. Workers' compensation considered both as a compensation program and as a tort-like rule of strict liability.

Mr. G. Schwartz

267. Indian Law. The special legal status of American Indians and Indian tribes and the tension between moral/legally claims and political forces. The sources and scope of federal, state, and tribal power on Indian reservations; property law concepts unique to Indian tribes and Indians; rights to American Indians in relation to federal, state, and tribal governments and the federal trust relationship to Indians.

Ms. Goldberg-Ambrose

268. Labor Law III. The rights and obligations of individual employees in collective bargaining units, especially of those who choose not to belong to a union, under present legislation, as well as some employment issues in the context of foreign businesses. The law of the Labor-Marking Reporting and Disclosure Act of 1959, insofar as it relates to the regulations of internal union affairs. Mr. Aaron

269. Law, Foreign Policy, and National Security. Various legal considerations and restraints, both national and international, affecting the formulation of foreign policy and protection of national security. The decision-making process, including the constitutional balance between executive and legislative branches, the foreign relations power of the President, the War Powers Resolution and the Treaty Power. The role of bureaucratic politics. The congressional regulation of foreign policy and its attempt to subject intelligence activities to the rule of law. The problem of protecting national security information in a free society and other Bill of Rights issues. The role of international law affecting national security, including the UN. Chapter, and multilateral and bilateral arms control obligations. Mr. Trimble

270. International Law. The role of law and legal institutions in international relations and in government foreign affairs decision making, particularly on the part of the U.S. Nature and source of international law and how it is applied in the relations of states. The allocation of responsibility for decision making within the international system and how the conflicting assertions of jurisdiction are resolved. Major limitations on the exercise of authority by states. The use of force by states, paramilitary groups, and international organizations. Mr. Trimble

271. International Business Transactions. The fundamental legal issues that arise in international trade, licensing, and investment. The legal and financial institutional framework within which international business is conducted; national and international limitations affecting the movement of goods, the transfer of technology, and the flow of capital; the organization, financing, and protection of international business undertakings; the use of agents, distributors, and licensees; problems of contract negotiation and dispute resolution in an international setting; and foreign investment. Mr. Allford, Mr. Rossett

272. International Economic Law and Organization. Public international law affecting private economic activity, principally in the areas of trade, investment, and monetary affairs; the roles of the GATT, IMF, World Bank, UNCTAD, and the UN Center on Trans-National Corporations; and the U.S. law governing the negotiation and implementation of international agreements. Mr. Trimble

273. International Human Rights. Examination of the theoretical issues behind the achievements and limitations of the international human rights movement. How did the notion originate and develop into its present form and content? Is the concept of rights recognition or usefulness to achieving the objectives of the U.S. protection and promotion of human dignity and personal integrity throughout the world? Ought there be a dichotomy between civil and political rights as opposed to economic, social, and cultural rights? Is it possible to evolve "new generations of human rights," such as the right to development and the right to peace, and fit them into preexisting schemes, or would these "rights" operate better under separate arrangements? Emphasis on the developments, content, and enforcement machinery of what is known as the International Bill of Human Rights. Particular attention to the question of how national sovereignty and interests influence a country's position regarding the formulation and enforcement of human rights standards.

Ms. Gunning

276. Comparative Law: Commercial. Examination of the growing unification of commercial law around the world. Investigation of (1) the documentary sales transaction, with emphasis on the use of the letter of credit and the billing of a sale, (2) dispute resolution, particularly arbitration and special assistance under international treaties and conventions, (3) the United Nations Convention on Contracts for the International Sale of Goods which, with the advice and consent of the U.S., became the law of the U.S., and (4) the law of the European Economic Community (EEC), with emphasis on the structure and decision-making processes of the EEC and the evolving legal doctrines that are creating a body of law that is supreme and directly applicable within all nations of the EEC.

Mr. Rosett

278. Comparative Law: Chinese Law. 20th-century transformations in Chinese law in the context of their jurisprudential and historical background. A general introduction to the nature and function of law in China; comparative legal analysis. Equips future practitioners to address legal problems arising from commercial interaction with China. Mr. Allford

278. Comparative Law: Japanese Law. Designed to introduce the nonspecialist law student to major features of the Japanese legal system, the product of a different historical and cultural experience which has absorbed waves of influence from other countries and over generations has assimilated these influences into a unique legal system. Relation of the structures, processes, and personnel of Japanese law to other features of Japanese society and history. The organization, recruitment, and training of legal professionals and the processes of dispute resolution within and outside the courts. Ms. Bryant, Mr. Ramssey, Mr. Rossett

278. Comparative Law: Japanese Law, Selected Readings (2 units). Prerequisite: reading knowledge of Japanese at the third-year level. Designed to introduce students to a variety of Japanese-language legal materials. Reading of law review articles and other sources (e.g., selections from contracts, cases, or treatises).

Mr. Ramssey

279. Admiralty Law. A study of the special jurisdictional, procedural, and substantive rules applicable to water-based activities, especially the carriage of passengers and goods by water. The allocation of disputes involving such activities between state and federal courts, the rules of practice applicable to maritime liens, the special procedures for limiting shippers' liability, and the sources and nature of laws governing maritime torts, contracts, and property. The applicability of traditional maritime doctrines to modern phenomena such as offshore drilling, contamination, and oil spills.

Ms. Goldberg-Ambrose

280. Aviation Law. The regulation of aviation and air transport under both international and domestic law. The nature and sources of aviation law, the legal regime of the airspace and the aircraft, and the regulations of users of the airspace, including jurisdiction over hijackings and other offenses committed aboard aircraft. The role of the Civil Aeronautics Board in the regulation of domestic air transport. The regime of liability for international air carriers established by the Warsaw Convention and subsequent instruments, and the liability of aircraft manufacturers, maintenance, repair, and service facilities, and air traffic control and advisory services.

Mr. Margo

M285. Governance: State, Regional, and Local (2 to 3 units). (Same as Architecture and Urban Planning M2082.) Legal problems involving local governmental entities; sources and extent of powers and duties with respect to personnel, finance, public works, community development, and related topics.

M286. Public Control of Land Development (2 to 4 units). (Same as Architecture and Urban Planning M2022A.) Analysis of the legal and administrative aspects of the regulation of land use and development, including the growth of urban sprawl and the planning process; dwelling legislation, building codes, zoning, subdivision control, public acquisition of land, tax control, and urban development.

Mr. McGee

M287. Urban Housing and Community Development (2 to 3 units). (Same as Architecture and Urban Planning M2231.) Comprehensive consideration of the rebuilding and construction of American cities, with major emphasis on the "housing process" — the way in which shelter and related facilities are created by the institutions which direct housing activities in urban areas. Students encouraged to undertake research projects, with emphasis on field research, in lieu of a substantial portion of the final examination.

Mr. McGee

M290. Environmental Law and Policy (2 to 3 units). (Same as Architecture and Urban Planning M2324.) Examination, from perspectives meaningful to legal institutions, of the nature of environmental problems. The means by which law has responded, and can and should respond, to problems of environmental quality. Both common law and legislative and administrative measures considered. The air pollution problem is the primary vehicle for study.

292. Water Law. The basic components of U.S. water law; the riparian system of allocating water used in the Eastern U.S., the appropriation system of allocating water used in the Western U.S., and the federal overlay of reserved rights, navigation power, and reclamation. Water use efficiency and conservation, protection of instream water uses, groundwater management, public rights to water-based recreation, and water pollution.

295. Criminal Procedure. The process by which courts decide the guilt or innocence of those accused of crime and the selection of an appropriate penalty. The right to trial and other devices by which accused persons can be released following arrest and pending trial. The process by which the prosecutor decides what charges to file and the limits on charging power, including the grand jury and the preliminary hearing. Criminal pleading, including the process of plea bargaining. The trial process, including the right to trial by jury and sentencing procedures.

Mr. Arenella
299. Federal Criminal Law Enforcement. Federal criminal topics such as RICO (including both its civil and criminal uses), mail fraud, the Bank Secrecy Act, the Hobbs Act, the Travel Act, criminal tax enforce-
ment, and drug offenses. The special features of complex criminal statutes, how federal enforcement authorities work to bring criminal prosecution, and the nature of the federal criminal role. Federal ap-
proaches to the prosecution of white collar crime, organized crime, and political corruption. In recent years there have been a large number of federal pros-
nal, the nature of the federal criminal role. Federal ap-
proaches to the prosecution of white collar crime, organized crime, and political corruption. In recent years there have been a large number of federal pros-

300. Remedies. The kinds and nature of relief afford-
ed by courts to litigants in civil litigation. The theory and general principles governing the award of compensatory damages, equitable relief, and restitu-
tion. The substantive law of restitution and the history of equity jurisdiction. Mr. Bauman

302. Copyright. A basic introduction to the law of copyright. The large and recently revised federal stat-
tute that governs the field. Mr. Lowenstein

305. Entertainment Law. Some familiarity with unfair trade practice and copyright preferred but not re-
quired. Analysis of a variety of legal problems en-
countered in representing performers, writers, pro-
ducers, and others involved in the creative arts. Ex-
amination of the scope of rights that attach to an entertain-
ment enterprise, including copyright and the right of publicity, and the sequence of exploiting those rights. Survey of the business and tax arrangements typical of entertainment enterprises. Fiduciary obliga-
tions owed to performers by agents, guardians, and 

306. Patent Law. Designed for the future general or 

326. Health Law and Administration. The major 

329. Women and the Law: Feminist Jurispru-
dence. The law affecting the lives of women, in 
cluding divorce, custody, child support, sexual orientations and gender identity. Emphasis on the historical achievements of feminist theory to a broad range of legal issues - from the dilemmas faced by Antigone (Sophocles) and Portia (Shakespeare's The Merchant of Venice) to the theories advanced by H.L.A. Hart, Ronald Dworkin, and members of the critical legal studies movement. Reading of the major works in feminist legal theory; emphasis on the practical effects such theory may have on a variety of issues of importance to men and women.

331. Immigration Law. An overview of the immi-
gration and naturalization process from the practitioner's point of view. Nonimmigrant and immigrant visas, consular practice, deportation/exclusion proceeding,

332. Children and the Law. Judicial and legislative allocation of power and responsibility between par-
ents and the state; the child's economic situation with the family; child custody, adoption, medical treatment of minors; parental right to discipline children; neglect and abuse; state-enforced limitations on the liberty of minors and juvenile delinquency.

335. Religious Legal Systems. The literature and in-
stitutions of a religious legal system are discussed from time to time by different instructors in Canon law, Islamic law, and the Rabbinic legal tradition. Content varies depending on the particular tradition under study; emphasis on concerns common to a legal sys-
tem focused on divine authority. The evolution of divine 

336. English Legal History. The growth of the Com-
mon Law and Trial by Jury in the period from 1187 to 1765.

337. American Legal History, 1776-1984. The histo-
ry of legal and constitutional thought, together with the history of the law's part in social and political change and in everyday life. Consideration of a wide variety of texts and events, with emphasis on the "separation of law and politics, law's relationship to other normative orders in society, the ambiguities of legal "freedom" and "equality," problems of interpretation in law and history. Revolution and constitution-making, the cre-

400. Pretrial Lawyering Process: Civil (Clinical). 
Training and practical experience in the full range of 

403. Interviewing, Counseling, and Negotiation 
(Clinical). Basic interviewing, counseling, and nego-
tiation concepts in the areas of litigation and business 
planning. The externs participate in conferences focusing on 
modifications in the area of business planning. Class-

404. Clinical Pretrial Advocacy (Clinical). The con-
cepts of logic and the principles of argument and persuas-
ion are applied in the context of litigation advocacy. Students gain practical experience by working in public prose-
cutory and defense offices at the federal and state 
level under the direct supervision of experienced ap-

405. Fact Investigation and Discovery in Complex 
Litigation (Clinical). The process of developing and 

407. Immigration Law. Designed for the future 
general or business lawyer who should be able to recog-
nize a patent problem or a related intellectual-property 

409. Pretrial Lawyering Process: Criminal (Clini-
cal). Prequisites: or corequisites: courses 211, 295. Basic aspects of courtroom skills (e.g., cross-exam-
ination, direct examination, openings and closings), culminating in a modified mock trial. Emphasis on pretrial preparation and strategy. Attorney-client rela-
tions and the ethical considerations involved, discov-
ery and investigation, preliminary hearings and mo-
tions practice (the use of such fora for discovery and investigatory purposes), theory development and case building, plea negotiation and preparation, plea to plead, and preparation for sentencing. Optional fieldwork component. Ms. Gunning

410. Appellate Advocacy (Clinical). The concep-
tual logic and the principles of argument and persuas-
ion are applied in the context of litigation advocacy. Students gain practical experience by working in public prose-
cutory and defense offices at the federal and state 
level under the direct supervision of experienced ap-
pellate practitioners.

411. Conflict of Laws. Problems resulting from 
multistate (both sister state and foreign nation) dis-
putes. The choice of law problem, constitutional limi-
tations on state choice of law, recognition of foreign 
judgments and jurisdiction. Analysis of the govern-
mental interests implicated in the dispute. Mr. Lowenstein

417. Family Law. The de jure and de facto husband-
wife relationship. Legal principles and social policies 
governing the creation, maintenance, and dissolution 
of the conjugal relationship. Property and support is-

418. Law and the Political Process. Recommended 
prerequisite or corequisite: course 201. An examina-
tion of the political and legal aspects of public policy, in 
which the laws governing the political process affect 
and reflect political power relationships. Statutory re-
forms enacted in the past 10 to 15 years at the federal 
and state levels. Right to vote, reapportionment, po-
litical parties, bribery, campaign finance, incumbency, 
ballot propositions, lobbying, and conflict of interest. Mr. Lowenstein

425. Law and Psychiatry. The law affecting the mental health of patients who have been seriously mentally ill 

427. Communications Law. Survey course on the 
laws related to the major industries regulated by the 

428. Antitrust Law. Use of patents to illuminate several gen-
eral fields of nonbroadcast video technologies, including cable and 
satellites. Review of the principles of common carrier regulation, as applied to examination of the telecommunications industry in the aftermath of the 
divestiture of the Bell System. Mr. Brenner

429. Women and the Law. A study of ways in which 
court decisions, statutes, and the operation of the legal system reflect ideas about what women and men are like and what their roles in life should be. "Protective" labor legislation, voting rights, equal pro-
tection of the laws, the Equal Rights Amendment, control of children's discipline and either topics in criminal law (rape, prostitution) or topics in family law (the marriage obligation and grounds for divorce). Ms. Littleton

430. Educational Law. Designed for the future 
general or business lawyer who should be able to recog-
nize a patent problem or a related intellectual property 
problem, and for the prospective patent lawyer. Pat-
ents related to trade secrets, copyrights, and trade-
marks. The classic policy tension between technolo-
gical progress and order. Private rights, and antitrust law. Use of patents to illuminate several general 
areas of the constitutional base of the patent system; how the mandate is effectuated or defeated 
by courts.

431. Immigration Law. An overview of the immi-
gration and naturalization process from the practitioner's point of view. Nonimmigrant and immigrant visas, consular practice, deportation/exclusion proceed-
ings, naturalization and citizenship, constitutional is-

432. Children and the Law. Judicial and legislative 
allocation of power and responsibility between par-
ents and the state; the child's economic situation with the

itutions of a religious legal system are discussed from 

435. Religious Legal Systems. The literature and in-
itutions of a religious legal system are discussed from 

437. American Legal History, 1776-1984. The histo-
y of legal and constitutional thought, together with 

Training and practical experience in the full range of 

443. Pretrial Lawyering Process: Criminal (Clini-
cal). Prequisites: or corequisites: courses 211, 295. Basic aspects of courtroom skills (e.g., cross-exam-
ination, direct examination, openings and closings), culminating in a modified mock trial. Emphasis on pretrial preparation and strategy. Attorney-client rela-
tions and the ethical considerations involved, discov-
ery and investigation, preliminary hearings and mo-
tions practice (the use of such fora for discovery and investigatory purposes), theory development and case building, plea negotiation and preparation, plea to plead, and preparation for sentencing. Optional fieldwork component. Ms. Gunning

445. Appellate Advocacy (Clinical). The concep-
tual logic and the principles of argument and persuas-
ion are applied in the context of litigation advocacy. Students gain practical experience by working in public prose-
cutory and defense offices at the federal and state 
level under the direct supervision of experienced ap-
pellate practitioners.

447. Fact Investigation and Discovery in Complex 
Litigation (Clinical). The process of developing and 

449. Interviewing, Counseling, and Negotiation 
(Clinical). Basic interviewing, counseling, and nego-
tiation concepts in the areas of litigation and business 
planning. The externs participate in conferences focusing on 
modifications in the area of business planning. Class-
room discussion enhanced by analysis of videotapes of "client" interviews and conducting simulated inter-
views. Ms. Bergman, Ms. Gillig
Law student delivers oral argument as part of the school’s highly respected Moot Court Program.

405. Trial Advocacy (Clinical). Designed to provide training in the full range of skills needed by a trial advocate. A year-long series of classes emphasizing the development of courtroom advocacy and other lawyering skills: case planning, direct and cross-examination of witnesses, opening statement and closing argument, client and witness interviewing, case investigation, negotiation, and examination of expert witnesses. In Fall Semester role-play exercises are legal or nonlegal in nature, capped off with a mock trial. During Spring Semester students actually appear in court and represent indigent clients under the direct supervision of instructors. Mr. Bergman, Mr. Moore

406. Simulated Trial Advocacy (Clinical). Prerequisite or corequisite: course 211. Enrollment priority to third-year students. First half of the year-long course 405. Theoretical and practical aspects of the trial process; training in the skills needed to represent clients in pretrial and trial litigation. The principal function of trials — the resolution of disputed questions of fact — and the trial lawyer’s role in presenting persuasive evidence to the judges and jurors who perform that function. The development of specific skills in such tasks as interviewing, fact investigation and analysis, conducting direct and cross-examinations, making opening statements and closing arguments, using exhibits, and making and responding to evidentiary objections, presented through a combination of lecture, discussion, demonstration, and simulated role-play exercises. Presentation of a videotaped mock trial at the end of the semester (no fieldwork component). Mr. Bergman, Mr. Moore

407. Mediation and Alternative Dispute Resolution (Clinical). Issues, principles, and skills implicated in the use of nonadversarial methods of dispute resolution. Theories and various approaches to conflict resolution, including comparisons among and between adjudication, arbitration, mediation, med-arb, mini-trials, and community dispute centers. Some of the difficulties with alternative dispute resolution, including the role of law, inequality among the parties, consent, motivation, enforcement, and effects of alternative dispute resolution. Comparative study of dispute institutions in political and legal systems. Through skills training and role-play exercises students learn and practice the skills necessary to conduct mediation and arbitration sessions. Ms. Menkel-Meadow

408. Legal Negotiation (Clinical). Theoretical and practical aspects of negotiating transactions and disputes in our legal system. Negotiation theory, using both legal and behavioral science materials; differences between litigation and transactional matters; the context in which particular negotiation strategies and tactics are successfully employed; ethical and normative implications of negotiations; the role negotiation plays in our legal system, both in dispute resolution and in legal planning; development of proficiency in negotiation, both from planning and behavioral perspectives. Ms. Menkel-Meadow

409. Negotiation and Mediation (Clinical). Theoretical and practical aspects of negotiating and mediating transactions and disputes in our legal system. Negotiation and mediation theory, using both legal and behavioral science materials; differences between litigation and transactional matters; the context in which particular negotiation and mediation strategies and tactics are successfully employed; ethical and normative implications of negotiations and mediations; the role negotiation and mediation play in our legal system, both in dispute resolution and in legal planning; development of proficiency in negotiation and mediation, both from planning and behavioral perspectives. Ms. Menkel-Meadow

436. Advocacy for the Homeless (Clinical). Homelessness is now recognized as a major social problem in this country. Examination of the problem of homelessness from the perspective of the lawyer, using both classroom work and a field placement. Survey of the following topics in the classroom: (1) the nature, extent, and causes of the problem, (2) legal responses to the immediate crisis, (3) longer-term solutions. Issues facing the lawyer who represents the homeless, such as (1) building a lawyer-client relationship that maximizes the power of vulnerable clients, (2) balancing individual advocacy and group litigation, (3) designing impact litigation and enforcing judicial relief, and (4) the lawyer’s role in a coordinated response to the problem. Ms. White
445. Planning and Drafting Small Estates (Clinical).

Various rules added to the Code by the 1984 act (e.g.,
the role of loans and the interest deduction. Applica-
tions, with emphasis on such topics as the allegedly
determinist's objection to the criminal law's blaming
strategies and defensive tactics in offers. Consideration of
problems of tax planning, using computer spreadsheet
programs (an IBM PC and the Lotus 1-2-3 program
are available at the school). Basic training in the use
of the computer is a prerequisite. Emphasis on the
use of the computer for tax planning. Lectures on
basic techniques of financial analysis and modeling.
Students work in teams of two to analyze
a problem selected by them with consent of
instructor.

500. Seminar in Constitutional Law. Selected topics in constitutional law. Prerequisites:

Mr. Karst, Mr. Varat

501. Seminar in Taxation: Timing Issues. Comparison of an income tax and a consumption tax, pro-
ceding to various theoretical issues such as the pro-
ductivity of taxation. The relationship between
the treatment of the payor and the payee, and
the treatment of income taxes of different
characters; the standard of proof in dis-
charge of the burden of proof in efforts to recover
others of similar character. Mr. Alleyne

512. Seminar on Selected Problems in Social Wel-
fare and Health. Prerequisite: consent of instructor.
Limited enrollment. A year-long research seminar on
topics selected by students with consent of instructor,
with emphasis on empirical-policy research outside
the School of Law and preferably in the community.
Joint class meetings to discuss topics, methods of
approach, and preliminary findings, but most of work
is to be independent research.

516. Seminar in International Law: The Changing
International Legal Order — A Chinese Perspec-
tive. Prerequisites: courses 221, 230. Limited
enrollment (preferential to students with strong tax and financial back-
grounds). Students will be trained in the analysis of a range of prob-
lems of tax planning, using computer spreadsheet
programs (an IBM PC and the Lotus 1-2-3 program
are available at the school). Basic training in the use
of the computer is a prerequisite. Emphasis on the
use of the computer for tax planning. Lectures on
basic techniques of financial analysis and modeling.
Students work in teams of two to analyze
a problem selected by them with consent of
instructor.

501. Seminar in Taxation: Corporate and Tax
Issues in Corporate Acquisitions. Prerequisites or
corequisites: courses 221, 230. Examination of se-
lected corporate and tax aspects of corporate acquisi-
tions, including analysis of the selection of corpo-
rates in selecting a target company. Takeover strate-
gies and defensive tactics in offers. Consideration of
the federal income tax treatment of corporate acquisi-
tions.

503. Seminar in Criminal Law: Rethinking Crimi-
nal Law Excuse Theory. Examination of both the
determinist's objection to the criminal law's blaming
practices and the responses to that challenge offered
by philosophers, psychiatrists, and legal theorists
who have attempted to reconcile a deterministic view of
human action with criminal law excuse theory. Ex-
amination of the theoretical premises of both ap-
proaches, including the role of intent, causation and
partial excuses such as insanity, duress, provocation,
diminished responsibility, and the "ghetto-defense."
Mr. Arentella

Limited to 15 students. Is the death penalty morally
impermissible? Is it immoral even if it has a deter-
cent effect? Or are there situations in which it is morally
improper not to apply the death penalty (even if it has no
extra deterrent effect)? Exploration of these ques-
tions, with emphasis on such topics as the allegedly
arbitrary and discriminatory manner in which death
sentences are carried out, the risk of executing
the innocent, the limitations on the use of the death
penalty, the death penalty better comports with respect for
the sanctity of human life. Mr. Dolinko

503. Seminar in Criminal Law: Rape. The legal de-
definition of rape, the procedural rules applied in the
administration of the law, and the sentences pro-
vided for rape offenses. In order to determine and
critically evaluate the evidence and moral responsibil-
ities of prosecutors and defense attorneys, rape
cases are also examined, as are all aspects of
to rape prosecutions.

504. Seminar in Theory of Property. A philosophical
exploration of the foundations of a theory of property.
Topics include the concept of property, property rights
in the body (including reference to abortion and sui-
cide), and the relation of property to privacy and hu-
nan nature. Readings from classical and contempo-
ary writers, including Locke and Marx, and from
instructor's work in progress.

507. Seminar in Labor Law: Problems of Proce-
dure and Evidence in Labor Arbitration Hearings.
Specific problems of evidence and procedure encoun-
tered in the labor arbitration hearing: the admissibility of
evidence seized from employee personal belong-
ings on company property; application of "self-in-
consistent" and other evidentiary "rules of law" as
innocent; the treatment of workplace "confessions";
the propriety of calling the grievant-employee as an ad-
verse company witness; the standard of proof in dis-
charge of the burden of proof in efforts to recover
others of similar character.

510. Seminar in Labor Law: Problems of Proce-
dure and Evidence in Labor Arbitration Hearings.
Specific problems of evidence and procedure encoun-
tered in the labor arbitration hearing: the admissibility of
evidence seized from employee personal belong-
ings on company property; application of "self-in-
consistent" and other evidentiary "rules of law" as
innocent; the treatment of workplace "confessions";
the propriety of calling the grievant-employee as an ad-
verse company witness; the standard of proof in dis-
charge of the burden of proof in efforts to recover
others of similar character. Mr. Handler

516. Seminar in International Law: The Changing
International Legal Order — A Chinese Perspec-
tive. Prerequisites: courses 221, 230. Examination of se-
lected corporate and tax aspects of corporate acquisi-
tions, including analysis of the selection of corpo-
rates in selecting a target company. Takeover strate-
gies and defensive tactics in offers. Consideration of
the federal income tax treatment of corporate acquisi-
tions.

501. Seminar in Taxation: Corporate and Tax
Issues in Corporate Acquisitions. Prerequisites or
corequisites: courses 221, 230. Examination of se-
lected corporate and tax aspects of corporate acquisi-
tions, including analysis of the selection of corpo-
rates in selecting a target company. Takeover strate-
gies and defensive tactics in offers. Consideration of
the federal income tax treatment of corporate acquisi-
tions.

503. Seminar in Criminal Law: Rethinking Crimi-
nal Law Excuse Theory. Examination of both the
determinist's objection to the criminal law's blaming
practices and the responses to that challenge offered
by philosophers, psychiatrists, and legal theorists
who have attempted to reconcile a deterministic view of
human action with criminal law excuse theory. Ex-
amination of the theoretical premises of both ap-
proaches, including the role of intent, causation and
partial excuses such as insanity, duress, provocation,
diminished responsibility, and the "ghetto-defense."
Mr. Arentella

impermissible? Is it immoral even if it has a deter-
cent effect? Or are there situations in which it is morally
improper not to apply the death penalty (even if it has no
extra deterrent effect)? Exploration of these ques-
tions, with emphasis on such topics as the allegedly
arbitrary and discriminatory manner in which death
sentences are carried out, the risk of executing
the innocent, the limitations on the use of the death
penalty, the death penalty better comports with respect for
the sanctity of human life. Mr. Dolinko

503. Seminar in Criminal Law: Rape. The legal de-
definition of rape, the procedural rules applied in the
administration of the law, and the sentences pro-
vided for rape offenses. In order to determine and
critically evaluate the empirical and moral responsibil-
ities of prosecutors and defense attorneys, rape
cases are also examined, as are all aspects of
to rape prosecutions.

504. Seminar in Theory of Property. A philosophical
exploration of the foundations of a theory of property.
Topics include the concept of property, property rights
in the body (including reference to abortion and sui-
cide), and the relation of property to privacy and hu-
nan nature. Readings from classical and contempo-
ary writers, including Locke and Marx, and from
instructor's work in progress.

507. Seminar in Labor Law: Problems of Proce-
dure and Evidence in Labor Arbitration Hearings.
Specific problems of evidence and procedure encoun-
tered in the labor arbitration hearing: the admissibility of
evidence seized from employee personal belong-
ings on company property; application of "self-in-
consistent" and other evidentiary "rules of law" as
innocent; the treatment of workplace "confessions";
the propriety of calling the grievant-employee as an ad-
verse company witness; the standard of proof in dis-
charge of the burden of proof in efforts to recover
others of similar character.
555. Seminar in Legal History: Black Slavery and Freedom, 1630-1968. The contested meanings and boundaries of "slavery" and "freedom" in the legal and political cultures of the North and South at critical moments in their histories. How race and class figured in the legal oppression of blacks, and how blacks and others have sought to use law to extend their freedom. Introduction to a variety of ways of doing legal history and of exploring the interplay of law, politics, and society. Topics include genesis of the slave codes, history of the law of slavery, abolitionist jurisprudence and legal activism, the Constitution as a terrain of sectional conflict, emancipation and Reconstruction: ex-masters and ex-slaves contest the boundaries of the new freedom, rise of Jim Crow, emergence of modern civil rights movement and the legacy of antislavery, the desegregation and voting rights struggles, the relations between legal and other forms of political action, and the achievements and limits of the "second reconstruction" of 1954 to 1968. Mr. Forbath

556. Seminar in American Legal History, 1776-1984. Recommended prerequisite: course 337. Designed for students interested in doing original historical research. Reading of a handful of historians whose work illuminates important interpretive or methodological problems. Progress reports and presentations. Mr. Forbath

557. Seminar in Administration of Criminal Justice. Recent American decisions in criminal procedure concerning the rights of persons suspected or accused of criminal offenses, contrasted with the administration of justice in civil law legal systems, particularly those of Mexico and Spain. Comparison of the reaction by the American judiciary to the crisis of violent crime with that of Spanish law enforcement officials confronted with implementing the nation's new constitution while simultaneously attempting to suppress politically motivated violence. The gap between theory and practice, particularly in Mexico and Latin America. Mr. McGee

558. Seminar in Antitrust Law. Mr. Liebeler, Mr. Wiley

559. Seminar in Political Theory and the Law. The theory of public choice. Since World War II, much democratic theory had tended to center around two questions: (1) On what basis should it be decided whether a type of decision should be made collectively through the government or individually through the market? (2) In what sense are government institutions "representative"? While some earlier writers such as Edmund Burke and James Madison may be considered, focus on contemporary writers, including David Truman, Anthony Downs, Richard Musgrave, Buchanan and Tullock, Moncur Olson, and Brian Barry. Mr. Lowenstein

560. Seminar in American Legal Education. Prerequisite: consent of instructor. Law schools as institutions in the legal establishment. Historical development of legal education: teaching methods; law school politics; recruitment of students and faculty; research and publications; class stratification in legal education; testing and evaluation of students and faculty; advanced legal education; comparative legal education; and the curriculum. Mr. Bergman, Mr. Graham

561. Seminar in American Legal Education, Issues in clinical legal education. Exploration of the history of clinical legal education both nationally and at UCLA. Examination of selected issues in clinical education and ideas concerning the integration of clinical methodology into the traditional classroom. Participants required to undertake a research project examining some issue in clinical education and to present a paper on the project. Mr. Binder

562. Seminar: Teaching Assistants. Limited to teaching assistants. Ways to make teaching assistants' work more effective and interesting. The teaching of legal writing; criteria for evaluating legal writing, ways of editing others' work. Consideration of what approaches to first-year student writing are likely to be most effective. The teaching assistants' role in other parts of the first-year curriculum (torts, civil procedure, property, etc.). Consideration of how teaching assistants might help first-year students with their work, develop exercises for small discussion sections, then conduct and evaluate those discussions. Ms. Anderson, Mr. Yeazell

563. Seminar in International Regulation of Military Power. The role of international law in the regulation of the use of force and the containment of military solutions to world problems. The original United Nations' plan, its invocation in resisting aggression, and its role in various peacekeeping ventures. Multilateral and bilateral arms control negotiations (such as the Comprehensive Nuclear Test Ban negotiations and SALT), the role of law in restraining military buildup and in achieving other national security objectives. Mr. Trimble

564. Seminar in European Economic Community. The structures and institutions of the European communities, their lawmaking processes, and administration. The interaction and conflict between community law and national law and the growing role of the European Court in mediating between the nations and the communities. The processes of the court and parallel between American constitutional development and that in Europe. Mr. Rosett

565. Seminar in Business Planning. Prerequisites or corequisites: courses 220, 221, 230. The tax and corporate law aspects of important problems in the life of an enterprise, such as formation of a corporation, compensation of employees, recapitalization, stock redemptions, acquisitions, and corporate divisions. Mr. Asmow

566. Seminar in Arms Control and Legal Process. The role of sanctions and dispute-settlement techniques in arms control agreements. The original plan of the United Nations against the role it has actually played in international peacekeeping. The recent arms control efforts such as the Nuclear Test Ban Treaty, the Nonproliferation Treaty, and SALT, with a view to assessing the potential for enhancing compliance with these through international institutions. Comparison with the experience of the GATT and the IMF, as well as some of the more theoretical literature on the reasons why nations comply with international law. Mr. Trimble

567. Seminar in Law and the Political Process. The ways in which the laws governing the political process affect and reflect political power relationships. Statutory reforms enacted in the past 10 to 15 years at the federal and state levels. Right to vote, reapportionment, political parties, bribery, campaign finance, incumbency, ballot propositions, lobbying and conflict of interest. Mr. Lowenstein

568. Seminar in Immigration Law: Aliens' Rights. Prerequisite: course 331. Emphasis on three substantive areas of immigration-related law that are legally and politically salient: citizenship and naturalization, refugee and asylum law, and the employment rights of aliens. Introduction to the fundamental law in the topics covered, while simultaneously developing a critical perspective on extant law. The basic statutory framework and traditional judicial gloss placed on various legal requirements and procedures for the attainment of certain status or equality of treatment at the workplace. Development of an understanding of the theories of migration, drawing crucial distinctions between labor and political migration, foreign policy and the rule of law, and the function of citizenship within our legal and political structures. Demonstration that our history of race relations, foreign policy, and economic structures have a predominant effect on our legal structures and have played a fundamental role in the evolution of our law dealing with the rights of aliens.
Our society has become a world of information. Over half of the nation's workforce is now directly engaged in producing, processing, and distributing information in one form or another. Education, scientific and technical development, banking and financial management, government and corporate management — all depend increasingly on accurate, relevant, and readily available information. New technologies have produced a wealth of forms in which we may distribute and transfer information. Printed media have been supplemented by photographic, audiovisual, and computer-processible forms. As a result, libraries and information systems of all kinds have become crucial agencies for the management of the resulting flood of information.

The field of library and information science is concerned with the processes involved in these information agencies and, more generally, in the use of information in our society. How are records with essential information, whatever their form may be, to be acquired, preserved, organized, retrieved, and made available? How is information best used in making decisions and in meeting the goals of society as a whole, as well as those of specific organizations?

Education in the field must provide competence with both old and new methods for the processing of information and old and new approaches to the management of libraries, information centers, and information systems in organizations of all kinds. It is this goal to which UCLA's Graduate School of Library and Information Science is dedicated.

Master of Library Science

Admission

Students are admitted in Fall Quarter only. In addition to Graduate Division requirements and application procedures (see Chapter 3), the school requires:

1) A statement of purpose.
2) Graduate School of Library and Information Science application materials provided in the school’s announcement and application materials.
3) A report of an interview by the dean of the school or by a person designated by the dean as qualified to conduct the interview.
4) An official report of a score on the General Test of the Graduate Record Examination (GRE) taken within the past five years. Applicants must achieve a minimum combined score (verbal and quantitative) of 900.
5) Three letters of recommendation.
6) Satisfaction of the following entrance requirements: (a) a statistics requirement, satisfied by completing a college-level course with a minimum grade of C; (b) a computer programming requirement, met either by completing a college-level course with a minimum grade of C or by passing a proficiency examination administered by the school (most standard languages such as PL/1, FORTRAN, COBOL, PASCAL, and BASIC are acceptable, as is a college-level course in the use of data management systems such as dBASE3, KNOWLEDGEMAN, or CONDOR); (c) reading knowledge of a foreign language, which may be met by completing three quarters or two semesters of college-level study in the language with minimum grades of C or by passing the Graduate School Foreign Language Test (GSFLT) with a minimum score of 500. The school will accept the passing of a foreign language test administered by another UCLA department that meets that department’s graduate degree requirements or, for languages not covered by the GSFLT, the passing of a reading test supervised by the appropriate UCLA foreign language department.

Applications not meeting the required grade-point average of 3.0 may be admitted in exceptional cases if GRE scores, letters of recommendation, or other factors indicate unusual promise. While work experience is not a requirement for admission, consideration is given to such experience in reviewing the total application.

For information on the proficiency in English requirements for international graduate students, refer to “Graduate Admission” in Chapter 3.

Course Requirements

You are normally required to enroll in three courses per quarter in order to complete the program in six quarters. Part-time enrollment may be permitted if you are working in a library or information center.

Eighteen courses (72 quarter units) are required for graduation from the M.L.S. program. Coursework must provide evidence both of basic professional competencies and of knowledge in a field of specialized competence.

Basic Professional Competence: The requirement is met by completing nine core courses: Library and Information Science 400, 402, 410, 411, 420, 421, 430, 441, and at least one graduate-level research methodology course such as 205, 240, 241, 260, 261, or 290. In certain cases, prior coursework or work experience may justify replacing a course by a validation examination administered by the school, but this is not encouraged and should...
be used only for the purpose of increasing the extent to which you pursue a specialization. Only in unusual cases will librarianship coursework taken elsewhere satisfy the basic competency requirements.

Specialized Competence: Completion of a course of study is required as evidence of knowledge of a field of specialization in librarianship, bibliography, or information science. The field of specialization and the specialized course program must be approved by a faculty adviser. The requirement ordinarily is met by the completion of nine additional courses, which may include internships. Relevant coursework in other departments or schools is encouraged.

During the second year, you may apply for an internship of one to three quarters either on campus or on campus at a library or information center. The internship is a regularly scheduled course and may be applied toward the 18 required courses.

No more than eight units of course 596 may be applied toward the total course requirement; only four units may be applied toward the minimum requirements of the Graduate Division. In order to enroll in any S/U graded course, including 500-series courses, you must be in good academic standing.

Comprehensive Examination Plan

A comprehensive examination consisting of two components is required. The written test component is offered in Fall, Winter, and Spring Quarters and is designed to demonstrate your understanding of library and information science services as a totality. It does not cover the basic professional competencies individually; rather, it deals with the field in a unified form. To be eligible to take the written test component, you must complete one year of academic residency, satisfy all outstanding entrance requirements, and complete all nine core courses.

The specialization component of the comprehensive examination requires the completion of a paper or project in the area of your specialization, which demonstrates a considerable amount of work and thought and is of publishable quality. The paper or project is required even if you have an advanced academic degree in which a thesis or dissertation was a requirement and must be approved by your faculty adviser.

Cooperative Degree Programs

To participate in a cooperative program, you must make application to and be admitted by both this school and the other UCLA school or department. Fulfilling the combined set of program requirements normally takes three years.

M.A.-History/M.L.S.

This concurrent degree program of the Graduate School of Library and Information Science and the Department of History allows you to combine historical study with the tools of the information professional and to obtain two degrees — the M.L.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from this school and the History Department.

M.A.-Latin American Studies/M.L.S.

This specialization is an articulated degree program of the Graduate School of Library and Information Science and the Latin American Studies Program. You can obtain two degrees — the M.L.S. and the M.A. in Latin American Studies. However, no course may be used for credit toward more than one degree. The program provides broad training in library and information science, as well as the opportunity to explore and analyze on an advanced level the social, political, and cultural issues characteristic of Latin American societies.

M.B.A./M.L.S.

A concurrent degree program jointly sponsored by the Graduate School of Library and Information Science and the John E. Anderson Graduate School of Management, this specialization is designed to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in the two professional fields. Students should request all application materials from the M.B.A. Admissions Office, John E. Anderson Graduate School of Management.

Post-M.L.S. Certificate of Specialization

The Post-M.L.S. Certificate of Specialization Program meets the need for specialized training in various areas of librarianship, information science, and bibliography, as well as research competence.

Admission requirements vary slightly for each field of specialization, but the basic requirements are a bachelor’s (or higher) degree in letters and science, an M.L.S. degree from an American Library Association-accredited school, and unconditional admission to graduate standing by the UCLA Graduate Division.

Your course program may begin in any quarter of the academic year. If you are admitted for a preliminary quarter to complete prerequisite courses, that quarter is not counted toward the minimum residence requirements.

Part-time enrollment is encouraged to provide flexibility for the working librarian. Opportunities for relevant coursework outside the department and internships, both on and off campus, are available.

Three general areas of specialization have been authorized: librarianship, bibliography, and information science. Further specialization within these fields is possible. A minimum of nine courses (100-,200-,400-, and 500-series) must be completed in the Graduate School of Library and Information Science and other departments of the University.

In addition to taking coursework in your area of specialization, you must complete a paper or project in that area, which demonstrates a considerable amount of work and thought and is of publishable quality. The specialization paper or project is required even if you have an advanced academic degree in which a thesis or dissertation was a requirement and must be approved by your faculty adviser.

Ph.D. Degree

Admission

In addition to Graduate Division requirements and application procedures, the school requires:

1. A master’s degree or the equivalent from an institution of recognized standing, representing academic preparation equivalent to that required for a comparable degree from the University of California.

2. Evidence of basic professional competence. This would be satisfied by an M.L.S. degree from a program accredited by the American Library Association or by completing Library and Information Science 400, 402, 410, 411, 420, 421, 430, 441, and at least one graduate-level research methodology course such as 205, 240, 241, 260, 261, or 290.

3. Satisfaction of the same entrance requirements as listed in item 6 under the M.L.S. degree.

4. A statement of purpose which identifies your proposed area of specialization, accompanied by appropriate evidence of qualifications for pursuing a doctoral program.

5. A total score of 1,200 or better on the General Test of the Graduate Record Examination (GRE), with at least 500 in each of the two parts (verbal and quantitative). The examination must have been completed within five years prior to application for admission.

6. Three letters of recommendation.

7. Interviews with two faculty members of the school.

8. Graduate School of Library and Information Science application materials provided in the school’s announcement.

While work experience in a library is not a requirement for admission, consideration is given to such experience in evaluation of candidates.
Major Fields or Subdisciplines
You are expected to specialize in a subfield in one of three major fields:
1. Information storage, organization, and retrieval.
2. Communication and information transfer.
3. Libraries and other information organizations.

The school strictly limits the specific subfields which, at any time, are accepted for doctoral work.

Course Requirements
No courses are required for the Ph.D. other than those for admission. However, you normally take Library and Information Science 272 several times, as well as a variety of other courses, both inside and outside the school, relevant to your individual program.

Qualifying Examinations
You are required to pass written qualifying examinations in each of the three areas of study listed above, including coverage of the historical as well as technical aspects. These are scheduled during one week in a quarter. If you fail one of the sections of the three-part examination, it may be repeated. Should you fail two or three sections, all three must be repeated.

After passing the written examinations, you are required to pass the University Oral Qualifying Examination, which is based on your dissertation proposal.

You are encouraged to start work on your proposal while taking courses in preparation for the written qualifying examinations. The proposal should, in most cases, be completed at the same time or soon after the completion of the written examinations, but it must be completed and accepted within two years after passing the written examinations.

The oral examination covers the methodology and feasibility of your research, as well as the depth of your knowledge in the specific field of your proposed dissertation research.

Your doctoral committee decides, after the oral examination, whether the proposal is accepted as written, is accepted with modification, or is not accepted. The committee also decides whether the oral examination has been passed. If the proposal is not accepted, the examination may not be passed.

Dissertation Research and Final Oral Examination
The third formal requirement of the program is that you research, write, and defend a dissertation. The required final oral examination is administered by members of the doctoral committee, who also evaluate the dissertation.

Upper Division Courses
Upper division courses may not be applied toward the M.L.S. degree.

110. Information Resources and Libraries. Prerequisite: sophomore standing or consent of instructor. Not open for credit to M.L.S. students. An introduction to bibliographic and information resources and relevant research methodology, covering both general and specialized materials. Designed to facilitate knowledgeable use of libraries and efficient retrieval of information. Some sections focus on specific subject areas (such as science and technology).

111A-M111E. Ethnic Groups and Their Bibliographies. Introduction to bibliographical and research tools and methods for students with interests in ethnic groups. 111A. American Indian History and Culture; 111B. Afro-American History and Culture; 111C. Latino History and Culture; 111D. Asian American History and Culture; M111E. Jewish History and Culture. (Same as Jewish Studies M111E.) Sections on other ethnic groups may be added. Offered in collaboration with the several centers for ethnic studies. May not be repeated for credit.

124. Information Access Systems. Exploration of new and established channels for providing information to the general public, including videotex, electronic publishing, data bases, information utilities, computer networks, and conventional library operations. Each information technology studied on the basis of its history, economics, technical characteristics, relation to other media, and potential for social change.

140. Computer Programming for Library Operations and Services. Introduction to computer programming and data base management in the library information center environment. Concepts of data organization and retrieval, file structure, with emphasis on data description. Students required to create and execute a variety of programs on microcomputer and/or mainframe systems for bibliographic, administrative, and management information applications.

Graduate Courses
Upper division undergraduate students must obtain consent of the instructor to enroll in 200-series courses and consent of the dean of the school to enroll in 400-series courses.

Graduate students from other schools or departments who wish to take courses in the Graduate School of Library and Information Science also must obtain consent of the instructor prior to enrolling.

M202. Folklore Archiving. (Formerly numbered M202A-M202B.) (Same as Folklore M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing data bases, utilizing both manual and computerized techniques.

205. Research Methodology in History of Bibliography, Library and Information Science. Introduction to historiography as it relates to librarianship. Identification of key primary and secondary sources material for writing history in the field. Critical analysis and review of selected bibliographical literature on librarians and information specialists, as well as influential histories of the various areas in the profession. Problem-oriented approach.

206A-206Z. Seminars in Historical Topics (2 to 4 units each). (Formerly numbered 206.) Special studies in a variety of historical problems. Topics and units may vary according to the subject.

442. Library Materials. Emphasis on the folktale, and oral interpretation with emphasis on modern imaginative literature. Readings and discussion of the function of folklore and fantasy in literature, society, child development, and library programming. Students required to choose, learn, and tell stories in class and in a library or community setting and to read stories aloud.

467. Seminar on Current Topics in Library Public Administration. Prerequisite: course 463 or consent of instructor. Special topics in public librarianship, with strong emphasis on issues and problems of public library administration. Topics, which vary to allow in-depth examination of current issues and individually selected concerns, emphasize those aspects of public librarianship which concern public libraries. Particular attention to funding and budgetary matters, the impact of new technologies, and the marketing of public library services.

471. Health and Life Sciences Libraries. Organization, administration, services, and problems of health and life sciences libraries; relationships with institutions of which they are a part and with the community. Several field trips.

472. Law Librarianship. An introduction to the profession of law librarianship; the organization of the professional associations and their activities; the character and distribution of law libraries throughout the country; resource and characteristics of law library problems and their solutions.

473. Government Information. Examination of the informational needs of government officials and the resources available to meet these needs. Topics may include: government publications, government data bases, communication with public officials.

474. Issues and Problems in Preservation of Library Materials. Provides information for administration of conservation programs and decision making in the preservation of library materials. Topics may include: history of paper production and book structure; relation to the present endangerment of library materials; past and current practices in library storage, retrieval, and use; environmental controls; housekeeping; binding standards; collection processing; library and book curricula; microfilming; cooperative conservation programs; conservation ethics; disaster preparedness and recovery.

487A-487Z. Special Studies in Library and Information Science (2 units each). Examination of specialized topics of professional interest. Topics and units vary according to subject and may include conservation of materials, business information sources, problems in library management, current issues in cataloging, etc.
Because the world is changing rapidly and unpredictably, today's professional manager must learn the concepts and principles of management that make adjustments to new conditions possible. At UCLA's John E. Anderson Graduate School of Management (AGSM), which is consistently ranked among the best such schools in the nation, students prepare to become first-rate managers with both specialized skills and a broad understanding of the general economic, business, and managerial environment. This background enables them to become effective and efficient directors of organizations and people whether they are in the private, public, or not-for-profit sector.

Specifically, AGSM offers the business community a wide range of continuing education programs that provide state-of-the-art information in a variety of fields, and advances the art and science of management by engaging in and educating scholars capable of conducting basic research in all fields of management.

AGSM students come from diverse professional and educational backgrounds and seek equally diverse personal and professional goals. Whether they choose to pursue the professional M.B.A., the academic M.S., or a Ph.D. in Management, they graduate with a broad understanding of people and organizations and with a sound technical background in the economic and mathematical concepts of management planning and decision making.
John E. Anderson Graduate School of Management

3250 Graduate School of Management, (213) 825-7935

Professors
Robert B. Andrews, Ph.D. (Production and Operations Management); Associate Dean
Michael J. Brennan, Ph.D. (Goldyne and Irwin Hees Professor of Money and Banking; Finance)
John W. Buckley, Ph.D. (Arthur Young Professor of Accounting)
Ehwood Buffa, Ph.D. (Times Mirror Professor of Management Strategy and Policy; Production and Operations Management)
Lee G. Cooper, Ph.D. (Marketing)
Thomas E. Copeland, Jr., Ph.D. (Finance)
Bradford Cornell, Ph.D. (Finance)
Samuel A. Culbert, Ph.D. (Behavioral and Organizational Science)
Michael R. Darby, Ph.D. (Business Economics)
Louis E. Eis, M.S. (Behavioral and Organizational Science)
José de la Torre, D.B.A. (Organization and Strategic Studies)
David K. Eiteman, Ph.D. (Finance)
Donald Erlenkotter, Ph.D. (Management Science; Production and Operations Management)
Eric G. Flamholtz, Ph.D. (Human Resource Management and Industrial Relations)
Walter A. Fogel, Ph.D. (Human Resource Management and Industrial Relations)
Arthur M. Geoffrion, Ph.D. (Management Science)
Martin Greenberger, Ph.D. (IBM Professor of Computers and Information Systems)
Alfred E. Hofflander, Ph.D. (Finance)
John Hutchinson, Ph.D. (Human Resource Management and Industrial Relations)
Harold H. Kassarjian, Ph.D. (Marketing)
Larry J. Kinbili, Ph.D. (Business Economics)
Paul Kircher, Ph.D., C.P.A. (Recalled (Accounting)
Archie Kleingartner, Ph.D. (Human Resource Management and Industrial Relations)
J. Clayburn La Force, Ph.D. (Business Economics)
Bennet P. Lientz, Ph.D. (Information Systems)
Steven A. Lippman, Ph.D. (Management Science)
James B. MacQueen, Ph.D. (Management Science)
Robert Hal Mason, Ph.D. (Organization and Strategic Studies)
Fred Massarik, Ph.D. (Behavioral and Organizational Science)
John J. McDonough, D.B.A. (Behavioral and Organizational Science; Accounting)
Bill McKelvey, Ph.D. (Organization and Strategic Studies), Chair
Bruce L. Miller, Ph.D. (Accounting)
Daniel J. Mitchell, Ph.D. (Human Resource Management and Industrial Relations)
Frank G. Mittlebach, M.A. (Urban Land Economics)
Donald G. Morrison, Ph.D. (William E. Leonhard Professor of Management; Marketing)
Rosser T. Nelson, Ph.D. (Management Science; Production and Operations Management)
William G. Ouchi, D.B.A. (Management Science; Organization and Strategic Studies)
Anthony P. Raia, Ph.D. (Behavioral and Organizational Science; Organization and Strategic Studies)
Richard W. Roll, Ph.D. (Allstate Professor of Insurance and Finance)
Rakesh K. Sarin, Ph.D. (Production and Operations Management)
Eduardo S. Schwartz, Ph.D. (California Professor of Real Estate and Land Economics; Finance)
John P. Shelton, Ph.D. (Finance)
R. Clay Sprowls, Ph.D. (Information Systems)
J. Fred Weston, Ph.D., Recalled (Warren C. Cordner Professor of Money and Financial Markets; Business Economics; Finance)

Ernest J. Scalberg, Ph.D., Assistant Dean
The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school does not offer an undergraduate major in management; however, several undergraduate courses in management are offered. Enrollment in Management 120A, 120B, 122, 124, 130, 133, and 140 is open only to students in the economics/business program (see Chapter 5 for details on this program). Enrollment in other courses, although open to all University students who have completed the prerequisites, is limited, and non-AGSM students are advised not to count on gaining admission to them in order to meet the requirements of other departments or programs.

Degrees Offered
Master of Business Administration (M.B.A.)
Master of Science (M.S.) in Management
Doctor of Philosophy (Ph.D.) in Management

Master of Business Administration

The two-year, full-time program leading to the Master of Business Administration (M.B.A.) degree is designed to prepare managers for business enterprises and for public/not-for-profit organizations. A part-time version of the program is available for a limited number of fully employed students, who must be able to attend classes scheduled between the hours of 4 and 10 p.m. at least two days a week.

The program aims to develop general management perspectives and knowledge while imparting expertise in student-selected fields of specialization. Along with mastery of subject matter, the M.B.A. program stresses integrating the lessons of various academic disciplines and functional fields, translating theory into practice, questioning the past and planning for the future, and self-guided learning as a continuing basis for effective managerial work.

Admission

Although no specific undergraduate major is required for entrance, you must complete elementary algebra and differential calculus before entering the M.B.A. program. You are required to take the Graduate Management Admission Test (GMAT). Any questions about the GMAT should be addressed to the Educational Testing Service, Box 966, Princeton, NJ 08541, (609) 883-8519. The local phone number in Los Angeles is (818) 578-1971.

International applicants who hold degrees from universities or colleges where English is not the primary language are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

You must complete the M.B.A. Application, which includes the application for admission to graduate standing. Admission is for the Fall Quarter only; completed applications, with full documentation, must be filed with AGSM by March 3.

Consideration is given to your academic record; score on the GMAT and, for applicants whose native language is not English, score on the TOEFL; potential for management as evidenced by work experience and community, extracurricular, or other experience; and letters of recommendation. Preference is given to applicants who have had full-time management-related work experience since completing their bachelor's degrees. Students admitted directly from baccalaureate programs who choose to work before entering graduate school will have their admission honored for three years.

Small group information sessions are offered by the M.B.A. Admissions Office several days a week from July through mid-March on an appointment basis. Call 825-8874 to arrange attendance.

Applications and information about the M.B.A. program are available in the M.B.A. Program Office, 3371 Graduate School of Management, UCLA, Los Angeles, CA 90024-1448.

Areas of Study

Accounting; behavioral and organizational science; business economics; finance; human resource management and industrial relations; information systems; management science; marketing; organization and strategic studies; production and operations management; urban land economics. Interdisciplinary studies are offered in arts management, entertainment management, entrepreneurial studies, international and comparative management, and public/not-for-profit management.

Course Requirements

The three required elements of the M.B.A. program are the management core, the advanced electives totaling at least 24 courses (96 units), and the management field study. Management core subjects cover the fundamentals of disciplines which underlie the practice of management. Advanced electives provide specialized knowledge and skills for a particular field of management work.

Management Core: The management core consists of 11 courses on subjects basic to the practice of management, including Management 402, 403, 405, 408, 410, 411, 412, 420, one course from 409, 414, and two courses from 404, 406, 407.

Advanced Electives: These focus on one or more fields of specialization within the broad realm of management. Students design programs of study to meet their specific academic needs and professional goals. Eight electives must be selected from regular AGSM courses, and you are encouraged to emphasize two or more areas of study.

You must also select at least three additional free electives, subject only to general University regulations. These electives normally must be taken while enrolled in the program. They may support or complement the remainder of your program of study.

A maximum of two four-unit 596 courses may be applied toward the 96-unit requirement.

Management Field Study: The two-quarter management field study project (courses 444A-444B) consists of teams of four or five students who serve as management consultants to business firms or other organizations. Conclusions are summarized in a report which serves in lieu of a thesis or comprehensive final examination for the members of the team. The field study is judged by standards applicable to professional management consulting.

Extracurricular Activities

A variety of student organizations promote both professional competence in many areas and the development of contacts among students, alumni, faculty, and business executives. Many opportunities are presented for students to become involved in planning events with executives in both the public and private sectors, to participate in day-long programs at various organizations, and to meet with company representatives and alumni. Extracurricular activities are an integral part of life at AGSM, and all students are encouraged to participate.

Concurrent Degree Programs

J.D./M.B.A.

The John E. Anderson Graduate School of Management and the School of Law offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Students interested in such a program should apply to both schools simultaneously.
M.S.-Computer Science/M.B.A.
The John E. Anderson Graduate School of Management and the Department of Computer Science in the School of Engineering and Applied Science offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Students should request all application materials from the M.B.A. Admissions Office, John E. Anderson Graduate School of Management.

M.L.S./M.B.A.
A concurrent degree program jointly sponsored by the John E. Anderson Graduate School of Management and the Graduate School of Library and Information Science, this specialization is designed to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in the two professional fields. Students should request all application materials from the M.B.A. Admissions Office, John E. Anderson Graduate School of Management.

M.P.H./M.B.A.
The John E. Anderson Graduate School of Management and the School of Public Health, Division of Health Services, offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields and who wish in-depth professional preparation for such a career. The program reflects the combined interest of employers, faculty, and students who have recognized the increasing challenges facing managers in the health care industry and the need for individuals who are skilled in dealing with these challenges. Students should apply to both schools simultaneously as admissions decisions are made jointly. Application materials are available from the M.B.A. Admissions Office, John E. Anderson Graduate School of Management.

M.A.-Latin American Studies/ M.B.A.
The John E. Anderson Graduate School of Management and the Latin American Studies Program jointly sponsor a three-year concurrent degree program designed for individuals preparing for careers in international management with a special focus on the Latin American region. Establishment of the program was predicated on the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies. Students should request application materials from the M.B.A. Admissions Office and the Latin American Studies Program.

M.A.-Urban Planning/M.B.A.
The John E. Anderson Graduate School of Management and the Graduate School of Architecture and Urban Planning offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service. Students should request all application materials from the M.B.A. Admissions Office, John E. Anderson Graduate School of Management.

Executive M.B.A. Program
Designed for mid-career managers with strong records of achievement, the Executive M.B.A. Program enables executives to obtain high quality advanced management education while continuing in their full professional roles. The program is limited to 50 participants with superior academic records and a minimum of eight years of combined work and managerial experience.

The intensive 22-month course of study leads to a regular M.B.A. degree. The emphasis is on general management training; increased competence in management specialties; organizational and interpersonal skills; and sophisticated understanding of the integration of businesses and their environments.

Classes are held at AGSM on Fridays and Saturdays every other week, with three- to five-day residential sessions held at conference sites at the beginning, middle, and end of the program. Further information and application materials may be obtained by writing to the Assistant Dean, Executive M.B.A. Program, 4383 Graduate School of Management, UCLA, Los Angeles, CA 90024-1464.

M.S./Ph.D. Programs
Admission
All applicants are required to take the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants who hold a degree from a non-English-speaking university are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information. Three letters of recommendation must be submitted with the completed application. All application materials, including transcripts, should be sent directly to the Doctoral Office. 3379 Graduate School of Management, UCLA, Los Angeles, CA 90024-1481.

Applications are accepted for Fall Quarter admission only; the deadline for submission of applications and complete documentation is January 31.

Program information and application materials may be obtained from the Doctoral Office.

All applicants to the M.S. or Ph.D. program are strongly urged to arrange an interview with at least one faculty member in their proposed area of concentration or major field area. The interview should take place before February 1.

Master of Science Degree
The academic master's program is a full-time program which leads to the Master of Science degree in Management. Some students enter the program with the goal of eventual acceptance into the doctoral program; for others, the M.S. is a terminal degree. In either case, the program's emphasis is on advanced specialized training and the development of research capability.

Major Fields or Specializations
Business economics, management science.

Course Requirements
Business Economics: A maximum of 16 courses may be required. It is possible to waive the seven prerequisite courses on the basis of prior coursework. Nine graduate courses (the required and elective major field courses plus four units of Management 598) are required and cannot be waived.

(2) Specialization (eight courses; deviations may be approved by the chair of the business economics academic unit): Five required courses from Management 201A, 201B, 201C, 202B, 205C, 205A, plus three electives (illustrative courses and course sequences) selected from one of the following groups: industrial organization — Management 202A, 202D; 203A, 203B, 203C, 231A, 231B, 231C; Economics 204A-204B-204C; 271A, 271B; techniques for analysis — Economics 213A-213B, 214A; 231A, 231B; Management 240A, 240B; economic forecasting — Management 201B, 201C, 202A, 205B, 205C; 230.

(3) Master's Thesis (one course): Four units of Management 598.

Management Science: A maximum of 16 courses may be required. The four prerequisite courses and three managerial core course requirements may be waived on the basis of prior coursework. Nine graduate courses (methodological core, depth field, and four units of Management 598) are required and cannot be waived.

(1) Prerequisites (four courses): Mathematics 32B, Statistics 152A-152B, and two quarters of computer programming.
(2) Managerial Core (three courses): Management 403, 405, 408.
(3) Methodological Core (five courses; deviations may be approved by the chair of the management science academic unit): Management 203A, 210A, 210B, 210C, 216A.
(4) Depth Field: Three courses which support your thesis research.
(5) Master's Thesis (one course): Four units of Management 598.

Four units of course 596 may be applied toward the minimum graduate course requirement.

**Thesis Plan**
A thesis is required for the Master of Science degree. Students generally establish a thesis committee during their fifth quarter. Plans for the thesis should be presented to the committee for approval at the beginning of the sixth quarter.

**Ph.D. Degree**
The doctoral program is a research-oriented degree program which leads to the Ph.D. in Management. The program includes intensive training in research methods applicable to problems of organizations in the public and private sectors. It prepares students for careers in university teaching and research or as staff specialists in business firms and other organizations. The program offers students substantial opportunities to discover their own, unique scholarly focus and competence.

**Major Fields**
Accounting; behavioral and organizational science; business economics; finance; human resource management and industrial relations; information systems; international and comparative management; management science; marketing; organization and strategic studies; production and operations management; urban land economics.

**Course Requirements**
The research preparation requirement consists of two parts: (1) a course requirement and (2) a research paper. You are required to take five research courses which are not part of the major field area. These courses must be completed before taking the oral qualifying examination and may not be waived by prior graduate work. The research paper must be submitted to and accepted by the research paper committee no later than the Spring Quarter of your third year of study.

The breadth requirement consists of eight courses which are clearly outside your major field area. You should use these courses to become more knowledgeable about the basic elements of several other management disciplines and functional areas or to define a minor field or research and teaching proficiency. Three of these courses may be waived by prior coursework. They must be completed before taking the oral qualifying examination.

There is no formal major field course requirement. Students, in consultation with a major field adviser, design a course of study which prepares them to pass the major field examination.

**Qualifying Examinations**
Proficiency in the major field area is determined by a written examination, supplemented in some areas by an oral examination. The major field examination must be passed by the end of the Spring Quarter of your third year of study.

You are required to present the substance of your dissertation proposal in a formal seminar to which all Ph.D. students and faculty are invited.

When all the preliminary requirements have been fulfilled (coursework, research paper, major field examination, seminar), the University Oral Qualifying Examination can be held; if passed, you are advanced to candidacy. The oral qualifying examination must be passed within four and one-half years of the date of entrance into the program.

**Candidate in Philosophy Degree**
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**
The school requires that students take a final oral examination; this requirement may be waived only under exceptional circumstances.

**Lower Division Courses**

1A-1B. Elementary Accounting. Prerequisite: sophomore standing. Course 1A is prerequisite to 1B. An introduction to accounting theory and practice. The recording, analyzing, and summarizing procedures used in preparing balance sheets and income statements in the first quarter. Payroll and tax accounting, partnership and corporation accounts, manufacturing and cost accounting, and supplementary statements in the second quarter.

**Upper Division Courses**

120A. Intermediate Financial Accounting I. (Formerly numbered 120.) Prerequisite: course 1B. An intermediate-level course in the theory and practice of financial accounting. The underlying concepts of asset valuation and income measurement. The measurement and reporting of current and long-term assets, including cash and marketable securities, inventories, plant assets and depreciation, and intangibles.

120B. Intermediate Financial Accounting II. (Formerly numbered 120.) Prerequisite: course 120A. An intermediate-level course in the theory and practice of financial accounting. The underlying concepts of liability recognition and expense, including leases, bonds, and pensions. Shareholder's equity, including earnings per share. Accounting for changing prices.

122. Cost Accounting. Prerequisites: course 1B, Economics 40, or equivalent. The nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis.

123. Auditing. Prerequisite: course 120B. Concepts and problems in the verification of financial and related information, including ethical, legal, and other professional issues. Historical developments and current concerns.

124. Advanced Accounting. Prerequisites: courses 120A, 120B. Partnerships and joint ventures; installment sales and consignment sales; home office and branch relationships; corporate combinations; the preparation of consolidated statements; foreign branches and subsidiaries; receiverships; estates and trusts; governmental units; actuarial science.

127. Federal Income Taxation. Prerequisite: course 1B. Recommended: course 120A. Basic concepts of federal income taxation pertaining to individuals; income and deductions, areas of special tax procedures pertaining to gains and losses from sales and exchanges. Tax considerations in business and investment decisions.

130. Business Finance. Lecture, three hours; discussion, one hour. Prerequisites: course 120A or 120B, Economics 40, or equivalent. A study of the forms and sources of financing business firms large and small, corporate and nonprofit. Emphasis on financial planning and developing judgment in formulating decisions on financial problems. Financial problems considered in their social, legal, and economic effects.

Mr. Anderson

133. Investment Principles and Policies. Prerequisite: course 130. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

Mr. Erlenkotter and the Staff

140. Elements of Production and Operations Research. Prerequisites: Mathematics 3A, 3B, 3C, 3E, Economics 40, or equivalent. Principles and decision analysis related to the effective utilization of the factors of production in manufacturing and nonmanufacturing activities. Analytical models and methods for allocation, transportation, inventories, replacement, scheduling, and facilities design.

Mr. Erkenkotter and the Staff

150. Elements of Industrial Relations. Principles and methods of effectively utilizing human resources in organizations. The relationship between social, economic, and other environmental factors and current problems in industrial relations.

Mr. Hutchison

175. Elements of Real Estate and Urban Land Economics. An examination of business decision making as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, building, financing, marketing, and using urban property.

Mr. Mittelbach

182. Leadership Principles and Practice. Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratory.
Graduate Courses

Graduate courses are ordinarily open to students admitted in graduate standing. As a condition for enrollment, you must submit to the instructor in charge of the course evidence of satisfactory preparation for the work proposed.

200. Advanced Microeconomics. (Formerly numbered 200A.) Seminar, three hours. Prerequisite: course 405 or consent of instructor. An economist's approach to organization and competitive interaction. Topics include game theory, threat credibility, incentive contracts, information advantages, and entry deterrence. Mr. Rasmussen

201B. Econometrics and Business Forecasting. Prerequisite: consent of instructor. Development of standard topics in applied econometric modeling. Emphasis on the assumptions underlying the classical normal linear regression model, special problems in application, and interpretation of results. Practical applications extensively developed in student projects. Mr. Rasmussen

201C. Regional Economic Forecasting. Prerequisite: course 201A. Forecasting of economic activity in a region, emphasizing special problems such as population and industry migration; the effects of external forces on the region's economy. Mr. Erlenkotter

202A. Regulation. (Formerly numbered 201D.) Prerequisite: course 405 or consent of instructor. Reasons for government intervention in theory and practice. The effect of regulation on business. How regulation and deregulation occur. Areas include public utilities, banking, pollution, and the political process. Mr. Rasmussen

202B. Analytics of Competitive Strategy. Discussion, three hours. Prerequisites: courses 402, 405, or consent of instructor. Development and analysis of strategies to maximize value in competitive and cooperative situations. Problems include competitive bidding, tacit collusion, and strategies in repeated settings. Mr. Ping

202C. Empirical Studies in Industrial Organization. Prerequisite: course 202B. Investigation of factors influencing the size of industries, their size distribution, and the conditions of entry and exit. Implications of such industry characteristics, derived for decisions having to do with firm output, prices, advertising, and research and development. Mr. Weston

202D. Organization of Industry and Business Policy. Prerequisite: course 201A or consent of instructor. An instructive study of economic aspects of long-range planning of firms with respect to horizontal expansion, vertical integration, and diversification, especially the review of statutory and legal decisions affecting internal and external expansion policies.

203A. Economics of Decision. (Formerly numbered 203A.) Prerequisites: rudiments of economic theory, calculus, probability, and statistics. The basic principles of decision making under uncertainty: expected utility, risk aversion, stochastic dominance, and their impact on economic decisions in a stochastic environment. Mr. Lippman

205A. International Business Economics. Prerequisites: courses 405 and 406, or consent of instructor. The international business environment, international economic institutions, national and regional trade policies and developments, trends in foreign markets, and international monetary problems, studied for their influence on the organization and operation of the international corporation. Mr. Biakhchandani, Mr. Erlenkotter

205B. Comparative Market Structure and Competition. Prerequisite: course 205A or consent of instructor. A comparative study of public policies toward competition, market structures, and competitive practices in key industries in selected countries. Mr. Mason, Mr. Mitchell

206B. Business Forecasting for Foreign Economies. Prerequisite: course 201A or consent of instructor. Forecasting changes in business activity, population, industrial structure, productivity, Gross National Product and its components for selected countries.

206D. Management of Economic Development in Latin America. Discussion, three hours. Prerequisites: courses 405 or Economics 1 or 2. An introduction to economic development in Latin America. Consideration of the role of population, human resources development, agriculture, and land reform. Examination of various industrialization strategies, the role of foreign trade, foreign investment, and economic integration in the area's development. Analysis of the role of inflation and financial intermediation of capital development. Mr. Granfield

207. Resource Administration of Nonmarket Activities. (Formerly numbered 207A.) Seminar, three hours. Prerequisite: course 405 or consent of instructor. Examinations of the behavior of managers in the profit vs. not-for-profit sectors to determine the critical variables that explain the observed differences in behavior. Use of the methodology of microeconomics, particularly utility maximization. Mr. Granfield

208. Public Services and Private Functions. (Formerly numbered 207B.) Prerequisites: courses 405 and 406, or consent of instructor. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of the proper roles of government and the private sector in the financing and provision of public goods and services.

209. Selected Topics in Business Economics. (Formerly numbered 208.) Prerequisite: consent of instructor. Special topics in business economics. Current developments in theory or practice in business economics. May be repeated for credit.

210A. Mathematical Programming. Discussion, three hours. Prerequisite: linear algebra. A comprehensive development of the theory and computational methods of linear programming, with applications to a variety of areas. Mr. Eaves

210B. Applied Stochastic Processes. Discussion, three hours. Prerequisite: Mathematics 150A or Electrical Engineering 131A. Fundamentals of stochastic processes, including Poisson processes, renewal theory, and Markov chains. Sequential stochastic (usually Markovian) decision processes in discrete and continuous time. Emphasis on problem formulation, solution techniques, and applications. Mr. MacQueen

210C. Network Flows and Integer Programming. Prerequisite: linear programming. Theory and techniques of discrete and network-related mathematical programming models in management science. Application to various allocation, coordination, and planning problems. Emphasis on fundamentals, efficient computational methods, and the keys to successful practical applications. Mr. Mamer

211A. Nonlinear Mathematical Programming. Prerequisites: course 210A, Mathematics 32A, or equivalent. Theory, methods, and application of the optimization of nonlinear systems. Review of classical optimization methods; optimality and duality theory for convex programs; main computational approaches to convex programming; current computer codes and computational experience. Mr. Graves

211B. Large-Scale Mathematical Programming. Prerequisite: course 210A or equivalent. Theory and computational methods for optimizing large-scale linear and nonlinear programs. Exploitation of special structures with combinatorial, dynamic, multidimensional, and stochastic aspects to obtain practical solution procedures in spite of large numbers of variables and/or constraints. Mr. Graves

212A. Management Science Models I. Prerequisites: course 407, Mathematics 31B. A broad survey of deterministic models of management science, including solution methods and applications management. Solution methods include linear programming, network optimization, integer programming, nonlinear programming, and dynamic programming. Application areas include corporate planning, finance, marketing, production and operations management, distribution, and project management. Mr. Erlenkotter, Mr. Geoffrion, Mr. Lippman

212B. Management Science Models II. Prerequisites: courses 212A, Mathematics 32A, or equivalent. A broad survey of nonlinear, time-staged, and probabilistic models for managerial decision making. Application areas include finance, marketing, production, facilities design, and energy systems. Mr. Erlenkotter, Mr. Mamer

212C. Management Science Models III. Prerequisites: courses 212A, 212B. In-depth reviews of actual management science applications. Emphasis on the professional skills needed for successful practical applications.

213A. Intermediate Probability and Statistics. Prerequisite: course 402 or equivalent. Introduction to probability theory and hypothesis testing as applied to management. SAS programs used in this course and its sequels. Mr. Mamer, Mr. Morrison, Mr. Ting

213B. Statistical Methods in Management. Prerequisite: course 213A or consent of instructor. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to management studies. Mr. Cooper, Mr. Hanssens, Mr. MacQueen
218C Introduction to Multivariate Analysis. Prerequisite: course 213B or consent of instructor. Introduction to the analysis and interpretation of multivariate statistical models through the use of empirical research to organize and represent information; interpretation of coefficients from multivariate exploratory models, principal axes and factor analysis models, and canonical correlation analysis. May be repeated for credit.

220A Intermediate Financial Accounting I. Prerequisite: course 203 or consent of instructor. Concepts and principles of financial accounting. Emphasis on enhancing students' understanding of published corporate financial statements. Emphasis on assets and revenue recognition. Ms. Hughes, Mr. Miller

220C Advanced Financial Accounting. Prerequisites: courses 220A and 220B, or consent of instructor. A continuation of courses 220A and 220B, with emphasis on a range of topics, including accounting for partnerships, mergers, combinations, and parent-subsidiary relationships. Review of litigation procedures, including reorganizations, receiverships, and bankruptcy. Mr. Farrell

221 Current Issues in Accounting. Prerequisite: course 220B or equivalent. A forum for discussion of contemporary issues in accounting and information systems, in a colloquium format. Drawing on prominent speakers in the field, course requires students to formulate a position paper on each topic presented. Mr. Buckley

222 Cost Accounting. Prerequisite: course 403. The nature, objectives, and procedure of cost accounting and control; job costing and process costing; job and product costing; standard costs; theories of cost allocation and absorption; uses of cost accounting data for management decision making. Mr. Suh

223 Auditing. Prerequisite: course 403. Theory and practice underlying the auditors' examination and reporting on financial statements, including professional ethics, internal control, and the selection and application of auditing procedures, with emphasis on generally accepted auditing standards. Mr. Miller

226 International Accounting. Prerequisite: course 403. Comparative analysis of accounting concepts and practices in other countries; study of contrasts between various systems; problems of accounting for international corporations, including transfers of funds and income measurement; accounting influences on economic development. Mr. Farrell

227A Taxation Principles and Policy. Discussion, three hours. Prerequisite: course 403. Study of fundamental income tax problems encountered in business, investment, employment, and personal decisions. Special emphasis on structuring real estate and securities transactions. Current trends in law and policy. Mr. Klein

227B Taxation and Business Planning. Discussion, three hours. Prerequisite: course 403. Study of the tax issues arising in the formation, operation, and termination of a corporation. Specific emphasis on structuring shareholders' transactions involving dividends, redemptions, liquidations, acquisitions, and capital stock. Mr. Klein

228 Evaluating Financial Statement Information. Lecture, three hours. Prerequisites: courses 220A or 220B, 230, 402. Issues of accounting information evaluation, with special emphasis on uses of financial statements by decision makers external to the firm (e.g., creditors, shareholders). Topics include capital market influences, bankruptcy prediction, and interpreting earnings. Mr. Landsman

229A Accounting Theory. Prerequisite: course 220B. A survey of accounting literature, with emphasis on current topics and recently published textbooks. Contemporary practice as it has evolved in accordance with basic theory and expanding demands for accounting information. Mr. Farrell

229B Research Methodology in Accounting. Prerequisite: doctoral standing or consent of instructor. Design and analysis of empirical research in accounting. Sources of research problems. Research conduct and methodology in accounting and other fields as they relate to accounting. Mr. Landsman

229C Special Topics in Accounting. Prerequisite: consent of instructor. An exploration of a complex accounting area. May be repeated for credit.

229X-229Y-229Z Accounting Workshop (1 unit, 1 unit, 2 units). Discussion, two hours. Prerequisite: doctoral standing. Designed to develop an ability to critically evaluate research in fields relevant to the study of accounting. Papers presented in a colloquium format by leading scholars in accounting. Active participation and intellectual interchange encouraged through discussion of the papers during the colloquium. May be repeated for credit. S/U grading.

230 Theory of Finance. Prerequisite: course 408. Decision making under uncertainty, the theory of asset pricing and the capital market. Development of the most recent theoretical constructs and application to fundamental issues in corporate financial management (such as capital budgeting, capital structure, hedging strategies). Mr. Copeland, Mr. Grinblatt, Mr. Titman

231A Profit Sector Financial Policy. Prerequisite: course 230. Identifying and solving financial problems through the use of cases. The application of financial theory and financial techniques to business problems, using written reports and classroom discussion. Mr. May, Mr. Titman, Mr. Weston

231B Nonprofit Sector Financial Policy. Discussion, three hours. Prerequisite: course 408. Identifying and solving financial problems for all types of nonprofit organizations, with attention to funds accounting, budgeting and control, investment decision making when market valuation cannot be used as a criterion, and sources of funds for nonprofit organizations. Cases are used. Mr. Eteman

231C Working Capital Management. Lecture, three hours. Prerequisite: course 230. More detailed advanced coverage of the short-range problems of financial management-current assets, current liabilities, and their interrelationships. Ms. Luna

231E Managing Finance and Financing the Emerging Enterprise. Prerequisites: courses 230, 403, 408, second-year standing. Emphasis on the financial, control, and investment issues confronting rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles which may be appropriate to secure the organizations' money requirements.

232A Security Analysis. Prerequisite: course 230. Primarily a course in stock market investing, but approach applicable to all investment assets. Techniques of security analysis and security valuation based on financial statements of the organization. Mr. Mayers, Mr. Roll

232B Portfolio Management. Prerequisite: course 230. Focus on entire portfolios rather than individual assets. Emphasis on portfolio construction and selection of stocks through the use of traditional decision making and the evaluation of achieved portfolio performance. Case studies of portfolio construction. Mr. Grinblatt, Mr. Roll

232D Option Markets. Prerequisite: course 230. The organization and role of option markets, arbitrage and hedging relationships, the valuation of options, the implementation of option trading strategies, the perspective of corporate securities analysts, the function of options in securities markets, and innovations in option markets. Students learn fundamentals of hedging and spreading by playing an option trading game and writing a term paper analyzing their trading strategies. Mr. Geske
233A. Money and Capital Markets. Prerequisite: course 230. Application of interest theory and flow funds analysis to the price determination process in the markets for bonds, mortgages, stocks, and other financial instruments. Analysis of costs of capital in individual industries. Mr. Cornell, Mr. Masulis, Mr. Roll.

233B. Financial Institutions. Prerequisites: courses 230, 233A. Study of the financial policies and practices of commercial banks, savings and loan associations, pension funds, insurance companies, and other major financial institutions. Review of current major problems facing senior managers of these financial institutions.

Mr. Andersen, Mr. Masulis, Mr. Roll.

233C. Speculative Markets. Prerequisite: course 230. Study of the theory and evidence of capital market efficiency, including the stock market, the bond market, commodity future markets, the options market, money markets, and foreign exchange markets.

Mr. Copeland, Mr. Hirshleifer.

234A. Multinational Business Finance. Lecture, three hours. Prerequisites: course 408 and either course 305A or consent of instructor. Study of management of multinational businesses. The international venture and financial techniques for the daily operation of a multinational firm.

Mr. Eteman.

234B. Advanced Studies in International Finance. Prerequisite: course 234A. Study of current and important issues of international financial management. Major focus on the interrelation of advanced theoretical concepts and their implications for the business firm and its international financial management decisions.

235A. Problems in Insurance Management. Discussion, three hours. Prerequisite: consent of instructor. Advanced consideration of the problems of insurance management, with emphasis on the role of the underwriter in investment, marketing, and regulatory problems related to insurance activities.

Mr. Hofflander.

235B. Risk and Risk Bearing. Lecture, three hours. Prerequisite: consent of instructor. Advanced consideration of the theory of risk and risk bearing. The analysis of alternative ways of meeting risk and uncertainty, the scope and limits of insurance, and the economics of insurance.

Mr. Hofflander.

236. Special Topics in Finance. Prerequisites: course 230 or consent of instructor. Intended for master's students. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change.

239A. Theory of Exchange under Uncertainty. Prerequisite: consent of instructor. Foundations of the theory of exchange developed as an introduction to theoretical literature on the pricing of capital assets. Primarily intended for Ph.D. students, but well-prepared master's students may find the course useful in their career preparation.

Mr. Geske.

239B. Theory of Investment under Uncertainty. Prerequisites: courses 230 and 239A, or consent of instructor. Foundations of theory of firm capitalization and investment decisions, with special attention to questions of exchange and allocative efficiency. Primarily intended for Ph.D. students, but well-prepared master's students may find the course useful in their career preparation.

Mr. Mayers.

239C. Empirical Research in Finance. Prerequisites: course 230, training in econometrics, consent of instructor. In-depth study of empirical research in the field of finance, with emphasis on market efficiency, capital asset pricing, and option pricing. Primarily intended for Ph.D. students, but well-prepared master's students may find the course useful in their career preparation.

Mr. Roll.

239D. Ph.D. Seminar in Finance. Prerequisites: course 230, courses in the 239 series. Intended for Ph.D. students. Advanced topics in finance theory and empirical research. May be repeated for credit with instructor change.

239X-239Y-239Z. Finance Workshop (1 unit, 1 unit, 2 units). Discussion, 90 minutes. Prerequisite: doctoral standing. Designed to develop an ability to critically evaluate finance research. Papers presented and discussed in class. Active participation and intellectual interchange encouraged through discussion of the papers in sessions prior to the workshop, as well as during the colloquium. May be repeated for credit. S/U grading.

240A. The Operating Manager. Definition and analysis of problems of production planning, inventory management, quality control, system design, and implementation from the operating manager's perspective, primarily through case studies. Course is integrative in nature, rather than one of developing new methodologies and techniques.

Mr. Buffa, Mr. Chambers.

240B. Operations Planning, Scheduling, and Control. Prerequisite: course 407 or consent of instructor. Forecasting, inventory planning, aggregate planning, job-shop scheduling models, and automated manufacturing systems, with emphasis on managerial relevance. Examples of the models in solving or providing insights into real-world problems.

Mr. Chambers, Mr. Nelson.

240C. Design of Operational Systems. Prerequisites: courses 407, objectives, and criteria in the determination of the capabilities, characteristics, and configurations of manufacturing and service systems. Examination of analytic and synthesizing methodologies for the selection of capacity, location, technology, processes, material movement and storage systems, facilities, work group structures, and jobs.

Mr. Andrews.

240D. Operations Strategy and Policy. (Formerly numbered 244A.) Discussion, three hours. Definition and scope of operations strategy and its relation to corporate strategy, importance of productivity and its amplification in global competition, positioning the system to match market requirements, capacity decisions, product and process technology, the workforce and job design, strategic implications of operating decisions, suppliers and vertical integration. Case analyses involving strategic issues in manufacturing and nonmanufacturing situations.

Mr. Buffa.

241A. Managing Technology for Competitive Advantage. (Formerly numbered 241.) Advanced technologies such as robotics, computer-integrated manufacturing, computer-aided design and manufacturing (CAD/CAM), and flexible manufacturing systems. Effects of technological innovation on operations managers at both the strategic and operational levels. Course is integrative in nature.

Mr. Shirley.

241B. Project Management. (Formerly numbered 243A.) Course 407 or equivalent. Management of development projects. Decision-making environment, economic analysis, network analysis, scheduling, and control of development projects. Sequential and aggregate development decisions.

Mr. Yost.

242A. Models for Operations Planning, Scheduling, and Control. (Not the same as course 242A) Prerequisite: course 407 or consent of instructor. Survey of research studies and recent literature in operations planning, scheduling, and control. Emphasis throughout on formal models and their applications. Aggregate planning, work force scheduling, inventory management, and detailed operations scheduling and control.

Mr. Chambers, Mr. Nelson.

242B. Models for Operations Systems Design. Prerequisites: doctoral standing. Survey of research literature on models for the design of manufacturing and service systems, including long-range forecasting, operational economies, capacity, location, facilities, processes/technology work, and work structures.

Mr. Andrews, Mr. Eisenkotter.

243A. Planning for Facilities Systems. (Formerly numbered 242A.) Prerequisite: course 212A or equivalent. Planning of location, expansion, and replacement for interdependent systems of facilities. Examination of spatial and dynamic economic considerations. Applications in selected industries and public systems.

Mr. Erlenkotter.

243B. Inventory Theory. Prerequisite: course 210B or consent of instructor. General discussion of inventory models, with emphasis on characterization and form of optimal policies and efficient computational methods. Consideration of deterministic, stochastic, discrete, and continuous-time models.

Mr. Tang.

243C. Scheduling Models for Intermittent Systems. Prerequisite: course 407. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent heuristic approaches, current research in coordinated interaction of computer models, and man-machine interaction.

Mr. Nelson.

243X-243Y-243Z. Production and Operations Management Seminar (1 unit, 1 unit, 2 units). (Formerly numbered 243-243X-243Y-243Z.) Discussion, three hours. Prerequisite: doctoral standing. Required of all students in the production and operations management concentration during the first two years of their Ph.D. work. Student and faculty presentations of ongoing research. May be repeated for credit.

Mr. Sarin, Mr. Shirley.

244. Research in Production and Operations Management. (Formerly numbered 245B-245C). Studies of advanced subjects of current interest in operational management. Emphasis on recent developments and the application of specialized knowledge to operational problems. Topics vary each quarter. May be repeated for credit with topic change.

Mr. Sarin, Mr. Shirley.

245. Special Topics in Operations Management. (Formerly numbered 245A.) Studies of advanced subjects of current interest in operational management. Emphasis on recent developments and the application of specialized knowledge to operational problems. Topics vary each quarter. May be repeated for credit with topic change.

246A. Strategy/Policy Analysis and Formulation in the Public and Private Nonprofit Sectors. Prerequisite: doctoral standing. Normally taken in the first and second years of doctoral study. Survey of the research literature in production and operations management. Seminar reports dealing with special topics. May be repeated for credit with topic change.

Mr. Sarin, Mr. Shirley.

246B. Budgeting and Resource Allocations in the Public Sector. Prerequisites: courses 403 and 408, or consent of instructor. Resource allocation objectives/techniques used in federal, state, and local government. Budget analyzed as a planning device, vehicle for allocational decision making, financial control mechanism, crucible for political choice. Provides seminar (courses 246A-246B) credit for those responsible for resource allocation.

246C. Management in the Public and Private Nonprofit Sectors. (Formerly numbered 292D.) Prerequisite: doctoral standing. Examination of the roles and management systems of the three sectors of the U.S. society: public, nonprofit, and managerial issues of public and private nonprofit organizations and their political, social, and technical environments. Financial, marketing, and operational considerations and strategic analyses, organizational, control, and ethical issues of service delivery systems.
247A. Role of Management in Artistic Decision Making. (Formerly numbered 272.) Prerequisite: consent of instructor. A descriptive study of the criteria for decision making in artistic institutions, including the role of the institution in society, the economic environment of the arts, and the artistic value systems of arts organizations.

247C. Legal Environment of Arts Management. (Formerly numbered 271.) Prerequisite: consent of instructor. Exploration of the way in which law and the arts relate, the role of the lawyer vis-à-vis artist and arts manager, policy underpinnings of the law and effect on the arts, and unsolved problems and issues in areas of interaction.

249A. Special Topics in Public and Private Nonprofit Management. (Formerly numbered 248.) Prerequisite: consent of instructor. Tutorials will be given in areas of recent developments and the application of specialized knowledge to public/not-for-profit management. Topics vary each quarter. May be repeated for credit with topic change.

249B. Special Topics in Arts Management. (Formerly numbered 274.) Prerequisite: consent of instructor. Examination of current issues in the management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

250A. Labor Relations: Process and Law. Prerequisite: graduate standing. Consideration, at an advanced level, of the collective bargaining process, the labor-management agreement, the administration of the contract, the law of labor-management relations, union structure and goals, and the influence of external labor markets on labor relations.

250B. Human Resource Management: Process and Law. Prerequisite: course 250A. A systematic study of the way in which labor and management influence each other in determining wages, working conditions, and overall labor-management relationships, with emphasis on understanding actual agreements and addressing problems.

250C. Behavioral Foundations of Human Resource Management. Prerequisite: course 250B or consent of instructor. Topics include development and training; human resource accounting; behavioral foundations of participating management; motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

251. Managing Human Resources. The management of people in organizations, intended for managers as well as personnel specialists. Organized at three related but distinct levels of analysis: (1) the day-to-day utilization of people as organizational resources to achieve optimal productivity, satisfaction, retention, and development; (2) the personnel management function or system that provides specialized human resources; and (3) the issues facing top management which involve the management of human resources, including strategic planning for human resources, management of labor-management relations, and design of corporate culture.

252. Systems of Employee-Management Participation. Prerequisite: course 250B or consent of instructor. Emphasis on development of systems of employee-management participation around the world (apart from traditional collective bargaining systems). Specific content may vary from year to year. Topics may include the role of management, industrial democracy, joint consultation, workers' councils, profit-sharing.

253. Employee Discipline, Discharge, and Grievance-Appeal Settlement. Prerequisite: graduate standing. Analysis of conflict in the employment relationship: theoretical and empirical findings. Principles and philosophies that underlie resolution of labor-management impasses, with emphasis on grievance procedures, arbitration, mediation, and fact-finding.

254. Analysis of Labor Markets. Prerequisite: consent of instructor. Problems of verifying hypotheses concerning labor market behavior and the application of data to managerial problems. Solutions for operationally defining labor market concepts. Critical evaluation of available labor market data. Case studies applying these data to managerial problems.

255. Comparative Industrial Relations. Prerequisite: course 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of industrial relations systems. Focus on the development and economic environments. The institutions, philosophies, and ideologies of labor, management, and government, and the interaction of their power relationships, the substance and manner of determination of "web of rules" governing the rights and obligations of the parties, and the resolution of conflicts.

256. Seminar in Human Resource Management and Industrial Relations. Discussion, three hours. Prerequisites: courses 250A, 250B, 250C. Capstone seminar for students interested in human resource management and industrial relations. Visiting lecturers emphasize recent developments in the field; students prepare seminar papers.

257. Labor-Management Relations in Public and Nonprofit Sectors. Prerequisite: graduate standing. Analysis of labor-management relations in government, including public education, and in nonprofit institutions (i.e., artistic, cultural, recreational, and health care). Emphasis on negotiations and group relationships rather than on public personnel administration.

258. Selected Topics in Industrial Relations (1 to 4 units). Prerequisite: doctoral standing or consent of instructor. An examination in depth of problems or issues of current concern in industrial relations. Emphasis on recent contributions to theory, research, and methodology. Special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

259A. Employment Planning and Evaluation. Lecture, three hours. Prerequisite: course 254. Development of programs and practices to meet the human resource needs of organizations, including staffing, training, management development, career progression, and evaluation.

259B. Equal Employment Opportunity Management. Lecture, three hours. Prerequisite: course 254. The development and administration of programs to provide equal employment opportunities in employing organizations. Current statutory and case law and administrative agency requirements.

260A. Advanced Marketing Management. Prerequisite: course 411 or consent of instructor. A decision-oriented approach to the solution of product, price, promotion, and distribution channel problems. Extensive use of case studies.

260B. Marketing Strategy and Planning. Prerequisite: course 260A or consent of instructor. An examination of the framework of strategic marketing planning. The analysis of a few, yet powerful, conceptual frameworks which have broad application. Within the framework, the strategies of marketing planning development, and management of key elements in the annual marketing planning process.

261A. Management in the Distribution Channel. Prerequisite: course 260A or consent of instructor. An examination of the operation of distribution channel systems, the issues of power in the distribution channel and the trade-offs between alternative channel systems.

261B. International Marketing Management. Prerequisite: course 260A or consent of instructor. Opportunities and risks of international trade, and emerging trends in foreign markets, including an exploration of alternative methods and strategies; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

262. Price Policies. Prerequisite: course 260A or consent of instructor. Consideration of such concepts as marginal analysis, measuring and predicting the forces of costs, as they apply to price making. The theory of price leadership, geographical pricing, price discrimination, price warfare, and leader pricing studied in relation to the process of pricing in a market. In addition, attention to the price policies of individual firms in which these concepts are applicable.

263A. Consumer Behavior. Prerequisite: course 411 or consent of instructor. A study of the nature and determinants of consumer behavior. Emphasis on the influence of sociopsychological factors such as personality, small groups, demographic variables, social class, and culture on the formation of consumers' attitudes, consumption, and purchasing behavior.

263B. Theory of Marketing Stimulation. Prerequisite: course 263A. Analysis of factors influencing consumer demand. Techniques for stimulating demand evaluated in relation to specific marketing objectives. Material from economics, psychology, sociology, anthropology, and marketing research.

264A. Marketing Research: Design and Evaluation. Prerequisite: course 411 or consent of instructor. Focus is on methods of measuring and predicting the forces affecting marketing, including quantitative aspects of demand, consumer reaction to product characteristics, effectiveness of advertising and other promotional devices, influence of organizational systems on sales efficiency, and effectiveness of competitors' strategies.

264B. Mathematical Models in Marketing. Prerequisite: course 260A or equivalent or consent of instructor. A study of the utilization of models for the solution of marketing problems. Discussion on models concerned with such problems as brand switching, media selection, pricing, competitive strategy, scheduling, allocation problems, and waiting time.

264C. Seminar in Multidimensional Scaling. Prerequisite: consent of instructor. A seminar providing for the study of recent developments in metric and nonmetric multidimensional scaling.

265A. Marketing and the Law. Prerequisite: course 260A or consent of instructor. A detailed study of the legal implications of the legislative enactments (federal, state, or local) which influence the operation of institutions engaged in marketing activities, together with an analysis of the judicial decisions which have interpreted these laws.

265B. Social Issues in Marketing. Prerequisite: course 260A or consent of instructor. Environmental impact of marketing in society; study of theories, methods, and relationships for evaluating transaction behavior in a scientific and humanistic context; macroanalytic perspectives in marketing.
26A. Product Management. Prerequisite: course 260A. Development of a framework for identifying and appraising alternative growth strategies of the firm. Product addition, modification, and deletion decisions, and the processes by which these decisions can be made in an optimal manner.

Mr. Curtin, Mr. Meyer

26B. Advertising Policy. Prerequisites: courses 260A and 263A, or consent of instructor. A study of the formulation of advertising policies. Includes an analysis of cases dealing with the role of advertising in marketing, the definition of advertising objectives, strategy, appropriation policy, media selection, evaluating advertising results, and the organization of the advertising function.

Mr. Nakamoto

26C. Sales Force Management. Prerequisite: course 411 or consent of instructor. Development of a logical framework for the solution of problems in sales force management. The role of selling in the marketing mix, the selling interaction, and key problems in planning, organizing, evaluating, and controlling the sales force.

26D. Methodological Issues in Research on People. Prerequisite: consent of instructor. A systematic approach to the special issues concerning research on people; criteria for evaluating macro-methodologies; development of scientific concepts, models, theories, and laws; and the relation of private report, and the question of data language.

26E. Selected Topics in Marketing. Prerequisite: course 250A or consent of instructor. A study of selected areas of marketing knowledge and thought. Specific areas may vary depending on the particular interests of the instructor and students. Individual projects and reports. May be repeated for credit.

27A. Theory in Marketing. Prerequisite: consent of instructor. Serves as a mechanism to introduce students to the development of marketing thought. Issues pertaining to the general topic of theory development and testing. Prepares students for conducting theoretically grounded research in marketing.

Mr. Nakamoto

27B. Research in Marketing Management. Prerequisite: consent of instructor. Intended for Ph.D. students. Study of research issues associated with marketing management decisions. Recent research in the areas of strategic marketing, marketing segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues.

Mr. Hanssens, Ms. Scott

27C. Quantitative Research in Marketing. Prerequisite: consent of instructor. Intended for Ph.D. students in management and related fields. Students are assumed to have a good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and computer graphics. Review of a range of quantitative models as applied in marketing research.

Mr. Curtin, Mr. Hanssens, Ms. Kahn, Mr. Meyer

27D. Behavioral Research in Marketing. Prerequisite: consent of instructor. Empirical research in consumer behavior surveyed and critically evaluated from theoretical as well as practical perspectives. Intended for Ph.D. students who will be conducting research in consumer behavior or related areas.

Mr. Kasarjian, Ms. Meyers-Levy, Mr. Nakamoto, Ms. Scott

27E. Special Research Topics in Marketing. Prerequisite: doctoral standing. Advanced selected topics in marketing, with emphasis on the theoretical examination of one or two topics in current research and theory. May be repeated for credit.

269X-295Y-296Z. Workshop in Marketing (1 unit, 1 unit, 2 units). Prerequisite: doctoral standing. Required of all students during the first two years of their Ph.D. work. Series consists of a number of leading scholars and professionals who make presentations to marketing faculty and Ph.D. students. Active participation and intellectual interchange, which helps students gain a richer perspective on the field of marketing. In Progress grading.

270A. Information Systems Applications. (Formerly numbered 225A.) Prerequisite: course 404. Basic concepts and uses of information systems in organizations. Use of information technology in support of individual decision making and organizational decision making. Description of types of applications (e.g., functional, strategic). Evaluation of systems. Analysis of their impacts.

Ms. Markus, Mr. Swanson

270B. Information Systems for Planning and Control. (Formerly numbered 225B.) Prerequisites: courses 403 and 404, or consent of instructor. Design of systems to support management planning and control. Approaches and techniques employed at the strategic, managerial, and operational levels. Special consideration of accounting and budgeting methods. Impact of planning and control information on human behavior.

Mr. McDonough, Mr. Silver, Mr. Swanson

270C. Measurement in Information Systems. (Formerly numbered 225C.) Prerequisite: course 404. The role of measurement in management information and decision support systems. The logic and techniques of measurement. Application to the individual, organizational, and societal performance.

Mr. Swanson

270D. Simulation for Management. (Formerly numbered 224E.) Discussion, three hours. Prerequisites: knowledge of computer programming and basic statistics, consent of instructor. The design, implementation, and use of discrete-event simulation models using a general purpose simulation language (e.g., SIMSCRIPT). Emphasis on the managerial use of simulation and the presentation of results (e.g., statistical analysis, graphics, animation). Extensive programming assignments.

270E. Expert Systems for Management. Prerequisite: second-year M.B.A. or doctoral standing or consent of instructor. Examination of expert systems for management, including rule and frame-based systems, certain and uncertain inference, expert system features; and database management systems, current applications. Project that develops an expert system required.

Mr. Sprowls

271A. Information Systems Technology. (Formerly numbered 224A.) Discussion, three hours. Prerequisite: course 404. Discussion of hardware, software, telecommunications, and data base technology. The specification and configuration of computer-based systems for management applications. Methods for costing computer hardware and software and for assessing computer performance. Trade-off analysis of comparative computer configurations.

Mr. Frank, Mr. Lientz

271B. On-Line and Network-Based Systems. (Formerly numbered 224F.) Discussion, three hours. Prerequisite: course 404. Overview of computer networks, networked microcomputer systems. Data communication technology. Data security in computer networks. Cost/benefit analysis of on-line and computer networks. Applications to computer utilities; command and control systems; and commercial, medical, and governmental sites. Use of a systems approach to prepare feasibility studies or to estimate the potential benefits of a particular system.

Mr. Frank, Mr. Lientz

271C. Data Base Management Systems. (Formerly numbered 224D.) Discussion, three hours. Prerequisites: courses 271A and 272A, or consent of instructor. Distributed processing. Networked microcomputer systems. Data communication technology. Data security in computer networks. Cost/benefit analysis of on-line and computer networks. Applications to computer utilities; command and control systems; and commercial, medical, and governmental sites. Use of a systems approach to prepare feasibility studies or to estimate the potential benefits of a particular system.

Mr. Frank, Mr. Lientz

272A. Information Systems Development. (Formerly numbered 224C.) Discussion, three hours. Prerequisite: course 404. Concepts and methodologies of systems analysis to determine user requirements. Overview of data base management systems, with emphasis on the relational model. Project required, using a microcomputer-based CASE tool and related databases.

Mr. Frank, Mr. Sprowls

273A. Information Systems Management. (Formerly numbered 224B.) Discussion, three hours. Prerequisite: course 404. Managing information systems within organizations. Role of chief information officer. Frameworks for understanding the information systems function. Issues related to project management, computer operations, security, end-user computing, distributed and departmental computing, managing information systems professionals, costings of services, organizational structures.

Mr. Leeburg

274A. Special Topics in Information Systems. (Formerly numbered 224G.) Prerequisite: consent of instructor. An examination in depth of issues or problems concerned with the theory and practice of computing and the management and use of information systems. Course may have a single theme or may deal with a number of topics. May be repeated for credit.

274B. Frontiers in Information Systems. (Formerly numbered 225D.) Prerequisite: doctoral standing or consent of instructor. An examination in depth of problems or issues of current concern in information systems. Emphasis on recent and future developments in research, and methodology. May be repeated for credit.

Mr. Greenberger

274X-274Y-274Z. Current Research in Information Systems (1 unit, 1 unit, 2 units). (Formerly numbered 225X-225Y-225Z.) Discussion, two hours. Prerequisite: doctoral standing. A year-long sequence associated with the Information Systems Colloquium Series. Regularly scheduled presentations of current research and state-of-the-art developments in the information systems field. Study and discussion of the research presented. May be repeated for credit. S/U grading.

Mr. Swanson

275A. Urban Issues and Problems. Discussion, three hours. Prerequisite: course 175 or consent of instructor. Identification and analysis of emerging issues and problems in turbulent urban environments; land utilization and regulations, transportation, real estate and building industries, mass transit, city size and efficiency, environmental pollution, and related topics. Not offered every year.

Mr. Mittebach

275B. Urban Land Markets. Discussion, three hours. Prerequisite: course 405 or consent of instructor. Development and use of economic and management principles and methods to analyze and project urban land uses and land values; study of demand for and supply of industrial, commercial, retail, recreational, and residential space in the context of urban growth, structure, and change.

Mr. Mittebach

275C. Alternative Urban Futures. Discussion, three hours. Prerequisite: completion of first-year M.B.A. recommended. The course, for the first time, is being offered primarily for students seeking a course that specifically relates real estate analysis to the array of management courses taught at AGSM. Use of case studies to examine various managerial strategies for creating or acquiring and managing private real estate projects intended to respond to anticipated alternative urban futures. Not offered every year.

Mr. Case, Mr. Mittebach

275A. Theory of Urban Property Valuation. Discussion, three hours. Prerequisite: course 408 or equivalent. Use of a systems approach to prepare feasibility and valuation studies which systematically analyze property development strategies. Analysis of the particular social, economic, political, and physical forces which can influence property values. Students encouraged to use computer-based analysis.

Mr. Case, Mr. Mittebach
276B. Comparative and International Urban Land Studies. Discussion, three hours. Analysis of private and public decisions shaping urban growth and change in developed and developing nations. Emphasis on economic, social, and institutional forces influencing urban structure, land-use patterns, growth of jobs, and distribution of jobs and people in the built environment. Not offered every year. Mr. Mittelbach

277A. Housing Market Systems. Discussion, three hours. Prerequisite: consent of instructor. Concepts, models, and methods to study and forecast local, regional, and national housing markets; consumer and investor behavior; residential land development and building; primary and secondary residential mortgage markets; private and public forces influencing housing costs and prices. Mr. Case, Mr. Mittelbach

277B. Housing Policy. Discussion, three hours. Prerequisite: consent of instructor. Alternate housing strategies, policies, and programs; housing for low and moderate income groups; urban renewal; community services to improve housing environment; stimulating innovation and efficiency in production, distribution, and delivery of residential capital and housing services; the roles of private enterprise. Mr. Case, Mr. Mittelbach

278A. Urban Real Estate Financing and Investing. Discussion, three hours. Prerequisite: consent of instructor. An investor-oriented course in which real estate and business trends are evaluated to determine alternative investment opportunities. Use of current financial, economic, and investment theories and techniques to evaluate investment opportunities in case studies and short case problems to illustrate the development of investment strategies. Mr. Case, Mr. Mittelbach

278B. Sources, Uses, and Flows of Real Estate Capital. Discussion, three hours. Analysis of money, capital, and mortgage markets to determine the potential availability and costs of mortgage money from alternative sources. Evaluation of various sources of funds to determine factors influencing the decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions. Mr. Case, Mr. Mittelbach

279A. Special Studies in Urban Land Economics. Limited to master’s or Ph.D. candidates working on thesis- or dissertation-related research. May be repeated for credit. Mr. Case

279B. Selected Topics in Urban Land Economics. Discussion, laboratory, and fieldwork. Prerequisite: second course in urban land economics or consent of instructor. A case-oriented approach that provides students with the tools and techniques to become involved in real estate investment, development, and analysis relevant to the study of urban land economics. May be repeated for credit. Mr. Case

280A. Important Studies in Human Systems. Prerequisite: doctoral standing or consent of instructor. Survey of seminal studies in human systems. Summarization and critique of selected contributions to the evolution and current status of the field. Review of such topics as personality, motivation, group and intergroup behavior, systems theory, and organizational design and development. Mr. Massarik

280B. Survey of Research Philosophies and Methods. Prerequisite: doctoral standing or consent of instructor. A broad introduction to objectivist and subjectivist philosophies of science, and the psychological and sociological sciences. Critique of laboratory and field experiments; field studies, analytical and descriptive methods; interview, participant observation, questionnaire, and unobtrusive methods of data collection. Mr. Massarik

280C. Personal and Professional Development. Prerequisite: doctoral standing or consent of instructor. Provides a setting where students may explore their own professional values in the process of testing and evaluating the values and standards important in the human systems Ph.D. program and held by the wider community of system researchers and interveners. Mr. Culbert

280D. Research Design for Human Systems Studies. Prerequisite: course 280A or 280C or consent of instructor. Temporal and logical sequences in the process of designing studies of human systems, including optimizing the fit of research topic, observation, and data collection methods and data analysis techniques. Active involves students in the preparation of research proposals. Mr. Case

280E. Tutorial in Human Systems Research. Prerequisite: consent of instructor. Provides an opportunity for students to offer and receive constructive comment on the design, data analysis, and writing of their Ph.D. research papers. Mr. Massarik

280F. Human Systems Research Seminar. Prerequisite: course 280D or consent of instructor. Exploration of various research methods and problems encountered in applying them. Students are actively involved in seminar reports and in class critique of current human systems research designs. May be repeated for credit. Mr. Boje

281A. Sociotechnical Systems. Prerequisite: graduate standing. Introduction to systems concepts and view of work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus on developing the sociotechnical systems analytic approach and understanding the advantages of this approach for designing and managing organizations. Mr. Davis

281B. People in Organizations. Prerequisite: graduate standing. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior in organizational implications of individual, group, and social behavior. Special attention to knowledge about satisfaction motivation and productivity in organizations. Mr. Case

281C. Situational Factors in Management. Prerequisite: graduate standing. Application of a situational, contingency, or "it all depends" perspective to important managerial issues such as personality, motivation, leadership, and differentiation/integration models. Mr. Lasko

281D. Sensitivity Training Groups and Their Facilitation. Prerequisite: consent of instructor through prior application to the department. Development of cognitive and experiential understanding of the dynamics of sensitivity training groups and their facilitation. Relevant theory, research findings, and case studies; translation of these inputs into practice. Mr. Tannenbaum

282A. Situational Factors in Management. Prerequisite: doctoral standing or consent of instructor. Development of diagnostic way of thinking that is fundamental to managerial effectiveness in diverse organizational situations. Mr. Davis

282B. Task Group Processes. Prerequisite: course 281A or 281B or consent of instructor. The structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on an understanding of how group activities interact with the physical/technical environment. Imparts a practical knowledge of task group functioning through class exercises and field observations. Mr. Culbert

283A. Environmental Settings of Sociotechnical Systems. Prerequisite: course 281A or consent of instructor. The complex of content and context of the environments in which organizations operate. Analysis of environments along sociocultural, political, and economic dimensions, their interrelationships, and their relations to technology. Mr. Davis

284A. Organization Design. Prerequisite: course 281A or consent of instructor. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Development of specific methods ranging from the micro design of jobs to the macrodesign of total organizational structures. Special emphasis on sociotechnical and differentiation in integration models. Mr. Davis

285A. Managerial Interpersonal Communication. Prerequisite: M.B.A. standing or consent of instructor. Concepts of organizational, interpersonal, and personality factors affecting managerial communications. Styles and modes of communication in one-to-one, group, and indirect communication settings. Opportunities offered to deepen understanding of one's own communication styles and skills. Mr. McDonough

287. Sensitivity Training Groups and Their Facilitation. Prerequisite: consent of instructor through prior application to the department. Development of cognitive and experiential understanding of the dynamics of sensitivity training groups and their facilitation. Relevant theory, research findings, and case studies; translation of these inputs into practice. Mr. Tannenbaum

288A. Selected Topics in Behavioral Science. Prerequisite: M.B.A. standing or consent of instructor. Examination in depth of problems or issues of current concern in managing organizational behavior. Emphasis on recent theories, research findings, and professional applications of special interest to M.B.A. students and faculty. May be repeated for credit. Mr. Davis

288B. Selected Topics in Behavioral Science. Prerequisite: M.B.A. standing or consent of instructor. Theories and mechanisms of change in organizations and impact on effectiveness and productivity. Philosophies and theories of human behavior fundamental to the study of individual, group, organizational, and cultural behavior. Exploration of depth of selected sociotechnical systems and consulting behavioral science knowledge and applications. May be repeated for credit. Mr. Tannenbaum

288C. Current Issues in Sociotechnical Systems and Organization Design. Prerequisite: doctoral standing or consent of instructor. Current topics in the analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe and the U.S. In-depth comparisons of selected job and organizational design approaches. May be repeated for credit. Mr. Davis

289. Current Issues in Human Systems Change and Development through Consulting. Prerequisite: doctoral standing or consent of instructor. Current topics in the analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe and the U.S. In-depth comparisons of selected job and organizational design approaches. May be repeated for credit. Mr. Davis
288E. Selected Topics in Organization Theory. Prerequisite: doctoral standing or consent of instructor. In-depth treatment of organizations as units of analysis. Emphasis on recent theoretical and empirical development, methodological issues arising from research, and concepts of organization structure, process, and effectiveness. May be repeated for credit.

288F. Selected Topics in Organizational Behavior. Prerequisite: doctoral standing or consent of instructor. Psychological and social psychological aspects of human behavior and performance in organizations. Theoretical models, empirical findings, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit.

288G. Current Issues in Human Systems Studies. Prerequisite: doctoral standing or consent of instructor. In-depth study of theory and research pertaining to a particular subject matter or such topics as cross-cultural, organization change, action, and multivariate research, depending on student and faculty interest. May be repeated for credit.

288X-288Y. Behavioral and Organizational Sciences Workshop (1 unit, 1 unit, 2 units). Discussion, two hours. Prerequisite: doctoral standing. Designed to expose Ph.D. students to the research within the field while at the same time requiring that each Ph.D. student develop a critical framework for evaluating and integrating recent research. May be repeated for credit. S/U grading. Mr. Massarik

290. Organization Theory. Prerequisite: course 423 or consent of instructor. Analysis of the theory and practice of the managerial function of organizing through study of the literature, case analyses, and seminar discussion. Individual projects and reports.

Mr. McKelvey

291. Planning and Control. Prerequisite: course 423 or consent of instructor. Analysis of the theory and practice of the managerial function of planning and control. The implementation of objectives through policy formulation, decision making, and control. Individual projects and reports.

Mr. Carrabino, Mr. Steiner

292A. Research and Development Policy. Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; research planning and organizational goals; assessing of forecasting technological futures.

Mr. Goodman

292B. Models of Organization Behavior. Prerequisite: consent of instructor. Theoretical frameworks for developing explanatory and predictive models of complex organizations. Exercises in constructing formal models, usually in mathematical or stochastic form and, where appropriate, using materials from field studies. May be repeated for credit. S/U grading. May be used to discover implications for the systems changes recommended in the sociotechnical field study.

292C. Comprehensive Planning in the Public Sector. Prerequisite: consent of instructor. Evolving modes of planning under complexity, with particular emphasis on the public sector. Development of policy through standard setting, bargaining, and regulating government. Emphasis on the development of plans that define goals and values in organization, societal, and technological forecasting.

293. Political Environment of American Business. Prerequisite: consent of instructor. An evaluation of certain current issues concerning the impact on business of national, international, and political systems. Designed to provide a clearer understanding of the principal features of American politics, especially as they influence the business enterprise.

Mr. Wilson (W)

294A. Strategy Formulation and Implementation. Prerequisite: consent of instructor. Case course dealing with strategy decisions and their implementation, executive action, and administrative behavior involving strategies. Student should be confronted with complex company situations to develop ideas essential to overall managerial direction.

294B. Environmental Impacts on Management. Prerequisite: consent of instructor. Examination of how environmental forces affect management. Consumer organizational managers might respond to external environmental problems. Methods studied for developing and evaluating alternative managerial solutions; the methods that permit organization assistance in improving current and future environmental quality.

295A. Entrepreneurship and Venture Initiation. Prerequisite: consent of instructor. An exploration in entrepreneurship particularly concerned with the formation and operation of new business ventures. Significant and crucial aspects of exploring new business opportunities and starting a business.

Mr. Schollihammer

295B. Small Business Management. Prerequisite: consent of instructor. Exploration of crucial aspects in managing small business enterprises. Emphasis on the identification and analysis of characteristic operating problems of small firms and the application of appropriate management principles and techniques.

Mr. Schollihammer

295C. Corporate Entrepreneurship. Prerequisite: consent of instructor. An inquiry into the nature of entrepreneurship and the effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial strategies aiming at the identification, development, and exploitation of technical and organizational innovations, the management of new product or process development, and effective new venture management in a corporate context.

Mr. Schollihammer

296A. International Business Management. Discussion, three hours. Prerequisite: course 205A or consent of instructor. Identification, analysis, and resolution of managerial issues of policy and action within the context of a multinational corporation, with emphasis on problems of adaptation to different sociocultural, political, and economic environmental characteristics on planning, the structuring of organizational relationships, coordination and control in multinational firms.

Mr. Schollihammer

296B. International Comparative Management Research. Prerequisite: doctoral standing or consent of instructor. In-depth study of theory and research pertaining to international business and comparative management. Emphasis on recent research developments and methodological issues. Imparts knowledge on the design and the conduct of international/comparative management research.

Mr. Mason

297A. Comparative and International Management. Prerequisite: consent of instructor. A comparative study of the practice of management in selected foreign countries, as affected by their social environments and the development of management theory.

297B. International Business Policy. Prerequisites: course 205A, consent of instructor. Analysis of key managerial problems encountered in a multinational corporation. Concepts and theories acquired in other courses in international business and comparative management, applied to a series of complex cases and simulations of international business operations.

297C. International Business Law. Prerequisites: course 205A, consent of instructor. An introduction to the international business operates; overseas business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; pat- ents, trademarks, and the management of international business disputes; expropriation of foreign investments; international business and government relations.

297D. International Business Negotiations. Prerequisite: course 296A. Exploration of international business negotiations of multinational enterprises with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/dissolution of joint ventures, extent of foreign ownership/management control, terms/conditions for technology transfer, investment incentives.
111. Elements of Marketing. Principles of market-driven managerial decision making: the definition of target markets, assessment of consumer needs, demand forecasting, market segmentation, and customer analysis. Applications include the marketing function: product and pricing decisions, channels of distribution, sales force, and advertising.

142. Management of Organizations. Prerequisite: graduate standing. Integrative approach to theory and practical application of complex organizational processes, emphasizing managerial roles in designing organizational structures, creating and maintaining planning, control, information, incentive systems, different patterns of human interaction such systems and trends to produce. Mr. Barney, Mr. Mckelvey, Mr. Spender

413A. Programming for Management Applications. Prerequisite: graduate standing. Building management application systems. Programming in a high-level procedural language. Software specification, design, coding, testing, implementation, and maintenance. Extensive programming assignments.

414. Managerial Problem Solving: Individual. (Formerly numbered 440.) Prerequisite: graduate standing. Study and practice of individual decision making and problem solving, including the impacts of personality, motivation, interpersonal communication, and various decision-making techniques. The relationships among the individual, managerial roles, and complex organizations as they influence the managerial process.

420. Management Policy. Prerequisite: course 412. Evaluation and formulation of organization's overall policies and strategies. Economic, heuristic, and social process approaches to policy formulation, environmental analysis, and organizational appraisal. Senior management's role in managing the policy process. Mr. Barney, Mr. Mason, Mr. Rumelt

422. Analysis and Communications. Discussion, three hours. Prerequisite: graduate standing. Study and practice of oral and written management communications, including audience analysis, persuasion, revising and editing, presentation of technical information, and uses of computer technology. Organized and developing speaking exercises. Personal attention to students' written communications and oral presentations.

423. Advanced Management Theory. Advanced study of management theory in formally organized enterprise through significant readings; discussion of advanced approaches and techniques developed from applying theory; use of theory to integrate methods and findings of quantitative and behavioral sciences in management education and training. Mr. Bainga

441. Managerial Problem Solving: Complex Systems. Prerequisite: course 414. Study of organizational and interorganizational problem solving, including identification, formation, data collection, forecasting, assumption testing, solution methods, implementation, evaluation, control, and dealing with conflict and ambiguity. Organization of projects in which problem solving is experienced at various levels of complexity.

444A-444B. Management Field Study. Must be taken in two consecutive quarters in the second year (or its equivalent) for part-time students. Supervised study of selected assignments as an extension of client consultant relationship, identification of problem or strategic question, design of study, collection and analysis of data, development and reporting of implementable recommendations. In Progress grading (credit to be given only on completion of course 444B).

450. Fieldwork in Behavioral Science Management Development (4 or 8 units). Prerequisites: course 287, consent of instructor. Supervised practical fieldwork in all phases of laboratory education for management development, such as sensitivity training laboratories, creativity and personal growth laboratories, simulated managerial behavior laboratories, etc.

451. Fieldwork in Organizational Development (2 to 12 units). Prerequisite: course 284B or 450 or consent of instructor. Supervised practical fieldwork in organizational development consultation in interpersonal, group, intergroup, total organization, and interorganizational settings.

452. Fieldwork in Technical Assistance for Minority Business Enterprise (1 to 4 units). Prerequisite: completion of first year of master's program or consent of instructor. Supervised field experience in business consulting and other forms of technical assistance for business firms and management in ethnic communities; seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.

453. Fieldwork in Arts Management (4 to 12 units). Prerequisite: consent of instructor. Supervised field experience and practical work in all phases of an arts organization (pictorial, performing, or community), concentrating on its managerial problems and its relationship to the community and society in general.

454. Fieldwork in Organizations. Prerequisites: completion of two quarters of the M.B.A. program, consent of the supervising faculty and the director of the M.B.A. program. Supervised, nonpaid practical experience or fieldwork in an organization as an intern or fellow. Execution of predetermined assignment(s) pursuant to a defined program of study which may include formal coursework. May not be repeated for credit.

495. Preparation for Teaching Business and Management. Prerequisites: graduate standing, consent of instructor. Study of problems and methods in the teaching of management. Seminars, workshops, and practice teaching. May not be applied toward the M.B.A., M.S., or Ph.D. degree requirements. S/U grading.

The following individual study or research courses (501 through 599) may be used, within limitations and conditions prescribed by the school, to satisfy minimum higher degree requirements.

501. Cooperative Program (2 to 6 units). Prerequisite: consent of UCLA AGSM graduate adviser and assistant dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596A-596N. Research in Management (1 to 8 units each). Prerequisite: consent of director of master's program or director of Ph.D. program by special permission. Directed individual study or research. May be repeated.

597. Preparation for Qualifying Examinations (4 or 12 units). Prerequisite: consent of master's program or director of Ph.D. program by special petition. Preparation for master's comprehensive examination or Ph.D. qualifying examinations.

598. Thesis Research in Management (4 or 12 units). Prerequisite: consent of director of master's program by special petition. Research for and preparation of master's thesis. May be repeated. S/U grading.

Executive M.B.A. Program

Admission to the Executive M.B.A. program is prerequisite for enrollment in the following courses:

461. Managerial Problem Solving (2 units). Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting the individual's diagnostic and decision-making skills. Use of readings, cases, decision simulations, and discussions to explore the areas of charting job and career progress, working with others, and shaping the work culture. Mr. Ouchi

462. Economic Analysis for Managers. Policy-oriented problems in antitrust, tax securities, and environmental regulation. Concepts of microeconomic theory illustrated. Topics include traditional antitrust regulations, new trends in antitrust, private versus government antitrust, securities regulation, environmental regulations, and a business firm's optimal response to regulation. Mr. Granfield

463. Data Analysis and Management Decisions under Uncertainty. Survey of statistical model building, with emphasis on the managerial interpretation of the statistical summary of data. Classical statistics covered through multiple regression to support the courses in finance and marketing that follow. The fundamental approaches to decision making under uncertainty. Mr. Hanssens

464. Managerial Accounting. Familiarizes the manager with the functions of accounting by focusing on the use of external financial reports for evaluating corporate performance and the use of accounting information for internal planning and control. Mr. Buckley

465. Quantitative Methods for Managers. A survey of modeling approaches to managerial planning and decisions. Emphasis on the ability to recognize situations where models can be used advantageously, to work effectively with model building specialists, and to make good use of models once they have been developed. Mr. Geoffrion

466A-466B. Financial Policy for Managers (4 units, 2 units). Modern financial management deals with decision making under uncertainty for corporate financial management, for portfolio investment decisions, for financial institutions, and for international financial management. Focus on learning sound theoretical tools and applying them in casework. Mr. Copeland, Mr. Cornell

467. Management Issues in Information Systems (2 units). The growing role of information systems in the corporation and how they change ways of doing business. Examples from the airlines, health, computer, communications, distribution, and publishing industries. Strategic, organizational, and societal implications. Mr. Schollhammer

468. Economic Forecasting (2 units). Macroeconomic theory and its application to business forecasting. Major economic indicators and their historical description of the U.S. economy; theoretical tools that business economists use to analyze the impacts of monetary and fiscal policy; macroeconomic techniques applicable to business decisions. Mr. Kimbell

469. Management of Human Resources. An introduction to the major areas of human resource management—personnel management, labor economics, labor law, and labor relations—accomplished by examining some of the major concepts, theories, and research related to each of these topic areas, as well as some of the practical problems for managers posed by each. Mr. Flamholtz

470A. Introduction to Action Research and Policy Analysis (2 units). Provides methods of organizational and strategic analysis to determine the relationship of the organization with its environment. Techniques for action research such as experimental design, survey design, and research methods. Mr. Goodman

470B-470E. Action Research and Policy Analysis Project (2 units, 1 unit, 1 unit, 2 units). Four quarters of supervised study of an organization in relation to complex environmental changes. Competitive and environmental analysis of the organization. Development of an action research project and managerial policy scenarios; examination of their organizational implications; and recommendations for managerial and organizational response to deal with environmental changes. Mr. Raia

472. Marketing Strategy and Policy. Strategic marketing decisions, including the development of marketing objectives and strategies and the implementation of these strategies through pricing, channel, promotion, and new product decisions. Ms. Scott

473. Managerial and Organizational Processes. Development of an understanding of the workings of large, complex organizations, with emphasis on the macroanalytic, rather than on the microanalytic, approach. Mr. Raia

474. Production and Operations: Systems, Strategies, and Policies. Analysis of strategic and operating policies and decisions for systems that produce goods and services in enterprises. Examination of the role of broad-level planning, inventories, scheduling of resources, organization of resources, distribution systems, system location. Comprehensive operating problems. Mr. Sarin

475. International Managerial Policies and Strategies. Study of economic and business decisions in an international context, with emphasis on the formulation and implementation of management strategies in multinational enterprises. Application of concepts of international economic analysis and exploration of international corporate strategies. Mr. Schollhammer

476. Competitive Strategy and Business Policy. The study of the general management task of forging a competitive strategy. Emphasis on the economics of business rivalry within a variety of industrial settings and the implications of changing environments on business strategy. Mr. Rumelt

477. The Manager and Business/Society Relationships. While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, the basic economic structure, and social responsibility. Mr. Ouchi

478. Seminar on Management Strategy and Policy (2 units). Broad policy issues relevant to strategic planning and management. Group methods of problem solving, including a case study involving the top management team from a prominent corporation in an analysis of the corporation's competitive environment and strategic planning.
The UCLA School of Social Welfare is one of the nation's great professional schools of social work. Its mission is to contribute to the understanding of the social, economic, and political forces which are shaping our individual and communal lives and to use that knowledge to help in developing appropriate social policy and social work practice responses — whether under public, voluntary, occupational, or proprietary auspices.

Social workers are employed as planners, policy analysts, administrators, and direct service providers in all of the human services, including health, family and child welfare, mental health, services to the aged, manpower development and training, etc. Social workers are concerned with the causes, treatment, and prevention of personal and social ills and with the broader trends in the society which impact on the well-being of individuals, families, and communities. The school's objective is to prepare its graduates not only for practice as it is but for imaginative leadership in creating the social work practice of the future.
School of Social Welfare

Professors
Rossina M. Becerra, Ph.D., Associate Dean
Jerome Cohen, Ph.D.
Jeanne M. Giovannoni, Ph.D.
Yehskei Hasenfeld, Ph.D.
Doris S. Jacobson, Ph.D.
Harry H. L. Kitano, Ph.D.
Manuel R. Miranda, Ph.D.
Jack Rothman, Ph.D.
Leonard Schneiderman, Ph.D., Dean
Nathan E. Cohen, Ph.D., Emeritus
Maurice F. Conney, D.S.W., Emeritus
Alfred H. Katz, D.S.W., Emeritus
Elliot T. Studt, D.S.W., Emeritus

Associate Professors
Diane de Anda, Ph.D.
Alex J. Norman, D.S.W.
John Red Horse, Ph.D.
Harry Wasserman, D.S.W., Emeritus

Assistant Professors
James E. Lubben, D.S.W.
Judith Rosenthal, D.S.W.
Ruth E. Zambrana, Ph.D.

Academic Coordinators
Terence J. Roberts, Ph.D., Assistant Dean, Student Services
Gloria Waldinger, D.S.W., Director, Postgraduate Education and Development

Fieldwork Consultants
Wanda S. Batlengen, M.S.W.
Joy Sigmund Felice, M.S.W.
Katherine M. Kolodziejski, Ph.D., Director
Jane E. Kurohara, M.S.W.
Najie Ray, M.S.W.
Winifred E. Smith, M.S.W., Emeritus

Degrees Offered
Master of Social Welfare (M.S.W.)
Doctor of Social Welfare (D.S.W.)

The UCLA School of Social Welfare offers an M.S.W. program in Social Welfare and a doctoral program of study leading to the D.S.W. The programs are designed to prepare candidates who wish to train for careers in teaching, research, administration, and practice positions. Courses are scheduled in the School of Social Welfare and in schools and departments of related disciplines and professions.

Master of Social Welfare
Admission
In addition to University minimum graduate admission requirements, the master’s program of the School of Social Welfare requires a minimum of five courses in social sciences or social welfare subjects as prerequisite undergraduate preparation for graduate study in the field of social work. Completion of courses in psychology and sociology is desirable, and a course in statistics is required.

A grade-point average of 3.0 or better is required in all courses taken during the junior and senior years. However, applicants with a GPA below 3.0 may be considered when there is clear evidence of capacity for academic achievement and professional development. In addition, the school applies the following criteria in the selection of candidates: personal suitability for professional education and potential for successful social work practice, a satisfactory state of health, and an adequate financial and personal plan to permit completion of degree requirements.

The General Test of the Graduate Record Examination (GRE) is required, as are official transcripts from every school attended since high school. GRE results must be submitted prior to any evaluation of the application for admission. GRE scores must be less than five years old and may be repeated to achieve a higher score, if desired. The highest GRE General Test score achieved is evaluated for admission. In addition, international students whose native language is other than English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information. The school may request that you take specified examinations to assist in the assessment of candidacy for admission.

Five letters of recommendation are required. In addition, an autobiographical statement and a professional concepts and goals statement must accompany the application.

Admission to the school requires simultaneous application to (1) the School of Social Welfare and (2) the Graduate Division. Both applications and the school brochure can be obtained by writing to School of Social Welfare Admissions, 247 Dodd Hall, UCLA, Los Angeles, CA 90024-1452, or by calling 825-7737.

Major Fields or Subdisciplines
Direct social work practice with individuals, families, and small groups, community organization, and social welfare administration are offered as social work methods. Concentrations are available in child and family welfare, health and aging, and mental health.

Course Requirements
A total of 76 units in courses in the School of Social Welfare is required, including three courses in social welfare policy and services, three courses in the human behavior and social environment sequences, six courses in methods of social work practice, four courses in social welfare research, plus five quarters of field instruction. Appropriate substitutions or waivers may be made by the dean. You may, with consent of the dean, take courses in other graduate schools of the University in fulfillment of the degree requirements.

With the consent of the instructor and the dean, you may substitute tutorial studies of comparable material in the 500 series for either required or elective courses. Only Social Welfare 596A and 597A may be taken. A minimum of nine units of 500-series courses may be applied toward the entire graduate course requirement for the degree.

Practicum Requirements
There is a concurrent field placement in each of the two years. Time spent in placement may vary according to guidelines established by the school, but approximately 1,300 hours are required.

Thesis Plan
While no University-approved master’s thesis is required for the M.S.W. degree, the curriculum requires theoretical courses in research methodology. As a component of the second-year research course, the satisfactory completion of an individual research project, or participation in a group research project concerned with a social welfare problem, is required.

Comprehensive Examination Plan
All M.S.W. candidates must pass an oral comprehensive examination in the Spring Quarter of the second year of study. The examination may cover the entire range of the program.
Doctor of Social Welfare

Admission

In addition to the University minimum requirements, the school requires completion of an M.S.W. degree program with a superior record from an accredited school of social work. This requirement may occasionally be waived if an applicant possesses a postgraduate degree and professional experience in a related field. Such candidates, however, are required to fulfill specified requirements in the M.S.W. program in addition to the normal doctoral requirements.

Admission criteria include the quality of your performance in previous undergraduate and graduate study, capacity for doctoral-level scholarship, ability to express yourself clearly in writing, success in professional employment and other pertinent experience, results of the Graduate Record Examination (GRE), and personal qualifications indicating suitability for advanced study and research.

The General Test of the GRE is required, as are official transcripts from every school attended since high school. In addition, international students whose native language is other than English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information. The school may request that you take specified additional examinations to assist in the assessment of candidacy for admission.

Five letters of recommendation and a typewritten statement of professional and educational objectives are required. To exemplify your communication skills, you may submit any of the following: published articles, master's thesis, or other theoretical/research-oriented unpublished papers.

Although a personal interview is not required as part of the application procedure, whenever possible a conference is arranged with a member of the doctoral faculty.

Prospective students must apply separately to the School of Social Welfare and to the Graduate Division. Both applications and the school brochure are available by writing to the School of Social Welfare Doctoral Program, 247 Dodd Hall, UCLA, Los Angeles, CA 90024-1452.

Major Fields or Subdisciplines

The core curriculum is the same for all students. Programs of specialized study relevant to the substantive area of the dissertation, which include courses in other schools and departments of the University as well as seminars and tutorials within the school, are developed in consultation with the adviser.

Course Requirements

Courses required for the degree normally cover a two-year span of study. All first-year course requirements must be completed before taking the qualifying examinations.

Required courses for the first year are Social Welfare 225A-225B, 245A-245B-245C, and 286A-286B-286C. In addition, a one-quarter course may be required in an area to be selected by the doctoral program committee, depending on the educational needs and interests of the first-year class.

Required courses for the second year are Social Welfare 210A-210B. A third course, which may be a seminar or individual or small group tutorial, is also required.

In addition to these requirements, you must take a minimum of three quarters in a graduate school or department outside the School of Social Welfare in an area related to your professional objectives, with consent of your advisor. In exceptional instances, you may obtain either a waiver of or substitution for a required course. Ordinarily, students in full-time study are expected to enroll in at least 12 units of study each quarter during the first two years and at least eight units per quarter thereafter.

A practicum may be required as a component of one or more courses, although it is not a general program requirement.

Qualifying Examinations

Before the formation of a doctoral committee, you must pass a written qualifying examination in each of the three core areas, as follows: (1) social welfare policy, history, and philosophy, (2) social work practice theory, and (3) research and scientific inquiry (philosophy and values, research methodology, research design, and behavioral concepts utilized in social welfare).

The written qualifying examinations are graded on a pass/fail basis. If you fail one or two of the three examinations, you may be granted permission to retake those examinations only with the approval of the doctoral committee. You ordinarily are required to take the examinations in September of your second year in the program; any retaking of examinations ordinarily takes place at a later date, at the discretion of the doctoral committee.

The University Oral Qualifying Examination for advancement to candidacy covers the dissertation proposal and related areas and is administered by a committee, which consists of faculty members from within and outside the school. The written qualifying examinations must be successfully completed prior to the oral examination.

Final Oral Examination

A final oral examination may be required at the option of the doctoral committee.

Graduate Courses

Consult the school for curriculum updates.

201A-201B. Dynamics of Human Behavior (3 units each). (Formerly numbered 201A-201B-201C.) Biopsychosocial factors associated with individual and group behavior and development as applicable in the social functioning of individuals and groups. Emphasis on theoretical issues and research evidence which contribute to a unified theory of human development.

202A-202B. Dynamics of Human Behavior: Deviance IV, V (2 units each). Prerequisites: courses 201A-201B-201C. Deviations and pathologies or stresses in the physical, emotional, and social areas of human functioning that will allow them to work effectively and functionally.

203. Integrative Theory and Research in Human and Social Behavior (2 units). An integrative course which brings together the preceding courses in the human behavior and social environment series by examination at an advanced level of the major theoretical strands and the identification of problem areas requiring further research.

204A. Social Systems in Social Welfare (2 units). The application of social system theory to the problems of social welfare and social work. Analysis of the network of community relationships, values, stratification, institutions, and subcultures as related to the premises and services of social work.

204B. Small Groups in Social Welfare (2 units). Application of theory and knowledge of small group functioning to the problems of working with groups in social work settings. Analysis of group formation, structure of interaction and communication patterns, and leadership and morale problems. Application to family, peer, and special-purpose groups.

205A. Cross-Cultural Awareness (2 units). Designed to aid students in the development of professional perspectives that will allow them to work effectively with members of myriad cultural groups, to discuss with clarity alternative concepts of culture in the determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U grading.

205B. Group Conflict and Change (2 units). (Formerly numbered 205.) Studies of the phenomena of group conflict and change as they appear in the social welfare matrix of groups, communities, and social institutions; relationship between conflict and social and cultural change; major research contributions in understanding of these phenomena. S/U grading.

210A-210B-210C. Social Ecology. Lecture, two hours. Prerequisites: doctoral standing and/or consent of instructor. Exploration of data, theories, and research from the biological and policy sciences regarding ecological relationships. Review of current sociocultural, demographic, and political changes as they affect human society, its institutions and, more particularly, social welfare needs and the study of them.

220. History and Philosophy of Social Welfare (2 units). The history of social work as a field: body of knowledge, method and process, and point of view analyzed within the context of the economic, political, social, philosophical, and scientific climate of the period.

221A. Social Welfare Policy and Services I (2 units). Nature, roles, and history of welfare institutions in different societies; applicable social system theory with special reference to values as seen by different components of the welfare system: policy and research about needs and not met, about various welfare policies and organizational forms, and about social change to prevent needs.
221B. Social Welfare Policy and Services II (2 units). Understanding of the significant theoretical constructs and relevant empirical evidence dealing with how organizations develop and maintain their internal functions. Development of beginning skill in organizational analysis. Special attention to organizational analysis of social welfare services.

222A-222B-222C. Social Welfare Administration I, II, III (2 units each). Prerequisites: graduate standing and/or consent of instructor. Study of methods by which welfare policies are formulated and translated into action: the nature of organizational and research processes involved in welfare administration; role of welfare agency personnel in policy formulation, implementation, and evaluation.

223. Seminar on the Social Work Profession (2 units). The nature and role of social work in contemporary society; relationships with other professions: probable future trends in the profession; social work ethics; professional organizations; certification licensing; professional responsibility for continued self-criticism and improvement of the profession. S/U grading.

224A-224B-224C. Advanced History and Philosophy of Social Welfare. Prerequisites: doctoral standing and/or consent of instructor. Analysis of long-term trends in social welfare systems transcending national boundaries, their directions, goals, values, and relationships to social work. Application of organizational theory to planning, organizing, and administering welfare agencies.

225A-225B-225C. Social Welfare Systems. Prerequisites: doctoral standing and/or consent of instructor. Analysis of theories of organizational behavior affecting welfare systems (including supranational systems transcending national boundaries), their directions, goals, values, and relationships to social work. Application of organizational theory to planning, organizing, and administering welfare agencies.

227A-227B-227C. Comparative Social Welfare Theories and Programs. Prerequisites: doctoral standing and/or consent of instructor. Analysis of interrelationships between nations' welfare services and the social, economic, religious, and broader cultural milieus within which they develop. Special attention to social theories, value systems, and other elements of culture which particularly affect welfare programs.

230A-230B-230C. Theory of Direct Social Work Practice I, II, III (2 units each). Corequisite: required social work practicum. An introduction to the theory of social work with individuals and small groups and to the principles of practice which are derivative of this and related theory.

231A-231B-231C. Advanced Theory of Direct Social Work Practice IV, V, VI (2 units each). Corequisite: required social work practicum. Advanced level, critical analysis of theories, concepts, and principles underlying social casework practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups, and to diagnostic knowledge and competence required in rehabilitation and prevention.

240A-240B-240C. Theory of Social Work Practice in Community Organization I, II, III (2 units each). Corequisite: required social work practicum. Historical and theoretical developments in community organization; understanding the community as a social system; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention.

241A-241B-241C. Advanced Theory of Social Work Method (Community Organization) IV, V, VI (2 units each). Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives: research and field experience directed toward study of social problems within the context of community planning; emerging patterns of physical, economic, and social planning within the framework of social change theory.

M242. Counseling Families of Handicapped Children (2 units). (Same as Psychiatry M254.) Prerequisite: consent of instructor. Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises.

245A-245B-245C. Development of Social Work Practice Theory. Lecture, two hours. Prerequisites: doctoral standing and/or consent of instructor. Critical analysis of social work practice theories and selected social sciences theories in historical, social, and scientific contexts, with attention to how theory becomes modified over time.

258. Critical Problems in Social Welfare. Prerequisites: doctoral standing and/or consent of instructor. Current problems in the field of social welfare. Specific topics vary depending on the research and educational interests and needs of the class. May be repeated for credit.

275. Family Process: Psychological and Social Perspectives on the Family. (Same as Psychology M275.) Various theoretical perspectives applicable to the analysis of family structure and dynamics. Critical issues in the application of family constructs to clinical problems.

280. Social Welfare Research (2 units). Sources, nature, and uses of social work theory and research-based knowledge and of broader social data relevant to social welfare activities. Critical analysis of major methods of developing scientific knowledge.

281A-281B-281C. Advanced Social Welfare Research (2 units each). Individual or group research projects requiring intensive examination and analysis of a social problem area, directed toward the development of research knowledge and techniques for social work practice. In Progress grading.

285A-285B-285C. Research in Social Welfare. Prerequisites: doctoral standing and/or consent of instructor. Review of areas of research of concern to social workers, with special attention to design, instrument construction, data collection, data processing, data reduction, analysis, and interpretation. Designs studied include survey, panel, experimental observation, and theory development research.

286A-286B-286C. Survey of Research Methods. Prerequisites: doctoral standing and/or consent of instructor. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis.

290A-290B-290C. Seminar in Social Work (2 units each). A series of seminars dealing with trends in social work and social welfare, with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research.

M290D. Women, Health, and Aging: Policy Issues (2 or 4 units). (Same as Public Health M241.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent; consent of instructor. The social and economic context of older women's aging, the major physical and psychological changes older women experience, the delivery of health services to this population, and the policies that respond to their health needs.

401A-401B-401C. Practicum in Social Work (2 units, 4 units, 4 units). Laboratory, 20 hours. Educa-
ationally directed practica in human services and in related health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire a disciplined practice foundation in the profession. In Progress and S/U grading.

401A-402B-402C. Advanced Practicum in Social Work (6 units, 4 units, 2 units). Laboratory, 24 hours. Prerequisites: courses 401A-401B-401C. Practicum in social work, arranged for students in keeping with their major field of study. In Progress and S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596A. Special Study and Research for M.S.W. Candidates (2 to 8 units). Individual programming for selected students to permit pursuit of a subject in greater depth.

596B. Special Study and Research for D.S.W. Candidates (2 to 8 units). Prerequisites: doctoral standing and/or consent of instructor. S/U or letter grading.

597A. Preparation for D.S.W. Comprehensive Examination (2 to 8 units). Prerequisite: consent of instructor.

597B. Preparation for D.S.W. Qualifying Examinations (2 to 8 units). Prerequisites: doctoral standing and/or consent of instructor.

599. D.S.W. Dissertation Research (2 to 8 units). Prerequisites: doctoral standing and/or consent of instructor.
The UCLA School of Dentistry has developed a national and international reputation for its teaching and research activities. Challenging educational and training programs prepare the dental student for a professional career dedicated to patient treatment and service. The curriculum is carefully designed to prepare students for changes in treatment modalities and health care delivery systems. Students become actively involved in preventive dental care early in their training and soon make valuable contributions to the clinical health team. The clinical instruction system emphasizes a patient care approach in which each patient is treated comprehensively. Students interact with their colleagues, faculty, and dental auxiliary personnel in much the same way as they later will interact in a private or group practice.

Opportunity exists for dental students to undertake programs designed to meet their special needs; fourth-year electives encourage more advanced training in an area of particular interest. In addition to basic and applied research programs within the school, students participate in community service programs such as the Venice Dental Clinic, the Downtown Los Angeles Children’s Dental Clinic, and the Mobile Dental Clinic, the latter in conjunction with the University of Southern California. Postdoctoral study can be undertaken in one of several dental specialties, and an active continuing education program directed by UCLA faculty members provides a variety of short courses for members of the dental profession and their auxiliaries.
School of Dentistry

A3-042 Dentistry, (213) 825-6141

The UCLA School of Dentistry, which occupies facilities in the Center for the Health Sciences, offers a D.D.S. (Doctor of Dental Surgery) degree program, a number of postdoctoral programs, and an Oral Biology M.S. degree program. Articulated D.D.S. and M.S. or certificate programs are also available. This catalog provides detailed information only on the M.S. program in Oral Biology, for which admission to the School of Dentistry is not required.

Degrees Offered
Doctor of Dental Surgery (D.D.S.)
Master of Science in Oral Biology

Predental Program

The UCLA School of Dentistry offers an upper division course for predental students. Dentistry 199 is an individual special studies course for UCLA undergraduates with definitive research interests and abilities applicable to dentistry. The subject areas include oral biology, clinical research, and dental health policy. Interested students should contact the Office of Student Affairs at 825-6141 to obtain the names and areas of interest of participating School of Dentistry faculty. Also refer to Chapter 5 for details on the three-year predental curriculum offered by the College of Letters and Science.

Upper Division Course

199. Individual Special Studies (2 to 8 units). Prerequisite: consent of instructor. Studies in dentistry and related subject areas appropriate for the training of particular students, which may include reading assignments or laboratory work leading to a final oral or written report. P/NP or letter grading.

D.D.S. Degree Program

The UCLA dental curriculum leading to the degree of Doctor of Dental Surgery (D.D.S.) is based on the quarter system. The course of study usually takes four academic years of approximately nine months each, with two required summer quarters between the second/third and third/fourth years. The curriculum is designed to provide students with clinical competence and broad experience in all phases of clinical dentistry within the four years. The dental curriculum consists of three principal areas: basic health sciences courses, didactic dental courses, and clinical experience. The first two years of the curriculum are chiefly devoted to didactic coursework in the basic health and dental sciences. The final two years emphasize training and instruction in the clinical fields, including endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, oral radiology, oral and maxillofacial surgery, anesthesiology, orthodontics, pediatric dentistry, periodontics, and removable prosthodontics.

For further details on the D.D.S. program and a listing of the courses offered, see the Announcement of the UCLA School of Dentistry, available from the Office of Student Affairs and Admission, School of Dentistry, A3-042 Dentistry, UCLA, Los Angeles, CA 90024-1762.

Postdoctoral Programs

The School of Dentistry offers the following opportunities for postdoctoral study: a one-year general practice residency program; a one-year residency in maxillofacial prosthodontics; a four-year oral and maxillofacial surgery residency training program; a three-year combined orthodontic-pediatric dental program; and two-year programs in the specialties of orthodontics, pediatric dentistry, periodontics, and prosthodontics.

Information on these postdoctoral programs can be obtained by writing directly to their respective directors, UCLA School of Dentistry, Los Angeles, CA 90024-1668.

Professors
George W. Bernard, D.D.S., Ph.D.
Colin K. Kranker, Ph.D.
Louis J. Goldberg, D.D.S., Ph.D., Chair
Douglas Junge, Ph.D.
No-Hee Park, D.M.D., Ph.D.
John A. Yagiela, D.D.S., Ph.D.
Fred Herzberg, D.D.S., M.S., Emeritus
Norman S. Simmons, D.M.D., Ph.D., Emeritus

Associate Professor
Lawrence Wolinsky, D.D.S., Ph.D.

Lecturers
Jaime Bulka, D.D.S., Dr.Odont., Ph.D.
Kenneth Miyasaka, D.D.S., M.S., Ph.D.

Adjunct Professor
Bernard G. Sarnat, M.D., D.D.S.

Adjunct Assistant Professor
Mark L. Torbiner, D.M.D.

Scope and Objectives

The M.S. program in Oral Biology is intended to prepare students for teaching and research careers in dentistry while introducing them to modern approaches to research in the biology of the oral-facial area. The core curriculum is made up of basic science courses in embryology and histology, microbiology, immunology, physiology, neurophysiology, biology of bone, biochemistry of caries, pharmacology, and therapeutics, all directly related to oral-facial problems. In addition, students take concurrent courses in research methods and scientific writing, a course in biostatistics, and any of several electives in related areas.

All students carry out a thesis project, working in a laboratory in the School of Dentistry, Dental Research Institute, or other divisions of the Center for the Health Sciences. Each is exposed to modern research methodology and is supervised by a faculty member with research experience. Many students are in cooperative D.D.S./M.S. programs or resident programs in specialty areas, and many are dentists trained in other countries.

Master of Science Degree

Admission

Applicants are expected to have an acceptable bachelor's degree with a strong background in the biological and chemical sciences or a Doctor of Dental Surgery degree or the equivalent (i.e., D.M.D.) from an accredited university. The Graduate Record Examination (GRE) and the Dental Aptitude Test (DAT) are not required but may be submitted. Three letters of recommendation are required as part of the admissions packet. There is no separate application form other than that required by the Graduate Division. International students are considered individually after evaluation of their curriculum and training and must take an English language proficiency examination. Refer to "Proficiency in English" under "Graduate Admis-
Major Fields or Subdisciplines
Areas of specialization or subdisciplines which may be followed to complement or complete the degree requirements include anatomy, biological chemistry, cell biology and virology, immunology, microbiology, pharmacology, and physiology.

Course Requirements
The program requires a total of nine courses, five of which must be at the graduate level. Seven graduate core courses are required: Oral Biology 202, 204, M205, M206, 207, 208, M214. These should be taken during your first year of graduate study. Course 260 and Biometrics 160 are both required for completion of the degree.

Courses 596 and 598 are required 500-series courses. You are eligible to take two to eight units at a time on an S/U grading basis as many times as needed. A maximum of eight units of 500-series courses may be applied toward the total course requirement, of which four units may be applied toward the minimum graduate course requirement.

Thesis Plan
The master's thesis is intended to demonstrate your ability to design and carry out a research project and then to analyze and present the resulting data. The thesis must be prepared according to high standards of experimental design and data analysis. The subject of the thesis must be approved by the graduate adviser and by the faculty member who will direct the work of the thesis. After completing course requirements, you should prepare and send to your graduate committee a brief description of the proposed research project. The committee then discusses the proposal with you and makes suggestions.

The thesis should be prepared mainly in consultation with the sponsor, although other committee members are available for assistance. At least two weeks should be allowed between completion of the thesis and termination of the program, to allow committee members to read and comment on the manuscript.

Final Oral Examination
A final oral defense of your thesis is usually required.

Articulated Degree Program
The M.S. degree in Oral Biology has been structured so that students pursuing a dental degree or certificate in the UCLA School of Dentistry have an opportunity to participate in the program. These students must submit a separate application to the Graduate Admissions Office.

Graduate Courses

202. Principles and Methods of Research. Lecture, one hour; laboratory, three hours. Designed to familiarize students with the experimental method and its application to basic and applied research, including experimental method and design and interpretation of data. Research instrumentation and the advantages and limitations of various investigative tools.

Mr. Junge and the Staff (Sp)

M203. Oral Embryology and Histology. (Same as Anatomy M229.) Lectures and laboratory instruction in the development and histological structure of the facial region and the oral and peri-oral organs and tissues. Mr. Bernard and the Staff (Sp)

204. Antibiotics and Antimicrobial Agents (2 units). A summary of current information on the chemistry, synthesis mode of action, and mechanism of resistance for generically grouped antimicrobial substances. Emphasis also on pharmacokinetic complications of antibiotic usage. Mr. Franker (F)

M205. Oral Sensory Physiology (2 units). (Same as Physiology M208.) Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Sensory mechanisms in normal and abnormal oral function. Organization of sensory systems in general, sensory transduction and neural coding, oral touch and temperature perception, pain mechanisms, dental pain sensitivity, physiology and abnormalities of taste and olfaction. Mr. Junge (F)
M206. Secretory and Gastrointestinal Immunity (2 units). (Same as Microbiology and Immunology M206.) Review of anatomy and physiology of the oral cavity, the intestines, and the related lymphatic and blood vascular systems in reference to the immune system. The secretory and systemic immune systems, with particular emphasis on the unique properties of SIgA. Discussion in terms of recent experimental findings of the ability to process enteric antigens, to respond, and to regulate enteric immunity. The role that enteric immunity may play in diseases of the GI tract, such as dental caries and inflammatory bowel diseases. Students participate in discussions following each lecture and present seminars based on a review of the relevant scientific literature.

Mr. Miyasaki

207. Brainstem Control of Rhythmic Movements (2 units). Discussion of the central nervous system mechanisms which coordinate and control the contraction patterns of muscles which are involved in orofacial behaviors such as sucking, chewing, and swallowing. Emphasis on the interaction among brainstem reflexes, pattern generators, and "voluntary control centers." Discussion of the role of neuromodulators in the control of these behaviors.

Mr. Goldberg

208. The Biochemistry of Saliva and Dental Caries (2 units). A seminar on current research in the field of saliva biochemistry and its relationship to the development of dental caries. Each student expected to present a current article for discussion.

Mr. Wolinsky (Sp)

211. Biology of the Temporomandibular Joint (1 unit). Lecture, two hours. Anatomy, histology, physiology, and biomechanics of the temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging.

Ms. Bibb, Mr. Clark, and the Staff (F)

M214. Biology of Bone (2 units). (Same as Anatomy M225.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Embryology of bone tissue; bone as an organ; growth and development of specific bones; biochemistry and physiology of bone; remodeling of bone; crystallography of hydroxyapatite; pathological calcifications; pathology of bone; mechanisms and lineage of calcification; clinical correlations.

Mr. Bernard (W)

225. Gross Postnatal Craniofacial Growth and Development (2 units). Designed primarily to develop a critical sense in the evaluation of the research literature and an appreciation of the dynamic complexity of postnatal craniofacial growth. At each session students present reviews and critiques of original articles, followed by group discussion. Specific aspects of the following general topics on growth of bone and tissues considered in detail: historical review; modes of growth; general and craniofacial (mandible, midface, cranium) growth; methods of assessing; factors affecting; and conflicting hypotheses. Students encouraged to pursue their particular interest.

Mr. Sarnat (Sp)

226A-226B. Craniofacial Growth and Development (2 units each). Prerequisite: strong background in histology and embryology. Students acquire, from scientific literature discussed in a lecture/seminar format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of the principles governing growth and development of the craniofacial region. Students required to present seminars on assigned topics which aid their understanding and analysis of the course content that has application to their specific and professional fields. In Progress grading.

Mr. Dixon and the Staff (F, W)

227. Dental Embryology and Histology (1 unit). Description and interpretation of important stages in the development of the orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to the course content and analysis of the current state of knowledge about selected features of the orofacial apparatus which are of significance to the clinical dental specialist.

Mr. Dixon (F)

228. Dental Pharmacology and Therapeutics (2 units). Lecture, three hours. A survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on the autonomic and central nervous systems.

Mr. Yagiela (W)

260. Oral Biology Seminar (1 unit). Research seminar to discuss faculty and student research of oral biology and related disciplines. Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

Mr. Park

M293. Major Concepts in Oncology. (Same as Microbiology and Immunology M293 and Pathology M293.) Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

Mr. Hankinson (W)

S96. Directed Individual Study or Research (2 to 4 units). S/U grading.

A modern school of medicine exists in many minds and in many places. It includes many more disciplines than all those available to such physicians as Copernicus and John Locke, famous for discoveries well beyond medicine then or now. UCLA School of Medicine faculty and students may be found in the Molecular Biology Institute and in the Department of Physiology, in the clinics, wards, and operating rooms of the UCLA Medical Center and Los Angeles County Harbor-UCLA Medical Center, in the Health Sciences Computer Center, in the Louise Darling Biomedical Library, and in dozens of other clinical and scientific facilities.

Regarded by many physicians and medical faculty to be among the best in the nation, UCLA's School of Medicine encompasses a wide range of clinical specialties, including neurology, obstetrics and gynecology, ophthalmology, pediatrics, radiation oncology, and surgery. Graduate work leading to the M.S. and/or Ph.D. degrees is offered through the Graduate Division, either separately or in conjunction with the M.D. program, in 11 different disciplines.

Each department of the school is staffed by a distinguished faculty of respected researchers and practitioners. They have at their disposal some of the most technologically advanced equipment and facilities, including one of the nation's eight hospital-based biomedical cyclotrons producing short-lived radioisotopes for research and diagnostic nuclear medicine procedures.
School of Medicine

12-109 Center for the Health Sciences, (213) 825-6081

The UCLA School of Medicine offers an M.D. degree program, several allied health programs in affiliation with other hospitals and universities, and a number of postgraduate medical training programs. In addition to specialties in medicine, neurology, obstetrics and gynecology, ophthalmology, pediatrics, radiation oncology, and surgery, which lead to the M.D. degree, a range of master's and doctoral degrees is offered through the Graduate Division.

M.D. Degree Program

The four-year curriculum leading to the degree of Doctor of Medicine (M.D.) at UCLA is designed to develop a comprehensive scientific and humane approach to patient care that includes basic sciences, preventive medicine, diagnosis, and therapeutics. Clinical skills are taught in the context of anatomical, pathological, and psychosocial factors in health, disease, and treatment.

During the first two years, which are devoted mainly to the basic sciences with only periodic, brief clinical exposure, instruction is primarily in the form of lectures and laboratory sessions, demonstrations, and tutorials. In the last two years, instruction in patient care is given in the form of required and elective clinical clerkships at the UCLA Medical Center or at one of many affiliated hospitals.

All of the medical school departments participate in the medical curriculum leading to the M.D. degree. If you are interested in details on the M.D. curriculum and a listing of courses offered in each department, or if you wish to make application to the M.D. program, you should obtain a copy of the Announcement of the UCLA School of Medicine from the Office of Student Affairs, School of Medicine, 12-109 CHS, UCLA, Los Angeles, CA 90024-1720. You are also referred to Chapter 5 of this catalog for details on the four-year premedical studies program offered by the College of Letters and Science.

Additional Programs

Articulated Degree Programs

The School of Medicine offers an articulated degree program in conjunction with the Graduate Division which allows you to earn both the M.D. and Ph.D. in six to seven years, depending on your course of study and research. The Ph.D. may be awarded in one of several medical science fields. For more information, contact the associate dean for Education in Medical Science at (818) 891-2335.

In addition, an arrangement with the School of Public Health enables you to pursue the M.P.H. degree while attending medical school. Interested students should consult the Student Affairs Office in the School of Public Health.

Allied Health Programs

Programs in allied health include animal care technician, dental assistant, dental hygienist, dietetics technician, emergency medical technician, social work, pharmacy, respiratory therapist, vocational nurse, medical technologist, nurse anesthetist, operating room nurse, physician's assistant, physical therapist, prosthetist-orthotist, radiologic electronics specialist, radiologic technologist, radiation therapy technologist, and ultrasound technologist.

Information regarding these programs may be obtained from the Office of Allied Health Programs in the UCLA Center for the Health Sciences (825-6711).

Postgraduate Medical Training Programs

Postgraduate training programs, including residencies, are available at several off-campus sites in addition to those offered at the UCLA Medical Center. Programs offered at the allied institutions broaden the scope of the teaching programs by providing extensive clinical facilities, special population settings, and diverse practice modes. Information about these programs is available from the Office of Student Affairs, UCLA School of Medicine.

Carlos A.E. Lemni, Ph.D., Adjunct
James F. McGinnis, Ph.D., Adjunct
Anselmo R. Pineda, M.D., Clinical
Margaret N. Shouse, Ph.D., Adjunct

Visiting Assistant Professor
Robert B. Trelease, Ph.D.

Scope and Objectives
The Department of Anatomy offers advanced training leading to the Ph.D. degree. The great majority of students graduating with a doctoral degree in anatomy can look forward to an academic career in medical or dental schools and, in accord with this, the department strives to produce graduates soundly qualified both for teaching of anatomical subjects at this level and for the conduct of productive research in morphology or in some related area. An M.S. degree is also available to individuals whose major interests and training lie in allied fields. The department does not offer an undergraduate degree. An informational brochure may be obtained by writing to the Vice Chair, Department of Anatomy, 73-235 CHS, UCLA, Los Angeles, CA 90024-1783.

Requirements for Graduate Degrees
Admission
Applicants must have a bachelor’s degree in a physical or biological science or in a premedical curriculum. Introductory courses in zoology, one year of general and organic chemistry, and one year of college physics are required. Courses in comparative anatomy, embryology, cell biology, genetics, elementary statistics, and the philosophy of science are highly recommended.

You must submit (1) transcripts of grades for all college-level work, (2) the results of the Graduate Record Examination (GRE), including the Subject Test in Biology or in your undergraduate major, (3) at least three letters of recommendation from professors stressing potential for successful completion of graduate studies and creative independent research, and (4) an essay describing your background, work experience, interests, and career goals. Selected applicants are asked to an interview with an admissions committee of faculty and graduate students.

Major Fields or Subdisciplines
The major fields in which graduate research may be undertaken include (1) neuroanatomy and neurophysiology, (2) neuroendocrinology, and (3) cell biology, including immunology.

Master of Science Degree
The M.S. degree in Anatomy is available to applicants who have specialized objectives (e.g., students in bioengineering, medical illustration, physical therapy, and other paramedical specialties), as well as to international students who can plan only a limited stay in this country. Provision can also be made for medical and dental professionals at the postdoctoral level who wish to pursue a limited research project and will satisfy all requirements of the program.

Course Requirements
A total of 36 units of coursework is required, 20 of which must be in graduate-level courses. Eight units of Anatomy 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement. All M.S. candidates must take two courses selected from 201 (seven units), M206A (five units), M206B (seven units), and 207 (12 units); one departmental seminar; other courses essential to the student’s program; courses in the minor field (for those under the comprehensive plan).

Thesis or Comprehensive Examination Plan
You may elect either the thesis or examination plan. For the thesis plan, a committee of the adviser and two department members approves the thesis proposal, usually at the start of your second academic year. All members participate in criticism and approval of the eventual thesis; there is no oral defense. Under the comprehensive examination plan, you must demonstrate in a written examination a grasp of the general principles of anatomy, as well as an understanding of some related field that is relevant to your objectives.

Ph.D. Degree

Course Requirements
(1) You are required to take for credit three of the following courses or course combinations: Anatomy 201 and 254; M206A (neuroscience students also take M206B); 207; 209. One of the following course sequences is also required: Physiology 201A-201B or Biological Chemistry 201 and 203, or 202 and 203.

(2) Participation in at least two departmental seminars.

(3) Completion of such other courses as are essential for your research interest.

(4) Completion of a “breadth requirement” which consists of the equivalent of eight units of work selected to augment the dissertation project. This may be satisfied by a foreign language examination.

Teaching Experience
Since the anatomy profession generally imposes relatively heavy teaching obligations, it is strongly recommended that students seek opportunities to gain teaching experience in the major anatomy courses, gross anatomy in particular.

Qualifying Examinations
The written comprehensive examination is intradepartmental and intended to evaluate your capacity to organize and integrate information gained in the major core courses. All students are required to take the examination
205A-205B. Gross and Developmental Anatomy for Medical Students (5 units each). (Formerly numbered 105A-105B.) Lecture/laboratory, three four-hour sessions (16 weeks beginning in August). Prerequisites: medical student standing, consent of instructor. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissection. 205A. Limbs and Thorax (first eight weeks); 205B. Abdomen, Pelvis, Head, and Neck. Each course may be taken independently for credit. 

Mr. Maxwell and the Staff (F)

M206A. Neurosciences: The Introductory Course for Graduate Students (5 units). (Same as Neurosciences M206A.) Lecture, four hours; laboratory/demonstrations, three hours. Prerequisites: a college-level biology or zoology course, some familiarity with the subjects of electronics and electricity, consent of instructor. Introductory course on the principles of organization and function of the nervous system, intended for graduate students in relevant disciplines and as background for more advanced courses for students specializing in the neurosciences.

Mr. Scheibel, Mr. Segundo (W)

M206B. Neurosciences: The Intermediate Course for Graduate Students (7 units). (Same as Neuroscience M206B.) Lecture, six hours; laboratory, two hours; tutorial; corequisites: Physiology M202 or 203A-203B, or equivalent, consent of instructor. Neuronal excitability and integration, sensory mechanisms, and motor control as related to behavior.

Mr. Scheibel, Mr. Segundo (Sp)

207. Gross and Developmental Anatomy for Graduate Students (12 units). (Formerly numbered 207A-207B.) Lecture/laboratory, three four-hour sessions (16-week semester). Prerequisite: consent of instructor. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissection. Trunk and extremities; head and neck.

Mr. Maxwell and the Staff (F)

208A-208B. Electronics for Neuroscientists. Lecture, two hours; laboratory, four hours. Prerequisite: consent of instructor. Development of an understanding of electronic methods used in neuroscience. Basic principles of passive networks, operational amplifiers, semiconductors, digital logic, waveform generation, signal conditioning, data acquisition methods, and neurophysiological instrumentation systems. 3 or 4 units.

Mr. Bernard and the Staff (Sp)

209. Cell Molecular Structure and Function (5 units). Lecture, four hours; discussion, one hour. Prerequisites: biochemistry, consent of instructor. Introduction to cell biology for graduate students in basic medical sciences. Topics include cell structure, assembly, and function; biogenesis of organelles, intercellular junctions, endocytosis, extracellular matrix, cytoskeleton and motility, intercellular and intracellular signaling, immunity and gene structure, function and replication.

Mr. Bok and the Staff (F)

211. Cellular Basis of Learned Behavior (2 units). Lecture/discussion, one two-hour session; laboratory, to be arranged. Prerequisites: microscopic anatomy, mammalian physiology, and phylogeny (W). Function and ontogeny of cerebral processes in alerting, learning, focusing attention, and memory.

Mr. Woody (F)

213. Multigene Families (2 to 4 units). (Formerly numbered M213.) Lecture, one to two hours; discussion, one to two hours. Prerequisite: consent of instructor. Analysis of the molecular structure, developmental regulation, and evolution of multigene families. Topics include the hemoglobins, immunoglobulins, histones, ribosomal RNAs, satellite DNAs, and histocompatibility antigens. S/U or letter grading.

Mr. Campbell (W)

M221A-M221B. Cellular and Molecular Neurochemistry. (Same as Biological Chemistry M221A-M221B, Neuroscience M221A-M221B, Pharmacology M221A-M221B, and Psychology M221A-M221B.) Lecture, three hours. Prerequisites: Biological Chemistry M220A-M220B, and consent of instructor. Biochemistry and neurochemistry of specific tissues of the nervous system. Prerequisites: a general background in biochemistry. The biochemical and structural properties of the nervous system in relation to its development and function, and the disorders that result from alterations in the fundamental biochemistry of the nervous system. Although the subject is treated in an interdisciplinary manner, course progresses from structure through chemistry to function in precise manner and biological terms.

Mr. de Veilis (W,Sp)

M223. Paradigms of Evolution. (Same as Biology M231A.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. The range of conceptual foundations underlying evolutionary studies in various fields of biology, biochemistry, geology, and physics today. S/U or letter grading.

Mr. Brunk, Mr. Campbell (W)

M225. Biology of Bone (2 units). (Same as Oral Biology M214.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Embryology of bone tissue; bone as an organ; growth and development of specific bone types. Pathogenesis of disease processes: remodeling of bone; crystallography of hydroxyapatite; pathological calcifications; pathology of bone; mechanisms and lineage of calcification; clinical correlations.

Mr. Koch and the Staff (W)

M226. Neuronal Mechanisms Controlling Rhythmic Movements. (Same as Kinesiology M243 and Neuroscience M243.) Prerequisite: Kinesiology 140 or consent of instructor. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and the interaction between neuronal networks. Introductory to the primary literature and techniques used in these areas. Students expected to critically evaluate data and the conclusions drawn.

Mr. Chandler, Mr. Goldberg

M229. Oral Embryology and Histology. (Formerly numbered M229.) Lecture, laboratory, and tutorial contacts. Prerequisite: a college-level biology or zoology course, some familiarity with the subjects of electronics and electricity. Development of specific bones; biochemistry and physiology of bone tissue; bone as an organ; growth and development of specific bone types. Pathogenesis of disease processes: remodeling of bone; crystallography of hydroxyapatite; pathological calcifications; pathology of bone; mechanisms and lineage of calcification; clinical correlations.

Mr. Bok and the Staff (Sp)

M235. Gut and Brain Peptides (2 units). (Same as Medicine M235, Neuroscience M235, and Physiology M235.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology today. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

Mr. Brecha, Mr. Reeve, Ms. Tache (W)

251. Problems in Developmental and Comparative Immunology (2 units). Prerequisite: consent of instructor. Review of current literature emphasizing early development and evolution of immune competence.

Mr. Cooper

252. Seminar on Basic and Quantitative Neurophysiology (2 units). Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Lecture series on basic neurophysiology. Early lectures by invited specialists on their specific fields. Later lectures by each student on a topic selected and prepared in collaboration with the instructor.

Mr. Segundo (Sp, even years)

253. Communication and Coding in Nervous Systems. Two-hour discussions, usually two and two-and-one-half-hour sessions. Prerequisite: consent of instructor. Presentation, discussion, and critique of efforts to quantify neuronal function where the essence of the mathematics is expressed in qualitative and physiologically meaningful terms (e.g., stability, neurons as analyzers of spike trains, identification of synaptic operators).

Mr. Segundo (Sp, odd years)
254. Structure and Function of Cells and Tissues (2 units). (Formerly numbered 201.) Lecture, one hour; discussion, one hour. Prerequisites or corequisites: consent of instructor. Corequisites: consent of instructor. Course topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

Ms. Dirksen, Mr. Young, and the Staff (F)

M255A-M225D. Seminars in Neural and Behavioral Endocrinology (3 units, 2 units, 3 units, 2 units). (Formerly numbered 255A-255D.) (Same as Psychology M294A-M294D.) Lecture, three hours. Topics include hormonal biochemistry and pharmacology. Hypothalamic-hypophysial interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress; hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

Mr. Gorski and the Staff (W, M255A, M255C; Sp, M255B, M255D)

256. Seminar in Cell Structure and Function (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Selected topics in cell biology emphasizing those areas which are of current interest. An analysis of the various techniques being used to study the cell.

Ms. Dirksen and the Staff (W,Sp)

258. Seminar in Neuroscience (2 units). Prerequisite: basic neurology. Topics of current interest or ongoing research projects; examination of both content and method of presentation. May be repeated for credit.

Mr. Schelbel (F, odd years; W, even years)

M261. Neuronal Circuit Analysis (2 units). (Same as Neuroscience M261.) Lecture/discussion, three hours. Prerequisites: courses M205A, M205B, or equivalent. A seminar with strong emphasis on specific reading assignments. An integrated view of neuronal circuit analysis at an advanced level; the layout and performance of a variety of basic neuronal circuits serving different control functions.

Mr. Schlag (W)

265. Evolution of Cancer (2 units). Prerequisite: consent of instructor. Review of current literature emphasizing the appearance of tumors and neoplasms in representative invertebrates, fishes, amphibians, and reptiles. Theories of cancer development from the evolutionary viewpoint. Mr. Cooper (W)

290. Tutorials in Anatomy (2 units). Tutorial, one hour. Prerequisite: consent of instructor. Individual study with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to the instructor and student. S/U grading.

390A-390B. Peer Review System (2 units each). Prerequisite: advancement to candidacy in integrative or systems biology or consent of instructor. Introduction to the peer review system for the evaluation of research proposals. After consideration of the grant review process, each student prepares an abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

Mr. Gorski (W,Sp, odd years)

495A-495F. Preparation for Teaching in the Anatomical Sciences (2 to 4 units each). Prerequisites: graduate standing, consent of vice chair and instructor. Observation and practice of the methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. A maximum of three 495 courses may be taken; none may be repeated. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record continued enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual Study or Research (2 to 12 units).

598. Thesis Research for M.S. (2 to 12 units).

599. Dissertation Research for Ph.D. Candidates (2 to 12 units).

Medical History Division

Professors
Ynez V. O'Neill, Ph.D., in Residence
L.R.C. Agnew, M.D., Emeritus
Mary A.B. Brazier, Ph.D., Emeritus, in Residence
Franklin D. Murphy, M.D., Sc.D., Emeritus

Associate Professor
Robert G. Frank, Jr., Ph.D., Division Chief

Lecturer
Elizabeth R. Lomax, M.D., Ph.D.

Upper Division Courses

107A-107B. Historical Development of Medical Sciences. Lecture, three hours. The major contributions of medicine and medical personalities from earliest times. 107A. The contributions of medicine and medical personalities from earliest times through 1650. 107B. The subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

Mr. Frank (Sp), Ms. O'Neill (W)

Ms. Frank (F,W)

Graduate Courses

240A-240B. History of Medical Sciences (2 units each). Lecture, one hour. Survey of the development of scientific and medical thought from ancient times to the present. (F,W)

241A-241B. History of Clinical Sciences (2 units each). Lecture, one hour. Survey of the development of the clinical specialties and comparison of medical practice in Western civilization with that developed in other parts of the world. (F,W)

242. History of Pathology (1 unit). Survey of the history of pathology and related sciences from antiquity to the 20th century, tracing the development of pathological theory, practice, organization, and education and comparing them to current practice.

(F)

(2)

244. History of American Medicine (1 unit). Survey of the history of medicine in the U.S. from the Colonial period to the present.

Sp}

246. History of Neurophysiology: Its Impact on Psychology and Medicine (2 to 4 units). Lecture, one hour; seminar, two hours. The development of experimental neurophysiology from its scientific roots in the 17th century through the recognition of the excitability of the nervous system, to the use of this characteristic in revealing the functions of the central nervous system. Discussion of the interaction of neurophysiological ideas with contemporary philosophy and medicine. Lectures may be taken independently.

Ms. Brazier, Ms. Lomax, Ms. O'Neill (Sp)

250. History of Medical Psychology (2 units). Lecture, one hour. An examination of the themes underlying medical psychology and modern mental health theories. Beginning with a review of contemporary thinking, lectures focus on the various factors shaping present concepts of mental disorder, and provide a framework for the understanding of current issues.

Ms. Lomax, Ms. O'Neill (W)

596. Directed Individual Studies in Medical History (2 to 12 units). Investigation of subjects in medical history selected by students with the advice and direction of the instructor. Individual reports and conferences.

(F,Sp)

Scope and Objectives
The Department of Anesthesiology in the School of Medicine offers a program leading to the M.S. degree in Nurse Anesthesia. This program prepares qualified registered nurses in the specialty of anesthesiology and qualifies the graduate to sit for the certification examination given by the Council on Certification of Nurse Anesthetists. The graduate attains a high level of clinical competence combined with an extensive body of didactic knowledge relevant to the specialty. The program is designed to lead to careers in the clinical practice of nurse anesthesiology and the teaching of nurse anesthesiology with the opportunity for participating in research in the area.

Master of Science in Nurse Anesthesia
Admission
The following admission requirements must be met:
(1) A Bachelor of Science degree in Nursing or other appropriate undergraduate degree.
(2) Graduation from an accredited nursing program satisfactory to the program and to the UCLA Graduate Division. You may be required to enroll in certain additional undergraduate courses prior to final consideration by the program.
(3) Licensure as a registered nurse prior to entry into clinical coursework. Evidence of status as a registered nurse in the State of California is mandatory.
(4) Completion of a minimum of one year of experience as a graduate nurse in an acute care area of nursing, preferably an intensive care unit.
(5) Professional and academic competence attested through three letters of recommendation.
(6) Graduate Record Examination (GRE) General Test results submitted to the program.
(7) Successful completion of the following undergraduate-level courses: (a) inorganic chemistry, organic chemistry, and biochemistry, (b) introductory physics, (c) biology, (d) anatomy, (e) physiology, (f) English, (g) psychology, (h) statistics, and (i) a course in methods of research (highly recommended).
(8) A scholarship record satisfactory to the Graduate Division and the Nurse Anesthesia Program. Transcripts must be sent to both.
(9) Interview with the program director or designee and with members of the final selection committee, and observation in the clinical practicum. Approximately five to six students are selected for admission in Fall Quarter by the final selection committee which meets annually in January. Information regarding the program may be obtained by writing to the Department of Anesthesiology, 56-125 CHS, UCLA, Los Angeles, CA 90024-1778. All applicants must apply to both the department and the Graduate Division. Separate applications are needed.

Foreign Language Requirement
There is no foreign language requirement for the M.S. degree.

Course Requirements
Total courses required for the degree: 13¼; all must be graduate-level courses.

Completion of courses 597 or 598A is required. Course 598B may be repeated twice, but only two of the courses may be applied toward the degree. Letter grading may be utilized in 500-series courses.

Thesis Plan
If you elect this option, your thesis committee is established during the second year of the program. The thesis proposal is written and approved during the Winter or Spring Quarter of your second year. You must take a written comprehensive examination for course completion.

Comprehensive Examination Plan
Students electing this option must demonstrate didactic and clinical competence in the field. This option is generally recommended for students continuing to doctoral degree study. The oral examination is general in scope and may include information from all aspects of the curriculum. A written comprehensive examination is also required for course completion. Examinations are offered quarterly.

Other Requirements
(1) You must complete all requirements for the Master of Science degree in a minimum of 10 quarters, but no more than 12 quarters, of consecutive full-time enrollment.
(2) The program does not discriminate on any basis unless a handicap is determined by the selection committee to preclude the safe clinical practice of anesthesia.
(3) You must complete a minimum of 550 cases as the primary anesthetist.
(4) You must meet the requirements for application to sit for the certification examination of the Council on Certification of Nurse Anesthetists for program completion.

Graduate Courses
210A, Chemistry and Physics of Nurse Anesthesia I (2 units). Lecture, two hours; discussion, one hour. A study of the principles of chemistry and physics as applied specifically to the practice of anesthesia.

210B, Chemistry and Physics of Nurse Anesthesia II (2 units). Lecture, two hours; discussion, one hour. Prerequisite: course 210A. A continuation of the study of the principles of chemistry and physics as applied specifically to the practice of anesthesia.

210C, Chemistry and Physics of Nurse Anesthesia III (2 units). Lecture, two hours; discussion, one hour. Prerequisite: course 210B. A continuation of the study of chemistry and physics as related to anesthesia management, with specific emphasis on biochemistry as related to acid-base balance and theories of narcosis.

215A. Pharmacology of Nurse Anesthesia I. Lecture, four hours; discussion, one to two hours. Introduction to basic pharmacological principles as applied to administration of anesthesia. A study of uptake and distribution, mechanism of action, fate, and toxicity as related to anesthetic agents.

215B. Pharmacology of Nurse Anesthesia II. Lecture/discussion. A study of the pharmacology of adjunct drugs influencing anesthesia administration, including their uptake and distribution, mechanism of action, fate, biotransformation, and toxicity.
220A. Respiratory Anatomy and Physiology for Nurse Anesthetists I (2 units). Lecture, two hours; discussion, one hour. A study of the structure and function of the respiratory system, with emphasis on anatomy and physiology at the cellular level.

Ms. Ward

220B. Respiratory Anatomy and Physiology for Nurse Anesthetists II (2 units). Lecture, two hours; discussion, one hour. A continuation of respiratory anatomy and physiology, with emphasis on the respiratory system as related to anesthesia administration and recent developments.

Ms. Ward

220C. Respiratory Anatomy and Physiology for Nurse Anesthetists III (2 units). Lecture, two hours; discussion, one hour. A continuation of the study of respiratory anatomy and physiology as related to anesthesia administration and relevant problems.

Ms. Ward

221. Cardiovascular Anatomy and Physiology for Nurse Anesthetists. Lecture, four hours; discussion, one hour. An integrated study of the anatomy and physiology of the C-V system as related to the management of anesthesia administration.

Ms. Ward

M222. Biological Control Systems. (Same as Electrical Engineering M243.) Prerequisite: Electrical Engineering 14. Introduction to the modeling and analysis of biological control systems, such as the respiratory system, cardiovascular system, and neuromuscular system, with emphasis on solving problems of current interest in biomedicine.

Mr. Wiberg

223. Anatomy and Physiology of the Endocrine and Excretory Systems for Nurse Anesthetists. Lecture, four hours; discussion, one to two hours. An integrated study of the endocrine and excretory systems as related to the management of anesthesia administration.

Mr. Katz

225A-225B. Anatomy and Physiology of the Nervous System for Nurse Anesthetists (2 units each). Lecture, two hours; discussion, one to two hours. An integrated study of the anatomy and physiology of the nervous system as related to the management of anesthesia administration.

Ms. Rubenstein

290. Anesthesia Seminar for Nurse Anesthetists (2 units). Discussion, two to three hours. Discussion of research methods, basic statistics, and critical scientific papers in relation to anesthesia research and practice.

Ms. Waugaman and the Staff

400A. Basic Clinical Anesthesia for Nurse Anesthetists I (2 units). Lecture, three hours; laboratory, 30 hours. Prerequisite: course 402. Correlation of techniques of anesthesia administration with basic science knowledge as applied in the clinical area with supervised practice. S/U grading.

Ms. Frye and the Staff

400B. Basic Clinical Anesthesia for Nurse Anesthetists II (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400A. A continuation of the practice of techniques of anesthesia administration as applied in the clinical area with supervised practice. S/U grading.

Ms. Frye and the Staff

400C. Basic Clinical Anesthesia for Nurse Anesthetists III (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400B. A continuation of techniques of anesthesia administration as applied in the clinical area with supervised practice. S/U grading.

Ms. Frye and the Staff

400D. Clinical Anesthesia for Nurse Anesthetists IV (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400C. A practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

Ms. Frye and the Staff

400E. Clinical Anesthesia for Nurse Anesthetists V (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400D. A practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

Ms. Frye and the Staff

400F. Clinical Anesthesia for Nurse Anesthetists VI (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400E. A practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

Ms. Frye and the Staff

400G. Clinical Anesthesia for Nurse Anesthetists VII (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400F. A practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

Ms. Frye and the Staff

401. Legal Aspects and Bioethics (2 units). Lecture, two hours; discussion, 30 minutes to one hour. Prerequisite: consent of department. Introduction to the history, bioethics, and legal aspects of nurse anesthesia. Exploration of the psychology related to the patient undergoing surgery and anesthesia.

Mr. Katz and the Staff

597. Preparation for M.S. Oral Qualifying Examination (2 units). Prerequisite: consent of instructor. Opportunity to pursue comprehensive study in anesthesiology and related areas on an individual basis, with the opportunity for discussion of the material with the instructor.

Ms. Katz

599A. Research in Anesthesia I (2 units). Prerequisite: course 599A. Research in Anesthesia I: An integrated research study toward the M.S. degree.

Ms. Ward

599B. Research in Anesthesia II (2 units). Prerequisite: course 599A. Opportunity to pursue anesthesiology research for thesis preparation. Independent research of quality suitable for publication required. May be selected instead of the oral comprehensive examination for completion of the M.S. program.

Ms. Ward

Scope and Objectives

Modern biochemistry is both intellectually and methodologically a wide-ranging and expanding field of science; it has grown well beyond its initial definition as the chemistry of living things. People who call themselves biochemists work in areas as diverse as medical research, nutrition, pharmacology, crystallography, virology, genetic manipulation, and cellular or molecular biology, as well as the "traditional" studies of metabolism, enzymology, and molecular structure.

The Biological Chemistry Department at UCLA attempts to provide students with the necessary background for continued growth in this fast-changing science. As a part of the School of Medicine, the department is involved in the basic education of students who will be practicing physicians, as well as medical research specialists. But through its graduate program and its interactions with other graduate departments, it deals with students whose primary interests are in biochemistry and other related sciences.

The department emphasizes biochemical research leading to the Ph.D. degree; the faculty represents a variety of research areas, and graduates find employment in a multiplicity of research or research-related fields, as well as in teaching. The department also offers limited opportunities for research or nonresearch study toward the M.S. degree.
Requirements for Graduate Degrees

Admission
In addition to the University's minimum requirements, which include a bachelor's degree (preferably in chemistry or a biological science), students should normally have completed the following: general chemistry, quantitative chemistry, organic chemistry (with laboratory), physical chemistry (with laboratory), general physics, mathematics through calculus, and general biology (or bacteriology, botany, zoology, biochemistry, or molecular biology). More advanced courses in these areas are also recommended where possible.

You are expected to take the Graduate Record Examination (GRE) General Test, preferably in October or before, but no later than December of the year prior to expected admission. It is strongly recommended that you also take the GRE Subject Test in either Biology or Chemistry. In exceptional circumstances, the GRE test requirements may be waived by the departmental graduate admissions committee. If your native language is other than English, you are expected to take an appropriate examination which tests proficiency in English (e.g., TOEFL) prior to the time of application to this department.

There is no separate application form required for admission to the department, but at least three letters of recommendation are required. Have them sent directly to the Graduate Information Office at the address below.

Departmental brochures and information may be obtained by writing to the Graduate Information Office, Department of Biological Chemistry, 33-257 CHS, UCLA, Los Angeles, CA 90024-1737.

Course Requirements
All graduate students must take four of the following core courses (Biological Chemistry M248, M253, M255, M263, and M267) unless excused by the graduate adviser. (See additional course requirements under each degree program.)

Written Qualifying Examination
After completing the core course requirements (see above), you must take the departmental written examination (usually given in July; may be given in January or at other times if there is sufficient need). This examination is formulated by the departmental graduate student guidance committee from questions submitted by the various faculty members, who also evaluate your answers to the questions. The committee evaluates your overall performance on the examination and makes a recommendation to the departmental faculty of one of the following: (1) pass at the Ph.D. level of achievement; (2) pass at the master's level of achievement; (3) fail.

The departmental faculty can approve or change the recommended action and can authorize a reexamination in case of failure (consent is rarely given to take the test a third time). The faculty may also recommend or require additional coursework in specific areas prior to taking the examination a second time, or before taking final action on the results of the written examination.

Master of Science Degree

Course Requirements
In addition to the core course requirements described above for all students, elective courses must be taken to complete the total of nine courses (36 units) required for the degree.

No more than two courses (eight units) in the 500 series may be applied toward the total course requirement, and only one (four units) of the two courses may be applied toward the minimum graduate course requirement (20 units) for the degree.

With consent of the graduate adviser, Biological Chemistry 596, 597, and 598 may be taken if they are appropriate to your program. All three courses are graded S/U and may be taken as often as necessary.

Comprehensive Examination Plan
In general, the department prefers students to enter directly into the Ph.D. program, but if you enter the master's program, the comprehensive examination plan is preferred. Only in exceptional situations is a student approved for the thesis plan. In either plan you must pass the departmental written examination at the master's level of achievement (see above). Only course requirements and the written examination are needed to complete the comprehensive examination plan.

Thesis Plan
In addition to coursework, a written thesis is required. A thesis committee helps you plan the thesis research, determines the acceptability of the thesis, administers a final examination (if deemed appropriate), and recommends appropriate action on the granting of the degree. In the event of an unacceptable thesis or performance on the final examination (if one is given), the thesis committee determines if it is appropriate for additional time to be granted to rewrite the thesis or to be reexamined.

Ph.D. Degree

Admission
Students are not required to obtain a master's degree prior to admission into the doctoral program and do not usually obtain a master's degree as part of the normal progress toward the Ph.D.

Course Requirements
In addition to the general course requirements listed above, students in the Ph.D. program are expected to complete:

(1) Biological Chemistry 220A-220B-220C (each quarter during the first year). You must arrange for at least two rotations in the laboratories of different faculty members to help in the selection of a research adviser.

(2) Three or four elective courses (total of 10 to 12 units) in addition to the core courses described above. One of the courses must be a scientific language/instrumentation course (e.g., computer language, statistics, electron microscopy). Elective courses may be selected from those offered by any department.

(3) Courses 596, 597, and/or 599 during quarters in which research (596, 599) or study for written or oral examinations (597) is part of your program. Course 599 is for students who have passed their oral examinations; course 596 is for those who have not.

Teaching Experience
All students in the doctoral program are expected to participate in teaching activities by assisting the faculty in a laboratory for medical students (usually one day a week for one quarter during the second year) and by assisting in the grading of examinations (usually one to two times per quarter starting in the second year).

Qualifying Examinations
If you have passed the departmental written examination at the Ph.D. level of achievement (see above), you should consult with the department chair, who is responsible for nominating faculty members to serve on your doctoral committee.

The University Oral Qualifying Examination, which must be passed before you can be advanced to candidacy, consists of the presentation and defense of a research proposal to the doctoral committee. This proposal should not be in the area of your dissertation research. The doctoral committee determines whether you pass the examination and whether reexamination is allowed in case of failure. The examination may be repeated only once. It is expected that students will complete the University Oral Qualifying Examination by the beginning of the third year of graduate work.

Final Oral Examination
The doctoral committee may elect to waive the final oral examination.
Articulated Degree Program

Students may apply for the M.D./Ph.D. program by making simultaneous applications for graduate standing in this department and for admission to the School of Medicine. Acceptance by both of the concerned units is necessary. Certain changes in the requirements (e.g., fewer required courses) allow some savings in time compared to separate M.D. and Ph.D. degrees.

Upper Division Course

102C. Biological Chemistry Seminar (Dental Students) (1 unit). Seminar, four hours (five weeks). Required in the dental curriculum; consent of instructor required for nondental students. The seminars, given by the students to small discussion groups, involve presentation of material from current research dealing with biochemical studies. (W)

Graduate Courses

201. Biological Chemistry (5 units). (Formerly numbered 201A-201B.) Prerequisites: organic chemistry; consent of instructor required for nonmedical students. General and specialized aspects of biochemistry beyond the level ordinarily considered in undergraduate courses. Emphasis on mammalian systems. Mr. Sigman, Mr. Wickner, and the Staff (Sp, first eight weeks)

202. Biological Chemistry (5 units). (Formerly numbered 101A-101B.) Prerequisites: organic chemistry; consent of instructor required for nonmedical students. General biochemistry with emphasis on mammalian systems. Structure, function, and metabolism of major cellular components. Mr. Glitz and the Staff (Sp, first eight weeks)

203. Biological Chemistry (5 units). (Formerly numbered 101B-101C.) Prerequisites: course 201 or 202; consent of instructor required for nonmedical students. Continuation of courses 201 and 202. General biochemistry with emphasis on mammalian systems. Metabolism and its regulation in eukaryotes. Mr. Fulco and the Staff (Sp, second eight weeks)

204. Biological Chemistry Laboratory (1 unit). (Formerly numbered 101E.) Discussion, one hour; laboratory, six hours. Prerequisite: consent of instructor required for nonmedical students. Experiments illustrating techniques and procedures in medically related biochemistry; analysis of experimental results. S/U or letter grading.

205A-205B. Biological Chemistry Lecture (Dental Students). (Formerly numbered 202A-202B.) Lecture, three hours. Prerequisites: courses necessary for admission to dental school. Required in the dental curriculum; consent of instructor required for nondental students. The biochemical properties and structures of living systems, with special emphasis on mineral metabolism and nutrition.

Ms. Zamenhof and the Staff (F, 205A; W, 205B)

220A-220B-220C. Research Laboratory Rotations (2 to 8 units each). Prerequisite: consent of instructor. Students arrange apprenticeships in the laboratories of one or more departmental faculty members and engage in a research project under close faculty direction. Allows students to acquire in-depth laboratory experience in specific research areas and facilitates an informed decision on their part in the selection of a thesis/research adviser. S/U or letter grading. Mr. Fulco and the Staff (F, 220A; W, 220B; Sp, 220C)

M221A-M221B. Cellular and Molecular Neurochemistry. (Formerly numbered 221.) Prerequisite: Anatomy M221A-M221B, Neuroscience M221A-M221B, Pharmacology M221A-M221B, and Psychiatry M221A-M221B.) Lecture, three hours. Prerequisites: courses 202, 203, or equivalent. Contemporary neurochemistry for students with a general background in biochemistry. The biochemical and structural properties of the nervous system in relation to its development and functions, introduction to disorders that result from alterations in the fundamental biochemistry of the nervous system. Although the subject is treated in an interdisciplinary manner, course progresses from structure through chemistry to function in precise manner and biological terms. (W,Sp)

222. Biochemistry of the Synapse (2 units). Prerequisite: course M221A. Detailed analysis of the research literature dealing with biochemistry of the synapse. Metabolism, storage, and release of transmitter; transmitter receptors and functions; neuronal plasticity. Mr. Howard

M248. Molecular Genetics. (Same as Biology M248.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on the use of genetic techniques for addressing fundamental questions, both eukaryotic and molecular biology. Topics include mutation, organism, selection, recombination, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.

Mr. McEntee and the Staff (Sp)

M253. Macromolecular Structure (6 units). (Same as Chemistry M253.) Lecture or recitation, five hours. Prerequisites: courses 202 and 203, or Chemistry 110A, 115A, 157A, or 157B, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure cloning and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. (F)

M255. Biological Catalysis (2 units). (Same as Chemistry M255.) Prerequisites: course 201 or 202 or Chemistry 156, 157B, or 157A, and 110A, or equivalent, consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for the study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy. Emphasis on important biologically active agents and artificial enzymes.

Mr. Sigman (Sp)

M257. Physical Chemistry of Biological Macromolecules (2 units). (Same as Chemistry M257.) Prerequisite: Chemistry 25 or 110A or consent of instructor. Comprehensive treatment of lipid nutrition and metabolic-nutritional aspects. Mr. Edmond and the Staff (W)

M261. Advanced Chemistry, Biochemistry, and Nutrition of Lipids. (Same as Chemistry M261 and Public Health M262D.) Lecture, three hours; discussion, one hour. Prerequisites: courses 202 and 203 or Chemistry 157A and 157B, or equivalent, consent of instructor. Comprehensive treatment of lipid nutrition and metabolic-nutritional aspects. Mr. Edmond and the Staff (W)

M263. Metabolism and its Regulation. (Formerly numbered M263.) (Same as Chemistry M263.) Lecture, three hours. Prerequisites: course 202 or 203 or Chemistry 156, 157A, or 157B, and 110A, or equivalent, consent of instructor. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of control mechanisms of metabolism in relation to physiological function. (Sp)

M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics (3 units each). (Same as Chemistry M264A-M264B-M264C.) Prerequisites: course M261 or equivalent, consent of instructor. The biochemistry, morphology, and physiology of the atherosclerotic lesion. Emphasis on the chemistry of lipoproteins and the role of plasma lipoproteins in the regulation of tissue lipid metabolism and the development of atherosclerosis. Each course may be taken independently for credit.

Mr. Edwards and the Staff (F, M264A; W, M264B; Sp, M264C)

M265A-M265B-M265C. Seminar in Molecular Embryology (2 units each). (Same as Biology M265A-M265B-M265C.) Prerequisite: consent of instructor. An advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

Mr. De Robertis, Mr. Zipursky

M267. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Chemistry M267.) Lecture or recitation, five hours. Prerequisites: course 202 and 203 or Chemistry 110A, 115A, 157A, or 157B, or equivalent, consent of instructor. Recommended: course M253. Cell cycle DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development.

Mr. Hershman and the Staff (W)

M298. Seminar on Current Topics in Molecular Biology (20 units). (Same as Biology M298, Chemistry M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

(F,W,Sp)

596. Directed Individual Study and Research (2 to 12 units). Hours to be assigned by Biology. Prerequisite: consent of instructor. S/U or letter grading.

597. Preparation for Examinations (2 to 4 units). Prerequisite: consent of graduate adviser. Individual study for Ph.D. qualifying examinations or M.S. comprehensive examination. S/U grading.

Biomathematics

AV-617 Center for the Health Sciences, (213) 825-5018

Professors

Abdelmonem A. Affi, Ph.D.
Virginia A. Clark, Ph.D.
Robert M. Elashoff, Ph.D.
Henry Huang, D.Phil.
Donald J. Jenden, M.D., Ph.D. (h.c.)
Roderick J.A. Little, Ph.D.,
Vice Chair
Frank J. Massey, Ph.D.
Carol M. Newton, M.D., Ph.D.
Michael E. Phelps, Ph.D.
M. Arme Spence, Ph.D., in Residence
Wilfrid J. Dixon, Ph.D., Emeritus
Requirements for Graduate Degrees

Admission
High academic achievement in one scientific or mathematical field is required. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) should be taken. At least three letters of recommendation are required from faculty competent to evaluate your qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the Graduate Admissions Office application forms, you are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to the Chair, Graduate Admissions Committee, Department of Biomathematics, AV-617 CHS, UCLA, Los Angeles, CA 90024-1766. You are admitted to either program after you have achieved admission to the Graduate Division and have been approved by the departmental graduate admissions committee.

Master of Science Degree

Course Requirements

In fulfilling the University’s minimum requirement of nine courses, master’s candidates must complete at least five graduate-level courses in biomathematics, of which Biomathematics 201, 202, and 203 are required.

No more than two 596 courses may be applied toward the required nine courses, and none may be applied toward the graduate course requirement.

Thesis Plan

You generally are required to follow the comprehensive examination plan. Permission to undertake a thesis plan must be given by the departmental advisory committee, which must approve the thesis committee, as well as your plans for the thesis.

Comprehensive Examination Plan

A written comprehensive examination administered by a committee consisting of at least three faculty members appointed by the chair, with approval of the advisory committee, covers material presented in your coursework. This is usually the written comprehensive examination for the doctoral program given during the summer, but in exceptional cases a special committee and written examination are provided.

Ph.D. Degree

Major Fields or Subdisciplines

Each student completes the requirements for a field of special emphasis in biology. Presently approved fields of special emphasis for which courses of study have been developed include genetics, immunology, neurosciences, pharmacology, and physiology. Others may be added in response to students’ requests.

Course Requirements

The following courses are required:
- Biomathematics: 201, 202, 203, 204, and eight units from 205, 206, 207A or 207B (but not both), 209.
- Mathematics: Five graduate courses from an approved list, with two substitutions possible if especially appropriate to your research field. (Consent may be given by the advisory committee at the time of admission to the program to count prior graduate courses for full or partial completion of this requirement.)
- Biology: Courses required for the field of major biological emphasis.

Independent Research: Each student must take at least four units of Biomathematics 596 with a member of the Biomathematics Department each year prior to taking the written comprehensive examination. As you progress, there is increasing emphasis on research and encouragement to publish. Failure to advance in capacity for independent, creative research is a primary indication for recommended withdrawal from the program.

The following courses are recommended:
- Mathematics: By individual study or coursework, you should have strength in differential equations, probability and statistics, and real and complex analysis. Offerings in the Department of Mathematics are especially recommended.
- Statistics: Additional training in biostatistics is highly recommended (see offerings in the School of Public Health).
- Computer Methods: You must be a facile programmer and acquainted with numerical methods needed for your area of research. The numerical analysis sequence in the Department of Mathematics and computing courses in biomathematics are suggested.

Biology and Biological Chemistry: A broad background is expected, from molecular to organ-system levels. This probably will be provided in requirements for the field of major biological emphasis; supplemental coursework will be advised, if needed.
Teaching Experience

One teaching preceptorship (Biomathematics 596) is required. You participate fully in the planning and delivery of one course in the Biomathematics Department. The emphasis is on your training in all aspects of preparing for and offering a course; this is not a service-oriented teaching assistantship.

With consent of the advisory committee, a student who does not plan to pursue an academic teaching career may, for one quarter, participate at the level of one 596 course in the individual-instruction activities of a member of the department faculty (e.g., informal instruction of biomedical scientific collaborators, planning and guiding individual reading programs, developing and administering term projects in research).

Qualifying Examinations

In the summer, the department offers a written comprehensive examination to test your competence in biomathematics. Full-time students must take this by the end of two academic years of study and part-time students by the end of three.

The qualifying examination in the field of major biological emphasis usually is the regular comprehensive examination for doctoral students in that field and is taken prior to the examination that advances them to candidacy. Students entering with a Ph.D. in a biological field are exempt from the above requirements. Students with an M.D. are exempt from the required coursework; exemption from the examination may be granted by joint action of the curriculum and advisory committees in consultation with advisers from the specialty area.

The University Oral Qualifying Examination, administered by the doctoral committee appointed by the dean of the Graduate Division, critically probes the quality, scope, and feasibility of your proposed dissertation work. It explores the integration and strength of biomathematical, mathematical, and biological expertise in your intended area of research. You advance to candidacy after passing this examination.

Final Oral Examination

A final oral examination is required of all candidates and is a defense of the dissertation, administered by the doctoral committee.

Upper Division Courses

110. Elements of Biomathematics. Lecture, three hours; laboratory, three hours. Prerequisite: calculus. Analysis of deterministic models. Conditions under which deterministic and probabilistic descriptions of biological phenomena are appropriate. Both approaches are applied to selected examples in physiology and biology. Mr. Engel (F)

120A-120B. Computing and Informatics in Biology and Medicine (2 units each). Lecture, two hours; laboratory, one hour; self-instruction in computing, to be arranged. Prerequisite: consent of instructor. Biomedically oriented introduction (for students with heavy laboratory background) to basic computing concepts, use of widely available software on microcomputers and large computers, survey of biomedical applications/data bases, programming, P/NP or letter grading.

Mr. McCoy, Ms. Newton (F, 120A; W, 120B)

Mr. Jennich (F, M153A; W, M153B)

CM156. Human Genetics. (Same as Biology CM156.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 25. The application of genetic principles in human populations, with emphasis on cytotgenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and the methodologies appropriate to answer such questions. Concurrently scheduled with course CM25A.

Mr. Merriam, Ms. Spence (Sp)

160. Introductory Biomathematics for Medical and Biological Research. Lecture, four hours; discussion, 90 minutes. An elementary statistics course that focuses on statistical concepts and critiques the literature, with emphasis on clinical research. Output from statistical computer packages discussed in class, but students do not use the computer themselves. Topics include descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination, etc. (W)

170A. Computer-Based Introductory Biomathematics for Medical and Biological Experimenters. (Not the same as course 170A prior to Fall Quarter 1985.) Lecture, four hours; discussion, 90 minutes. An intensive statistics course emphasizing the design of experiments and analysis of data using statistical packages. Statistical topics similar to course 160 — descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination — but students also shown how to use the computer and run statistical software packages. Practical aspects of data collection and cleaning. (F)

170B. Statistical and Mathematical Modeling in Medical and Biological Research. (Not the same as course 170B prior to Spring Quarter 1986.) Lecture, four hours; discussion, 90 minutes. A second course in biomathematical methods. Topics include randomization methods, intermediate experimental design, contingency table analysis, analysis of variance, multiple linear regression, nonlinear regression, methods of classification, model checking, basic mathematical models including comparison models, and statistical computer software. Students have the opportunity to design their own experiments and analyze them on the computer, and to analyze previously collected data. (Sp)

172. Clinical Trials. Lecture, three hours; discussion, two hours. Prerequisites: Public Health 100C or 100D or Statistics 152B or equivalent. Topics include steps in bringing a possible therapy to clinical use; design of studies in animals to assess antitumor response; randomization, historical controls, sample size of study, stratification, and points; ethics of human experimentation; informed consent; three phases of human studies; indications for various types of controls, prognostic factors, survivorship studies, design of diagnostic studies; organization of a clinical trial — administration, comparability, protocols, nursing and clinical standards, data collection and management. Mr. Elashoff (W)

190HA-190HB. Honors Research in Biomathematics. Prerequisites: upper division standing, consent of instructor and department chair. Individual research in some aspect of biomathematics designed to acquaint students in depth with mathematical models and computer applications in biology. Must be taken for at least two quarters and for a total of at least eight units. Thesis required. Ms. Spence (F, W, Sp)

199. Special Studies in Biomathematics (2 to 8 units). Prerequisites: upper division standing, consent of instructor. Special studies in biomathematics, including either reading assignments or laboratory work, both designed for appropriate training of students. (F, W, Sp)

Graduate Courses

200. Research Frontiers in Biomathematics (2 units). Prerequisite: consent of instructor. A series of presentations by the faculty on research frontiers in biomathematics. S/U grading. (F, even years)

201. Deterministic Models in Biology. Prerequisite: knowledge of linear algebra and differential equations. Examination of the conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physical control systems, and cellular/animal population models.

Ms. Newton (F)

Mr. Lange (W)

203. Stochastic Models in Biology. Prerequisite: Mathematics 115A, knowledge of linear algebra in probability. The mathematical description of biological relationships, with particular attention to areas where the conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and a variety of other biological and medical disciplines.

Mr. Lange (Sp)

204. Biomedical Data Analysis. Prerequisite: consent of instructor. The quantity and quality of observations can be greatly affected by the present-day extensive use of computers. A problem-oriented study of the latest methods in statistical data analysis and the use of such arising in laboratory and clinical research.

Mr. Little (Sp)

205. Electric Potential Problems in Membranes, Cells, and Tissues. Prerequisite: knowledge of differential equations and electrostatics, or consent of instructor. Review of electrostatics; potential problems in angular coordinates; cylindrical coordinates; modeling subthreshold electrical properties of cells; microelectrode measurements of intracellular potentials; boundary conditions for current flow across membranes; eigenfunction expansions and singular perturbation analysis of intracellular and extracellular potential distribution in spherical and cylindrical cells and synaptica; computation of potential barriers for ions traversing a membrane pore.

Mr. Peskoff (Sp)
The end of the quarter are quite substantial. (Sp) Though the programming skills that are attained by formulate and then implement the best approach or optimal experiment design.

Mr. Landaw (Sp)

M230. Computed Tomography: Theory and Applications. (Same as Radiological Sciences M230.) Prerequisite: consent of instructor. Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications.

Mr. S-C. Huang (W)

M231. Special Topics: Statistical Methods for Categorical Data. (Same as Public Health M201E.) Lecture, three hours; discussion, one hour. Prerequisites: Public Health 100B or 101B, Statistics 152C or equivalent, consent of instructor. Statistical techniques for the analysis of categorical data, discussion and illustration of their applications and limitations.

Mr. Korn (W)

M232. Statistical Analysis of Incomplete Data. (Same as Public Health M202F.) Lecture, three hours; discussion, one hour. Prerequisites: Public Health 101C, Statistics 152C, or equivalent, consent of instructor. Discussion of the statistical analysis of incomplete data sets, with material from the sample survey, econometric biometrics, psychometrics, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of the methods to applied problems, as well as on the underlying theory.

S/U or letter grading. Mr. Little (Sp, odd years)

M233. Simultaneous Statistical Inference. (Same as Public Health M202G.) Lecture, three hours; discussion, one hour. Prerequisites: Public Health 200C, M205A, Statistics 152C. Methods and theory of simultaneous statistical inference.

Mr. Korn (Sp, odd years)

M234. Applied Bayesian Inference. (Same as Public Health M202H.) Lecture, three hours; discussion, one hour. Prerequisites: Public Health 200C, M205A, and Statistics 152C, or consent of instructor. The Bayesian approach to statistical inference is the basis of many advanced computational methods for quantifying uncertainty in scientific and social science research. Bayesian inference is well suited to small datasets and situations where the prior information may be dominated by the data.

Mr. Little (Sp, even years)

CM256. Human Genetics. (Same as Biology CM256.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 25. The application of genetic principles in human populations, with emphasis on cyto genetic, biochemical genetics, population genetics, and medical genetics. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and the methodologies appropriate to answer such questions. Completion of Biology course CM156. Independent research project required of graduate students.

Mr. Meriam, Ms. Spence (Sp)

M270. Optimal Experimental Design and Control for Biological and Other Dynamic Systems. (Same as Computer Science M296B and Medicine M270D.) Prerequisites: Computer Science 272B and M296A, or consent of instructor. Theory and algorithms for designing optimal experiments for quantifying or optimal inputs for controlling dynamic systems in engineering and life sciences. Optimal sampling schedules for parameter estimation. Control optimization and variations for designing optimal test inputs. Algorithms, software, and applications in medicine and engineering.

Mr. Landaw (W)

M280. Computational Statistics. (Same as Mathematics M280 and Public Health M270J.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: pivoting and other techniques used in stepwise regression, nonlinear regression algorithms, algorithms for balanced and unbalanced analysis of variance, including the mixed model, iterative rescaling, and other methods for log-linear models.

Mr. Jenrich (F)

M281. Survival Analysis. (Same as Public Health M201K.) Lecture, three hours; discussion, one hour. Prerequisites: Public Health 100C, Statistics 152C, or equivalent, consent of instructor. Statistical methods for the analysis of survival data.

Mr. Elashoff (F)

596. Directed Individual Study or Research. Biostatistics (2 to 12 units). Individual study on topics not yet covered by the offerings of the department. May be repeated for credit with topic change.

S/U grading. (F, W, Sp)

Medicine

32-115 Center for the Health Sciences, (213) 825-6275

Chair

Roy T. Young, M.D.

Scope and Objectives

The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught information acquisition through history taking, physical examination, and laboratory evaluation; information synthesis through achieving a differential diagnosis and evaluative plan; and medical decision making for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician-patient relationship.
Instruction in the department is provided in the second, third, and fourth years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty, ambulatory and hospital-based internal medicine, at all the major affiliated centers. For further details on the Department of Medicine and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Microbiology and Immunology

43-239 Center for the Health Sciences, (213) 825-5661

Professors
Benjamin Bonavida, Ph.D. (Immunology)
John L. Fahey, M.D. (Immunology)
Sydney M. Firegold, M.D., in Residence (Bacteriology)
Sidney H. Golub, Ph.D., in Residence (Immunology)
Marcus A. Horwitz, M.D. (Bacteriology)
Dexter H. Howard, Ph.D. (Mycology), Vice Chair
David T. Imagawa, Ph.D. (Virology)
James N. Miller, Ph.D. (Bacteriology)
Debi P. Nayak, B.V.Sc., Ph.D. (Virology)
Jack G. Stevens, D.V.M., Ph.D. (Virology), Chair
Jerrold A. Turner, M.D. (Parasitology), Vice Chair
Dexter H. Howard, Ph.D. (Mycology), Vice Chair
David T. Imagawa, Ph.D. (Virology)
Sydney M. Finegold, M.D., Ph.D., in Residence (Immunology)

Assistant Professors
Rafi Ahmed, Ph.D. (Virology)
David A. Campbell, Ph.D. (Parasitology)
Lawrence T. Feldman, Ph.D. (Virology)
Patricia Johnson, Ph.D. (Parasitology)
Mitchell Kronenberg, Ph.D. (Immunology)
Virginia L. Scottfield, Ph.D. (Immunology)

Lecturers
Margery L. Cook, Ph.D. (Virology)
Nina Dabrowa, Ph.D. (Mycology)
Maurice L. White, Ph.D. (Bacteriology)

Adjunct Associate Professor
George C. Fareed, M.D. (Virology)

Scope and Objectives
The desire to explain natural phenomena, including disease, is the basis for most students' interest in biological sciences. The Microbiology and Immunology Department in the UCLA School of Medicine is disease oriented. The emphasis is on pathogenesis of infection, malignancy, and immunological response of the host to these changes of immunological dysfunction. All tools available from molecular biology to morphological methods are applied to these problems.

Microbiology and Immunology are interwoven disciplines. Microbiology has played a central role in all aspects of biological sciences, including morphogenesis, genetics, developmental biology, physiology, biochemistry, and cell biology. An understanding of microbiology is thus fundamental to biological research. Immunology, once a branch of microbiology, is now a major biological discipline and a basic component of disease-oriented microbiology.

The graduate program in microbiology and immunology is closely associated with advanced (postdoctoral) training in research, clinical and public health diagnostic work, and industrial applications. Careers in microbiology and immunology include industrial appointments and clinical laboratory supervision in both government agencies and private enterprises and academic positions.

Master of Science Degree
The department does not accept students whose sole objective is a master's degree.

Ph.D. Degree
Admission
In addition to the University minimum requirements, the following items are required:
1. A bachelor's degree with a major in either the biological or physical sciences.
2. At least a B+ in chemistry, physics, and mathematics; at least a B average in biology (upper division and prior graduate study).
3. Three favorable letters of recommendation.
4. Graduate Record Examination (GRE) General Test and Subject Test in Biology.
5. Acceptable statement of purpose.
6. An interview with members of the department graduate student committee when indicated.

For departmental brochures and/or application forms, write to the Graduate Student Office, Department of Microbiology and Immunology, 43-204 CHS, UCLA, Los Angeles, CA 90024-1747.

Major Fields or Subdisciplines
You are expected to be competent in both microbiology and immunology. However, you must do your thesis work in one of the following divisions: immunology, medical microbiology, or virology.

Foreign Language Requirement
There is no foreign language requirement for the degree.

Course Requirements
1. Microbiology and Immunology 202A, 202B, 202C, 202D, M226A, M226B are required and must be completed during your first year of study.
2. Course 596 is required. You complete a laboratory rotation program during your first year of study.
3. Chemistry M253 and two courses in molecular biology (Microbiology and Immunology 250, 264) are required.
4. Additional course requirements are determined by your major field and your preceptor.

Teaching Experience
Teaching assignment in one laboratory section of Microbiology and Immunology 201, 212, or another laboratory course presented by the department is required.

Qualifying Examinations
The departmental written qualifying examination is to be taken at the end of your first year of graduate study. The examination consists of written tests in all three areas of study (immunology, microbiology, and virology). You select one area as your major and the other two as your minor areas. The examination in microbiology (major or minor) covers the fields of bacteriology, and either mycology or parasitology. The examinations require factual knowledge, the ability to analyze experimental work, and the capacity to design problem-solving experiments and are graded on a pass/fail basis. Each examination may be repeated once if not passed. The makeup examination is administered no earlier than three months and no later than six months after the failure, unless specified remedial work requires a longer period for proper preparation.

You must complete the University Oral Qualifying Examination within three years (nine quarters) after entering the program. Advancement to candidacy is awarded after successful completion of this examination. If inadequacies are encountered, you may be required to repeat the examination.

The topic of your research proposal must be in a different area and use a different approach from that of your thesis project and research, but within the fields of interest in the department. You must be able to explain the research and results and demonstrate general knowledge of microbiology and immunology.
The details of the dissertation requirement are supervised by your professor and doctoral committee. The dissertation must demonstrate an original and independent contribution to scientific knowledge. A dissertation should be submitted in a major scientific journal and be presented in the University-required format.

Final Oral Examination
The final oral examination is optional with the doctoral committee. However, you are required to present a special seminar based on your dissertation.

Upper Division Courses

M185. Immunology. (Same as Biology M186 and Microbiology M186.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 23, 25, Recommended corequisite: Chemistry 152 or 156. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cell immune reactions.

Mr. Clark, Mr. Sercarz (F)

M186. Experimental Design in Immunology. (Same as Biology M186 and Microbiology M186.) Laboratory, 12 hours. Prerequisites: course M185, consent of instructor. Corequisite: course M187. Emphasis on a limited number of situations designed to train students in organizing and evaluating immunological laboratory experiments.

Mr. Clark, Mr. Sercarz (W)

M187. Immunology Seminar (2 units). (Same as Biology M187 and Microbiology M187.) Prerequisites: course M185, consent of instructor. Corequisite: course M185. Required of graduate students; aimed at training the student in how to read and evaluate scientific literature; designed to serve as a forum for the critical analysis of research papers.

Mr. Clark, Mr. Sercarz (W)

199. Directed Individual Research Studies in Microbiology and Immunology (2 to 8 units). Prerequisites: senior standing, consent of instructor (based on written research proposal). Individual research projects carried out under direction of a professor.

F, W, Sp

Graduate Courses

Undergraduates may enroll in some graduate courses with consent of instructor.

201. Microbiology and Immunology (8 units). Lecture/laboratory. Limited to medical students. Study of infectious agents of human disease, with emphasis on host-parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites, and viruses, and principles of prevention, treatment, and laboratory diagnosis.

F

202A. Fundamentals of Immunology (2 units). Prerequisite: consent of instructor. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cell-mediated immune functions.

F

202B. Medical Mycology and Parasitology (2 units). Prerequisite: consent of instructor. Morphology, physiology, and pathogenicity of fungi which cause human and animal diseases. Study of the morphology, biology, host-parasite relationship, public health importance, and control of protozoa, helminths, and arthropods parasitic in and on humans and animals.

F

M206. Secretary and Gastrointestinal Immunity (2 units). (Same as Oral Biology M206.) Review of the anatomy and physiology of the oral cavity, the intestines, and the related lymphatic and blood vascular systems in reference to the immune system. The secretory and systemic immune systems, with particular emphasis on the unique properties of S1gA. Discussion in terms of recent experimental findings of the ability to process enteric antigens, to respond, and to regulate enteric immunity. The role that enteric immunity may play in diseases of the GI tract, such as dental caries and inflammatory bowel diseases. Students participate in discussions following each lecture and present seminars based on a review of the relevant scientific literature.

Sp, alternate years

206. Molecular Biology of Animal Viruses. Lecture, three hours. Prerequisites: courses in general biochemistry and general microbiology, including virology (consent of instructor may be obtained in special cases). Recommended undergraduate students with a major in public health, biology, or microbiology and for graduate students with an interest in any field of biology or chemistry. An overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in the control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host.

Mr. Nayak (Sp)

210. Medical Myology (3 units). Lecture, four hours. Prerequisite: consent of instructor. A study of the morphology, physiology, and pathogenicity of fungi causing human and animal diseases.

Mr. Howard (Sp)

210L. Medical Myology (2 units). Laboratory, four hours. Prerequisite: consent of instructor. Required of undergraduate students. Laboratory application of principles discussed in course 210.

Mr. Howard (Sp)

212. Laboratory Procedures in Immunological Research (2 units). (Formerly numbered M212.) Prerequisite: course M185 or equivalent or consent of instructor. Limited to 25 students. A series of intensive laboratory workshops designed to acquaint students with the advanced methodologies utilized for immunological research. Workshops offered at regular intervals and last two to three days. Successful completion of four workshops constitutes the requirements for the course. May be repeated for credit with topic change. S/U grading.

F, W, Sp

222. Membrane Behavior. (Formerly numbered M222.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Description and relation of membrane structure and biogenesis to the function of members to and mediators of normal and pathological biological responses. Development of general principles of membrane behavior from studies of simple and complex model systems.

Mr. Turner (Sp, alternate years)

M223. Membrane Research Seminar (2 units). (Same as Microbiology M223.) Seminar conducted by consent of instructor. Critical discussions of the current literature in membrane research, with emphasis on the relationship between structure and function in lipid bilayer system. S/U grading.

Mr. Miller and the Staff (W)

M225A. Principles of Microbial Pathogenesis. (Same as Biology M225A and Microbiology M225A.) Lecture, one hour; discussion, three hours. Prerequisites: courses 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. A lecture-discussion format designed to analyze the basic pathogenesis of bacterial and mycotic infections. Emphasis on molecular and cellular approaches to an understanding of host-microbial interactions.

Mr. Ahmed and the Staff (Sp)

250. Cell and Molecular Biology. Lectures and student seminar presentations. A review of selected current topics in molecular and cellular biology. Topics will include recent experimental results on the organization, expression, and regulation of genes in eukaryotic cells. S/U or letter grading.

Mr. Feldman (W)

251. Selected Topics on the History of Microbiology (2 units). Lecture, one hour; discussion, one hour. Consideration of the history of infectious diseases, their host-parasite relationships, etiology, pathogenesis, epidemiology, diagnosis, and immunity. S/U or letter grading.

Mr. Howard (W)

254. Immunogenetics (2 units). Review of current literature in the field of immunogenetics, with emphasis on fundamental studies involving genetic and immunological principles and techniques. Selected topics discussed and results interpreted; conclusions and experimental methods evaluated.

Ms. Sciofield (Sp)

M256. Seminar in Viral Oncology (2 units). (Same as Pathology M256.) An advanced research seminar designed to consider the current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

Mr. Baluta

M258A. Molecular Genetics of the Immune System (3 units). (Same as Biology M258A and Microbiology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or 202A or equivalent or consent of instructor. Reading and discussion of current research articles on immunogenetics of immunoglobulin D, II, oncogenes of the immune system, T cell antigen receptor, and loci affecting differentiation. S/U or letter grading.

Mr. Wall and the Staff (W, five weeks)

M258B. T and B Cell Function (2 units). (Same as Biology M258B and Microbiology M258B.) Lecture, two hours; discussion, two hours. Prerequisites: course M185 or 202A or equivalent or consent of instructor. Reading and discussion of current literature and research articles on ontogeny, activation, and effector function of T and B cells. S/U or letter grading.

Mr. Bonavida and the Staff (W, five weeks)

M258C. Major Histocompatibility Complexes (2 units). (Same as Biology M258C and Microbiology M258C.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or 202A or consent of instructor. Reading and discussion of current research articles on the structure, function, MHC chromosomal regions and genes, MHC polymorphism, MHC-linked systems, MHC-linked genes, MHC and disease, and nonimmune function of MHC. S/U or letter grading.

Mr. Clark, Ms. Sciofield (Sp, five weeks)
M255D. Immunopathology (2 units). (Same as Bi- ology M258D and Microbiology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or 202A or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immu- nocomplex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immu- nedeficiency disease. S/U or letter grading.

Mr. Porter (Sp, five weeks)

M255E. Immunoregulation (2 units). (Same as Bi- ology M258E and Microbiology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course M185 or 202A or consent of instructor. Reading and discussion of current research articles on idiotypic networks, suppressor T cells, tolerance at T and B cell levels, and Ir gene control. S/U or letter grading.

Mr. Sercarz (F, five weeks)

M255F. Immunobiology of Cancer (2 units). Prerequisite: consent of instructor. Reading of recent literature in the immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, hormonal response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U grading.

Mr. Golub (Sp, alternate years)

252. Immunology of Cancer (2 units). Prerequisite: consent of instructor. Review of recent literature in the immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, hormonal response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U grading.

Mr. Bonavida

M263. Cellular Immunology Seminar (2 units). (Same as Microbiology M263.) Prerequisite: consent of instructor. Critical discussions of the current literature in T and B cell immunity, with emphasis on molecular mechanisms.

Mr. Sercarz (F, W, Sp)

M254. Molecular Microbiology and Cell Biology (2 units). Prerequisite: consent of instructor. Discussion of selected current topics related to microbiology and cell biology, with special emphasis on an understanding of the basic phenomena at the molecular level. S/U grading.

Mr. Feldman (F)

270. Infection in Disease (2 units). Lecture, one hour; discussion, one hour. Prerequisite: basic immu- nology. Introduction to the role of immune processes in disease for students with prior knowledge of basic immunology. Topics include immunodeficiency, im- mediate hypersensitivity reactions, autoimmun disease, and immune complex-mediated diseases, to- gether with transplantation immunology, tumor immu- nology (re the role of immunity in infection). Students prepare a 20- to 30-minute presentation on a selected topic.

Mr. Fahey (W, alternate years)

274. Interactions of the Immune System and Nerv- ous System (2 units). Lecture, one hour; discus- sion, one hour. Prerequisites: graduate or postdoc- toral training in immunology, behavioral sciences, or neurosciences, consent of instructor. Limited to 10 students. Study of existing knowledge of the interrela- tionships between the central and peripheral nervous systems and the immune system. Review of research on CNS effects on immune function and vice versa, as well as human and animal studies linking stress to immune changes.

Mr. Fahey, Ms. Kemery

M293. Major Concepts in Oncology. (Same as Oral Biology M293 and Pathology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Discussion of current research articles on cancer immunology, genetics, membrane, macromo- lecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epi- demiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

Mr. Hankinson (W)

M296. Seminar on Current Topics in Molecular Bi- ology (2 units). (Same as Biological Chemistry M296, Biology M296, Chemistry M296, Microbiology M296, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of the departmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

(F, W, Sp)

596. Directed Individual Study or Research (2 to 8 units). Laboratory, to be arranged. Prerequisite: consent of graduate adviser. S/U grading.

597. Preparation for Ph.D. Qualifying Examina- tions (2 to 6 units).

599. Research for and Preparation of Ph.D. Dis- sertation (2 to 12 units). Research on an original problem in the field of microbiology and immunology to be selected by the graduate student with the advice of the adviser. Fields of study may be in bacteriology, immunology, mycology, parasitology, virology, tumor biology, or cell biology.

Molecular Biology

(Interdepartmental)

The Ph.D. degree program in Molecular Biology draws its staff members from participating departments in the health and life sciences and from the Molecular Biology Institute. For details on this interdisciplinary program, see Chapter 5 on the College of Letters and Science.

Neurology

C-128 Reed Neurological Research Center, (213) 206-6584

Chair
Robert C. Collins, M.D.

Vice Chairs
Robert W. Baloh, M.D.
Mark A. Goldberg, M.D., Ph.D., in Residence
Wallace W. Tourtellotte, M.D., Ph.D., in Residence
Claude G. Wasterlain, M.D., in Residence

Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mor- tality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neuro- logical Research Center provide means for a coordinated basic science and clinical re- search approach to neurological disorders, pa- tient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship at an affiliated hospital, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

For further details on the Department of Neu- rology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

reason.

few research fields have greater potential and

importance to mankind than neuroscience. The

brain is responsible for every human

thought, emotion, action, and accomplishment.

It is a miraculous organ which orches-

trates and paces human maturation; permits u

learn, remember, reason, and behave as we do; and coordinates the function of every other organ and structure in the body.

To understand this complex organ completely is, perhaps, an unapproachable objective since it is the principal organ responsible for mankind's evolution and is itself constantly evolving. Yet, basic questions relating to neural function and dysfunction are approachable, and the solutions to many human neurological and psychiatric disorders can be achieved only through brain research.

The interdisciplinary program of graduate training leading to the Ph.D. in Neuroscience utilizes facilities, resources, and activities of the Brain Research Institute and is administered by an interdepartmental degree commit-

de.

Ph.D. Degree

Admission

All applicants must satisfy the University mini-

mum requirements. In addition, Graduate Rec-

Goodness Exam (GRE) or Medical College Admis-

sion Test (MCAT) scores are required. Recommended preparation includes mathe-

matics through calculus and at least one year each of general chemistry, organic chemistry, physics, and basic biology. Three letters of recom-

mendation are required.

Information regarding the program may be ob-

tained by writing to the Neuroscience Office, 73-346 CHS, UCLA, Los Angeles, CA 90024-1761.

Major Fields or Subdisciplines

Biobehavioral sciences; neuroanatomy; neu-

rochemistry; neurocybernetics and communica-

tion; neuroendocrinology; neuroimmunolo-

gy; neuropathology; neuropharmacology; neu-

rophysiology.

Foreign Language Requirement

The program does not have a language re-

quirement but does have a breadth require-

ment which can be satisfied by one of the fol-

lowing methods:

(1) Passing the Graduate School Foreign Lan-

guage Test in one of the approved languages (French, German, or Russian) with a score of 500 or better. Any exceptions must be ap-

proved by the neuroscience committee.

(2) Completing an in-depth minor in an area related to your field. A minor is defined as at least eight units of study beyond the introd-

ucory level.

No student is advanced to candidacy who has not met this breadth requirement.

Course Requirements

Basic course requirements include Biology 171 (or Physiology 213, 214, or 215 with ap-

proval of the neuroscience committee), Bio-

mathematics 170A, 210, Neuroscience M201A-

M201B, M206A, M206B, M221A-M221B, 233, and electives and laboratory experience as de-

termined in consultation with your adviser.

Substitutions to the basic requirements may be made, depending on your background, with consent of the graduate adviser. You are ex-

pected to complete the core courses within your first two years of study.

Teaching Experience

Teaching experience is required for the de-

gree. However, such experience is obtained by virtually all students in Neuroscience 233, which is required.

Qualifying Examinations

A written qualifying examination is required fol-

lowing completion of the core requirements. The objective of this examination is to test your basic knowledge and ability to relate know-

edge in different neuroscience areas, to locate and interpret literature, and to apply research problems.

After passing the written qualifying examina-

tion, you and your adviser select your doctoral committee to administer the University Oral Qualifying Examination, which is normally tak-

en after the written qualifying examination and the breadth requirements have been com-

pleted.

When you have passed the oral examination, you are advanced to candidacy and may begin work on the dissertation.

Final Oral Examination

The final oral examination is optional with your doctoral committee.

Graduate Courses

2004A-200B-200C, Clinical Concepts in the Neuro-

sciences (2 units each). Information concerning neurological and psychiatric disorders for students from basic science backgrounds. S/U grading.

(odd years)

M201A-M201B-M201C, Functional Organization of Behavior (2 units each). (Same as Psychology M201A-M201B-M201C.) Prerequisite: consent of in-

structor. Course M201A is prerequisite to M201B, which is prerequisite to M201C. M201A. The development of behaviors within different species and the functional uses of behaviors; use of an evolutionary biological perspective as the framework. M201B. Re-

search studies designed to take into account the functional behavior of animals. M201C. Special ques-

tions of interest to students.

M204. Structure and Function of the Limbic Sys-

tem (2 units). (Same as Neurology M204.) Prerequi-

site: consent of instructor. Current knowledge of the mammalian limbic system presented by surveying studies of its developmental anatomy, intrinsic synap-

tic organization, synaptic chemistry, afferent and ef-

ferent circuits, and dysfunctions in memory and cog-

nition association with limbic system function. The pathophysiology of limbic epilepsy, related to normal limbic system structure and functions. Mr. Babb

205. Brain-Behavioral Strategies for the Neuro-

sciences (3 units). Prerequisite: consent of instruc-

tor. Emphasis on behavioral designs, methods, and instruments employed to test specific neurological af-

ferent-efferent and integrative systems of the central nervous system. The programming of signals and incen-

tives in arousal, habituation, classical condition-

ing, and operant conditioning paradigms discussed in terms of the neural challenges for the coping ani-

mal. Emphasis on behavioral methods, along with concurrent recording of neurophysiological data. De-

signed primarily to present practical behavioral tech-

niques to neuroscience students

M206A. Neurosciences: The Introductory Course for Graduate Students (5 units). (Same as Anatomy M206A.) Lecture, four hours; laboratory/demonstra-

tions, three hours. Prerequisites: a college-level biol-

ogy or zoology course, some familiarity with the sub-

jects of electronics and electricity, consent of instruc-

tor. Introductory course on the principles of organiza-

tion and function of the nervous system, intended for graduate students in relevant disciplines and as background for more advanced courses for students specializing in the neurosciences.

M206B. Neurosciences: The Intermediate Course for Graduate Students (7 units). (Same as Anatomy M206B.) Lecture, six hours; laboratory, two hours; tutorial contacts. Prerequisites: course M206A or Anatomy 203A-203B or equivalent, consent of instruc-

tor. Neuronal excitability and integration, senso-

ry mechanisms, and motor control as related to be-

havior.
25A, 25BB-25CC. Survey of the Basic Neurological Sciences (2 units each). Summary information concerning methodologies utilized in different research approaches to brain study (e.g., neurophysiology, neuroendocrinology, brain ultrastructure, neuropharmacology and others) and brief review of present state of knowledge available from each. For students with interest in interdisciplinary aspects of brain research. (Odd years)

259A-259B-259C. Neurophysiology of Behavior: The Fetus, Newborn, and Infant (2 units each). An integrated review of neuroanatomical, neurophysiological, and behavioral development of human and animal fetuses and infants. Correlation of behavior with the development of the brain during this period of rapid change in both.

M260. Neuromuscular Factors in Movement Regulation. (Same as Kinesiology M208.) Prerequisite: Kinesiology 118 or consent of instructor. Interaction of neural and muscular factors in the regulation of muscle fiber properties and the importance of these properties in neural strategies of movement regulation.

M261. Neuronal Circuit Analysis (2 units). (Same as Anatomy M261.) Lecture/discussion, three hours. Prerequisites: courses M206A, M206B, or equivalent. A seminar with strong emphasis on specific reading assignments. An integrated view of neuronal circuit analysis at an advanced level; the layout and performance of a variety of basic neuronal circuits serving different control functions. (W) Mr. Schlag

M265A-M265B-M265C. Seminars in Neural Control of Movement (2 to 4 units each). (Same as Kinesiology M264A-M294B-M294C.) Prerequisite: course M240 or M243 or consent of instructor. Selected topics on the neural determinants of movement behavior. Students required to present a two-hour seminar.

596. Directed Individual Study or Research (2 to 12 units). Prerequisite: consent of instructor. (W) Mr. Scheibel

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). Prerequisite: consent of instructor. (W) Mr. Scheibel

599. Dissertation Research for Ph.D. Candidates (4 to 12 units). Designed for students requiring special instruction or time to work on dissertation. (W) Mr. Scheibel

Obstetrics and Gynecology

27-117A Center for the Health Sciences, (213) 206-2056

Chair
Roy M. Pitkin, M.D.

Vice Chairs
Robert E. Christensen, M.D.
Shewin J. Isenberg, M.D. (Harbor-UCLA)

Scope and Objectives

Obstetrics and gynecology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Stein Eye Institute are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

and adolescence, an understanding of reproductive endocrinology during the menopausal years, experience in the management of obstetric deliveries, and an understanding of the changes in the postmenopausal years. The program includes experience in the management of normal and pathological obstetrical conditions, the anatomical and physiological variants following childbirth, and gynecological abnormalities not necessarily related to reproduction.

Students work on the wards and in the outpatient clinics during the third year, with clinical experience continuing during the fourth year in the advanced clinical clerkship.

The graduate medical education program in obstetrics and gynecology includes a four-year course of instruction. Subspecialty units provide instruction in perinatal medicine, general gynecology, gynecologic oncology, reproductive endocrinology, and family planning and sex counseling. For further details on the Department of Obstetrics and Gynecology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.
The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to examine patients with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

- Thomas L. Hall, M.D., Ph.D.
- Frank A. Salem, M.D.
- Neil Sidell, Ph.D.

Scope and Objectives

Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in prevention, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years. Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope.

A combined education in breadth and depth is indispensable: it is this education, as it is applied to injuries and reaction to injuries, that is the goal of the Ph.D. program in Experimental Pathology.

Master of Science Degree

Students are generally accepted into the program for the purpose of obtaining a Ph.D. in Experimental Pathology. However, the department also awards an M.S. degree in Experimental Pathology in cases where a student is unable to finish the full Ph.D. program but whose completed work is adequate to the standards and minimum requirements set for a master's degree.

The general requirements for the M.S. degree are the same as those for the Ph.D., with the following exceptions:

1. Only 30 units of the listed electives are required in addition to the core courses.

(2) You are also expected to enroll in a minimum of eight units of Pathology 599 each quarter, starting in the third year. These may not be applied toward the minimum course requirement for the degree.

(3) You must pass the written qualifying examination at the master's level. The University Oral Qualifying Examination acts as the comprehensive examination. A thesis is also required, which encompasses individual research.

Ph.D. in Experimental Pathology

Admission

In addition to the University minimum requirements, Graduate Record Examination (GRE) General Test scores and three letters of recommendation are required. There is no application form in addition to the one used by the Graduate Division. Because of the sequencing of classes, applicants are generally considered for admission to the Fall Quarter only. For departmental brochures, write to the Chair, Department of Pathology, 13-327 CHS, UCLA, Los Angeles, CA 90024-1732.

Students intending to take advanced degrees in the Department of Pathology must have a bachelor's degree in physical or biological sciences or in the premedical curriculum. M.D.s are also encouraged to apply. Minimum course requirements for admission normally include one year of calculus, physics, general chemistry, organic chemistry, and biological sciences. One course each in molecular biology, immunology, and histology is recommended and is required before taking the written qualifying examination. In some cases, deficiencies in the prerequisites may be fulfilled in the first year of study.

Course Requirements

The following courses are required: Pathology 231A, 242A, 242B, 244, 250A-250B-250C, 251, M293, and Biomatics 170A. Three laboratory rotations must be taken to intelligently select a thesis adviser. In addition, if you are beginning the program with a bachelor's degree, you must select 30 units from remaining pathology courses and related biomedical areas of interest at the upper division or graduate level. Within these electives, you must take courses to obtain basic knowledge of biochemistry and molecular biology. If you are entering the program with a master's degree or M.D., you may have fewer elective units to complete for the Ph.D.

Teaching Experience

You may assist for one or two quarters in medical or dental pathology courses to gain teaching experience.
Qualifying Examinations

After the core course requirements are completed (usually at the end of the second year), a comprehensive written qualifying examination covering core courses and required basic knowledge is administered. If examiners feel that some questions should be elaborated on orally, you must do this within three months of the written examination. If failed, the examination may be repeated.

Six months to one year after completion of the written examination, the University Oral Qualifying Examination is administered by the doctoral committee. This examination normally includes discussion of the subject matter of your proposed dissertation topic. You are expected to have done preliminary work before the examination and to demonstrate wide and comprehensive knowledge of your special subject. After passing, you are advanced to candidacy.

Final Oral Examination

All candidates are required to defend their dissertation at an oral examination open to the public. The purpose of the dissertation is to demonstrate ability for independent investigation and proficiency in the field.

Upper Division Course

199. Special Studies (2 units). Supervised laboratory research, 10 hours. Prerequisite: consent of instructor. Students select instructor among eligible research faculty and carry out independent laboratory research project under instructor supervision. P/NP or letter grading.

Graduate Courses

200A. Dental Pathology (3 units). Lecture, 90 minutes; laboratory, three hours. Prerequisite: consent of instructor. The fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems.

Mr. Foos and the Staff

M215. Interdepartmental Course in Tropical Medicine (2 units). (Same as Medicine M215, Microbiology and Immunology M215, and Pediatrics M215.) Lecture, two and one-half hours; demonstrations. Prerequisites: basic courses in microbiology and parasitology of infectious diseases in the School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. A syllabus supplements the topics covered in the classroom. S/U or letter grading.

Mr. Turner (Sp, alternate years)

231A. Pathological Anatomy and Physiology (6 units). Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Prerequisites: graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodakchrome photomicrographs and projection of microslides. Concentration in the area of general pathology.

Mr. Paglia and the Staff (F)

231B-231C. Pathophysiology of Disease (6 units each). Prerequisites: course 200A, graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodakchrome photomicrographs and projection of microslides. Concentration in the area of specific pathology.

Mr. Cochran and the Staff (W,Sp)

232. Topics in Vertebrate Neurobiology (2 units). An introduction to the cell biology of the vertebrate central nervous system, with special reference to its development, structure, and potential disease processes.

242A. Molecular Mechanisms in Disease (2 units). Prerequisites: course 231A, consent of instructor. A description of molecular events resulting from administration of injurious chemical and physical agents (u.v. X rays, carcinogens, toxins, etc.) and from reactions to injuries (e.g., necrosis, degeneration, hyperplasia, neoplasia, inflammation, etc.) and an interpretation of structural and functional disturbances in terms of the molecular alterations.

Mr. Van Lancker and the Staff

242B. Molecular Mechanisms in Disease (2 units). Prerequisites: course 242A, consent of instructor. A description of molecular events resulting from administration of injurious chemical and physical agents (u.v. X rays, carcinogens, toxins, etc.) and from reactions to injuries (e.g., necrosis, degeneration, hyperplasia, neoplasia, inflammation, etc.) and an interpretation of structural and functional disturbances in terms of the molecular alterations.

Mr. Van Lancker and the Staff

244. Electron Microscopy in Experimental Pathology. Lecture, six hours; discussion, four hours. Ultrastructural aspects of pathology, including introduction to use of modern methods of electron microscopy in pathological studies, essentials of normal ultrastructure, and ultrastructural phenomena in general pathology.

Ms. Berliner, Ms. Frank

245. Environmental Pathology. Prerequisites: graduate standing, consent of instructor. Designed to explore the interrelationships of man with his total environment. Presentation of a series of special topics to discuss the effect on man of changes in the composition of air, water, soil, and other materials. S/U grading.

250A-250B-250C. Pathology Graduate Student Laboratory Seminars (2 units each). Limited to and required of all students in experimental pathology. Review and discussion of current literature and research in special topics of experimental pathology.

251. Pathology Graduate Student Laboratory Seminar (2 units). Prerequisite: consent of instructor. Consists of 10 two-hour seminars, conducted by Pathology Department staff and guest lecturers, which may include demonstrations of apparatus and methods dealing with new and advanced experimental techniques of value in experimental pathology. Subjects include the biochemistry, biological and morphological techniques in tissue fractionation, tissue culture, and radioautography (electron microscopy, etc.) that are frequently used in the study of disease mechanisms.

Mr. Hankinson, Mr. Rodgerson

254. Seminar in Experimental Neuropathology (1 unit). Prerequisite: consent of instructor. A weekly seminar series presented by experts working at the forefront of research on diseases of the nervous system. New experimental approaches and laboratory model systems for studying diseases such as Alzheimer's and Huntington's diseases, epilepsy, neurotoxins, and multiple sclerosis. S/U grading.

Mr. Sidell, Mr. Verity

255. Mapping the Human Genome (1 unit). Lecture, two hours. Prerequisite: consent of instructor. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of the human genome map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of disease genes. S/U or letter grading.

M256. Seminar in Viral Oncology (2 units). (Same as Microbiology and Immunology M256.) An advanced research seminar designed to consider the current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

Mr. Baluda

M257. Introduction to Toxicology. (Same as Pharmacology M257). Prerequisites: Pharmacology 241 or consent of instructor. Biochemical and systemic toxicology, basic mechanisms of toxicity, and interaction of toxic agents with specific organ systems.

M258. Pathologic Changes in Toxicology. (Same as Pharmacology M258.) Designed to give students experience in learning the normal histology of tissues which are major targets of toxic and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

Ms. Berliner (W)

252. Biology of Aging (2 units). Lecture, one hour; discussion, one hour. Prerequisite: graduate standing. Introduction to the biology of aging, with emphasis on mammalian and cellular aging. — Mr. Effros, Mr. Walford

253. Major Concepts in Oncology. (Same as Microbiology and Immunology M253 and Oral Biology M253.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control, physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

Mr. Effros, Mr. Seeger (W)

596. Directed Individual Study or Research (4 to 12 units). Individual research with members of the staff or of other departments, the latter for the purpose of supplementing programs available in the department. S/U grading.

Pediatrics

22-401 Davies Children’s Center, (213) 206-6327

Executive Chair
William F. Friedman, M.D., (James H. Nicholson Professor of Pediatric Cardiology)

Executive Vice Chair
Solomon A. Kaplan, M.D.

Chairs
Delbert A. Fisher, M.D. (Harbor-UCLA) 
S. Douglas Fraser, M.D. (Olive View) 
David L. Rimon, M.D., Ph.D. (Cedars-Sinai) 
Robert J. Schlegel, M.D. (King/Drew)

Scope and Objectives

The Department of Pediatrics encompasses four teaching hospitals: UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The UCLA Medical Center integrates its clinical program and teaching activities with the Olive View Medical Center. The clinical fundamentals course offers medical students detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics is given at one of the four medical centers. In-depth electives in the Department of Pediatrics are listed in the School of Medicine Handbook of Clinical Courses, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Pharmacology

23-278 Center for the Health Sciences, (213) 825-5596

Professors
Jorge R. Barrio, Ph.D. 
Arthur K. Cho, Ph.D. 
Matthew E. Conolly, M.D. 
Werner E. Flacke, M.D. 
Daniel X. Freedman, M.D. 
Robert George, Ph.D. 
Mark A. Goldberg, M.D., Ph.D., in Residence 
Louis J. Ignarro, Ph.D. 
Murray E. Javik, M.D., Ph.D. 
Donald J. Jenison, M.D., Ph.D. (hc), Chair 
Peter Loftus, M.D., D.Sc. 
Ronald C. Kun, M.D., in Residence 
Richard W. Olsen, Ph.D., Vice Chair 
Jeremy H. Thompson, M.D., F.A.C.P.I. 
William L. Hewitt, M.D., Emeritus 
Dermot B. Taylor, M.D., Emeritus

Associate Professors
Don H. Cattlin, M.D. 
Bernard K-K. Fung, Ph.D., in Residence 
Sherrill G. Howard, Ph.D. 
Bjoern V. Ringdahl, Ph.D., in Residence

Assistant Professor
Cameron B. Gundersen, Ph.D., in Residence

Lecturer
Joseph H. Beckerman, Pharm.D.

Adjunct and Visiting Professors
II JIn Bak, Ph.D., D.D.S., Adjunct 
Yi-Han Chang, Ph.D., Adjunct 
Roger W. Russell, Ph.D., Visiting

Adjunct Associate Professors
Steven L. Barriere, Pharm.D. 
M. David Fairchild, Ph.D. 
Stephen M. Stahl, M.D., Ph.D. 
Larry A. Wheeler, Ph.D.

Scope and Objectives

The Department of Pharmacology offers instruction for undergraduate, graduate, and medical students. It includes systematic study of the effects of drugs in normal and pathological states, the mechanisms by which these effects are exerted, and the factors influencing their absorption, distribution, and biological disposition. Consideration is also given to the medical and social problems created by the increasing use of drugs by both the medical profession and the public.

Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

Master of Science Degree

The Pharmacology Department offers the Ph.D. degree, and students may obtain the M.S. degree; however, the department normally does not admit candidates for the M.S. degree only.

Ph.D. Degree

Admission

In addition to meeting University requirements for graduate admission, you must have received a bachelor's degree in a biological or physical science or in the premedical curriculum.

In suitable cases, students who have course deficiencies may be admitted to graduate standing, but any deficiencies must be removed within a specified time. Graduate Record Examination (GRE) scores, Test of English as a Foreign Language (TOEFL) scores for international students, and three letters of recommendation are required.

Prospective students may write for a departmental brochure to the Graduate Student Office, Department of Pharmacology, 23-250 CHS, UCLA, Los Angeles, CA 90024-1735.

Major Fields or Subdisciplines

Cardiovascular pharmacology; chemical pharmacology; clinical pharmacology; immunopharmacology; neuroendocrine pharmacology; neuropharmacology; psychopharmacology.

Course Requirements

Required: Pharmacology 200 (three quarters), 203, 211A-211B, 212A-212B, 234A-234B-234C, 237A-237B-237C, 241, 251 (must be taken every quarter), 291 (three quarters or alternative courses); Biological Chemistry 201, 202, 203; Physiology 201A-201B, 203A-203B (Anatomy 203A-203B); one biostatistics course.

All coursework should be completed by the end of the sixth quarter and prior to taking the departmental comprehensive examinations.

The Pharmacology Department provides a system of laboratory rotations (course 200) in order to familiarize students with a variety of pharmacological research areas and techniques. During your first six quarters in the department, you participate in projects of your choosing. If possible, two of these are during the regular academic year and the third during the summer. You also become familiar with the literature relevant to the various research projects and thus establish a basis for the selection of your own research area. If you have already chosen a research area at the time you enter the department, you may benefit by working in the related laboratory during the previous summer. This would provide an uninterrupted period of over two months to work on a research project.

As part of course 200 you must submit a report of your activities in the various research groups by the end of the quarter. The report should include the nature of the project, how you participated, the results obtained, and a critical evaluation of the project.

Teaching Experience

Seminar presentations are required of all students in the graduate program.

Qualifying Examinations

Examinations are given in all courses except seminars and research. These are in the form of written examinations, oral examinations, term papers, and/or laboratory practicals. After completing the first two years of study, you are required to take a departmental comprehensive examination consisting of a written part and an oral part. You are then recommended for continuation toward the Ph.D. degree, for further remedial study, or for termination. Questions are intended to test for a rational, analytical approach to problem solving and for ability to integrate material learned in different courses. You are expected to know basic principles of pharmacology and the status of topics of current interest in pharmacology.
After passing the departmental comprehensive examination, you must take the University Oral Qualifying Examination within 18 months. This examination is administered by the doctoral guidance committee. Most questions concentrate on the background literature, experimental methods, and implications of your field of interest and dissertation project. When you pass this examination, you are eligible to petition the Graduate Division for advancement to Ph.D. candidacy.

If you fail any one of the above required examinations, you may be reexamined at a later date determined by the guidance committee.

Final Oral Examination

A final oral examination is administered after submission of the dissertation.

Articulated Degree Program

The Department of Pharmacology offers an articulated M.D./Ph.D. program with the UCLA School of Medicine. Candidates must be accepted by the School of Medicine Admissions Office in order to qualify.

Upper Division Courses

110. Drugs: Mechanisms, Uses, and Misuse. Lecture, four hours (seven weeks); discussion, four hours (three weeks). Prerequisites: Biology 5, 6, 7, Chemistry 21, 23, 25, or equivalent. An introduction to pharmacology for undergraduate students, emphasizing the principles underlying the mechanism of action of drugs, their development, control, rational use, and misuse. Mr. Jenden (W)

199. Special Studies (2 to 8 units). Prerequisite: consent of instructor and department chair. Special studies in pharmacology, including either reading assignments, or laboratory work, designed for appropriate training of each student. (F,W,Sp)

Graduate Courses

200. Introduction to Laboratory Research (2 to 4 units). Prerequisite: consent of instructor. Individual projects in laboratory research for beginning graduate students. At the end of each quarter students submit to their supervisor a report covering the research performed. Pharmacology graduate students must take this course three times during their first two years in residence. (F,W,Sp)

203. Clinical Pharmacology (2 units). (Formerly numbered 202.) Lecture, zero to two hours; discussion, zero to two hours. Prerequisites: courses 211A-211B. A series of lectures and case presentations designed to illustrate the principles of pharmacology in a clinical context, and the solution of practical therapeutic problems by reference to pharmacokinetics, mechanisms of action, and disposition of drugs. Mr. Catlin in charge (Sp)

211A-211B. Principles of Pharmacology (4 units, 2 units). (Formerly numbered 201A-201B.) Lecture, three to eight hours; discussion, zero to nine hours. Prerequisites: mammalian physiology, biochemistry. A systematic consideration of the principles governing the interaction between drugs and biological systems and of the principal groups of drugs used in therapeutics. Particular attention on the modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine. Mr. Ignarro in charge (F,W)

212A-212B. Graduate Commentary: Clinical Pharmacology (2 units each). Prerequisites: mammalian physiology and biochemistry. A supplementation of topics covered in course 202. Primarily for graduate students. Mr. Catlin M221A-M221B. Cellular and Molecular Neurochemistry. (Same as Anatomy M221A-M221B, Biological Chemistry M221A-M221B, Neuroscience M221A-M221B, and Psychiatry M221A-M221B.) Lecture, three hours. Prerequisites: Biological Chemistry 202, 203, or equivalent. Contemporary neurochemistry for students with a general background in biochemistry. The biochemical and structural properties of the nervous system in relation to its development and functions; introduction to disorders that result from alterations in the fundamental biochemistry of the nervous system. Although the subject is treated in an interdisciplinary manner, course progresses from structure through chemistry to function in precise manner and biological terms.

Mr. de Vellis, Mr. Olsen (W,Sp)

234A-234B-234C. Experimental Methods in Pharmacology (2 units each). Prerequisite: consent of instructor. A survey of experimental methods and instrumentation used in the analysis, identification, and study of mechanisms of action of pharmacologically active compounds.

Mr. Chang, Mr. George (W,Sp)

236. Neuropharmacology. Prerequisite: neurophysiology. Advanced neuropharmacology, including actions and modes of action of drugs acting on the central nervous system, interactions between drugs and nervous tissue, movements of drugs through the blood brain barrier, and distribution to the central nervous system; problems of central transmission.

Mr. George (W)

237A-237B-237C. Neurotransmission. Prerequisites: course 241, consent of instructor. A detailed examination of neurochemical transmission, dealing in particular with the cholinergic and adrenergic transmission mechanisms and pharmacological agents that affect them. Critical examination of the evidence for mechanisms involving other possible transmitters.

Mr. George, Mr. Gundersen, Ms. Howard, Mr. Olsen (F,W,Sp)

238. Behavioral Toxicology. Prerequisite: consent of instructor. Lectures and discussions designed to examine effects of exposures to a wide variety of chemical and physical agents on behavior of the total organism as it adjusts to changes in its physical and social environment. Such effects may be reflected as subtle disturbances of behavior before classic symptoms of toxic states become apparent. Consideration to methodologies by which such disturbances may be measured, to the state of present knowledge, and to application of the knowledge in regulating risks of both prenatal and postnatal exposure. Particular emphasis on the relevance of this knowledge to human behavior.

Mr. Russell (Sp)

241. Introduction to Chemical Pharmacology. Prerequisite: organic and biological chemistry. Introduction to general principles of pharmacology. The role of chemical properties of drugs in their distribution, metabolism, and excretion. Mr. Cho (F)

251. Seminar in Pharmacology (2 units). Seminars presented by students, faculty, and guest lecturers on a variety of topics. S/U grading.

Mr. George, Mr. Lomax (F,W,Sp)

253. Seminar in Environmental Toxicology (2 units). Prerequisite: consent of instructor. Oral reports and discussions of current research on chemical pollutants in the environment, their effects on biological systems, and the mechanism of these effects.

Mr. Jenden (F,W,Sp)

M257. Pathologic Changes in Toxicology. (Same as Pathology M258.) Designed to give students experience in learning the normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

261. Introduction to Clinical Pharmacology (2 units). Prerequisite: consent of instructor. Lectures, case presentations, and discussions designed to acquaint graduate students with the special problems and effects encountered in clinical use of drugs, including absorption, metabolism and excretion, drug interactions and interference with clinical laboratory analysis.

291. Special Topics in Pharmacology (2 units). Prerequisite: consent of instructor. Examination in depth of topics of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced Ph.D. candidates, academic staff, or visiting faculty. May be taken twice for credit. (F,W,Sp)

596. Directed Individual Research in Pharmacology (4 to 12 units).

599. Research for and Preparation of Ph.D. Dissertation (4 to 12 units).

Sally Kraine, Ph.D.
Michael C. Leleisi, Ph.D.
Kenneth D. Philipson, Ph.D., in Residence

Lecturer
Jessie O. Washington, D.V.M.
Adjunct Associate Professor
Oscar U. Scremin, M.D.

Adjunct Assistant Professor
Kenneth S. Leonards, Ph.D.

Scope and Objectives
Physiology is the science of the functional activities of the human body. This covers a wide range, on the one hand involving observations on human organisms and patients, on the other hand experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, neurobiology, communication and information, organ systems and integrative phenomena, and behavioral physiology.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA’s Physiology Department was judged fifth best in the nation in terms of the quality of its faculty. In addition to the Ph.D. program, the department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.

Ph.D. Degree

Admission
Candidates for admission to graduate standing in the Department of Physiology are expected to pursue the Ph.D. degree. The department does not admit candidates for the M.S. degree. Ph.D. students must conform to the general admission requirements set by the Graduate Division and have received a bachelor’s degree in a biological or physical science or in the premedical curriculum. In general, at the time of admission, you should have completed courses in mathematics through calculus and differential equations (equivalent to Mathematics 31A, 31B, 33A); physics (12 quarter units); chemistry (16 quarter units, including quantitative analysis, physical and organic chemistry); biology or zoology (16 quarter units, including comparative vertebrate anatomy).

In certain cases, at the discretion of the department, students lacking some of the preparatory background in areas pertinent to physiology may be admitted to graduate standing, provided that deficiencies are made up. Successful completion of the first-year curriculum requires knowledge of physical chemistry (at least equivalent to Chemistry 110A and 156) and differential equations (equivalent to Mathematics 33A). It is strongly recommended that these or equivalent courses be taken prior to admission. If not, these deficiencies must be removed within a specified time after admission, which would likely extend the first-year curriculum into the second year. Students may also be admitted on the recommendation and sponsorship of staff members subject to admission committee approval.

The Graduate Record Examination (GRE) General Test is required as well as the Subject Test in Biology or in your major field. Medical College Admission Test (MCAT) scores are accepted in lieu of the GRE. Three letters of recommendation are required and should be addressed to the Director of Graduate Studies. Completion of a master's program is not required.

An application packet and/or departmental brochure is available from the Graduate Student Office, Department of Physiology, 53-170 CHS, UCLA, Los Angeles, CA 90024-1751.

Major Fields or Subdisciplines
Cellular electrophysiology; membrane transport; excitation, contraction, energetics, and protein chemistry of muscle; fundamental neurophysiology; cardiovascular, respiratory, and gastrointestinal physiology.

Course Requirements
The graduate training program consists of a core requirement (Biology 171, Physiology 201A-201B, 205) which must be completed within your first two years of study. A second series of at least three courses applicable to your research interests and one advanced course in physiology outside your major area of interest are also required. Your curriculum must be approved by the graduate committee and your faculty adviser. One laboratory rotation is required within the first two years, prior to taking the written comprehensive examination.

Qualifying Examinations
The written comprehensive examination is given at the end of your formal coursework (core curriculum and specialty courses); it may contain an oral section covering your area of specialization. Recommendations following the examination are based on the total and specific areas of competence revealed by the examination, performance in coursework during the year, and recommendations of staff with whom you have had close association. Marginal performance in all areas with excellence in none is not considered acceptable.

Following successful completion of the departmental comprehensive examination, you must select a sponsor who acts as chair of your doctoral committee and directs your thesis research. The committee members conduct the University Oral Qualifying Examination to establish that you are capable of conducting a productive research project. At this point in your training, you normally will have completed all formal coursework, will have passed the departmental comprehensive examination, and will have devoted approximately a year to a research project. After successful completion of the oral qualifying examination, you are advanced to candidacy.

Final Oral Examination
The final oral examination is optional with the doctoral committee.

Upper Division Courses
100. Elements of Human Physiology (6 units). Prerequisite: dental student standing or consent of instructor. Required of first-year dental students. Lectures, laboratories, and demonstrations/conferences concerning functional activities of the living body in terms of both cellular and systemic functions. Examples presented, where possible, on the basis of information relevant to oral function.

(F) M105. Human Physiology. (Same as Nursing M105.) Lecture, four hours; discussion, one hour. Prerequisite: nursing student standing or consent of instructor. Required of third-year nursing students. Lecture and discussion, with emphasis on a correlational approach to anatomy and physiology of the human body.

199. Special Studies (1 to 8 units). Prerequisite: consent of instructor. Special studies in physiology, including either reading assignments or laboratory work or both, designed for appropriate training of each student.

Graduate Courses
200. Transport across Biological Membranes. Prerequisite: consent of instructor. An in-depth study of transport ions, nonelectrolytes, and water across plasma membranes of single cells and epithelia. Lectures include such topics as membrane structure, the passive permeability of membranes to ions and nonelectrolytes, active transport of sugars and amino acids, active ion transport, and the mechanisms of water transport. Experimental work involves the transport of ions across single cell membranes and epithelia using radioactive tracer and electrophysiological techniques.

Mr. Wright 2014-201B. Organ System Physiology (6 units each). (Formerly numbered 101, 102.) Lecture, six hours; laboratory, three and one-half hours. Prerequisite: enrollment in qualified graduate program or consent of instructor. Primarily for first-year medical students and runs throughout the School of Medicine’s second semester. Lectures, laboratories, and conferences. Electrical properties of excitable tissues. Contractility of muscle. Epithelial transport. Cardiovascular, renal, respiratory, and gastrointestinal systems. Fluid and electrolyte balance. To receive credit, both courses must be taken together in the same academic year. In Progress grading.

202. Permeability of Biological Membranes to Ions (6 units). Prerequisites: Chemistry 110A, 110B, or equivalent, consent of instructor. Topics include ion permeation mechanisms, ion distribution, and physical basis of ion discrimination across cell membranes.

Mr. Diamond
203A-203B. Basic Neurobiology (2 units each). (Formerly numbered 103A-103B.) Lecture/laboratory, two to three hours per day on an irregular schedule. Prerequisite: knowledge of the chemistry of neurons. Credit applied toward major or minor only with consent of instructor. Corequisites: Anatomy 203A-203B. Lecture, conferences, demonstrations, and laboratory procedures necessary for an understanding of the functions of the nervous system. Mr. Chase, Mr. Schlag, and the Staff (Sp).

205. Chemical Physiology of Membranes and Cellular Systems. Prerequisite: consent of instructor. A mathematical and physical background for understanding the functioning of the neuronal membrane and its relation to the functioning of other entral systems. Mr. Ciani, Mr. Hagwara, Ms. Krasne.

217B. Transport Systems in Cell Membranes. Prerequisite: consent of instructor. Properties of pumps and carriers in cell membranes. Topics include the transfer of electrical and chemical ions and the function of transmembrane proteins. Ms. Sachs, Mr. Wright.

217C. Cellular Neurophysiology. Formerly numbered 217D. (1 unit). Prerequisite: course 217B or consent of instructor. Structure and function of synaptic transmission, neurotransmitters, excitation/inhibition, and special sensory receptors.

218A. Integrative Neurophysiology. Prerequisite: course 217C or consent of instructor. Structure and function of CNS neurons, structure and function of visual, cerebellum, and other CNS systems. Structure and function of autonomic nervous system.

218B. Physiology of Muscle. Prerequisite: course 217C or consent of instructor. Anatomy and Physiology of Muscle. Excitation, excitation-contraction coupling, calcium regulation of contraction, myofilament interactions, energetics, metabolism, and chemical kinetics of contraction and relaxation of vertebrate muscle. Mr. Brady.

221A-221B. Concepts of Excitation and Contraction in Muscle (2 to 6 units each). Prerequisite: consent of instructor. In-depth study of muscle physiology, with material derived from a critical review of classical and recently published research papers. Content varies according to the special interests of the students. Mr. Bracy.

222. Graduate Commentary: Renal, Respiratory, and Gastrointestinal Physiology (2 units). Prerequisite: course 217C. An advanced seminar for graduate students of the topics presented in course 102.

223. Graduate Commentary: Physiology of the Nervous System (2 units). Prerequisite: basic course in cell physiology and anatomy, human or comparative; consent of instructor. Advanced seminar for graduate students of the topics presented in basic neurophysiology. Ms. Buchanan.

225. Ionic Selectivity and Molecular Architecture of Channels (6 units). Lecture, three hours; laboratory, three hours; reading period 12 hours. Independent study. Prerequisite: consent of instructor. An introduction to the mechanisms of non-selective ion channels, the definitions and properties of ion channels in cell membranes and the regulation of these mechanisms. Mr. Eisenman (Sp).

227. Theoretical Problems in Membrane Permeation (2 units). Prerequisite: consent of instructor. Tutorial directed to specific theoretical problems of interest to the students. Mr. Ciani.

228. Epithelia: Structure and Function (2 units). Prerequisite: consent of instructor. Lectures and seminars on the physiology of epithelial cells, with particular emphasis on membrane transport. S/U grading. Mr. Wright (W).

229. Research Topics in Neurobiology (2 units). Prerequisite: consent of instructor. Discussion of recent literature covering research problems in neurobiology. S/U or letter grading. Mr. Letinsky.

230A-230B. Selected Topics in Organ Physiology (2 to 8 units each). Prerequisite: consent of instructor. Macroscopic, microscopic, and ultrastructural correlates of tissue and organ function. Advanced consideration of special topics in the physiology of the cardiovascular and gastrointestinal systems, as well as the respiratory, renal, and central nervous systems.

231A-231B. Cardiovascular and Respiratory Physiology (2 to 6 units each). Prerequisite: consent of instructor. In-depth study of the cardiovascular and respiratory systems. Mr. Rasmussen. Respiratory mechanics and function. Mr. Robinson. Control and regulation of the cardiovascular system and its relation to the mechanics of respiration and cellular gas exchange. Critical reviews and discussion of selected articles in the literature.

M235. Gut and Brain Peptides (2 units). (Same as Anatomy M235, Medicine M235, and Neuroscience M235.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

250A-250B-250C. Techniques in Biological Research (1 unit each). Discussion of techniques important to students in the biological sciences. S/U grading.

251A-251B. Seminar in Physiology (1 unit each). Prerequisite: permission of instructor. Review and discussion of current physiological literature, research in progress, and special topics. S/U grading.

253A-253B-253C. Current Topics in Neurobiology and Behavioral Biology (3 to 6 units each). Three to six hours; discussion, one hour. Prerequisite: consent of instructor. A seminar course covering recent advances in the field. Some talks are reviews of recent literature, with posted references for student preparation. S/U grading.

256. Use of Laboratory Animals in Research. Prerequisite: consent of instructor. An introductory course for graduate students in the medical and biological sciences, covering principles and practical problems in the handling and use of common laboratory animal species. Mr. Washington.

257. Developmental Neurobiology. Lecture, two hours; discussion, two hours. Prerequisite: Biology 171 or equivalent, consent of instructor. Processes governing the development and differentiation of neurons, synaptogenesis, and specificity and plasticity in neuronal and nerve-muscle interactions. Mr. Arnold, Mr. Grinnell.

596. Directed Individual Study or Research (2 to 12 units). Prerequisite: consent of instructor.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units). Prerequisite: consent of instructor.

598. Thesis Research for M.S. Candidates (2 to 12 units). Prerequisite: consent of instructor.

599. Dissertation Research for Ph.D. Candidates (2 to 12 units). Prerequisite: consent of instructor.

Adjunct and Visiting Associate Professors

Christian A. M. Baltaxe, Ph.D., Adjunct (Biobehavioral Sciences)
Warren S. Brown, Ph.D., Adjunct (Biobehavioral Sciences)
V. Charles Chauvastra, M.D., Adjunct
Milton S. Davis, Ph.D., M.D., Adjunct
Victor Haddox, M.D., J.D., Adjunct

Richard L. Heinrich, M.D., Adjunct
Lewis M. King, Ph.D., Adjunct (Biobehavioral Sciences)
Ira M. Lester, M.D., Adjunct
Keh-Ming Lin, M.D., Adjunct
James F. McGinnis, Ph.D., Adjunct (Biobehavioral Sciences)
Mary J. O'Connor, Ph.D., Adjunct (Medical Psychology)
Susan B. Oldham, Ph.D., Visiting (Biobehavioral Sciences)
William R. Procci, M.D., Adjunct
H. Rebecca Rausch, Ph.D., Adjunct (Neuropsychology)
Stephen M. Staahl, M.D., Ph.D., Adjunct
Mario Valente, M.D., Adjunct
Caroline L. Wakefield, Ph.D., Visiting (Biobehavioral Sciences)
Jeffery N. Wilkins, M.D., Adjunct

Scope and Objectives

The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its programs for psychiatry interns and residents and for medical students (courses for medical students are listed in the Announcement of the UCLA School of Medicine and the School of Medicine Handbook of Clinical Courses).

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through University Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course prerequisites determined by specific educational programs. Additional information is available from the department office.

Programs

The Developmental Disabilities Immersion Program is cosponsored by the Department of Psychology and the Department of Psychiatry and Biobehavioral Sciences and by the Office of Instructional Development — Field Studies Development. Each year a group of 30 students is selected for the program which runs during the Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected community facilities serving persons with developmental disabilities. Required core courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements. Student individualized research projects are also part of the immersion experience. Students interested in the program should contact the Office of Instructional Development — Field Studies Development (70 Powell Library) or the Psychology Undergraduate Advising Office (1531 Franz Hall).

The department offers a 12-month Clinical Psychology Internship, which is a Graduate Division certificate program. Students enrolled in clinical psychology programs at APA-approved universities are eligible to apply. Applications are accepted through January 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact the Psychology Internship Training Office, C8-532 NI18 (825-0145).

A certificate is also awarded by the department to qualified graduate students who successfully complete the Mental Retardation and Other Developmental Disabilities Training Program. The program fulfills the internship requirement for the Ph.D. program in clinical psychology and the master's program in social welfare, and for the disciplines of speech pathology, occupational therapy, and nutrition at nearby universities. Further, it satisfies state licensure and clinical placement requirements in psychology, speech and language, special education, social welfare, nursing, psychotherapies, occupational therapy, and nutrition. Interested students should contact the program training director, 78-243A NI18 (825-0147), for further information.

Information on clinical practicums which are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

Master of Social Psychiatry

The Master of Social Psychiatry (M.S.P.) program is not admitting new students at this time.

Upper Division Courses

M112. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M136.) Prerequisite: consent of instructor. The skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in the social sciences.

Mr. Gallimore, Mr. Weisner (W)

M119. Evolution of Intelligence. (Same as Psychology M119K) Lecture, two hours; discussion, two hours. Prerequisites: Psychology 15 or 115, an introductory statistics course, junior or senior standing, consent of instructor. Intelligence treated as neural information-processing capacity; its evolution in vertebrates correlated with the evolution of enlarged brains. Quantitative approaches in evolutionary biology and the neurosciences.

Mr. Jerison
M132. Exceptional Children. (Same as Psychology M133B.) Prerequisite: Psychology 130. Study of the issues and research problems in the areas of mental retardation, giftedness, learning disorders, emotional disorders, and childhood psychosis. Mr. Frankel

M142. Advanced Statistical Methods in Psychology. (Same as Psychology M142.) Lecture, two hours; discussion, two hours. Prerequisite: Psychology 41. Chi square, special correlation methods, multiple regression, nonparametric methods, analysis of variance, reliability and validity. Mr. Galbraith (W)

175. Women Physicians: Professional Socialization. The professional socialization of women in medicine. The developmental stages of medical training and practice (medical school, internship, residency, and various specialty areas of private practice). Women trainees and physicians in various specialties participate in presentations. Research project required. Mr. Coombs (F)

M180A. Contemporary Problems in Mental Retardation. (Same as Psychology M180A.) Prerequisites: Psychology 104, 41, and 127 or 127 Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of the concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning the causes and treatment of development disabilities, as well as systems for the care and training of affected individuals. Lectures, directed reading, and discussion.

Mr. Fluharty and the Staff

M180B. Contemporary Issues in Mental Retardation. (Same as Psychology M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychosocial issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers.

M182A. Advanced Statistical Methods in Mental Retardation. (Same as Psychology M182A.) Prerequisite: Psychology 41. Limited to Immersion Program students. Introduction of statistical methods and design in experimental principles of statistical inference and appropriate testing methods. Introduction to the use of computers and various software packages. Mr. Olmstead

M182B. Advanced Design and Statistics (Same as Psychology M182B.) Prerequisite: course M182A. Continuation of course M182A. Mr. Silverstein

M182C. Perception. (Same as Psychology M182C.) Limited to Immersion Program students. Human information processing, both physical and psychological, with special emphasis on pathologies in the mentally retarded. Mr. Galbraith

M182D. Current Issues in Mental Retardation. (Same as Psychology M182D.) Limited to Immersion Program students. Advanced topics in mental retardation. May be repeated for credit with consent of instructor. Mr. Olmstead

M183. Introduction to Neuroscience. (Same as Psychology M183.) Limited to Immersion Program students. Application of general principles to human brain and spinal cord. Mr. Buchwald, Mr. Olmstead

M184. Human Genetics. (Formerly numbered 198.) (Same as Psychology M184.) Lecture; two hours; discussion, two hours. Limited to Immersion Program students. Application of genetic principles to human populations, with emphasis on cytogenetics, biochemical and population genetics, and family studies. Lectures and readings on the methodologies appropriate to human genetics. Mr. Fluharty

M190. Ethology: Physiology of Behavior and Learning in Animals. (Same as Psychology M119J.) Prerequisites: Psychology 115, junior standing. Basic course for undergraduate students which integrates a systematic overview of common forms of behavioral plasticity and standard training paradigms in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with a broad biological, evolutionary perspective.

Mr. Soltysik (W)

199. Special Studies in Psychology (2 to 4 units). Prerequisite: consent of instructor and department chair, based on a written proposal outlining the course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms are available in the Office of Education, B7-349 NPI&H.

Graduate Courses

200. Colloquium on Biobehavioral Sciences (1 unit). Prerequisite: consent of instructor. A vehicle for continuing education on recent advances in various social science research. Introduction to the field of biobehavioral sciences and biobehavioral and biosocial contexts. A forum for pertinent interdisciplinary discussion. Speakers present information from their area of competence and expository lectures on the broad issues of behavior.

Mr. West

M201A-M201B-M201C. Functional Organization of Behavior (2 units each). (Same as Neuroscience M201A-M201B-M201C.) Prerequisite: consent of instructor. Course M201A is prerequisite to M201B, which is prerequisite to M201C. M201A. The development of behaviors within different species and the functional uses of behaviors; use of an evolutionary biological perspective as the framework.

Mr. Halgren (Sp)

M214. Selected Topics in the Cross-Cultural Study of Socialization and Childhood. (Same as Anthropology M236P.) Lecture. Three hours. Prerequisite: consent of instructor. Methods, ethnographic data, and theoretical orientations. Emphasis on current research. May be repeated for credit.

Mr. Weisner (F)

M216. Functional Neuropsychology. (Formerly numbered M216A-M216B-M216C.) (Same as Neuroscience M216.) Lecture, two hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. An interdisciplinary course integrating current research findings in neuroanatomy, molecular neurobiology, synaptic neurophysiology, event-related potentials, neurophysiology of amnesia, and cognitive psychology of normal memory into a realistic model. Mr. Halgren

M219A-M219B. Basic Core Courses in Mental Retardation Research (2 units each). (Same as Anthropology M237A-M237B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Required of all MRPC trainees. A systematic overview of mental retardation and the sciences basic to this field of study. The language, methods, aims, and contributions of the various disciplines that contribute to the field. The last two weeks of the second quarter are spent discussing and preparing multidisciplinary research designs with potential for the prevention or amelioration of mental retardation. S/U grading.

Mr. Buchwald, Mr. Edgerton

220A-220B. Living Systems Theory and Its Application (2 or 4 units each). Prerequisite: consent of instructor. Current status of basic and applied scientific research in systems science at the levels of the cell, the organ, the organism, the group, the organization, the society, and the supranational systems. Present and potential future applications of systems science to psychodiagnoses, psychotherapy, group processes, community psychiatry, and organizational behavioral. Applications to neurosciences, artificial intelligence, instructional technology, and other fields. If taken for four units, additional class time and reading and a research paper (20-25 pages) required.

Mr. Miller (F,W)

M211. Sociocultural Perspectives on Mental Retardation. (Same as Anthropology M244R.) Lecture, three hours. Prerequisite: consent of instructor. Exploration of concepts such as "intelligence," "competence," and "adaptive behavior" in varying non-Western societies. The historical phenomenon of mental retardation in the West, particularly the U.S. Topics include cross-cultural perspectives, the history of institutional confinement, the policies of deinstitutionalization and normalization, and current issues involving adaptation and "quality of life." Discussion of topics such as communicative competence, work, crime, deviance, sexuality, and marriage. May be repeated for credit.

Mr. Edgerton (W)

M212. Cultural Modes of Thought. (Same as Anthropology M233P.) Lecture, three hours. Prerequisite: consent of instructor. An examination of the influences of culture on learning, perception, thinking, and intelligence. The fields of cross-cultural psychology, in addition to cognitive anthropology, focus on learning and thinking in non-Western cultures, including problems of education and research areas within the U.S. Mr. Price-Williams

M213A-M213B. The Individual In Culture. (Same as Anthropology M235A-M235B.) Lecture. Three hours. Course M213A is prerequisite to M213B. In Progress grading. Mr. Langness (F,W)

M214. Selected Topics in the Cross-Cultural Study of Socialization and Childhood. (Same as Anthropology M236P.) Lecture. Three hours. Prerequisite: consent of instructor. Methods, ethnographic data, and theoretical orientations. Emphasis on current research. May be repeated for credit.

M216. Functional Neuropsychology. (Formerly numbered M216A-M216B-M216C.) (Same as Neuroscience M216.) Lecture, two hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. An interdisciplinary course integrating current research findings in neuroanatomy, molecular neurobiology, synaptic neurophysiology, event-related potentials, neurophysiology of amnesia, and cognitive psychology of normal memory into a realistic model. Mr. Halgren

M219A-M219B. Basic Core Courses in Mental Retardation Research (2 units each). (Same as Anthropology M237A-M237B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Required of all MRPC trainees. A systematic overview of mental retardation and the sciences basic to this field of study. The language, methods, aims, and contributions of the various disciplines that contribute to the field. The last two weeks of the second quarter are spent discussing and preparing multidisciplinary research designs with potential for the prevention or amelioration of mental retardation. S/U grading.

Mr. Buchwald, Mr. Edgerton

220A-220B. Living Systems Theory and Its Application (2 or 4 units each). Prerequisite: consent of instructor. Current status of basic and applied scientific research in systems science at the levels of the cell, the organ, the organism, the group, the organization, the society, and the supranational systems. Present and potential future applications of systems science to psychodiagnoses, psychotherapy, group processes, community psychiatry, and organizational behavioral. Applications to neurosciences, artificial intelligence, instructional technology, and other fields. If taken for four units, additional class time and reading and a research paper (20-25 pages) required.

Mr. Miller (F,W)
22A. Behavioral Medicine. Seminar, three hours. Prerequisite: consent of instructor. Review of behavioral science knowledge and techniques relevant to the understanding of physical health and illness and discussion of the application of this knowledge and these techniques to prevention, diagnosis, treatment, and rehabilitation. Integration of behavioral and biomedical approaches.

226A-226B. Childhood Psychopathology (2 units each). Seminar, one hour. Prerequisite: consent of instructor. Current research in the causes and behavioral manifestations of childhood psychopathology. Discussion on diagnosis and etiology of childhood psychopathology.

240. Assessment and Treatment of Afro-American Families (3 units). Formerly numbered 240A-240B-240C.) Seminar, two hours. Prerequisites: graduate standing, consent of instructor. The use of psychological tests by health professionals and trainees in the evaluation and treatment of Afro-American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form the basis for supervised evaluation and case management with an Afro-American child and family.

241A-241B-241C. Mental Retardation Interdisciplinary Core Curriculum (1 unit each). Lecture, 90 minutes. Prerequisite: consent of instructor. A survey series on major topic areas of mental retardation, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special deficits. Presented in an interdisciplinary framework as a component of the major program. S/U grading.

243A-243B-243C. Mental Retardation Interdisciplinary Core Curriculum (1 unit each). Lecture, 90 minutes. Prerequisite: consent of instructor. A survey series on major topic areas of mental retardation, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special deficits. Presented in an interdisciplinary framework as a component of the major program. S/U grading.

245A-245B. Psychological Assessment of Severely Handicapped Children (3 units each). Lecture, 90 minutes. Prerequisite: consent of instructor. Course 245A is prerequisite to 245B. The psychological assessment of the severely handicapped child is emphasized on the assessment of children with development disabilities and children who are generally thought to be "untestable." A practical orientation, involving two hours per week of supervised testing. S/U grading.

246. Psychological Aspects of Mental Retardation. (Same as Psychology M246.) Prerequisite: consent of instructor. Discussion of the psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

247A-247B-247C. Neurological and Psychological Bases of Behavior (1 unit each). Discussion. two hours. Prerequisites: graduate standing, consent of instructor. Discussion of advances in neuropsychology, neuropsychology, with particular reference to modern development studies. Faculty members or advanced students present results of their research work in the context of available literature; intense discussion during and after presentation. S/U grading.

248. Research Rounds in Mental Retardation and Developmental Disabilities (1 unit). Prerequisite: consent of instructor. Monthly session, with presentation of a patient and discussion of research approaches relevant to that patient. Staff members from various disciplines and invited speakers participate. S/U grading.

250. Medical Anthropology in Public Health. (Same as Anthropology M250 and Public Health M251.) Prerequisites: Public Health 112, 130, one upper division psychology, sociology, or anthropology course, or equivalent, consent of instructor. Cross-cultural aspects of human behavior as they relate to perception, treatment, incidence, and prevalence of disease and illness.

253. Seminar: Child Development (1 unit). Prerequisite: consent of instructor. Theories of development, systems of child development, and chronological aspects of child development. Presentation of assigned readings by students plays a major role in each session.

254. Counseling Families of Handicapped Children (2 units). (Same as Social Welfare M254.) Prerequisite: consent of instructor. Techniques and issues in counseling families through evaluation, feedback, and treatment. Special and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises.

255. Basic Clinical Child Psychopathology (1 unit). Prerequisite: consent of instructor. Weekly seminars covering the basic clinical aspects of child psychopathology. Readings provided for a basis of discussion on topics including interviews of parents and children, diagnosis, and related syndromes.

257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders (3 units each). Laboratory, 90 minutes; didactic, 90 minutes. Prerequisite: consent of instructor. Didactic and practical training in communication and its dysfunction as these relate to language disabilities seen in an interdisciplinary setting. Provides a background for graduate and postgraduate students who plan to engage in clinical work and/or clinical research in which language disturbances of childhood and adulthood are relevant.

M221A-M221B. Cellular and Molecular Neurochemistry. (Same as Anatomy M221A-M221B, Biochemistry M221A-M221B, Neuroscience M221A-M221B, and Pharmacology M221A-M221B.) Lecture, three hours. Prerequisites: Biological Chemistry 202, Biochemistry 202, or consent of instructor. This course focuses on the biochemical and structural properties of the nervous system in relation to its development and functions; introduction to alterations in the fundamental biochemistry of the nervous system. Although the subject is treated in an interdisciplinary manner, course progresses from structure through chemistry to function in precise manner and biological terms.

M222. Transcultural Psychiatry. (Same as Anthropology M222F.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and the questions of "sick" societies. May be repeated for credit.

Mr. Kennedy 223. MMPI Seminar and Case Conference (2 units). Seminar, one hour; discussion, one hour. Prerequisite: psychology intern, psychiatry resident, or consent of instructor. May be repeated for credit. Seminar work in the context of the Minnesota Multiphasic Personality Inventory. Discussion of theory, principles, and research into the personality types. Discussion of case data relating to the MMPI profile and treatment planning.

Mr. Caldwell 226A-226B. Childhood Psychopathology (2 units each). Seminar, one hour. Prerequisite: consent of instructor. Current research in the causes and behavioral manifestations of childhood psychopathology. Discussion on diagnosis and etiology of childhood psychopathology.

Ms. Sigman, Mr. Tanguay (F,W)

228. Behavioral Medicine. Seminar, three hours. Prerequisite: consent of instructor. Review of behavioral science knowledge and techniques relevant to the understanding of physical health and illness and discussion of the application of this knowledge and these techniques to prevention, diagnosis, treatment, and rehabilitation. Integration of behavioral and biomedical approaches.

Mr. McCready, Mr. Munford, Mr. Reeves, Mr. Shapiro 229. Hispanic Mental Health Issues and Treatment (2 units). Prerequisites: consent of instructor. Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparision of psychiatry in Mexico and the U.S., an analysis of the various theoretical perspectives regarding Hispanic psychosocial behavior; distinguishing psychodynamic factors from cultural factors in the treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clienteles.

Mr. Morales, Ms. Telles (W)

232A-232B-232C. Human Sexual Dysfunction (2 units each). Prerequisite: consent of instructor. One-year training and research course in the direct behavioral treatment of human sexual dysfunction. A combination of didactic material and supervised experience.

Mr. Golden (F,W,Sp)

M234A-M234B. Affective Disorders (2 or 4 units each). (Formerly numbered 234A-234B.) (Same as Psychology M234A-M234B.) Lecture, one hour; laboratory, one hour. Prerequisites: graduate standing, consent of instructor. General topics related to the primary affective disorders (depression, manic depressive illness), including diagnosis, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

Mr. Gitlin, Mr. Hammen 235. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M235Q, Education M222A, and Psychology M295.) Prerequisite: consent of instructor. The skill of observing and recording behavior in natural settings from field trips and field practice in observing behavior. Discussion of some of the uses of observations and their implications for research in the social sciences. Students expected to integrate observational work into their original research projects.

Mr. Gallimore, Mr. Weisner (W)

236A-236B-236C. Psychology Interns Seminar (1 unit each). Prerequisite: consent of instructor. Current topics in clinical psychology. Group selected topics for discussion pertaining to psychopathology, diagnostic evaluation, and modalities of treatment. S/U grading.

Ms. Holroyd (F,W,Sp)

237. Seminar in Behavioral Neuroimmunology (1 unit). (Same as Psychology M211.) Lecture, one hour per month; discussion, 30 minutes per month. A series of lectures presented once a month throughout the academic year by invited speakers from UCLA and around the world. S/U grading.

Mr. Lieberman, Mr. Solomon 240. Assessment and Treatment of Afro-American Families (3 units). (Formerly numbered 240A-240B-240C.) Seminar, two hours. Prerequisites: graduate standing, consent of instructor. Seminar meets throughout the year. During Summer Quarter emphasis on the initial clinical and research evaluation as well as early treatment of the child and family. During Fall, Winter, and Spring Quarters instructors use videotaped sessions and notes from their own clinical work to discuss such topics as diagnostic criteria, family system treatment formulations stressing the work with parents and children, and such theoretical and technical issues as transference, resistance, differentiation of symptoms, and termination. Student presentations encouraged in order to amplify clinical and theoretical issues and to become familiar with ongoing cases which are part of a systematic outcome study.

Mr. Heinicke 243A-243B-243C. Mental Retardation Interdisciplinary Core Curriculum (1 unit each). Lecture, 90 minutes. Prerequisite: consent of instructor. A survey series on major topic areas of mental retardation, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special deficits. Presented in an interdisciplinary framework as a component of the major program. S/U grading.

Mr. Forness, Ms. Jacobs (F,W,Sp)

244. Computers in Mental Retardation Research. Prerequisite: consent of instructor. Introduction to the background of digital computing with emphasis on their impact on society. Directed toward providing students with a broad general understanding of applications and limitations of computers. Specific examples from clinical, research, and administrative applications within the mental retardation and child psychiatry program.

Mr. Guthrie, Mr. Hull (W)

SCHOOL OF MEDICINE / Psychiatry and Biobehavioral Sciences / 491
259. Legal and Ethical Issues with Vulnerable Populations (3 units). Discussion, 90 minutes; laboratory, three and one-half hours. Prerequisite: consent of instructor. Discussion of current laws dealing with vulnerable populations (e.g., children, developmentally disabled people, elderly people; philosophers, ethicists, biologists, sociologists) and their potential to resolve them. Use of videotapes and discussion of cases.

Mr. Tymchuk (W)

260. The Chronically Medically Ill Child and Family. Lecture, three hours; seminar, one hour. Prerequisite: consent of instructor. Review of current research findings and clinical practice concerning dually diagnosed populations. Therapeutic interventions pertaining to populations of interdisciplinary trainees in various community settings. Mr. Tymchuk (W)

261. Psychopathology of Mental Retardation (1 unit). Seminar, 90 minutes. Prerequisite: consent of instructor. Review of current research findings and clinical practice concerning dually diagnosed populations. Ms. Jacobs, Mr. Price-Williams (F), Mr. Forness (W)

262A-262B-262C. Clinical Fieldwork in Developmental Disabilities and Chronic Illness (1 to 4 units each). Prerequisites or corequisites: courses 243A-243B-243C, consent of instructor. Placement and supervision of clinical and consultation activities of interdisciplinary trainees in various community agencies, hospitals, or other related settings serving developmentally disabled or chronically medically ill children, youth, or adults. Supervision done jointly by community personnel on site, in collaboration with interdisciplinary faculty. S/U grading.

Mr. Forness

264. Biofeedback: Theory, Research, and Clinical Application. Seminar, two hours; laboratory, one hour. Prerequisite: consent of instructor. Introduction to concepts and techniques of biofeedback, including review of experimental literature and applications to various clinical problems (hypertension, headache, pain and anxiety, sexual dysfunction, cardiac arrhythmias, neuromuscular disorders, etc.). Training in the use of portable biofeedback devices. Consideration of research and clinical issues. Mr. Shapiro (W)

265. Mind and Brain in Evolution (2 units). Prerequisite: consent of instructor. Review of the fossil evidence on the organic evolution of the brain and the implications for cognitive psychology and individual differences are considered. The evolutionary analysis is "above the species level." Mr. Torell

266. Psychophysiological Research (1 unit). Seminar, 90 minutes. Prerequisite: consent of instructor. Advanced seminar and discussion of ongoing laboratory research involving concepts, experimental design, measurement, and data analysis. Current topics include regulation of physiological and subjective reactions to stress and pain, discrimination and control of blood pressure, and regulation of postural hypotension. Mr. Shapiro (F, W, Sp)

267. Psychological Anthropology. (Same as Anthropology M343Q.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropological context. Theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and cultural psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they are related to culture. Topics vary from quarter to quarter. May be repeated for credit.

Mr. Edgerton, Mr. Kennedy (W)

M273. Advanced Seminar in Medical Anthropol- ogy. (Same as Anthropology M263Q, Nursing M273, and Public Health M279K.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of the interrelationships between society, culture, ecology, health, and illness. Bases for written critical analyses and class discussion provided through key theoretical works.

Ms. Browner

274. Neuropsychology and Behavior (3 units). Prerequisite: graduate standing, consent of instructor. An analysis of patterns of brain dysfunction, chemical transmitters, and behavior. Approaches to study behavior of mammalian species. Special emphasis on recent developments in electrophysiological recording techniques in behaving animals and how such developments relate to classical concepts of brain function.

Mr. Levine (Sp)

Ms. Browner

276. Prospects for Neurocognitive Enhancement in Adults (3 units). Prerequisite: consent of instructor. Critical examination at multiple levels of brain function changes with aging — from structural changes to the cognitive processes that underlie learning, memory, and other higher level interactions at the biological, psychological and sociological levels on the one hand to functional changes in sensory, motor, mnemonic and intellectual abilities at the other. Evaluation of behavioral, pharmacological, and transplanta- tion techniques to enhance or restore function.

Mr. Halgren, Mr. Synklik

277. From Research to Practice: Biobehavioral Contributions (2 units). Prerequisite: consent of instructor. An overview of biobehavioral research as it is currently translated into therapeutic and preventive practice across disciplines. S/U grading.

Mr. Shapiro

278. Clinical Psychopharmacology Research. Discussion, two hours; laboratory, two hours. Prerequisites: experience in a psychiatric facility, involvement in psychiatric research, consent of instructor. Directed research and clinical experience at the graduate level. Clinical skills taught in the practical setting of ongoing psychopharmacology research projects. Discussion of clinical case problems and ongoing psychopharmacology research projects and of proposed and new projects focusing on practical problems, design, methodology, procedures, and instrumentation.

M279A. Seminar: Human Behavioral Ecology. (Same as Anthropology M229A and Education M218A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models of animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other ecological and economic approaches in anthropology.

Mr. Blount Jones

M279B. Seminar: Reproductive Families and Parenting. (Same as Anthropology M229B and Education M218B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from the viewpoint of evolution and the debate of theories, questions, and methods from social and biological sciences. Mr. Blount Jones

M279C. Seminar: Selected Topics in Human Ethology. (Same as Anthropology M229C and Education M218C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in the study of human behavior. Areas covered: coordination and evolution of behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins.

Mr. Blount Jones

280. Sociocultural Perspectives on Women and Health. (Same as Anthropology M269P, Nursing M280, and Public Health M276D.) Seminar, three hours. Prerequisite: consent of instructor. Literature from industrialized and developing societies on topics such as the relationship between women's social roles and health, especially illness as perceived by women, as patient and as health professional, and her role as a caregiver, especially as a nurse (whether as a patient, as a health professional, and as a caregiver) among patients and healers, and women's reproductive health issues, including the development and use of new reproductive technologies.

Ms. Browner (F)

281. Behavioral Therapy in an Educational Setting. Lecture, one hour; laboratory, six to 10 hours. Prerequisite: consent of instructor. Supervised experience in a classroom working with exceptional children. Theoretical background furnished through a one-hour weekly lecture.

Ms. Richy

Ms. Goldberg

290. Quantitative Analysis of Ethnographic Data. Prerequisite: graduate standing. Didactic and experiential training in quantification and analysis of ethnographic data, including principles of psychological scaling, and statistical techniques to be used in ethno-anthropological and psychological research, as applied to ethnographic data and application of univariate and multivariate statistical methods for analysis of ethnographic data.

Ms. Nihira

294. Neuroanatomy of Behavior (2 units). Lecture, 90 minutes. Prerequisites: graduate standing, consent of instructor. The clinical phenomenology of specific behavioral abnormalities such as disturbances of mood, language, cognitive, attention, movement, and sleep, and their relation to underlying structural disturbances. An outline of the neuroanatomy, both nuclear structures and pathways, involved in the behavioral abnormalities.

Mr. Benson, Mr. Scheibel

298. Current Topics in the Biobehavioral Sciences (1 to 4 units). Prerequisite: consent of instructor. Current issues in the biobehavioral sciences offered on a selective basis depending on instructor interest and topical relevancy of problems. Consult Schedule of Classes for topics and instructors. May be repeated for credit.

402. Childhood Psychosis Journal Club (1 unit). Prerequisite: consent of instructor. Discussion of basic and applied research issues related to childhood psychosis by a series of speakers. Readings suggested for each topic.

Ms. Sigman

403. Individual Case Supervision (1 to 4 units). Prerequisite: consent of instructor and 260. Preparation for one-to-one supervision. Credit is based on a written proposal to be structured by instructor and student prior to enrollment; additional information and proposal forms available in the Office of Educational Student Affairs.

Mr. Nihira

404. Clinical Psychotherapy: Individual Therapy (1 to 4 units). Prerequisite: consent of instructor and previous biological, psychological, and social factors influencing individual and group functioning. Consult Schedule of Classes for topics and instructors. May be repeated for credit.
413. Community Meeting: 2-West (1 unit). Prerequisites: assignment to Unit 2-West, consent of instructor. One-hour course devoted to individual experience in leading a large group of patients and staff. Leadership by rotation. A 30-minute process didactic session follows.

414. Emergency Treatment Attending Rounds (1 unit). Prerequisites: assignment to Emergency Treatment Unit, consent of instructor. Cases seen in the emergency room during the preceding night, reviewed by a consultant and the emergency treatment staff. Exploration of assessment techniques, methods of intervention, and alternate modes of treatment.

416. Treatment Planning Meetings (1 unit). Prerequisite: consent of instructor. Treatment and management problems posed by inpatient psychiatry. Discussion of clinical psychopathology, treatment plans, and interdisciplinary skills. Emphasis on formulating accurate diagnostic assessments and planning effective treatment programs utilizing the therapeutic methods of the milieu (somatic therapies, behavioral techniques, family therapy, group process, individual and dyadic treatment, etc.).

424. Ward Milieu Meeting (1 unit). Prerequisite: consent of instructor. Milieu course meetings designed to explore experientially and didactically the multiple aspects of group process on a psychiatric inpatient unit.

425. Teaching Case Conference (1 unit). Prerequisite: consent of instructor. Review of diagnosis and treatment of the full spectrum of disorders, with expert off-site consultants.

427. Pediatric Psychopharmacology Seminar (1 unit). Prerequisite: child psychiatry fellowship. Emphasis on intervention strategies, the expanded role of the nurse, sociocultural diversity, and prevention in pediatric populations. Emphasis on the expanded role of the nurse.

429. Child Outpatient Team (1 unit). Prerequisite: consent of instructor. Weekly team meetings to coordinate the clinical activities of the trainees in the Child Outpatient Department. Discussion of literature and theories related to selected cases. S/U grading.

445. Family Therapy Seminar for Clinicians (2 units). Prerequisites: prior clinical responsibility and treatment experience with individuals or families, consent of instructor. Conceptual and practical issues of family development and treatment. Emphasis on structural family therapy. Alternative models may be reviewed during the year. Videotape used extensively. Case supervision available. Participants must be treating one or more families.

449. Supervision in Systematic Parent Training (2 units). Lecture, 90 minutes; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Advanced clinical trainees learn behavior therapeutic techniques of assessment and treatment of parent-child problems. Lectures, case presentations, and workshops on the various skills necessary. Mr. Frankel

462A-462B-462C. School Intervention by Child Psychiatrists. Prerequisite: consent of instructor. Knowledge of children in schools through (1) field experience, (2) a didactic program, (3) group supervision. Each trainee selects a local elementary or junior high school as the site of field experience in consultation. Supervision focuses on assessing the needs of the school and initiating the consultation. Seminar considers theories of consultation, systems theory as applied to the schools, the organization of the school systems, the professional roles represented in the school (e.g., teachers, counselors, principals, etc.), and their special problems. In Progress grading.

465. Pediatric Psychopharmacology Seminar (1 unit). Prerequisite: child psychiatry fellowship or consent of instructor. Designed for all fellows in child psychiatry. The background of childhood psychopharmacology: clinical evaluation of psychotropic drugs for children; clinical indications for various psychotropic drugs. Clinical supervision of individual cases provided along with seminars and discussions of various articles. Mr. Cantwell

471. Grand Rounds (No credit). Prerequisite: second-year resident in Child Service, child psychiatry fellow, or consent of instructor. Each month one second-year child psychiatry fellow presents a major clinical problem. Senior faculty discuss intervention strategies. The presenting trainees expected to cover the pertinent literature and to assemble the critical elements of information on the case or problem at hand. Most sessions eligible for Continuing Medical Education credit.

M472A. Nursing Care of the Developmentally Disabled. (Same as Nursing M410A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: consent of instructor: Study of the handicapping conditions of childhood and their effects on the individual and the family. Content based on normative developmental models with consideration for sociocultural diversity. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to the implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience.

Ms. Betz (F)

M472B. Nursing Care of the Developmentally Disabled. (Same as Nursing M410B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: course M472A and/or consent of instructor. Study of the philosophical and conceptual models affecting care delivery for the developmentally disabled. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention.

Ms. Betz (W)

M472C. Nursing Care of the Developmentally Disabled. (Same as Nursing M410C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: course M472B and/or consent of instructor. Exploration and participation in the assessment, planning, and delivery of health care to the developmentally disabled in a variety of settings. Emphasis on the expanded role of the nurse.

Ms. Betz (Sp)

474. Research in Developmental Psychopathology (1 unit). Seminar, 90 minutes per month. Presentations of programmatic research in child psychiatry. Each session includes a faculty research presentation followed by comments from invited discussants, as well as general discussion. S/U grading.

Ms. Asarnow, Mr. Tanguay

478. Clinical Genetics Rounds (No credit). Prerequisites: medical graduate, consent of instructor. Weekly clinical rounds on patients seen in the wards during the preceding week. House staff and others involved in clinical work may attend. Usually an in-depth discussion of the medical and genetic aspects of one or more disorders presented.

Ms. Randall

479. Genetics Clinic Presentation (No credit). Prerequisite: consent of instructor. A weekly clinical teaching session on the patients seen in the preceding genetics clinic. In-depth discussion on the genetics of each disorder.

Ms. Crandall and the Staff

480. Analysis of Human Chromosome Studies (1 unit). Prerequisite: consent of instructor. Chromosome karyotypes prepared in the cytogenetics laboratory during the preceding week presented and discussed with reference to clinical findings. Teaching includes the interpretation of abnormal karyotypes and the technical aspects of routine and special chromosome stains.

Mr. Sparks

491. Chromatography Review (No credit). Prerequisites: premedical course or biochemistry, consent of instructor. A weekly session with presentation of amino acid chromatography carried out during the preceding week. The interpretation of abnormal chromatograms together with the technical aspects of the tests used.

Mr. Cederbaum

485. Medical Genetics Seminar (No credit). Prerequisite: introductory course, consent of instructor. A weekly lecture series intended for those interested in genetics or in the specific topic to be presented. Speakers are invited for their expertise or research in some special area related to genetics and may be from UCLA or elsewhere. Discussion and questions from the audience encouraged.

Ms. Crandall and the Staff

596P. Individual Studies in Psychiatry (2 to 12 units). Prerequisite: consent of instructor and department chair, based on a written proposal outlining the course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms available in the Office of Education, B7-349 NPI&H. Directed individual research and study in psychiatry at the graduate level.

Mr. Tymchuk

---

Radiation Oncology

B3-109 Center for the Health Sciences, (213) 825-9304
Chair
Robert G. Parker, M.D.
Vice Chair
Guy J.F. Julliard, M.D.

Scope and Objectives

The Department of Radiation Oncology includes clinical divisions at the UCLA and Wadsworth VA Medical Centers, divisions of experimental radiation biology and medical radiation physics, and the A. Frederick Rasmus sen, Jr., Clinical Neutron Therapy Facility. Research and teaching facilities are available at both medical centers. The primary clinical mission of the department is the management of patients who have cancer, although ionizing radiations also are used for preparing patients for bone marrow transplantation and for altering the immune system of patients with a range of illnesses. Knowledge of the disease in question, the comparative efficacy of radiation therapy and other methods, radiation biology and pathophysiology, and the physical characteristics of varying radiations is essential. Research interests range from clinical problems through cellular kinetics, radiation modifiers, radiation chemistry, molecular biology, immunology, and basic and applied physics. The educational programs serve medical, dental, nursing, and radiation therapy technologist students, and community and postgraduate physicians who are qualifying for certification in therapeutic radiology by the American Board of Radiology.

For further details on the Department of Radiation Oncology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.
Scope and Objectives

The biomedical physics graduate program in the Department of Radiological Sciences offers training in four specialties: biophysics, medical imaging, medical physics, and radiation biology. Specialized facilities for training and research are available in the departmental clinical laboratories, the Laboratory of Biomedical and Environmental Sciences, the Image Processing Laboratory, and a number of associated hospitals. Highly specialized equipment includes the biomedical cyclotron, the radiation oncology cyclotron, the picture archiving and communication system (PACS), the positron emission tomography (PET) scanners, the stereotactic gamma irradiator, and many VAX and Sun computers with image processor systems. Students are trained to work both as professional medical physicists and as independent investigators.

Graduates in biomedical physics can expect to engage in any combination of clinical service, consultation, research, and teaching. Biomedical physicists are usually employed in hospitals frequently associated with a medical school, where they are members of the academic staff. They are also in demand in high
Thesis or Comprehensive Examination Plan
You are required to write a thesis (Plan I) based on a research project or to pass a comprehensive examination (Plan II) consisting of material selected from the core courses. The examination is offered at least once a year and may be repeated once.

Ph.D. in Biomedical Physics
Admission
Admission to the doctoral program requires (1) selecting a specialty, (2) passing either all of the core courses with grades of B or better or the M.S. comprehensive examination, and (3) passing a written specialty qualifying examination which may be repeated once. Completion of a master's program is not required.

Qualifying Examinations
The qualifying examination for admission to the Ph.D. program should be taken by the end of the sixth quarter in residence. Once the qualifying examination is passed and you have selected a research topic in your specialty for the dissertation, you should, within a reasonable time frame agreed on with the dissertation adviser, form a doctoral committee and schedule the University Oral Qualifying Examination. This examination covers your mastery of the biomedical physics curriculum, particularly the areas of the proposed dissertation topic.

If you do not complete the dissertation within four years after taking the written qualifying examination, you may be required to take it again.

Final Oral Examination
The final oral examination, or dissertation defense, is required.

Upper Division Course
199. Directed Individual Study or Research for Undergraduate Students (2 to 4 units). Prerequisite: consent of graduate adviser (based on a written proposal outlining the course of study or research). Directed individual study in biomedical physics for undergraduate students to be structured by faculty member and student at time of initial enrollment.

Mr. Hoffman (F)

Graduate Courses
200A. Physics and Chemistry of Nuclear Medicine. Lecture, one hour; laboratory, three hours. Prerequisite: consent of instructor. Nuclear structure, statistics of radioactive decay, nuclear radiations and their interaction with matter, nuclear decay processes, nuclear reactions, and compartment models. The physical and chemical properties of radioactive preparations used in nuclear medicine.

Mr. Hoffman (F)

200B. Nuclear Medicine Instrumentation. Lecture, one hour; laboratory, three hours. Prerequisite: course 200A. Introduction to nuclear medicine instrumentation, including x-ray ionization chambers, probe and well scattering detectors, scintillation cameras, and single photon emission computed tomography.

Mr. Graham (W)

201. Medical Radiation Accelerator Design. Lecture, three hours. Prerequisite: course 203. Overview of the physical principles involved in the design of current particle accelerators (electron, proton, heavy particle) and analysis of the characteristics of current accelerators and facility design.

Mr. Myers (Sp)

202A. Nuclear Medicine. Prerequisite: course 200B or consent of instructor.

(F,W,Sp)

202B. Diagnostic Radiology. Prerequisites: courses 200A, 205, and 208A-208B, or consent of instructor.

(F,W,Sp)

202C. Radiation Therapy. Prerequisites: courses 203, 204, 207, and 208A-208B, or consent of instructor.

(F,W,Sp)

Mr. Smathers (W)

204. Introductory Radiation Biology. Effect of ionizing radiation on chemical and biological systems.

Mr. Withers (W)

205. Physics of Diagnostic Radiology. Production of X rays, basic interactions between X rays and matter, X-ray system components, physical principles of medical radiography, radiographic image quality, fluoroscopy, image intensifiers, special procedures, X-ray protection. Laboratory experiments illustrate the basic theory.

Mr. H.K. Huang (F)

206. Advanced Instrumentation. Prerequisites: courses 200A, 200B, 205, 209, 210. Introduction to the recent advances in digital diagnostic imaging systems. Topics centered on instrumentation include film digitizers, image equipment interfaces, computed radiography (CR), digital subtraction angiography (DSA), computed tomography (CT), magnetic resonance imaging (MRI), and picture archiving and communication systems (PACS).

Mr. H.K. Huang (Sp)

207. Dosimetry and Health Physics. Lecture, three hours. Prerequisite: consent of instructor. The dosimetry of ionizing radiation, concepts in radiation protection, the recommendation of the national council on radiation protection and measurements, the maximum permissible dose levels. Shielding calculations. The layout and design of radiologic installation.

Mr. Herman, Mr. Norman (F)

208A-208B. Medical Physics Laboratory. Lecture, three hours; laboratory, one hour. Prerequisites: one course in FORTRAN or another computer language, consent of instructor. Basic principles of the digital technology used in radiological sciences. The concepts and experience necessary to undertake radiological research in a diverse computing environment. Discussion of the relationship between computers and diagnostic equipment with regard to data acquisition, equipment interfacing, and data analysis.

Mr. Herman (F, W, Sp)

209. Digital Techniques in Radiological Sciences. Lecture, three hours; laboratory, one hour. Prerequisites: one course in FORTRAN or another computer language, consent of instructor. Basic principles of the digital technology used in radiological sciences. The concepts and experience necessary to undertake radiological research in a diverse computing environment. Discussion of the relationship between computers and diagnostic equipment with regard to data acquisition, equipment interfacing, and data analysis.

Mr. Markovich (F)

210. Principles of Medical Imaging. Prerequisites: courses 200A, 200B, 205, 209. Study of image representation in spatial and frequency domains. Methods of measuring PTF, LSF, ESF, MTF, and signal-to-noise ratio. Other topics include Fourier method, histogram analysis, filter design, sampling theory, optics and system analysis, image compression, and ROC analysis.

Mr. H.K. Huang (W)
496 / Radiological Sciences / SCHOOL OF MEDICINE

211. Medical Ultrasound. Lecture, 90 minutes; laboratory, two hours. Prerequisite: at least one calculus course; for non-Radiological Sciences Department students: consent of instructor. Designed to teach graduate biomedical physics students to calibrate ultrasound medical imaging equipment, to evaluate new instrumentation and research in the field, and to initiate their own research into clinical ultrasound studies. Ms. Kimme-Smith (W)

212. Biochemical Basis of Positron Emission Tomography (PET). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Introduction to biochemical processes and the application of radioisotopes to study metabolism noninvasively by positron emission tomography (PET). Validation of kinetic models to derive quantitative information from PET. Introduction to clinical and experimental application of PET. Mr. Buxton (F)

213. Quantitative Autoradiography. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Application of quantitative autoradiography for estimating brain and heart functions. Topics include 2-deoxyglucose method for metabolic rate; iodantipyrene method for blood flow; amino acid method for protein synthesis; quantitative receptor autoradiography; neuroanatomy and neurophysiology of autoradiogram and PET scan interpretation. Mr. Ackermann

214. Medical Image Processing Systems. Prerequisites: courses 209, 210, consent of instructor. Architecture, design, and programming of medical image processing systems. Use and development of benchmark programs to evaluate performance of image processing systems. Provides experience with at least five different image processing systems. Mr. H.K. Huang, Mr. Mankovich (Sp)

215. Breast Imaging Physics and Instrumentation. Lecture, three hours; laboratory, two hours. Prerequisites: course 205, consent of instructor. Advanced clinical imaging techniques in mammography, including X-ray generators, tubes, xerography, ultrasound, MRI, and digital units. Quality control, dose measurements on dedicated, recently manufactured equipment. Ms. Kimme-Smith (F)

M230. Computed Tomography: Theory and Applications. (Same as Biomathematics M230.) Prerequisites: consent of instructor. Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT); various reconstruction algorithms; special characteristics of CT, physics in CT, and various biomedical applications. Mr. S-C. Huang (W)

260A-260B. Seminar In Medical Physics (2 units each). Joint critical study by students and instructors of the fields of knowledge pertaining to medical physics. Periodic contributions made by visiting scientists. Discussion of research in progress. Mr. Norman (W, 260A; Sp, 260B)

266A-266B-266C. Seminar in Nuclear Medicine (2 units each). Topics of current interest in nuclear medicine. Intended for physicians, radiation physicists, and graduate students. S/U grading. (F, W, Sp)

269. Seminar in Medical Imaging (1 unit). Prerequisite: consent of instructor. Teaching assistance in graduate laboratory courses under the supervision of a faculty member. S/U grading.

495. Special Studies In Biomedical Physics. Discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Joint critical study by students and instructors of advanced topics in medical physics. Emphasis on positron-emitting labeled radioisotopes for PET. Application of radionuclide data to in vivo quantitative estimation of biochemical and pharmacological parameters in humans with PET (i.e., membrane transport, metabolism, biosynthesis, and neurotransmission). Mr. Barrio (Sp)

596. Research In Biomedical Physics (4 to 12 units). Directed individual study or research. Only one 596 course may be applied toward the M.S. degree requirements. May be repeated for credit.

597. Preparation for Ph.D. Qualifying Examinations. May not be applied toward the M.S. degree requirements. May not be repeated. S/U grading.

598. Research and Preparation of M.S. Thesis (4 to 12 units). Two 598 courses (or 596 and 596 combined) may be applied toward the M.S. degree requirements. May be repeated. S/U grading.

Scope and Objectives

The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain a broad knowledge of diseases treated by surgical means, to understand the pathology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the impact of surgical illness on the patient and the patient's family and environment.

Third-year students participate in a 12-week core clerkship in clinical surgery. UCLA, Wadsworth VA, and Harbor-UCLA Medical Centers provide individual sections, each of which has a special orientation depending on the patient population and the individual staff. During the fourth year students may elect to take additional clinical clerkships with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For further details on the Department of Surgery and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.
The excellent reputation of the UCLA School of Nursing has been achieved by the faculty, students, and graduates. The school is recognized nationally and internationally for its fine undergraduate and graduate programs. The first class in the new Doctor of Nursing Science degree program was enrolled in Fall Quarter 1987.

Faculty members are selected for their expertise, both in clinical areas of specialization and in research, and for their ability to transmit knowledge. In addition, highly skilled nurses practicing in many clinical settings are affiliated with the school and participate in the educational process.

In the curriculum, strong emphasis is placed on clinical competency and research. Faculty members are particularly cognizant of the needs of patients who represent a broad ethnic, racial, and cultural spectrum and have provided an emphasis on cultural diversity within the curricula. The School of Nursing has especially good technological support established to enhance the learning; for example, computer, media, and print resources are available for student use and are integral to the environment.

Students are selected for their capabilities, background, and potential for contributions to the profession and are prepared as highly competent professional nurses. Alumni, employed at all levels in many employment settings in different geographical areas, well represent the School of Nursing.

Outstanding educational opportunities are offered by the school. Faculty and administration are proud of the accomplishments and recognition of the school and its graduates and that the school continues to be in the forefront in preparing the future leaders in nursing.
School of Nursing

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. If you are interested in the academic programs offered, you are urged to attend a counseling session or request a copy of the "Announcement of the UCLA School of Nursing" by writing to the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702 (825-7181).

History and Accreditation

The School of Nursing was authorized by The Regents of the University in 1949 as one of the professional schools of the UCLA Medical Center. This action paved the way for the development of an undergraduate basic program in nursing and made possible the establishment of a graduate program leading to the Master of Nursing degree. In 1986 The Regents approved the Doctor of Nursing Science degree program; students were admitted into the program in Fall Quarter 1987.

The baccalaureate program has been continuously approved by the California Board of Registered Nursing since 1949. The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The Accrediting Service of the National League for Nursing has granted full accreditation to the programs since 1954.

Admission

The School of Nursing strives to attain a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on scholarship, diverse life experiences, and disadvantage. You must have completed a minimum of 84 quarter units with an overall grade-point average of 2.8 or better and have three letters of recommendation. Diverse life experiences, including previous employment, volunteer work, and community service which reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantages such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical handicaps. Completed applications should reflect clearly identified career goals and documentation of your potential in nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits 50 students each Fall Quarter. In addition to the regular UC Undergraduate Application Packet which must be returned to the University of California (P.O. Box 23460, Oakland, CA 94623-0460), an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702.

You can find a discussion of the prenursing curriculum and prehealth advising in "Preparing for a Professional School" in Chapter 5.

Degree Requirements

The Bachelor of Science degree is granted on fulfillment of the following requirements.

(1) You must complete 45 required courses (180 quarter units) of college work and satisfy the general University requirements.

(2) Of the required 45 courses, at least 21 courses must be in general education, including the courses listed under the "Prenursing Curriculum" in Chapter 5 on the College of Letters and Science.

(3) You must complete at least 25 courses (100 quarter units) of upper division coursework toward the degree, including Nursing 101, 104A, 104B, M105, 109, 120A through 120F, 184, two courses from 190A through 190F, 192, 193, 195, four electives, Public Health 100A, 112.

Bachelor of Science Degree

The baccalaureate program leading to the Bachelor of Science degree provides for a close interchange of general and professional education. The physical, social, and emotional health aspects of nursing are emphasized throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers.

Credit by examination is available to qualified students on review of previous education.
(4) You must maintain an overall grade-point average of C (2.0) or better in all courses taken while a student in the School of Nursing.

(5) You must complete all required nursing courses in the school and receive a grade of C or better in the following courses: Nursing 101, M105, 109, 120A through 120F, and two courses from 190A through 190F.

(6) You must be enrolled in the School of Nursing during your final three quarters in residence; the last nine courses must be completed while so enrolled.

Study Lists: You may not enroll in more than four courses per quarter unless a petition is approved in advance by the assistant dean.

Honors

Dean's Honors

Dean's Honors are awarded annually to undergraduate students completing the academic year with distinction. To be eligible you must achieve an overall grade-point average of 3.75 on a minimum of 36 graded units of work completed during the academic year.

Honors with the Bachelor's Degree

College honors are awarded to graduating students with a superior overall grade-point average. The levels of honors and their requirements for each level are: Summa cum laude, 3.85; Magna cum laude, 3.65; Cum laude, 3.5. To be eligible for college honors, you must have completed at least 90 University of California units for a letter grade.

School of Nursing Faculty Award

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor's and the master's program with the highest grade-point average in all nursing courses.

Master of Nursing Degree

In the Master of Nursing (M.N.) degree program, students contribute to improving nursing care through the application of advanced knowledge in nursing research, theory, and clinical practice. Throughout the program, the structure for nurse-client relationships and research is provided by the nursing process. This is a deliberative problem-solving activity which includes assessment, diagnosis, intervention, and evaluation. In addition to their clinical specialization sequence, students may elect courses in teaching, consultation, and/or administration as preparation to meet their specific career goals.

Admission

You must provide evidence of the following:

(1) Graduation from a recognized college or university having a National League for Nursing-accredited baccalaureate nursing program satisfactory to the School of Nursing and to the Graduate Division. If you have completed other curricula (e.g., graduated from an international institution), you may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees.

(2) Status as a licensed registered nurse in the state of California.

(3) An upper division statistics course or a lower division statistics course with content equivalent to Public Health 100A, to be completed before entering the school.

(4) An upper division nursing research course taken at an NLN-accredited institution and equivalent to Nursing 193, to be completed before entering the school.

(5) Nursing 192 or its equivalent, to be completed before entering the school.

(6) Professional and/or academic competence in nursing attested through three letters of recommendation.

(7) A scholarship record satisfactory to the Graduate Division and to the School of Nursing.

(8) A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) for applicants from foreign countries in which English is not the primary language and medium of instruction, whether licensed registered nurses in the U.S. or not (scores must be submitted prior to consideration for admission). Refer to “Proficiency in English” under “Graduate Admission” in Chapter 3 for further information.

(9) A passing score on the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination for international applicants who are not licensed registered nurses in the U.S., prior to consideration for admission.

In addition to the Graduate Division application, you must file the Application for Admission to the School of Nursing, available through the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702. Application deadlines are June 1 for Fall Quarter and December 31 for Spring Quarter. For information on admission to graduate standing, see Chapter 3.

Major Fields or Subdisciplines

The School of Nursing offers graduate studies in the following areas.

Maternal-Child Health: Maternity, pediatrics.

Medical-Surgical Nursing: Cardiopulmonary, general medical-surgical, nursing administration, oncology.

Primary Ambulatory Care / Family Nurse Practitioner: Family, gerontology, occupational health.

Psychiatric-Mental Health Nursing

You may choose to add preparation in education or administration to your clinical requirement.

Degree Requirements

(1) A minimum of 11 courses (44 units) in the 100, 200, 400, and 500 series is required; eight of the courses (32 units) must be taken in the School of Nursing, with five (20 units) in the 200 and 400 series. Additional coursework is required to fulfill the requirements for certain areas of specialization. A total of eight units of 500-series courses may be applied toward the total course requirement for the degree.

(2) A minimum grade-point average of 3.0 is required. A grade of B is required in graduate clinical nursing courses in order to advance to the next clinical course in a series.

(3) A minimum of three quarters of full-time enrollment (eight units per quarter) is required for academic residence.

(4) Successful completion of a comprehensive examination or a thesis is required.

Course Requirements

You must successfully complete the following courses:

(1) Research in nursing (Nursing 204).

(2) Nursing theory, cultural diversity (Nursing 203, 209A, 209B).

(3) Management, consultation, and professional issues (Nursing 220A — not required for administration students — and 220B).

(4) Clinical practice (Nursing 401, 402, 405, 416, 417, 421A through 426C). Clinical course requirements vary for each specialty area; not all courses are required in each specialty.

(5) Clinical specialization.

Additional course requirements vary according to specialty area listed below.

Maternal-Child Health

Maternity Clinical Nursing Specialty: The goal of this specialty is to develop clinical specialists who take a leadership role in the nursing management of the childbearing family in all phases of the reproductive cycle. Students develop individualized plans of study to meet their personal and professional goals. Guided options include management of low-risk pregnancy, alternative birthing options, perinatal nursing, and basic neonatal intensive care. Required courses include Nursing 203, 204, 209A, 209B, 212, 220A, 220B, 223, 422A, 422B, 422C.
Pediatric Clinical Nursing Specialty: The goal of this specialty is to develop clinical specialists who take a leadership role in the nursing management of a selected group of neonates, children, and families. Guided options include neonates, children, and families experiencing acute/critical illness, chronic illness, developmental disabilities, or oncology. Required courses include Nursing 203, 204, 209A, 209B, 212, 220A, 220B, 421A, 421B, 421C.

Medical-Surgical Nursing Specialty: The graduate of the medical-surgical nursing program is a specialist who takes leadership in the care of one or more specific groups of clientele whose health problems may be classified according to biological systems, pathology, acuity levels, medical treatment modalities, physical functions, or psychophysiological functions. Graduate students choose from existing clinical options (i.e., cardiopulmonary, general medical-surgical nursing, nursing administration, and oncology), and within each option they develop individualized plans of study to meet personal and career objectives.

Cardiopulmonary: This option is designed to prepare clinical nurse specialists to meet an increasing demand for improved health services for patients with cardiopulmonary diseases. Several years of experience in acute coronary/pulmonary care settings (medical and/or surgical) and/or in cardiovascular rehabilitation is highly recommended before entering this option. Graduates are expected to function as cardiopulmonary nurse clinicians, teachers, consultants, or research associates. Required courses include Nursing 203, 204, 209A, 209B, 210, 211, 214, 215, 220A, 220B, 423A, 423B, 423C.

General Medical-Surgical: The goal of this option is to prepare clinical specialists in general medical-surgical nursing. Students are encouraged to develop their own clinical focus in areas of acute chronic illness (e.g., critical care, trauma nursing, diabetes, neurological nursing, rehabilitation, geriatrics). At least two years of prior experience in medical-surgical nursing is highly recommended. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220B, 423A, 423B, 423C.

Nursing Administration: This option focuses on advanced clinical practice, organizational theory, health services and financial management, and the practice of nursing administration. Students gain the basic knowledge and skills required of nursing administrators in a volatile health care environment. Nursing content develops the knowledge of advanced clinical and management practice needed to plan and evaluate nursing services. Health services and financial management content provides a framework for organizing, directing, and coordinating health care resources. The program requires six quarters of full-time study, a summer session, and a three-month spring administrative residency. Stipends for the residency program are provided by the institutions in which the residency is completed.

In addition to the required courses in the School of Nursing, students in this program take courses in the School of Public Health, Division of Health Services Management, and the John E. Anderson Graduate School of Management. Nursing administration students may select medical-surgical nursing as their clinical specialization. Required courses include Nursing 203, 204, 209A, 209B, 220B, 428A, 428B, 428C, and seven health services/financial management courses (Management 403, 408, 411, 412, Public Health 130, 430, 436).

Oncology: The comprehensive care of the cancer patient requires that nurses be prepared in theory and skills to minister to the patient's total needs—physical, psychological, emotional, social, and spiritual. This option is designed to prepare clinical nurse specialists for the interdisciplinary team responsibility for cancer prevention, treatment, and rehabilitation. In addition to clinical competence in preventive, detection, and rehabilitative phases of cancer care, emphasis is directed to the preparation of the clinician in research, teaching, administration, and consultation. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220B, 416, 417, 423A, 423B, 423C.

Primary Ambulatory Care/Family Nurse Practitioner Specialty: This specialty prepares family nurse practitioners to take a leadership role in the care of individuals throughout the lifespan. The focus is on collaborative practice to assure comprehensive quality health care and health maintenance in outpatient, work site, nursing home, or home health settings. Emphasis is on the assessment, treatment, and evaluation of the client's responses to actual or potential health problems which may be chronic or acute and include primary prevention. Special options are available in occupational health or gerontology, with additional coursework. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220B, 264, 402, 429A, 429B, 429C.

Thesis Plan
If you choose the thesis plan, you normally select a thesis committee by the beginning of your third quarter or following completion of Nursing 204 and 205A or 205B. You are expected to complete the thesis within the normal five- to seven-quarter time period. Completed theses should be filed approximately two weeks before the awarding of the degree.

Comprehensive Examination Plan
The comprehensive examination is given in written form and is scheduled each quarter. You are eligible to take the examination during the quarter in which you are advanced to candidacy and may repeat the examination, in its entirety or in part, twice. You must complete all requirements for the degree within one calendar year after advancement to candidacy.
Doctor of Nursing Science Degree

The Doctor of Nursing Science (D.N.Sc.) degree program is research oriented with a focus on clinical nursing research. The goal is the development of scholars who, through the conduct of original research and the generation of theory, will build the knowledge base for professional practice. The curriculum allows students to obtain the theoretical and scientific knowledge necessary for scholarly pursuit in nursing.

Admission

Priority is given to graduates of accredited master's degree programs in nursing. Individuals admitted to doctoral study with a bachelor's degree in nursing and a master's degree in a non-nursing field are required to make up clinical specialty deficiencies by taking clinical courses in one of the current master's clinical specialty programs. Such courses may be taken concurrently with doctoral courses. Individuals admitted to doctoral study with a bachelor's degree in nursing and masters are required to complete a program of master's courses in nursing at UCLA as a prerequisite to entry into doctoral courses.

A philosophy of science course (Philosophy 227 or 232 or its equivalent) is a prerequisite to the program. The course may be taken after admission has been granted and/or concurrently with nursing theory courses during your first year in the program but must be completed prior to taking the written qualifying examination.

Applications are reviewed on an individual basis by the doctoral program committee. Applicants whose application materials indicate a high potential for success in the doctoral program are interviewed. Preference is given to applicants who demonstrate (1) capacity for original scholarship and nursing research as evidenced by prior publications, (2) consistent research objectives and career goals, (3) research objectives congruent with those of the faculty in the School of Nursing, and (4) scholarly verbal and written communication skills.

You must provide evidence of the following:

1. A Master of Nursing degree; a Bachelor of Science degree in Nursing and a master's degree in a non-nursing* field; or a Bachelor of Science degree in Nursing*. Degrees must be from a National League for Nursing-accredited program satisfactory to the School of Nursing and to the Graduate Division.

2. A scholarship record satisfactory to the Graduate Division and to the School of Nursing, with a minimum grade-point average of 3.5.

3. A combined verbal, quantitative, and analytic score of at least 1,500 on the Graduate Record Examination (GRE), taken within the past five years.

4. An upper division statistics course with content equivalent to Public Health 100A, 100D, or Biomathematics 170A.

5. A graduate research in nursing course with content equivalent to Nursing 204.

6. A graduate nursing theory course with content equivalent to Nursing 203.

7. A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) for applicants from foreign countries in which English is not the primary language and medium of instruction (scores must be submitted prior to consideration for admission). Refer to “Proficiency in English” under “Graduate Admission” in Chapter 3 for further information.

8. A passing score on the nursing and English portions of the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination for international applicants who are not licensed as registered nurses in the U.S., prior to consideration for admission.

9. Status as a licensed registered nurse; prior to entry into any clinical practicum, evidence of current licensure as a registered nurse in the State of California is mandatory.

10. Four letters of reference affirming your potential for scholarly, investigative, and creative endeavors in nursing.

11. Examples of scholarly papers and/or creative works.

12. A statement of educational objectives, specific focus of research, and program and career goals.

13. Curriculum vitae.

In addition to the Graduate Division application, you must file the Application for Admission to the School of Nursing, available through the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702. Application deadlines for Fall Quarter are December 31 (priority) and February 1 (final). For information on admission to graduate standing, see Chapter 3.

Areas of Study

Students in the doctoral program focus their study in one of three areas: (1) sociocultural diversity — formulation, investigation, and evaluation of social and cultural similarities and differences that influence the perceptions of health and illness, the treatment of illness, and the utilization of health services; (2) psychophysical environment — formulation, analysis, and investigation of the effects of the psychological and physical environments (both internal and external) on health/illness states, on cooperation with treatment regimens, and on preventing hospitalization and rehospitalization; (3) health-illness continuum — formulation, analysis, and evaluation of measures to enhance the patient's ability to promote, maintain, or regain health states and to combat illness states.

Degree Requirements

You must meet the University minimum standards for doctoral degrees. School of Nursing requirements are as follows:

1. Completion of core and cognate courses required for your area of focus. Cognate courses are to be selected from an approved list, with consent of the faculty adviser and review by the doctoral program committee.

2. Successful completion of a written qualifying examination and the University Oral Qualifying Examination.

Course Requirements

Core Courses

The following core courses are required of all students in the program:

1. Nursing science (Nursing 206A, 206B).

3. One statistics sequence (Public Health 206A-206B, or Psychology 252 and 253, or Sociology 210A-210B).

4. One major area of study course (Nursing 226 or 227 or 228).

Cognate Courses

A minimum of six cognate courses (24 units) relevant to your major area of study is required and must be selected from an approved list available in the Student Affairs Office, 2-200 Factor Building. In the sociocultural diversity area, you take courses in cultural anthropology and sociology. In the psychophysical environment area, courses in architecture and psychology are required. In the health-illness continuum area, you select courses in physiology and public health.

Qualifying Examinations

The written qualifying examination must be passed after completion of the basic core courses. The examination evaluates three areas of knowledge: the basic concepts of nursing science, nursing research methods and analyses, and the basic concepts of your selected area of study. Normally no more than one reexamination is permitted.

The University Oral Qualifying Examination, taken after completing the course requirements, evaluates your dissertation proposal. You are responsible for obtaining the consent of five or more faculty members to serve on your doctoral committee.
After passing the University Oral Qualifying Examination, you may apply for advancement to candidacy. Formal notice is contingent on approval by the chair of the doctoral committee and the dean of the Graduate Division.

Final Oral Examination

When the dissertation is completed and approved by all committee members, a meeting for oral defense, which may be open to the public, is scheduled. All members of the committee, both certifying and noncertifying, must be present. You are expected to respond to any substantive and/or methodological questions raised during the meeting.

Upper Division Courses

101. Introduction to the Art and Science of Nursing (8 units). Lecture, four hours; laboratory, 12 hours; autotutorial laboratory, variable. Introduction to nursing theory and practice. Content includes the following modules: nursing process, pharmacology, interpersonal and personal skills. Methodology includes laboratory, lectures, autotutorial laboratory, and clinical application. Ms. Bahu and the Staff 104A. Behavior of Man in Health and Illness. Examination of the health-illness continuum from the framework of social and biological sciences. Content includes role theory, developmental theory, transcultural communication theory, and other theories relevant to nursing practice. Ms. Vasta 104B. Behavior of Man in Health and Illness. Prerequisite: course 104A. Examination of the health-illness continuum from the framework of illness as a stressor and the possible responses to such stress. Ms. Bahu and the Staff.

120C. Medical Nursing (5 units). Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, M105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of the theoretical content related to the nursing care of the patient undergoing medical interventions. Ms. Gonzalez 120D. Surgical Nursing (5 units). Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, M105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of the theoretical content related to the patient undergoing surgical interventions. Ms. Green 120E. Psychiatric/Mental Health Nursing (5 units). Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, M105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of the theoretical content related to the nursing care of the patient undergoing surgical interventions. Ms. Killion 190B. Advanced Maternity Nursing (7 units). (Formerly numbered 190A, 109B.) Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120F. Clinical concentration in the management of the childbearing family. Theoretical content further refines theories, concepts, and nursing practice related to the childbearing family. Application of the theoretical concepts to reproduction to the nursing care of the family. Ms. Killion 190C. Critical Care Nursing (7 units). (Formerly numbered 190A, 109B.) Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120F. Clinical concentration related to nursing in the critical care setting. Theoretical content includes pathophysiology, pharmacology, advanced nursing skills, and treatment modalities in selected clinical situations. Application of the theoretical content related to the nursing care of the acutely ill medical and surgical adult patient in the emergent and critical phases of illness. Ms. Bahu 190D. Perioperative Nursing (7 units). (Formerly numbered 190A, 109B.) Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120F. Clinical concentration related to nursing in the operating room setting. Theoretical content further refines theories, concepts, and the practice of perioperative nursing. Application of the theoretical content related to the nursing care of the patient undergoing surgical intervention. Ms. Mendelsohn 190E. Advanced Psychiatric/Mental Health Nursing (7 units). (Formerly numbered 190A, 109B.) Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120F. Clinical concentration in the area of mental health nursing. Theoretical concepts and application related to the mental health of the adult, geriatric, child, or adolescent client. Experiences include those in inpatient psychiatric nursing, outpatient day treatment programs, individual and child therapy, hospice programs, and crisis intervention units. Ms. Vasta 190F. Advanced Community Health Nursing (7 units). (Formerly numbered 190A, 109B.) Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120F. Clinical concentration in the area of mental health nursing. Theoretical content focuses on the community as a context for understanding the relationship between the psychosocial environment and the health status of individuals and groups. Clinical settings include schools, home health agencies, and occupational health and other nonacute settings. Ms. Mendelsohn 192. Physical Assessment. Lecture, two hours; discussion one hour; laboratory, three hours. Prerequisite: completion of a physical assessment course. Review of history taking, physical examination, and use of special techniques. Ms. Vredevoe 193. Principles of Pathology and Disease Processes. Lecture, two hours; laboratory, five hours. Prerequisites: courses 101, 104A, 104B, 120A through 120F. Clinical concentration in the area of mental health nursing. Theoretical content focuses on the community as a context for understanding the relationship between the psychosocial environment and the health status of individuals and groups. Clinical settings include schools, home health agencies, and occupational health and other nonacute settings. Ms. Vredevoe 195. Nursing Leadership in a Changing Environment (3 units). Theories of leadership, management, and change explored in relationship to the delivery of patient care services. Issues of professional socialization and leadership in a changing health care environment. Ms. Welsh
Graduate Courses

Research in Nursing, Nursing Theory, and Cultural Diversity

202. Philosophical Foundations of the Science of Nursing. Prerequisite: Sociology 1. Description and discussion of the special health care problems that members of minority groups face which may be related to socioeconomic status as well as ethnic background and subcultural differences.

199. Special Studies in Nursing (2 to 16 units). Prerequisite: senior standing and/or consent of instructor. Designed to explore major schools of thought in contemporary Western philosophy of science, with emphasis on the ways in which these schools may and do influence nursing science and practice.

203. Theoretical Frameworks for Nursing Practice. Comparative study of selected conceptual models of nursing and the recipient of nursing, with particular emphasis on the regulatory model, the adaptation model, the developmental model, and the complementary model.

204. Research in Nursing: An Advanced Course. Prerequisite: course 193 or equivalent. Upper division basic research methodology course. Complex research designs and analysis of multiple variables, with emphasis on techniques for control of variables, data analysis, and interpretation of results. Analysis in depth of the interrelationship of theoretical frameworks, design, sample selection, data collection instruments, and data analysis techniques. Content discussed in terms of clinical nursing research problems.

205A. Qualitative Research Methods in Nursing. Prerequisite: course 204. Emphasis on nursing research designs utilizing the field method approach, ethnemethodology, and/or inductive methods.

205B. Quantitative Research Methods in Nursing. Prerequisite: course 204. Emphasis on nursing research designs requiring statistical analysis of data.

206A. Nursing Theory Development: Issues and Methods. Lecture, two hours; seminar, two hours. Prerequisites: courses 203 and Philosophy 227 or 232 or equivalent. Issues and methods of developing nursing theories and models, including the characteristics, significance, and function of theories and models and rationale for theory development in nursing. In Progress grading (credit to be given only on completion of course 206B).

206B. Nursing Theory Development: Application and Integration. Lecture, two hours; seminar, two hours. Prerequisite: course 206A. Issues involved in application and integration of nursing theory in practice, education, administration, and research, including the characteristics, significance, and function of nursing theories and models in testing nursing theories.

207. Research in Nursing: Measurement of Clinical Variables. Lecture, two hours; discussion, two hours. Prerequisites: course 204, and 205A or 205B or equivalent. Analysis of methods of measurement of physiological and psychosocial variables relevant to clinical nursing research, with emphasis on the purposes, underlying assumptions, strengths, and limitations of measurement techniques. Analysis of techniques to develop reliability, validity, sensitivity of measurement instruments.

208. Research in Nursing: Measurement of Outcomes. Discussion, three hours; field application, six to eight hours. Prerequisites: courses 206A, 207. Methods of measurement and analysis of clinical variables and outcomes. Emphasis on development of measurement techniques and scaling and tool development as they apply to outcomes. Emphasis on the opportunity to develop knowledge and skills through course content and individualized directed involvement in a clinical research project.

209A. Human Responses to Illness. Lecture, three hours; discussion, one hour. Prerequisite: course 203. Introductory graduate-level nursing theory course. Emphasis on broad categories of human responses to illness that nurses diagnose and treat: psychological and sociocultural responses to illness. Designed to provide a conceptual base that nurses can use in assessing, diagnosing, planning, and intervening in these responses to illness.

209B. Human Responses to Illness. Prerequisites: courses 203, 204, 209A. Current concepts and research on human physiological and role-related responses to illness in critical, long-term, and ambulatory settings. Physiological responses involve protective, regulatory, and sensory/aural mechanisms. Role-related and social responses involve and provide context for other human responses.

210. Respiratory Physiology as It Relates to Nursing. Lecture, three hours; discussion, one hour; seminar, one hour. Prerequisite: course 204. Emphasis on current research. Application of knowledge to nursing problems.

211. Cardiovascular Physiology as It Relates to Nursing. Lecture, three hours; discussion, one hour; seminar. Prerequisite: upper division human physiology course. Advanced treatment of the topic presented in lectures and seminars, with emphasis on current research. Application of knowledge to nursing problems.

212. Discontinuities in Family Health during the Reproductive Years. Lecture, two hours; discussion, one hour. Overview of selected problems with health connotations that are potentially disruptive to the family during childbearing years. Selected problems examined in depth. Pertinent variables affecting the family defined, stated in methods, strategies, coping, and utilization of professional services; their relevance for nursing practice.

214. Human Responses to Cardiovascular Illness. (Formerly numbered 415.) Corequisite: course 211. Introduction to the basic methods of assessing cardiovascular function in health and illness, with emphasis on their application in clinical nursing practice.

220A. Essentials of Nursing Management. Lecture, two hours; discussion, one hour; laboratory, three hours. Study of management theories and their application to administration of nursing services in health care facilities. Emphasis on management functions of planning, organizing, staffing, leading, and controlling. Use of the group process, lecture, and discussion.

220B. Consultation and Professional/Ethical Issues. Lecture, three hours; discussion, one hour. Recommended: prerequisite to 220A, one clinical graduate level practice course. Study of the theories and practices of professional role development in the realm of consultation and professional and ethical issues as foundation for advanced practice. Lectures, panels, and group discussion. Ms. van Serrvelen

221. Theoretical Frameworks for Developmental Problems, Middle and Later Years (3 units). Aspects of human development relevant to understanding health needs in middle and later years. Changes in biological, cognitive, and psychosocial processes; implications for prevention and rehabilitative care.

223. Management of Developmental Problems, Early Years. Lecture, two hours; discussion, two hours. Study of selected human developmental theories, hypotheses, and concepts as they relate to children. Problems relevant to nursing examined through the critique of pertinent literature.

226. Psychophysical Environmental Influences on Health-Illness Behaviors and Health Outcomes. Lecture, two hours; discussion, two hours. Prerequisites: courses 205A, 205B. Application of theory to research on health-illness-related phenomena of behaviors occurring as health status changes, self-definition as healthy or ill, regimen compliance, the sick-role, and societal influences on sick-role.

228. Sociocultural Variations in Health and Illness. Lecture, two hours; discussion, two hours. Prerequisites: courses 205A, 205B. The relationship of sociocultural factors to health systems and the diagnostic and treatment processes, health-related systems, and the sociocultural variations into clinical nursing research.

224. Seminar in Primary Ambulatory Care (2 units). Corequisite: course 402 or consent of instructor. Discussion of the concepts of team practice, interprofessional and intrainstitutional relationships, legal issues, and the sociocultural aspects of primary care.

227. Medical Anthropology. (Same as Anthropology M263Q, Psychiatry M273, and Public Health M279H.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of the interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

228. Consultation and Professional/Ethical Issues. Lecture, three hours; discussion, one hour. Recommended: prerequisite to 220A, one clinical graduate level practice course. Study of the theories and practices of professional role development in the realm of consultation and professional and ethical issues as foundation for advanced practice. Lectures, panels, and group discussion.

Ms. van Serrvelen

221. Theoretical Frameworks for Developmental Problems, Middle and Later Years (3 units). Aspects of human development relevant to understanding health needs in middle and later years. Changes in biological, cognitive, and psychosocial processes; implications for prevention and rehabilitative care.

223. Management of Developmental Problems, Early Years. Lecture, two hours; discussion, two hours. Study of selected human developmental theories, hypotheses, and concepts as they relate to children. Problems relevant to nursing examined through the critique of pertinent literature.

Ms. Gottesman, Ms. Ludington

226. Psychophysical Environmental Influences on Health-Illness Behaviors and Health Outcomes. Lecture, two hours; discussion, two hours. Prerequisites: courses 205A, 205B. Application of theory to research on health-illness-related phenomena of behaviors occurring as health status changes, self-definition as healthy or ill, regimen compliance, the sick-role, and societal influences on sick-role.

Ms. Reeder

228. Sociocultural Variations in Health and Illness. Lecture, two hours; discussion, two hours. Prerequisites: courses 205A, 205B. The relationship of sociocultural factors to health systems and the diagnostic and treatment processes, health-related systems, and the sociocultural variations into clinical nursing research.

Ms. Reeder

248. Seminar in Primary Ambulatory Care (2 units). Corequisite: course 402 or consent of instructor. Discussion of the concepts of team practice, interprofessional and intrainstitutional relationships, legal issues, and the sociocultural aspects of primary care.

Ms. Ver Steeg

273. Advanced Seminar in Medical Anthropology. (Same as Anthropology M263Q, Psychiatry M273, and Public Health M279H.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of the interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

Ms. Brower

280. Sociocultural Perspectives on Women and Health. (Same as Anthropology M269P, Psychiatry M280, and Public Health M276D.) Seminar, three hours. Prerequisite: consent of instructor. Literature from industrialized and developing societies on topics such as the relationship between women’s social roles and their health, women as patients and healers, and women’s reproductive health issues, including the development and use of new reproductive technologies.

Ms. Brower
Clinical Practice

401. Nursing Assessment and Intervention. Lecture, two hours; laboratory, four to eight hours. Prerequisite or corequisite: course 203. Instruction and experience in the systematic assessment of patients for the identification of nursing problems. Discussion and evaluation of major modes of intervention practice.
Ms. Bershadian

402. Primary Diagnosis for Nurse Practitioners. (Formerly numbered 402B.) Lecture, four hours; laboratory, four hours; individual study, four hours. Prerequisites: courses 195 or equivalent, admission to the nurse practitioner specialty area of the primary ambulatory care section, consent of instructor. Collection, analysis, and reporting of data used by the nurse practitioner in identification of patient problems. Principles and practices in history taking, physical examination, laboratory, and other diagnostic methodology. Pathology and pathophysiology integrated in a systems approach.

405. Assessment in Psychiatric Nursing. Lecture, two hours; laboratory, six hours. A preparatory course for advanced clinical practice. A critical examination of the concepts and strategies which affect assessment of psychological behavior.
Ms. Odum and the Staff

M410A. Nursing Care of the Developmentally Disabled. (Same as Psychiatry 472A.) Lecture, one hour; discussion, one to two hours; laboratory, one to two hours. Prerequisite: course M410A and/or consent of instructor. Study of the handicapping conditions of childhood and their effects on the individual and the family. Content based on normative developmental models with consideration for specific disabilities. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to the implementation of intervention strategies. Series of three courses integrates didactic and clinical experience.
Ms. Betz (F)

M410B. Nursing Care of the Developmentally Disabled. (Same as Psychiatry 472B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: course M410A and/or consent of instructor. Study of the philosophical and conceptual models affecting care delivery for the developmentally disabled. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention.
Ms. Betz (W)

M410C. Nursing Care of the Developmentally Disabled. (Same as Psychiatry 472C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: course M410B and/or consent of instructor. Exploration and participation in the assessment, planning, and delivery of health care to the developmentally disabled in a variety of settings. Emphasis on the expanded role of the nurse.
Ms. Betz (Sp)

412. Perspectives of Occupational Health Nursing Practice (3 units). Lecture, three hours; two half-day practical sessions. Emphasis on the role of the occupational health nurse in the nursing process and the professional role of occupational health nurses. Prerequisite: consent of instructor. Presentation of current concepts in occupational health within a nursing framework. Analysis of elements of worksite health programs; discussion of the leadership role in ensuring a safe and healthful workplace.
Ms. Mullé

Ms. Sarna

417. Advanced Concepts in Cancer Nursing. Lecture, three hours; clinical observation and field trips, three hours. Prerequisite: course 416 or consent of instructor. Clinical application of advanced concepts in oncology — pathophysiology, epidemiology, prevention, diagnosis, psychosocial impact, treatment, symptom distress, and rehabilitation — to nursing care. Emphasis on the functional and scientific exploration of cancer care problems. Individualized clinical observations and field trips.
Ms. Sarna

421A. Clinical Nursing Care of Children (6 units). Lectures, four hours; laboratory, 15 hours. Prerequisites: courses 203, 223. The application of a theoretical model and the nursing process to a specific, identifiable client population in a pediatric setting. With special emphasis on assessment and diagnosis. Content covers each aspect of the nursing process.
Ms. Gottesman and the Staff

421B. Advanced Clinical Nursing Care of Children (8 units). Lectures, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 421A. Focus on the role of the nurse specialist in pediatric nursing, with an emphasis on the practitioner component of the role. Students identify a selected population for whom care is planned and implemented within an conceptual framework for nursing interventions. Emphasis on the development of a researchable clinical question.
Ms. Gottesman and the Staff

421C. Specialization in Nursing Care of Children (8 units). Lectures, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 421B. Required for the pediatric clinical nursing specialty. The practitioner role is continued in this course to further consolidation of knowledge and skill. Emphasis on consultation, staff development, research, and patient advocacy dimensions of the clinical nurse specialist role.
Ms. Gottesman and the Staff

422A. Clinical Maternity Nursing (8 units). Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 203. Emphasis on developing skill in the utilization of the assessment, intervention, and evaluation phases of the nursing process with childbearing families. Examination of family-centered orientation and theoretical models as they relate to the development of nursing practice and care giving.
Ms. Ludington and the Staff

422B. Advanced Clinical Maternity Nursing (8 units). Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 422A. Knowledge and clinical expertise refined and extended, with emphasis on high-risk conditions in the reproductive process. Emphasis on the development of effective communication, intervention, and evaluative phases of the nursing process and on teaching, counseling, and collegial relations.
Ms. Konikaj-Griffith and the Staff

422C. Clinical Specialization in Maternity Nursing (8 units). Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 422B. Further development of clinical expertise in areas of the high-risk and normal conditions encountered during pregnancy, related to the reproductive and perinatal processes. Emphasis on coordination of care, patient and family education, counseling, and consultation.
Ms. Konikaj-Griffith and the Staff

423A. Advanced Clinical Medical-Surgical Nursing (8 units). Lecture, two hours; laboratory, 18 hours. Prerequisite: course 422A. Study of special nursing roles and responsibilities in selected medical-surgical areas. Prerequisite: course 220A (may be taken concurrently). Advanced course in the theory and practice of the nursing care of adults. Emphasis on the critical evaluation, integration, and application of scientific and theoretical knowledge within an advanced nursing practice role. Focus on acutely ill patients.
Ms. Nyamathi and the Staff

423B. Advanced Clinical Medical-Surgical Nursing (8 units). Lecture, two hours; laboratory, 18 hours. Prerequisite: course 423A. Study of clinical specialization and other expanding roles in nursing. Emphasis on continued refinement and extension of professional knowledge and clinical skills in a selected clinical area in the care of patients with chronic health problems. Practicum planned in conjunction with students' career goals.
Ms. Cooper and the Staff

423C. Clinical Specialization in Medical-Surgical Nursing (8 units). Lecture, two hours; discussion, 90 minutes; laboratory, 15 hours. Prerequisite: course 423B. Examination and implementation of the clinical nurse specialist role with a specific patient population within a particular group. Emphasis on the functional aspects of the role: practitioner, educator, consultant, researcher. Ms. Welsh and the Staff

424A. Clinical Psychiatric Nursing (5 units). Lecture, one hour; discussion, two hours; laboratory, six hours. Prerequisites: course 405, consent of instructor. Focus on the process of psychotherapy, with specific emphasis on the knowledge and skills of assessment and individual therapy practice.
Ms. van Servellen and the Staff

424B. Advanced Clinical Psychiatric Nursing (8 units). Discussion, three hours; laboratory, 15 hours. Prerequisite: course 424A. Refinement and extension of an understanding of the process of psychotherapy of individuals and groups, and emphasis on the role of the psychiatric nurse. Focus on the process of psychotherapy, with specific emphasis on the knowledge and skills of assessment and individual therapy practice.
Ms. van Servellen and the Staff

424C. Clinical Specialization in Psychiatric Nursing (10 units). Discussion, two hours; laboratory, 24 hours. Prerequisite: course 424B. Supervised internship. Students select the setting and population.
Ms. van Servellen and the Staff

425A. Advanced Clinical Gerontological Nursing (3 units). (Not the same as course 425A prior to Winter Quarter 1986.) Prerequisite: one graduate nursing course. Emphasis on the role of the nurse in managing scarce resources, with emphasis on patient classification systems, staffing, and assignment of nursing personnel. Cost-effective management of human and financial resources explored extensively.
Ms. McBride

425B. Clinical Specialization in Gerontological Nursing (8 units). (Formerly numbered 425C.) Discussion, three hours; laboratory, 30 hours maximum. Prerequisite: course 425A. Extension and demonstration of competencies in planning and implementation of nursing programs in health problems of the elderly.
Ms. McBride

428A. Clinical Nursing Management. Lecture, one hour; discussion, one hour; laboratory, six hours. Prerequisite: Public Health 430 or Management 412 or appropriate substitute. Application of management theory in a health care setting, with emphasis on organization of nursing care of groups of patients. Students work with nurse managers and clinical specialists in developing a unit philosophy, objectives, policies, standards of practice, and care evaluation mechanisms.
Ms. Burner

428B. Advanced Clinical Nursing Management. Lecture, one hour; discussion, one hour; laboratory, six hours. Prerequisite: course 428A. Examination of the role of the nurse in the management of health care resources, with emphasis on patient classification systems, staffing, and assignment of nursing personnel. Cost-effective management of human and financial resources explored extensively.
Ms. Burner
428C. Nursing Administration Residency. Prerequisites: courses 428A, 428B. Required field residency experience. Students apply management theory to administration of nursing services in a variety of health care settings. Provides an organizational-based environment in which students can develop skills in management practice. Ms. Burner

429A-429B. Preceptorship in Primary Ambulatory Care Nursing (9 units each). Lecture, three hours; laboratory, 18 hours. Prerequisites: courses 264, 402. Theory and clinical practice in nursing management and evaluation of health problems in a selected ambulatory population. Emphasis on health maintenance. Attention to the developmental and cognitive needs of clients in relation to family, social, and cultural structures. Ms. Davis-Sharts and the Staff

429C. Advanced Preceptorship in Primary Ambulatory Care Nursing (10 units). Lecture, two hours; laboratory, 24 hours. Prerequisites: courses 429A-429B. Required of students who want to meet the requirements for preparation as a nurse practitioner as established by the California Board of Registered Nursing. Emphasis on the refinement and extension of assessment, management, and evaluation skills, family health care, and community health concepts. Placements provide the opportunity for an in-depth focus on a specific group of health problems. Ms. Davis-Sharts and the Staff

Special Studies

596. Directed Individual Studies for Graduate Students (4 to 8 units). Prerequisite: consent of instructor. Opportunity for graduate students in nursing to pursue special research interests. May be repeated for credit, but only four units may be applied toward the M.N. degree requirements. S/U grading.

597. Individual Study for Comprehensive Examination (4 to 8 units). May be repeated once for credit, but only four units may be applied toward the M.N. degree requirements. S/U grading.

598. Research for Thesis (4 to 8 units). Prerequisite: consent of instructor. May be repeated for credit, but only four units may be applied toward the M.N. degree requirements. S/U grading.

599. Research for and Preparation of D.N.Sc. Dissertation (2 to 8 units). Individualized faculty supervision of doctoral dissertation research by student's chair. May be repeated for credit, but only eight units may be applied toward the doctoral degree requirements. S/U grading.
Public health is concerned with understanding, preventing, and controlling disease, and with promoting health in populations. Its goal is to ensure that the protection and improvement of the health of the public is accomplished by the most effective means consistent with equity for all individuals.

The mission of the UCLA School of Public Health is to develop, integrate, and apply pertinent knowledge from the biological, physical, and social sciences to enhance community health. In this context health is defined as a positive condition requiring not only the control of disease but also the presence of sufficient physical and mental vigor to promote well-being and improve the quality of life. To fulfill this mission the school (1) educates future public health professionals, (2) conducts research to protect and improve health and health services, and (3) contributes knowledge, expertise, and service to the community.

Seven areas of study are offered: behavioral sciences and health education, concerned with the study and implementation of behavior which prevents disease and enhances health; biostatistics, which develops statistical and analytic techniques for public health use; environmental and occupational health sciences, which elucidates health hazards in the general environment and in the workplace; epidemiology, concerned with the nature, extent, and distribution of disease and health in populations; health services, concerned with the organization, quality, and distribution of health care; nutritional sciences, concerned with investigating the role of nutrients in disease processes and promoting good nutritional practices; and population and family health, which identifies health problems of and promotes health in high-risk groups such as women, children, and the poor.

Students are prepared for careers in the public and private sectors, in health agencies, hospitals, industry, and voluntary organizations, and for careers in research and teaching.
School of Public Health

Emeritus Professors

Roselyn B. Alfinito-Slater, Ph.D.
Ruth Boak, Ph.D., M.D.
Lester Breslow, M.D., M.P.H.
John M. Chapman, M.D., M.P.H.
Wilfrid J. Dixon, Ph.D.
Olve Jean Dunn, Ph.D.
Carl E. Hopkins, Ph.D., M.P.H.
Raymond J. Jessen, Ph.D.
Edward B. Johns, Ed.D.
David H. Katz, D.M., M.A.
Ralph W. McKeel, Ph.D.
Edward L. Rada, Ph.D.
Milton I. Roemer, M.D., M.P.H.
John F. Schaechter, Ph.D.
Max H. Schoen, D.D.S., D.P.H.
Frank F. Tallman, M.D.
Daniel M. Willet, Ph.D.

Associate Professors

Carol S. Anehsensel, Ph.D. (Population and Family Health)
E. Richard Brown, Ph.D. (Behavioral Sciences and Health Education)
Albert Chang, M.D., M.P.H. (Population and Family Health)
Shan Cretin, Ph.D., M.P.H. (Health Services)
William G. Cumberland, Ph.D. (Biostatistics)
Clima A. Davis, Ph.D. (Environmental and Occupational Health Sciences)
Curtis D. Eckert, Ph.D. (Nutritional Sciences)
John R. Fronemo, Ph.D. (Environmental and Occupational Health Sciences)
Michael S. Goldstein, Ph.D. (Behavioral Sciences and Health Education)
Sander Greenland, Dr.P.H. (Epidemiology)
Robert W. Haile, Dr.P.H. (Biostatistics)
Isabelle F. Hunt, Dr.P.H. (Nutritional Sciences)
Hal Morgenstern, Ph.D. (Epidemiology)
Donald E. Morris, Sc.D., M.S.P.H. (Behavioral Sciences and Health Education)
Judith M. Siegel, Ph.D., M.S.P.H. (Behavioral Sciences and Health Education)
Jane L. Valentine, Ph.D. (Environmental and Occupational Health Sciences)

Assistant Professors

Rina Alcalay, Ph.D. (Behavioral Sciences and Health Education)
C. Elizabeth Castro, Ph.D. (Nutritional Sciences)
Dorota Dabrowska, Ph.D. (Biostatistics)
Virginia F. Flack, Ph.D. (Biostatistics)
Michael R. Jones, Ph.D. (Nutritional Sciences)
Douglas M. Mackay, Ph.D. (Environmental and Occupational Health Sciences)
Glen A. Melnick, Ph.D. (Health Services)
Gary A. Richland, M.D., M.P.H. (Population and Family Health)
Michael G. Ross, M.D., M.P.H., in Residence (Population and Family Health)
Nathaniel Schenker, Ph.D. (Biostatistics)
Shoshannah Soffer, Dr.P.H. (Health Services)
Jeremiah M. Taylor, Ph.D., in Residence (Biostatistics)
Robert O. Valdez, Ph.D.

Professors

Abdelmonem A. Affifi, Ph.D. (Biostatistics), Dean
Lawrence R. Ash, Ph.D. (Infectious and Tropical Diseases)
Allan Ralph Barr, Sc.D. (Infectious and Tropical Diseases)
Emil Berkmanov, Ph.D. (Behavioral Sciences and Health Education)
Judith Blake, Ph.D. (Fred H. Bixby Professor of Population Policy)
Linda B. Bourque, Ph.D. (Population and Family Health)
Robert H. Brook, M.D., Sc.D. (Health Services)
Potter C. Chang, Ph.D. (Biostatistics)
Virginia A. Clark, Ph.D. (Biostatistics)
Roger Detels, M.D., M.S. (Epidemiology)
John Edmond, Ph.D., M.D., Dr.P.H. (Biostatistics)
Robert M. Elashoff, Ph.D. (Biostatistics)
Jonathan B. Efielding, M.D., M.P.H. (Health Services)
Ralph R. Freidich, D.V.M., Dr.P.H. (Epidemiology)
William H. Glaze, Ph.D. (Environmental and Occupational Health Sciences)
Donald Guthrie, Ph.D., in Residence (Biostatistics)
William C. Hinds, Ph.D. (Environmental and Occupational Health Sciences)
Robert J. Jenrich, Ph.D. (Biostatistics)
Snehendu B. Kar, Dr.P.H. (Behavioral Sciences and Health Education; Population and Family Health), Chair and Associate Dean
Joel D. Koppie, M.D., in Residence (Nutritional Sciences)
Jess Kraus, Ph.D. (Epidemiology and Occupational Health)
Peter A. Lachenbruch, Ph.D. (Biostatistics)
Charles E. Lewis, M.D., Sc.D. (Health Services)
Virginia C. Li, Ph.D., Ph.D. (Behavioral Sciences and Health Education)
Robert A. Mah, Ph.D. (Environmental and Occupational Health Sciences)
Marvin Marcus, D.D.S., M.P.H. (Health Services)
Frank J. Massey, Jr., Ph.D. (Biostatistics)
Mohammad G. Mustafa, Ph.D. (Environmental and Occupational Health Sciences)
Alfred K. Neumann, M.D., M.A., M.P.H., F.A.B.P.M. (Population and Family Health), Assistant Dean for Student Affairs
Charlotte G. Neumann, M.D., M.P.H. (Population and Family Health)
Stuart O. Schweitzer, Ph.D. (Health Services)
Susan C. Scrimshaw, Ph.D. (Population and Family Health)
William Shonick, Ph.D. (Health Services)
Marian E. Swendsen, Ph.D. (Nutritional Sciences)
Paul R. Torrens, M.D., M.P.H. (Health Services)
Barbara R. Vash, Ph.D. (Biostatistics)
James L. Whittenberger, M.D., in Residence (Environmental and Occupational Health Sciences)
Telford H. Work, M.D., M.P.H., D.T.M.&H. (Infectious and Tropical Diseases)

Lecturers

Emily Abel, Ph.D.
Linda M. Blanchard, M.P.H.
Michael L. Bobrow, B.Arch.
Helene G. Brown, B.S.
Anne H. Coulson (Epidemiology)
Warren Day, M.S., M.A.
Patricia L. Engle, Ph.D.
Marsha A. Epstein, M.D., M.P.H.
Charles M. Ewell, Jr., Ph.D.
Paul M. Field, M.D., M.P.H.
Jay W. Friedman, D.D.S., M.P.H.
Kennard Friedman, M.S., M.H.A.
Emil Gauvreau, M.P.H.
Paul G. Girard, Ph.D.
Robert D. Girard, LL.B.
Frank C. Gomez, Dr.P.H.
Los Green, M.P.H.
Joseph Hakel, M.P.H.
Eung-Soo Han, M.D., M.P.H.
Patricia Hassakis, M.D., M.P.H.
Arthur C. Hollister, Jr., M.D., M.P.H.
Santeri J. James, Ph.D. (Biostatistics)
Patrice E. Jeffile, R.N., M.P.H.
Martine Jozan, M.D., Dr.P.H. (Epidemiology)
Stephen W. Kahana, D.Env.
James J. Korell, Ph.D. (Biostatistics)
Joel W. Kovner, Dr.P.H.
Stewart A. Laidlaw, Ph.D. (Nutritional Sciences)
Kenneth E. Lee, M.S.P.H.
Marin H. Lee, Ph.D. (Biostatistics)
Harry M. Lieberman, M.D., M.P.H.
Robert G. Lindberg, Ph.D. (Environmental and Occupational Health Sciences)
Ronald L. Linder, Ed.D. (Behavioral Sciences and Health Education)
Lawrence S. Linn, Ph.D.
J. Robert Lister, LLB.
Ping-yu Liu, Ph.D. (Biostatistics)
Norma J. Murphy, M.S. (Nutritional Sciences), Associate Field Program Supervisor
Audrey J. Naylor, M.D.
Mario Panaquca, B.A. (Nutritional Sciences; Environmental and Occupational Health Sciences)
Sondra T. Perdue, Dr.P.H. (Biostatistics)
Donald W. Polhemus, M.D., M.P.H.
Stanton J. Price, Dr.P.H.
George W. Pritchard, J.D., M.D., M.P.H.
Stephen J. Robinson, M.D., M.P.H.
Hossain Ronaghy, M.D., M.P.H.
Robert R. Rupp, M.S. (Health Services)
Rafatollah Salmipour, M.D.
Simon R. Spurz, M.P.H.
Susan B. Sorenson, Ph.D.
Constance S. Sullivan, Dr.P.H.
Jack Swanzinger, Ph.D.
Pamela Hale, M.P.H.
M.M. (Behavioral Sciences and Health Education)
Stephen L. Volla, M.P.H.
Lawrence G. Wayne, Ph.D. (Epidemiology)
Walter Weygandt, M.D. (Environmental and Occupational Health Sciences)
Paul F. Wehrle, M.D. (Epidemiology)
Florence C. McGucken, M.S., Emeritus
Jean L. Mickey, Ph.D., Emeritus
Adjunct and Visiting Professors
Ellen Alkon, M.D., M.P.H., Adjunct (Health Services)
Sumita Singh, Ph.D., M.S., Adjunct (Behavioral Sciences and Health Education)
Edith M. Carlisle, Ph.D., Adjunct (Nutritional Sciences)

Wen-Pin Chang, M.D., M.P.H., M.M.Sc., Visiting (Population and Family Health)

Brian E. Henderson, M.D., Adjunct (Epidemiology)
James M. Iacono, Ph.D., Adjunct (Nutritional Sciences)
Thomas Mack, M.P.H., Adjunct (Epidemiology)
Eric J. McLaughlin, Ph.D., Visiting (Health Services)
Joseph P. Newhouse, Ph.D., Adjunct (Health Services)
John M. Peters, M.D., M.P.H., Sc.D., Adjunct (Epidemiology)
Ruth J. Roemer, J.D., Adjunct (Epidemiology)
Jeffrey B. Ross, Ph.D., Adjunct (Environmental and Occupational Health Sciences)
David A. Wegman, M.D., Visiting (Environmental and Occupational Health Sciences)

Adjunct Associate Professors
Davida Coady, M.D., M.P.H. (Epidemiology)
Edward J. Faeder, Ph.D. (Environmental and Occupational Health Sciences)
Arlene Fink, Ph.D. (Health Services)
Raymond D. Goodman, M.D., M.P.H. (Health Services)
Jacqueline B. Kosecoff, Ph.D. (Health Services)
Edward J. Faeder, Ph.D. (Behavioral Sciences and Health Education)
Jeffrey Pomerance, M.D. (Population and Family Health)
Susan M. Preston-Martin, Ph.D., M.P.H. (Epidemiology)
Gary H. Spivey, M.D., M.P.H. (Epidemiology)
Wen-Pin Chang, M.D., M.P.H., D.M.Sc. (Nutritional Sciences)
Thomas Mack, M.P.H., Adjunct (Nutritional Sciences)
Eric J. McLaughlin, Ph.D., Adjunct (Health Services)
David A. Wegman, M.D., Visiting (Environmental and Occupational Health Sciences)

Adjunct and Visiting Assistant Professors
Roger A. Clemens, Dr.P.H., Adjunct (Nutritional Sciences)
Allyson R. Davies, Ph.D., Adjunct (Health Services)
Daniel H. Ershoff, Dr.P.H., Adjunct (Behavioral Sciences and Health Education)
James R. Greenwood, Ph.D., M.P.H., Adjunct (Infectious and Tropical Diseases)
Wilbert Jordan, M.D., M.P.H., Adjunct (Health Services)
Sherrie H. Kaplan, Dr.P.H., Adjunct (Health Services)
Brian J. Koziol, Ph.D., Adjunct (Nutritional Sciences)
Laura M. Lake, Ph.D., Adjunct (Environmental and Occupational Health Sciences)
Phoebe Lindsey, Dr.P.H., Visiting (Health Services)
Alfred C. Marcus, Ph.D., Adjunct (Behavioral Sciences and Health Education)
Edward J. O'Neill, M.D., M.P.H., Adjunct (Environmental and Occupational Health Sciences)
Jose O. Mato, M.D., Adjunct (Epidemiology)
Lawrence S. Rubenstein, Ph.D., Adjunct (Health Services)
James W. Sayre, Dr.P.H., Adjunct (Biostatistics)
Bernard M. Siegel, M.D., Adjunct (Health Services)
Robert M. Sloane, M.S., Adjunct (Health Services)
Jacqueline E. Stiff, M.D., M.S.P.H., Adjunct (Health Services)
Marc Strasburg, Dr.P.H., Adjunct (Epidemiology)
Jeffrey B. Wales, Ph.D., Adjunct (Health Services)
Fred W. Wasserman, Dr.P.H., Adjunct (Health Services)

The School of Public Health no longer offers a bachelor's degree, but does offer graduate programs leading to both academic and professional degrees in public health and in biostatistics and is responsible for the administration of the graduate program in environmental science and engineering, whose description immediately follows the public health programs.

Degrees Offered

Biostatistics ............. M.S., Ph.D.
Environmental Science and Engineering .................. D.Env.
Preventive Medicine and Public Health ................... M.S.*
Public Health .............. M.P.H., M.S., Dr.P.H., Ph.D.

*Not admitting new students at this time

Requirements for Graduate Degrees

Admission
Application forms and the Announcement of the UCLA School of Public Health, as well as descriptive brochures and applications for the Environmental Science and Engineering Program, may be obtained by writing to the Office of Student Affairs, School of Public Health, 16-071 Public Health, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the UCLA Application for Graduate Admission, Fellowships, and Financial Support must be completed. Three letters of recommendation are required, two from former professors and one from an employer (if no employer, three former professors) before an application is considered complete. It is your responsibility to ensure that the application file is complete.

The preferred deadline for graduate applications is January 15, 1989, for Fall Quarter 1989 admission. Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. Except for the Division of Population and Family Health, prior field experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation. In addition, you must be accepted by and accommodated in the division of the Department of Public Health in which you wish to study. If you need help in deciding on a division, you should speak to the staff in the Office of Student Affairs.

Applicants to the School of Public Health must perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE) The Medical College Admission Test (MCAT), Dental Admission Test (DAT), or Graduate Management Admission Test (GMAT) may be accepted in lieu of the GRE by some divisions under certain circumstances. (Note: The Nutritional Sciences and Epidemiology Divisions require GRE scores. MCAT or DAT scores are accepted only for applicants already holding M.D. or D.D.S. degrees; GMAT scores are accepted only for applicants to the joint M.B.A.-M.P.H. program.) Applicants at the master's level require a minimum combined (verbal and quantitative) score of 1,100. Applicants at the doctoral level need a minimum combined (verbal and quantitative) score of 1,200. The analytical section is not required. The Biostatistics Division has different criteria for evaluating performance on aptitude tests for its master's and doctoral degrees.

Refer to the UCLA Application for Graduate Admission, Fellowships, and Financial Support for the Test of English as a Foreign Language (TOEFL) requirement for international applicants. For more information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

No screening examination is required for admission; however, specified courses are required by the Biostatistics, Environmental and Occupational Health Sciences, Health Services, and Nutritional Sciences Divisions (see below). If your undergraduate coursework has been deficient in breadth of fundamental training, you must take specified undergraduate courses after admission.

Master's Applicants
Your prior program of study should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically include two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and others that constitute an adequate preparation for the proposed area of specialization.

If your prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for your proposed area of specialization, you must include courses in those sciences in your graduate program; these may not be applied toward the minimum requirements for the degree.

Specific Concentration Requirements

(1) Students concentrating in environmental and occupational health sciences should have a bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Coursework should include three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/ or biochemistry. Mathematics through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for these requirements will be considered for applicants with an otherwise superior academic background.
(2) Students whose field of concentration is nutritional sciences should have a bachelor's degree in biological, physical, or chemical sciences or related areas, with coursework including three quarters of general chemistry (including quantitative analysis), three quarters of organic chemistry and/or biochemistry, mathematics through calculus, three quarters of biological sciences (including microbiology and physiology), and two quarters of physics (physics is not required for the M.P.H. program). Substitutions for these requirements will be considered for applicants with an otherwise superior academic background.

Applicants who do not qualify for admission to the M.P.H. program because they lack courses in basic nutrition and therapeutic nutrition may be admitted to the M.S. program. Students admitted to the M.S. program are eligible to petition to transfer to the M.P.H. program after satisfactorily completing courses in basic nutrition (equivalent to Public Health 152) and therapeutic nutrition (equivalent to courses 166A, 166B).

(3) Applicants interested in the population and family health program must have some prior experience in the health field (paid or volunteer) and preferably a bioscience or behavioral science background.

(4) For admission to the Master of Science in Biostatistics program, you must have completed a bachelor's degree. Majors in mathematics, computer science, or a field of application in biostatistics are preferred. Undergraduate preparation for the program should include Mathematics 31A, 31B, 32A, 32B, 33A, 33B (second-year calculus), or the equivalent.

Master of Public Health

The M.P.H. is a professional degree in the field of public health. You are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses, at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; one 596 course (four units) may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

In addition to the core courses, at least three courses (two or four units) outside your area of specialization are strongly recommended. Only courses in which you receive a grade of C- or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Areas of Specialization

Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

Behavioral Sciences and Health Education

Public Health 181 or 125, 182, 482 (eight units), 484, and four courses (16 units) from 280, 282, 287, 295A, and 481 are required. In addition, two to three elective courses from the list of specialty areas are required. Individual and experimental courses may not be applied toward the required course units. Additional courses may be elected, in consultation with your faculty adviser, from within the department or in other schools/colleges at UCLA. Normally two years or six quarters are needed to complete the course requirements. Candidates with a prior doctoral degree or advanced preparation in a related field may complete an M.P.H. degree in one year. It is possible for students to elect an additional area of concentration in another division.

Biostatistics

Required courses include Public Health 101A, 101B, and 101C (in exceptional circumstances, courses 100A, 100B, 100C, and 100D may be substituted); 200A; 401E or 401F or 401G; 402A, 402B (satisfies the field training requirement); three courses from 403, 404, 405, 406. Courses 211A and 211B are recommended. Elective courses should be selected in public health, biostatistics, or mathematics. Students whose mathematics preparation does not include sufficient calculus must take courses in the Mathematics Department while in the M.P.H. program.

Environmental and Occupational Health Sciences

Required courses include Public Health 150, 153 (required for students who have not taken a course in microbiology), 154, 156, 253A, 255 and 256 (may be repeated for credit), 259A, 400, 450. Elective courses should be selected in your area of specialization and in public health, engineering and applied science, chemistry, biology, management, architecture and urban planning, and medicine.

After, or simultaneous with, fulfillment of the core (divisional and schoolwide) requirements, you take courses with emphasis on water quality, environmental management, air pollution, environmental epidemiology, environmental sciences and engineering, industrial hygiene, or environmental toxicology.

Epidemiology

Infectious and Tropical Diseases: Required courses include Public Health 100B, 210, 211A, 211B, 212H, 216A, 216B, 218A, 218B, 220A, 220B, 222 (must be taken each quarter), 400 (for predoctoral students), 596 (for postdoctoral students). Students holding a doctorate in an appropriate biomedical science may petition for waiver of course 400. You must submit a report on a project related to infectious and tropical diseases.

Methodology/Chronic Diseases: Required courses usually include Public Health 100B, 210, 211A, 211B, 400 (for predoctoral students), 596 (for postdoctoral students), two or four units in behavioral sciences, and two additional courses from 211C, 212D, 212E, 212G, 212I, 212J, 212K, 213, 215A, 215B, 221, 223, 225, 227, 410A, 410B, 411, 414, 415, 417, 418. (Physicians and other postdoctoral students in an appropriate biomedical science may petition for waiver of course 400.) You must submit a report demonstrating competence in epidemiologic methodology.

Health Services

Note: The Division of Health Services is examining the curriculum with a view to its revision. Information regarding requirements for graduation may be subject to change. Call 825-2594 for up-to-date details.

Required core courses include Public Health 132, 230A-230B (instead of 130), 238.

Health Services Management: This track is only available to students enrolled in the M.B.A./M.P.H. concurrent degree program. For further information, refer to the listing under “Cooperative Degree Programs” later in this chapter. Admission to the program requires one course in accounting and one in microeconomics; prior coursework in management theory, economics, computers, and statistics is highly recommended. Required courses include Public Health 131, 400, 430, 431, 432, 433, 436, 437, 596, Management 403, 408. Elective courses are selected in consultation with your faculty adviser and must include one course in planning and two additional courses from the Division of Health Services. You must also complete a minimum of 12 weeks of field study in an approved site, for which you receive four units of credit for Public Health 400.

Students are admitted only in Fall Quarter. Residences are offered by various types of local health care facilities; students receive a stipend of $1,200 to $2,100 per month.
A special two-year concentration in health information systems is offered for students interested in the design, implementation, management, and evaluation of data systems in a wide range of health and health-related organizations. A summer internship is required. (This program will not be offered in 1988-89.)

Health Services Organization: An M.P.H. is available as a one-year program for students with prior doctoral degrees. Division core courses are required. Additional courses are determined on an individual basis. No summer internship is required.

Nutritional Sciences
Emphasis is on community nutrition. Required courses include Chemistry 152 or Biological Chemistry 205A and 205B, Public Health 165 or 261A, 260E, 260F, M260G, 260H, 262 or 263 (may be repeated for credit), 400, 460, 461, 463A, 463B. Public Health 162, 167, 264E, 264F, 462 are recommended. Electives should be selected from Public Health 100B, 100C, 166A, 166B, 181, 270, Biology 177, Psychiatry M184.

Of the courses listed above, at least six graduate courses (at least two must be in the 400 series) and at least one seminar course (262, 263) are required.

A minimum of 56 units is required. You must take two seminars during your course of study. If residence is extended beyond four quarters, more than two seminars are required.

Population and Family Health
Emphasis is on population, family health, family planning, reproductive and women's health, maternal and child health, and international health (including applied nutrition, community and primary health care). Two tracks are available — domestic (U.S.) and international (primary health care). You are required to complete at least 16 units (for health professionals) or 20 units (for generalists) of divisional courses offered in selected tracks, plus Public Health 125, 171A, 400, 596. Elective courses are selected in consultation with your faculty adviser.

Students with a professional degree may graduate with an M.P.H. in one academic year (three quarters). Students without a professional health degree need four to six quarters of study.

Comprehensive Examination Plan
You must pass two comprehensive examinations, one in the area of specialization, and a centrally administered written examination in the general field of public health. If you fail either examination, you may be reexamined once.

The schoolwide core course comprehensive examination is administered twice each academic year, usually the first Saturday in May and November. The examination in the major field is administered by your division.

Field Training
Field training in an approved public health program is required of candidates who have not had prior relevant field experience. A minimum of four units, but no more than eight, is required.

Interdivisional International Health
The school offers several options for international or domestic students interested in international health. Faculty in all divisions of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations in cross-cultural settings.

If you are interested, specify the division most relevant to your skills area on your application, clearly indicating your international interests. You will be given an appropriate adviser and directed to additional faculty members interested in internationally oriented training, service, and research.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to apply to the Division of Population and Family Health.

Cooperative Degree Programs
Following are descriptions of combined programs of study leading to the M.P.H. degree. In the articulated degree programs listed below, no course may be used for credit toward more than one degree.

M.A.-African Area Studies/M.P.H.
The School of Public Health and the African Area Studies Program have an articulated degree program whereby you can work sequentially for the master's degree in African Area studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Area Studies Program, UCLA African Studies Center, and/or the Office of Student Affairs, UCLA School of Public Health.

M.A.-Latin American Studies/ M.P.H.
The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. degree program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

M.B.A./M.P.H.
The School of Public Health, Division of Health Services, and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields and who wish in-depth professional preparation for such a career. The program reflects the combined interest of employers, faculty, and students who have recognized the increasing challenges facing managers in the health care industry and the need for individuals who are skilled in dealing with these challenges. Students should apply to both schools simultaneously as admissions decisions are made jointly. Application materials are available from the M.B.A. Admissions Office, John E. Anderson Graduate School of Management.

Preventive Medicine Residency Program
An accredited residency in general preventive medicine is available to physicians through the School of Public Health. The residency is designed to prepare qualified physicians for leadership roles in public health practice and preventive medicine teaching and research. Completion of the program can lead to board eligibility in public health and general preventive medicine — a specialty recognized by the American Board of Preventive Medicine.

The residency currently consists of at least two years of work but may be completed over a longer period of time. The first part is comprised of formal studies for the Master of Public Health (generally in either family health, epidemiology, or health services). Other areas (e.g., maternal and child health) may be considered on an individual basis. Application must be made simultaneously for both the residency and admission to the School of Public Health for the M.P.H.
The faculty of Physician applicants who have completed the Los Angeles County Department of Health Services, the Jonson Comprehensive Cancer Center, and other city and county health departments in the state. New affiliations are developed as the need arises. Residents may also undertake studies toward qualification for a more advanced degree in public health — the Dr.P.H. or Ph.D. — or do research in collaboration with members of the faculty. Physician applicants who have completed M.P.H. studies at an accredited school of public health may be admitted directly into the field training part. Generally speaking, a license to practice medicine is a prerequisite to field training. Many residents are working members of health departments and complete the program over a period of several years. For further information, contact the Office of Student Affairs, UCLA School of Public Health.

Master of Science in Public Health

The Master of Science program provides research orientation within the general field of public health. It includes the preparation of a thesis or major written report.

Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Public Health 597 may not be applied toward the degree requirements. No more than 18 full courses may be required for the degree.

Mandatory core courses include Public Health 100A, 100B, and 112 (114 for epidemiology majors). Each core course may be waived if you have taken a similar course elsewhere and can pass the waiver examination.

Only courses in which you receive a grade of C- or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Areas of Specialization

Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

Behavioral Sciences and Health Education

Public Health 181 or 125, 182, 281, 484, and four to six divisional core courses (selected from an approved list) are required. Electives, selected in consultation with an adviser, must include the Public Health 283 series and research methods courses. Normal program length is six quarters.

Environmental and Occupational Health Sciences

Required courses usually include Public Health 150, 153, 154, 156, 253A, 255 (may be repeated for credit), 258A, 259A, 598 (a maximum of one course may be applied toward the minimum total course requirement). Environmental Science and Engineering 411, one course in biological chemistry (a specific course may be listed in the specialty track area). Elective courses should be selected in your area of specialization and in public health, biological chemistry, physical sciences, engineering and applied science, chemistry, biology, microbiology, law, and pharmacology.

At least five of the approximately 13 courses must be at the graduate level (200 and 500 series). In addition, you must complete a laboratory project and thesis.

After, or simultaneous with, fulfillment of the core (divisional and schoolwide) requirements, you take courses with emphasis on water quality, environmental management, air pollution, environmental epidemiology, environmental sciences and engineering, industrial hygiene, or environmental toxicology. Students specializing in environmental epidemiology should discuss specific course requirements with the Division of Environmental and Occupational Health Sciences and the Division of Epidemiology.

Epidemiology

Infectious and Tropical Diseases: Required courses usually include Public Health 210, 211A, 211B, 212H, 216A, 216B, 216A, 218B, 220A, 220B, 222 (must be taken each quarter). Course 130 (for students planning to enter the Dr.P.H. program or to practice epidemiology in a health department) is recommended. Electives should be selected from courses 116, 214, 219, and other relevant courses in public health and biomedical sciences.

Methodology/Chronic Diseases: Required courses usually include Public Health 210, 211A, 211B, 221, plus one full course in each of demography, biostatistics, data management, and topic specific epidemiology (courses 116, 212D, 212E, 212G, 212H, 212I, 212J, 212K, 213, 214, 215A, 215B, 225, 226, or others). Courses 130 (for students planning to enter the Dr.P.H. program or to practice epidemiology in a health department), 410A, 410B are recommended. Relevant elective courses should be selected in public health and biomedical sciences.

Health Services

Note: The Division of Health Services is examining the curriculum with a view to its revision. Information regarding requirements for graduation may be subject to change. Call 825-2594 for up-to-date details.

Required core courses include Public Health 132, 230A-230B, 238. Emphasis is on health planning, health policy analysis, and health services research for clinicians.

Planning: Public Health 243, 248, 444, one computer course, one course from the field of health financing, law, or public sector approved by your adviser; one evaluation course, three management courses, and a summer internship are usually required. Courses 100C, 100D, 131, 232, 233, 235, 239, 240, 247, 281, 287, 430, 438, 440A, 446, 447D, 447E are recommended.

Policy Analysis: Public Health 233, 243, one computer course, one course from the field of health financing, law, or public sector approved by your adviser; one evaluation course, two management courses, and a summer internship are usually required. Courses 100C, 131, 181, 232, 235, 239, 240, 247, 281, 430, 438, 440A, 447D, 447E are recommended.

Research: Public Health 233, 403, 406, one course in economics, behavioral science, management, political science, or sociology, two health services research courses, and two courses in the Division of Health Services are usually required.

Electives, selected in consultation with your adviser, should be chosen from recommended courses and others. A summer field placement (minimum 10 weeks) is required following the first three quarters of study. The equivalent of 18 full courses and six quarters in residence are required for completion of the M.S. degree.

Nutritional Sciences

Emphasis is on nutritional biochemistry. Required courses usually include Biological Chemistry 205A-205B, Public Health 260E, 260F, M260G, 260H, 261A, 261B, 262 (may be repeated for credit), and 596 or 598 (may be repeated for credit). Public Health 165, 264E, 264F are recommended. Elective courses should be selected from Physiology 100, Public Health 100C, 166A, 166B, 167, 181, 461, 482, Biology 177.

You must complete a thesis. A minimum of 52 units is required; five of the courses listed above must be at the graduate level (200 or 500 series). It is expected that after the first quarter you will take a seminar each quarter.

Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before you file for advancement to candidacy. The thesis must be acceptable to the thesis committee.
Comprehensive Examination/Report Plan
If the comprehensive examination/report option is approved, a guidance committee of three faculty members is appointed. A written comprehensive examination on your major area of study must be passed. If you fail, you may be reexamined once.

The preparation of a major written research report is required; it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Master of Science in Biostatistics
Course Requirements
The M.S. degree requires a minimum of nine graduate and upper division courses, of which at least five must be graduate courses in the 200 and 500 series. The five required graduate courses must be in biostatistics or mathematical statistics, including at least three courses in biostatistics.

Areas of Specialization
Areas of specialization and typical course plans are listed below.

Biostatistics
Unless previously taken, the following courses must be included in the degree program: Public Health 101A, 101B, 101C, M101D, 200A, 200B-200C, 204E, 402A, 402B; any two courses from M201E, 201F, 201G, 201H, 201J, M201K, 201M; Mathematics 150A or Statistics 152A; Statistics 152B-152C.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics, may be selected with your adviser’s consent.

A written report and written comprehensive examination covering the above course material are required.

Biostatistical Health Data Management
Unless previously taken, the following courses must be included in the degree program: Program in Computing 1, Public Health 101A, 101B, 101C, M101D, 200A, 200B-200C, 203A, 203B, 403, 404 or 405; Mathematics 150A or Statistics 152A, Statistics 152B-152C.

One public health course in a division other than Biostatistics is selected with your adviser’s consent.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics, are selected with your adviser’s consent.

A written report and written comprehensive examination covering the above course material are required.

Comprehensive Examination Plan
The thesis plan is not used. The written comprehensive examination is on your major field only. It is taken during the Spring Quarter of the academic year of your Public Health 200A, 200B-200C sequence. Normally no more than one reexamination after failure is allowed. If you do not take the reexamination at the time specified by the division, you forfeit your right to reexamination.

Master of Science in Preventive Medicine and Public Health
The program is not admitting new students at this time.

Doctor of Environmental Science and Engineering
The program leading to the D.Env. degree is administered and housed in the School of Public Health. Information on the program follows the public health course listings later in this chapter.

Doctor of Public Health
The Doctor of Public Health (Dr.P.H.) is the highest professional degree for the public health generalist. You are expected to focus on public health practice and to acquire broad knowledge related to professional skills. The dissertation is of an applied, practical, problem-solving nature and must demonstrate your ability for independent investigation.

There is no foreign language requirement; teaching experience is recommended but not required.

Admission
In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.P.H. or a master’s degree in an appropriately related field (if the master’s degree is in a field other than public health, you must have taken the equivalent of the M.P.H. mandatory core courses or include them in the course of study after admission), (3) at least a 3.0 undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by a division of the Department of Public Health, (5) approval by the admissions policy committee and the department chair. Screening or evaluation examinations may be required by each division.

Course Requirements
The course requirements in the major field depend on the division and the field you select. You must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two divisions other than your major division.

The major division requires an additional area of concentration which may be either inside or outside the school. In divisions that allow it, an equivalent field experience completed while a doctoral student and approved by the guidance committee may be substituted for the additional area of concentration.

Areas of Specialization
Areas of specialization and typical course plans, in addition to courses required for the master’s degree, are listed below.

Behavioral Sciences and Health Education
At least four advanced research methods/statistics courses and at least five advanced courses from a list designed and offered by the division are required. In addition, six full courses (four must be at the 200 or 400 level) in at least two divisions other than your major division are required for breadth; four of these must be in only one other division. Two quarters of research experience prior to beginning the dissertation are required, as is participation in Public Health 286 (divisional doctoral seminar) and 288. Elective courses should be selected in consultation with your adviser. Written qualifying examinations in both the major and minor areas of concentration are required.

Biostatistics
The Dr.P.H. in Biostatistics requires a research orientation for which the coursework for the M.S. in Biostatistics is more appropriate than the coursework for the M.P.H.

A written screening examination of all students entering the doctoral program is required and must be successfully completed before the end of your first year in the program (if not taken prior to entering). Courses covered by this and other examinations are determined in consultation with your adviser and the division faculty. All registered doctoral students enroll in the biostatistics consulting laboratory for one quarter each year.

Beyond the introductory program, the following courses, if not already taken, should be included: Public Health 200B-200C, any four courses from the 201 and 207 series, 203A, M205A-M205B-M205C, 401E through 401G (any two courses), 403, one course from 404, 405; Mathematics 150A or Statistics 152A, Statistics 152B-152C. Public Health 402B is required and may be used as the additional area of concentration referenced below.
In addition, six full courses (four must be at the 200 or 400 level) in at least two divisions other than your major division are required for breadth. The major division requires an additional area of concentration which may be either inside or outside the school. The Electives, selected in consultation with your adviser, should be chosen from courses in mathematics, biomathematics, survey research methods, operations research, computer data processing, and other appropriate areas.

Environmental and Occupational Health Sciences

Recommended courses are determined in consultation with your adviser. In addition, six full courses (four must be at the 200 or 400 level) in at least two divisions other than your major division are required for breadth. The major division requires an additional area of concentration which may be either inside or outside the school.

Epidemiology

The recommended program includes additional courses in biostatistics, demography, and epidemiology beyond those required for the M.P.H.; courses or directed group study in specialized areas of infectious and chronic disease epidemiology or application of epidemiology to health planning, management, and/or policy; laboratory or clinical studies in medical, health, or biological sciences.

In addition, six full courses (four must be at the 200 or 400 level) in at least two divisions other than your major division are required for breadth. The major division requires an additional area of concentration which may be either inside or outside the school (e.g., biology, biostatistics).

Health Services

Note: The Division of Health Services is examining the curriculum with a view to its revision. Information regarding requirements for graduation may be subject to change. Call 825-2594 for up-to-date details.

From 48 to 72 quarter units beyond the master's degree are required. About one-third is to be in the substantive area of structure and functioning of health services, one-third in skills and tools required for health services management and policy analysis, and one-third in elective courses to meet individual needs and interests. In addition, if the master's degree did not include it, you must spend three to nine months in a supervised residency or practicum experience in one or more health-related organizations.

In addition, six full courses (four must be at the 200 or 400 level) in at least two divisions other than your major division are required for breadth. The major division requires an additional area of concentration which may be either inside or outside the school (e.g., economics, political science, sociology, management).

Nutritional Sciences

Recommended courses include Biological Chemistry 205A-205B, Public Health 260E, 260F, M260G, 260H, 261A, 262 or 263 (may be repeated for credit and must be taken once per year), 265 (may be repeated for credit and must be taken each quarter), 460, 461, 463A, 463B, and 495, 596, and 599 (may be repeated for credit). Conversational Spanish is also recommended.

In addition, six full courses (four must be at the 200 or 400 level) in at least two divisions other than your major division are required for breadth. The major division requires an additional area of concentration which may be either inside or outside the school (e.g., biology, biostatistics).

Population and Family Health

Course content for the major field includes courses needed for the divisional M.P.H., the divisional doctoral seminar, and two advanced courses in research methodology. Beyond the master's degree requirements, a minimum of 48 units (four quarters with an average of 12 units each) is required. Of these, at least 20 units must be in this division, in addition to the divisional doctoral seminar.

In addition, six full courses (four must be at the 200 or 400 level) in at least two divisions other than your major division are required for breadth (you may petition to include up to two 100-level courses). The major division requires 18 units in an additional area of concentration which may be either inside or outside the school.

Qualifying Examinations

Before advancement to candidacy, you must pass written examinations in the major field, prepared and administered by the guidance committee or by the faculty of the division. Normally no more than one reexamination after failure is allowed. The doctoral committee is nominated after you have made a tentative decision on a dissertation topic. The doctoral committee administers the University Oral Qualifying Examination after you have successfully completed the written examinations.

Final Oral Examination

A final oral examination is required of all candidates.

Ph.D. in Public Health

The Ph.D. is the highest research degree in public health for the student who desires in-depth knowledge in the area. Depth of knowledge and research skills are stressed. The dissertation must demonstrate your ability for independent scholarly investigation. There is no foreign language requirement for the Ph.D.; teaching experience is recommended but not required.

Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.S. in Public Health or an appropriately related field (students with an M.P.H. need to satisfy the course requirements of the M.S. in Public Health before or after admission), (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by a division of the Department of Public Health, (5) approval by the admissions policy committee and the department chair. Screening examinations may be required by each division.

In the Division of Behavioral Sciences and Health Education, you must satisfy the divisional core requirements for the M.P.H. or M.S. in Public Health (depending on your background) at a level acceptable for the doctoral program. Coursework may be waived by examination if equivalent courses have been taken elsewhere.

Major Fields or Subdisciplines

Behavioral sciences and health education, environmental and occupational health sciences, epidemiology, health services, and nutritional sciences.

Course Requirements

The courses needed to pass the written examination in your major field depend on the division and field you select.

The minor must be in a field cognate to the major field in public health. A strong minor is required, with at least four full graduate courses (16 units) or equivalent from a department that grants a Ph.D. Biostatistics is the only division considered cognate to a major in public health.

Qualifying Examinations

Before advancement to candidacy, you must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.
Final Oral Examination
A final oral examination is required of all candidates.

Ph.D. in Biostatistics
Admission
Qualifications for admission are those currently specified by the Graduate Division (see Chapter 3). Normally, students receive an M.S. in Biostatistics at UCLA before admission to the Ph.D. program.

Course Requirements
There are no specific course requirements. However, your program of study must be approved by the Division of Biostatistics and must include, at the graduate level, three areas of knowledge: biostatistics, mathematical statistics, and a third field such as biology, epidemiology, infectious diseases, medicine, microbiology, pharmacology, physiology, psychology, zoology, or public health. You are encouraged to participate in the biostatistics consulting laboratory for one quarter each year. Recommendation for the degree is based on your attainments rather than on the completion of specified courses.

Screening/Qualifying Examinations
Biostatistics requires a written screening examination of all students entering the doctoral program. The examination must be successfully completed before the end of the first year in the program (if not taken prior to entering the program).

Written qualifying examinations in biostatistics and mathematical statistics and an examination in your selected third field are taken before advancement to candidacy.

The University Oral Qualifying Examination is taken before advancement to candidacy and after successful completion of the written examinations. Administered by the doctoral committee, it is usually a defense of the dissertation proposal. A failed examination may be repeated once. The timing of reexaminations is specified by the division in the case of written examinations or by your committee in the case of the oral examination. If you do not take the reexaminations at the specified time, you forfeit your right to reexamination.

Final Oral Examination
A final oral examination is required.

Lower Division Course

Upper Division Courses
100A. Introduction to Biostatistics. Lecture, three hours; laboratory/quiz, two hours. Prerequisites: upper division standing, one biological or physical sciences course. Students who have completed courses in statistics may enroll only with consent of instructor. Not open for credit to students with credit for course 101A. Introduction to methods and concepts of statistical analysis. Sampling situations, with special attention to those occurring in the biological sciences. Topics include distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size.

100B. Introduction to Biostatistics. Lecture, three hours; laboratory/quiz, two hours. Prerequisites: course 100A or equivalent, consent of instructor. Not open for credit to students with credit for course 101B. Introduction to analysis of variance, linear regression, and correlation analysis.

100C. Introduction to Biostatistics. Lecture, three hours; laboratory, two hours. Prerequisites: course 100B or equivalent, consent of instructor. Introduction to concepts of probability used in biomedical sciences. Enumeration statistics and nonparametric methods. Comparison of nonparametric with analogous parametric tests. Discussion of power and sample size.

101A. Basic Biostatistics. Lecture, three hours; quiz, one hour. Prerequisite: Mathematics 31B or equivalent. Not open for credit to students with credit for course 100A. Basic concepts of statistical analysis applied to biological sciences. Topics include random variables, sampling distributions, parameter estimation, statistical inference.

101B. Basic Biostatistics. Lecture, three hours; quiz, one hour. Prerequisite: course 101A. Not open for credit to students with credit for course 100B. Topics include elementary analysis of variance, simple linear regression and correlation, nonparametric methods, elements of sequential analysis.

101C. Basic Biostatistics. Lecture, three hours; laboratory, two hours. Prerequisites: course 101B or equivalent. Not open for credit to students with credit for course 100C or 100D. Introduction to multiple regression; topics relating to analysis of variance and experimental designs.

103. Statistics for Public Health. Lecture, three hours; laboratory, two hours. Prerequisites: upper division standing, one biological or physical sciences course. Open to students in the M.P.H. and nursing programs; may not be used as a prerequisite for course 100B. Introduction to sources of demographic and health information, methods of calculating and interpreting vital, health statistics, and elementary methods for statistical inference.

105. Application of Statistical Theories to Biomedical Research. Lecture, three hours; discussion, one hour. Prerequisite: Statistics 152C or consent of instructor. Review of statistical theories essential to biostatistics. Illustration of applications by examples. Topics include delta method, order statistics, asymptotic properties of MLEs, iterative algorithms for MLEs, generalized likelihood ratio tests for categorical data, and transformations.

111. Epidemiology, Public Health, and the Arms Race (2 units). Lecture, one hour; discussion, one hour. Prerequisites: course 112 or 114 or equivalent, consent of instructor. Overview of history and current status of the arms race, with emphasis on the medical and public health consequences of nuclear weapons and the public health consequences of the arms race. P.H. Hale

112. Principles of Epidemiology. Lecture, two hours; laboratory, four hours. Prerequisite: one full biological sciences course. Not open for credit to students with credit for course 114. Introduction to epidemiology, including factors governing health and disease in populations.

114. Epidemiology I. Lecture, two hours; laboratory, four hours. Prerequisites: courses 100A (may be taken concurrently), one full biological sciences course, consent of instructor. Not open for credit to students with credit for course 112. Introduction to epidemiology, including factors governing health and disease in populations.

M115. Disease Problems of Socioeconomic and Political Impact in Latin America. (Same as Latin American Studies M155.) Lecture, six hours; discussion, six hours. Prerequisite: one upper division Latin American studies course. Social, economic, and political impact of important disease problems in Latin American countries. Mr. Work

116. Epidemiology of Nosocomial Infections (2 units). Prerequisites: courses 112 or Microbiology 101 or Microbiology and Immunology 202B or equivalent, consent of instructor. Applied procedures for conducting research in family health. A research design comprises one of the course requirements. Mr. Bourque

130. Health Services Organization. Prerequisite: four units of social sciences. Structure and function of American health care system; issues and forces shaping its future.

131. Structure and Function of Health Care Facilities. Lecture, two hours; discussion, two hours. Prerequisites or corequisites: course 130, consent of instructor. Introduction to structure, organization, and function of health care facilities.

132. Management Science for Health Planning and Administration. Lecture, three hours; laboratory, two hours. Prerequisites: courses 100A, either 403 or Management 404, or equivalent, consent of instructor. Introduction to the use of quantitative analy- ses to support managerial and operational decisions in health services organizations. Topics include mathematical models for structuring decisions, resource allocation, inventory control, task sequencing, scheduling, and forecasting. Use of microcomputers. Mr. Vazquez

134. Introduction to Comprehensive Health Planning. Lecture, four hours; fieldwork, four hours. Prerequisite: one upper division microeconomics, statistics, calculus, or political science course. Concepts underlying health planning, state of the art, and some relevant literature. Mr. Melnick
181. Introduction to Social Research Methods in Health. Lecture, four hours; assignments, eight hours. Prerequisites: course 100 or equivalent, consent of instructor. Basic methods and techniques in designing and conducting health research using a variety of methods. Discussions of students' own research.

182. Behavioral Sciences and Health. Lecture, three hours. Prerequisite: one social sciences course. Basic concepts in behavioral sciences pertinent to health and medical care; cultural and social class variables in health status, health teams and community relations; community decision making in public health. Mr. Goldstein, Mr. Kar

187. Health Education for Teacher Credentials (2 units). Limited to students in the teacher education credential program. Required for the California State Instructional Credential. The teaching-learning process as applied to personal and community health. Topics include psychoactive drugs (alcohol, tobacco, and narcotics), human sexuality, nutrition, and community health resources. Mr. Linder

189. Community Cancer Education. Lecture, three hours; project and fieldwork, one hour. Prerequisites: Biology 30 or equivalent, consent of instructor. Explanation of the subject matter in health education through community resources, culminating in student-generated community field-study proposal and presentation. Ms. Brown

199. Special Studies (2 to 4 units). Prerequisites: senior standing, consent of instructor and department chair (based on a written proposal outlining the course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each quarter.

Graduate Courses

200A. Biostatistics. Lecture, three hours; discussion, one hour. Prerequisites: courses 100A, 100B, 100C or 101C, one other statistics course, consent of instructor. Study design, sampling, determination of sample size, data screening, types of measurements and determination of appropriate analysis, and unidimensional scale construction. S/U or letter grading for nonmajors only.

200B-200C. Biostatistics. Lecture, three hours; discussion, one hour. Prerequisites: courses M101D, 200A, linear algebra, advanced calculus. 200B. Multiple linear regression, including model validation, influence of observations, regression diagnostics, diagnostic analysis, principal components; factor analysis. 200C. Measures of association and analysis of categorical data, theory of generalized linear models.

201E. Special Topics: Statistical Methods for Categorical Data. (Same as Biomathematics M231.) Lecture, three hours; discussion, one hour. Prerequisites: course 100B or 101B, Statistics 152C or equivalent, consent of instructor. Statistical techniques for the analysis of categorical data; discussion and illustration of their applications and limitations.

201F. Special Topics: Distribution Free Methods. Lecture, three hours; discussion, one hour. Prerequisites: course 100D or 101B, and Statistics 152C, or consent of instructor. Theory and application of distribution free methods in biostatistics.

201G. Special Topics: Statistical Simulation Techniques. Lecture, three hours; discussion, one hour. Prerequisites: course 100C, Statistics 152C or one computer programming language, consent of instructor. Techniques for simulating important statistical distributions, with applications in biostatistics.

201H. Special Topics: Finite Population Sampling. Lecture, three hours; discussion, one hour. Prerequisite: course 100D or Statistics 152C. Theory and methods for sampling finite populations and estimating population characteristics.

201J. Special Topics: Supplemental Topics. Lecture, three hours; discussion, one hour. Prerequisites: course 100C, consent of instructor. Topics in biostatistics not covered in other courses.

M201K. Survival Analysis. (Same as Biomathematics M281.) Lecture, three hours; discussion, one hour. Prerequisites: course 100C, Statistics 152C, or equivalent, consent of instructor. Statistical methods for the analysis of survival data.

201M. Introduction to Statistical Methods for Biological Assays. Lecture, three hours. Prerequisites: course 100C, Statistics 152C. Topics include standard statistical procedures for the estimation of relative potency, density of microorganisms, and density of radioactivity, models used for these procedures, and statistical considerations for designing such assays.

M202F. Statistical Analysis of Incomplete Data. (Same as Biomathematics M232.) Lecture, three hours; discussion, one hour. Prerequisites: course 101C, Statistics 152C, or equivalent, consent of instructor. Discussion of the statistical analysis of incomplete data sets, with material from the sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of data in statistical packages, missing data in ANOVA and regression imputation, weighting, like-hood-based methods, and nonrandom nonresponse models. Emphasis on application of the methods to applied problems, as well as on the underlying theory. S/U or letter grading.

M202G. Simultaneous Statistical Inference. (Same as Biomathematics M233.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200C, M205A, Statistics 152C. Methods and theory of simultaneous statistical inference.

M202H. Applied Bayesian Inference. (Same as Biomathematics M234.) Lecture, three hours; discussion, one hour. Prerequisites: courses 101A, 101B, 101C, 200A, consent of instructor. The Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

202J. Statistical Graphics. Lecture, three hours; laboratory, two hours. Prerequisites: courses 101A, 101B, 101C, 200A, consent of instructor. Graphical data analysis emphasizes use of visual displays of quantitative data to examine data structure by exploring patterns and relationships, and to enhance classical numerical analyses, especially assumption validity checking. Principles of graph construction, graphical methods, and perception issues.

203A. Data Base Management Systems. Lecture, three hours; laboratory, two hours. Prerequisites: course 403 or equivalent, consent of instructor. Data base and data base models applied to medical and public health studies; design of data bases for efficient data retrieval and statistical analysis using package data base management and statistical package programs.

203B. Systems Analysis for Health Data. Lecture, three hours; laboratory, two hours. Prerequisites: course 203A, consent of instructor. Health data computer processing as a total system; review of selected health information systems, statistical packages, and computer languages; computer languages, development, programming, and maintenance of a computer system for managing health data.

204E. Seminar in Biostatistics (2 units). Prerequisites: courses 200B, two courses from M201E through 201J, and two courses from advanced biostatistics. Theory and methods of the development of methodology and problems in applications of biostatistics.

204F. Advanced Seminar in Biostatistics (2 units). Prerequisites: course 200C, consent of instructor. Current research in biostatistics. May be repeated for credit. S/U grading.

M205A-M205B-M205C. Linear Statistical Models. (Same as Mathematics M279A-M279B-M279C.) Lecture, three hours; discussion, one hour. Prerequisites: courses 101C, Statistics 152C, or equivalent. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, the Gauss-Markov theorem, fixed and random component models, balanced and unbalanced designs.

206A-206B. Multivariate Biostatistics. Lecture, three hours. Prerequisite: course M205A or equivalent. Multivariate analysis as used in biological and medical situations. Topics from component analysis, factor analysis, discriminant analysis, analysis of dispersion, canonical analysis.

207E. Advanced Topics: Stochastic Processes. Lecture, three hours. Prerequisites: upper division mathematics, including statistics and probability. Stochastic processes applicable to medical and biological research.

207F. Advanced Topics: Mathematical Epidemiology. Lecture, three hours. Prerequisites: course 207E or equivalent, upper division mathematics (including statistics and probability). Mathematical theory of the history of epidemiology with deterministic and stochastic models and problems involved in applying the theory.

207G. Advanced Topics: Statistical Genetics. Lecture, three hours. Prerequisites: upper division mathematics, including statistics and probability. Introduction to statistical genetics.

207H. Statistical Methods for Research Biological Assays. Prerequisite: course 201M. Topics include statistical methods developed for research assays for which the standard procedures do not apply.

M207J. Computational Statistics. (Same as Biomathematics M280 and Mathematics M280.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: pivoting and other technologies used in stepwise regression, nonlinear regression algorithms, algorithms for balanced and unbalanced analysis of variance, including the mixed model, iterative rescaling, and other methods for log-linear models.

207L. Advanced Topics: Recent Developments. Lecture, three hours; discussion, one hour. Prerequisites: course 200C. Advanced topics and developments in biostatistics and theory. (Available in the Public Health II. 201 or 207 series, or in other courses. Possible topics include time-series analysis, classification procedures, correspondence analysis, etc.

210. Principles of Infectious Disease Epidemiology. Lecture, three hours. Prerequisites: courses 100A or equivalent, one-year sequence of biology and chemistry, consent of instructor. Ascertainment of infection, transmission, and epidemiological parameters rather than clinical and pathological aspects. Specific diseases discussed in depth to illustrate epidemiologic principles. Mr. Barr

211A-211B. Epidemiologic Methods I and II. Lecture, four hours; discussion, one hour. Prerequisites: courses 100A, 100B, at least two upper division biology or social sciences courses, consent of instructor. Recommended but not required: course 112 or 114 or equivalent. Comprehensive coverage of concepts, principles, and methods in epidemiology with emphasis on study design, statistical analysis, and causal inference. Theoretical and quantitative emphasis, focusing on the investigation of disease etiology and other causal relationships in public health.
211C-211D. Epidemiology: Theory and Methodology. (Formerly numbered 211C.) Prerequisites for course 211C: courses 100C or 100D and 211B, or equivalent, consent of instructor; for course 211D: course 211C or consent of instructor. Mr. Spivey

212G. Epidemiology of Cardiovascular Disease (2 units). Lecture, one hour; discussion, one hour. Prerequisites: courses 100A, 112, 135, or equivalent, one full biological or social sciences course, consent of instructor. Mr. Detels

212H. Epidemiology of Arthrophorous Disease. Prerequisites: prerequisite 211B, graduate standing. Epidemiologic aspects of disease carried by arthropods, emphasizing life cycle and ecology of vectors as related to epidemiology of viral, rickettsial, bacterial, protozoal, and helminthic diseases. Mr. Barr

212I. Epidemiology of Noninfectious Injuries. Lecture, three hours; discussion, two hours. Prerequisites: courses 100A, 112, 135, or equivalent, one full biological or social sciences course, consent of instructor. Mr. Kraus

212J. Occupational Epidemiology. Lecture, two hours; discussion, two hours. Prerequisites: course 211A or equivalent, consent of instructor. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments. Mr. Kraus

212K. Epidemiology of Assault, Homicide, and Suicide (2 units). Lecture, two hours; discussion, one hour. Prerequisites: courses 100A, 112, 155, or equivalent, one full biological or social sciences course, consent of instructor. Mr. Kraus

212L. Seminar in Epidemiology: Methodology (2 units). Prerequisites: course 211A or equivalent, consent of instructor. Review of recent epidemiologic research contained in recent medical literature. May be repeated for credit. S/U grading.

212M. Seminar in Epidemiology: Infectious and Tropical Disease (2 units). Prerequisites: courses 100A, 100B, and 212D, or consent of instructor. Mr. Haile

212N. Seminar in Epidemiology: Ecological. Prerequisites: courses 100A, 112, one upper division biology course or equivalent, consent of instructor. Mr. Haile

212O. Seminar in Epidemiology: Theoretical Epidemiology. Prerequisites: courses 100A, 112, one upper division biology course or equivalent, consent of instructor. Mr. Haile

215B. Epidemiology of Cancer (2 units). Lecture, one hour; discussion, one hour. Prerequisites: course 215A, consent of instructor. Current issues in cancer epidemiology, including etiologic research, screening programs, prevention, ethics, and law. Mr. Halle

216A. Ecology of Ecological Disease. Lecture, two hours; discussion, six hours. Prerequisites: course 112, Microbiology 210A, C103B, or equivalent, consent of instructor. Geographic pathology and behavioral causes of diseases. Epidemiologic, ecological, and biological determinants of the distribution, exposure to, and occurrence of exotic diseases. Mr. Work

216B. Viral Diseases of Man. Lecture, two hours; laboratory, six hours. Prerequisites: course 216A or equivalent, consent of instructor. Viral and rickettsial diseases of man. Natural history, epidemiology, diagnosis, control, and prevention of these diseases, especially in tropical situations. Mr. Work

218A. Protozoal Diseases of Man. Prerequisites: Microbiology 101 or Biology 105 or equivalent, consent of instructor. May be taken concurrently with course 218B. Comprehensive overview of systematic parasitology, emphasis on relationships, public health problems, and control of protozoa parasitic in man and animals. Mr. Ash

218B. Protozoal Diseases of Man (2 units). Prerequisite or corequisite: course 218A. Laboratory methods of diagnosis and microscopic recognition of protozoa parasitic in man and animals. Intestinal protozoa and organisms occurring in the blood and tissues of their hosts and pathology associated with these infections. Mr. Ash

219. Arthropods of Medical Importance. Lecture, two hours; laboratory, six hours. Prerequisites: Biology 105 or 107 and 181, Microbiology 101, or equivalent. Biology and identification of mites and insects of medical importance involved in transmission and causation of human diseases. Mr. Barr

220A. Helminthic Diseases of Man. Prerequisites: Microbiology 101 or Biology 105 or equivalent, consent of instructor. May be taken concurrently with course 220B. Comprehensive overview of systematic, morphological, biology, host-parasite relationships, public health problems, and control of the nematodes, trematodes, and cestodes parasitic in man and animals. Mr. Ash

220B. Helminthic Diseases of Man (2 units). Prerequisite or corequisite: course 220A. Laboratory diagnosis and practical microscopic recognition of the nematodes, trematodes, and cestodes parasitic in man and animals. Pathology produced by these infections. Mr. Ash

221. Seminar in Epidemiology: Methodology (2 units). Prerequisites: course 211A or equivalent, consent of instructor. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U grading.

222. Seminar in Epidemiology: Infectious and Tropical Disease (2 units). Prerequisites: courses 211A or equivalent, consent of instructor. Review of research on specific diseases of public health importance. May be repeated for credit. S/U grading.

223. Topics in Theoretical Epidemiology (2 units). Prerequisites: courses 100A and 100B and 100D (or Statistics 152A), 211A, 211B, consent of instructor. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic models, epidemiologic models, problems in inference, model specification problems, design issues, analysis issues, and confounding. May be repeated for credit with consent of instructor. S/U grading.

224. Principles of Epidemiology II. Lecture, four hours; discussion, two hours. Prerequisites: courses 100A, 112, one upper division biology course, or equivalent, consent of instructor. Material presented in course 112 examined in greater detail. Topics include measures of disease occurrence and criteria of causality; reliability and validity concerns; proper design, analysis, interpretation of experiments, and cohort and case control studies. Mr. Haile

226. Genetic Epidemiology (2 units). Prerequisites: courses 100A, 112, one upper division biology course, or equivalent, consent of instructor. Proper design, analysis, interpretation, and application of analytical methods used by genetic epidemiologists, including studies of familial prevalence, twins, migrants, genetic marker-disease associations, and more complex analyses of genetic models. Mr. Haile

227. Public Health Research Using Available Data (2 units). Lecture, one hour; discussion, one hour. Prerequisites: courses 100A, 112, 210A, 403 or 277 or 465, or equivalent, consent of instructor. May be repeated for credit. S/U grading.

230A-230B. Health Systems Organization and Financing. Lecture, four hours; discussion, two hours. Prerequisites: health services major; four upper division courses in two of the following: social sciences, political science, history, economics, anthropology, medicine or health science, law, management or organizational behavior, operations research, philosophy; consent of instructor. In-depth analysis of health services systems in the U.S., using relevant theories, concepts, and models. Mr. Torrens and the Staff

231. Health Policy Seminar: Health Care Financing, Competition, and Regulation. Prerequisites: courses 100A, 100B, 230A-230B, 238, or equivalent, consent of instructor. Limited to doctoral students and M.S. or M.P.H. students with advanced degrees. Public policy concerns the development, operation, and regulation of health services. Analysis of the market for those services: demand for care, fee-for-service and prepaid payment systems, regulation of price and capital investment, private sector efforts to control health care costs. Mr. Shonick

232. Governmental Health Services and Trends. Prerequisites: course 130, two additional upper division social or behavioral sciences courses, consent of instructor. Systematic analysis of the relationship between organized programs of personal health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health programs and more novel and new medical care and quality control functions. Mr. Shonick

233. Health Policy Analysis. Lecture, two hours; discussion, two hours. Prerequisites: course 130 or equivalent, three social sciences courses, consent of instructor. Conceptual and procedural tools for the analysis of health policy, emphasizing the role of analysis during the various phases of the life cycle of public policy.

235. Law (2 units). Prerequisites: courses 130, two additional upper division political science or sociology courses or equivalent, consent of instructor. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs. Mr. Roemer
238. Microeconomics. Instructor. 4. Topics include demand, supply, equilibrium, market structure, consumer and producer behavior, and macroeconomic policy. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

239. Advanced Microeconomics. Instructor. 5. An advanced analysis of microeconomic theory and its applications. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

240. Environmental Economics. Instructor. 4. An introduction to the economics of the environment. Topics include property rights, externalities, control policy, and market failure. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

241. Environmental Policy. Instructor. 4. An introduction to environmental policy with a focus on U.S. federal and state policies and international agreements. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

242. Environmental Law. Instructor. 4. An introduction to the legal framework for protecting the environment. Topics include the Clean Air Act, Clean Water Act, Endangered Species Act, and other federal and state regulations. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

243. Environmental Finance. Instructor. 4. An introduction to the financial aspects of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

244. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

245. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

246. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

247. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

248. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

249. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

250. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

251. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

252. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

253. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

254. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

255. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

256. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

257. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

258. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

259. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

260. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

261. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

262. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

263. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

264. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

265. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

266. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

267. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

268. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

269. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

270. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

271. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

272. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.

273. Environmental Economics and Policy. Instructor. 4. An introduction to the economic analysis of environmental policy, including cost-benefit analysis, market failure, and environmental policy design. Prerequisites: courses 100A or equivalent, 232, Economics 1, 2, or equivalent, consent of instructor. Evaluation: written assignments and comprehensive examinations.
259A. Critical Review of the Scientific Basis of Occupational Standards. (Formerly numbered 259.) Prerequisites: courses 100A, 112, 156, 256. Designed to provide students with the opportunity to review the scientific basis for selected occupational exposures with disease. Special emphasis on critical evaluations of the literature. Attention specifically to the interface of science and regulatory standards. 2 units. Ms. Brown.

259B. Science and Politics of Environmental Regulation. Lecture, three hours, discussion, one hour. Prerequisites: four upper division courses (e.g., Architecture and Urban Planning 262A, 262B, Economics 103B, 111, Geography 1122, 122, 125, 155, 290, 292, Management 202A, Political Science 173, 185, Public Health 150, 154, 254), consent of instructor. Analysis of how science, law, administration, economics, and politics influence state and national environmental regulation from formulation to implementation, including rule making, public participation, federalism, enforcement, and judicial review. 2 units. Mr. Neumann.

260E. Advanced Nutrition: Vitamins. Lecture, three hours; discussion, one hour. Prerequisites: Biochemical Chemistry 202 and 203 or equivalent, consent of instructor. Comprehensive treatment of vitamin nutrition and metabolic-nutrient interactions. Mr. Swendsen.

260F. Advanced Nutrition: Proteins (2 units). Prerequisites: courses 100A, 162 or equivalent, Biological Chemistry 265A-265B or Chemistry 152, consent of instructor. Comprehensive treatment of protein nutrition and metabolic-nutrient interactions. Mr. Jones.

260G. Advanced Chemistry, Biochemistry, and Nutrition of Lipids. (Formerly numbered 260G.) Same as Biological Chemistry M261 and Chemistry M261.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 202 and 203 or Chemistry 157A and 157B, or equivalent, consent of instructor. Comprehensive treatment of lipid nutrition and metabolic-nutrient interactions. Ms. Carlisle.

261A. Laboratory Instrumentation and Methods. Lecture, two hours; laboratory, six hours. Prerequisites: course 165 and Chemistry 25 or Biological Chemistry 202 (may be taken concurrently), consent of instructor. Biochemical techniques and instrumentation used in environmental and nutritional sciences, including absorption, fluorescence spectroscopy, gas chromatography, HPLC, electrophoresis, radiosotopes, and centrifugation. Mr. Panaque.

261B. Advanced Laboratory Techniques in Nutritional Science. Lecture, one hour; laboratory, six hours. Prerequisites: course 261A, consent of instructor. Current biochemical methods emphasizing design of nutritional experiments. Mr. Castro.

263. Seminar in Public Health Nutrition (2 units). Prerequisites: courses 162, 167, one nutrition course in the 200 or 400 series. Review of literature in selected areas of public health nutrition. May be repeated for credit. 2 units. Ms. Alfin-Slater, Mr. Kopple, Ms. Swendsen.

264E. Clinical Nutrition Problems (2 units). Prerequisites: one or more 200-level nutrition courses, Biological Chemistry 202, 203. Nutrition and nutrient-metabolic interactions in various disease states such as gastrointestinal disorders, renal disease, and liver disease. Ms. Alfin-Slater, Mr. Kopple, Ms. Swendsend.

264F. Clinical Nutrition Problems (2 units). Prerequisites: one or more 200-level nutrition courses, Biological Chemistry 201 or 202. Nutrition and nutrient-metabolic interactions in various disease states such as cardiovascular disease, diabetes, and cancer. Ms. Alfin-Slater, Mr. Kopple, Ms. Swendsend.

265. Doctoral Research Seminar in Nutritional Sciences (2 units). Prerequisites: at least one course in the 250 series, doctoral standing, consent of instructor. Limitation to doctoral students on presentation of research projects. Emphasis on data evaluation. May be repeated for credit. S/U grading.

270. Maternal and Child Nutrition. Prerequisites: courses 161, 170A, 170B, one nutrition course or equivalent, consent of instructor. Nutrition of mothers, infants, and children in countries at various levels of socioeconomic development; measures for prevention and treatment of protein-calorie malnutrition; relationship between nutrition and mental development; impact of ecological, socioeconomic, and cultural factors on nutrition, nutrition education, and service. 2 units. Ms. Jeffries, Ms. Newman.

271. Medical Anthropology in Public Health. (Same as Anthropology M256 and Psychiatry M250.) Prerequisites: courses 112, 130, one upper division psychology, sociology, or anthropology course, or equivalent, consent of instructor. Cross-cultural aspects of feeding behavior as they relate to nutrition, treatment, incidence, and prevalence of disease and illness. 2 units. Ms. Scrimshaw.

272. Seminar on Current Issues in Maternal and Child Health. Lecture, two hours; discussion, two hours; assignments, eight hours. Prerequisites: courses 100A, 112 or equivalent, 125, and 171A, consent of instructor. New knowledge and approaches in selected health and social problems of families, women of childbearing age, and children, including early development, day care, and genetic counseling. Ms. Chang.

272D. Adolescent Health and Health Behavior. Lecture, two hours; discussion, two hours; assignments, eight hours. Prerequisites: courses 100A, 112 or equivalent, 125, and 171A, consent of instructor. Adolescent health and health behaviors within a conceptual framework integrating developmental, social, and cultural factors. Ms. Aneshensel.

272E. The Family and Mental Health. Lecture, two hours; discussion, two hours; assignments, eight hours. Prerequisites: courses 100A, 112 or equivalent, 125, and 171A, consent of instructor. Emphasis on how the social organization of the family, relationships among family members, and the extrafamilial context (e.g., community, society) affect the psychological well-being of spouses, parents, and children. Ms. Aneshensel.

273. Qualitative Research Methodology. (Same as Anthropology M263Q, Nursing M273, and Psychiatry M280.) Seminar, three hours. Prerequisites: courses 112, 171A, 171B, one nutrition course or equivalent, 171A, 171B, consent of instructor. New knowledge and approaches in selected health and social problems of families, women of childbearing age, and children, including early development, day care, and genetic counseling. Ms. Chang.

279D-279E-279F. Seminar in Preventive Medicine (2 units each). (Formerly numbered 279D-279E.) Prerequisites: courses 100A, 112, 130, upper division health services, planning, behavioral sciences, population and family health, and physiology courses, or equivalent, consent of instructor. Three-quarter sequence devoted to the analysis of current issues, principles of research design, and application of research findings in preventive medicine. Discussion of administrative, epidemiologic, and clinical methods. S/U grading.

279H. Advanced Seminar in Medical Anthropology. (Same as Anthropology M263Q, Nursing M273, and Psychiatry M273.) Seminar, three hours. Prerequisites: course 182, three courses from Psychology 135, 170A, Sociology 132, 135, or equivalent, consent of instructor. Unified behavioral science approach to natural determinants of change, as foundation for planned change in health-related behavior at community, group, and individual levels. Ms. Siegel.
282. Communications in Health Promotion and Education. Lecture, two hours; discussion, two hours. Prerequisites: course 182 and three social sciences courses or equivalent, consent of instructor. Design, implementation, and evaluation of interpersonal communication strategies for health promotion programs. Equal emphasis on communication theories, models, and empirical research literature and on specific applications in health programs and case studies. Ms. Alcalay, Mr. Kar

283E. Social Epidemiology I. Lecture, two hours; discussion, one hour. Prerequisites: course 112, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on life-stages and other sociocultural factors associated with general susceptibility to disease and subsequent mortality. Ms. Siegel

M283F. Sociocultural Aspects of Health and Illness: Health Professions. (Same as Sociology M249A.) Lecture, three hours. Prerequisites: course 182, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Sociocultural examination of the concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to the meaning of professionalization and professional-client relationships within a range of organizational settings. Mr. Goldstein

M283G. Sociocultural Aspects of Health and Illness: Health Behavior. (Same as Sociology M249B.) Seminar, three hours. Prerequisites: course 182, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick role behavior. Mr. Berkano

283H. Social Epidemiology II. Lecture, two hours; discussion, one hour. Prerequisites: course 112, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of chronic diseases. Topics include hypertension, coronary heart disease, and cancer. Emphasis on life-stages and other sociocultural factors associated with chronic diseases. Ms. Siegel

284. Ecology of Mental Health. Lecture, three hours. Prerequisites: courses 100A, 112 and 182 or equivalent, consent of instructor. Analysis of occurrence and distribution of mental aspects of mental health and illness in the community and the relationships to social structure. Problems of classification, definition, measurement in sociopsychiatric epidemiology, sociocultural and social-psychological factors in mental disorders. Mr. Goldstein

285. Community Problems in Mental Disorders. Lecture, three hours. Prerequisites: course 182, three upper division or graduate psychology or sociology courses or equivalent, consent of instructor. Intensive examination of the meaning of mental health, mental illness, and psychotherapy, both curative and preventative, within a public health context. Implications for social policies and programs. Mr. Goldstein

286. Seminar in Behavioral Sciences and Health (2 to 4 units). Lecture, two hours. Prerequisites: courses 283E, M283F, M283G, or equivalent, consent of instructor. Recent significant contributions of behavioral sciences to understanding health and illness, with selected and varying topics each quarter. May be repeated for credit. S/U grading. Mr. Berkano, Ms. Li

287. Community Organization in the Health Field. Lecture, two hours; discussion, one hour; fieldwork, four to six hours. Prerequisites: course 182, at least three of the following courses: Sociology, or anthropology courses or equivalent. Theory and practice of community organization applied to health problems, including analysis of relevant factors in the physical and social environment and development of community-based intervention strategies to improve health and health services. Opportunity to study organization through field observation and participation and to discuss community organization theory in the context of students' experiences. Mr. Brown

288. Current Problems in Health Education. Lecture, one hour; discussion, three hours. Prerequisites: course 182 and three other public health and/or social sciences courses, or consent of instructor. Current problems and findings in health education content areas, such as nutrition, mental health, family health, consumer health, safety, and communicable and chronic diseases.

289. Issues in Program Evaluation. Discussion, three hours; reading and research paper, one hour. Prerequisites: course 281, one social sciences course, or equivalent, consent of instructor. Advanced seminar in the evaluation of programs of health education, including implementing evaluation research in the context of local demonstration projects. Mr. Berkano

290. Introduction to Occupational Health Education. Lecture, three hours; discussion, two hours. Prerequisites: courses 100C or 100D or Statistics 152C or equivalent, consent of instructor. Design, implementation, and evaluation of education programs dealing with health and safety issues for workplace settings.

291. Advanced Topics in Health Survey Research Methods. Lecture, two hours; discussion, two hours. Prerequisites: courses 281 or equivalent, consent of instructor. Special topics in health survey research methods. Design of special purpose surveys; recent interviewing techniques; diaries and memory aids; measurement error, including response bias, social desirability, response validity; telephone interviewing; obtaining data on sensitive issues; ethics and confidentiality of survey research data. Mr. Goldstein

292. Alcohol and Drug Abuse: Social Policy Perspectives (3 units). (Formerly numbered M292.) Prerequisite: consent of instructor. Alternative models of alcohol and other drug addictions examined and implications assessed for public policy regarding their control. Prevention efforts and findings from California and national surveys, with primary emphasis on alcohol use and abuse. Ms. Beckman

293. Alcoholism and Drug Abuse among Women. (Formerly numbered M293.) Prerequisite: consent of instructor. Discussion of the psychosocial aspects of alcoholism and drug abuse of alcohol and other drugs among women. Topics include etiology, prevention, treatment, hormonal influences, and the role of the family. Emphasis on current theoretical perspectives and research findings. Ms. Beckman

294. Introduction to Occupational Health Education. Lecture, one hour; discussion; two hours; out-side assignment, one hour. Prerequisites: course 156, two sociolog, psychology, or education courses, consent of instructor. Health education theory and practice as applied to occupational health and safety. Emphasis on design and evaluation of education programs dealing with health and safety issues for workplace settings.

295A. Advanced Community Health Education. (Formerly numbered 296) Lecture, two hours; discussion, two hours. Prerequisites: course 182, three upper division social sciences or public health courses, consent of instructor. Before planning the educational components of a health program, one must assess the behaviors and factors influencing the health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing a community-based educational program. Mr. Morisky

295B. Research in Community and Patient Health Education. (Formerly numbered 285.) Lecture, three hours; discussion, one hour. Prerequisites: course 182 and three upper division social sciences or public health courses, or consent of instructor. Application of conceptual, theoretical, and evaluative skills to community-based health education risk-reduction programs. Computer applications, data management, and research methodologies taught through microcomputer and mainframe computer management and analysis of program data bases. Mr. Morisky

296A. Biostatistical Methods for Longitudinal Data. (2 to 4 units). Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward the M.S. minimum course requirement; four units may be applied toward the 44-unit minimum total required for the M.H. degree. Mr. Berkanovic

296B. Seminar in Behavioral Sciences and Health (2 or 4 units). Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward the M.S. minimum course requirement; four units may be applied toward the 44-unit minimum total required for the M.H. degree. Mr. Berkanovic

297. Applied Statistics. Lecture, one hour; discussion, one hour. Prerequisite: courses 100C or 100D or Statistics 152C or equivalent, 112, consent of instructor. Design and analysis of longitudinal or panel studies. S/U grading (non-division majors only).

298. Statistical Methods for Longitudinal Data. Lecture, three hours. Prerequisites: courses 100C or 100D or Statistics 152C or equivalent, 112, consent of instructor. Design and analysis of longitudinal or panel studies. S/U grading (non-division majors only).

299. Statistical Analysis Methods for Case-Control Studies. Lecture, three hours. Prerequisites: courses 100C and 100D, or 101C. Statistical designs, sampling statistics, and analytic models of case-control studies. Special topics such as exploratory analyses, multiplicity of analyses, cross-validation, small sample properties of small samples, and handling of missing data. Mr. Berkanovic

300H. Special Topics: Applied Statistics. Lecture, three hours; discussion, one hour. Prerequisites: courses 100B or equivalent, consent of instructor. Special topics not applied statistics not covered in other courses in the professional series.

401A. Principles of Biostatistical Consulting (2 units). Lecture, one hour; discussion, one hour. Pre-requisites: courses 100B or 101B and Statistics 152B. Presentation of structural format for statistical consulting. Role of statistician and client. Reviews of actual statistician-client interactions and case studies.

402B. Biostatistical Consulting. Discussion, two hours; laboratory, two hours. Prerequisites: courses 100C and 402A, or consent of instructor. Principles and practices of biostatistical consulting. May be repeated for credit. S/U grading. Prerequisites: at least one statistics course, two research methodology courses, Program in Computing 1 or equivalent, consent of instructor. Concepts of health data management, design and maintenance of large data bases on tapes or disks; computing tools and techniques facilitating data retrieval for statistical analysis; design and report generation useful to biostatisticians, health planners, and other health professionals.
404. Principles of Sampling. Lecture, three hours; discussion, one hour. Prerequisites: courses 100B, 112, or equivalent, consent of instructor. Statistical aspects of the design and implementation of a sample survey. Techniques for the analysis of the data, including estimation and standard errors. Avoiding improper use of survey data.

405. Demographic Materials and Methods. Lecture, three hours; laboratory, two hours. Prerequisites: courses 100A or 112, 114 or equivalent, consent of instructor. Sources of demographic information; description of human populations; calculation and interpretation of statistics used to measure and describe population growth; structure, geographic distribution, mortality, natality, and migration.

406. Applied Multivariate Biostatistics. Lecture, three hours; laboratory, one hour. Prerequisites: course 100B, at least two other upper division research courses, consent of instructor. The use of multiple regression, principal components, factor analysis, discriminant function analysis, logistic regression, and canonical correlation in biomedical data analysis.

409. Introduction to Microcomputers (2 units). Lecture, one hour; laboratory, one hour. Prerequisites: four upper division physical, biological, or social sciences courses or consent of instructor. Introduction to microcomputers and their application. S/U grading.

410A. Management of Epidemiologic Data (2 units). Prerequisites: courses 100A, 112 (one course may be taken concurrently with consent of instructor). Concepts, collection, and management of data, with particular emphasis on large-scale data bases. Introduction to computers and appropriate selection and use of packaged programs.

410B. Management of Epidemiologic Data (2 units). Prerequisites: course 410A or equivalent, consent of instructor. Development of special purpose programming and compiler languages for epidemiologic problems. Data management in large-scale studies in infectious and chronic diseases.

411. Research Resources in Epidemiology (2 units). Lecture, one hour; discussion, one hour. Prerequisites: courses 100B, 211B; consent of instructor. Instruction and practical experience in the use of varied bibliographic aids and sources of information, building of reference files, and presentation of research findings for publication.

412. Preventive Medicine in Public Health Practice. Lecture, two hours; discussion, two hours. Prerequisites: courses 100A, 112, 130, 155, or equivalent, consent of instructor. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings.

413. Preventive Medicine in Public Health Practice. Lecture, two hours; discussion, two hours. Prerequisites: courses 100A, 112, 130, 155, or equivalent, consent of instructor. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings.

414. Practical Epidemiologic Investigations. Lecture, one hour; laboratory, three hours. Prerequisites: courses 100A, 112 or 114, 211A, or equivalent, consent of instructor. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings.

415. Epidemiology for Developing Countries. (Not the same as course 415 prior to Fall Quarter 1986.) Prerequisites: courses 100A, 112 or equivalent, two biological sciences courses or equivalent, consent of instructor. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings.

416. Epidemiologic Strategies for Evaluating Public Health Efforts (2 units). Seminar, three hours. Prerequisites: courses 100A, 112, 130, 403, or equivalent, consent of instructor. The techniques necessary for the effective assessment of the worth of a health department. As part of a group-selected project, students conduct an actual small-scale data collection and evaluation study. S/U or letter grading.

417. Injury Prevention Strategies and Countermeasures (2 units). Prerequisites: courses 100A, 112, two upper division biological or life sciences courses, or equivalent, consent of instructor. Lectures with discussion on injury prevention strategies and countermeasures, including a critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U grading.

418. Rapid Epidemiological Surveys in Developing Countries. Prerequisites: courses 100A, 112 or 114, 409, 415, or equivalent, consent of instructor. Microcomputer-assisted planning and organizing of epidemiological surveys in developing countries, including teaching of methods for two-stage cluster sampling, training interviewers, and the use of microcomputers to develop questionnaires, select the sampling population, process and analyze data, and prepare the final report.

430. Health Service Organization and Management Theory. Prerequisite: course 131, two upper division social sciences courses, or equivalent, consent of instructor. Application of contemporary organization and management theory to systems that provide personal health care services. Environmental characteristics, missions/goals, structure and processes of health service organizations.

431. Managerial Processes in Health Service Organizations. Lecture, one hour; laboratory, three hours. Prerequisites: course 430, consent of instructor. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, system, and interorganizational. Unique features of health service organizations are stressed as applications are presented.

432. Integrative Seminar in Health Services Management. Prerequisite: course 431. Residents and preceptors are responsible for presenting cases of actual administrative problems for solution by teams of students and faculty, with evaluation of performance.

433. Health Service Organization Policy and Strategy. Lecture, three hours; discussion, one hour. Prerequisites: courses 131, 400 (at least six units), 430, or equivalent, consent of instructor. Conceptual, analytical, and technical aspects of policy and strategy formulation in health service organizations. Special attention to structure and dynamics of competitive markets, corporate-level strategic planning and marketing, managerial ethics and values, organization creativity/innovation.

436. Financial Management of Health Service Organizations. Prerequisites: courses 131, 141, 430, or equivalent, consent of instructor. Application of financial management and accounting principles to health care facilities, including unique financial characteristics of health care facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and risk management.

437. Legal Environment of Health Service Management (2 units). Prerequisites: course 131 or equivalent, consent of instructor. General survey of legal aspects of health service organizations, including legal aspects of health care delivery, health care financing, legal aspects of health services management. Ms. Valdez

438. Issues and Problems of Local Health Administration (2 units). Prerequisites: courses 112, 130, one additional health services course, or equivalent, consent of instructor. Analysis of organizational issues currently faced by local health departments, including planning and management of health services, organizational problems and interagency relationships.

439. Dental Care Administration (2 units). Prerequisites: courses 100A, 112, or equivalent, consent of instructor. In-depth examination of several specific dental care policy issues: manpower, relationship of treatment to disease, national health program strategies, and evaluation mechanisms.

440A. Health Information Systems: Organization and Management. Lecture, two hours; laboratory, three hours. Prerequisites: courses 230A-230B or equivalent, consent of instructor. Principles of and systems relating to organization and management of a health facility's health information system.

440B. Health Information Systems: Organization and Management. Lecture, two hours; laboratory, three hours. Prerequisites: courses 230A-230B or equivalent, consent of instructor. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigations of obtaining and processing data to meet needs of programs in institution and agency.

443D. Advanced Hospital Financial Management Simulation. Lecture, one hour; discussion, one hour; laboratory, two hours. Prerequisites: courses 130, 141, 436, consent of instructor. Practical aspects of hospital management decisions in a changing environment, examined through computer simulation, with particular attention to accounting projects, demand patterns, investment programs, and health care regulations.

443E. Advanced Hospital Financial Management Simulation. Prerequisites: courses 130, 131, 141, 436, or equivalent, consent of instructor. Hospital financial management, including reimbursement management, capital financing, and capital investment analysis, discussed and analyzed with respect to students' individual residency sites.

444. Applied Methodology in Health Planning. (Formerly numbered 444B.) Lecture, three hours; fieldwork, four hours. Prerequisites: courses 230A-230B or equivalent, consent of instructor. Application and demonstration of methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles area. Mr. Melnick

446. Financing Health Care. Prerequisites: course 130, Economics 1, 2, or equivalent, consent of instructor. Patterns of health care financing by consumers, providers, third-party intermediaries; trends in health service use; expenditures, national health insurance, and international comparisons of health financing. Mr. Schneider

447D. Management of Health Maintenance Organizations. Lecture, three hours. Prerequisites: courses 130, 134, or equivalent, consent of instructor. Alternative approaches to fee-for-service for paying, providing, or arranging for delivery of health care services, and relating these approaches to the national health policy. Mr. Wasserman

447E. Health Insurance Principles and Programs. Prerequisites: courses 130, 232, one additional health services course, or equivalent, consent of instructor. Examination of social, actuarial, and commercial assumptions underlying private health insurance and governmental health insurance. Analysis of diversity of voluntary medical care insurance plans under different sponsorships and with varied scopes of coverage and benefits and their implications for public and private medical care developments. Mr. Shonick

461. Computer Use in Nutritional Assessment. Lecture, two hours; laboratory, six hours. Prerequisites: courses 100A, 112 (may be taken concurrently), 162 or equivalent, 460, consent of instructor. Includes computer and application of methods for the purpose of nutritional assessment of population groups. Ms. Murphy.

462. Nutritional Assessment: Laboratory Assays (2 units). Lecture, one hour; laboratory, three hours. Prerequisites: courses 162, 165, 167, or equivalent, one course in the 260 series. Biochemical methods for evaluating nutritional status of individuals of population groups. Techniques for measuring vitamins, minerals, lipids, and proteins. Ms. Swenson.

463A. Preparation for Practicum in Public Health Nutrition (2 units). Discussion, one hour; laboratory or fieldwork, five hours. Prerequisites: courses 112, 165, 460 (may be taken concurrently). Chemistry 152, consent of instructor. Students analyze a public health nutrition program and prepare for a practicum. Ms. Hunt, Jones.

463B. Practicum in Public Health Nutrition. Discussion, two hours; laboratory or fieldwork, 10 hours. Prerequisites: courses 112, 165, 460 (may be taken concurrently). 460, 461, 463A, consent of instructor. Students analyze a public health nutrition program and conduct the public health nutrition practicum. Ms. Hunt, Jones.

464. International Health Agencies and Programs. Prerequisites: three upper division or graduate courses in public health, health sciences, or another field. Focuses on the role of high- and middle-income countries in the international health arena. Mr. Richwald.

470A. Advanced Issues in International Health. Lecture, two hours; discussion, two hours. Prerequisites: courses 240, 270, 470A or 472A or 475 or equivalent, consent of instructor. In-depth focus on major public health issues confronting developed and developing countries and donors of technical and financial assistance. Mr. Neumann.

471A. Women's Health: Principles, Programs, and Policies. (Not the same course as 471B prior to Fall Quarter 1985.) Prerequisites: courses 100A, 130 or equivalent, 155, 171A, consent of instructor. In-depth consideration of health services, programs, and issues relevant to nonreproductive women's health care. Subjects include health status of women, endocrinological issues, chronic diseases, cancer, stroke, and evaluation of health services for women. Ms. Chang.

471B. Perinatal Health Care: Principles, Programs, and Policies. (Not the same course as 471B prior to Winter Quarter 1988.) Prerequisites: courses 100A, 130 or equivalent, 155, 171A, consent of instructor. Comprehensive examination of perinatal health care. Includes topics such as perinatal outcomes, public programs, controversies surrounding new technology, regionalization, organization of services at the federal, state, and county levels, and medical-legal issues. Mr. Richwald.

471C. Family Planning: Public Health Programs, Programs, and Policies. Prerequisites: courses 100A, 130 or equivalent, 155, 171A, consent of instructor. A critical review of public health issues in the area of family planning, abortion, and sexuality. Emphasis on health care problems, delivery of services, and public programs. Mr. Richwald.

472A. Maternal and Child Health in Developing Areas. Prerequisites: courses 270, 470A, or equivalent, consent of instructor. Major health problems of mothers and children in developing areas, stressing causation, management, and prevention. Particular reference to adapting programs to limited resources in non-industrialized countries. Ms. Jelliffe.

472B. Recent Developments in Maternal and Child Health in Disadvantaged Countries (2 units). Prerequisites: courses 171A, 171B, 270, 472A, or equivalent, consent of instructor. Analytic in-depth consideration of recent advances in the field of international maternal and child health, with special reference to developing countries. Mr. Jelliffe.

472D. Overseas Refugee Health Programs (2 units). Lecture, one hour; discussion, one hour. Prerequisites: courses 112, 171A, 270 or 472A, or equivalent, consent of instructor. Comprehensive overview of the health problems of overseas refugee situations and of programs designed to deal with these special circumstances. Mr. Jelliffe.

473A. Handicapped Children: The Public Health Concern (2 units). Prerequisites: courses 130, 170 or equivalent, 171A, consent of instructor. Epidemiology, prevalence, social consequences, and remedial programs for the major handicapping conditions in children. Emphasis on biological and social factors, current research, and program developments. Mr. Katz.

473B. Child Health in the U.S. Lecture, three hours; discussion, one hour; field trip, three hours. Prerequisites: courses 112, 130 or equivalent, 171A, consent of instructor. Examination of the health problems affecting infants, children, and adolescents in the U.S. and exploration of alternatives of priorities, approaches, services, and policies aimed at ameliorating these problems. Mr. Chang.

473F. Research Seminar in Community Child Health Services (2 units). Discussion, one hour; laboratory, one hour; field trip, two hours. Prerequisites: courses 100A, 125, 130, 171A, 171B, or equivalent, consent of instructor. Examination and development of evaluation strategies for existing community child health services at the local level and development of evaluation strategies for selected topics in programmatic areas. Emphasis on collaborative research and consultation skills, with participation of local health department personnel. Mr. Chang.

473G. Health Services in Child Day Care. Lecture, two hours; discussion, two hours; one field trip, three hours. Prerequisites: courses 112, 130, 170 or equivalent, consent of instructor. Assessment of needs, planning, and development of health and nutrition services for young children in day care and related child development programs. Mr. Chang.

473H. Child Health Policy. Lecture, three hours; discussion, one hour. Prerequisites: courses 130 or equivalent, 171A, 473D, consent of instructor. Analysis of the development and characteristics of child health programs and policies; issues related to health services for children examined according to chronological development of child; relationship of health programs to programs of nutrition, day care, education, and welfare; strategies for achieving change and the politics of developing a child health policy. Mr. Chang.

474. Self-Care and Self-Help in Community Health. Lecture, two hours; discussion, two hours. Prerequisites: courses 112, 130, fieldwork internship, or equivalent, consent of instructor. Review of background, principles, concepts, programs, and research concerning the emerging field of self-care in health. Mr. Katz.

Adjunct Assistant Professor
Laura M. Lake, Ph.D.

Scope and Objectives

Enlightened management of the environment is necessary to maintain a suitable quality of life. Such management requires scientists trained in a multiplicity of environmental disciplines. These interdisciplinary, interactive skills are developed through the UCLA graduate program in environmental science and engineering, leading to the Doctor of Environmental Science and Engineering (D.Env.) degree.

The goal of the program is to prepare professional environmental analysts to deal with the complexities of various courses of action on the environment and resources, to develop recommendations for sound environmental policies, and to devise means to implement policies adopted.

The present focus of the program, that of interdisciplinary training in the environmental sciences and its application, is a successful one. Graduates have been employed in technical assessment and management positions with governmental agencies, consulting firms, and industrial firms concerned with environment-related projects.

No undergraduate major is offered; however, studies can be arranged along several routes. Students with majors in the natural sciences, geography/ecosystems, public health, or engineering who have environmental or energy problem solving as a professional goal may wish to supplement their course preparation in consultation with the program faculty.

Although participating faculty members are mainly from the College of Letters and Science and the School of Engineering and Applied Science, the program is administered through the School of Public Health.

Doctor of Environmental Science and Engineering

Admission

In addition to meeting University minimum standards, you must have an excellent scholastic record (3.0 GPA in undergraduate work and 3.5 in graduate work) and must be acceptable to the interdepartmental committee. Your overall academic record, including Graduate Record Examination (GRE) scores, must reflect exceptional verbal and quantitative skills. Three letters of recommendation are required. You must hold a master’s degree in engineering, public health, or one of the natural sciences to be formally admitted to the program.

Students with graduate training in fields of science and engineering who have not earned a master’s degree may be considered for admission. In these cases you must show evidence of graduate training equivalent to the master’s degree, including some research experience. Students with a bachelor’s degree may be informally affiliated with the program while earning a master’s degree in one of the participating departments.

All students must have taken the following preparation courses: (1) one year of introductory biology with laboratory; (2) one year of general chemistry with laboratory, including analytical methods, and one quarter of organic chemistry; (3) one course or equivalent experience in elementary programming and use of computer hardware and software; (4) one course in introductory geology with laboratory; (5) one year of calculus and one course in elementary statistics; (6) one year of introductory physics with laboratory. Any of the courses may be taken after you arrive at UCLA. Conditional admission is given to students who are otherwise qualified.

Subject to available funds, the program offers fellowships or research assistantships to eligible first-year students. Prospective students may write for descriptive brochures to the Environmental Science and Engineering Program, School of Public Health, 46-081 CHS, UCLA, Los Angeles, CA 90024-1772.

Major Fields or Subdisciplines

Specialties within the program include, but are not limited to, the assessment and management of hazardous substances in the air, soil, and water environments, migration of contaminants in groundwater, health risks of toxic substances, and environmental problems common to the U.S. and Latin American countries. Also, you may slant your work toward greater emphasis either on the science engineering side or on the science policy side of your specialty.

Course Requirements

A minimum of 15 courses after admission to the program is required, including three core courses offered by the program faculty. At least three breadth courses, in addition to the core courses, must be at the graduate level. Breadth courses from the following categories are selected in consultation with your faculty adviser. Exact requirements depend on your previous training.

Environmental Science: Five courses, including environmental chemistry; environmental biology, microbiology, and ecology (two courses); environmental geology; and atmospheric sciences.

Environmental Engineering and Technology: Seven courses, including hydrology; advanced statistics, computer science, or applied mathematics; engineering (three courses); and toxicology or epidemiology.

Social Sciences/Law: Three courses, including one in environmental law.

Electives: Three courses, of which individual instruction and research may be used to satisfy all or part of the requirement.

Core Courses: You must complete three four-unit core courses, offered by the program faculty, with grades of B or better. The courses cover critical issues and methods in environmental science, engineering, and policy. Successful completion of each core course is prerequisite for advancement to the problems course sequence.

Seminar: You are required to enroll in Environmental Science and Engineering 411 each quarter you are in residence.

Problems Course: Before proceeding to the problems course sequence, you must have completed a minimum of 12 breadth courses and the three core courses and have the approval of the program faculty. Twenty-four quarter units of the Environmental Science and Engineering 400 series (problems course sequence) are required and may be met by completing three consecutive quarters (eight units per quarter) on a single theme, or as a minimum, at least two consecutive quarters devoted to a single theme plus one quarter of participation or activity approved by the faculty. Enrollment in more than one problems course per quarter is not allowed. Normally problems course credit is earned only through courses offered by the program. However, you may petition the faculty for permission to earn problems course credit through multidisciplinary environmental projects offered in other departments at UCLA.

Qualifying Examinations

The written qualifying examination is normally taken during your second year in residence, after completing the core courses and most of the breadth courses. If all or parts of the examination are failed, one and only one repeat is allowed — at the next offering. The written examination covers the material in the core courses, the breadth courses, and selected topics in classical and contemporary subjects in the program’s areas of interest. A reading list is provided.

When you have completed all other course requirements and are in the final quarter of the problems course, a doctoral committee is established. The committee conducts the University Oral Qualifying Examination, which explores the depth, breadth, and extent of your preparation, with appropriate emphasis on practical problems and situations. After successful completion of the oral examination and the problems course requirements, you are advanced to candidacy.

In case of failure, you may repeat the oral examination once after completing any additional coursework or individual study the doctoral committee may recommend.
Internship

Once you have been advanced to candidacy, an 18- to 24-month internship in your field of interest is arranged at an outside institution. Arrangements for the internship are your responsibility and must be approved by the doctoral committee, the interdepartmental committee, and the dean of the Graduate Division. Supervision during the field training experience is by your doctoral committee. During the internship, you must register for eight units of a 599 course in each academic-year quarter.

Dissertation and Final Oral Examination

A dissertation is required and should be a scholarly treatment of the problem area in which you have worked, but not a description of the totality of the experience. It should show evidence of critical thought and originality. No later than nine months after advancement to candidacy and the beginning of the internship, you are required to present a written prospectus, including an outline, of the dissertation and defend it before your doctoral committee. After completing the internship, you must return to UCLA to present an open seminar. The final oral examination includes the problems course, internship experience, and a defense of your dissertation.

If the seminar and all other elements of your performance are judged satisfactory, you are awarded the degree of Doctor of Environmental Science and Engineering (D.Env.).

Graduate Courses

400A. Environmental Science and Engineering Problems Course (8 units). Prerequisite: consent of instructor and program chair. Primarily intended for students enrolled in the environmental science and engineering doctoral program. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

400B. Environmental Science and Engineering Problems Course (8 units). Prerequisites: successful completion of course 400A, consent of instructor and program chair. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

400C. Environmental Science and Engineering Problems Course (8 units). Prerequisites: successful completion of course 400B, consent of instructor and program chair. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems.

400D. Environmental Science and Engineering Problems Course (8 units). Prerequisite: successful completion of course 400C and of an internship approved by the Environmental Science and Engineering Interdepartmental Committee. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems.

410. Environmental Science and Engineering Workshop (2 units). Prerequisite: consent of instructor. Primarily intended for students enrolled in the environmental science and engineering doctoral program. Development of analytical or experimental skills essential to the solution of environmental problems studied in courses 400A, 400B, 400C, and 400D.

411. Environmental Science and Engineering Seminar (2 units). Prerequisite: consent of instructor. Required of graduate students in environmental science and engineering each quarter in residence. Current topics in environmental science and engineering. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser, program chair, and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisite: consent of instructor and program chair. Supervised investigation of advanced environmental problems. S/U grading.
Appendix

Nondiscrimination

The University of California, in compliance with Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, does not discriminate on the basis of race, color, national origin, religion, sex, handicap, or age in any of its policies, procedures, or practices; nor does the University discriminate on the basis of sexual orientation. This nondiscrimination policy covers admission and access to, and treatment and employment in, University programs and activities, including but not limited to academic admissions, financial aid, educational services, and student employment.

Inquiries regarding the University's equal opportunity policies may be directed to the Campus Counsel, 3140 Murphy Hall, UCLA, Los Angeles, CA 90024-1405. Speech and hearing impaired persons may call TDD (213) 206-6083.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, religion, sex, sexual orientation, or handicap and may contact the Office of the Dean of Students, 1206 Murphy Hall, for further information and procedures.

Residence for Tuition Purposes

Students who have not been residents of California for more than one year immediately prior to the residence determination date for each term in which they propose to attend the University are charged, along with other fees, a nonresident tuition fee. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Law Governing Residence

The rules regarding the establishment of legal residence for tuition purposes at the University of California are governed by the California Education Code and by Standing Orders of The Regents of the University of California. Under these rules residence for tuition purposes can be established by adult citizens or by certain classes of aliens. There are also particular rules applicable to the residence classification of minors (under 18) in that such residence is generally regarded as being derived from the parent or parents with whom the minor last resided.

Who Is a Resident?

In order to be classified a resident for tuition purposes, an adult, other than an adult alien present in the U.S. under the terms of a nonimmigrant status which precludes the adult alien from remaining permanently in the U.S., must have established his or her residence in California for more than one year immediately preceding the residence determination date for the term during which he or she proposes to attend the University and relinquished any prior residence. An individual must couple physical presence within this state for one year with objective evidence that such presence is consistent with intent to make California his or her permanent home and, if these steps are delayed, the one-year duration period will be extended until both presence and intent have been demonstrated for one full year. Indeed, physical presence within the state solely for educational purposes does not constitute the establishment of California residence under state law, regardless of the length of stay. A woman's residence shall not be derivative from that of her husband or vice versa.

Adult Aliens

An adult alien student is entitled to resident classification if the student has been lawfully admitted to the U.S. for permanent residence in accordance with all applicable laws of the U.S., and has thereafter established and maintained residence in California for more than one year immediately prior to the residence determination date. Nonresident aliens present in the U.S. under the terms of visa classifications A, E, G, I, K, L, or political asylum status who can demonstrate California residence for more than one year prior to the term while holding such visa may be entitled to resident classification. Nonimmigrant classifications which preclude an adult alien from establishing California residence are B, C, D, F, H, J, and M. An adult alien not holding an acceptable visa status or not in possession of a visa status which precludes establishing California residence may be considered for resident status if requirements concerning physical presence and requisite intent are satisfied.

¹Source: A national survey of a representative group of colleges conducted by the College Placement Council, representing the 80 percent range of offers for March 1988 throughout the country. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.
Establishing the Requisite Intent to Become a California Resident

Relevant indicia which can be relied on to demonstrate one’s intent to make California the permanent residence includes registering to vote and voting in California elections; designating California as the permanent address on all school, employment, and military records; obtaining a California driver’s license or if a nonresident, a California identification card; obtaining California vehicle registration; paying California income taxes as a resident, including income earned outside California from the date residence is established; establishing an abode where one’s permanent belongings are kept within California; licensing for professional practice in California; and the absence of this indicia in other states during any period for which residence in California is asserted. Documentary evidence may be required. All relevant indicia will be considered in the classification determination.

General Rules Applying to Minors

The residence of the parent with whom an unmarried minor (under age 18) child maintains his or her place of abode is the residence of the unmarried minor child. The residence of an unmarried minor who has a parent living cannot be changed by his or her own act, by the appointment of a legal guardian, or by relinquishing a parent’s right of control. When the minor lives with neither parent, residence is that of the parent with whom the student maintained the last place of abode. The minor, except a minor alien present in the U.S. under the terms of a nonimmigrant status which precludes the minor alien from remaining in the U.S. permanently, may establish residence when both parents are deceased and a legal guardian has not been appointed. Where the residence of the minor is derived, the California residence of the parent from whom it is derived must satisfy the one-year durational requirement.

Specific Rules Applying to Minors

(1) Divorced or Separated Parent Situations — The student must move to California to live with the California resident parent while still a minor (before the 18th birthday) in order to receive derivative California resident status. Otherwise, he or she will be treated like any other adult coming to California to establish legal residence.

(2) Parent of Minor Moves from California — A student who is a U.S. citizen or eligible alien who remains in the state after his or her parent, who was a California resident for at least one year immediately prior to leaving and has, during the student’s minority and within one year immediately prior to the residence determination date, established residence elsewhere, shall be entitled to resident classification until the student has attained the age of majority and has resided in the state the minimum time necessary to become a resident so long as, once enrolled, he or she maintains continuous attendance at an institution.

(3) Self-Support — Nonresident students who are U.S. citizens or eligible aliens, who are minors or 18 years of age, and who have demonstrated the intent to make California their permanent home, and can evidence that they have been self-supporting and actually present within California for the entire year immediately prior to the residence determination date, may be eligible for resident status.

(4) Two-Year Care and Control — Students who are U.S. citizens or eligible aliens shall be entitled to resident classification if immediately prior to the residence determination date, they have lived with and been under the continuous direct care and control of any adult or adults other than a parent for not less than two years, provided that the adult or adults having such control have been California residents during the year immediately prior to the residence determination date. This exception continues until the student has attained the age of majority and has resided in the state the minimum time necessary to become a resident student, so long as continuous attendance is maintained at an institution.

Exemptions from Nonresident Tuition

(1) Member of the Military — A student who is a member of the U.S. military stationed in California on active duty, except a member of the military assigned for educational purposes to a state-supported institution of higher education, may be exempt from the nonresident tuition fees until he or she has resided in the state the minimum time necessary to become a resident. He or she must provide the Residence Deputy with a statement from the commanding officer or personnel officer stating the assignment to active duty in California is not for educational purposes and must include the dates of assignment to the state.

(2) Spouse or Other Dependents of Military Personnel — Exemption from payment of the nonresident tuition fee is available to a spouse or to a natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. Such exemption shall be maintained until the student has resided in California the minimum time necessary to become a resident. The student must petition for this exemption each term he or she is eligible. If a student is enrolled in an institution and the member of the military (a) is transferred on military orders to a place outside this state and continues to serve in the Armed Forces or (b) retires from active duty immediately after having served in California on active duty, the student shall retain this exemption under conditions set forth above.

(3) Child or Spouse of Faculty Member — To the extent that funds are available, the unmarried, dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate may be eligible for a waiver. Confirmation of the faculty member’s membership on the Academic Senate shall be secured each term before this waiver is granted.

(4) Child or Spouse of University Employee — The dependent child or spouse of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory) and who has been employed by the University for more than one year may be entitled to resident status.

(5) Children of Deceased Public Law Enforcement or Fire Suppression Employees — Children of deceased public law enforcement or fire suppression employees who were California residents and who were killed in the course of fire suppression duties or law enforcement duties may be entitled to an exemption of the nonresident fees.

Maintaining Residence During a Temporary Absence

A student’s temporary absence from the state for business or educational purposes will not necessarily constitute loss of California residence unless the student has acted inconsistently with the claim of continued California residence during his or her absence. The burden is on the student to show retention of California residence during an absence from the state. Steps a student (or parent of a minor student) should take to retain California resident status for tuition purposes include:

(1) Continue to use a California permanent address in all records — educational, employment, etc.

(2) Satisfy California resident income tax obligations. Individuals claiming permanent California residence are liable for payment of income taxes on their total income from the date they establish California residence. This includes income earned in another state or country.

(3) Retain California voter’s registration, voting by absentee ballot.

(4) Maintain California driver’s license and vehicle registration. If it is necessary to change driver’s license and/or vehicle registration while temporarily residing in another state, these must be changed back to California within the time prescribed by law.

Reclassification Petitions

Students MUST PETITION IN PERSON at the Registrar’s Office for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term of attendance for which the student seeks reclassification.
California law requires that financial independence be included among the factors considered for students classified as nonresidents and seeking reclassification as residents. Financial independence will not be considered for graduate students who are teaching assistants, research assistants, or teaching associates employed on a 0.49 or more time basis for the term for which reclassification is sought. For detailed information regarding reclassification, contact the Campus Residence Deputy in 1111 Murphy Hall (825-3447).

**Time Limitation on Providing Documentation**

If additional documentation is required for either an initial residence classification or reclassification but is not readily accessible, the student will be allowed a period of time no later than the end of the applicable term to provide such documentation.

**Incorrect Classification**

All students classified incorrectly as residents are subject to reclassification and to payment of all nonresident fees not paid. If incorrect classification results from false or concealed facts by the student, the student is also subject to University discipline. Resident students who become nonresidents must immediately notify the Residence Deputy.

**Inquiries and Appeals**

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the CAMPUS RESIDENCE DEPUTY, Office of the Registrar, 1111 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024-1405 (825-3447) or to the Legal Analyst-Residence Matters, 590 University Hall, Berkeley, CA 94720. NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES. The student is cautioned that this summation is NOT a complete explanation of the law regarding residence. A copy of the regulations adopted by The Regents of the University of California is available for inspection in the Registrar’s Office, 1111 Murphy Hall. Please note that changes may be made in the residence requirements between the publication date of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the Residence Deputy, may make a written appeal to the Legal Analyst within 90 days of the notification of the final decision by the Residence Deputy.

**Privacy Notice**

All of the information requested on the Statement of Legal Residence form is required by the authority of Standing Order 110.2 (a)-(d) of The Regents of the University of California for determining whether or not a student is a legal resident for tuition purposes. Registration cannot be processed without this information. The Registrar’s Office on campus maintains the requested information. The student has the right to inspect University records containing the residence information requested on the form.

**Grading Regulations**

**Assigning a Grade**

The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor’s evaluation of the student’s achievement in the course. When on examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student’s own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

**Student Grievance Procedures**

Grounds for student grievances are the application of nonacademic criteria such as considerations of race, politics, religion, sex, or evaluation of student work by criteria not directly reflective of performance related to course requirements. Students having such a grievance should talk to the instructor of the course, the department chair, the dean or divisional dean of the college or school, and the vice chancellor—faculty relations, in that sequence.

If the dispute is not resolved through these discussions, a grievance may be filed with the Charges Committee of the Academic Senate (3125 Murphy Hall). If it is determined that probable cause exists for violation of the faculty code of conduct, the grievance is then brought to the Committee on Privilege and Tenure.

If an instructor in charge of a course has been determined by the Committee on Privilege and Tenure to have assigned a grade on any basis other than academic grounds, that committee shall inform the divisional Academic Senate chair. Within a period of two weeks after notification, guided by the Committee on Committees, the divisional Senate chair shall establish an ad hoc committee to determine whether the grade shall be changed. The ad hoc committee shall consist of at least three members, with at least one member a representative of the department involved. The ad hoc committee will obtain whatever records are available and use these records to make a final decision concerning the grade. If the records are not adequate, then the committee may assign a grade of Pass, or allow the student to repeat the course without penalty. The ad hoc committee will report the change of grade to the Registrar. In order to protect the student, the grade shall be changed, if warranted, within four weeks following the formation of the ad hoc committee.

**Correction of Grades**

All grades, except DR, I, and IP, are final when filed by an instructor in the end-of-term course report. However, the Registrar is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the division in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor’s signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair.

**Undergraduate Final Examinations**

No student shall be excused from assigned final examinations except as provided below. In compliance with Section 92640a of the Education Code the University must accommodate requests for alternate examination dates at a time when the activity would not violate a student’s religious creed. Accommodation for alternate examination dates will be worked out directly and on an individual basis between the student and the faculty member involved: (1) in general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor; (2) students unable to reach a satisfactory arrangement with their instructor should contact the University Ombudsman, 274 Kinsey Hall, or the Dean of Students, 1206 Murphy Hall, for assistance; (3) instructors who have questions or who wish to verify the nature of the religious event or prac-
true involved should contact the University Ombudsman or the Dean of Students for assistance.

The instructor in charge of an undergraduate course shall be responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based on adequate evaluation of that achievement. The instructor's methods of evaluation must be announced at the beginning of the course. The methods may include a final written examination, an oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours' duration and will be given only at the times and places established and published by the department chair and the Registrar.

At the end of the term in which a student is expected to be graduated, a student's major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term, and with the approval of the appropriate Committee on Courses, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release to individual students their original final examinations (or copies). This may be done by any method which insures the students' right to privacy. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular quarter of instruction, during which period students shall have access to their examinations.

**Student Conduct: Violation of University Policies**

Students are subject to disciplinary action for several types of misconduct, including dishonesty such as cheating, multiple submission (i.e., the submission of any work which as been used in fulfillment of any other academic requirement), plagiarism, or knowingly furnishing false information to the University; forgery or other misuse of University documents, keys, or identifications; theft or damage to property; unauthorized entry to University properties; disruption of teaching, research, administration, disciplinary procedures, or other University activities; physical abuse or threats of violence; disorderly conduct; disturbing the peace; sexual harassment; the use, possession, or sale of narcotic or illegal drugs on campus or at official University functions; and violations of other University policies or campus rules and regulations. Further information on these infractions and on the procedures concerning student discipline are contained in the University of California Policies Applying to Campus Activities, Organizations, and Students (Parts A and B), UCLA Student Conduct Code of Procedures, and UCLA Activity Guidelines. Copies of these booklets are available in the Office of the Dean of Students (1206 Murphy Hall), Center for Student Programming (161 Kerckhoff Hall), or Student Psychological Services (A3-062 CHS).

In addition, the Office of the Dean of Students publishes "Official Notices" in the Daily Bruin at various times during the year. Such notices are important, and all students are held responsible for the information in them.

**Disclosure of Student Records**

Pursuant to the Federal Family Educational Rights and Privacy Act of 1974, the California Education Code as amended in 1976, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right (1) to inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal and State Laws and the University Policies, (2) to have withheld from disclosure personally identifiable information from their student records, except as provided by the Federal and State Laws and the University Policies, (3) to inspect records maintained by the University of disclosures of personally identifiable information from their student records, (4) to seek correction of their student records through a request to amend the records and subsequently through a hearing, and (5) to file complaints with the Department of Education regarding alleged violations of the rights accorded them by the Federal Act.

The University may publish, without the student's prior consent, items in the category of "public information," which are name, address, telephone number, date and place of birth, major field of study, dates of attendance, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including but not limited to intercollegiate athletics), and the name, weight, and height of participants in intercollegiate athletic teams. Students who do not wish all or part of the items of "public information" disclosed may, with respect to address and telephone number, so indicate on the UCLA Address/Data portion of the Registration Form, and with respect to the other items of information, by filling out a Decline to Release Public Information form available in the Registrar's Office, 1105 Murphy Hall.

Student records which are the subject of the Federal and State Laws and the University Policies may be maintained in a wide variety of offices. Students are referred to the UCLA Campus and CHS Directory which lists all the offices which may maintain student records, together with their campus address, telephone number, and unit head. Students have the right to inspect their student records in any such office subject to the terms of the appropriate Federal and State Laws and the University Policies.

A copy of the Federal and State Laws, the University Policies, and the UCLA Campus and CHS Directory may be inspected in the office of the Records Management Coordinator, 200 Campus Services Building II. Information concerning these matters and students' hearing rights is also available there.
Endowed Chairs

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University’s three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or “chairs,” which support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 73 endowed chairs which have been approved by The Regents of the University of California, as follows. (* Asterisks indicate new chairs which have been approved by The Regents since publication of the 1987-88 UCLA General Catalog.)

**College of Letters and Science**

Armenian Educational Foundation Chair in Modern Armenian History
Arthur Andersen and Company Chair in Business Economics
Ralph Bunche Chair in International Studies
James S. Coleman Chair in International Development Studies
Mr. and Mrs. C.N. Flint Professorship of Philosophy
Gloria and Paul Griffin Chair in Philosophy
Marvin Hoffenberg Chair in Political Science
Endowed Chair in Modern European History
Franklin D. Murphy Chair in Italian Renaissance Studies
Narekatsi Chair in Armenian Studies
1939 Club Chair
David S. Saxon Presidential Chair in Physics
Charles Speroni Chair in Italian Literature and Culture
UCLA Alumni and Friends of Japanese Ancestry Chair in Japanese American Studies
UCLA Foundation Chair
Saul Weinstein Chair in Organic Chemistry

**School of Engineering and Applied Science**

L.M.K. Boettler Chair in Engineering
Norman E. Friedmann Chair in Knowledge Sciences
Hughes Aircraft Company Chair in Manufacturing Engineering
Ralph M. Parsons Chair in Chemical Engineering

**Graduate School of Architecture and Urban Planning**

S. Charles Lee Chair in Architecture and Urban Planning
Harvey S. Perloff Chair

**Graduate School of Education**

Allan Murray Carter Chair in Higher Education
George F. Kneller Chair in Education and Philosophy

**School of Law**

Connell Professorship of Law
Chair in Entertainment Law
Gleeson L. Payne Chair in Insurance Law
*Richard C. Maxwell Chair in Law
*David G. Price and Dallas P. Price Chair in Law
Security Pacific Bank Chair

**John E. Anderson Graduate School of Management**

Allstate Chair in Insurance and Finance
California Chair in Real Estate and Land Economics
Edward W. Carter Chair in Business Administration
James A. Collins Chair in Management
Warren C. Cordner Chair in Money and Financial Markets
Henry Ford II Chair in International Management
Goldyne and Irwin Hearsh Chair in Money and Banking
IBM Chair in Computers and Information Systems
Harry and Elsa Kunin Chair in Business and Society
William E. Leonhard Chair in Management
Chauncey J. Medberry Chair in Management
*Paine Chair in Management
Times Mirror Chair in Management Strategy and Policy
Arthur Young Chair in Accounting

**School of Medicine**

Louis D. Beaumont Chair in Surgery
Bowyer Professorship of Medical Oncology
Judson Braun Chair in Biological Psychiatry
Joseph Campbell Chair in Child Psychiatry
Edward W. Carter Chair in Internal Medicine
Castera Chair in Cardiology
Crump Chair in Medical Engineering
Distinguished Professor in Medicine Chair
Max Factor Family Foundation Chair in Neurology
Charles Kenneth Feldman Chair in Ophthalmology
Dolly Green Chair in Ophthalmology
Eleanor I. Leslie Chair in Neuroscience
Della Martin Chair in Psychiatry
James H. Nicholson Chair in Pediatric Cardiology
Samuel J. Pearlman, M.D. and Della Z. Pearlman Chair in Head and Neck Surgery
Thomas P. and Katherine K. Pike Chair in Alcohol Studies
Augustus S. Rose Chair in Neurology
Jennifer Jones Simon Chair in Biophysics
Norman F. Sprague Chair in Molecular Oncology
Jules Stein Chair in Ophthalmology
*James Anderson Chair in Gastroenterology
Streisand Chair in Cardiology
Leon J. Tiber, M.D. and David S. Alpert, M.D. Chair in Medicine
Wasserman Professorship of Ophthalmology

**School of Public Health**

Fred H. Bixby Chair in Population Policy
Fred W. and Pamela K. Wasserman Chair in Health Sciences
University Administrative Officers

Regents Ex Officio
Governor of California
George Deukmejian
Lieutenant Governor of California
Leo T. McCarthy
Speaker of the Assembly
Willie L. Brown, Jr.
State Superintendent of Public Instruction
Bill Honig
President of the Alumni Association of the University of California +
Richard G. Heggie
Vice President of the Alumni Association of the University of California +
S. Sue Johnson
President of the University
David Pierpont Gardner

Appointed Regents +
Roy T. Brophy (1998)
Yvonne Brathwaite Burke (1993)
Glenn Campbell (1996)
Frank W. Clark, Jr. (2000)
Tirso del Junco (1997)
Jeremiah F. Hallisey (1993)
Willis W. Harman (1990)
John F. Henning (1989)
Meredith J. Khachigian (1990)
Leo S. Kolligian (1997)
Vilma S. Martinez (1990)
Joseph A. Moore (1990)
Robert N. Noyce (1992)
William French Smith (1998)
Yori Wada (1992)
Dean A. Watkins (1996)
Harold M. Williams (1994)
Jacques S. Yeager (1994)
Deborah Ruth Thorpe (1989+)

Faculty Representatives to the Board of Regents
Richard W. Gable
Fred N. Spiess

Officers of The Regents
President of The Regents
George Deukmejian
Chair of The Regents
Leo S. Kolligian
Vice Chair of The Regents
Harold M. Williams
General Counsel
James E. Hoist
Secretary
Bonnie M. Smotony
Treasurer
Herbert M. Gordon

Office of the President
President of the University
David Pierpont Gardner
Senior Vice President — Academic Affairs
William R. Frazer
Senior Vice President — Administration
Ronald W. Brady
Vice President — Agriculture and Natural Resources
Kenneth R. Farrell
Vice President — Budget and University Relations
William B. Baker
Vice President — Health Affairs
Cornelius L. Hopper, M.D.
Special Assistant to the President
Janet E. Young

Officers Emeriti
President of the University, Emeritus, and Professor of Economics, Emeritus
Charles J. Hitch
President of the University, Emeritus, and Professor of Business Administration, Emeritus
Clark Kerr
President of the University, Emeritus, and Professor of Physics, Emeritus
David S. Saxon
Vice President of the University, Emeritus, and Professor of Physics, Emeritus
William B. Fretter
Vice President of the University, Emeritus, Professor of Agricultural Economics, Emeritus, and Agricultural Economist, Emeritus
Harry R. Wellman
Vice President — Agriculture and National Resources, Emeritus
James B. Kendrick, Jr.

Vice President — Budget Plans and Relations, Emeritus
Thomas E. Jenkins
Vice President — Financial and Business Management, Emeritus, and Professor of Pathology, Emeritus
Baldwin G. Lamson
University Provost, Emeritus, Chancellor, Emeritus, and Professor of Mathematics, Emeritus
Angus E. Taylor
Vice President, Emeritus, and Secretary and Treasurer of The Regents, Emeritus
Robert M. Underhill
Assistant President, Emeritus
Dorothy E. Everett
Coordinator, Administrative Policy, Emeritus
Ruth E. Byrne
Executive Assistant to the President, Emeritus
Gloria L. Copeland
Secretary of The Regents, Emeritus
Elizabeth O. Hansen
Treasurer of The Regents, Emeritus
Owsley B. Hammond
General Counsel of The Regents, Emeritus
John J. Cunningham
Associate Counsel of The Regents, Emeritus
John E. Landon

Chancellors of the Campuses
Chancellor at Berkeley
Ira Michael Heyman
Chancellor at Davis
Theodore L. Hullar
Chancellor at Irvine
Jack W. Peltason
Chancellor at Los Angeles
Charles E. Young
Chancellor at Riverside
Rosemary S.J. Schraer
Chancellor at San Diego
Richard C. Atkinson
Chancellor at San Francisco
Julius R. Krevans
Chancellor at Santa Barbara
Barbara S. Uehling
Chancellor at Santa Cruz
Robert B. Stevens

+ Terms of Regents appointed by the Governor expire February 28 of the year named in parentheses. The Student Regent (Deborah Ruth Thorpe) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.
University Professors
E. Margaret Burbidge, University Professor, San Diego, Department of Physics
Melvin Calvin, Emeritus University Professor, Berkeley, Department of Chemistry
Gerard Debreu, University Professor, Berkeley, Departments of Economics and Mathematics
Murray Krieger, University Professor, Irvine, Department of English and Comparative Literature
Julian S. Schwinger, Emeritus University Professor, Los Angeles, Department of Physics
Glenn T. Seaborg, Emeritus University Professor, Berkeley, Lawrence Berkeley Laboratory
S. Jonathan Singer, University Professor, San Diego, Department of Biology
Neil J. Smelser, University Professor, Berkeley, Department of Sociology
Edward Teller, Emeritus University Professor, Livermore, Lawrence Livermore Laboratory
Charles H. Townes, Emeritus University Professor, Berkeley, Department of Physics
Sherwood L. Washburn, Emeritus University Professor, Berkeley, Department of Anthropology
John R. Whinnery, Emeritus University Professor, Berkeley, Department of Electrical Engineering and Computer Sciences

UCLA Administrative Officers
Chancellor
Charles E. Young, Ph.D.

Executive Vice Chancellor
Murray L. Schwartz, LL.B., LL.D.

Administrative Vice Chancellor and UCLA Medical Center Director
Raymond G. Schultz, M.D.

Vice Chancellor — Academic Administration
Andrea L. Rich, Ph.D.

Vice Chancellor — Capital Programs
Peter W. Blackman, J.D.

Vice Chancellor — Faculty Relations
Harold W. Horowitz, S.J.D.

Vice Chancellor — Graduate Programs and Dean of Graduate Division
Victoria A. Fromkin, Ph.D.

Vice Chancellor — Institutional Relations
Elwin V. Svenson, Ed.D.

Vice Chancellor — Planning
Adrian H. Harris, M.S.

Vice Chancellor — Public Affairs
Alan F. Charles, J.D.

Vice Chancellor — Research Programs
Albert A. Barber, Ph.D.

Vice Chancellor — Student Affairs
Winston C. Doby, Ed.D.

Executive Assistant to the Chancellor
Rosemary Ford, B.A.

Assistant Chancellor — Executive Assistant
John R. Sandbrook

Director of Neuropsychiatric Hospital
Don A. Rockwell, M.D.

Director of Neuropsychiatric Institute
Louis Jolyon West, M.D.

Campus Counsel
Patricia M. Jasper, J.D.

University Librarian
Russell Shank, M.B.A., D.L.S.

Dean of Continuing Education
To be named

Deans of UCLA Colleges and Schools
Graduate School of Architecture and Urban Planning
Richard S. Weinstein, M.A.

School of Dentistry
Henry M. Cherrick, D.D.S.

Graduate School of Education
Lewis C. Solmon, Ph.D.

School of Engineering and Applied Science
A.R. Frank Wazzan, Ph.D.

College of Fine Arts
J. Bernard Kester, M.A., Acting

School of Law
Susan W. Prager, J.D.

College of Letters and Science
Provost
Raymond L. Orbach, Ph.D.

Division of Humanities
Herbert Morris, LL.B., D.Phil.

Division of Life Sciences
Frederick A. Eiserling, Ph.D.

Division of Physical Sciences
Clarence A. Hall, Jr., Ph.D.

Division of Social Sciences
David O. Sears, Ph.D.

Division of Honors
Edward A. Alpers, Ph.D.

Graduate School of Library and Information Science
Robert M. Hayes, Ph.D.

John E. Anderson Graduate School of Management
J. Clayburn La Force, Ph.D.

School of Medicine
Kenneth I. Shine, M.D.

School of Nursing
Ada M. Lindsey, R.N., Ph.D.

School of Public Health
Abdelmonem A. Afifi, Ph.D.

School of Social Welfare
Leonard Schneiderman, Ph.D.

How to Reach UCLA

By Automobile:
San Diego Freeway northbound; exit Wilshire Boulevard toward Westwood; left on Westwood Boulevard.
San Diego Freeway southbound; exit Sunset Boulevard; left on Sunset Boulevard; right on Westwood Plaza.

By Bus:
Schedule information is available by calling the following numbers:
Culver City Municipal Bus Line: 202-5731 or 559-8310
Southern California Rapid Transit District: 625-4455
Santa Monica Municipal Bus Line: 451-5445
