The aerial photographs on the cover and title page of this year's catalog provide a study in contrast.

On the cover: A dramatic view of UCLA's south campus today, looking west from Hilgard Avenue, with the Factor Building and Young, Franz, and Knudsen Halls in the foreground, the Veterans Administration complex in the center, and the Pacific Ocean in the background. Photo by James Arzouman.

On the title page: The fledgling UCLA campus in 1930, with Royce, Haines, Kinsey, and Moore Halls and Powell Library forming a lonesome little cluster amid the beanfields of Westwood.

Publications Manager/Editor, Academic Publications: Leann J. Hennig
Assistant Editor: Susan J. Kientz
Design: Robin Weisz, Juliet Beynon

Want Extra Copies?
Copies of the 1990-91 UCLA General Catalog are available for purchase at the Students' Store. To obtain a copy by mail, send a check or money order for $8 within California or $9 within the continental U.S. (includes UPS or first-class postage) to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, ATTN: Mail Out. Make checks payable to ASUCLA. You may also charge the cost to your VISA or MasterCard by calling the Mail Out Department at (213) 825-6064 or 206-4198.

Please note
Every effort has been made to ensure the accuracy of the information presented in the UCLA General Catalog. However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or deletion without notice.

Other information about UCLA may be found in the announcements of the Schools of Architecture and Urban Planning, Dentistry, Education, Engineering and Applied Science, Law, Library and Information Science, Management, Medicine, Nursing, Public Health, and Social Welfare, and in literature produced by the School of the Arts and School of Theater, Film, and Television. Further details on graduate programs are available in various Graduate Division publications, including Standards and Procedures for Graduate Study at UCLA.

Introducing UCLA

"... in 10 years ... we shall look with amazement upon the development of this University, for it is certain to be greater, far greater, than the imagination of any of us can foresee."
— Ernest Carroll Moore
UCLA Director, 1919

From Little Acorns...

The year was 1880. With a population of 11,000, Los Angeles was a gaslit pueblo trying to convince the state to establish in Southern California a second State Normal School like the one already existing in San Jose, some 300 miles to the north.

In March of the following year, the State Assembly approved the establishment of such a school. A group of enthusiastic citizens, over 200 of whom contributed between $2 and $500, purchased a site less than a mile from the business section. Soon the towering Victorian form of the school rose from an orange grove which, today, is the site of the Central Los Angeles Public Library. On August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students.

By 1914, the little pueblo of Los Angeles had grown to a city of 350,000 and the school, whose enrollment far exceeded its capacity, moved to new quarters — a Hollywood ranch off a dirt road which would later become Vermont Avenue.

With a view toward expansion, Director Ernest Carroll Moore proposed in 1917 that the school become the first branch of the Berkeley-based University of California. Two years later, the Los Angeles State Normal School was replaced by the Southern Branch of the University of California, no longer merely a teacher's college but an institution that offered two years of instruction in Letters and Science. Third- and fourth-year courses were soon added, the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: University of California at Los Angeles (the “at” became a comma in 1958).

The Move Westward

As the student population of the University continued to increase, the need for a new site became obvious and the search was soon under way for a permanent home for UCLA. On September 21, 1927, Director Moore turned the first shovelful of soil that broke ground for the creation of the campus of his dreams.

The choice of Westwood, set squarely in the path of westward-moving Los Angeles, no doubt was an important factor in determining UCLA’s future growth. But in 1929, on the barren chaparral-covered hills of Westwood, the four original buildings — Royce Hall, Powell Library, Haines and Kinsey Halls — formed a lonesome little cluster in the middle of four hundred empty acres. The campus hosted some 5,500 students that fall.

The first priority after the move to Westwood was to establish a graduate curriculum, essential for any major university. The Regents established the master’s degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

Los Angeles and the University nurtured each other through the years, and both experienced phenomenal growth and development during the next half century. UCLA’s most spectacular period of growth occurred in the 25 years following World War II, when it tripled its prewar enrollment of 9,000 students and undertook what would become a $260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 715-bed teaching hospital which is now one of the largest and most highly respected in the world.

UCLA Today

Today, UCLA is a large and complex institution devoted to undergraduate and graduate scholarship, research, and public service. Known for academic excellence, many of its programs are rated among the best in the nation, some among the best in the world.

Groundbreaking, September 21, 1927. Provost Ernest Carroll Moore wields the shovel as Regent Edward A. Dickson (to Dr. Moore’s right) and others cheer.

Not the sound of symphony, but of chisel and saw: Royce Hall under construction, 1928.
Some 209 buildings on 419 acres house the College of Letters and Science plus 13 professional schools and serve over 34,670 students. Another major period of campus development is currently under way which will provide needed additional space for engineering, chemistry, law, management, and medical center programs, as well as the new Fowler Museum of Cultural History building and increased student housing and parking space on the northwest campus. UCLA's top administrative officer is Chancellor Charles E. Young who has just celebrated the twenty-first anniversary of his appointment to that position.

The Setting

UCLA is cradled in rolling green hills just five miles inland from the ocean, in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and at its southern gate by Westwood Village. Originally envisioned as a business district to serve UCLA, this picturesque little college town has mushroomed into an entertainment magnet for the entire Los Angeles area.

The cultural treasures of the Los Angeles County Museum of Art are a few miles to the east as are other museums, the community of Beverly Hills, the Music Center, and the downtown business area. Beyond that the deserts, snowcapped mountains, and ski resorts are little more than an hour's drive.

The Ambience

The stately Tudor Gothic and Italian Romanesque architecture of UCLA's early buildings blends with the contemporary and modern design of the newer structures. Royce Hall, one of the original four buildings, remains the campus symbol. Contrasting campus moods range from the activity of Bruin Walk to the serenity of the Japanese Garden. Attend a rock concert on the lawn, or a classical recital in Schoenberg Hall. Contemplate a Rodin or a Lachaise in the Sculpture Garden, or participate in a political rally in Meyerhoff Park.

UCLA is a place of surprises. A unique inverted fountain, where water flows over river rocks, recalls the Yellowstone creeks that inspired it. Enter the Bunche Hall Annex and discover a glorious atrium where palms and ferns glisten in filtered sunlight. Step inside the courtyard of Macgowan Hall and come face to face with the impressive stone Tower of Masks, created by the noted sculptress Anna Mahler.

UCLA is a place for serious study in a vibrant, dynamic atmosphere. You must visit the campus to appreciate it. The Visitors Center, located in 1417 Ueberroth Building (206-8147), has a reception area where visitors are met, welcomed, and assisted. The center arranges group or personal tours of the campus all year round and provides information on campus exhibits and recreation areas. The Office of Undergraduate Admissions and Relations with Schools (825-8764) conducts tours for prospective undergraduates.

The Commitment to Research

UCLA is one of the outstanding "research universities" in the country. What does this mean to you as a student?

It means that the same faculty members teach both undergraduate and graduate courses and that these instructors create knowledge as well as transmit it. They spend a major portion of their time engaged in research in libraries and laboratories and out in the field.

At UCLA you are taught by the people making the discoveries, so you learn the latest findings on every front. You may exchange ideas with faculty members who are authorities in their fields, and even as undergraduates you are encouraged to participate in research to experience firsthand the discovery of new knowledge. This inseparable commitment to teaching and research is the hallmark of a research university.

The Question of Size

Although UCLA has a larger enrollment than other University of California campuses, it is small in comparison to some of the Midwestern universities. Its general campus population of some 30,935 students is equal to that at UC Berkeley, but the UCLA campus is enriched by an additional 3,735 men and women studying in its health sciences schools of Dentistry, Medicine, Nursing, and Public Health. UCLA makes the most of its size by offering an extraordinary breadth of high quality academic programs and a range of student opportunities available at few other universities in the country.

A major concern of the faculty and staff is to allow you, the student, to feel that you belong. UCLA provides orientation sessions and special academic assistance programs for new students, a staff of helpful advisers and counselors in every college/school and academic department, a myriad of student services, and unlimited opportunities for involvement and participation.

All UCLA students share the pride of attending one of the most prestigious educational institutions in the country. Beyond that, no one individual deals with the totality of UCLA. Campus life is made comfortable by interacting and identifying with only certain parts of the whole, whether they be your academic department, residence hall, fraternity or sorority, club or organization, or the spirit of Bruin victories on the athletic fields.

Many prospective students ask about the size of classes at UCLA. Standard instructional formats include lectures, discussion sections, seminars, and laboratory sessions. Although large lecture groups in some introductory courses are not unheard of, 96 percent of all lower division lecture classes in 1989-90 had fewer than 200 students, and the University is making every effort to further reduce class size. Students in most lecture classes also enroll in discussion sections of about 25 students, and seminars and laboratory classes usually have fewer than 20 students. There is an overall ratio of one faculty member for approximately 17 students.

Most UCLA faculty members take a genuine interest in their students. They set aside office hours for receiving students, and most appreciate the opportunity for informal conversation. Even professors who seem remote in the classroom may be just the opposite on a one-to-one basis. A brief discussion can benefit both student and instructor.
Professors are often aided, especially in the small discussion sections, by teaching assistants (TAs). These are graduate students who teach on a part-time basis while pursuing their degree. Many students find it helpful to talk to the TAs about academic problems.

Hallmarks of Excellence

Recent surveys indicate that in overall excellence, UCLA is one of America’s most prestigious and influential public universities. It is consistently rated among the best universities in the nation and is by far the youngest institution in this select group.

ACADEMICS — UCLA has one college and 13 professional schools. The College of Letters and Science offers programs leading to both undergraduate and graduate degrees, as do the School of the Arts, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. The other professional schools offer graduate programs exclusively: the Graduate School of Architecture and Urban Planning, Graduate School of Education, School of Law, Graduate School of Library and Information Science, John E. Anderson Graduate School of Management, School of Social Welfare and, in the health sciences, the Schools of Dentistry, Medicine, and Public Health.

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 106 different disciplines; graduate students may earn one of 81 master’s and 97 doctoral and professional degrees.

Academic programs undergo a continuing process of review and evaluation to maintain their excellence, and new programs are added as they are approved by The Regents. The College of Fine Arts, for example, has recently split into two professional schools — the School of the Arts and the School of Theater, Film, and Television. New degree programs this year include Master of Science and Ph.D. degrees in Environmental Health Sciences, Epidemiology, and Health Services. And the Departments of Astronomy and Physics have formed a new joint venture — the Astrophysics Program — to study the workings of stars and other heavenly bodies.

THE FACULTY — Of the many factors that go into the making of a great university, no single factor is as important as its faculty. UCLA’s distinguished faculty includes 1987 Nobel prizewinner Donald Cram, several John Simon Guggenheim fellows and Fulbright scholars, and many members of both the National Academy of Sciences and the American Academy of Arts and Sciences. In 1989-90 eight faculty members received Fulbright scholarships to conduct research, lecture, and consult abroad and two UCLA scientists and scholars were awarded Guggenheim fellowships. With an additional three Sloan Research fellows and one National Science Foundation award winner, UCLA placed among the leading universities nationwide in the number of these prestigious awards.

In a recent survey the Conference Board of Associated Research Councils evaluated the quality of the faculty in more than 150 American research universities. UCLA was judged second in the nation among public universities, and among the most highly rated overall. Of the 32 disciplines studied, 17 of UCLA’s academic departments were ranked among the top 10 in the country.

RESEARCH — UCLA is among the six leading research universities in the country, receiving a record $253 million in 1988-89 in extramural grants and contracts to support its research activities. The University hosts several hundred postdoctoral scholars each year who share its excellent research facilities. Its laboratories have seen major breakthroughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in a myriad of vital areas continue to improve the quality of life for people around the world.

TEACHING — Although all UCLA faculty members engage in research and the discovery of new knowledge, they are equally dedicated to disseminating their findings in the classroom. Indeed, excellence in teaching is one of the main criteria for faculty promotion, and distinguished teaching awards are among those most highly prized by UCLA professors.

STUDENT BODY — The university has no higher priority than to advance the ethnic diversity of its students, faculty, staff, and administrators. The diversity of UCLA’s student population — nearly equally divided between men and women — yields the wide range of opinion and perspective essential to a great university. Although most students are from California, they come from all 50 states and more than 100 foreign countries to study at UCLA. The University now enrolls the most ethnically and culturally diverse undergraduate student population — both in total students and as a percentage of enrollment — of any major university in the U.S. Ethnic minorities comprise one half of the undergraduates and 30 percent of the graduate student population. And international students and scholars presently number over 5,700, making this one of the most popular American universities for students from abroad.

NUMEROUS OTHER FACTORS — With nearly six million volumes, UCLA’s library is rated among the finest in the country. Its athletic teams have made the University an acknowledged leader in intercollegiate sports. Its Center for the Performing Arts ranks as the largest, most diversified and comprehensive program of its kind in the country.

The University played a significant role in the 1984 Summer Olympics in Los Angeles, with a 4,000-athlete Olympic Village, all gymnastics and tennis events, the drug-testing laboratory, and most theatrical events of the Olympic Arts Festival on its campus. It was also the site of several major policy addresses and of the final Bush-Dukakis debate during the 1988 Presidential election campaign.

All these factors plus its research facilities, its community service, and its international links with all parts of the world make UCLA today a very special kind of institution.
The University of California traces its origins to 1868, when Governor Henry H. Haight signed the Organic Act providing that California’s first “complete University” be created.

Classes began the following year at the College of California in Oakland. The first buildings on the Berkeley campus were completed in 1873, and the University moved into its new home. The following June, the University of California conferred bachelor’s degrees on 12 graduates.

Today the University is one of the largest and most renowned centers of higher education in the world. Its nine campuses span the state, from Davis in the north to San Diego in the south. In between are Berkeley, San Francisco, Santa Cruz, Santa Barbara, Riverside, Irvine and, of course, Los Angeles.

All the campuses adhere to the same admission guidelines and high academic standards, yet each has its own distinct character, atmosphere, and — to some degree — academic individuality. Riverside, for example, excels in the plant sciences and entomology; Davis has a large agricultural school and offers the University’s only veterinary medicine program; San Diego has excellent oceanography and marine biology programs; San Francisco is devoted exclusively to the health sciences. Among the campuses there are five medical schools and three law schools, as well as schools of architecture, business administration, education, engineering, and many others.

The UC campuses have a combined enrollment exceeding 164,000 students, 91 percent of them California residents. About one fifth study at the graduate level. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the nation. The collections of over 100 UC libraries on the nine campuses are surpassed in size on the American continent only by the Library of Congress collection.

The faculty of the University of California is internationally known for its distinguished academic achievements. On its nine campuses the University has 20 Nobel laureates, and membership in the National Academy of Sciences is the largest of any university in the country.

University Administration

The University of California system is governed by a Board of Regents whose regular members are appointed by the Governor of California. In addition to setting broad general policy and making budgetary decisions for the UC system, The Regents appoint the President of the University, the nine chancellors, and the directors, provosts, and deans who administer the affairs of the individual campuses and divisions of the University.

The Regents delegate authority in academic matters to the Academic Senate, which determines academic policy for the University as a whole. The Senate, composed of faculty members and certain administrative officers, determines the conditions for admission and granting of degrees, authorizes and supervises courses and curricula, and advises University administrators on budgets and faculty appointments and promotions. Individual divisions of the Universitywide Academic Senate determine academic policy for each campus. Students participate in policy-making at both campuswide and systemwide levels.
Academic Resources and Programs

Research: The Discovery of Knowledge

As one of the largest research universities in the world, UCLA is renowned for its programs of faculty and student research; more than 5,000 funded programs are in progress at a given time. One focus of these efforts is a group of "organized research units" (ORUs) which provide an interdisciplinary approach to the search for knowledge.

ORUs are study centers and research institutes consisting of faculty and students from various departments engaged in continuing research of particular subjects. They do not offer courses of instruction or degrees, although several work in conjunction with interdepartmental instruction programs which lead to bachelor's and/or advanced degrees. ORUs provide invaluable experience for students and faculty in basic and applied research and greatly enhance UCLA's educational program and the overall academic quality of the University.

In the overview which follows, UCLA's 24 organized research units are listed within five major divisions—health sciences, life sciences, physical sciences and engineering, social sciences, and arts and humanities. Within each division, representative groups and programs are included which, although not formally established as ORUs, are nevertheless doing important research in their respective areas.

Health Sciences

The LABORATORY OF BIOMEDICAL AND ENVIRONMENTAL SCIENCES, located in Warren Hall (900 Veteran Avenue, 825-9431) and the Center for the Health Sciences, is funded through a contract with the Department of Energy. Research is conducted in biomolecular and cellular science, environmental biology, and nuclear medicine. Laboratory faculty members have joint appointments in academic departments and teach at both undergraduate and graduate levels. Major facilities include a medical cyclotron, advanced scanning equipment, a cobalt radiation facility, environmentally controlled growth chambers, a vivarium, and a spectrographic analytical laboratory.

The BRAIN RESEARCH INSTITUTE, center of neuroscience research at UCLA, has the largest investigative program of its kind in the country, with more than 140 scientists working on problems ranging from the nerve cell to human behavior. The institute provides an environment for specific multidisciplinary research and training in the structure and function of the central nervous system. The Office of the Director is located in 73-369 BRI (825-5061).

The DENTAL RESEARCH INSTITUTE, with principal laboratories on the seventh floor of the School of Dentistry, fosters research related to oral health. Areas of investigation include biomaterials, clinical studies, craniofacial biology, immunology/immunogenetics, oral neurology/pain, periodontology, and ultrastructure/cell biology. The Office of the Director is located in 73-029 Center for the Health Sciences (206-8045).

The MENTAL RETARDATION RESEARCH CENTER, located on the fourth through eighth floors of the Neuropsychiatric Institute and Hospital, provides laboratories and clinical facilities for research and training in mental retardation and related aspects of human development. Its interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases. Administrative offices are located in 58-258 PI&H (825-0313).

The JULES STEIN EYE INSTITUTE is one of the best equipped centers for research and treatment of eye diseases anywhere in the world. This comprehensive facility, located in the Center for the Health Sciences (825-5053), is devoted to the study of vision, the care of patients with eye disease, and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided. A recently completed expansion facility, the Doris Stein Eye Research Center, houses new research and training programs concentrating on major eye diseases worldwide.

In the health sciences, research carried out in ORUs is complemented by research on neurological and neuromuscular diseases in the Lewis Neurovascular Research Center, the Reed Neurological Research Center, and the Neuropsychiatric Institute and Hospital. The Jonsson Comprehensive Cancer Center, one of 20 comprehensive centers in the nation, is renowned for the breadth and excellence of its cancer research. The Center for Ulcer Research and Education is a federally funded center doing basic and applied research on the origin and treatment of ulcers. And of course, UCLA is deeply involved in all aspects of the fight against AIDS, with basic research in epidemiology, immunology, and the clinical management of AIDS patients being done in the AIDS Clinical Research Center.

Life Sciences

The MOLECULAR BIOLOGY INSTITUTE provides research and training resources in molecular biology for faculty from the College of Letters and Science and the School of Medicine, and includes the Parvin Cancer Research Laboratories. Administrative offices are located in 168 MBI (825-1018).

The CENTER FOR THE STUDY OF WOMEN, located in 236A Kinsey Hall (825-0590), coordinates and disseminates interdisciplinary research on women, focusing on three programmatic areas: women, work, and the economy; women, language, and the arts; and women, science, and health. The center promotes innovative research by sponsoring conferences, publications, programs for affiliated and visiting scholars, a Directory of UCLA Scholars, an ongoing faculty research seminar, and a public lecture series on Women, Culture, and Society. In collaboration with other UC campuses, women's studies programs, and community groups, the center seeks to address public policies affecting women's lives.

The Fernald Child Study Center is a life sciences interdisciplinary research unit created to study and treat a variety of childhood behavioral problems and learning disorders. And the Center for the Study of Evolution and the Origin of Life melds the diverse research of more than 100 UCLA faculty in the study of the emergence and evolution of life on Earth.

Physical Sciences and Engineering

The CRUMP INSTITUTE FOR MEDICAL ENGINEERING brings together physical, chemical, and biological scientists and students to develop and apply novel technologies to the study of biological systems, ranging from isolated biochemical systems to humans. A major focus is the development and use of imaging technologies to collect, analyze, and communicate biological data, as well as to construct concepts, models, and theories of the structure and function of biological systems. Imaging
technologies encompass such areas as immunocytochemistry, fluorescence and electron microscopy, autoradiography, nuclear magnetic resonance imaging and spectroscopy, positron emission tomography (PET), and computed tomography. Ph.D. degree-granting programs exist through affiliations with various departments throughout the campus, as well as a graduate program within the institute. Dr. Michael E. Phelps is the director (825-6539).

The INSTITUTE OF GEOPHYSICS AND PLANETARY PHYSICS (IGPP) is a multicampus research unit (MRU) of the University of California; the branch at UCLA is engaged in research in geophysics, geochemistry, space physics, biochemistry, and biology, including the nature of the Earth, moon, and other planetary bodies, the origin of terrestrial life, the dynamical properties of the sun and solar wind, and the evolution of stellar interiors. Facilities include analytical laboratories in meteoritics, glaciology, petrology, geochronology, archaeology, and the origins of life, laboratories for experiments in fluid dynamics and high-pressure physics, developmental laboratories for instrumentation in space physics and seismology, and computational laboratories for large-scale, numerical modeling relevant to the above topics. The UCLA branch office is located in 3839 Slichter Hall (825-1664).

The INSTITUTE OF PLASMA AND FUSION RESEARCH, an ORU formed by The Regents in early 1987 and located in 6291 Boelter Hall (825-1613), is dedicated to research into plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, professional research staff, and faculty study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering and nuclear technology, computer simulations and the theory of plasmas, space plasma physics and experimental simulation of space plasma phenomena, advanced plasma diagnostic development, laser-plasma interactions, and the use of plasma in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings.

The WHITE MOUNTAIN RESEARCH STATION is a multicampus research unit (MRU) dedicated to high-altitude research. Four separate laboratory sites near Bishop, California, ranging up to 14,250 feet above sea level, include the highest permanent teaching and research facilities in North America. Research includes studies in archaeology and the biological, medical, and physical sciences. The administrative office is located in 6713 Geology (825-2093).

Among other interdisciplinary activities in the physical sciences and engineering at UCLA, the Engineering Research Center for Hazardous Substances Control is researching ways to reduce the volume and toxicity of hazardous wastes and dispose of the remainder in a safe manner. On other frontiers, an Artificial Intelligence Laboratory designed exclusively for research in this burgeoning field has opened under the wing of the Computer Science Department, and a Manufacturing and Automation Research Center, funded by the National Science Foundation, is to be operated jointly by UCLA’s School of Engineering and Applied Science and the University of Southern California (USC).

Social Sciences

The OFFICE OF INTERNATIONAL STUDIES AND OVERSEAS PROGRAMS (ISOP) supports and coordinates international and foreign area studies at UCLA. Among the area studies centers and programs that operate under its aegis are four major interdisciplinary research centers that rank among the best in the nation. Some of the world’s leading specialists on area studies have joined these centers.

The Coleman African Studies Center (10244 Bunche Hall, 825-3686) is the major interdisciplinary center for African studies in the Western U.S. It furthers research on Africa in the humanities and social sciences, as well as in the professional schools of Architecture and Urban Planning, Education, Law, Management, Medicine, Public Health, and Theater, Film, and Television. The center also sponsors public lectures, seminars, and academic and exchange programs and encourages the teaching of African topics at the graduate and undergraduate levels.

The Latin American Center (10343 Bunche Hall, 825-4571) encourages and coordinates interdisciplinary research, academic programs, and publications. By linking campus activities with developments in the field and in other institutional settings, the center benefits UCLA, the broader community of Latin Americanists, and the general public.

The von Grunebaum Center for Near Eastern Studies (10266 Bunche Hall, 825-1181) coordinates research projects related to the Near East and administers the interdisciplinary programs leading to the M.A. and Ph.D. degrees in Islamic Studies. The combined resources of the center include the largest faculty, one of the most comprehensive library holdings, and the richest variety of Near and Middle Eastern studies courses of any institution in the Western Hemisphere. The center also conducts significant publication and outreach programs.

The Center for Russian and East European Studies (11369 Bunche Hall, 825-4060) develops and coordinates teaching and research on Russia and the countries of Eastern Europe through conferences, lectures, seminars, and academic exchange programs with Russian and Eastern European universities.

ISOP also supports other interdisciplinary activities such as the study of arms control, nuclear proliferation, and international security in the Center for International and Strategic Affairs. The Center for Pacific Rim Studies promotes research, course offerings, seminars, and faculty and student exchange programs on the people and nations bordering the Pacific Ocean; the Center for Chinese Studies has developed a major graduate program in Chinese studies, as well as significant research on historical and social science topics; and an NDEA Joint Center in East Asian Studies with the University of Southern California sponsors joint seminars and conferences focused on the East Asian region. Other ISOP programs focus on Japan, Mexico, development studies, political economy, and South and Southeast Asia.
The INSTITUTE OF AMERICAN CULTURES promotes the activities of four major ethnic centers whose goals are to study and illuminate the histories of our country's minorities, and to apply the University's capabilities to the analysis and solution of specific minority problems. These centers promote faculty research, encourage the development of new courses and degree programs, assist departments in recruiting scholars, build library and other resources, and publish literature to disseminate the results of their work.

The Center for Afro-American Studies (160 Haines Hall, 825-7403) conducts and sponsors research on the African American experience, coordinates the Afro-American Studies curriculum, publishes research results, and sponsors community service programming.

The American Indian Studies Center (3220 Campbell Hall, 825-7315) is one of the largest centers of its kind in the country. It serves as an educational and research catalyst and includes a library, master's and postdoctoral fellowship programs, and a publishing unit that produces a number of books and a quarterly journal.

The Asian American Studies Center (3232 Campbell Hall, 825-2974) seeks to increase the knowledge and understanding of the experiences of Asian Pacific peoples in America and promotes the development of material resources related to Asian American studies.

The Chicano Studies Research Center (180 Haines Hall, 825-2363) facilitates interdisciplinary academic research related to the Chicano experience. The center has research and academic programs and maintains a publications unit and research library that are considered leading contributors to Chicano studies nationally.

The INSTITUTE OF ARCHAEOLOGY, located in A210 Fowler Building (206-8934), develops and coordinates research on Southern California archaeology and publishes the ISSR Quarterly, a newsletter for the UCLA social sciences community, and ISSR Working Papers in the Social Sciences; it is located in 9240 Bunche Hall (825-0711).

Other interdisciplinary activities in the social sciences include the nationally respected Business Forecasting Project in UCLA's John E. Anderson Graduate School of Management and the Center for the Study of Evaluation in the Graduate School of Education which is at the forefront of efforts to improve the quality of schooling in America. In addition, the Center on the Teaching and Learning of History in Elementary and Secondary Schools, established by the National Endowment for the Humanities and based at the UCLA education school, is bringing K-12 teachers and social studies professors from throughout the country together in an effort to improve history teaching. And a new interdisciplinary unit, the Center for the Study of Urban Poverty, is bringing together faculty with expertise in urban poverty and social welfare policy analysis and evaluation. Housed in the Institute for Social Science Research, the center will initiate new research on issues related to urban poverty and is sponsoring seminars in the field.

Arts and Humanities

The CENTER FOR THE STUDY OF COMPARATIVE FOLKLORE AND MYTHOLOGY, located in 1037 AGSM (825-4242), supports and coordinates the study of comparative folklore and mythology. Resources include the Wayland D. Hand Library, the Visual Media and Folk Medicine Archives, the Archive of California and Western Folklore, the American Popular Beliefs and Superstitions Archive and Encyclopedia Project, the D.K. Wilgus Archive of Folk Song and Music, and other collections of field recordings, records, and films.

The CENTER FOR MEDIEVAL AND RENAISSANCE STUDIES supports the research activities of some 20 academic departments dealing with the development of civilization between A.D. 300 and 1650. Major programs include funding research assistants, appointing postdoctoral associates and visiting professors, organizing conferences and colloquia, and supporting departments in inviting lecturers. The center also sponsors the publication of research both in book-length studies and in two journals, Viator, with emphasis on intercultural and interdisciplinary studies, and Comitatus, with articles by graduate students and recent Ph.D. graduates. The center is located in 212 Royce Hall (825-1880, 825-1970).

The CENTER FOR SEVENTEENTH- AND EIGHTEENTH-CENTURY STUDIES, located in Suite 1548 at 1100 Glendon Avenue (206-8552), coordinates research activities and academic programs in the early modern period. It is closely related to UCLA’s Clark Memorial Library and sponsors programs at the Clark. Center activities include appointing postdoctoral fellows and visiting professors, organizing conferences and colloquia, and sponsoring publications.

In other research activities, the Center for Bilingual Research and Second Language Education is working to produce a society that is proficient in at least two languages. In the Linguistics Phonetics Lab, one of the best-known laboratories of its kind in the nation, researchers are finding new ways to analyze speech functions and make voiceprints for use in law enforcement. And the University has established the Hammer Center for Leonardo Studies and Research where scholars have access to major resources for the study of the works of Leonardo da Vinci.

Resources for Research and Study

University Library System

Library facilities are crucial to both study and research. The University Library on the UCLA campus is one of the country's largest and most renowned academic libraries. The 19-branch system consists of the University Research Library, the College Library, and 17 specialized subject libraries. Collectively they contain nearly six million volumes and extensive holdings of government publications, pamphlets, manuscripts, maps, microforms, music scores, recordings, photographs, and slides. They regularly receive over 93,500 serial publications.
ORION, the library's on-line information system, provides location and holdings information for materials acquired or cataloged since 1977, an increasing percentage of older materials, and current information for materials on order or in processing. On-line circulation status information for some libraries is also available. ORION public access terminals are located in most campus libraries, and demonstrations and workshops in using the system are available at the beginning of each term. The main card catalog in the University Research Library lists older holdings in all campus libraries.

Students have access to the stacks in most libraries. A handbook describing the organization, services, and hours of the University libraries is available in all of the campus branches.

University Research Library

The University Research Library on north campus is a modern six-story building designed primarily as a graduate research library serving the social sciences and humanities. The building houses over three million volumes arranged in open stacks, as well as the Reference Room, Circulation Department, Graduate Reserve Service, Periodicals Room, and Audiovisual Service. The Microform Reading Service, with some 1,110,000 microcopies of newspapers, books, and periodicals, has a variety of reading and copying equipment. During academic sessions library hours are weekdays 8 a.m. to 11 p.m. (6 p.m. Friday), Saturday 9 a.m. to 5 p.m., Sunday 1 to 10 p.m.

The Department of Special Collections in the Research Library contains rare books and pamphlets, the University Archives, early maps, and files of early California newspapers. Manuscript collections include the literary papers of Henry Miller and Anais Nin, as well as the private papers of Jack Benny, Charles Laughton, Carey McWilliams, King Vidor, and Nobel Peace Prize winner Dr. Ralph J. Bunche, a UCLA alumnus. Other significant holdings include the Sadleir Collection of nineteenth-century fiction, generally regarded as the finest of its kind, and the Ahmanson-Murphy Collection of Early Italian Printing (1471-1550), with a concentration on Aldine imprints. The department also houses UCLA's Oral History Program, a national leader in the field with over 400 interviews with prominent individuals since the program was founded in 1959.

The Public Affairs Service, also housed in the Research Library, collects official publications of the U.S. government, the State of California, California counties and cities, selected U.S. state and local governments, foreign nations and selected foreign states and provinces, plus those of the United Nations and some of its specialized agencies and a number of other international organizations. Also housed are current English-language, nongovernmental pamphlets on public affairs representing a wide spectrum of political and social opinion, with strong emphasis on social welfare, economic, social, and political conditions, and industrial relations.

College Library

The College Library, located in the Powell Library Building, is designed to meet the basic study needs of most undergraduates. Its 276,000 books and periodicals are maintained in open stacks, with course reserve materials, lecture notes, past examinations, and APS (Academic Publishing Service) readings available for loan. During academic sessions library hours are weekdays 8 a.m. to 10 p.m. (5 p.m. Friday), Saturday 10 a.m. to 6 p.m., Sunday noon to 9 p.m. The Powell Library reading rooms are open daily until midnight. The Reprographic Service office, housed in the Powell Library Building, can duplicate books, periodicals, manuscripts, and maps.

Specialized Subject Libraries

The resources of the specialized campus libraries are devoted mainly to subjects of concern to the departments or professional schools which they serve, but their materials are available to all UCLA students and faculty. A recorded message (825-8301) provides current hours of service for each library.

The Architecture and Urban Planning Library includes materials treating architecture, building technology, city and regional planning, and selected environmental topics. The Art Library supports the art, art history, and design programs. For those interested in the Italian Renaissance, one of the greatest research centers in the world for the study of Leonardo da Vinci is the Bell Library of Vinciana, part of the Art Library.

The Louise Darling Biomedical Library, in the Center for the Health Sciences, is one of the finest libraries of its kind in the country. Its 471,000 volumes and over 6,000 serial subscriptions serve all the UCLA health and life sciences schools and the UCLA Medical Center.

The Chemistry Library includes material on chemistry, biochemistry, and molecular biology, while education, psychology, and teaching English as a second language are the principal subjects covered by the Education and Psychology Library. Materials for engineering, astronomy, computer science, meteorology, and mathematics are kept in the Engineering and Mathematical Sciences Library. The English Reading Room mainly duplicates the Research Library's holdings in English and American literature, and major subjects covered by the Geology-Geophysics Library include geoscience, invertebrate paleontology, planetary and space science, and hydrology.

The Law Library has a substantial collection of over 350,000 volumes selected to further the course of instruction in the School of Law and the legal research needs of the UCLA community, and the Management Library serves the John E. Anderson Graduate School of Management and the various subjects related to business and management.

The Bruman Map Library in Bunche Hall houses maps, city plans, nautical charts, and technical books and serials on all aspects of cartography and is one of the largest of its kind in the U.S. The Music Library houses historical musicology and ethnomusicology materials, musical scores, recordings, and the personal collections of such composers as Henry Mancini, Alex North, and Ernst Toch. Materials in Chinese, Japanese, and Korean are available in the Rudolph Oriental Library, and the Physics Library covers all aspects of that science, including acoustics and spectroscopy.

The Theater Arts Library is the home of many prestigious collections which have been donated to UCLA, such as those of Charlton Heston, Rosalind Russell, director William Wyler, and animator Walter Lantz. The collections include original scripts, contracts, correspondence, shooting diaries, and much more. The University Elementary School Library contains contemporary materials for children from kindergarten through junior high school age.

Supplementing the University Library is the Clark Memorial Library, with its collection of some 84,700 volumes and 18,800 manuscripts related to English culture of the seventeenth and eighteenth centuries. Its John Dryden collection is among the most complete in the world. The library, located approximately 10 miles from the UCLA campus, contains noncirculating materials. Leaflets describing the Clark Library and information about University transportation to it are available at the Reference Desk in the Research Library.

Special Archive Collections

The UCLA FILM AND TELEVISION ARCHIVE is a living resource equally respected by industry and scholars. Students and faculty from a wide range of disciplines — from the arts to the social sciences to the humanities — use the archive's extensive collections to expand their knowledge and understanding of moving image media, cultural history, and the social and political life of the twentieth century. Access to the archive is through the Archive Research and Study Center located in 46 Powell Library (206-5368).

The Motion Picture Collection, with more than 37,000 films, is the country's largest collection west of the Library of Congress. Among its outstanding collections are 27 million feet of Hearst Metrotone News film
dating back to 1919. Other noteworthy holdings include studio print libraries from Twentieth Century-Fox, Paramount Pictures, Warner Brothers, Columbia Studios, New World Pictures, Universal Studios, and Orion. Special collections document the careers of William Wyler, Hal Ashby, Tony Curtis, Rosalind Russell, Stanley Kramer, Cecil B. DeMille, Harold Lloyd, and other persons of prominence in the American film industry.

The Television Collection, operated jointly by the Academy of Television Arts and Sciences and UCLA, is the nation’s largest university-based collection of television broadcast materials. Its 25,000 titles include kinescopes, telefilms, and videotapes spanning television history from 1947 to the present, with emphasis on drama, comedy, and variety programming. A special collection of nearly 100,000 news and public affairs programs is also maintained.

Other archive collections include the Collection of Television Technology and Design, with over 300 historical television cameras and receivers dating from the 1930s, and a Radio Study Collection. Radio holdings include programs featuring Jack Benny, Bing Crosby, and Edward R. Murrow, as well as episodes from the Screen Directors Playhouse and Hallmark Hall of Fame series.

Art Galleries and Museums

A tour of all the UCLA museums and art galleries will take you from one corner of campus to the other. In the course of three decades UCLA’s WIGHT ART GALLERY COMPLEX has evolved into a multifaceted museum, responsive to the needs of the University and the general public. The complex includes the Wight exhibition galleries, with 14,000 square feet of exhibition space in which to mount approximately 12 exhibitions per year, the Grunwald Center for the Graphic Arts, and the Murphy Sculpture Garden.

Located in the Dickson Art Center on north campus, the Wight Art Gallery is open Tuesday 11 a.m. to 8 p.m., Wednesday through Friday 11 a.m. to 5 p.m., Saturday and Sunday 11 a.m. to 5 p.m. (closed Monday, major holidays, and July and August). Admission is free. Daily tours are offered by the UCLA Art Council docents; special group tours may be arranged by calling 825-3264. The administrative office is located in 1100 Dickson Art Center. For a schedule of exhibitions, call 825-9345.

On the second floor of the Wight Art Gallery is the GRUNWALD CENTER FOR THE GRAPHIC ARTS, which houses a distinguished collection of over 35,000 prints, drawings, and photographs. Maintained as a study and research facility for the benefit of students and the community, the center’s permanent holdings include significant European and American examples from the thirteenth century to the present. It is particularly noted for its collection of German expressionist prints formed by Fred Grunwald and the comprehensive holdings of Matisse and Picasso, as well as the Richard Vogler Cruikshank collection and the Frank Lloyd Wright collection of Japanese prints. The center, located in 2122 Dickson Art Center (825-3783), is open by appointment Monday through Friday from 9 a.m. to 5 p.m.

The Murphy Sculpture Garden, located between Bunche Hall and the Wight Art Gallery, contains a collection of over 70 major works by Rodin, Matisse, Calder, Lachaise, Lipchitz, Moore, Miro, Hepworth, and many other late nineteenth- and early twentieth-century masters. All works in the growing collection, situated on a picturesque five-acre expanse, are private gifts to the University.

The FOWLER MUSEUM OF CULTURAL HISTORY is internationally known for the quality of its collections and exhibits. Its collections encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Oceania, and Latin America. The museum offers assistance with instruction and research and sponsors major exhibitions, lecture programs, and symposia. Administrative offices are located in 211 Fowler Building (825-4361).

Other Resources

The OFFICE OF ACADEMIC COMPUTING (OAC), with administrative offices in 4302 Math Sciences, provides centralized computing facilities as well as network and microcomputing support services for the UCLA academic community. OAC offers a broad range of services, including operation of an IBM 3090-600J supercomputer with six vector facilities; maintenance of public computing facilities; instruction in the use of computer hardware and software through free noncredit classes; professional consulting services; the publication of newsletters and user documentation; and assistance to individuals and departments in the selection of microcomputer and workstation hardware and software and computing assistance to faculty, staff, and students with disabilities through the Microcomputer Support Office (MSO).

OAC’s IBM 3090 runs the MVS/ESA and VM/XA-SP operating systems and is available to all colleges, schools, and departments within UCLA, as well as to all registered students. OAC maintains a large library of applications software, including statistical, text processing, language, and graphics packages. The 3090, together with its vector facilities, is particularly appropriate for numerically intensive computing and data management tasks. In the numerically intensive computing area, OAC provides a code clinic with professional consultants to analyze and improve the efficiency of specialized code in numerically intensive computing applications. In the graphics/visualization area, OAC consultants work with users in producing the high-quality graphic output necessary for research in many scientific disciplines. OAC is connected to the campus backbone network, thus enabling access to its services wherever there is a connection to the network throughout the campus. These services include access to ORION, the UCLA on-line library information system; use of BEN, an electronic communication system; access to the Internet and BITNET; and a direct link to the San Diego Supercomputer Center and NSFnet.

The MICROCOMPUTER SUPPORT OFFICE (2035 AGSM, 825-8183 for technical questions, 825-7408 for administrative questions) provides services supporting the use of microcomputers and advanced workstations, as well as special services in computing for faculty, students, and staff with disabilities. MSO services are intended to support the integration of microcomputers and advanced workstations into administrative, instructional, and research programs as well as individual microcomputer acquisition and use. Most services are available through the Microcomputer Information Center where the UCLA community can try out hardware and software in a nonbiased environment.

To arrange for use of the IBM 3090, apply in the OAC User Relations Office (4302 Math Sciences, 825-7548) weekdays from 8 a.m. to 5 p.m.
The DIVISION OF LABORATORY ANIMAL MEDICINE, located in 1V-211 CHS (825-7281), is responsible for the procurement, husbandry, and general welfare of animals required for teaching and investigative services. It also administers the veterinary medical and husbandry programs throughout the campus.

The University of California NATURAL RESERVE SYSTEM offers 26 reserves statewide to be used for field studies in unspoiled natural sites and for protected scientific experiments. Several reserves are close enough to campus for daily access. For more information, contact Laurie Vitt, 109 Botany (825-1575).

The BIOLOGICAL COLLECTIONS of the Biology Department include marine fishes from the Eastern Pacific and Gulf of California, and birds and mammals primarily from the Western U.S., Mexico, and Central America. The department also maintains a more limited collection of amphibians, reptiles, and fossil vertebrates, as well as collections of algae, fungi, and bacteria. For more information, contact James North-ern, A339 Life Sciences (825-1282).

Although the UCLA campus as a whole has an attractive, park-like atmosphere, there are two distinctive garden areas worthy of special note. The eight-acre MATHIAS BOTANICAL GARDEN, located in the southeast corner of campus, contains some 4,000 species of native and exotic plants. It is used for botanical and ornithological teaching and research. This peaceful wooded area, a center for testing the usefulness of woody subtropical plants, is a favorite spot for quiet strolls. The botanical garden also has a research Herbarium containing 170,000 dried plant specimens. The administrative office is located in 124 Botany (825-3620).

The CARTER JAPANESE GARDEN in nearby Bel Air, designed and constructed by Japanese artisans and architects using native plants and artifacts, is an authentic Kyoto-style garden. The terraced two-acre garden contains such traditional and symbolic features as a teahouse, shrine, antique stone water basins, lanterns, waterfalls, and a pond with Japanese carp (koi) swimming among water lilies. The garden, a private gift to UCLA, is used by faculty and students for study and research, by departments for professional events, and by others seeking a serene setting for meditation and solitude. It is open to individual visitors and groups by reservation only. Hours are Tuesday 10 a.m. to 1 p.m. and Wednesday noon to 3 p.m. Friday is reserved for group visits. Call the Visitors Center at 206-8147.

Supplementary Educational Programs

In addition to the regular academic programs which are described in Chapters 5 through 18 of this catalog, the following optional programs are available to UCLA's undergraduate and graduate students.

Summer Sessions

UCLA offers more than 500 courses from approximately 50 UCLA departments in six-, eight-, nine-, and 10-week sessions. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year, repeat courses in which they may have done poorly, lighten their academic load for the following term, or complete graduation requirements more quickly.

Admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in Chapter 2 (undergraduate) or Chapter 3 (graduate).

If you are a regularly enrolled undergraduate student, you may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on your UCLA transcript, and grades earned are computed into your grade-point average. Check with your college or school counselor about the possibility of applying these courses toward minimum unit requirements and for any limitations the college or school may impose on Summer Sessions study.

If you are a regularly enrolled graduate student, you may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master's or doctoral degree; consult your graduate adviser in advance concerning this possibility. Summer Sessions courses may also satisfy the academic residence requirement for master's or doctoral degrees (see Chapter 3 for details).

Unlike enrollment in regular terms, you may attend another college institution for credit while you are enrolled in Summer Sessions. Applications and more information are available in 100 Dodd Hall (825-8355).

UCLA Extension

Serving approximately 100,000 adult students each year, UCLA Extension is one of the largest university continuing education programs in the world. It is designed to bring the benefits of the University — its scholars, research, and resources — to the community and the state as a whole.

Many of UCLA's 4,400 Extension classes are innovative and experimental in content, format, and teaching methods. Credit and noncredit courses are offered in nearly every academic discipline and in many interdisciplinary areas. Many noncredit Extension courses offer the opportunity to earn Continuing Education Units, widely used for relicensure and other professional/career-related purposes.

Although registering for Extension courses does not constitute admission to regular session, degree credit earned through Extension may apply toward the UCLA bachelor's or master's degree; consult your college or school counselor or graduate adviser before enrolling. For more information, see the sections on "Concurrent Enrollment and Transfer of Credit" and "Courses of Instruction" in Chapter 4. Graduate students should also see "Transfer of Credit" in Chapter 3.

The Extension Advisory Service offers assistance in planning long- or short-term study through Extension. The office is located in 114 UCLA Extension (UNEX), 10995 Le Conte Avenue (206-6201). To obtain the current UCLA Extension Catalog, call 825-8895. The Registration Office is open weekdays from 8 a.m. to 6 p.m. and until 5 p.m. on Friday (825-9971).

Education Abroad Program (EAP)

Each year more than 1,400 undergraduate and graduate students from UC campuses study at distinguished universities throughout the world. UCLA students remain registered here while overseas and receive UC units and grade points for work completed abroad. Currently, EAP offers study opportunities at more than 85 different universities in 33 countries: Australia, Austria, Brazil, Canada, China, Costa Rica, Denmark, Egypt, England, France, Germany, Ghana, Hong Kong, Hungary, India, Indonesia, Japan. Educati
asia, Ireland, Israel, Italy, Japan, Kenya, Korea, Mexico, New Zealand, Norway, Peru, Portugal, Scotland, Spain, Sweden, Taiwan, Thailand, and Togo. Participants generally spend a full academic year abroad, enjoying a unique opportunity to enhance language skills and become involved in the culture of the host country. One-term programs are available in China, Hungary, Korea, Mexico, and U.S.R. Summer programs are offered in Denmark, Indonesia, Mexico, Thailand, and Togo. In Costa Rica there is a year program, a one-term tropical biology field study, and programs for medical students. For all programs a special orientation program and, when necessary, intensive language training are included. During the year UC faculty members at the host university assist with scholastic or personal problems.

EAP is open to all undergraduate students who have (1) completed a minimum of 90 quarter units (junior standing) prior to departure, (2) at least a B average (3.0 GPA) overall at the time of application, and (3) the support of the UCLA EAP Selection Committee. Some programs have a language requirement as well.

Graduate students who have completed at least one year of graduate work and have the approval of their graduate adviser and the dean of the Graduate Division may participate at most study centers.

Costs for participation in EAP vary from $1,459 to $15,738, but University financial aid is available to those who qualify. Applications must be filed several months in advance. For more information, contact the EAP Office in 28 Haines Hall (825-4889, 825-4995).

**Education at Home Program**

Students interested in early American history and culture have the opportunity to spend Winter Quarter 1991 “on location” in three Eastern cities. The Education at Home Program, conducted through the UC Riverside campus, is open to graduate students (with prior approval of their adviser) and undergraduates from any campus in the UC system.

Those selected for participation spend nine weeks in Williamsburg, one in Philadelphia, and a concluding week in Washington, DC. Formal instruction consists of three American history courses (four units each) comprising classroom work and field trips to places of historical interest. An additional four units of independent study may be arranged. For further information, brochures, or applications, write to the Education at Home Program, Department of History, University of California, Riverside, CA 92521, or call Susan Braddock at (714) 787-3820.

**Interdisciplinary Colloquia**

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interests. They are open to all faculty members, interested undergraduates, and graduate students assigned to the colloquia by their advisers. Credit is not awarded directly but may be given through appropriate departmental courses. For information about the committees in charge of the colloquia, call the assistant to the provost of the College of Letters and Science at 825-4621.

The Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences provides a forum for interaction among faculty and students interested in the applications of mathematics and statistics to the behavioral sciences. Disciplines include anthropology, architecture, artificial intelligence, biology, business, computer science, economics, education, engineering, geography, linguistics, management, operations research, philosophy, political science, psychology, public health, public planning and policy, sociology, and systems analysis.

The colloquium sponsors presentations by leading experts in these fields, including faculty members from UCLA, other UC campuses, and other universities, and meets on alternate Fridays from 1 to 3 p.m. in 2270 AGSM during the academic year. Announcements of presentations, including abstracts of the papers to be presented, are circulated and posted on campus; announcements also appear in UCLA Today. For further information, contact the Western Management Science Institute at 825-1581.
Living Accommodations

Where you live while attending UCLA can play an important role in your total college experience. Nearly half of UCLA freshmen live on campus, but the majority of undergraduates commute. About 20 percent of the total student population lives at home.

There are many different housing options available, though the housing shortage on and near the UCLA campus means your first choice may not be available. You should therefore consider all housing options, decide early which one you plan to pursue, and apply for or follow up on them as soon as possible. If you plan to live off campus, arrive early to make your housing arrangements for the coming academic year. Some students even pay rent year-round to insure accommodations, and try to sublet during the summer months.

The UCLA Community Housing Office, 270 De Neve Drive, Los Angeles, CA 90024-1495, (213) 825-4491, provides information and current listings on University-owned apartments, cooperatives, private apartment rooms, roommates, rooms in private homes, room and board in exchange for work, and short-term housing. It also has bus schedules, area maps, neighborhood profiles, and a landlord-tenant counselor. A current Registration Card or letter of acceptance and a valid photo identification card are required for service.

The International Student Center on Hilgard Avenue helps international students find housing and may also provide temporary facilities until suitable permanent housing arrangements are made.

UCLA Housing Options and Opportunities: Information and Application, a booklet which covers housing options in much greater detail, is mailed to all students when they are accepted for admission (you may also request it prior to admission).

On-Campus Housing

On-campus housing can add an extra dimension of enjoyment and convenience to your UCLA experience; the demand, however, currently exceeds the space available. Four residence halls (Dykstra, Hedrick, Rieber, and Sproul Halls) and two residential suite complexes (Hitch and Saxon Residential Suites) accommodate nearly 4,000 undergraduates. There is one residence hall, Hershey Hall, which houses some 335 graduate students. Housing expansion is currently under way that will accommodate 1,256 additional students by spring 1992. All on-campus housing is coed and within walking distance to classrooms.

Residence hall rooms are shared by two or three students. Residential suites — shared by four or six students — consist of two bedrooms, a full bathroom, and a common living room. The residence hall cafeterias, which also accommodate students in the residential suites, serve 19 meals per week.

Applications for on-campus housing are contained in the UCLA Housing Options and Opportunities: Information and Application booklet, available at the UCLA On-Campus Housing Assignment Office, 270 De Neve Drive, Los Angeles, CA 90024-1381, (213) 825-4271. Assignments to the halls and suites are made annually through a housing lottery. In order to be eligible for the lottery, your completed application must be postmarked by the following deadlines:

- March 19 (May 21 for graduate students) for Fall Quarter 1990
- October 29 for Winter Quarter 1991
- January 28 for Spring Quarter 1991
- March 18, 1991 (May 20 for graduate students) for Fall Quarter 1991

Following each of these dates, the lottery will be held to determine the order in which students will be offered housing. The full cost per student for the 1990-91 academic year (Fall, Winter, and Spring Quarters, excluding vacation periods) is $4,250 (triples) or $4,850 (doubles) for residence halls and $5,025 (six persons) or $5,625 (four persons) for suites, plus a $21.45 membership fee in the On-Campus Housing Student Association.

The Office of Residential Life, in the Residential Life Building next to Sproul Hall (825-3401), is responsible for the conduct of students in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems. The office is also a designated campus Harassment Information Center available to all UCLA students (see “Harassment” in the Appendix for more information).

Family Student Housing

UCLA maintains nearly 900 off-campus apartments about five miles from campus for married and single-parent students. Unfurnished one-, two-, and three-bedroom units are available. Rentals for 1990-91, excluding utilities, are expected to range from $443 to $983 per month. Since waiting lists for family student housing are long, do not wait until you have been accepted to UCLA to apply. Verification of marriage and/or copies of children’s birth certificates must accompany your application. Call the Family Student Housing Office at (213) 391-0686 for up-to-date information.

University-Owned Apartments

Over 600 shared apartments for single students in four off-campus facilities are maintained by the University; all are located within walking distance of campus. Rental rates vary depending on the location and size of the apartment. An application is included in the UCLA Housing Options and Opportunities: Information and Application booklet, available at the UCLA On-Campus Housing Assignment Office. Applications received by the deadline are assigned random numbers to determine the order in which applicants will be offered available vacant apartments. This lottery is separate from that of the residence halls and suites. You may apply simultaneously to both lotteries (using the separate application forms). The University apartment lottery is held once a year in spring; the 1991-92 application deadline is April 22, 1991 (deadline for 1990-91 applications was April 23, 1990). Roommate vacancies in University apartments are routinely posted in the UCLA Community Housing Office.

Cooperatives

Cooperatives provide an atmosphere similar to residence halls except that you must work three to four hours per week as partial payment for room and board. There are five cooperatives within walking distance of campus. Room and board rates for 1989-90 varied between $550 and $1,200 per quarter. Cooperatives normally have long waiting lists, so apply early. For applications and specific information, write directly to each cooperative. Addresses are available from the UCLA Community Housing Office.

Fraternities and Sororities

Many of the 55 fraternities and sororities at UCLA own chapter houses on the west and east sides of campus respectively. For sororities, you must be a member to live in the house and generally will be able to move in after your first year of active membership. For fraternities, living in the
house depends on the number of housing spaces available. Room, board, and dues are about the same as the monthly residence hall fee. During the summer break, most fraternities with chapter houses lease rooms to students, Greek or not (check listings at the UCLA Community Housing Office). For more information, contact the Office of Fraternity and Sorority Relations, 118 Men’s Gym (825-6322).

Apartments

If you would like to rent an apartment off campus, you must carefully consider the kind of living arrangements you can afford. Your financial situation may dictate how close you live to UCLA and whether you can live alone or must share an apartment. Apartments within three miles of UCLA (Westwood, West Los Angeles, parts of Brentwood and Santa Monica) average $600 per month for single units and $790 for one-bedroom units. Apartments more than four miles away (Palms, Mar Vista, Culver City) usually cost $100 to $150 less. Because they change daily, listings cannot be mailed or given over the phone; they are posted in the UCLA Community Housing Office. A roommate share board is also available.

Short-Term Housing

If you need temporary quarters until you find something permanent, there are several hotels and motels within five miles of campus with varying rates and accommodations. Most short-term housing is available for no more than one to three months, though some may be for longer periods. Sublets are most readily available from May to August. Hotel and motel listings, which may be requested by mail or phone, are available in the UCLA Community Housing Office.

Transportation

There are several different means of transportation to and from campus other than using your car. Public bus lines connect UCLA to Santa Monica, Culver City, Beverly Hills, and most of Los Angeles. Bicycles, mopeds, and motorcycles are all popular ways to get around; several bike paths in the local area make your ride easier and safer, and there are free parking areas on campus specially marked and equipped for these vehicles. Many students form or join existing UCLA carpools and vanpools to save time and money and make the daily commute more pleasant. Students who form a three-person carpool may apply for a student carpool permit through Parking Services (825-9871). Contact the Commuter Assistance-Ridesharing carpool and vanpool coordinators at 825-6339; they can assist you in finding others from your home area who are interested in sharing a ride.

The UCLA/Westwood Commuter Lines buspool program has been operating since January 1989. The 45-passenger luxury vehicles currently serve Studio City/Sherman Oaks, Westchester, and central Los Angeles, with other areas such as Pasadena and Torrance under consideration. To accommodate diverse student and staff schedules, buses currently arrive on campus at 7, 8, and 9 a.m. and leave campus at 4, 5, and 6 p.m. For further information, call 206-1185.

A Guaranteed Ride Home (GRH) program has been developed to aid full-time UCLA commuters in the event of an emergency or other unscheduled need to get home. The service consists of three options — night rider vans which are vanpools that arrive on campus at approximately 10 a.m. and leave at 6 or 7 p.m., overnight rental car service, and taxi service. For detailed information on routes, schedules, fares, or general information, contact the Commuter Assistance-Ridesharing Office at 825-1185.

All of these alternatives are described in The UCLA Commuters’ Guide, a booklet which also contains a ridesharing application, bus routes, area maps, and helpful hints on getting to UCLA without using your car. It is available from Parking Services (Structure 8, Level 2, Westwood Plaza at Strathmore Place), at the UCLA Community Housing Office (270 De Neve Drive), and through the Commuter Assistance-Ridesharing Office (Structure 8, Level 2).

Parking Space and Permits

A limited number of parking permits for campus lots are sold to students each term, but parking spaces on campus are at a premium and not all students who request a permit will receive one. Obtain a Student Parking Request at Parking Services (Structure 8, Level 2) and return it by the deadline. Check dates on the Calendar at the beginning of this catalog or in the quarterly Schedule of Classes.

Parking assignments are based on the distance you live from campus, work commitments, and other information you provide. Students with permanent or temporary disabilities who have DMV disabled persons’ license plates or placards may apply to the Office for Students with Disabilities for parking assignments and on-campus transportation assistance. Students with short-term disabilities (normally less than three months) who do not have DMV disabled persons’ license plates or placards may obtain recommendations for parking permits through Student Health Service. If you do not receive a permit, you must reapply every term to be reconsidered. For more information, call Parking Services at 825-9871.

ASUCLA

Every registered UCLA student is a member of the Associated Students of UCLA (ASUCLA), one of the nation’s largest such enterprises in terms of size, scope, and range of programs. The undergraduate and graduate student governments are integral parts of ASUCLA, which supports the following activities and services.

Food Service

ASUCLA operates the food service on the general campus and provides a number of innovative menu options at a variety of locations. Catering for special events is also available. Hours listed are for regular school sessions and vary during the summer and holiday periods.

COOPERAGE — On the A Level of Ackerman Union, the Cooperage offers Mexican food, pizza, grill items, croissants, special salads, and soft ice cream. A stage and sound system for live entertainment and a large-screen TV for major events are available. Hours are weekdays 8 a.m. to 12:30 a.m. (1:30 a.m. Friday), Saturday 11 a.m. to 1:30 a.m., Sunday 11 a.m. to 11 p.m.

NORTH CAMPUS STUDENT CENTER — This facility, just south of the Research Library, offers a variety of Mexican and Latin entrees, frozen yogurt, fresh-baked cookies, deli and garden sandwiches, a wide selection of international-style entrees, made-to-order entree salads, hamburgers, and a salad bar. North Campus is open for breakfast, lunch, and dinner. Hours are weekdays 7 a.m. to 11 p.m. (8 p.m. Friday), Saturday 10 a.m. to 6 p.m., Sunday 11 a.m. to 9 p.m.
BOMBSHELTER DELI AND BURGER BAR — This unique food service in the center of the Court of Sciences offers an assortment of traditional deli sandwiches, snacks, frozen yogurt, broiled hamburgers and chicken, and salads at reasonable prices. A full breakfast menu is served in the morning. Hours are weekdays 7:30 a.m. to 5 p.m. (4 p.m. Friday), weekends 10:30 a.m. to 2:30 p.m.

TREEHOUSE — Located on the first floor of Ackerman Union, the Treehouse is open for breakfast, lunch, and dinner and features ranch-fried chicken, chili and salad bars, Italian-style dishes, and a variety of traditional American favorites. Grilled-to-order sandwiches and a top-your-own burger bar are offered at the Hole-in-the-Wall. Hours are weekdays 7 a.m. to 7:30 p.m. (3 p.m. Friday).

Adjacent to the Treehouse is the Sandwich Room, where you can find a variety of low-cost, made-to-order sandwiches, including Italian-style hot or cold submarine sandwiches. Hours are weekdays 10 a.m. to 4 p.m. (3 p.m. Friday), Saturday 10 a.m. to 2:30 p.m.

In the Treehouse lobby is Tout de Suite, a frozen yogurt, baked goods, and candy counter. Hours are weekdays 7 a.m. to 8 p.m., Saturday 11 a.m. to 3 p.m.

CAMPUS CORNER — The oldest of the ASUCLA food facilities, the Campus Corner is located just across Bruin Walk from Kerckhoff Hall. Pita bread pocket sandwiches, soft frozen yogurt, hamburgers, and French fries are available. Hours are weekdays 7:30 a.m. to 5 p.m. (4 p.m. Friday).

KERCKHOFF COFFEE HOUSE, on the second floor of Kerckhoff Hall, offers Baskin-Robbins ice cream specialties and a variety of teas, coffees, gourmet cheesecakes, and potages (hearty soups). Live entertainment is featured almost every night. Hours are weekdays 7 a.m. to 1 a.m., weekends 10 a.m. to midnight.

POTLATCH, a lounge on the first floor of the Anderson Graduate School of Management, offers a variety of sandwiches, snacks, and beverages. Hours are Monday through Thursday 8 a.m. to 9 p.m., Friday 9 a.m. to 2 p.m.

LU VALLE COMMONS, located between the Anderson Graduate School of Management and the School of Law, features deli food, hamburgers, and other grilled specialties. Hours are weekdays 7:30 a.m. to 10 p.m. (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday 11 a.m. to 8 p.m.

Within Lu Valle Commons is Jimmy’s Coffee House, featuring coffee, teas, and cheesecake. Hours are weekdays 7 a.m. to midnight (10 p.m. Friday), Saturday 9 a.m. to 9 p.m., Sunday 11 a.m. to 10 p.m.

Students’ Store

The ASUCLA Students’ Store, the largest on-campus retail store in the nation, is actually a mini department store with four campus locations. The Main Store (B Level of Ackerman Union, 825-7711) offers textbooks, general books, school and art supplies, calculators and other electronic items, UCLA insignia merchandise (Bearwear), men’s and women’s sportswear, groceries, health/beauty aids, and greeting cards. The University’s computer purchase program is administered through the Main Store — Macintosh and IBM computers are available to students, faculty, and staff at discounts up to 40 percent. Selected software is discounted as much as 75 percent. Hours during regular school sessions are weekdays 7:45 a.m. to 7:30 p.m. (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday 11 a.m. to 5 p.m.

The Health Sciences Store (13-126 CHS, 825-7721) specializes in books and supplies for students in dentistry, medicine, public health, and related areas. The Lu Valle Commons Students’ Store (just south of AGSM, 825-7238) carries convenience items, magazines, and general books for the north campus area, as well as textbooks for selected graduate programs (law, management, architecture, urban planning, social welfare). The North Campus Shop (in the North Campus Student Center, 206-0751) is a small convenience store offering school supplies, snacks, and other convenience items.

Lecture Notes

The Lecture Notes Office (A206 Ackerman Union, 206-0882) publishes concise weekly summaries of about 130 of UCLA’s large lecture classes. Hours during regular school sessions are weekdays 7:45 a.m. to 6:30 p.m. (6 p.m. Friday), Saturdays 10 a.m. to 5 p.m., Sunday noon to 5 p.m.

Job Opportunities on Campus

ASUCLA reserves over 2,000 part-time jobs for UCLA students in food service, the students’ stores, Graphic Services, Travel Service, the student union, and other departments. Listings are posted outside the Personnel Office, 205 Kerckhoff Hall (825-7055).

The residence halls offer a number of positions, as do the University libraries; check at the residences and the Personnel Office in the University Research Library (825-7947). Other on-campus jobs may be available through the Placement and Career Planning Center (see “Student Services” later in this chapter).

Check Cashing

Cash is available via on-campus automatic tellers. There are three Home Federal locations: outside the North Campus Student Center, outside the Health Sciences Store, and on the A Level of Ackerman Union. Also on the A Level of Ackerman Union are automatic tellers for Bank of America, First Interstate Bank, Security Pacific National Bank, and Wells Fargo Bank which accept cards from other banks that are members of the Star, Plus, or Cirrus networks (transaction fees may apply). Network information is posted on each automatic teller.

Students, faculty, and staff with current UCLA identification may also write checks for $20 over the amount of purchase at all Students’ Store locations; a $2 minimum purchase is required.

Graphic Services

ASUCLA Graphic Services, 150 Kerckhoff Hall (206-0894), is the campus center for photographic, printing, copying, typographic, and other graphic services. Portraits, photography, yearbook sittings, passport photographs, film, photo and darkroom supplies, and discount photofinishing are also provided. Hours are weekdays 8:30 a.m. to 5:30 p.m. A satellite Graphic Services Center is located in Lu Valle Commons (825-7568).

The Graphic Services Kerckhoff Hall office also features a public fax machine and the Macintosh and Laser Rental Service (206-8454). Macintosh computers are available for hourly rental; term papers, newsletters, and flyers may be output on a Laserwriter or Imagewriter printer. A Linotronic 300 is available for high-resolution typesetting of newsletters and brochures. Weekend and evening hours are available during busy periods; call for the latest information.
Meeting Rooms
A variety of meeting rooms is available for use by the entire campus community. To reserve space in Ackerman Union, Kerckhoff Hall, Lu Valle Commons, or North Campus Student Center, contact the Student Union Operations Office on the A Level of Ackerman Union (206-0836).

Travel Service
The ASUCLA Travel Service, located on the A Level of Ackerman Union (825-9131), offers a wide range of domestic and international charter flights, land arrangements and charter packages, student tours, scheduled air and rail tickets, and other travel-related services. Hours are weekdays 8:30 a.m. to 6 p.m., Saturday 11 a.m. to 3 p.m.

Student Activities
The opportunities to participate in extracurricular activities at UCLA are virtually unlimited. Though it is impossible to list all the activities here, the following are just a few of the many ways you can get involved in campus life and expand your horizons beyond classroom learning.

Student Government
In addition to its Services and Enterprises division, which is responsible for the services described above, ASUCLA includes the Undergraduate Students Association, the Graduate Students Association, and the Communications Board, which publishes the Daily Bruin and other campus student publications. Governed by a 10-member Board of Directors, ASUCLA operates and manages Ackerman Union, Kerckhoff Hall, North Campus Student Center, and Lu Valle Commons.

Many facets of student life at UCLA are sponsored or organized in some way by student government. Getting involved in the decision-making process can be extremely rewarding and can offer avenues of expression you may not find in other aspects of your university experience.

Undergraduate Student Government — The Undergraduate Students Association (USA), located on the third floor of Kerckhoff Hall (825-4504), is governed by the Undergraduate Students Association Council. USAC administers the association's $500,000 annual operating budget through a network of student commissions (Academic Affairs, Campus Events, Community Service, Cultural Affairs, Facilities, Financial Supports, and Student Welfare) presided over by the student body president. The undergraduate student body elects officers annually.

Many student government programs benefit both campus and community. The Community Service Commission (825-2333) serves Los Angeles through such programs as Amigos del Barrio, offering academic and emotional support for Latino students; the UCLA Prison Coalition, providing tutoring for inmates of juvenile correctional institutions; and the UCLA Special Olympics, to name just a few. More than 1,250 students volunteer annually for community service participation.

Student government also supports the various special interest groups on campus, including the African Student Union, American Indian Students Association, Asian Pacific Coalition, Gay and Lesbian Association, MEChA, UCLA Jewish Student Union, and the Union for Students with Disabilities.

The Campus Events Commission (825-1958) provides the campus with free and low-cost entertainment programming, as well as opportunities for student involvement. The commission is responsible for the Speakers Program (see next page), noontime and evening concerts, the Ackerman Film Program, and Mardi Gras.

Graduate Student Government — The Graduate Students Association is the official organization representing the interests of UCLA graduate students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees, including the ASUCLA Board of Directors and the Student Fee Advisory Committee, as well as to departmental student organizations and committees of the Academic Senate. In addition, GSA sponsors various graduate student journals, programs, and social events, including Melnitz Movies (UCLA student film program) and publication of the GSA newsletter, Grad Voice. The GSA Office is located in 301 Kerckhoff Hall (206-8512).

 Clubs and Organizations
Joining a club or organization is an excellent way to make new friends and find your niche on campus. UCLA has about 700 different clubs and registered organizations — more than you will find on almost any other university campus in the country. Political, athletic, recreational, cultural, academic, and religious clubs of almost every description are represented — and if you can't find one to suit your particular interest, you can start your own.

Clubs focusing on sports and recreation are listed in the University Recreation Association Office, located in the Wooden Center (825-3701). For a full listing of registered student organizations, contact the Center for Student Programming, 161 Kerckhoff Hall (825-7041). This office can help you start a club or join an existing one, and serves as the official registry for all campus organizations. The center assists students with program development and fund-raising, monitors financial activities of student organizations, interprets and enforces University rules and regulations, and administers official and general purpose bulletin boards on campus.

Groups registered through the Center for Student Programming are eligible to use the services of the Campus Activities Service Office (CASO), 12 Royce Hall (825-8981). CASO offers technical advice and estimates for services in the public events area and reserves most campus public assembly facilities, classrooms, and auditoriums. The Conference Planning and Special Event unit of CASO (825-2024) specializes in large and complex meeting/conference activities using a variety of campus spaces and needing support from multiple campus service agencies. General assignment lockers and the sale of UCLA padlocks are also administered by CASO.

Complaints Against Student Organizations
Complaints of misconduct against officially recognized campus organizations should be made at the Center for Student Programming, 161 Kerckhoff Hall, except complaints against Greek letter social organizations (i.e., fraternities and sororities) which should be made at the Office of Fraternity and Sorority Relations, 118 Men's Gym.

Fraternities and Sororities
The Office of Fraternity and Sorority Relations (FSR), 118 Men's Gym (825-6322), serves as the adviser to and sponsor of the 55 Greek letter social organizations and their four governing councils — Asian Greek Council, Interfraternity Council, National Pan-Hellenic Council, and Panhellenic Council.

Greek letter social organizations registered and officially recognized by FSR are eligible to participate in programs such as the Greek Leadership Conference, Rush, Greek Week, New Member Alcohol and Substance Education, Dating Expectations Programs, intramural tournaments, and all University-sponsored programs. Individual student members are eligible for scholarships offered by the Intersorority Mothers’ Club, Los Angeles Alumnae Panhellenic, Panhellenic Council, and Interfraternity Council. The FSR staff assists organizations in campus and community programming, fund raising, membership development, training, and philanthropic activity.

FSR is also a designated campus Harassment Information Center available to all UCLA students (see “Harassment” in the Appendix for more information).
Fraternities and sororities provide the security of friendship and academic support while encouraging personal development and expansion. Members have group and individual responsibilities related to their particular interests and talents, and all take part in the group’s programs and support networks. “Greeks” follow their founding principles of service, scholarship, and friendship. There is a place for anyone who will contribute to a group experience, and the cost to live in a chapter house is no more than living in a campus residence hall, although many members “live out.” More than 5,000 UCLA students participate in “Greek life.”

**Mardi Gras**

UCLA's annual Mardi Gras is the world's largest student-operated college activity. Each Spring Quarter over 5,000 Bruins from all types of campus organizations help to prepare and present this carnival. Students design and operate more than 70 booths featuring games, food, and live entertainment. There are celebrity judges, carnival rides, clowns, balloons, fireworks, and much more. A special preview night, with reduced rates for students, faculty, and staff, is held on Thursday; Mardi Gras is open to the public on Friday night, Saturday, and Sunday. The event generates well over $100,000 annually for UCLA's official charity, UniCamp, a summer camp for underprivileged Los Angeles children. For more information, contact the Mardi Gras Committee in 129 Kerckhoff Hall (825-8001) or the Campus Events Commission in 300A Kerckhoff Hall (825-1956).

**UCLA Campus Events Speakers Program**

The Speakers Program, now over 25 years old, brings the world’s foremost entertainers, politicians, and literary figures to campus. It also presents two annual awards programs — the Jack Benny Award for comedic excellence and the Spencer Tracy Award for outstanding screen performance. Past speakers have included Johnny Carson, David Letterman, Whoopie Goldberg, Robin Williams, Jessica Lange, James Stewart, Spike Lee, William Hurt, Patricia Schroeder, Jesse Jackson, Matt Groening, Studs Turkel, Shimon Peres, Walter Cronkite, and Jane Fonda.

**Publications and Broadcast Media**

UCLA's publications and broadcast media, operated by the ASUCLA Communications Board, provide excellent training grounds for aspiring writers, journalists, photographers, and radio announcers while serving the communication needs of the campus community. The following are the major student-operated sources of information on campus:

- **The Daily Bruin**, with a circulation of 22,000, is the third largest daily newspaper in Los Angeles. As the principal outlet for campus news, the Bruin is published each weekday of the regular academic year (twice weekly during the summer) and is distributed free from kiosks around campus and in Westwood and Brentwood. Students work as reporters, editors, proofreaders, photographers, and advertising sales representatives; new staff members are always welcome. Bruin offices are located in 112 Kerckhoff Hall (825-9898).

- Seven newsmagazines reflecting the diversity of the campus community are published twice each term. **Al-Talib** is a new publication devoted to Muslim issues; **Ha'Am** deals with Jewish issues; **La Gente** treats Chicano, Latino, and Native American issues; **Nommo** explores African American issues; **Pacific Ties** is devoted to Asian issues; **TenPercent** covers gay, lesbian, and bisexual issues; and **Together** reports on women's issues. Each includes news and features on political and cultural affairs both on and off campus. Prospective staffers are welcome. The offices of these newsmagazines are located in 112 Kerckhoff Hall.

The UCLA yearbook, **Bruin Life**, is one of the largest student publication efforts on campus. Available each spring, it contains photographs and information on undergraduate students, graduating seniors, athletic teams, fraternities and sororities, and campus activities. A separate publication, the **Freshman Record**, is produced for new UCLA students. If you would like to participate, contact the yearbook staff in the trailer behind Kerckhoff Hall (825-2640).
Like many other large universities, UCLA has its own radio station. KLA Radio provides music, news, public service programming, and sports coverage during the academic year. The carrier current signal is sent to the residence halls and parts of Ackerman Union and Kerckhoff Hall on 53 AM and to many parts of the Los Angeles area on 99 Century Cable FM. The studios are located at the rear of the Grand Ballroom in 2400A Ackerman Union (825-9107; request line: 825-9999). All positions, including on-air, news staff, and advertising representatives, are open to students.

The Performing Arts

UCLA offers a rich variety of concerts, art exhibits, dance recitals, and theater productions as an integral part of University life. A full calendar of exceptional programs by the Music, Ethnomusicology and Systematic Musicology, and Dance Departments of the School of the Arts and the Theater and Film and Television Departments of the School of Theater, Film, and Television provides opportunities for student involvement and personal growth.

The Music Department offers more than 15 performance organizations. Instrumentalists are invited to play with one of seven different bands and orchestras. Campus choral organizations include a Concert Choir, Chamber Singers, Women's Chorus, Men's Glee Club, and the Colle-giate Chorus which, with 120 members, is the largest of the groups.

The Ethnomusicology and Systematic Musicology Department provides students with the opportunity to perform in various non-Western and ethnic groups.

The Dance Department presents afternoon and evening modern dance concerts and demonstrations both on and off campus, and folk and ethnic performing groups meet regularly. Dance students have the opportunity to design and choreograph as well as perform.

Each year the Theater Department presents a series of major productions to the general public. The Film and Television Department produces about 300 student-directed films each year in addition to hundreds of television programs. Professionals appearing on campus frequently visit classes to share their skills, and many have established awards and scholarships in the performing arts at UCLA.

Be a Spectator

If you'd rather be entertained than do the entertaining, UCLA's Center for the Performing Arts stages more than 200 public concerts and events each year. Ever since Royce Hall was dedicated in 1929, UCLA has been a premiere West Coast showcase for both new talent and the world's leading artists. The Los Angeles Philharmonic and Chamber Orchestras perform regularly each season, as do several major dance ensembles, theatrical companies, and performance artists. Numerous celebrities have appeared on UCLA stages, from Luciano Pavarotti to Marcel Marceau, Isaac Stern to Cleo Laine, Pierre Boulez to Liv Ullman. Discount tickets for students, faculty, and staff are available to all events.

Sports and Athletics

Athletics play a major role in the University's mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports. In 1988-89 the UCLA men's athletic program placed first in the nation all-around excellence competition and has won the award 10 times. The women's program placed first in the 1989-90 poll conducted by U.S.A. Today and has won that award several times. UCLA is the only university in the country to win five National Collegiate Athletic Association (NCAA) men's and women's championships in a single year (1981-82).

MEN'S INTERCOLLEGIATE SPORTS — UCLA is a member of the Pacific-10 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; Stanford University; University of Southern California; University of Oregon; Oregon State University; Washington State University; and the University of Washington. UCLA teams have won an overall total of 54 NCAA men's championships — second highest in the nation — including 15 in tennis, 13 in volleyball, 10 in basketball under the legendary John Wooden, and eight in track and field. In addition, the volleyball team won the 1989 NCAA title. You can participate on the varsity level in football, basketball, track, baseball, tennis, crew, volleyball, gymnastics, swimming, water polo, golf, soccer, and cross-country. For more information, contact the Men's Athletic Office at 825-8699.

WOMEN'S INTERCOLLEGIATE SPORTS — With 10 different varsity sports, the UCLA women's program is one of the most extensive in the country, and UCLA has played an important role in establishing women's sports as part of the NCAA. Women's teams have won many national, regional, and conference titles, including the 1981-82, 1983-84, 1984-85, 1987-88, 1988-89, and 1989-90 NCAA championships in softball, the 1981-82 and 1982-83 track and field crowns, and the 1984 volleyball title. Other nationally ranked teams are those in basketball, swimming, tennis, golf, cross-country, and gymnastics. Athletic grants-in-aid are available on a selective basis in most sports. For more information, contact the Women's Athletic Office at 825-8699.
INTERCOLLEGIATE ATHLETIC FACILITIES — UCLA's major indoor arena is the famed Pauley Pavilion, which seats 12,543 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, Drake Stadium is the home of UCLA track and field competitions and site of many outdoor events including the College of Letters and Science Commencement. The Los Angeles Tennis Center, a 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. The Morgan Intercollegiate Athletics Center houses the UCLA Athletic Hall of Fame. Off-campus facilities include Robinson Stadium for varsity baseball, the UCLA Aquatic Center in Marina del Rey for the UCLA crew and sailing programs, and the renowned Rose Bowl in Pasadena, home of the UCLA football team.

Athletics for Everyone
UCLA offers a wide variety of recreational opportunitues to meet the needs of the campus community. The Department of Cultural and Recreational Affairs (CRA), 2131 Wooden Center (825-3701), serves as the administrative center for the coordination of programming, facilities, and equipment and supervision of campus recreational activities and services.

INTRAMURAL/CLUB SPORTS — The Intramural Sports Program offers over 40 activities, ranging from basketball and badminton to volleyball and water polo, in men's, women's, and coed competition with team and individual play; many are divided by skill levels so participants of any ability level can get involved. The Club Sports Program offers you the chance to organize, coach, or participate in sports that fall beyond the scope of intramurals but are not offered at the varsity level. Annually over 15 club teams participate in a competitive schedule of league and tournament play with other college, university, and local area teams. Recognized teams exist in ice hockey, rugby, lacrosse, cycling, women's soccer, snow skiing, and surfing.

RECREATION CLUBS — Students with special interests in activities that are primarily instructional or social in nature have the opportunity to pursue their interests through clubs such as amateur radio, dance, fishing, snow skiing, and a variety of martial arts.

RECREATION INSTRUCTIONAL PROGRAM — A broad range of non-credit recreation classes is available in aquatics, dance, fine arts, outdoor studies, physical fitness, boating and sailing, tennis, and sports skills. Most classes are designed for beginning and intermediate skill levels. You can also participate in cultural events through the poetry reading program, museum tours, and theater in Los Angeles outings.

BRUIN KIDS — Summer day camps, recreation classes, enrichment programs, and year-round weekend activities are offered for children of the UCLA community aged four to 16. Summer employment opportunities for UCLA students and a chance to work with children in a learning environment are provided through the Bruin Kids Program.

RECREATION FACILITIES/INFORMAL RECREATION — UCLA students with appropriate identification have several major facilities in which to practice and play. The Wooden Recreation and Sports Center is a comprehensive student activities building with multiple gymnasia, 10 racquetball/handball courts, two squash courts, a weight training facility, exercise/dance and martial arts rooms, and a games lounge. The Sunset Canyon Recreation Center offers year-round activities in an outdoor park setting and features a 50-meter swimming pool, 25-yard family pool, picnic-barbecue areas, multipurpose play fields, an outdoor amphitheater, 10 lighted tennis courts, and various meeting rooms and lounges. Students also have the use of Pauley Pavilion, Drake Stadium, Los Angeles Tennis Center, Intramural Fields, Men's Gym, and Dance Building for recreational sports.
Student Services

UCLA students enjoy an extremely broad range of benefits and support services which enrich their college careers and help them attain their academic and career goals.

Academic Counseling

Many sources of academic counseling are available. Faculty advisers and counselors in each college and school help students with major selection, program planning, academic difficulties, degree requirements, and petitions for exceptions to these requirements.

Advisers in each major department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see "Academic Resources and Assistance" in Chapter 2 of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

Placement and Career Planning Center

The Placement and Career Planning Center (PCPC) offers career guidance and placement services to all UCLA students. Services are located in the PCPC Building (825-2981) and in two satellite locations: 1349 AGSM (services for M.B.A. students, 825-3325) and 5289 Boelter Hall (specializing in engineering and the physical sciences, 825-4606).

Career Development — A staff of career counselors is available to assist you in career exploration and the job search. Information on planning further education and alternative careers can be found in the Career Resources Library. In addition to bringing graduate school representatives to campus, the Campus Interview Program brings employer representatives to discuss career opportunities with seniors and graduate students, and career-related summer employment with continuing students. The direct referral service posts a large number of currently available jobs in a variety of organizations. A professional file service is provided for those seeking positions in the field of education.

Student Employment — A job listing and referral system helps students and their spouses find part-time, temporary, or vacation employment. Career-related opportunities include internships and cooperative education possibilities.

Student Health Service

The Student Health Service (SHS) is designed to offer the health care and information you may need as a UCLA student. Services are provided on an appointment or walk-in basis at little or no cost to all registered students on presentation of Registration and UCLA Student I.D. Cards. If you withdraw during a school term, all SHS services will continue to be available on a fee basis for the remainder of that term. You are encouraged to select a clinician who will provide ongoing health care. The cost for all services received outside of SHS is your responsibility. For further information on SHS, call 825-4073.

Location and Hours — General and emergency care is available in A2-130 Center for the Health Sciences. Office hours weekdays are 8 a.m. to 5 p.m. except Tuesday, when service begins at 9 a.m. Emergency care is also available between Gates 10 and 11 in Pauley Pavilion (825-5704) from 1:30 to 6 p.m. weekdays. For emergency care when these facilities are closed, you may obtain treatment at the UCLA Medical Center Emergency Room on a fee-for-service basis.

Primary Care Clinic provides outpatient diagnoses and treatment for most health care needs of both men and women. Care is provided by board certified physicians and nurse practitioners. The clinic also provides counseling for general health concerns. Call 825-2463 to schedule an appointment.

Specialty Clinics provide specialized care when you are referred by the Primary Care Clinic. Services include dermatology, orthopedics, surgery, gynecology, internal medicine, allergy, chest, ENT (ear, nose, and throat), ophthalmology, urology, and neurology. Routine physicals, health clearances, immunizations, and travel shots are available for a moderate fee. Call 825-0861.

Women's Health Service provides care for routine women's health needs and treatment of gynecological problems. Family planning (birth control) services are available, as are testing, counseling, and referral for pregnancy. Counseling for sexual problems and relationship concerns is also provided. Call 825-0854 for appointments and 825-7000 for clinicians.

Men's Health Clinic treats male genital and urinary problems, both sexual and nonsexual in nature. The clinic also provides sexual counseling for UCLA's male students. Call 825-0861.

Dental Clinic services are available by appointment without need of a referral. Some general dentistry and dental hygienic services are available. Fees are charged for all services. Call 825-5858.

Outreach Programs, such as the Peer Health Counselor and Student Health Advocate Programs, provide peer care and educational counseling for health concerns. The programs allow students to be involved in the planning and delivery of all aspects of health care. Call 825-4730.

Supplemental Medical Insurance — UCLA offers a student Medical Insurance Plan (MIP) which is available as a supplement to the services offered in SHS. MIP provides benefits for certain major medical expenses not covered by SHS, such as hospitalization, surgery, and emergency room costs.

All graduate students and all international students (graduate and undergraduate) on nonimmigrant visas must maintain adequate medical insurance coverage during all periods of enrollment at UCLA. MIP fulfills the medical insurance requirement. For graduate students the MIP fee is included in each term in the fee assessment total on the UCLA Fee Statement portion of the Registration Form. For undergraduates the MIP fee appears as a voluntary option to be added to the fee assessment total on the Registration Form each term. This is the only method by which MIP can be purchased.

Graduate and international students who are insured under adequate private medical insurance may waive out of MIP. See "Mandatory Medical Insurance Requirement" in the "Registration and Enrollment" sections of Chapters 2 and 3 for a description of what constitutes adequate private medical insurance and instructions for waiving out of MIP. For further information on medical insurance, call the SHS Insurance Office at 825-1856.

Student Psychological Services

Student Psychological Services (SPS) offers short-term personal counseling and psychotherapy at two locations. The Mid-Campus Office is located in 4223 Math Sciences (825-0768, 825-4207). The South Campus Office is in A3-062 CHS (825-7985).
Psychologists, clinical social workers, and psychiatrists are available at both locations, offering assistance with situational stresses and emotional problems from the most mild to the most severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.

The service is confidential and free to regularly enrolled students. Students are seen individually or may choose from a number of groups offered each term. Appointments are made on weekdays between 8 a.m. and 5 p.m. Emergency counseling is also available.

SPS is also a designated campus Harassment Information Center available to all UCLA students (see "Harassment" in the Appendix for more information).

**Helpline**

Helpline (825-HELP) provides information, referrals, crisis intervention, and a friendly ear when you don't know where else to turn. Hours are weekdays 5 p.m. to midnight, Saturday and Sunday 8 p.m. to midnight. For more information, contact Clive D. Kennedy, Student Psychological Services, 4223 Math Sciences (825-4207).

**Office of the Dean of Students**

The Office of the Dean of Students, located in 1206 Murphy Hall (825-3871), exists to help you, either directly or by referral, with whatever needs you might have. Direct services include general counseling; sending emergency messages to students; and assisting in understanding University policies and procedures, including grievance procedures regarding student records, discrimination, and student debts.

In addition, the office publishes "Official Notices" in the Daily Bruin at various times during the year. Such notices are important, and all students are held responsible for the information in them.

The office publishes "Student Conduct: Violation of University Policies" in the Appendix for more information.

**Ombudsman**

The Ombudsman is responsible for listening and responding to grievances from any member of the campus community (i.e., students, faculty, administrators, staff), for investigating those grievances where resolution has not been to the satisfaction of the concerned individual or where there are no established guidelines for resolution, and for resolving where possible, through mediation, those grievances (including sexual harassment). The office is located in 274 Kinsey Hall (825-7627) and is independent in operation; all matters are handled confidentially. Hours are weekdays 8 a.m. to 5 p.m.

The office is also a designated campus Harassment Information Center available to all UCLA students (see "Harassment" in the Appendix for more information).

**Student Legal Services**

If you are a currently registered and enrolled student with a legal problem, you can get assistance free of charge from attorneys or law students under direct supervision of attorneys. They will help you solve legal problems, including those related to landlord/tenant relations, domestic relations, accident and injury problems, criminal matters, and contract and debt problems. Assistance is available on a walk-in basis from 9 a.m. to noon weekdays in 70 Dodd Hall (825-9894).

**Central Ticket Office**

Tickets for all UCLA events are available at the Central Ticket Office (CTO) in the West Alumni Center.

CTO also offers student discount tickets to campus athletic and cultural events and local motion picture theaters (Registration and UCLA Student I.D. Cards must be presented at the time of purchase). You may also purchase tickets to off-campus events through Ticketmaster and Ticketron, as well as student discount tickets for RTD buses and tokens for the Santa Monica and Culver City bus systems.

For information on athletic and special events, call 825-2101; for cultural events, call 825-2953.

**Community Resource Center**

Community and public service is an integral part of UCLA's educational mission and greatly enhances students' learning experiences. In an effort to facilitate greater student involvement, the Community Resource Center actively promotes and publicizes volunteer opportunities to meet the needs of our growing community and provides an information clearinghouse for volunteer opportunities both on campus and in the community for all interested students and student groups. Program coordinators, located in 203 Men's Gym (206-5523), are available to assist you in developing a community service opportunity and exploring the field of volunteerism.

**Services for International Students**

The Office of International Students and Scholars (OISS) works closely with the International Student Center to provide services and programs specifically for UCLA's 5,700 international students. Together they provide a comprehensive orientation program for these students which helps them pursue their academic goals, and a series of programs which allow them to share their viewpoints with American students and the community.

The OISS staff, located in 105 Men's Gym (825-1681), includes professional and peer counselors specially prepared to assist you with questions about immigration, employment, government regulations, financial aid, cultural adjustment, and personal matters. OISS is also a designated campus Harassment Information Center available to all UCLA students (see "Harassment" in the Appendix for more information).

Visa assistance for faculty, researchers, and postdoctoral scholars is an additional OISS service.

The International Student Center, 1023 Hilgard Avenue (208-4587), focuses on student-community relations and helps with language, housing, and other problems in addition to sponsoring cultural, educational, and social programs.

**Services for Students with Disabilities**

The Office for Students with Disabilities, A255 Murphy Hall (825-1501 or TDD 206-6083), provides services to students with permanent and temporary disabilities, including registration/priority enrollment assistance, special parking, fee deferrals authorized by the California Department of Rehabilitation, readers, note takers, interpreters for deaf students, housing assistance, on-campus transportation, campus orientation, proctor and test-taking assistance, support group, and adaptive equipment. The office can also assist with arrangements for training and access to the Disabled Computing Program.

The Disabled Computing Program helps provide access to campus computing facilities for UCLA students, faculty, and staff with disabilities. Specially adapted computer workstations and training are available to those with low vision, blindness, and physical and learning disabilities. For further information, contact the Microcomputer Support Office at 825-7408.
Veterans' and Social Security Services

Registrar's Student Information, 1134 Murphy Hall, provides information for veterans and eligible dependents about V.A. educational benefits, tutorial assistance, the work-study program, and emergency loans; issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet the income restrictions in Education Code Section 10652; and certifies student status for recipients of Social Security benefits.

Women's Resource Center

The Women's Resource Center (WRC), located in 2 Dodd Hall (825-3945), offers services to all UCLA students, with special focus on women's needs.

The center presents workshops and support groups on many topics, including child care, self-defense, assertiveness training, rape prevention and education, career development, single parenting, health, returning to school, and personal relationships. It also offers referrals for medical, legal, career planning, personal counseling, and other services both on and off campus. In addition, rape services consultants (RSCs) — individuals who provide information, support, and resources for UCLA students who have been raped or sexually assaulted — can discuss options and alternatives, help identify and assist in contacting the most appropriate support services, and answer any questions that may arise.

The WRC is also a designated campus Harassment Information Center available to all UCLA students (see "Harassment" in the Appendix for more information).

A library includes specialized publications on women's issues. Internships are offered in areas such as creative writing, legislative research, graphic arts, and publicity. The WRC, committed to improving the status of women on campus, works with other campus agencies to help women reach their full potential.

Child Care Services

The Child Care Center provides full- and part-time care for children aged two months to five years. Fees range from $205 to $529 per month depending on the age of the child and amount of time enrolled in the program. The center is located in the northwest corner of campus between Veteran Avenue, Sunset Boulevard, and Bellagio Drive, with the entrance on Bellagio Drive (825-5086).

The Outreach Program helps parents make off-campus child care arrangements. The outreach coordinator meets parents each Monday from noon to 1 p.m. in 2 Dodd Hall. For more information, call 825-8474.

The University Parents Nursery School is a multicultural cooperative school for two- to five-year-old children of UCLA students, faculty, and staff. Experienced teachers, assisted by co-oping parents, provide a gradual transition from the home to the school environment. Hours are weekdays 8:30 a.m. to 12:30 p.m. and/or 12:30 to 4:30 p.m., with some extended care available from 7:30 to 8:30 a.m. and 4:30 to 5:30 p.m. The nursery school is located in the UCLA Family Student Housing Community Center, 3327 South Sepulveda Boulevard (397-2755).

Safety and Security

Emergency: Campus Police — If you need to call the Campus Police Department, just dial three digits — 911 — from any campus phone. For nonemergency information, contact them at 601 Westwood Plaza (825-1491). You may also dial 35 from any campus phone to report police, fire, and medical emergencies.

Escort Service — The Department of Community Safety provides free escort service every day of the year from dusk to 1 a.m. Uniformed community service officers (CSOs) — specially trained UCLA students — are available to walk students, staff, faculty, and visitors between campus buildings and local living areas or Westwood Village. To obtain an escort, call 825-1493 about 20 minutes before you need one.

Evening Van Service — The free service provides a safe and convenient mode of transportation around campus at night. Seven vans driven by CSOs operate Sunday from 5 to 11 p.m. and Monday through Thursday from 5 p.m. to midnight (6 p.m. to midnight during Spring Quarter) and serve many campus areas, including the residence halls, sororities, libraries, and living areas west of campus. For further information or a free brochure, call 825-9800.

UCLA Rape Prevention and Education Services are cosponsored by the Women’s Resource Center and the Department of Community Safety. Services include workshops, self-defense classes, intake counseling, and referrals to offer practical safety suggestions, increase physical and psychological preparedness, and heighten awareness of the complex issues of rape and sexual assault. For more information, call 206-8240 or 825-7661.

CPR — The Department of Community Safety offers American Heart Association-approved cardiopulmonary resuscitation classes to the UCLA community which can be organized any day or evening. For more information or to schedule a class, call 206-0176.

UCLA Alumni Association

For more than 50 years, the UCLA Alumni Association has provided its members with the opportunity to continue their involvement with UCLA through intellectual, cultural, and social activities. With more than 53,000 members, it ranks among the six largest dues-paying alumni groups in the nation. Membership is open to all — alumni, parents of current students, faculty, staff, UCLA Extension students, and others.

The Alumni Association sponsors many programs for its members. The Alumni Travel Program enables members to participate in educational and cultural tours. The Governmental Relations Program promotes constructive dialogue between alumni and government officials. The Reunions Program facilitates class reunions for alumni. The Advisory and Scholarship Program awards merit scholarships to freshman, transfer, and continuing students each year and hosts programs to help recruit the best and brightest students to UCLA. The Alumni Association is also the parent organization for more than 110 regional alumni clubs, professional school alumni organizations, and other support organizations which help alumni and friends across the country stay in touch with the University and with other UCLA friends.

In addition to activities for alumni, the association supports a large number of student activities each year through the Student Alumni Association (SAA). Student members plan and produce UCLA's Homecoming festivities and Spring Sing. The SAA "Dinners for Twelve Strangers" program brings together students, faculty, and alumni. And through the SAA Career Network, students have the opportunity to meet alumni and other UCLA friends.

The Alumni Association extends a wide variety of benefits and services to its dues-paying members — library privileges, discounts on cultural and athletic tickets, eligibility for group insurance programs, access to the Alumni Locator Service, travel programs, and special members-only publications. A special membership package offered to graduating seniors includes reduced membership rates; discounts on cap and gown rental, diploma lamination, and graduation announcements; and a special discount on a UCLA Extension class. The Alumni Association is located in the West Alumni Center, 325 Westwood Plaza (825-3901; 800-UCLALUM, outside the 213 and 818 area codes).

Undergraduate Admission

Information:
Undergraduate Admissions and Relations with Schools (UARS)
1147 Murphy Hall
(213) 825-3101

The Office of Undergraduate Admissions and Relations with Schools (UARS) invites you to visit UCLA to discuss your prospects as a student and to experience the campus firsthand. The UARS Office offers frequent student-guided individual and group tours of the campus which are both enjoyable and informative; reservations are required. Call (213) 825-3101 for tour reservations and general UCLA admissions information.

Preparing for University Work

A carefully planned program of high school courses best prepares you for University work. It can give you a definite edge in your undergraduate studies and a head start in your selected field. Most important, if you master certain basic skills in high school, you increase the probability of your success at the University.

As a prospective UCLA freshman, you should give priority to completing the high school courses required for admission — the academic pattern of courses outlined later in this chapter. In addition, you should give careful thought to the general field of study, if not the specific major, you want to pursue. If you can make this decision early, you can take additional high school courses related to your field.

You should understand that the academic requirements for admission are minimum entrance standards. Completing the required high school courses with satisfactory grades will not automatically determine whether you will be selected for admission to UCLA, as students are chosen from a large number of highly competitive applicants. Most of these applicants will have exceeded the minimum requirements; thus selection is based on your demonstrated overall preparation. Those applicants with the strongest preparation are offered admission.

You must begin preparation for college at least by the ninth grade in order to allow you to progress through more than just the minimum required courses. If possible, you should begin academic coursework in mathematics and foreign language in the seventh and/or eighth grades, as this allows you to complete five or six years of college preparatory work. With the strength of solid preparation, students applying to UCLA will be in a competitive position for admission.

Applying for Admission

The first step in applying for admission is to obtain a UC Undergraduate Application Packet containing all necessary forms and instructions from your California high school or community college counselor or from any University of California Undergraduate Admissions Office. One application is used to apply to all UC campuses. You may apply to one UC campus for the basic $40 application fee; for each additional campus you select, you must pay an additional $40 fee per campus. Checks or money orders should be made payable to The Regents of the University of California. These fees are not refundable.

Complete the application, taking care to list your desired major and the correct major code for the campus(es) to which you are applying. Mail the completed application and the nonrefundable application fee in the self-addressed envelope included in the application packet.

If you are in high school when you apply (freshman applicant), your application information is used by UARS to make preliminary admission decisions. Do not send your sixth and/or seventh semester high school transcripts. A complete and final transcript, including a statement of graduation or proficiency, will be required at a later date. You must submit official results of the Scholastic Aptitude Test (SAT) or American College Test (ACT) and three achievement tests; request that test results be sent directly to UCLA when you take each test. You should take these tests by the December test date, as they are part of the review process for admission.

If you have attended or are attending another college when you apply (transfer applicant), your application information is used by UARS to make preliminary admission decisions. Transcripts of all your high school and college work will be required at a later date. It is your responsibility to arrange for transcripts to be sent and to assure that they arrive promptly; hand-carried transcripts are not acceptable for final evaluation. Transcripts and other documents cannot be returned or forwarded to other institutions.

When to Apply

The filing periods for applications are as follows:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Winter Quarter 1991</td>
<td>Closed to new applicants</td>
</tr>
<tr>
<td>Spring Quarter 1991</td>
<td>File October 1-31, 1990 (Junior-level transfers only)</td>
</tr>
<tr>
<td>Fall Quarter 1991</td>
<td>File November 1-30, 1990 (Freshmen and transfers)</td>
</tr>
</tbody>
</table>

(Applications for admission to Fall Quarter 1990 would have had to be filed during November 1989.)

Some departments, majors, or schools at UCLA are open for Fall Quarter admission only. Contact UARS before applying.

Notification of Admission

You will be mailed a notice, which you should keep, acknowledging receipt of your application. Later, you will receive a letter explaining your admission status. The length of time before admission notification varies depending on how complete your application is and how quickly your records are received. In general, Fall Quarter applicants are notified beginning March 1.

If you are accepted for admission, you will be asked to sign and return a Statement of Intent to Register and a Statement of Legal Residence. A nonrefundable $100 deposit, also required at this time, will be applied to your University registration fee if you register in the term to which you are admitted.
Entrance Requirements

All campuses of the University of California have the same minimum freshman admission requirements. The requirements are based on two principles: (1) the best indicator of success at the University is a record of high grades in previous schoolwork and (2) the completion of certain academic courses in high school prepares you to begin University work and choose a general field of study.

Fulfilling the minimum admission requirements, however, does not necessarily assure admission to UCLA. The selection of applicants is based on demonstrated high scholarship in preparatory work, which often goes well beyond the minimum eligibility requirements. UCLA offers admission to those students with the best overall academic preparation.

In addition to the primary criteria for admission selection, other elements are considered to ensure a diverse student body which serves the interests of California. If you present evidence of educational and economic disadvantage or a disability, that will be taken into account. If you belong to an ethnic group which has low UC eligibility rates and historically low participation in higher education, that will also be taken into account.

California residency is another factor. While these elements are given consideration, academic performance remains the key factor for admission to UCLA.

Admission as a Freshman

You are considered a freshman applicant if you have not enrolled in a regular session of any college-level institution since graduation from high school (except for summer session immediately following high school graduation). To qualify for admission as a freshman, you must meet three major requirements: the Subject Requirement, the Scholarship Requirement, and the Examination Requirement. These are the minimum requirements for admission to the University; meeting them does not automatically assure admission to UCLA.

Subject Requirement

Outlined below are the high school academic courses required for admission to the University of California. Each course must be completed with at least a grade of C. The requirement consists of 15 year-long courses, seven of which must be taken during your last two years in high school. These are the minimum courses required for admission; you are encouraged to exceed these requirements whenever possible.

(1) History — One year of U.S. history, or one-half year of U.S. history and one-half year of civics or American government.

(2) English — Four years of university preparatory courses in English composition and/or literature, with no more than one year accepted from the ninth grade.

(3) Mathematics — Three years of university preparatory courses in elementary algebra, geometry, and advanced algebra (four years are recommended, including trigonometry and calculus).

(4) Laboratory Science — A one-year course in one laboratory science, taken in the tenth, eleventh, or twelfth grade (three years are recommended, including biology, chemistry, physics, and/or physiology).

(5) Foregn Language — Two years of one foreign language with a written literature (three to four years are recommended).

(6) College Preparatory Electives — Four units, in addition to those required above, to be selected from at least two of the following subject areas: history, English, advanced mathematics, laboratory science, foreign language, social sciences, and visual and performing arts. In general, elective courses should involve considerable reading and should develop your analytical and reasoning ability and skill with written and oral exposition.

Scholarship Requirement

Eligibility for admission to the University of California is based on a combination of your grade-point average (GPA) in the academic subject requirements and your American College Test (ACT) or Scholastic Aptitude Test (SAT) scores. For detailed scholarship information, see the UC Undergraduate Application Packet or contact Undergraduate Admissions and Relations with Schools (OARS).

Examination Requirement

All freshman applicants must submit scores from the following tests:

(1) One Aptitude Test:
   (a) The American College Test (ACT), composite score OR
   (b) The Scholastic Aptitude Test (SAT), total score.

(2) Three College Board Achievement Tests (ACH) which must include:
   (a) English composition AND
   (b) Mathematics, level 1 or 2, AND
   (c) Either English literature, foreign language, science, or social science.

Admission Selection

Many elements are considered in the selection process, but the primary ones are (1) academic preparation — quality, level, and content of coursework, (2) performance in courses completed, (3) scores received on the standardized college tests (Scholastic Aptitude Test or American College Test and achievement tests), (4) number of and performance in honors and advanced placement (AP) courses, and (5) depth and quality of senior-year coursework.

You should take as many honors and advanced placement courses as possible and should try to exceed the minimum academic subject requirements in all subjects, particularly mathematics, laboratory sciences, and foreign languages. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of academic courses. Overall performance must be well above average.

For detailed information on admission requirements for freshman students, see the UC Undergraduate Application Packet or contact UARS.

Admission as a Transfer Student

A transfer applicant has been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) You may not disregard your college record and apply for admission as a freshman. Priority is given to junior-level applicants. If you wish to transfer to UCLA, you should follow these general guidelines:

(1) See your college counselor, who can help you identify the courses you should take to prepare for your intended major, and make certain the courses you are currently taking are transferable.
(2) Take as many English and mathematics courses as possible. UCLA’s academic program is rigorous and requires a strong background in both critical and quantitative skills. English and mathematics are the most important subjects you can take.

(3) Begin to satisfy the Transfer Core Curriculum or general education requirements and fulfill prerequisites for your intended major. Because a sound liberal arts education encompasses more than an in-depth knowledge of one field, the College of Letters and Science and most schools at UCLA require that students take coursework in areas outside their major. Before transferring to UCLA, you can take courses to satisfy these general education requirements as well as fulfill some of the required “prerequisite” courses for your major.

For more detailed information on admission requirements for transfer students, see the UC Undergraduate Application Packet or contact UARS.

Intercampus Transfers
Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the UC Undergraduate Application Packet and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see “When to Apply” at the beginning of this chapter). If you have attended another UC campus and wish to be considered for admission to UCLA, you must have been in good standing when you left that campus. Intercampus transfers are not automatic; you must compete with all other applicants.

Senior-Level Applicants
Students attaining senior standing are not generally admitted by the University.

Second Bachelor’s Degree Applicants
By policy, second bachelor’s degrees are not generally granted by the University, except in the School of Nursing.

Transfer Credit and Credit by Examination
The University gives unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by the Office of Undergraduate Admissions and Relations with Schools (UARS). All courses which meet the criteria are used in determining your eligibility for admission. (To convert semester units into quarter units, multiply the semester units by $1.5$ — e.g., $12$ semester units $\times 1.5 = 18$ quarter units.)

College credit for examinations given by national testing services is generally not allowed, except for the Advanced Placement examinations given by the College Board. Contact UARS for more information.

Applicants from Other Countries
To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certificate of completion which would enable them to be admitted to a university in the home country.

Your application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted as early as possible after the filing period opens (see “When to Apply” at the beginning of this chapter). This will allow time for the necessary correspondence and, if you are admitted, to obtain your passport visa.

Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. To demonstrate that command, you are required to take the UCLA English as a Second Language Placement Examination (ESLPE). Depending on your ESLPE results, you may have to complete one or more English as a second language courses. In addition, you are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing your ability. Make arrangements for this test by writing to the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Have your test results sent directly to the UCLA Office of Undergraduate Admissions and Relations with Schools.

Mandatory Medical Insurance Requirement
UCLA requires, as a condition of registration, that all international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment. See “Mandatory Medical Insurance Requirement for International Students” in the “Undergraduate Registration and Enrollment” section later in this chapter for a description of what constitutes adequate medical insurance. Most travel insurance plans and NAFSA international plans are NOT acceptable; medical insurance plans from your home country (including Canada) also are NOT acceptable.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For undergraduates the MIP fee appears as a voluntary option to be added to the fee assessment total on the UCLA Fee Statement portion of the Registration Form each term. This is the only method by which MIP can be purchased.

If you decide to waive out of MIP because you have adequate private medical insurance, you must complete a Medical Insurance Waiver Request, available from the Student Health Service (SHS) Insurance Office, which you must return to that office during Fall Quarter. For further information on MIP or adequate medical insurance requirements, call the SHS Insurance Office at 825-1856.

Readmission
Undergraduate students are required to apply for readmission only if they are absent from the University for more than one term. Thus, if you complete a term and then withdraw, cancel, or fail to register for the next term, registration materials will be available for you for the term immediately following.

If you are absent for two or more consecutive terms, you must file an application for readmission with the Registrar. During the 1990-91 academic year, all such students returning in the same standing (undergraduate) must file applications for readmission as follows:

<table>
<thead>
<tr>
<th>Filing Deadlines</th>
</tr>
</thead>
<tbody>
<tr>
<td>August 15 for Fall Quarter 1990</td>
</tr>
<tr>
<td>November 25 for Winter Quarter 1991</td>
</tr>
<tr>
<td>February 25 for Spring Quarter 1991</td>
</tr>
</tbody>
</table>

Applications are available from the Registration Office, 1113 Murphy Hall. Your completed application must be accompanied by a $40 application fee (nonrefundable) and transcripts of records from any other institutions (including UCLA Extension) you attended during your absence. Readmission is generally approved if you were in good academic standing (2.0 grade-point average) when you left the University, if coursework completed elsewhere in the interim is satisfactory, and if applications for readmission are filed on time. Your college or school may have other academic regulations governing readmission (consult the appropriate counseling office). Contact the Registration Office at (213) 825-1091 for further information on readmission.
Undergraduate Registration and Enrollment

Information:
Registration Office  1113 Murphy Hall
   (213) 825-1091
Enrollment Office  1115 Murphy Hall
   (213) 206-0488

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly Schedule of Classes, available for purchase at the Students' Store several weeks before the beginning of each term. To obtain a copy by mail, write to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, Attn: Mail Out. Include a check or money order for $2.60 payable to ASUCLA.

Registration consists of paying fees and enrolling in classes. The Registration Form, issued by the Registrar, is used for paying fees and for requesting enrollment in classes. You must complete both processes by the established deadlines to be officially registered and enrolled for the term. Advance payment is required of all eligible students. Payments may be mailed, deposited in the Main Cashier's Drop Slot, or made in person at 1125 Murphy Hall during the published payment period. Payments submitted after the published fee deadline will be assessed an additional $50 late payment fee. Students on financial aid may be eligible for a waiver of the $50 fee if funds are delayed by the University.

Deadline Dates
(Tentative only; consult Schedule of Classes for firm dates.)

Fee Payment Deadlines:
   September 7 for Fall Quarter 1990
   December 14 for Winter Quarter 1991
   March 8 for Spring Quarter 1991

Classes Dropped for Failure to Pay Registration Fees:
   September 28 for Fall Quarter 1990
   January 4 for Winter Quarter 1991
   March 29 for Spring Quarter 1991

Mandatory Medical Insurance Requirement for International Students

UCLA requires, as a condition of registration, that all international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For undergraduates the MIP fee appears as a voluntary option to be added to the fee assessment total on the UCLA Fee Statement portion of the Registration Form each term. This is the only method by which MIP can be purchased.

If you decide to waive out of MIP because you have adequate private medical insurance, you must complete a Medical Insurance Waiver Request, available from the Student Health Service (SHS) Insurance Office, which you must return to that office during Fall Quarter. Otherwise you must purchase MIP when you pay your registration fees each term.

An adequate private medical insurance plan must provide all of the following minimum benefits:

1. It must provide a minimum of $80,000 in "Lifetime Maximum" benefits.
2. It must limit the subscriber's out-of-pocket expense to a maximum of $5,000 for deductibles and copayments for covered services.
3. It must not have restricted scheduled daily maximums or dollar amount limits for in-hospital services or semiprivate rooms.
4. Maximum period of exclusion for preexisting conditions must be no more than two years.
5. It must not exclude benefits for injuries incurred from motor vehicle accidents or self-inflicted (attempted suicide) injury.
6. Participating member health maintenance organizations (HMOs such as Health Net and Kaiser) must be located within 100 miles of the UCLA campus.
7. It must be a U.S.-based insurance company with all administrative and claims operations conducted in the United States of America. Foreign embassy representatives or individuals acting on your behalf do not constitute insurance companies. Most travel insurance plans and NAFSA international plans DO NOT meet the adequate insurance requirement.

If your private medical insurance plan does not meet all of the above requirements, you must purchase MIP. For further information on MIP or adequate medical insurance requirements, call the SHS Insurance Office at 825-1856.

Enrollment in Classes

The quarterly Schedule of Classes contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the Schedule and with the aid of academic counseling from your school or college advisers, you can assemble a program of courses (see "Choosing Your Major" and "Planning a Program" later in this chapter).

You should plan two or three alternate programs in case your first choice of courses is not available. You may not choose two courses in the same final examination group and should not select classes that conflict in meeting times. If conflicts are unavoidable, consult with the instructor of each course at the first class meeting.

Telephone Enrollment

The UCLA Telephone Enrollment System is a specialized computer interface which allows you, the student, to directly access UCLA's enrollment data base by using a touch-tone telephone. A digitally recorded human voice instructs you through each transaction. By using this telephone access, you can enroll in classes, add or drop classes/sections, put yourself on the wait list for a class, change the grading basis for a class (i.e., Passed/Not Passed), obtain a reading of your Study List, exchange a class/section for another, and check your wait list position. You enroll during the appointment periods printed on your Registration Form. Consult the Schedule of Classes for full enrollment details.
In-Person Enrollment
For classes that require written approval or specialized processing, you may enroll at the Enrollment Office, 1115 Murphy Hall, during the telephone appointment period or, when classes begin, at the enrollment processing area in Ackerman Union.

Study Lists
On Friday of the second week of instruction the Study List of enrolled courses becomes “official,” all wait lists are eliminated, and a computerized Official Study List is mailed to each registered student. (If you do not receive yours within 10 days, obtain a copy at the Enrollment Office, 1115 Murphy Hall.) You are responsible for all courses and the grading basis as listed on the Official Study List, and you cannot receive credit for courses not listed. Unapproved withdrawal from or neglect of a course entered on the Study List will result in a failing grade.

Beginning with the third week of instruction, changes to your Official Study List require an Enrollment Petition from your college or school. There is a fee for the petition, and approval signatures are required before processing. If you add a special studies (199) course, you must also bring an approved copy of the Petition for Enrollment in Special Studies 199 Course. Consult the Schedule of Classes for deadlines and complete instructions. Note: When retroactive approval is given, in exceptional cases, to drop a course or to change the grading basis, the course and action will appear on the official transcript.

Change of College/School or Major
Changing your college/school or major requires the approval of the college/school or department you want to attend. Applications are made by petition, which is available without charge from the college or school office. You may not change majors after the opening of the last term of your senior year.
Undergraduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar’s Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of $1,972 per term (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each term, all undergraduates must pay the following fixed fees. Fees for Fall Quarter 1990 are current as of publication date but are subject to change without notice by the Regents.

<table>
<thead>
<tr>
<th>Quarterly Expenses, Fall 1990</th>
</tr>
</thead>
<tbody>
<tr>
<td>University registration fee</td>
</tr>
<tr>
<td>Education fee</td>
</tr>
<tr>
<td>Ackerman Student Union fee</td>
</tr>
<tr>
<td>Associated Students (ASUCLA) fee</td>
</tr>
<tr>
<td>Wooden Recreation Center fee</td>
</tr>
<tr>
<td>Total for California residents</td>
</tr>
<tr>
<td>Nonresident tuition fee</td>
</tr>
<tr>
<td>Total for nonresidents</td>
</tr>
</tbody>
</table>

The registration fee covers certain student expenses for counseling service, all laboratory and course fees, athletic and gymnasium facilities and equipment, lockers, registration, graduation, and care and treatment on campus by the Student Health Service. This fee is charged whether or not you make use of these services.

Other Fees

Miscellaneous fees charged to UCLA undergraduates include a $50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes). A $60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). Minimal charges of $5 or less are assessed for most petitions and other special requests. A complete list of fees may be found in the Schedule of Classes.

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction may receive partial refunds of fees. For the refund schedule and more information, see “Withdrawal” in Chapter 4 of this catalog or consult the Schedule of Classes for specific refund dates for each term.

Reduced Fee Programs

UCLA recognizes the need for undergraduate part-time study in special circumstances. If you have ongoing family or employment responsibilities or health problems which preclude full-time study, you may qualify for part-time enrollment.

If you have approval from your college or school to enroll in 10 units or less, you may qualify for a fee reduction. Nonresident students pay only half the nonresident tuition fee; residents pay half the education fee. You must file the Request for Fee Reduction form with your college or school by Friday of the second week of instruction. Fee assessment is based on total units enrolled as of Friday of the third week of instruction.

Living Expenses

Printed below are the estimated yearly budgets for undergraduate California residents. Nonresidents must add the $5,916 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session terms of the 1990-91 academic year and do not include Summer Sessions. The budgets are designed to serve as a guide only.

*If you are assigned a room in a residential suite, add $600.
**Includes $100 for extra meals during breaks.

For more information on housing, see Chapter 1 or contact the UCLA Community Housing Office, 270 De Neve Drive (825-4491).
Financial Support

Information:
Financial Aid Office
A129J Murphy Hall
(213) 206-0432

It is not required that you come from a low-income family in order to qualify for financial aid. You must, however, demonstrate "financial need," which is defined as the difference between the cost of attending UCLA and the amount that you and your family should be able to contribute. The University expects that students and their families will bear as much of the necessary cost of a student's education as their circumstances will permit.

The Financial Aid Office publishes a Financial Aid Handbook which provides more complete information than this catalog can give. You can get a copy free of charge from the Financial Aid Office, A129J Murphy Hall, University of California, Los Angeles, CA 90024-1435.

Applying for Financial Aid

The deadline for filing all undergraduate financial aid applications for academic year 1991-92 is March 2, 1991 (applications for 1990-91 would have had to be filed by March 1990). Because of the limits being placed on financial aid funding, meeting deadlines is more crucial than ever. Applications received after the deadline will be considered only if funds are still available. The Daily Bruin and other campus media publish information on deadline dates.

Prospective students must first apply for admission to UCLA by filing the UC Undergraduate Application Packet during the filing period (see "Undergraduate Admission" at the beginning of this chapter). You can also use the admissions application to apply for undergraduate scholarships.

Student Aid Application for California (SAAC)

One of the key assumptions of financial aid is that parents, to the extent that they can contribute, have primary responsibility for financing the cost of a student's education. To permit an evaluation of need, all students who apply for need-based aid must provide financial information on the Student Aid Application for California (SAAC). If you are financially independent according to financial aid guidelines, your own financial circumstances are analyzed rather than those of your parents.

The SAAC is used to apply for Pell Grants, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. It is available from California high schools and colleges and from the UCLA Financial Aid Office, and should be filed by March 2 with the appropriate processing service. Be sure to indicate that a report is to be sent to UCLA.

Continuing students may obtain UCLA Scholarship and Financial Aid Application Packets beginning in January of each year at the Financial Aid Office. Continuing undergraduate students from foreign countries may pick up a Financial Aid Application for International Students at the same office. No financial aid can be awarded to international students in their first year of attendance at UCLA.

Kinds of Financial Aid

There are four basic kinds of aid: scholarships, grants, loans, and work-study employment. Since most students are eligible for several of these, the Financial Aid Office usually offers a combination "package" consisting of some money that is a gift (scholarship or grant) and some that will have to be paid back or worked for. If you indicate a preference for work or loan, the Financial Aid Office will attempt to honor it.

Unless otherwise stated, you must demonstrate financial need to qualify for aid, and you must be making normal academic progress as defined by your college or school and department.

Scholarships

Scholarships are gifts that do not have to be repaid. The Undergraduate Scholarship Program at UCLA rewards academic excellence and promise and provides assistance in meeting the expenses of an undergraduate education. Scholarships are expected to create opportunities for further academic growth and development.

Financial need is a prerequisite only for University and name (endowed) scholarships other than those listed below. Each year approximately $300,000 is awarded from the many different scholarship funds. Awards range from $100 to $2,000 and are not renewable. You must reapply each year for continued consideration.

Regents Scholarships

One of the highest honors that may be conferred on an undergraduate student is the awarding of a Regents Scholarship. Unlike other University scholarships, these are awarded for four years to students entering from high school, and for two years to juniors. A UCLA faculty committee selects Regents Scholars on the basis of their exceptional academic achievement and promise. Financial need is not a criterion for this award; scholars receive a yearly honorarium of $500 if they have no financial need. Scholars who establish financial need by filing the SAAC receive a yearly stipend to cover the amount of their need. In addition to the monetary awards, Regents Scholars receive special privileges.

National Merit Scholarships

UCLA sponsors a number of four-year scholarships for entering freshmen who are finalists in the National Merit Scholarship competition. Finalists who are admitted to UCLA must select UCLA as their institution of choice and must meet UCLA's scholarship criteria in order to receive a UCLA Merit Scholarship. Awards range from $500 to $2,000.

UCLA Alumni Association Scholarships

Alumni Scholarships are available to California high school graduates who will be UCLA freshmen in the Fall Quarter. No financial need is involved, but eligibility requirements exist, and you should have demonstrated leadership ability, be involved in extracurricular activities, and show academic excellence and promise. Alumni Scholarships are merit-based and competitively awarded; amounts range from $500 to $10,000. The Ralph Bunche Scholarship, also awarded by the UCLA Alumni Association and named in honor of the Nobel Peace Prize laureate and UCLA alumnus, is awarded to students from historically underrepresented backgrounds.

ROTC Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of $100 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, 825-7381; Air Force, 825-1742; Navy, 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Completed applications should be received prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Three- and two-year scholarship applications may be obtained from the appropriate UCLA department and must be submitted prior to February 1.
Grants
Grants are gifts that do not have to be repaid and are based solely on need. Whenever guidelines and funds permit, your financial aid package will include a grant.

Pell Grants
Pell Grants are federal aid programs intended to be the “floor” of financial aid packages. As such, they may be combined with other forms of aid in order to meet the full costs of education. Amounts for 1990-91 range from $200 to $2,300, depending on federal funding, and are determined by your own and your family’s financial resources. U.S. citizens, permanent residents, and refugees are eligible to apply by filing the SAAC. The University requires all eligible undergraduates to apply for a Pell Grant.

Cal Grants A and B
California residents who have not completed more than nine quarters or six semesters of college work prior to September 1990 are eligible to apply for a California Student Aid Commission Cal Grant award. The SAAC is the official application for these programs. “Cal Grant A” awards are applied toward education and registration fees. They are based on need and academic achievement and are renewable each year. “Cal Grant B” awards are intended to assist low-income families and are renewable annually.

State University Grants
These grants provide eligible students with financial assistance from state funds. Awards range from $100 to $5,800. All students are considered.

Supplemental Educational Opportunity Grants
These awards are federally funded and are granted only to undergraduates with financial need. Awards range from $100 to $2,000. Recipients must be U.S. citizens or eligible noncitizens.

Loans
Loans allow you to postpone paying some of the costs of your education until you have completed school. A financial aid offer almost always includes a long-term, low-interest loan. The loans come from revolving funds; most repayments are immediately released to current students.

Federal and California Stafford Student Loans (formerly known as Guaranteed Student Loans) are long-term need-based loans made by banks, savings and loan associations, and credit unions. They are available to U.S. citizens, permanent residents, or refugees who are enrolled in at least a half-time program at UCLA. You should check with various lending institutions to determine their particular loan policies, but the Financial Aid Office must process applications before you submit them to a lending institution. Applications are available from the Student Loan Services Office, A227 Murphy Hall.

Repayment of the SSL begins six to nine months after graduation or withdrawal and continues for a maximum of 10 years. Undergraduates may borrow from $2,625 to $4,000 per academic year up to a total of $17,250. SSL processing takes approximately 10 to 12 weeks.

Work-Study Programs
Work-study is a need-based program designed to expand part-time job opportunities for students. The program allows you to work a maximum of 20 hours per week while attending school and 40 hours per week during breaks. An academic year’s work-study award may range from $1,000 to $6,000, but your gross earnings may not exceed the amount awarded to you. There are two basic work-study programs available.

Under College Work-Study, the federal government pays a portion of your hourly wage; your employer contributes the balance. Whenever possible, work is related to your educational objectives. Employment may be on or off campus. Hourly pay rates comply with minimum wage laws and vary with the nature of your work, experience, and capabilities. To be eligible you must be a U.S. citizen, permanent resident, or a refugee.

The President’s Work-Study program is administered in the same manner as College Work-Study except that The Regents of the University and your employer provide funding, and you are limited to on-campus jobs. All students are eligible to apply.

*These majors have been transferred to the College of Letters and Science.
Getting Your Bachelor’s Degree

The College and Schools

The UCLA campus consists of one college and 13 schools, most of which are subdivided into departments. The courses of instruction are administered within the departments.

The College of Letters and Science provides a broad, nonprofessionally oriented curriculum leading to both undergraduate and graduate degrees.

The schools provide training for specific professions and are authorized to grant professional degrees (e.g., Master of Business Administration, Doctor of Education, Master of Public Health). UCLA has 13 professional schools, four of which offer undergraduate degree programs: School of the Arts, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television.

Each college and school has its own degree requirements and is headed by a dean or provost who has final academic authority. Thus, when you attend UCLA, you are enrolled not only at the University of California, Los Angeles campus, but in a specific college or school within the University. Your academic life is governed by the college or school which houses your major.

As the chart on the previous pages shows, UCLA offers Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in a broad range of disciplines. There are no undergraduate minors at UCLA, but there are a number of special programs which you may complete as an adjunct to your major. The bachelor’s degree (you may earn only one) is the culmination of your undergraduate work; master’s and doctoral degrees are earned in graduate study.

Knowing Your Responsibilities

UCLA provides its students with a wide variety of academic assistance and personal support resources, but it is up to you to realize when you need help and to seek it out. It is also your responsibility to keep informed and to comply with the rules, regulations, and policies affecting your academic standing and your life as a UCLA student. Consult this catalog, the college and school announcements, and the Schedule of Classes for the information you need; watch for official announcements in the Daily Bruin and on campus bulletin boards. Meeting academic deadlines, monitoring your Study List for accuracy, completing prerequisites, and satisfying degree requirements are all part of your academic duties as a student. Living up to your responsibilities will add immeasurably to the value and enjoyment of your education (also see “Student Conduct” in the Appendix of this catalog).

Choosing Your Major

One of the most important decisions you will have to make in college is your choice of major — the field of study which represents your principal academic interest and which will possibly contribute toward your career goals. Some students select their major at the time they fill out the University’s application for admission. A far greater number, however, are undecided about their major.

If you are in the College of Letters and Science, you do not need to declare your major in your freshman year. The college allows you to attend with an undeclared major until the end of your sophomore year. In fact, if you are not certain of your specific academic goals, it is often wise to wait and explore the diversity of subject areas offered at UCLA. Enroll in introductory courses (usually numbered below 100) in a variety of disciplines to learn the scope and vocabulary of the major. It is not unusual for students to become enthusiastic about disciplines previously unfamiliar to them. With careful planning, such courses may also apply toward fulfilling college requirements for whatever major you choose. To narrow your choices further, carefully consider general college requirements, the description of courses offered in the major, and the departmental requirements for completing the program of study. Look at the books required for each course. Sit in on a few classes and talk with professors during their office hours. Discuss your interests and plans with a departmental counselor or faculty adviser, a college counselor, or with advisers in the Placement and Career Planning Center.

A few words of warning: certain majors, especially in the arts, engineering, and the sciences, require early declaration. Some have enrollment quotas and will allow application by new majors only during a specified term. Check with the departmental adviser for the majors that interest you.

In addition, each UCLA undergraduate is limited to between 208 and 216 quarter units, depending on the college or school, to complete the academic program and fulfill all degree requirements. So, if you wait to declare a major, don’t wait too long. In any case, you must declare a major by the beginning of your junior year (90 quarter units).

When you are ready to declare your major, or if you wish to change from one major to another, pick up a Petition for Change of Major at the college or school office. There is no fee for this petition.

Planning a Program

Every new student should obtain academic counseling before enrolling in classes at UCLA (counseling is required in the School of Engineering and Applied Science). Working with a tentative major in mind, you need to plan courses to satisfy all of the degree requirements while staying within the minimum and maximum number of units required for graduation. The Orientation program for new students will take you through a step-by-step plan for an effective program (see “Orientation” later in this chapter). If you cannot attend Orientation, see your college or school adviser or, if you have selected a major, make an appointment with your major department adviser before enrolling in classes.

Undergraduate Degree Requirements

In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college-level coursework for the bachelor’s degree at UCLA. A maximum of 208 units is allowed in the School of the Arts, School of Nursing, and School of Theater, Film, and Television; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 187 and 201 (depending on the program); 213 maximum units are allowed.

As you work toward a bachelor’s degree, be aware that in addition to unit requirements there are three types of requirements which you must satisfy. The first type consists of Universitywide requirements which all undergraduates must satisfy; the rest vary depending on your major and the college or school which offers it.
(1) University requirements — Subject A or English as a Second Language (ESL), and American History and Institutions;

(2) College or school requirements (e.g., credit and scholarship, English composition, general education requirements);

(3) Department requirements (courses in preparation for the major and in satisfaction of the major).

University requirements are described below. Turn to “Requirements for the Bachelor’s Degree” in the appropriate school or college chapter for a description of the college or school requirements, and then to the individual departments within each college and school for the department requirements.

University Requirements

The University of California has established two requirements which all undergraduates must satisfy in order to graduate:

(1) University requirements

(2) College or school requirements (e.g., credit and scholarship, English composition, general education requirements)

Graduation that you must satisfy before entering UCLA or during your first year in residence. You may meet this requirement by:

(1) Scoring 3, 4, or 5 on one of the College Entrance Examination Board (CEEB) Advanced Placement Tests in English OR

(2) Scoring 800 or better on the CEEB Achievement Test in English Composition OR

(3) Presenting transfer credit for an acceptable college-level course in English composition (passed with a grade of C or better) at another institution OR

(4) Passing the Subject A Examination. All freshmen from California high schools should have taken the Universitywide Subject A Examination in May 1990; others will take an examination at UCLA early in their first term.

If you do not meet the requirement in one of the ways described above, Academic Senate regulations require you to enroll in either English A or 2 (determined by performance on the Subject A Examination) as early as possible during your first year in residence. Each course must be taken for a letter grade and passed with a grade of C or better. If you receive a final grade of C− or less, you must repeat the course during your next term in residence. Satisfaction of the Subject A requirement is a prerequisite to English 3 and all subsequent English courses.

English as a Second Language (ESL) Students: If your native language is not English, you are required to take the UCLA English as a Second Language Placement Examination (ESLPE) in addition to the Subject A Examination. Results of both examinations will be reviewed to determine which track (Subject A or ESL) better meets your needs. If you are placed in the Subject A track, you may satisfy the Subject A requirement by following the guidelines listed above. If you are placed in the ESL track, you may satisfy the requirement by completing the required courses in the English as a Second Language 33 series — one or more of courses 33A, 33B, 33C — and 35, depending on your ESLPE results. Each course must be passed with a grade of C or better (C− or a Passed grade is not acceptable). You must begin taking the required courses during your first term in residence at UCLA and then proceed in the English as a Second Language 33 series followed by course 35. All units apply toward graduation but cannot be applied toward general education requirements.

Transfer students whose native language is not English may be required by the Office of Undergraduate Admissions and Relations with Schools to take the ESLPE even if they have received transfer credit for an acceptable college-level course in English composition at another institution. Those without transfer credit must take both the ESLPE and the Subject A Examination.

American History and Institutions

This requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the U.S. under the federal and state constitutions. Candidates for a bachelor’s degree must satisfy the requirement in American History and Institutions by one of the following methods:

(1) Completing a year’s course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better OR

(2) Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:

- Afro-American Studies M104A, M104B, M158A, M158B, M158C
- Chicano Studies M159A, M159B
- Economics 183
- English 80, 85, M104A, M104B, 115A, 170, 171, 172, 173, 174, 176, 177
- Geography 136
- Political Science 1, 70, 114A, 114B, 143, 144, 145, 172A, 172B, 183A
- Equivalent courses completed in UCLA Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement OR

(3) Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state OR

(4) Scoring 500 or better on the College Entrance Examination Board (CEEB) Achievement Test in American History OR

(5) Scoring 3, 4, or 5 on the CEEB Advanced Placement Test in American History.

Candidates for an instructional credential, but not for a degree, must take one of the following courses: History 7A, 7B, 151A, 151B, Political Science 172A, or 172B.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the U.S.

For more information on this requirement, contact the undergraduate History Department counselor in 6248 Bunche Hall (825-3720).

Course Credit and Minimum Scholarship

The grades A through C and Passed denote satisfactory progress toward the bachelor’s degree. The grades C− through D− yield unit credit but may not satisfy certain scholarship requirements. Even when they do, they must be offset by grades of C+ or better in other courses.

In order to qualify for a bachelor’s degree in any college or school at UCLA, you must earn at least a C (2.0) average in all courses taken at any University of California campus. If you fail to maintain this level, you may be placed on academic probation or may become subject to dismissal.

Academic Probation

You will be placed on probation if your overall grade-point average falls between 1.5 and 1.99 or if you do not earn at least a 2.0 GPA in any one term. While you are on probation, you may not take any course on a Passed/Not Passed basis, and you may have to limit your Study List to 12 units.
Your probation will end at the close of a regular term if you have attained a C (2.0) average for the term and a cumulative C average in all University work. If you do not end probation within two terms, you will become subject to dismissal.

**Academic Dismissal**

You will be subject to dismissal from the University under any of the following conditions:

1. If your grade-point average in any one term is less than 1.5 OR
2. If you do not earn at least a C (2.0) average in any term when you are on probation OR
3. If you do not end probation within two terms.

If you are subject to dismissal, your transcript will carry that notation. You should make an appointment with your college or school counselor. Depending on your situation, you will be given conditions for continuation, or you will be dismissed from the University.

Your college or school counselor can explain the conditions for readmission if you wish to return to the University after dismissal (see “Readmission” earlier in this chapter).

**Progress Toward the Bachelor’s Degree**

UCLA is a full-time educational institution, and students are expected to complete their undergraduate degree requirements and graduate within four years.

The normal program for undergraduate students is three to four courses (12 to 16 units) per term. Each college and school enforces minimum enrollment or minimum progress regulations. You may be subject to disqualification for failing to meet minimum progress requirements. Check with your college or school counselor. Please read the degree requirements section under each college and school for specific Study List limits. See Chapter 4 for information on concurrent enrollment, credit by examination and credit from other institutions, and special studies (199) course limitations.
Academic Resources and Assistance

Alternative Academics

UCLA has a broad range of options that can lend an added dimension to your undergraduate academic program. You will find other services and programs available to both graduate students and undergraduates in Chapter 1 of this catalog.

Council on Educational Development

The Council on Educational Development (CED) offers special courses and programs that encourage educational diversity and enrichment for undergraduates. CED works closely with the college, schools, and research centers on campus to support new academic programs and courses. Many of these courses cover socially important issues which, because they are new, are not addressed in existing academic departments. Many involve nontraditional educational concepts, interdisciplinary topics, and subjects on the leading edge of faculty interest.

Each year several courses focus on medicine, law, and human values. Students analyze ethical, legal, and scientific values in medical and mental health care issues, such as genetic screening, human experimentation, patients’ rights, and medical technology.

For information about CED courses, consult the Schedule of Classes. Your college, school, or department can advise you about degree credit for CED courses. The office is located in 80 Powell Library (825-5467).

EXPO Center

The Extramural Programs and Opportunities (EXPO) Center offers access to a wide variety of off-campus learning experiences. For more information on any of the programs or services listed below, contact the EXPO Center, A213 Ackerman Union (825-0831).

UCLA Internship Program — More than 4,000 UCLA students have learned about the inner workings of government and business while serving in the internship program, the largest of its kind at any university in the nation. Bruins serve full-time internships for one or more terms on the staffs of elected officials, public interest groups, government agencies, and corporate offices in Sacramento, Washington, and overseas. Others are participating in business, banking, and the arts in New York, San Francisco, and Los Angeles. Stipends for students in the program can be arranged.

International Opportunity Counseling Service — The EXPO Center counsels students on study, travel, and work opportunities outside the U.S., offering information on some 2,400 overseas study programs open to UCLA students. EXPO also maintains a library of current materials related to study and travel opportunities abroad. International Student Identity Cards and Youth Hostel memberships are issued at the center.

Field Studies Development

Field Studies Development, a division of the Office of Instructional Development, helps students, faculty, and academic departments to develop meaningful learning experiences outside the classroom. These may be in the form of internships, field studies or research, community service, or cooperative education programs. The office is located in 70 Powell Library (825-7867).

Departmental Field Studies Development — Academic field study programs have been developed in anthropology, Asian American studies, business and administration, communication studies, education, English, folklore, geography, history, kinesiology, psychology, sociology, urban planning, and women’s studies. Departmental coordinators work with you to develop field projects and find placements and academic sponsors.

Independent Field Studies — You may design internships and field study opportunities to meet your specific academic, personal, and career goals. A field study coordinator assists you with your plans and helps identify faculty sponsors for your field study. Most departments offer independent field study opportunities.

Community Service — Learning Programs — These programs enable students to do community service while studying topics related to economics, history, sociology, education, or urban planning.

Sequential or Immersion Options — Field Studies Development cosponsors multiple course sequences (taken during one term or over a period of two or three terms) where students study a single issue from different perspectives. For example, the Sociology Department sponsored a three-course “term” which focused on the control of crime issue, and the Geography and Sociology Departments sponsor a three-term program for first- and second-year students on the study of the urban underclass.

Developmental Disabilities Immersion Program (DDIP) — Cosponsored by Field Studies Development and the Departments of Psychology and Psychiatry, DDIP offers an intensive living, studying, and working experience in developmental disabilities. The program is a full two-term sequence offered in Winter and Spring Quarters. For more information, call 825-1627.

Freshman and Sophomore Programs

Honors Collegium

The Honors Collegium is an innovative educational alternative designed primarily for UCLA’s promising freshmen and sophomores. For a complete description of this program, see Chapter 5 on the College of Letters and Science.

Professional Schools Seminar Program (PSSP)

This program offers seminars that explore topics bridging various academic disciplines and professional practice. Students seeking to define their own academic and career goals will gain valuable exposure to (1) research frontiers in the professions, (2) policy and ethical issues, and (3) historical and sociological perspectives on professional practice.

Seminars are offered in Fall, Winter, and Spring Quarters (consult the Schedule of Classes). Enrollment is limited to allow students close contact with professional school faculty members; lower division students are preferred. You must satisfy the Subject A requirement before enrolling in these seminars. General education credit is granted for most seminars. For further information, contact the PSSP in 80 Powell Library (825-5467).
Individual Classes
Most departments offer the individual study (199) course for seniors — or juniors with at least a B average — who want to pursue a particular research interest. Consult your department or the departmental listings in this catalog for further information.

Individual Majors
Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

The requirements for an individual major vary with each college and school at UCLA, although maintaining a high scholastic average is usually mandatory. Please refer to the appropriate college or school chapter.

Reserve Officer Training Corps (ROTC)
The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows you to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing your college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs carry a monthly stipend in the junior and senior years, and additional financial aid is available to qualified students. Individual programs are described in detail in Chapter 5 on the College of Letters and Science.

Student Research Program (SRP)
The Student Research Program is designed to provide UCLA undergraduates the opportunity to participate in a research project with a senior faculty member. You select a faculty sponsor from the SRP directory or on your own, and the two of you agree on a contract detailing the nature of your tasks and your specific time commitment. Participation is voluntary, and you receive a notation on your transcript after successfully completing the time commitment for the term.

All undergraduates in good academic standing are eligible to participate. Research opportunities exist in most academic departments within the College of Letters and Science, in the arts, and in most of the graduate and professional schools. In addition, funds are available to reimburse students or departments for research-related costs incurred during active participation in the program. For further information, contact the SRP Office in 70A Kinsey Hall (825-6443).

Teaching Careers
Although UCLA has no undergraduate major in education, you may prepare for a career in teaching and/or education on campus. Information is available from the following offices:

(1) Specialization in Education Program Office, 201 Moore Hall, for information regarding this newly established specialization. The program is described in detail in Chapter 5 on the College of Letters and Science.

(2) College of Letters and Science Counseling Service, A316 Murphy Hall, for information regarding the Diversified Liberal Arts Program for instructional credential candidates. The program is described in detail in Chapter 5 on the College of Letters and Science.

(3) Placement and Career Planning Center, for information on employment opportunities in teaching and education.

(4) UCLA Graduate School of Education Office of Student Services, 201 Moore Hall, for information on master's and doctoral degree programs in education and current information on requirements for various instructional credentials.

Advising and Academic Assistance
UCLA's academic standards are high, and many students find they need some form of academic assistance. Help is available in several forms: staff and student counselors, faculty advisers, services, and special programs. You need only to seek it out. This section introduces you to the many kinds of assistance available to undergraduates. Refer to the section on "Student Services" in Chapter 1 for other helpful programs.

College and School Advisers
Each college/school and academic department at UCLA has a staff of academic counselors and advisers who are knowledgeable and experienced. They are eager to help you plan your academic program, monitor your progress toward the bachelor's degree, provide information about college and major requirements and prerequisites, and assist you with academic problems, improving study habits, and program planning. Counseling offices for each undergraduate college and school are listed below.

College of Letters and Science — A316 Murphy Hall, 825-1965 or 825-3382 (Honors Programs — A311 Murphy Hall, 825-1553 or 825-3786)
School of the Arts — A239 Murphy Hall, 825-9705
School of Engineering and Applied Science — 6426 Boelter Hall, 825-2826
School of Nursing — 2-200 Factor Building, 825-7181
School of Theater, Film, and Television — A239 Murphy Hall, 825-9705

Counseling Assistants
Counseling assistants (CAs) are UCLA graduate students who have been specially trained to help new students with the transition into university life. Employed by the Division of Honors and Undergraduate Programs in the College of Letters and Science, they represent a number of academic disciplines in the college and in several schools on campus. CAs help new students during Orientation with program planning and course selection, and are available throughout the year for follow-up visits and to provide help with program planning, skill building, and personal support. You may make an appointment with a CA in A316 Murphy Hall (206-6681).

ASK Peer Counselors
The ASK program provides an extension to the counseling services available to College of Letters and Science undergraduates. ASK counselors are students trained to provide you with academic information, advisement, and referral in a convenient walk-up setting.

You can find ASK counselors at these campus locations: Campbell Hall (southwest corner), Placement and Career Planning Center, Powell Library (southeast corner), Royce-Powell Quad, and A316 Murphy Hall, weekdays 10 a.m. to 2 p.m.; in front of 1105 Murphy Hall, weekdays 9 a.m. to 4 p.m. During registration and open enrollment periods every term, ASK counselors are also available from 9 a.m. to 4 p.m daily in the computer room in Ackerman Union.
Orientation and Tutorial Services

Orientation
Orientation at UCLA provides a comprehensive introduction to campus life. During the summer and before the beginning of Winter and Spring Quarters, special programs offer new undergraduates extensive academic counseling and educational planning. During Orientation you work in small groups with peer counselors and professional academic advisors. You gain insight into necessary academic skills, learn how to plan and construct your academic program, and become familiar with the educational opportunities, student services, and facilities available at UCLA. Individual counseling sessions help you adjust to University life and fulfill the advising requirements of the college and some schools. Sessions for parents are also offered.

During the summer, Orientation offers three-day, two-night dormitory live-in programs for freshmen and two-day, one-night programs for transfer students. Prior to Winter and Spring Quarters, a one-day on-campus program is offered. There is a fee for participation. For more information, contact the Orientation Office at 206-6685.

ARC Math/Sciences Tutorials
The Academic Resources Center Math/Sciences Tutorials, located in Dykstra Hall, provide an organized by-appointment tutorial program for Biology 2, 5, 6, 7, and 8, Chemistry and Biochemistry 2, 11A, and 11B, Economics 40, most math courses between Mathematics 1 and 32A, Physics 6A, 6B, 8A, and 10, Psychology 41, and Sociology 18. Trained tutors meet in small group sessions on a weekly basis, teaching methods to improve problem-solving skills and test-taking strategies. Requests for tutoring must be made during the first three weeks of the term; early registration is strongly advised. You may submit requests between 10 a.m. and 2 p.m. Monday through Friday, beginning the first day of classes. For more information, call 206-6965 or 825-7305.

ARC Composition Tutoring Lab and ESL Service Courses Tutorials
The Academic Resources Center Composition Tutoring Lab, in cooperation with the UCLA Writing Programs, offers individual assistance to students enrolled in English A, 2, and 3 and to students writing papers for other UCLA courses. The lab is staffed by trained undergraduate peer tutors who have shown outstanding ability in advanced composition courses and who can help students at any stage of the writing process—from generating and organizing ideas to polishing final drafts.

The ARC ESL Tutoring Lab assists nonnative-speaking students with English grammar, idioms, pronunciation, listening comprehension, and composition. Priority is given to students enrolled in English as a Second Language 33A, 33B, and 33C, and other ESL courses. The tutors are all graduate students pursuing degrees in teaching English as a second language.

Both the Composition and ESL Labs are located in 339 Kinsey Hall and offer free individual tutoring by appointment. For tutoring appointments or further information, call 206-1491.

Student Athletes Tutorial Services
The Student Athletes Tutorial Services provide tutoring in the evening and on weekends for intercollegiate athletes whose practice and competition schedules prevent them from participating in the Academic Resources Center (ARC) tutorial services. Eligible student athletes can receive regular individual or small group assistance in a wide range of courses, provided they request tutoring within the first four weeks of the term. Trained tutors clarify course content, teach study strategies and, in consultation with course instructors, develop problem-solving exercises and practice examinations to build learning and performance skills.

The coordinator is located on the second floor of the Morgan Center. For tutoring appointments and further information, call 825-8699.

Academic Advancement Program (AAP)
Located in Campbell Hall, the Academic Advancement Program is dedicated to expanding educational opportunities for over 6,000 underrepresented minority and low-income students. Through the Counseling Unit, Tutorial Unit, and Summer Program, AAP provides both personal and academic support services to its students in order to enhance their scholastic achievement and promote their successful pursuit of the bachelor's degree.

Counseling Unit
Throughout the academic year AAP freshman, advanced standing, learning skills, and peer counselors meet with students to facilitate their personal, social, and academic adjustment to UCLA and to assist them in clarifying problems, concerns, and goals. Individual counseling is available by appointment and on a walk-in basis; group counseling sessions are also available.

Incorporated within AAP in 1984, the federally funded Program Leading to Undergraduate Success (PLUS) provides counseling services to low-income, minority, and underprepared freshmen whose parents have never earned a bachelor's degree.

The Peer Counseling Center, staffed by students who have made a successful academic transition to UCLA, provides a student perspective on courses, study materials, and educational goals. All peer counselors undergo thorough training in University policies and counseling techniques; they inform students about resources, services, clubs, and organizations on a one-to-one basis.

AAP also offers a series of workshops on time management, reading comprehension, examination preparation, note taking, professional and/or graduate school entrance examination preparation, and other academic areas.

Tutorial Unit
The unit is staffed by approximately 200 upper division student tutors who provide academic support services in 15 major disciplines covering more than 450 different courses. Approximately 2,000 students receive tutoring every term on both an individual and group basis. Any AAP student is eligible to request tutoring.

Summer Program
The Summer Program is a six-week instructional program which offers students a firsthand introduction to UCLA through in-class instruction, tutorials, and learning workshops. You receive guidance on academic planning and are assured enrollment in Fall Quarter classes. You also have the option of residence hall living or commuting; cultural, social, and recreational activities, along with counseling assistance, are available.

The Summer Program for Freshmen (FSP) is designed to help entering freshmen meet UCLA's high academic standards by improving composition, mathematical, and general learning skills. Intensive English courses help students improve writing skills and meet the University's initial composition requirement. The program's mathematics courses prepare students for subsequent university-level mathematics courses, including calculus which is required for many majors at UCLA.

The Summer Program for Transfer Students (TPS) is designed to improve the composition and general learning skills of incoming transfer students and to acquaint them with key campus resources and counseling/career information. The program consists of a composition course and an upper division course which, if completed successfully, yield credit toward the bachelor's degree.

For more information regarding eligibility, application, and/or specific questions on services, contact the AAP Office in 1209 Campbell Hall (825-1481).
Learning Resource Centers (LRC)

The Instructional Media Laboratory provides individual student access to course-related interactive and videotape programs. Students, assigned by faculty to study specific supplementary materials, may learn at their own pace and at times that suit their individual schedules. The laboratory is located in 270 Powell Library (206-1211).

The Instructional Media Library is UCLA's central resource for the collection and maintenance of educational and instructional media. Materials from the collection are loaned to regularly scheduled UCLA classes and may be rented by organizations and individuals from the campus community. The library is authorized to monitor compliance with University guidelines and federal copyright law governing the use of video recordings. Reference books from educational and feature film distributors are available. The staff assists in researching media on any subject and obtaining materials from outside sources. Two screening rooms, located in 46 Powell Library, are available by appointment (825-0755).

The Language Laboratory is a full-service audio facility for teaching and learning languages. Students enrolled in foreign language classes are assigned by faculty to practice pronunciation, comprehension, and listening skills in the laboratory, 190 Powell Library (206-8855). Audio-tape programs which accompany specific texts used in classes and listening, recording, and monitoring equipment are available.

Petitions

A petition is a piece of paper representing your need or desire to be excepted from any standard rule or regulation in the University. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whoever has authority over your particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between you, your college or school and, in some cases, the department chair, granting you an exception from the existing regulations.

Petitions are also used at UCLA to change your college/school or major, take more or fewer units than regulations permit, make late changes to your Study List, remove an Incomplete grade, or obtain credit by examination. In addition, you may petition for concurrent enrollment, double major, or waiver of scholarship requirements. Petitions for most of these exceptions are available from your college/school or department.
Academic Excellence

Eligible students receive the following honors and awards in recognition of academic achievement.

**Dean’s Honors List**

The College of Letters and Science, School of the Arts, School of Engineering and Applied Science, and School of Theater, Film, and Television award Dean’s Honors to deserving students each term. The School of Nursing awards Dean’s Honors on an annual basis. These honors are based on the grade-point average attained within a specified number of units. Consult your college or school for further information.

**Honors with the Bachelor’s Degree**

Your college or school awards honors according to your overall GPA at graduation. To be eligible you must have completed at least 90 University of California units for a letter grade.

The levels of honors are *summa cum laude*, *magna cum laude*, and *cum laude*. Specific requirements vary for each level and are included in the appropriate college and school chapters.

**Departmental Honors**

In all campus units except the School of Engineering and Applied Science and the School of Nursing, departmental honors and highest honors are awarded at graduation on your major department’s recommendation, based on successful completion of a departmental honors program. Consult your department for its requirements.

**Departmental Scholar Program**

Departments in all campus units except the School of Nursing may nominate exceptionally promising juniors and seniors as UCLA Departmental Scholars to pursue bachelor’s and master’s degree programs simultaneously. Nominations are submitted to the college or school dean or provost for recommendation to the dean of the Graduate Division. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog).

**Honor Societies**

**Alpha Lambda Delta and Phi Eta Sigma**

Membership in these national freshman honor societies is based solely on academic achievement during your freshman year. To be eligible you must have a 3.5 GPA with 12 graded University of California units in the first term of your freshman year, or a cumulative 3.5 GPA at the end of the second and/or third terms. Invitations are issued in Winter Quarter, and initiation is held during Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (825-3871).

**Golden Key**

Golden Key is a national interdisciplinary academic honors organization dedicated to excellence. Students qualify on the basis of objective academic criteria; no more than the top 15 percent of enrolled juniors and seniors may be eligible. The society recognizes and encourages scholastic achievement and excellence in all undergraduate fields of study, unites with collegiate faculties and administrators in developing and maintaining high standards of education, provides economic assistance to outstanding members by means of an annual scholarship for initiates, and promotes scholastic achievement and altruistic conduct through voluntary service. Invitations are issued in Winter Quarter, and a reception is held in Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (825-3871).

**Mortar Board**

Mortar Board is a national honor society for college seniors which recognizes scholastic ability (a 3.0 GPA is required), outstanding and continual leadership, and dedicated service to the community. Membership applications are available from the Office of the Dean of Students, 1206 Murphy Hall (825-3871), during Winter Quarter.

**Phi Beta Kappa**

Phi Beta Kappa is a national honorary society in the humanities, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. (Students do not apply for Phi Beta Kappa membership.)

At UCLA only graduating seniors and selected juniors are elected to membership. The annual elections are held in November and May, with the initiation in June. At present, the minimum GPA considered is 3.65 (for 140 or more UC units); the minimum number of UC units considered is 75 (students at the 75-unit level must have at least a 3.85 GPA). A reasonable distribution of courses in the humanities and sciences is also required. A Passed grade is computed approximately as a B, depending on number of courses taken and graded units. If you are elected, you will be notified by mail. For more information, contact the Phi Beta Kappa Office, Honors Programs, A311 Murphy Hall (825-0192).

**Outstanding Senior Award**

The Outstanding Senior Award offers recognition to graduating seniors who have demonstrated scholastic excellence, creativity in the department, and outstanding service to the University and community. Nominations are accepted from November through the end of January, and awards are presented at the annual Alumni Awards Ceremony in June. For more information, contact the UCLA Alumni Association in the West Alumni Center, 325 Westwood Plaza (206-0684).
Graduate Study
Nature of Graduate Education

The principal characteristic of graduate study is the pursuit of new knowledge through research. At UCLA graduate students benefit from — and contribute to — the resources of one of the outstanding research universities in the country. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, and excellent research centers, institutes, and laboratories in virtually every major discipline (see details in Chapter 1) all provide an extraordinary scope of opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classrooms, the laboratories, in specialized seminars, through independent research, and in teaching experiences. As a graduate student, your education is enriched by the several hundred postdoctoral and visiting scholars from other universities who engage in research and teaching at UCLA every year. This unique research environment promotes the quality of original work and study which is the hallmark of graduate education.

The degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration or Juris Doctor is intended to develop your mastery of a field and prepare you for the practice of a profession. The doctoral degree (Ph.D., Ed.D., etc.) is designed to prepare you for creative activity and original research, often in association with college or university teaching.

Administration

The Graduate Division

The UCLA Graduate Division is responsible for administering policy established by the Academic Senate’s Graduate Council for master’s, doctoral, and professional degree programs other than those in law, medicine, and dentistry. It oversees graduate recruitment and admissions, fellowships, teaching assistantships, graduate student researcher appointments, and other graduate student support, affirmative action, and the maintenance of high quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice chancellor — graduate programs.

The Graduate Council

The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University’s philosophy of shared governance, the council is responsible for the establishment of policy and standards for graduate education at UCLA; the approval, review, and monitoring of graduate degree programs; and recommendations regarding fellowships and assistantships.

The Graduate Adviser

After admission to a department, program, or school, each graduate student is assigned a graduate adviser who approves Official Study Lists and assists the student in program planning and completing degree requirements. The graduate adviser is available for counseling whenever needed; departments usually require at least one student consultation each term. When the master’s or doctoral committee is established, the faculty chair of that committee often assumes the adviser’s role.

Graduate Students Association (GSA)

UCLA’s Graduate Students Association (GSA) shares an equal voice with the Undergraduate Students Association in the governance of the Associated Students. For more details on the GSA, see “Student Activities” in Chapter 1.
Admission Requirements

U.S. applicants to graduate standing must hold a bachelor’s degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. Degrees granted on the basis, for example, of nonacademic prior learning, test scores, and other than organized supervised coursework in academic subjects are not considered comparable. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above average scholarship, from a non-U.S. university or university-level institution. If your examinations have been graded Excellent, Very Good, Good, and Pass, you must have at least a Very Good general rating to qualify for admission. Students who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, etc., or a four-year degree, diploma, or higher certificate from a technical, vocational, or postsecondary specialized school, should not apply for graduate admission. Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, etc., also do not qualify for graduate admission.

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places available in UCLA’s schools, college, and departments. Applications are evaluated in terms of scholastic qualifications and formal preparation for the graduate field of study. Departments may have special requirements for admission, which are included under individual departmental listings in this catalog.

Applying for Admission

Graduate students at UCLA must submit the Application for Graduate Admission, Fellowships, and Financial Support to the Graduate Admissions Office. You may obtain this form, in person or by mail, from your prospective school or department.

Applications are generally accepted for Fall, Winter, and Spring Quarters, although some departments limit admission to Fall Quarter due to course sequencing. Such restrictions are stated in this catalog’s departmental listings and in the application packet. Enrollment in Summer Sessions courses does not constitute admission to graduate standing.

Applications and supporting papers should be on file in the Graduate Admissions Office by the following dates (if the dates below fall on a weekend or holiday, the next working day applies):

- October 1, 1990, for Winter Quarter 1991
- December 31, 1990, for Spring Quarter 1991
- January 15, 1991, for Fall Quarter 1991

Applications postmarked after these dates will be considered only when enrollment and funding limitations permit.

Supporting papers and materials to be submitted, including official transcripts of record and a $40 nonrefundable application fee, are specified in the application packet. Submitted materials are not returnable.

Graduate Record Examination — If you are applying for admission to a department or school which requires Graduate Record Examination (GRE) scores, you should arrange to take the examination no later than February so your scores arrive on time. GRE scores should be sent directly to your prospective department and not to the Graduate Division.

<table>

</thead>
<tbody>
<tr>
<td>October 13, 1990</td>
</tr>
<tr>
<td>December 8, 1990</td>
</tr>
<tr>
<td>January 15, 1991 (general only)</td>
</tr>
</tbody>
</table>

GRE applications and information are available from offices of the Educational Testing Service, either at CN 6000, Princeton, NJ 08541-6000, or at 1947 Center Street, Berkeley, CA 94704. For information on GRE Fee Waivers, write to the Associate Program Director at the New Jersey address.

Letters of Recommendation — Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze your abilities and academic promise. In some cases, these letters may mean the difference between acceptance and rejection. Letters should be sent directly to the prospective department. Forms to be used are included in the application packet.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment. See “Mandatory Medical Insurance Requirement” in the “Graduate Registration and Enrollment” section later in this chapter for a description of what constitutes adequate medical insurance. Most travel insurance plans and NAFSA international plans are NOT acceptable; medical insurance plans from your home country (including Canada) also are NOT acceptable.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For graduate students the MIP fee is included each term in the fee assessment total on the UCLA Fee Statement portion of the Registration Form. This is the only method by which MIP can be purchased.

If you decide to waive out of MIP because you have adequate private medical insurance, you must complete the Medical Insurance Waiver Request included with your registration materials each term and submit the form when you pay your registration fees. For further information on MIP or adequate medical insurance requirements, call the Student Health Service Insurance Office at 825-1856.

International Applicants

Applicants who have credentials from universities and colleges in foreign countries should submit applications at least two months before the dates listed above. International applicants should have an academic (continued on page 54)

*The department admits only applicants whose objective is the Ph.D.
**Not admitting new students at this time.
degree or professional title earned at a university and will be evaluated on the basis of grades (marks) and class or rank achieved. You should submit official transcripts of record, in duplicate, for all college and university work. Specific instructions are given in the application packet.

**Proficiency in English**

Test of English as a Foreign Language (TOEFL) — International students who hold a bachelor’s or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from both the TOEFL and the UCLA English as a Second Language Placement Examination (ESLPE). All other applicants must take the TOEFL, administered by the Educational Testing Service in some 95 foreign centers. Applications are available from the Educational Testing Service, CN 6000, Princeton, NJ 08541-6000.

UCLA English as a Second Language Placement Examination (ESLPE) — If your native language is not English, you are required to take the UCLA ESLPE (in addition to the TOEFL) before the term in which you are to register. Depending on your ESLPE results, you may have to complete one or more courses in the English as a Second Language 33 series, beginning in your first term in residence at UCLA. These courses must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. You should expect to spend a longer period of time at the University than would normally be necessary to complete a degree program if you are required to take any English as a second language courses. If you do not achieve a minimum score on the ESLPE, your application is deferred until you have acquired the necessary proficiency in English. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

Test of Spoken English (TSE) — If you are an international student and wish an appointment as a teaching assistant, you should take the Test of Spoken English offered at the TOEFL Center in your home country.

**No Degree Objective**

UCLA has no special graduate, limited, or unclassified categories of admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. Teachers with a master’s degree who wish some refresher study, or international students on a year’s stay in the U.S., may wish to apply in this manner. Requirements for admission are the same as those for degree programs.

**Duplication of Degrees**

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see “Concurrent and Articulated Degree Programs” later in this chapter). If you are applying for a second academic degree at the same level or lower than the one you already hold, you are required to show compelling cause to the department. All degree requirements and University regulations apply just as they do for a first degree. Courses already applied to the earlier degree may not be applied to the second.

**Summer Sessions Courses**

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. If you wish to apply Summer Sessions courses to your subsequent graduate program, you should consult in advance with your departmental adviser. This is also true if you have been readmitted to graduate standing and you wish to resume graduate study in Summer Sessions. Information and applications are available from the Office of Summer Sessions, 100 Dodd Hall. Also refer to the sections on “Academic Residence” and “Transfer of Credit” later in this chapter.

**Renewal of Application**

An offer of admission is valid for a specific term only. If you were not admitted, or failed to register in the term for which you were first accepted, you should file a Renewal of Application form for admission to a later term. Forms are available from the departments and should be submitted to the Graduate Admissions Office, 1247 Murphy Hall. Filing dates are the same as those for new applications. Forms should be accompanied by official transcripts, in duplicate, of any graduate work completed since the former application and by a $40 application fee. You may file only one Renewal of Application without the $40 fee. Acceptance for admission at any earlier date does not guarantee approval of the renewal. Since application records are kept no longer than two years, you may apply for admission after this period only by completing a new application and providing all necessary documents.

**Readmission**

Students who are granted a formal leave of absence (see “Leaving UCLA” in Chapter 4) do not have to apply for readmission if they resume their graduate work in accordance with the terms of their leaves. All other continuing graduate students who fail to register for any regular session, or who fail to complete a term through cancellation or withdrawal, must compete for readmission with new applicants.

If you have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence), you must file an Application for Readmission. Forms are available from the departments and should be submitted to the Graduate Admissions Office, 1247 Murphy Hall. The following materials must accompany the Application for Readmission:

1. A check or money order for $40 (nonrefundable) made payable to The Regents of the University of California.
2. The Graduate Petition for Change of Major, if appropriate. (If you are reapplying in a new major, request this form along with the Application for Readmission.) Your UCLA graduate transcript must also be submitted.
3. Transcripts of all academic work completed since your registration at UCLA as a graduate student.

**Admission to the Schools of Dentistry, Law, and Medicine**

Applicants for M.S. and Ph.D. programs in departments of the School of Medicine or Dentistry should apply for admission to the Graduate Division as described above. For admission to D.D.S., J.D., and M.D. degree programs in the Schools of Dentistry, Law, and Medicine, write to the respective schools for their announcement booklets and for information and application procedures.
UCLA offers instruction leading to a broad range of master's and doctoral degrees, both academic and professional. Graduate students earn master's or doctoral degrees through distinguished achievement in study and research. Achievement in study is evaluated by means of the qualifying and comprehensive examinations. Achievement in research is judged by the merits of the thesis or dissertation.

The doctorate, and specifically the Doctor of Philosophy degree, is awarded in recognition of a candidate's in-depth knowledge of a broad field of learning, and for demonstrated ability to make original and distinguished contributions to the field. More generally, the degree is an affidavit of critical aptitude in scholarship, imaginative enterprise in research, and proficiency and style in communication.

University Minimum Standards

The requirements described here for master's and doctoral degrees are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses and/or examinations for their master's degree. Each department also sets additional requirements for doctoral degrees according to the demands of the field of study. You are advised to consult the appropriate school announcement or your departmental graduate adviser for details.

Transfer of Credit

There are two general regulations governing transfer of credit. No courses completed before the award of the bachelor's degree may be applied toward a graduate degree unless you are a UCLA Departmental Scholar. Also, courses taken for any other degree may not be applied toward a master's degree at UCLA unless you are enrolled in a Graduate Council-approved concurrent degree program (see "Concurrent and Articulated Degree Programs" later in this chapter).

From Within the University — You may petition to have units and grade points for graduate work completed at other campuses of the University applied toward satisfaction of master's degree requirements at UCLA. Such courses may fulfill up to one half of both the total course and University Minimum Standards For Advanced Degrees*

</tbody>
</table>

* Individual departments and programs may set higher standards. Refer to departmental listings under the appropriate college or school chapter or consult your departmental graduate adviser for details.

** If the master's degree was earned at UCLA, one year of residence will have been satisfied.
graduate course requirements, and one third of the academic residence requirement, but may not have been used to fulfill the requirements for another degree.

From Outside the University — With approval of the dean of the Graduate Division and your major department, courses completed with a grade of B or better in graduate standing at institutions outside the University of California may apply toward UCLA master's programs. However, courses taken for any degree awarded at another institution may not be applied toward a graduate degree at UCLA. A maximum of two courses (eight quarter units or five semester units) may be applied, but they cannot be used to reduce either the minimum graduate course requirement or the academic residence requirement. (To convert semester units into quarter units, multiply the semester units by 1.5 — e.g., 12 semester units \( \times 1.5 = 18 \) quarter units. To convert quarter units into semester units, multiply the quarter units by \( \frac{7}{6} \) — e.g., 12 quarter units \( \times \frac{7}{6} = 7.99 \) or 8 semester units.)

From Summer Sessions — Regular session courses offered in UCLA Summer Sessions by regular faculty qualify for credit toward a higher degree with departmental approval. Courses offered by visiting faculty may apply, with a recommendation from the department chair. It is best to consult your departmental graduate adviser about applying Summer Sessions courses to your graduate program.

From UCLA Extension — Extension courses taken after July 1, 1969, can be applied only if they are concurrent courses prefixed by XLC (offered for students in degree programs and open to Extension students by petition) in the 100, 200, or 400 series, completed with a grade of B or better. By petition to the dean of the Graduate Division and with departmental approval, a maximum of two such courses may be applied toward the nine-course minimum and the five-graduate-course requirements for the master's degree. The master's program, then, would include at least three courses in the 200 or 500 series for academic degrees, or three courses in the 200, 400, or 500 series for professional degrees.

If your master's program requires more than nine courses, concurrent Extension courses may be applied toward one half of the course requirements over the minimum of nine.

Grades earned in Extension courses or in courses taken outside the University of California are not included in computing your grade-point average nor may they be used to remove scholarship deficiencies. Correspondence courses are not applicable to graduate degrees.

Academic Residence

Master’s Degree — The minimum residence requirement consists of three academic terms in graduate standing at the University of California, including at least two terms at UCLA.

Doctoral Degree — The minimum residence requirement is two years (six terms) in graduate standing at the University of California, including one year (usually the second) in continuous residence at UCLA. If you earned a master's degree at UCLA, one year of this requirement will have been met. In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal.

Academic residency for both degrees is established by successfully completing a minimum of one graduate or upper division course (four units) during a term.

You may earn one term of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

To maintain satisfactory progress toward the degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward a graduate degree, including those taken at another UC campus.

Foreign Language Requirements

Foreign language requirements are determined by individual departments and programs. If your program has a language requirement, you should fulfill it either before you begin graduate study or as soon as possible thereafter. All foreign language requirements must be satisfied before advancement to candidacy.

Many departments require graduate degree candidates to demonstrate proficiency in one or more foreign languages, so that you can acquire broad knowledge in your field of study and keep abreast of foreign developments in the field. You are urged to complete language requirements as early as possible in your graduate career. If your department requires two or more foreign languages, you must complete at least one before the Oral Qualifying Examination.

Depending on your department's regulations, you may fulfill foreign language requirements either by passing the Educational Testing Service (ETS) Graduate School Tests in French, German, Russian, or Spanish (offered for students in degree programs and open to Extension students by petition) in the 100, 200, or 400 series, completed with a grade of B or better. By petition to the dean of the Graduate Division and with departmental approval, a maximum of two such courses may be applied toward the nine-course minimum and the five-graduate-course requirements for the master's degree. The master's program, then, would include at least three courses in the 200 or 500 series for academic degrees, or three courses in the 200, 400, or 500 series for professional degrees.

If your master's program requires more than nine courses, concurrent Extension courses may be applied toward one half of the course requirements over the minimum of nine.

Program of Study and Scholarship

Master's Degree

At least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) must be completed in graduate standing; at least five (20 units) of the nine must be graduate-level courses.

UCLA offers master's degrees under two plans: Plan I, the Master's Thesis, and Plan II, the Master's Comprehensive Examination. Some departments offer both plans, and you must consult with your department to determine the plan for meeting your degree requirements. University minimum requirements are the same under either plan.

Master's Thesis (Plan I)

After advancement to candidacy (described below), students under Plan I must submit a thesis reporting on results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

A thesis committee, consisting of at least three faculty members who hold regular professorial appointments at the University, is nominated by the department and appointed by the dean of the Graduate Division for each student (consult the Graduate Division for more details on committee members' eligibility requirements). The thesis committee, which
must be appointed before you may be advanced to candidacy, approves the subject and plan of the thesis, provides the guidance necessary to complete it, then reads and approves the completed manuscript. Approval must be unanimous among committee members.

Once the thesis committee and other concerned faculty have approved the subject for the thesis, work may begin. You are responsible for preparing the thesis in the proper form and for observing filing deadlines.

**Master's Comprehensive Examination (Plan II)**

Following advancement to candidacy (described below), students under Plan II must pass a comprehensive examination administered by a committee consisting of at least three faculty members appointed by the department. In some departments the comprehensive examination may serve as a screening examination for admission to doctoral programs. Information concerning this examination and its form (written, oral, or both) is available in your department.

**Doctoral Degree**

Doctoral programs are individualized and permit a high degree of specialization. The University does not specify course requirements for doctoral programs. Individual programs set their own requirements, which may include specific courses, and these must be completed before you take the University Oral Qualifying Examination. You will determine your course of study in consultation with a graduate adviser until the doctoral committee is appointed.

**Doctoral Examinations before Advancement to Candidacy**

Prior to advancement to candidacy, doctoral candidates fulfill the coursework, teaching, and/or examinations required by the major department or group. You are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after you complete the recommended or required work. Once all departmental and foreign language requirements are met, the department chair consults with you and then nominates a doctoral committee.

**University Oral Qualifying Examination**

The doctoral committee, consisting of at least five faculty members nominated by your department, is appointed by the dean of the Graduate Division (consult the Graduate Division for details on committee membership). To determine your qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a written examination.

**Advancement to Candidacy**

**Master's Degree**

When you have completed approximately half the program for the master's degree (usually at least two terms), you should formally apply for advancement to candidacy. Application forms are available from your department or the Graduate Division, Student and Academic Affairs
Section (1225 Murphy Hall), and must be filed in your major department no later than the second week of the term in which you expect to receive your degree (by the end of the second week of the first Summer Session for a September degree).

You may not be advanced to candidacy until all departmental requirements for advancement, including foreign language examinations, have been satisfied. You then have one year from the date of advancement to complete all requirements for the degree, including your thesis or comprehensive examination. Candidacy expires at the end of one year and reinstatement during the term in which you plan to receive the degree is by petition only.

**Doctoral Degree**

You are eligible for advancement to doctoral candidacy after passing the University Oral Qualifying Examination with no more than one negative vote, completing four terms of academic residence and any additional departmental requirements, and maintaining a 3.0 grade-point average in graduate standing. You must complete the application for candidacy form sent to you by the Registrar's Office, have it signed by your doctoral departmental requirements, and submitted to the Graduate Division, Student and Academic Affairs Section. You are officially advanced to candidacy on the date the completed form is submitted.

**Candidate in Philosophy Degree**

In several departments, as approved by the Graduate Council, the intermediate degree of Candidate in Philosophy (C.Phil.) is awarded to qualified students on advancement to candidacy for the Ph.D. degree.

The C.Phil. is not a terminal degree but gives formal recognition to a definite state of progress toward the doctorate. Academic requirements are the same as for advancement to candidacy for the Ph.D. (see above). Four terms in academic residence at UCLA are required. (Also refer to "Academic Residence" earlier in this chapter.)

The C.Phil. may not be conferred after or simultaneously with the Ph.D. For departments offering the C.Phil., see the degree chart at the beginning of this chapter. For further details, consult the Graduate Division.

**Doctoral Dissertation**

Once the doctoral committee approves the subject for your dissertation, the in-candidacy stage of the doctoral program begins and is devoted primarily to independent study and research and to the preparation of the dissertation, which demonstrates your ability for independent investigation. The doctoral committee guides your progress toward its completion. You are responsible for following instructions on the preparation of the dissertation and for observing filing deadlines.

**Final Preparation and Filing of Thesis or Dissertation**

For guidance in the final preparation of the thesis or in the preparation and submission of the dissertation and accompanying abstract, you may:

1. Consult the Theses and Dissertations Adviser, Office of the University Archivist, 141 Powell Library.
2. Read Regulations for Thesis and Dissertation Preparation, available in the Graduate Division, Student and Academic Affairs Section, or in the Archivist's Office.
3. Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each term (see the Calendar at the beginning of this catalog).

**Master's Thesis** — When all members of the committee have approved the thesis and you are ready to file it, you must initiate the final steps in the process by submitting the original signature (approval) page, title page, and any other required forms to the Graduate Division, Student and Academic Affairs Section, where completion of degree requirements will be verified. After final approval by the dean of the Graduate Division, you must file the thesis with the Theses and Dissertations Adviser by the published deadline (approximately two weeks before the degree is to be awarded).

**Doctoral Dissertation** — When all members of the committee have approved the dissertation and you are ready to file it, you must submit the original signature (approval) page and title page to the Graduate Division, Student and Academic Affairs Section, where completion of degree requirements will be verified. After final approval by the dean of the Graduate Division, you must file two paper copies of the dissertation with the Theses and Dissertations Adviser by the published deadline (approximately two weeks before the degree is to be awarded).

Deadlines for this academic year are:
- December 3 for Fall Quarter 1990
- March 11 for Winter Quarter 1991
- June 3 for Spring Quarter 1991

**Doctoral Final Oral Examination**

A final oral examination may be required at the option of any member of the doctoral committee, and in some departments is required of all doctoral candidates. The examination, for which all committee members must be present, may be held before you have prepared the final copy of your dissertation, but passing the examination (with no more than one negative vote of the committee members) does not imply approval of the final manuscript. Consult your doctoral committee chair or graduate adviser for further information.

**Interdepartmental Degree Programs**

In addition to graduate degree programs offered within schools and departments, UCLA offers interdepartmental programs involving two or more participating departments. A total of 27 interdepartmental programs offer bachelor's, master's, and doctoral degrees in some combination; several units offer all three degrees. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of faculty division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

Interdepartmental degree programs which currently lead to advanced degrees are listed below. All are described more fully in Chapter 5 on the College of Letters and Science, with the exceptions of Environmental Science and Engineering which is in the School of Public Health and Neuroscience which is in the School of Medicine. For further information, contact the chair or graduate adviser of the specific program that interests you.

- African Area Studies (M.A.)
- Afro-American Studies (M.A.)
- American Indian Studies (M.A.)
- Applied Linguistics (Ph.D.)
- Archaeology (M.A., Ph.D.)
- Asian American Studies (Ph.D.)
- Comparative Literature (M.A., Ph.D.)
- Cultural Studies (M.A.)
- Environmental Science and Engineering (D.Env.)
- Folklore and Mythology (M.A., Ph.D.)
- Indo-European Studies (Ph.D.)
- Islamic Studies (M.A., Ph.D.)
- Latin American Studies (M.A.)
- Molecular Biology (Ph.D.)
- Neuroscience (Ph.D.)
- Romance Linguistics and Literature (M.A., Ph.D.)
Concurrent and Articulated Degree Programs

Each of the programs described thus far leads to a single degree — either master's or doctoral. UCLA also offers concurrent and articulated degree programs, which allow you to earn two degrees simultaneously by combining two free-standing degree programs into a coordinated course of study. You may petition to design your own articulated program (with departmental and Graduate Division approval), but you may not apply credits for one degree to the other. Concurrent degree programs, which may not be individually designed, allow some credit overlap.

These programs accomplish several important objectives: they enable the University to respond to societal changes by creating new fields of study; they prepare students more fully for the world's complexities by combining the cultural (political-social-economic) aspects of their field with the tools of a professional degree; and they allow faculty members to cross departmental lines and interact on a broader scale.

Concurrent degree programs, by allowing a specified amount of credit to apply to both degrees, permit students to reduce the total number of courses required for the two degrees and thereby reduce the time normally required if courses were taken in sequence. Programs leading to concurrent degrees are offered in the following disciplines:

- Education, M.A., Ph.D., M.Ed., or Ed.D. — Law, J.D.
- History, M.A. — Library and Information Science, M.L.S.
- Latin American Studies, Interdepartmental M.A. — Urban Planning, M.A.
- Management, M.B.A. — Computer Science, M.S. (School of Engineering and Applied Science)
- Management, M.B.A. — Latin American Studies, Interdepartmental M.A.
- Management, M.B.A. — Law, J.D.
- Management, M.B.A. — Library and Information Science, M.L.S.
- Management, M.B.A. — Public Health, M.P.H.
- Management, M.B.A. — Nursing, M.N.
- Management, M.B.A. — Urban Planning, M.A.
- Urban Planning, M.A. — Law, J.D.

Articulated degree programs permit no credit overlap, and students must complete degree requirements separately for each degree. Programs leading to articulated degrees are offered in the following disciplines:

- African Area Studies, Interdepartmental M.A. — Public Health, M.P.H.
- African Area Studies, Interdepartmental M.A. — Film and Television, M.F.A. in Theater Arts
- Latin American Studies, Interdepartmental M.A. — Education, M.Ed. in Curriculum
- Latin American Studies, Interdepartmental M.A. — Engineering and Applied Science, M.S.
- Latin American Studies, Interdepartmental M.A. — Library and Information Science, M.L.S.
- Latin American Studies, Interdepartmental M.A. — Public Health, M.P.H.
- Medicine, M.D. — Graduate Division health science major, Ph.D.
- Oral Biology, M.S. — Dentistry, D.D.S. or Certificate

Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Contact the Graduate Division, Student and Academic Affairs Section, for information on designing your own articulated program.
Graduate Registration and Enrollment

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly Schedule of Classes, available for purchase at the Students' Store several weeks before the beginning of each term. To obtain a copy by mail, write to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, Attn: Mail Out. Include a check or money order for $2.60 payable to ASUCLA.

Registration consists of paying fees and enrolling in classes. The Registration Form, issued by the Registrar, is used for paying fees and for requesting enrollment in classes. You must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Advance payment is required of all eligible students. Payments may be mailed, deposited in the Main Cashier's Drop Slot, or made in person at 1125 Murphy Hall during the published payment period. Payments submitted after the published fee deadline will be assessed an additional $50 late payment fee. Students on financial aid may be eligible for a waiver of the $50 fee if funds are delayed by the University.

Deadline Dates
(Tentative only; consult Schedule of Classes for firm dates.)

Fee Payment Deadlines:
September 7 for Fall Quarter 1990
December 14 for Winter Quarter 1991
March 8 for Spring Quarter 1991

Classes Dropped for Failure to Pay Registration Fees:
September 28 for Fall Quarter 1990
January 4 for Winter Quarter 1991
March 29 for Spring Quarter 1991

Mandatory Medical Insurance Requirement
UCLA requires, as a condition of registration, that all graduate students and all international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For graduate students the MIP fee is included each term in the fee assessment total on the UCLA Fee Statement portion of the Registration Form. This is the only method by which MIP can be purchased.

If you decide to waive out of MIP because you have adequate private medical insurance, you must complete the Medical Insurance Waiver Request included with your registration materials each term and submit the form when you pay your registration fees.

An adequate private medical insurance plan must provide all of the following minimum benefits:

1. It must provide a minimum of $80,000 in "Lifetime Maximum" benefits.
2. It must limit the subscriber's out-of-pocket expense to a maximum of $5,000 for deductibles and copayments for covered services.
3. It must not have restricted scheduled daily maximums or dollar amounts for in-hospital services or semiprivate rooms.
4. Maximum period of preexisting conditions must be no more than two years.
5. It must not exclude benefits for injuries incurred from motor vehicle accidents or self-induced (attempted suicide) injury.
6. Participating member health maintenance organizations (HMOs) such as Health Net and Kaiser must be located within 100 miles of the UCLA campus.
7. It must be a U.S.-based insurance company with all administrative and claims operations conducted in the United States of America. Foreign embassy representatives or individuals acting on your behalf do not constitute insurance companies. Most travel insurance plans and NAFSA international plans DO NOT meet the adequate insurance requirement.

If your private medical insurance plan does not meet all of the above requirements, you must purchase MIP. For further information on MIP or adequate medical insurance requirements, call the Student Health Service Insurance Office at 825-1856.

Enrollment in Classes
Enrollment requests are processed from the completed Study List Request portion of the Registration Form. To be enrolled for credit, you must complete the request, obtain your adviser's signature approval, and file it with your major department by Friday of the second week of classes. There is a $50 fee for late filing of the Study List (see your department for departmental procedures).

You are guaranteed enrollment in courses in your major department provided that department is coded correctly on your Study List Request. If you have recently changed majors and your Study List Request is incorrect, you need proof that the Graduate Division has approved the change. For guaranteed enrollment in restricted or possibly closed courses outside your major department, you must submit an approved Permission to Enroll form with the Study List Request.

Change of Major
Continuing graduate students may petition for a change of major after discussing plans with the new department. Forms for this purpose are available from the departments and should be filed with the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure, but you should consult with the adviser in the new program before filing an application.

Full-Time Graduate Program
Three graduate courses (or 12 units) per term are considered the normal enrollment for graduate students. A minimum of eight units is required for full-time standing for all students, including teaching assistants, graduate student researchers, and fellowship awardees.

Teaching assistants and graduate student researchers are required to take at least two courses per term, or the equivalent of eight units, throughout their appointments. Those assistants/researchers who take a
leave of absence, or withdraw, terminate their appointments. Course 375 for teaching assistants and independent studies at the 500 level may be included in reaching the eight-unit load.

Graduate students holding fellowships must be enrolled full-time students, both before and after advancement to candidacy. The eight-unit minimum required per term may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Veterans Administration regulations is available from Registrar’s Student Information, 1134 Murphy Hall.

Continuous Registration

Graduate students are normally required to register in all three terms of each academic year, including the term in which their degrees or certificates are to be awarded. If you are granted a formal leave of absence or are eligible to pay the filing fee for a degree (see next page), you are exempt from this requirement. You must be registered in order to receive financial aid, use University facilities, or take any University examination except the master’s comprehensive or doctoral final oral examination.

If you fail to register or to file for an official leave of absence by the end of the second week of instruction, you are assumed to have withdrawn from UCLA. You will then have to reapply and compete for readmission with all other graduate applicants if you wish to return to graduate study at UCLA.

Continuing graduate students studying or doing research outside California throughout a term may pay half the registration fee, plus all other fees in full. Petitions for the reduced fee are available from your department and from Fellowships and Student Support, 1228 Murphy Hall.

Employment and Degree Progress

Policy governing the employment of graduate students considers you primarily as a student rather than an employee and emphasizes your need to make timely progress toward your degree. You are limited to a maximum of 12 terms of appointment in academic apprentice teaching titles and a maximum of 18 terms in a combination of academic apprentice teaching and research titles. Appointment to any title limits your employment maximum to 50 percent time during the academic year.

University policy prohibits the employment of graduate students in academic titles. This policy was established to ensure that you (1) make timely progress toward your degree, (2) not be subject to the conflicting roles of student and faculty member, and (3) not be involved in the instruction of your peers.

Registration in the Final Term for Award of the Degree

(1) You must register in the final term in which the degree is to be conferred if you are (a) completing coursework, (b) using library or other University facilities, (c) taking up faculty time other than for a final reading of the thesis or dissertation or to administer the comprehensive or final examination, (d) a doctoral student and were not registered the term immediately preceding the term in which your dissertation is filed, or (e) receiving University funds in the form of a fellowship or appointment as a teaching assistant, reader, or graduate student researcher. If you were not continuously registered or on leave of absence and you are required to register to receive your degree, you must apply for readmission.

(2) If only the thesis or dissertation and/or comprehensive or final examination remain to be completed in your final term, you may be eligible to pay the filing fee instead of registering (see next column).

(3) If you were registered in the preceding term and have completed all degree requirements, including final examinations and filing your thesis/dissertation, during the interval between terms and before the first day of instruction, you are not required to register (or pay the filing fee) to receive your degree at the end of the following term.

The Filing Fee

If you have completed all requirements for a degree except filing the thesis or dissertation and/or taking the master’s comprehensive or doctoral final oral examination, you may be eligible to pay a filing fee of half the registration fee instead of paying all required fees. Applications are available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. For eligibility conditions and further information on the filing fee and registration in the final term, please consult Standards and Procedures for Graduate Study at UCLA, available in 1225 Murphy Hall or in individual departments.

Health Evaluation

New students enrolling in the School of Dentistry, Education, Medicine, Nursing, or Social Welfare must complete and return to the Student Health Service the Health Evaluation form provided by their departments.
Graduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to your academic program, personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar’s Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of $1,972 per term (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each term, all graduate students (except Law and Medicine School students) must pay the following fixed fees. Students in the Schools of Law and Medicine should refer to their individual school announcements for explanation of fees per semester. Fees for Fall Quarter 1990 are current as of publication date but are subject to change without notice by The Regents.

Other Fees

Miscellaneous fees charged to UCLA graduate students include a $50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes); $25 for advancement to doctoral candidacy; and $5 or less for most petitions and other special requests. A $50 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). A complete list of fees may be found in the Schedule of Classes.

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction or take an approved leave of absence by the end of the second week of classes may receive partial refunds of fees. For the refund schedule and more information, see “Withdrawal” in Chapter 4 of this catalog or consult the Schedule of Classes for specific refund dates for each term.

Nonresident Tuition Fellowships

A limited number of nonresident tuition fellowships are awarded each year to graduate students with distinguished academic records. Details of eligibility are available from your department or Fellowships and Student Support, 1228 Murphy Hall.

Living Expenses

Printed below are the estimated yearly budgets for graduate California residents. Nonresidents must add the $5,916 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session terms of the 1990-91 academic year and do not include Summer Sessions. (Budgets for the Schools of Medicine, Dentistry, and Nursing are higher, reflecting the expense of specialized books and supplies; figures are available from your health professions counselor.)

*Includes $100 for extra meals during breaks.

For more information on housing, see Chapter 1 or contact the UCLA Community Housing Office, 270 De Neve Drive (825-4491).
Financial Support

Information:
Fellowships and Student Support
1228 Murphy Hall
(213) 825-3521

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance.

Entering graduate students interested in University-administered awards should complete the Application for Graduate Admission, Fellowships, and Financial Support. Readmitted students should request the Graduate Application for Readmission form, and continuing graduate students should complete the Fellowship and Assistantship Application for Continuing Students. Completed applications must be returned by January 15. (Some departments have earlier deadlines; consult the application packet for details.)

UCLA Graduate Student Support, a booklet describing the full range of financial assistance available, is published annually and mailed to continuing students by the Graduate Division. Contact your department for more detailed information.

Fellowships

The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Most fellowship, traineeship, and grant awards are for one academic year (three terms). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the tuition, for periods of one to three terms, of selected graduate students who are not California residents.

Assistantships

Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. Teaching assistantships provide experience in teaching undergraduates, with faculty supervision. (Teaching assistants, associates, and fellows are eligible to receive partial payment at the beginning of the term in the form of an interest-free advance loan check. Interested students should apply to their departments.) Graduate student researcher appointments give students experience working on faculty-supervised research projects.

Graduate Affirmative Action Awards

Information:
Graduate Affirmative Affairs Office
1248 Murphy Hall
(213) 825-2780

These programs were established to increase the graduate enrollment and retention of students from groups which have traditionally been underrepresented in graduate education. These groups include American Indians, blacks/African Americans, Chicano/Mexican Americans, Filipino Americans, and Puerto Ricans. In addition, women in the sciences and engineering, Asian American men in the arts, humanities, and social sciences, and Asian American women in all areas are eligible for many of these awards.

As indicated below, the Graduate Division offers one need-based financial aid program (GAP) and several fellowships to underrepresented students. Students may apply for both financial aid and fellowships simultaneously. All applicants for fellowships must be U.S. residents. For more information on these programs, contact the Graduate Affirmative Affairs Office, 1248 Murphy Hall (825-2780).

(1) Dorothy Danforth Compton Fellowship Program — UCLA is one of 10 universities selected by the Danforth Foundation for this program, which is jointly sponsored by the UCLA Office of the Chancellor. Initiated in 1981-82, it remains the most prestigious four-year fellowship available to underrepresented students. Fellowships are awarded to black/African American, Chicano/Mexican American, American Indian, and Puerto Rican students committed to careers in college and university teaching. Students pursuing Ph.D. degrees in the humanities, social sciences, physical sciences, life sciences, and fine arts are eligible.

(2) Graduate Opportunity Fellowship Program (GOFP) — Funded by the University of California, this program provides fellowships to students from traditionally underrepresented in graduate programs and to women in fields such as engineering and the physical and life sciences.

(3) Patricia Roberts Harris Fellowship (formerly Graduate and Professional Opportunity Program) — This program is funded by the U.S. Department of Education. The number of fellowships awarded to participating colleges and universities each year depends on congressional funding. UCLA currently has fellows enrolled in the fields of chemistry, English, physics, and public health.

(4) Office of the President Affirmative Action Fellowship — This program is funded by the University of California Office of the President for entering Ph.D. students pursuing careers in research and teaching. The fellowship provides a stipend of $12,500, plus $2,500 for fees and/or expenses. All applicants must be U.S. citizens or permanent residents who are American Indian/Alaskan native, black/African American, Chicano/Mexican American, Asian American women (in all disciplines), and Asian American men in the social sciences and humanities. In addition, women in the physical and life sciences and engineering may apply regardless of ethnicity.

(5) Research Assistantship/Mentorship Program — Funded by the University of California Office of the President, this program provides research assistantships for underrepresented students and is designed to encourage a close mentoring relationship between students and faculty members and to enhance research skills.

(6) Dissertation Year Fellowship Program — Funded by the UC Office of the President, this program supports and encourages University of California minority graduate students to complete the dissertation requirements for the Ph.D. degree and to enhance their qualifications as candidates for faculty teaching and research. The awards provide a $12,000 stipend, student health insurance costs, registration fees, and a $500 allowance for research expenses.

(7) Graduate Advancement Program (GAP) — Awards are made on the basis of need as demonstrated by standard University financial aid criteria. These awards differ from conventional financial aid allocations in that grants may be slightly larger and work-study awards do not require matching funds by employers.

Awards Based on Financial Need

Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and your financial resources. Financial aid applicants must file either the Student Aid Application for California (SAAC) or the GAPSFAS. The SAAC is preferred.

Financial aid awards include work-study and low-interest loans. Students are usually awarded a financial aid “package” which is a combination of these forms of assistance. Further information is available from the Financial Aid Office, A129J Murphy Hall.
Special Programs and Training

Graduate Cross-Enrollment Program with USC

As an integral part of an Academic Resource Sharing program linking UCLA with the University of Southern California, the Graduate Cross-Enrollment Program makes possible graduate student exchanges in many departments. The program is limited to specialized courses which would not otherwise be available to UCLA students and is in effect only during the regular academic year (not in summer).

If you have completed at least one term of graduate study at UCLA and have obtained the necessary approvals, you may enroll in a 501 course through your department. When you have completed the course at USC, your grade will be forwarded to UCLA to be recorded on your transcript (S/U grading only). Only eight units of cross-enrollment courses may be applied toward requirements for the master's degree, and these courses may not be used to satisfy the five-graduate-course requirement. Applications, available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall, should be completed before the start of the term in which the course is offered.

Intercampus Exchange Program

If you have completed one term of graduate study at any campus of the University, you may attend another campus as an Intercampus Exchange Graduate Student with the approval of your department chair, the chair of the department or group in which you wish to study at the host campus, and the dean of the Graduate Division at both the home and host campuses. The privilege should be used only by students whose graduate study may be enhanced by work with certain faculty or use of facilities and resources accessible only at another campus.

Although you are considered to be in residence at your home campus, as an Intercampus Exchange Student you have library, health service, and other privileges at the host campus. Grades are transferred to your home campus and entered on your official record.

Applications are available from the Graduate Division, Student and Academic Affairs Section, and should be filed at least four weeks before the beginning of the term in which you expect to enter the program. The program is available only during the regular academic year (not in summer).

Graduate students may also take advantage of the Education Abroad and Education at Home Programs, described in Chapter 1 of this catalog.

Postdoctoral and Visiting Scholars

The University makes opportunities and facilities available to qualified scholars — those holding doctoral degrees or foreign equivalents — to continue advanced study and research under faculty guidance. Postdoctoral Scholar standing, which does not lead to any degree, is limited to a maximum of three years and must begin within three years after the doctoral degree is awarded. Interested candidates should make advance arrangements with the relevant department or research unit.

The same opportunities are made available to Visiting Scholars — senior scholars and distinguished visitors holding doctoral degrees or foreign equivalents — who wish to pursue independent research or advanced study at UCLA for a limited time, normally no more than one year. Visiting Scholars are distinguished from Postdoctoral Scholars and academic appointees in that they usually have adequate support funds from sources outside the University.

Further information on both Postdoctoral and Visiting Scholars is available from Fellowships and Student Support, 1228 Murphy Hall.
General Policies and Regulations

Standards of Scholarship
To maintain satisfactory progress toward a graduate degree, UCLA requires at least a B (3.0) average in all courses taken in graduate standing at any campus of the University and in all courses applied toward advanced degrees. This standard applies to all graduate students, including candidates in certificate programs. In courses graded on an S/U basis, the grade of S (Satisfactory) is awarded for work which would otherwise receive a B or better. Grades S and U are not included in calculating grade-point averages.

Scholarship Probation
You are on probation and are subject to dismissal if your cumulative average in all work attempted in graduate standing falls below a B (3.0) or if work in any two consecutive terms falls below a B average. The dean of the Graduate Division, in consultation with your department, determines your eligibility to continue graduate study in probationary status. If you are allowed to continue, you must make timely progress toward improving your grade-point average.

Disqualification and Appeal
If you are subject to disqualification for reasons other than failure to maintain the minimum grade-point average, you will have your records reviewed by the Graduate Division, in consultation with the graduate adviser. If disqualification results, you may submit a written appeal to the dean of the Graduate Division for reconsideration.

Appeals will be considered only if based on appropriate cause such as (1) procedural error, (2) judgments based on nonacademic criteria, (3) personal bias, or (4) specific mitigating circumstances contributing to performance. Alleged errors in academic judgment or evaluation are not considered appropriate causes for appeal.

In cases of appropriate cause, the dean of the Graduate Division refers the appeal to the Graduate Council's Committee on Instruction and Degree Requirements. You are required to submit a written statement on the basis for your appeal and are entitled to a personal appearance before the committee. After obtaining information on the matter from any appropriate person or office, the committee makes a recommendation to the dean of the Graduate Division, who makes the final decision. In reporting the decision, the committee includes the basis for the decision, its effective date, and any specific recommendations.

Graduate Student Complaints
Because of the separation of functions within the University, students are sometimes uncertain where they should direct their complaints. The following information may be helpful.

If you have complaints of a scholastic or professional nature involving faculty, you should take them up with the faculty member concerned or, if that is not feasible, with the chair of the department. If the department as a whole is involved, you should take the matter to the appropriate divisional or school dean. Should the issue not be resolved at that level, you may appeal to the dean of the Graduate Division, 1237 Murphy Hall.

Complaints of misconduct against a student or group of students should be made at the Office of the Dean of Students, 1206 Murphy Hall. Complaints of misconduct against officially recognized campus organizations should be made at the Center for Student Programming, 161 Kerckhoff Hall, except complaints against Greek letter social organizations (i.e., fraternities and sororities) which should be made at the Office of Fraternity and Sorority Relations, 118 Men's Gym.

Complaints concerning alleged violation of the policies and regulations governing graduate study should be made to the dean or associate dean of the Graduate Division, 1237 Murphy Hall.

Complaints about a violation of University policy regarding the conduct of one or more faculty members should be handled as described in "Non-discrimination," "Harassment," and "Faculty Code of Conduct" in the Appendix.
# Units and Grading Policy

UCLA students are responsible for understanding the grading policies and regulations established by the Academic Senate. Should any semantic variations exist between explanations in this catalog and regulations in the Manual of the Academic Senate, the manual will prevail in all cases. Copies of the Senate manual are available for your review in the Academic Senate Office, 3125 Murphy Hall.

## Grades

Instructors are required to assign a final grade for each student registered in a course. The following grades are used to report the quality of a student’s work at UCLA:

### Undergraduate Students

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Superior Achievement</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
</tr>
<tr>
<td>C</td>
<td>Fair</td>
</tr>
<tr>
<td>D</td>
<td>Poor</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
</tr>
<tr>
<td>P</td>
<td>Passed (achievement at grade C level or better)</td>
</tr>
</tbody>
</table>

### Graduate Students

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Superior Achievement</td>
</tr>
<tr>
<td>B</td>
<td>Satisfactorily demonstrates potential for professional achievement</td>
</tr>
<tr>
<td>C</td>
<td>Passed but work does not indicate potential for professional achievement</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
</tr>
<tr>
<td>NP</td>
<td>Not Passed</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress</td>
</tr>
<tr>
<td>DR</td>
<td>Deferred Report</td>
</tr>
</tbody>
</table>

### For Undergraduates

The grade A may be modified by a minus (−) suffix, and the grades B, C, and D by a plus (+) or minus (−) suffix, to either raise or lower your grade-point average. The grades A, B, C, and P denote satisfactory progress toward the bachelor’s degree, but a D grade must be offset by higher grades in the same term for you to remain in good academic standing. An F grade yields no unit or course credit.

### For Graduate Students

The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same term for you to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees.

The Schools of Dentistry, Medicine, and Law maintain their own grading codes. If you are interested in programs in any of these schools, consult the appropriate school announcement.

## Grade Points

In computing scholarship standing, a course counts as four quarter units. Partial or multiple courses are counted proportionally (e.g., one-half course is equal to two units).

### Grade Points per Unit

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A−</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B−</td>
<td>2.7</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
<tr>
<td>NP</td>
<td>0</td>
</tr>
<tr>
<td>U</td>
<td>0</td>
</tr>
</tbody>
</table>

Courses in which you receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, and IP, are disregarded in determining your grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent grade-point averages.)

## Computing Your Grade-Point Average

Your grade-point average, or GPA, is determined by dividing the number of grade points earned by the number of units attempted. For example, suppose you take three four-unit courses and receive grades of A−, B−, and C+. The total number of grade points earned is 34.8, and the total number of units attempted is 12. Your GPA is 2.9.

### For Undergraduate Students

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except UCLA Extension). Individual departments may require higher standards of achievement.

Only grades earned in regular session or Summer Sessions at any UC campus are computed in your UCLA grade-point average. Grades earned at another institution or in UCLA Extension do not affect your GPA.

Other schools and agencies may calculate grade-point averages differently from the University when evaluating your records for admission to graduate and professional school programs. You should contact them about their policies in this regard.

## Class Standing

Undergraduate classification is determined by the number of units completed:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Completed Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 - 44.9</td>
</tr>
<tr>
<td>Sophomore</td>
<td>45 - 89.9</td>
</tr>
<tr>
<td>Junior</td>
<td>90 - 134.9</td>
</tr>
<tr>
<td>Senior</td>
<td>135 or more</td>
</tr>
</tbody>
</table>
In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college-level coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the School of the Arts, School of Nursing, and School of Theater, Film, and Television; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 187 and 201 (depending on the program); 213 maximum units are allowed. If you exceed the maximum, you may not be advanced to candidacy for a doctorate.

Graduate classification is based on your degree objective and whether or not you are advanced to candidacy for a doctorate.

**Passed/Not Passed (P/NP) Grades**

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed basis.

By alleviating grading pressures, this option allows you to explore areas in which you have little or no previous experience. The grade P is assigned for a letter grade of C or better. Units earned this way count toward satisfaction of degree requirements but do not affect your GPA.

You will receive neither units nor course credit for an NP grade.

You may enroll in one course each term on a P/NP basis (two courses if you have not elected the P/NP option in the preceding term). You may not elect this option for Summer Sessions courses without an approved petition. Your department or school may require that you take some or all courses in your major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult your college or school for details.

You may make program changes to or from P/NP grading through the sixth week of instruction (see the Calendar at the beginning of this catalog for exact dates); changes after the first two weeks of class require a petition ($3 — pay fee at the Main Cashier, 1125 Murphy Hall), available from your college or school.

Certain undergraduate courses are offered only on a Passed/Not Passed basis and are designated PN in the Schedule of Classes.

**Satisfactory/Unsatisfactory (S/U) Grades**

Graduate students in good standing (minimum 3.0 GPA) may enroll for S/U grading in one graduate or upper division course outside the major field each term, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of B or better, but units earned in this manner will not be counted in computing the GPA. You will receive neither units nor degree credit for a U grade.

You may not elect the S/U option for Summer Sessions courses without an approved petition. Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction (see the Calendar at the beginning of this catalog); changes after the first two weeks of class require a petition ($3 — pay fee at the Main Cashier, 1125 Murphy Hall), available from your department.

Certain graduate courses are offered only on a Satisfactory/Unsatisfactory basis and are designated SU in the Schedule of Classes.

**Incomplete (I) Grades**

Your instructor may assign the I grade when your work is of passing quality but is incomplete for a good cause (i.e., illness or other serious problems). It is your responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, you may replace it with a passing grade and receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. If the work is not completed by the end of the next full term in residence, the grade will lapse to an F, NP, or U as appropriate. Your college or school may extend this deadline in unusual cases.

Petitions for Removal of Incomplete Grade ($5 — pay fee at the Main Cashier, 1125 Murphy Hall) are available in your school or department office. (Note: Once an I grade is assigned, it remains on your transcript along with the passing grade you may later receive for the course.)

**In Progress (IP) Grades**

For certain courses extending over more than one term (identified by T1, T2, T3, or T4 in the Schedule of Classes), evaluation of student performance is deferred until the end of the final term of the course. Provisional grades of IP are assigned in the intervening term(s) and are replaced with the final grade when you complete the full sequence. The school or college faculty or the Graduate Council will determine credit if you do not complete the full sequence and petition for partial credit.

**Deferred Report (DR) Grades**

You may receive a DR grade when the instructor believes your work to be complete but cannot assign a grade because of disciplinary proceedings or other problems. If you are given a disciplinary DR grade, the Office of the Dean of Students will assist you in resolving the problem. For graduate students, the dean of the Graduate Division will set a deadline by which the DR will lapse to an F if the problem is not resolved and a grade assigned. The DR will be changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that you have resolved the situation. The DR grade is not included in determining your grade-point average.

**Repetition of Courses**

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except Extension) may be repeated only according to the following guidelines:

1. To improve your grade-point average, you may repeat only those courses in which you receive a grade of C — or lower; NP or U grades may be repeated to gain unit credit. Courses in which you received a letter grade may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated either on the same basis or for a letter grade.

2. Repetition of a course more than once requires the approval of your college or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.

3. Degree credit for a course will be given only once, but the grade assigned each time you take the course will be permanently recorded on your transcript.

4. For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points will be computed in the grade-point average. After repeating 16 units, however, your GPA will be based on all letter grades assigned and total units attempted.

5. For graduate students, all courses in which a letter grade is given, including repeated courses, will be used in computing the grade-point average.
Correction of Grades

All grades except DR, I, and IP are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by reexamination or, with the exception of the I and IP grades, by completing additional work. If you are dissatisfied with a grade, you should review your work with the instructor and receive an explanation of the grade assigned. See the Appendix for further details and procedures for appealing grades.

Credit by Examination

Students with high scholastic standing may earn credit for regular University courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study which may include oral and written work in addition to other requirements. To be eligible for this privilege, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner. The results of these courses are entered on your record in the same way as regular courses, and corresponding grade points are assigned. Graduate credit earned by examination may be applied toward minimum course requirements for master’s degrees but cannot apply to academic residence requirements for master’s or doctoral degrees.

You will need approval from the appropriate instructors, the department, and your college or school or the dean of the Graduate Division, from whom petitions for credit by examination ($5 each — pay fee at the Main Cashier, 1125 Murphy Hall) are available.

Other Academic Policies

Concurrent Enrollment and Transfer of Credit

Concurrent enrollment means taking courses for credit in UCLA regular session (Fall, Winter, or Spring Quarter) and at another college institution (including UCLA Extension) at the same time. Concurrent enrollment is not permitted except in extraordinary circumstances, and re
credit will be given for courses taken concurrently elsewhere without the approval of your college or school. This does not apply to UCLA Summer Sessions (see “Summer Sessions” in Chapter 1).

Undergraduates

During the summer or during a term when you are not registered at UCLA, you may elect to take courses for credit at UCLA Extension, a community college, or another four-year institution (see limitations below). The Office of Undergraduate Admissions and Relations with Schools makes the final decision on credit transferability, but it is your responsibility to select courses with catalog descriptions similar to courses offered in regular session at UCLA. You should avoid courses that are closely related to those you have already taken, as you cannot receive credit twice for the same or similar courses. If you wish to apply a specific course from another college toward satisfaction of degree requirements at UCLA, consult your college, school, or department counselor before taking the course.

Only grades earned in regular session or Summer Sessions at any UC campus will be computed into your UCLA grade-point average. You may, however, receive unit credit and satisfy course requirements with transferable work taken elsewhere. When you have completed the work, you must have the other college send a copy of your transcript to the UCLA Office of Undergraduate Admissions and Relations with Schools (UARS); you must also fill out a Transfer Credit Evaluation Request form in the UARS Office.

UCLA Extension — If you wish to receive degree credit for work taken through UCLA Extension, you should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. No degree credit is given for courses numbered X300 through X499. Remember that concurrent enrollment in Extension and regular session is not permitted.

Community Colleges — The maximum number of community college units allowed toward the bachelor's degree is 105 quarter units (70 semester units). The UCLA Office of Undergraduate Admissions and Relations with Schools will not count community college courses beyond 105 quarter units, but you may still receive subject credit to satisfy lower division requirements. Consult your college or school counselors for possible further limitations. (To convert semester units into quarter units, multiply the semester units by 1.5 — e.g., 12 semester units × 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 — e.g., 12 quarter units × .666 = 7.99 or 8 semester units.)

Graduates

With approval of the dean of the Graduate Division, certain courses completed outside of UCLA regular session may be applied toward the master’s degree. For more details, see “Transfer of Credit” under “Requirements for Graduate Degrees” in Chapter 3.

Transcript of Record

The Registrar prepares and permanently retains a record of each student's academic work. Your transcript reflects all undergraduate and graduate work completed in UCLA regular session and Summer Sessions. It lists chronologically your courses, units, grades, cumulative grade-point average, transfer credits, and total units. Unofficial copies of student transcripts are issued several weeks after the end of each term (to learn your grades more quickly, leave postcards with your instructors). You should pick up your transcript and inform the Registrar immediately of any omissions or other discrepancies. Student copies are available from mid-January to mid-February for Fall Quarter grades, mid-April to mid-May for Winter Quarter grades, and July to October for Spring Quarter grades at no charge from Registrar's Student Information, 1134 Murphy Hall (students in the Schools of Architecture and Urban Planning, the Arts, Management, Nursing, Public Health, and Theater, Film, and Television should pick up their transcripts in the respective school office). Consult the Schedule of Classes Calendar for specific distribution dates.

To have official transcripts sent to other schools or institutions, fill out a Transcript Request form at Registrar's Student Information, 1134 Murphy Hall. Each transcript costs $4; make your check or money order payable to Regents-UC. Transcript fees are subject to change at any time. Requests will not be processed if you have outstanding financial obligations to the University. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

Transcripts for UCLA Extension courses may be ordered from UCLA Extension, P.O. Box 24901, Los Angeles, CA 90024.

Verification of Student Status

The Registrar verifies current term registration and full-time enrollment status for loan forms and other noncampus certifications at 1134 Murphy Hall, beginning the first day of classes for undergraduates and the third week of classes for graduates.

Certificate of Resident Study for International Students

In addition to a formal transcript, each college or school of the Graduate Division may issue a Certificate of Resident Study to a registered international student. To obtain this certificate, you must have completed a program of at least nine courses with a minimum 2.0 grade-point average, or have satisfactorily completed a research project over a period of nine months or more. The chair of your major department recommends the award of this certificate.

Registration Card

Your valid Registration Card (Reg Card) is your official student identification and is required, along with your UCLA Student I.D. Card, for most University services. Carry it with you as you will be asked to show it for student health services, library privileges, athletic and cultural student ticket rates, recreation center, check cashing, and many other campus services.

If you lose or do not receive your Reg Card, a temporary verification card (good for seven days) will be issued without fee at the Registration Office, 1113 Murphy Hall. After the term begins, you may replace lost, destroyed, or mutilated cards at the Registration Office for a $3 fee. You must show proof of identity for verification or replacement cards.

UCLA Student (Photo) I.D. Card

This card with photo is issued without charge in your first term of registration and is valid with the current Reg Card as long as you remain in the same standing (graduate or undergraduate). It is required for most University services and student activities.

You will need a current Reg Card and other valid identification (driver's license, passport, or DMV I.D. card) to get your Student I.D. Card. In Fall Quarter cards are issued adjacent to the enrollment area in Ackerman Union. In other terms, cards are issued at 140 Kerckhoff Hall. There is a $10 fee for issuing the card after your first term in attendance. You may replace lost or destroyed cards at 140 Kerckhoff Hall for a $10 fee.

Change of Name or Address

If you wish to change your name on your official record, fill out a name change form at Registrar's Student Information, 1134 Murphy Hall. If you change your address after filing the UCLA Data Change Request portion of your Registration Form, notify the Registration Office in 1113 Murphy Hall as soon as possible.
Leaving UCLA

Intercampus Transfer
Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the UC Undergraduate Application Packet and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see "Undergraduate Admission" in Chapter 2). Applications are available from the UCLA Office of Undergraduate Admissions and Relations with Schools, 1147 Murphy Hall, Los Angeles, CA 90024-1436, other University of California Undergraduate Admissions Offices, or your local community college.

Graduate students who wish to enroll as degree candidates at other UC campuses must apply for admission to those Graduate Divisions.

Absence during a Term
If you have to be absent from classes temporarily for reasons beyond your control, you should notify your instructors. Regardless of the reasons for absence, you are required to complete all coursework. If you cannot complete the work on time because your absence is late in the term or prolonged, you may request that the instructors assign an Incomplete grade (see "Incomplete Grades" earlier in this chapter).

One Term Absence for Undergraduates
Undergraduate students who have completed at least one term at UCLA and fail to register for the following term may return to the University the next subsequent term as continuing students. If you plan to attend another institution (including UCLA Extension) during your absence, you should consult your college or school counselor before enrolling elsewhere (see "Concurrent Enrollment and Transfer of Credit" earlier in this chapter). If you are absent for two or more consecutive terms, you are no longer considered a continuing student and must apply for readmission (see "Readmission" in Chapter 2 for procedures and deadlines).

Leave of Absence for Graduate Students
Graduate students in good standing may be granted leaves of absence, normally for periods of one to three terms, on approval from the appropriate department and the Graduate Division. Leaves, which may be extended for a total of two years at the discretion of your department and the Graduate Division, must be requested before the end of the second week of class. Request forms are available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. For details on leaves of absence, see Standards and Procedures for Graduate Study at UCLA, available in the Graduate Division offices or in individual departments. Students on leaves of absence are not eligible to use University facilities (except libraries) or faculty time. Leaves of absence as described here do not apply to undergraduates.

Graduate students who fail to register for a term and do not take an official leave of absence are considered to have withdrawn from the University and must compete for readmission with all other applicants.

Cancellation
Before the first day of classes, you may cancel registration by submitting a written notice, together with your current Registration Card and Student I.D. Card, to the Registration Office, 1113 Murphy Hall. A $10 service charge will be deducted from your fee refund; additional fees will be deducted for failure to return your Registration Card and Student I.D. Card.

Undergraduates who return to the University for the following term are considered continuing students. If you are absent longer than one term, you must apply for readmission (see "Readmission" in Chapter 2 for procedures and deadlines). If you cancel in your first term at UCLA, you must reapply for admission.

Graduate students who cancel their registration and do not apply for a formal leave of absence must compete for readmission to return to the University.

Withdrawal
Withdrawal from the University means discontinuing attendance in all courses in which you are enrolled. If you withdraw during a term, you need to file a Notice of Withdrawal, available from your academic dean's office (undergraduates) or departmental office (graduates). Submit your Registration Card and Student I.D. Card along with the form or a fee will be deducted from any refund.

When you withdraw officially during the first five weeks of instruction (calendar days 1 to 35, beginning with the first day of instruction), a percentage of your registration fee will be refunded as follows:

<table>
<thead>
<tr>
<th>Week of Instruction</th>
<th>Refund Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>First week</td>
<td>80%</td>
</tr>
<tr>
<td>Second week</td>
<td>60%</td>
</tr>
<tr>
<td>Third week</td>
<td>40%</td>
</tr>
<tr>
<td>Fourth week</td>
<td>20%</td>
</tr>
</tbody>
</table>

If instruction begins in midweek, refund percentages may also change in midweek. Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. Consult the current Schedule of Classes for further details and specific refund dates.

You may withdraw only if you have not taken any final examinations or otherwise completed the work in any of your courses. For undergraduates, one withdrawal places no restriction on readmission or continuation if you started the term in good academic standing. If you withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on your continuance in undergraduate standing. Before withdrawing, you are urged to consult faculty, departmental, or college advisers to consider the full implications of this action.

Undergraduates may also withdraw from a term retroactively, provided no final examinations have been taken and no coursework has been completed. No withdrawals are accepted once you have officially graduated from the University.

If you register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation, you will receive F, NP, or U grades, as appropriate, for all courses in which you are enrolled for that term. A $60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). No fees will be refunded, and future registration privileges may be curtailed or revoked. Transcripts will not be issued if you have outstanding financial obligations to the University.
Undergraduate Students — If you return to the University for the term following withdrawal, you are considered a continuing student. If you return later than the following term, you must apply for readmission.

Graduate Students — If you do not register for a term, you are considered to have withdrawn from the University and must apply for readmission when you return.

Graduation from UCLA

Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. According to a recent survey of UCLA alumni, one third of all current term after published deadlines.

Requirements” in Chapter 2.

You may request a review of your degree progress by a counselor in your college or school office at any time. Advisers in your major department are also available for counseling on departmental requirements.

The “degree expected term” you specify on your Registration Form is used by the degree auditors to review your coursework and begin the audit of your completion of degree requirements. You cannot graduate without such an audit. If your expected graduation date changes, mark the new term on the Registration Form and file it within the published dates (consult the Schedule of Classes Calendar) at the Registration Office, 1113 Murphy Hall. There is a fee for declaring candidacy for the current term after published deadlines.

During the fourth week of classes each term, a list of candidates for that term is posted on the bulletin board next to the Registration Office, 1113 Murphy Hall. If you have requested that no public information (including your name) be released, you will not be included on the posted list. Inquire at the Registration Office for information on your degree expected term (a photo I.D. is required).

If you complete requirements (take a course through UCLA Extension at another institution, remove an Incomplete grade, etc.) but are not currently registered, you must file a candidacy petition and designate your plan to be graduated “in absentia.” Consult the Schedule of Classes Calendar for filing deadlines to declare candidacy.

Students in the School of the Arts, School of Nursing, School of Engineering and Applied Science, and School of Theater, Film, and Television are audited for degree requirements by staff members in their respective counseling/student affairs offices and should consult them regarding questions on degree requirements and school degree audit procedures.

Plans are underway for students in the College of Letters and Science who entered UCLA in Fall Quarter 1988 and thereafter to be provided with a computer-generated Degree Progress Report. This report will include a detailed evaluation of transfer credit, courses and grades for each completed term, degree requirements completed, and requirements still outstanding. Consult the Schedule of Classes for details regarding the new form and its distribution.

Students who entered prior to Fall Quarter 1988 are audited for degree requirements by the Registrar’s degree auditors after completing 160 units, with an “expected degree term” within the subsequent two terms. You should receive information regarding your completion of requirements or any remaining degree requirements and/or deficiencies no later than your final term.

A “Summary of Shortages for the Bachelor’s Degree” statement is mailed to each current term candidate who does not satisfy degree requirements that term. If you receive such a notice, contact a degree auditor immediately to discuss your expected completion of the requirements.

Once you complete 180 units and declare the current term as your “expected degree term,” you are reviewed by your degree auditor for award of the degree each subsequent term while in continuous registration, including UCLA Summer Sessions. Keep your degree auditor informed of your plans for completing your degree.

Graduate Students

Candidates for both master’s and doctoral degrees must file an advancement to candidacy petition, be advanced to candidacy, and complete all degree requirements, including the master’s thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred (consult the Schedule of Classes for filing deadlines). For full details on degree requirements and procedures for graduate students, see Chapter 3 on Graduate Study.

Certificate of Completion

The Certificate of Completion, the official notice that you have met all degree requirements and will be placed on the list of graduates for the specified term, is sent to you four to six weeks after the end of your final term. Official transcripts, with your graduation date included, should be available for order within seven weeks after the end of the term.

Degree Date

Degrees are awarded at the end of Fall, Winter, and Spring Quarters and at the end of the second Summer Session. For the School of Law and School of Medicine degrees are awarded at the end of Fall and Spring Semesters. Consult the respective University calendars (quarter, summer sessions, semester) for the actual degree award date, which is the final day of the term.

Diplomas

Diplomas for both undergraduate and graduate students are available approximately three months after the degree award date. Information about obtaining your diploma in person (no fee) or by mail (with fee) is included with your Certificate of Completion. To expedite receipt of your diploma, you are encouraged to return the diploma mailer form and remit the mailing fee.

If your original diploma is destroyed, a duplicate may be ordered by contacting the Registrar’s Office, Diploma Reorder, 1105 Murphy Hall. There is a fee for the replacement diploma, and it will bear a reissue date and the signatures of the current officials of the state and University. The Registrar’s Office retains diplomas for five years from graduation date.

Commencement

Each school and college conducts an academic ceremony for its graduates. Some of the ceremonies feature an address by the Chancellor, student speakers, recognition of candidates who have achieved high academic distinction and honors, as well as prizes, and the awarding of the UCLA Medal. Check with your school or college for eligibility requirements and program and time schedules.

Academic regalia (caps, gowns, and hoods) become available for rent through ASUCLA two weeks prior to Commencement. For rental information, call 825-2587. You may purchase graduation announcements with printed enclosure cards at the ASUCLA Campus Photo Studio (150 Kerckhoff Hall) through mid-May. Discount packages are available for purchase through a joint effort by the UCLA Alumni Association and ASUCLA.
Colleges and Schools

Organization

This catalog is organized into the one college and 13 schools which are the University's component parts. Each of the following chapters is devoted to a single college or school. Each is introduced by general information on scope and emphasis, the academic departments it encompasses, admission standards, and requirements for undergraduate and graduate degrees.

The overall college or school description is followed, in alphabetical sequence, by its departmental listings. Here you will find faculty rosters, departmental degree requirements, requirements for the major, and descriptions of all courses (lower division, upper division, and graduate) offered by that department or interdepartmental degree program. (If you are not certain which college or school offers a particular program, see the organization chart on the inside front cover.)

Since the great majority of UCLA's students and degree programs are housed within the College of Letters and Science, that unit is presented first. It is followed by the other general campus units offering undergraduate programs: the School of the Arts, School of Theater, Film, and Television, and School of Engineering and Applied Science. The graduate programs: the School of the Arts, School of Theater, Film, and Television, and School of Engineering and Applied Science. The graduate programs: the School of the Arts, School of Theater, Film, and Television, and School of Engineering and Applied Science. The graduate programs: the School of the Arts, School of Theater, Film, and Television, and School of Engineering and Applied Science.

Courses of Instruction

Because the catalog must be prepared well in advance of the academic year it covers, it may not reflect recent changes in courses, curricula, and faculty listings. For more current information, consult the quarterly Schedule of Classes available in the Students' Store shortly before the beginning of each new term.

Courses listed in this catalog represent the total nonclinical offerings of each college, school, and department at UCLA. Certain courses listed may not be offered every term or every year. Where possible, the terms in which a course is offered have been indicated in parentheses after the instructor's name (F = Fall, W = Winter, Sp = Spring, Sum = Summer).

Academic Credit

A course has a credit value of four quarter units unless otherwise specified in parentheses after the course title.

A listing such as History 1A-1B-1C, Introduction to Western Civilization, indicates three full four-unit courses, 1A, 1B, and 1C. The listing Music 4A-4B-4C, Basic Musicianship (2 units each), indicates three half-courses at two units each. A course may not be prerequisite to the next in the series unless so designated, but since policies vary among departments, you should check with the departmental counselor or adviser. Credit for a specific course may be dependent on completion of a subsequent course, as noted in the description.

Prerequisites

Education is a building process. It is difficult or impossible to learn advanced principles without first understanding elementary ones. Therefore, one or more lower division courses may be prerequisite to taking another lower division or an upper division course. Prerequisites should be noted carefully — it is your responsibility to meet these requirements in preparation for more advanced work. A course has no prerequisites if none is designated in departmental requirements or course descriptions.

Undergraduate Courses

Undergraduate courses are classified as lower division and upper division. Lower division courses (numbered 1-99) are often surveys offering preliminary introductions to the subject field. They are designed primarily for freshmen and sophomores, though upper division students may enroll for unit and grade credit. Lower division courses may not be applied toward graduate degrees.

Upper division courses (numbered 100-199) are open to all students who have met the prerequisites indicated in departmental requirements or the course description. Preparation generally includes at least one lower division course in the subject or two years of college work. With approval of the major department, graduate students may take 100-series courses toward satisfaction of master's degree requirements.

Courses numbered 98 and 198 are group study courses set up on a one-time basis in subjects for which no regular courses have been established. Because they vary in content and are offered irregularly, they are not listed in the catalog.

Individual special studies courses (numbered 199, 199F, 199H, and 199I) involve supervised independent study and research requiring adequate background in the subject proposed for study. These courses are open to juniors (with a minimum 3.0 GPA in the major field), seniors, and graduate students. To enroll, you must complete the appropriate petition (available from the department) and have it approved by both the instructor in charge and department chair.

Undergraduates may enroll in a maximum of eight units of 199, 199F, 199H, or 199I courses per term. After completing 16 units of 199 or 199H credit on a letter grade basis, you must take any additional 199 or 199H courses on a Passed/Not Passed basis. Independent field study courses (199F and 199I) must be taken on a Passed/Not Passed basis; a total of eight units is allowed. If you have an outstanding Incomplete grade in a 199, 199F, 199H, or 199I course, you may not register for another until the I grade is removed. See departmental listings and individual course descriptions for specific prerequisites and credit limitations.

Graduate Courses*

Graduate courses numbered 200-299 are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree.

*These definitions do not apply to the School of Law, which maintains its own course numbering system.
With departmental and instructor consent, and subject to requirements in the appropriate college or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If you take a graduate course as an undergraduate, you may not apply that same course later toward a higher degree.

Graduate courses numbered 300-399 are highly specialized teacher-training courses which are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor's degree only at the discretion of the individual college or school.

Graduate courses numbered 400-499 are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements for the M.A. or M.S. degree but may apply as electives.

Individual study and research courses (numbered 500-599) are reserved for advanced study and are not open to undergraduates. Courses are numbered as follows: 595/596 = directed individual study or research; 597 = preparation for master's comprehensive or doctoral qualifying examination; 598 = master's thesis research and preparation; and 599 = doctoral dissertation research and preparation. (Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with other institutions.) See individual departmental listings for specific limitations on 500-series courses.

UCLA Extension Courses

In general, you may not attend UCLA Extension for degree credit if you are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the course listings, yield credit toward the bachelor's degree. Graduate students may petition to apply up to two XLC courses toward the master's degree. For more details, see " Concurrent Enrollment" earlier in this chapter.

Concurrent and Multiple Listings

Concurrently scheduled courses (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels — undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through UCLA Extension.)

Multiple-listed courses (identified by a capital M before the course number) are courses of the same format and level offered jointly by more than one department. For example, Byzantine Civilization is offered by the Department of Classics (Classics M170A) and the Department of History (History M122A). You will find that particular course listed under both departments in Chapter 5 on the College of Letters and Science.

Faculty Rosters

Faculty rosters in each academic department are listed in the following order:
- Professors
- Associate Professors
- Assistant Professors
- Lecturers
- Adjunct and Visiting faculty in each of the first three Academic Senate classifications

In the case of interdepartmental degree programs, all participating faculty members have appointments in regular academic departments. Participating faculty are listed in the above order, with the home department or specialty of each member indicated in parentheses.
The Idea of a Multiversity' is a city of infinite variety. Some get lost in the city; some rise to the top within it; most fashion their lives within one of its subcultures. . . . It offers . . . a vast range of choices, enough literally to stagger the mind. In this range of choices . . . (one) encounters the opportunities and the dilemma of freedom."

Clark Kerr, The Uses of the University

With over 23,000 students and 1,000 faculty, UCLA's College of Letters and Science is the largest academic unit in the UC system. Underscoring the "multiversity" concept, its four academic divisions of humanities, physical sciences, social sciences, and life sciences provide the framework for more than 100 majors leading to the Bachelor of Arts or Bachelor of Science as well as to master's and doctoral degrees.

The undergraduate programs in the college stress a "liberal arts education" which brings together perspectives from many fields in a unified approach to learning. Students learn some of the ways issues are analyzed, questions posed, and knowledge organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they will pose their own questions, analyze academic issues of their own making, and, through their research, participate in the creation of knowledge.
College of Letters and Science

A316 Murphy Hall, (213) 825-1965

The primary units of the College of Letters and Science are the academic departments which are grouped in four divisions: humanities, physical sciences, social sciences, and life sciences. Each division is headed by a dean who reports directly to the provost.

In addition to departmental advising, the Division of Honors and Undergraduate Programs includes a network of student assistance within its components: College Counseling Service, Honors Programs (see “Honors” later in this section), and Academic Advancement Program (see Chapter 2).

Undergraduate Study

The degree programs in the College of Letters and Science are designed to expose students to a variety of intellectual challenges by combining a wide distribution of courses and the opportunity to specialize in one particular field. To this end, you are required to select lower division courses that deal with the general foundations of human knowledge. In upper division courses you are relatively free to concentrate attention on one field of interest: your major.

You are expected to select a major by the beginning of your junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet your special need (individual major). Preparation for a major often requires prior completion of courses known as prerequisites.

Counseling Services

The College Counseling Service is located in A316 Murphy Hall. Staff members are specially trained to assist you with questions pertaining to academic regulations and procedures, selection of courses, and the many options and alternatives available to enhance your university education.

Some questions can be answered at the college information window or by calling 825-1965. If you would like to confer with a counselor or regarding overall degree requirements, academic difficulty, program planning, or assistance in selecting a major, you can arrange an appointment at the information window. Appointments with counseling assistants can be scheduled by calling 206-6681. Group counseling sessions on a variety of academic issues are offered throughout the year.

For information on the ASK peer counselors, Orientation, and tutorial services, see Chapter 2.

Your Major

Most entering freshmen are unsure about specific academic goals and request to be admitted to the college as “undeclared.” These students then explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest (see “Choosing Your Major” in Chapter 2 of this catalog).

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When you are ready to do so, obtain approval on a Petition for Declaration of Major from the department or interdepartmental degree committee which governs your intended major and file the form at the College Counseling Service.

You can obtain help with your academic planning from a variety of resources, including the College Counseling Service in A316 Murphy Hall (825-1667 or 825-1965) and the Placement and Career Planning Center (825-2981). In addition, faculty members and counselors in each college department are available to discuss in detail the courses and programs in their respective fields. For further suggestions, see “Advising and Academic Assistance” in Chapter 2.

Assessing Progress Toward Your Degree

One of your responsibilities as a UCLA student includes a regular monitoring of all requirements necessary for the degree. It is imperative that you read this catalog carefully and consult regularly with the Letters and Science counseling staff for confirmation of the requirements you need. “Degree checks” are available by appointment. Departmental counselors can advise you regarding progress and completion of your major requirements. It is important that you maintain an accurate assessment of progress toward your degree by utilizing departmental and College Counseling Service resources.

Minimum Progress

UCLA is a full-time institution, and it is expected that students will complete their undergraduate degree requirements promptly. The recommended study load for an undergraduate in the College of Letters and Science is 12 to 16 units per quarter.

According to Academic Senate regulations, Letters and Science undergraduates who do not pass at least 36 units during any three consecutive terms will be placed on probation, and students who do not pass at least 32 units during three consecutive terms will be subject to disqualification from registration at the University. Exceptions may be granted by the college due to poor health, family responsibilities, or regular employment of 20 hours per week or more.

Letters and Science Majors

A major in the College of Letters and Science consists of at least nine and no more than 15 upper division courses (between 36 and 60 units). All courses applied toward the major and preparation for the major must be taken in the college as “undeclared.” The recommended study load for an undergraduate in the College of Letters and Science is 12 to 16 units per quarter. If you have been away from the University for several terms, you should consult with your major department or curriculum advisor concerning the requirements under which you will graduate.

There are three categories of majors in the College of Letters and Science:

Departmental Majors

A departmental major consists of a group of related upper division courses, of which at least six courses are in one department. These majors are supervised by established campus departments. There are 82 departmental majors currently offered by the college.
Majors and Degrees Offered

African Area Studies (M.A.)
African Languages (B.A.)
Afro-American Studies (B.A., M.A.)
American Indian Studies (M.A.)
Ancient Near Eastern Civilizations (B.A.)
Anthropology (B.A., B.S., M.A., Ph.D.)
Applied Linguistics (C.Phil., Ph.D.)
Applied Mathematics (B.S.)
Arabic (B.A.)
Archaeology (M.A., C.Phil., Ph.D.)
Art History (B.A., M.A., Ph.D.)
Asian American Studies (M.A.)
Astronomy (B.S., M.A., M.A.T.*, Ph.D.)
Astrophysics (B.S.)
Atmospheric Sciences (B.S., M.S., C.Phil., Ph.D.)
Biochemistry (B.S., M.S., C.Phil., Ph.D.)
Biology (B.S., M.A., C.Phil., Ph.D.)
Chemistry (B.S., M.S., C.Phil., Ph.D.)
Chemistry/Materials Science (B.S.)
Chicano Studies (B.A.)
Chinese (B.A.)
Classical Civilization (B.A.)
Classics (B.A., M.A., C.Phil., Ph.D.)
Cognitive Science (B.A.)
Communication Studies (B.A.)
Comparative Literature (M.A., C.Phil., Ph.D.)
Cybernetics (B.S.)
Development Studies (B.A.)
East Asian Languages and Cultures (M.A., C.Phil., Ph.D.)
East Asian Studies (B.A.)
Economics (B.A., M.A., C.Phil., Ph.D.)
Economics/Business (B.A.)
Economics/International Area Studies (B.A.)
Economics/System Science (B.S.)
English (B.A., M.A., C.Phil., Ph.D.)
English/Greek (B.A.)
English/Latin (B.A.)
Folklore and Mythology (M.A., Ph.D.)
French (B.A., M.A., C.Phil., Ph.D.)
French and Linguistics (B.A.)
General Chemistry (B.S.)
General Mathematics (B.S.)
General Physics (B.A.)
Geochemistry (M.S., C.Phil., Ph.D.)
Geography (B.A., M.A., C.Phil., Ph.D.)
Geography/Ecosystems (B.A.)
Geology (B.S., M.S., C.Phil., Ph.D.)
Geology — Engineering Geology (B.S.)
Geology — Paleobiology (B.S.)
Geophysics — Applied Geophysics (B.S.)
Geophysics and Space Physics (B.S., M.S., Ph.D.)
German (B.A., M.A.)
Germanic Languages (C.Phil., Ph.D.)
Greek (B.A., M.A.)
Hebrew (B.A.)
Hispanic Languages and Literatures (C.Phil., Ph.D.)
History (B.A., M.A., C.Phil., Ph.D.)
History/Art History (B.A.)
Indo-European Studies (C.Phil., Ph.D.)
Iranian Studies (B.A.)
Islamic Studies (M.A., C.Phil., Ph.D.)
Italian (B.A., M.A., C.Phil., Ph.D.)
Italian and Special Fields (B.A.)
Japanese (B.A.)
Jewish Studies (B.A.)
Kinesiology (B.S., M.S., Ph.D.)
Latin (B.A., M.A.)
Latin American Studies (B.A., M.A.)
Linguistics (B.A., M.A., C.Phil., Ph.D.)
Linguistics and Anthropology (B.A.)
Linguistics and Computer Science (B.A.)
Linguistics and East Asian Languages and Cultures (B.A.)
Linguistics and English (B.A.)
Linguistics and French (B.A.)
Linguistics and Italian (B.A.)
Linguistics and Philosophy (B.A.)
Linguistics and Psychology (B.A.)
Linguistics and Scandinavian Languages (B.A.)
Linguistics and Spanish (B.A.)
Mathematics (B.S., M.A., M.A.T., C.Phil., Ph.D.)
Mathematics/Applied Science (B.S.)
Mathematics of Computation (B.S.)
Microbiology (B.S., M.A., Ph.D.)
Molecular Biology (Ph.D.)
Near Eastern Languages and Cultures (M.A., C.Phil., Ph.D.)
Near Eastern Studies (B.A.)
Philosophy (B.A., M.A., C.Phil., Ph.D.)
Physics (B.S., M.S., M.A.T., Ph.D.)
Political Science (B.A., M.A., C.Phil., Ph.D.)
Portuguese (B.A., M.A.)
Psychobiology (B.S.)
Psychology (B.A., M.A., C.Phil., Ph.D.)
Public Administration (M.P.A.*)
Religion, Study of (B.A.)
Roman Romance Linguistics and Literature (M.A., C.Phil., Ph.D.)
Russian Language and Literature (B.A.)
Russian Studies (B.A.)
Scandinavian (M.A.)
Scandinavian Languages (B.A.)
Slavic Languages and Literatures (B.A., M.A., C.Phil., Ph.D.)
Sociology (B.A., M.A., C.Phil., Ph.D.)
Spanish (B.A., M.A.)
Spanish and Linguistics (B.A.)
Spanish and Portuguese (B.A.)
Teaching English as a Second Language (M.A.)
Women's Studies (B.A.)
World Arts and Cultures (B.A.)

*Not admitting new students at this time.
**The department admits only applicants whose objective is the Ph.D.
Interdepartmental Majors

An interdepartmental major consists of at least 13 related upper division courses, of which no more than eight are in one department. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

The College of Letters and Science currently offers 25 interdepartmental majors. Although most lead to bachelor's degrees, there are some which lead to graduate degrees only. Check the chart of majors and degrees for the programs which interest you.

African Area Studies
Afro-American Studies
American Indian Studies
Applied Linguistics
Archaeology
Asian American Studies
Chemistry/Materials Science
Chicano Studies
Communication Studies
Comparative Literature
Cybernetics
Development Studies
East Asian Studies
Economics/System Science
Folklore and Mythology
History/Art History
Indo-European Studies
Islamic Studies
Latin American Studies
Molecular Biology
Near Eastern Studies
Religion, Study of
Romance Linguistics and Literature
Women's Studies
World Arts and Cultures

You can find a detailed description of each of these majors under their respective headings later in this chapter.

Individual Majors

If you have some unusual but definite academic interest for which no suitable major is offered at the University and you have completed at least three terms of work (nine courses) at the University with a grade-point average of 3.4 or better, you may plan an individual major. The consent of the Division of Honors and Undergraduate Programs and the assistance of a faculty adviser are required.

The major should consist of at least 12 and no more than 15 upper division courses, a majority of which are in departments offering a major in the college. A senior thesis is required. The title of the major will be entered in the memorandum column of your official transcript; your diploma will read "Individual Field of Concentration." For further details about individual majors, contact the Honors Programs Office in A311 Murphy Hall (825-1553).

Returning Students and Their Majors

If you return to the University to resume your studies after an absence of several years, you may find your previous major area of study no longer available. You then must select a current major in which to complete your studies. Consult the College Counseling Service for assistance.

Supplemental Programs

The college offers no "minors"; instead, you may choose from 12 different programs which are not degree-granting majors, but are sequences of supplemental courses designed to enhance your work in certain areas. Each of these specializations must be taken jointly with an organized departmental or interdepartmental major:

- African Studies
- Asian American Studies
- Business and Administration Computing, Specialization in (anthropology, cybernetics, economics, geography, linguistics, mathematics, psychology, sociology)
- Diversified Liberal Arts Education
- International Relations
- Labor and Workplace Studies
- Law and Society
- Organizational Studies
- Urban Studies
- Women's Studies

Detailed descriptions of the programs (except specialization in computing) are given under their respective headings later in this chapter. For descriptions of the specialization in computing, refer to the majors listed in parentheses above.

Student Research Program (SRP)

For information on this program, see "Alternative Academics" in Chapter 2.

Double Majors

If you are in good academic standing, you may be permitted to have a double major consisting of departmental majors from two departments within this college. They must both be completed within the maximum limit of 228 units, and you must obtain the approval of both departments.

With few exceptions, double majors in the same department are unacceptable. You must designate one of the two majors as the principal one for the purpose of satisfying general education requirements. No more than five upper division courses may be common to both majors.

Courses outside the division of the principal major which are required in preparation for that major may be used to satisfy general education requirements. Courses required for the secondary major (including preparation for the major) also may satisfy general education requirements.

Changing Your Major

If you are in good academic standing and wish to change your major, you may petition to do so provided you can complete the new major within the 216-unit limit (228 for double majors and special programs). Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if you are on probation or have begun your last term.

If you fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses, you may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

The Study List

The required study load for undergraduate students in the College of Letters and Science is 12 to 16 units (three to four courses) per term. For exceptions, see "Minimum Progress" earlier in this section. Three courses are recommended for students in the first term of the freshman year. All other students may carry four and one-half courses (18 units) without petition. After the first term, you may petition to enroll in as many as five courses if you attained at least a B average the preceding term in a program of at least three graded courses.

First-term transfer students from any other campus of the University may carry excess Study Lists on the same basis as students who have completed one or more terms at UCLA; however, they are not encouraged to do so.

Requirements for Bachelor's Degrees

Each student must meet three types of requirements for the Bachelor of Arts or Bachelor of Science degree: University requirements, college requirements, and department requirements (including preparation for the major and major requirements). For details on department requirements, see the department and major of your choice.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see "Undergraduate Degree Requirements" in Chapter 2.
**College Requirements**

The College of Letters and Science has eight requirements which must be satisfied for the award of the degree: unit, major, scholarship, residence, English composition, quantitative reasoning, foreign language, and general education course requirements.

### Structure of a Degree

Three types of degree requirements are included within the 180-unit minimum/216- or 228-unit maximum limits for the bachelor’s degree:

**University Requirements**

1. Subject A or English as a Second Language (ESL)
2. American History and Institutions

**College Requirements**

1. English Composition or ESL Composition
2. Quantitative Reasoning
3. Foreign Language
4. General Education Course Requirements

**Department Requirements**

1. Preparation for the Major
2. Major Requirements

**Electives**

The remaining units, defined as electives, are courses which vary according to your interests and goals. When selecting your courses, keep the following degree criteria in mind:

**Scholarship**

You must attain an overall 2.0 minimum grade-point average in the 180/216 or 228 units required and must satisfy the scholarship requirements of your major department (usually a 2.0 average in the preparation and major courses, but it may be higher in the former, according to departmental requirements).

**Residence Requirement**

See “Residence Requirements” later in this section.

**Upper Division Unit Requirement**

At least 72 units (18 courses) must be upper division (numbered 100-199).

**Unit Requirements**

You must satisfactorily complete for credit a minimum of 180 units (45 courses) for the bachelor’s degree. At least 72 units (18 courses) of the 180 units must be upper division (numbered 100-199). A maximum of 216 (228 for double majors and special programs) units is allowed. If you have advanced placement (transfer) credit, you may exceed the unit maximum by the amount of that credit.

**Scholarship and Major Requirements**

You must attain at least a 2.0 (C) grade-point average in all courses undertaken at this University for receipt of the bachelor’s degree. You must also attain a 2.0 GPA in a major and satisfy both the course and scholarship requirements of that major (including preparation for the major) in the College of Letters and Science.

**Residence Requirements**

Sixty-eight of the last 80 units completed for the degree must be earned in residence in the college. No more than 16 of the 68 units may be completed in UCLA Summer Sessions. While enrolled in the college you must complete at least 10 upper division courses (40 units), including six courses in the major. These residence requirements apply to all students, both continuing and transfer.

**English Composition Requirement**

**Note:** You must complete the University’s Subject A or English as a Second Language (ESL) requirement prior to completing the college’s English Composition requirement.

You may satisfy the English Composition requirement by taking one course from English 3, 4, Humanities 2A, 2B, 2C. The course must be taken for a letter grade, and you must receive at least a C; a grade of C− is not acceptable. Humanities 2A, 2B, or 2C may be applied toward the humanities general education requirements; English 3 or 4 may not be applied.

The composition requirement may also be satisfied by scoring 4 or 5 on one of the College Entrance Examination Board (CEEB) Advanced Placement Tests in English or by passing the English 3 Proficiency Examination. Students scoring 660 or better on the CEEB English Composition Achievement Test are eligible for this proficiency examination.

You must satisfy the composition requirement within your first three terms in residence.

**Transfer Students** — You may take the English 3 Proficiency Examination (1) if you have completed a transferable English composition course with a Passed grade rather than a letter grade or (2) if you have completed, with a grade of C or better, a college-level English composition course that the Office of Undergraduate Admissions and Relations with Schools does not accept as equivalent to English 3. Like eligible freshmen, you must register for the examination in the Freshman Writing Program Office, 271 Kinsey Hall, before the first day of enrollment for the term.

If you have credit for 90 or more units and have not satisfied the requirement, you are expected to include an acceptable composition course on your Study List during your first year in residence in the college. If you are required to take English 2 to satisfy the Subject A requirement, you should, on completion of that requirement, take an acceptable composition course in your second term in residence.

**English as a Second Language (ESL) Students** — If your native language is not English, you may satisfy the English Composition requirement by completing English as a Second Language 36 with a grade of C or better (C− or a Passed grade is not acceptable). Admission into course 36 is determined by a Composition Placement Test administered the first day of class each term.

**Quantitative Reasoning and Foreign Language Requirements**

In the College of Letters and Science you must demonstrate basic skills in quantitative reasoning and satisfy the foreign language requirement.

**Note:** All courses taken to satisfy these requirements must be completed with a grade of Passed or C or better.

**Quantitative Reasoning** — May be satisfied by achieving an SAT mathematics score of 600 or better, a mathematics achievement score of 550 or better, or by completing one of the following methods: AP Statistics 102A, 102B, 102C; AP Computer Science 10C or 10F; Economics 40; Geography 40; Mathematics 1 or any higher numbered course except 38A, 38B, and 104; Philosophy 31; Political Science 6; Program in Computing 10A, 10B, 10C; Sociology 18; Statistics 50.

**Foreign Language** — May be satisfied by one of the following methods: (1) completing a college-level foreign language course equivalent to UCLA’s level three or above or OR (2) scoring 3, 4, or 5 on the CEEB Advanced Placement (AP) foreign language examination in French, German, or Spanish, thereby earning college credit OR (3) presenting a UCLA foreign language departmental examination score indicating competency through level three. The following language courses may be used to fulfill the foreign language requirement:

- **African Languages (Linguistics)**
  - 1A-1B-1C (Swahili)
  - 7A-7B-7C (Zulu)
  - 11A-11B-11C (Yoruba)
  - 31A-31B-31C (Bambara)
  - 41A-41B-41C (Hausa)
  - 51A-51B-51C (Amharic)

- **Afrikaans (Germanic Languages)**
  - 105A, 105B, 105C, 105D

- **Ancient Near East (Near Eastern Languages)**
  - 120A-120B-120C (Ancient Egyptian)
  - 140A-140B (Sumerian)

- **Arabic (Near Eastern Languages)**
  - 1A-1B-1C
Armenian (Near Eastern Languages) 101A-101B-101C, or 130A-130B and 131A
Berber (Near Eastern Languages) 101A-101B-101C
Bulgarian (Slavic Languages) 103A-103B-103C
Chinese (East Asian Languages) 1, 2, 3
Czech (Slavic Languages) 102A-102B-102C
Dutch (Germanic Languages) 103A, 103B, 103C
French 1, 2, 3
German (Germanic Languages) 1, 2, 3
Greek (Classics) 1, 2, 3
Hebrew (Near Eastern Languages) 1A-1B-1C or 10A-10B-10C
Hungarian (Germanic Languages) 101A, 101B, 101C
Indigenous Languages of the Americas (Linguistics) 18A-18B-18C (Quechua)
Irish (Near Eastern Languages) 1A-1B-1C
Italian 1, 2, 3
Japanese (East Asian Languages) 1, 2, 3
Korean (East Asian Languages) 1, 2, 3
Latin (Classics) 1, 2, and 3, or 16 (Summer Sessions course)
Lithuanian (Slavic Languages) 101A-101B-101C
Polish (Slavic Languages) 102A-102B-102C
Portuguese (Spanish and Portuguese) 1, 2, 3
Romanian (Slavic Languages) 101A-101B-101C
Russian (Slavic Languages) 1, 2, and 3, or 11A-13B (two units each)
Scandinavian 1, 2, 3 (Swedish); 11, 12, 13 (Norwegian); 21, 22, 23 (Danish)
Semitics (Near Eastern Languages) 140A-140B, 141 (Akkadian)
Serbo-Croatian (Slavic Languages) 103A-103B-103C
Spanish (Spanish and Portuguese) 1, 2, 3
Turkish Languages (Near Eastern Languages) 101A-101B-101C (Turkish); 111A-111B-111C (Uzbek)
Ukrainian (Slavic Languages) 101A-101B-101C
Yiddish (Germanic Languages) 1, 2, 3

General Education (GE) Course Requirements

The general education requirements of the college are intended to introduce undergraduates to the richness and diversity of the various academic disciplines. Within the four major divisions of the college—humanities, social sciences, life sciences, and physical sciences—you are encouraged to explore the different possibilities for future university study. Whether or not you have a specific educational goal, general education requirements are designed to broaden your intellectual perspective and to set you on the path to becoming an educated member of society.

The set of GE course requirements you will follow are specified on the chart labeled “Courses to Fulfill GE Requirements” on the next pages. You must earn units in four courses in the humanities (literature, philosophy, language and linguistics, culture and civilization, the arts), three courses in the physical sciences, four in the social sciences (two from historical analysis and two from social analysis), and three courses in the life sciences. In the humanities, at least one course must be from literature and no more than two may be from any single subgroup. In the physical sciences, two courses must be complementary and one must include a laboratory and/or demonstration component. In the life sciences, one course must include a laboratory and/or demonstration component.

All students entering UCLA in Fall Quarter 1990 with 45 or more quarter units are not required to complete the complementary course requirement in physical sciences.

Courses required to satisfy the major or other courses taken in the major department may not be used to satisfy the general education requirements. However, courses outside the major which are required as preparation for a major may be used to satisfy these requirements.

Course Exemptions — Students majoring in the humanities are exempt from two courses, one in their major subgroup and one other humanities course. Students majoring in the physical sciences are exempt from two courses in the physical sciences group. Students in the social sciences are exempt from two courses in the subgroup of their major, and students in life sciences are exempt from two courses in the life sciences grouping. At least 14 courses (12, with exemptions) must be completed.

Course Substitutions — Two lower division seminars which have been approved for GE credit may be substituted for courses on the “Courses to Fulfill GE Requirements” list. You may make no more than one such substitution per group (humanities, physical sciences, social sciences, life sciences). An annual list of GE seminars is published in the General Education Handbook, and descriptions are listed in the quarterly Schedule of Classes under “Seminars and Special Programs for Undergraduates.”

Advanced Placement Credit — For application of advanced placement (AP) credit on the general education requirements, see the AP chart later in this section or consult the College Counseling Service.

Reciprocity with Other UC Campuses — Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to arriving at UCLA are not required to complete the college’s GE requirements at UCLA. Written verification from the college dean at the other UC campus is required. Consult a Letters and Science counselor or regarding your eligibility for this option.

Transfer Core Curriculum — Transfer students from non-UC schools have the option to fulfill UCLA’s lower division general education requirements by completing a transfer core curriculum prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed upon by the University of California and the California community colleges. Although general education or transfer core courses are graduation requirements rather than admission requirements, you are advised to fulfill them prior to transfer. The transfer core curriculum significantly eases the transfer process, as all of UCLA’s general education requirements are fulfilled when you complete it. If you select the transfer core curriculum, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the College of Letters and Science general education requirements. The Office of Undergraduate Admissions and Relations with Schools determines, at the point of admission, your completion of the transfer core.

General Education Groupings by Major

For the purpose of these requirements, departmental and interdisciplinary majors are classified in the divisions listed below. Not all courses within a department apply on GE requirements in the division of the major (e.g., psychology is listed as a life science; however, Psychology 10 appears as a social science under social analysis).

(A) Humanities

A1: Literature
African Languages
Arabic
Chinese
Classics
English
English/Greek
English/Latin
French
German
Greek
Hebrew
Italian (including Italian and Special Fields)
Japanese
Latin
Portuguese
Russian Language and Literature
Scandinavian Languages
Slavic Languages and Literatures
Spanish
Spanish and Portuguese

A2: Philosophy
Philosophy

A3: Language and Linguistics
French and Linguistics
Linguistics (including all Linguistics and special fields majors)
Spanish and Linguistics

(continued on page 85)
Courses to Fulfill GE Requirements

See “Quantitative Reasoning and Foreign Language Requirements” on page 81 for courses to fulfill those requirements.

(A) Humanities

Four courses, with at least one from Group A1 and no more than two courses from any single subgroup:

(1) Literature

Classics 40. Survey of Greek Literature in Translation
41. Survey of Latin Literature in Translation
English 10A. English Literature to 1660
10B. English Literature, 1660-1832
70. Major British Authors before 1800
75. Major British Authors, 1800 to the Present
80. Major American Authors
85. The American Novel
90. Shakespeare
95A. Introduction to Fiction
95B. Introduction to Drama
95C. Introduction to Fiction
96. The Short Story in England and America
French 12. Introduction to Study of French Literature (in French)
114A, 114B, 114C. Survey of French Literature (in French)
German (Germanic Languages) 50A. Masterworks of German Literature in Translation, Medieval Period through Classicism
50B. Masterworks of German Literature in Translation, Romanticism to the Present
101A. Introduction to German Poetry (in German)
101B. Introduction to German Drama (in German)
101C. Introduction to German Narrative Prose (in German)
Humanities 1A. World Literature: Antiquity to Early Middle Ages
1B. World Literature: Late Middle Ages to the 17th Century
1C. World Literature: Age of Enlightenment to the 20th Century
1D. Great Books from the World at Large
2A. Survey of Literature: Antiquity to Early Middle Ages
2B. Survey of Literature: Late Middle Ages to the 17th Century
2C. Survey of Literature: Age of Enlightenment to the 20th Century
Portuguese (Spanish and Portuguese) 40A, 40B. Portuguese, Brazilian, and African Literature in Translation
120A. 120B. Survey of Portuguese Literature (in Portuguese)
130A, 130B. Survey of Brazilian Literature (in Portuguese)
Russian (Slavic Languages) 25. The Russian Novel in Translation
Scandinavian 50. Introduction to Scandinavian Literature
Spanish (Spanish and Portuguese) 60A, 60B, 60C. Hispanic Literatures in Translation
120A. 120B. Survey of Spanish Literature (in Spanish)
136A, 136B. Survey of Spanish-American Literature (in Spanish)

(2) Philosophy

Philosophy 1. Beginnings of Western Philosophy
2. Introduction to Philosophy of Religion
4. Philosophical Analysis of Contemporary Moral Issues
5A. Philosophy in Literature
6. Historical Introduction to Moral and Political Philosophy
7. Introduction to Philosophy of Mind
8. Introduction to Philosophy of Science
10. Virtues and Vices
21. Skepticism and Rationality
22. Introduction to Ethical Theory

(3) Language and Linguistics

Linguistics 1. Introduction to Study of Language
10. Structure of English Words
Language: Formal University foreign language instruction at least four or higher; no more than one course at level four or higher may be used
Spanish and Portuguese M35. Spanish, Portuguese, and Nature of Language

(4) Culture and Civilization

Chinese (East Asian Languages) 50. Chinese Civilization
East Asian Languages and Cultures 60. Introduction to Buddhism
Folklore and Mythology 15. Introduction to American Folklore Studies
German (Germanic Languages) 100A. German Civilization and Culture before 1700
100B. Modern German Civilization and Culture from 1700 to 1919
100C. German Civilization and Culture in the 20th Century
History *9A. Introduction to Asian Civilizations: History of India
*9C. Introduction to Asian Civilizations: History of Japan
*9D. Introduction to Asian Civilizations: History of the Near and Middle East
*10A. *10B. Introduction to Civilizations of Africa
*11A. *11B. History of China
Italian 42A, 42B. Italian Civilization or Italy through the Ages
46. Italian Cinema and Culture
Japanese (East Asian Languages) 50. Japanese Civilization
Jewish Studies (Near Eastern Languages) 10. Social, Cultural, and Religious Institutions of Judaism
Korean (East Asian Languages) 50. Korean Civilization
Russian (Slavic Languages) 95A. Introduction to Russian Civilization
99B. Soviet Civilization
Spanish and Portuguese M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil

(5) The Arts

Art History 50. Ancient Art
51. Medieval Art
54. Modern Art
55A. Africa, Oceania, and Native America
55B. Arts of Pre-Columbian America
56A. Art of India and Southeast Asia
56B. Introduction to Chinese Art
57. Renaissance and Baroque Art
Classics 51. Art and Archaeology of the Classical World
Dance 134A. History of Dance in Western Culture, Origins to 1600
134B. History of Dance in Western Culture, 1600 to the Present
181A. Dance Cultures of Asia
182A. Dance Cultures of Africa
C187A. Dance Cultures of Native American Indians
Design 30A. Nature of Design
Ethnomusicology and Systematic Musicology 20A, 20B, 20C. Musical Cultures of the World
108A, 108B. Music of Latin America
M110A, M110B. The Afro-American Musical Heritage
113. Music of Brazil
136A, 136B. Music of Africa
147. Survey of Classical Music in India
174. Aesthetics of Music
Film and Television 106A. History of the American Motion Picture
106B. History of the European Motion Picture
106C. History of African, Asian, and Latin American Film
106D. Development of Film in Europe and the U.S. from WWI through the Depression
106E. Development of Film in Europe and the U.S. from WWII to the Present
108. History of Documentary Film
112. Film and Social Change
Music 15. Art of Listening
Musicoiyology 2A, 2B. Introduction to the Literature of Music
133. Bach
134. Beethoven
135A, 135B, 135C. History of Opera
Theater 5A. History and Drama of Theater from Primitive Times to 1640
5B. History and Drama of Theater from 1640 to 1900
5C. History and Drama of Theater from 1900 to the Present
102E. Theater of Non-European World
104F. History of American Theater

(continued on page 84)
Courses to Fulfill GE Requirements (continued)

(B) Physical Sciences
Three courses from the following, two of which must be complementary and one of which must have a laboratory and/or demonstration component:

| Astronomy 2A, 2B. Introduction to the Physical Universe |
| 3. Astronomy: Nature of the Universe |
| 4. Universe of Stars and Stellar Systems |
| 5. Life in the Universe |
| 6. Cosmology: Our Changing Concepts of the Universe |
| 81. Astrophysics I: Stars and Nebulae |
| 82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology |

| Atmospheric Sciences 2. Air Pollution |
| 3. Introduction to the Atmospheric Environment |
| 4. California Weather and Climate |
| 5. Climates of Other Worlds |
| 6. Climate and Climatic Change |

| Chemistry and Biochemistry 2. Introductory Chemistry |
| 8A. Chemistry and Biochemistry 6A/8B, 6A/8C, 6B/8A, 8A/8B, 8A/8C. |
| 3A/3B, 3A/3E, 3A/31 B, 31 A/3B, 31 A/3E, 31 A/31 B; Physics 3A/3B, 6A/6B, |
| 6C. Physics for Life Sciences Majors: Mechanics |
| 8A. Physics for Life Sciences Majors: Waves, Sound, Heat |
| 8C. Physics for Scientists and Engineers: Electricity and Magnetism |
| 10. Physics |

Courses with a laboratory and/or demonstration component include Astronomy 3, 81, 82, Atmospheric Sciences 3, 4, Chemistry and Biochemistry 11B, 15L, Earth and Space Sciences 1, 2, 15, Geography 1, Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A, 8B, 8C, 10. |

(C) Social Sciences
Four courses (two each from Groups 1 and 2 or all of Group 3):

(I) Historical Analysis
Two courses from a single sequence are recommended:

| Classics 10. Survey of Classical Greek Culture |
| 20. Survey of Roman Civilization |
| History 1A, 1B, 1C. Introduction to Western Civilization |
| 3A, 3B, 3C. Introduction to History of Science |
| 3D. Themes in History of Medicine |
| 4. Introduction to History of Religions |
| 5A, 5B. Survey of British History |
| 6A, 6B, 6C. History of the American Peoples |
| 7A, 7B. Survey of Political History of the U.S. |
| 8A. Latin America: Reform and Revolution |
| 8B. Latin American Social History |
| 8C. Central America: Struggle for Change |

(Cross-listed courses can fulfill the GE requirement in only one group.)

*9A. Introduction to Asian Civilizations: History of India |
*9C. Introduction to Asian Civilizations: History of Japan |
*9D. Introduction to Asian Civilizations: History of the Near and Middle East |
*10A, *10B. Introduction to Civilizations of Africa |
*11A, *11B. History of China |

Political Science 10. Introduction to Political Theory |

(2) Social Analysis
Anthropology 8. Archaeology: An Introduction |
9. Social Cultural Anthropology |
33. Culture and Communication |
Communication Studies 10. Introduction to Communication Studies |
Economics 1, 2. Principles of Economics |
5. Introductory Economics |
Geography 3. Cultural Geography |
4. Human Location and Behavior |
Political Science 20. World Politics |
40. Introduction to Politics |
50. Introduction to Comparative Politics |
Psychology 10 (Introductory Psychology) or 11 (Principles of Psychology) |
Social Sciences 20. Racial Minorities in the U.S. |
Sociology 1. Introduction to Sociology |
2. Changing Society and Making History |
3. Sociology of Everyday Life |
4. Jobs and Careers: Sociological Approach |
31. Dilemmas of Third World Development |
Women’s Studies 10. Introduction to Women’s Studies: Feminist Perspectives on Women and Society |

(3) Social Sciences Cluster Program
The program offers another way to complete all of the social sciences general education requirement. For further information, see page 314.

(D) Life Sciences
Three courses from the following, one of which must have a laboratory and/or demonstration component:

| Anthropology 7. Human Evolution | or 12 (Principles of Human Evolution: Comparative Analysis) |
| 10. Principles of Human Evolution: Genetic Basis |
| 15. Human Biology and Behavior |
| Biology 2. Principles of Modern Biology |
| 3. Introduction to Human Physiology and Disease |
| 5. Biology of Organisms |
| 5L. Organismic and Environmental Biology Laboratory |
| 6. Ecology, Evolution, and Behavior |
| 15. Introductory Cellular and Molecular Biology |
| 6. Introductory Genetics |
| 10. Plants and Civilization |
| 13. Evolution of Life |
| 20. Introduction to Human Heredity |
| 21. Field Biology |
| 25. Oceans |
| 40. AIDS and Other Sexually Transmitted Diseases: The Modern Plague |
| 70. Genetic Engineering and Society |
| Earth and Space Sciences 15. Introduction to Oceanography |
| 16. Principles of Paleontology |
| Geography 2. Biogeography |
| 5. People and the Earth’s Ecosystems |
| Kinesiology 5. Issues in Human Physiology: Diet and Exercise |
| 13. Introduction to Human Anatomy |
| Microbiology and Molecular Genetics 6. Introduction to Microbiology |
| 7. Developments in Biotechnology |
| Psychology 15. Introductory Psychology |

Courses with a laboratory and/or demonstration component include Biology 3, 5, 5L, 6, 7, 8, 10, 20, Earth and Space Sciences 15, 16, Geography 2, 5, Kinesiology 13. |

All honors sections of the above courses also fulfill GE requirements.

Honors Collegium: Inquire at the Honors Programs Office (A311 Murphy Hall) for information on courses which satisfy any of the areas of the general education requirements.
A4: Culture and Civilization
Ancient Near Eastern Civilizations
Classical Civilization
Iranian Studies
Jewish Studies
Near Eastern Studies
Religion, Study of
Russian Studies
A5: The Arts
Art History
World Arts and Cultures

(B) Physical Sciences
Applied Mathematics
Astrophysics
Atmospheric Sciences
Biochemistry
Chemistry
Chemistry/Materials Science
Cybernetics
Economics/System Science
General Chemistry
General Mathematics
General Physics
Geology (including all specialization options)
Geophysics (including all specialization options)
Mathematics
Mathematics/Applied Science
Mathematics of Computation
Physics

(C) Social Sciences
C1: Historical Analysis
History
History/Art History
C2: Social Analysis
Afro-American Studies
Anthropology
Chicano Studies
Communication Studies
Development Studies
East Asian Studies
Economics (including all specialization options except Economics/System Science)
Geography
Geography/Ecosystems
Latin American Studies
Political Science
Sociology
Women's Studies

(D) Life Sciences
Biology
Cognitive Science
Kinesiology
Microbiology
Psychobiology
Psychology

Credit Limitations

Note: Transfer students with credit from other institutions (advanced standing credit) receive a Degree Progress Report (DPR) from the Office of Undergraduate Admissions and Relations with Schools indicating the transferable units from their former institution(s); however, the following credit limitations may reduce the total number of transferred units which will apply toward the degree in the College of Letters and Science. Consult with a counselor in the College Counseling Service regarding these limitations.

The following credit limitations apply for all students enrolled in the college. In most cases units are not deducted until the final term before graduation. Consult a counselor in the College Counseling Service if you have questions.

Subject A
If you do not satisfy the Subject A requirement prior to enrolling at UC, you must pass an approved course or other program prescribed by your UC campus of residence. Only after satisfying the Subject A requirement can you take for transfer credit an English composition course after enrolling at UCLA. Consult a college counselor regarding Subject A equivalent courses from other UC campuses.

Credit for Advanced Placement Tests

**Note:** You may not repeat for units or grade points any AP Test credit that has been given UCLA course number equivalency (e.g., History 7A-7B).

* All UCLA course equivalents consist of lower division advanced placement units.
** Students who take both tests receive a maximum of eight units of credit.
Community College
After completing 105 quarter units (26 1/4 courses) toward the degree in all institutions attended, you are allowed no further unit credit for courses completed at a community college.

Physical Education
No more than four units in physical education activities courses may be applied toward the bachelor’s degree.

300- and 400-Level Courses
No more than two courses (eight units) in the 300 and 400 series of courses may be applied toward the bachelor’s degree. Credit is not granted for X300 and X400 courses taken in UCLA Extension.

Performance Courses
No more than 12 units of music and/or dance performance courses (Dance 71B through 79Z, C171B through C179Z, Ethnomusicology and Systematic Musicology 91A-91Z, and Music 90A through 90N) may be applied toward the bachelor’s degree whether taken at UCLA or another institution.

Foreign Language
Credit will not be allowed for completing a less advanced course in grammar and/or composition after you have completed a more advanced course. College credit for an international student’s native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division (advanced language courses only) and graduate courses taken at the University of California or another English-speaking institution of approved standing (no credit is allowed for lower division courses).

College Level Examination Programs
Credit earned through the College Level Examination Program (CLEP) and through the California State University English Equivalency Examination may not be applied toward the bachelor’s degree.

Advanced Placement (AP) Tests
Advanced Placement (AP) Test credit may not be applied toward a degree unless you had less than 36 units of credit at the time of the examination(s).

ROTC Courses
A maximum of 24 units of ROTC courses may be applied toward the 180-unit minimum required for the degree. For those students contracted in the Aerospace Studies Department, 38 units of aerospace studies credit may be applied toward the 180-unit minimum required for the degree.

Independent Study Courses
No more than two courses (eight units) of credit may be taken per term in special independent study courses. The total number of units allowed in such courses for a letter grade is 16; see specific restrictions under each departmental listing.

Chemistry and Biochemistry 2
No unit credit is granted toward the degree for Chemistry and Biochemistry 2 if one year of high school chemistry was completed with a grade of C or better. Units and grade points are deducted at graduation for the duplicated chemistry courses. The maximum deduction is four units.

Physics 3A, 6A, 8A, 10
Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to a total of six units of credit.

Statistics
No credit is allowed for more than one lower division course in statistics (Anthropology 80, Economics 40, Geography 40, Political Science 6, Psychology 41, Sociology 18, Statistics 50) or for more than one sequence of such courses whether taken at UCLA or another institution.

Education Abroad Program
Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the eight units maximum allowable for the Intensive Language Program.

Credit by Examination
Within the College of Letters and Science, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or the UCLA Honors Programs.

You may petition for credit by examination for one course at a time. The examination for that course must be taken successfully before you may petition for credit by examination in another course. Petitions for credit by examination ($5 each — pay fee at the Main Cashier, 1125 Murphy Hall) are available only through an appointment with a counselor in the Honors Programs Office. Approval is given or withheld by the dean of the Division of Honors and Undergraduate Programs who may limit the number of such petitions you present.

Honors

College Honors
College Honors is awarded to graduating seniors with an overall University of California grade-point average of 3.5 or better who have completed either 44 units of honors coursework or 36 units of honors coursework that include a senior research project/thesis based on original research. With the assistance of Honors Programs counselors, you integrate this coursework throughout your undergraduate education with other University, college, and major requirements for the bachelor’s degree. In this way, these units need not be above and beyond your other academic commitments.

Students in the College Honors program are entitled to specialized counseling within the division, some preferential preenrollment in classes each term, access to specially designed honors classes, eligibility for unique scholarships and research stipends, attendance at special forums, speeches, and events, counseling on graduate and preprofessional programs, graduate library privileges, access to the division computer facility, and a filing and mailing service for letters of recommendation. Incoming freshmen who are eligible for College Honors based on SAT scores and GPA are also assisted in obtaining on-campus student housing for the first year.

To qualify for College Honors, entering freshmen must (1) have an overall GPA of 3.85 or better and an SAT score of 1,300 or better (on one test date) or an ACT score of 31 or better and (2) graduate in the top three percent of their high school class or (3) qualify through the Honors Programs Educational Enhancement Program (see below). Certain entering transfer students may be admitted with a transfer GPA of 3.85. Continuing UCLA and transfer students with at least 12 or more graded units at UCLA and a cumulative UC GPA of 3.5 or better who can complete the honors course requirements prior to graduation are encouraged to participate, as are both regularly qualified and potentially successful underrepresented minority students.

The Educational Enhancement Program offers low-income, minority, disabled, and other nontraditional students who might not otherwise be able to participate an opportunity to qualify for UCLA’s College Honors program. Contact the Honors Programs Office for more information.

You may apply for admission to College Honors at A311 Murphy Hall. For further information, attend one of the group meetings offered regularly by the Honors Programs Office.

Honors with the Bachelor’s Degree
Honors with the Bachelor’s Degree are awarded according to your overall grade-point average at graduation. To be eligible, you must have completed 90 or more graded units at the University of California. Coursework taken on
A variety of scholarships and awards for qualified continuing students and graduating seniors is also available.

In addition, the Honors Programs Office administers Phi Beta Kappa (national honor society).

Dean's Honors List
The Dean's Honors List recognizes high scholastic achievement in any one term. The following criteria are used to note Dean's Honors List on the student records: (1) a 3.75 GPA in any one term with at least 12 graded units and no grade of NP or I or (2) a 3.66 GPA and at least 56 grade points during the term, with no grade of NP or I. Dean's Honors List is automatically recorded on your transcript.

Departmental Scholar Program
Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as UCLA Departmental Scholars to pursue bachelor's and master's degrees simultaneously.

Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and a UC cumulative GPA of 3.5 or better. You must also have at least one term's coursework remaining at UCLA. To obtain both the bachelor's and master's degrees you must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill requirements for both degrees. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog). For further information, consult the Honors Programs Office.

Honors Collegium
The Honors Collegium is a unique and innovative educational alternative designed primarily for students in their freshman and sophomore years. Refer to Honors Collegium later in this chapter for a complete description of the program.

Honors Programs Office
The Honors Programs Office, located in A311 Murphy Hall (825-1553, 825-3786), provides academic counseling and services for College Honors students, Departmental Scholars, Education Abroad Program students, students pursuing individual majors, and students participating in the High School Scholars program. The division also provides counseling for Regents Scholars, National Merit Scholars, and Alumni Scholars during their first year of attendance. Services offered include academic counseling, degree checks, assistance with petitions and, for College Honors students only, letters describing the program to graduate and professional schools.

Preprofessional and Professional Programs

Preprofessional and Professional Programs

The programs that follow are not degree programs in the College of Letters and Science. The purpose of each group of courses is to assist you if you plan to apply to a professional school at the end of your sophomore (90 units) or junior (135 units) year.

If you are not accepted by a professional school, you must declare a major in the College of Letters and Science and complete the requirements for a degree without exceeding 216 units.

New students entering these curricula are listed as "undeclared" majors and are advised in the college unless an adviser is named below in the presentation of the curriculum.

Prehealth Care Advising Office
Information and counseling on preparing for health care professional schools and assistance in filing an application are available through the Prehealth Care Advising Office, College of Letters and Science. Open counseling sessions are held weekly for pre-meds, pre-dents, pre-nurses, and other pre-health students (information, call 825-1817). Application blanks for AMCAS, MCAT, DAT, etc., may also be obtained from this office.

Prehealth Curriculum: Two Years*

The University offers a four-year program in dental hygiene leading to the degree of Bachelor of Science. The first two years may be taken at Los Angeles; the last two years must be taken at the School of Dentistry at the University of California, San Francisco. Admission to UCSF is by competitive application.

The 90 quarter units of work required for admission to the School of Dentistry at UCSF include specific requirements as follows (the courses referred to are UCLA courses which fulfill the requirements):

Curriculum Requirements: (1) Subject A; (2) American History and Institutions (the examination in American History and Institutions may be taken at the UCSF School of Dentistry, but it is preferable to satisfy the requirements in the predental program); (3) one year of English which includes English 3; (4) Chemistry and Biochemistry 1A, 11B/11BL, 132A and 132B/132BL, and 153A/153AL (or former 21 and 23 and 25); (5) Biology 5, 5L, 7, 8, 8L; (6) Psychology 10 and one additional psychology course; (7) 16 units in social sciences and humanities, including foreign language (one course in speech and one in sociology are required). Courses in anatomy and physiology are strongly recommended.

Prehealth Counseling Sessions are Held Weekly (call 825-1817 for details).

Predental Hygiene Curriculum: Two Years

The 90 quarter units of work required for admission to the School of Dentistry at UCSF include specific requirements as follows (the courses referred to are UCLA courses which fulfill the requirements):

Curriculum Requirements: (1) Subject A; (2) American History and Institutions. For further information, consult

Prehealth Care Advising Office
Information and counseling on preparing for health care professional schools and assistance in filing an application are available through the Prehealth Care Advising Office, College of Letters and Science. Open counseling sessions are held weekly for pre-meds, pre-dents, pre-nurses, and other pre-health students (information, call 825-1817). Application blanks for AMCAS, MCAT, DAT, etc., may also be obtained from this office.

Predental Curriculum: Three Years

The College of Letters and Science offers a predental curriculum designed to fulfill the basic educational requirements for admission to several dental schools and the general educational requirements of the College of Letters and Science. You should determine and satisfy the specific requirements of the dental schools to which you expect to apply.

To be adequately prepared for the predental curriculum, you should take the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and foreign language.

The 135 quarter units of work required for admission to the UCLA School of Dentistry in this curriculum include the following:

General University Requirements: (1) Subject A; (2) American History and Institutions.

Specific UCLA School of Dentistry Requirements: (1) English 3, 4; (2) Chemistry and Biochemistry 1A, 11B/11BL, 11C/11CL, 132A and 132B/132BL and 153A/153AL (or the former 21 and 23 and 25); (3) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C; (4) Biology 5, 5L, 7, 8, 8L; (5) Psychology 10.

Social sciences and humanities courses such as anthropology, history, economics, psychology, political science, appreciation of art and music, and philosophy should also be included.

For further information, consult Admissions Requirements of U.S. and Canadian Dental Schools, AADS, 1625 Massachusetts Avenue NW, Suite 101, Washington, DC 20036. Sample copies of the Dental Admission Test (DAT) are available in the Prehealth Care Advising Office; open counseling sessions are held weekly (call 825-1817 for details).

Prehealth Counseling Sessions are Held Weekly (call 825-1817 for details).

Premedical Studies: Four Years

If you intend to apply for admission to a medical school and wish to complete the requirements for a bachelor's degree before such admission, you should select a major within the College of Letters and Science. Medical schools have no preference as to major. You should choose the major in which you are

*The UCSF School of Dentistry reserves the right to limit enrollment if applications exceed available facilities and to require interviews and aptitude tests if they are necessary for the selection of the class. For further information, see the Announcement of the School of Dentistry, UC San Francisco.
most interested and can do best. In addition to fulfilling the requirements of the selected major, you should satisfy the specific requirements for medical schools to which you expect to apply.

High school preparation for premedical studies at the University should include English, three units; U.S. history, one unit; mathematics, three and one-half units; chemistry, one unit; physics, one unit; biology, one unit; foreign language (preferably French or German), two units. It is desirable that a course in freehand drawing be taken in high school.

The following courses are usually required for admission to the UCLA Medical School: (1) 12 quarter units of English, including at least one course in English composition; (2) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 13A and 13B/132BL, and 153A/153AL (or former 21 and 23 and 25); (3) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C; (4) two years of college biology to include the study of cellular, molecular, developmental, and genetic biology, including at least one year of laboratory courses and one year of upper division courses; required lower division courses are Biology 5, 7, 8. Courses in physical chemistry and calculus are strongly recommended. Course requirements for admission to other University of California medical schools vary slightly.

Because requirements for admission to medical schools outside the University of California also vary somewhat, you should consult the following publications: Medical School Admission Requirements, U.S. and Canada, Association of American Medical Colleges, 1 Dupont Circle NW, Washington, DC 20036; The Education of Osteopathic Physicians, AACOM, 6110 Executive Boulevard, Suite 405, Rockville, MD 20852; and The New MCAT Student Manual (also an AAMC publication available at the above AAMC address). Open counseling sessions are held weekly; call 825-1817 for details.

Prepharmacy Curriculum: Two Years

The University offers a four-year course leading to the Bachelor of Science degree in Nursing. The prenursing curriculum in the College of Letters and Science is designed to prepare you for the program in the UCLA School of Nursing. You should apply to the School of Nursing when you have completed or have in progress 84 quarter credits, including the prenursing courses listed below with grades of C or better, and a cumulative grade-point average of at least 2.8. Since you must apply during the Fall Quarter of the year prior to the year in which you wish to be enrolled, you must present your proposed curriculum for the remaining terms.

Because enrollment in the UCLA School of Nursing is limited, you should become familiar with the admission requirements as early as possible. Attend open counseling sessions for further information, obtain the booklet Information for Applicants to Schools and Colleges of Optometry from the American Optometric Association, 243 Lindbergh Boulevard, St. Louis, MO 63141. Open counseling sessions are held weekly; call 825-1817 for details.

Prepharmacy Curriculum: Two Years

The School of Pharmacy on the San Francisco campus of the University offers a four-year curriculum leading to the degree of Doctor of Pharmacy. To be admitted to this curriculum you must have met all requirements for admission to the University and have completed, with an average grade of C (2.0) or better, at least 90 quarter units of the program below. Students taking prepharmacy work at the University of California are normally enrolled in the College of Letters and Science. If taken elsewhere, the courses elected must be equivalent to those offered at the University. To complete prepharmacy studies in the minimum time, you should take elementary chemistry, trigonometry, and a full year of intermediate algebra in high school.*

Curriculum Requirements (First Year): (1) Subject A; (2) English 3, 4; (3) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; (4) trigonometry and intermediate algebra (if not completed in high school); (5) 28 quarter units of electives selected from courses in foreign language, social sciences, and humanities (within the two-year preparation).

Curriculum Requirements (Second Year): (1) Biology 5, 7, 8, 8L; (2) Physics 3A and 3B, or 6A and 6B, or 8A and 8B; (3) Mathematics 3A and 3B, or 31A and 31B; (4) Chemistry and Biochemistry 13A and 132B/132BL (or former 21 and 23); (5) American History and Institutions.

For further information, contact Robert LeWinter, Director of Pharmaceutical Services, 17-135 Center for the Health Sciences (206-6555). Open counseling sessions are held weekly; call 825-1817 for details.

Prephysical Therapy Curriculum: Three or Four Years

Students who intend to apply for admission to a physical therapy school should select a major (kinesiology and psychology are commonly selected) and complete the following prerequisite courses: Kinesiology 13 or 17A, 101A, 101B; Biology 5, 7; Chemistry and Biochemistry 11A, 11B/11BL, 15, 15L; Physics 3A, 3B, 3C.
The first year of the curriculum may be taken at the American Physical Therapy Association, 1156 15th Street NW, Washington, DC 20005, and at the Prehealth Care Advising Office (825-1817).

You should write to schools with physical therapy programs early in your sophomore year for specific admission requirements and application deadlines. Information concerning in-state and out-of-state programs may be obtained from the American Physical Therapy Association. Additional advising on preparing for and applying to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master’s and doctoral degrees. See the departmental listings which follow for specific requirements and procedures.

For information on the proficiency in English as a second language and application, contact the SMC/UCLA Medical Center School of Respiratory Therapy at 825-7222.

Prelaw Studies

Law schools have no preference with regard to specific majors or particular courses. Admission to law school is based on the quality of your academic work, LSAT scores, and other qualities as reflected in letters of recommendation, in the written application, and in interviews. The College of Letters and Science offers advising on preparing for and applying to law schools through a weekly drop-in counseling session (for information, call 825-1817).

For additional information, see the Law School Admission Bulletin within the "Law School Admission Service Packet" (available at the Admissions Office, UCLA Law School).

Graduate Study

The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master’s and doctoral degrees. See the departmental listings which follow for specific requirements and procedures.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Assistant Professors
Robert C. Bailey, Ph.D. (Anthropology)
Judith A. Carney, Ph.D. (Geography)
John A. Nkinyangi, Ph.D. (Education)
Nadine R. Peacock, Ph.D. (Anthropology)

Lecturers
Patrice E.F. Jelliffe, R.N., M.P.H.

Scope and Objectives
The basic objective of the African Area Studies Program is an intellectual one — to provide interested students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers high quality African area courses in a wide range of fields, including not only the social sciences and humanities, but increasingly in the professional fields as well. The Master of Arts is not a professional degree, but students are encouraged to enroll in courses in the several professional schools on campus. Articulated degree programs are also offered.

Academic flexibility draws many students to the program. Because there are more than 65 faculty members on campus with African interest and experience in approximately 20 different disciplines, students have multiple options to design individual programs.

According to a recent survey, 37 percent of the program's graduates are continuing study at the postgraduate level, 25 percent are employed in higher education, and 24 percent work with international or foreign organizations in 20 countries.

Master of Arts Degree
Admission
In addition to the University minimum requirements, applicants are required to (1) submit three letters of recommendation from academic referees, one of which may be from an employer if the applicant has been away from school for some time and (2) present a résumé describing both academic and professional experience.

In addition to meeting the requirements of the Graduate Division, you must have adequate preparation in undergraduate fields related to the program. Normally, the required preparation for the M.A. degree in African Area Studies is a Bachelor of Arts in the social sciences or arts and humanities.

Major Fields or Subdisciplines
You must select a major field concentration in one discipline, professional school, or approved interdisciplinary grouping. For more information and a brochure describing the program, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall, UCLA, Los Angeles, CA 90024-1310.

Foreign Language Requirement
You are required to satisfy the language requirement by one of the following methods: (1) taking three courses (12 units) in an African language with an average grade of B or better (these courses may not be applied toward the nine courses required for the degree), (2) passing a Linguistics Department examination in an African language not regularly offered, (3) proving that you are a native speaker of an African language, (4) proving that you have a Foreign Service Institute rating of three or above in an African language, or (5) petitioning for the substitution of an appropriate non-African language.

Course Requirements
A minimum of nine courses is required for the M.A., at least five of which must be at the graduate level. The courses must be distributed between disciplines as follows: (1) major discipline — a minimum of five courses, of which three must be at the graduate level; Sociology and anthropology may be taken as a combined major. Other combined majors must be approved by the graduate adviser; (2) minor discipline — a minimum of three courses, of which two must be at the graduate level; (3) third discipline — a course on Africa, preferably of the survey or methodology type. In addition, African Area Studies M229B and/or History 275 are strongly recommended for all students in the program.

No more than one course graded on an S/U basis may be applied toward the minimum of nine courses required for the degree, except with consent of the graduate adviser. One course in the 500 series may be applied toward the total course requirement and toward the minimum graduate course requirement. With consent of the graduate adviser, another 500-level course may be allowed but may not be applied toward the minimum graduate course requirement.

Thesis Plan
The program normally requires a written comprehensive examination for the M.A. degree; however, a thesis option is available. If you wish to follow the thesis plan, you should select, in consultation with the graduate adviser, a faculty committee to supervise your thesis. The thesis must reflect the major area of emphasis. Normally the thesis should be submitted to the committee at the beginning of your fourth term in residence and should be approved before the end of that term. If the committee does not approve the thesis, you will have failed the requirement and are not allowed to resubmit the thesis.

Comprehensive Examination Plan
If you select the comprehensive examination plan, you are required to take a written examination administered by a three-person committee. It is your responsibility to make arrangements for this examination with faculty members in appropriate departments. Exceptions are granted only with consent of the graduate adviser. The examination normally is three to six hours in length.

An oral examination may be held at the discretion of the examining committee after it has read the written examination. If you fail the comprehensive examination, you may retake it only once with consent of the graduate adviser.

African Development Studies within the M.A. in African Area Studies
Students interested in an interdisciplinary program in African development studies within the existing master’s program should consult the graduate adviser. Coursework focuses on planning and development.

Cooperative Degree Programs
In the articulate degree programs described below, no course may be used for credit toward more than one degree. Thus, courses that have been applied toward the completion of the M.A. degree in African Area Studies may not also be applied toward any other degree.

For more information on any of the cooperative degree programs, contact the Graduate Adviser or Assistant Graduate Adviser, M.A. Program in African Area Studies.

M.F.A./M.A.-African Area Studies
The African Area Studies Program and the Department of Film and Television have an articulated degree program which allows students to combine study for the M.A. in African Area Studies and the M.F.A. in Theater Arts, with a specialization in motion picture/television. Additional information is available from the Graduate Adviser, Student Affairs Office, UCLA Film and Television Department.

M.P.H./M.A.-African Area Studies
The African Area Studies Program and the School of Public Health have an articulated degree program whereby you can work sequentially for the master's degree in African Area Studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees. Potential applicants may also contact the Office of Student Affairs, UCLA School of Public Health.

Graduate Courses
M229B. Africana Bibliography and Research Methods. (Same as Library and Information Science M229B.) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized data bases.
African Area Studies Course List

All courses are not offered every academic year. You should verify courses with the respective departments.

African Languages (Linguistics) 1A-1B-1C. Elementary Swahili
2A-2B-2C. Intermediate Swahili
7A-7B-7C. Elementary Zulu
8A-8B-8C. Intermediate Zulu
11A-11B-11C. Elementary Yoruba
12A-12B-12C. Intermediate Yoruba
31A-31B-31C. Elementary Bambara
32A-32B-32C. Intermediate Bambara
41A-41B-41C. Elementary Hausa
42A-42B-42C. Intermediate Hausa
51A-51B-51C. Elementary Amharic
52A-52B-52C. Intermediate Amharic
97. Elementary and Intermediate Studies in African Languages
103A-103B-103C. Advanced Swahili
123A-123B-123C. Advanced Yoruba
133A-133B-133C. Advanced Bambara
143A-143B-143C. Advanced Hausa
150A-150B. African Literature in English Translation
153A-153B-153C. Advanced Amharic
190. Survey of African Languages
192. Comparative Studies in African Languages
199. Special Studies in African Languages
201A-201B. Comparative Niger-Congo
202A-202B-202C. Comparative Bantu
270. Seminar in African Literature
Afrikaans (German Languages) 105A. Elementary Afrikaans
105B. Intermediate Afrikaans
114. Afrikaans Literature in Translation
135. Introduction to Afrikaans Literature
199. Special Studies in Afrikaans

Anthropology 112. Old Stone Age Archaeology
M115S. Historical Archaeology
118A, 118B. Museum Studies
121A. Primate Fossil Record
121B. The Australopithecines
121C. Evolution of the Genus Homo
133R. Aesthetics Anthropology
137. Ethnography on Film
156. Comparative Religion
158. Hunting and Gathering Societies
161. Development Anthropology
165. Demographic Problems in Nonindustrial Societies
M168. Health in Culture and Society
171. Civilization of Sub-Saharan Africa
M197A. Introduction to Development Studies
212P. Selected Topics in Hunter-Gatherer Archaeology
221A-221B. Fossil Evidence for Human Evolution
230Q. Cultural Anthropology
233P. Symbolic Anthropology
233Q. Aesthetic Anthropology
239P. Selected Topics in Field Training in Ethnography
250. Selected Topics in Social Anthropology
252P. Comparative Systems of Social Inequality
254. Kinship
255. Comparative Political Institutions
261P. Issues in Development Anthropology
M262P. Culture and Human Reproduction
M266. Medical Anthropology
M267B-M267C. Ethnographic Film Direction
271. African Cultures
280. Anthropology Theory
M288. Ethnographic Film

Architecture and Urban Planning 210A. History of Planning Thought since 1800
210B. Comparative History of Planning Practice
210C. Colloquium in Planning Theory
217A-217B. Comprehensive Planning Project
232A. Introduction to Regional Planning: Evolution of Regional Planning Dogmas
232B. Spatial Planning: Regional and International Development
233. Political Economy of Urbanization
235A-235B. Urbanization and Rural Development in Third World Countries
236A. Urban and Regional Economic Development I
253. Social Theory for Planners
266. City and Countryside in the Third World
268. Advanced Seminar in Environmental Analysis and Policy
269. Special Topics in Environmental Analysis and Policy
279. Housing for Developing Countries

Art History 55A. Africa, Oceania, and Native America
101A. Egyptian Art and Archaeology
101B. Egyptian Art and Archaeology of the Middle and New Kingdoms
118C. Arts of Sub-Saharan Africa
C119A. Advanced Studies in African Art: Western Africa
C119B. Advanced Studies in African Art: Central Africa
201. Topics in Historiography of Art History
203. Museum Studies
C216A. Advanced Studies in African Art: Western Africa
C216B. Advanced Studies in African Art: Central Africa
219C. African Art
220. Oceanic, Pre-Columbian, African, and Native North American Art
Berber (Near Eastern Languages) 101A-101B-101C. Elementary Berber
102A-102B-102C. Advanced Berber
130. The Berbers
199. Special Studies in Berber Languages

Community Health Sciences 160. Principles of Food and Nutrition
161. Nutrition and Health
171B. Family Health and Population: Principles and Issues
270. Maternal and Child Nutrition
272. Seminar on Current Issues in Maternal and Child Health
M274A-M274B. Population Policy and Fertility
M274C. Seminar in Population Policy and Fertility
275. Human Lactation: Biological and Public Health Significance
470A. International Health Agencies and Programs
470B. Advanced Issues in International Health
472A. Maternal and Child Health in Developing Areas
472B. Recent Developments in Maternal and Child Health in Disadvantaged Countries
472D. Overseas Refugee Health Programs
475. Planning and Development of Family Health Programs
477. Assessment of Family Nutrition
478. Anthropometric Nutritional Assessment
479. Food and Nutrition Planning: Policies and Programs in World Context
479D. Nutrition Education and Training: Third World Considerations

Dance 728. Dance of Ghana
C172R. Dance of Ghana
182A. Dance Cultures of Africa

Economics 110. Economic Problems of Underdeveloped Countries
111. Theories of Economic Growth and Development
112. Policies for Economic Development
190. International Economics
191. International Trade Theory
192. International Finance
281A. International Trade Theory
281B. International Finance
281C. International Economics
282A-282Z. Topics in International Economics
286A. Economic Development
286B. Analysis and Appraisal of Development Projects
287A-287Z. Topics in Development Economics

Education 204C. Education and National Development
204E. International Efforts in Education
224. Problems and Issues in Bilingual and Multicultural Education
238. Cross-National Analysis of Higher Education
253B. Seminar: African Education
253F. Seminar: Education in Revolutionary Societies

English M111G. Oral Traditions in Africa
114. World Literatures in English
M235. African Myth and Mythology
M261. Studies in African Literature in English

English as a Second Language

Film and Television 106C. History of African, Asian, and Latin American Film
108. History of Documentary Film
112. Film and Social Change
M209G. Ethnographic Film
219. Seminar in Film and Society
Scope and Objectives

This special undergraduate program is designed primarily for (1) students who plan to live and work in Africa or who are interested in government and public service careers involving African affairs and (2) students who plan to pursue graduate work in one of the social sciences or Near Eastern and African languages, with primary concentration on the African field.

The philosophy of the specialization is that people with a solid background in one of the established disciplines can make the best contribution to an understanding of Africa and its problems. Thus, the specialization can be taken only jointly with work toward a bachelor's degree, normally in one of the following fields: anthropology, economics, geography, history, linguistics, political science, or sociology. Students completing this special program receive a degree with a major in a selected discipline and specialization in African studies. The chair of the committee in charge certifies completion of the program.

Special Undergraduate Program

Preparation for the Specialization

Required: History 10A-10B and either African Languages 190 or a three-term sequence in any African language.

Upper Division

Students are required to take a departmental major in the social sciences or, by special arrangement with the committee chair, in the humanities or arts. In addition, you are required to take an upper division course related to Africa in each of four departments.

For more information, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall (825-2944) or Professor Christopher Ehret, History, 6265 Bunche Hall (825-4093, 825-4601).

Afro-American Studies

(Interdepartmental)

160 Haines Hall, (213) 825-7403

Professors

Walter Allen, Ph.D. (Sociology)
Gordon L. Berry, Ed.D. (Education)
Kimberie W. Crenshaw, J.D., LL.M., Acting (Law)
James H. Johnson, Ph.D. (Anthropology)
E. Victor Wolfenstein, Ph.D. (Political Science)
Bachelor of Arts Degree

The B.A. program in Afro-American Studies is periodically revised; check with the program office for changes and/or updates. Majors should also closely consult the 1990-91 Afro-American Studies Catalog and Directory, available from the program office.

Preparation for the Major

Required: History 10A and the lower division courses listed in one of the following concentrations, plus three courses from at least two additional concentrations (prerequisites for the courses listed must be completed before enrolling in a given course; this is especially important for the quantitative courses in economics and psychology): anthropology — Anthropology 8, 9, 10 (or 7), 12; economics — Economics 1, 2, 40, Mathematics 3A, 3E (or 3A and 3B, or 31A and 31B); English — English 3, 4, 10A, 10B, 10C (all must be taken in sequence); history — History 1A-1B-1C, 6A-6B-6C, 10B, and 100 or 101; philosophy — Philosophy 4, 21, 22, 31; political science — Political Science 1, 6, 20, Sociology 1, Economics 1; psychology — Mathematics 2, Psychology 10, 41, 42, Biology 2, Anthropology 7, Physics 10 (or 3A or 6A or 8A), one year of high school chemistry (or Chemistry and Biochemistry 2 or 11A); sociology — Mathematics 2, Sociology 1, 18, Linguistics 1, Anthropology 9. You are strongly urged to complete the required lower division courses within the first two years of the major.

The Major

Required: (1) Anthropology M164, English M104A, or History M158B-M158C; (2) four upper division and/or graduate courses in Afro-American Studies (or four departmental courses that are multiple-listed with Afro-American Studies); (3) six upper division electives within the department of concentration selected from the approved courses listed below; (4) two upper division electives outside the department of concentration selected from the approved courses list. Note: You may petition the committee which administers the degree program to have a course not on the approved list accepted for the major. In arranging a course of study, you should select a combination of courses that best meets your current and future educational and career goals.

Approved courses (recommended courses are in bold):

**Afro-American Studies**

B100, C101A through C101Z, 104A, 104B, M145, M158A, M158B, M158C, M164, M172, M197, 198, 199

**Anthropology**

M110, M111, M115P, M120, M121, M122, M123, M124, M125, M130, M134, M135A, M135B, M136Q, M137, M140, M142A, M142B, M145, M151, M152, M153, M156, M161, M167, M171, M182, M186A, M186B, M199

**Economics**

M101A, M101B, M102, M103 through M103Z, M107, M110, M111, M112, M120, M121, M130, M133, M135, M136, M141, M144, M147A, M147B, M150, M151, M160, M161, M180, M183, M190, M191, M192, M199

**History**

**Political Science**

**Psychology**

Honors Option

Students participating in the honors option are required to complete an independent research paper or project undertaken with the guidance of a faculty member. If you are an Afro-American studies major with a grade-point average of 3.5 or better, you can complete the honors option by writing an undergraduate thesis. For more information, contact the curriculum coordinator of the Afro-American Studies Program.

Double Major Option

Some students elect to complete the requirements of two majors (Afro-American studies and another). If you are interested in this option, you must maintain good academic standing and complete both majors within the 228-unit maximum imposed by the college. Courses used to satisfy the requirements for the principal major may also be used to satisfy the requirements of the other major.
requirements for the secondary one, but no more than five courses may be common to both majors. Because of the complexity of the double major, you are encouraged to plan your curriculum early and to do so in consultation with the college counselors and/or the Afro-American Studies Program adviser or curriculum coordinator.

Master of Arts Degree

The Master of Arts program in Afro-American Studies is international in scope, focusing on African American cultures in the U.S., the Caribbean, and South America. The program prepares students for positions in the job market, as well as further graduate study (i.e., Ph.D.) in their traditional disciplines.

Admission

Applicants for admission must possess a bachelor's degree in the social sciences or humanities and demonstrate an interest in Afro-American studies either through their previous course of study or in their future plans. Students are selected on the basis of the following criteria: (1) an official transcript; (2) three academic letters of recommendation; (3) a minimum 3.0 (B) average in the junior/senior years of college; (4) a statement of purpose describing the applicant’s background in Afro-American studies, proposed program of study, and future career goals; (5) scores on the verbal and quantitative sections of the Graduate Record Examination (GRE); (6) an original term paper or research paper which best expresses the applicant’s interests and abilities; (7) other evidence of promise deemed relevant such as work experience, accomplishments, or community and public service.

Admission to the program is limited to Fall Quarter. The application deadline for the 1991-92 academic year is January 15, 1991 (earlier for international students). Prospective students may request applications from the M.A. Degree Program in Afro-American Studies, Center for Afro-American Studies, 160 Haines Hall, UCLA, Los Angeles, CA 90024-1545.

Major Fields

The M.A. in Afro-American Studies is interdisciplinary, with formal support linkages to nine disciplinary departments: Anthropology, English, History, Linguistics, Music, Philosophy, Political Science, Psychology, and Sociology. Related courses are also offered in the following schools and departments: Art, Dance, Economics, Film and Television, Geography, Psychiatry, and Biobehavioral Sciences, Theater, Folklore, and Mythology, Latin American Studies, African Studies, Education, Library and Information Science, Management, Public Health, and Social Welfare.

Foreign Language Requirement

You are required to satisfy the language requirement by one of the following methods: (1) successfully completing two years of coursework in a foreign language at the college level, (2) passing a foreign language proficiency examination approved by your guidance committee and deemed appropriate by the program committee, or (3) demonstrating competence in the use of the computer as an aid in social research.

Course Requirements

A total of 14 upper division and graduate courses are required for the degree. Of that number, only four may be selected from upper division listings. The program has a structured core of seven required courses. You are required to take Afro-American Studies M200A and three courses from 200B through 200F. These courses should normally be taken in your first year of study. The second year is devoted to acquiring disciplinary competence in your cognate field, and six courses must be selected from that discipline. Finally, course 270A is required, and courses 270B-270C are to be taken in conjunction with work in the discipline of your choice. These seminars are expected to facilitate completion of your thesis. One course (four units) in the 500 series may be applied toward either the total course requirement or the minimum graduate course requirement.

Thesis Plan

The thesis is the final report on the results of your original investigation. Before beginning work on the thesis, you should consult closely with your academic adviser and the thesis committee. See the 1990-91 Afro-American Studies Catalog for details concerning thesis requirements.

Comprehensive Examination Option

You may elect to complete the M.A. degree through the comprehensive examination option. The written examination is administered by a committee consisting of at least three faculty members appointed by the program and is offered on a regular basis.

Upper Division Courses

Mr. Yarbrough, Ms. Smith

M104B. Afro-American Literature since the 1920s. (Same as English M104B.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of the Afro-American literary tradition from the 1920s to the present, including oral and written forms (ballads, blues, speeches; prose, poetry, drama). Emphasis in the Harlem Renaissance and black writing in the 1960s. Writers studied include Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Richard Wright, James Baldwin, Langston Hughes, Ralph Ellison, Toni Morrison, Amin Baraka (LeRoi Jones), and Alice Walker.

Mr. Yarbrough, Ms. Smith

M145. Ellingtonia. (Formerly numbered 145.) (Same as Ethnomusicology M111.) Music of Duke Ellington, highlighting the clarinet virtuoso and his compositions. The influence of Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Coolie Williams, and Mercer Ellington.

Mr. Burrell (W)

M147. Minority Group Politics. (Same as Political Science M147B.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

Mr. Gilliam

M158A. Comparative Slavery Systems. (Same as History M158A.) Lecture, three hours. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (Same as History M158B-M158C.) Lecture, three hours. Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieu.

M164. The Afro-American Experience in the U.S. (Same as Anthropology M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on understanding cultural patterns of adaptation among black Americans.

Mr. White

M172. The Afro-American Woman in the U.S. (Same as Psychology M172 and Women's Studies M172.) Prerequisite: upper division standing. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.
Graduate Courses

M200A. Advanced Historiography: Afro-American.
(Same as History M200V.) Seminar, three hours. May be repeated for credit.

M200B. Seminar in the Political Economy of Race.
Prerequisite: consent of instructor. Seminar on political economy, with special reference to black political economy and with focus on dynamics of allocation of wealth and power resources among social classes and racial and ethnic groups in the U.S. Presented in a context that is at once comparative and international, seminar emphasizes internationalism and transnationalism as well as the uniqueness of the Afro-American condition. Attempts to relate the black condition in the U.S. to the socioeconomic system of this country and to compare it to political, social, and economic conditions of African peoples elsewhere.

M200C. Selected Problems in Urban Sociology.
(Same as Sociology M262.) Seminar. Prerequisite: consent of instructor. Mr. Oliver

M200D. Afro-American Sociolinguistics: Black English.
(Same as Anthropology M243Q.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.

M200E. Studies in Afro-American Literature.
(Same as English M262.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

Ms. Smith, Mr. Yarborough

200F. African American Psychology.
Seminar. Prerequisite: consent of instructor. Survey of psychological literature as it pertains to persons of African American descent. Critical review of implications of "mainstream" research on African Americans, including discussion of research on the family, academic achievement, and psychological assessment (testing). Emphasis also on theoretical approaches advanced by African American scholars. African philosophy, perspectives on racism in psychology, and research in the black community.

C201A-C201Z. Special Topics in Afro-American Studies.
Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C101A-C101Z.

241. Special Topics in Afro-American Studies.
Lecture, four hours; discussion, one hour. Intensive research and study of major themes and issues in various areas of Afro-American studies.

M197. Topics in African-American Literature.
(Same as English M197.) Variable specialized studies couples with Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890-1914; Contemporary Afro-American Fiction. May be repeated for credit.

Ms. Smith, Mr. Yarborough

197B. Special Studies in Comparative Literature: Caribbean Literature.
General introduction to literature of the English-speaking Caribbean by reviewing its historical and geographical background. To analyze the historical process toward self-determination in the literature, the following topics are included: (1) alienation and the search for community, (2) "external" relationships (the ancestor, the kinsman, the other), and (3) form and language.

199. Special Studies in Afro-American Studies (2 to 4 units). To be arranged with faculty member who will direct the study. Prerequisites: 3.0 GPA in the major, junior or senior standing, consent of instructor. Intensive directed research project. Eight units may be applied toward major requirements.

American Indian Studies (Interdepartmental)

3220 Campbell Hall, (213) 825-7315

Professors
Richard L. Abel, LL.B., Ph.D. (Law)
Robert A. Georges, Ph.D. (English)

Melissa Meyer, Ph.D. (History)
Gary Sarns, Ph.D. (English)

Scope and Objectives

Because UCLA possesses a substantial number of faculty in the humanities and social sciences engaged in teaching and conducting research on American Indians, the nation's first interdisciplinary M.A. in American Indian Studies was established here.

The M.A. program draws primarily on existing courses in the participating departments, where research and research methodologies are of primary concern. Students are exposed to Indian-related research in a number of different disciplines; demonstration of research skills is required. You will graduate with the training you need to teach Native American studies or to serve in an administrative capacity in Indian programs. The M.A. program is coordinated by the American Indian Studies Center and ranks among the top Indian studies programs in the country.

Master of Arts Degree

Admission

A bachelor's degree from an accredited undergraduate institution is required for admission to the M.A. program in American Indian Studies. You must demonstrate interest in American Indian studies either by formal coursework, independent study, or practical experience. As part of the application, you must submit a detailed account of your background, potential career plan, and interest in American Indian studies. Preference is given to individuals with undergraduate majors relevant to the proposed areas of concentration within the M.A. degree areas: anthropology, English, history, linguistics, literature, sociology, fine arts, or American Indian studies.

Entering students must meet the University's minimum admission requirement of a 3.0 grade-point average in all work completed during the last two undergraduate years and in all prior graduate work. The Graduate Record Examination (GRE) is not required, but you are encouraged to take the examination and submit test results as part of the documents supporting your enrollment application. At least three faculty letters of recommendation must be submitted. Admission to the program is limited to Fall Quarter. You may obtain application forms and further information from the Committee to Administer the M.A. Degree in American Indian Studies, American Indian Studies Center, 3220 Campbell Hall, UCLA, Los Angeles, CA 90024-1548.

Major Fields or Subdisciplines

The American Indian Studies M.A. is an interdepartmental program with 10 participating academic schools and departments: Anthropology, Art History, Dance, English, History, Law, Library and Information Science, Linguistics, Music, and Sociology. The 10 disciplines are grouped into four areas of concentration: history and law; expressive arts; social relations; and language, literature, and folklore. Courses related to the American Indian Studies M.A. are also offered in the following schools and departments: Architecture and Urban Planning, Education, Political Science, Social Welfare, and Psychology.

Linguistics Requirement

Students in the M.A. program must successfully complete one of the following: (1) Linguistics 114, (2) Anthropology 243P, or (3) for native speakers of an American Indian language, an independent study course (approved by the instructor) in either linguistics or anthropology in
which a structural knowledge of the student’s language is learned. These courses are designed to show how American Indian languages and communicative norms are primary vehicles for understanding American Indian cultures.

Course Requirements

1. A minimum of 10 courses is required, at least seven of which must be graduate courses. Four courses are required: American Indian Studies M200A, M200B, M200C (which ordinarily must be taken in the first year), and one of the linguistics requirement options described above, which must be taken by the end of the second year. In addition, one of the remaining six courses must be a graduate course concerned with research methodology.

2. All M.A. candidates select one of the following areas of concentration: (a) history and law, (b) expressive arts, (c) social relations, (d) language, literature, and folklore. You can petition for optional combinations of interdisciplinary work through the program committee.

3. Two courses in the 500 series may be applied toward the total course requirement; however, only one 596 course may be applied toward the minimum graduate course requirement.

Thesis or Comprehensive Examination Plan

You may select either (1) a thesis plan or (2) a comprehensive examination plan to complete the degree program. The committee members supervising the thesis or administering the comprehensive examination are selected by you with the consent of the program committee. Copies of the thesis must be submitted to each member of the committee by the fifth week of the term in which you expect to graduate. If you choose the comprehensive examination plan, you must demonstrate in a written and/or oral examination your competency in the major and minor areas of study.

Upper Division Course

197. Special Topics In American Indian Studies. Variable topics selected from the following: Myth and Folklore of Indian Societies; Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and the American Indian; History of American Indians (cultural area); Dance and Music of American Indians (cultural area); American Indian Policy. Consult Schedule of Classes for topics and instructors. May be repeated twice for credit.

Graduate Courses

M200A. Advanced Historiography: American Indian Peoples. (Same as History M200K.) Seminar, three hours. Designed to familiarize students with major genres of literature relating to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

Ms. Meyer

M200B. Cultural World Views of Native America. (Same as English M266.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology.

Ms. Heth, Mr. Lincoln

M200C. Contemporary Issues of the American Indian. (Same as Anthropology M269 and Sociology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in course M200A and cultural and expressive experience of American Indians presented in course M200B.

Mr. Champagne

201. Topics in American Indian Studies. Discussion, three hours. Prerequisite: consent of instructor.

Adjunct Professor

Gerardo Reichel-Dolmatoff, Ph.D.

Adjunct Associate Professor

Donald Lindburg, Ph.D.

Research Anthropologist

Kyeyoung Park, Ph.D.

Scope and Objectives

Anthropology is classed as a social science, but its roots are in both the biological sciences and humanistic studies. It still constitutes a bridge linking these three areas of knowledge, and the department has strong ties with other disciplines ranging from anatomy and genetics to linguistics, psychology, classics, and fine arts.

The department recognizes the following five fields in anthropology:

Archaeology is the study of cultures of the past, where knowledge of their characteristics is obtained primarily from material evidence left in the ground, supplemented in some cases by historical and inscriptional records.

Biological anthropology studies the diversity of the human physical characteristics and the biological characteristics underlying human behavior. Faculty members in this field specialize in one of four subfields: (1) primatology or the study of the biology and behavior of monkeys and apes, (2) paleoanthropology, the study of fossil hominids and the evolution of humans, (3) human genetics, and (4) behavioral ecology of human and nonhuman primates.

Cultural anthropology is the investigation of idealized systems, including religious beliefs and mythologies, philosophical and other cognitive concepts, world views and aesthetic configurations, and technologies transmitted from generation to generation.
Linguistic anthropology examines the diversity of natural languages and other communicative systems, the sociocultural patterning of their use, and their relationship to the cultural knowledge of their speakers.

Social anthropology, closely tied to sociology, studies the structure of human communities and the institutionalized social interaction systems. It examines the diversity of family forms and kinship, governance and political systems, law and the resolution of conflict, economic collaboration, social status and role, and certain aspects of religion.

Cutting across the five fields are three other categories of course offerings: applied anthropology, regional cultures, and history, theory, andmethod.

The department offers Bachelor of Arts and Bachelor of Science degrees in Anthropology for undergraduates; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as business, urban planning, medicine, public health, nursing, law, education, and social welfare. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

Bachelor of Arts Degree

Preparation for the Major

Required: Anthropology 7, 8, 9, and one elective from 10, 15, 33, 44, 60, 60P. All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.

The Major

The major is designed for students interested in an anthropological understanding of human behavior. One of the strengths of anthropology is its cross-cultural “holistic” and integrative approach with many fields, such as biology, history, linguistics, the social sciences, and many of the humanities.

To provide a comprehensive understanding of the discipline as a whole, you must take one course in each of the five fields (see “Scope and Objectives” above). One upper division survey core course is offered in each field, but you may take any course in the given area to fulfill this requirement. All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.

You must complete 14 (four-unit) upper division courses as follows:

1. One upper division course in each of the five fields: archaeology, biological anthropology, cultural anthropology, linguistic anthropology, and social anthropology.

2. One upper division course in regional cultures.

3. Four additional upper division anthropology courses.

4. Four upper division courses (unless otherwise designated) in related fields selected from a list maintained in the department.

Students considering graduate work in anthropology are strongly encouraged to take at least one course in the history and theory of anthropology and one course in methodology in addition to the upper division core courses in the five fields.

Honors Program

The honors program provides research-orientated students with opportunity to engage in original research and analysis under the close supervision of faculty members and culminates in an honors paper. To be admitted you must have junior standing and have completed at least two upper division anthropology courses and Anthropology 197H. You should have a cumulative GPA of 3.0 overall and a 3.5 cumulative GPA in your upper division anthropology courses. The application for admission must be submitted to the honors committee at the end of course 197H (taken in Winter Quarter of your junior year). The proposal, research, analysis, and writing of your paper take place over three terms through courses 199HA, 199HB, and 199HC. Course 199HA should be taken in Spring Quarter of your junior year; 199HB and 199HC are taken in Fall and Winter Quarters of your senior year.

Bachelor of Science Degree

Preparation for the Major

Required: Anthropology 8, 9, 10, 12; Biology 5, 7, 8; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 6A, 6B, 6C. All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.

The Major

The major provides an overview of human evolution and is designed to prepare students for careers in anthropology and the health sciences, including medicine, dentistry, and nursing. All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA. The following courses are required:

1. One upper division course in each of the five fields: archaeology, biological anthropology, cultural anthropology, linguistic anthropology, and social anthropology.

2. One upper division course in regional cultures.

3. Two statistics courses (sequential recommended).

4. Four additional upper division anthropology courses, at least two of which must be in fields other than biological anthropology.

5. At least one course in each of the following areas: anatomy (Kinesiology 17A); ecology (Biology 122, Geography 112); human genetics (Biology CM156); physiology (Biology 166, 167, 170, Kinesiology 101A, 101B). Courses listed are recommended, but others may be substituted with consent of the department.

Specialization in Computing

Majors in either anthropology bachelor’s degree program may select a specialization in computing by (1) completing Program in Computing 10A, 10B, and 10C or 15, (2) completing one course from Anthropology 156A, 156B, 156C, (3) completing either a 199 course that focuses on the integration of computer methods with anthropological studies or one course from Program in Computing 60, Computer Science 172, or Mathematics 61, or an equivalent course (subject to approval of the departmental computer committee), (4) satisfying all other requirements for a bachelor’s degree in the specified major. You graduate with a bachelor’s degree in your major and a specialization in computing.

Graduate Study

Admission

Admission to the graduate program in anthropology is limited to Fall Quarter. The department does not require an undergraduate major in anthropology, though this is desirable. Prospective students should have completed the language requirement before beginning work. Knowledge of a foreign language is not required for admission, but completion of the language requirement before beginning work is highly recommended, and such students are at an advantage in the selection process.

Applications and all supporting material must be submitted by December 15, 1990, to be considered for admission for Fall Quarter 1991.

The Graduate Admissions Office (Graduate Division, 1247 Murphy Hall, UCLA, Los Angeles, CA 90024-1428) requires submission of an official application (with fees) and official transcripts of record, in duplicate, from each college or university at which work has been completed.

In addition, you must submit the following directly to the Graduate Counselor, Department of Anthropology, 341 Haines Hall, UCLA, Los Angeles, CA 90024-1553:

1. Three letters of recommendation (preferably from anthropologists).

2. Graduate Record Examination (GRE) scores.

3. A research or term paper.

4. Statement of purpose.
The department requires two faculty members to sponsor an applicant before admission is recommended.

For further information on the departmental program, a graduate syllabus may be obtained without charge by writing to the above departmental address.

Master of Arts Degree

Foreign Language Requirement

M.A. language requirements may be met by:

1. Passing the Educational Testing Service (ETS) examination in a foreign language with a score of 500 or better or

2. Passing a departmental examination or other demonstrations of proficiency in a foreign language by petition to the department chair and the dean of the Graduate Division.

Students whose native language is not English may petition to have the requirement waived. Formal written petition for such waiver must be submitted to the guidance committee, department chair, and the Graduate Division.

Core Course Requirements

You must demonstrate basic knowledge in the five fields by one or a combination of the following:

1. passing the core course with a grade of B or better,
2. petitioning that work taken elsewhere constitutes the equivalent of such courses, or
3. passing a special examination in each, in Spring Quarter of your first year in residence.

Courses taken while in graduate standing to meet these field requirements may also serve to meet course unit demands for the M.A. degree.

Course Requirements

The minimum course load is three courses (12 units) per term, but this requirement may be waived by petition to the department chair. An M.A. degree requires 10 courses (40 units) taken for a letter grade with a minimum 3.0 grade-point average.

1. Four courses may be upper division (100 series).
2. One course must be a graduate core seminar in your chosen subfield of specialization (e.g., Anthropology M201A for archaeology, course 202 for biological anthropology, course 203 for sociocultural anthropology, course 204 for linguistic anthropology).
3. In addition to the appropriate graduate core seminar, you must take five other graduate seminars (200 series).
4. Three courses may be outside the major with consent of the guidance committee.
5. Two courses may be anthropology independent studies (see department for course numbers) with consent of the guidance committee.

Eight units of course 506 taken for a letter grade may be applied toward the total M.A. course requirement, with four of these units applicable toward the minimum graduate course requirement.

Thesis

By your fourth term of study, you select a thesis committee of departmental faculty to supervise your research and writing. The committee, as well as your thesis topic, must be approved by the department and the dean of the Graduate Division. Prior to completing the M.A. degree requirements, you file a Petition for Advancement to Candidacy form with the Graduate Division. The approved thesis must be typed and filed according to University regulations; information on regulations and procedures is available from the Graduate Division.

Evaluation of the thesis provides the basis for the thesis committee's recommendation and departmental faculty vote regarding both the acceptability of the thesis for the M.A. degree and admission into the doctoral program.

Ph.D. Degree

Admission

If you are entering the department with an M.A. in Anthropology from another university or in a field other than anthropology, you must satisfy all master's degree requirements with the exception of the thesis. To fulfill this requirement, you may submit your prior master's thesis or a research paper written as a graduate student (whether or not in anthropology). Only after satisfying these requirements are you admitted into the Ph.D. program.

Foreign Language Requirement

You must satisfy the Ph.D. language requirement before formally nominating the five-member doctoral committee and before taking the qualifying examinations. Any language useful for field study and/or library research is acceptable. You must submit to your departmental committee a comprehensive annotated bibliography and demonstrate familiarity with its contents by taking a written or oral examination. The format of the examination is determined by your doctoral committee. Students who speak English as a second language may waive the language requirement by petition to their committee, the department chair, and the Graduate Division. Under unusual circumstances, the department will consider alternate means of fulfilling the requirement.

Course Requirements

You must be in residence for one year between receipt of the M.A. degree and advancement to doctoral candidacy. During this time, coursework must be done with at least three different members of the faculty. You must be enrolled in a minimum of 12 units (this requirement may be waived by petition to the department chair) or be on an official leave of absence.

Qualifying Examinations

Qualifying examinations are conducted in two parts: (1) a written examination and (2) the University Oral Qualifying Examination. The timing of the examinations is arranged with members of the doctoral committee, but they may not take place earlier than the third term after receiving the M.A. degree. The written examination must be completed within the first eight weeks of the given term; the University Oral Qualifying Examination is expected to be completed in the same term, but no later than the following term.

The format for the written examination is determined by the doctoral committee which examines you in three subfields of your choice. Two of these three subfields are selected from a list available in the department; the third is specific to your needs, interests, and dissertation plans. After you successfully complete the written examination, the doctoral committee administers the University Oral Qualifying Examination, in which you are required to present a defense of your dissertation proposal. The committee determines the conditions for reexamination should you fail either examination.

Final Oral Examination

This examination focuses on your dissertation and may be waived by your doctoral committee.

Lower Division Courses

7. Human Evolution. (Formerly numbered 11.) Lecture, three hours; discussion, one hour. Required as preparation for B.A. degree. Evolutionary processes and evolutionary past of the human species.

8. Archaeology: An Introduction. (Formerly numbered 6.) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. General survey of field and laboratory methods, theory, and major findings of anthropological archaeology, including case-study guest lectures presented by several departmental archaeologists.

9. Sociocultural Anthropology. (Formerly numbered 5, 22.) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to study of culture and society in comparative perspective. Examples from societies around the world to illustrate basic principles of formation, structure, and distribution of human institutions. Of special concern is the contribution and knowledge that cultural diversity makes toward understanding the problems of the modern world. P/NP or letter grading.

Mr. Bailey, Ms. Peacock

33. Culture and Communication. Lecture, three hours; discussion, one hour. Functions and relationships in which culture and communication shape each other, with emphasis on importance of language as a symbolic and practical guide to people’s behavior and understanding of each other’s actions. Topics include theories of language, the socialization process, and nonverbal communication.

Mr. Durante (F)

44. Culture and the Visual Arts. Lecture, two hours; discussion, one hour. In our contemporary urban societies, looking at art objects and other aesthetic forms as a significant part of our everyday cultural experience. The anthropological approach offered helps achieve better understanding of formal qualities and symbolic meaning of Western and non-Western art objects present in our visual environment.

60. Anthropology for Today. (Formerly numbered 160.) Lecture, three hours. Lectures, films, readings, and discussions, with focus on critical evaluation of anthropological theory. Emphasis on changing cultural aspects of a selection of pressing problems in the modern world. Examination of such domestic issues as poverty and social inequality, educational reform, public health and mental health, conflict and cooperation, and exchange in a broad view of world issues as economic development, environmental protection, population control, political modernization, diplomacy, war, and revolution, refugee and disaster relief, minority rights and protection of indigenous peoples. Survey of ethical issues and career opportunities in applied anthropology.

Mr. Hammond

60P. Internships in Applied Anthropology. (Formerly numbered 160P.) Seminar, three hours. Prerequisite: six units of field experience. To give students first hand experience working in agencies in public and private sectors (e.g., refugee relief centers, drug rehabilitation programs, community development agencies, mental health clinics, etc.) selected for their relevance to individual students’ prospective professional interests. Eight to 12 hours per week, complemented by weekly seminars, field evaluations, and preparation of a field journal.

Mr. Hammond

80. Introduction to Quantitative Methods. (Formerly numbered 164A.) Lecture, three hours; discussion, one hour. Data analysis as a way to reason with quantitative information. Topics include description (frequency distribution tables, histograms, population specification (mean and standard deviation, normal distribution), samples and estimation procedures (central limit theorem), and hypothesis testing (t-test, chi-square test). Read

Upper Division Courses

All upper division courses with letter designations (A, B, P, Q, etc.) may be taken independently unless otherwise stated.

Archaeology

110. World Archaeology. Prerequisite: upper division standing or consent of instructor. Broad survey of human culture history from its Stone Age beginnings to establishment of the primary civilizations of the Old and New Worlds. Emphasis on student's personal interest in archaeology and in an anthropological approach to study of the past.

Mr. Sackett

111. Study of Archaeology. Survey of contemporary prehistoric archaeology. Emphasis on what archaeologists do to study various aspects of archaeology to the modern world. Intended for students with a desire to explore the nature of anthropological archaeology. (Core course for archaeology field.)

Mr. Hill

112. Old Stone Age Archaeology. Lecture, three hours. Prerequisite: course 8 or consent of instructor. Development of Paleolithic cultural traditions in Europe, Africa, Asia, and the New World. Emphasis on the ordering and interpretation of archaeological data, Pleistocene geology and chronology, and relationship between human cultural and biological evolution.

Mr. Sackett

113P. Archaeology of North America. Lecture, three hours. Prerequisite: knowledge of North American Indians. Evolution of Indian societies from earliest times to (and including) contemporary Indians; approaches and methods of American archaeology.

Mr. Meighan

113Q. Prehistory of California Indian Cultures. Examination of the California archaeological record from earliest human evidence to historic times, with emphasis on development of cultural diversity.

Mr. Meighan

113R. Southwestern Archaeology. Examination of prehistory of the American Southwest from Early Man to historic times. Emphasis on describing and explaining cultural variation and change, employing an ecological and evolutionary perspective. Special attention to Great Basin, Pueblo, and the Great Abandonment. Evolutionary processes generalized and related to contemporary world problems.

Mr. Hill

114P. Ancient Civilizations of Western Middle America (Meso-Sphere). Pre-Hispanic and Conquest period native cultures of Western Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Toltec-Aztec and Mixtec civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

Mr. Nicholson

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere). Pre-Hispanic and Conquest period native cultures of Eastern Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Lowland and highland Maya civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

Mr. Leventhal

114R. Ancient Civilizations of Andean South America. Lecture, three hours. Prerequisite: course 8 or consent of instructor. Study of prehistoric and protohistoric cultures of Andean South America, as revealed by archaeology and early Spanish writings. The Incas and their predecessors in Peru, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

Mr. Donnan

115P. Archaeological Field Training. Prerequisite: consent of instructor. Procedures of archaeological excavation, mapping, stratigraphy, collecting, and recording of archaeological data (field class conducted off campus).

115O. Archaeological Research Techniques. Lecture, three hours. Prerequisite: courses 8 or consent of instructor. Introduction to techniques of discovery and analysis of archaeological artifacts, and use of data research. Special attention to sampling, typology, and locational analysis. Consideration of techniques for measurement of such important variables as population, diet, seasonality, specialization, and exchange.

Mr. Hill

115R. Strategy of Archaeology. Lecture, three hours. Prerequisite: course 8 or consent of instructor. Introduction to problem formulation, theory, and methods of archaeology. Approaches to formulation and development of research designs. Focus on how archaeologically relevant research is conceived and planned, with consideration of differing viewpoints and their usefulness.

Mr. Hill

M115S. Historical Archaeology. (Same as History 115S.) Survey of aims and methods of historical archaeology as practiced on both sides of the Atlantic, with case studies from North America, the Caribbean, Africa, and Europe.

Mr. Posnansky

116P. Laboratory Analysis in Archaeology. Lecture, three hours. Prerequisite: consent of instructor. Preparation of archaeological reports for publication. Laboratory description of archaeological collections; typology and preparation of display in illustrated format and presentation of archaeological data for scholarly publications. Students work with museum collections of archaeological finds: ceramics, basketry, implements of bone, stone, and shell.

Mr. Berger

117. Archaeological Materials Analysis: Laboratory Methods. Lecture, three hours; laboratory, three hours. Prerequisite: course 8. Training in archaeological analysis of prehistoric cultural materials, including chipped and ground stone artifacts, vertebrate fauna, shellfish, ceramics, ornaments, and beads, and craft production materials from sites worldwide. Introduction to electronic measurement instrumentation and computerization of archaeological data, and digitizer-grader.

Ms. Arnold (W)

117P. Intensive Laboratory Training in Archaeology. Lecture, three hours; laboratory, four hours. Prerequisites: courses 116P, 117, or equivalent. Archaeologists with special expertise in specific analytical techniques and topics oversee intensive laboratory training on a tutorial or small-class basis on one of the following topics: zoooarchaeology, ethnobotany, lithic analysis, ceramic analysis, etc. May be repeated for credit with topic change. P/NP or letter grading.

Mr. Arnold

118A. Museum Studies. Prerequisite: consent of instructor. Method and theory of museum operation. Discussion and demonstration of acquisition accessions, storage, photography, conservation, and exhibition. Analysis of museum research, publication, and teaching, as well as museum administration and fundraising. Lectures and demonstrations structured to illustrate how various aspects of museum operation are interrelated.

Mr. Donnan and the Museum Staff

118B. Museum Studies. Prerequisites: course 118A, consent of instructor. Two areas of museum operation are selected by students from those discussed and demonstrated in course 118A. Students are required to determine and participate in these areas through a combination of library research and a series of assignments carried out in the museum.

Mr. Donnan and the Museum Staff

Biological Anthropology

120. Survey of Biological Anthropology. Lecture, three hours. Prerequisites: courses 10, 12, or equivalent. Limited to majors and graduate students in anthropology. Survey of biological anthropology including all major subareas. Lecture/seminar format requiring attendance at a recitation section in addition to lectures. (Core course for biological field.)

120G. Biological Anthropology in Review. Lecture, three hours; seminar, three hours. Corequisite: lecture portion of course 7. Limited to graduate students in anthropology. Designed for anthropology students who have a deficiency in biological anthropology. Seminar discussion based on basic evolutionary principles, behavior of nonhuman primates, hominid evolutionary history, and contemporary human variation.

Mr. Boyd

121A. Primate Fossil Record. Lecture, three hours. Recommended prerequisites: courses 10, 12. Course 121A should be taken before 121B and 121C.

Introduction to method and theory in paleoanthropology. Primates evolution, Craniofacial through the Miocene.

Mr. Rasmussen
121B. The Australopithecines. Lecture, three hours. Prerequisite: consent of instructor. Recommended: courses 10, 12, 121A. Morphology, ecology, and behavior of the genus Australopithecus. History of their discoveries and their place in human evolution. Ms. Kennedy

121C. Evolution of the Genus Homo. Lecture, three hours. Prerequisite: consent of instructor. Recommended: courses 10, 12, 121A, 121B. Origin and evolution of the genus Homo, including archaic sapiens and Neanderthals. Morphology, ecology, and behavior of these groups. Course ends with appearance of modern man. Ms. Kennedy

124P. Evolution of Human Behavior. Lecture, three hours. Prerequisite: consent of instructor. Recommended: course 7 or 10 or 12 or equivalent. Examination of human sexual relations and social behavior from an evolutionary perspective. Emphasis on theories and evidence for differences between men and women in their patterns of growth, matura-
tion, fertility, mortality, parenting, and relations with members of the opposite sex. Mr. Bailey

124Q. Physiology of Human Behavior. Lecture, three hours. Prerequisite: course 124P or consent of instructor. Overview of neural, physiological, and endocrine substrates of a variety of human behaviors, including sexual behavior, aggression, language, and learning. Emphasis on evolutionary origins, developmental pathways, and cross-cultural expressions of behaviors examined. Focus on human behavior, with evidence from animal literature as well. Ms. Peacock

125. Genetics of Human Diversity. (Formerly numbered 125C.) Study of the genetic composition of human populations and human biological diversity. Emphasis on genetics at the population level for both discrete and quantitative variation. Analytic methods and evolutionary hypotheses.

126P. Introduction to Field Methods in Human Ecology. Lecture, three hours. Prerequisite: upper division or graduate standing. Survey of methods used in anthropological investigations emphasizing human biology and human ecology. Study design, physical assessment of nutritional status, growth and maturation, demographic surveys, systematic observation of behavior, energy expenditure, subsistence ecology, data analysis. Demonstrations and labs. P/NP or letter grading. Mr. Bailey, Ms. Peacock

128A. Primate Behavior Nonhuman to Human. Lecture, three hours. Prerequisite: three hours of upper division standing. Review of primate behavior as known from laboratory and field studies. Theoretical issues of animal behavior with special reference to nonhuman primates. Discussion of human behavior as the product of such evolutionary processes. P/NP or letter grading. Ms. Silk

129. Behavioral Ecology of Primates. Lecture, three hours. Prerequisite: course 128A. Analysis of evolution of sociality, sexual strategies, parenting behavior, fighting and contests, and altruism and cooperation in primate species. Ms. Silk (W)

129P. Laboratory Methods in Biological Anthropology: Skeletal. Lecture, three hours. Prerequisite: courses 10, 12, 121A, 121B. Origin and evolutionary processes of the genus Homo, including archaic sapiens and Neanderthals. Morphology, ecology, and behavior of these groups. Course ends with appearance of modern man. Ms. Kennedy

129Q. Paleopathology. Lecture, one hour; laboratory, three hours. Prerequisites: course 129P, upper division standing, consent of instructor. Investigation into diseases, trauma, health status, subsistence activities, and ethnic mutilation (i.e., cranial deformation) through analysis of fossil and mortuary materials. Course has worldwide scope, with some emphasis on the New World. Ms. Kennedy

130. Study of Culture. Lecture, three hours. Prerequisite: one lower division anthropology course or equivalent. The 20th-century elaboration and development of the concept of culture and cultural evolution. Emphasis on methods of data ascertainment through fieldwork in archaeological and ethnographic and life-table modification, age-group systems, and effects of modernization on these systems in non-Western societies.

130P. Laboratory for Naturalistic Observations: Laboratory Methods in Human Behavioral Endocrinology (6 units). Lecture, three hours; laboratory, three hours (plus time to complete project). Prerequisite: course 124Q or consent of instructor. Introduction to laboratory methods in neuroendocrinology for study of individual and group variation and consensus of instructor. Overview of neural, physiological, and endocrine substrates of a variety of human behaviors, including sexual behavior, aggression, language, and learning. Emphasis on evolutionary origins, developmental pathways, and cross-cultural expressions of behaviors examined. Focus on human behavior, with evidence from animal literature as well. Ms. Peacock

130Q. Physiology of Human Behavior. Lecture, three hours. Prerequisite: course 124P or consent of instructor. Overview of neural, physiological, and endocrine substrates of a variety of human behaviors, including sexual behavior, aggression, language, and learning. Emphasis on evolutionary origins, developmental pathways, and cross-cultural expressions of behaviors examined. Focus on human behavior, with evidence from animal literature as well. Ms. Peacock

130R. Cross-Cultural Socialization and Childhood. Lecture, three hours. Introduction to ethnographic data on socialization and child training. Theories explaining the development of children in different social settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences. P/NP or letter grading.

130S. Anthropology of Deviance and Abnormality. Lecture, three hours. Prerequisite: course 9 or equivalent, consent of instructor. Relationship between culture and recognition of, responses toward, and forms of deviant and abnormal behavior.

130T. Laboratory Methods in Human Behavioral Endocrinology: Symbolic Systems. Prerequisite: upper division standing or consent of instructor. Analysis of anthropological research with special reference to biological and behavioral aspects of thought, behavior, and communication expressed in a symbolic mode (as distinguished from discursive, instrumental, and causal modes). Methods for study of symbolic meaning, including the experiential approach.

131. Technology and Environment. Significance of material culture in archaeology and ethnology; problems of invention and the acceptance of innovations; ecological and sociological concomitants of technological systems; selected problems in material culture. Ms. Bray, Mr. Earle

133Q. Symbolic Systems. Prerequisite: upper division standing or consent of instructor. Analysis of anthropological research with special reference to biological and behavioral aspects of thought, behavior, and communication expressed in a symbolic mode (as distinguished from discursive, instrumental, and causal modes). Methods for study of symbolic meaning, including the experiential approach.

133R. Aesthetic Anthropology. Prerequisite: upper division standing. Elaboration of a cross-cultural notion of visual aesthetic phenomena that meets the requirements of anthropological research. Aesthetic phenomena as cultural; their integration in a cultural system; their relationships with other elements in the interplay of social forces.

134. Personality and Cultural Systems: Enculturation. Prerequisite: upper division standing or consent of instructor. Relationship between individual and culture, with focus on enculturative learning as modality of personality forms and internal dynamics of culture change. Major emphasis on cultural influences of cognition, perception, thought processes, socialization, and development of value.
139L. Field Methods in Cultural Anthropology. Laboratory, three hours. Prerequisite: upper division standing. Corequisite: course 139. Supervised practice in field methods in cultural anthropology. Field methods and techniques presented in course 139 practiced and applied in simulated field situations. Discussion of styles of presenting ethnographical information. Mr. Wilbert

Linguistic Anthropology

M140. Language in Culture. (Same as Linguistics C146.) Prerequisite: upper division standing or consent of instructor. A systematic study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. (Core course for linguistics field.) Mr. Kroasky

141. Ethnography and Communication: Introduction and Practice. Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Course has two interrelated objectives: (1) to introduce students to ethnography of communication—descriptive and analytic communication behavior; and the sociocultural knowledge which it reflects and (2) to train students to recognize, describe, and analyze relevant linguistic, proxemic, and kinesic aspects of face-to-face interaction. (Alternates yearly with courses 142A-142B and 145.) Mr. Duranti, Mr. Kroasky (Sp)

M142A-142B. Microethnography of Communication. Lecture, three hours. Course 142A or Sociology C12A or consent of instructor is prerequisite to 142B. Students prepare daily records (sound tape, videotape, or film) of naturally occurring social interactions, which are analyzed in class for interactive tasks, resources, and accomplishments displayed. Laboratory and fieldwork outside of class and minimal fees to offset costs of equipment maintenance and insurance required. (Alternates yearly with courses 141 and 143.) Mr. Moerman (W,Sp)

143. Field Methods in Linguistic Anthropology. (Formerly numbered 143A.) Lecture, three hours. Prior or concurrent experience in linguistics not required. Practice in eliciting linguistic data from informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and traditional holistic practice with native speakers of non-Indo-European languages is normally an important aspect of student participation. P/NP or letter grading. (Alternates yearly with courses 141 and 143.) Mr. Duranti, Mr. Kroasky

144. American Indian Ethnolinguistics and Sociolinguistics. Prerequisite: prior coursework in either anthropological linguistics, or American Indian studies. Introduction and analysis of sociocultural, linguistic aspects of language use in Native North American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as multiethnic, multicultural, multilingual societies regarding appropriate communicative behavior and variation within speech communities (e.g., male and female speech, baby talk, ceremonial speech, etc.). Macro-sociolinguistic considerations include language contact and its relationship to language change and language in American Indian education. Mr. Kroasky

145. Afro-American Sociolinguistics: Black English. (Formerly numbered C145.) Lecture, three hours. Prerequisite: instructor. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minor- ity dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues of sociolinguistics examined through a case study approach.

Social Anthropology

150. Study of Social Systems. Lecture, three hours. Prerequisite: course 8 or 9 in Sociology 1 or consent of instructor. General principles of the organization of society; relation of these to technological complexity and ecological conditions of the culture; principles of evolutionary development of social systems. (Core course for social field.) Mr. Shahani

151. Marriage, Family, and Kinship. Lecture, three hours. Prerequisite: course 9. Survey of marital patterns, descent, and family structure in a range of societies. Emphasis on relationship between kinship and other aspects of the sociocultural system and on importance of kinship for general anthropological research. Ms. Levine

152. Traditional Political Systems. Prerequisite: course 150 or consent of instructor. Political organization in preindustrial societies of varying degrees of complexity. Law and the maintenance of order; corporate groups; ideology. Relations of political institutions to other institutions of society.

153. Evolution of Human Societies. (Formerly numbered 153A.) Lecture, three hours. Review of economic and ecological approaches to studying organization of production and exchange. Economic life viewed from three perspectives: adaptation, decision, and competition. Comparative analyses of behaviors discussed in context of ethnographic evidence from a wide variety of cultural systems. Mr. Earle, Mr. Johnson

154. Comparative Religion. Survey of various methodological approaches in comparative study of religious ideologies and action systems, including understanding particular religions through descriptive and structural approaches, and identification of social and psychological factors which may account for variation in religious systems cross-culturally. Mr. Newman

155. Hunting and Gathering Societies. Lecture, three hours. Prerequisite: course 9. Survey of hunting and gathering societies. Examination of their distinctive features from both an ecological and cultural viewpoint with a focus on the possibility of developing a general framework for synthesizing these two viewpoints. Use of this synthesis as a basis for illustrating the relevance of hunting and gathering societies as an understanding of complex societies. Mr. Read

156. Social Dynamics. Lecture, three hours. Prerequisite: introductory anthropology or sociology course or consent of instructor. Examination of recurrent forms of institutional behavior, including child-rearing practices, initiation rites, kin-group organization, technology, role networks, attitude and belief systems, warfare, and structuring of status and authority. Demonstration of interrelatedness of diverse theoretical orientations in anthropology in formulation of a holistic theory. P/NP or letter grading. Mr. Goldschmidt

Applied Anthropology

161. Development Anthropology. Lecture, three hours. Prerequisites: course 9 and upper division standing, or consent of instructor. Comparative study of planned and unplanned development, in particular as it affects the cultural, socioeconomic, political, and psychological impact of capital, technological change and gender differences, economic differentiation and class, urban-rural relations, and migration. Discussion of theoretical issues in light of case studies. Ms. Bray

162. Contemporary American Indian Problems. Controversial problems of contemporary American Indian life and on and off the reservation. Topics include self-determination, land claims, activism, urban Indians, and role of the Bureau of Indian Affairs. M162P. Destruction and Survival of Indigenous Societies. (Formerly numbered C162P.) (Same as World Arts and Cultures M162P) Lecture, three hours. Prerequisite: course 9 or upper division standing or consent of instructor. Clarification of concepts and forms of destruction and survival; analyses directed to different processes threatening the institutions of a group and its survival. Exploration of current theories of ethnicnic and genocide for their relevance and validity. P/NP or letter grading.

M163. Women in Culture and Society. (Same as Women's Studies M163.) Lecture, three hours. Prerequisite: course 9. Systematic approach to study of sex roles from an anthropological perspective. Critical review of relevant theoretical issues supported by ethnographic material from traditional cultures and contemporary American society. Ms. Sacks

M164. The Afro-American Experience in the U.S. (Same as Afro-American Studies M164.) Prerequisites: Understanding the formation of Afro-African cultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of relevant theoretical concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans.

165. Demographic Problems in Nonindustrial Societies. Lecture, three hours. Prerequisite: course 9. Dynamic interaction between environment, cultural belief, social structure, and population in hunting and gathering, pastoral, horticultural, and agricultural societies. Principal theories of population change and current issues in population policy considered in light of the anthropological evidence. Ms. Levine

166. Urban Anthropology. Open to upper division majors in social sciences, and others with consent of instructor. Survey of urbanization throughout the world, with emphasis on issues of cultural and economic adaptation of nonurban migrants. Special focus on problems of rural-urban migration of ethnic minority groups and subsequent adaptation of them within the U.S. explored in terms of methods and perspectives of anthropology.

167P. Psychoanalysis and Anthropology. Lecture, three hours. Exploration of mutual relations between anthropology and psychoanalysis, considering both theory and method. History of and current developments in psychoanalysis, anthropological critiques of psychoanalytic theory and method, toward a cross-cultural psychoanalytic approach. Mr. Johnson

M168. Health in Culture and Society. (Same as Nursing M158.) Prerequisite: upper division standing. Examination of theories and methods of medical anthropology in relation to cross-cultural health systems, role networks, attitude and belief systems of the participants. Emphasis on interaction networks in health care systems.

169. Modernization in the Middle East. Lecture, three hours. Prerequisite: course 9 or consent of instructor. Exploration of how Middle Eastern Muslim societies have responded to contemporary Western challenges — political, economic, technological, cultural, and military. Critical examination of contrastive models of economic development and nation-building policies employed by Turkey, Egypt, Iran, and Saudi Arabia and their consequences for these countries and the region.

Regional Cultures

Africa

171. Civilization of Sub-Saharan Africa. Prerequisite: upper division standing or consent of instructor. Comprehensive overview of the sociocultural world of sub-Saharan Africa, interpreted as a broad cultural unit with its specific African configurations and as a plurality of civilizations, each based on a particular association of the environment (dry savanna, grassland, equatorial forest, highlands) with a dominant technique of acquisition/production (hunting/gathering, cereal's growing, cattle herding, commercial crops, industry).

North America

172P. North American Indian Cultures. Examination of American Indian cultures from early historic time to modern development.
172R. Cultures of the Pueblo Southwest. Lecture, three hours. Prerequisite: course 8 or 9 or upper division standing or consent of instructor. Survey of ethnography and ethnohistorical research of Pueblo Indians (Hopi, Zuni, Tanoan, and Keresan) and their immediate neighbors. Basic information on history, languages, social organization, and traditional cultural systems of these groups. Mr. Kroskrity

173T. Civilizations of East Asia. Lecture, three hours. General anthropological introduction to the closely linked civilizations of China, Korea, and Japan, providing a comprehensive survey of fundamental institutions such as family, state, and religion and assessing effects of urbanization and industrialization. Ms. Bray

174T. Ethnography of Hispanic Cultures in the U.S. Southwest. (Same as Chicano Studies M1 72T.) Lecture, three hours. Prerequisite: course 9 or consent of instructor. Introduction to past and contemporary civilizations and cultures of the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading.

175P. Models of Cultural Evolution. Lecture, two hours; discussion, one hour. Prerequisite: course 9 or equivalent. Introduction to Darwinian models of cultural evolution. How processes of cultural transmission and modification explain cultural variation in space and time. P/NP or letter grading.

175R. East Asian Archaeology. Lecture, three hours. Prerequisite: course 9 or consent of instructor. Technology, subsistence, material culture, settlement, and social organization of the early Holocene in Near East, Israel, Jordan, and Mesopotamia, with emphasis on connections with the Near East and the Balkans. Mr. Johnson

175S. Japan. Lecture, three hours. Prerequisite: course 9 or consent of instructor. Japan, a country with a long and varied history, rich in art and culture, and a notable recent political and economic development. Social structure, thought, religion, and art of the Japanese people. Mr. Read

176. Cultures of the Middle East. Lecture, three hours. Prerequisite: course 9 or consent of instructor. Unity and diversity of social institutions and cultural forms in the Arab countries of North Africa and the Near East, Israel, Turkey, Iran, and Afghanistan.

177. Cultures of the Pacific. Four major culture areas of Australia, Melanesia, Polynesia, and Micronesia. General geographical features, prehistory, and language distribution of the whole region. DISTINCTIVE sociocultural features of each culture area presented in context of their adaptive significance. Mr. Newman

Middle East

174. Ethnography of South American Indians. Introduction to ethnography of South American Indians, with special emphasis on Lowland South America. Survey of history and development of society in this world area and examination of exemplary cultures symptomatic of various levels of cultural achievement. Mr. Wilbert

175. Civilizations of the Civilization of South Asia. Introduction to understanding and appreciation of the peoples, cultures, and societies of the Philippines, Indonesia, Malaysia, Thailand, Burma, Laos, Cambodia, Malaysia, and Vietnam seen against the backdrop of physical and ecological environments. Use of slides and other media along with texts, lectures, and discussion.

Mr. Moerman

175Q. Civilizations of South Asia. Examination of civilizations of Sri Lanka, India, Pakistan, Bangladesh, and the Himalayan states. Ideational systems, social institutions, and techniques of production discussed in the framework of a few contemporary civilizations, each focused on a major religious tradition (Hinduism, Buddhism, and Islam).

Ms. Levine

175R. Civilizations of Inner Asia. Overview of culture and society among the diverse peoples of Inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic adaptation, politics and development, within the framework of recent national integration, kinship, forms of marriage and status of women, religion and the social order in Hindu-Buddhist culture contact zone, and current problems of modernization.

Mr. Levine

175S. Japan. Lecture, three hours. Prerequisite: course 9. Overview of contemporary Japanese society. General introduction; kinship; marriage and family life; social mobility and education; norms and values; religion; patterns of interpersonal relations; social deviance.

Mr. Read

182. History of Anthropology. Brief survey of development of Western social science, particularly anthropology, from Greek and Roman thought to emergence of the modern discipline in the late 19th century. "Foot paradigm" of Western social science and its influence on such notables as Durkheim, Freud, Hall, Lombraso, Marx, Piaget, Terman, and others. Consideration of how this influences ethnocentrism and Eurocentrism, sex, race, and perception of deviance, and our view of culture in general.

183. History of Archaeology. Prerequisite: at least one upper division archaeology course or consent of instructor. Development of modern discipline of archaeology from the Renaissance to the present, stressing how each of the major branches of archaeology has evolved a special character determined by peculiarities of its own data, methods, and intellectual affinities.

Mr. Sackett

184. History of Human Evolutionary Theory. The men, events, and spirit of the time which marked man's attempts to understand his origins and diversity.

185. History of Social Anthropology. Lecture, three hours. Prerequisites: 199A or equivalent. Methods of quantitative data analysis. Topics to be selected from linear regression analysis (univariate and multivariate), principal component analysis, discriminant analysis, cluster analysis, nonparametric, and logistic models. Emphasis on computer-based applications of data analysis techniques.

Mr. Read

186A. Quantitative Methods in Anthropology. (Not the same as course 186A prior to Fall Quarter 1989.) Lecture, three hours: discussion, one hour. Prerequisite: course 80 or equivalent. Methods of quantitative data analysis. Topics to be selected from linear regression analysis (univariate and multivariate), principal component analysis, discriminant analysis, cluster analysis, nonparametric, and logistic models. Emphasis on computer-based applications of data analysis techniques.

Mr. Read

186B. Models and Modeling in Anthropology. Prerequisite: upper division standing. Recommended: course 186A or equivalent. Study and reproduction of both individual and social structure viewpoints. Introduction to four groups of models, along with ethnographic examples — decision tree models, indifference curve and marginal cost models, adaptation and learning models, and information diffusion models.

Mr. Read

186P. Models of Cultural Evolution. Lecture, two hours; discussion, one hour. Prerequisite: course 9 or equivalent. Introduction to Darwinian models of cultural evolution. How processes of cultural transmission and modification explain cultural variation in space and time. P/NP or letter grading.

Special Studies

C191. Writing for Anthropology. (Formerly numbered 191.) Lecture, three hours. Prerequisite: course 9 or equivalent. Course designed for students who have completed the introductory anthropology course (199A). Emphasis on clear expression, research methods, and academic writing. Class projects require student writing and evaluation of professional writing. Emphasis on organization and presentation of a scholarly argument. Concurrently scheduled with course C291.

Mr. Earle, Ms. Levine

M197A. Introduction to Development Studies. (Same as Development Studies M100A.) Seminar, three hours. Prerequisite: some beginning experience in the social sciences at college level. Seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. Economic development and political changes. Mr. Nimmo

197H. Departmental Honors Seminar. Seminar, three hours. Prerequisites: 3.5 GPA in at least two upper division anthropology courses and eligibility for Letters and Science honors, or consent of instructor. Five discussion sessions dealing with major debates, questions, and issues in each of the departmental fields (social, cultural, biological, and linguistic anthropology, and archaeology). Discussion each week in seminar format of readings on a major topic.

199. Special Studies in Anthropology (2 to 8 units). Prerequisite: consent of instructor. May be applied toward upper division anthropology courses required for the major.

199A. Directed Studies for Honors. Discussion, three hours. Prerequisite: honors major in anthropology. Discussion meetings with advisor to help define research and preparation for the project. Extensive reading and research in the field of the proposed honors thesis. Project often involves summer fieldwork. Progress report (credit to be given only on completion of course 199HC).

199B. Directed Studies for Honors. Prerequisites: course 199A and honors major in anthropology, or consent of instructor. Must be taken in Fall Quarter of senior year of college level. Seminar for research directed toward analysis and presentation of data in a draft of honors thesis (no more than 30 pages). In Progress grading (credit to be given only on completion of course 199HC).
Graduate Courses

Admission to all graduate courses is subject to consent of instructor and completion of appropriate course requirements (when so indicated). Graduate courses are normally non-repetitive in content but may be repeated for credit with consent of instructor and graduate counselor.

M201A-M201B. Graduate Core Seminars in Archaeology (6 units each). (Formerly numbered M219A-M219B.) (Same as Archaeology M201A-M201B.) Seminar, three hours. Required of anthropology students in archaeology field. Seminar discussions based on carefully selected list of 30 to 40 major archaeological works. These core courses provide students with foundation in breadth of knowledge required by a professional archaeologist. Archaeological historiography, survey of world archaeology and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser.

202. Biological Anthropology Colloquium. (Formerly numbered 226.) Seminar, three hours. Selected topics on status of current research in biological anthropology. May be repeated for credit. S/U or letter grading.

210. Core Seminar: Sociocultural Anthropology. Seminar, three hours. Prerequisites: two courses from 130, 135A, 150, or equivalent, or consent of instructor. Essential concepts, theories, and methodologies of sociocultural anthropology. Reading of and critical discussion on a body of significant literature.

214. Core Seminar: Linguistic Anthropology. (Formerly numbered 240.) Seminar, three hours. Prerequisite: consent of instructor. Theoretical and methodological foundations of study of language structure and function. Emphasis on sociolinguistic topics. Discussion of linguistic, philosophical, psychological, and anthropological contributions to understanding of verbal communication as a social activity embedded in culture.

Mr. Duranti, Mr. Koskity

212R. Problems in Oceanic Archaeology. Lecture, three hours. Prerequisite: consent of instructor. Prehistory of Oceania. Content may vary, but problems of early settlement, gradient of cultural development (sociopolitical, religious, ecological), adaptation, island adaptation, and evolution of social stratification. May be repeated for credit.

Mr. Earle

212S. Special Topics in Archaeology (6 units). (Same as Archaeology M265.) Lecture, three hours. Prerequisite: graduate standing in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavations projects, regional synthesis, or persons on a worldwide basis, including current work by core faculty of the program and special visitors.

213. Selected Topics in Old World Archaeology. Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit. Mr. Sackett

214. Selected Topics in Prehistoric Civilizations of the New World. Prerequisite: consent of instructor. Mesolithic and Andean civilizations now constitute major focus of seminar. May be repeated for credit.

215. Field Training in Archaeology (4 to 8 units). Prerequisite: prior experience in archaeology. Advanced training in archaeological excavation techniques, including organization of projects, supervision of field crews, writing of field reports, and preliminary analysis of field data. May be repeated for credit.

Mr. Meighan

216. Dating Techniques in Environmental Sciences and Archaeology. (Same as Geography M266.) Lecture, three hours. Prerequisite: consent of instructor. Colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit. Mr. Hill

217. Explanation of Societal Change. Prerequisite: consent of instructor. Examination of processes of societal evolution, emphasizing usefulness of a variety of explanatory models from general systems theory, ecology, ethnography, and other sources. Specific research questions vary with each course offering. May be repeated for credit.

Mr. Catt

218. Style and Ethnicity. Seminar, three hours. Prerequisite: consent of instructor. How stylistic variation in material culture informs us about past societies, with an emphasis on the role of economic forces and social processes. Students are encouraged to approach this topic in terms of theoretical frameworks from ethnography, history, and archaeology.

Mr. Sackett

219. Complex Hunters-Gatherers in Theoretical Perspective. Seminar, three hours. Prerequisite: consent of instructor. Examination of economic, political, and social foundations of complex hunter-gatherer societies, with an emphasis on the emergence of complex social organization and recognition of complex middle-range societies in the archaeological record. Role of craft specialization in cultural evolution. S/U or letter grading.

Ms. Arnold

220. Current Problems in Biological Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Detailed examination of current research in biological anthropology (specific topics to be announced). Emphasis on nature of hypotheses and their testing in ongoing student and faculty research. May be repeated for credit.

221A-221C. Fossil Evidence for Human Evolution. Prerequisite: consent of instructor. Examination and analysis of fossil evidence for man's evolution.

Mr. Kennedy

222. Population Genetics of Man. Lecture, three hours. Prerequisite: consent of instructor. Introductory course in statistics. Study of population concepts, probability, conditions of gene frequency equilibrium, and factors causing gene frequency change.

Mr. Muller

222G. Probability Models and Statistical Methods in Genetics. (Formerly numbered M222G.) Lecture, three hours. Prerequisites: course 222P, Mathematics 3A, and consent of instructor. Introduction to probability models and statistical methods in genetics. Maximum likelihood methods for estimated genetic parameters introduced and discussed in class.

Mr. Read (W)

222R. Applied Genetic Modeling. (Same as Biometrics M207B.) Lecture, three hours; discussion, one hour. Prerequisites: course 222Q and graduate standing, or consent of instructor. Methods of computer-oriented genetic analysis. Topics include selection, the standardization of mode, performance (quantitative) methods, and population structure. Includes laboratory for hands-on computer analysis of genetic data; laboratory reports required.

223. Roots of Human Behavior. Lecture, three hours. Prerequisite: consent of instructor. Examination of behavior of living nonhuman primates and of evolution and biological basis of human behavior. May be repeated for credit.

223P. Biology and Ecology of Foraging Peoples. Prerequisite: consent of instructor. Detailed discussions of topical issues in study of foraging societies, including perspectives of cultural ecology and ethnography, emphasis on theoretical and practical topics in human ecology and biology, including health and nutrition, growth and development, life history variables, foraging, and sex differences.

Mr. Bailey

224. Selected Topics in Field Training in Biological Anthropology. Prerequisite: consent of instructor. Examination of current hypotheses in student and faculty field research. Emphasis on new approaches to field and field-oriented laboratory investigations of primatology, behavior, anatomy, physiology, evolution (specific topics to be announced). May be repeated for credit.

225. Analysis of Biological Anthropology Field Data. Prerequisite: course 224 or other field training course, four units. Prerequisites: consent of instructor. Examination of specific techniques and theoretical and methodological aspects of research on wild primates from planning and expedition through final data analysis (discussion topics to be announced). May be repeated for credit.

226. Primate Paleobiology. Lecture, 90 minutes; laboratory, 90 minutes. Prerequisite: course 121A or 127P or consent of instructor. Examination of how the fossil record of primate species can be reconstructed by comparative methods in primate anatomy. Emphasis on strategies for examining distinct and homologous features and on quantitative methods for inferring diet, locomotion, body size, and habitat and diet of extinct primates. S/U or letter grading. Mr. Rasmussen

228. Ecology of Human Reproduction. Seminar, three hours. Prerequisites: graduate standing, and instructor consent. Critical current examination of research concerning responsiveness of the human reproductive system to a wide variety of behavioral and ecological influences, including stress, exercise, nutrition, and disease. Intercourse of reproductive hormones on human behavior. Evolutionary and cross-cultural perspectives. S/U or letter grading. Ms. Peacock

M229A. Seminar: Human Behavioral Ecology. (Same as Education M281A and Psychiatry M279A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence, settlement patterns and technology, and human social organization. Examination of techniques for reducing human mortality. Comparison with other economic and ecological approaches in anthropology.

Mr. Blurton Jones

M229B. Seminar: Reproduction, Families, and Parenting. (Same as Education M281B and Psychiatry M279B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and interaction of perspectives from social and biological sciences. Mr. Blurton Jones
229C. Seminar: Selected Topics In Human Ethology. (Same as Education M281C and Psychiatry M279C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation: developing ethological and ethnographic studies; adaptation; evolutionary origins. Mr. Burton Jones

Cultural Anthropology

230P. Ethnology. Prerequisite: consent of instructor. Seminar on ethnological method and theory concentrating on ideational systems. May be repeated for credit. Mr. Wilbert

230O. Cultural Anthropology. Prerequisite: consent of instructor. Special problems in cultural anthropology. May be repeated for credit. Mr. Goldschmidt

231. Asian Americans: Personality and Identity. Prerequisite: graduate standing. Effect of class, caste, and race on the Asian American personality within the framework of anthropological theories.

232. Cultural and Psychological Aspects of Rites of Passage. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Examination of rites of passage from both sociocultural and psychological perspectives. Exploration of general aspects (those common to rites of passage in general) as well as specific aspects (e.g., of puberty rites, rites of a religious nature, etc.) as examples of early anthropological literature on the subject and more recent formulations. S/U or letter grading.

232P. Cultural Models of Thought. (Same as Psychiatry M212.) Lecture, three hours. Prerequisite: consent of instructor. Examination of the influence of culture on learning, perception, thinking, and intelligence. Fields of cross-cultural psychology, in addition to cognitive anthropology. Focus on learning and thinking in non-Western cultures, including problems of education in ethnic areas within the U.S. Mr. Price-Williams

232Q. Myth and Ritual. Prerequisite: consent of instructor. Nature and function of myth and ritual in nonindustrialized societies. Associated value systems and philosophies examined as infrastructure of culture rather than as phenomena proposed by structuralists. Consequently, structuralist rationalism and cultural material empiricism. May be repeated for credit.

Mr. Newman, Mr. Wilbert

232R. South American Folklore and Mythology Studies. (Same as Folklore M257.) Prerequisite: course 174P or consent of instructor. Examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people. Mr. Wilbert

232S. Ethnography of Humor. (Same as Folklore M214.) Lecture, three hours. Prerequisite: graduate standing in folkloristics and/or anthropology. Examination and analysis of selected humoristic expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

227. Person, Self, and Identity in Contemporary Anthropology. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Survey of anthropological literature on person, self, and identity. Conceptual and theoretical relationships among these themes and their development in contemporary ethnography. S/U or letter grading.

22U. Issues in Anthropology of Emotion. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Issues and problems in anthropological study of emotion, with emphasis on emotions as a cultural expression of culture shaping emotional experience and expression in everyday contexts and in ritual and ways in which concepts of emotion vary cross-culturally. S/U or letter grading.

232V. Current Issues in Ethnography. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. S/U or letter grading. Mr. Moerman

233P. Symbolic Anthropology. Prerequisite: course 133R or consent of instructor. Nature of symbolic relations (as distinguished from other referential ones), significance of symbolic systems (in terms of action, cognition, affect, and representation), and non-Western symbolic and isomorphic logic (as opposed to the causal one) are among questions to be selected for analysis and discussion. May be repeated for credit.

233Q. Aesthetic Anthropology. Prerequisite: course 133R or consent of instructor. Selected questions concerning visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit.

234. Seminar in Psychocultural Studies. (Formerly numbered M234A-M234B.) (Same as Psychiatry M210.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychology, transcultural psychiatry, deviance, learning, perception, and evaluation, and psychocultural perspectives on change.

Mr. Edgerton, Mr. Price-Williams

234P. Transcultural Psychiatry. (Same as Psychiatry M222.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, divinace, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit.

Mr. Kennedy

234Q. Psychological Anthropology. (Same as Psychiatry M272.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

Mr. Edgerton

234R. Sociocultural Perspectives on Mental Retardation. (Same as Psychiatry M211.) Lecture, three hours. Prerequisite: consent of instructor. Exploration of concepts such as "intelligence," "competence," and "adaptive behavior" in varying non-Western societies as background to study of the phenomenon of mental retardation in the West, particularly the U.S. Topics include cross-cultural history of institutional confinement, policies of deinstitutionalization and normalization, and current issues involving adaptation and "quality of life." Discussion of topics such as communicative competence, work, crime, deviance, sexuality, and marriage. May be repeated for credit.

Mr. Edgerton

236P. Selected Topics in Cross-Cultural Study of Socialization and Childhood. (Same as Psychiatry M214.) Lecture, three hours. Prerequisite: consent of instructor. Methods, ethnographic data, and theoretical discussions of current issues in cross-cultural analysis. May be repeated for credit. Mr. Weisner

236Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Education M222A, Psychiatry M235, and Psychology M235.) Prerequisite: consent of instructor. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations in research and for research on social sciences. Students expected to integrate observational work into their current research interests.

Mr. Levine, Mr. Weisner (W)

237A-M237B. Basic Core Courses in Mental Retardation Research (2 units each). (Same as Psychiatry M218A-M218B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Required of all MRRC trainees. Systematic overview of mental retardation and sciences basic to this field of study. Language, methods, aims, and contributions of various disciplines that contribute to the field. Last two weeks of second term are spent discussing and preparing multidisciplinary research designs with potential for prevention or amelioration of mental retardation. S/U or letter grading.

238. Evolution of Technology Lecture, three hours. Description, analysis, and interpretation of technological developments from the time material culture originated to the Industrial Revolution. S/U or letter grading.

239. Selected Topics in Field Training in Ethnography (4 to 8 units). Prerequisite: consent of instructor. Supervised collection of ethnographic information in the field. Students spend full time in the field for most of term.

240. Analysis of Field Data. Prerequisite: course 239P or other field training course. Supervised analysis of ethnographic materials by students who have participated in a related field training course. Students work with their own as well as general project data under supervision of professional journals. May be repeated for credit.

Linguistic Anthropology

M241. Topics In Linguistic Anthropology. (Same as Linguistics M246C.) Prerequisite: consent of instructor. Problems in relations of language, culture, and self. May be repeated for credit.

242. Ethnography of Communication. Prerequisite: graduate standing or consent of instructor. Seminar devoted to examining representative scholarship from fields of sociolinguistics and ethnography of communication. Particular attention to theoretical developments including relationship of ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical focus include style and strategy, speech variation, varieties of noncasual speech genres, languages and ethnicity, and nonverbal communication behavior.

Mr. Duranti, Mr. Kroskrity

243P. American Indian Linguistics and Sociolinguistics. Prerequisites: prior coursework in either American Indian studies, consent of instructor. Social and cultural aspects of language use in Native North American speech communities. Specific focus include both micro-sociolinguists topics (such as multilingualism, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistics topics (such as language contact, language change, and language in American Indian education). Graduate students conduct library and/or other research and participate in group discussion. Mr. Kroskrity

243Q. Afro-American Sociolinguistics: Black English. (Formerly numbered CM243Q.) (Same as African American Studies M236.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority speech variations from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.
245. Linguistic and Intracultural Variation. Prerequisite: consent of instructor. Problem of variation as it impinges on disciplines of anthropology and linguistics. Among objectives of course are the following: to acknowledge importance of speech variation in anthropological linguistics research, to critically assess a broad and representative sample of modern scholarship on language and to individual and interindividual variation, and to evaluate utility and potential applicability of recent linguistic models to anthropological linguistics and anthropological theory.

246. Research Design and Field Training in Linguistic Anthropology. Prerequisite: consent of instructor. Supervised collection of linguistic information in the field. Students spend full time in the field for most of term. May be repeated for credit. S/U or letter grading.

247. Analysis of Linguistic Field Data. Prerequisite: course 246 or other field training course or consent of instructor. Supervised analysis of linguistic field data by students who have participated in a related field training course. Students work with their own as well as general project data in preparation of articles for professional journals. May be repeated for credit. S/U or letter grading.

248. Practicum in a Field Language (4 to 6 units). Prerequisite: consent of instructor. Intensive training in an indigenous language as preparation for work in the field.

249. Social Interaction. Formerly numbered 257.) Prerequisite: consent of instructor. Emphasis on issues for ethnographic theory and practice raised by developments in anthropological, sociological, psychological, linguistic, and ethnological contributions to our understanding of organization of face-to-face behavior. May be repeated for credit.

250. Selected Topics in Social Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Intensive examination of current theoretical views and literature. S/U or letter grading.

251P. Cultural Ecology. Prerequisite: consent of instructor. May be repeated for credit.

252P. Comparative Systems of Social Inequality. Seminar, three hours. Examination in historical and contemporary perspective of particular systems of stratification, including class, caste, ethnicity, gender, age, sexual preference, handicap, etc., to develop a unified theory of social inequality. Examples from Asian, Pacific, European, African, and American cultures. S/U or letter grading.

253. Economic Anthropology. Prerequisite: consent of instructor. May be repeated for credit.

253P. Technology and Economy. Seminar, three hours. Prerequisite: consent of instructor. Analysis of technological systems and patterns of technical evolution in context of corresponding social and economic change (e.g., in labor organization, kinship, property rights), using examples mainly from Asian peasant societies, past and present. S/U or letter grading.

254. Kinship. Prerequisite: consent of instructor. May be repeated for credit.

255. Comparative Political Institutions. Prerequisite: consent of instructor. May be repeated for credit.

259. Cultural Ecology of Nomadic Pastoral Societies. Seminar, three hours. Prerequisite: upper division standing. Examination of nomadic pastoralism both as a form of subsistence and economic strategy, and as a mode of sociopolitical adaptation to ecologically marginal and sociopolitically heterogeneous regions of Asia and Africa.

Applied Anthropology

260. Urban Anthropology. Prerequisite: course 167 or consent of instructor. Intensive anthropological examination of the urban setting as a human environment.

261P. Issues in Development Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Examination of selected problems in Third World economic development, covering such topics as technological innovation and culture change, economic modernization, health, education and labor, training, population, housing and urbanization promotion of local participation, migration and refugee resettlement, and rights of national minorities. Consideration of career strategies in development anthropology.

261Q. Issues in Applied Anthropology. Seminar, three hours. Use of seminar format to explore selected domestic and international problems from applied anthropological perspective. Consideration of history of applied anthropology, ethics, and case histories.

262P. Culture and Human Reproduction. (Same as Community Health Sciences M276.) Lecture, two hours; discussion, two hours. Prerequisites: course 137A, Anthropology 171A, and course 247A, Epidemiology 112, consent of instructor. Exploration of human behavior related to reproduction. Cross-cultural exploration of biological and behavioral factors, with particular reference to human adaptability.

263P. Gender Systems. Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between gender, economy, ideological systems, and social inequality. Selection of ethnographic case studies from recent literature. S/U or letter grading.

263R. Medicine in Chinese Culture. Seminar, three hours. Prerequisite: consent of instructor. Use of the rich field material available from the expanding study of Chinese medicine to analyze social and symbolic complementarity of different therapeutic systems and current attempts at syncretization with Western biomedical sciences. S/U or letter grading.

265. Public Archaeology. Prerequisite: consent of instructor. Archaeology as part of the national heritage, both in the U.S. and other countries. Legal, ethical, cultural, and scholarly aspects of salvage and contact archaeology. Designed for researchers and managers of cultural resources. Mr. Meighan

266P. Medical Anthropology. (Same as Community Health Sciences M279H, Nursing M273, and Psychiatry M273.) Seminar, three hours. Prerequisite: consent of instructor. Limitation to 15 students. Examination of interrelationships between society, culture, ecology, health, and lifetanes. Bases for written critical analysis and class discussion provided through key theoretical works.

268. Cultures of the Pacific Islands. Prerequisite: consent of instructor. Topics in contemporary socio-cultural anthropology and classic ethnography of Melanesia, Polynesia, and Micronesia. May be repeated for credit.

269. Contemporary Issues of the American Indian. (Same as American Indian Studies M200C and Sociology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

Regional Cultures

272. Indians of South America. (Same as Latin American Studies M250A.) Lecture, three hours. Prerequisite: consent of instructor. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

273. Cultures of the Middle East. Prerequisite: consent of instructor. Course 176 or consent of instructor. Survey of literature and problems of various cultures of the Middle East.

274. Cultures of the Pacific Islands. Prerequisite: consent of instructor. Topics in contemporary socio-cultural anthropology and classic ethnography of Melanesia, Polynesia, and Micronesia. May be repeated for credit.

275. History, Theory, and Method

280. Anthropology Theory. Prerequisite: graduate standing in anthropology or consent of instructor. Range of theories that anthropologists have employed in describing and explaining variability in sociocultural phenomena. Organization of particular theories, as well as issues that separate divergent theoretical systems. Examination of selected theories of different theoretical perspectives. Major perspectives include evolutionism, cultural ecology, British functionalism, French functionalism, structuralism, cultural and personality, psychological anthropology (Freudian, non-Freudian), behavioral anthropology, cognitive anthropology, and ethnosemantics.

281. Selected Topics in History of Anthropology. Prerequisite: consent of instructor. Particular problems in history of anthropology as dictated by interests of students and faculty. May be repeated for credit.

282. Research Design in Cultural Anthropology. Prerequisite: consent of instructor. Primarily intended for graduate students preparing for fieldwork. Unique position of anthropology among the sciences and retesting problems for scientific research design. Review of typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion.

M. Johnson
283. Mathematical Models in Anthropology. Prerequisite: consent of instructor. Current topics and issues in mathematical anthropology. Overview of a variety of mathematical approaches relevant to theory, systems theory, decision theory, Markov processes, etc.

Mr. Read

M284. Quantitative Research Methodology. (Same as Community Health Sciences M273.) Discussion, three hours; laboratory, one hour. Prerequisites: Biostatistics 100A, Community Health Sciences 125 or 181, one undergraduate or graduate social psychology, anthropology, or sociology course, consent of instructor. Intensive seminar-field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care.

Ms. Scrimshaw

M285. Schools, Domains, and Strategies in World Archaeology. Seminar, three hours. Prerequisite: consent of instructor. Comparative examination of schools of world archaeology, contrasting their respective data bases, research strategies, and relations to adjacent subfields. Anthropologists from all departments are welcome, as are students interested in history or philosophy of science.

Mr. Sackett

M286. Quantitative Methods in Anthropology. Laboratory, three hours. Prerequisites: Courses 186A, 186B, or equivalent, consent of instructor. Computer-aided methods of quantitative data analysis, including multivariate techniques, in context of student research designs.

Mr. Read

M286P. Selected Topics in Computer Simulation and Modeling. Seminar, three hours. Prerequisites: Courses 186A and 186B or equivalent or consent of instructor. Applications of computer simulation and/or models to specific problem areas of interest to anthropologists. Problem areas rotate with each offering and include cognitive ecological, demographic, evolutionary, and other theoretical foci. S/U or letter grading.

Mr. Read

M287. Poststructural Theories. Seminar, three hours. Prerequisites: graduate standing, consent of instructor. Examination of development and application of poststructural theories in anthropology by exploring interdisciplinary connections, especially as they concern the analysis of cultural discourse. Anthropographic writing, reflexivity, politics of representation, historicity, and study of the self, identity, and the body. S/U or letter grading.

M289. Computer Methodologies in Latin American Studies and Anthropology. (Same as Latin American Studies M225.) Lecture, three hours. Prerequisite: consent of instructor. Basic principles of computing and information processing, along with their potential application in Latin American research. Examination of impact that computers are having in Latin American society.

Mr. Behrens

C291. Writing for Anthropology. Lecture, three hours. Prerequisite: consent of instructor. Teaching of writing skills in various academic forms, including term papers, essay examinations, journal articles, and reports. Class projects require student writing and evaluation of professional writing. Emphasis on organization and presentation of a scholarly argument. Course currently scheduled as course C191. Graduate students expected to prepare a higher level of the scholarly research paper. S/U or letter grading.

Mr. Earle, Ms. Levine

292. Making Oral Presentations. Lecture/student presentations, two hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. How to organize and present seminar reports, papers at scholarly conferences, and lectures to professional audiences. Opportunity for students to develop their speaking skills through actual practice in workshop atmosphere of mutual support and constructive criticism. S/U grading.

Mr. Sackett

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

385. Teaching Anthropology (2 to 4 units). Seminar/workshop, three hours. Prerequisite: graduate standing. Required of all new teaching assistants. Workshop and seminar in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Four-day workshop precedes beginning of term, followed by 10-week seminar during term designed to deal with problems and techniques of teaching anthropology. Unit credit may be applied toward full-time equivalency but not toward nine-course requirement for M.A. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Undergraduate enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students (2 to 8 units). Prerequisite: consent of instructor. Directed individual studies. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units).

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: consent of instructor. Ph.D. dissertation research or writing. Students must have completed qualifying examinations and ordinarily take no other coursework.

Applied Linguistics (Interdepartmental)

3300A Rolfe Hall, (213) 206-1985

Professors

Roger W. Andersen, Ph.D. (Teaching English as a Second Language and Applied Linguistics)

Raimo A. Anttila, Ph.D. (Linguistics)

Lyle Bachman, Ph.D. (Teaching English as a Second Language and Applied Linguistics)

Russell N. Campbell, Ph.D. (Teaching English as a Second Language and Applied Linguistics)

Marianne Celce-Murcia, Ph.D. (Teaching English as a Second Language and Applied Linguistics; Distinguished Teaching Award)

Susan R. Curtiss, Ph.D. (Linguistics)

Victoria A. Fromkin, Ph.D. (Linguistics; Distinguished Teaching Award)

Bruce P. Hayes, Ph.D. (Linguistics)

Edward L. Keenan, Ph.D. (Linguistics)

Marji R. Kuno, M.A. (Linguistics)

Peter N. Ladefoged, Ph.D. (Phonetics; Distinguished Teaching Award)

Pamela L. Munro, Ph.D. (Linguistics)

Elinor Ochs, Ph.D. (Teaching English as a Second Language and Applied Linguistics)

John F. Povey, Ph.D. (Teaching English as a Second Language and Applied Linguistics)

Russell G. Schuh, Ph.D. (Linguistics)

Clifford H. Prator, Ph.D., Emeritus (Teaching English as a Second Language and Applied Linguistics)

Paul M. Schachter, Ph.D., Emeritus (Linguistics; Distinguished Teaching Award)

Associate Professors

George D. Bedell, Ph.D. (Linguistics)

Thomas J. Hinnebusch, Ph.D. (Linguistics)

Nina M. Hyams, Ph.D. (Linguistics)

Patricia A. Keating, Ph.D. (Linguistics; Distinguished Teaching Award)

Hilda J. Koopman, Ph.D. (Linguistics)

Earl J. Kod, Ph.D. (Teaching English as a Second Language and Applied Linguistics)

Dominique L. Sportiche, Ph.D. (Linguistics)

Edward P. Stabler, Ph.D. (Linguistics)

Donca Sterne, Ph.D. (Linguistics)

Timothy A. Stowell, Ph.D. (Linguistics)

Lecturers

Donna Brinton, M.A. (Teaching English as a Second Language and Applied Linguistics)

Janet Goodwin, M.A. (Teaching English as a Second Language and Applied Linguistics)

Christine Holten, M.A. (Teaching English as a Second Language and Applied Linguistics)

Linda Jensen, M.A. (Teaching English as a Second Language and Applied Linguistics)

Adjunct Associate Professor

Ian Maddieson, Ph.D. (Linguistics)

Adjunct Assistant Professor

Brian L. Lynch, Ph.D. (Teaching English as a Second Language and Applied Linguistics)

Scope and Objectives

Since language permeates every aspect of our social, economic, political, and academic pursuits, it is small wonder that we have deep abiding curiosity about its origin, its use, and its acquisition. The UCLA doctoral program in applied linguistics provides a rich and supportive environment for graduate students and faculty to define and resolve questions that satisfy that curiosity.

The combined faculties of the Department of Teaching English as a Second Language and Applied Linguistics and the Department of Linguistics, as well as professors in Psychology, Sociology, and Education, represent a wide range of expertise and experience in language-related research. Their guidance and collaboration with students as they apply relevant elements of linguistics, psycholinguistics, and sociolinguistics result in substantial research findings in the area of language use, education, acquisition, and analysis. Graduates of the program are well prepared to pursue academic and professional careers at the highest level of service and inquiry.
Foreign Language Requirement

Before advancement to candidacy, you must demonstrate proficiency in one foreign language. If your native language is English, you may fulfill the requirement by one of the following methods: (1) a reading examination, (2) a research paper based on extensive sources in the language, (3) a conversation examination showing knowledge in depth, or (4) a score of 550 or better on an Educational Testing Service (ETS) graduate examination. If your native language is not English, you may use English to fulfill the requirement. In consultation with the interdepartmental committee, you must select the most appropriate means of fulfilling the requirement.

Course Requirements

In addition to fulfilling the general University requirements, candidates for the Ph.D. in Applied Linguistics must meet the program requirements listed below. All courses taken to fulfill breadth and specialization requirements must be approved by your faculty adviser.

Basic Preparation — Any of the following courses not already taken must be completed as early as possible and before advancement to candidacy for the degree. For basic preparation in linguistics, you can select either a phonetics and phonology track or a syntax and semantics track. For both tracks, you must take Linguistics 120A and either Linguistics 120B, 127, or Teaching English as a Second Language and Applied Linguistics 122. Students selecting the phonetics and phonology track would then take Linguistics C165A/C200A, followed by Linguistics 201 or 203 or 204. Students selecting the syntax and semantics track would take Linguistics C165B/C200B, followed by one course from Linguistics 206, 207, 214, or 215. For basic preparation in TESL, you must take Teaching English as a Second Language and Applied Linguistics 241, 370, and 380. Course 370, which is organized as a general orientation to the ESL field, must be taken at UCLA. If you have taken courses equivalent to any of the remaining courses at another institution, you are not required to take them at UCLA. If you have at least two years of experience in teaching a second language, you may be exempt from course 380.

Units and Courses — As a breadth requirement, all candidates must take at least 32 units of graduate-level coursework (in the 200 or 500 series). These 32 units may not include courses taken while completing basic preparation courses, Linguistics 275, Teaching English as a Second Language and Applied Linguistics 400, or Applied Linguistics 597 or 599. No more than eight of the 32 units may be in 596 courses, and these should be in Applied Linguistics 596, if possible. The 32 units (eight courses) must include at least two courses in each of the specializations of language analysis and language education, as well as two courses in either language acquisition or language use. (At least one of the language analysis breadth courses must be taken in the Linguistics Department. None of the aforementioned six courses may be 596 courses taken in departments other than Linguistics or Teaching English as a Second Language and Applied Linguistics.) An additional two courses are required in the specialization in which the dissertation research will be done. Thus, a student who opted for a dissertation in language acquisition would take a minimum of four courses in that area, plus two in language analysis and two in language education.

Appropriate graduate courses taken at UCLA after completion of the M.A. but before admission to the doctoral program may be applied toward the eight-course requirement for the Ph.D. Credit may be transferred for up to two courses taken at another institution, but only for graduate-level courses taken after completion of the M.A. and preferably taken within the framework of UCLA's Applied Linguistics 501.

Within Graduate Division limits, courses that may be taken on an S/U basis include undergraduate courses taken as prerequisites to needed graduate courses, undergraduate courses not required, reading courses in a foreign language, graduate courses taken in addition to the required 32 units, Applied Linguistics 501, 597, 599, Teaching English as a Second Language and Applied Linguistics 400, and Linguistics 275. All other courses must be taken for letter grades.

Specialization Core Courses — The following are required core courses for each of the four specializations: language acquisition — Teaching English as a Second Language and Applied Linguistics 280, 261; language analysis — minimum of two courses taken in the Linguistics Department; language education — any of Teaching English as a Second Language and Applied Linguistics courses on the approved list for the curriculum and instruction subspecialization, courses 209 and 222 for the testing and research design subspecialization; language use — Teaching English as a Second Language and Applied Linguistics 280 and 281 for language policy, course 283 for discourse.

Research Papers

In lieu of a written qualifying examination, two original research papers of publishable quality in different areas of specialization are required. These may be revised or extended seminar papers but must be prepared after admission to the Ph.D. program. The topics of these papers are to be selected by the student, in consultation with appropriate faculty members and with consent of the Ph.D. program adviser. Each of the finished papers is evaluated by two faculty members.

The doctoral committee administers the University Oral Qualifying Examination before advancement to Ph.D. candidacy.
Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination
All candidates are required to prepare a dissertation as a demonstration of their ability to carry out original research under the guidance of their doctoral committee. As the dissertation nears completion, you must make a public report on the results of your research. This may be done, at your choice, at a meeting of the colloquium of either the Department of Teaching English as a Second Language and Applied Linguistics or the Department of Linguistics. You must, therefore, enroll in either Teaching English as a Second Language and Applied Linguistics 400 or Linguistics 275 during the appropriate term. The public report determines whether a final oral examination is required.

Graduate Courses

591. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA program adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading. (F,W,Sp)

596. Directed Individual Study (4 to 8 units). Prerequisite: doctoral standing. Independent study in an area of applied linguistics. Up to eight units may be applied toward Ph.D. course requirements. May be repeated for credit. (F,W,Sp)

597. Preparation for Ph.D. Candidacy Examination (4 to 8 units). Prerequisite: completion of at least six courses of the 32-unit requirement for Ph.D. May not be applied toward the 32-unit requirement. May be repeated for credit. S/U grading. (F,W,Sp)

598. Research for and Preparation of Ph.D. Dissertation (4 to 16 units). Prerequisite: advancement to Ph.D. candidacy. Required of all Ph.D. candidates each term they are registered and engaged in dissertation preparation. May be repeated for credit but may not be applied toward Ph.D. course requirements. S/U grading. (F,W,Sp)

Applied Linguistics Course List

Language Acquisition
Linguistics 213. Survey of Psycholinguistics
C235. Theoretical Issues in Disorders of Language Development
254. Topics in Linguistics I: Proseminar
259A, 259B. Topics in Linguistics II: Proseminar
264A-264B-264C. Seminars in Special Topics in Linguistic Theory
251. Advanced Seminar in Interlanguage Analysis
260. Psycholinguistics and Language Teaching
261. Second Language Acquisition
269. Current Issues in Language Acquisition
271. Cross-Linguistic Topics in Second Language Acquisition

Additional Courses in Other Departments
Education 217D. Language Development and Education
227B. Research on Cognitive and Language Characteristics of Exceptional Individuals
Psychiatry 257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders
Psychology 240A-240B. Developmental Psychology
242F. Seminar in Developmental Psychology: Development of Language and Communication
260A-260B-260C. Proseminars in Cognitive Psychology
262. Human Learning and Memory
263. Psycholinguistics
268D. Seminar in Human Information Processing: Language and Thought

Language Analysis
English 241. Studies in Structure of the English Language
Linguistics 201. Survey of Current Issues in Phonological Theory
202. Survey of Current Issues in Language Change
203. Survey of Phonetic Theory
204. Survey of Experimental Phonetics
205. Survey of Current Issues in Morphological Theory
206. Survey of Current Issues in Syntactic Theory
207. Survey of Formal Semantics
209. Survey of Natural Language Processing
210A, 210B. Field Methods I, II
214. Survey of Current Syntactic Theories
215. Survey of Syntactic Typology
220. Linguistic Areas
225. Linguistic Structures
251. Topics in Phonetics and Phonology I: Proseminar
252. Topics in Syntax and Semantics I: Proseminar
253. Topics in Language Variation I: Proseminar
254. Topics in Linguistics I: Proseminar
256A, 256B. Topics in Phonetics and Phonology II: Proseminar
257A-257B. Topics in Syntax and Semantics II: Proseminar
258A, 258B. Topics in Language Variation II: Proseminar
259A, 259B. Topics in Linguistics II: Proseminar
Teaching English as a Second Language and Applied Linguistics 249. Current Issues in Language Analysis
250. Advanced Seminar in Cohesion Analysis of English Structure
252. Advanced Seminar in Contextual Analysis of English Structure
283. Discourse Analysis

Additional Courses in Other Departments
Dutch (Germanic Languages) 234. Structure of Modern Standard Dutch
Spanish (Spanish and Portuguese) 256A-256B. Studies in Spanish Linguistics

Language Education
Curriculum and Instruction
Teaching English as a Second Language and Applied Linguistics 220. Materials Development for Language Teaching
221. Media for Language Teaching
223. Role of English as a Second Language in Bilingual Education
M224. Teaching of English for Minority Groups
225. Program Evaluation in Applied Linguistics
227. Experiential Seminar in Second Language Learning
229. Current Issues in Language Education
264. English for Specific Purposes

Additional Courses in Other Departments
Education 262B. Seminar: Reading
262F. Seminar: Research Topics in Bilingual/Multicultural Education

Testing and Research Design
222. Language Testing for Teachers of English as a Second Language
223. Advanced Seminar in Construction and Administration of Language Tests

Additional Courses in Other Departments
Education 210B. Statistical Inference (courses 210B through 210D are highly recommended for statistical background, but only one may be applied toward the eight-course requirement)
210C. Analysis of Variance
210D. Multivariate Analysis
211C. Item Response Theory
218A. Multiple Regression Analysis
M222A. Laboratory for Naturalistic Observations: Developing Skills and Techniques (courses M222A through 222C are highly recommended for qualitative research background, but only one may be applied toward the eight-course requirement)
222B. Design Issues in Naturalistic Research
222C. Qualitative Data Reduction and Analysis

Language Use
Linguistics 253. Topics in Language Variation I: Proseminar
254. Topics in Linguistics I: Proseminar
258A, 258B. Topics in Language Variation II: Proseminar
259A, 259B. Topics in Linguistics II: Proseminar
263A-263B-263C. Seminars in Language Variation (only one of these may be applied toward the eight-course requirement)
Teaching English as a Second Language and Applied Linguistics 223. Role of English as a Second Language in Bilingual Education
280. Language Policy in Developing Countries
281. Language Policy in the U.S.
282. Intercultural Communication and Teaching of English as a Second Language
283. Discourse Analysis
M285. Studies in African Literature in English
289. Current Issues in Language Use

Additional Courses in Other Departments
Anthropology 204. Core Seminar: Linguistic Anthropology
M234Q. Psychological Anthropology
242. Ethnography of Communication
245. Linguistic and Intracultural Variation
249. Social Interaction
Education 204D. Minority Education in Cross-Cultural Perspective
Sociology C244A, C244B. Conversational Structures I, II
266. Selected Problems in Analysis of Conversation
267. Selected Problems in Communication
Spanish (Spanish and Portuguese) 209. Dialectology
257. Studies in Dialectology
Archaeology
(Interdepartmental)

A148 Fowler Building, (213) 825-4169

Professors
C. Rainer Berger, Ph.D. (Anthropology, Geography, Geophysics), Chair
Francesca Bray, Ph.D., Acting (Anthropology)
Giorgio Buccellati, Ph.D. (Ancient Near East, History)
Elizabeth Carter, Ph.D. (Near Eastern Languages and Cultures)
Christopher B. Donnan, Ph.D. (Anthropology)
Susan B. Downey, Ph.D. (Art History)
Timothy Earle, Ph.D. (Anthropology)
James N. Hill, Ph.D. (Anthropology)
Richard Janko, Ph.D. (Classics)
Cecilia F. Klein, Ph.D. (Art History)
Antonio Loprieno, Dr.phil.habil. (Near Eastern Languages and Cultures)
Henry B. Nicholson, Ph.D. (Anthropology)
Merrick Posansky, Ph.D. (History, Anthropology)
Donald A. Preziosi, Ph.D. (Art History)
Dwight Read, Ph.D. (Anthropology)
James R. Sackett, Ph.D. (Anthropology)
Marija Gimbutas, Ph.D., Emerita (Slavic Languages and Literatures, European Archaeology)
Kan Lao, B.A., Emeritus (East Asian Languages and Cultures)
Wendell H. Osawalt, Ph.D., Emeritus (Anthropology)
Katharina Otz-Dorn, Ph.D., Emerita (Art History)
Richard C. Rudolph, Ph.D., Emeritus (East Asian Languages and Cultures)

Associate Professors
Irene A. Birman, Ph.D. (Art History)
Jesse L. Byock, Ph.D. (Germanic Languages)
Hung-Ishiang Chou, Ph.D. (East Asian Languages and Cultures)
Bernard D. Frischer, Ph.D. (Classics)
Gail E. Kennedy, Ph.D. (Anthropology)
William Klemmer, Jr., Ph.D. (Materials Science and Engineering, Archaeological Sciences)
Lattimore, Ph.D. (Classics)
Donald F. McCallum, Ph.D. (Art History)
Sarah P. Morris, Ph.D. (Classics)
Joseph F. Nagy, Ph.D. (English, Folklore and Mythology)

Assistant Professors
Jeanne Arnold, Ph.D., in Residence (Anthropology)
Robert C. Bailey, Ph.D. (Anthropology)
Robert L. Brown, Ph.D. (Art History)

Adjunct Professor
Gerard Reichei-Dolmatoff, Ph.D. (Anthropology)

Scope and Objectives

The interdisciplinary program offers M.A. and Ph.D. degrees in Archaeology. It brings together interests and specialties represented by those departments offering courses in archaeology, as well as others offering courses relevant to archaeology. Qualified undergraduates may enroll in courses offered by the program provided they receive consent of the instructor.

The primary purpose of the program is to train scholars in archaeology for university-level teaching and research and other professional aims. Its resources are intended for those archaeology students whose academic goals cannot be met within a single department and who, consequently, require an individually designed plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, geology, mathematics, statistics, zoology, etc.). There are opportunities for participation in a variety of field, laboratory, and computer studies on a worldwide scale.

Requirements for Graduate Degrees

Admission

Any undergraduate major may be considered for admission to the program although those applicants who have had little previous archaeological education may be admitted under probationary status and may be required to take a series of courses to make up deficiencies. A Graduate Record Examination (GRE) General Test report is required. The following application materials should be submitted directly to the chair of the program: an acceptable plan of study (including a statement of objectives, an outline of projected coursework, and a general indication of an M.A. paper or dissertation topic); three letters of recommendation; a research paper preferably relevant to archaeology or comparable evidence of scholarly work. Applicants are accepted for admission to Fall Quarter only. The program’s “Study Guidelines” brochure will be sent to applicants on request to the Chair, Archaeology Program, A148 Fowler Building, UCLA, Los Angeles, CA 90024-1526.

Major Fields or Subdisciplines

Africa; analysis of archaeological materials; ancient Near East; Andean South America; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; Europe; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Fieldwork

No graduate degree is awarded until you have worked in the field and have demonstrated your competency to direct field research in archaeology. Both theoretical and practical knowledge of methods and techniques used in the field are necessary. This requirement may be met in several ways. Ordinarily you take a regular UCLA field course such as Anthropology 115P, Archaeology 259, Ancient Near East 261, or History 276, or similar courses offered by other departments. Comparable courses offered by other institutions may also be accepted. An informal report, submitted by the director of an excavation, describing work performed by the students under supervision, may be sufficient. Excepting the four courses listed above, any given formula to fulfill the requirement must be cleared in advance with the chair of the program.

Master of Arts Degree

The structure of the M.A. program includes the successful completion, within seven academic terms, of fieldwork (described above) plus the following requirements.

Foreign Language Requirement

The ability to read at least one modern foreign language, relevant to your field of interest and approved by your advisor, is required for the M.A. You may meet this requirement by (1) passing an examination administered by the Educational Testing Service (ETS) with a score of 500 or better, (2) completing the third course in an introductory, regular sequence of the selected language at UCLA with a minimum grade of A, or (3) taking a reading examination (in Spanish, French, or German) administered by the program.

The foreign language requirement must be completed by the end of your sixth term in residence, unless an earlier deadline is imposed by your adviser.

Course Requirements

A minimum of 42 units (at least nine courses, of which five must be graduate) taken for a letter grade are required, to be distributed as follows: a minimum of five courses (26 units) in the 200 and 500 series, including Archaeology 200 (six units), M201A-M201B (six units each), and two elective graduate courses*, one of which may be course 596. Course 596 (letter-graded) may be taken twice for a maximum of 12 units, but only six units may be applied toward the minimum graduate course requirement. Four upper division elective courses* (a minimum of 16 units, excluding 199s) are also required.

Comprehensive Examination Plan

You are required to take a comprehensive core examination during your third term in residence. This written examination is based largely on a reading list which has been the focus of the seminar discussions in Archaeology M201A-M201B. The examination is graded high pass, pass, or no pass and may be repeated once.

*Of the six combined elective courses, no more than four may be offered by the same department. At least one must be outside your sphere of regional interest to be selected from a pool of eligible courses by your adviser.
M.A. Paper
A master's-level research paper, normally no longer than 20 to 35 pages and graded by the three members of the M.A. committee, is to be submitted to the chair of the program by the end of the third week of the seventh term.

Ph.D. Degree
Admission
Completion of a master's program is required. Applicants who do not have a UCLA M.A. in Archaeology should refer to the admission section under "Requirements for Graduate Degrees" above. Admission to the doctoral program for students completing a UCLA M.A. in Archaeology is based on written recommendation by all three members of the M.A. committee and at least a high pass on either the M.A. core examination or the M.A. paper.

Doctoral students entering the program with an M.A. from another university are required to pass the comprehensive core examination (see "Master of Arts Degree") unless they can demonstrate to the chair and the members of the admissions committee that the examination should be waived.

Foreign Language Requirement
Reading competence in two modern foreign languages relevant to your interests is normally required and may be demonstrated as outlined for the master's degree.

Course Requirements
You must be enrolled in a minimum of 12 units per term. Archaeology 200 is required. There are no other restrictions or requirements concerning courses.

Qualifying Examinations
By the end of your fourth term in the doctoral program, after the foreign language requirement has been fulfilled, you must take a written qualifying examination in the following three areas: (1) topical specialization, (2) analytical theory, method, and technique, and (3) regional/cultural history. If you pass this examination, you may then make arrangements to take the oral examination. If the written examination or any portion thereof is failed, you may make one further attempt if your committee deems it appropriate.

The University Oral Qualifying Examination must be taken by the end of your sixth term in the doctoral program. You are required to submit to the doctoral committee a formal dissertation proposal (of about 10 pages), including the particular research problem on which you will be examined during the oral qualifying examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination may be waived by your doctoral committee.

Upper Division Course

C110. Archaeological Materials Identification and Characterization (6 units). Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C210.

Graduate Courses

200. Archaeology Colloquium (1 to 6 units). Discussion, two hours. Prerequisite: archaeology major or consent of instructor. Required of all students. Development of archaeology as a discipline. Major intellectual trends and current issues in archaeology. Scientific and methodological issues, excavation projects, relationships between archaeologists from different academic departments. May be repeated for credit but may be applied only twice toward departmental M.A. requirements. S/U grading only for students enrolled for one unit.

M201A-M201B. Graduate Core Seminars in Archaeology (6 units each). (Same as Anthropology M201A-M201B.) Seminar, three hours. Required of all M.A. students. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. Three compulsory core seminars provide students with foundation in breadth of knowledge required by a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser.

M205. Special Topics in Archaeology (6 units). (Formerly numbered 205.) (Same as Anthropology M212S.) Lecture, three hours. Prerequisite: graduate standing in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors.

M210. Archaeological Materials Identification and Characterization (6 units). Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C110.

M213. Archaeological and Paleontological Applications of Stable Isotopes (6 units). (Same as Earth and Space Sciences M213.) Lecture, three hours. Application of natural variations in stable isotope ratios in fossilized biological and nonbiological materials to a variety of archaeological and paleontological problems. Topics include basis for isotope distributions in archaeological and paleontological materials; analytical procedures for measuring isotopic ratios; dietary reconstruction; paleoclimatic analysis; determination of provenience of archaeological materials; analysis of aspects of biochemistry and physiology of fossil animals.

259. Fieldwork in Archaeology (2 to 12 units). Prerequisite: consent of instructor. Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. Minimum of one month of field time away from campus is required. May be repeated for credit with consent of adviser.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). Prerequisites: completion of formal coursework, passing of language examinations before enrollment, consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

598. M.A. Paper Preparation (2 to 12 units). Prerequisite: consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 12 units). Prerequisite: consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

Related Courses in Other Departments
Related courses, not listed individually, include regional geography, ancient and regional history, ethnography, folklore, history of technology, and the Earth sciences. Also recommended are the appropriate modern and ancient languages for your area of study.

Most archaeology courses are taught in the various departments. The following is a list of such courses, by topic and department. You are encouraged to examine the course listings of all departments for a truly interdisciplinary course of study.

Methodology and History

Ancient Near East (Near Eastern Languages) 261. Practical Field Archaeology
Anthropology 115P. Archaeological Field Training
115Q. Archaeological Research Techniques
115R. Strategy of Archaeology
M115S. Historical Archaeology
116P. Laboratory Analysis in Archaeology
M116C. Dating Techniques in Environmental Sciences and Archaeology
118A, 118B. Museum Studies
121A. Primate Fossil Record
121B. The Australopithecines
121C. Evolution of the Genus Homo
129P. Laboratory Methods in Biological Anthropology - Skeletal
132. Technology and Environment
138. Methods and Techniques of Ethnobiography
158. Hunting and Gathering Societies
183. History of Archaeology
186A. Quantitative Methods in Anthropology
188B. Models and Modeling in Anthropology
210. Analytical Methods in Archaeological Studies
211. Regional Analysis in Archaeology
M216. Dating Techniques in Environmental Sciences and Archaeology
217. Explanation of Societal Change
221A-221B. Fossil Evidence for Human Evolution
283. Mathematical Models in Anthropology
Art History 203. Museum Studies
265. Fieldwork in Archaeology
Materials Science and Engineering 149C. Properies of Art Ceramic Materials
149D. Ceramic Materials in History and Archaeology

New World
Anthropology 113P. Archaeology of North America
113Q. Prehistory of California Indian Cultures
113R. Southwestern Archaeology
114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)
art history majors should be aware that the college foreign language requirements. (3) Two terms

ional upper division units must be taken to reach the 72-unit total.

It is recommended that you have each term’s program approved by the departmental adviser.

Master of Arts Degree

Admission
A minimum grade-point average of 3.25 overall and 3.5 in upper division art history courses is required. The Graduate Record Examination (GRE) is required, although no minimum score has been established. Three letters of recommendation (preferably from art historians) are required. The statement of purpose submitted with the application is given weight in the evaluation and should be as specific as possible about your interests in art history. In addition, you must have completed six full courses in the history of art (grades of B or better and not including studio courses), with at least two courses from Fields A and B (see below). Specific areas may not be offered in satisfaction of more than one requirement.

Field A — (1) Aegean, (2) American, (3) Greek and Roman, (4) medieval and Byzantine, (5) modern and contemporary, (6) Renaissance and baroque.

Field C — (15) Critical theory.

Applicants demonstrating exceptional promise but lacking some or all of the six required courses may, at the discretion of the graduate review committee, be admitted on condition that they make up those courses. Deficiencies must be made up during your first two terms in residence and may not be applied toward degree requirements. In all cases or exceptions must be worked out with the major adviser.

Prospective students may contact the Counselor, Department of Art History, 3209 Dickson, UCLA, Los Angeles, CA 90024-1417, for brochures and information. The department has no special departmental application; admission is limited to Fall Quarter.

Major Areas or Subdisciplines
Fifteen major areas in three fields, as noted under “Admission” above.

Foreign Language Requirement
Reading knowledge of French and German is required of all students except those intending to major in Asian (i.e., Chinese, Japanese, South Asian), pre-Columbian, Islamic or, with consent of the adviser, Italian art history. Students majoring in Chinese or Japanese art history must substitute either Chinese or Japanese respectively for either French or German. Those majoring in South Asian or Islamic art history must substitute, for either French or German, an appropriate classical research language of South Asian or Islamic culture respectively. Those majoring in Italian art history may, with consent of their major adviser, substitute Italian for French. In all cases, the final decisions regarding choice must be made in consultation with, and with the consent of, the major adviser. Students majoring in pre-Columbian art history must substitute Spanish for French.

With the exception of Asian and Islamic art history majors, all students must demonstrate reading fluency in both foreign languages by any of the following methods: (1) passing the department language examination, (2) passing the Graduate Student Foreign Language Test (GSFLT) with a minimum score of 600, (3) enrolling in and completing with a minimum grade of B, UCLA’s French 5, German 6, Italian 5, and/or Spanish 25. One of these language requirements must be satisfied by the end of the second term in residence and the other by the end of the sixth.

Students majoring in Asian or Islamic art history must satisfy their European language requirement by the end of the sixth term in residence and may do so by any of the three methods listed above. The Asian or Islamic language requirement, however, is normally satisfied by enrolling in an appropriate course sequence for six consecutive terms (normally beginning with the first term of graduate study) and by maintaining a grade of B or better in those courses. Details and/or exceptions must be worked out with the major adviser.

Course Requirements
The M.A. degree requires the completion of a major and two minors in art history; there are three major/minor course options available (see the department counselor for option details). For options 1 and 2, you are required to take a minimum of 10 graduate and upper division courses, of which at least eight must be in art history and of which at least six must be graduate courses (200 series and 596). For option 3, you are required to take a minimum of 13 graduate and upper division courses (but may be required to take up to 14), of which at least eight must be in art history and of which at least six must be graduate courses (200 series and 596). At least four of these courses (in all options) must be in the 200 series, and no more than two may be 596 courses (Art History 597, 598, and 599 may not be applied toward the degree). All students must take course 200 and either 201 or 202. Courses should be selected in consultation with your major and minor advisers.

Thesis Plan
The thesis committee is established after completion of all course requirements. At the same time, you select a thesis topic in your major field. The thesis should deal succinctly with the topic in an independent, critical, and original fashion while taking fully into account the present state of research on the problem.

Ph.D. Degree

Admission
The M.A. in Art History is usually required for admission to the Ph.D. degree program. However, students with an M.A. degree in other disciplines may apply for admission. The graduate review committee determines the equivalency of the M.A. on an individual basis. An M.A. in Art History from another institution may be accepted as equivalent to that from UCLA or the holder may be accepted into the program at a stage determined by the graduate review committee. All incoming Ph.D. students must have taken and passed with a grade of B or better at least two courses (upper division and/or graduate) in areas not related to the proposed major (as outlined in the M.A. course requirements). Deficiencies must be made up during your first two terms in residence and may not be applied toward degree requirements.

The application must include, in addition to official transcripts and Graduate Record Examination (GRE) scores, all of the following:

(1) A standard statement of purpose (approximately 400 words).

(2) A copy of the M.A. thesis, or, if no thesis was written, one major research paper written at the M.A. level in the major (or intended major) field.

(3) Three or more letters of recommendation from individuals familiar with your scholarly work, one of which must be a detailed letter of assessment and endorsement from your major adviser for the M.A.

(4) A written statement from the intended Ph.D. major adviser of willingness to supervise your Ph.D. work.

(5) Evidence, prior to admission, of reading fluency in two appropriate foreign languages.

Students applying directly to the Ph.D. program from the M.A. in Art History program at UCLA follow a slightly modified procedure. For details, see the department counselor.

Reading knowledge of French and German is requisite for admission at the Ph.D. level for those majoring in all areas except Asian, Islamic, pre-Columbian, or Italian art history. You may demonstrate this knowledge by submitting a Graduate Student Foreign Language Test (GSFLT) score of 600 or better, taking and passing the relevant department language examination(s), or completing UCLA’s German 6, French 5, and/or Italian 5 with a grade of B or better.

Students intending to major in Asian or Islamic art history must demonstrate, by the methods outlined above, reading fluency in either French or German. In addition, they must complete with a grade of B or better six consecutive quarter courses (or equivalent) in an appropriate Asian or Islamic language. Determination of the appropriate language and acceptable equivalencies should be worked out in advance with the intended major adviser.
Students intending to major in pre-Columbian art history must demonstrate, by the means outlined above, reading fluency in German and Spanish. In the latter case, UCLA's Spanish 25, passed with a grade of B or better, fulfills the requirement.

Students who have passed a required foreign language at another institution must either take and pass the relevant UCLA departmental foreign language examination or submit an official recent (within two years) GSFLT score of 600 or better in that language.

Prospective students may contact the Counselor, Department of Art History, 3209 Dickson, UCLA, Los Angeles, CA 90024-1417, for brochures and information. The department has no special departmental application; admission is limited to Fall Quarter.

Major Areas or Subdisciplines

Field C — (22) Critical theory.

Foreign Language Requirement

You are normally required to demonstrate, no later than the time of your University Oral Qualifying Examination, reading fluency in one or more foreign languages in addition to those required for admission. Among those areas requiring such reading fluency are Aegean, Greek, Roman, medieval, Byzantine, Renaissance, Islamic, pre-Columbian, and all Asian areas. The applicability of this requirement, the language(s) required, and the exact methods of satisfying the requirement are determined in consultation with the major adviser.

Course Requirements

There are three major/minor course options available (see the department counselor for option details). For options 1 and 2, a minimum of eight graduate and upper division courses is required, of which at least four must be art history graduate courses (200 series and 596). For option 3, a minimum of 11 graduate and upper division courses is required, of which at least four must be art history graduate courses (200 series and 596). Of these totals (eight or 11), you must take at least two, and may take up to five, extra-departmental upper division and/or graduate courses, which must be approved by your major or minor adviser (where applicable).

If you enter the Ph.D. program deficient in Art History 200 or its equivalent, you must add it to your total requirements. In some cases, course 201 may also be required (if recommended by your faculty adviser).

Qualifying Examinations

After completion of coursework and language requirements, you must take the Ph.D. written comprehensive examination to test your breadth and depth of knowledge in the major and minor fields of study. If you fail the examination, or any part thereof, that portion may be repeated during the subsequent term in residence. No further repetition is allowed.

A dissertation topic is selected after you pass the written comprehensive examination; the members of your doctoral committee are then nominated, and the committee is appointed by the dean of the Graduate Division.

After having submitted a dissertation proposal, you then take the University Oral Qualifying Examination, given by your doctoral committee. Assuming there is no more than one no-pass vote, you may initiate the procedure to advance to candidacy.

Final Oral Examination

The doctoral committee may decide, by unanimous agreement, to waive the final oral examination (not normally required). If a final oral examination is required, it is held after the final draft of the dissertation has been circulated among the committee members. In case of failure, the doctoral committee decides, by unanimous agreement, whether or not you may be reexamined.

Lower Division Courses

50. Ancient Art. Lecture, three hours; quiz, one hour. Prehistoric, Egyptian, Mesopotamian, Aegean, Greek, Hellenistic, and Roman art and architecture. Ms. Downey, Mr. Preziosi.

51. Medieval Art. Lecture, three hours; quiz, one hour. Early Christian, Byzantine, Islamic, Carolingian, Ottonian, Romanesque, and Gothic art and architecture. Mr. Klein.

54. Modern Art. Lecture, three hours; quiz, one hour. Art and architecture from 1800 to the present in Europe and the U.S. Ms. Bierman.

55A. Africa, Oceania, and Native America. (Formerly numbered 55.) Lecture, three hours; discussion, one hour. Comparative approach, emphasizing economic, cultural, and historical aspects of selected artistic traditions which developed outside the sphere of influence of major European and Asian civilizations. Ms. Klein.

55B. Arts of Pre-Columbian America. (Formerly numbered 118B.) Lecture, three hours; discussion, one hour. Survey of cultures which developed in the area between (and including) Mexico and Peru from ca. 1000 B.C. to the Conquest. Ms. Klein.

56A. Art of India and Southeast Asia. (Formerly numbered 56.) Lecture, three hours; discussion, one hour. Survey of major artistic monuments of Indo-Iranian and Southeast Asian cultures, concentrating on formal and iconographical problems, as well as social and political conditions under which artworks were patronized and produced. Mr. Brown.

56B. Introduction to Chinese Art. (Formerly numbered 56.) Lecture, three hours; discussion, one hour. Introduction to discipline of Chinese art history. Fundamentals of formats, methods, and materials of Chinese art, visual and textual sources, peculiarities of patronage, traditional art history and criticism, and approaches to representation in premodern China. Mr. Klein.

57. Renaissance and Baroque Art. Lecture, three hours; discussion, one hour. History of art and architecture in Western Europe from 1400 to 1750. Ms. Klein.

Upper Division Courses

101A. Egyptian Art and Archaeology. Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during the Predynastic period and Old Kingdom. Mr. Preziosi.

101B. Egyptian Art and Archaeology of the Middle and New Kingdoms. (Formerly numbered 101B.) Lecture, three hours. Prerequisite: course 50. Study of architecture, sculpture, painting, and minor arts during the Middle and New Kingdoms. Mr. Preziosi.

102A. Minoan Art and Architecture. (Formerly numbered 102.) Lecture, three hours. Prerequisite: course 50. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. Mr. Klein.

102B. Mycenaean Art and Architecture. Lecture, three hours. Prerequisite: course 50. Study of development of art and architecture in Mycenaean Greece from ca. 2000 to 1000 B.C. Mr. Klein.

103A. Greek Art. Lecture, three hours. Prerequisite: course 50. Survey of art and architecture of Greece from the Archaic period through the 5th century B.C. Ms. Downey, Mr. Preziosi.

103B. Hellenistic Art. Lecture, three hours. Prerequisites: courses 50, 103A. Art and architecture of Greek world from the 4th through 1st century B.C., including transmittal of Greek art forms to the Roman world. Ms. Downey.

103C. Roman Art. Lecture, three hours. Prerequisite: course 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. Ms. Downey.

103D. Etruscan Art. Lecture, three hours. Prerequisite: course 50. Arts of Etruscan peninsula from ca. 1000 B.C. to end of the Roman Republic. Ms. Downey.

103E. Late Roman Art. Lecture, three hours. Prerequisites: courses 50, 103C. Art of Roman Empire from the 2nd through 4th century (A.D.). Ms. Downey.

104A. Western Islamic Art. Lecture, three hours. From the Tigris and Euphrates Rivers to Spain, 7th to 16th century. Ms. Bierman.

104B. Eastern Islamic Art. Lecture, three hours. From the Tigris and Euphrates Rivers through Afghanistan and parts of central Asia; Ottoman Empire. Ms. Bierman.

C104C. Problems in Islamic Art. Lecture, three hours. Monuments or theoretical problems related to Islamic culture and artistic production. Concurrently scheduled with course C214. Mr. Klein.

105A. Early Christian Art. Lecture, three hours. Prerequisite: course 51 or consent of instructor. Origins, treatment, and development of Christian art from paganism to the 14th century. Ms. Bierman.

105B. Early Medieval Art. Lecture, three hours. Prerequisites: course 51 or consent of instructor. Art and architecture of Western Europe from the Migration period until A.D. 1000. Mr. Klein.

105C. Romanesque Art. Prerequisite: course 51. Art and architecture of Western Europe in the 11th and 12th centuries. Mr. Klein.

105D. Gothic Art. Lecture, three hours. Prerequisite: course 51. Art and architecture of Europe in the 13th century. Mr. Klein.

105E. Byzantine Art. Lecture, three hours. Prerequisite: course 51 or consent of instructor. Theory and development of Byzantine art from the Iconoclastic controversy to 1453 and diffusion of Byzantine art in Armenia, Georgia, the Caucasus, and Russia. Ms. Bierman.

106A. Italian Art of the Trecento. Lecture, three hours. Prerequisite: course 57 or consent of instructor. Art and architecture of the 14th century. Ms. Bierman.

Lecture, three hours. Prerequisite: course 57 or consent of instructor. Painting, sculpture, and architecture of the late 16th and early 17th centuries considered in context of the Counter-Reformation.

109A. Northern Renaissance Art. Lecture, three hours. Prerequisites: course 57 or consent of instructor. Painting and sculpture of Northern Renaissance.

109B. Northern Renaissance Art. Lecture, three hours. Prerequisite: course 108A. Painting and sculpture in the Northern Renaissance.

109A. Baroque Art. Lecture, three hours. Prerequisites: course 57 or consent of instructor. Art and architecture of Northern Europe, 16th to late 17th century. Mr. Kunzle

109C. European Art of the 18th Century. Lecture, three hours. Prerequisite: course 57. Painting, architecture, and sculpture of the 18th century examined in light of political and intellectual developments. Special emphasis on effect of the rise of democratic institutions, especially the French Revolution.

110A. European Art of the 19th Century. Lecture, three hours. Prerequisite: course 54. Neoclassicism and Romanticism, with emphasis on France—development and influence of David, Ingres, and Delacroix. Mr. Boime

110B. European Art of the 19th Century: Realism and Impressionism. Lecture, three hours. Prerequisite: course 54. Inquiry into problem of realism, with emphasis on French art, but including developments in England and Germany. Mr. Boime

110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism. Lecture, three hours. Prerequisite: course 54. Study of major developments in art from 1890 to 1930, including Seurat, Cezanne, Gauguin, Van Gogh, Art Nouveau, Fauvism, German expressionism.

110D. Contemporary Art. Lecture, three hours. Prerequisite: course 54. European and American art since World War II. Mr. Boime, Mr. Kunzle

110F. Selected Topics in Modern Art. Lecture, three hours. Prerequisite: course 54. Changing topics in modern art (post-1970) which reflect interests of individual professor and visiting faculty members.

110G. Art and Politics in the Contemporary Americas: Latin America. Prerequisite: course 54. Nationalist and revolutionary responses of Latin American to U.S. imperialism. Discussion of the cases of Mexico, Cuba, Chile, and Nicaragua. Mr. Kunzle, Mr. Wilkins

C112A. American Art before the Civil War. (Formerly numbered 112A.) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. Concurrently scheduled with course C212A. Ms. Whiting

C112B. American Art in the Gilded Age, 1880-1900. (Formerly numbered 112B.) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to the turn of the century. Concurrently scheduled with course C212B. Ms. Whiting

C112C. 20th-Century American Art. (Formerly numbered 112C.) Lecture, three hours. Painting and sculpture in the U.S. from 1900 to the present. Concurrently scheduled with course C212C. Ms. Whiting

M113. Russian Art. (Same as Russian M180.) Lecture, three hours. Recommended prerequisites: courses 54, 57, or consent of instructor. Survey of art and architecture of Russia from the beginning of the present day. Emphasis on development of Russian art in its religious, social, and political context. Mr. Fier

114A. Early Art of India. Lecture, three hours. Not open to freshmen. Survey of Indian art from Vedic Valley cultures to the 10th century. Emphasis on Buddhist and Hindu backgrounds of the arts. Mr. Brown

114C. Japanese Art. Lecture, three hours. Not open to freshmen. Japanese art from its beginning in prehistory through the 19th century. Emphasis on development of Buddhist art and its relationships with the culture. Mr. McCaullum

114D. Later Art of India. Lecture, three hours. Prerequisite: course 114A or consent of instructor. Survey of Indian art from the 10th to the 18th century. Decline of Buddhist art, last efflorescence of Hindu architecture, Muslim painting and architecture, and Rapot painting. Mr. Brown

114E. Arts of Korea. Lecture, three hours. Art and archaeology of Korea from the Neolithic Period through the Yi dynasty. Particular emphasis on early archaeology and state formation, Buddhist art, koryo ceramics, and Yi literati painting. Mr. McCaullum

114F. Arts of Southeast Asia. Lecture, three hours. Not open to freshmen. Southeast Asian art from its beginning in prehistory through the 19th century. Study of art of selected cultures from Burma, Malaysia, Thailand, Cambodia, Vietnam, and Indonesia. Mr. Brown

C115A. Advanced Indian Art. Lecture, three hours. Prerequisite: course 114A. Study in Indian art and architecture. Concurrently scheduled with course C257. Mr. Brown

C115B. Advanced Chinese Art. Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course C257. Mr. McCaullum

C115C. Advanced Japanese Art. Lecture, three hours. Prerequisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course C259. Mr. McCaullum

C115D. Art of Early China, Neolithic to A.D. 906. Lecture, three hours. Prerequisite: consent of instructor. Period generally known as "early China," ranging from earliest Neolithic artifacts to end of T'ang dynasty (618-906). Concurrently scheduled with course C261A.

C115E. Chinese Art of Sung and Yuan Dynasties, 906-1368. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and some sculpture from Sung through Yuan dynasties (906-1368). Concurrently scheduled with course C261A.

C117A. Pre-Columbian Art of Mexico. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C119A. Ms. Klein

C117B. Pre-Columbian Art of the Maya. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected Maya-speaking cultures of southern Mexico, ca. 200 B.C. to the Conquest, with particular emphasis on iconography of political, religious, and means of expression in drawing. Concurrently scheduled with course C218B. Ms. Klein

C117C. Pre-Columbian Art of the Andes. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of cultures of central and western U.S., Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. Concurrently scheduled with course C218B. Ms. Klein

118A. Arts of Oceania. Lecture, three hours. Prerequisite: course 55A or consent of instructor. Survey of arts of the major island groupings of the Pacific, emphasizing style-regions and broad historical relations. Mr. Klein

118C. Arts of Sub-Saharan Africa. Lecture, three hours. Survey, with emphasis on sculpture, of selected traditions within a style-region framework.

118D. Arts of Native North America. Lecture, three hours. Prerequisite: course 55A or consent of instructor. Survey of painting, sculpture, and other arts from the Eskimo to peoples of the Caribbean and Southwestern U.S. Ms. Klein

C119A. Advanced Studies in African Art: Central Africa. Lecture, three hours. Selected topics in art of peoples living west and north of Cameroon, with emphasis on special problems of theory and method. Concurrently scheduled with course C216A.

C119B. Advanced Studies in African Art: Western Africa. Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C216B.

204A-120B-120C. History of Prints. Lecture, three hours. Development of style and techniques of expression in graphic arts. 120A. 15th to Early 16th Century; 120B. 16th to Early 19th Century; 120C. Later 19th and 20th Centuries.

212A-121B1. Critical and Historical Studies in Drawing. Lecture, three hours. Development of and means of expression in drawing. 121A. Late Middle Ages to Early Renaissance; 121B. Late Renaissance to the Present.

212C. Tutorial Conferences. Discussion, two hours. Prerequisites: courses 50, 51, 54, 57. Limited to undergraduate art history majors. Discussion of selected art topics, with emphasis on related readings in music, literature, history, and philosophy. Oral reports. P/NP grading.

212D. Undergraduate Seminar. Lecture, three hours. Prerequisite: junior standing or consent of instructor. Selected topics within art history, explored through the readings, discussion, research papers, and oral presentations. May be repeated twice.

219. Honors Course. Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 in major, junior or senior standing, consent of instructor. Individual studies for majors. May be repeated once for credit.

219A. Special Studies in Art (2 to 8 units). Hours to be arranged. Prerequisites: 3.0 GPA in major, junior standing, consent of instructor. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (un-otherwise noted) on recommendation of the advisor; they are not open to undergraduate students.

200. Art Historical Theories and Methodologies. Discussion, three hours. Critical examination of history of the discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts from antiquity to the present. Mr. Preziosi, Ms. Whiting

201. Topics in Historiography of Art History. Discussion, three hours. Critical examination of historiographic traditions of specific areas and fields within the discipline of art history, concentrating on particular time periods, geographical areas, artistic traditions, or historical concepts. Concurrently scheduled with course 219B.

202. Topics in Theory and Criticism in Art History. Discussion, three hours. Focused studies of various theoretical and critical traditions within art history, concentrating on particular issues, authors, or methodologies either within or across historical and cultural contexts. Concurrently scheduled with course 219B.

203. Museum Studies. Seminar, two hours. Various aspects of museum activities: concepts and historical evolution of art museums and collecting; methodology of exhibitions: problems involved in acquisition and evaluation of works of art.

204. Restoration, Preservation, and Conservation. Seminar, two hours. May not be repeated.
205. Studies in Prints. Seminar, two hours. Critical studies in history and connoisseurship of graphic arts in the Western world. Group or individual studies often culminate in professionally directed exhibitions produced by Grunwald Center for the Graphic Arts.

206. Studies in Drawings. Seminar, two hours. Critical studies in hand-painting and graphic work, emphasis on drawing and printmaking in the Western world. Individual studies emphasize professional presentation. Group studies may culminate in exhibitions sponsored by Grunwald Center for the Graphic Arts.

210. Egyptian Art. Seminar, two hours. Prerequisites: courses 101A, 101B, 102A. Art in Egypt during the Late period and Greco-Roman period. Students should be ready to prepare for every meeting a briefing of a topic from archaeological memoirs, not to exceed 10 minutes. Some lectures.

211. Topics in Aegean Art. Seminar, two hours. Prerequisites: courses 102A and 102B, or consent of instructor. Art and architecture of Aegean Bronze Age (3000-1000 B.C.). Monuments or theoretical problems related to art and culture of Crete, Greece, the Cyclades, or Western Anatolia.

C212A. American Art before the Civil War. Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. Concurrently scheduled with course C121B. Ms. Whiting

C212B. American Art in the Gilded Age, 1860-1900. Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C121B. Ms. Whiting

C212C. 20th-Century American Art. Lecture, two hours. Emphasis on selected topics in Contemporary and European art. Ms. Bierman

213. Advanced Studies in Islamic Art. Seminar, two hours. Art and architecture of Islamic world (Spain to Iran) from the 7th to 17th century. Monuments or theoretical problems related to Islamic culture and artistic production. Ms. Bierman

C214. Problems in Islamic Art. Lecture, three hours. Prerequisite: consent of instructor. Monuments or theoretical problems related to Islamic culture and artistic production. Concurrently scheduled with course C104C. Ms. Bierman

C216A. Advancement in African Art: Western Africa. Lecture, three hours. Selected topics in artistic outputs of peoples living west and north of Cameroon, with emphasis on special problems of theory and method. Concurrently scheduled with course C119A. Ms. Bierman

C216B. Advanced Studies in African Art: Central Africa. Lecture, three hours. Selected topics in artistic outputs of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C119B. Ms. Bierman

C218A. Pre-Columbian Art of Mexico. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C117A. Ms. Klein

C218B. Pre-Columbian Art of the Maya. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C117B. Ms. Klein

C218C. Pre-Columbian Art of the Andes. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of Peru, Colombia, Ecuador, and Bolivia from ca. 400 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. Concurrently scheduled with course C117C. Ms. Klein

C219A. Oceanic Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in the art of Pacific islands. Ms. Klein

C219B. Pre-Columbian Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of pre-Hispanic Latin America. Ms. Klein

C219C. African Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of Africa. Ms. Klein

C219D. Native North American Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of the American Indian. Ms. Klein

C221. Topics in Classical Art. Lecture, two to three hours. Studies in Parthian art. Site-by-site survey of the Near East (Afghanistan, Iraq, Iran, Syria) during period of Greek and Parthian control. Ms. Downey

C223. Classical Art. Seminar, two hours. Studies in Greco-Roman art and architecture. Studies of specific periods, sites, or artistic media. Ms. Downey

C229. Renaissance and Baroque Paleography. Seminar. Prerequisites: knowledge of Italian, working knowledge of Latin. Workshop approach to documents pertaining to artistic commissions from the 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, correspondence, treatises, and inscriptions. Mr. Pedretti

C230. Italian Renaissance Art. Seminar, two hours. Prerequisite: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers. Ms. Pedretti, Ms. Woods-Marsden

C231. Leonard and Renaissance Theory of Art. Seminar, two hours. Prerequisite: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers. Ms. Pedretti

C255. American Art and Architecture of the People's Republic, 1368 to the Present. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and sculpture from Sung through Yuan dynasties (906-1368). Concurrently scheduled with course C115E. C256C. Chinese Art from Ming Dynasty to the People's Republic, 1368 to the Present. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and sculpture from Ming dynasty through the late 1970s. Concurrently scheduled with course C115E

C260. Asian Art. Seminar, two hours. Advanced studies in secular and religious artistic traditions of India, China, Japan, and adjacent regions. Topics and geographical areas vary each term. Mr. Brown, Mr. McCallum

C261A. Art of Early China, Neolithic to A.D. 900. Lecture, three hours. Prerequisite: consent of instructor. Period generally known as "early China," ranging from earliest Neolithic artifacts to end of T'ang dynasty (618-907). Concurrently scheduled with course C115C. Mr. McCallum

C261B. Chinese Art of Sung and Yuan Dynasties, 906-1368. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and some sculpture from Sung through Yuan dynasties (906-1368). Concurrently scheduled with course C115E

C261C. Chinese Art from Ming Dynasty to the People's Republic, 1368 to the Present. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and sculpture from Ming dynasty through the late 1970s. Concurrently scheduled with course C115E

C265. Fieldwork in Archaeology (2 to 8 units). Participation in archaeological excavations or other archaeological research under supervision of the staff. M270. Art Law. (Same as Law M301.) Prerequisite: consent of instructor. Knowledge of fine arts, arts management, or international law desirable. Limited enrollment; management and art history students may cross-register with consent of instructors. Legal issues related to the fine arts. Consideration of U.S. domestic law as well as international treaties and foreign law in addressing such controversial issues as the international trade in art, in public places, and moral rights. Distinguished guest speakers and one field trip.

C 375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at UCLA. May be repeated for credit. S/U grading.

C 501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

C 596. Directed Individual Study or Research (2 to 12 units). Prerequisite: consent of instructor.

C 597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

C 598. Research for and Preparation of Master's Thesis (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

Philip L. Newman, Ph.D. (Anthropology)
Paul Ong, Ph.D. (Urban Planning)

Assistant Professors
King-Kok Cheung, Ph.D. (English)
Valerie J. Matsumoto, Ph.D. (History)

Scope and Objectives
The Asian American Studies Program, an interdepartmental program supported by the Asian American Studies Center, promotes the study of Asian and Pacific peoples in the U.S. from several disciplines. The undergraduate program provides a general introduction to Asian American studies for those who anticipate advanced work at the graduate level or careers in research and community work related to the Asian American. Although no undergraduate major is offered in Asian American studies, students may participate in the program through a departmental major or an interdisciplinary major such as East Asian studies. The graduate program leads to the M.A. degree.

A major goal of the program is to communicate the experiences of Asians as an American ethnic group. Courses examine the important issues and concerns of Asian Americans, including their history, mental health, social organization, and culture.

Special Undergraduate Program
Preparation for the Specialization
Required: Asian American Studies 100A-100B.

Upper Division
Since this is not a degree-granting program, students participating in it must complete an organized major.

Further information on the undergraduate specialization, contact the Curriculum Coordinator, Asian American Studies Center, at the above address.

Master of Arts Degree
Admission
In addition to the University's minimum requirements, applicants are expected to present evidence of their previous interest in Asian American studies through courses taken at the undergraduate level, by research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the Asian American Studies Program (3232 Campbell Hall, UCLA, Los Angeles, CA 90024-1546) as part of their application. Three letters of recommendation are also required.

Major Fields
Since the program is interdepartmental, its major fields are determined by the participating faculty members from various departments.

Research Tool or Language Requirement
Prior to advancement to candidacy, you must fulfill one of the following requirements:

1. Foreign Language — Two years of university coursework or equivalent in an Asian language. This requirement may be fulfilled before entering the program, but you must pass a proficiency examination administered by the interdepartmental committee.

2. Research Methods — Three upper division or graduate courses in research methods with grades of B or better (e.g., statistics, computer science, field and observational techniques, or archival methods). Courses should be selected from the interdepartmental committee's approved list.

You must justify your requirement choice in a written statement. The rationale must specify the courses selected and how they directly relate to research and career goals.

Course Requirements
A total of 11 upper division and graduate courses is required for the degree. Of that number, seven must be graduate courses, including the required Asian American Studies 200A, 200B, 200C. Three of the graduate courses must be selected from Anthropology 231, 263P, Education 240D, 253G, History 201H, 245, Sociology 261, 263. The remaining four courses of the 11-course total, three of which may be upper division, must be approved by your faculty adviser and should be selected to give you additional training in a discipline or greater understanding of a particular topic.

Two courses in the 500 series may be applied toward the required 11 courses; however, only one of the two may be applied toward the required seven graduate courses.

Thesis Plan
In partial fulfillment of the requirements for the M.A. degree, you are required to complete either one of two thesis plans or a comprehensive examination.

Plan A (Thesis) — The thesis is intended to provide the opportunity for independent scholarly research on the historical and contemporary experiences of the Asian American population. It should be an original contribution to the field and the length and quality of a publishable journal article. You are expected to submit a research plan to your thesis committee for approval at the beginning of Fall Quarter of your second year in residence. After your thesis is approved and completed, the committee conducts an oral examination on its subject, usually in Spring Quarter of your second year. Academic credit for thesis research and preparation is given through Asian American Studies 598.

Plan B (Field Research Thesis) — A field research thesis is recommended for students who are interested in the practical application of what they have learned in their graduate coursework or who are intending to pursue careers with Asian American community organizations and agencies. Your field research thesis committee meets with you to approve your project plan at the beginning of Fall Quarter of your second year in residence. After your thesis is completed, the committee conducts an oral examination on the written report of the project, usually in Spring Quarter of your second year. Academic credit for field research is given through course 598 or 599.

Comprehensive Examination Plan
You may elect to complete the M.A. degree by taking a written comprehensive examination based on an annually updated "Approved List of Core Works in Asian American Studies," a collection of approximately 200 of the most significant scholarly and creative books, novels, articles, and reports in the field of Asian American studies. The examination is normally offered during the break between Winter and Spring Quarters. You must notify the program chair of your intent to take the examination at least one academic term before it is administered. If you fail the examination, you may repeat it once. Academic credit for examination preparation is given through Asian American Studies 598.

Upper Division Courses
101B. Internships in Asian Pacific Communities. Discussion, two hours; fieldwork, eight hours mini-
mum. Prerequisites: course 101A or consent of in}-
structor. Integrates academic and empirical work by
providing students the challenge of performing public service and community work in Asian Pacific or other
multicultural communities, and of bringing the on-
going internship experiences back to classroom.
P/NP or letter grading.

M102. Asian American Literature. (Same as En-
glish M102.) Prerequisite: satisfaction of Subject A
requirements. Course 102E. Topic include Chinese,
Japanese, Pilipino, and Korean origins. Study of
interaction of autobiography and fiction, nourishing
and limiting influences of mainstream American and
Asian literary traditions, and conflict between ideo-
logical and literary criteria. Ms. Cheung (F)

103. Asian Americans and the Law. Survey of major
federal and California case and legislative law direct-
ed specifically toward Asian Americans from 1850
to World War II and relocation. Major subject areas in-
clude immigration law, anti-Asian legislation, and immi-
grant and minority group status. Mr. Sue

195A-195E. Asian American History and Experi-
ence. Prerequisite: sophomore standing. Study of
immigration history, settlement patterns, and expe-
riences of specific Asian American populations. Ex-
amination of historical and contemporary sociocul-
tural, economic, and political issues as they affect
formation and character of various Asian American
communities. Consult Asian American studies
centers for topics to be offered in a specific term. P/NP or
letter grading. 195A, 195B, 195C, 195E, American
American History; 195E, Chinese American History

196A-196D. Critical Issues in U.S.-Asia Relations.
Prerequisite: sophomore standing. Critical examina-
tion of U.S. involvement in specific Asian countries,
including colonial, political, and economic factors that shape relations between Asia and
the U.S. Exploration of impact of relationships in the
Pacific Rim, as well as on Asian Americans and the
Asian American experience. Consult Asian American
Studies Center for topics to be offered in a specific term. P/NP or
letter grading. 196A, U.S.-Philippine Relations; 196B, U.S.-Korean Relations; 196C, U.S.-
China Relations; 196D, U.S.-Japan Relations

197. Topics in Asian American Studies. Lecture,
two to four hours. Prerequisite: junior/senior standing
or consent of instructor. Variable topics course in
Asian American studies on selected issues in educa-
tion, literature, social, political, and economic
development. P/NP or letter grading.

199. Special Topics in Asian American Studies (2
to 4 units). Prerequisites: course 100A or 100B or
comparable knowledge in Asian American studies,
junior or senior standing, consent of instructor. Special
individual study on topics such as ethnic literature,
public policies, economic development, immigrant
education, and social policies related to Asian
American studies. May be repeated for a maximum of
eight units.

Graduate Courses

200A. Critical Issues in Asian American Studies.
Prerequisite: graduate standing, consent of instruc-
tor. Examines and seeks to develop a critical appreci-
ation of research literature on Asians in America and
to develop alternative interpretations of the Asian
American experience. Topics include Asian American
history and economic/political and social/political
issues. Ms. Matsumoto

200B. Critical Issues in Asian American Commu-
nities. (Formerly numbered 200C.) Lecture, three
hours. Prerequisites: graduate standing, consent of
instructor. Evaluation of traditional and contemporary
theories and models of community for their appropri-
ateness to understanding Asian American communities.
Consultation of specific topics with explicit development, structure, and dynamics of
Asian American communities in studying community issues and concerns. Mr. Ong

(Formerly numbered 200B.) Lecture, three hours.
Prerequisites: graduate standing, consent of instruc-
tor. Critical review of research methods, strategies,
and philosophies in Asian American studies.

297. Topics in Asian American Studies.
M297A. Topics in Asian American Literature. (Same as English M260A.) Lecture, three hours. Graduate
seminar that examines and critically evaluates writ-
tings of Asian Americans.

M297B. Asian Migration to the U.S. (Same as Architec-
ture and Urban Planning M242A.) Prerequisite: gradu-
te standing or consent of instructor. Emphasis on
Asia as a regional source for international migrants.
Topics include patterns and theories of international migra-
tion and their relevance to the Asian experience, send-
ning and receiving countries, research and policy
issues. S/U or letter grading.

M297C. Urbanization in Asia — Policy Issues and
Problems. (Same as Architecture and Urban Plan-
ning M242B.) Prerequisite: graduate standing or con-
sent of instructor. Urbanization in less developed
countries in Asia with specific reference to its peculiar
features and characteristics, and relationship of ur-
banization to the development process. Topics in-
clude urbanization development, structural and poli-
ty determinants of urbanization, urban policy and
strategies, and country case studies. S/U or letter grading.

490. Writing Workshop for Graduate Students (2
units). Lecture, one hour; discussion, one hour.
Prerequisite: consent of instructor. Practice in writing re-
ports, grant proposals, abstracts, theses, and article-
length research papers. Analyzing rhetorical and sty-
stic features of essays in various Asian American
journals helps students improve both their prose style
and editorial abilities. Four units may be applied to-
ward M.A. degree requirements. May be repeated
once for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8
units). Hours to be arranged. Prerequisite: consent of
instructor.

598. Research for and Preparation of M.A. Thesis
(2 to 8 units). Prerequisite: consent of instructor.
Preparation of research data and writing of M.A. the-
sis. S/U grading.

David B. Cline, Ph.D., Emeritus
Daniel M. Popper, Ph.D., Emeritus

Associate Professors
Matthew Malkan, Ph.D.
William I. Newman, Ph.D.

Assistant Professor
Jean L. Turner, Ph.D.

Scope and Objectives

Astronomy, the oldest science, has now become a meeting place of nearly all physical sciences. It is difficult for any educated person to escape the awe and wonder of such things as the nature of the other planets, the likelihood of black holes in space, the origin and future of the universe, and the possibility of life elsewhere.

The Astronomy Department, therefore, has several educational missions: to develop skills in graduate students which will enable them to make contributions at the frontier of astronomical research, to prepare undergraduate majors for entry into a graduate program, and to provide insight and understanding for nonmajors and nonscience students.

Graduate training of future astronomers, up to the Ph.D. level, is the department’s first responsibility. Applicants must have solid backgrounds in physics and mathematics. The program provides training in both theoretical and observational astronomy; its strengths, at present, are in solar physics, stellar structure and evolution, magnetohydrodynamics, gaseous nebulae and interstellar medium, optical design, galaxies, quasars, and observational and theoretical cosmology.

The department’s second responsibility is to the undergraduate astrophysics major who hopes for a career in astrophysics. Some Bachelor of Science degree recipients go on to graduate work; some opt for teaching careers, for which their training in physics, astrophysics, and mathematics is most useful; still others find excellent jobs in industry, where their broad background in physical science with a specialty in astrophysics makes them particularly valuable (especially in computer science, space, and aeronautical fields).

Classes for Nonmajors

The department offers general courses to all University students, including those who are not science oriented.

The Astronomy 2A-2B two-term sequence covers the material in courses 3, 4, and 6. You may take one sequence or the other, but not both.

Astronomy 3 is the fundamental one-term course recommended for every University student who does not major in physical sciences and should be taken in the first or second year. If you had an astronomical introductory course in high school, you should take either courses 2A-2B, 3H, 4, 5, or 6.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths. They use more mathematics but are still aimed at nonscience majors. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses endpoints of stellar evolution and the structure and evolution of the universe. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in astrophysics or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They represent a serious and systematic introduction to astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 8 series and two terms of the Mathematics 31/32 series).

Students of junior and senior standing in physics or related sciences are invited to select any of these courses: 115, 117, 127, 140, 180.

Bachelor of Science in Astrophysics

Preparation for the Major

Required: Astronomy 81, 82, Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E, Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 3 or 10A. Recommended: Chemistry and Biochemistry 11A. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year.

The Major

Honors Program

Senior majors in astrophysics with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, you must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, your grade-point average must remain at 3.4 or better, and your work in course 199 must reflect original research and be accepted by the departmental honors committee.

Graduate Study

Admission

The basic requirement for admission is a bachelor’s degree in physics or astronomy. Students in closely related fields (e.g., mathematics or chemistry) may be admitted at the discretion of the department. All students who apply should submit at least three letters of recommendation and take the Graduate Record Examination (GRE) General Test and Subject Test in Physics. For further information, contact the Graduate Adviser, Department of Astronomy, 8979 Math Sciences, UCLA, Los Angeles, CA 90024-1562.

New students and those who have not been admitted to candidacy for the Ph.D. should consult with the graduate adviser at the beginning of Fall Quarter to determine a program for the year.

Master of Science in Astronomy

Course Requirements

Nine courses are required for the master’s degree, of which at least five must be at the graduate level in astronomy (excluding Astronomy 200). The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

Comprehensive Examination Plan

To receive the master’s degree, you must obtain at least a B average in all the departmental written comprehensive examinations taken. The examinations are divided into sections, with one section for each course in the A or B series that you may apply toward the M.S., M.A.T., or Ph.D. requirements. The examination is given at the time the final examination for the course would normally be scheduled and is letter graded. You may repeat failed courses for credit but may not repeat the departmental examinations for departmental credit.

Master of Arts in Teaching

The department is not admitting students to the program at this time.
Course Requirements
Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy (excluding Astronomy 200), mathematics, or physics, or 100- or 200-series courses in education required for the instructional credential. The B segments of the graduate multiple-credit courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, should be taken.

Comprehensive Examination Plan
This plan is the same as for the M.S. degree.

Ph.D. in Astronomy
Course Requirements
Required for the degree are Astronomy 200, 204A, 206A, 217A, 219A, 227A, 230A; at least four courses from 204B, 208B, 217B, 219B, 227B, 230B; and at least two courses (projects) from 204C, 208C, 217C, 219C, 227C, 230C. You are required to take course 250 each term in residence.

Teaching Experience
Before receiving a Ph.D., you are required to spend at least three terms as a teaching assistant at UCLA or have equivalent experience elsewhere.

Comprehensive Examinations
The departmental written comprehensive examinations are the same as described under the M.S. degree. To be qualified to go on to the Ph.D., you must receive a minimum score on these examinations. After the written comprehensive examinations are completed, you must then fulfill the normal University requirements for a dissertation and pass the University Oral Qualifying Examination.

Projects
During the Fall Quarters of your second and third years, you are expected to complete a research project. You should work closely with one of the staff both when the project subject is selected and throughout the course of the work. The projects may be a continuation of work begun during the preceding Spring Quarter; the goals of the project should be selected to reflect the amount of work completed in the Spring Quarter.

Evaluation of the projects is based as much on the quality of the written report as on the quality of the research itself. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques selected to attack the project problem, and the reasons for this choice. If the project is original and interesting, but incomplete, you are encouraged to complete it later, but the grade assigned is based on the portion completed by the end of the Fall Quarter.

Final Oral Examination
You must pass a final examination after completing your dissertation.

Lower Division Courses
2A-2B. Introduction to the Physical Universe. Lecture, three hours; discussion, one hour. Thorough introductory survey of astronomy for students not planning major in physical sciences. Same topics as course 3 but in greater depth, with emphasis on physical reasoning. 2A. Planets and Stars; 2B. Galaxies and Cosmology. Prerequisite: course 2A with a grade of C or better.

3. Astronomy: Nature of the Universe. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, on development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments.

3H. Introductory Astronomy and Astrophysics. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, on development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments.

10. Practice in Observing. Laboratory, one hour per week. Prerequisite: Astronomy 200 or equivalent.

6. Cosmology: Our Changing Concepts of the Universe. Lecture, three hours; discussion, one hour. Prerequisite: course 3 or 3H or equivalent. Essentially nonmathematical exposition of our ideas about the structure and evolution of the universe. Historical development of ideas up to the present time. Problem of cosmic center and cosmic edge. Space and time. Curvature of space, General relativistic Black holes. Expanding universe and cosmological redshift. Early stages of the universe, Big Bang, current ideas of the inflationary universe.

81. Astrophysics I: Stars and Nebulae. Lecture, three hours; laboratory, one hour. Prerequisites: Mathematics 31A, 31B, and Physics 8A; or equivalent, or consent of instructor. Open to qualified sophomores and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Methods and importance for astrophysics. Variables stars. Planetary nebulae, novae, and supernovae.

82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 31A, 31B, Physics 8A, or equivalent. Recommended: course 81, Physics 8B, 8C. Open to qualified sophomores and upper division students. Basic principles of stellar structure and evolution. Red giants, white dwarfs, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. Milky Way galaxy and the interstellar medium. Extragalactic astronomy, galaxy clustering, active galactic nuclei, and quasars. Introduction to cosmology: Hubble law, thermal history of the Big Bang, and developments of the universe.

Upper Division Courses

117. Radiation and Fluids in Astrophysics. Lecture, three hours. Prerequisites: course 115 or equivalent and junior standing in astrophysics or physics, or consent of instructor. Radiation and absorption of stars. Blackbody radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to interstellar and intergalactic media, and to the early universe.

127. Stellar Atmospheres, Interiors, and Evolution. Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Recommended: courses 115, 117. Physical conditions in stellar interiors. Energy production in stars. Stellar evolution from star formation through normal observed stages to white dwarfs, neutron stars, and black holes. Novae, supernovae, other variable stars, chromospheres, and coronae of sun and stars. Evolution of binary stars. Analysis of stellar atmospheres.

140. Stellar Systems and Cosmology. Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Properties of star clusters and galaxies, with special emphasis on Milky Way galaxy, Clusters and superclusters of galaxies. Extragalactic distance scale. Quasars and active galaxies. Topics in cosmology, including expansion of the universe, microwave background, galaxy formation from primordial fluctuations, and observational constraints on the Big Bang.

Mr. Morin, Mr. Wright (W)
180. Astrophysics Laboratory. Lecture, two hours; laboratory, four hours. Prerequisites: junior or senior standing in astrophysics, physics, or a related field, consent of instructor. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photography. Emphasis on use of computers for automatic collection of data and for processing 2-D astronomical images.

Mr. McLean, Mr. Wright (F)

199. Special Studies (2 or 4 units). Prerequisites: senior standing in astrophysics or physics (with an outstanding record), consent of instructor. Special studies with an individual faculty member. With prior consent, course may be used to carry out a meritorious observing program at the UCLA students' observatory or, in special cases, with the 24-inch reflector.

Graduate Courses
Prerequisite to all graduate courses is consent of instructor. Courses 204A through 230C are offered in alternate years and consist of three quarters according to the following scheme: level A (Winter Quarter, four units) — a basic survey course presenting the minimum knowledge in the field expected of all students who wish to obtain the Ph.D., but who do not necessarily plan to specialize in the field covered by the course; level B (Spring Quarter, six units) — advanced level for those considering the possibility of taking up a research project in the field; level C (Fall Quarter, following academic year, 10 units) — individual research projects supervised by the instructor in the form of a laboratory. Course 240 is equivalent to the B courses.

200. Introduction to Graduate Study of Astronomy. Required of all new graduate students. Survey of various fields of astronomy and astrophysics; first acquaintance with working methods and with department. Survey of basic astronomical nomenclature, background in physics and mathematics outlined as required in graduate courses. Mr. Piavlic

201. Astrophysics of Solar System. Prerequisite: graduate standing or consent of instructor. Sun, solar phenomena, and solar-terrestrial relationships. Interplanetary, interstellar plasma physics, comets, meteors, meteors, satellites and planets, planetary atmospheres. Origin and evolution of solar system. Mr. Ulrich

204A-204B-204C. Observational Astronomy (4 units, 6 units, 10 units). Star catalogs and charts. Radiation measurements, photoelectric photometry, and solid-state detectors. Radio and infrared techniques. Spectroscopic observations. Includes laboratory work. Mr. McLean, Mr. Ulrich, Mr. Wright

204A-204B-204C. Interstellar Medium (4 units, 6 units, 10 units). Dynamics and physics of interstellar gas and dust. Radio observations of interstellar medium. Diffuse and planetary nebulae. Magnetic fields in space. Star formation. Topics in high-energy astrophysics. Mr. Jura, Mr. Turner, Mr. Zuckerman

217A-217B-217C. Stellar Phosphores (4 units, 6 units, 10 units). Physics of stellar phosphores and radiative transfer. Continuous and line spectra of stars. Chemical abundances in stars. Stars with extended and unstable atmospheres. Mr. Piavlic, Mr. Ulrich

230A-230B-230C. High-Energy Astrophysics (4 units, 6 units, 10 units). High-energy radiation processes. Observational techniques of X-ray and gamma-ray astronomy. Theory and observational results of X-ray and gamma-ray sources, pulsars, radio galaxies, and quasars. Mr. Coroniti, Mr. Wright

240. Modern Problems in Astronomy and Astrophysics. Open to qualified graduate students in astronomy and in related fields (physics, atmospheric sciences, Earth and space sciences). Special topics offered by distinguished visiting professors. May be repeated for credit.

M285. Origin and Evolution of Solar System. (Same as Earth and Space Sciences M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading. Mr. Newman (Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses may be repeated at the discretion of the department:

596A. Directed Individual Studies (4 to 10 units). 596L. Advanced Study and Research at Lick Observatory (4 to 12 units), intended for graduate students who require observational experience, as well as those working on observational problems for their thesis. Mr. Kraft

599. Ph.D. Research and Writing (10 to 12 units).

Scope and Objectives
The atmospheric sciences present a wide variety of problems of compelling scientific interest and increasing social concern. This is exemplified by efforts to improve air quality, dependations caused by severe storms and floods, attempts to control or modify weather phenomena, problems of long-range weather forecasts and climate change, and expanding scientific frontiers into our outer atmosphere and atmospheres of other planets.

The department offers a broad curriculum in dynamic and synoptic meteorology, atmospheric physics and chemistry, and upper atmosphere and space physics.

The Bachelor of Science degree qualifies students for entry-level technical positions or represents valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

Bachelor of Science Degree
Preparation for the Major

The Major
Required: Atmospheric Sciences 104A, 104B, 104C, CM140, 181, Physics 131; three courses from Atmospheric Sciences C105, C141, C142, 143, 144, 145, 151; two courses from Physics 110A, 110B, 112, M122, 132, 140, Chemistry and Biochemistry 110A, 110B, Mathematics 135A, 135B, 136, 140A, 140B. Students preparing for graduate studies in atmospheric chemistry should take Chemistry and Biochemistry 11B, 11C, 110A, 110B; students preparing for graduate studies in atmospheric physics and chemistry should take Atmospheric Sciences 145, Physics 140, Mathematics 135A-135B, 140A; students preparing for graduate studies in upper atmosphere and space physics should take Atmospheric Sciences 145, C154, Physics M122; students preparing for graduate studies in dynamics/synoptics should take Atmospheric Sciences C141, C142, Physics 132.
Graduate Study
The Department of Atmospheric Sciences offers the M.S., C.Phil., and Ph.D. degrees.

Admission
There are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by the Graduate Admissions Office. Three letters of recommendation are required. For departmental brochures and information, write to Department of Atmospheric Sciences, 7127 Math Sciences, UCLA, Los Angeles, CA 90024-1565. In addition to students holding bachelor's degrees in meteorology or atmospheric sciences, graduates in related disciplines — astronomy, chemistry, engineering, geophysics, mathematics, oceanography, and physics — are encouraged to apply for graduate standing in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of the candidate's previous education.

Major Fields or Subdisciplines
Dynamic and synoptic meteorology; atmospheric physics and chemistry; upper atmosphere and space physics.

Master of Science Degree
Course Requirements
A total of nine courses must be completed, five of which must be in the 200 or 500 series. You must also attain a grade of B (3.0) or better in one course in each of two fields other than your field of specialization. The only formal course requirement beyond the UCLA general requirements is Atmospheric Sciences 270 in which you must present a formal seminar attended and graded by all faculty members. The graduate advisers may, at their discretion, prescribe courses in areas in which they deem students to have insufficient background to help them in preparing to pass the comprehensive examination.

Teaching Experience
There is no formal requirement for teaching experience, but it is strongly encouraged, and approximately 65 percent of our graduate students serve as teaching assistants for one or more terms.

Qualifying Examinations
If you selected the M.S. comprehensive examination plan, you must also take an in-depth oral examination in your area of research specialization. A doctoral committee is appointed to conduct the University Oral Qualifying Examination on your selected dissertation topic and related areas, and the final oral examination which is required of all students. Each of these examinations must be passed in no more than two attempts.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
This examination is required of all students.

Lower Division Courses
1. Introduction to Weather Maps and Weather Forecasting. Lecture, three hours. Introduction to weather maps and satellite imagery and their use in making a weather forecast. Discussions also include structure of the National Weather Service and services it provides to the general public. Course allows students to practice making weather forecasts for Los Angeles and one city east of the Rocky Mountains. Mr. Wakimoto (Sp)

2. Air Pollution. Lecture, three hours; discussion, one hour. Letters and Science general education requirement course for all students interested in causes and effects of high concentrations of pollution in the atmosphere. Topics include sources of pollution, gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interaction with biosphere and oceans; stratospheric pollution.

3. Introduction to the Atmospheric Environment. Lecture, three hours; discussion, one hour. Prerequisites: atmospheric sciences major. Course for majors parallel to course 3; discussion section included. Mr. Venkateswaran (W)

4. California Weather and Climate. Lecture, two hours; laboratory, two hours; field trips. Climate and weather in California. Topics include marine layer, sea-land breeze, low-level temperature inversion, severe weather, satellite interpretation, weather forecasting, and use of interactive computing in weather analysis.

5. Climates of Other Worlds. Lecture, three hours; discussion, one hour. Introduction to atmospheres of planets and their satellites in the solar system using information obtained during the recent planetary exploration program. Elementary description of origin and evolution of atmospheres on the planets. Climates on the planets, conditions necessary for evolution of life, and its resulting effect on planetary environment. Mr. Thorne (W)

6. Climate and Climatic Change. Lecture, three hours; discussion, one hour. Course specifically designed to satisfy in part the Letters and Science general education requirement of students majoring outside the physical sciences. Introduction to physical causes of climate, classification of climate, and global distribution of climate types. Description of climate changes over time scales ranging from lifetime of Earth to El Nino events. Discussion of causes of climatic change (e.g., long-term steady increase in solar luminosity, short-term fluctuations in solar luminosity, changes in Earth's orbit, changes in atmospheric composition, volcanic clouds, anthropogenic changes such as increased CO2 and nuclear war).

7. State of the art in modeling and predicting climate. Mr. Mechos (Sp)

8. Clouds, Rain, and Storms. Lecture, three hours; discussion, one hour. The raindrop and the ice crystal. Relation of meteorological conditions to cloud types. Precipitation mechanisms from clouds. Different scales of atmospheric cloud organization. Description and dynamics of spectacular weather systems, ranging from tornados to hurricanes. Severe weather forecasting. Mr. Venkateswaran
10H. Introduction to Atmospheric Sciences. Lecture, three hours; discussion, one hour. Prerequisite: Physics 8D or exceptional performance in high school mathematics and physics or consent of instructor. Structure and analysis of the wave cyclone. Derivation of the Quasi-geostrophic omega equation. Diabatic effects on cyclogenesis. Modeling studies. Discussion of current research topics. Concurrently scheduled with course 2227. Mr. Blier (Sp)

C142. Atmospheric Circulations. (Formerly numbered 142.) Lecture, three hours; discussion, one hour. Prerequisite: course CM140. Observed mean structure and circulations of the atmosphere. Momentum, heat, and moisture budgets and energy cycle. Rotating annulus experiments. Numerical simulation of general circulation. Boundary layer and cloud processes. Concurrently scheduled with course C201. Mr. Arakawa (W)

144. Micrometeorology and Air Pollution Meteorology. Lecture, three hours; discussion, one hour. Prerequisite: course C142. Wind and temperature structure in the surface layer; mesoscale weather and wind systems; turbulence and diffusion; evaporation; transport, diffusion, and transformation of atmospheric contaminants. Mr. Thorne (F)

145. Atmospheric Physics. Lecture, three hours; discussion, one hour. Prerequisites: Physics BE, 131. Physics of gases; properties and behavior of cloud particles; atmospheric electricity; solar and terrestrial radiation; scattering, absorption, and opacity; remote sensing. Mr. Thorne (F)

154. Solar Terrestrial Physics. (Formerly numbered CM154.) Lecture, three hours; discussion, one hour. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C202. Mr. Thorne (F)

161. Numerical Methods in Atmospheric Sciences. Lecture, two hours; laboratory, three hours. Prerequisites: course C141 and Program in Computational and Mathematical Sciences C142. Basic numerics, including first, second, and third order models. Atmospheric dynamics. Dry adiabatic processes. Phase changes of water and moist adiabatic processes. Introduction to cloud microphysics. Gravitational stability. Mr. Arakawa (W)

101. Meteorology and Society. Lecture, three hours; discussion, one hour. Prerequisite: upper division or graduate standing. Intended for students in architecture, urban planning, law, and engineering, and all students interested in impact of weather on society. Impacts of weather on society. Climate and atmospheric planning. Weather and engineering structures. Forensic meteorology in civil cases. Uses and abuses of short- and long-term weather forecasts and their current validity. Status of attempts to modify climate—In particular, to increase or decrease rainfall. Meteorology and public policy—in particular, air pollution legislation and acid rain investigations. Mr. Wakimoto (Sp)

104A. Atmospheric Thermodynamics. Lecture, three hours; discussion, one hour. Prerequisites: Chemistry 11A, Mathematics 33B, Physics 8C or consent of instructor. Basic thermodynamics, including first, second, and third laws. Atmospheric statics. Dry adiabatic processes. Phase changes of water and moist adiabatic processes. Introduction to cloud microphysics. Gravitational stability. Mr. Neelin (F)

104B. Introduction to Dynamic and Synoptic Meteorology I. Lecture, two hours; laboratory, three hours. Prerequisites: courses 104H, 11, Atmospheric Continuum. Properties of velocity field: vorticity, divergence, streamlines and trajectories, stream function and velocity potential. Equation of motion for fluids. Special atmospheric cases such as geostrophic wind, gradient wind, ageostrophic wind, and frontal wind. Mr. Yashima (W)

104C. Introduction to Dynamic and Synoptic Meteorology II. Lecture, two hours; laboratory, three hours. Prerequisite: course 104B. Conservation of mass and equation of continuity. Transformation of vertical coordinate. Circulation and the vorticity equation. Thermodynamic energy equation. Mr. Wakimoto (Sp)

105. Advanced Synoptic Meteorology. Lecture, three hours. Prerequisite: course 104C or consent of instructor. Structure and analysis of the wave cyclone. Characteristics of frontal zones, Frontogenesis. Diagnosis of vertical velocity; quasi-geostrophic omega equation; derivation, applications, and alternative formulations of the Eyre-Eliasen equation. Diabatic effects on cyclogenesis. Modeling studies. Discussion of current research topics. Concurrently scheduled with course C2227. Mr. Blier (F)

C201. Atmospheric Circulations. Lecture, three hours; discussion, one hour. Prerequisite: course CM140. Observed mean structure and circulations of the atmosphere. Momentum, heat, and moisture budgets and energy cycle. Rotating annulus experiments. Numerical simulation of general circulation. Boundary layer and cloud processes. Concurrently scheduled with course C142. Mr. Arakawa (W)

M203A. Introduction to Atmospheric Chemistry. (Formerly numbered M203A.) Lecture, three hours. Principles of physical chemistry, chemical kinetics, photochemistry, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate. Mr. Turco (F)

203B. Physics of Clouds and Precipitation. (Formerly numbered M203B.) Lecture, three hours. Survey of atmospheric physics of clouds and precipitation. Dynamics of moist air, phase changes of water substance, latent heats, moist adiabatic processes; elementary cloud dynamics; cloud microstructure; microphysics of cloud droplets, nucleation phenomena, droplet hydrometeors, aerosol formation, atmospheric optics; radiative processes; thermal radiation, infrared radiation transfer in atmospheres, energy balance relationships; solar radiation, Rayleigh and Mie scattering, atmospheric optics; radiative climatology, energy balance and climate; remote sensing of atmospheres. Mr. Turco (Sp)

C205A. Solar Terrestrial Physics. Lecture, three hours; discussion, one hour. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C154. Mr. Thorne (F)

190. Operational Meteorology (2 units). Laboratory, six hours. Prerequisite: junior or senior standing in atmospheric sciences. Daily contact with weather data and forecasting; satellite and radar data. Introduction to weather forecasting for aviation, air pollution, marine weather, fire weather, and public use. Includes daily weather map discussions and visits to observing, radiosonde, and radar installations. Mr. Thorne (F,Sp)

C199. Special Studies in Meteorology (2 or 4 units). Prerequisite: consent of instructor. Special individual study. Mr. Turco, Mr. Venkateswaran (Sp)

212A. Numerical Methods in Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite or corequisite: course C202. Basic numerical methods for initial-boundary value problems in fluid dynamics, with emphasis on applications to atmospheric and oceanographic problems. Finite difference methods and truncation error. Linear and nonlinear computational instability. Computational modes and computational boundary conditions. Nonlinear shallow-water equation model. Spectral methods. Mr. Mechoso (W)

212B. Numerical Modeling of the Atmosphere I. Lecture, three hours. Prerequisites: courses C201 or C202 or 212A, or consent of instructor. Computational design of dynamical processes in numerical weather prediction and climate simulation models. Basic governing equations. Vertical and horizontal coordinates. Quasi-geostrophic and balanced models. Shallow-water equation model. Three-dimensional primitive equation models. Limited-area modeling. Mr. Arakawa (F)

214A. Tropical Dynamics. (Formerly numbered 214A, 214B.) Lecture, three hours. Radiative transfer and energy-balance models (EBMs). Mean equilibration climates and their stability. Coupled EBM and land-ocean-atmosphere general circulation model. History of our planet. Continuum mechanics of ice sheets and mantle. Oscillatory models of Quaternary glaciation cycles. Transitions from equilibrium to periodic and aperiodic climate behavior. Climatic predictability. Mr. Ghil

218. Dynamics of the Atmosphere-Ocean System. Lecture, three hours. Transfer of properties between atmosphere and ocean; wind-driven ocean currents; coastal upwelling. Air-sea interactions. Effects of oceans on climate. Mr. Neelin (Sp)

220. Dynamics of the Middle Atmosphere. (Formerly numbered 255.) Lecture, three hours. Prerequisites: courses C201, C202. Structure and composition of the middle atmosphere. Waves in the middle atmosphere, including tides, planetary waves, and gravity waves. Quasi-biennial oscillations. Stratospheric sudden warmings. Semiannuatl oscillations. Wave-mean flow interactions. Interactions between middle and lower atmosphere. Mr. Fritschen (F)

224A. Atmospheric Turbulence. (Formerly numbered 208A.) Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Surface and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. Mr. Wu (W)

M224B. Atmospheric Diffusion and Air Pollution. (Formerly numbered M206B.) Lecture, three hours. Sources and nature of atmospheric pollution; effects of pollution on air quality; meteorological factors and air pollution potential. Meteorological aspects of air pollution. Mr. Blier (F)

228. Mesoscale Meteorology. (Formerly numbered 201.) Lecture, three hours. Prerequisite: course 226. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on design and implementation project. Mr. Wakimoto (W)

230A. Atmospheric Chemistry I. (Formerly numbered 221A.) Lecture, three hours. Prerequisite: course M203A or consent of instructor. Photochemistry of stratosphere, chemistry of physical surfaces and solutions; precipitation chemistry and acid rain; atmospheric organic chemistry; regional and global biochemical cycles; current issues in global change. Mr. Turco

230B. Atmospheric Chemistry II. (Formerly numbered 221B.) Lecture, three hours. Prerequisite: course M203A or consent of instructor. Photochemistry of stratosphere and mesosphere; basic ionosheric processes; stratospheric pollution and the ozone layer; physical chemistry of upper atmosphere; and clouds and aerosols; comparative photochemistry of planetary atmospheres; observational techniques and results. Mr. Turco

232. Chemical Transport Modeling. Lecture, three hours. Prerequisites: courses M203A, M203B, and 230B, or consent of instructor. Equations of tracer transport and chemical kinetics modeling in three dimensions; numerical techniques; coupled simulations of gas-phase and aerosol microphysics and chemistry; computational versus observational results; current problems in tracer modeling. Mr. Turco

234A. Cloud and Precipitation Physics I. (Formerly numbered 222A.) Lecture, three hours. Prerequisite: course 203B or consent of instructor. Microstructure of atmospheric clouds; structure of the three phases of water substance, including surface effects; thermodynamic theory for equilibrium between the three phases of water substance, including surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals. Mr.Turco

234B. Cloud and Precipitation Physics II. (Formerly numbered 222B.) Lecture, three hours. Prerequisite: course 234A. Theory of growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrodynamics of rigid bodies in a viscous medium; hydrodynamics of rain drops, and atmospheric spherical ice particles; growth of cloud drops and atmospheric ice particles by collision. Mr. Lew

240A. Radar Meteorology. (Formerly numbered 226B.) Lecture, three hours. Radar detection of spherical and nonspherical particles; use of radar in studying size distributions of cloud and precipitation particles, precipitation intensity and amount, updraft velocities, horizontal wind speed, and turbulence; radar observations of convective clouds, Boston thunderstorms, hurricanes, squall lines, and fronts; clear air echoes. Mr. Wakimoto

240B. Remote Sensing. (Formerly numbered 256.) Lecture, three hours. Prerequisites: courses 203C and 240B, or consent of instructor. Radar and optical techniques of remote sensing; atmospheric spectroscopy; methods based on scattering, absorption, and extinction; passive and active techniques; inversion methods; remote sensing of terrestrial meteorological parameters; retrieval of atmospheric and oceanic parameters; remote sensing of ice and snow, bodies and surfaces; and remote sensing of planetary atmospheres. Mr. Venkateswaran

244. Methods of Radiative Transfer. (Formerly numbered 238.) Lecture, three hours; laboratory, one hour. Prerequisites: courses 203C and 240B, or consent of instructor. Analytical and numerical methods of radiative transfer; pure scattering atmospheres, and Chandrasekhar's solution; discrete ordinates; n-stream representations; exponential sums; Monte Carlo techniques and three-dimensional problems; computational laboratory. Mr. Venkateswaran (Sp)

Upper Atmosphere and Space Physics

250A. Solar System Magnetohydrodynamics. (Formerly numbered 240A.) Lecture, three hours. Prerequisite: course C205A or consent of instructor. Derivation of the mathematical model for an infinitely extended, generalizened Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to dynamical and thermodynamical laws of solar and planetary magnetospheres and to solar wind-magnetosphere-ionosphere coupling. Mr. Siscoe

250B. Solar System Microscopic Plasma Processes. (Formerly numbered 240B.) Lecture, three hours. Prerequisite: course C205A or consent of instructor. Derivation of the mathematical model for an infinitely extended, generalizened Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to dynamical and thermodynamical laws of solar and planetary magnetospheres and to solar wind-magnetosphere-ionosphere coupling. Mr. Siscoe

256. Ionospheric Electrodynamics. (Formerly numbered 240C.) Lecture, three hours. Prerequisites: courses 203C and 240B, or consent of instructor. Ionospheric structures, currents, and electric fields; equatorial and high-latitude ionospheres; ionospheric control of magnetospheric phenomena. Mr. Venkateswaran (Sp)

257. Radiation on Belt Plasma Physics. (Formerly numbered 247.) Lecture, three hours. Prerequisite: course 205B or consent of instructor. Turbulent plasma instabilities and their relation to satellite observations and magnetospheric structure. Processes responsible for charged particle heating, and transport of energetic solar radiation belt particles. Mr. Thorne
Special Studies

270. Seminar in Atmospheric Sciences (2 units). (Formerly numbered 260.) Lecture, one hour. May be repeated for credit. S/U or letter grading.

271. Seminar in Atmospheric Dynamics (2 units). (Formerly numbered 261.) Lecture, one hour. May be repeated for credit. S/U or letter grading.

M272A-M272B-M272C. Seminars in Climate Dynamics (2 to 4 units each). (Formerly numbered M270A-M270B-M270C.) (Same as Earth and Space Sciences M270A-M270B-M270C and Geography M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle, Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading. Mr. Ghil

273. Seminar in Atmospheric Physics (2 units). Lecture, one hour. May be repeated for credit. S/U or letter grading.

274. Seminar in Atmospheric Chemistry (2 units). Lecture, one hour. May be repeated for credit. S/U or letter grading.

281. Special Topics in Dynamical Meteorology (2 to 4 units). (Formerly numbered 219.) Individual meetings with instructor to be arranged. Content varies from year to year. S/U grading. Mr. Blier (F)

283. Special Topics in Atmospheric Physics (2 units). Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

284. Special Topics in Atmospheric Chemistry (2 units). Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

285. Special Topics in Solar Planetary Relations (2 to 4 units). (Formerly numbered 249.) Individual meetings with instructor to be arranged. Selected topics of current research interest in solar, magnetic, or ionospheric physics. Mr. Siscoe, Mr. Thorne, Mr. Venkateswaran

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Ghil

596. Directed Studies for Graduate Students (2 to 8 units).

597. Preparation for Comprehensive Examinations (2 to 8 units).

598. Research and Preparation of M.S. Thesis (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Scope and Objectives

Studies in biology touch every aspect of life, and seeking answers to the problems of living organisms is a major challenge to modern biology. To meet this challenge, the Biology Department offers a wide spectrum of undergraduate and graduate instruction in population, organismic, developmental, cell, and molecular biology. All of these subject areas relate in some way to practical problems facing contemporary society, and all influence individual and collective decisions on matters ranging from environmental degradation to viruses and cancer.

The Bachelor of Science degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

Bachelor of Science Degree

The Bachelor of Science degree is divided into five areas of concentration which build on similar lower division introductory courses and differ primarily in the upper division requirements. The first area of concentration — general biology — is designed for students who desire exposure to a wide range of biological subjects and for most students who will later seek admission to health sciences-related professional schools. The program offers great flexibility and can serve as adequate preparation for subsequent graduate study in any field
of biology. The remaining four areas of concentration — ecology, behavior, and evolution (EBE), marine biology (MB), molecular, cellular, and developmental biology (MCD), and plant biology (PB) — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

Pre-Biology Major

Students who have not completed all the courses required as preparation for the major are considered pre-biology majors. After completing those courses with a grade of C or better in each, students must petition to enter the biology major in the Undergraduate Advising Office, 2312 Life Sciences.

In order to be admitted as pre-biology majors, transfer students who have 80 or more units must have completed one year of general chemistry with laboratory, Biology 5 and 7, equivalent, and at least one of the following:

1. one year of calculus,
2. one year of calculus-based physics, or
3. two organic chemistry courses with laboratory.

General Biology Concentration

Preparation for the Major: Biology 5, 6, 7, 8, 8L; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: One morphology and systematics course (Biology 100, 101, 103, 105, 110, 153), or Microbiology and Moleculare Genetics 101; one developmental and molecular biology course (Biology 138, 141, 143, 144, 146, or 149); one physiology course (Biology 158, 162, 166, 167, or 170); two additional upper division biology courses; Chemistry and Biochemistry 132A, 132B/132BL, 153A/153AL; four additional upper division courses in biology, chemistry, mathematics, (except Mathematics 104, 106), microbiology, or from Biometrics 110, Biostatistics 100B, 100C, Earth and Space Sciences 116, Geography 112.

Ecology, Behavior, and Evolution (EBE) Concentration

Preparation for the Major: Biology 5, 6, 7, 8, 8L; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 15; Mathematics 31A, 31B, 32A, 32B, 33A, Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: One morphology and systematics course (Biology 100, 101, 103, 105, 110, or 152); one physiology course (Biology 162, 166, 167, or 170); three ecology, behavior, and evolution courses (Biology 111, 120, 122, 129, or 135); one field quarter consisting of two to four courses from the Field Biology Quarter (FBQ), Catalina Marine Biology Quarter (CMBQ), or equivalent; additional upper division courses in biology, chemistry, mathematics (except Mathematics 104, 106), microbiology, or physical sciences (recommended: Biology C119, M127, 130, 146, 168 in ecological and behavioral processes and Biology 103, 107, 112, 113A, 114, 115 in taxon-oriented biology; Chemistry and Biochemistry 132A, 132B/132BL, 153A/153AL may be substituted for Chemistry and Biochemistry 15, Mathematics 32B, 33A).

Marine Biology (MB) Concentration

Preparation for the Major: Biology 5, 6, 7, 8, 8L; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL, 153A; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL; Statistics 50; Earth and Space Sciences 15 or Atmospheric Sciences 6.

The Major: Biology C109; one marine organismic biology course (Biology 100, 105, or 112); one physiology course (Biology 128, 162, 166, 167, or 170); one ecology, behavior, or evolution course (Biology 120, 122, 129, or 135); one field quarter consisting of four courses from the Catalina Marine Biology Quarter (CMBQ); two physical, chemical, or geological oceanography courses from Atmospheric Sciences CM140, 143, Chemistry and Biochemistry 103, 154, Earth and Space Sciences 130, 131, or 144, Geography 100, 101, or 125, Mechanical, Aerospace, and Nuclear Engineering 103 (strongly recommended) or 150A.

Molecular, Cellular, and Developmental Biology (MCD) Concentration

Preparation for the Major: Biology 5, 6, 7, 8, 8L; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: Three developmental and molecular biology courses (Biology 138 or 141 and two courses from 143, 144, C149); Chemistry and Biochemistry 132A, 132B/132BL, 153A/153AL; three biological chemistry courses (Chemistry and Biochemistry 110A, 153B, 153C); one of the following laboratory courses or sets of laboratory courses: Biology 158, 162, 166 or 167, CM185/M186/M187, 145A and 157, or 171 and 172A; two additional upper division courses from the following list not used to satisfy another requirement: Biology 110, 138, 141, 145A, C149, 154, CM156, 157, 158, 162, 166, 171, 174, M175A, CM185, 190A through 190D, 199, Microbiology and Molecular Genetics 101.

Plant Biology (PB) Concentration

Preparation for the Major: Biology 5, 6, 7, 8, 8L; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL, 153A; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: Biology 146 or 162; one plant morphology or anatomy course (Biology 100, 101, or 152); two molecular or cellular plant biology courses (Biology 141, 144, C149); one ecology or evolution course (Biology 103, 120, or 122); one field quarter course involving research in plant biology (Biology 124, 128, or 148) or a laboratory internship (Biology 190 series or 199) which requires a written paper on some aspect of plant research; additional upper division courses in biology, chemistry, computer science, geography, or microbiology.

Additional Requirements

1. A six-unit course counts as only one course toward requirements for the major.
2. A maximum of eight units of Biology 190 or four units of Biology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.
3. Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade with at least a 2.0 (C) overall average in all courses applied toward the major.

Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Biology 190A-190B.

Field Biology

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Catalina Marine Biology Quarter (CMBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter occurs during Spring Quarter and involves some combination of Biology 103, 107, 113B, 114, 115, 124, C126, 128, 131, and 132. The Catalina Marine Biology Quarter occurs during Fall Quarter and includes some combination of Biology 102, C104, 123, 147, 148, 164, and 165. To participate, you must enroll in all courses in the respective program. It is strongly recommended that you complete Biology C109 or C215 prior to applying for CMBQ. Participants in both programs are selected by personal interview during Winter Quarter. Although most participants are upper division biology majors, both programs are available to any upper division student with adequate biological background. Information and applications are available in the Undergraduate Advising Office.
Graduate Study

The department offers M.A. and Ph.D. degrees in Biology, with specialization in a wide spectrum of fields. Students who plan to enter graduate school are urged to seek the advice of staff members in their field of interest.

Admission

The department encourages applications from students in all areas of science, but expects successful applicants to have or to acquire a background comparable to the requirements for the bachelor's degree in biology at UCLA. A background in chemistry, physics, and mathematics is desirable. Deficiencies in these or other subjects must be made up at the earliest opportunity. Undergraduates who are prospective applicants should remedy their deficiencies by preparatory study at an appropriate institution. The Graduate Division or the department may initially restrict applicants with less distinguished accomplishments.

The department is organized for administrative purposes into two divisions based on mutual interest. Applications should be directed to either Division I (molecular, cell, and developmental biology) or Division II (integrative biology: cells, organisms, and populations). The major fields and subdisciplines are listed under faculty interests in the departmental brochure.

All applicants must take the General Test (verbal, quantitative, and analytical) of the Graduate Record Examination (GRE). The Subject Test in Biology is also required.

Three letters of recommendation are required. These should be from professors, supervisors, or others who may provide an evaluation of motivation, accomplishments or potential in research, scholarly activities, teaching, and related academic functions.

Applications, departmental brochures, and additional information may be obtained from the Graduate Affairs Office, Department of Biology, 2316 Life Sciences, UCLA, Los Angeles, CA 90024-1606.

Program of Study

Study consists of coursework and research within the department and within related programs in biochemistry, geology, microbiology, and molecular biology on campus. Opportunities are also available off campus for intensive study of marine biology at the Catalina Marine Science Center in Fall Quarter (CMQB), field biology in Spring Quarter (FBQ), and tropical biology through courses offered by the Organization for Tropical Studies. You also are required to complete the departmental written qualifying examination, given twice a year, at an early point in your graduate career.

Foreign Language Requirement

No foreign language is prerequisite to admission to the M.A. or Ph.D. program, and there is no uniform language requirement for obtaining the Ph.D. However, in the pursuit of certain sub specialties of biology, you may be required to gain proficiency in one or more foreign languages.

Master of Arts Degree

Admission

Applications are evaluated by the appropriate divisional admissions committee and are accepted for admission to Fall Quarter only.

Course Requirements

The program consists of at least nine courses completed in graduate standing, of which at least five must be graduate (200 series) courses. The remainder may be courses in the 100, 200, or 500 series as noted below. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum graduate course requirement. Courses graded S/U may not be applied toward the minimum requirement, except that an S/U-graded course outside the major and applicable to the degree may be applied, provided that no more than one such course is taken per term.

Specific course requirements are established for you by your guidance committee.

Thesis Plan

A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master's thesis committee of three faculty members. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the graduate division. The examination is graded pass, fail, or repeat. A failure requires dismissal. The second attempt at the examination is graded pass/fail. The examination must be completed by the end of the third year following first registration. You are advanced to candidacy following successful completion of this examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination may be waived by your doctoral committee.

Lower Division Courses

If you do not complete course prerequisites as listed below, you may be dropped from those courses.

1. Introduction to Modern Biology. Lecture, three hours; laboratory, two hours. Required for nonmajors. Courses 2 and 3 may be taken independently, concurrently, or in either sequence. Not open to students with credit for courses 5 or 7. Major themes in biology, including evolution, behavior, ecology, cell biology, photosynthesis, genetics, organismal diversity, and energetics as they relate to events occurring on our earth today.

2. Principles of Modern Biology. Lecture, three hours; laboratory, two hours. Designed for nonmajors. Courses 2 and 3 may be taken independently, concurrently, or in either sequence. Not open to students with credit for course 7. Examination of an integrative approach to specific anatomy and physiology of major organs and organ systems, including potential aspects of health, development, and disease.

3. Introduction to Human Physiology and Disease. Lecture, three hours; laboratory, two hours. Required for nonmajors. Courses 2 and 3 may be taken independently, concurrently, or in either sequence. Not open to students with credit for course 7. Examination of a wide range of topics on the structural and functional characteristics of the human body in health and disease.

4. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and ecology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of body temperature, and nervous system.

5. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and ecology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of body temperature, and nervous system.

6. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and ecology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of body temperature, and nervous system.

7. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and ecology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of body temperature, and nervous system.

8. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and ecology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of body temperature, and nervous system.

9. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and ecology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of body temperature, and nervous system.

10. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and ecology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of body temperature, and nervous system.

11. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and ecology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of body temperature, and nervous system.
5L. Organismic and Environmental Biology Laboratory. Discussion, two hours; laboratory, four hours. Prerequisite: course 5. Introductory biology laboratory, including selected topics on anatomy, physiology, behavior, and ecology of nonmammalian animals.

6. Ecology, Evolution, and Behavior. Lecture, three hours; discussion, two hours. Prerequisites: courses 5 and Mathematics 3A or 31A. Survey of principles of population and community ecology, behavioral ecology, population genetics, and evolution.

7. Introductory Cellular and Molecular Biology. Lecture, three hours; discussion, two hours. Prerequisites: courses 5 and Chemistry 11A, 11B, and 11C, or 15. Integrated introduction to cellular and subcellular biology, including cells and organelles, molecular biology, cell cycles, and developmental biology.

8. Introductory Genetics. Lecture, three hours; discussion/demonstration, 30 minutes. Prerequisite: course 5. Principles of Mendelian inheritance and chromosomal basis of heredity in prokaryotes and eukaryotes, recombination, biochemical genetics, mutation, DNA, genetic code, gene regulation, genes in populations.

8L. Cellular and Molecular Biology Laboratory (2 units). Laboratory experience with topics in courses 5L, 8 (may be taken concurrently). Introductory laboratory experience, including bacterial growth, mitosis and meiosis, genetics, molecular biology, and developmental biology.

10. Plants and Civilization. Lecture, three hours; demonstration, one hour. Designed for nonmajors. Origin of crop plants; man's role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history.

13. Evolution of Life. Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. Introduction to biological theory within the framework of evolutionary theory. Relationships of evolutionary thought to other areas of knowledge and society. Natural selection and origin of variation examined in context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on critical role of historical processes.

20. Introduction to Human Heredity. Lecture, two hours; discussion, one hour; laboratory, two hours. Not open to students with a prior college course in genetics; not intended to satisfy requirements of medical, dental, or veterinary programs. Principles of Mendelian and biochemical genetics and their biological basis introduced through lectures, readings, and laboratory exercises with Drosophila. Topics include prenatal development, Mendelizing factors, role of chromosomes in heredity, and role of genes in determination of phenotypes. Students are strongly encouraged to take both courses 100 and 101 since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

21. Field Biology. Lecture, three hours; discussion, one hour; laboratory, two hours; required field trips. Recommended (but not prerequisite): course 2. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals.

25. Oceans. Lecture, three hours; discussion, one hour. Not open to students in the sciences or to students with credit for Earth and Space Sciences 15. Limited to 40 students. Chemistry and physical and chemical processes that take place in oceans, with emphasis on their effects on organisms.

35. Mathematical Ideas in Biology. Lecture, three hours; discussion, one hour. Prerequisite: one year of calculus, consent of instructor. Use of mathematical ideas and analysis in formulation and evaluation of theories of individual and population growth, including models of birth and death, growth control, biological rate processes, and applications of random walk theory. Coverage of topics tailored to specific student interests.

40. AIDS and Other Sexually Transmitted Diseases: The Modern Plague. Discussion of biological basis of HIV infection and its progression to AIDS, using this as a knowledge base to examine the impact of AIDS epidemic on infrastructure of society. P/NP or letter grading.

70. Genetic Engineering and Society. Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for other course or permission of instructor. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society.

88A. Lower Division Seminar: Conservation of Biology. (Formerly numbered 88.) Discussion, three hours; one weekend field trip. Introduction to patterns of biological diversity; selection, management, and use of natural reserves; human aspects on diversity; and effects of governmental and nongovernmental actions on biological conservation.

88B. Lower Division Seminar: Origin of Life. Seminar, three hours. Prerequisites: courses 5, 5L, 6, or 8. A survey of the theories of the origin of life based on observations, experimental simulations, and speculations. Students are guided in making class presentations and in writing papers. P/NP or letter grading.

Upper Division Courses

Course 5L is prerequisite to course 8L and all upper division laboratory courses. Course 8 is prerequisite to all upper division courses in cell, molecular, and developmental biology. If you do not complete the prerequisites, you may be dropped from those courses.

100. Biology of Lower Plants (6 units). Lecture, four hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. Introduction to biology of algae, fungi, and bryophytes, with emphasis on form, function, and development, and role of lower plants in the environment. Students are strongly encouraged to take both courses 100 and 101 since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

101. Biology of Vascular Plants (6 units). Lecture, four hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. Introduction to the diversity in form and reproduction of vascular plants, with emphasis on development, evolution, and function. Students are strongly encouraged to take both courses 100 and 101 since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

102. Biology of Marine Invertebrates. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Morphology, systematics, life histories and natural history, ecology, behavior, and physiology of marine invertebrates, emphasis on local invertebrates of Southern California and their habitats. Given at Catalina Marine Science Center. Mr. Morin, Mr. Muscatine.

103. Plant Evolution and Systematics. Lecture, three hours; laboratory, three hours. Prerequisite: course 2 or 5 or consent of instructor. Evolution, systematics, morphology, principles of taxonomy, phyogeography, phylogenetic analysis, specialization, and natural history of plants. P/NP or letter grading. Mr. A. Gibson.

104. Experimental Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105, 129, and 166 or 167 (either may be taken concurrently). Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212. Mr. Morin.

105. Biology of Invertebrates (6 units). Lecture, three hours; laboratory/field trips, six hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates. Instructor, Mr. Muscatine.

106. Experimental Marine Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105, and 166 or 167 (either may be taken concurrently), or equivalent, or consent of instructor. Experimental biology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations. Mr. Muscatine.

117. Entomology (6 or 8 units). Prerequisites: courses 5, 5L, and 6, or consent of instructor. Strongly recommended for prospective CBSM students. Introductory to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C215.

110. Vertebrate Morphology. Lecture, three hours; laboratory, four hours. Prerequisites: courses 5, 5L, 6. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology. Laboratory study of selected vertebrates.

Mr. Van Valkenburgh.

111. Biology of Vertebrates. Lecture, three hours; demonstration/field trips/discussion, three hours. Prerequisites: courses 5, 5L, 6. Adaptations, behavior, and ecology of vertebrates. Mr. Vitt.

112. Ichthyology. Lecture, two hours; laboratory, six hours. Prerequisites: courses 5, 5L, 6, and 111, or consent of instructor. Limited to 24 students. Biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphologic, and coloration; and ecology of field trips examine fishes of the Southern California shoreline, tidelands, and coastal streams. Mr. Both.

113A. Herpetology. (Formerly numbered 113L.) Lecture, three hours; laboratory, four hours; two field trips. Prerequisite: courses 5, 5L, or 6. Field course restricted to biology of reptiles and amphibians of the world, covering current systematics, history, ecology, behavior, morphology, and physiology of these animals. Mr. Vitt.

113B. Field Herpetology. (Formerly numbered 113.) Prerequisites: courses 5, 6. Recommended: courses 111, 113A. Three weeks of off-campus research projects followed by two-week lecture course (three hours per day) and offered only as part of Field Biology Quarter. Basic lecture material currently scheduled with course C215.

Mr. Morin, Mr. Muscatine.

114. Ornithology. Lecture, two hours; laboratory/discussion/field trips, six hours. Prerequisites: course 111, consent of instructor. Limited enrollment. Systematics, distribution, physiology, behavior, and ecology of birds.
115. Mammalogy. Lecture, three hours; laboratory, four hours; field trips. Prerequisite: course 111 or equivalent, consent of instructor. Evolution, ecology, and behavior of mammals.

Ms. Van Valkenburgh

117. Vertebrate Paleontology. Lecture, three hours; laboratory, three hours. Prerequisite: course 110. Recommended: one general geology course. Limited enrollment. Fossil record of the evolution of vertebrates, with emphasis on morphology of primitive forms in the series from fish to mammal.

Ms. Van Valkenburgh

C119. Mathematical Ecology. (Formerly numbered 118.) Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course 219.

Mr. Vance

120. Evolution. Lecture, three hours; discussion, two hours. Prerequisite: completion of preparation for the major courses. Introduction to historical, methodological, and technical aspects of natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. P/NP or letter grading.

Mr. Buth, Mr. Cody, Mr. Hespenheide

121. Molecular Biology and Evolution. Lecture, three hours; discussion, one hour. Prerequisites: courses 7, 8. Not open to credit for students with credit for course 144. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution.

Mr. Brunk (W)

122. Ecology. Lecture, three hours; laboratory, three hours. Prerequisite: completion of preparation for the major courses. Highly recommended: Mathematics 31A, 31B, 32A. Recommended for biology majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distribution of populations, interactions between species, and structure, dynamics, and functions of communities and ecosystems.

Mr. Cody, Mr. Greenfield, Mr. Vance

123. Ecology of Marine Communities. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Full study of natural history and ecology of marine organisms and communities, involving independent research project. Offered at Catalina Marine Science Center.

Mr. Vance

124. Field Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, 10 hours. Prerequisites: courses 5, 6. Recommended: courses 111, 120, 122. Offered either as a four-unit-quarter-long course with weekend field trips or as a single field trip conducted between quarters, followed by lectures and tutorials for three weeks. When course is given as part of Field Biology Quarter, it is eight units and lasts for five weeks. Field and laboratory research in ecology; study of techniques for the collection and analysis of field data with emphasis on design and execution of field studies.

Mr. Cody

C128. Behavioral Ecology (4 or 8 units). (Formerly numbered 128.) Prerequisites: courses 5, 6, consent of instructor. Course either as a four-unit-quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course 227.

Mr. Greenfield, Mr. Narins

127. Soils, Plants, and Society. (Same as Geography M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B, and 11C, or equivalent, or consent of instructor. General treatment of soil development and morphology and physical and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and soil-related special studies examined on field trip to explain developmental phenomena.

Mr. Lunt

128. Plant Physiological Ecology (4 or 8 units). Lecture, three hours; laboratory-field, three hours. Offered either as a four-unit-quarter-long course or as an eight-unit Field Biology Quarter course with individual research projects correspondingly expanded. Study of plant-environmental interactions under natural conditions. Emphasis on transpiration and photosynthesis, both plants and vertebrates, and water movement in soil-plant-atmosphere continuum. Individual student projects.

Mr. Nobel

129. Behavior of Animals. Lecture, three hours; discussion, three hours. Prerequisite: course 111 or consent of instructor. Ecological significance, underlying mechanisms, and evolution of behavior, with special reference to animal sociology under natural conditions.

Mr. R. Gibson

130. Behavior Research Problems. Lecture, three hours; laboratory, two hours. Prerequisites: courses 5, 6, consent of instructor. Systems controls and nonobtrusive sensing procedures for behavior studies in laboratory and field. Rationale, design, and limitations of laboratory studies of behavior.

Mr. Kavanau

131. Insect Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, eight hours. Prerequisites: course 120 or 122, consent of instructor. Offered either as a four-unit-quarter-long course with weekend field trips or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly. Analysis of ecological roles of insects in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects.

Mr. Greenfield, Mr. Hespenheide

132. Field Behavioral Ecology (8 units). Lecture, two hours; laboratory or field trip, 10 hours. Prerequisites: courses 5, 6. Recommended: course 129. Five-week course offered only as part of Field Biology Quarter. Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects involving extended field trip.

Mr. Greenfield, Mr. Narins

C134. Physiological Ecology of Desert Animals (4 or 8 units). Lecture, three hours; laboratory, one hour; field trips, four hours. Prerequisites: courses 111, and 166 or 167 or 170. Offered either as a four-unit-quarter-long course with weekend field trips or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course 214.

Mr. Nagy

Mr. Taylor

136. Developmental Biology. Lecture, three hours; discussion, one hour. Prerequisite: completion of preparation for the major courses. Synopsis of fundamental concepts in embryology and survey of current topics in developmental biology.

Mr. Crews, Ms. Lengyel, Mr. Tobin

141. Molecular Basis of Plant Differentiation and Development. Lecture, three hours; discussion, one hour. Prerequisites: courses 5, 7, 8. In-depth study of basic processes of development and molecular aspects of the developmental process as it relates to the plant kingdom. Discussion of a variety of developing systems (protoplasts, fungi, lower and higher plants), with the goal of developing a unified concept of differentiation.

142. Seminar on Topics in Developmental Biology (2 units). (Formerly numbered 142A-142B-142C.) Prerequisite: course 138, consent of instructor. Undergraduate seminar on topics in developmental biology. Reading and group discussions on current research. P/NP or letter grading.

143. Molecular Cell Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 5, 7, 8. Chemistry courses through Chemistry 153A/153AL. Molecular biology as applied to study of eukaryotic cells. Molecular aspects of organelles such as nucleus, mitochondrion, cytoskeleton, golgi apparatus, plasma membrane, and extracellular matrix. Other topics include molecular evolution, cell cycle, and cell biology of cancer.

Mr. Grunstein, Mr. Simpson

144. Molecular Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 7, 8. Strongly recommended: Chemistry 135A/135AL. Course in molecular biology emphasizing synthesis, structure, function, and interactions of biological macromolecules.

145A-145B-145C. Molecular Biology Laboratory. Laboratory, 12 hours. Prerequisite: consent of instructor. Highly recommended: course 144. Course in experimental molecular biology in which students carry out original research under supervision. Space is limited, and arrangements must be made in advance with instructor. Mr. Sailer (F,W,Sp)

146. Physiochemical Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 5 and 7, or consent of instructor, and Physics 6C or equivalent. Physiochemical analysis of physiology of cells and organelles, with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction.

Mr. Nobel (F)

147. Biological Oceanography. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Introduction to general biology of marine algae, including the physical, chemical, and biological factors affecting composition and distribution of plankton. Natural history of major phytoplankton and zooplankton taxa; patterns of community structure and physiologic mechanisms; and interrelationships with both plants and vertebrates. Group and individual field projects. Offered at Catalina Marine Science Center.

Mr. Muscatine

148. Biology of Marine Plants. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Introduction to general biology of marine algae, including the physical, chemical, and biological factors affecting composition and distribution of plankton. Natural history of major phytoplankton and zooplankton taxa; patterns of community structure and physiologic mechanisms; and interrelationships with both plants and vertebrates. Group and individual field projects. Offered at Catalina Marine Science Center.

Mr. Muscatine

C149. Cell and Molecular Biology of Plants. (Formerly numbered 149.) Lecture, three hours; discussion, one hour. Prerequisite: completion of preparation for the major courses. Molecular and structural aspects of cells, with emphasis on plant-specific organelles (e.g., chloroplast, cell walls) as metabolic processes (e.g., photosynthesis, nitrogen fixation). Comparison with equivalent processes in algae and bacteria. Concurrently scheduled with course 220.

Mr. Thornber
150. Plant Chemical and Molecular Communication. Lecture, three hours; discussion, two hours. Prerequisite: completion of preparation for the major courses. Not open for credit to students with credit for course 166 or 170. Recommended for students with interests in zoology or conservation biology. Emphasis on functional adaptations. Mr. O'Lague

151. Principles of Neurobiology. Lecture, three hours; discussion, one hour. Prerequisite: course 166 or consent of instructor. Introduction to basic principles of neurobiology, including description of the structure of neurons and nerve cells; membrane mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; properties of synaptic transmission; information transduction and coding; regulation of body temperature; development of and toxic interactions between cells of the nervous system. Mr. O'Lague

172A-172B. Introductory Laboratory in Neurophysiology. Laboratory, eight hours. Prerequisite: course 171 or consent of instructor. Limited enrollment. Courses must be taken concurrently. Laboratory investigation of function of central and peripheral nervous systems in invertebrates and vertebrates. Emphasis on electrophysiological approaches to basic neurophysiological problems. Mr. O'Lague

173. Anatomy and Physiology of Sense Organs. Lecture, three hours; discussion, one hour. Prerequisite: course 171 or equivalent. Anatomy and physiology of sense organs, with emphasis on comparative aspects. Mr. Nicklas

174. Advanced Molecular Biology. Lecture, three hours. Prerequisites: course 144 with a grade of B— or better or consent of instructor. Chemistry 132B/132BL, 153A/153AL, 153C. Course in advanced molecular biology with emphasis on advanced topics selected from emerging fields in all branches of molecular biology. P/NP or letter grading. Mr. Kasamatsu, Mr. Lake, Mr. Ray

175A. Neuroscience: From Molecules to Mind—Cellular Mechanisms (5 units). (Same as Kinesiology M180A and Psychology M117A.) Lecture, four hours; discussion, one hour. Prerequisites: courses 5, 7, and Physics 3B or 6B or 8C, or consent of instructor. Cellular physiology, pharmacology, molecular biology, and development of the nervous system. P/NP or letter grading.

175B. Neuroscience: From Molecules to Mind—Integrative Mechanisms (5 units). (Same as Kinesiology M180B and Psychology M117B.) Lecture, four hours; discussion, one hour. Prerequisite: course 171 (or Kinesiology M101A or Psychology 110) or M175A (or Kinesiology M180A or Psychology M117A) or consent of instructor. Central and reflex mechanisms of homeostasis, sensory information processing, and motor control. P/NP or letter grading.

175C. Neuroscience: From Molecules to Mind—Neural Bases of Behavior (5 units). (Same as Kinesiology M180C and Psychology M117C.) Lecture, four hours; discussion, one hour. Prerequisite: course M175B (or Kinesiology M180B or Psychology M117B) or Kinesiology 126 or Psychology 115 or consent of instructor. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

179. Invertebrate Endocrinology. Lecture, three hours. Prerequisite: course 156 or 167 or consent of instructor. Introduction to invertebrate endocrine systems. Mr. Engelman

181. Parasitology and Symbiosis (6 units). Lecture, three hours; laboratory, six hours. Prerequisites: courses 5, 7. Introduction to principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man. Mr. MacNiss

182. Experimental Parasitology. Laboratory, eight hours. Prerequisite: consent of instructor. Introduction to use of parasites in experiments concerning basic biological problems and to problems concerning parasitism. Mr. MacNiss

185. Immunology. Formerly numbered M185. (Same as Microbiology CM185 and Immunobiology CM145.) Lecture, three hours; discussion, one hour. Prerequisites: course 8, Chemistry 132B/132BL, 153A/153AL. Recommended corequisite: Chemistry 153C. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cell immune reactions. Concurrently scheduled with course CM285. Mr. Clark

186. Experimental Design in Immunology. (Same as Microbiology M186 and Microbiology and Immunology CM186.) Laboratory, 12 hours. Prerequisites: courses 132B/132BL or Chemistry 153AL. Recommended corequisite: course CM185, consent of instructor. Corequisite: course M186. Student presentation of selected papers from immunology literature. Designed to serve as forum for critical analysis of research papers. Mr. Clark

188. Seminar on Biology and Society (2 units). Prerequisite: consent of instructor. Investigations and discussions of current social and environmental issues, including substantial biological considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit.
M189A-M189B. Theoretical Behavioral Ecology. (Same as Anthropology M189A-M189B.) Lecture, three hours. Prerequisites: one upper division introduction to behavioral ecology course, one undergraduate mathematics course (preferably calculus or probability and statistics). Course M189A or consent of instructor is prerequisite to M189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods.

Mr. Boyd

190A-190D. Honors Research in Biology (2 to 4 units each). Prerequisites: course 5L, senior standing, consent of undergraduate adviser. Individual research designed to broaden and deepen students' knowledge of some phase of biology. Must be taken with Biology Department faculty for at least two terms and for a total of at least eight units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A research project must be presented to undergraduate adviser each term a 190 course is taken. A maximum of eight units may be applied toward biology major. (F,W,Sp)

199. Special Studies (2 to 16 units). Prerequisites: course 5L, consent of instructor and undergraduate adviser based on written proposal outlining the study or research to be undertaken. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than eight units of course 199 in any one term must obtain authorization from department chair and appropriate dean. Only one 199 course may be applied toward biology major. (F,W,Sp)

Graduate Courses

Consent of instructor is required for admission to all graduate courses. Additional prerequisites are stated in the course descriptions.

201. Use of the Computer in Biology (2 units). (Not the same as course 201 prior to Spring Quarter 1989.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading. (F,W)

Mr. Simpson

202. Principles of Systematics and Taxonomy. Lecture, three hours; laboratory, three hours. Prerequisites: course 120. Concepts, principles, and methods involved in the inference of evolutionary relationships and application of biological nomenclature.

Mr. Buth

203. Marine Botany and Physiology. Lecture, three hours; discussion, one hour; laboratory, six hours; experimental project. Prerequisites: graduate standing, consent of instructor. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological and ecological aspects. Laboratory techniques in culture and physiological, ecological, and biochemical investigation of algae. Given at Catalina Marine Science Center.

204. Advanced Biology of Algae. (Formerly numbered 204A.) Lecture, four hours; discussion, one hour. Prerequisites: consent of instructor. Consideration of current research in experimental physiology and biochemical aspects of photosynthesis. Topics include discussion of appropriate aspects of chemical and physical oceanography and limnology; algal physiology; biochemistry, physiological ecology, and algal processes in ocean and freshwater habitats.

Mr. Chapman

205. Marine Invertebrate Biology. Lecture, four hours; laboratory, eight hours. Prerequisites: consent of instructor. Functional morphology, life histories, and systems of marine invertebrates of all major classes and most minor taxa; emphasis on the living animal and its habitat. Given at Catalina Marine Science Center. (F,W)

206. Advanced Ichthyology. Lecture, three hours; laboratory, three hours. Prerequisites: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit. (F)

Mr. Buth

208. Advanced Vertebrate Morphology. Lecture, two hours; laboratory, eight hours. Prerequisites: course 110 or equivalent, consent of instructor: Emphasis on a functional approach to evolution of vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptations in independent project required. May be repeated once for credit. (F,W)

Ms. Van Valkenburgh

209. Behavior of Arthropods. Lecture, three hours; discussion, one hour. Prerequisites: course 105 or 107 or equivalent, consent of instructor. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required. (F)

Mr. Greenfield

210. Advanced Ornithology. Lecture, two hours; laboratory, two hours; fieldwork, two hours. Prerequisites: course 114 or equivalent, consent of instructor. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociality).

Mr. Ahmed

211. Physiology and Ecology of Digestion. (Not the same as course 211 prior to Spring Quarter 1989.) Lecture, two hours; discussion, two hours; laboratory, two hours. Prerequisites: course 166 or 167 or 170 or equivalent. Principles of digestive, respiratory, and integumentary systems and intestinal adaptations to diet, stage of development, and nutritional state. Principles of digestion and membrane transport emphasized in lectures and discussion sections; modern techniques taught in laboratory. Students conduct individual projects in lab and field.

Mr. Obst

212. Experimental Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105, 129, and 166 or 170 (either may be taken concurrently). Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course 218.

Mr.荡

214. Physiological Ecology of Desert Animals (4 or 8 units). Lecture, three hours; laboratory, one hour; field trips, four hours. Prerequisites: courses 111, and 166 or 167 or 170. Offered either as a four-unit quarter-long course with six field trips or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid environment. Concurrently scheduled with course 213.

Mr. Nagy

215. Introduction to Marine Science. (Formerly numbered 215.) Lecture, three hours; laboratory, three hours; weekend field trips. Prerequisites: courses 1, 5L, and 6, or consent of instructor. Strongly recommended for prospective CBMQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and their communities. Concurrently scheduled with course C109.

216. Quantitative Methods in Behavior and Ecology. Lecture, two hours; laboratory, six hours. Prerequisites: course 122 or 129 or equivalent, consent of instructor. Quantitative methods of data collection and analysis in behavioral and ecological research. Lectures review general nature of quantitative problems that arise in behavior and ecological methods used to solve them. Laboratory exercises emphasize analysis, using comprehensive, statistical software routines on personal microcomputers, of the kinds of data that frequently arise in field biological research.

Mr. R. Gibson

217. Marine Ecology. Lecture, four hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; articulated marine invertebrates. Given at Catalina Marine Science Center. (F)

Mr. Vance

218. Oceanology. Lecture, four hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Ecology and dynamics of pelagic and benthic associations; populations, productivity, seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanography. Given at Catalina Marine Science Center.

C219. Mathematical Ecology. (Formerly numbered 215.) Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world may be the same or different. We discuss how and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C119.

Mr. Taylor, Mr. Vance

220. Cell and Molecular Biology of Plants. Lecture, three hours; discussion, three hours. Prerequisites: graduate standing, molecular and structural aspects of cells, with emphasis on plant-specific organelles (e.g., chloroplasts, cell walls) as metabolic processes (e.g., photosynthesis, nitrogen fixation). Comparison with equivalent processes in marine and freshwater bacteria. Concurrently scheduled with course C149.

Mr. Thornber

224. Marine Molecular Biology (8 units). (Formerly numbered 224T.) Lecture, three hours; laboratory, eight hours. Prerequisites: background in statistical software routines on personal microcomputers, of the kinds of data that frequently arise in field biological research. Consent of instructor. Ten-week intensive course designed to train marine biologists in advanced techniques of cell and molecular biology. Independent project required. Given at Catalina Marine Science Center. (F)

M226A. Principles of Microbial Pathogenesis. (Same as Microbiology M226A and Microbiology and Immunology M226A.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. Lecture/discussion format designed to analyze basic pathogenesis of bacterial and viral infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction.

Mr. Ahmed

Mr. Grunstein, Mr. Ray Nairns

229. Structural Macromolecules. Lecture, three hours; discussion, one hour. Comprehensive molecular biology of selected structural proteins and polysaccharides, including cellular synthesis, structure and physical properties, and integrated biological functions. (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from principles of macromolecular structure, including proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer imaging; three-dimensional reconstruction; S/U or letter grading. 2 units. Mr. Eisenberg

M230B. Structural Molecular Biology. (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from principles of macromolecular structure, including proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer imaging; three-dimensional reconstruction; S/U or letter grading. 2 units. Mr. Eisenberg

M230D. Structural Molecular Biology Laboratory (2 hours). (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including expression, purification, and characterization of recombinant proteins utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building.

Mr. Eisering, Mr. Lake

231A-231B-231C. Advanced Evolutionary Biology. (Formerly numbered M231A, M231B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Series of advanced studies of concepts and methods in evolutionary biology. Topics may include speciation, extinction, coevolution, fossil record, rates of evolution, contributions of molecular biology to evolutionary studies, and developments in theory of evolutionary thought. Students are encouraged to take each course in sequence. Themes vary from year to year. May be repeated for credit. S/U or letter grading.

231A. Mechanisms of Evolution. Prerequisites: courses 20 and/or 135 or equivalent. Evolutionary Patterns of Evolution, 231C. Molecular Evolution.

234A. Genetic Control of Development. Especially intended for first- and second-year graduate students as overview of research questions on developmental biology available within Biology Department and of significant new advances in the discipline. Fundamental questions in developmental biology, with examples from current literature. Topics include differential gene activity, gene localization, homeotic mutations, determined cell state, cell identification, hormone receptors and hormone-mediated responses, and developmental neurobiology and emphasize analysis of genes implicated in developmental processes. Students strongly encouraged to take both courses 234A and 234B, since these represent a survey of modern biology as appropriate preparation for graduate study. S/U or letter grading.

234B. Advanced Topics in Cell Biology. Lecture, two hours; discussion, two hours. Especially designed for first- and second-year graduate students as overview of research questions on cell biology available within Biology Department and of significant new advances in the discipline. Prerequisites: courses 20 and/or 135 or equivalent. Lectures in cell biology, with examples from current literature.

Mr. Nertich, Mr. Simpson (Sp, alternate years)

235. Current Topics in Escherichia coli Genetics (2 units). Prerequisite: course 598. Seminar on topics from current literature in Escherichia coli molecular biology, with emphasis on using nonsense suppression to effect protein engineering and to study mechanisms of mutagenesis.

238. Seminar in Marine Molecular Biology. (Not the same as course 238 prior to Spring Quarter 1989.) Discussion, 10 hours. Prerequisites: consent of instructor. Seminar on current issues and work in marine molecular biology. Given at Catalina Marine Science Center.

240. Physiology of Marine Animals. Lecture, four hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Lecture and laboratory studies on cellular, tissue, cellular, organ, and animal physiology. Lecture topics: biology: metabolic characteristics of cells, energy transformations. Given at Catalina Marine Science Center.

241. Laboratory in Advanced Electrophysiology (8 units). Laboratory, 12 hours. Prerequisites: courses 102 and 112 or equivalent, consent of instructor. Two-day week, laboratory, five hours per week. Prerequisites: course M236. Lecture, one hour; discussion, one hour. Prerequisites: consent of instructor. Given at Marine Science Center. (Same as Biological Chemistry M236.) Lecture, three hours; discussion, two hours. Prerequisite: consent of instructor. Topics include mutagenesis, mutant selection, recombination, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.

249. Biochemistry of Parasitism. Lecture, three hours. Biochemical and physiological aspects of parasite-host relationships. Mr. Macniss

250. Seminar in Parasitology (2 units). Discussion, two to four hours. Prerequisite: consent of instructor. Current topics in systematic biology, including methods of systematic biology available within Biology Department and parasitology. Theme varies from year to year. May be repeated for credit. Mr. Bush

253. Seminar in Plant Structure (2 units). Mr. A. Gibson

254. Seminar in Plant Morphogenesis (2 units). Mr. H. Packard

255. Seminar in Invertebrate Zoology (2 units). Mr. Morin, Mr. Muscatine

CM256. Human Genetics. (Same as Biomatics CM256.) Lecture, three hours; discussion, one hour. Prerequisites: courses 125/125A/153A/153AL. Fundamental principles of human genetics, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current issues in genetics of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Mr. Merriam

256. Gene Manipulation: Genetic Engineering. Lecture, three hours; discussion, two hours. Prerequisites: course 138 or 144 or consent of instructor. Survey of methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. Mr. Sailer

257B. Gene Manipulation: Advanced Course (2 units). Lecture, 90 minutes; discussion, one hour. Prerequisite: course 157 or 257. Additional topics in methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. S/U or letter grading.

Mr. Sailer

M258A. Molecular Genetic Mechanisms of Immune System Function. (Formerly numbered M250A.) (Same as Microbiology M258A and Immunology M258A.) Lecture, two hours; discussion, two hours. Prerequisites: course CM185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of immune system, T cell antigen receptor, and loci affecting differentiation. S/U or letter grading.

Mr. M. Braun, Mr. Stevens (W, five weeks)

M258B. Biology of B Cells: Development, Repertoire, and Activation (2 units). (Formerly numbered M250B.) (Same as Microbiology M258B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisites: course CM185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on B cell development, repertoire, and growth and differentiation. S/U or letter grading.
add this program to a social science major. Students with an interest in a liberal arts area, who are not planning to go to graduate school, may want to complete this program to prepare for a job in business while pursuing a major of their choice. (Note: This program may not be taken with any economics major. Students with a particular interest in accounting, banking, and finance are directed to the economics/business major.)

Completion of this program in addition to a Letters and Science major will give you the basic skills and knowledge most employers seek. Courses used to satisfy either the major or general education requirements may also be applied toward the requirements of this program.

A minimum grade of C— is necessary to apply courses to this program, with an overall C average in the specialization. All courses must be taken for a letter grade; the P/NP option is not acceptable. You may satisfy one of the field studies course requirements by completing an independent study course (199), taken in an appropriate department with prior consent of the program faculty adviser. You also are required to seek guidance from a field studies coordinator in choosing and researching your topic.

To enter the specialization, you must file a petition with the College Counseling Service in the College of Letters and Science. If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate. (Such petitions are automatically granted; there is no penalty for not completing the program.) All degree requirements, including the specific requirements for this specialization, must be fulfilled within 228 units. A statement of completion is noted on your transcript and diploma when you have successfully completed the requirements for this specialization and for graduation.

For further information and help in assessing the appropriateness of this program and how it relates to your career/education goals, contact the College Counseling Service in the College of Letters and Science.

Field Studies

Required: Any three courses from the following list:

Business and Administration Communications and Interactions — Communication Studies 100, 101, Geography 146, Psychology 136A, 137A, 174, 176, Sociology 135

Business Logistics — Geography 145, 148, 149

Cognitive Science — Linguistics 1 or 100, 10, Materials Science and Engineering M107A or Psychology M153, Psychology 110, 111, 120, 121, 187

Contemporary Administration — Anthropology 150, Geography 148, Political Science 173, 180, Psychology 148, Sociology 173

Contexts — Honors College 57, 60A, 60B, 61

Government and Business — Political Science 142, 173

Labor Studies — History 155A, 155B, Political Science 174, Psychology M137E, 148, Sociology 171

National and International Business and Administration — History 125E, 148C, 149B, Political Science 124, 129, 130

Urban and Metropolitan Administration — Anthropology 60, 60P, 167, Geography 145, 150, Political Science 183A, 183B, Psychology 175, Sociology 158

U.S. Business Institutions — History 149A, Political Science 173, Sociology 168, 173

---

Business and Administration (Interdepartmental)

A316 Murphy Hall, (213) 825-1965

Additional Coursework for Students Interested in Business and Administration

The specialization in business and administration is not a major, but a sequence of supplemental courses designed to prepare students for the complexities of a career in business and administration. Students complete one of the many majors in the College of Letters and Science, as well as a sequence of courses.

For example, if you are interested in international business, you might major in a foreign language to become familiar with the literature and culture of other countries, and then add this program to gain basic understanding of economics, accounting, and statistics. Other students interested in working for a governmental agency or nonprofit corporation might

Chemistry and Biochemistry

3010 Young Hall, (213) 825-4219

Professors

Frank A.L. Anet, Ph.D. (Organic Chemistry)
Daniel E. Atkinson, Ph.D. (Biochemistry)
Mario E. Baur, Ph.D. (Physical Chemistry)
Kyle D. Bayes, Ph.D. (Physical Chemistry)
Orville L. Chapman, Ph.D. (Organic Chemistry)
Steven G. Clarke, Ph.D. (Biochemistry)
Donald J. Cram, Ph.D. (Saul Winstein Professor of Organic Chemistry, University Professor)
Richard E. Dickerson, Ph.D. (Biochemistry, Molecular Biology)
Francois N. Diederich, Dr.rer.nat. (Organic and Bioorganic Chemistry)
David D. Eisenberg, D.Phil. (Physical Chemistry, Molecular Biology; Distinguished Teaching Award)
Mostafa A. El-Sayed, Ph.D. (Chemistry and Biochemistry)
Christopher S. Foote, Ph.D. (Chemistry and Biochemistry)
William M. Gelbart, Ph.D. (Physical Chemistry)
Jay D. Gralla, Ph.D. (Biochemistry)
Scope and Objectives

Chemistry is concerned with the composition, structure, and properties of substances, the transformations of these substances into others by reactions, and the kinds of energy changes that accompany these reactions. The department is organized in four interrelated and overlapping subdisciplines that deal primarily with the chemistry of inorganic substances (inorganic chemistry), the chemistry of carbon compounds (organic chemistry), the chemistry of living systems (biochemistry), and the physical behavior of substances in relation to their structures and chemical properties (physical chemistry).

The department offers three undergraduate majors: one in chemistry with emphasis on inorganic, organic, or physical chemistry, a second major in biochemistry, and a third in general chemistry. The chemistry and biochemistry majors are designed to prepare students for graduate studies in each field, for entry into professional schools in the health sciences, and for careers in industries and businesses that depend on chemically and biochemically based technology. The general chemistry major is intended for students who wish to acquire considerable chemical background in preparation for careers outside chemistry.

Graduate research and training programs leading to the M.S. and Ph.D. degrees in Chemistry and in Biochemistry are also offered.

Undergraduate Study

Admission

Regular and transfer students who have the prerequisites for the various courses are not thereby assured of admission to those courses. The department may deny admission to any course if a grade of D or below was received in a prerequisite, or if in the opinion of the department the student shows other evidence of inadequate preparation.

Transfer students with more than 84 quarter units are accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry and Biochemistry 11 series, Mathematics 31A, 31B, 32A, Physics 8A, 8C/8CL, and 8D/8DL, or 6A, 6B, and 6C (or a year of calculus-based physics). Biochemistry majors also should have completed a course in the biology of organisms; chemistry majors should have completed Mathematics 32B.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 132A. Transfer students should consult the department's Undergraduate Office for assistance in planning their programs.

You may not take or repeat a chemistry or biochemistry course for credit if it is a prerequisite for a more advanced course for which you already have credit.

Courses used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, individual study courses, and research courses (e.g., 190, 199) may not be applied toward the requirements for the majors.

Each of the major programs is outlined below. Students may contact Dorothy Seymour, Undergraduate Counselor, for help and advice (4016 Young Hall).

Preliminary Examination for Chemistry and Biochemistry 11A

If you wish to enroll in Chemistry and Biochemistry 11A or 11AH, you must take the Chemistry Diagnostic Test during the enrollment period for the term in which you intend to take these courses. Enrollment usually is limited to students who have passed the examination. It will be given in 2250 Young Hall on Monday, September 24, 1990; Thursday, November 15, 1990; Thursday, February 21, 1991; and Saturday, June 1, 1991.

If your performance on the examination does not qualify you for immediate admission to Chemistry and Biochemistry 11A, but you wish to enroll in a subsequent term, you may be eligible for enrollment in Los Angeles Valley College (LAVC) Chemistry 17. This course is given at UCLA during Fall Quarter expressly for UCLA students preparing for Chemistry and Biochemistry 11A. If you successfully complete LAVC course 17, you are entitled to admission to course 11A for the next three terms. Offered on a Passed/Not Passed basis, LAVC course 17 carries no UCLA graduation credit but does displace four units on your Study List. It is not an acceptable substitute for course 11A.

Bachelor of Science in Chemistry

This program is for students who intend to pursue a career in chemistry.
Preparation for the Major

Required: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, 32B, 33A; Physics 8A, 8C/8CL, and 8D/8DL (BB/BBL strongly recommended), or 6A, 6B, and 6C*. Physics 8 series is strongly recommended for students with interest in physical chemistry, biophysical chemistry, or physical organic chemistry. No specific foreign language is required; however, reading knowledge of German (at least at the level of German 3) is strongly recommended if you are planning to pursue graduate work in chemistry.

The Major

Required: Chemistry and Biochemistry 110A, 110B, 113A, 114 (or 114H), 132A, 132B/132BL, 132C/132CL, 136 or 144, 153A/153AL, 173, and two other upper division or graduate courses in the department, including at least one laboratory course from 154, 174, 184.

Bachelor of Science in Biochemistry

This program is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

Preparation for the Major

Required: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, 33A; Physics 6A, 6B, and 6C, or 6A, 6C/8CL, and 8D/8DL (BB/BBL strongly recommended)*; Biology 5, 8 (BL recommended). Physics 8 series is recommended for students with interest in biophysical chemistry.

The Major

Required: Chemistry and Biochemistry 110A, 132A, 132B/132BL, 132C/132CL, 153A/153AL, 153B, 153C, 154, 156; one course from each of the following five categories: (1) Microbiology and Molecular Genetics 101; (2) Biology 138, 141, 143, C149, Microbiology and Molecular Genetics C111, or C119; (3) Biology 158, 162, 166, 167, 170, 171, or Microbiology and Molecular Genetics C112; (4) one upper division or graduate-level course in chemistry and biochemistry; (5) one upper division or graduate-level course in biology, chemistry and biochemistry, or microbiology. Courses selected to satisfy categories 4 and 5 must be approved by the undergraduate adviser.

Bachelor of Science in General Chemistry

This program is for students who wish to acquire considerable chemical background in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major may be appropriate for some students who plan to enter professional schools, such as those of medicine, dentistry, or public health.

Preparation for the Major

Required: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, 32B, 33A; Physics 6A, 6B, and 6C, or 8A, 8C/8CL, and 8D/8DL*. To enter the major, you must complete the preparation courses with at least a 2.0 average.

The Major

Required: Chemistry and Biochemistry 110A, 132A, 132B/132BL, 132C/132CL, 153A/153AL; three additional upper division courses in the department (at least one must be a laboratory course); six additional upper division courses. A 2.0 average is required in all upper division courses in the department. The program should be coherent in terms of your interests and objectives and must be based on a written proposal and approved by the undergraduate adviser.

Graduate Study

The department offers programs of study and research leading to the M.S. and Ph.D. degrees in both Chemistry and Biochemistry. Candidates for advanced degrees may specialize in the following fields: biochemistry, inorganic, organic, or physical chemistry. If you are planning to work toward the Ph.D., you should not seek an M.S. degree first but should apply directly to the Ph.D. program. Application materials may be obtained by writing to Phyllis Jergenson, Graduate Office, Department of Chemistry and Biochemistry, 4006 Young Hall, UCLA, Los Angeles, CA 90024-1569.

Admission

An excellent undergraduate record is required in addition to the University minimum requirements. Graduate Record Examination (GRE) General and Subject Tests are recommended. Each student admitted to graduate standing in chemistry is given orientation examinations at the beginning of the first term in the division of study and a second area selected from physical, organic, and inorganic chemistry. The main purpose of the orientation requirement is to help you and your adviser plan a suitable course program. The examinations include material covered in upper division courses in biochemistry, physical, organic, and inorganic chemistry. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

No orientation examinations are given to biochemistry students. You are encouraged to become familiar with research activities of all faculty members in your area of interest and to join a research group as soon as possible. Biochemistry students rotate through at least two research groups during Fall and Winter Quarters, with a final selection made during Spring Quarter.

Foreign Language Requirement

Language requirements for the different areas of specialization are as follows: biochemistry—none; inorganic—German or a coordinated course in computer programming; organic—German; physical—German or French or, with consent of the research director, a substitute course program or a coordinated course in computer programming. Either the Educational Testing Service (ETS) examination (with a score of 500) or the departmental examination is acceptable. The substitute course program should consist of 10 units of coordinated upper division or graduate courses forming a minor field of concentration. These courses may be taken on an S/U grading basis but may not be applied toward the departmental course requirements. There is no language requirement for the M.S. degrees.

Master of Science Degrees

Course Requirements

Chemistry M.S. — At least nine courses (36 units) are required, of which at least five (20 units) must be graduate courses and the remainder upper division courses. You must take a minimum of two courses in your major area and one course in an outside area. Choices may be made from the following:

Inorganic — Chemistry and Biochemistry 174, 207, C275, C276A, 276B, 277, 279, 280

Organic — Chemistry and Biochemistry 207, 232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, 246

Substitutions may be made with consent of the area adviser. With consent of the graduate adviser, courses of directed individual study, but not research courses, may replace any of the courses listed above.

Up to 24 units of course 596 or 598 may be applied toward the total course requirement; up to 20 units may be applied toward the minimum graduate course requirement.

Plan I (thesis plan) is the preferred method of attaining the M.S. in Chemistry. However, in exceptional cases where Plan II (comprehensive examination plan) is used, an additional six units of course 597 and six units from course 228, 248, or 278 may be applied toward the graduate course requirement and the total course requirement.

Biochemistry M.S. — The M.S. in Biochemistry may be obtained by the thesis plan or the comprehensive examination plan. Course requirements vary for each plan, as follows.
Plan I (Thesis Plan) — A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry and Biochemistry M253, M255, M263, M267. Registration in course 268 is required for three terms but is not applicable to the 36-unit requirement.

Up to 22 units of course 596 or 598 may be applied toward the total course requirement; up to eight units may be applied toward the graduate course requirement. After completion of course requirements, you should consult your research adviser to form a thesis committee.

Plan II (Comprehensive Examination Plan) — A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry and Biochemistry M253, M255, M263, M267. You may apply six units of course 268 and six units of course 597 to the graduate course requirement and the total course requirement. With the exception of Chemistry and Biochemistry 268 and 597, all courses must be taken for a letter grade.

Ph.D. Degrees

Course Requirements

Chemistry Ph.D. — Candidates in each area of specialization should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. Required coursework must be completed before advancement to candidacy.

Inorganic Chemistry — (1) Required background material: Chemistry and Biochemistry 173; (2) two courses from C276A, 276B, 277; (3) two courses from 174, 207, 271A through 271Z, 275, 279, 280; (4) two courses from physical chemistry (C213B, C215A, C215B, 215D, C223A) or organic chemistry (232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, 246) or biochemistry (153C); (5) Chemistry and Biochemistry 278.

Organic Chemistry — (1) Required background material: Chemistry and Biochemistry 132A, 132B, 132C, 136; (2) courses C243A, 244A; (3) course C243B or 244B; (4) one additional course from physical chemistry (C213B, 245) or inorganic chemistry (173, 174, C275, C276A) or biochemistry (153C); (5) two courses from 207, 232, 236, 241A through 241Z, 242, 245, 246; (6) Chemistry and Biochemistry 248.

Physical Chemistry — (1) Required background material: Chemistry and Biochemistry 110A, 110B, 113A; (2) courses C215A, C215B, C223A, C223B, or equivalent; (3) course 228 each term; (4) one term of course 218 (for presentation of research); (5) two courses (for letter grade credit) from C210C, 215C, 215D, 223C, 225; (6) two courses (with S/U grading option) from C210C, 215C, 215D, 221A through 221F, 223C, 225, C243A, C276A, 277, Mathematics 146, Physics 213A, 105A, 110A, 110B, 131, 132, 140. Substitutions may be made with consent of the graduate adviser (physical chemistry).

Biochemistry Ph.D. — Candidates should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. Required coursework must be completed before advancement to candidacy.

(2) Core courses M253, M255, M263, M267 — 18 units total. Students concentrating in biophysical chemistry or other specialized areas may want to modify the core. In these cases, six units of the core courses may be replaced subject to consultation with and consent of the graduate adviser.

(3) An additional 12 units of upper division or graduate courses subject to the consent of the graduate adviser. It is recommended that eight of these units be from other than biochemistry offerings. Advanced courses taken elsewhere or as an undergraduate may be substituted for some of these units in appropriate cases. Seminar courses are normally not applicable.

(4) Chemistry and Biochemistry 258 in the first four terms.

Teaching Experience

One year of teaching experience is required.

Qualifying Examinations

Rather than a single comprehensive examination, the department gives all chemistry Ph.D. candidates a series of written tests called cumulative examinations. These are designed to encourage and test the continued growth of professional competency through coursework, study of the literature, departmental seminars, and informal discussions with colleagues.

Three examinations are given per term at approximately monthly intervals. If you enter directly into the chemistry Ph.D. program and perform satisfactorily on the orientation examination in your special area, you may begin writing the examinations immediately. You must begin by the start of your second term in residence and must continue until you have passed five. To remain in good standing, you should pass at least one of the first six examinations attempted and three out of nine. Fifteen attempts are normally the maximum.

The written examination requirement for all biochemistry Ph.D. candidates is coupled to the graduate student seminar, Chemistry and Biochemistry 258. Beginning with Winter Quarter of your first year, you are required to submit the following written reports for grading to the instructor and other designated faculty members:

(1) Winter Quarter — A presentation and written report based on the Fall Quarter rotation research experience, to be submitted to the instructor and rotation supervisor for grading.

(2) Spring Quarter — A written report which summarizes the current state of knowledge in a small, well-defined area and which identifies the general types of experiments needed for progress in that field, to be prepared for grading by the course instructors.

(3) Fall Quarter, Second Year — At the end of the preceding Spring Quarter, you select a research topic from a list prepared by the division. An in-depth seminar on this topic which summarizes the current state of knowledge in a field and which indicates likely future directions must be presented. The written report should go beyond the information presented in the seminar and should propose specific experiments. This examination is graded by two faculty members other than the research supervisor.

A failed report may be revised once. The written examination requirement for the biochemistry Ph.D. program is fulfilled after you satisfactorily complete all three different types of reports.

At the end of the first and second years in either Ph.D. program, your overall progress is evaluated by the graduate student committee, taking into account performance in courses, written examinations, and research. The committee may recommend that you (1) proceed to the oral examination, (2) be redirected to the M.S. program, or (3) be terminated.

The University Oral Qualifying Examination is based on your research proposal which should represent independent work and should offer the doctoral committee an opportunity to judge your ability to think creatively and to formulate significant ideas for research. The examination is to be attempted by the end of the seventh term (sixth term for biochemistry). Failure to comply with this time schedule may result in disqualification from the Ph.D. program unless permission has been given by the area adviser. The committee’s decision to advance you to candidacy, to allow you to repeat the oral, or to disqualify you is based on the quality of the written proposal, the adequacy of the oral presentation, your overall record at UCLA as reflected in coursework and examinations, and your research ability.
Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination
You are required to prepare a dissertation thesis based on independent, original research conducted under the supervision of your research adviser and doctoral committee.

The final oral examination is optional with the doctoral committee.

Lower Division Courses

2. Introductory Chemistry. Lecture, two hours: discussion, two hours. Not open to students with credit for course 11A. Designed to meet part of Letters and Science requirements for nonscience majors and similar requirements in other schools. Concept of submicroscopic world of chemistry, ranging from protons to protons in subject matter. Refer to "Requirements for the Bachelor's Degree" in College of Letters and Science section of this catalog for other credit limitations on this course.

Mr. Farrington, Mr. Hardwick

11A. General Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: high school chemistry or equivalent background and three-and-one-half years of high school mathematics. Recommended: high school physics. Required of all majors in chemistry and biochemistry. (Students lacking prerequisites may qualify for admission by exceptional performance on Chemistry Diagnostic Test.) Atomic theory and stoichiometry; states of matter and phase equilibrium; gases; liquids and solutions; acids, bases, and salts; equilibria in gases and solutions; solubility and solubility equilibria; oxidation and reduction.

Mr. Baur, Mr. El-Sayed (F, W, Sp)

11BH. General Chemistry (Honors). Lecture, four hours; discussion, one hour. Prerequisites: high school chemistry or equivalent background and three and one-half years of high school mathematics, successful completion of Chemistry Diagnostic Test. Recommended: high school physics. (Students lacking prerequisites may qualify for admission by exceptional performance on Chemistry Diagnostic Test.) Atomic theory and stoichiometry; states of matter and phase equilibrium; gases; liquids and solutions; acids, bases, and salts; equilibria in gases and solutions; solubility and solubility equilibria; oxidation and reduction.

Mr. Gelbart, Mr. Kivelson (F)

11B. General Chemistry. Lecture, three hours: discussion, one hour. Prerequisite: course 11A or 11H with a grade of C- or better or consent of instructor. Chemical principles and properties: chemical reactions; changes of state; solutions; reaction mechanisms; chemical kinetics; quantum theory and electronic structure of atoms; periodicity of chemical properties.

Mr. Farrelly, Mr. Feiker, Mr. Nicol (F, W, Sp)

11BH. General Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisite: course 11A with a grade of B- or better or course 11A, and consent of instructor. Honors course parallel to course 11B.

Mr. Kivelson, Mr. Knobler (W)

11BL. General Chemistry Laboratory (2 units). Laboratory, four hours; video laboratory, one hour. Prerequisite: course 11A with a grade of C- or better or consent of instructor. Corequisite: course 11C or must already have been passed with a grade of C- or better. Use of the balance; volumetric techniques; equilibria; thermodynamics; quantitative analysis using volumetric and potentiometric procedures; Beer's Law.

Ms. Russell (F, W, Sp)

11C. General Chemistry (3 units). Lecture, two hours. Prerequisite: course 11B or 11BH with a grade of C- or better or consent of instructor. Bonding and molecular structure; descriptive inorganic chemistry; principles of atomic structure; bonding in solids; metals, ceramics, and glasses; introduction to quantum mechanics; nuclear structure; basics of atomic spectroscopy.

Mr. Kaez, Mr. Kaner (F, W, Sp)

11CH. General Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: course 11BH with a grade of B- or better or course 11B, and consent of instructor. Honors course parallel to course 11C, but at a more advanced level.

Ms. Valentine (Sp)

11CL. General Chemistry Laboratory (3 units). Laboratory, eight hours; video laboratory, one hour. Prerequisite: course 11BL with a grade of C- or better. Corequisite: course 11C or must already have been passed with a grade of C- or better. Rates of reactions; quantitative volumetric analysis; qualitative inorganic analysis; inorganic synthesis; column chromatography; colorimetric analysis; titration; molarity.

Ms. Russell (F, W, Sp)

15. Survey of Organic Chemistry and Biochemistry. Prerequisite: course 11A with a grade of C- or better. Not open to students with credit for course 112A or former course 21. Recommended for students in prenursing, prephysical therapy, and pre-dental hygiene. Does not meet requirements for admission to medical and dental schools. Fulfills one of the following courses in College of Letters and Science section of this catalog for other credit limitations on this course.

Ms. Lamb (F)

15L. Laboratory in Elementary Organic Chemistry and Biochemistry (1 unit). Laboratory, four hours. Corequisite: course 15 (or must already have been passed with a grade of C- or better). Does not meet requirements for admission to medical and dental schools. Fulfills one of the following courses in College of Letters and Science section of this catalog for other credit limitations on this course.

Ms. Lamb (F)

96. Special Courses in Chemistry (1 to 4 units). To be arranged. Prerequisite: consent of undergraduate adviser (Chemistry). May be repeated for a maximum of eight units.

(F, W, Sp)

Upper Division Courses

103. Environmental Chemistry. Prerequisites: courses 132A, 132B/132BL, and 153A/153AL, or consent of instructor. Chemical aspects of air and water pollution; solid waste disposal; energy resources; and pesticide residues; principles of pollution control; environmental legislation; effects. Chemical reactions in the environment and effect of chemical processes on the environment.

Mr. Baur, Mr. Bayes (Sp)

Mr. Baur, Mr. Knobler, Mr. Whetten (F, W, Sp)

110B. Physical Chemistry: Introduction to Statistical Mechanics and Kinetics. Lecture, four hours; discussion, one hour. Prerequisites: course 110A and Mathematics 23B, or consent of instructor. Strongly recommended: course 113A (for biochemistry major) or course 156 may be substituted. Kinetic theory of gases, principles of statistical mechanics, statistical thermodynamics, equilibrium structure and free energy, relaxation and transport phenomena; liquids, macromolecules, chemical kinetics, molecular-level reaction dynamics.

Mr. Baur, Mr. Nicol (W, Sp)

C110C. Physical Chemistry: Charges, Fields, and Matter. Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Includes electrostatic fields in matter — susceptibilities, molar polarization and refraction, multipole, van der Waals forces; classical EM waves — propagation, refraction, scattering, absorption, optical rotation and rotational dispersion; magnetic effects; radiation — multipole, black-body, Einstein coefficients, lasers; scattering and diffraction — Rayleigh, Mie, Raman, X-ray, electron, neutron, nuclear — by particles, molecules, lattices, resonance phenomena — light, EPR, NMR, Mössbauer; electrolytes — ion activity, conductivity, rate effects. May be concurrently scheduled with course C120C.

Mr. Reiss (Sp)

113A. Physical Chemistry: Introduction to Quantum Mechanics. Lecture, four hours; discussion, one hour. Prerequisites: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C123B.

Mr. Feiker (W)

114. Physical Chemistry Laboratory. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A. Credit may be arranged. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics.

Mr. Bayes, Mr. Feiker, Mr. Scott (W, Sp)

114H. Physical Chemistry Laboratory (Honors). Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, with grades of B or better, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes topics in physical chemistry to be selected in consultation with instructor.

Mr. Bayes, Mr. Feiker, Mr. Scott (F, W, Sp)

C115A-C115B. Quantum Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to course 113A or Physics 131A: or Physics 131A is an introduction to analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is prerequisite to C115B. Students entering course C115A are normally expected to complete the following courses:

Course C115A is designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding.

Mr. Bayes, Mr. Reiss (F, W, Sp)

C115A-C115B. Quantum Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to course 113A or Physics 131A: or Physics 131A is an introduction to analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is prerequisite to C115B. Students entering course C115A are normally expected to complete the following courses:

Course C115A is designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding.

Mr. Farrelly, Mr. Reiss (F, C115A; W, C115B)
132A. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: courses 11C or 11CH, and 11CL (may be taken concurrently), with grades of C- or better, or consent of instructor. Mr. Foote, Ms. Stephenson (F, W, Sp). 

132B. Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 132A or 132AH with a grade of C- or better or consent of instructor. Mr. Diederich (W). 

132BCL. Organic Chemistry Laboratory (2 units). Lecture, one hour; laboratory, three hours. Prerequisites: courses 11C or 11CH, and 11CL (may be taken concurrently), with grades of C- or better, or consent of instructor. Mr. Diederich (W). 

132C. Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 132B or 132BH, and 132BL with grades of C- or better, or consent of instructor. Mr. Eisenberg, Mr. Reisler (F, Sp). 

132C. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: courses 132B or 132BH, and 132BL with grades of C- or better, or consent of instructor. Mr. Eisenberg, Mr. Reisler (F, Sp). 

132CH. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisite: course 132B or 132BH with a grade of B- or better or consent of instructor. Ms. Lamb, Mr. Weiss (F, W, Sp). 

132CL. Organic Chemistry Laboratory (2 units). Lecture, one hour; laboratory, four hours. Prerequisites: courses 132B or 132BH, and 132BL with grades of C- or better, or consent of instructor. Mr. Eisenberg, Mr. Reisler (F, Sp). 

132CL. Organic Chemistry Laboratory (2 units). Lecture, one hour; laboratory, four hours. Prerequisites: courses 132B or 132BH, and 132BL with grades of C- or better, or consent of instructor. Mr. Eisenberg, Mr. Reisler (F, Sp). 

132CL. Organic Chemistry Laboratory (2 units). Lecture, one hour; laboratory, four hours. Prerequisites: courses 132B or 132BH, and 132BL with grades of C- or better, or consent of instructor. Ms. Merchant (F, W, Sp). 

136. Organic Structural Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 132A, 132B/132BL, and 132C/132CL, or equivalent. Mr. Foote (F, W, Sp). 

1413A. Structure and Mechanism in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110B, 113A, and 132C/132CL (may be taken concurrently), or equivalent, with grades of C- or better, or consent of instructor. Mr. Chapman (F). 

1413B. Mechanism and Structure in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 1413A with a grade of C- or better or consent of instructor. Mr. Chapman (W). 

144. Practical and Theoretical Introductory Organic Synthesis. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 132C/132CL or equivalent. Mr. Armstrong, Mr. Jung (F). 

153A. Structure, Catalysis, and Intermediary Metabolism. Prerequisites: courses 132A and 132B or 132AH with grades of C- or better, or consent of instructor. Mr. Eisenberg, Mr. Reisler (F, Sp). 

153AL. Elementary Biochemistry Laboratory (2 units). Lecture, one hour; laboratory, four hours. Prerequisites: courses 132A or 132AH, 132B or 132BH, 132BL, 153A (may be taken concurrently). Mr. Eisenberg, Mr. Reisler (F, Sp). 

153B. Nucleic Acids, Proteins, and Signal Transduction. Lecture, three hours; discussion, one hour. Prerequisites: courses 153A, 153AL. Mr. Eisenberg, Mr. Reisler (F, Sp).
Graduate Courses

207. Organometallic Chemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Survey of synthesis, structure, and reactivity (emphasizing a theoretical approach) of compounds containing carbon bonded to elements selected from main group metals, metalloids, and transition metals, including olefin complexes and metal carbonyles; applications in catalysis and organic synthesis.

Mr. Hawthorne (Sp)

C210C. Physical Chemistry: Charges, Fields, and Matter. Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Topics include electrostatics, electric polarization, multipole expansion, Van der Waals forces; classical EM waves — propagation, refraction, scattering, absorption, optical rotation and rotational invariance; magnetic effects, radiation; multipole expansion of electric and magnetic fields; multipole expansion of electron clouds. 

Mr. Reiss (Sp)

C213B. Physical Chemistry: Molecular Spectroscopy. Lecture, four hours; discussion, one hour. Prerequisite: course 113A. Topics include electronic spectroscopy, magnetic resonance spectroscopy, and mass spectroscopy. 

Mr. Reiss (Sp)

215C. Advanced Quantum Chemistry: Applications. Lecture, three hours; discussion, one hour. Prerequisite: course C215B, Physics 131, or equivalent. Topics in quantum chemistry selected from molecular structure, collision processes, theory of the solid state, symmetry and its applications, and theory of electromagnetic radiation. S/U or letter grading.

Ms. Carter, Mr. R. Levine (F, W)

215D. Molecular Spectra, Diffraction, and Structure. Lecture, three hours; discussion, one hour. Prerequisite: course C215B, Physics 131, or equivalent. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance; neutron, and x-ray diffraction; coherence effects. S/U or letter grading.

Mr. El-Sayed, Mr. Nicol, Mr. Whetten (W)

218. Physical Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, graduate fellows, and graduate students. May be repeated for credit. S/U grading.

221A-221Z. Advanced Topics in Physical Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose particular interest embraces that specialty. S/U or letter grading.

Ms. Carter, Mr. Reiss, Mr. Williams

C223A-C223B. Classical and Statistical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisite: course C215A. Introduction to the classical thermodynamics of perfect gases, solids, and liquids; statistical mechanics; probability; ensembles; partition functions; independence of microstates; equations of state; density matrix; second quantization. S/U or letter grading.

Mr. Reiss, Mr. F, C232A, W, C232B

223C. Statistical Mechanics. Lecture, three hours; discussion, one hour. Prerequisite: courses C215B, C223B, Physics 131, or equivalent. Fundamentals of statistical mechanics; classical equations of state; Coulomb systems; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. S/U or letter grading.

Mr. Geibert

Mr. Bayes (Sp)

228. Chemical Physics Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

Mr. Reiss (Sp)

M230B. Structural Molecular Biology. (Same as Biology M230B.) Lecture, three hours; discussion, one hour. Prerequisite: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and x-ray crystallography; optical and computational methods; three-dimensional reconstruction. S/U or letter grading.

Mr. Eisenberg

M230D. Structural Molecular Biology Laboratory (2 units). (Same as Biology M230D.) Laboratory, 10 hours. Corequisite: course C230B. Methods in structural molecular biology, including experiments using single crystal x-ray diffraction, low angle x-ray diffraction, electron diffraction, optical diffraction, optical tiling, three-dimensional reconstruction from electron micrographs, and NMR building.

Mr. Eisinger, Mr. Lake (W)
247. Organic Colloquium (2 units). Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

248. Organic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

249. Problems in Advanced Organic Chemistry (2 units). Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry, with emphasis on current literature. Intended primarily for first- and second-year graduate students preparing for comprehensive examinations. May be repeated for credit. S/U grading.

250. Topics in Biochemistry and Molecular Biology of Animal Cells. Lecture, three hours. Prerequisites: courses 132A, 132B/132BL, 132C/132CL, or equivalent, 153A, 153B, 153C, and 156, or equivalent, or consent of instructor. Structure and organization of animal cells, cell-cell contact, motility of cell and mobility of cellular components, chromosome structure, interactions between cytoplasm and nucleus, genetic analysis in higher eukaryotic cells, biochemistry of tissue development and organization.

251A-251Z. Advanced Topics in Biochemistry (2 units each). Topics will vary by semester. Each course embraces a recognized specialty in biochemistry, generally taught by a staff member whose research interests embrace that specialty.

252. Biological Energy Transductions. Lecture, three hours. Prerequisites: courses 153B and 153C, or equivalent, or consent of instructor. Molecular basis of energy transductions, including oxidative and photosynthetic phosphorylation, other energy-linked oxidative functions, membrane active transport, muscle contraction, and special sensory functions.

253. Macromolecular Structure (6 units). (Same as Biological Chemistry M253.) Lecture-discussion, five hours. Prerequisites: courses 110A, 110B, 110C, 153A, 153B, 153C, and 156, or Biological Chemistry 201A-201B, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure cloning and expression of genes; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties.

254. Advanced Biochemical Methods. Lecture, two hours; laboratory, three hours. Prerequisites: courses 153B, 153C, and 156 or consent of instructor. Recommended: courses 153B, 153C. Theoretical and practical basis of metabolism, general principles of biochemistry.

255. Biological Catalysis (2 units). (Same as Biological Chemistry M255.) Prerequisites: courses 153A or 153, and 153A, or equivalent, or consent of instructor. Reaction mechanisms, enzymatic reactions, experimental approaches for study of enzymes, including kinetic, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes.

256. Biochemistry Research Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeated for credit. S/U grading.

257. Inorganic Chemistry. Lecture, three hours. Prerequisites: courses 110A, 110B, 110C, 137, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C276.

258. Biochemistry Student Seminar (2 units). Seminars produced by instructors. Prerequisites: consent of instructor. Each course embraces a recognized specialty in biochemistry, generally taught by a staff member whose research interests embrace that specialty.

259. Directed Individual Study or Research (2 to 16 units). To be arranged with faculty member who will direct the study or research. May be repeated for credit. S/U grading.

260. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 4 units). Prerequisite: consent of graduate adviser (Chemistry). S/U grading.

267. Crystal Structure Analysis. Lecture, three hours. Theory and practice of modern crystallography, with emphasis on practical experience in structure determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refinement, error analysis, and common pitfalls. S/U or letter grading.

268. Inorganic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

269. Bioinorganic Chemistry. Lecture, three hours. Prerequisites: courses 110A and either 156 or 173. Role of metal ions in biology; introduction to metalloenzymes and metalloproteins; metal ions in reactions with nucleic acids; metal ion metabolism.

270. Solid-State Chemistry. Lecture, three hours. Prerequisites: course 137 or equivalent. Survey of important molecules, their synthesis, and characterization as single-crystal powders, or polymers. Chemical, optical, and magnetic properties and their relationship to band theory.

271. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: teaching assistant employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

272. Directed Individual Study or Research (2 to 16 units). To be arranged with faculty member who will direct the study or research. May be repeated for credit. S/U grading.

273. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 4 units). Prerequisite: consent of graduate adviser (Chemistry). S/U grading.

274. Research for and Preparation of M.S. Thesis (2 to 16 units). Each faculty member supervises research of M.S. students and holds research group meetings, seminars, and discussions with the students.

275. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Each faculty member supervises research of Ph.D. students and holds research group meetings, seminars, and discussions with the students.
Chemistry/Materials Science (Interdepartmental)

6532 Boelter Hall, (213) 825-5534

Professors
Bruce S. Dunn, Ph.D. (Materials Science and Engineering)
M. Frederick Hawthorne, Ph.D. (Chemistry and Biochemistry)
John D. Mackenzie, Ph.D. (Materials Science and Engineering)
Malcolm F. Nicol, Ph.D. (Chemistry and Biochemistry)
R. Stanley Williams, Ph.D. (Chemistry and Biochemistry)
Jeffrey L. Zink, Ph.D. (Chemistry and Biochemistry)

Associate Professor
Nancy M. Haegele, Ph.D. (Materials Science and Engineering), Chair

Assistant Professors
Richard B. Karem, Ph.D. (Chemistry and Biochemistry)
Jenn-Ming Yang, Ph.D. (Materials Science and Engineering)

Scope and Objectives
The undergraduate major is designed for students who are interested in solid-state chemistry, the preparation of engineering materials such as semiconductors, glasses, ceramics, metals, and polymers, the reactivity of such materials in different environments, and how chemical compositions affect properties. It provides appropriate preparation for graduate studies in many fields emphasizing interdisciplinary research involving chemistry, engineering, and applied science.

Bachelor of Science Degree
Preparation for the Major
Required: Chemistry and Biochemistry 11A or 11AH, 11B or 11BH, 11BL, 11C or 11CH, 11CL, English 3, Materials Science and Engineering 14, Mathematics 31A, 31B, 32A, 32B, 33A, Physics 8A, 8B or 8BH, 8C or 8CH, 8CL, 8D or 8DH, 8DL, Program in Computing 10A.

The Major
Required: Chemistry and Biochemistry 110A, 110B, 113A, C113B or C115A-C115B, 114, 132A, 173, eight units from C123A, C123B, 132B or 132BH, 132BL, 132C or 132CH, 132CL, 174, C175, C176; Materials Science and Engineering 120, 131L or 161L, 147A, 150, 160, eight units from 110, 111, 121, 122, 130, 131, 143A, 147B, 147E, 162.

For further information, contact Barbara Brooks, Materials Science and Engineering, 6532 Boelter Hall.

Chicano Studies (Interdepartmental)

71A Kinsey Hall, (213) 206-7695

Professors
Juan Gómez-Quiñones, Ph.D. (History)
David E. Hayes-Bautista, Ph.D. (Medicine)

Associate Professors
Guillermo Hernández, Ph.D. (Spanish)
Raymund A. Paredes, Ph.D. (English)
Raymond A. Rocco, Ph.D. (Political Science), Chair

Assistant Professor
Edit Villarreal, M.F.A. (Theater)

Lecturer
Richard Chabran, M.L.S. (Library and Information Science)

Scope and Objectives
Today there is a demand for individuals with extensive knowledge of the Chicano community. Opportunities are developing in both the public and private sector that call for men and women academically prepared and aware of the history, culture, and current problems facing Chicano/Latino communities. The Chicano studies major provides students with the language and cross-cultural studies background that will enhance their qualifications for positions in schools, governmental organizations, and private enterprise.

The program, coordinated by an interdepartmental committee, is multidisciplinary and leads to the Bachelor of Arts degree.

Bachelor of Arts Degree
The B.A. program in Chicano Studies is designed to provide systematic instruction for students who wish concentrated study of the Chicano experience. Viewed as developmental, the program subjects the Chicano reality to critical investigation, including the social, economic, educational, historical, political, and psychological analysis of the Chicano. The major is recommended for students preparing for graduate study as well as for public service careers.

Preparation for the Major
Required: One course from each of the following departments: Anthropology 8 or 9; Economics 1 or 2; History 6A, 6B, or 6C; Political Science 1; Sociology 1; Spanish 5 or equivalent. You must complete prerequisites for all courses selected.

The Major
This consists of three elements, one of which is optional (you must complete prerequisites for all courses in the major):

(1) Major Core (nine courses) — Chicano Studies M102, M105, M145, M147, M159A, M159B, M172T; History 197; Sociology 156* or 160*.

(2) Major Concentration — Four courses in one discipline, selected from Anthropology 115P, 135A, 135B, 138, M140, 150, 167, 185: Economics 110, 120, 121, 150, 151, 152, 172; English M104A, M104B, 106, 171, 172, 173, 174, 188, 189, 190; History 147B, 153, 154B, 160, 162, 163; Library and Information Science 111C, Political Science 115, 142, 149, 172B, 173, 174, 180, 182A through 182D; Psychology 127, 130, 134, 135, 136A, 137A, 137C, 175; Sociology 102, 104, 156* or 160*, 157, 158, M175, 182, 184; Spanish 100A, 100B, 105, 107, 115, M118A, M118B, 136A, 136B, 137, 139, 142, 143, 144, M149. You may petition the committee in charge of the major to include in the major concentration area a course not on the approved list. CED courses may be applied by petition.

(3) Optional Multidisciplinary Senior Thesis — Prerequisite: senior standing. Chicano studies majors have the option during their senior year to enroll in two 199 courses in their major concentration area, with the intention of producing a Chicano studies undergraduate thesis related to the major concentration. Enrollment in the two 199 courses is with the advice and consent of a faculty member. The first term includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second term entails completion of the data collection, analysis of the data, and termination of the thesis.

Course Limitations — No more than two 199 courses may be applied toward the major concentration; 199 courses applied toward the multidisciplinary senior thesis option may not also be applied toward the major concentration area. Registration in 199 courses must be approved in writing by the department chair and either the chair or adviser for the Chicano studies major. No more than two CED courses may be applied toward the major concentration.

Upper Division Courses
M102. The Mexican American and the Schools. (Same as Education M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.

M103C. Origins and Evolution of Chicano Theater. (Same as Theater M103C.) Lecture, three hours. Prerequisite: upper division standing. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

*Course may not be used for both the major core and major concentration.
M103D. Contemporary Chicano Theater. (Same as Theater M103D.) Lecture, three hours. Prerequisite: upper division standing. Study of recent trends in Chicano theater as reflected in works of contemporary Chicano dramatists and theater artists.

Ms. Villareal

M105. The Chicano Experience in Literature. (Same as English M105.) Prerequisite: satisfaction of Subject A requirement. Study of literature in English by and about Chicanos. Survey of depiction of the Chicano experience in American literature generally, with emphasis on development of Chicano literature itself, its cultural backgrounds, and distinctive uses of language.

Mr. Paredes

M145. Introduction to Chicano Literature. (Same as Spanish M145.) Lecture, three hours. Prerequisite: Spanish 25 or 26. Recommended: Spanish 136B. Introduction to texts representative of the Chicano literary tradition. Production to texts representative of the Chicano literary heritage. Survey of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus.

Mr. Hernandez

M174. Minority Group Politics. (Same as Political Science M147A.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level political science course or one upper division course on race or ethnically based politics. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.

Mr. Rocco

M159A. History of the Chicano Peoples. (Same as History M159A.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

Mr. Gómez-Quinones

M159B. History of the Chicano Peoples. (Same as History M159B.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.

Mr. Gómez-Quinones

M172T. Ethnography of Hispanic Cultures in the U.S. Southwest. (Same as Anthropology M172T.) Lecture, three hours. Prerequisite: Anthropology 9 or consent of instructor. Ethnography of social and cultural adaptations of Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading.

W. Haslam, Ph.D.

S. P. Morris, Ph.D.

A. Travis, Emeritus

M174. Minority Group Politics. (Same as Political Science M147A.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level political science course or one upper division course on race or ethnically based politics. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.

Mr. Rocco

M159A. History of the Chicano Peoples. (Same as History M159A.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

Mr. Gómez-Quinones

M159B. History of the Chicano Peoples. (Same as History M159B.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.

Mr. Gómez-Quinones

M172T. Ethnography of Hispanic Cultures in the U.S. Southwest. (Same as Anthropology M172T.) Lecture, three hours. Prerequisite: Anthropology 9 or consent of instructor. Ethnography of social and cultural adaptations of Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading.

S. P. Morris, Ph.D.

A. Travis, Emeritus

Bachelor of Arts in Classical Civilization

The purpose of the classical civilization major is to provide a balanced, yet focused, view of the ancient civilizations of Greece and Rome, both historically unique and universally typical human creations. The approach to the subject is accordingly both causal and comparative. The areas of study include the elements of culture — religion, mythology, philosophy, art, literature, language, the socioeconomic system, and politics. The requirements of the major encourage both breadth and depth: eight of the 12 required upper division courses (four from this department and four from other departments) must be taken in one of the four areas of concentration listed below; the remaining four upper division courses taken in this department may be selected to reflect your varied interests in the areas outside your concentration. If you qualify for the departmental honors program, you may substitute Classics 195A-195B-195C for one of the four upper division electives. While this major is not designed to qualify you for graduate study in classics, it does not preclude a transition to advanced study in classics or related fields.

Preparation for the Major

Required: Classics 10 and 20 and either 40 or 41.

The Major

Required: (1) Greek 3 or Latin 3 with a passing grade; (2) eight upper division courses in the department — no more than three may be selected from either Greek 101A through 130 or Latin 101 through 133, four must be selected from the courses listed below under any one of the four areas of concentration, and four electives (one may be Classics 195A-195B-195C if you qualify for the departmental honors program); (3) any four related courses in other departments listed below in your chosen area of concentration. Total courses required: 12, plus the language requirement.

Areas of Concentration

(3) Literature and Society — Classics 140, 141, 142, 143, 144, 145A, 150A, 150B, 152, 162, 165. Related courses: Anthropology 133R, 150, 152, M163, 185, Communication...
Bachelor of Arts in Greek

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Twelve upper division courses, six in Greek and six in Latin, including Greek 110 and Latin 110A; (2) one course from Classics 140, 141, 142, 143; (3) one course in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B); (4) an upper division course in Latin; (5) two additional courses in one or two of the related areas: classical archaeology (Classics 151A, 151B, 151C, 151D), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145A, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124, Byzantine civilization (Classics M170A, M170B), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in Latin

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Nine upper division courses in Latin, including course 110; (2) one upper division course in Latin; (3) Classics 141 and either 140 or 141; (4) two courses in Greek or Roman history (History 115B-115C, 116A-116B, 117A-117B); (5) two additional courses in one or two of the related areas: classical archaeology (Classics 151A, 151B, 151C, 151D), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145A, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170A, M170B), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in Classics (Greek and Latin)

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Twelve upper division courses, six in Greek and six in Latin, including Greek 110 and Latin 110A; (2) one course from Classics 140, 141, 142, 143; (3) one course in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B); (4) one additional course in two of the related areas: classical archaeology (Classics 151A, 151B, 151C, 151D), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145A, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170A, M170B), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Honors Program

The honors program is open to students in each of the departmental majors. To qualify for graduation with departmental honors or high- est honors, you must: (1) complete all requirements for your major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and at least a 3.0 overall GPA, and (3) complete Classics 195A-195B-195C with a grade of A – or better.

Master of Arts Degrees

Admission

Requirements for admission to the M.A. programs are a UCLA B.A. degree, or the equivalent, with a major in classics (for the Classics M.A.), Greek (for the Greek M.A.), or Latin (for the Latin M.A.) and a grade-point average of at least 3.0 in the major; a statement of purpose; three letters of recommendation, normally from previous instructors in the classics; and the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the department). In cases of deficient preparation or doubtful equivalency to a UCLA B.A., the department may grant provisional admission, requiring additional coursework or a written examination. Applicants for the Classics M.A. program who are deficient in Greek (or Latin) may be admitted to the Latin (or Greek) program, then permitted to transfer into the classics program when the deficiencies have been removed. The department uses the same application form as the Graduate Admissions Office, which may be obtained from the Department of Classics (7349 Bunche Hall, UCLA, Los Angeles, CA 90024-1475) or Graduate Admissions.

Major Fields or Subdisciplines

The department offers M.A. degrees in Classics (Greek and Latin), Greek, and Latin.

Foreign Language Requirement

In addition to taking courses in Greek and/or Latin, you must demonstrate proficiency in German, French, or Italian during your first year of study, either by passing German 5, French 5, or Italian 5 at UCLA (or an equivalent course) with a minimum grade of C, or by examination. For German and French, the examination is the standard Educational Testing Service (ETS) reading examination (you need a minimum score of 500); for Italian, a written translation examination is administered by the department.

Course Requirements

For the Classics M.A., Classics 287, Greek or Latin 210, and five courses from Greek 200A-200B-200C/Latin 200A-200B-200C are required. For the Greek M.A., Classics 287,
Greek 200A-200B-200C, and 210 are required. For the Latin M.A., Classics 287, Latin 200A-200B-200C, and 210 are required. (The Greek and Latin 200A-200B-200C courses test the appropriate sections of the departmental reading lists in a one-hour translation examination.) The remaining courses are to be selected in consultation with the graduate adviser.

No more than two half seminars, each counting as two units, and no more than one 500-series course may be applied toward the M.A. course requirements.

Comprehensive Examination Plan

The department follows the comprehensive examination plan for the M.A. degrees. Before the examination, you are expected to complete the departmental reading lists in Greek authors (for the Greek M.A.) or Latin authors (for the Latin M.A.) or in Greek and Latin authors (for the Classics M.A.). The examination consists of a three-hour written test in Greek and Latin literature (Greek for Greek M.A., Latin for Latin M.A.; Greek and Latin for Classics M.A.) in two parts: (1) passages for translation at sight and for generic identification and comparison and (2) an essay question combining periods kept separate in the Greek and Latin 200A-200B-200C courses (for Classics M.A., combining Greek and Latin). It must be taken no later than one term after you fulfill the M.A. course requirements. The examination may be repeated once, in the term following your first attempt; in exceptional cases and with consent of the departmental faculty, more than once. A grade of B+ or better is required for admission into the Ph.D. program.

Ph.D. Degree

Admission

In addition to an M.A. degree (see below), the department requires a statement of purpose. Students without a UCLA M.A. must also submit three letters of recommendation, normally from previous instructors in the classics, and the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the department). The department uses the same application form as the Graduate Admissions Office, which may be obtained from the department or Graduate Admissions.

A UCLA M.A. degree in Classics, Greek, or Latin, with a comprehensive examination grade of B+ or better, or an equivalent degree from another university is required.

Major Fields or Subdisciplines

The department offers the Ph.D. degree in Classics with major fields in (1) classical literature and philology, (2) classical linguistics, (3) Byzantine Greek, and (4) medieval Latin.

Foreign Language Requirement

New students in the doctoral program will normally have demonstrated proficiency in French, German, or Italian as described in the requirements for the M.A. degree. During the first year of study in the Ph.D. program, you must demonstrate proficiency in either French (Italian may be substituted with consent of the regular departmental faculty) or German, whichever was not used to satisfy the M.A. requirement. If Italian or French was used to satisfy the M.A. requirement, German must be taken.

Greek and Latin Graduate Courses

Most Greek and Latin seminars may be taken as follows: (1) full seminars (four units, letter grading), with a required final paper (or an equivalent workload, such as a final examination, as designated by the instructor) to be presented to the instructor and assessed as part of the final grade of (2) half seminars, with full participation in the course but no required paper (or equivalent as described above). Half seminars carry two units and are normally taken on an S/U grading basis only. Arrangements may be made with the instructor beforehand, at the instructor's discretion, for letter grading.

Course Requirements

Classical Literature and Philology — M.A. degree holders in Greek only or Latin only must take two 200A-200B-200C courses in the other language. In addition, five (or more) 200-series courses are required of all Ph.D. students, including Greek 210 and Latin 210 unless taken previously. Required courses (except for Greek 210 and Latin 210) are in addition to those taken for the M.A.

Classical Linguistics — M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking two 200A-200B-200C courses in the other language. A minimum of five full seminars is required: Classics 180 (or an equivalent undergraduate or graduate course taken at UCLA or elsewhere), 240, Greek 242, 243, Latin 242, and either Classics 230A-230B or one term of Vedic (Indic M222A, presupposing three terms of upper division classical Sanskrit).

Byzantine Greek — M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking courses 200A-200B-200C in the other language. A minimum of five full seminars is required: Greek 210, at least two courses from 231A-231B-231C, 240A-240B, 245, History 216A-216B.

Medieval Latin — M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking courses 200A-200B-200C in the other language. A minimum of five full seminars is required: Latin 130 or 120, 131, 133 (or equivalent undergraduate or graduate courses taken at UCLA or elsewhere), 210, at least two courses from 231A-231B, 243 (or History 219A or 219B), Greek 231A or 231B or 231C (or an upper division medieval language course such as French 115A, 115B, 115C, German 122, Italian 113A, 113B, 114A, 114B, 190, Spanish M118A, M118B, 122, 123, or an equivalent under-graduate or graduate course taken at UCLA or elsewhere), History 217.

Qualifying Examinations

Each major field has a separate reading list. All lists include the reading list in Greek and Latin authors required for the M.A. in Classics.

Classical Literature and Philology — (1) A written three-hour comprehensive examination consisting of passages from the Ph.D. reading list and other literature (M.A. degree holders in Greek only or Latin only take an additional two-hour examination in sight translation from the other language), (2) a 15- to 25-page research paper on a field or author of your choice outside your area of specialization (submitted either before or after the comprehensive examination), (3) a written three-hour examination in your area of specialization and prospective dissertation topic.

Classical Linguistics — (1) A written three-hour translation examination in classical Greek or Latin, (2) a written three-hour examination consisting of passages of ancient texts covered in the required course, (3) a two-hour written examination in comparative grammar.

Byzantine Greek — (1) A written three-hour translation examination in classical Greek and (2) a written three-hour examination on Byzantine Greek.

Medieval Latin — (1) A written three-hour translation examination in classical Latin and (2) a written three-hour examination on medieval Latin.

Complete examination details are available in the department. Each qualifying examination may normally be retaken once. The University Oral Qualifying Examination, administered by the doctoral committee after you complete your last qualifying examination, tests your knowledge of your major field (and possible stipulated areas outside your specialization) and includes discussion of your formal dissertation proposal.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

An oral defense of the dissertation, which is written under the supervision of the individual adviser and must contribute significantly to research on the subject, may be required or waived at the discretion of the doctoral committee.
## Classics

### Lower Division Courses

10. Survey of Classical Greek Culture. Knowledge of Greek not required. Lectures, many illustrated, on Greek life and culture from age of Homer to Roman Conquest. Discussion of art, literature, philosophy, and mythology. Mr. Blank, Mr. Lattimore (F,W)

20. Survey of Roman Civilization. Knowledge of Latin not required. Study of life and culture of Rome from its foundation to end of ancient empire. Survey of art, literature, and political thought of the Romans. Selections from Latin authors read in translation. Mr. Blank, Mr. Frischer, Mr. Goldberg, Ms. Newlands (W,Sp)

40. Survey of Greek Literature in Translation. (Formerly numbered 141.) Lecture, three hours; discussion, one hour. Readings in English of Greek literature from the beginning to Roman times to demonstrate the sweep of Greek literary achievement and the foundations it laid for subsequent literary developments. P/NP or letter grading.

Mr. Goldberg, Mr. Haslam

41. Survey of Latin Literature in Translation. (Formerly numbered 143.) Lecture, three hours; discussion, one hour. Readings in English to emphasize unique achievements of Latin literature, particularly in such areas as epic, drama, satire, oratory, and history. P/NP or letter grading.

Mr. Dyck, Mr. Goldberg, Ms. Newlands

50F. Power and Imagination in Ancient Rome. Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Freshman seminar designed to survey major aspects of Roman civilization, including art, religion, literature, and politics. P/NP or letter grading.

Mr. Frischer (F, W, Sp)

51. Art and Archaeology of the Classical World. Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Greek and Roman art and archaeology at discretion of instructor. P/NP or letter grading.

Mr. Dyck, Mr. Goldberg, Ms. Newlands

M70. Survey of Medieval Greek Culture. (Same as History M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, of Homer to Rome and the Renaissance (including discovery of America). Mr. Dyck

88A. Socrates. (Formerly numbered 45F.) Discussion, three hours. Examination of evidence for Socrates' life and thought, through texts from Plato, Xenophon, and Aristophanes, in an attempt to see how Socrates worked and affected those around him.

Mr. Blank (Sp)

88B. Power and Imagination in Byzantium. (Formerly numbered 71F.) Discussion, three hours. Prerequisite: freshman standing. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform.

Mr. Dyck (F, W, Sp)

88C. Lower Division Seminar on Comparative Mythology. (Formerly numbered 68F.) Discussion, three hours. Ways of studying myth through history, especially in ancient Near Eastern and Indo-European cultures. Comparison of myths on both diffusionary and creative models. Reconstruction of prototypes common to prehistoric Western Asia and Europe.

Mr. Puvel (F, W, Sp)

88D. Lower Division Seminar: The Greek Symposium. Seminar, three hours. Freshman seminar on the topic of the Greek symposium, an institution that permits students to understand many major features of Greek culture and society.

Ms. Bergen

### Upper Division Courses

140. Topics in History of Greek Literature. Lecture, three hours. Prerequisites: courses 10, 40, or 41. Investigation of a specific issue in the understanding of Greek literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

Mr. Haslam, Mr. Janko

141. Topics in History of Latin Literature. Lecture, three hours. Prerequisites: courses 20, 41. Investigation of a specific issue in the interpretation of Latin literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

Mr. Frischer, Mr. Goldberg, Ms. Newlands

142. Ancient Epic. (Formerly numbered 144.) Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Homer's Iliad and Odyssey, Vergil's Aeneid, and Ovid's Metamorphoses, studied in translation.

Ms. Bergen, Ms. King

143. Ancient Drama. (Formerly numbered 142.) Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Study of Greek and/or Latin drama in translation. P/NP or letter grading.

Mr. Goldberg, Mr. Haslam

144. Generic and Topical Studies In Ancient Literature. Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Examination of some problems in ancient literature that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading.

Mr. Frischer, Mr. Goldberg, Ms. Newlands

145A. Ancient Greek and Roman Philosophy. (Formerly numbered 145.) Lecture, two hours; discussion, one hour. Study of some major Greek and Roman philosophical texts, including those of Pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

Mr. Blank

145B. Later Greek Philosophy. Lecture, two hours; discussion, one hour. Prerequisite: course 145A. Philosophy 1, 100A, 101B, or 102, or consent of instructor. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

Mr. Blank

150A. Origins of the Western View of Women: The Female in Greek Thought. Lecture, three hours. Prerequisites: course 10 or equivalent, consent of instructor. Interdisciplinary study of concept of the female in various forms of thought developed by the Greeks (e.g., Epic, tragedy, comedy, history, political philosophy, gynecology). Special emphasis on how these texts lay the foundation for the Western view of women.

Ms. Bergen

150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought. Lecture, three hours. Prerequisites: course 20 or equivalent, consent of instructor. Interdisciplinary study of concept of the female in Roman and early Christian thought. Special emphasis on status of the female with regard to sexuality, procreation, and the sacred.

Ms. Bergen, Ms. Newlands

151. Classical Archaeology: Aegean to Christian Age. Lecture, three to four hours. Prerequisite: course 10 or History 1A. Knowledge of Greek not required. Survey of prehistoric art and archaeology of the Greek lands.

Mr. Janko

151B. Classical Archaeology: Greco-Roman Architecture. Lecture, three to four hours. Prerequisites: courses 10 and 20, or History 1A, or equivalent. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture.

Mr. Lattimore

151C. Classical Archaeology: Greco-Roman Sculpture. Lecture, three to four hours. Prerequisite: course 10 or History 1A, or equivalent. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman sculpture.

Mr. Lattimore

151D. Classical Archaeology: Greco-Roman Painting. Lecture, three to four hours. Prerequisite: course 10 or History 1A, or equivalent. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman painting.

Mr. Lattimore

C151E. Archaeological Field Techniques (12 units). Offered field archaeological techniques. May be repeated for credit with approval. Prerequisites: at least one classical archaeological course, consent of instructor. Training in techniques of archaeological research in the field, including topographic mapping, artifact recording, facts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. P/NP or letter grading.

Ms. Morris

152. The Ancient City. Lecture, three to four hours. Prerequisites: courses 10 and 20, or History 1A, or equivalent. Study of urban planning in the ancient world, with particular attention to cities of classical Greece and Rome, but with consideration also to comparable developments in the ancient Near and Far East. Examination of questions of architectural space and form, of design, and function of major municipal areas and buildings, and of provision of public amenities by detailed reference to significant archaeological sites and contemporary sources.

Mr. Frischer, Mr. Lattimore

161. Introduction to Classical Mythology. Lecture, three to four hours. Prerequisite: course 10 or History 1A or equivalent. Origins of classical myth; substance of divine myth and heroic saga; place of myth in religion; survey of study of classical mythology.

Mr. Lattimore, Mr. Puvel

162. Classical Myth in Literature. Use of myth in principal authors and genres of Greek and Roman literature, with examples of its influence in later literatures.

165. Ancient Athletics. Prerequisite: course 10 or History 1A or equivalent. Study of ancient Greek and Roman athletics and their connections with religion, politics, literature, art, and life.

166A. Ancient Greek Religion. Study of the religion of the ancient Greeks. Mr. Blank, Mr. Dyck, Mr. Janko

166B. Roman Religion. Study of the religion of the ancient Romans. Mr. Frischer, Ms. Newlands

167. Greek and Roman Magic. Lecture, three hours. Prerequisite: course 10 or 20. Study of beliefs about supernatural phenomena in the ancient world, including ghosts, demons, and other magical powers, as tested in both literary and archaeological sources. P/NP or letter grading.

Mr. Dyck

168. Introduction to Comparative Mythology. Prerequisite: course 161 or consent of instructor. Religions, mythical, and historical traditions of Greece and Rome compared with each other and with those of other ancient Near Eastern and European societies.

Mr. Puvel

Mr. Dyck

Mr. Janko, Mr. Puvel

195A-195B-195C. Senior Honors Paper (2 units, 2 units, 8 units). (Formerly numbered 195.) Supervised through individual consultation with an appropriate faculty member a research paper on a topic of their own choosing within their area of concentration in the major. 195A. P/NP grading.

195B. Prerequisite: course 195A with a grade of P. 195C. Prerequisite: course 195B with a grade of P. Letter grading.
Graduate Courses

200. History of Classical Scholarship. Mr. Dyck
240. Etruscology. Prerequisite: consent of instructor. Survey of scholarly research on Etruscan language and culture, with analysis of epigraphic material. Mr. Puhevel
244. Textual Criticism. Studies in Preparation of a Critical Edition of Greek and/or Latin Texts. Seminar, three hours. Differences in critical approaches to the ancient text. Emphasis on the critical edition as the baseline text for the study of oratory in ancient poetry. Mr. Haslam, Mr. Löffstedt
254. Greek and Latin Meter. Prerequisite: consent of instructor. Comprehensive study of meter as it functions in classical poetry. Mr. Haslam, Mr. Janko
251A. Seminar in Classical Archaeology: Aegean Bronze Age. Mr. Janko
251B. Seminar in Classical Archaeology: Greco-Roman Architecture. Mr. Frischer, Mr. Lattimore
251C. Seminar in Classical Archaeology: Greco-Roman Sculpture. Mr. Lattimore
251D. Seminar in Classical Archaeology: Greek-Roman Painting. Discussion, three hours. Prerequisite: consent of instructor. Studies in style and iconography of various periods of ancient Greek and Roman painting. May be repeated for credit with consent of instructor. Mr. Lattimore
251E. Archaeological Field Techniques (12 units). Formerly numbered 251E. Off-campus field archaeology, 36 hours. Prerequisites: at least one classical archaeology course, consent of instructor. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C215E. S/U or letter grading. Ms. Morris
252. Topography and Monuments of Athens. Detailed studies in topography and monuments of Athens, combining evidence of literature, inscriptions, and actual remains. Mr. Lattimore
253. Topography and Monuments of Rome. Detailed studies in topography and monuments of ancient Rome, combining evidence of literature, inscriptions, and actual remains. Mr. Frischer, Mr. Lattimore
260. Topics in Ancient Religion. Seminar, three hours. Prerequisite: consent of instructor. Ms. Bergren, Mr. Frischer, Mr. Lattimore
268. Seminar in Comparative Mythology. Prerequisites: courses 168, consent of instructor. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies. Mr. Puhevel
277. Graduate Colloquium in Classical Literature. Survey of basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinarity studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor. May be repeated for credit with topic change. S/U grading. (F, W, Sp)
375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
596. Directed Individual Study or Research (2 to 8 units).
597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).
599. Research for Ph.D. Dissertation (2 to 8 units).

Greek

Lower Division Courses

1. Elementary Greek. Lecture, five hours. (F)
2. Elementary Greek. Lecture, five hours. Prerequisite: course 1. (W)
3. Elementary Greek. Lecture, five hours. Prerequisite: course 2. (Sp)

Upper Division Courses

Note: Greek 3 is prerequisite to 100, which is prerequisite to 101A through 110 and 114 through 212.
100. Readings in Greek Prose. Prerequisite: course 3. Reading of Plato's Apology or a text of comparable difficulty. Ms. Bergren, Mr. Haslam, Mr. Janko
101A. Homer: Odyssey. Mr. Haslam, Mr. Janko, Ms. King, Mr. Puhevel
101B. Homer: Iliad. Mr. Haslam, Mr. Janko, Ms. King, Mr. Puhevel
102. Lyric Poets. Selections from Archilochus to Bacchylides. Ms. Bergren, Mr. Haslam, Mr. Janko
103. Aeschylus. Ms. Bergren, Mr. Blank, Mr. Haslam, Mr. Janko
104. Sophocles. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King
105. Euripides. Mr. Frischer, Mr. Haslam, Mr. Janko, Ms. King
106. Aristophanes. Ms. Bergren, Mr. Haslam, Mr. Janko
107. Hesiod. Lecture, three hours. Prerequisite: course 100. Reading of Theogony and excerpts from Works and Days, with emphasis on Hesiod's place in Greek literature and his role in transmission of Greek mythology. Mr. Goldberg, Mr. Janko
110. Study of Greek Prose. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose. Mr. Blank, Mr. Haslam, Mr. Janko
111. Herodotus. Mr. Blank, Mr. Janko, Mr. Lattimore
112. Thucydides. Mr. Haslam, Mr. Janko, Ms. King, Mr. Lattimore
113. Attic Orators. Mr. Dyck, Mr. Haslam, Mr. Lattimore
121. Plato. Mr. Blank, Mr. Frischer, Ms. King
122. Plato: Republic. Ms. Bergren, Mr. Blank, Mr. Haslam
123. Aristotle: Poetics and Rhetorics. Mr. Blank, Mr. Haslam, Mr. Janko
124. Aristotelian Ethics. Mr. Blank, Mr. Dyck, Mr. Frischer
130. Readings in the New Testament. Prerequisite: course 3. Mr. Dyck, Mr. Haslam
131. Readings in Later Greek. Prerequisite: course 100. Topics vary from year to year and include "Longinus," On the Sublime; Marcus Aurelius; Arius; The Second Sophistic; Plutarch, later epic, epigram; epi-stolography Graeci. Mr. Blank, Mr. Dyck, Mr. Haslam
132. Survey of Byzantine Literature. Prerequisite: course 100. Readings based on (1) Anthology of Byzantine Prose, ed. Nigel Wilson and (2) Oxford Book of Medieval and Modern Greek Verse, ed. C.A. Trypanis, or if unavailable, Poeti bizantini, ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures. Mr. Dyck
133. Readings in Byzantine Literature. Prerequisite: course 132. Topics vary from year to year and include Procopius, Agathias, Michael Psellus, the Alexiad of Anna Comnena, and Digenis Akritas. Mr. Dyck
199. Special Studies in Greek (2 to 8 units). Prerequisite: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 201A-201B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar. Seminars numbered 201A through 233 (except 210) may be taken for either two or four units. If a seminar is taken for four units, a paper is required.
200A-200B. History of Greek Literature (6 units each). Prerequisite: consent of instructor. Lectures on history of Greek literature, supplemented on the part of the student by independent reading of Greek texts in original language. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King
201A-201B. Homer: Iliad (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King
202A-202B. Homer: Odyssey and the Epic Cycle (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King
203. Hesiod (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Frischer, Mr. Janko
204. Homeric Hymns (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Janko
205. Seminar in Aeschylus (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Janko
206A-206B. Sophocles (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Haslam, Mr. Lattimore
207A-207B. Euripides (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Haslam, Ms. King
208A-208B. Aristophanes (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren
209A-209B. Seminars in Hellenistic Poetry (2 or 4 units each). (Formerly numbered 209.) S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Mr. Haslam
210. Advanced Greek Prose Composition. Prerequisite: course 110 or equivalent. Mr. Haslam, Mr. Janko
211A-211B. Herodotos (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Frischer, Mr. Haslam
212A-212B. Thucydides (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Lattimore
213. Seminar in Greek Historiography (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Ms. Haslam
214. Demosthenes (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck
215. Early Greek Orators (2 or 4 units). Studies in works of Antiphon, Andocides, and Lysias. S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck

216. Menander (2 or 4 units). Prerequisite: reading knowledge of classical Greek. S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Mr. Goldberg

217A. Greek Lyric Poetry: Archaic Lyric (2 or 4 units). Prerequisite: consent of instructor. Study of lyric poetry of Archaic period, both choral and monodic, with emphasis on language and meter. Emphasis on development of ability to read early selections of classical prose. Ms. Bergren, Mr. Haslam, Mr. Janko

217B. Greek Lyric Poetry: Pindar and Bacchylides (2 or 4 units). Prerequisite: consent of instructor. Study of choral odes of Pindar and Bacchylides, with special attention to conventions of the epinician. S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Haslam, Mr. Janko

220. Seminar in the Greek Novel (2 or 4 units). Lecture, three hours. Study of the development and place in Greek literature. Two texts (Chariton: Chaereas and Callirhoë and Longus: Daphnis and Chloe) studied in some detail. S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Frischer

222A-222B. Plato (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Frischer

223A-223B. Aristotle (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Dyck, Mr. Frischer

224. Seminar in Post-Aristotelian Philosophy (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Frischer

231A-231B-231C. Seminars in Later Greek and Byzantine Literature (2 or 4 units each). Prerequisite: consent of instructor. Studies in various aspects of Greek, Byzantine, and modern Greek. S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Dyck

233. Byzantine Poetry (2 or 4 units). Study of main representatives of both religious and secular poetry. S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck

240A-240B. History of the Greek Language. Prerequisite: consent of instructor. Survey of the historical development of classical Greek. 240B. Postclassical, medieval, and modern Greek. Mr. Dyck, Mr. Janko

241. Greek Epigraphy. Survey of Greek historical inscriptions, chiefly Attic. Mr. Dyck

242. Greek Dialects and Historical Grammar. Prerequisite: consent of instructor. Linguistic situation in early Greece. Readings in classical Greek dialectal texts. Greek grammar in context of common Greek and Indo-European linguistics. Mr. Janko, Mr. Puhvel

243. Mycenaean Greek. Prerequisite: consent of instructor. Script, language, and grammar of the Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. Mr. Janko, Mr. Puhvel

244. Greek Papyrology. Prerequisites: reading knowledge of Greek, consent of instructor. Introduction to Greek papyri, considered both as historical documents and as carriers of literature. Mr. Haslam

245. Greek Paleography. Studies in development of book hand in Greek manuscripts earlier than the invention of printing. Mr. Blank

256. Directed Individual Study or Research (2 to 8 units). Mr. Blank

257. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). Mr. Blank

259. Research for Ph.D. Dissertation (2 to 8 units). Mr. Blank

Latin

Lower Division Courses

1. Elementary Latin. Lecture, five hours. (F)

1G. Elementary Latin for Graduate Students (No credit). Concurrently scheduled with course 14.

2. Elementary Latin. Lecture, five hours. Prerequisite: course 1.

3. Elementary Latin. Lecture, five hours. Prerequisite: course 2.

14. Elementary Latin: Intensive (8 units). All declensions of nouns and adjectives, all conjugations in indicative mood, and primary uses of subjunctive mood. Emphasis on development of ability to read easy selections of classical prose.

Upper Division Courses

Note: Latin 3 is prerequisite to 100, which is normally prerequisite to all other 100-series courses in classical Latin authors.

100. Readings in Latin Prose and Poetry. Lecture, three hours. Prerequisite: course 3 or equivalent. Close study of a prose text supplemented with related readings in poetry. Attention to historical and cultural context. Course is normally prerequisite to other courses in the Latin 100 series. Mr. Blank, Mr. Frischer, Mr. Levine, Mr. Newlands

101. Plautus. Mr. Goldberg, Mr. Lofstedt

102. Terence. Mr. Goldberg, Mr. Lofstedt

103. Lucretius. Mr. Blank, Mr. Frischer, Mr. Levine, Mr. Newlands

105. Vergil: Selections from Aeneid I-VI. Mr. Frischer, Mr. Haslam, Mr. King, Mr. Levine, Mr. Newlands

106. Catullus. Mr. Haslam, Mr. Levine, Ms. Newlands

107. Horace. Mr. Frischer, Mr. Levine, Mr. Newlands

108. Roman Elegy. Selections from Catullus, Tibullus, and Propertius. Mr. Frischer, Mr. Levine, Mr. Newlands

109. Roman Satire. Selections from Epistles of Horace, Satires of Juvenal, and Epigrams of Martial. Mr. Frischer, Mr. Levine, Mr. Newlands

110A-110B. Study of Latin Prose. (Formerly numbered 110.) Discussion of three hours. Course 110A is prerequisite to 110B. Work in sight reading and grammatical analysis of classical prose texts; writing of classical prose. Mr. Blank, Mr. Levine, Mr. Lofstedt, Ms. Newlands

111. Livy. Mr. Frischer, Mr. Lofstedt

112. Tacitus. Mr. Frischer, Mr. Lofstedt, Ms. Newlands

113. Cicero: The Orations. Mr. Dyck, Mr. Frischer, Mr. Newlands

114. Roman Epistolography: Cicero and Pliny. Mr. Blank, Mr. Dyck, Mr. Frischer, Mr. Newlands

115. Caesar. Mr. Lofstedt

116. Petronius. Mr. Frischer, Mr. Newlands

117. Silius Italicus. Mr. Frischer, Mr. Lofstedt, Ms. Newlands

118. Seneca. Mr. Frischer, Mr. Newlands

119. Ovid. Mr. Frischer, Mr. Newlands

201. Roman Epic Tradition (2 or 4 units). Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck, Mr. Frischer, Ms. King, Ms. Newlands

202. Seminar in Catullus (2 or 4 units). Detailed consideration of entire Catullan corpus. S/U (two-unit course) or letter (four-unit course) grading. Mr. Levine, Ms. Newlands

203A. Elegaic Poetry (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Mr. Levine, Ms. Newlands

203B. Propertius (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Mr. Levine, Ms. Newlands

204A-204B. Vergil’s Aeneid (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Janko, Mr. Puhvel

205A. Seminar in Vergil’s Bucolics (2 or 4 units). Formerly numbered 205S. S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Mr. Haslam, Mr. King, Ms. Newlands

205B. Seminar in Vergil’s Georgics (2 or 4 units). Close reading of Vergil’s text; careful evaluation of influential criticism on the poem, much of it recent; examination of the work’s place within the tradition of rural poetry. S/U (two-unit course) or letter (four-unit course) grading. Ms. Newlands

206. Horace (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Ms. Newlands

207. Roman Comedy (2 or 4 units). Prerequisite: consent of instructor. Survey of history of Roman comedy. Reading of one comedy by Plautus or Terence, with emphasis on language and meter. S/U (two-unit course) or letter (four-unit course) grading. Mr. Goldberg, Mr. Lofstedt

208. Ovid (2 or 4 units). Prerequisite: reading knowledge of classical Latin. Detailed study of poetic works of Ovid. Readings in the original with discussion of secondary literature and scholarship. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Ms. Newlands

Graduate Courses

The 200-series courses which are designated A and B (e.g., 203A and 203B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar. Seminars numbered 201 through 213B (except 210) may be taken for either two or four units. If a seminar is taken for four units, a paper is required.

200A-200B-200C. History of Latin Literature (6 units each). Prerequisite: consent of instructor. Lecture on the history of Latin literature, supplemented on the part of the student by independent reading of Latin texts in the original. Mr. Blank, Mr. Goldberg, Mr. Levine, Ms. Newlands

210. Roman Epic Tradition (2 or 4 units). Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading. Ms. Newlands

212. Seminar in Catullus (2 or 4 units). Detailed consideration of entire Catullan corpus. S/U (two-unit course) or letter (four-unit course) grading. Ms. Newlands

213. Medieval Latin Prose. Prerequisite: course 130 or consent of instructor. Extensive reading of selected texts in prose, with emphasis on idioms and syntax of medieval Latin. Mr. Lofstedt

216. Special Studies in Latin (2 to 8 units). Prerequisite: senior standing, consent of instructor.
209. Seminar in Roman Satire (2 or 4 units). Detailed study of an individual satirist, with attention to his position in development of the satirical genre in Roman literature. Choice of author varies from year to year. Three hours. Consent of instructor. Characteristics of the writer as a social critic and artist, and of contemporary literary and social environment. S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Ms. Newlands.

210. Advanced Latin Prose Composition. Prerequisite: course 110B. Mr. Levine.

211A-211B-211C. Seminars in the Roman Historians (2 or 4 units each). Study of considerable portions of writings of the following. S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Ms. Newlands. 

211A. Sallust. Ms. Newlands.
211B. Livy. Mr. Frischer.
211C. Tacitus. Mr. Frischer, Ms. Newlands.

215. Seminar in the Roman Novel (2 or 4 units). Works such as Petronius' Satyricon and Auleius' Metamorphoses: study of literary problems. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Frischer, Ms. Newlands.

216. Roman Rhetoric (2 or 4 units). Seminar, three hours. Close study of one rhetorical text (e.g., Rhetorica ad Herennium, Cicero's De Oratore, Seneca's Controversiae or Suso's Quintilian's Institutio), with attention to its place in rhetorical tradition. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck, Mr. Frischer, Ms. Newlands.

220. Cicero's Orations (2 or 4 units). Seminar, three hours. S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck, Mr. Frischer, Ms. Newlands.

221A. Cicero's Philosophical Works (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck, Mr. Frischer, Mr. Levine.

221B. Cicero: De Natura Deorum (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck, Mr. Frischer, Mr. Levine.

222. Seminar in Roman Stoicism (2 or 4 units). Prerequisite: reading knowledge of Greek and Latin. S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Dyck, Mr. Frischer, Mr. Levine.

223. Lucilius (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Dyck, Mr. Frischer, Mr. Levine.

224. Seneca (2 or 4 units). Seminar, three hours. Detailed study of one work of prose or poetry by the younger Seneca. Emphasis on literary and philosophical problems, with some attention to philosophical and historical matters as well. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading. Mr. Goldberg, Ms. Newlands.

231A-231B. Seminars in Medieval Latin (2 or 4 units each). Prerequisite: at least one upper division Latin course or consent of instructor. Studies in various areas of the language and literature of medieval Latin. May be repeated for credit with consent of instructor. S/U (two-unit course) or letter (four-unit course) grading. Mr. Löffstedt.

232. Vulgar Latin. Prerequisite: consent of instructor. History and characteristics of popular Latin; its development into early forms of the Romance languages. Mr. Löffstedt.

235. Latin Literature: poetry, three hours. Close study, with attention to literary and historical background, of work of one or several poets who flourished between the death of Ovid and fall of the Roman Empire. Ms. Newlands.

236. Latin Literature: prose, three hours. Close study, with attention to literary and historical background, of work of one or several prose authors who flourished between the death of Tacitus and fall of the Roman Empire. Ms. Newlands.

240. History of the Latin Language. Prerequisite: consent of instructor. Development of Latin from the earliest monuments until its emergence in the Romance languages. Mr. Löffstedt.

370. Teaching Latin. Prerequisite: graduate standing or consent of instructor. Techniques for teaching; organization of classes; review of content of curriculum offered in junior and senior high schools.

495. College Teaching of Latin (2 units). Prerequisites: appointment as a teaching assistant, consent of instructor. Methodology of instruction in conjunction with classroom practice. May be repeated for credit. S/U grading. Mr. Goldberg.

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Students officially admitted to the communication studies major for Fall Quarter 1988 and thereafter must fulfill the following requirements. Those admitted prior to Fall Quarter 1988 have the option of fulfilling either the following requirements or those listed in the 1986-87 UCLA General Catalog.

Preparation for the Major
Required lower division courses: Communication Studies 10, Psychology 10, Sociology 1, Speech 1, Anthropology 33 or Linguistics 1, Program in Computing 1, one course from Economics 40, Sociology 18, or Statistics 50.
You are encouraged but not required to complete as many lower division preparation for the major courses as possible before admission to the program.

Writing Requirement
Required: English 131D.

The Major
Required Core Courses: Communication Studies 100 and 101 and one course from Anthropology M140, Communication Studies 102, or Linguistics 100.

Specializations
Mass Communication — (1) Required: Communication Studies 140, 152, and one course from Political Science 141, Psychology 137B, or Sociology 133; (2) systems, institutions, and policies — two courses from Communication Studies 153, 155, 156, 165, 170, 177, 180, 187, either Communication Studies M147 or Sociology M176; (3) media content/criticisms/history — two courses from Communication Studies 160, M161, 171, Film and Television 106A, 108, 110A, either Communication Studies 175 or Film and Television 116; (4) mass electives — two courses from Communication Studies 115, 120, 130, Psychology 135 or Sociology 132, Psychology 137A or Sociology 135, Sociology C124A, C124B, 160; (5) general electives — two courses from one of the following groups: (a) American studies — English 115A, History 148A, 148B, 148C, 150A, 150B, 156A, 156B, Political Science 114A, 114B; (b) language theory — Communication Studies 150, Linguistics 100, 170, Philosophy 172, Psychology 122 or 123; (c) social systems — Anthropology 133R, 135A, 135B, 142A, 142B, Sociology C124A, C124B, either Anthropology 134 or Sociology 134.

Interpersonal Communication — (1) Required: four courses (at least one of which must be Communication Studies 115 or 120) from Communication Studies 115, 120, Sociology C124A, C124B, either Psychology 135 or Sociology 132, either Psychology 137A or Sociology 135; (2) heterogeneous groups communication — three courses from Anthropology 141, Communication Studies 130, Psychology 125, 137C, M165, 174, 177, 178, either Sociology 156 or 160; (3) interpersonal electives — two courses from Communication Studies 140, 152, 153, 155, 165, 170, 180, 187, either Communication Studies M147 or Sociology M176; (4) general electives — two courses from one of the following groups: (a) communication — Communication Studies 150, Linguistics 100, 170, Philosophy 172, Psychology 122 or 123; (c) social systems — Anthropology 133R, 135A, 135B, 142A, 142B, Sociology C124A, C124B, either Anthropology 134 or Sociology 134.

Lower Division Course
10. Introduction to Communication Studies. Introduction to fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory.

100. Communication Theory. Prerequisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10 or consent of instructor. Analysis of fundamental nature of human communication; its physical, linguistic, psychological, and sociological bases. Study of theoretical models explicating the process and constituents of the communicative act.

101. Freedom of Communication. Analysis of legal, political, and philosophical aspects of freedom of expression, an access to an audience, and access to information. Study of court decisions governing freedom of communication in the U.S.

102. Code of Human Communication. Prerequisite: course 10 or Sociology 1 or Psychology 10 or Linguistics 1 or consent of instructor. Structural analysis and description of human communication codes; development of language; characteristics of the source, channel, and destination in human communication.

115. Dyadic Communication and Interpersonal Relationships. Prerequisite: course 100. Developmental approach to study of communication in dyadic relationships. Analysis of differences in the stages of relationships in terms of communication rules and verbal and nonverbal messages.

120. Principles and Types of Group Communication. Prerequisite: course 100 or consent of instructor. Study of processes and issues of small group communication. Particular emphasis on organization of and participation in problem-solving discussion.

121. Cultural Factors in Interpersonal Communication. Prerequisite: course 100 or consent of instructor. Study of cultural factors as they affect the quality and processes of interpersonal communication; exercises in participation, analysis, and criticism of interethnic and interracial communication in small group configuration.

140. Theory of Persuasive Communication. Prerequisite: course 100 or consent of instructor. Dynamics of communication designed to influence human behavior; analysis of persuasive intentions, sources, strategies, and audience response; integration of theoretical materials from relevant disciplines of humanities and social sciences.

142. Rhetorical Theory. Prerequisite: course 100 or consent of instructor. Survey of major neoclassical and modern rhetorical theories in rhetoric. Analysis of theories of Plato, Aristotle, Cicero, Quintilian, St. Augustine, Blair, Whately, Campbell, and other leading works in rhetoric.

147. Sociology of Mass Communication. Formerly numbered 147.) (Same as Sociology M176.) Prerequisite: course 100 or consent of instructor. Study in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

150. Analysis of Communication Content. Prerequisite: course 10 or consent of instructor. Study of methodology for qualitative and quantitative analysis of the content of communications.

152. Analysis of Communication Effects. Prerequisite: course 100 or consent of instructor. Survey of experimental and field research on effects of communications. Study of source, message, and environmental factors affecting audience response.

153. The Media and Aggression Against Women. Lecture, two hours; discussion, two hours. Prerequisites: course 152 or consent of instructor. Study of the growing body of literature on relationships between mass media and aggression against women. Consideration of both role of the media as reflecting cultural values and scripts and its potentially powerful role as a socializing agent of the culture. Analysis of research on role of individual differences among members of a culture as mediators of the impact of the media.

154. Communication Technology and Public Policy. Prerequisite: course 10. Introduction to modern communication technology and policy, with special attention to current policy issues, institutions which make policy decisions, and social, economic, and technological trends which create policy problems. Modern communication technologies surveyed include cable television, teletext, videowest, and satellite, microwave cellular, and subcarrier communication.

156. Human-Computer Communication. (Formerly numbered 196C.) Prerequisite: completion of the seven preparation for the major courses. Limited to communication studies majors. Survey of behavioral, design, and evaluation issues in human-computer communication. Readings from disciplines of psychology, sociology, computer science, communication, and library and information science. Students perform several on-line assignments in learning to use different technologies. Term paper required.

160. Political Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of nature and function of communication in the political sphere; analysis of contemporary and historical communications within established political institutions; state papers; deliberative discourses; electoral campaigns.

161. Mass Media and Elections. (Formerly numbered M165B.) (Same as Political Science M165.) Prerequisite: communication studies major or consent of instructor. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.
170. Legal Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of trial and appellate processes as systems of communication. Analysis of elements of the juridical process as they affect the quality of communication content. Study of rules of evidence, jury behavior, and structure of legal discourse. Mr. Rosenthal

171. Seminar in Theories of Freedom of Speech and Press. Prerequisites: course 101, consent of instructor. Exploration of relationship between freedom of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of the significance of these values examined in connection with issues such as obscenity, defamation, access to media, and control of commercial, corporate, and government speech. Mr. Lowenstein

175. Criticism and the Public Arts. Prerequisite: course 10 or consent of instructor. Introduction to methods and problems of criticism in the public arts. Study of several types of critical methods: formalistic, analogue, pragmatic, and aesthetic criticism. Topics include definition of art and criticism, aesthetic media, genre and resources of film, television, theater, and public discourse, varieties of critical method, problems of critical judgment.

197A-197Z. Special Topics in Communication Studies. Lecture, three hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Topics courses; consult Schedule of Classes for topics to be offered in a specific term. 197A. Mass Communication Theory; 197B. Systems, Institutions, and Policies; 197C. Media Content/Criticism and History. 197D. American Studies; 197E. Language/Interaction Structures; 197F. Social Semiotics; 197G. Interpersonal Communication Theory; 197J. Heterogeneous Groups Communication. (F, WS, P)

199. Special Studies (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior standing, consent of independent study for seniors who desire intensive or specialized investigation of selected research topics. 199H. Special Studies for Honors Candidates (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior and honors program standing. Independent study for honors undergraduates who desire intensive or specialized investigation of selected research topics.
Areas of Study

Your study plan should combine work in the major and minor literatures by focusing on a limited area in which these literatures may be explored. The area may be a literary period (e.g., Romanticism), a genre (e.g., the novel), or a theoretical problem.

The major literature is the area of your primary concentration. You specialize in one historically defined period (e.g., medieval, Renaissance, and baroque, neoclassicism and 18th century, Romanticism to modern), but general knowledge of the major literature is a prerequisite for the specialization.

In the minor literature, you focus on a period comparable to the area of specialization in the major literature, although you may not have as much historical depth and breadth as in the major literature.

Foreign Language Requirement

Literary proficiency in the major and minor literatures is an essential prerequisite for courses and degrees in comparative literature. You should be able to take graduate classes conducted in the languages of your specialization, speak the major foreign language adequately, and read literary texts in that language with "literary proficiency" (i.e., with sensitivity to stylistic nuances).

Before completing the M.A., you must demonstrate knowledge of at least two foreign languages. Proficiency in one must be certified by passing or setting up plans for two or more upper division and/or graduate literature courses in the appropriate language department. (You must prove more than elementary language competency in order to take these courses.) The second language requirement may be satisfied either by completing two years of language classes, by taking one upper division literature class, or by passing the Educational Testing Service (ETS) foreign language examination with a score of 600 or better. Translation examinations may be administered by departmental members in languages for which no ETS examination is available.

Course Requirements

The following 12 courses are the minimum course requirements. Some students will take extra courses to make up deficiencies.

(1) Four comparative literature courses, including Comparative Literature 200 and one course in literary theory such as 201, 202, 203, or 204; the comparative study of one genre (e.g., novel, epic, lyric, drama); the comparative study of one period or movement (e.g., baroque, Romanticism).

(2) Five courses (three must be graduate, two may be upper division) in your major literature.

(3) Three courses, either graduate or upper division, in your minor literature. You should study periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in your major literature.

Of the above required courses, eight units at most may be in the 500 series. Course 596 or 597 may be applied toward the minimum course requirement and the graduate course requirement.

Comprehensive Examination Plan

The examination for the M.A. is both written and oral, testing both historical knowledge and comprehension of methodology. There are three possible results of the examination: you may pass it, receive a favorable M.A. degree, or fail the examination altogether. The program allows a maximum of two attempts to pass the M.A. examinations.

The written examinations test your skill in literary analysis and detailed knowledge of specified works in the major and minor literatures. The examinations are based on reading lists from the works of at least 15 authors in the major literature (two-three hour examinations) and the works of at least 10 authors in the minor literature (one-three hour examination). Normally, the reading list consists of approximately 12 to 15 works in the major literature and 12 to 15 works in the minor literature. For more details on the reading list, contact the program office.

Ph.D. Degree

Admission

For entrance into the Ph.D. program, an M.A. degree in Comparative Literature is normally required. Students with an M.A. degree in one national literature, extensive knowledge of a second, and the ability to read literary texts in a third language may be considered for admission. Applicants should submit three letters of recommendation. Students entering with any degree other than an M.A. in Comparative Literature must offer three literatures from the works of at least 15 authors in the major literature, preferably in your period of emphasis, plus any additional courses required by the program committee and/or graduate advisers. None of the minimum required courses may be in the 500 series. Although only six courses are required, you are strongly advised to take at least two and usually three courses in each of your literatures.

If you have taken your M.A. in Comparative Literature at UCLA, the following courses are required: two comparative literature courses, one with a theoretical orientation; two to three courses in your second minor; two courses in your major literature, preferably in your period of emphasis, plus any additional courses required by the program committee and/or graduate advisers. None of the minimum required courses may be in the 500 series.

Teaching Experience

Teaching experience is not required but is highly recommended.

Qualifying Examinations

The examinations are both written and oral and may be taken over a period of two to three terms at the end of the second year after receiving your M.A. degree. The written examinations are based on reading lists for the major and two minor literatures.

For the major literature, you take one three-hour historical examination based on a reading list of 40 items. No more than 20 of the items may be in the approximately 100-year period of emphasis.

For the minor literatures, you must take (1) one three-hour written examination in each minor literature, based on approved reading lists of 25 to 30 items or (2) one three-hour written examination in the minor literature not included in your M.A. examinations and write a paper.
Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D. dissertation.

Dissertation
The doctoral dissertation must demonstrate original critical work in the field. Although a topic comparing literatures is commonly undertaken, comparative literature students may write a dissertation on a single subject in a single field provided that their wide range of knowledge is demonstrated by the quality of the work.

Graduate Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Prerequisites</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>C205</td>
<td>Comic Spirit</td>
<td>Prerequisite: reading knowledge of one appropriate foreign language.</td>
<td></td>
</tr>
<tr>
<td>C206</td>
<td>Reception Theory and Literary Hermeneutics</td>
<td>Seminar, three hours. Major premises of reception theory and literary hermeneutics presented and analyzed.</td>
<td></td>
</tr>
<tr>
<td>C207</td>
<td>Classical Tradition: Epic</td>
<td>Seminar, three hours.</td>
<td></td>
</tr>
<tr>
<td>C209</td>
<td>Crisis of Consciousness in Modern Literature</td>
<td>Prerequisite: reading knowledge of one appropriate foreign language. Study of modern European and American writers who can well be considered both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Flannery O'Connor, and Stevens. May be concurrently scheduled with Humanities C109. Graduate students required to prepare papers based on texts read in original languages and meet as a group one additional hour each week.</td>
<td></td>
</tr>
<tr>
<td>C211</td>
<td>Classical Tradition: Tragedy</td>
<td>Seminar, three hours.</td>
<td></td>
</tr>
<tr>
<td>C212</td>
<td>Satire</td>
<td>Lecture, three hours. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary roles: role played by authors and narrators in relation to their predecessors. May be concurrently scheduled with Humanities C111. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week.</td>
<td></td>
</tr>
<tr>
<td>C227</td>
<td>Archetypal Herosim in Literature</td>
<td>Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Examination of archetypal female figures in classical/traditional literatures and their reincarnations in modern African American, Anglo-American, Asian, European, and Latin American literature. Special emphasis on position of women in the cultures and ideology of the authors.</td>
<td></td>
</tr>
<tr>
<td>C228</td>
<td>Archetypal Heroes in Literature</td>
<td>Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus. May be concurrently scheduled with Humanities C129. Graduate students required to prepare papers based on texts read in original language and to meet as a group one additional hour each week.</td>
<td></td>
</tr>
<tr>
<td>C230</td>
<td>Translation Workshop</td>
<td>Prerequisites: solid reading knowledge of at least one foreign language, consent of instructor. Open to qualified undergraduates and graduates. Course emphasizes study of theory and practice of literary translation. Analyses of significant theoretical contributions to the field. Weekly exercises in translation technique with genres, periods, and authors at discretion of participants.</td>
<td></td>

</tbody>
</table>

Mr. Heim

C239. Early Medieval Literature | Prerequisite: reading knowledge of one appropriate foreign language. Survey of Latin and Germanic literatures from fall of Roman Empire to the beginning of the 12th century. May be concurrently scheduled with Humanities C139. Graduate students required to write papers based on texts read in original languages and may meet as a group one additional hour each week. |       |

Mr. Calder

C240. Medieval Epics | Prerequisite: reading knowledge of one appropriate foreign language. Consideration of five medieval epics (Beowulf, El Cid, La Chanson de Roland, Nibelungenlied, and Njalssaga), with two objectives: first, critical understanding of each work, and second, understanding of the nature of epic literature. Assignments consist of extended seminar paper and short oral reports. May be concurrently scheduled with Humanities C140. Graduate students required to prepare papers based on texts read in original languages and meet as a group one additional hour each week. |       |

Mr. Condren

C241. Literary Mediation of History in the Renaissance | Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Analysis of the presence and treatment of history in the literature of the Renaissance. May be concurrently scheduled with Humanities C141. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. |       |

Ms. Re

C245. Renaissance Drama | Prerequisite: reading knowledge of one appropriate foreign language. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lopez de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with Humanities C145. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. |       |

Mr. Braumuller

C260. Literature and the Visual Arts, 1700 to the Present | Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Knowledge of art history valuable but not required. May be concurrently scheduled with Humanities C160. Graduate students required to read works in original languages. |       |

Mr. Roston

C265. The French Revolution and European Literature | Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Part of UCLA French Revolution Bioennial Program. Course in cultural criticism using plays, poetry, popular tracts, etc., to explore the context and connections of the French Revolution to European culture. Authors range from Voltaire and Rousseau to Thomas Paine, Coleridge, Wordsworth, Goethe, and Kant. May be concurrently scheduled with Humanities C165. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. |       |

Mr. Maniquis
C265. Modern Tragedy. Seminar, three hours. Prerequisite: knowledge of one appropriate foreign language. Development of tragic form from the Age of Enlightenment to the present, emphasizing its connection with political, cultural, and sexual conflict. Discussion of theories of tragedy as well as parallel forms such as melodrama, drama of ideas, and epic theater. Concurrently scheduled with Humanities C166. S/U or letter grading.

C266. Romantic Autobiography. Discussion, three hours. Evolution of the autobiography from spiritual (Augustine) and secular (Cervantes) sources to transition in the 18th century which blended features of the epic poem and quest-romance. Wordsworth's Prelude came to represent the best example of this mixture. Major examples of Romantic autobiography to be studied include Rousseau's Confessions, Wordsworth's Prelude, and Goethe's Wilhelm Meister's Apprenticeship. Later novels that develop and extend the genre include Joyce's Portrait of the Artist as a Young Man and Proust's Swann's Way. May be concurrently scheduled with Humanities C174. Ms. Packer

C270. The Dream in English and German Romantic Literature. Lecture, three hours; discussion, one hour. Prerequisite: reading knowledge of one appropriate foreign language. Study of the dream as a standard narrative technique in English and German Romantic literature. May be concurrently scheduled with Humanities C170. Graduate students may be required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. Mr. Burwick

C271. Dramatic Theory and Criticism in German and English Romanticism. Seminar, three hours. Prerequisite: reading knowledge of German. Generic conceptions of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with Humanities C171. Mr. Burwick

C272. The Grotesque in Romantic Literature and Art. Prerequisite: reading knowledge of one appropriate foreign language. Study of the grotesque in visual and verbal arts of the Romantic period; aesthetics of tragic-comic interaction, demonic vision, and satirical sketches of man's abnormality and perversion. May be concurrently scheduled with Humanities C172. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. Mr. Burwick

C273. Theory and Texts of the Fantastic. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with Humanities C173. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. Ms. Re

274. Search for Organic Forms. Prerequisite: reading knowledge of French or German. Seminar devoted to theories of the "organic" in the 18th and 19th centuries, with special emphasis on Rousseau and Goethe. Study of thought made between theories of nature and theories of state. Mr. Maniquis

C275. The 19th-Century Novel. Seminar, three hours. Prerequisite: reading knowledge of French or German. Study of the development of the novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular period or critical problem. May be concurrently scheduled with Humanities C175. Mr. Lehan

C276. Fiction and History. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Analysis of use of historical events, situations, and characters in the novels of the Romantic period, emphasizing its connection with political, cultural, and sexual conflict. Discussions of theories of tragedy as well as parallel forms such as melodrama, drama of ideas, and epic theater. Concurrently scheduled with Humanities C166. S/U or letter grading.

C287. Crisis of Authority. Seminar, three hours. Prerequisite: graduate standing or consent of instructor, reading knowledge of one appropriate foreign language. Darwin's Origin of Species undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely authored and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and O'Neill. Concurrently scheduled with Humanities C176. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. Ms. Pasinetti, Ms. Re

C288. Symbolist Tradition in Poetry. Prerequisite: reading knowledge of either French or German. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with Humanities C180. Graduate students may be required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. Mr. Shideler

C290. Poetry and Poetics of the Post-Symbolist Period. Prerequisite: reading knowledge of French or German. Study of some dominant poetic trends and figures in American and European poetry in first half of the 20th century, including such surrealists as Apollinaire and Breton, imagists, and major individual poets such as Pound, Eliot, Valery, Rilke, George, and Stevens. May be concurrently scheduled with Humanities C181. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. Ms. Komar

C284. Alternate Tradition: In Search of a Female Voice in Contemporary Literature. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with Humanities C184. Graduate students required to prepare papers based on texts read in original languages whenever possible. Ms. King, Ms. Komar

C285. The Modern Continental Novel. Lecture, three hours. Prerequisite: reading knowledge of at least one appropriate foreign language. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as paranoia, time, entropy, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Humanities C185. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. Mr. Lehan

C286. The Postmodern Novel. Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways—philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and post- structuralism. Concurrently scheduled with Humanities C186. Graduate students required to meet as a group one additional hour each week. S/U or letter grading. Mr. Lehan

C292. The Psychological Novel. Prerequisite: major in literature, reading knowledge of French. Comparative study of French and English novels which both precede and follow development of psychoanalysis. Selected readings of Freud, in addition to the required fiction. Mr. Hutter

C297. The Mystery Novel. Prerequisite: reading knowledge of French. Study of mystery and detective fiction in England, France, and the U.S. Development of genre, form, and historical significance of the genre. Study through close readings of selected works. May be concurrently scheduled with Humanities C197. Graduate students required to prepare papers based on texts read in original languages and may meet to a group one additional hour each week. Mr. Lehan

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of graduate student, reading knowledge of one appropriate foreign language. Study of teaching and research. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 12 units). Prerequisite: graduate standing in comparative literature. Necessary for students in comparative literature who need additional individual study and research. May be repeated for credit. S/U grading.

597. Preparation for M.A. and Ph.D. Examinations (2 to 12 units). Prerequisite: graduate standing. Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be repeated for credit. S/U grading.

Bachelor of Science Degree

**Pre-Cybernetics Major**

You may apply for the pre-cybernetics major via petition if you are a sophomore and have taken at least three of the premajor mathematics courses with a 2.7 GPA or better and three other premajor courses. Together, all preparation for the major courses, including mathematics, must be completed with at least a 3.0 GPA and a minimum grade of C in all courses. Transfer students must meet the same academic requirements, based on all courses transferred from another institution which satisfy premajor requirements, and must have completed one 12-unit term of residence in regular session at UCLA.

**Preparation for the Major**

Required: A minimum of 72 units, including Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A; Biology 5, 7; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B, 8C; Psychology 10 or 11; Program in Computing 10A.

**The Major**

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 GPA in mathematics, 3.0 GPA overall, and a minimum grade of C in all courses).

The major consists of a methodology core (five and one-half courses), a specialization area (seven courses), and a cybernetics breadth requirement (three courses). Each course in the major must be completed with a grade of C or better.

**Methodology Core** — Four subject areas as follows:

1. One overview course: Computer Science 196A.
2. Two courses in probability and statistics from one of the following groups: (a) Statistics M152A and 152B, or (b) Mathematics M150A and Statistics 152B, or (c) Electrical Engineering 131A and Statistics 152B.
3. Two courses in signals and control systems (one from each group): (a) Computer Science 170 or Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical, Aerospace, and Nuclear Engineering 171A.
4. One course in modeling and computer simulation: Computer Science M196B.

**Applications/Specialization Areas** — A minimum of seven courses in either life sciences, behavioral sciences, engineering and applied mathematics, or an integration of courses from these areas that form a coherent cybernetics curriculum. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in medicine, public health, management, dentistry, and engineering.

With few exceptions, courses in the life sciences area are in biology, microbiology, chemistry, and biochemistry, as well as in departments of the School of Medicine. Courses in the behavioral sciences area are in psychology, linguistics, and economics. And courses in the engineering and applied mathematics area are in engineering, computer science, and mathematics.

**Cybernetics Breadth Requirement** — One course from each of the applications/specialization areas selected from the current approved list.

**Specialization in Computing**

You may select this area as an option in the existing applications/specialization areas. Program in Computing 108, 10C, 30, and Computer Science 141 are required, in addition to six courses selected from an approved list. You graduate with a bachelor's degree in cybernetics and a specialization in computing.

**Honors Program**

Junior and senior majors who have completed all preparation for the major courses and have an overall grade-point average of 3.0 or better and a 3.5 or better in required major courses may apply for admission to the honors program, in which honors-designated sections of selected courses are required. Students pursuing highest honors must, in addition, complete a senior thesis based on an approved research topic. Those who successfully complete the program (3.0 GPA or better overall, 3.5 or better in major coursework, and a grade of B or better in required honors courses) are awarded a degree with honors. At the discretion of the faculty sponsor and the interdisciplinary committee, students demonstrating exceptional ability on the senior research thesis are awarded highest honors.

**Upper Division Course**

---

**Development Studies (Interdepartmental)**

11276 Bunche Hall, (213) 825-2927

**Professors**

Edward A. Alpers, Ph.D. (History)
Charles F. Bennett, Ph.D. (Geography)
Francesca Bray, Ph.D. (Acting Anthropology)
Robert P. Brenner, Ph.D. (History)
E. Bradford Burns, Ph.D. (History; Distinguished Teaching Award)
Lucie C. Cheng, Ph.D. (Sociology)
Sebastian Edwards, Ph.D. (Economics)
John Friedmann, Ph.D. (Urban Planning)
The major consists of six parts:

1. Development Studies M100A-M100B.
2. Economics 110 or 111*.
3. Four core courses (two should be from the same discipline) from Anthropology 130, 150, Economics 112*, 191*, Geography 121, 133, Political Science 115, 167, 168L or 168S, Sociology 101, 184.
6. Twenty-four units in courses 195A-195B-195C and an overall GPA of 3.0. Highest honors are awarded to students who complete the major (including courses 195A-195B-195C) with a 3.75 GPA and who produce an exceptional thesis.

Upper Division Courses

M100A-M100B. Introduction to Development Studies. (Formerly numbered 100A-100B.) Seminar, three hours. Prerequisite: some beginning experience in social sciences at college level. Two-term seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. M100A. (Same as Anthropology M197A.) Economic development and culture change. M100B. (Same as Political Science M197G.) Political economy of development. Mr. Hammond, Mr. Sklar (W,Sp)

195A-195B-195C. Directed Studies for Honors. Prerequisites: courses M100A-M100B, 2.5 GPA in courses offered for the major, formal application to honors program, consent of instructor. 195A. Research, discussion, and planning of honors thesis. 195B-195C. Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

Diversified Liberal Arts (Interdepartmental)

A316 Murphy Hall, (213) 825-1965

Undergraduate Certificate Program

The Diversified Liberal Arts Program (DLAP) is not a major, but a special certificate program through which you may fulfill a requirement to earn a "clear" credential to teach in California elementary schools. To earn the credential, you must complete the Instructional Credential Program in the Graduate School of Education. In addition, you must either earn a satisfactory score on the Commons Section of the National Teachers Examination or complete the DLAP in the College of Letters and Science.

To earn the certificate in diversified liberal arts, you must complete a major in the College of Letters and Science. You must also complete DLAP requirements in four areas: (1) English, (2) mathematics and the physical and/or life sciences, (3) social sciences, (4) humanities, fine arts, and foreign language.

Requirements for one of these areas are normally satisfied by courses taken for your major; in addition, you must complete seven courses (28 units) in each of two other areas and eight courses (32 units) in a fourth area. A grade of C or better must be earned in all courses specifically required for the program (i.e., English
Physical or Life Sciences (Required) — A minimum of 12 units in physical sciences and/or life sciences, apart from mathematics.

The remaining courses for Area 2 may be selected from any courses in the physical or life sciences that satisfy the general education requirements (mathematics courses may be included).

Area 3 — Social Sciences

History (Required) — History 7A or 7B. Other courses which may satisfy the Area 3 requirement are those listed as fulfilling the social sciences general education requirements.

Area 4 — Humanities, Fine Arts, and Foreign Language

Although there are no specific course requirements, courses applied toward this area must be selected from those courses listed as fulfilling the humanities general education requirements. The following may also be applied toward Area 4: any courses in foreign language; Dance 1A, 1B, 1C; English 4, 129; Music 1A, 1B, 113A, 113B; Theater 118A, 118B, 119A.

Earth and Space Sciences

3806 Geology, (213) 825-3880

Professors
Orson L. Anderson, Ph.D. (Geophysics)
Peter Bird, Ph.D. (Geophysics, Geology)
Friedrich H. Busse, Ph.D. (Geophysical Fluid Dynamics)
John M. Christie, Ph.D. (Geology)
Paul J. Coleman, Jr., Ph.D. (Geophysics, Space Physics)
Paul M. Davis, Ph.D. (Geophysics)
Wayne A. Dollase, Ph.D. (Geology)
Clarence A. Hall, Jr., Ph.D. (Geology)
T. Mark Harrison, Ph.D. (Geochemistry)
Raymond V. Ingersoll, Ph.D. (Geology)
David D. Jackson, Ph.D. (Geophysics)
Isaac R. Kaplan, Ph.D. (Geology, Geochemistry)
William M. Kaula, M.S. (Geophysics)
Margaret G. Kivelson, Ph.D. (Space Physics)
Robert L. McPherson, Ph.D. (Space Physics, Geophysics)
Arthur Montana, Ph.D. (Geochemistry)
John L. Rosenfeld, Ph.D. (Geology)
Bruce N. Runnegar, Ph.D. (Paleontology)
Christopher T. Russell, Ph.D. (Space Physics)
J. William Schopf, Ph.D. (Paleobiology; Distinguished Teaching Award)
Gerald Schubert, Ph.D. (Geophysics, Planetary Physics)
Ronald L. Shreve, Ph.D. (Geology, Geophysics)
John T. Wasson, Ph.D. (Geochemistry, Chemistry)
Donald Carlisle, Ph.D., Emeritus
W. Gary Ernest, Ph.D., Emeritus
Robert E. Holzer, Ph.D., Emeritus
Helen Tappan Loeblich, Ph.D., Emerita
Clemens A. Nelson, Ph.D., Emeritus
Gerhard Oertel, Dr. rer. nat., Emeritus

Associate Professors
William I. Newman, Ph.D. (Planetary Physics)
Walter E. Reed, Ph.D. (Geology)

Assistant Professors
Jon R. Davidson, Ph.D. (Geology, Geochemistry)
Craig E. Manning, Ph.D. (Geochemistry, Petrology)
Charles R. Marshall, Ph.D. (Paleontology)
David A. Paige, Ph.D. (Planetary Science)
Mary R. Reid, Ph.D. (Geology, Geochemistry)
An Yin, Ph.D. (Geology)

Lecturers
Donald Hallinger, Ph.D. (Geology)
Robert E. Jones, B.S. (Geology)
Gerhard Stummer, B.S. (Geology)

Adjunct Professors
Paul M. Merfield, Ph.D. (Environmental Geology)
Floyd F. Sabins, Jr., Ph.D. (Geology)

Adjunct Associate Professor
Frank Kyte, Ph.D. (Geochemistry)

Scope and Objectives

The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life: essentially, the physical environment and its interaction with life. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas which are emphasized at UCLA include isotopic and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, the Earth's interior, planetary physics, space plasmas, and economic geology.

The variety of techniques applied lead to several specializations within the five main disciplines. Students completing their studies with a B.S. or M.S. degree usually are employed by industry. Many are employed in environment-related activities; others are involved in mineral or oil exploration or in construction. Students attaining the Ph.D. degree are usually employed by universities or governmental and industrial research groups.

Bachelor of Science in Geology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 61; Biology 2; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A; Physics 8A/8AL, 8B/8BL, and 8C/8CL or 6B; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C—.
The Major

Students with an interest in nonrenewable natural resources are advised to take courses 128, 136C, 137, 138, 141, and/or 150. Those interested in geochronology are advised to take Earth and Space Sciences 103C, 119, 121A-121B, 128, 130, 131, and/or Chemistry and Biochemistry 110A, 110B, 114, 132A, 132B, 153A, 184.

Bachelor of Science in Geology — Engineering Geology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 33A; Physics 8A/8AL, 8B/8BL, 8C/8CL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences 103A, 103B, 111, 112, 121A-121B, 135, 139; Civil Engineering 108, 120, 121, 128L, 150; one course from Earth and Space Sciences 134, 136C, 137, 141, 150, Geography 100, Civil Engineering 151, 155.

Students with an interest in nonrenewable natural resources are advised to take Earth and Space Sciences 103C, 128, 136C, 137, 138, 139, 141, and/or 150.

Bachelor of Science in Geology — Paleobiology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 61; Biology 5, 5L, and 6 or 7 or 8; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL. All courses must be passed with a minimum grade of C-.

The Major

Bachelor of Science in Geophysics — Applied Geophysics

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 11A; Mathematics 31A, 31B, 32A, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Bachelor of Science in Geophysics — Geophysics and Space Physics

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 9; Chemistry and Biochemistry 11A, 11B/11BL, 11C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences M140, 152, 154; Physics 105A, 105B, 110A, 110B, 112; Physics 131 or Mathematics 145; three courses from Earth and Space Sciences 101, 119, 131, 134, 136A, 136B, 150, 205, 233, Atmospheric Sciences 203C, one of Mathematics 140A, 140B, or 140C.

Students planning to do graduate work in specialized careers in Earth science should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth and Space Sciences graduate courses numbered from 200A through 249.

Honors in Geology or Geophysics

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a member of the faculty. Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative GPA of 3.5, who have completed at least 90 graded units at the University of California, and who have completed a minimum of two terms (eight units) of Earth and Space Sciences 199H leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

Graduate Study

Admission

Application may be made for admission to any term. Graduate Record Examination (GRE) scores are required; the examination should be taken at least six weeks before the deadline. Also required are three letters of recommendation which should be sent to the Graduate Adviser, Department of Earth and Space Sciences, 3683 Geology, UCLA, Los Angeles, CA 90024-1567. Application forms and a brochure giving information about the department may be obtained from the graduate adviser. Students who wish to apply for fellowships or teaching assistantships should be aware that these are allocated in February for the following academic year; completed applications should be received by January.

Major Fields and Subdisciplines

The Department of Earth and Space Sciences offers programs leading to the M.S. and Ph.D. degrees in Geochemistry, in Geology, and in Geophysics and Space Physics. The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry. The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, nonrenewable natural resources, organic geochemistry, paleobiology, paleontology, petrology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields. The program in geophysics and space physics offers study in applied geophysics, the Earth’s interior (seismology, gravity, thermal regime, geomag-
tism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydro-magnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), and space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays). Other comparable areas of study are also possible.

Foreign Language Requirement
Advising committees may require one or more foreign language in special individual cases. The committees determine how the requirement is to be fulfilled.

Master of Science in Geology

Admission
A bachelor’s degree in geology, biology, chemistry, physics, or other science is required. Applicants must have outstanding records in the relevant basic sciences and mathematics.

Course Requirements
Each course of study is worked out individually between you and the advising committee. It may include appropriate courses offered by other departments. Unless you have already passed Earth and Space Sciences 61 and 111, you are required to take either 195G or 61 and 111 during your first year in residence. Depending on your performance in course 195G, you may subsequently be required to take either 111 or 61 and 111.

Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate-level courses, of which at least four units must be a geology seminar (courses 251 through 260). Except for courses 597 and 598, those graded on an S/U basis may not be applied toward the requirements. The advising committees may require additional courses in light of individual educational objectives and backgrounds.

Specialization in Nonrenewable Natural Resources
The objective of this program is to prepare students for professional careers in the geology of metallic, nonmetallic, and fossil energy resources. Individual courses of study are arranged in consultation with the committee for graduate study in nonrenewable natural resources. Relevant subjects include mineral deposits, mining and exploration geology, physico-chemical exploration, petroleum and coal geology, depositional systems, and basin analysis. Particularly relevant courses include Earth and Space Sciences 128, 130, 131, 136A, 136B, 136C, 137, 138, 144, 150, 241, 254, 258, and 268, as well as selected courses in chemistry, engineering, social sciences, law, and management.

Thesis Plan
The thesis must be approved by the research director (usually the chair of your advising committee), as well as by the other members of the advising committee. No examination is required of students who write a thesis.

Comprehensive Examination Plan
If you elect this plan, the advising committee prepares and administers the final examination (normally oral). In most cases, a failed final examination can be repeated once.

Master of Science in Geophysics and Space Physics

Admission
A bachelor’s degree in a physical science, engineering, mathematics, or other field is required. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) Aptitude Test scores are required: Subject Test scores are desirable, preferably in physics, although mathematics or geology scores are also acceptable.

Course Requirements
Courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A, 200B, and 200C and at least 12 additional units of 200-series (graduate) courses. At least half of these must fall within a single field of concentration (applied geophysics, Earth’s interior, geophysical fluid dynamics, planetology, or space physics) selected in consultation with your faculty adviser, and the remainder must contribute to your general competence in geophysics and space physics. Courses 200A, 200B, and 200C must be passed with a grade-point average of 3.0 or better unless you are following the thesis plan. Courses graded on an S/U basis may not be applied toward the minimum requirement.

Thesis Plan
The completed thesis must be approved by your faculty adviser (usually the chair of your advising committee), as well as by the other members of that committee. Eight units of 500-series courses (596, 598) may be applied toward the total course requirement.

If it is not, the committee may recommend either termination of graduate study or further coursework or research or both, leading to a revised thesis. Revision and resubmission is not normally permitted more than once.

Comprehensive Examination Plan
This plan is recommended for those continuing to the Ph.D. The examination consists of a six-hour written part covering your major field of study and a subsequent oral part which may be more general in scope. If the examination is failed, the advising committee may recommend either termination of graduate study or further coursework followed by another examination. Reexamination is not normally permitted more than once.
Comprehensive Examination Plan
You may select either (1) a written six-hour examination in question-answer format or (2) an examination in written proposal-oral format. Contact the department for details of each format. Courses in the 500 series may not be applied toward the 36-unit minimum requirement.

Specialization in Applied Geophysics
The objective of this program is to provide advanced technical training to students who plan to do detailed analysis of geophysical data in industry, mainly petroleum exploration. Emphasis is on theory, computation, data analysis, and inversion. Fieldwork and original measurements are strongly supported, but UCLA has no facilities for gathering or routine processing of reflection seismic data. Undergraduate preparation for admission is equivalent to a B.S. in Geophysics (applied geophysics specialty), including a common mastery of the subject matter of Earth and Space Sciences 61, 111, 112, 136A, 136B, 136C, 152, Physics 105A, 105B, 110A, 110B, and 114. Exceptions may be allowed, but in particular, deficiency in geophysical fieldwork must be made up.

Course Requirements — Courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A and 202, plus at least two courses from 203, 204, 205, 222. Eight additional units of graduate-level courses are required; courses 208B, 208, M224A, M224B are recommended. Eight units of 500-series courses (596, 598) may be applied toward the graduate course requirement. Except for courses 596 and 598, those graded on an S/U basis may not be applied toward the minimum requirement.

Thesis Plan — A thesis is required for this specialization. A qualifying examination on the suitability of the proposed thesis should be taken by your fourth term in residence. You are also required to take a final examination on the adequacy of your completed thesis.

Ph.D. in Geochemistry
Admission
Admission requirements are the same as those for the M.S. in Geochemistry.

Course Requirements
Each course of study is worked out individually in consultation with your advising committee. You are expected to complete at least the minimum number of courses which are required for the M.S. in Geochemistry and to attain, either through prior training or through prescribed coursework, a common mastery of the subject matter of Earth and Space Sciences 51A, 51B, 130, 131, 234A or 234B, and Chemistry and Biochemistry 110A, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology. You must take course 235A, 235B, or 235C each term.

Qualifying Examinations
The departmental written qualifying examination must be taken before the end of your first year of the doctoral program if you have a master's degree; otherwise, it must be taken before the end of your second year of enrollment. It may be given in either a question-answer format or in a proposal format, at your discretion. Contact the department for details of each format. In case of failure, an examination of either format may be repeated at the discretion of the examining committee.

After passing the written qualifying examination, you must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination is normally required.

Ph.D. in Geophysics and Space Physics
Admission
Admission requirements are the same as those for the M.S. in Geophysics and Space Physics.

Course Requirements
Six courses are required, three in fundamental physics and three in the major geophysics discipline. You must attain a grade-point average of 3.3 or better (on a 4.0 scale) in the six courses. Contact the department for details.

Qualifying Examinations
The departmental written qualifying examination is given in either a question-answer format or in a written research proposal-oral format, at your discretion. Contact the department for details of each format.

After passing the written qualifying examination, you must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee. If you do not pass this examination within four years after entering the program, you are subject to dismissal.

Final Oral Examination
The examination is required.

Lower Division Courses
1. Introduction to Earth Science. Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 1H or 100. Elements of Earth science; study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology. (F, W, Sp)
101. Introduction to Geophysics and Space Physics

120. Rubey Colloquium: Major Advances in Earth Science
Lecture, three hours. Prerequisite: upper division standing. Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty). Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty). Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty). Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty). Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty).
131. Geochemistry. Lecture, three hours; discussion, one hour; prerequisites: junior or senior standing in chemistry, physics, or Earth and space sciences. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth, oceans, and atmosphere; chemistry of Earth’s interior, phase transformations at high pressure and temperature. (Alternates yearly with course 130.) Mr. Wasson

133. Regional Geology. Lecture, three hours; discussion, two hours. Prerequisites: courses 61 and 131 or consent of instructor. Basic concepts of stratigraphic, paleontologic, biologic, and climatic principles to a specific province or provinces. Emphasis on tectonic evolution of selected regions.

134. Computing in Earth and Space Sciences. Lecture, three hours; laboratory, one hour. Prerequisites: Physics 8A, 8B, 8C, or 8D, Mathematics 31A, 31B, 32A, and Program in Computing 3 or 10A, or consent of instructor. Original programming and application of software to generate and test hypotheses with nonlinear or non-equilibrium systems. Interpretation of data from observation and experimentation with graphics to generate hypotheses; forward modeling from fundamental equations to explore implications; probabilistic testing of models against data. Examples and exercises from the Earth and space sciences. Introduction to software for research and industry. Mr. Bird (F)

135. Introduction to Applied Geophysics. Lecture, three hours; laboratory, one hour. Prerequisites: Physics 8A, 8B, 8C, or 8D, Mathematics 31A, 31B, 32A, and Program in Computing 3 or 10A, or consent of instructor. Original programming and application of software to generate and test hypotheses with nonlinear or non-equilibrium systems. Interpretation of data from observation and experimentation with graphics to generate hypotheses; forward modeling from fundamental equations to explore implications; probabilistic testing of models against data. Examples and exercises from the Earth and space sciences. Introduction to software for research and industry. Mr. Davis (Sp)

136A. Applied Geophysics. Lecture, three hours; laboratory/field trips, three hours. Prerequisites: Physics 8A, 8B, 8C, 8D, Mathematics 33A, 33B, and Program in Computing 3 or 10A, or consent of instructor. Not open for credit to students with credit for course 136A. Principles and techniques of gravimetric, seismic, magnetic, and other geophysical modeling methods applied for ore, petroleum, and other economic minerals. Mr. Jackson (Sp)

136B. Applied Geophysics. Lecture, three hours; laboratory/field trips, six hours. Prerequisites: course 136A and Program in Computing 3 or 10A, or consent of instructor. Not open for credit to students with credit for course 135. Seismic reflection, gravity, magnetic anomaly analysis, and interpretation. Mr. Schubert (F)

138. Exploration and Mining Geology. Lecture, three hours; discussion, one hour; laboratory, four hours; field trip. Prerequisite: course 51B. Geological principles applied to exploration for and evaluation of mineral deposits; geological techniques at operating mines; mine economics; exploration and mining. Mr. Merfield (W)

139. Engineering and Environmental Geology. (Formerly numbered M139.) Lecture, two and one-half hours. Prerequisite: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics and stress-strain engineering as it applies to ground conditions, including soil properties, recognition, prediction, and control or abatement of subsidence, landslides, earthquakes, and other geologic aspects of urban planning and subsurface disposal of liquids and solid wastes. Mr. Merfield (W)

141. Basin Analysis. Lecture, three hours; laboratory, six hours. Prerequisites: courses 103B, 111. Interpretation of sedimentary rock records in terms of tectonic and basin evolution. Bedform analysis in modern sedimentary systems to focus interpretation of deformed rocks in complex structural regions. Mr. Ingersoll

144. Marine Geology. Lecture, three hours; field trips. Prerequisites: mathematics, senior standing. Recent marine sedimentology and geology and their relationship to other geologic disciplines. Mr. McPherson

152. Physics of the Earth. (Formerly numbered 122.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 8A, 8B, 8C, Mathematics 31A, 31B, and 32A, or consent of instructor. Application of physics to structure and evolution of the solid Earth. Seismology, convection and heat flow, gravity, geomagnetism, rock magnetism, and relation of these topics to plate tectonics and other problems of current geophysical interest. Mr. Anderson (F)

154. Solar Terrestrial Physics. (Formerly numbered M154.) Lecture, three hours; discussion, one hour. Prerequisite or corequisite: Physics 110B. Particle and electromagnetic emissions from the sun under quiet and under disturbed conditions. Solar radio, magnetospheres and ionospheres of Earth and other planets. Geomagnetic phenomena and the aurora. Ms. Kivelson, Mr. McPherson

155. Planetary Physics. Lecture, three hours; discussion, one hour; prerequisites: Mathematics 31A, 31B, 32A, Physics 8A, 8B, and 8C, or consent of instructor. Formation of solar nebula; origin of planets and their satellites; comets, asteroids, and meteorites; celestial mechanics and dynamics; physics of planetary interiors, surfaces, and atmospheres. Mr. Paige, Mr. Russell (W)

156. Geofield Geophysics (6 units). Lecture, three hours; laboratory, six hours; discussion, one hour. Prerequisites: course 135 or 136A, consent of instructor. Application of geophysical methods to exploration including planning, data collection, data reduction, and interpretation. Fieldwork on unsolved problems (weekend field trip). Mr. Davis (Sp)

156D. Advanced Field Geophysics (6 units). Lecture, three hours; laboratory, six hours; discussion, one hour. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic reflection, seismic refraction, gravity, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration including planning, data collection, data reduction, and interpretation. Use of computer in applied geophysics. Mr. Davis, Mr. Jackson (Sum, six weeks)

137. Petroleum Geology. Lecture, three hours. Prerequisites: courses 61 and 111, or consent of instructor. Geology applied to exploration for and production of natural gas and petroleum; techniques of surface and subsurface geology; problems of petroleum geology. Mr. Hallinga (Sp)

Graduate Courses

200A. Introduction to Geophysics and Space Physics I: The Solid Earth and Planeta. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Geochemistry, cosmology, space weather, geophysics; gravity field; seismology; heat transfer, thermal and mechanical evolution of the mantle; core and geomagnetism; lunar and planetary interiors. Mr. Newman (F)

200B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular composition; planetary observatories; dynamics of oceans and atmospheres. Mr. Schubert (W)

200C. Introduction to Geophysics and Space Physics III: Planets — Aeronomy and the Interplanetary Medium. Lecture, three hours. Prerequisites: Physics 105A, 110B, 112, and 131, or consent of instructor. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of the solar wind with Earth, magnetospheric phenomena. Ms. Kivelson, Mr. Russell (Sp)

203. Electrodynamics. Prerequisite: upper division electromagnetic theory course or consent of instructor. Maxwell’s equations and boundary conditions; momentum, angular momentum, and energy of electromagnetic fields; plane electromagnetic and magnetohydrodynamic waves; wave guides, simple radiating systems, and diffraction. Mr. Coleman (W)

204. Time-Series Analysis and Spectral Estimation. Lecture, three hours. Prerequisites: intermediate courses in calculus (including linear algebra and complex variables) and computer programming (including FORTRAN). Basic methods in time-series analysis, including least squares estimation and significance level determination, in application to problems in geophysics, atmospheric physics, and space physics. Topics include Fourier transforms (continuous, discrete, FFT), time series analysis, auto and cross correlation, transfer function estimation, spectral analysis, autoregressive and moving average methods (AR, MA, ARMA), and multichannel prediction and spectral analysis. Mr. Newman

205. Inverse Theory and Data Interpretation. Lecture, three hours. Prerequisites: Mathematics 115A, 115A-150B, and 151, or consent of instructor. Inverse modeling problem — determination of model parameters consistent with experimental data, considering effects of random errors and nonuniqueness. Enlargement and simplification of small problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthogonal rotations, statistics, principal axis transformation for rectangular problems, simple boundary conditions and Lagrange multipliers. Examples from a broad range of physical sciences. Mr. Newman

206. Geothermics. Lecture, two and one-half hours; discussion, 30 minutes. Prerequisite: Mathematics 33A or consent of instructor. Basic concepts of heat transfer applied to solutions of geological and geophysical problems, including continental heat flow, cooling of oceanic lithosphere, solidification of magma, surface heat flow, thermal anomalies, sedimentary basins, frictional heating on fault zones, mantle geothers, temperature in descending slabs, thermal convection in geothermal regions. Mr. Schubert
230. X-Ray Crystallography. Lecture, three hours; laboratory, three hours. Prerequisite: course 51B. Point, translation, and space group symmetry; diffraction of X rays; structure factors; crystallographic calculations; unit cells, unit cell methods, and primitive basis vectors; unit cell, site, and space group symmetries; and the Laue group. Mr. Dollase

231. Crystal Chemistry and Structure of Minerals. Lecture, three hours; laboratory, three hours. Prerequisite: course 51B. Bonding, isomorphous series, and polymorphic behavior of minerals; crystal structures; and crystallographic relationships. Mr. Dollase

232. Mineral Physics and Equations of State. Lecture, three hours. Prerequisite: consent of instructor. Phase equilibria; transport properties; temperature dependence of elastic constants; heat capacity; thermal expansion; and thermal conductivity. Application of shock-wave experiments to equations of state. Mr. Anderson (W)

234A. Thermodynamic and Geometric Principles of Phase Equilibria. Prerequisite: courses 51B and 110B, or consent of instructor. Introduction to thermodynamics; basic concepts of phases and phase diagrams; geometric representation of thermodynamic systems; and application of these concepts to mineral stability relations in igneous and metamorphic rocks. Mr. Davis (W)

234B. Petrologic Equilibrium. Lecture, three hours; discussion, three hours. Prerequisites: course 51B and Chemistry 110B, or consent of instructor. Introduction to isotropic systems; polymerization; and phase equilibria. Mr. Montana

244. Tectonics of Sedimentary Basins. Lecture, three hours; discussion, two hours; field trips. Prerequisites: courses 1038, 110B. Recommended: course 141. Plate-tectonic settings of sedimentary basins. Basic analytical methods, field methods to stress determination. Mr. Ingersoll (W)

245A-245B. Stress and Deformation. Lecture, three hours. Prerequisites: Physics 8A, 8B, Mathematics 32A, and 32B, or consent of instructor. Recommended: Mathematics 32A. Scalars, vectors, tensors; applications to geophysical phenomena. Mr. Shreve (Sp, every third year)

246. Stress in the Lithosphere. Lecture, three hours. Prerequisites: course 202 or 245A or Civil Engineering 108 or consent of instructor. Overcoming, hydrofracturing, fault plane solutions, seismic stress drops; effects of erosion, cooling, Earth ellipticity, topography, and density anomalies. State of stress in plate boundaries and interiors. Application of finite element and analytical methods to stress determination. Mr. Bird (Sp)

247. Glaciology. Lecture, three hours. Prerequisite: course 245A or equivalent or consent of instructor. Occurrence and classification of glaciers; accumulation and ablation; glacier budget; mechanical properties of ice; glacier flow; crevasses; structural and structural features; thermal relationships; bed slip; climatic response; catastrophic advances.

248. Advanced Structural Geology. Lecture, three hours; discussion, two hours. Prerequisite: course 245B or consent of instructor. Principles governing fracture, folding, and flow of rocks; solutions of structural problems at various scales; regional tectonic provinces; strain analysis. Mr. Vinogradov (W)
250. Advanced Engineering and Environmental Geology. Lecture, three hours; required field trips. Prerequisite: course 139 or consent of instructor. Current topics in engineering and environmental geology, including slope stability, hazardous waste disposal, grading codes, slip rates and recurrence intervals of active faults, computer and remote sensing applications, and case histories. Offered irregularly according to demand. Mr. Merfield

251. Seminar in Mineralogy. Lecture, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal structures, chemical equilibria, and petrographic phases. May be repeated for credit. Mr. Kay (F)

252. Seminar in Geochemistry. Lecture, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and ancient sediments, structure and chemistry of upper mantle, geochronology, cosmochemistry, and cosmochemistry. Mr. Kaplan (W)

253. Seminar in Petrology. Lecture, three hours. Problems of igneous or metamorphic petrology: methods of evaluating physical conditions of metamorphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of the mantle; element fractionation among coexisting phases; other current subjects in the field. S/U or letter grading. (F,W,Sp)

254. Seminar in Sedimentology. Lecture, three hours. Processes of transport and deposition; deep sea sediments; deltas and estuaries; petrology of carbonates, sandstones, and lutes; stratigraphy; palaeoenvironmental studies. Mr. Reed (W)

255. Seminar in Structural Geology and Tectonics. Lecture, three hours. Flow and fracture in Earth's crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidation and unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segmentation of continental-type rocks. Mr. Christie, Mr. Yin (W,Sp)

256. Seminar in Glaciology and Geomorphology. Lecture, three hours. River processes of data processing, display, and data analysis. Mr. Shreve (F)

257. Seminar in Paleontology. Lecture/discussion, three hours. Prerequisite: consent of instructor. Advanced topics in paleontology, biostratigraphy, paleoecology, and paleobiogeography, with emphasis on relations to other disciplines. Mr. Runnegar

258. Seminar in Mineral Deposits. Lecture, three hours. Problems of distribution, composition, and formation of mineral deposits; mineral economics; investigations of opaque minerals by microscopic or other techniques. Mr. Runnegar

259. Seminar in Paleontocenics. Lecture, two hours; discussion, two hours. Prerequisite: course 244 or consent of instructor. Basin evolution and paleogeography, with emphasis on the Phanerzoic of the Western U.S. Mr. Ingersoll (Sp)

260. Seminar in Advanced Topics in Geology (2 to 4 units). Topics vary. May be repeated for credit. Mr. Runnegar (F)

261. Topics in Magnetophoresic Plasma Physics. Lectures, discussions, and exercises on specific advanced topics in magnetophoresic plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, ultralow frequency waves, and adiabatic particle motion in Earth's radiation belts. Mr. McPherron

265. Instrumentation, Data Processing, and Data Analysis in Space Physics. Lecture, three hours. Principles, testing, and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra. Mr. McPherron

268. Seminar in Resource Analysis. Lecture, three hours. Prerequisite: consent of instructor. Geothermal, geophysical, economic, and technological factors in studies of optimal use of mineral and energy resources. Stress on different mineral or energy sources from time to time.

M270A-M270B-M270C. Seminars in Climate Dynamics (2 to 4 units each). (Same as Atmospheric Sciences M272A-M272B-M272C and Geography M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. Archives, geophysical, geochemical, micropaleontological, and stratigraphic evidence for changes throughout the geologic past. Rheology and dynamics of climatic systems; atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate and interannual, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading. Mr. Berger, Mr. Ghi, Mr. Schubert

272. Seminar in Geophysics. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in Earth physics. Content varies from year to year. May be repeated for credit. Mr. Davis

M285. Origin and Evolution of Solar System. (Same as Astronomy M285.) Dynamical problems of solar system: chemical evidences from geochronology, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

289A-289B-289C. Seminars in Fluid Dynamics (2 units each). Problems of current interest in fluid dynamics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

290. Seminar in Time-Series Analysis (2 units). Discussion, three hours. Discussion of recent research in spectral estimation, filtering, and signal detection applied to geophysical problems. S/U grading. Mr. Jackson

298. Advanced Topics in Earth and Space Sciences (2 to 4 units). Mr. Harrison (W)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: graduate standing or graduate degree and department chair and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

---

**East Asian Languages and Cultures**

290 Royce Hall, (213) 206-8235

**Professors**

Robert C. Epp, Ph.D. (Japanese)
Leo Ou-fan Lee, Ph.D. (Chinese)
Peter H. Lee, Ph.D. (Korean), Chair
Herbert E. Plutschow, Ph.D. (Japanese)
Hartmut E.F. Schaeffer, Ph.D. (Sanskrit)
Kenneth S.K. Chen, Ph.D., Emeritus
Kan Lao, B.A., Emeritus
Richard C. Rudolph, Ph.D., Emeritus

**Associate Professors**

Noriko Akatsuka, Ph.D. (Japanese)
Ben Befu, Ph.D. (Japanese)
Robert E. Buswell, Ph.D. (Chinese)
Hung-hsiang Chou, Ph.D. (Chinese)
Richard E. Strassberg, Ph.D. (Chinese)
Shirleen S. Wong, Ph.D. (Chinese)

**Assistant Professors**

John B. Duncan, Ph.D. (Korean)
Shoichi Iwasaki, Ph.D. (Japanese)
Leslie Pincus, Ph.D. (Chinese)
C.P. Hau Sanny, Ph.D. (Chinese)

**Lecturers**

Ikuo Nishide, M.A. (Japanese)
Sung-Ock Sohn, Ph.D. (Korean)
Yihua Wang, M.A. (Chinese)
Y.C. Chu, M.A., Emeritus
Kuo-yi Pao (Unseen), M.A., M.S., Emeritus

---

**Scope and Objectives**

The Department of East Asian Languages and Cultures aims to provide students with an exposure to the rich cultural heritage of China, Japan, Korea, and India. This is accomplished through courses in language, literature, religion, thought, archaeology, and other aspects of culture. For undergraduates the department offers a program leading to the B.A. degree in Chinese or Japanese, in which the emphasis is on the language and culture of China or Japan. The language program aims to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner.

At the graduate level, the department offers a program leading to an M.A. degree in several fields of East Asian culture. The program aims to give students a solid mastery of these fields preparatory to careers in teaching or in areas such as journalism, business, banking, or gov-
COLLEGE OF LETTERS AND SCIENCE / East Asian Languages and Cultures / 165

current service. The Ph.D. program, which is very selective, trains research scholars for academic careers in specialized fields.

Classes for Nonmajors
The department offers the following courses in which knowledge of Asian languages is not required: Chinese 50, 150, 151, 152, 160, 175, 180, 190A-190B, East Asian Languages and Cultures 60, 162, Indic 175, Japanese 90, 150, 151, 160, 175, Korean 150, 151, 160, 175.

Buddhist Courses

Bachelor of Arts in Chinese
Preparation for the Major
Required: Chinese 1, 2, 3, 4, 5, 6, 50, History 9C, and 11A or 11B. Anthropology 9, Chinese 110A, and English 4 are recommended.

The Major
Required: A total of 11\frac{1}{2} courses, of which seven must be upper division language courses, including at least two vernacular language courses from Chinese 100A, 100B, 100C, 101A, 101B, 101C, 145A, 145B, and at least four classical language courses from 110A, 110B, 110C, 140A, 140B, 140C, 143A, 143B, 145B, and 165.

The remaining four and one-half required courses must include Chinese 150 or 151 or 152; one course from 160, 175, 190A, 190B; East Asian Languages and Cultures 199 (at least two units in the senior year); Art History C115D, C115E, or C115F; and either History 182A, 182B, 183A, 183B, or 184.

English 95A, 95B, 95C, and additional courses in Japanese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program three courses in classical Japanese and beginning courses in Chinese or Korean. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Bachelor of Arts in Japanese
Preparation for the Major
Required: Japanese 1, 2, 3, 4, 5, 6, 50, History 9C, and 11A or 11B. Anthropology 9 and English 4 are recommended.

The Major
Required: A total of 12\frac{1}{2} courses, of which seven must be upper division language courses selected from Japanese 100A, 100B, 100C, 130, 131, C132, 140, 141, 142, 149, C195. The seven courses must include 100B and 130 or 131 or C132.

The remaining five and one-half required courses must include Japanese CM122: 150 or 151; one course from 160 or 175; East Asian Languages and Cultures 199 (at least two units in the senior year); Art History 114C; and either History 187A, 187B, or 187C.

English 95A, 95B, 95C, and additional courses in Japanese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program three courses in classical Japanese and beginning courses in Chinese or Korean. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Master of Arts Degree
Admission
To qualify for admission you are expected to (1) meet general University requirements for the undergraduate major, (2) have taken a minimum of three quarter courses or the equivalent in classical Chinese (for Chinese majors), classical Japanese (for Japanese majors), or a minimum of three years of modern Korean (for Korean majors), and (3) present a B.A. degree from a Department of East Asian Languages and Cultures similar to UCLA's. Applicants with a B.A. in another field or from departments whose requirements are less rigorous are admitted to the Department of East Asian Languages and Cultures (290 Royce Hall, UCLA, Los Angeles, CA 90024-1540) only if they can meet the requisite standards within one year. Selection is based on (1) prior scholastic performance, (2) recommendations by professors, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) an undergraduate term paper or comparable writing sample in English.

Major Fields or Subdisciplines
M.A. students may specialize in Chinese language and culture, Japanese language and culture, or Korean language and culture. A comparative or interdisciplinary field may be incorporated into an area of specialization.

Language Requirements
Students majoring in Chinese must have completed one year of Japanese or Korean with a grade of S or better; those majoring in Japanese must have completed one year of classical or modern Chinese or Korean with a grade of S or better; those majoring in Korean must have completed one year of Chinese or Japanese with a grade of S or better. This requirement may be fulfilled before admission to the M.A. program.

Course Requirements
Nine courses (36 units) are required for the degree, of which six (24 units) must be graduate courses. Chinese 200 is required for the Chinese major; Japanese 200 is required for the Japanese major; Korean 200 is required for the Korean major. With departmental consent, up to two courses (eight units) taken outside the department (S/U grading is acceptable) may be applied toward the nine courses. No more than two 500-series courses (four units) may be applied toward the nine courses required for the degree; only one 500-series course may be applied toward the minimum graduate course requirement. Courses taken to meet admission standards and language requirements may not be applied toward the total course requirement. You must take at least one seminar in each of your comprehensive examination fields.

International students may also be required to take English as a Second Language 33A, 33B, 33C, 34, 36, or other ESL courses.

Thesis Plan
This plan is recommended if you intend to proceed to the Ph.D. After completing at least one year of graduate work with excellence, you may petition the department to present a thesis; you also must have a letter of support from a faculty member agreeing to serve as your thesis director. After your committee accepts your thesis, you must take an oral examination related to it and a translation examination in your area of specialization.

Comprehensive Examination Plan
Comprehensive examinations are offered in the literature and cultural history of China, Japan, or Korea. You are required to take an examination in each of three fields within your area of specialization, including one in a literature field. In consultation with your graduate adviser, you may replace one field with an outside field either within the department or in another department.

For the major in Chinese, you must take comprehensive examinations in three of the following fields: (1) modern Chinese literature, (2) traditional Chinese fiction and drama, (3) traditional Chinese poetry, (4) Chinese civilization or archaeology, (5) Chinese Buddhism.

For the major in Japanese, you must take comprehensive examinations in three of the following fields: (1) classical Japanese literature (poetry and prose), (2) classical Japanese culture and folklore, (3) modern Japanese literature and culture, (4) Japanese Buddhism, (5) Japanese linguistics.

For the major in Korean, you must take comprehensive examinations in three of the following fields: (1) Korean culture, (2) Korean Buddhism, (3) classical Korean poetry, (4) classical Korean fiction, (5) modern Korean literature.
You must also take a translation examination in your area of specialization, and you are required to present two seminar research papers. The results of the examinations and the quality of the papers determine whether you are admitted to the Ph.D. program.

Ph.D. Degree

Admission
An M.A. degree in the field or in a related field is required. Selection among qualified applicants from outside the department is based on (1) prior or scholastic performance, (2) three letters of recommendation, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) a recent research paper in English. Students with an M.A. in the department are judged on their M.A. record.

International students are encouraged to complete an M.A. in the department before proceeding to the Ph.D. program.

Major Fields or Subdisciplines
The department emphasizes four major fields at the Ph.D. level: (1) Chinese language and literature with the subdisciplines of poetry, drama, fiction, and modern literature; (2) Japanese language and literature with the subdisciplines of ancient, medieval, early modern, and modern literature; (3) Korean language and literature with the subdisciplines of culture, Buddhism, classical poetry and fiction, and modern literature; (4) Buddhist studies with the subdisciplines of Chinese Buddhism, Japanese Buddhism, and Korean Buddhism. A comparative or interdisciplinary field may be incorporated into an area of specialization. In addition, a program in ancient Chinese civilization or Japanese linguistics may be arranged by petition.

Foreign Language Requirement
You must demonstrate reading knowledge of French or German by passing the Graduate School Foreign Language Test administered by the Educational Testing Service (minimum score of 500) or by passing a level five course with a grade of B or better or S. With the consent of the department, Russian may be substituted.

Course Requirements
Students entering the program with an M.A. in a different field, or in the same field but from another institution, must meet the standards of the department's M.A. coursework in addition to fulfilling Ph.D. course requirements. A minimum of five graduate courses (not including courses taken to meet the language requirements listed below) beyond the M.A. degree is required. In addition, students majoring in Chinese must take three years of modern Japanese or two years of classical Chinese. Those majoring in Buddhist studies are encouraged to take appropriate courses in Sanskrit and/or Pali. A grade of B or better or S is required for all language courses.

Qualifying Examinations
You must take written examinations as follows:
For the major in Chinese literature — (1) a general examination in Chinese literature covering modern Chinese literature, traditional fiction and drama, and traditional Chinese poetry; (2) examinations in three approved fields to be selected from at least two of the following groups: (a) Chinese poetry, Chinese fiction and drama, modern Chinese literature, (b) ancient Chinese civilization, Chinese Buddhism or another field of Chinese thought or religion, (c) an outside field from within the department, (d) a field offered in another department or interdepartmental program.

For the major in Korean literature — (1) a general examination in Japanese literature; (2) examinations in two of the following approved fields (which cannot be from the same group): (a) ancient, medieval, early modern, or modern Japanese literature, (b) Japanese Buddhism, another field of Japanese thought or religion, or Japanese linguistics, (c) Chinese or Korean literature, (d) a field offered in another department or interdepartmental program.

For the major in Japanese literature — (1) a general examination in the literature of ancient India; (2) examinations in three approved fields to be selected from at least two of the following groups: (a) ancient, classical, or modern Japanese literature, (b) Japanese Buddhism, another field of Japanese thought or religion, or Japanese linguistics, (c) Chinese or Korean literature, (d) a field offered in another department or interdepartmental program.

For the major in Buddhist studies — (1) a general examination in your major field; (2) an examination in an approved subfield within your major field; (3) a general examination in another approved field inside or outside the department.

For the major in ancient Chinese civilization or Japanese linguistics — (1) an examination in your major language area; (2) a general examination in your major field; (3) an examination in an approved subfield within your major field; (4) a general examination in another approved field inside or outside the department.

The written qualifying examinations must be taken within a four-week period after satisfying all language and course requirements. With the consent of the department, you may repeat the qualifying examinations once only. You must also take a translation examination in your area of specialization.

After successful completion of the written examinations, the department appoints a doctoral committee whose chair serves as your dissertation adviser. Preferably within six months, but no more than a year after your written examinations, you must pass the University Oral Qualifying Examination on the dissertation proposal. With department consent, you may repeat the examination once.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination
Within three years after you have advanced to candidacy, you must present a dissertation embodying the results of independent investigation. If you fail to meet the five-year time limit for the completion of the dissertation, you are required to take the written qualifying examinations again.

A final oral defense of the dissertation is optional at the discretion of the doctoral committee.

Chinese

Lower Division Courses
No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Chinese. (Formerly numbered East Asian Languages 1A.) Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills -- speaking, listening, comprehension, reading, and writing.

Ms. Wang

2. Elementary Modern Chinese. (Formerly numbered East Asian Languages 1B.) Lecture, two hours; discussion, three hours. Continuation of course 1.

Ms. Wang

3. Elementary Modern Chinese. (Formerly numbered East Asian Languages 1C.) Lecture, two hours; discussion, three hours. Continuation of course 2.

Ms. Wang

4. Intermediate Modern Chinese. (Formerly numbered East Asian Languages 11A.) Lecture, two hours; discussion, three hours. Prerequisite: course 3 or consent of instructor. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, knowledge of idiomatic expressions, and both traditional and simplified characters.

5. Intermediate Modern Chinese. (Formerly numbered East Asian Languages 11B.) Lecture, two hours; discussion, three hours. Prerequisite: course 4 or consent of instructor. Continuation of course 4.

6. Intermediate Modern Chinese. (Formerly numbered East Asian Languages 11C.) Lecture, two hours; discussion, three hours. Prerequisite: course 5 or consent of instructor. Continuation of course 5.

50. Chinese Civilization. (Formerly numbered East Asian Languages 40A.) Lecture, three hours. Knowledge of Chinese not required. Survey of development of outstanding aspects of Chinese culture from prehistoric to modern times.

Mr. Chao
Upper Division Courses

10A-100B-100C. Advanced Modern Chinese. (Formerly numbered East Asian Languages 121A-121B-121C.) Lecture, three hours. Prerequisite: course 60 or consent of instructor. Materials selected from contemporary Chinese publications, with emphasis on social sciences. Texts analyzed for their linguistic features and social and cultural background. Readings, compositions, informal debates on topical issues, and oral presentations.

101A-101B-101C. Readings in Modern Expository Chinese. (Formerly numbered East Asian Languages 124A-124B-124C.) Lecture, three hours. Prerequisite: course 100C or consent of instructor. Selected readings in modern essays taken from literary texts. In addition, students work with material in the area of their professional interests.

109A-110B-110C. Introduction to Classical Chinese. (Formerly numbered East Asian Languages 113A-113B-113C.) Lecture, three hours. Prerequisite: course 3 or consent of instructor. Grammar and readings in selected texts.

110A. East Asian Cultural Traditions. (Formerly numbered East Asian Languages 110A.) Lecture, two hours. Prerequisite: course 110B or consent of instructor. The development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism such as Pure Land and Zen, contributions to Chinese culture.

120A. Poetry and Prose. (Formerly numbered East Asian Languages 120A.) Lecture, two hours. Prerequisite: course 120B or consent of instructor. Readings and discussion of works of modern Chinese literature.

130A. Poetry and Prose. (Formerly numbered East Asian Languages 130A.) Lecture, two hours. Prerequisite: course 130B or consent of instructor. Poetry and prose of the 20th century. Themes selected from contemporary poetry, drama, and fiction, with emphasis on bibliography training (including various types of literary prose and historical narratives, attention to stylistic features and historical development. May be repeated for credit with consent of instructor. In Progress grading.

130B. Readings in Chinese Literary Texts. (Formerly numbered East Asian Languages 130B.) Lecture, three hours. Prerequisite: course 130A or consent of instructor. Readings and discussion of works of modern Chinese literature.

131A. Poetry and Prose. (Formerly numbered East Asian Languages 131A.) Lecture, two hours. Prerequisite: course 131B or consent of instructor. Poetry and prose of the 20th century. Themes selected from contemporary poetry, drama, and fiction, with emphasis on bibliography training (including various types of literary prose and historical narratives, attention to stylistic features and historical development. May be repeated for credit with consent of instructor. In Progress grading.

132. Post-1949 Chinese Literature. (Formerly numbered East Asian Languages 126.) Lecture, three hours. Prerequisite: course 132B or consent of instructor. Reading and discussion of selected works in contemporary poetry, drama, and fiction, with emphasis on People’s Republic of China.

133A-133B. Readings in Classical Chinese Poetry. (Formerly numbered East Asian Languages 122A-122B.) Lecture, three hours. Prerequisite: course 133B or consent of instructor. Readings and discussion of classical Chinese poetry.

140A-140B-140C. Readings in Chinese Literary Texts. (Formerly numbered East Asian Languages 183A-183B-183C.) Lecture, three hours. Prerequisite: course 110C.

143A-143B. Readings in Classical Chinese Poetry. (Formerly numbered East Asian Languages 152A-152B.) Lecture, three hours. Prerequisite: course 110C or consent of instructor. Discussion and critical reading of representative works selected on basis of such critical concerns as thematic patterns, image clusters, genres, and characteristics of major poets. May be repeated for credit with consent of instructor. In Progress grading.

145A-145B. Readings in Traditional Chinese Fiction. (Formerly numbered East Asian Languages 151A-151B.) Lecture, three hours. Prerequisite: course 145B or equivalent or consent of instructor. Selected readings from classic Chinese novels. Designed primarily as a language course; emphasis on appreciation and obtaining a command of various literary styles, as well as on critical interpretation of the texts.

160. Chinese Buddhism. (Formerly numbered East Asian Languages 173.) Lecture, three hours. Knowledge of Chinese not required. Lectures and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism such as Pure Land and Zen, contributions to Chinese culture.

165. Introduction to Chinese Buddhist Texts. (Formerly numbered East Asian Languages 139.) Lecture, three hours. Prerequisite: course 100A or 110C or consent of instructor. Introduction to Chinese Buddhist texts written in literary Chinese and taken from translated Indian sutras, indigenous exegetical materials, Chinese apocryphal scriptures, and Chan writings. Problems in translation from Indo-European languages into Chinese; evolution of Chinese Buddhist terminology. Coverage may be repeated for credit with consent of instructor.

170. Readings in Chinese Philosophical Texts. (Formerly numbered 275.) Lecture, three hours. Prerequisite: course 170A or consent of instructor. May be repeated for credit with consent of instructor.

175. Introduction to Chinese Thought. (Formerly numbered East Asian Languages 185.) Lecture, three hours. Prerequisite: course 175A or consent of instructor. General survey of indigenous Chinese thought from Chou period to circa 1800, covering Confucianism, Taoism, Mo-tzu, legalists, influence of Buddhism, development of neo-Taoism, neo-Confucianism.

180. Chinese Brush Painting. (Formerly numbered East Asian Languages 169.) Lecture, two hours; studio, two hours. Combination studio-lecture course surveying aesthetics and techniques of Chinese literati painting. Emphasis on realizing philosophical ideals of critical treatises through mastery of traditional materials and elements of landscape.

185A-185B. Archaeology in Early and Modern China. (Formerly numbered East Asian Languages 170A-170B.) Lecture, three hours.

190A. Introduction to Chinese Archaeology. Early Chinese study of their own past, types of artifacts, antiquarianism, and beginnings of scientific archaeology in China before 1949.

190B. Archaeology in People’s Republic of China. Survey of major excavations of sites of all periods, carried out under the intensive archaeological program of the PRC, and interpretation of archaeological findings.

191. Chinese Ethnology and Calligraphy. (Formerly numbered East Asian Languages 189.) Lecture, three hours. Prerequisite: one year of classical Chinese or consent of instructor. Covers (1) development of the Chinese writing system from the "Porcelain Inscriptions" 6,000 years ago to modern "Simplified Forms" and the studies of Six Scripts principles which were used to form Chinese characters and (2) aesthetic training of calligraphic art and its appreciation, with focus on ways of recognizing and interpreting the "Cursive Style," a common form of handwriting.

Graduate Courses

200. Bibliography and Methods of Research in Chinese. (Formerly numbered East Asian Languages 285.) Required of all graduate students in Chinese. Lectures and discussion on research methodology dealing with traditional Chinese materials, with emphasis on bibliography training (including most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism, and rare book editions.

201A-201B. Seminar in Classical Historical Study and Readings in Classical Studies. (Same as History M201L.) Seminar, three hours. Prerequisite: two years of classical Chinese or working knowledge of classical Chinese. Readings in late Imperial Civil Service Examination essays.

230A-230B. Seminars: Selected Topics in Modern Chinese Literature (2 units each). (Formerly numbered East Asian Languages 251.) Lecture, three hours. Prerequisite: consent of instructor. Selected readings in 20th-century Chinese literature, emphasizing fiction. Discussion of individual research projects. May be repeated for credit. In Progress grading.

230A. Modern Chinese Cultural History (2 units each). (Formerly numbered East Asian Languages 243A.) Lecture, three hours. Prerequisites: courses 143A and/or 143B, or consent of instructor. Chinese poetry from the Shih-ching phase to the 6th century, with emphasis on People’s Republic of China. Seminars alternate yearly between traditional narrative and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in narrative selected from genres from the Chou through the T’ang period, Topics in drama selected from ts’ao-chih and ch’uan-ch’i. May be repeated for credit with consent of instructor. In Progress grading.

230B. Modern Chinese Cultural History (2 units each). (Formerly numbered East Asian Languages 243B.) Lecture, three hours. Prerequisite: reading knowledge of colloquial and literary Chinese. Seminars alternate yearly between traditional narrative and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in narrative selected from genres from the Chou through the T’ang period. Topics in drama selected from ts’ao-chih and ch’uan-ch’i. May be repeated for credit with consent of instructor. In Progress grading.

240A-240B. Seminars in Classical Chinese Poetry. Lecture, three hours. Prerequisite: course 143A or course 143B, or consent of instructor. Chinese poetry from the Shih-ching to the 6th century, with emphasis on People’s Republic of China. Seminars alternate yearly between traditional narrative and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in narrative selected from genres from the Chou through the T’ang period. Topics in drama selected from ts’ao-chih and ch’uan-ch’i. May be repeated for credit with consent of instructor. In Progress grading.

245A-245B. Seminars in Traditional Chinese Narrative and Drama (2 units each). (Formerly numbered East Asian Languages 244.) Lecture, three hours. Prerequisite: reading knowledge of colloquial and literary Chinese. Seminars alternate yearly between traditional narrative and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in narrative selected from genres from the Chou through the T’ang period. Topics in drama selected from ts’ao-chih and ch’uan-ch’i. May be repeated for credit with consent of instructor. In Progress grading.

250A-250B. Seminars in Chinese Buddhist Texts (2 units each). (Formerly numbered East Asian Languages 213.) Lecture, three hours. May be repeated for credit with consent of instructor. In Progress grading.

255A-255B. Seminars in Chinese Cultural History (2 units each). (Formerly numbered East Asian Languages 275.) Lecture, three hours. Prerequisite: consent of instructor. Discussion and research on major problems related to Chinese culture, such as beginnings of scientific archaeology in China and the Xia and Shang cultures and Xia and Shang dynasties. May be repeated for credit. In Progress grading.

260. Introduction to Buddhism. (Formerly numbered 41.) Lecture, three hours. Knowledge of Asian languages not required. General survey of development of Buddhism in India, focusing on those religious doctrines and meditative practices most essential to various Asian traditions of the religion.

East Asian Languages and Cultures Lower Division Course

60. Introduction to Buddhism. (Formerly numbered 41.) Lecture, three hours. Knowledge of Asian languages not required. General survey of development of Buddhism in India, focusing on those religious doctrines and meditative practices most essential to various Asian traditions of the religion.
Upper Division Courses

162. Buddhist Meditation Traditions. (Formerly numbered 171.) Lecture, three hours. Knowledge of at least one East Asian language required. Critical issues common to historical and philosophical traditions, such as meditation and practice of meditation in Buddhism, with emphasis on Zen and other schools. Topics include various meditations and philosophical traditions, including meditation and meditation methods. May be repeated for credit with consent of instructor. Mr. Buswell

199. Special Studies in East Asian Languages and Cultures (2 to 4 units). Prerequisites: senior standing in department or advanced reading knowledge of Chinese or Japanese, consent of instructor. Special individual study. May be repeated once with consent of instructor.

Graduate Courses

240A-240B. Seminars: Topics in East Asian Literary History (2 units each). (Formerly numbered 279.) Lecture, three hours. Prerequisite: reading knowledge of at least one East Asian language. Critical issues common to East Asian history, including Confucianism, Daoism, and elements of East Asian history, such as political and philosophical issues. May be repeated for credit with consent of instructor. Mr. Scharff

265A-265B. Seminars: Selected Topics in Buddhist Studies (2 units each). (Formerly numbered 257.) Lecture, three hours. Coverage varies. May be repeated for credit. In progress grading. Mr. Buswell

299A. Independent Study (2 units each). (Formerly numbered 299.) Lecture, three hours. Prerequisites: graduate standing, knowledge of a particular text, and consent of instructor. May be repeated for credit. In Progress grading. Mr. Buswell

301. Teaching an East Asian Language as a Foreign Language. 375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: teaching assistant, associate, or fellow. Teaching apprentice under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). S/U grading.

598. Research for and Preparation of M.A. Thesis (2 to 4 units). Prerequisite: consent of instructor. Maximum of four units may be applied toward M.A. degree requirements. S/U grading.

Indic

Upper Division Courses

110A. Elementary Sanskrit. (Formerly numbered East Asian Languages 160.) Lecture, three hours. Introduction to script and grammar, with reading exercises and attention to significance of Sanskrit for the understanding of other Indo-European languages. Mr. Scharff

110B. Intermediate Sanskrit. (Formerly numbered East Asian Languages 161.) Lecture, three hours. Prerequisite: course 110A or equivalent. Advanced aspects of grammar and reading of literary texts. Mr. Scharff

110C. Advanced Sanskrit. (Formerly numbered East Asian Languages 162.) Lecture, three hours. Prerequisite: course 110B or equivalent. Reading of entire Shagavagdota or comparable amount of other Sanskrit literature. Mr. Scharff

115. Readings in Sanskrit. (Formerly numbered East Asian Languages 165.) Lecture, three hours. Prerequisite: course 110C or equivalent. Extensive reading in such texts as best serve students' needs. Mr. Scharff

175. Introduction to Indic Philosophy. (Formerly numbered East Asian Languages 167.) Lecture, three hours. Survey of main trends in Indian philosophy from ancient to modern times. Mr. Scharff

Graduate Courses

M222A-M222B. Vedic. (Formerly numbered East Asian Languages 222A-M222B.) Lecture, three hours. Prerequisite: knowledge of Sanskrit equivalent to course 110C. Characteristics and Vinaya rules and readings in Rigveda hymns. Only course M222B may be repeated for credit.

230. Selected Readings in Sanskrit Texts. (Formerly numbered 230A-230B.) Lecture, three hours. May be repeated for credit with consent of instructor. S/U or letter grading. Mr. Scharff

234A-234B. Introduction to Panini's Grammar. (Formerly numbered East Asian Languages 221A-221B.) Lecture, three hours. Prerequisite: course 110C or equivalent. Reading of selected passages of the text, with introduction to Panini's technique. S/U or letter grading. Mr. Scharff

236A-236B. Pali and Prakrits. (Formerly numbered East Asian Languages 214A-214B.) Lecture, three hours. Prerequisites: knowledge of Sanskrit equivalent to course 110B, consent of instructor. Grammatical studies and reading of texts. Comparative considerations. S/U or letter grading. 236A: Pali. 236B: Prakrits. Mr. Scharff

Japanese

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Japanese. (Formerly numbered East Asian Languages 9A.) Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Introduction to modern Japanese with attention to conversational language, grammar, and conversation drill based on material covered in class. Ms. Akatsuka, Mr. Iwasaki

2. Elementary Modern Japanese. (Formerly numbered East Asian Languages 9B.) Lecture, two hours; discussion, three hours. Ms. Akatsuka, Mr. Iwasaki

3. Elementary Modern Japanese. (Formerly numbered East Asian Languages 9C.) Lecture, two hours; discussion, three hours. Ms. Akatsuka, Mr. Iwasaki

4. Intermediate Modern Japanese. (Formerly numbered East Asian Languages 19A.) Lecture, three hours; discussion, two hours. Prerequisite: course 3. Continuation of course 3. Readings in modern Japanese with emphasis on comprehension and structural analysis. Ms. Akatsuka

5. Intermediate Modern Japanese. (Formerly numbered East Asian Languages 19B.) Lecture, three hours; discussion, two hours. Prerequisite: course 4. Continuation of course 4.

6. Intermediate Modern Japanese. (Formerly numbered East Asian Languages 19C.) Lecture, three hours; discussion, two hours. Prerequisite: course 3. Continuation of course 3.

10. Intermediate Spoken Japanese (2 units). (Formerly numbered East Asian Languages 15A.) Prerequisites: course 3, consent of department. Limited to students with credit for courses 2, 3, 3. May be taken concurrently with courses 4, 5, 6. Conversational Japanese. Ms. Nishide

Upper Division Courses

100A-100B-100C. Advanced Modern Japanese (2 units each). (Formerly numbered East Asian Languages 119A-119B, 145.) Lecture, two hours; discussion, three hours (100A-100B) and one hour (100C). Prerequisite: course 6. Emphasis on comprehension, structure, and proficiency in reading, composition, and conversation in modern Japanese. Ms. Pincus

120. Introduction to Japanese Linguistics. (Not the same as course CM120 prior to Fall Quarter 1990.) Lecture, three hours. Prerequisite: course 3 or equivalent. Introduction to Japanese grammar and sociolinguisitcs through reading, discussion, and problem solving. Grammar, semantics, and discourse pragmatics. Ms. Akatsuka, Mr. Iwasaki

CM122. Structure of Japanese I. (Formerly numbered CM120.) (Same as Linguistics M176A.) Lecture, three hours. Prerequisites: course 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course C222. Ms. Akatsuka

CM123. Structure of Japanese II. (Same as Linguistics M176B.) Lecture, three hours. Prerequisites: two or more years of Japanese language study or consent of instructor. Survey of Japanese language at three different levels of organization: (1) word level—word class, verbal morphology and semantics; (2) clause/sentence level—tense, aspect, modality; (3) discourse level—point of view, ellipsis, topicalization. Concurrently scheduled with course C223. Mr. Iwasaki

130. Introduction to Kawabata Yasunari. (Formerly numbered East Asian Languages 134A.) Lecture, three hours. Prerequisite: course 6. Reading and analysis of the Nobel laureate's short stories, with particular emphasis on their emotional structure. (F, even years)
131. Introduction to Mushakoji Sanatsu. (Formerly numbered East Asian Languages 134B.) Lecture, three hours. Prerequisite: course 5. Reading and discussion of Mushakoji's prose, poetry, and poetry. (F, odd years)

C132. Introduction to Shiga Naoya. (Formerly numbered East Asian Languages C178.) Lecture, three hours. Prerequisite: course 100A or 130 or 131. Reading and discussion of Shiga's short stories, with special emphasis on Hino's novel technique until 1918. Concurrently scheduled with course C232. (W, even years)

133. Readings in Modern Japanese Texts. Lecture, three hours. Prerequisite: course 141. Designed to familiarize students with literary, journalistic, and critical texts representing late 19th- and 20th-century Japanese. Text selection set by individual instructor. Ms. Plutschow and the Staff

140. Introduction to Classical Japanese: Heian Literature. (Formerly numbered East Asian Languages 129.) Lecture, three hours. Prerequisite: course 100C or consent of instructor. Introduction to literary Japanese, with readings and discussions in prose and poetry of the Heian period. Ms. Belu

141. Readings in Medieval Japanese Literature. (Formerly numbered East Asian Languages 179A.) Lecture, three hours. Prerequisites: course 140 or consent of instructor, reading knowledge of modern and classical Japanese. Readings include poetry from the 13th to 15th century, using original texts in classical Japanese. Mr. Plutschow

142. Readings in Edo Literature. (Formerly numbered East Asian Languages 179B.) Lecture, three hours. Prerequisite: course 140. Readings and discussion in prose, poetry, and drama from 1600 to 1868. Mr. Belu

149. Introduction to Kambun and Other Literary Styles. (Formerly numbered East Asian Languages 137.) Lecture, three hours. Prerequisite: course 141 or 142 or consent of instructor. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Mr. Belu, Ms. Plutschow

175. Introduction to Japanese Thought. (Formerly numbered East Asian Languages 184.) Lecture, three hours. Knowledge of Asian languages not required. General survey of Japanese thought from early modern times, including: (a) biographies of Shinto, major religious forms of Confucianism, ethics of bushido, National Labor School, and modern Japanese philosophers such as Nishida Kitaro and Watsuji Tetsuro. Attention also to representative contemporary thinker about Japanese thought, especially Shigenshii, of what might qualify as recognizably "Japanese" in aesthetics, ethics, and philosophy.

M182. Japanese Folklore. (Formerly numbered East Asian Languages M182.) (Same as Folklore M182.) Lecture, three hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals/offerings and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto-Buddhist syncretism, and other non-Buddhist belief systems found in Japan. Mr. Plutschow

C195. Readings in the Japanese Family System. (Formerly numbered East Asian Languages C181.) Lecture, three hours. Prerequisite: course 100C or consent of instructor. Study of World War II articles criticizing the family system and way it has functioned in the past. Concurrently scheduled with course CM295. (W, odd years)

M196. Seminar: Comparative Japanese Law — Selected Readings (2 units). (Same as Law C296.) Designed to introduce students to a variety of Japanese-language legal materials. Reading of law review articles and other sources as time permits (e.g., selections from contracts, cases, or treaties); titles vary from term to term. Classroom work to be coordinated with outside research projects with consent of instructor. Mr. Ramsey

Graduate Courses

200. Bibliography and Methods of Research in Japanese. (Formerly numbered East Asian Languages 296.) Lecture, three hours. Required of all graduate students in Japanese. Mr. Befu

C222. Structure of Japanese I. (Formerly numbered C220.) Lecture, three hours. Prerequisites: course 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly diachronically distinct characteristics of Japanese syntax and semantics. (2) clause/sentence level — clause structure. (3) discourse level — coherence. Concurrently scheduled with course CM122. Ms. Akatsuka

C223. Structure of Japanese II. Lecture, three hours. Prerequisite: two or more years of Japanese. Readings and discussion of many seemingly synchronically distinct characteristics of Japanese grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course CM123. Mr. Iwasski

224A-224B. Seminars: Selected Topics in Japanese Discourse Linguistics (2 units each). Lecture, three hours. Prerequisite: course CM122 or equivalent. Critical reading and discussion of selected topics in Japanese discourse linguistics. May be repeated for credit with consent of instructor. In Progress grading. Ms. Akatsuka, Mr. Iwasski

225A-225B. Seminars: Linguistic Analysis of Japanese Narratives (2 units each). (Formerly numbered East Asian Languages 225.) Lecture, three hours. Prerequisite: course CM122 or consent of instructor. Analysis of short and long Japanese narratives. Emphasis on exploration of how grammatical features such as tense, aspect, voice, and point of view are utilized to achieve desired literary effects. May be repeated for credit with consent of instructor. In Progress grading. Ms. Akatsuka

229A-229B. Seminars: Linguistic Analysis of Japanese Narratives (2 units each). Lecture, three hours. Prerequisite: course CM122 or consent of instructor. Analysis of short and long Japanese narratives. Emphasis on exploration of how grammatical features such as tense, aspect, voice, and point of view are utilized to achieve desired literary effects. May be repeated for credit with consent of instructor. In Progress grading. Ms. Akatsuka

C235. Readings in the Japanese Family System. (Formerly numbered East Asian Languages C235.) Lecture, three hours. Prerequisite: course 100C or equivalent. Not open for credit to students with credit for course C232. Analysis and discussion of post-World War II articles criticizing the family system and way it has functioned in the past. Concurrently scheduled with course C195. Graduate students write a research paper and present written or oral reports on outside readings. (W, odd years)

Korean

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Korean. (Formerly numbered East Asian Languages 7A.) Lecture, two hours; discussion, three hours. Not open to students who, from whatever source, already know the language. Introduction to standard spoken Korean and Korean writing, with emphasis on conversation. Ms. Sohn

2. Elementary Modern Korean. (Formerly numbered East Asian Languages 7B.) Lecture, two hours; discussion, three hours. Continuation of course 1. Ms. Sohn
Upper Division Courses

100A-100B-100C. Advanced Modern Korean. (Formerly numbered East Asian Languages 117A-117B.) Lecture, three hours. Prerequisite: course 100A or equivalent. Course 100A: consent of instructor is prerequisite to 100B; course 100B is prerequisite to 100C. Course 100C: Continuation of course 100B. Readings of modern prose and poetry, with emphasis on grammar and Sino-Korean. Ms. Sohn

120. Structure of Korean. (Formerly numbered East Asian Languages CM177.) Lecture, three hours. Prerequisites: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and phonological characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean. Concurrently scheduled with course C220. Ms. Sohn

130. Readings in Modern Korean Literature. (Formerly numbered East Asian Languages 128.) Lecture, three hours. Prerequisite: reading knowledge of modern Korean. Reading and discussion of selected works in modern Korean. Ms. Sohn

150. Korean Literature in Translation. (Formerly numbered East Asian Languages 142A.) Lecture, three hours. Knowledge of Korean not required. Survey of Korean literature from the beginning to the present day, with all readings from English translations. Poetry and prose to the end of the 19th century. Mr. Lee

151. Korean Literature in Translation. (Formerly numbered East Asian Languages 142B.) Lecture, three hours. Knowledge of Korean not required. Survey of Korean literature from the beginning to the present day, with all readings from English translations. Literature of the 20th century. Mr. Lee

160. Korean Buddhism. (Formerly numbered East Asian Languages 175.) Lecture, three hours. Knowledge of Korean not required. Introduction and development of Buddhism in Korea, interactions between indigenous Korean culture and Sino Buddhist traditions. Korean syntheses of Indian and Chinese Buddhism, with an emphasis on Korean Buddhist poetic and literary works. Mr. Buswell

165. Introduction to Korean Buddhist Texts. (Formerly numbered East Asian Languages 138.) Lecture, three hours. Prerequisites: course 100B or Chinese 110C. Introduction to reading Korean Buddhist texts written in Sino-Korean and taken from in-digenous doxographic materials and philosophical writings, Korean Buddhist apocryphal scriptures, native exegetical commentaries, and Son (Zen) texts. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor. Mr. Buswell

170. Introduction to Korean Thought. (Formerly numbered East Asian Languages 185.) Lecture, three hours. General survey of Korean thought from the earli-est records to the 20th century, including shamanism, Taoism, Buddhism, Christianity, and neo-Confucianism. Korean traditions and those found in India, China, Japan, and the West. Mr. Duncan

Scope and Objectives

This undergraduate major is designed for those who wish to study the Chinese- and Japanese-speaking areas of East Asia and/or engage in business there. It offers a social science approach, combined with language study and work in the humanities.

Bachelor of Arts Degree

Preparation for the Major

Required: History 9C and 11A-11B, or Chinese 50 and Japanese 50; Chinese 1, 2, 3 or Japanese 1, 2, 3 or Korean 1, 2, 3 or a parallel Cantonese sequence; Chinese 4, 5, 6 or Japanese 4, 5, 6 or Korean 4, 5, 6. Students planning to pursue classical Chinese in the major need Chinese 110A-110B-110C in addition to the above courses.

The Major

This consists of three parts:

(2) Five courses from the following: any upper division courses in the social sciences listed above not being used to satisfy that requirement; any upper division courses in the Department of East Asian Languages and Cultures not being used to satisfy other parts of the major requirements; any new upper division courses relevant to East Asian or Asian American studies (including no more than three CED courses) which may be approved by the Executive Committee of the college on the recommendation of the advisory committee; Art History 114C, 114E, C115B, C115C*, Ethnomusicology and Systematic Musicology 20C, 156A*, 156B*, 157, 158A, 158B, 158C, 160A.

(3) The prescribed courses in one of the following areas (courses offered to satisfy this requirement may not be applied toward other parts of the major requirements): (a) archaeology — any four courses from Chinese 140A, 140B, Anthropology 112*, 115Q*, 115R*; (b) geography — Geography 133*, 186*, and two additional upper division geography courses; (c) history — four upper division or graduate courses from East Asian or Southeast Asian history (History 182A, 182B, 183A, 183B, 184, 187A, 187B, 187C, 190A, 190B, 197 when in the East Asian field); (d) political science — Political Science 115 and three courses from 135*, 136*, C137A, 137B, 159, 160, 161, C197* when in the East Asian field; (e) religion — Chinese 160, 165, East Asian Languages and Cultures 162, Japanese 160, Korean 160, 165; (f) sociology — Sociology 156 and three courses from 102, 116, 132, 134*, 188.

Guido Tabellini, Ph.D.
Darrel Williams, Ph.D.

Scope and Objectives

UCLA’s Economics Department is ranked among the 10 best in the nation according to a recent survey conducted by the Conference Board of the Associated Research Councils. Its undergraduate program is designed for students who wish to gain a thorough understanding of economic analysis. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specialties in the discipline, the analytic core of the major in economics is closely structured. Some courses are appropriate for nonmajors, but the curriculum is most suitable for students who wish to make the study of economics the primary focus in their undergraduate education.

The undergraduate major provides analytical training in reference to socioeconomic phenomena and provides an excellent theoretical background for those pursuing graduate education in law, management, public administration, journalism, social welfare, architecture and urban planning, and education, as well as economics.

The graduate program is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students’ ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas. A Master of Arts program is also offered, which involves coursework and comprehensive examinations designed for the Ph.D. student.

Bachelor of Arts in Economics

Pre-Economics Major

While you are completing the lower division preparation courses for the major, you may be
classified as a pre-economics major. When you have completed the preparation courses for the major and before you reach 100 quarter units (but no later than 135 quarter units), you must petition to enter the major at the undergraduate counselor's office in 2253 Bunche Hall.

Preparation for the Major

**Required:** English 4 or 129 or two 100W courses; Economics 1, 2, 40 (or Statistics 50 as a substitute for course 40); two courses in calculus (i.e., Mathematics 3A or 31A and 3B, 3E, or 31B; the Mathematics 31A, 31B sequence is particularly recommended). All courses must be completed for a letter grade. A 2.0 (C) grade is required in each premajor course, with a combined 2.5 GPA required in the economics and mathematics courses. You must petition for major standing by the time you attain 135 quarter units.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

**Required:** Ten upper division courses in economics which must include Economics 101A, 101B, 102, and at least one course in three different fields in economics selected from the list below (all courses must be completed for a letter grade). Economics 100, 110, and 190 may not be included among the 10 upper division courses. One or two of the 10 courses may include Management 120A and/or 120B and/or 130 and/or 133 (Learning Center courses or courses transferred from other institutions may not be applied toward this option).

A grade of C or better is required in each of courses 101A, 101B, and 102. In addition, you must have a 2.0 grade-point average in the upper division major courses. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor or before enrolling in any courses for the major.

Major Fields

Economic theory (courses 101A, 101B, 102, 103A-103Z, 104, 105A, 105B, 107); economic development (courses 111, 112); regional economics (courses 120, 121); public finance (courses 130, 133, 135, 136); statistics, mathematical economics, and econometrics (courses 141, 142, 143, 144, 145, 146, 147A, 147B); labor economics (courses 150, 151, 152); money and banking (courses 160, 161); government and industry (courses 170, 171, 172, 173, 174, 175, 176); international economics (courses 180, 181A, 181B, 182, 183, 184); international economics (courses 191, 192).

Bachelor of Arts in Economics/Business

This program offers students a business orientation in their undergraduate studies and is designed to prepare students for careers in business and for graduate education in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see "The Major").

Admission

Students who do not qualify for admission to the major by the last day of Spring Quarter 1991 must follow the premajor and major requirements listed below.

Enrollment in the program is limited. Applications for admission are handled exclusively by the Department of Economics. To apply you must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit term of residence in regular session at UCLA, and all courses listed under "Preparation for the Major." In addition, you must (1) be enrolled in UCLA regular session at the time of application, (2) have a 2.0 (C) minimum grade in each preparation course, and (3) have a 3.0 (B) overall average in all preparation courses except English.

Note: The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Pre-Economics/Business Major

While you are completing the preparation courses for the major, you may be classified as a pre-economics/business major. (Transfer students who wish to enter UCLA as pre-economics/business majors must meet the admission screening requirements. For information, contact the Office of Undergraduate Admissions and Relations with Schools.) When you have completed the required economics, mathematics, and management preparation courses and have at least 72 quarter units (but no more than 135 quarter units), you must petition to enter the major at the economics/business counselor's office in 2250B Bunche Hall.

Preparation for the Major

**Required:** Economics 1, 2, 40 (or Statistics 50), 101A, 101B; English 4 or 129 or two 100W courses; Management 1A, 1B; Mathematics 3A or 31A and 3B, 3E, or 31B (the Mathematics 31A, 31B sequence is particularly recommended). All courses must be completed for a letter grade.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the economics/business counselor before enrolling in any courses for the major.

The Major

**Required:** Economics 102 and at least two courses from 104, 173, 174, 184; four other upper division courses in economics in at least two different fields (no more than two may be taken in the government and industry field); four upper division courses from Management 108, 120A, 120B, 122, 123, 124, 127, 130, 133, 140, 175. Transfer credit for any of the major courses is subject to department approval. In addition, some graduate courses from the Anderson Graduate School of Management may be applied toward the major with department consent prior to taking the courses. Consult the economics/business counselor or before enrolling in any courses for the major.

All upper division major courses must be taken for a letter grade. A grade of C or better is required in each upper division major course (except for Economics 101A and 101B which are part of the premajor), and you must have a 2.0 GPA in the upper division major courses to graduate in this major.

Bachelor of Arts in Economics/International Area Studies

This program is for students who wish to attain specialized knowledge of a particular geographical area in addition to the economics analysis provided by the major. It should be useful to those who plan careers in international business or government service. The department encourages participation in the University of California Education Abroad Program or other recognized international study programs. Experience in foreign firms or institutions would be an advantage but yields no academic unit credit toward the major.

Admission

Students who do not qualify for admission to the major by the last day of Spring Quarter 1991 must follow the premajor and major requirements listed below.

Qualified students must submit written applications to the undergraduate counselor in 2253 Bunche Hall to be admitted. To apply you must have completed at least 72 quarter units, one 12-unit term of residence in regular session at UCLA, and all courses listed under "Preparation for the Major." In addition, you must be enrolled in UCLA regular session at the time of application. All courses must be completed for a letter grade. A minimum 2.0 (C) grade is required in each premajor course, with a combined 2.5 GPA in the economics and mathematics courses. Language course preparation need not be completed at the time of admission but must be completed before pre-
paring the research paper required in Economics 193. Your program as a whole must be approved by the Economics Department faculty adviser before you are admitted to the major; you must apply before you reach 135 quarter units.

Pre-Economics/International Area Studies Major

While you are completing the preparation courses for the major, you may be classified as a pre-economics/international area studies major. When you have completed the required mathematics and economics preparation courses and at least the first year of foreign language, and have at least 72 quarter units (but no more than 135 quarter units), you must petition to enter the major at the undergraduate counselor's office.

Preparation for the Major

Required: Economics 1, 2, 40 (or Statistics 50 as a substitute for course 40), 101A, 101B, 102; two courses in calculus (i.e., Mathematics 3A or 31A and 3B, 3E, or 31B; the Mathematics 31A, 31B sequence is particularly recommended). You also must complete the sixth quarter course (or equivalent) of any modern language (e.g., French 6, German 6, Russian 6, Spanish 25; these are most frequently offered in fulfillment of this requirement, but also see the offerings under Portuguese, Italian, Germanic Languages, Near Eastern Languages, African Languages, and East Asian Languages and Cultures).

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: A total of 12 upper division courses selected from economics and the list of "Approved Noneconomics Courses" below. Eight must be from economics, including Economics 191, 192, 193, and five courses from at least two different fields in economics (selected from the "Major Fields" listed under the regular economics major). Economics 101A, 101B, and 102 (which are required for the premajor) cannot be used to satisfy this requirement. The four remaining upper division courses must be chosen from the approved list below and must include selections from at least two different departments. Economics 193 must be completed in your last year before graduation and includes the preparation of a research paper on the economy of the country or region of your specialization. Sources in the language of the region or country must be utilized. The non-economics courses, the research paper, and the language learned must show consistency of purpose.

One or two of the five upper division economics electives may include Management 120A and/or 120B and/or 130 and/or 133 (Learning Center courses or courses transferred from other institutions may not be applied toward this option).

To graduate in the major you must achieve a 2.0 GPA for both economics and noneconomics courses, with a grade of C− or better in each course.

Approved Noneconomics Courses

Specialization in Computing

Majors in economics, economics/business, and economics/international area studies may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, Mathematics 61, and two courses from Program in Computing 10C, 30, 60, (3) completing at least two courses from Economics 104, 143, 144, 145, 146, 147A, 147B, 199, with the additional provision that the courses taken must make substantial use of computers. A grade of C− or better is required in each course, with a combined GPA of at least 2.0. You graduate with a bachelor's degree in your major and a specialization in computing.

Bachelor of Science in Economics/System Science

The degree is described following the Economics Department courses.

Honors Program

The departmental honors program is open to majors in economics, economics/business, economics/international area studies, and economics/system science who have an overall 3.5 grade-point average.

To qualify for departmental honors at graduation, you must (1) select at least seven of the required upper division economics courses from the approved list designated for departmental honors, (2) complete a senior thesis acceptable to the departmental honors committee, (3) present your thesis in Economics 199H and 199, the courses used must be from economics courses, with a grade of C− or better in each course.

One or two of the five upper division economics electives may include Management 120A and/or 120B and/or 130 and/or 133 (Learning Center courses or courses transferred from other institutions may not be applied toward this option).

To graduate in the major you must achieve a 2.0 GPA for both economics and noneconomics courses, with a grade of C− or better in each course.

Graduate Study

Admission

Applicants for graduate study who satisfy the University minimum requirements are eligible to apply. It is strongly recommended that you have undergraduate training in economics, mathematics, and statistics. You must also submit a full record of prior university experience, three letters of reference, and your scores in the Graduate Record Examination (GRE) General Test and the Subject Test in Economics.

The Department of Economics (2263 Bunche Hall, UCLA, Los Angeles, CA 90024-1477) admits students only for Fall Quarter of each academic year. The deadline for submitting the admission/fellowship application is December 31.

Major Fields or Subdisciplines

Economic theory; economic development; urban and regional economics; public finance; mathematical economics; statistics and econometrics; labor economics; money and banking; industrial organization; economic institutions; international economics; uncertainty and information.

Master of Arts Degree

Course Requirements

Candidates for the Master of Arts degree in Economics should have completed the equivalent of an undergraduate major in economics. The department requires nine upper division and graduate-level courses in economics completed in graduate standing at UCLA. If not previously taken, these courses must include Economics 101A, 101B, and 102 with grades of B or better and one graduate-level course with a grade of B in history of economic thought or economic history. At least five of the nine courses must be strictly graduate economics courses.

You must also complete, if not previously taken, two courses in calculus and one in statistics. Economics 144 may be used as one of the calculus courses and Economics 40 as the statistics course.
With consent of the graduate chair, you may offer a maximum of two courses in other social sciences such as history, management, mathematics, psychology, education, or philosophy in partial satisfaction of the degree requirements; however, you must still take five graduate economics courses.

Four units of course 596 may be applied toward the total course requirement and the minimum graduate course requirement.

**Comprehensive Examination Plan**

The comprehensive examination requirement for the master's degree may be met in one of the following three ways:

1. A master's pass (M) or better in each of two full doctoral comprehensive examinations.
2. A master's pass (M) or better in each of two doctoral examinations, with one of the examinations being either microeconomic theory or macroeconomic theory, and the second examination in a field other than micro or macro theory.
3. A master's pass (M) or better in each of microeconomic theory and macroeconomic theory, plus a B+ average in Economics 203A, 203B, and 203C.

Examinations are graded H (Ph.D. honors pass), P (pass at the Ph.D. level), M (pass at the M.A. level), or F (fail).

**Ph.D. Degree**

**Course Requirements**

The specific course requirements which must be fulfilled prior to taking the University Oral Qualifying Examination are in quantitative methods.

The requirement may be satisfied by one of the following methods: (a) passing the quantitative methods examination offered at the close of the math review course given to entering students (only) just prior to the start of their first term; (b) achieving a B+ average in Economics 203A, 203B, and 203C; (c) achieving a B average in at least two terms of the advanced econometrics sequence (courses 231A, 231B) and one of the 232A-232Z special topics courses.

**Qualifying Examinations**

You are responsible for contacting the graduate adviser for additional regulations covering these examinations.

You are required to pass (with a P) both the microeconomic theory and macroeconomic theory examinations by the beginning of your third year. In addition, you have to pass further written examinations in three elective fields of specialization.

Written examinations are graded H (honors pass), P (pass at the Ph.D. level), M (pass at the M.A. level), or F (fail). They can be repeated, but you may sit for no more than seven in total. If you want to attempt an eighth sitting, you must obtain written approval from the chair of the graduate committee. Such approval is not generally granted.

In order to be advanced to candidacy, you are required to present a paper in a departmental workshop. It is recommended that this be done by the end of your third year.

The University Oral Qualifying Examination, administered by your doctoral committee, is scheduled after successful completion of all the written examinations and other course requirements, and after the submission of a written dissertation proposal. The examination focuses on, but is not limited to, the dissertation proposal.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**

A final oral examination on the doctoral dissertation is required unless it is waived by the committee that supervises the dissertation.

**Lower Division Courses**

1. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on allocation of resources and distribution of income through the price system.

2. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economics, including national income, monetary and fiscal policy, and international trade.

3. Introductory Economics. Lecture, three hours. Not open to students with credit for course 1, 2, or 100. Principles of economics as tools of analysis. Presentation of a set of concepts with which to analyze a wide range of problems that economic theory illuminates. May not be used to fulfill entrance requirements for any Economics Department major.

4. Introduction to Statistical Methods. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economics, including national income, monetary and fiscal policy, and international trade.

5. Microeconomic Theory. Lecture, three hours. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economics, including national income, monetary and fiscal policy, and international trade.

6. Macroeconomic Theory. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economics, including national income, monetary and fiscal policy, and international trade.

7. Microeconomic Theory. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economics, including national income, monetary and fiscal policy, and international trade.

8. Macroeconomic Theory. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economics, including national income, monetary and fiscal policy, and international trade.

9. Lower Division Seminar in Microeconomics. (Formerly numbered 3.) Discussion, three hours. Prerequisite: course 1. Limited to 10 freshmen or sophomores. Seminar in which students do intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in course 1), write papers, and present them at the seminar.

10. Lower Division Seminar in Macroeconomics. (Formerly numbered 4.) Discussion, three hours. Prerequisite: course 2. Limited to 10 freshmen or sophomores. Seminar in which students do intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in course 2), write papers, and present them at the seminar.

11. Economics and the Economy, institutions such as OPEC and oil price controls; oil debt and balance of payments, energy conservation, and future technologies.

13. Topics in Microeconomics (Honors). Lecture, three hours. Prerequisites: courses 101A, 101B, 102, 144, departmental honors program standing or consent of instructor. Introduction to Walrasian and Nash equilibrium. Modeling of selected applied topics such as peak load pricing, pricing of exhaustible resources, interactions between energy and the economy, institutions such as OPEC and oil price controls; oil debt and balance of payments, energy conservation, and future technologies.

107. History of Economic Theory. Lecture, three hours. Prerequisite: course 1 or 100. Survey of econo-
mic analysis from Grecian antiquity to the early 20th century, concentrating on the 18th and 19th cen-
turies; special attention to selected writers, including Aristotle, mercantilists, Physiocrats, Hume, Smith, 

108. Economics of Development. Lecture, three hours. Prerequisite: course 1 or 100. Limited to non-
Economics Department majors. Not open for credit to students with credit for course 111 or 112. Survey of main issues of develop-
ment economics. Economic structure of low-income countries and primary causes for their limited econ-
omic growth. Economic goals and policy alterna-
tives open to their leaders. Possible roles of devel-
opment countries. May not be applied toward any Eco-
nomics Department major. Mr. Edwards

110. Economic Problems of Underdeveloped Countries. Lecture, three hours. Prerequisite: course 1 or 100. Limited to non-Economics Depart-
ment majors. Not open for credit to students with credit for course 111 or 112. Survey of main issues of develop-
ment economics. Economic structure of low-income countries and primary causes for their limited econ-
omic growth. Economic goals and policy alterna-
tives open to their leaders. Possible roles of devel-
opment countries. May not be applied toward any Eco-
nomics Department major. Mr. Edwards

111. Theories of Economic Growth and Develop-
ment. Lecture, three hours. Prerequisite: course 101A. Growth models, theory of production under
sented in course 101A or 101B. Construction and
implementation of these tools, with applications to urban
location decisions, housing, transport, labor markets, location decisions of households and firms, transport, urban labor markets, and local public
sector. Mr. Ellickson, Mr. Hirsch

121. Urban Economic Analysis. Lecture, three hours. Prerequisite: courses 101A, 101B, or 120.
Sug-
gested strategies for economic development: infla-
tion, balanced growth, industry vs. agriculture, import
substitution, export-oriented expansion, foreign aid, 
endogeneity. Selected case studies. Mr. Edwards

120. Introduction to Urban and Regional Econom-
ics. Lecture, three hours. Prerequisite: course 101A or consent of instructor. Survey of broad range of policy and theoretical issues that are raised when economic analysis is applied in an urban setting. Top-
ics include urbanization and urban growth, housing markets, location decisions of households and firms, transport, urban labor markets, and local public sector.

Mr. Ellickson, Mr. Hirsch

130. Public Finance. Lecture, three hours. Prerequi-
tives: courses 101A and 101B, or consent of instruc-
tor. Role of government in a market economy. Alter-
native justifications for government intervention. Principals and effects of spending programs (espe-
cially social insurance and health), taxation, deficit
financing, and federal credit programs. Taxation in an
open economy. Properties of public choice me-
chanisms. Mr. Gale

133. State and Local Finance. Lecture, three hours. Prerequi-
tives: course 130. Division of factor prices and functions and revenues between state and local governments; rev-
ues, expenditures, and indebtedness of these gov-
ernments. Analyses of state and local tax systems.

Mr. McCall, Mr. Ostroy

135. Economic Models of Public Choice. (Same as Political Science M105.) Prerequisites: course 101A, any lower division political science course oth-
er than Political Science 1, and junior/senior standing, or consent of instructor: Political Science
101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor: Instructor: Analy-
sis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-

136. Economic Models of Political Conflict and Conflict Resolution. (Same as Political Science M106.) Prerequisites: course 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor: Bi-
ological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Mod-
els of institutional change: commitment, cooperation, institutional conflict, war: strategy and tactics. Mr. Hirshleifer, Mr. Stein

141. Principles of Statistical Decision. Lecture, three hours. Prerequisite: course 40 or equivalent. Errors of first and second kind; economic loss func-
tions; prior probabilities and Bayes theorem. Analy-

Mr. Ellickson, Mr. Hirshleifer, Mr. Riley

142. Probabilistic Microeconomics. Lecture, three hours. Prerequisites: courses 40, 101A, 101B. Com-
bination of basic probability introduced in course 40 with microeconomic models presented in courses 101A and 101B in order to explain phenomena such as insurance, job search, and stock market behavior. Optimal production and consumption under uncer-
tainty. Review of probability and introduction to alter-
native measures of risk and risk aversion. Mr. McCa

143. Applied Regression Analysis. Lecture, three hours; discussion/computer tutorial, one hour. Prere-

Mr. Ellickson, Mr. Intriligator, Mr. Riley

144. Introduction to Mathematical Methods in Eco-

145. Topics in Mathematical Economics. Lecture, three hours. Prerequisite: course 144. Possible topics include general equilibrium theory, convexity and uncon-
strained optimization, in particular the theory of the
price formation in commodity markets, production and consumer behavior in the presence of indivi-
dual preferences, empirical methods, etc. Mr. McCall

146. Linear Models in Economics. Lecture, three hours. Prerequisite: one linear or matrix algebra

147. Applications of Econometrics. Lecture, three hours. Prerequisite: course 147A. Econometric models and data; forecasting, policy analysis, esti-
mation of simultaneous equation models, applica-

Mr. Eslickson, Mr. Intriligator, Mr. Levine

150. Wage Theory. Lecture, three hours. Prerequi-
tives: courses 101A and 101B, or consent of instruc-
tor. Supply and demand for labor. Analysis of govern-
mment policies and other factors affecting the system of wage determination. Wage level and struc-
ture. Wages and human capital theory. Mr. Fallick, Mr. Waldman

151. Labor, Wages, and Income. Lecture, three hours. Prerequisite: course 145 or consent of instruc-
tor. Selected topics in labor theory; income distribu-
tion; business cycles and unemployment; invest-
ments in human capital and life cycles; migration; human fertility; marriage and divorce, etc.

Mr. Hilton

152. Trade Unions and Professional Associations. Lecture, three hours. Comparative behavior of unions and professional associations; criteria for wage maximization; quantification of gains; analysis of legal framework applying to such organizations.

Mr. Hilton

160. Money and Banking. Lecture, three hours. Recommended prerequisite: course 102. Principles of money and banking in the U.S.; legal and institu-
tional framework; money supply process; instru-
ments, effects, and practice of monetary policy.

161. Monetary Theory. Lecture, three hours. Prerequi-
tives: course 160. Nature of money and monetary exchange; level and term structure of interest rates; level and growth rate of money; transmission of mon-
etary shocks; theory and practice of monetary policy.

170. Monopoly and Competition. Lecture, three hours. Prerequisite: course 101A. Comparison of eco-
nomic and legal treatments of the competitive process. Monopoly competition, and collusion as economic the-
ory, as antitrust doctrine, and as fact. Source of monop-

Mr. Demsetz, Mr. Klein

171. Industrial Organization. Lecture, three hours. Prerequisite: course 101A. Study of pricing and output decisions of firms under conditions of less than perfect competition or monop-
opoly; theories of oligopoly and monopolistic competi-
tion; information costs and advertising; examination of pricing practices such as price discrimination, tie-

172. Economic Analysis of Laws and Legal Institu-
tions. Lecture, three hours. Prerequisite: course 101A. Application of economic theory to legal rule formulation: study of economic nature and conse-
quences of alternative legal arrangements, with spe-
cial reference to property rights. Application of eco-
nomic theory to analysis of laws relating to property, contracts, torts, crimes, taxation, and consti-
tutional issues. Analysis of legal process.

Mr. Demsetz, Mr. Hirsch

173. Centralized Markets. Lecture, three hours. Prerequi-
tives: course 101A. Emphasis upon firms as econo-

tics/business students. Organization and function of stock, bond, commodity, and foreign exchange markets. Theory and evidence relating to efficiency of these markets in comparison with centrally organized markets.

Mr. Demsetz, Mr. Klein

174. Organization of the Firm. Lecture, three hours. Prerequi-
tives: course 101A or 102, or consent of instruc-
tor. Selected topics in principal-agent problems; role of the firm in the production process; relationships with suppliers and customers; the theory of the

Mr. Butz, Mr. Demsetz, Mr. Klein
231B. System Models. (Formerly numbered M205.) (Same as Political Science M206B.) Lecture, three hours. Prerequisites: calculus or introductory probability, and graduate standing in economics or consent of instructor. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

Also see Management 200 (game theory and information economics), 203A (decision theory), 203B (economics of information)

Monetary Economics

221A. Monetary Economics I. (Formerly numbered 261.) Lecture, three hours. Prerequisite: course 220C. Emphasis on empirical studies in money and banking. Econometric implications of rational expectations, random vs. deterministic trends, unemployment, central bank operating procedures, and evolution of monetary institutions. S/U or letter grading.

221B. Monetary Economics II. (Formerly numbered 262.) Lecture, three hours. Prerequisite: course 221A. Emphasis on theoretical aspects of monetary economics, financial intermediation, models of banking panics, asset price volatility, contract theory, game theoretic models of policy, and Keynesian models with monopolistic competition, search, and coordination failures. S/U or letter grading.

222A-222Z. Topics in Monetary Economics. (Formerly numbered 204A-204Z.) Lecture, three hours. Current research in monetary economics. Content varies. May be repeated for credit. S/U or letter grading.

222A. Control and Coordination in Economics. (Formerly numbered M240.) (Same as Computer Science M222.) Prerequisite: graduate standing in economics or engineering or consent of instructor. Recommended: appropriate mathematics course. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, institutional choice, certain vs. uncertain environments; stochastic and learning models. Bayesian approach to price and output rate adjustment.

Mr. Leijonhufvud, Mr. Tabellini

229A-229B-229C. Workshops in Monetary Economics. (Formerly numbered 263A-263B-263C.) Lecture, three hours. Prerequisite: consent of instructor. Workshop for dissertation and prettisertation writers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Mr. Leijonhufvud, Mr. Tabellini

Also see Management 239A, 239B, 239C (Ph.D. seminar in finance) and 239X-239Y-239Z (finance workshop)

Econometrics

Mr. Sharma

212A. System Models. (Formerly numbered 248.) Lecture, three hours. Multivariate regression, error-correction variables, simultaneous equation identification, factor analysis of panel data, asymptotic distribution theory S/U or letter grading.

Mr. Sharma

222A-222Z. Topics in Econometrics. (Formerly numbered 204A-204Z.) Lecture, three hours. Prerequisites: courses 213A, 213B. Current research in econometrics. Topics vary from year to year. May be repeated for credit. S/U or letter grading.

223A. Bayesian Econometrics. (Formerly numbered M249.) (Same as Political Science M208B.) Subjective probability, subjective priors, Bayesian analysis of regression, information analysis, simplicity of models, criticism.

Mr. Leamer

232B. Time Series. (Formerly numbered M249A.) Stationary stochastic processes, Box-Jenkins methods, spectral analysis, forecasting, rational expectation models, analysis of macroeconomic data.

Mr. Sharma

242A-242B-242C. Workshops in Public Economics. (Formerly numbered 254A-254B-254C.) Lecture, three hours. Prerequisite: course 221A. Models of life cycle learning and work behavior, with particular emphasis on recent literature examining labor force behavior and regressions on women. S/U or letter grading.

Ms. Neelin, Mr. Welch

246A-246B-246C. Workshops in Industrial Organization. (Formerly numbered 244A-244B-244C.) Lecture, three hours. Prerequisite: consent of instructor. Workshop for dissertation and prettisertation writers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Mr. Welch

Industrial Organization

271A. Industrial Organization, Price Policies, and Regulation I. (Formerly numbered 271.) Lecture, three hours. Major economic aspects of property rights system and market interaction and applications to public policy and determination of alternative arrangements for allocating resources. Traditional problems of competition, monopoly, and industrial concentration. Brief analysis of those problems, emphasis on market power, problems of regulation and industry, monopolistic competition, new approaches to the problems.

S/U or letter grading.

Mr. Metzberg

271B. Industrial Organization, Price Policies, and Regulation II. (Formerly numbered 272.) Lecture, three hours. Prerequisite: course 271A. Study of firm organization and pricing under conditions of imperfect competition; information costs; advertising; economic and legal analysis of marketing practices as such as discrimination, tie-in selling, resale price maintenance, exclusive dealing, territorial arrangements. S/U or letter grading.

Mr. Klenow

271C. Mathematical Theory in Industrial Organization. (Formerly numbered 274.) Lecture, three hours. Prerequisites: courses 201A-201B. Formal modeling of theory of industrial organization: principal-agent problems; partial derivative of grand social utility function with respect to capital-labor ratio; optimal capital-labor ratio, consumer's problem, labor market. S/U or letter grading.

Mr. Waldman

272A-272Z. Topics in Industrial Organization. (Formerly numbered 244A-244Z.) Lecture, three hours. Topics include Social Security taxes and programs, unemployment insurance, public provision of medical care, theory of public goods, and theory of public choice. May be repeated for credit. S/U or letter grading.

273A. Public Utility Regulation. (Formerly numbered 273.) Lecture, three hours. Theory, practice, and consequences of regulation in electric power, gas, water, telecommunications, broadcasting, and other regulated industries; experiences of unregulated monopoly and public enterprises by way of contrast. S/U or letter grading.

Mr. Hilton
International Economics

281A. International Trade Theory. (Formerly numbered 291A.) Lecture, three hours. Theoretical and empirical analysis of microeconomic relationships among countries. Determinants of commodity and factor flows, prices, and factor rewards. Effects of trade barriers, S/U or letter grading. Mr. Learner

281B. International Finance. (Formerly numbered 292.) Lecture, three hours. Theory and evidence on balance of payments, exchange rate determination, international transmission of inflation and output, and macroeconomic policy in open economies, alternative monetary systems. S/U or letter grading. Mr. Edwards

281C. International Economics. (Formerly numbered 290D.) Lecture, three hours. Theoretical and empirical analysis of international trade. Effects of trade barriers, S/U or letter grading. Ms. Ozier

282A-282Z. Topics in International Economics. (Formerly numbered 204A-204Z.) Lecture, three hours. Current research in international economics. Content varies. May be repeated for credit. S/U or letter grading.

283. Economics of Soviet External Involvement. (Formerly numbered 204G.) Lecture, three hours. Prerequisite: consent of instructor. Emphasizes externalities. S/U or letter grading. Ms. Zier

284. Soviet Economic Theory and Organization. (Formerly numbered 202G.) Lecture, three hours. Prerequisite: consent of instructor. Emphasizes the Soviet system of planning. S/U or letter grading. Mr. Murphy

285A-285B-285C. Workshops in International Economics. (Formerly numbered 293A-293D-293C.) Lecture, three hours. Prerequisite: consent of instructor. Workshop for dissertation and pre-dissertation writers. S/U or letter grading. Ms. Cameron, Mr. Ellickson, Mr. Hirsch

The major is an alternative to the regular departmental major in economics and combines work in the School of Engineering and Applied Science with preparation in economic theory and in those aspects of mathematics and statistics necessary for the study of quantitative aspects of economics and systems theory. The major is appropriate for students with interests in such areas as economic theory, mathematical economics, econometrics, feedback and control systems, optimization, computing techniques, and the modeling and analysis of various socioeconomic systems.

Bachelor of Science Degree

Admission

Ten to 15 students are admitted each year based on space availability, completion of preparation for the major courses, and the GPA in those courses. Minimum qualifications for admission include the completion of six preparatory courses (four of the mathematics courses with a minimum GPA of 3.0 exclusive of the major course and two economics courses with a minimum GPA of 3.0 exclusive of the major course and two economics courses with a minimum GPA of 3.0). An overall 2.75 GPA in the preparatory courses is required.

Pre-Economics/System Science Major

While you are completing the lower division preparation courses for the major, you may be classified as a pre-economics/system science major. When you have satisfied the minimum admission qualifications (see above), you may apply for admission to the major at the undergraduate counselor's office in 2253 Bunche Hall.
Preparation for the Major

Required: Economics 1 and 2; Computer Science 10C or 10F or Program in Computing 3 or 10A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. All courses must be completed for a letter grade of C — or better.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: Fourteen upper division courses as follows: six courses in economics selected from Economics 101A and above, including 101A, 101B, 102, and one course from 141, 142, 144, 145, 146, 147A, 147B; six courses in system science selected from Computer Science 170, Electrical Engineering 102, 103, 131A, 131B, 136, 141, 142, including 131A (or Mathematics M150A or Statistics M152A) and 131B (or Mathematics 151 or Statistics 152B); two courses in mathematics selected from Mathematics 110A and above (such mathematics courses may not also be applied toward the system science requirements). Recommended courses include Computer Science 170 and Electrical Engineering 141 and 142 in the area of dynamic systems analysis and Electrical Engineering 136 in the area of optimization.

All upper division major courses must be completed for a letter grade of C — or better, with an overall 2.0 GPA.

Scope and Objectives

The undergraduate specialization in education is designed to (1) allow students to learn more about the multitude of professional and research issues in the field of education and to understand the complex interactions between social, political, and economic forces which influence and shape educational policies in America, (2) provide an introductory educational sequence for students who wish to pursue careers in education either as teachers or researchers, and (3) present an information base in the area of education by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

The teaching philosophy is governed by a need to address these objectives with a logical and time-efficient course structure — lower division courses that provide an introduction to educational policy, upper division social and behavioral sciences courses (sociology, political science, history, philosophy, anthropology, economics, psychology) taught in the Graduate School of Education, upper division elective courses in which students can pursue their own specific interests in the area of education, and a special studies research experience. The specialization must be taken in conjunction with a departmental or interdepartmental major.

Special Undergraduate Program

Enrollment is limited to 30 freshmen, sophomores, or junior students. To enter the specialization you must submit a formal application to the Office of Student Services in the Graduate School of Education. All courses applied toward the specialization must be taken for a letter grade.

Preparation for the Specialization

Required: Two courses from Education 91A through 91E.

Upper Division

Required: Two social sciences courses from Education M108, 112, C191A through C191E; two elective courses from Education 100, M102, 125A, M148, 180.

After successfully completing the six required courses with at least a 2.5 GPA, you must complete one special studies research experience or practicum course (Education 199) with a professor in the Graduate School of Education. Internship research areas include administration, curriculum, and teaching studies; higher education; psychological foundations and educational research methods; and social sciences (history, economics, anthropology, sociology, philosophy).

For further information and application forms, contact the Graduate School of Education Office of Student Services at the program address.

Scope and Objectives

An interest in English and American literature draws many students to the Department of English, which also offers courses in other fields, including the history and structure of the English language itself. Although committed to no single method or approach, the department encourages an emphasis on literary history and requires of its undergraduate majors a firsthand acquaintance with such influential writers as Chaucer, Milton, and Shakespeare. Students may range outward from this core to a rich variety of other fields — literary criticism, for example, or the ethnic literatures and popular culture of America, or the relation of literature to such complementary disciplines as history, sociology, psychology, and philosophy. Qualified students may elect a concentration in creative writing or an interdisciplinary program in American studies.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

Bachelor of Arts Degree

Admission to Courses in English

You must have completed the Subject A requirement before taking any courses in English (other than English A or 2). For further information regarding Subject A, see "Undergraduate Degree Requirements" in Chapter 2.

Preparation for the Major

Required: English 3, 4, 10A, 10B, 10C taken in the stated sequence (each course is a prerequisite for the next course).

Extra-Departmental Requirement in Foreign Literature or Foreign Language: All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) any combination of five courses in foreign language and foreign literature, including foreign literature in translation (see course listings later in this section of the catalog). Italian 46 may not be applied. For option 2, the department especially recommends Classics 142, Humanities C107, 116, C145. These courses may be taken on a P/NP grading basis.

The Major

Required: English 141A or 141B, 142A, 142B, 143, at least one course from the 180 series, and a minimum of seven additional upper division English courses. At least five of the seven courses must be selected from 140A, 140B, 142C, or 150 through 190. At least one of the seven courses must be in literature before 1800 (the 150 series).

You are encouraged to choose additional electives from courses 140A through M197. English 140A is especially recommended if you plan graduate work in literature. You may wish to select several courses in the relevant classical and postclassical foreign literatures and thought; the department especially recommends Classics 142, 161, Humanities C107, 116.

Special Programs

The department offers special programs in American studies and general literature. For both programs, the regular "Preparation for the Major" sequence as well as the departmental foreign language requirement apply. Because of the specialized nature of these programs, students planning to do graduate work in English should consult the departmental counselor before selecting either of these.

American Studies — This program consists of nine upper division courses in English and six related upper division courses taken in other departments. The nine English courses must include 109 and 178; two courses from 142A, 142B, 143; three courses from the 170 series, with at least one course from 170, 171, or 172, and no more than one course from 176 or 177; and one course pertaining to American studies selected from 187, 188, or 189, taken preferably in the senior year. Of the six upper division courses in other departments, four must be in a selected discipline (history, political science, sociology, etc.). One of the four courses must deal with the methodology of the discipline, while the other three must explicitly treat American culture. The courses must be selected in consultation with the English departmental counselor.

General Literature — This program consists of nine upper division courses in English or American literature and six upper division courses in foreign literatures (at least one of which must be taught in the original language). The nine English courses must include 142A and 142B; 141A, 141B, or 143; at least one course from the 150 series; and four electives selected from courses 140A through M197 (students intending graduate work in literature are especially encouraged to take English 140A). A listing of acceptable courses may be obtained from the department.

Creative Writing Major

For this major, you must satisfy all requirements listed under "Preparation for the Major," including the foreign language requirement. The major consists of English 142A and 142B and a minimum of 10 additional upper division English courses: three creative writing courses from the 133A through 135C series, taken in a single genre (poetry, short story, or drama), three literature courses paralleling the creative writing specialization, and four electives selected from courses 140A through M197. If you are planning to choose this major, you are encouraged to take course 20; for further details, contact the departmental counselor.

Major for International Students

The department offers a special major in English to bona fide international students whose native language is other than English. For this major, you must satisfy all requirements listed under "Preparation for the Major"; you may fulfill the departmental foreign language requirement with your own native language. The following 12 courses are required for the major itself: English as a Second Language 103, 106, 109; two
Bachelor of Arts in English/Latin

See Classics

M.A. and Ph.D. Degrees

All students admitted into the UCLA English graduate program with a B.A. must enter the M.A. course of study, which also serves as the first phase of the doctoral program for those who wish to pursue the Ph.D. The M.A. degree may be obtained either by passing the first qualifying examination (which also grants admission into the second phase of the doctoral program) or by writing a thesis. Students admitted with a master’s degree may waive most course requirements but must pass the first qualifying examination.

Admission

Admission to the program is based on a thorough review of the student's academic record. Ordinarily, students holding the B.A. are expected to meet these minimum requirements: an undergraduate major or program that provides preparation for advanced study of literature; a grade-point average in all English courses and in the junior and senior years of at least 3.5; and a recent (within the last five years) score on the Graduate Record Examination (GRE) of 650 on both the verbal section of the General Test and the Literature in English Subject Test or a combined score of 1,300. Applicants holding the M.A. are expected to have a grade-point average of at least 3.7 in all graduate courses and correspondingly higher scores on the verbal GRE and the Literature in English Subject Test.

Foreign Language Requirement

If you are pursuing only the M.A. degree, you may fulfill the language requirement by demonstrating reading knowledge of any foreign language. This requirement should be satisfied at the beginning of your first term in residence, but in any event no later than the midpoint of the term in which you complete all degree requirements.

If you are pursuing the Ph.D., you are normally expected to have reading knowledge of two foreign languages, or to demonstrate superior proficiency in a single language. The departmentally approved languages are French, German, Italian, Spanish, Latin, and Greek, but other languages may be substituted by petition on the basis of a special research interest.

Course Requirements

Nine letter-graded English courses from the 200 series and two upper division courses in other fields are required for the M.A. If you enter the program with an M.A. in English, you are presumed to have fulfilled the nine-course requirement.

Teaching Experience

Although teaching experience is not required, most students in the Ph.D. program have the opportunity to serve as teaching assistants after passing English 495A and being in the program for at least one year. Teaching assistantships are awarded on the basis of merit.

Qualifying Examinations

The doctoral program is divided into three stages, the first two of which culminate in the first and second qualifying examinations.

First Stage

First Qualifying Examination Option — If you select the examination option for the M.A. or are pursuing the Ph.D. degree, you take the first qualifying examination after one year in the program. The examination consists of three written tests of three hours each. The three parts are graded pass or fail; in order to pass the examination as a whole, you must maintain a passing grade on each of the parts. The graduate faculty decides in each case whether to grant an M.A. and whether you will be admitted to the second stage of the Ph.D. program. Further details on breadth and philology requirements are available from the department.

Thesis Option — If you select the thesis option for the M.A., you must request a thesis committee (three faculty members) from the graduate counselor at least two terms before completing the program. The committee then meets with you to consider your thesis proposal. Your thesis should not be less than 40 nor more than 60 pages in length.

Second Stage

In this stage of the program, you are encouraged to take as many seminars as possible (any graduate seminar may be repeated for credit), as well as suitable courses in other departments. When sufficiently well prepared
and after satisfying the second language requirement, you take the second qualifying examination.

Second Qualifying Examination — The University Oral Qualifying Examination, at least two hours in length, consists of two parts. The first covers a specified period or field in English or American literature. The second part deals with your prospectus, a substantially researched paper which has been approved by the committee chair and distributed to the doctoral committee at least two weeks before the scheduled examination. The committee must certify both that you are competent in the historical field and that the prospectus has been approved. If you fail one or both parts of the examination, you may, at the discretion of the committee, repeat it once only.

Third Stage/Candidate in Philosophy Degree
Once you have passed the second qualifying examination, you may advance to candidacy and, on application, receive the Candidate in Philosophy (C.Phil.) degree. You may then proceed with the writing of the dissertation.

Final Oral Examination
A final oral defense of the dissertation is optional with the doctoral committee but is usually not required.

Lower Division Courses

1. Introduction to University Discourse (No credit). See listing under "English Composition."
2. Approaches to University Writing. (Formerly numbered B.) See listing under "English Composition."
3. English Composition, Rhetoric, and Language. See listing under "English Composition."

4. Critical Reading and Writing. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent. Introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six papers (three to five pages each).

4H. Critical Reading and Writing (Honors). Discussion, three hours. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, consent of department. Introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six papers (three to five pages each).

10A. English Literature, 1832 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A. Study of selected works of the period, including writings by Tennyson, Arnold, Browning, Yeats, Joyce, and Eliot. Minimum of three papers (three to five pages each) or equivalent.

10B. English Literature, 1860-1832. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A. Study of selected works of the period, including writings by Dryden, Pope, Swift, Wordsworth, and Keats. Minimum of three papers (three to five pages each) or equivalent.

20. Introduction to Creative Writing. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, submission of creative or expository writing samples to a screening committee. Designed to introduce fundamentals of creative writing. Emphasis either on poems or stories. Submission of instructor(s) during any given term. Readings from assigned texts and weekly writing assignments required.

20. British Authors before 1800. Prerequisites: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10A or 10B. Study of selected masterpieces of English literature before 1800, including works of Shakespeare, Donne, Milton, Swift, Pope, Johnson, and Fielding.

20. Major British Authors before 1800. Prerequisites: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10B or 10C. Study of selected masterpieces of English literature from 1800 to the present, including works of such writers as Wordsworth, Coleridge, Keats, Tennyson, Dickens, Browning, Yeats, Joyce, and Eliot.

30. American Novel. Prerequisites: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10A. Study of selected masterpieces of English literature from 1800 to the present, including works of such novelists as Hawthorne, James, Fitzgerald, and Faulkner.

40. Shakespeare. Prerequisites: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 142A or 142B. Survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievement. M. Rodes, M. Rowse, M. Watson

55A. Introduction to Poetry. (Formerly numbered 100A.) Prerequisite: satisfaction of Subject A requirement. Recommended for instructional credential candidates. Study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of selected readings. P/NP or letter grading.

95B. Introduction to Drama. (Formerly numbered 100B.) Prerequisite: satisfaction of Subject A requirement. Examination of representative plays: readings may range from Greek to modern drama. Emphasis on critical approaches to dramatic text: study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. P/NP or letter grading.

95C. Introduction to Fiction. (Formerly numbered 100C.) Prerequisite: satisfaction of Subject A requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

95D. Introduction to History. (Formerly numbered 100D.) Prerequisite: satisfaction of Subject A requirement. Study of American literature in historical context, focusing on the major periods and subgenres of the literary tradition in the US. P/NP or letter grading.

Upper Division Courses

100. Introduction to Special Topics and Genres. (Formerly numbered 100D.) Prerequisite: satisfaction of Subject A requirement. Study of a particular topic, genre, or subgenre in literature such as satire, biography, science fiction, or a specialized classification of literature. May be repeat for credit. P/NP or letter grading.

100W. Intensive Writing (2 units). See listing under "English Composition."

100WH. Intensive Writing (Honors) (2 units). See listing under "English Composition."

101. Gay and Lesbian Literature. (Formerly numbered 101.) Prerequisite: satisfaction of Subject A requirement. Late-19th- and 20th-century fiction, drama, and poetry written on gay and lesbian themes. Specific orientation to different genres and on gay male or lesbian literary tradition) vary with individual instructors.

102. Asian American Literature. (Same as Asian American Studies M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by Americans of Chinese, Japanese, Filipino, and Korean origins. Study of interaction of autobiography and fiction, nourishing and limiting influences of mainstream American and Asian literary traditions, and conflict between ideological and literary criteria. Ms. Cheung (F)

103. Jewish American Fiction. Prerequisite: satisfaction of Subject A requirement. Study of the fiction of Jewish writers in America, such as Bellow, Malamud, Singer, focusing on issues of Jewish ethical ideals and social values with the contemporary environment. Mr. Novak

104A. Early Afro-American Literature. (Same as Afro-American Studies M104A.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of the Afro-American literary tradition from the 19th century to World War I, including oral and written forms (folktales, spirituals, sermons, prose, poetry). Emphasis on use of language in the antislavery movement and rise of black writing at the turn of the century. Writers studied include Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Paul Laurence Dunbar, Charles W. Chesnutt, Booker T. Washington, W.E.B. Du Bois, and James W. Johnson. Mr. Yarborough

104B. Afro-American Literature since the 1920s. (Same as Afro-American Studies M104B.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of the Afro-American literary tradition from the 1920s to the present, including oral and written forms (ballads, blues, speeches; prose, poetry, drama). Emphasis on the Harlem Renaissance and black writing in the 1960s. Writers studied include Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Richard Wright, James Baldwin, Gwendolyn Brooks, Ralph Ellison, Toni Morrison, Amiri Baraka (LeRoi Jones), and Alice Walker.

105. The Chicano Experience in Literature. (Same as Chicano Studies M105.) Prerequisite: satisfaction of Subject A requirement. Study of literature in English by and about Chicanos. Survey of depictions of the Chicano experience in American literature and culture, generally, with emphasis on development of Chicano literature itself, its cultural backgrounds, and distinctive uses of language.

106. Native American Literary Studies. Prerequisite: satisfaction of Subject A requirement. Study of Native American oral cultures through translated documents (song-poems, life-stories, myths, tales, dream visions, speeches) and/or images in writing about Native Americans (poetry, fiction, history, anthropology, sociology).

100. The Short Story in England and America. (Formerly numbered 101.) Prerequisite: satisfaction of Subject A requirement. Historical survey of the short story as a genre, from the 19th century to the present. P/NP or letter grading.

Mr. Anderson
M107A. American Women Writers. (Formerly numbered M107.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

Ms. Banta, Ms. Rowe (F)

M107B. British Women Writers. (Formerly numbered M107.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

Ms. Lewis, Ms. Mellor, Ms. Yeazzell (W)

M107C. Special Topics in Women and Literature. (Formerly numbered M107.) Prerequisite: satisfaction of Subject A requirement. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonliterary grouping.

Ms. Chung, Ms. Mellor (Sp)

Mr. Aguirre, Mr. Dearing, Mr. Post

108C. The English Bible as Literature: Special Topics. Prerequisite: satisfaction of Subject A requirement. Study of the English Bible, with attention to particular literary themes, motifs, and genres. Possible discussion of influence of the Bible on discrete periods or individual authors in English literature. May be repeated for credit.

Mr. Aguirre, Mr. Dearing

109. Interdisciplinary Approaches to Literature. Prerequisite: satisfaction of Subject A requirement. Study of British or American literature in relation to other disciplines such as history, politics, philosophy, psychology. May be repeated for credit.

Mr. Burwick, Mr. Maniquis

110. Studies in Individual Authors. Prerequisite: satisfaction of Subject A requirement. Specialized study of the work of a single poet, dramatist, prose writer, or novelist. May be repeated for credit.

110W. Intensive Writing for the Discipline. See listing under "English Composition."

M111A. Literature of Myth and Oral Tradition. (Same as Folklore CM 106.) Prerequisites: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

Mr. Nagy

M111B. Anglo-American Folk Song. (Same as Folklore CM 106.) Prerequisites: satisfaction of Subject A requirement, junior standing. Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

Mr. Nagy, Mr. Porter

M111C. British Folklore and Mythology. (Same as Folklore M121.) Prerequisites: satisfaction of Subject A requirement, junior standing. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

Mr. Nagy, Mr. Porter

M111D. Celtic Mythology. (Same as Folklore M122.) Prerequisite: Folklore 101 or consent of instructor. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

Mr. Ford

M111E. Survey of Medieval Celtic Literature. (Same as Folklore M112.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

Mr. Ford

M111F. Celtic Folklore. (Same as Folklore M127.) Prerequisite: Folklore 101 or consent of instructor. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current trends in folkloric research.

Mr. Goodwin

M111G. Oral Traditions in Africa. (Same as Folklore M155.) Prerequisite: upper division standing. Survey of African folk traditions: folktale, epic, heroic poetry, and folk song.

Mr. Cosentino

112. Children's Literature. Prerequisite: satisfaction of Subject A requirement. Survey of literature written for children. Mr. Goodwin, background and development of types of children's literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography.

113. Literature for Adolescents and Young Adults. Prerequisite: satisfaction of Subject A requirement. Analysis and evaluation of literature intended mainly for students in junior and senior high schools. Review of mature books that are popularly suggested for this age group; study of interests and reading habits of young adults.

Mr. Goldberg, Mr. Moore

114. World Literatures in English. Prerequisites: satisfaction of Subject A requirement, consent of instructor. Survey of contemporary literature from English-speaking regions of the world, reviewing major genres from several national literatures and comparing the literatures. Generalizations concerning the nature of the English used by such writers. May be repeated for credit.

Mr. Cosentino

115A. American Popular Literature. Prerequisite: satisfaction of Subject A requirement. Study of main currents of popular and cultural taste as reflected in such genres as dime novels, detective fiction, and Western stories. Mr. Nagy.

115B. British Popular Literature. Prerequisite: satisfaction of Subject A requirement. Readings in the literature of the British masses, from 18th-century broadsides to contemporary novels. Examination of social functions of literature. Mr. Nagy.

116. Science Fiction. Prerequisite: satisfaction of Subject A requirement. Study of science fiction and speculative literatures.

Mr. Guffey

117. Detective Fiction. Prerequisite: satisfaction of Subject A requirement. Study of British and American detective fiction and the literature of detection.

Mr. Hutter

118. Film and Literature. Prerequisite: satisfaction of Subject A requirement. Study of interdisciplinary relationships between film and literature, including theme and structure, and focusing on cinematic adaptations of literary works. Mr. Nagy.

119. Literature of California and the American West. Prerequisite: satisfaction of Subject A requirement. Study of literature in English dealing with exploration, settlement, and emergent cultural awareness of the Western U.S. P.N.P or letter grading.

Mr. Allmendinger, Mr. Wortham

120A. Language Study for Teachers: Elementary School. See listing under "English Composition."

120B. Language Study for Teachers of English: Secondary School. See listing under "English Composition."

120C. Language Study for Teachers of Subjects Other Than English: Secondary School. See listing under "English Composition."

130A. Composition for Teachers: Elementary School. See listing under "English Composition."

130B. Composition for Teachers: Secondary School. See listing under "English Composition."

131A-131J. Advanced Exposition. See listing under "English Composition."

132. Composition for Society. See listing under "English Composition."

133A-133B-133C. Creative Writing: Poetry. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Weekly exercises in writing of poetry, with practice in standard poetic meters and study of techniques. Classroom discussion based on student work.

Only one course in sequence may be repeated for credit.

Mr. Gullans, Mr. Kessler, Mr. Yenser

134A-134B-134C. Creative Writing: Short Story. Prerequisite: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Three stories of average length to be completed during each term. Some of the stories, with instructor's consent are assumed, wish, to be substantial revisions of other stories presented. Classroom discussion based on stories presented. Only one course in sequence may be repeated for credit.

Mr. Kolb, Mr. Pecora

135A-135B-135C. Creative Writing: Drama. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Exploration of capacity of each student to write a play, with emphasis on playwriting, with several individual conferences, rehearsed readings, and laboratory productions. Only one course in sequence may be repeated for credit.

Mr. Kessler, Mr. Rodes

136A-136B-136C. Practical Writing and Editing. See listing under "English Composition."

137. Advanced Computer Techniques for Students of English. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, and Program in Computing 1 and 10A or consent of instructor. May be repeated for credit.

Mr. Dearing

140A. Criticism: History and Theory. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of some major historical documents and theoretical statements in history of literary criticism, including references to literary criticism of Aristotle, Horace, Sidney, Dryden, Johnson, Kant, Coleridge, Wordsworth, Shelley, Arnold, James, Croce, and T.S. Eliot, with emphasis on major critical positions and the theoretical foundations of those positions. Possible discussion of recent trends in criticism.

Mr. Kolb, Mr. Pecora

140B. Criticism: Special Topics. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of limited periods and specialized issues and approaches in history of literary criticism, including moral, biographical, sociological, psychological, formal, structural, and deconstructionist. May be repeated for credit with consent of instructor and listed in Schedule of Classes. Some study of literary texts, to illustrate the value and practical application of the approach, may be required.

Mr. Pecora, Mr. Reinhard

141A. Chaucer: The Canterbury Tales. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Introductory study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, The Canterbury Tales. Satisfies department's Chaucer requirement.

Mr. Condren, Mr. Kolve, Ms. Ridley
141B. Chaucer: Troilus and Criseyde and Selected Minor Works. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of Troilus and Criseyde and selected minor works by Chaucer. Mr. Bedient, Mr. Riddel, Mr. Wenzel, Mr. Coles, Ms. Lewis, Mr. Lewis. The House of Fame, The Parliament of Fowls, etc. Satisfies department's Chaucer requirement.

Mr. Condren, Mr. Kelly, Ms. Ridley

142A. Shakespeare: Poems and Early Plays. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of selected poems and representative comedies, histories, and tragedies through Hamlet.

Mr. Allen, Ms. Cheung, Mr. Post

142B. Shakespeare: Later Plays. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of representative problem plays, major tragedies, Roman plays, and romances.

Mr. Braunmuller, Mr. Fockes, Mr. Watson

142C. Shakespeare: Selected Topics. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, 142A, 142B. Designed for students interested in further study of Shakespeare. Limits of investigation set by individual instructors.

Mr. Allen, Mr. Braunmuller, Mr. Rodes

143. Milton. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works of Milton, with emphasis on Paraadox Lost and Samson Agonistes. Mr. Guffy, Mr. Lewis

150. Later Medieval Literature. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works of Milton, with emphasis on Paradise Lost and First Folio from Shakespeare to Milton and Newman. Mr. Kolb, Mr. Tennyson

163. Later Victorian Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works of Shakespeare, with emphasis on Shakespearean dramatic and mediaeval romances, protest, lyric, and political plays. The more difficult texts read in modernized form. Ms. Anderton, Mr. Hutter, Ms. Yezazell

165. 20th-Century British Poetry. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works of Shakespeare, with emphasis on major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to the present. Mr. Berst, Mr. Kolb, Mr. North

166. 20th-Century British Fiction. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of major works of Shakespeare, with emphasis on major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present.

Mr. Lincoin, Mr. Pecora

167. Drama, 1842-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of major works of Shakespeare, with emphasis on major British plays, including Shakespearean screen plays. Mr. Berst, Mr. Braunmuller, Mr. Goodwin

168. Drama, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works of Shakespeare, with emphasis on major British plays, including Shakespearean screen plays. Mr. Berst, Mr. Braunmuller, Mr. Goodwin

170. American Literature to 1800. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature from the beginning of the 19th century to the end of the Civil War. Mr. Colacurcio, Ms. Rowe

171. American Literature, 1801-1865. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature from the 19th century to the end of the Civil War. Mr. Colacurcio, Ms. Parker, Mr. Worthing

172. American Literature, 1866-1912. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature from the 19th century to the end of the Civil War. Mr. Colacurcio, Ms. Parker, Mr. Worthing

173. American Poetry, 1912-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Development of American poetry from 1912 through World War II, including works of Frost, Eliot, Pound, Williams, and Stevens. Mr. Bedient, Mr. Riddel, Mr. Wenzel

174. American Fiction, 1912-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Development of American novel and short story from 1912 through World War II, including works of Hemingway, Fitzgerald, Faulkner, and Stein. Mr. Goodwin, Mr. Lehan, Mr. Yorkbarough

175. American Poetry, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of contemporary American poetry. Mr. Riddel, Mr. Wenzel

176. American Fiction, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of contemporary American fiction. Mr. Goldberg, Mr. Kesslers, Ms. Smith

177. Perspectives in Study of American Culture. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Interdisciplinary study of American literature in its relationships to other disciplines including architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture.

Mr. Goodwin, Mr. Pareek

Courses 180 through 189 are designed to permit a small number of students (normally 15) to engage in concentrated study in an area in which they have a particular interest and in which they have taken adequate upper division background courses. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. For further details, see the departmental counselor. Courses may be repeated for credit.

180. Specialized Studies in Medieval Literature.

180X. Specialized Studies in Literature.

181. Specialized Studies in Renaissance Literature.

183. Specialized Studies in 18th-Century Literature.

188. Specialized Studies in 19th-Century American Literature.

190. Literature and Society. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of some aspect of relationship between literature and social, economic, or political history. May be repeated for credit.

Mr. Goodwin, M197. Topics in Afro-American Literature. (Same as Afro-American Studies M197.) Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890-1914; Contemporary Afro-American Fiction. May be repeated for credit.

Ms. Smith, Mr. Yorkbarough
Graduate Courses

200. Approaches to Literary Research. Bibliographical tools of English and American literary scholarship; introduction to descriptive bibliography and basic methods of research. Mr. Batten, Mr. Kipling

201A. History of Literary Criticism. (Formerly numbered 201.) Study of major documents in Western literary theory from Plato through T.S. Eliot. Mr. Lehan, Mr. Pecora

201B. Modern Literary Criticism. Study of developments and trends in 20th-century literary criticism. Mr. Pecora, Mr. Riddel

202. Enumerative and Descriptive Bibliography. Problems in bibliography; texts, and editions, with practical application in compiling bibliographies, editing texts, and approaching literature through textual criticism. Mr. Dearing

203. Computers and Literary Research. Prior knowledge in this area not required. Practice in writing and using computer programs for analysis of literary style, content, and authorship. Mr. Dearing

204. History of Rhetoric. Reading of basic texts in history of rhetoric and selections from standard commentaries. Survey of classical period and medieval-modern period in alternate years. Mr. Lanham

205. Perspectives in American Folklore Research. (Same as Folklore CM205.) Lecture, three hours. Prerequisite: Folklore 101 or consent of instructor. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society.

Mr. Georges, Mr. Jones, Mr. Stern

210. History of the English Language. Detailed study of history, characteristics, and changing forms of the language from its origin until about 1900.

Ms. Minkova

211. Old English. Study of Old English grammar, lexis, phonology, and pronunciation to enable students to read the literature赖以生存 and aloud. Reading of as much of the more interesting Old English prose and poetry as can be read in a term.

Mr. Calder, Mr. Condren

212. Middle English. Prerequisite: course 211. Detailed study of linguistic aspects of Middle English and of representative examples of the better prose and poetry.

Ms. Minkova, Ms. Ridley
257. Studies in Poetry. Studies in various themes and forms of poetry from Old English to the present; limits of investigation set by individual instructor.

258. Studies in the Novel. Studies in evolution of the genre from its beginning to the present; limits of investigation set by individual instructor.

259. Studies in Criticism. Mr. Guffey, Mr. Riddel, Mr. Weber

262. Studies in Afro-American Literature. (Same as Afro-American Studies M200E.) Prerequisite: consent of instructor. Special problems and trends of African American literature. May be repeated for credit.

263. Celtic Literature. Lecture, three hours. Prerequisite: knowledge of one of the ancient or modern Celtic languages. Studies in poetry and prose of early and modern Celtic literature, chiefly Irish and Welsh; limits of investigation set by individual instructor.

264. Studies in Rhetoric. Discussion, three hours. Special topics in classical and modern rhetoric, including substantial practice in rhetorical analysis of literary texts.

265. Seminar in Literary Data Processing. Prerequisites: courses 200, 203. Subjects alternate between (1) team writing of a large program to solve or help solve a research problem proposed by a faculty member (who usually joins in supervising the seminar), and (2) compilation and interpretation of literary statistics (with computer member of the UCLA Biomedical Consulting Clinic).

266. Cultural World Views of Native Americans. (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms - dance, art, song, religion and medicinal ritual - in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomycology.

270A-270B. English for the Two-Year College. Prerequisite: course 120B or 275. Discussion and practice of two-year college instruction in reading and comprehension. In Progress grading.

272. Current Issues in Teaching English. Prerequisite: course 120B or Linguistics 100. Focus on one of a variety of topics of special current interest.

274. Teaching of English for Minority Groups. (Same as Teaching English as a Second Language M224.) Prerequisites: Linguistics 100 and Teaching English as a Second Language 370, or consent of instructor. In-depth description of dialects of English and of other languages (such as Spanish) used by groups of students in American schools. Origins, variations within, and current status of language varieties such as Black English and Chicano Spanish, relevant research, and educational implications.

275. Stylistics and the Teaching of English. Strongly recommended for teaching assistants. Introduction to study of language and style and its application to teaching English, including rhetoric, linguistics, and grammar.

279. Interdisciplinary American Studies (6 units). (Same as History M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

300. Teaching English. See listing under "English Composition."
tion about the composition requirement, see the introductory copy for your college or school. Students who score 660 or better on the CEEB English Composition Achievement Test are eligible to take the Freshman Proficiency Examination. Outstanding performance on this examination fulfills the composition requirement. For further information, contact the Freshman Writing Program.

Lower Division Courses

A. Introduction to University Discourse (No credit). Lecture, five hours. Prerequisite: appropriate score on Subject A Examination. English A displaces four units on student's Study List but yields no credit toward a degree. First course in reading university-level texts and framing written responses that employ a range of rhetorical strategies from paraphrase to analysis. Emphasis on revision, developing syntactic variety and academic vocabulary, and editing for grammar and style. Completion of this course with a grade of C or better or demonstration of minimum competence on Subject A Examination is prerequisite to English 2.

2. Approaches to University Writing. (Formerly numbered 6.) Prerequisite: English A with a grade of C or better meets Subject A requirement.

3. English Composition, Rhetoric, and Language. Lecture, three hours. Prerequisite: satisfactory score on Subject A Examination. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on revision for argumentative coherence and effective style. Completion of this course with a grade of C or better meets Subject A requirement.

3H. English Composition (honors). Lecture, three hours. Prerequisite: satisfactory score on Subject A Examination, consent of department. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each). Completion of this course with a grade of C or better satisfies English Composition requirement.

3J. English Composition, Rhetoric, and Language (Honors). Lecture, three hours. Prerequisite: satisfactory score on Subject A Examination, consent of department. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each).

Upper Division Courses

100W. Intensive Writing (2 units). Prerequisite: satisfactory score on Subject A and English Composition requirement. Students must be concurrently enrolled in a course offered in conjunction with English 100W (consult Schedule of Classes for courses so designated). Material for writing assignments comes from adjunct courses, and assignments reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor.

100WH. Intensive Writing (Honors) (2 units). Prerequisite: satisfactory score on Subject A and English Composition requirement. Students must be concurrently enrolled in an honors course offered in conjunction with English 100WH (consult Schedule of Classes for courses so designated). Material for writing assignments comes from adjunct courses, and assignments reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor.

110W. Intensive Writing for the Discipline. Prerequisite: satisfactory score on Subject A and English Composition requirement. Students must be concurrently enrolled in a course offered in conjunction with English 110W (consult Schedule of Classes for courses so designated). Material for writing assignments comes from adjunct course, and assignments reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor. P/NP or letter grading.

120A. Language Study for Teachers: Elementary School. Prerequisite: satisfaction of Subject A and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar; language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language students to teaching of reading, writing, spelling, and literature.

120C. Language Study for Teachers of Subjects Other Than English: Secondary School. Prerequisite: satisfaction of Subject A and English Composition requirements. Introduction for teachers of subjects other than English to basic concepts in language acquisition, dialectology, sociolinguistics, and composition.

129. Intermediate Exposition. (Formerly numbered 36.) Prerequisite: English A and English Composition requirements. Preparatory for future secondary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in primary schools. P/NP or letter grading.

130B. Composition for Teachers: Secondary School. (Formerly numbered 130.) Prerequisite: satisfaction of Subject A and English Composition requirements. Preparation for future secondary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in secondary schools.

131A-131J. Advanced Exposition. (Formerly numbered 131A-131H.) Prerequisites: satisfaction of Subject A and English Composition requirements, upper division standing. Writing course designed to help students develop stylistic and argumentative virtuosity in various rhetorical contexts, including different sections that provide research and critical study of writing in major professions. May be taken P/NP or letter grading.

132C. Composition and Society. Prerequisites: satisfactory score on Subject A and English Composition requirements, upper division standing. Intensive study of some aspect of relationship between composition and social, economic, and political history. P/NP or letter grading. (W/LScP)

136A-136B-136C. Practical Writing and Editing. Lecture, three hours. Prerequisite: satisfaction of Subject A requirement, course 3, one course from 131 series, consent of instructor. Sequence in practical writing and editing ability specifically designed to prepare students for a career. Analysis of prose and literary styles necessary to the variety of writing in professional, nonacademic fields combined when ever possible with practical experience in a variety of writing internships and training in a wide range of editorial skills. In Progress grading for courses 136A-136B only.
The interdisciplinary Folklore and Mythology Program, which leads to the Master of Arts and Ph.D. degrees, provides coordinated study of the traditional life-styles of specific societies and culture areas, on the one hand, and systematic training in the research methods and investigative techniques of cross-cultural study, on the other. Courses focus on the nature, history, and functions of such traditional forms as narrative, song, music, art, dance, and speech and consider the part they play in human development and cultural existence. The program examines the ways in which human traditions both reflect and contribute to continuity and consistency in thought and life.

Trained folklorists pursue careers in teaching, research, governmental agencies, museum work and administration, performing groups and arts management, social work, the medical and legal professions, and business. Their responsibilities include documenting cultural and ethnic traditions, introducing traditional artists and their works to interested audiences, describing transformations of traditional processes and forms, and preserving on tape and film the customs and mores of social groups and individuals.

Although no undergraduate degree program is offered in folklore and mythology, students majoring in world arts and cultures may select folklore and mythology as their area of concentration. A variety of undergraduate courses offered by departments or by faculty participating in the interdepartmental program is also available to all University students. Those with undergraduate preparation in folklore and mythology studies may continue their work on the graduate level. For planning coursework, you should consult departmental counselors and the chair of the committee which administers the interdepartmental program.

Master of Arts Degree

Admission

Two letters of recommendation from former instructors or other comparable references are required and should be sent to the Chair, Folklore and Mythology Program, 1041 AGSM, UCLA, Los Angeles, CA 90024-1459.

Foreign Language Requirement

Reading knowledge of French, German, or Spanish is required. You have the option of demonstrating proficiency either by:

1. Passing the fifth quarter or fourth semester course in the selected foreign language at a college or university with a grade of B or equivalent no more than five years before graduate enrollment OR
2. Successfully completing the Educational Testing Service GSFLT examination with a score of 550 or better OR
3. Passing a reading examination administered and evaluated by members of the program faculty (or by outside faculty for languages not familiar to the program faculty).

Course Requirements

All degree candidates, whether electing the thesis or comprehensive examination plan (see below), must complete the following courses: Folklore and Mythology 200, 201A, 201B, and 216, and at least one course from each of the following groups:

Group 1 — One course in folk song or folk music.
Group 2 — One course in the folklore and mythology of a specific culture or culture area.
Group 3 — One course in the mythology of a specific culture or in the principles of mythology.
Group 4 — One graduate seminar in an area of folklore and mythology.

Only eight units of course 596 may be applied toward the minimum course requirements.

Thesis Plan

If you select this plan, you must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included) and submit an acceptable thesis, prepared under the direction of a member of the program faculty. Submission of the thesis is followed by an oral examination covering the fields of folklore and mythology studies. You must complete all degree requirements in a maximum of six regular academic terms.

The thesis committee, composed of three or more faculty members selected with approval of the chair of the interdepartmental committee, is appointed no later than the term before you expect to complete the requirements. No outside members are required.

Comprehensive Examination Plan

If you plan to pursue a Ph.D. degree in Folklore and Mythology, you must elect this plan and must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included). After completion of the coursework, you are expected to demonstrate competence in written and oral examinations requiring a grasp of (1) theoretical bases, major documents, and research methods and techniques of folklore and mythology studies, (2) two forms of folklore and mythology, and (3) the folklore and mythology of a specific country, continent, or geographical area. You must complete all degree requirements in a maximum of six regular academic terms.

Ph.D. Degree

Admission

Requirements for admission to the doctoral program include completing the requirements for the M.A. degree in Folklore and Mythology (or equivalent) and the written comprehensive examination. You are admitted to the doctoral program on the recommendation of the interdepartmental committee (you may secure provisional admission in order to complete the admission requirements).

Major Fields or Subdisciplines

You must develop competency in (1) a major field of folklore and mythology and (2) an area of concentration within a related discipline. These areas are selected with the approval of the guidance committee.

Foreign Language Requirement

Reading knowledge of German and another language approved by the guidance committee is required. You may demonstrate proficiency by any of the three methods described above under "Foreign Language Requirement" for the master's degree.

The foreign language examinations must be completed before you attempt the qualifying examinations.

Course Requirements

Before attempting the qualifying examinations, you must complete a minimum of nine courses or seminars in the 200 series (or substitutes recommended by the guidance committee) in (1) folklore and mythology and (2) an area of concentration within a related discipline. At least five of the nine courses must be selected from Folklore and Mythology 200 through M286B, and at least two of the nine are to be folklore seminars (i.e., course 259). No more than two 596 courses may be applied toward the minimum graduate course requirement.
Qualifying Examinations

After the required preparation, you complete a written examination covering (1) your specialization in folklore and mythology and (2) your related area of concentration. The examination is administered by a committee appointed with approval of the interdepartmental committee and includes one or more members from your related discipline.

The written examination is followed by the oral examination covering the same two areas listed above, which you must pass in order to be advanced to candidacy. The oral examination is administered by the doctoral committee, which also considers and approves your dissertation topic.

Final Oral Examination

An oral defense of the dissertation may be required, to be determined by your doctoral committee after you complete the oral qualifying examination.

Lower Division Course

101. Introduction to Folklore. Survey of various forms of folklore and their historical and social significance. Mr. Nagy, Mr. Porter

105. Perspectives in American Folklore Research. Lecture, three hours. Prerequisite: course 101 or consent of instructor. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course CM205.

CM205. Anglo-American Folk Song. (Same as English M111B.) Prerequisite: satisfaction of Subject A requirement, junior standing. Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course CM206.

C107. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 15 or 101 and/or consent of instructor. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C207.

M121. British Folklore and Mythology. (Same as English M111C.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with British folklore from earliest times to the 14th century.

133. The Arthurian Tradition. Prerequisite: consent of instructor. Survey of traditions relating to British King Arthur from medieval times to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of Arthurian material in other mediums (e.g., opera, film).

118. Folk Art and Technology. Prerequisite: junior standing. General course concerned with material manifestations of folklore culture and theoretical concepts and methodologies utilized in their analysis.

M122. Celtic Mythology. (Same as English M111D.) Prerequisite: course 101 or consent of instructor. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

M123A. Finnish Folklore and Mythology. (Same as Scandinavian M123A.) Methods and results of Finnish folklore studies and mythic traditions of the Finns. Special attention to oral epic, beliefs, and legends.

M123B. Finnish Folk Song and Ballad. (Same as Scandinavian M123B.) Course M123A is not prerequisite to M123B. Survey of Finnish balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

M125. Folklore and Mythology of the Lapps. (Same as Scandinavian M125.) Survey of Lappish beliefs, customs, and various genres of oral tradition, including tales, legends, songs, and music. Attention also to material manifestations of Lappish culture: arts and crafts, textiles, costume, folk technology.

M126. Baltic and Slavic Folklore and Mythology. (Same as Slavic M126.) General course for students interested in folklore and mythology for those interested in Indo-European mythic antiques.

M127. Celtic Folklore. (Same as English M111F.) Prerequisite: course 101 or consent of instructor. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

M128. Hungarian Folklore and Mythology. (Same as Hungarian M135.) General course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research.

M129. Folklore and Mythology of the Ugric Peoples. (Same as Hungarian M136.) Survey of traditions of the smaller Ugric nationalities (Vologda, etc.).

M130. North American Indian Folklore and Mythology Studies. Prerequisite: course 101 or consent of instructor. Examination of folklore and mythological data recorded from various North American Indian peoples within contexts of principal ideological frameworks which have been evolved historically for analysis of such data.

M131. Folklore of India. Prerequisite: course 101 or consent of instructor. Survey of folklore of India, with special reference to content and dissemination of oral epics, ballads, legends, and beliefs.

M140. From Boccaccio to Basile (in English). (Same as Italian M140.) Lecture, three hours. Study of origins and development of the Italian novella in its fourteenth-century literary context, and its role in European romanticism. Designed for students in other departments who wish to become acquainted with either the premises or growth of similar literary genres. Also intended for students majoring in folklore and mythology, who are given insight into Italian paper and manuscript traditions when these (as in the case of Boccaccio) were translated into highly sophisticated literary forms, as well as when (as in the case of Basile) they become embedded into the folk tradition of the Western world.

Mr. Cottage-Jones

M142. Introduction to Jewish Folklore. (Same as Jewish Studies M143.) Nature of Jewish folklore; narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

Mr. Stern

M149. Folk Literature of the Hispanic World. (Same as Spanish M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folklore literature throughout the Hispanic countries.

Ms. Arora

M150. Russian Folk Literature. (Same as Russian M150.) Lecture, three hours. Lectures and readings in Russian.

M154A-M154B. The Afro-American Musical Heritage. (Same as Ethnomusicology M110A-M110B.) Lecture, three hours. Prerequisites: course 101 or consent of instructor. Course M154A is not open to students with credit for former Music M154A; M154B is not open to students with credit for former Music M154B. Study of African music and its impact on the Americas; survey of developments of various Afro-American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

Ms. Djeje

Mr. Cosentino

162. Folklore and Oral History. Prerequisite: junior standing. Examination of relationships between folk tradition and oral history; how history may be derived from tradition; how traditions are embedded in historical sources; how the folk traditionalize history to reflect their point of view.

Mr. Stern

M170. Russian Folklore. (Same as Russian M170.) Lecture, three hours. General introduction to Russian folklore; including survey of genres and related folkloric phenomena. Lectures and readings in English.

M172. Folklore in Ethnic Context. Prerequisite: course 15 or 101 or consent of instructor. Role of folklore in ethnic relations; processes by which ethnic folklore is generated, transformed, and maintained by immigrant groups and subsequent generations.

Mr. Georges, Mr. Stern

M180. Analysis of Traditional Music. (Same as Ethnomusicology M180.) Prerequisites: Ethnomusicology M10A-10B-10C and 20A-20B-20C, or consent of instructor. Not open to students with credit for former Music M180. Intensive study of methods and techniques necessary to understand Western folk music.

Mr. Porter

M181. Folk Music of Western Europe. (Same as Ethnomusicology M126.) Prerequisite: consent of instructor. Not open to students with credit for former Music M181. Introduction to forms and styles of traditional music in Western Europe. Historical and ethnomusicological analysis of this music, using a wide variety of recorded examples from major cultural sub-divisions of the region.

Mr. Porter

M182. Japanese Folklore. (Formerly numbered M136.) (Same as Japanese M182.) Lecture, three hours. Examination of Japanese folklore and mythology, with emphasis on interpretations of native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto-Buddhist syncretism, and other non-Buddhist belief systems found in Japan.

Mr. Plutschow
183. Korean Folklore. (Formerly numbered M183.) Lecture, three hours. Survey of Korean folklore and its perspectives and methods — oral literature, performing folk arts, social folk custom, and material culture.

CM184D. Dance in the British Isles and North America: Anglo-American Tradition. (Same as Dance CM184D.) Introduction to folklore research on dance, with examples primarily from the British Isles and related traditions in North America. Topics include study for origins, structural analysis of dance forms, and relation of dance to its contexts. Concurrently scheduled with course CM284D.

190. Selected Topics in Folklore and Mythology Studies. Prerequisite: course 101 and consent of instructor. Proseminar focusing on selected problems, data, or themes in folklore and mythology studies. May be repeated twice for credit.

199. Special Studies in Folklore (2 to 4 units). Prerequisite: senior standing, consent of instructor.

Graduate Courses

200. Folklore Bibliography, Theory, and Research Methods. Basic course in theory and bibliography for folklore students. Considers types of research necessary for serious folklore study. Mr. Georges, Mr. Ward

201A. Folklore Collecting and Field Research. Prerequisite: course 200. Discussion/demonstration concerning theoretical concerns, methods, and techniques of data gathering and field research in folklore. Mr. Jones, Mr. Stern

201B. Folklore Collecting and Field Research. Prerequisite: course 201A. Supervised completion of fieldwork project developed in course 201A. Mr. Jones, Mr. Stern

202. Current Trends and Issues in Folklore Studies. Lecture, three hours. Prerequisite: course 200. Survey and analysis of current trends and issues in folklore studies, with emphasis on conceptual models, research techniques, and analytical procedures. Mr. Georges, Mr. Ward

205. Perspectives in American Folklore Research. (Formerly numbered M205.) (Same as Library and Information Science M205.) Lecture, two hours, laboratory; two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing data bases, utilizing both manual and computerized techniques. Mr. Georges, Mr. Stern

206. Anglo-American Folk Song. Prerequisite: graduate standing. Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course CM184D. Mr. Georges, Mr. Ward

207. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 200 and/or consent of instructor. Exploration of expressive and symbolic dimensions of urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C107. Mr. Jones, Mr. Stern

208. Afro-American Folklore and Culture. Prerequisite: graduate standing. Theoretical and methodological constructs which have contributed to the body of black cultural expression in the U.S. Ms. Robinson

211. Traditional Festivals and Festive Events. (Same as Italian M211.) Lecture, three hours. Prerequisite: consent of instructor. Analysis of traditional expressive forms and behaviors inherent in selected festivals and festive events (e.g., carnivals, community folk festivals, small festive gatherings), with emphasis on their structure and human dynamics.

213. Folk Belief and Custom. Prerequisites: course 201 and one course from 118, M121, M122, M123A, M129B, 124, M125, M126, M128, M149, M150, Anthropology 156, German 134, 240A, 240B, 240C. Study of beliefs and customs in the folk community: life cycle, calendrical and agricultural customs, and legendary elements. Mr. Jones, Mr. Mills

214. Ethnography of Humor. (Same as Anthropology M232S.) Lecture, three hours. Prerequisite: graduate standing in folklore or anthropology. Examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

215. Popular Legend. Prerequisite: course 200 or consent of instructor. Study of categories of legend and their relation to myth, custom, ritual, popular beliefs, and ethics. Mr. Georges, Mr. Ward

216. Folktales. Prerequisite: course 200 or consent of instructor. Mr. Georges, Mr. Ward

217. Folk Speech. Prerequisite: course 101, CM106, or M111. Recommended: Anthropology M140, English 121, or Linguistics 100. Study of ethnography of contemporary speech and its relevance to study of social and regional dialects, proverbs, riddles, onomatopoeia, folk poetry and verse, and traditional humor. Mr. Georges

218. Folk Art, Craft, and Aesthetics. Lecture, three hours. Prerequisite: course 200. Examination of research orientations and findings in regard to what has been called folk art, craft, and aesthetics. Major perspectives and areas of inquiry from latter part of 19th century to the present. Mr. Jones

219. Seminar in Puppet Theater. (Same as Theater M217B.) Lecture, three hours. Prerequisite: consent of instructor. Studies in puppet theaters of the world: techniques, literature, aesthetics.

220. Seminar: Topics in Celtic Folklore and Mythology. Lecture, three hours. Prerequisites: course 200, coursework in Celtic studies. Preparation for advanced study of and research in important areas of Irish oral tradition and folklore/mythology scholarship. Possible topics include pagan Celtic Brit/ireland; comparative Celtic folk and mythology; the Irish saints' legends; the Irish Fenian (Ossianic) tradition of ballads (laoidhe/duain) and prose tales; "fairy" beliefs; collecting and archiving methods of the Irish Folklore Commission; folklore studies and nationalism. Mr. Ford, Mr. Nagy

235. African Myth and Mythology. (Same as English M235.) Prerequisite: graduate standing. Methods of analyzing and appreciating African myths and mythological systems.

240. Introduction to Jewish Folk Literature. Prerequisites: upper division standing and consent of instructor. Examination of Jewish ballads and folk narratives, with special emphasis on religio-magical purposes and symbolic structure of these arts. In Progress grading.

241. Folklore and Mythology of the Near East. (Same as Near Eastern Languages M241.) Prerequisite: course 101 or equivalent.

243A. The Ballad. (Same as English M243A.) Prerequisites: upper division standing and consent of instructor. Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues.

243B. Problems in Ballad Scholarship. (Same as English M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in study of the popular ballad.

248. Theory and Method in Latin American Folklore Studies. Historical survey of folklore scholarship in Latin America, with emphasis on theoretical bases, methods, and techniques employed in study and analysis of traditional tales, songs, music, linguistic expressions.

249. Folk Literature of the Spanish and Portuguese Worlds. (Same as Portuguese M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures with their American counterparts represented in (1) ballad poetry, (2) narrative and drama, (3) speech. Ms. Arora

251. Seminar in Finno-Ugric Folklore and Mythology. Advanced studies in folklore traditions and mythologies of the Finno-Ugric peoples. Mr. Georges

257. South American Folklore and Mythology. (Same as Anthropology M232R.) Prerequisite: Anthropology 174P or consent of instructor. Examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people. Mr. Wilbert

258. Seminar in Folk Music. (Same as Music M258.) Seminar, three hours. Prerequisite: consent of instructor. Mr. Porter

259. Seminar in Folklore. Prerequisite: consent of instructor. Seminar focusing on selected topics in folklore and mythology. May be repeated for credit.

270A-M270B. Graduate Seminars in Japanese Performing Arts (2 units each). (Formerly numbered M236A, M236B.) Lecture, two hours, laboratory, three hours. Reading knowledge of Japanese not required. Lectures, discussions, and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religio-magical purposes and symbolic structure of these arts. In Progress grading.

CM284D. Dance in the British Isles and North America: Anglo-American Tradition. (Same as Dance CM284D.) Introduction to folklore research on dance, with examples primarily from the British Isles and related traditions in North America. Topics include search for origins, structural analysis of dance forms, relation of dance to its contexts. Concurrently scheduled with course CM184D.

286A-M286B. Studies in Hispanic Folk Literature. (Same as Spanish M286A-M286B.) Lecture, two hours, laboratory, two hours; S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Mr. Georges, Mr. Jones

400A-400B-400C. Directed Professional Activities. Prerequisite: consent of department chair. Directed individual projects in professional editing, bibliography, discography, filmography, festival direction, and other professional activities. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

495. Teaching Folklore and Mythology. Lecture, three hours. Prerequisite: course 200. Analysis and design of alternative organizational schemes, teaching aids and techniques, and evaluation methods for folklore courses. May not be applied toward J.D. or Ph.D. course requirements. S/U grading.

Mr. Georges, Mr. Jones

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, degree chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

Scope and Objectives

French is second only to English as a language of international culture, and French literature is one of the richest among world literatures. In recent decades French critical thought has maintained a dominant position in the Western world. The French Department seeks to give its students not merely a background in French language and literature, but opportunity to synthesize literary and linguistic study with examination of the critical intellectual questions of our time.

The lower division program is designed to provide minimal competence in French after one year and thorough basic knowledge of the language after two years. From the first day of French 1 all instruction is conducted in French.

The upper division program is chiefly devoted to perfecting linguistic skills and to the study of French literature. Courses in culture and linguistics are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French literature and culture.

The graduate program comprises training in the various fields of French literature and thought, as well as in literary criticism and analysis. A number of courses in linguistics and stylistics are also offered. The department offers both the M.A. and Ph.D. degrees.

Bachelor of Arts Degrees

Preparation for the Majors

Required: French 1, 2, 3, 4, 5, 6, 12, and 15, or equivalent. You normally take course 6 before undertaking course 12 or 15. If you received a grade of A in course 5, you may enroll in course 12 concurrently with course 6, with consent of instructor.

The Majors

Four majors are offered by the department:

Plan A leads to the Bachelor of Arts in French and subsequently to the standard elementary or secondary instructional credential. Required: Sixteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B, 114C-114D; two terms from courses 130A through 132*; three courses in French literature from 115A through 120D**; five elective courses normally selected from upper division courses in the Department of French in language, civilization, or literature. A maximum of one upper division course outside the department may be included in the major program with consent of the undergraduate adviser.

Plan A instructional credential candidates must take 15 upper division French Department courses, including French 105, in order to qualify for a waiver of the national teacher examination for the single subject instructional credential in French.

Plan B, with emphasis on literature, leads to the Bachelor of Arts in French and subsequently to the master's degree. Required: Fifteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B, 114C; six courses in French literature from 115A through 120D**; five elective upper division courses to be selected in consultation with a major adviser, either from the Department of French, the humanities or social sciences division of the College of Letters and Science, or from the School of the Arts.

Plan C (French Studies) is a core program in French allowing for individual selection of relevant courses in related fields in the humanities, social sciences, linguistics, etc. Required: Fifteen full courses of upper division work, including French 100A, 100B, 100C, 103, 114A-114B, 114C; three courses in French literature from 115A through 120D**; five upper division elective courses in the fields relevant to French studies to be selected in or out of the Department of French in consultation with the undergraduate adviser. This program does not normally prepare you for admission to the master's program in French at UCLA.

*A course in French history may be substituted for one of these with consent of the major adviser.

**All major plans one course from the 121 series and/or one undergraduate seminar (French 150 through 160) may be substituted for courses in the 115A through 120D offerings.
Plan D (French and Linguistics) leads to a Bachelor of Arts degree in French and Linguistics. In addition to the normal preparation for the major, you are required to complete the sixth term of work in one other foreign language or the third term in each of two other foreign languages. Required: French 100A, 100B, 100C, 103, 114A-114B-114C; two courses from French 105, 106, 107, 108A, Linguistics 100, 103, 110, 120A, 120B, and C164 or C165A or C165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the under-graduate level.

If your knowledge of French exceeds the preparation usually received in courses preparing for the major and if you demonstrate the requisite attainment in French 100A, 100B, or 100C, you may substitute for those courses in grammar and composition an equivalent number of upper division courses in the Department of French in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA Department of French. A maximum of eight units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. You must maintain a C average in upper-division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult a major adviser before registering for upper division courses. The three courses count as literature courses for the purpose of satisfying major requirements.

**Institutional Credential in French**

If you wish a single subject instructional credential in French, you must have the consent of the Department of French in order to gain admission to student teaching. For the single subject credential, consent is contingent on a major (or equivalent) in French and the successful completion of French 370. For additional information, consult the Graduate School of Education (231 Moore Hall) and/or the Department of French.

**Master of Arts Degree**

**Admission**
The Graduate Record Examination (GRE) General Test, a sample of written work in French, and three letters of recommendation are required and should be sent to the Department of French, 222 Royce Hall, UCLA, Los Angeles, CA 90024-1550. A Bachelor of Arts in French is desirable but not mandatory.

**Major Fields or Subdisciplines**
The corpus of French literature is divided into three chronological periods: (1) medieval/Renaissance, (2) classical (roughly the 17th and 18th centuries), and (3) modern (since 1800), with Franco-African literature as an option.

**Foreign Language Requirement**
The foreign language requirement is fulfilled by (1) passing a course of at least level three in either German, Latin, Spanish, or Italian, (2) by passing the University reading examination in one of these languages, or (3) by passing the Educational Testing Service (ETS) language examination with a score of 500 or better. In special cases, substitution of another foreign language is acceptable if approved by the graduate adviser. You must complete the foreign language requirement before you submit your M.A. thesis (Plan I) or take the M.A. examination (Plan II). All candidates for the M.A. must be proficient in spoken French.

**Plans of Study**
The department offers two master's programs: Plan I (thesis plan) and Plan II (comprehensive examination plan).

**Plan I and II Course Requirements** — French 201, 202, and 203A or 203B are required and should be taken as early as possible. A total of 12 courses in French is required, including at least three courses in each of two periods. At least eight of the courses must be at the graduate level. Students in Plan I may include four units of credit for course 598.

**Plan I Admission Requirements and Oral Qualifying Examination** — You may apply to the chair of the department for admission into Plan I after completing at least six graduate courses (200 series), four of which must be literature courses in the French Department. The minimum admission requirements are a 3.5 graduate GPA in French and letters from two graduate professors in the department specifically recommending admission into this plan.

Final admission into Plan I (i.e., permission to write the thesis) is contingent on passing a one-hour oral examination in the two periods prepared. If you fail this examination, the examining committee determines whether you may be permitted another attempt or be advised to take the comprehensive examination (Plan II).

The thesis should demonstrate proficiency in the methods and concepts of literary research; a suitable length is normally about 50 pages. A tentative outline of the proposed thesis must be approved by the thesis committee in writing before work on the thesis is begun. Final approval of the thesis by the committee is also required.

**Plan II Comprehensive Examination** — You must pass written examinations of four hours in length in each of the two periods prepared, a two-hour explication de texte, and an oral examination in French. The examinations are given in Fall and Spring Quarters and may be retaken once.

**Terminal M.A. Degree**

Decision to award a terminal M.A. degree is made by the department on the basis of (1) M.A. examination papers, (2) oral examination, and (3) overall appraisal of record.

**Ph.D. Degree**

**Admission**
Completion of a master's degree with recommendation for continuance by the M.A. committee is required; outside applicants need an M.A. degree or equivalent and three letters of recommendation, as well as the Graduate Record Examination (GRE) General Test and a sample of written work in French.

Admitted students holding the M.A. or Maîtrise from another institution must take an oral examen de passage in two periods of literary history in order to be formally admitted to the doctoral program. This examination, administered by the M.A. committee, should be taken during your first year in residence. In case of failure it may be repeated once.

**Major Fields or Subdisciplines**
The corpus of French literature is divided into three chronological periods: (1) medieval/Renaissance, (2) classical (roughly the 17th and 18th centuries), and (3) modern (since 1800), with Franco-African literature as an option.
Foreign Language Requirement

(1) Languages are divided into three groups: Latin; German and Russian; and other Romance languages. You must study two languages up to levels five and six respectively, with no more than one from any one group. The languages selected must be approved by your guidance committee. Language requirements may also be satisfied by taking the Educational Testing Service (ETS) examination with level five corresponding to a score of 550 and level six, 600. Substitution of another language, when warranted by the nature of your specialization, must be recommended by the guidance committee and approved by the graduate adviser.

(2) When the nature of your specialization requires the knowledge of a third language (in addition to the two normally required), the guidance committee is expected to take into account the extra work implied in making its other recommendations.

(3) Language requirements are to be completed before taking the doctoral qualifying examination.

Course Requirements

The following courses are required: (1) French 201, 202, and 203A or 203B, (2) at least four seminars, two of which should be in your proposed period of specialization, (3) at least two graduate courses in other departments related to the area of specialization. In addition, you are expected to follow the guidance committee’s suggestions in taking courses in preparation for the doctoral qualifying examination.

Qualifying Examinations

Four written examinations of four hours each are required as follows: (1) focused specifically in the area of the prospective dissertation topic; (2) dealing with a more general subject related to the dissertation topic; (3) in a cognate field related to the methodology or approach you plan to employ in the dissertation; (4) in the period not covered at the M.A. level. The topics to be dealt with in parts 1, 2, and 3 are determined by prior consultation with the doctoral guidance committee. At the discretion of the department, you may be permitted to retake a failed examination once.

After passing the written examinations, you are admitted to the University Oral Qualifying Examination. This examination, normally of two hours duration, bears chiefly on parts 1 and 2 of the written examinations and on the proposed dissertation subject. You are expected to submit a written outline of research plans before the oral examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.
215A-215D. Medieval Literature. (Formerly numbered 215A-215F.) Lecture, three hours. Prerequisite: course 214:
215A. Lyric Types. (Not the same as course 215A prior to Fall Quarter 1990.)
215B. Narrative Types.
215C. Theater — Comic and Religious.
215D. Discursive Texts.
216A-216E. Renaissance. (Formerly numbered 216A-216H.) Lecture, three hours:
216A. Early Renaissance French Literature. Selected readings of works from first half of the 16th century, including those by Marot, Rabelais, Marguerite de Navarre, and Scève. Mr. Bensimon, Mr. Carron
216B. Poetic “Revolution” of 1549. Readings of works by Ronsard and Du Bellay, with selections from other writers of the 1550s. Mr. Bensimon, Mr. Carron
216C. Early Baroque Literature. Selected readings of works by major writers of the period from 1560 to 1600, including those by d’Avignon, Sponde, Chasignet, and Montaigne. Mr. Bensimon, Mr. Carron
216D. Montaigne. Study of Montaigne’s three books of Essais. Mr. Bensimon, Mr. Carron
216E. Mannerist French Poetry and Art. Comparative examination of mannerist forms of expression. Mr. Bensimon, Mr. Carron
217A-217D. 17th Century. (Formerly numbered 217A-217L.) Lecture, three hours:
217A. Theater. Analysis of representative comedies and/or tragedies, including those by Corneille, Moléire, and Racine. Ms. Melzer, Ms. Stefanovska
217B. Prose. Readings of selected works by philosophers, moralists, and/or novelists, including those by Pascal, La Rochefoucault, La Bruyère, La Fayette, and La Fontaine. Ms. Melzer, Ms. Stefanovska
217C. Poetry. Readings of works by major poets, including those by Racan, Voiture, Saint-Amant, Racine, La Fontaine, and Boileau. Ms. Melzer, Ms. Stefanovska
217D. Culture and Society. Study of political, social, religious, and courtly aspects, including libertine and salons milleux, La Frenaye, Versailles. Ms. Melzer, Ms. Stefanovska
218A-218C. 18th Century. (Formerly numbered 218A-218D.) Lecture, three hours:
218A. Topics in the Early Enlightenment. Selected readings from major works of the period from 1680 to 1747. Mr. Coleman, Mr. Werner
218B. Topics in the Enlightenment. Selected readings from major works of the period from 1748 to 1765. Mr. Coleman, Mr. Werner
218C. Topics in the Late Enlightenment. Selected readings from major works of the period from 1766 to 1791. Mr. Coleman, Mr. Werner
219A-219D. 19th Century. (Formerly numbered 219A-219K.) Lecture, three hours:
219A. Topics in Romanticism. Readings in literature of the Romantic period. Mr. el Nouty, Mr. Gans
219B. Topics in Realism and Naturalism. Readings in realist and naturalist novel and theater. Mr. el Nouty, Mr. Gans
219C. Topics in Symbolism. Readings in symbolism poetry and prose. Mr. el Nouty, Mr. Gans
219D. Poetry. Study of development of French poetry throughout the 19th century. Mr. el Nouty, Mr. Gans
220A-220D. 20th Century. (Formerly numbered 220A-220P.) Lecture, three hours:
220A. Turn of the Century. Readings include post-symbolist writers such as Valéry, Gide, and Proust. Ms. Kao, Ms. Loselle
220B. Literature from 1918 to 1945. Readings include postrealist writers such as Céline, Maunoir, and Anouilh. Ms. Kao, Ms. Loselle
220C. Post-World War II Literature. Readings include existentialist writers such as Robbe-Grillet, Beckett, and Ponge. Ms. Kao, Ms. Loselle
220D. Cinema and Literature. Comparative study of interrelations between cinematic and literary forms. Ms. Kao, Ms. Loselle
221A-221C. French-African Literature. (Formerly numbered 221A-221D.) Lecture, three hours:
221A. Introduction to Study of French-African Literatures. In-depth survey of French-African literatures prior to independence. Mr. el Nouty
221B. French-African Literature of Madagascar and Bantu Africa. Readings and analysis of major works since independence. Mr. el Nouty
221C. French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa. Readings and analysis of major works since independence. Mr. el Nouty
222. Quebec Literature. Lecture, three hours. Study of selected poems, novels, and plays in their cultural context. Mr. Coleman
Courses 250A through 260B may be repeated for credit.
250A. Major Medieval Texts. Seminar, three hours. Prerequisite: course 214. Intensive study of individual texts from multiple perspectives, such as La Chantons de Romances, the Romance of Chétyl de Troyes, La Roman de la rose, or François Villon’s Grand Testament. Mr. Haidu
250B. Structures of Medieval Literature. Seminar, three hours. Prerequisite: course 214. Advanced study of a variety of texts in terms of textual and historical structures. Mr. Haidu
250C. Problems in Medieval Literature. Seminar, three hours. Prerequisite: course 214. Exploratory study of a theoretical problem, such as subjectivity and representation in medieval literature, minor or noncanonical texts, individuality and convention, or opposition of religion and secularism. Mr. Haidu
251A-251B. Studies in the Renaissance. Mr. Bensimon, Mr. Carron
252A-252B. Studies in the Baroque. Mr. Bensimon, Mr. Carron, Ms. Melzer
254A-254B. Studies in the 18th Century. Mr. Coleman, Mr. Werner
255A-255B. Studies in the 19th Century. Mr. el Nouty, Mr. Gans
256A-256B. Studies in Contemporary Literature. Ms. Kao, Ms. Loselle
257A-257B. Studies in French-African Literature. Mr. el Nouty and the Staff
258A-258B. Studies in Literary Criticism. Mr. Gans and the Staff
259A-259B. Studies in Philosophy and Literature. Mr. el Nouty and the Staff
260A-260B. Studies in History of Ideas. Mrs. el Nouty
265A-265B. Studies in the History of the 18th Century. Mr. Coleman, Mr. Werner
267A-267B. Studies in Philosophical Anthropology. Mr. Gans
268A-268B. Advanced Reading in Philosophy. Mr. Gans
270A. Philosophy and Literature. Mr. el Nouty and the Staff
271A. Seminar in the Philosophy of Literature. Mr. el Nouty and the Staff
275A. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: consent of instructor. May be repeated for a maximum of 16 units. S/U grading.
276A. Philosophy and Literature. Mr. el Nouty and the Staff
285A. Seminar in the Philosophy of Literature. Mr. el Nouty and the Staff
295A. Seminar in the Philosophy of Literature. Mr. el Nouty and the Staff
296A. Advanced Reading in Philosophy. Mr. Gans
350A. Advanced Reading in Philosophy. Mr. Gans
355A. Advanced Reading in Philosophy. Mr. Gans
360A. Advanced Reading in Philosophy. Mr. Gans
370A. Advanced Reading in Philosophy. Mr. Gans
375A. Advanced Reading in Philosophy. Mr. Gans
376. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: consent of instructor. May be repeated for a maximum of 16 units. S/U grading.
377. Preparation for the M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). May be repeated for a maximum of 16 units. S/U grading.
378. Research and Preparation of M.A. Thesis (2 to 4 units). Prerequisite: consent of instructor. A maximum of four units may be applied toward M.A. degree requirements. S/U grading.
379. Research and Preparation of Ph.D. Dissertation (2 to 8 units).

Geography

1255 Bunche Hall, (213) 825-1071

Professors
Charles F. Bennett, Ph.D.
C. Rainer Berger, Ph.D.
William A.V. Clark, Ph.D., Chair
J. Nicholas Entrikin, Ph.D.
James H. Johnson, Ph.D.
Tom L. McKnight, Ph.D.
Anthony R. Orme, Ph.D.
Allen J. Scott, Ph.D.
Hartmut Walter, Ph.D.

Professors Emeriti
Henry J. Bruman, Ph.D.
Gary S. Dunbar, Ph.D.
Huyle L. Kostanick, Ph.D.
Richard F. Logan, Ph.D.
Clifford H. MacFadden, Ph.D.
Howard J. Nelson, Ph.D.
Jonathan D. Sauer, Ph.D.
Werner H. Terjung, Ph.D.
Benjamin E. Thomas, Ph.D.
Norman J.W. Thrower, Ph.D.

Associate Professors
Gerry A. Hale, Ph.D.
Stanley W. Trimbile, Ph.D.

Assistant Professors
Judith A. Carney, Ph.D.
Michael G. Curry, Ph.D.
Cindy Chi-Fun Fan, Ph.D.
Johannes J. Feddem, Ph.D.
Stephen A. Mathews, Ph.D.
Marilyn N. Raphael, Ph.D.
David L. Rigby, Ph.D.
Melissa Savage, Ph.D.

Scope and Objectives

Geographical knowledge deals with the description and analysis of the spatial distribution of those conditions (either naturally occurring or humanly produced) that form the material basis for the reproduction of social life. It also entails understanding the relationships between such conditions and the qualities of social life achieved under given economic, political, social, and cultural systems.
The research and teaching interests of the faculty, ranked sixth nationally by the Conference Board of the Associated Research Councils, cover major areas of geographical knowledge and underlie both the undergraduate and graduate instructional programs. These areas of interest may be broadly grouped into basic environmental studies, applied environmental studies, cultural and historical geography, economic and urban geography, political and social geography, geographical procedures, and regional geography.

The undergraduate program is designed for students who wish to gain a thorough understanding of geographical analysis, with emphasis on ecological, physical, social-spatial, and historical theories and methods of analysis applied to a wide range of biophysical, material, and social questions. The department offers two undergraduate majors that lead to the Bachelor of Arts degree: (1) the major in geography and (2) the major in geography/ecosystems. The majors prepare students for employment opportunities in both the public and private sectors (in environmental analysis, assessment, and management, map making and remote sensing, regional analysis, economic and urban spatial analysis, and teaching) and for graduate study in law, management, urban and regional planning, education, other biophysical and social sciences, and applied programs, as well as in geography.

Producing geographers of high quality is the principal goal of the graduate program, designed primarily for students pursuing the Ph.D. degree. The Master of Arts program, which involves coursework and a thesis, serves as an essential building-block of the doctoral program. The doctorate is awarded to those students who have achieved the level of geographical knowledge and training required of a professional geographer. The degree recognizes the ability of students to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

Bachelor of Arts in Geography

Geography majors are encouraged to consult with the undergraduate adviser for the planning of a program suitable to their particular and individual objectives.

Preparation for the Major

**Required:** Geography 1, 2, 3, 4, 40. A mathematics background, such as Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, is recommended. All courses must be completed for a letter grade.

The Major

**Required:** A minimum of 10 upper division courses in geography taken for a letter grade.

In meeting this requirement, you must take three courses from Group I — Environment; three courses from Group II — Human Geography; one course from Group III — Procedures; two courses from Group IV — Regions; and one elective upper division course in geography. You are encouraged to take more than 10 upper division courses. A C average in the major is required for graduation.

Foreign Language/Mathematics Requirement

Every geography major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. All students who entered UCLA as a geography major and/or declared the geography major during Fall Quarter 1988 and thereafter may not apply high school foreign language courses toward this requirement. In mathematics, only Mathematics 2, 3A, 3B, 3C, 5, 31A, 31B, 32A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

Allied Fields

You must develop some competence in one or two allied fields. This requirement consists of at least four upper division courses selected from at least one but not more than two of the following disciplines: anthropology, atmospheric sciences, biology, chemistry, Earth and space sciences, economics, folklore, history, management, philosophy, physics, political science, psychology, public health, sociology, Architecture and Urban Planning 187 and 190 are also acceptable. Other disciplines require departmental consent.

Honors Program

Honors in the geography major may be obtained through procedures described under Geography 199HA-199HB.

Bachelor of Arts in Geography/Ecosystems

The major in geography/ecosystems offers a choice of three plans, each of which has its foundations within the Department of Geography but is essentially interdisciplinary in scope.

Plan 1 (Environmental Policy) has a social science orientation and is designed primarily for students whose environmental interests focus on policy issues concerning environmental management and conservation.

Plan 2 (Natural Resources) has a biogeographic orientation and is designed for students whose environmental interests focus on the conservation and management of renewable natural resources.

Plan 3 (Environmental Engineering) has a physical geography/technological orientation and is designed primarily for students interested in the physical and technological aspects of environmental conservation and management.

All three plans have certain features in common: (1) a high degree of emphasis is placed on student input and interaction with the faculty — particularly with respect to seminars; (2) you are encouraged to consult with the undergraduate adviser in planning a program; (3) all courses required for the major, both geography and non-geography, must be taken for a letter grade. A C average in the major is required for graduation.

Plan 1 (Environmental Policy)

**Preparation for the Major:** Biology 5, Economics 1 or 2, Geography 1, 2, 3, 4, 5, 40, Mathematics 3A, 3B, 3C, and introductory computing courses are recommended.

**The Major:** Geography 129, three courses from Group Ia, two courses from Group Ib, one course from Group III.

**Electives:** Six courses from the following: Anthropology 132, 150, 153, 167; Architecture and Urban Planning 190; Communication Studies 120; Economics 110, 111, 170; English 131A through 131J; Environmental Health Sciences 150, 152, 154; Geography: no more than three courses from 100 through 199; one course only from History 195A through 195G; Political Science 141, 142, 167, 170; Psychology M138; Sociology 158, 184.

Plan 2 (Natural Resources)

**Preparation for the Major:** Biology 5, 6, Chemistry and Biochemistry 11A, Geography 1, 2, 3, 4, 5, 40, Mathematics 3A, 3B, 3C, and introductory computing courses are recommended.

**The Major:** One course from Biology 103, 111, M118; Earth and Space Sciences 150; Geography 129, three courses from Group Ia, two courses from Group Ib, two courses from Group III.

**Electives:** No more than three courses may be taken in any one department to satisfy the elective requirement. Six courses should be selected from the following: Anthropology 132, 167; Biology 103, 111, M118, 120, 122, 131, 135, 147; Biostatistics 103; Civil Engineering 150, 155, 163; Earth and Space Sciences 139; Economics 111, 170; English 131A through 131J; Environmental Health Sciences 152, 154; Geography: no more than three courses from 100 through 199; Materials Science and Engineering M107A; Mechanical, Aerospace, and Nuclear Engineering 180A. Biology courses taken for elective requirements may not be applied toward the major requirement in biology.
Plan 3 (Environmental Engineering)

Preparation for the Major: Biology 5, Chemistry and Biochemistry 11A, Geography 1, 2, 3, 4, 5, 40, Mathematics 31A, 31B, 32A, 33A. Program in Computing 3 is highly recommended.

The Major: Earth and Space Sciences 139, 150; Geography 129, five courses from Group I (100, 104, 105, 124, and 106 or M127), two courses from Group III, including 167 or 168 or 171.

Electives: Six courses from the following: Atmospheric Sciences 144; Civil Engineering 150, 151, 155, 156, M161, 163; Economics 110; Electrical Engineering 103; English 131A through 131J; Environmental Health Sciences 150; Geography: no more than three courses from 100 through 199; Mathematics 115A, 141A, 141B; Mechanical, Aerospace, and Nuclear Engineering 103, M105A, 105D, 153A, 180A.

Honors Program

Honors may be awarded if you attain and maintain at least a 3.4 GPA in the major (including the senior thesis) from the beginning of your senior year to graduation. The thesis (Geography 196) is a substantial though not necessarily lengthy contribution to ecosystem analysis that must be submitted no later than early in your final term.

Specialization in Computing

 Majors in geography and geology/ecosystems may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), (3) completing at least two courses from Geography 104, 167, 168, 171. You graduate with a bachelor's degree in your major and a specialization in computing.

Graduate Study

Admission

Application may be made for admission to any term. You must submit an official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, and three letters of evaluation. You should normally have (1) completed the undergraduate major in geography or its equivalent, (2) received a B.A. degree, (3) attained at least a 3.3 grade-point average in courses taken in your junior and senior years and in the major for admission to the M.A. program and a 3.5 GPA for the Ph.D. (exceptions may be made if your record indicates unusual promise), (4) attained a high GRE score (normally well above 1,100) in the combined verbal and quantitative sections, (5) strong letters evaluating past academic, and possible professional, performance and potential for high achievement in the graduate program. Non-geography majors entering the graduate program are required to make up identified deficiencies. Normally this entails completing from three to six upper division courses during your first year in residence. Under most circumstances these courses are to be distributed evenly between Groups I and II and are in addition to those required for the M.A. or Ph.D. degree.

Admission to the Ph.D. program usually requires an M.A. or M.S. degree. You must provide clear evidence of your ability to conduct substantive research and to articulate your ideas clearly in writing. In addition, a faculty member must be willing to serve as your interim adviser, so it is advisable to establish prior contact with potential advisers before the decision to admit is made. Under rare circumstances, you may proceed directly toward the Ph.D. degree without taking a master's degree.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

Information and graduate brochures may be obtained by writing to the Graduate Adviser, Department of Geography, 1255 Bunche Hall, UCLA, Los Angeles, CA 90024-1524.

Major Fields or Subdisciplines

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, political, cultural, historical, urban, and regional geography. At the M.A. level students emphasize at least one of these specialized areas; the written qualifying examinations for the Ph.D. include three papers in the major fields or subdisciplines. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, you are expected to refine and deepen your research interests further, in consultation with knowledgeable faculty members, within, across, and beyond these organized research and teaching areas.

Master of Arts Degree

Course Requirements

You must complete at least nine courses, seven of which must be at the graduate level, including the required core courses (Geography 298A, 298B, 298C). The core courses must be completed within two years and with a grade of B- or better in each (if you enter with a geography major, you should complete them in your first year). Your program must have the approval of your committee chair and the graduate adviser each term.

Only one 500-series course may be applied toward the minimum course requirement for the master’s degree and toward the minimum graduate course requirement.

Research Tool Requirement

At least one research tool (a foreign language, computer programming, or a series of mathematics or statistics courses) is required. The requirement varies according to each subdisciplinary area or region. At least a B average must be attained in any series of courses taken, and the requirement must be met prior to approval of the thesis proposal by your graduate committee. If a foreign language is selected, the requirement may be met by passing the Educational Testing Service (ETS) examination with a score of 500 or better and translating a minimum of 500 words from an appropriate geographical text in three hours or less.

Thesis Plan

You must present a thesis, based in whole or in part on original investigation. Selection of a thesis topic, creation of a scientific design, and conduct of the investigation proceed initially under the supervision of the informal guidance committee, and later under the official thesis committee. The thesis proposal should include the exact nature of the problem to be researched, an outline of the subject matter, the proposed methods of research, the degree of originality involved, and the anticipated time of completion of the study.

Ph.D. Degree

Course Requirements

You must successfully complete, within two years and with a grade of B- or better in each, the required core courses (Geography 298A, 298B, 298C) if these have not already been taken at the M.A. level. If you enter with a geography degree, you should complete them in your first year. You are also required to take at least three graduate geography courses in addition to your M.A. coursework (excluding 298A, 298B, 298C, 375, 495, and the 500 series) and three upper division or graduate courses in one or two fields (outside of geography) allied to your major research area or subdisciplinary specialization, subject to approval of your committee. The allied field requirement must be met before you can take the oral qualifying examination. Your total program must be approved by the graduate adviser each term.

Research Tool Requirement

At least one research tool (a foreign language, computer programming, statistics/mathematics) is required. The requirement varies according to each subdisciplinary area or region.
and is required in addition to the M.A. tool requirement. Students who receive their M.A. elsewhere need to fulfill the UCLA tool requirement for the M.A. (credit may be given for research tools acquired at other institutions). At least a B average must be attained in any series of courses taken, and the requirement must be met prior to approval of the thesis proposal by your guidance committee. If a foreign language is selected, the requirement may be met by passing the Educational Testing Service (ETS) examination with a score of 500 or better and translating a minimum of 500 words from an appropriate geographical text in three hours or less.

Qualifying Examinations

You are expected to take the written qualifying examination, which consists of five written papers and is administered by your guidance committee, no later than your sixth term in the Ph.D. program (exceptions may be made in case you are entering from disciplines outside geography). The examination may be taken over a period of no more than two weeks. In case of failure, you may make one further attempt, but no sooner than three months nor longer than one year after the first examination. Preparation of your dissertation proposal follows successful completion of the written qualifying examination.

The University Oral Qualifying Examination, conducted by your official doctoral committee, focuses on your dissertation proposal. Once you have successfully completed the oral qualifying examination, you are eligible for advancement to candidacy. In instances of failure, the oral examination may be repeated once.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

The dissertation is the ultimate focus of your Ph.D. program and demonstrates an ability for independent investigation in a selected field of study. The dissertation should be designed and executed in such a way as to make a significant original contribution to geographic research, a contribution that is worthy of publication, in part or as a whole, in a reputable scientific medium.

A final oral defense of the dissertation may be required by the dissertation committee.

Lower Division Courses

Contact the department office to learn of additional offerings, seminar topics, and specific instructors for the term you wish to enroll in courses in geography.

1. Physical Environment. Lecture, three hours; laboratory, two hours. Study of Earth's physical environment. Particular emphasis on the nature and distribution of landforms and climate.

2. Biogeography. Lecture, three hours; laboratory, two hours. Prerequisite: course 1 or equivalent. Study of Earth's biosphere, with particular reference to evolution and distribution of plants, animals, and soils.

4. Introduction to Economic Geography. Lecture, three hours; laboratory, one hour. Introduction to basic concepts used in modern urban and economic geography. Emphasis on giving better understanding of effects of location on human behavior. Discussion and practical exercises on analysis of problems in the Los Angeles urban environment.

5. People and the Earth's Ecosystems. Lecture, three hours; laboratory, two hours. Examination of historical and contemporary roles of man as a major agent of biological change in Earth's ecosystems.

6. Maps and Mapping. Lecture, two hours; laboratory, two hours; independent study, one hour. Introduction to maps and their role in society. Fundamentals of reading and use of both reference and thematic maps. Influence of maps on attitudes toward and images of the geographic environment. Introductory survey of the fields of cartography and remote sensing.

40. Geographical Statistics. Lecture, three hours; laboratory, 90 minutes. Prerequisites or corequisites: courses 1, 4. Satisfies statistics requirement for geography major. Preparation and interpretation of data, descriptive statistics and measures of spatial pattern, introduction to statistical inference and measures of association.

Mr. Clark

88. Lower Division Seminar in Geography. Formerly numbered 19. Staff/student discussion, three hours; reading period, one hour. Prerequisite: course 1 or 2 or 3 or 4 or 5 as befits the theme. Seminar designed to explore various themes and issues pertinent to environment and people. Seminar topics advertised in department during previous term.

Upper Division Courses

Group I: Environment

100. Principles of Geomorphology. Lecture, three hours; laboratory, one hour. Prerequisite: course 1 or Earth and Space Sciences 1 or 100 or consent of instructor. Corequisite: course 100A. Strongly recommended: introductory physics and chemistry. Study of processes that shape the world's landforms, with emphasis on weathering, mass movement, and fluvial processes. Field projects concentrate on the many relations between climate and the world of man. Application of basic energy budget concepts to the microclimates of ecosystems of agriculture, animals, and man. Topics include glaciers, mass balance, glacier motion, erosion processes, glacial and glacial-lacustrine deposition.

101A. Coastal Geomorphology: Field and Laboratory (2 units). Laboratory/Fieldwork, six hours. Corequisites: courses 101 and 101B. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydromorphic processes, sediment transfers, and such features as beaches, estuaries, lagoons, dunes, deltas, wetlands, dunes, seacrafts, and coral reefs, together with coastal zone management.

Mr. Orme

103. Glaciology. Lecture, three hours; reading period, one hour. Prerequisites: course 100, upper division standing. Corequisite: course 103A. Introduction to both modern and ancient glaciers, glacial processes, and deposits. Topics include classification of glaciers, mass balance, glacier motion, erosion processes, glacialfluvioglaciallacustrine deposition.

103A. Glaciology. Lecture and Laboratory (2 units). Laboratory/Fieldwork, six hours. Corequisites: courses 100, 103. Field and laboratory investigations of glacial and glacial-lacustrine processes of erosion, transport, and deposition.

104. Climatology. Lecture, three hours; reading period, one hour. Prerequisites: course 104A. Study of origins, evolution, properties, and utilization of soils, with special emphasis on world's major soil groups.

106A. Field Laboratory (2 units). Laboratory/Fieldwork, six hours. Corequisite: course 106. Study of origins, evolution, properties, and utilization of soils, with special emphasis on world's major soil groups.
109A. Ecology of Vegetation: Laboratory (2 units). Laboratory/training work, six hours. Prerequisites: courses 2 and 40, or consent of instructor. Consists: course 109A. Methods of sampling and a variety of current data analysis techniques involving multivariate statistics and computer use. Workshops, research papers, and two one-day field trips.

110. Population Migration. Lecture, three hours; reading period, one hour; field trips. Prerequisites: courses 2, 40, Biology 5 or equivalent, or consent of instructor. Current concepts of the linkage between migration and population trends and societal environmental preferences begins with analysis of the landscape. Attitudes toward cultural or humanized landscape, methods of landscape analysis, and implications of landscape development for the future through lectures, readings, and field study.

113. Historical Geography of the U.S. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of development of the United States and the future through lectures, readings, and field study.

114. Political Geography. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of the politics of national and international relations.

135. Reading the Cultural Landscape: Perspectives and Processes. Lecture, three hours; reading period, one hour. Prerequisites: upper division standing or consent of instructor. Understanding people and their landscape through geographical evidence.

145. Spatial Organization of Society. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of social and behavioral issues in landscape organization, and tendency to megalopolitanization.

151. Historical Geography of Cities. Lecture, three hours; reading period, one hour. Prerequisites: courses 4 and 40, or consent of instructor. Historical geography of city systems as expression of human decisions. Emphasis on processes affecting city size and growth, internal structure of cities, rural land use, and industrial location.

152. World Cities. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. Study of spatial problems of trade, commercial development, migrations, and communication, and diffusion.

160. Urban Geography. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Analysis of development functions, spatial patterns, and geographic problems of American cities.

171. Historical Geography of the Cities of the U.S. Lecture, three hours; reading period, one hour. Prerequisites: courses 3 and 4, or equivalent, or upper division standing. Survey of diffusion and growth of cities in Western civilization. Development of city systems and evolution of urban internal spatial structure.

182. World Cities. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. Discussion of growth and structure of selected cities as illustrations of processes of urbanization in different countries and societies. Topics include rural to urban migration, cities as centers of power, spatial organization, and tendency to megalopolitanization.

200 / Geography / COLLEGE OF LETTERS AND SCIENCE
Group IV: Regions

180. North America. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Delimitation and analysis of principal geographic regions of the U.S. and Canada.

181. Middle America. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Middle America and the contemporary economic and cultural geography of Mexico and countries of Central America and the West Indies.

182A. Spanish South America. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Spanish South America and the contemporary economic and cultural geography of South America and the contemporary economic and cultural geography of Brazil.

183. Europe. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic conditions and their relation to economic, social, and political problems in Europe.

184. Soviet Union. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic conditions and their relation to economic, social, and political problems in the Soviet Union.

185. South and Southeast Asia. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic conditions and their relation to economic, social, and political condition in the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation.

186. Contemporary China. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of the People's Republic of China. Dynamics that have led to China's major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographical bases.

187. Middle East. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Analysis of economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times.

188. Northern Africa. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Analysis of economic, social, and political geography of the area including Mediterranean Africa, Sahara, Sudanic belt, and eastern Horn. Emphasis on geographical themes and problems during historical and modern times.

189. Middle and Southern Africa. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Regions of Africa south of the Sahara (middle and southern Africa) in terms of physical features, human settlement, economic production, and political patterns.

Special Studies

196. Senior Thesis in Ecosystems Analysis. Hours to be arranged. Prerequisites: courses 129, 160 or 181, senior standing, preparation for individual research and analysis for senior thesis under guidance and assistance of a faculty sponsor.

199A-199BH. Honors in Geography I, II. Hours to be arranged. Prerequisites: 3.25 overall GPA, at least five upper division geography courses with a 3.5 GPA; courses 167, 169, or consent of instructor. Staff/student team of two faculty members who assist student with bibliographic research and field research on a topic of mutual interest to student and the faculty members. Successful completion of course 199A entails preparation of a detailed bibliography and outline (to be evaluated by the two faculty members) for writing of a substantial paper during course 199B. If that work is determined to be of A quality, student is allowed to continue in honors program. If that work is graded B or below, credit is awarded, but student is not permitted to continue in honors program. 199BH. Devoted to writing of substantial paper researched and outlined in course 199A. It is also evaluated by the faculty members. If that work is determined to be of A quality, student graduates with honors in geography. If paper is graded B or below, credit is awarded, but student does not receive honors.

199I. Independent Study for Internships (2 to 4 units). Prerequisites: consent of instructor. Independent study course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by placement for which student is doing internship. May not be applied toward major requirements. P/N grading.

Graduate Courses

Group I: Environment

200. History and Paradigms of Geomorphology. Lecture, two hours; discussion, one hour; reading period, eight hours. Prerequisites: course 100 and two courses from 101, 103, 105, 106, 107. Analysis of geographic theories since the scientific revolution with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and tectonics, thermodynamics and mechanics, quantification, and current paradigms. View of each through modern contemporary milieu.

201. Coastal Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 101. Discussion of sources of coastal form and processes. Focus on structural and physical characteristics of coastlines, and responses observable in the coastal zone. May be repeated for credit.

202. Fluvial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 101, or Civil Eng. 181. Discussion of fluvial processes and sediment movement. May be repeated for credit.

Mr. Trimble
Group II: Human Geography

222. Advanced Cultural Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 133 or equivalent or consent of instructor. Lectures and discussions around specific aspects of cultural landscapes in different geographic environments. Mr. Hale

233. Seminar: Cultural Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 222 or 236 or equivalent or consent of instructor. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit. Mr. Entrikin, Mr. Hale

238. Advanced Historical Geography of the U.S. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 136, consent of instructor. Some major themes in American historical geography.

237. Seminar: Historical Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 236, consent of instructor. Theory and practice of historical geography in North America and Europe. May be repeated for credit.

240. Advanced Political Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 140 or equivalent or consent of instructor. Focus on principles of political geography and German geopolitics. Selected regions used as specific examples of differing techniques of study in geopolitics. Mr. Hale

241. Seminar: Political Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 240 or equivalent, consent of instructor. Related research projects growing out of course 240. May be repeated for credit.

250. Urban Systems. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 145 and 146, or consent of instructor. General study of urban structure and social organization of cities.

249. Seminar: Economic Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 245 or equivalent, consent of instructor. Related research projects growing out of course 248. May be repeated for credit.

251. Seminar: Urban Geography. Discussion, three hours; reading period, two hours. Prerequisites: courses 145 and 146, or consent of instructor. Lectures and discussions around specific aspects of urban geography. Mr. Clark

252. Location and Social Structure within the City. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 145 and 146, or consent of instructor. Study of links between urban social and urban spatial structure, emphasizing urban residential land use, social areas of the city, and accessibility and urban form. Mr. Scott

254. Migration and Residential Mobility. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: consent of instructor. Description and modeling of national, regional, and intra-urban migration. Mr. Clark

Group III: Procedures

260. Advanced Field and Laboratory Analysis in Geomorphology. Laboratory/fieldwork, 10 hours. Prerequisites: graduate standing, two courses from 202, 203, 204. Examination of advanced field and laboratory procedures used in contemporary geomorphological research, with emphasis on scientific design, instrumentation, and data evaluation. Mr. Orme, Mr. Trimble

261. Advanced Field Analysis: Cultural Geography (8 units). Fieldwork, once a week from 8 to 5. Prerequisites: one or more courses from 232, 238, 250, 251. Field methods and analysis applied to the cultural landscape, especially in Southern California, with particular reference to settlement, agriculture, and environment.

262. Advanced Field Analysis: Biogeography (8 units). Fieldwork, 10 hours. Prerequisite: consent of instructor. Observation, measurement, and analysis of biogeographical phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

265. Geographical Bibliography. Lecture, one hour; discussion, two hours; reading period, one hour. Prerequisite: consent of instructor. Survey of the literature of geography, with special reference to periodicals. Intended for beginning graduate students.

277. Advanced Cartography. Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Advanced work in theory and practical application of modern cartographic principles. Special emphasis on terrain representation, quantitative and computer-aided cartography, GIS, and applications to geographical research.

278. Geographic Information Systems. Lecture, two hours; laboratory, two hours. Prerequisites: courses 167, 168, and 171, or consent of instructor. Recommended: Earth and Space Sciences 150. Encoding, structure, and application of spatial data in digital GIS format using geographic information systems. Emphasis on geographic data (including remote sensing imagery and digital terrain models), raster and vector data structures, and spatial analysis/spatial modeling using GIS.

279. Remote Sensing of Environment. Laboratory, three hours; independent study, two hours. Prerequisites: courses 167 or equivalent or consent of instructor. Study of aerial photographs and remote sensor images. Emphasis on practical research. Particular attention to analysis of landscapes and interpretation of interrelationships of individual features in their physical and cultural context. Mr. Thrower

M270A-M270B-M270C. Seminars in Climate Dynamics (2 to 4 units each). Same as Atmospheric and Space Sciences M272A-M272B-M272C and Earth and Space Sciences M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. Archaeological, geochemical, micropalaeontological, and stratigraphic evidence for climate change throughout the geological past. Rhythm and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modelling, accumulation, and prediction of modern climate change. Study of monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

Mr. Berger, Mr. Ghi!, Mr. Schubert

M272. Spatial Statistics. (Same as Architecture and Urban Planning M272.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: consent of instructor. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

273. Seminar: Model Building for Spatial Analysis. Discussion, three hours. Prerequisite: consent of instructor. Discussions of philosophy and methodology of model building, with emphasis on problems unique to modeling spatial structure. Individual research topics may be repeated for credit.
Scope and Objectives

The Department of Germanic Languages offers an extraordinary scope of Germanic languages and literatures, including philology, linguistics, and folklore. This broad range of studies offers training in specialized fields, in addition to providing strong background in the literary and cultural traditions. The courses of instruction are designed to enable students to become effective teachers and productive scholars in either German or Germanic languages and literatures, including Germanic folklore, Hungarian, and Finnish.

Undergraduate majors in both German and Scandinavian languages lead to Bachelor of Arts degrees. The graduate program offers Master of Arts degrees in German and Scandinavian and a Ph.D. in Germanic Languages, with a variety of specialized fields available. The department also offers courses in Afrikaans, Dutch, Hungarian, Old Norse studies, and Yiddish, and a program in Finno-Ugric languages and literatures, which are open to all students.

Bachelor of Arts in German

The undergraduate program in German is comprised of lower division courses in the German language and upper division courses in German language, linguistics, literature, civilization, and folklore. While the nucleus of the undergraduate program consists of training in language and literature, students majoring in German will be prepared for a wide range of graduate studies and activities in related fields.

Preparation for the Major

Required: German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed two semesters of college German should enroll in course 4. Placement examinations may be given in situations where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

The Major

Required: Fifteen upper division German courses as follows: Group I — German 100A or 100B or 100C, 108A, 108B, 129; Group II — four courses from 100A or 100B or 100C (whichever has not been taken to satisfy the Group I requirement), 101A, 101B, 101C, 121A, 128, 134; Group III — three courses from 103, 105, 106, 107, 137; Group IV — four courses from 121B or 121C, 122, 123, 124, 126, 127, 130, 132. Native speakers of German should consult the undergraduate adviser before enrolling in course 108A, 108B, or 128. German majors, especially those who wish to pursue graduate studies in German, are encouraged to enroll in courses in German history and philosophy in those respective departments and are strongly urged to acquire reading knowledge of French.
Honors Program
To qualify for graduation with departmental honors, you must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 195 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

Instructional Credential in German
Students desiring the general secondary instructional credential in German should consult the Graduate School of Education (201 Moore Hall) and the Department of Germanic Languages.

Graduate Study
The Department of Germanic Languages offers the advanced degree candidate a scope and variety of studies unique among departments of German in the U.S. The department provides programs of study leading to the M.A. in German, the M.A. in Scandinavian, and the Ph.D. in Germanic Languages, with specialized fields in all areas of German literature, Germanic philology and linguistics, Germanic folklore, Scandinavian literature and philology, Netherlandic languages and literatures, and Yiddish studies. In addition, the department offers a program in Finno-Ugric languages and literatures. This wide range of studies within the Germanic languages and cultures enables the Ph.D. candidate to acquire competence in several specialized fields.

For brochures and other information, contact the Department of Germanic Languages, 302 Royce Hall, UCLA, Los Angeles, CA 90024-1539.

Master of Arts in German
Admission
A bachelor's degree in German with a minimum grade-point average of 3.0 from an accredited U.S. institution or the equivalent is required. Candidates deficient in their undergraduate preparation may be admitted but are required to take remedial courses, as recommended by the graduate adviser. A placement examination in German language or literature may be required. Three letters of recommendation are also required.

Major Fields or Subdisciplines
There are two M.A. plans that differ with respect to the course requirements and the comprehensive examinations. Plan A is for students who plan to terminate their studies with the M.A. and an instructional credential. Plan B is for students whose main interests are literary and linguistic rather than pedagogical and for students who plan to proceed toward the Ph.D.

Foreign Language Requirement
Before advancement to candidacy for the M.A., you must pass the Graduate School Foreign Language Test reading examination in French with a score of 500 or better. The test is administered through UCLA Extension at the beginning of each term, including the summer.

Course Requirements
Plan A requires a minimum of nine upper division and graduate courses, of which at least five courses must be graduate level (200 or 500 series). German 128, 129 (or equivalent), and 370 are required. Undergraduate credit for these courses (or equivalent) is applicable in satisfaction of these requirements.
Plan B requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). One seminar must be included.

Comprehensive Examination Plan
Examinations are offered each term, beginning with the written part during the fifth week of each term. Under exceptional circumstances the chair of the department will receive petitions for M.A. examinations during the summer recess.

One examination committee is appointed for each term. The members of the committee administer the written and oral examinations. The M.A. examination consists of two written examinations of three hours each, followed by a one-hour oral examination.
Part 1 of the written examinations covers various fields. In the case of Plan A, the origin and development of the standard German language and contemporary standards of the German language are included. In the case of Plan B, bibliography, Middle High German, the history of the German language, and German literature before 1600 are included. Part 2 of the written examinations covers major works and authors of German literature from 1600 to the present and concepts of literary criticism. After you have taken the written examinations, the M.A. committee decides whether you may proceed to the oral examination. If you fail the oral examination, the M.A. committee decides whether you must repeat the entire examination or only the oral portion.

If you apply for an M.A. under Plan B (to proceed toward the Ph.D.) and are awarded a terminal M.A., you may repeat the examinations if you choose not to have the M.A. degree officially awarded before the reexamination.

Ph.D. in Germanic Languages
Admission
An M.A. degree in German from an accredited U.S. institution or equivalent (e.g., Staatsexamen in German) is required. In case of significant deficiencies in prior training, the graduate advisers make appropriate study or course recommendations. All deficiencies must be removed prior to application for admission to candidacy for the qualifying examinations. Applicants without an M.A. in German (e.g., with an M.A. in Comparative Literature or in Linguistics) are required to pass the written part of the M.A. comprehensive examination before beginning doctoral work in the department. Applicants with an M.A. in Scandinavian who wish to major in Scandinavian literature and philology must take a formal minor in German. Three letters of recommendation are also required.

Major and Minor Fields of Study
The department offers two Ph.D. programs. The first program requires a major and a minor field in order to give students the broadest possible education and preparation for professional flexibility in research and teaching. The second program does not require a minor and is designed to enable students to complete their studies toward the Ph.D. more expeditiously.

If you select the first program, you must, as soon as possible after admission, declare your major and minor fields. The field in which you plan to present a dissertation is your major field and is selected from the four fields in which the degree is offered: (1) German literature, (2) Germanic philology and linguistics, (3) Scandinavian literature and philology, or (4) Germanic folklore.
If you select German literature as your major field, you must choose one of the following: (1) German literature before 1700 or (2) German literature from 1700 to the present.
The minor field may be selected from the following options: (1) German literature before 1600; (2) German literature from 1600 through Romanticism; (3) German literature from Romanticism to the present; (4) German philology and linguistics; (5) modern Scandinavian literature; (6) Germanic folklore; (7) Yiddish; (8) Dutch and Afrikaans; (9) Old Norse studies. If your major field is German literature, you may not choose options 1 through 3. As a special option, you may select an extra-departmental minor which must be individually endorsed by a majority of the departmental faculty members on the basis of your dissertation plans.
The second Ph.D. program allows specialization in either of the following two areas: (1) modern German literature (1600 to the present) or (2) Germanics — older German literature (to 1600), Germanic philology and linguistics (including Old Norse and Dutch linguistics), Germanic folklore. If you select the latter area, you are expected to choose two of these three fields, with special emphasis on one.

**Foreign Language Requirement**

In addition to French, a second language examination is required either in a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (substitution of another language may be approved by petition).

**Course Requirements**

There are no course requirements per se for the Ph.D. However, the following rules apply: (1) you must have successfully completed at least three seminars in residence before taking the qualifying examinations for the Ph.D.; (2) specific course requirements may be assigned to new students by the graduate advisor.

**Qualifying Examinations**

The written examinations consist of three parts for the first Ph.D. program and two parts for the second program: (1) first half of major field (three hours); (2) second half of major field (three hours); (3) minor field (three hours).

You may take the written examinations in the major or minor field any time after admission to the doctoral program and fulfillment of all prerequisite requirements. The major field examinations are given within a period of seven school days and completed no later than four weeks before instruction ends in a given term.

Written examinations may be repeated in case of failure. Repetition of the major examination includes both parts of the major field. When you have completed the written examinations successfully, the chair of the guidance committee schedules the University Oral Qualifying Examination to be administered by the doctoral committee as soon as possible after completion of the written examinations.

Advancement to candidacy takes place when you have (1) passed the graduate reading examination in French, (2) passed a departmental reading examination in either a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (or an approved substitute language), (3) successfully completed three seminars, and (4) passed the qualifying examinations. When you pass the oral examination, you advance to candidacy and proceed to the writing of the dissertation.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**

After your completed dissertation is accepted by the certifying members of the doctoral committee, you may be required to defend the dissertation in a final oral examination.

**German Lower Division Courses**

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

1. **Elementary German.** Lecture, five hours; laboratory, one hour. Mr. Voge

2. **Elementary German.** Lecture, five hours; laboratory, one hour. Prerequisite: course 1 or two years of high school German. Mr. Voge

3. **Elementary German.** Lecture, five hours; laboratory, one hour. Prerequisite: course 2 or two years of high school German. Mr. Voge

4. **Intermediate German.** Lecture, five hours. Prerequisite: course 3 or three years of high school German. Mr. Voge

5. **Intermediate German.** Prerequisite: course 4 or four years of high school German. Mr. Voge

6. **Intermediate German.** Prerequisite: course 5 or equivalent. Mr. Voge

7. **German Conversation (2 units).** Prerequisite: course 1 or one year of high school German. Use of German language teaching films, students have opportunity to practice spoken German in small groups. Mr. Voge

8. **Intermediate Conversation (2 units).** Prerequisite: course 3 or three years of high school German. Students have opportunity to practice spoken German in small groups. Mr. Voge

**Upper Division Courses**

Prerequisite for all upper division courses (except 100A, 100B, 100C, 112A through 112D, 121A, 121B, 121C) is course 6 or equivalent or consent of instructor.

Courses in the German 119 literature series may not be applied toward completion of the major in German.

**Courses Open to Majors and Nonmajors; No Credit to Graduate Students in German**

100A. German Civilization and Culture before 1700. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from earliest times to 1700. Study of German culture as presented in its literature, art, music, and architecture.

100B. Modern German Civilization and Culture from 1700 to 1919. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from 1700 to 1919. Study of German culture as presented in its literature, art, music, and architecture.

100C. German Civilization and Culture in the 20th Century. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from 1919 to the present, emphasizing developments in literature, arts, and architecture.

Mr. Bauml, Mr. Wagener

101A. Introduction to German Poetry. Close analysis of representative examples of German lyric poetry from early as well as modern literary periods, including systematic consideration of poetic conventions and forms, diction, tone, imagery, symbolization, and metrics. Course should be taken beginning of literary studies.

Mr. Bauml, Ms. Komar, Mr. Wagener

101B. Introduction to German Drama. Analysis of selected excerpts of drama (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, etc.), including systematic introduction to dramatic forms, theories, and techniques. Texts selected from modern literature as well as from older periods. Course should be taken at beginning of literary studies.

Mr. Bauml, Mr. Nehring

101C. Introduction to German Narrative Prose. Analysis of significant examples of narrative prose (e.g., short story, novella, novel, fairy tale, etc.), including systematic introduction to narrative forms, techniques, styles. Texts selected from modern literature as well as from older periods. Course should be taken at beginning of literary studies.

Ms. Komar, Mr. Nehring

102. Business German. Prerequisites: courses 1, 2, 3, 4, 5, 6. German for business studies: exercises in German business correspondence, terminology of export and import, readings and translations in the field of business German.

Ms. Landa

103. Introduction to German Enlightenment, Sturm und Drang, and Classicism. Reading and discussion of representative works by Lessing, Goethe, and Schiller; their historical and social background, their relationship to music (Bach, Mozart) and philosophy (Leibniz, Kant), as well as their place in the history of ideas.

Mr. Bauml

105. Introduction to German Literature from Romanticism to Realism. Lecture, three hours. Reading and analysis of selected works from Romanticism to realism.

Ms. Komar, Mr. Nehring

88. Lower Division Seminar. (Formerly numbered 95.) Discussion, three hours. Course of variable content limited to topics of current interest and offered whenever a staff member is available.

**Foreign Language Requirement**

In addition to French, a second language examination is required either in a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (substitution of another language may be approved by petition).

**Course Requirements**

There are no course requirements per se for the Ph.D. However, the following rules apply: (1) you must have successfully completed at least three seminars in residence before taking the qualifying examinations for the Ph.D.; (2) specific course requirements may be assigned to new students by the graduate advisor.

**Qualifying Examinations**

The written examinations consist of three parts for the first Ph.D. program and two parts for the second program: (1) first half of major field (three hours); (2) second half of major field (three hours); (3) minor field (three hours).

You may take the written examinations in the major or minor field any time after admission to the doctoral program and fulfillment of all prerequisite requirements. The major field examinations are given within a period of seven school days and completed no later than four weeks before instruction ends in a given term.

Written examinations may be repeated in case of failure. Repetition of the major examination includes both parts of the major field. When you have completed the written examinations successfully, the chair of the guidance committee schedules the University Oral Qualifying Examination to be administered by the doctoral committee as soon as possible after completion of the written examinations.

Advancement to candidacy takes place when you have (1) passed the graduate reading examination in French, (2) passed a departmental reading examination in either a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (or an approved substitute language), (3) successfully completed three seminars, and (4) passed the qualifying examinations. When you pass the oral examination, you advance to candidacy and proceed to the writing of the dissertation.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.
Courses Open for Credit to Majors or Graduate Students in German

119A. German Literature in the Age of Chivalry, in English Translation. Lecture, three hours. Study and analysis of literary monuments in English translation in their social and cultural settings, including chieftainship and the courtly love to medieval epics. 211A. Contemporary Novel. Study of selected nov-els in the period from 1945 to the present. Works by authors from West and East Germany, Austria, Sweden, Switzerland, such as Böll, Grass, Handke, Frisch, and Christa Wolf, analyzed and placed in context of literary, cultural, and political trends. Ms. Mundt

211B. Contemporary Lyrics and Drama. Study of selected poets and playwrights of the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Düren-matt, Frisch, Handke, Celan, and Brecht, analyzed and placed in context of literary, cultural, and political trends. Ms. Mundt

217. History of the German Language. Historical survey of development of the standard literary Ger-manic language, such as English, Dutch, and Germanic dialects and their classification; problems in evolution of nominal and verbal morphology of the various dia-lects; problems in phonological evolution of the var-iouls dialects. Mr. Stevens, Mr. Wilbur

230. Survey of Germanic Philology. Systematic survey of major problems in the field of Germanics; origins and historical diffusion of Germanic dialects and their classification; problems in evolution of nominal and verbal morphology of the various dia-lects; problems in phonological evolution of the var-iouls dialects. Mr. Stevens, Mr. Wilbur

231. Gothic. Systematic study of phonology and grammar of the Gothic language, with readings in Wulflaf’s translation of the Bible and introduction to history of the Goths and their place in the develop-ment of modern Europe. Mr. Stevens, Mr. Wilbur

232. Old High German. Introduction to earliest phases of Germanic literature, with extensive readings in major documents of that period (750-1050). Emphasis on grammatical interpretation of these docu-ments and identification of dialects used in their com-positions. Mr. Wilbur

233. Old Saxon. Introduction to study of earliest doc-uments in Old Low German. Readings in the Heathenand study of the Old Saxon Genesis. Mr. Wilbur

240A. Theories, Methods, and History of Germanic Folklore. History of Germanic folklore studied in context of European cultural history. Evolution of theo-ries and methods of the discipline as developed by Herder, the Grimms, Bolte, Maier, Naumann, Bauinger, and others. Mr. Ward

240B. Folk Song and Ballad. Analysis of poetic and musical aspects of Germanic songs and poetry. Study of thematic and formalistic evolution of text and music, combined with introduction to theories and methods of analysis of folk music and function of folk song in dramatic contexts. Mr. Wright

240C. Oral Prose Genres. Study of thematic and formal characteristics of legends, folktales, jests, proverbs, and riddles. Role of popular narrative in its sociocultural context in German history and survey of methods of analysis of narratives, texts, and contexts. Ms. Komar, Mr. Nehring

245B. Germanic Antiquities. Survey of prehistory and early history of Germanic civilization from the Bronze Age to the end of the migrations on basis of archaeological, historic, and philological evidence. Use of这种方法 to study of Germanic languages, the Germanic mythology, and myth to interpret evidence. Mr. Ward

251. Seminar in Syntax and Phonology of Ger-man. Topics selected from the field of contemporary Germanic syntax and phonology according to needs and preparation of students enrolled (e.g., Dialekt-geographie, generative phonology, generative syn-tax, Valenztheorie, Texttheorie). Mr. Stevens, Mr. Wilbur

252. Seminar in Historical and Comparative Ger-manic Linguistics. Topics selected from the field of historical Germanic phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic problem and classification of the Ger-manic languages, development of Germanic verbal and nominal morphology, proto-Germanic syntax). Mr. Stevens, Mr. Wilbur

253. Seminar in Medieval Literature. Selected top-ics in medieval literature, with emphasis on problems in literary analysis and applicability of various methods of historical analysis to medieval texts. Mr. Bäuml, Mr. Ward

254. Seminar in Renaissance and Reformation. Seminar on selected literary or philological problems, such as a particular genre, author, or theme. Textual analysis supplemented by critical review of research and application of methods of literary analysis pertinent to literature of this age. Mr. Wagener

255. Seminar in Baroque Literature. Seminar on selected problems of Baroque literature, such as a particular genre, author, or theme. Textual analysis supplemented by critical review of research and application of methods of literary analysis pertinent to literature of this age. Mr. Wagener

256. Seminar in Enlightenment and Sturm und Drang. Selected topics in 18th-century literature, such as utopian literature, love and money as motives, family structure and family life, image of women and women’s literature, Jacobin literature, seduction and betrayal as motifs, nobility and middle class in 18th-centruy literature. Textual analysis and review of recent research. Mr. Bahr

257. Seminar in the Age of Goethe. Selected topics in German literature between 1775 and 1832, such as Schiller’s theoretical writings, Goethe’s Faust II, Goethe’s Kinderzimmerspiele, and Goethe’s Faust II and Hegel’s Phänomenologie des Geistes, the French Revolution and German classicism. Textual analysis and review of current research. Mr. Bahr

258. Seminar in Romanticism. Discussion of a spe-cific author or topic from the Romantic period, possi-bly in close connection with course 208. Critical re-view of secondary works. Ms. Komar, Mr. Nehring

259. Seminar in 19th-Century Literature. Discuss-ion of a specific author or topic of 19th-century litera-ture; possible in close connection with courses 209A, 209B, or 209C. Critical review of secondary works. Ms. Komar, Mr. Nehring

260. Seminar in the Modern Period. Seminar on a selected genre, author, or theme of 20th-century Ger-manic literature prior to 1945. Mr. Bahr, Mr. Nehring, Mr. Wagener

261. Seminar in Contemporary Literature. Study of selected works, a specific author, genre, period, or topic from 1945 to the present. Texts analyzed and placed in context of literary, cultural, and political trends. Ms. Mundt

262. Seminar in Germanic Folklore. Detailed re-search on individual aspects of Germanic folklore. Topic selected generally is from course in the German 240B. May be repeated as a seminar with the approval of the instructor. Mr. Ward

263. Seminar in Theories of Literature. Specializa-tion in literary theories, such as Rezeptionsästhetik, Neo-Marxist Criticism, New Criticism, psychoanalytic criticism, anthropology of literature, structuralism, semio-logy, and hermeneutics. Mr. Bahr, Mr. Bäuml

370. Teaching German in Secondary Schools. Lecture, three hours; discussion periods. Prerequi-site: graduate standing or consent of instructor. Re-quired of all candidates for general secondary in-struclional credential in German. Mr. Voge

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching appren-ticeship under active guidance and supervision of a regular faculty member responsible for curricu-lum and instruction at the University. May be repeat-ed for credit. S/U grading. Mr. Voge

495A. Preparation for College Teaching of Ger-man. Study of problems and methods in teaching German at the college level, with emphasis on teaching and testing the listening, speaking, reading, and writing skills. May not be applied toward M.A. course requirements. S/U grading. Mr. Voge (F)
Graduate Courses

956. Directed Individual Study or Research in Afrikaans. To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Mr. Kirsner

957. Preparation for Ph.D. Qualifying Examinations. To be arranged with instructor (see department for I.D. number). S/U grading. Mr. Kirsner

Dutch

Upper Division Courses

100. Modern Dutch Culture and Society. Lecture, three hours. Lectures, discussions, and readings in English. Survey of art, architecture, literature, film, Dutch government (including "Polarization" — verzuiling), the two World Wars, housing policy, mass media, and rise of a multiracial society. Mr. Kirsner

103A. Elementary Dutch. (Formerly numbered Dutch and Afrikaans 103A.) Lecture/language laboratory. Prerequisite: course 101A or equivalent. Grammar and reading exercises, with emphasis on the standard language of the Netherlands and northern (Flemish) Belgium such as Boon, Claas, Couperus, Hermans, Mulisch, Mutatuli, and Reve and selected poets such as Campert, Gazele, Gorter, Kloos, Lucebert, Nijhoff, Van Otstijn, and Vromon. Mr. Kirsner

103B. Elementary Dutch. (Formerly numbered Dutch and Afrikaans 103B.) Lecture/language laboratory. Prerequisite: course 103A or equivalent. Mr. Kirsner

103C. Intermediate Dutch. (Formerly numbered Dutch and Afrikaans 103C.) Lecture/language laboratory. Prerequisite: course 103B or equivalent. Mr. Kirsner

113. Modern Dutch and Flemish Literature in Translation. Lecture, three hours. Readings and analysis of works by selected authors of the Netherlands and northern (Flemish) Belgium such as Boon, Claas, Couperus, Hermans, Mulisch, Mutatuli, and Reve and selected poets such as Campert, Gazele, Gorter, Kloos, Lucebert, Nijhoff, Van Otstijn, and Vromon. Mr. Kirsner

120. Introduction to Dutch Studies. (Formerly numbered Dutch and Afrikaans 120.) Prerequisite: consent of instructor. Brief review of Dutch grammar. Reading and discussion of selections from contemporary Dutch literature, contemporary Dutch literary criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and appreciation of the scope of 20th-century Neerlandistiek. Mr. Kirsner

121. Introduction to Modern Dutch Literature. (Formerly numbered Dutch and Afrikaans 121.) Discussion, three hours. Prerequisite: course 103B or 120 or equivalent. Mr. Kirsner

129. Special Studies in Dutch (2 to 4 units). (Formerly numbered Dutch and Afrikaans 129.) Prerequisite: consent of instructor. Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Mr. Kirsner

Hungarian

Upper Division Courses

101A. Elementary Hungarian. Introduction to gram- mar and reading exercises, with emphasis on the spoken language. Ms. Birnbaum

101B. Elementary Hungarian. Prerequisite: course 101A or equivalent. Grammatical exercises, conversation, and reading of texts. Ms. Birnbaum

101C. Elementary Hungarian. Prerequisite: course 101B or equivalent. Conversation and readings in literary texts. Ms. Birnbaum

101E. Advanced Hungarian. Prerequisites: courses 101A through 101D or equivalent. Conversation, reading, and discussion of literary texts. Ms. Birnbaum

101F. Advanced Hungarian. Prerequisites: courses 101A through 101E or equivalent. Selections of Hungarian prose and poetry read in the original. Ms. Birnbaum

120C. Readings in Hungarian Literature. Prerequisites: reading knowledge of Hungarian, course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Ms. Birnbaum

1212-121B. Survey of Hungarian Literature in Translation. Intended for students in general and comparative literature, as well as students interested in Finno-Ugric studies. Survey of main trends and institutions from earliest times to the present. The study of Hungarian literature as represented in its arts (literature, fine arts, music). Ms. Birnbaum

M125. Hungarian Folklore and Mythology. (Same as Folklore M128.) General course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research. Ms. Birnbaum

M126. Folklore and Mythology of the Ugric Peoples. (Same as Folklore M129.) Survey of traditions of the smaller Ugric nationalities (Voguls, Ostyaks, etc.). Ms. Birnbaum

M199. Special Studies in Hungarian (2 to 4 units). Prerequisite: consent of instructor. Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Ms. Birnbaum

Graduate Courses

234. Structure of Modern Standard Dutch. (Formerly numbered Dutch and Afrikaans 234.) Detailed examination, from contrasting theoretical viewpoints, of central problems in Dutch phonology, grammar, and semantics, with attention to related phenomena in German, English, and Afrikaans. Equivalent to Linguistics 225. Mr. Kirsner

256. Directed Individual Study or Research in Dutch. (Formerly numbered Dutch and Afrikaans 256.) To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Mr. Kirsner

597. Preparation for Ph.D. Qualifying Examinations. (Formerly numbered Dutch and Afrikaans 597.) To be arranged with faculty member who will direct the study (see department for I.D. number). S/U grading. Mr. Kirsner
Old Norse Studies

Lower Division Course

104. The Heroic Journey in Northern Myth, Legend, and Epic. Comparison of the journeys of heroes. Readings in mythology, legend, folklore, and epic, including Niblungenlied, Volsunga saga, Eddas, and Beowulf. Cultural and historic backgrounds to the texts. All readings in English. Mr. Byock

Upper Division Courses

139. The Saga. Lecture, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and culture that produced this literature. Mr. Byock

140. Viking Civilization and Literature. Readings in history, society, and culture of early Scandinavians. All texts in English: Old Norse sagas, Eddas, and early ballad literature. Mr. Byock

C145. Old Norse Literature and Society. Lecture, three hours. Readings in primary texts in conjunction with the critical literature. Specific issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C223. Mr. Byock

151. Elementary Old Norse. Introduction to grammar and pronunciation of Old Norse. Selected readings from the sagas and Prose Edda. Mr. Byock

152. Intermediate Old Norse. Prerequisite: course 151 or equivalent. Continued grammar, pronunciation, and readings from the Eddas and sagas of Icelanders, Norwegian kings, and legendary heroes. Mr. Byock

153. Modern Icelandic. Prerequisite: course 152 or equivalent. Grammar, readings, and conversation. Mr. Byock

199. Special Studies in Old Norse (2 or 4 units). Prerequisite: consent of instructor. Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Ms. Hadda

Graduate Courses

221. Advanced Old Norse Prose. Prerequisite: course 152 or equivalent. Readings of major saga texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandinavian history. Mr. Byock

222. Advanced Old Norse Poetry. Prerequisite: course 152 or equivalent. Readings of mythological and heroic poems from Prose Edda. Secondary sources used where appropriate. Mr. Byock

C223. Old Norse Literature and Society. Lecture, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Mr. Byock

245A. Germanic and Scandinavian Mythology. Lecture, three hours. Study of Northern myth and religion through close reading of Eddic texts and secondary sources. Ms. Hadda

596. Directed Individual Study or Research in Yiddish. To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Ms. Hadda

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for I.D. number). S/U grading. Mr. Byock

Yiddish

Upper Division Courses

101A. Elementary Yiddish. (Formerly numbered 1.) Introduction to grammar; instruction in listening, speaking, reading, and writing skills. Ms. Hadda

101B. Elementary Yiddish. (Formerly numbered 2.) Prerequisite: course 101A or equivalent. Ms. Hadda

101C. Elementary Yiddish. (Formerly numbered 3.) Prerequisite: course 101B or equivalent. Ms. Hadda

104. Advanced Yiddish. Lecture, three hours. Prerequisite: course 101C or equivalent. Grammatical exercises, reading and linguistic analysis of texts, conversation. Ms. Hadda

121A. 20th-Century Yiddish Poetry in English Translation. Prerequisite upper division standing or consent of instructor. Readings in 20th-century Yiddish poetry and drama. Ms. Hadda

121B. 20th-Century Yiddish Prose and Drama in English Translation. Prerequisite upper division standing or consent of instructor. Readings in 20th-century Yiddish pro Flynn.

121C. Special Topics in Yiddish Literature in English Translation. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. Ms. Hadda

131A. Modern Yiddish Poetry. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish poetry. Ms. Hadda

131B. Modern Yiddish Prose and Drama. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish prose and drama. Ms. Hadda

131C. Special Topics in Yiddish Literature. Prerequisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. Ms. Hadda

139. The Saga. Lecture, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and culture that produced this literature. Ms. Hadda

Yiddish

Graduate Courses

596. Directed Individual Study or Research in Yiddish. To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Ms. Hadda

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for I.D. number). S/U grading. Ms. Hadda

Scope and Objectives

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between the West and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden, as well as a strong set of course offerings in Finnish language, literature, and folklore. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

Bachelor of Arts in Scandinavian Languages

Preparation for the Major

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, 25, and 30, or equivalent.

The Major

Required: Twelve upper division courses in Scandinavian, including 105 and 106 or 110 for two terms and 141, 142, 143. As an option, three upper division courses in a related field may be taken. These three courses must be approved in advance by the undergraduate advisor. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

Master of Arts in Scandinavian

Admission

In addition to the University minimum requirements, prospective students in the M.A. program in Scandinavian must have an undergraduate major in Scandinavian languages or equivalent. If you are deficient in the undergraduate major, you must complete it by taking the appropriate courses as recommended by the graduate advisor. A placement examination in the Scandinavian languages, as well as in German, may be required.

Scandinavian Section

332 Royce Hall, (213) 825-2432

Professors

James R. Massengale, Ph.D., Vice Chair
Mary Kay Norseng, Ph.D.
Ross P. Shideler, Ph.D. (Distinguished Teaching Award)
Kenneth G. Chapman, Ph.D., Emeritus

Lecturer

Jules L. Zentner, Ph.D.
Three letters of recommendation are required by the Graduate Division.

For a brochure describing the program and requirements, write to the Scandinavian Section, 332 Royce Hall, UCLA, Los Angeles, CA 90024-1537.

Major Fields or Subdisciplines

There are no specifically designated major fields or subdisciplines in the M.A. program, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

Foreign Language Requirement

Reading knowledge of French or German is required (in addition, of course, to knowledge of the Scandinavian languages). You must pass the Graduate School Foreign Language Test reading examination in French or German with a score of 500 or better or must pass at least one upper division course in French or German.

Course Requirements

A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandinavian languages, at least five of which must be graduate courses. Three upper division or graduate-level courses may be taken in a related field of study to be determined in consultation with the graduate adviser; at least one of these must be at the graduate level. Comparative Literature 200 or English 201 or an equivalent course in methodology is required as one of the 12 courses.

Three 596 courses (12 units) may be applied toward the total course requirement, but only one (four units) may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

A comprehensive examination, based on the required coursework and a reading list, is required of all candidates for the M.A. degree. The examination is given whenever you have completed the course requirements and, in consultation with the graduate adviser, your general and reading list preparation is deemed adequate.

The comprehensive examination is both written and oral; students who fail may be reexamined once without petitioning.

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the "Ph.D. in Germanic Languages."

199A-199ZZ. Special Studies in Scandinavian (2 or 4 units). Prerequisites: senior or graduate standing, consent of instructor. To be arranged with faculty member who will direct the study (course section to be determined by two-letter code with initials of sponsoring instructor — see section for I.D. number). Independent study of works of graduate students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite.

Graduate Courses

C251. Henrik Ibsen. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of Henrik Ibsen. May be concurrently scheduled with course C144. Ms. Norseng

C252. August Strindberg. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of August Strindberg. May be concurrently scheduled with course C145. Mr. Massengale, Mr. Shideler

C253. Seren Kierkegaard. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of Seren Kierkegaard. May be concurrently scheduled with course C146. Mr. Massengale

C254. Knut Hamsun. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of Knut Hamsun. May be concurrently scheduled with course C147. Ms. Norseng

C263. Seminar in Scandinavian Studies. Prerequisites: graduate standing or consent of instructor, knowledge of a Scandinavian language. Intensive study of selected aspects of Scandinavian society based on readings in contemporary literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate advisor) with topic change. May be concurrently scheduled with course C263. Mr. Massengale, Ms. Norseng, Mr. Shideler

181. Contemporary Swedish Literature. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Reading and analysis of selected texts by major 20th-century Swedish authors. Mr. Shideler

C182. Theory of the Scandinavian Novel. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Emphasis on works of such writers as Ibsen, Strindberg, August Strindberg, Ibsen, Strindberg, etc. May be repeated for credit with consent of instructor. Three hours. May be concurrently scheduled with course C284. Mr. Massengale, Ms. Norseng, Mr. Shideler

193. Scandinavian Ballads. Lecture, three hours. Prerequisite: reading knowledge of a Scandinavian language. Survey of Danish, Norwegian, and Swedish ballads, with attention to their historical development, poetic content, and musical/poetic structure. Mr. Massengale

194. Hans Christian Andersen. Lecture, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Conducted in English. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and writer of tales, including consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. N/P or letter grading. Mr. Massengale

C185. Seminar in Scandinavian Literature. Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C265. Mr. Massengale, Ms. Norseng, Mr. Shideler

599. Research for and Preparation of Ph.D. Dissertation. To be arranged with faculty member who will direct the study or research. May be repeated once. May not be applied toward M.A. minimum course requirements. S/U grading.

Lecturers
Ludwig Lauerhass, Ph.D.
Albert Hoxie, M.A., Emeritus (Distinguished Teaching Award)

Adjunct Associate Professor
S. Scott Bartsch, Ph.D. (Distinguished Teaching Award)

Scope and Objectives
History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, history is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers—law, teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees. There is also a joint master's program with the Graduate School of Library and Information Science. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

Bachelor of Arts Degree

Preparation for the Major and the Major
The History Department's undergraduate program consists of 16 courses in history (six lower division — the "Preparation for the Major"); 10 upper division — the "Major") and four courses in the social sciences outside the department. The following courses are required in the program:

1. History 1A-1B-1C.
2. Two courses in U.S. history.
3. Two courses in non-Western history from the same area (i.e., Latin America, Asia, Near and Middle East, Africa) or in science and technology. Candidates for the California Standard Instructional Credential may not choose science and technology to fulfill their non-Western requirement.
4. History 100 or 101.
5. History 197 or 199.
6. Four courses in the social sciences outside of history or in other related disciplines as explained below.

The requirements for U.S. and non-Western history may be met with either upper or lower division courses. Normally only six lower division courses in history need to be included in your program, so if you meet the U.S. history requirement at the lower division level, you have to meet the non-Western requirement at the upper division level (or vice versa). If you choose to meet both requirements at the lower division level, you are still required to take 10 upper division courses to fulfill upper division requirements. The department recommends the following lower division courses to meet the U.S. history and non-Western requirements:

- History 2, 3A, 3B, 3C, 3D, 6A, 6B, 6C, 7A, 7B, 8A, 8B, 8C, 9A, 9C, 9D, 10A, 10B, 11A, 11B. If only one non-Western course is taken in lower division, an appropriate upper division non-Western course must be included in the major.

All history majors are required to take at least four courses in other departments in the social sciences, whether lower or upper division (anthropology, geography, economics, political science, sociology, psychology). These courses may not be taken on aPassed/Not Passed basis. A one-term course from the History 6A-6B-6C sequence may be applied toward this requirement, provided the same course is not used to satisfy any other requirement of the major.

By petition, you may replace up to two social sciences courses with courses in humanities, arts, or natural sciences relevant to your program in history. Courses in communication studies do not fulfill this requirement.

Only two courses offered outside the History Department may be applied as major courses without petition: Anatomy and Cell Biology (Medical History) 107A-107B.

Transfer students with deficiencies in lower division courses may by petition substitute appropriate upper division courses in history for the lower division requirements. See the undergraduate counselor.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

Advanced Placement Credit in History —
The College of Letters and Science allows eight quarter units toward the B.A. for each Advanced Placement Test in History. The History Department applies this credit to the "Preparation for the Major" as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows eight units of History 7A-7B credit on the history preparation. The excess units may be applied only toward the degree.

Honors Program
The honors program is designed for history majors who are interested in carrying out a year-long independent research project that culminates in an honors thesis. Special honors seminars are also offered during the junior year. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year.

History 101H is required, as are History 199HA-199HB-199HC, which count as three of the 10 required upper division courses. Course 199HA is taken in Spring Quarter of the junior year; honors students then take courses 199HB and 199HC in Fall and Winter Quarters of their senior year under the guidance of the sponsoring professor. A prize is awarded for the outstanding honors thesis.
Instructional Credential in History
If, based on your history major program, you would like a waiver of the national teacher examination for the single subject instructional credential in history, you must complete (1) History 7A-7B or two terms of course 6 sequence, (2) courses 1A-1B-1C, (3) course 163, and (4) two upper division courses in modern European history from the 125A-125F or 126A-126E sequences. You may not select history of science as a non-Western field.

Master of Arts Degree
Admission
For admission to graduate standing in the Department of History, you should normally have completed the undergraduate major or its equivalent, have received a Bachelor of Arts degree or its equivalent from an accredited college or university, and have maintained at least a B+ average in upper division work. You also need three letters of recommendation and the score of the General Test of the Graduate Record Examination (GRE) submitted to the department. Students not meeting the grade-point average requirements may be admitted in exceptional cases if their letters of recommendation, GRE score, or other factors indicate unusual promise. Applicants with a year or more of graduate study at other institutions should have attained a GPA of 3.5 or better if they wish to work toward the Ph.D. degree. Applications should be submitted before December 30; notification is made on or before May 1. Except for extraordinary cases, students are expected to begin their graduate work in Fall Quarter.

There is no screening examination. Nonhistory majors may be required to take specified courses, depending on their background and fields of specialization. Because applicants are admitted to pursue graduate work in a specific field, a change of fields after admission requires approval of the relevant field committee. An annual Guide to Graduate Study in History which explains the requirements and procedures of the graduate program in detail is mailed to all new graduate students who have filed a Statement of Intent to Register (prior to registration). The guide lists faculty, their representative publications, and descriptions of courses offered during the year, and is available from the Graduate Adviser, Department of History, 6273 Bunche Hall, UCLA, Los Angeles, CA 90024-1473.

Major Fields or Subdisciplines
The comprehensive examination covers one of the following fields: (1) ancient (includes ancient Near East); (2) medieval (includes Byzantine and medieval Jewish history); (3) Europe, 1550 to present (includes British history and the British Empire); (4) Africa; (5) Near East (includes Armenia); (6) India and Southeast Asia; (7) East Asia; (8) Latin America; (9) U.S.; (10) history of science; (11) special fields (students in the history of religions, Russian history, and modern Jewish history are normally examined in one of the above fields, but with consent of the faculty in these fields may petition the graduate guidance and curriculum committee for an M.A. examination in their field of specialization).

Foreign Language Requirement
If you are contemplating graduate work in history, you should begin study of a foreign language as an undergraduate since reading knowledge of one foreign language approved by the department is required. For French, German, Russian, or Spanish, a score of 500 on the Graduate School Foreign Language Test (GSFLT) is required. Students of U.S., Near East, and African history may use departmentally administered translation examinations in French, Spanish, or German in place of the GSFLT. Students of European history must pass departmentally administered examinations in one of these three languages no later than the beginning of the sixth term of full-time study. For other languages, certification is required by the department teaching the language according to that department's standards.

Course Requirements
The department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. No course in the 300 series may be applied toward this requirement, and only one in the 500 series may be applied. For students in U.S. history and European history, a minimum of seven of the nine courses must be at the 200 level. For U.S. history, these seven courses must include at least one two-term seminar and History 245. For European history, the seven courses must include two two-term seminars and course 225. Africanists must take course 275.

Comprehensive Examination Plan
The department follows the comprehensive examination plan. Individual fields specify fulfillment of the examination requirement by (1) a three-hour written examination designed to assess your ability to synthesize a broad field of knowledge or (2) the submission of three essays written for at least two different professors as part of your program of study. At least two of these papers must have been submitted for graduate courses in the 500 series. Students in the U.S. field must submit the paper from the two-term research seminar in U.S. history. The European field requires a comprehensive examination in the form of a research paper of approximately 15,000 words, to be submitted at the beginning of the sixth term of full-time study. Field examiners administer the M.A. comprehensive examinations in November, March, and May of each academic year. The committee recommends the following examination results: pass to continue, pass subject to reevaluation, terminal pass, fail. In cases where the M.A. is awarded pass subject to reevaluation, the field M.A. committee reevaluates your progress after an additional three terms of study. Only in exceptional cases are oral examinations required for the M.A. degree.

M.L.S./M.A.-History
This concurrent degree program of the Department of History and the Graduate School of Library and Information Science allows you to combine historical study with the tools of the information professional and to obtain two degrees — the M.L.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from this department and the Graduate School of Library and Information Science.

Ph.D. Degree
Admission
Admission requirements for the Ph.D. program are the same as those for the M.A., but applicants for the doctorate are urged to seek an interview or to correspond with a member of the faculty in the field in which they intend to work. Students may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree.

While no examination is required for admission to a Ph.D. program, evaluation examinations are given to determine your continuance to the Ph.D. degree.

An annual Guide to Graduate Study in History which explains the requirements and procedures of the graduate program in detail is mailed to all new graduate students who have filed a Statement of Intent to Register (prior to registration). The guide lists faculty, their representative publications, and descriptions of courses offered during the year, and is available from the graduate adviser.

Major Fields or Subdisciplines
Ancient Greece; ancient Rome; medieval constitutional and legal; medieval social and economic; medieval ecclesiastical and religious; medieval intellectual and cultural (medieval history specialists may offer no more than two of these fields in medieval history); Byzantine; Russia since 862; Southeast Europe (Balkans); England prior to 1485; England, 1485-1763; England since 1763; the British Empire; the Near East, 500-1500; the Near East since 1500; ancient Near East; Armenian; survey of African history; topics in African history (preferably on a regional basis); history of science to 1600; history of science since 1600; Europe, Renaissance- Reformation; Europe, Renaissance to the French Revolution; Europe since 1740; European socioeconomic history; European intellectual and cultural history; psychohistory; China, 900-1600; China since 1800; modern Japan; South
Teaching Experience
The department cannot provide teaching experience for all Ph.D. candidates and cannot therefore require it for the degree. You should, however, be able to demonstrate ability to give instruction in your field.

Qualifying Examinations
Full-time graduate students must schedule the written qualifying examination by the end of the ninth term of graduate work. The written examination includes the major field only, is normally prepared and administered by the chair of your doctoral committee, and is read by the entire committee before you take the oral qualifying examination. The members of the doctoral committee determine whether or not an examination may be repeated (normally only once).

The written examination must be passed and a dissertation prospectus (approved by the doctoral committee chair) must be written before taking the University Oral Qualifying Examination. In the oral examination you are examined in four fields, one of which may be an approved allied field. You should select fields in consultation with your faculty sponsor and must receive the department's approval of all four fields. If you fail the oral qualifying examination, you may repeat it once (normally within a period of six months) with the consent of the doctoral committee.

After passing the oral qualifying examination, you are advanced to candidacy and may begin work on the dissertation.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
If required by the qualifying examination committee, a final oral examination is conducted after completion of the dissertation to cover the field within which the dissertation falls. After approving a dissertation, the chair of the doctoral committee may, with the unanimous consent of the entire committee, recommend a waiver of the final oral examination.

Lower Division Courses
1A-1B-1C. Introduction to Western Civilization. Lecture, two hours; discussion, two hours. Broad historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students' general education, introduce them to ideas, values, and institutions basic to Western civilization, and acquaint them with the present. Through reading and discussion, with represen-tative contemporary documents and writings of enduring interest. 1A. Ancient Civilizations from Prehistory to A.D. 843; 1B. Classical World (A.D. 843 to ca. 1715); 1C. Medieval and Early Modern Europe (ca. 1715 to the Present).

1AH-1BH-1CH. Introduction to Western Civilization (Honors). Lecture, two hours; discussion, two hours. Honors sequence parallel to courses 1A-1B-1C. Mr. Berenson

2. History of Technology from Antiquity to the 20th Century. Lecture, three hours. Designed for students in mathematics, science, and the arts. Survey of development of man's ability to understand more fully and to utilize more efficiently the natural environment, stressing technology's changing social, economic, scientific, and cultural relationships.

3A-3B-3C. Introduction to History of Science, Lecture, three hours; discussion, two hours. History of science majors may not apply these courses on science general education requirements.

3A. Scientific Revolution. Survey of the beginnings of physical sciences involving transformation from Aristotelian to Newtonian cosmology, mechanization of the natural world, rise of experimental science, and origin of scientific societies. Mr. Wise

3B. Physical Sciences since the Enlightenment. Broad survey of development of ideas in classical and modern physics since Newton. Mr. Foreman

3C. Biological Sciences, 1800-1955. Survey of development of biological sciences from the period of Bichat and Müller to discovery of the double helix. Mr. Frank

4. Introduction to History of Religions. Lecture, three hours; discussion, two hours. Discussion of various systems, ideas, and fashions of thought that have dominated Western approaches to religions of the world since antiquity. Survey of development from classical Greek and early Christian theories to modern theories with its discoveries of the religions of India, China, ancient Near East, and the problem of the interaction of various religions in the 19th and 20th centuries. Mr. Bolle

5A-5B. Survey of British History. Lecture, three hours; discussion, two hours. Designed for students wanting general orientation to British history and those in English literature and prelaw. Survey of history of Britain from the union between England, Scotland, and Ireland (1707) to the present. Mr. Urquhart

6A-6B-6C. History of the American Peoples. Lecture, two hours; discussion, two hours. Survey of the American peoples from advent of aboriginal society to the present, emphasizing racial and ethnic interaction, industrialization, urbanization, and cultural change. 6A. To 1800; 6B. 1800 to 1900; 6C. 1900 to the Present. Ms. Appleby, Mr. Nash

6BH. History of the American Peoples (Honors). Lecture, two hours; discussion, two hours. Survey of the American peoples from advent of aboriginal society to the present, stressing racial and ethnic interaction, industrialization, urbanization, and cultural change. Mr. Monkkonen

7A-7B. Survey of Political History of the U.S. Lecture, two hours; discussion, two hours. This sequence (or two terms of course 6) strongly recommended for history majors planning to take more advanced courses in U.S. history. Designed for students in social sciences and other departments who desire thorough grounding in American political culture. Survey of history of the U.S. from the Revolutionary era to the present. Emphasis on political developments and social, cultural, and economic bases of American politics. 7A. To 1877; 7B. 1877 to the Present. Ms. Appleby, Mr. Gatell, Mr. Howe
8A. Latin America: Reform and Revolution. Lecture, three hours; discussion, two hours. General introduction to Latin America, emphasizing those institutions from the past which have shaped the present and the struggle for change in the 20th century. Movies and discussions complement topical lectures. Mr. E.B. Burns and the Staff

8B. Latin American Social History. Lecture, three hours; discussion, two hours. Focus on social history of Latin America: political change over time.

8C. Central America: Struggle for Change. Lecture, three hours; discussion, two hours. Economic growth and accompanying dependency of Central America from independence until the Great Depression and turbulent consequences of that combination from 1930 to the present. Attention to common characteristics of the five nations, as well as their individuality. Mr. E.B. Burns

8A-8D. Introduction to Asian Civilizations. Lecture, three hours; discussion, two hours. History of India. Introductory survey for beginning students of major cultural, social, and political ideas, traditions, and institutions of Indian civilization.

Mr. Woolpert

9C. History of Japan. Survey of Japanese history from earliest recorded time to the present, with emphasis on development of Japan as a cultural daughter of China. Attention to manner in which Chinese culture was Japanese and aspects of Japanese civilization which became unique. Creation of the modern state in the last century and impact of Western civilization on Japanese culture. Mr. Notehelfer

9CH. History of Japan (Honors). Introductory survey for beginning students of major cultural, social, and political ideas, traditions, and institutions of Indic civilization. Honors sequence classes of no more than 15 students meeting concurrently scheduled with course B112. Mr. E.B. Burns and the Staff

9D. History of the Near and Middle East. Introduction to history of the Muslim world from advent of Islam to the present day. Ms. Marston

10A-10B. Introduction to Civilizations of Africa. Lecture, three hours; discussion, two hours. For students with general interest in Africa, but also strongly recommended for those intending to take upper division courses in African history. Exploration of African cultures on a thematic basis within a wider framework of political change over time.

11A-11B. History of China. Lecture, three hours; discussion, two hours. To 1000. Survey of early history of China - genesis of characteristic Chinese institutions and modes of thought from antiquity to 1000. Focus on social, political, intellectual, and economic aspects of early and middle empires.

Mr. Elman, Mr. von Glahn

11B. 1000 to 1500. Survey of later history of China - evolution of characteristic Chinese institutions and modes of thought from 1000 to 1500. Focus on social, political, intellectual, and economic aspects of late empires and rise of modern China in the contemporary era.

Ms. Bernhardt, Mr. Elman, Mr. von Glahn

11A-11B. History of China (Honors). Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 11A-11B. Mr. Elman, Mr. von Glahn

M70. Survey of Medieval Greek Culture. (Same as Classical M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of Aristotle).

Mr. Dyck

88A-88U. Lower Division Seminars (5 units each). Seminar, three hours. Prerequisite: freshman or sophomore standing. Limited to 15 students. Open to non-history majors. Readings, discussions, papers. Sign-ups and descriptions of offerings each term are available in undergraduate counselor's office (624B Bunche Hall). Ten units may be taken for credit.

88A. Ancient Greece; Ancient Rome: 88B. Medieval Europe; 88E. Modern Europe; 88F. Russia; Eastern Europe; 88G. Britain; 88H. U.S.; 88I. Latin America; 88J. Near East; 88K. India; 88L. China; 88M. Japan; 88N. Africa; 88O. Science/Technology; 88P. History of Religion; 88Q. Theory of History; 88R. Jewish History; 88S. Armenia and the Caucasus; 88T. Southeast Asia; 88U. Psychohistory.

97H. Three Trials. Discussion, three hours. Prerequisite: consent of instructor. Limited to 20 students. Intensive study of three trials, each of which led to the execution of the accused: Socrates, Jesus of Nazareth, and Joan of Arc. View of each trial as a conflict between legitimate but irreconcilable interests and world views. For each, class constitutes itself as a court (prosecution, defense, jury) and reviews the verdict of original trial. Mr. Benson

Upper Division Courses

Prerequisite for all upper division courses is upper division standing or consent of instructor, unless otherwise stated. Certain graduate courses (200 series) are open to students with upper division standing and consent of instructor.

100. History and Historians. Lecture, three hours. Study of historiography, including intellectual processes by which history is written, results of these processes, and sources and development of history. Attention also to representative historians.

Mr. Baldwin, Mr. Ooms, Mr. Reill

101. Introduction to Historical Practice. Seminar, three hours. Limited to juniors and seniors. Discussion classes of no more than 15 students meeting with a faculty member. Exploration of how works of history are written, with emphasis on problems of historiography and method.

101H. Introduction to Historical Practice (Honors). Seminar, three hours. Limited to juniors and seniors in history honors program. Discussion classes of no more than 15 students meeting with a faculty member. Emphasis on problems in philosophy of history, historiography, and historical method.

102. Explorations in Psychoanalysis and History. Lecture, three hours. Art of psychological and historical interpretation; assessment of recent writings in the field of psychohistory.

Mr. Loweenberg, Mr. Wool

M103. Historical Archaeology. (Same as Anthropology M115S.) Survey of aims and methods of historical archaeology as practiced on both sides of the Atlantic, with case studies from North America, the Caribbean, Africa, and Europe.

Mr. Posnansky

M104A-M104B. Ancient Egyptian Civilization. (Same as Ancient Near East M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. Political and cultural institutions of ancient Egypt and ideas on which they were based. M104A. Chronological discussion of Prehistory, the Old and Middle Kingdom. M104B. The New Kingdom and the Late period until 322 B.C. (Alternate years)

Mr. Dyck

105. Ancient Mesopotamia and Syria. Lecture, three hours. Political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period. Mr. Buccellati

106A-106B.106C. Survey of the Middle East from 500 to the Present. Lecture, three hours. Background and circumstances of rise of Islam, creation of the Islamic Empire, and role of Dynastic Successor States and the Modern Nation States. Social, intellectual, political, and economic development.

106A. 500 to 1300. Mr. Morony

106B. 1300 to 1700. Ms. Marston

106C. 1700 to the Present. Ms. Keddie

107A-107B. Islamic Civilization. Lecture, three hours.

107A. Premodern Islam. Origins of Islamic civilization: Muhammad and the Qur'an; development of Islamic doctrine, ritual, piety and law, sectarian Islam, and mysticism.

Mr. Morony

Ms. Keddie, Ms. Marston

108A-108B. History of the Arabs. Lecture, three hours. Course 108A is prerequisite to 108B. Political, social, intellectual, and economic history of the Arabs from the 18th century to the present.

Ms. Marston

109A. To 1578. Mr. Morony

109B. 1578 to the Present. Ms. Marston

110A-110B. Iranian History. Lecture, three hours. Political, social, and cultural history of Persia.

110A. Islamic Iran to 1800. Mr. Banani

110B. Iran from 1800 to the Present. Ms. Keddie

111A-111B. History of the Turks. Lecture, three hours. Survey of society, government, and political history of the Turks (800-1808) and the Ottoman Empire from earliest times to the present.

111A. Origins to 1808. Turkish origins, early Central Asian and Middle Eastern states. Rise and fall of the Ottoman Empire.

Mr. Shaw

111B. 1808 to the Present. Modernization of the Ottoman Empire, 1808-1923. The Turkish Republic. The Turks in the world.

Mr. Shaw

111C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300-1923. Lecture, three hours. Preliminary introduction to the Jews in Byzantium and the Islamic world before the Ottoman conquest, followed by discussion of Jewish communities and Judaism in Southwestern Europe, Anatolia, and the Middle East while they were under Ottoman rule (1300-1923) and in the Turkish Republic since 1923. P/NP or letter grading.

Mr. Shaw

112A-112B-112C. Armenian History. Lecture, three hours.

112A. Armenia in Ancient and Medieval Times, 2nd Milennium B.C. to A.D. 11th Century.

Mr. Hovannisian

112B. Armenia from the Cilician Kingdom through the Periods of Foreign Domination and National Stirrings, 11th to 19th Centuries. Mr. Hovannisian

112C. Armenia in Modern and Contemporary Times, 19th and 20th Centuries. The Armenian question and genocide, national republic, Soviet Armenia, and the dispersion.

Mr. Hovannisian

C112D. Introduction to Armenian Oral History. Lecture/discussion, three hours. Uses and techniques of Armenian oral history; preinterview, interview, and postinterview procedures; methods of compilation and evaluation. Field assignments and interviews. May be concurrently scheduled with course C212.

Mr. Hovannisian

113. The Caucasus under Russian and Soviet Rule. Lecture, three hours. Survey of political, economic, social, and cultural history of the Caucasus region since 18th century. Focus on Georgian, Armenian, and Azerbaijani response to Russian and Soviet rule; the nationality question and the Soviet national republics.

Mr. Hovannisian
History of Ancient Mediterranean World. Lecture, three hours:

115A. Survey of history of the ancient East from earliest times to foundation of the Persian Empire. Mr. Mellor

115B. History and institutions of the Greeks from their arrival to the death of Alexander. Mr. Chambers, Mr. Mellor

115C. History and institutions of Rome from founding of the city to the death of Constantine. Mr. Chambers, Mr. Mellor

116A-116B. History of Ancient Greece. Lecture, three hours:

116A. Rise of the Greek City-State. Emphasis on archaic period and early classical age through the Persian Wars. Mr. Chambers

116B. Classical Period. Clash between Athens and Sparta, consequent rise of Macedonia, and aftermath of Alexander the Great. Mr. Chambers

117A-117B. History of Rome. Lecture, three hours:

117A. To Death of Caesar. Emphasis on development of imperialism and constitutional and social struggles of the late republic. Mr. Mellor

117B. From Death of Caesar to the Time of Constantine. The early empire treated in more detail, supplemented by survey of social and economic changes in the 3rd century. Mr. Mellor

118. Introduction to Roman Law. Lecture, three hours. Survey of public (constitutional), criminal, and private law of the Romans. Topics include social context of Roman law, historical evolution of Roman law, mechanisms and procedures by which the law was administered, and content of private law. Mr. Mellor

119. The Christian Church, 100-1517. Lecture, three hours. Constitutional, political, and economic history of the Church; Christianity, history of the manuscripts and Vulgate, and Germanic kingdoms; governance and institutions of the Church; relations between Church and monarchy; the high tide of papalism; crises of authority on eve of the Reformation. Mr. Benson

120. The Christian Religion, 100-1350. Lecture, three hours. Religious experience of Christians — conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. Religious life of lay Christians, as well as that of the Church’s institutional, intellectual, and spiritual leaders. Mr. Benson

121A-121B. Medieval Europe. Lecture, three hours. Recommended prerequisite: Western civilization. Basic introduction to Western Europe from Latin antiquity to the 15th century of discovery with emphasis on medieval use of Greek-Roman antiquity, history of the monastic and scholastic scriptoria, and growth of literacy. 121A. 400 to 1000; 121B. 1000 to 1500. Mr. Rousse

121C. Medieval Civilization: Mediterranean Heartlands. Lecture, three hours. Survey of Western Mediterranean Europe, social-economic-cultural within a political framework, including its relation with other cultures. Mr. R.I. Burns

121D. Medieval People: The 13th Century. Lecture, three hours. Movements and creative contributions to Western culture in this central century of the Middle Ages, as seen in its representative men and works. Mr. R.I. Burns

122A-123B. Byzantine History. Lecture, three hours. Political, socioeconomic, religious, and cultural continuity in the millennial history of Byzantium. Reform of Diocletian, Byzantium’s relations with Latin Europe, Slavs, Sassanids, Arabs, and Turks.

125A-125F. History of Modern Europe. Lecture, three hours:

125A. Renaissance: Power and Culture in the Italian City-States. Mr. Martines

125B. Reformation: Church and Religion in the Early 16th Century. Revolutionary tendencies in German society. The peasant uprising. Theology and political thought of Erasmus, Luther, Zwingli, and Calvin. The Anabaptists. The new churches. Effects of the Reformation on society. Mr. Clasen

125C. Absolutism and Enlightenment: Europe under the Old Regime. State, society, and culture in Europe from the mid-17th century until eve of the French Revolution. Mr. Anderson

126A-126E. Cultural and Intellectual History of Modern Europe. Lecture, three hours. Climates of taste and climates of opinion. Educational, moral, and religious attitudes; art, thought, and manners of the time in historical context.

126A. 16th Century. Mr. Clasen

126B. 17th Century. Mr. Anderson, Mr. Funkenstein

126C. 18th Century. Mr. Reill

126D. 19th Century. Mr. Loewenberg, Ms. Silverman, Mr. Weber

126E. 20th Century. Mr. Loewenberg, Mr. Weber, Mr. Wohl

127A-127B. War and Diplomacy in Europe. Lecture, three hours:

127A. 1650 to 1815. Survey of military and diplomatic history, seen in relation to social and economic developments and growth of the state. Mr. Symcox

127B. 1815 to 1945. Balance of power; growth of the nation-state; imperial and colonial expansion; two World Wars. Mr. Shaw, Mr. Symcox

128A-128C. History of France. (Formerly numbered 128A-128D.) Lecture, three hours:

128B. France, 1715-1871. "Ancien Régime" and the time of revolutions. Critical discourse leading to the French Revolution, collapse of the state, Napoleonic era, reconstruction of society through the monarchies and revolutions of the 19th century. Mr. Berenson, Ms. Silverman

128C. The Making of Modern France, 1871 to the Present. From oligarchy to democratic bureaucracy in two waves and three republics. Mr. Weber

129A-129B-129C. History of Modern Germany and Austria. Lecture, three hours:

129A. 1500 to 1648. Political structure of empire and territories, economy, social classes, daily life, book publishing and universities, Reformation and Counter-Reformation, Thirty Years' War, military entrepreneurship, population losses, the Peace of Westphalia. Mr. Clasen

129B. 1648 to 1848. Survey of social, economic, cultural, and political history, including rise of absolutist and bureaucratic government, Enlightenment and reforms, emergence of Austro-Prussian dualism, transformation of the German economy, impact of the French Revolution and German reform movement, Restoration and Metternichian reaction, rise of Romanticism, and causes and failure of the Revolutions of 1848. Mr. Ruge

129C. 1848 to the Present. Revolutions of 1848, Prussian constitutional struggle, German unification, Bismarckian and Wilhelmine eras in Germany and Austria, liberalism, industrialism, anti-Semitism, social democracy, the World Wars, revolutions, republics, Fascism and its occupation, and Austrian, German Federal, and German Democratic Republics. Mr. Loewenberg

130A-130B. History of Modern Europe from 1870 to 1914. Lecture, three hours:

130A. To Death of Alexander. Emphasis on development of imperialism and constitutional and social struggles of the late republic. Mr. Mellor

130B. Crisis of the Old Regime and the Revolution. The revolution in France, 1787-1799. Spread of revolution to other parts of Europe and varying responses. Imperialism and the coming of the First World War after 1792 and spread of the revolution by military force. Jacobinism in France and outside. Parallel movements abroad (e.g., Ireland, Haiti, Poland). Satellite regimes set up in Europe. Mr. Symcox

130C. Napoleonic Europe and the Restoration. Napoleon’s ascendancy in France from 1799: internal effects. Restructuring of Europe under Napoleon and national romanticism. Industrial and political change in Britain: Anglo-French world rivalry in 1815. The restoration: what could be restored and what could not. Risings national consciousness against Metternich’s system. Continuing revolutionary tradition: 1821, 1830, 1848. Romanticism in its apotheosis. Conclusion: how world of 1850 differed from that of 1750. Mr. Symcox

131A-131D. History of Russia. Lecture, three hours:

131A. From the Origins to the Rise of Muscovy. Kievan Russia and its culture, Appanage principalities and towns; the Mongol invasion; unification of the Russian state by Muscovy, Autocracy and its Sensators; serfdom. Mr. Krenk

131B. Imperial Russia from Peter the Great to Nicholas II. Westernization of state and society; centralization at home and expansion abroad; peasant problem: beginnings of industrialization; movements of political and social protest; non-Russian peoples, political reforms and social changes; Revolution of 1905; Russia in World War I; fall of the old regime. Mr. Rogger

131C. Revolutionary Russia and the Soviet Union. The Revolutions of 1917, Civil War, consolidation of the Bolshevik regime; succession crisis and ascendency of Stalin, collectivization and industrialization, foreign policy and World War II; death of Stalin, de-Stalinization, developments since; stagnation or stability? Mr. Hatch

131D. Intellectual History. Prerequisite: course 131B or Russian 99A or 119 or consent of instructor. Social thought and movements in modern Russia, late 18th to early 20th century. Mr. Hatch, Mr. Roger

132A-132B. History of Italy. Lecture, three hours:

132A. 1559 to 1848. Counter-Revolution and absolutism, Enlightenment reforms, revolutionary era, and first phase of the Risorgimento. Mr. Ginburg, Mr. Symcox

132B. 1848 to the Present. Political, economic, social, diplomatic, and ideological developments. Mr. Wohl
133A-133B. Social History of Spain and Portugal. Lecture, three hours:

133A. Age of Silver in Spain and Portugal, 1479-1760. Development of a trans-Atlantic economy; emphasis on factors which contributed to Spanish dominance of trade with the Americas. Mr. Krekic

133B. Rebellion and Revolution in Modern Spain and Portugal, 1789 to the Present. Spain's position in Europe and the challenges of modernization; focus on political, economic, and cultural developments. Mr. Martines

134A. Southeastern Europe, 500-1500. Lecture, three hours. Political, economic, and cultural survey of the independent Balkan states in the Middle Ages. Mr. Krekic

134B. Southeastern Europe, 1500-1918. Lecture, three hours. The Balkans under Ottoman rule, movements of national liberation, and formation of nation states. Mr. Krekic

135A-135B. Marxist Theory and History. Lecture, three hours. Course 135A is generally prerequisite to 135B. Introduction to Marxist philosophy and method; conception of historical stages; competing Marxist accounts of transition from feudalism to capitalist economy via reading Capital; theory of politics and state in relationship to historical interpretation of 19th-century European revolutions; capitalist crises. Mr. Brenner

136A-136Z. Topics in European History. Lecture, three hours. Integrated introduction to important aspects of European history, with emphasis on a specific topic within a broad framework. Mr. Brenner

136A. Social Movements.

136B. Peasants and Agrarian Society.

136C. Urban Society.

136D. The Family. Social history of the family in Western Europe since the Middle Ages. Household and family organization of peasants, artisans, and aristocrats; kinship, child-rearing, parental authority, marriage and inheritance systems; attitudes toward love, sex, and children. Mr. Symcox

136G. Psychohistory. Mr. Loewenberg, Mr. Wohl

136I. Special Topics.

137A-137B. History of Women in Europe. (Formerly numbered 136J-136K-136L.) Lecture, three hours:

137A. Prehistory to 1348. History of women in ancient Greece, Rome, and the Middle Ages. Topics include women in Greek mythology and life, Roman Empire, Christianity, convents, courtly love. Ms. Norberg

137B. 1348 to 1814. History of women from the Renaissance to the end of the French Revolution. Topics include women of Renaissance Italy, women in the Protestant and Catholic Reformations, witchcraft, the Enlightenment and French Revolution. Ms. Norberg

137C. 1814 to the Present. Topics include Victorian women; purity movements; suffrage; role of women in World War I, Russian Revolution, and the Nazi State; "second" feminism. Ms. Norberg

138A-138B. Topics in Medieval English History. Lecture, three hours. The history of towns and cities in the community and economy, family and landholding, Church and society, war, politics, and feudal relations. Mr. Rouse, Mr. Waugh

139. Renaissance England. Lecture, three hours. Culture and society. Emphasis on literature (Elizabethan, Jacobean, Caroline), with readings and lectures on different aspects of political and economic life as required for serious understanding of the culture. Mr. Martines

141A-141B-141C. History of Britain. Lecture, three hours. Analysis of British economy, society, and politics, focusing on dynamics of both stability and change:

141A. Tudor-Stuart Times, 1485-1660. (Formerly numbered 140A-140B.) Mr. Brenner, Mr. Martines

141B. Early Modern Times, 1660-1832. (Formerly numbered 141A.) Mr. Anderson, Mr. Brenner, Mr. Brewer

141C. Modern Britain since 1832. (Formerly numbered 141B.) Mr. Urdank

142A-142B. British Empire since 1873. Lecture, three hours. Political and economic development of the British Empire, including evolution of colonial nationalism, development of the Commonwealth idea, and changes in British colonial policy. Mr. SarDesai

143. History of Canada. Lecture, three hours. Survey of growth of Canada into a modern state from its beginnings under the French and British colonial empires.

144. History of Australasia. Lecture, three hours. History of Australia and New Zealand from the European settlement, with emphasis on interrelationships between settlers and aborigines; comparisons and contrasts between the Australian and New Zealand experience.

145A. Colonial America, 1600-1763. Lecture, three hours. Examination of the molding of an American society in English North America from 1600 to 1763. Emphasis on interaction of three emerging cultures: Western European, West African, and American Indian.

145B. Revolutionary America, 1760-1800. Lecture, three hours. Inquiry into origins and consequences of the American Revolution, nature of the revolutionary process, creation of a constitutional national government, and development of a capitalist economy.

146A-146B. U.S., 1800-1850. Lecture, three hours.

146A. Jeffersonian America. Jeffersonian Republican ascendancy and Era of Good Feelings, 1800-1828; disintegration of Federalist opposition; testing of American nationality in the second war with Britain; beginnings of transportation and industrial revolutions; restructuring of politics in an increasingly egalitarian age. Mr. Gatell, Mr. Howe

146B. Jacksonian America and Beyond. "Jacksonian Revolution" and its aftermath, 1829-1850; problem of national power versus state sovereignty; problems of rapid social change through industrialization and urbanization; relationships between industrial and/ or slave labor movements; territorial expansion as focus for sectional rivalry. Mr. Gatell, Mr. Howe

147A. U.S.: Civil War and Reconstruction. Lecture, three hours. Rise of sectionalism, anti-slavery crusade, formation of the Confederate States; war years; political and social reconstruction.

147B. U.S., 1875-1900. Lecture, three hours. American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of role of government and responses to that alteration.

147C. American South, 1877 to the Present. Lecture, three hours. Analysis of political, economic, social, intellectual, and cultural history of the South from cotton belt to Sunbelt. Topics include origins of segregation, sharecropping, Southern politics, Southern culture, and civil rights movement. Mr. Schuman

148A-148B. U.S.: 20th Century. Lecture, three hours. Political, economic, intellectual, and cultural aspects of American democracy in the 20th century. Mr. Coben, Mr. Schuman, Mr. Weiss

148C. U.S. since 1945. Lecture, three hours. History of political, social, and diplomatic developments that have shaped the U.S. since 1945. Mr. Dalek, Ms. Matsumoto, Mr. Schuman, Mr. Weiss

149A-149B. American Economic History. Lecture, three hours:

149A. 1790 to 1910. Roles of economic forces, institutional factors, and groups in promoting or imposing effective change in the American economy. 1790-1910. During this period the technical skeleton of the modern industrial structure was formed. Why and how American industry evolved into a dual economy, characterized by a center of firms large in size and influence and a periphery of smaller firms. Ms. Yeager

149B. 1910 to the Present. Dynamics of change in the dual economy, focusing in greater detail on interrelationships between macro and micro developments in the economy and on the growing interdependence between the U.S. and world economy, 1910 to the present. Ms. Yeager

150A-150B. Intellectual History of the U.S. Lecture, three hours. Principal ideas about humanity and God, nature and society, which have been at work in American history. Sources of these ideas, their connections with one another, their relationship to American life, and their expression in great documents of American thought. Mr. Howe

150C. History of Religion in the U.S. Lecture, three hours. Consideration of the religious dimension of people's experience in the U.S. Examination of a number of religious tractions which have become important in this country, with emphasis on major religious developments in religion to other aspects of American culture. Mr. Howe

151A-151B. Constitutional History of the U.S. Lecture, three hours:

151A. Origins and Development of Constitutionalism in the Federal Constitutional Framework. Mr. Dallek

151B. Constitutionalism since the Civil War. Particular emphasis on development of the Supreme Court, due process revolution, the Court and political questions, and the fact of judicial supremacy within self-prescribed limits.

152A-152B. American Diplomatic History. Lecture, three hours:

152A. Establishment of an independent foreign policy, territorial expansion of the U.S., and emergence of a world power. Mr. Dalek

152B. Role of the U.S. in the 20th-Century World. Mr. Dalek

152BH. American Diplomatic History (Honors). Lecture, three hours. Discussion, one hour. Role of the U.S. in the 20th-century world. Mr. Dalek

153. The U.S. and the Philippines. Lecture, three hours. Recommended: knowledge of Southeast Asian or U.S. history, or both. Examination of interrelationships of immigration and of colonialism and independence between the U.S. and the Philippines, focused mainly within the time period from 1898 to the present.

154A-154B. U.S. Urban History. Lecture, three hours:

154A. U.S. Cities: Overview. Demographic, geographic, political, economic, and social development of U.S. cities in relation to broad trends in U.S. history as well as to their own more special histories. Emphasis on mastery of facts and chronology, and awareness of major theoretical issues and fundamental concepts in urban history. Mr. Monkkonen

154B. Topics in U.S. Urban History. Prerequisite: course 154A. Exploration of one aspect of U.S. urban history in depth without having to attend to basic chronology or geography. Topics include crime and policing, urban economics, and urban government. Students do primary research papers based on local materials in addition to written examinations. Ms. Monkkonen
154C-154D. History of American Architecture and Urban Planning, 1600 to the Present. Lecture. Three hours. Aspects of American cultural history as explored through architecture, urban planning, and the fine arts, with emphasis on development of an architectural consciousness in America, ways in which the built environment has affected its users and observers, and extent to which it has reflected their values and way of life. 154C. 1600 to 1820; 154D. 1820 to the Present. Mr. Hines

155A-155B. American Working Class Movements. Lecture, three hours. Major episodes in social, trade union, and cultural history of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor, history of the Knights of Labor, A.F. of L. and C.I.O., and development of labor politics. Mr. Laslett

156A. American Social History, 1750-1960. Lecture, three hours. Historical analysis of American society and culture, with emphasis on the family, religious values, African-American life, women’s work, urbanization and industrialization, immigration and nativity. Why have doctors become so influential to 1860; 156B. 1860 to 1960. Mr. Cohen

156C-156D-156E. Social History of American Women. Lecture, three hours. Survey of major demographic, economic, social, and intellectual factors shaping the lives of women in America, and their role in social collectivities. Emphasis on class, regional, racial, and ethnic comparisons. 156C. Colonial and Early National. 1600-1820; 156D. Victorian and Industrial. 1800-1920; 156E. 20th Century. 1900-1975. Ms. Dubois, Ms. Matsumoto

156F-156G. History of the American Family. Lecture, three hours. Perspective on the contemporary American family through study of its development over the course of four centuries. Topics include Western European family models, sex roles, and family patterns. Emphasis on class, racial, ethnic, and regional variations. 156F. 1600 to 1870; 156G. 1870 to 1990. Ms. Morantz-Sanchez

156H. Medicine and Society in 19th-Century America. Lecture, three hours. Therapeutics, theories of disease, and medical science scrutinized with the understanding that these are never value-neutral, but are shaped by social structures of which they are part. Why have doctors become so influential to 1860; 1860 to 1930. Mr. Durant

156I. Comparative Slavery Systems. (Same as Afro-American Studies M156A.) Lecture, three hours. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies. Mr. Meyer

156J. Introduction to Afro-American History. (Same as Afro-American Studies M156B.) Lecture, three hours. Survey of the Afro-American experience, with emphasis on the three great trans-Atlantic African-American life: the Middle Passage and New World slavery, resistance to slavery and forced freedom, and transition from rural to urban milieus. Mr. Hill, Mr. Stevenson

158D. Afro-American Urban History. Lecture, three hours. Examination of Afro-American urban life prior to 1945, with emphasis on transformation from slavery to freedom and shift from Southern to Northern areas. Forces which both propelled Afro-Americans to the cities and which also inhibited their adjustment to them.

158E. Afro-American Nationalism in First Half of the 20th Century. Lecture, three hours. Critical examination of the Afro-American search in first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. Mr. Hill

159A. History of the Chicano Peoples. (Same as Chicano Studies M159A.) Lecture, three hours. They lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 19th century and into the 20th century, emphasizing interrelationships of labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper. Mr. Gómez-Quiones

159B. History of the Chicano Peoples. (Same as Chicano Studies M159B.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special emphasis on labor and politics. Provides a detailed look at the social, economic, labor, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper. Mr. Gómez-Quiones

160. The Immigrant in America. Lecture, three hours. Historical analysis of causes and consequences of immigration to the U.S. in the 19th and 20th centuries. Discussion of immigration restriction, acculturation, and implications of the influx of new peoples both for U.S. domestic and foreign policy. Mexican American, Asian American, and European immigration included. Mr. Lott

161. Asians in American History. Lecture, three hours. Study of the politically troubling question of entry into the U.S. of immigrants ineligible for citizenship and their citizen children in American history. Mr. Lott

162. American West. Lecture, three hours. Study of the frontier trans-Mexican border region, in the context of the Atlantic seaboard to the Pacific, from the 17th century to the present. Mr. Hundley, Mr. Sanchez

163. History of California. Lecture, three hours. Economic, social, intellectual, and political development of California from earliest times to the present. Mr. Hundley, Mr. Sanchez

164. History of Los Angeles. Lecture, three hours. Economic, social, cultural, and political development of Los Angeles and its environs from time of its founding as a Spanish frontier post and later as the nation’s gateway to the Pacific, to the present. Emphasis on processes of the area, changing physical environment, various interpretations of the city, and Los Angeles’ place among American urban centers. Mr. Sanchez

165A-165B. Colonial Latin America. Lecture, three hours. Studies in general development of Latin America prior to 1825, with emphasis on social history. Mr. Lockhart

165C. Indians of Colonial Mexico. Lecture, three hours. Survey of social and cultural history of the Indigenous Mexican people, with emphasis on processes of the time of the European conquest until Mexican independence, emphasizing an internal view of Indian groups and patterns on basis of records produced by the Indians themselves. Mr. Lockhart

166. Latin America in the 19th Century. Lecture, three hours. Intensive analysis of economic, social, and political problems of Latin American nations from their independence to around 1910. Mr. E.B. Burns, Mr. Möya

167A-167D. Latin America in the 20th Century. Lecture, three hours. Experiments in national development analyzed to relate the timing of social changes to economic, political, cultural, and geographic context. Successive country studies focus on world pressures and interplay of overlapping themes: struggle between centralized and decentralized political structure; interaction of socialist and "leftist" models of development (emphasized in course 167C), role of personalist leaders (emphasized in course 167B), definition of the national polity (emphasized in course 167C), and "rightist" models of development (emphasized in course 167D). Mexico is treated in 167A; each course, countries are studied according to the chronological contribution to the theme emphasized. 167A. Haiti, Uruguay, Costa Rica, Cuba, Chile; 167B. Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; 167C. Panama, Colombia, Ecuador, Honduras, El Salvador; 167D. Brazil, Guatemala, Peru, Nicaragua. Mr. Wilke

168. History of Latin American International Relations. Lecture, three hours. Perspectives on the diplomatic interests of Latin American nation in their relationships with one another and with other areas of the world, beginning with 19th-century independence. Mr. E.B. Burns

169. Latin American Elites. Lecture, three hours. Perspectives on the historical, literary, and cultural elites (defined as oral historical tradition and written tradition in different nations and regions) in Latin America. Mr. Wilke

170A. Latin American Cultural History. Lecture, three hours. Intellectual, artistic, and folk expressions of the Latin American spirit and character examined in readings and lectures, with emphasis on unique components of Latin American cultural identity and on how to develop self-interpretation. Music, films, and slides supplement discussions. Mr. E.B. Burns, Mr. Wilke

170B. Classic Travel Accounts of Latin America since 1735. Lecture, three hours. Recommended for prospective researchers before they select their topic of study. Introduction to "enlightened traveler" accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Comparison with current written accounts to photographic series to analyze the great variety of Native American cultures, Mexican and Latin American traditions, customs, occupations, dress, food, architecture, and transportation in the 20 countries of the area. Mr. Wilke

171. Mexican Revolution since 1910. Lecture, three hours. Examination of concept of "permanent revolution" to describe and explain the structure of "permanent revolution" under "one-party democracy." Analysis of unresolved colonial and 19th-century problems and crises that have influenced modern-day Mexico, if it is a modified form. Mr. Wilke

172. History of Argentina. (Formerly numbered 198H.) Lecture, three hours. History of economic, political, social, and cultural developments that have shaped Argentina from colonial time to the present.Emphasis in course 167B (formerly numbered 167C), definition of the national polity (emphasized in course 167C), and "rightist" models of development (emphasized in course 167D). Mexico is treated in 167A; each course, countries are studied according to the chronological contribution to the theme emphasized. 167A. Haiti, Uruguay, Costa Rica, Cuba, Chile; 167B. Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; 167C. Panama, Colombia, Ecuador, Honduras, El Salvador; 167D. Brazil, Guatemala, Peru, Nicaragua. Mr. Möya

173. Modern Brazil. Lecture, three hours. Selected topics in political, social, and cultural developments that have shaped Brazil from colonial time to the present. Emphasis in course 167B (formerly numbered 167C), definition of the national polity (emphasized in course 167C), and "rightist" models of development (emphasized in course 167D). Mexico is treated in 167A; each course, countries are studied according to the chronological contribution to the theme emphasized. 167A. Haiti, Uruguay, Costa Rica, Cuba, Chile; 167B. Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; 167C. Panama, Colombia, Ecuador, Honduras, El Salvador; 167D. Brazil, Guatemala, Peru, Nicaragua. Mr. Möya

174. Brazilian Intellectual History. Lecture, three hours. General intellectual development of Brazil, with emphasis on those intoxicating movements in which Brazilians attempted to interpret themselves, their nation, and their civilization. Mr. E.B. Burns
175A. Prehistoric Africa — Technological and Cultural Traditions. Survey of nondocumentary sources of early African history, with particular reference to technological, economic, and cultural developments from the origins of Man until the colonial period. Mr. Posnansky

175B. Africa and the Slave Trade. Social, economic, political, and cultural impact of the slave trade on African society, with emphasis on Atlantic trade without neglecting those of all other regions or continents. Islamic, and Indian Ocean worlds. Abolition and the African diaspora. Mr. Alpers, Mr. Obichere

175C. Africa in the Age of Imperialism. Topics include penetration of pre-capitalist social formations by capitalist, emergence of classes, nature of the colonial and postcolonial state, and struggle for national liberation in a global context. Mr. Alpers, Mr. Obichere

175E. Africa from 1945 to the Present. History of Africa south of the Sahara from end of World War II to the present. Last phase of politics of Africa, from decolonization to the present day. Neocolonialism, Pan-Africanism, liberation movements, and achievement of independence. Political, social, and economic change in the colonies and in the independent states of Africa. Neocolonialism, emergence of national development, apartheid in South Africa, ideological conflict in contemporary Africa, and Africa in world affairs since 1957. Mr. Obichere

178A-178B. History of West Africa. Lecture, three hours:

178A. West Africa from Earliest Times to 1600. Mr. Obichere, Mr. Posnansky

178B. West Africa since 1800. Mr. Obichere

178C. Social and Economic History of West Africa since 1600. Lecture, three hours. Analysis of main currents of West African social, cultural, and economic history since the fall of the Songhay Empire. Emphasis on the family, religious values, education, urbanization, migrations, arts, slavery, and the slave trade. Roles of economic forces and institutions in promoting or inhibiting economic change in West Africa; ethnic diversity and sociopolitical integration; colonial economic systems and efforts at economic planning and development since the 1950s. Mr. Obichere

177. Ethiopia and the Horn of Africa. Lecture, three hours. Survey of history of Ethiopia, Somalia, and Sudan. Mr. Ehret

177A-177B. History of Eastern Africa. Lecture, three hours:

177A. Cultural diversity of Eastern African societies, growth of more complex political systems, and impact of international trade to the later 19th century. Mr. Alpers, Mr. Ehret, Mr. Posnansky

177B. Economic, social, and political history of Eastern Africa since imposition of colonial rule, with emphasis on underdevelopment and protest. Mr. Alpers, Mr. Ehret, Mr. Posnansky

182A. From the Origins to 1870. Origins of the South African peoples and their interactions to 1870. Attention to social and economic as well as political aspects. Mr. Ehret

182B. Since 1870. Since 1870. Interactions between the inhabitants of southern Africa since 1870. Attention to social and economic as well as political aspects.

182A-182B. Thought and Society in China. (Not the same as courses 182A-182B prior to Fall Quarter 1988.) Lecture, three hours:

182A. To 1000. Recommended prerequisite: course 11B or equivalent. Elite and popular expressions of Chinese cultural life examined in readings and lectures. Focus on diversities of thought in the classical legacy and their evolution under the impact of Buddhism to 1000. Emphasis on the intersections between intellectual life and social, political, and economic conditions. Mr. Elman, Mr. von Glahn

182B. Since 1000. Recommended prerequisite: course 11B or equivalent. Elite and popular expressions of Chinese cultural life from 1000 to the 20th century. Emphasis on the social and political contexts within which Chinese orthodox and heterodox values evolved and changed. Evaluation of iconoclasm of Chinese intellectual life in the 20th century in light of earlier currents of thought. Mr. Eimerman

183A-183B. Society and Economy in China. (Not the same as course 183 prior to Fall Quarter 1988.) Lecture, three hours:

183A. To 1500. Recommended prerequisite: course 11A or equivalent. Survey of main features of Chinese society and economy in the premodern era, with emphasis on interplay of economic forces, ideas, and social and political institutions; structure of the imperial state; medieval economic revolution; gentry society. Mr. Huang, Mr. von Glahn

183B. Since 1500. Recommended prerequisite: course 11B or equivalent. Social-economic conditions of the presentation of the late imperial period in comparative perspective; Western impact and Chinese development and underdevelopment; change and continuity in revolutionary China. Ms. Bernhardt, Mr. Huang, Mr. von Glahn

184. 20th-Century China. (Not the same as course 184 prior to Fall Quarter 1988.) Lecture, three hours. Recommended prerequisite: course 11B or equivalent. Political, economic, and intellectual development in context of social-economic trends; human agency, structural change, and historical conjunctures in the 20th century. Ms. Bernhardt, Mr. Huang

188. Shinto, Buddhism, and Japanese Folk Religion. Lecture, three hours. Social dimension of various "ways" of religious devotion, with emphasis on cultural nationalism, Buddhism's medieval "reformation" and Zen's relation to the warrior culture, folk religious aspects such as shamanism, ancestor worship, and folk shrines. Mr. Matsuda

187A-187B-187C. Japanese History. Lecture, three hours. Political, economic, and cultural development of Japan from prehistory to the present. 187A. Ancient — Prehistory to 1600. 187B. Early Modern — 1600 to 1868. 187C. Modern — 1868 to the present. Mr. Notelehefer, Mr. Ooms, Ms. Silverberg

188A. Early History of India. Lecture, three hours. Introduction to civilization and institutions of India. Survey of history and culture of the South Asian subcontinent from earliest times to founding of the Mughal Empire. Mr. Wolpert

188B. Recent History of India and Pakistan. Lecture, three hours. History of the South Asian subcontinent from founding of the Mughal Empire through era of European expansion, British rule, and national movement to the present. Mr. Wolpert

190A-190B. History of Southeast Asia. Lecture, three hours:

190A. Early History of Southeast Asia. Political and cultural history of the peoples of Southeast Asia from earliest times to about 1815. Mr. SarDesai

190B. Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on expansion of European influence in political and economic spheres, growth of nationalism, and process of decolonization. Mr. SarDesai

M191A-M191B. Survey of Jewish History. (Same as Jewish Studies M191A-M191B.) Lecture, three hours. Social, political, and religious developments from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. Consult Schedule of Classes for specifics. May be taken independently for credit. Mr. Bolle

M192A-M192B. Jewish Intellectual History. (Formerly numbered 192A-192B.) (Same as Jewish Studies M192A-M192B.) Lecture, three hours. Development of Jewish self-understanding in relation to intellectual currents of the environment as expressed in the halacha, in philosophy, and in cabalism. Mr. zipperstein

M193A-193B. Society and Economy in China. (Not the same as course 193A-193B prior to Fall Quarter 1988.) Lecture, three hours. Examination of specific Chinese cultural life from 1000 to the 20th century. Emphasis on the social and political contexts within which Chinese orthodox and heterodox values evolved and changed. Evaluation of iconoclasm of Chinese intellectual life in the 20th century in light of earlier currents of thought. Mr. Eimerman

193A. Early Christianity. Lecture, three hours. Study of the religious, social, cultural, and political environment and its impact on the spread of Christianity. Mr. Bartchy

193B. Religions of South and Southeast Asia. Lecture, three hours. Comparative study of the major religions of the area. Topics vary from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. Consult Schedule of Classes for specifics. May be taken independently for credit. Mr. Bolle

193C. Religions of South and Southeast Asia. Lecture, three hours. Prerequisite: course 193A. Topics vary from year to year and include Buddhism in India; religions of Java and Bali; nonliterate traditions of India and Southeast Asia. Consult Schedule of Classes for specifics. May be taken independently for credit. Mr. Bolle

193D. Religions of the Ancient Near East. Lecture, three hours. Major polytheistic systems of the ancient Near East, with emphasis on Mesopotamia and Syria and their influence on Judaism. Concepts of divinity; varying concepts of hierarchy, hierarchies of gods, prayer and cult, magic, wisdom, and moral conduct. Mr. Buccellati

193E. Special Topics in History of Religions. Lecture, three hours. Prerequisite: course 193A. Topics vary from year to year and include specific topics such as history of Judaism, religions of ancient Israel, religious, social, and political world, and methodological issues in Jewish Studies M191A-M191B.) Lecture, three hours. Social, political, and religious developments from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. Consult Schedule of Classes for specifics. May be taken independently for credit. Mr. Bolle

194A. History of Early Christians. Lecture, three hours. Christian movement from its origins to ca. 160 C.E., stressing its continuity/discontinuity with Judaism, various responses to Jesus of Nazareth, writings produced during this period, movement's encounters with its religious, social, and political world, and methodological issues in Jewish Studies M191A-M191B.) Lecture, three hours. Social, political, and religious developments from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. Consult Schedule of Classes for specifics. May be taken independently for credit. Mr. Bolle

194B. Religious Environment of Early Christians. Lecture, three hours. Rich variety in religious practice and thought in the Mediterranean world of the 1st century C.E. and its context of the developing Christian movement. Topics include the Pharisees, Qumran, Philo, Stoics, Epicureans, traditional Greek and Roman religions, "mysteries," astrology, magic, gnosticism, and emperor-worship. Mr. Bartchy

194C. Jesus of Nazareth in Historical Research. Lecture, three hours. Prerequisite: course 194A. Study of the life and teaching of Jesus of Nazareth in the context of his social, economic, political, and religious contexts. Mr. Bartchy
195A-195B-195C. History of Science. (Formerly numbered 195A-195D.) Lecture, three hours. Prerequisite: course 3A or consent of instructor.

195A. Medieval and Renaissance Science. Continuity and discontinuity in scientific traditions from the 12th to the 17th century; interrelationships between theology, scientific thought, and social conditions. Theories of force, motion, and space; some attention to occult sciences. Mr. Funkenstein

195C. Perspectives on Modern Physical Science. Selected aspects of 19th- and 20th-century physical science, typically including science and industrialization, thermodynamics, electromagnetism, relativity, quantum mechanics, and the atom bomb. Mr. Wise

M195F-M195G. History of Biological Sciences. (Same as Anatomy/Medical History M106A-M106B.) Lecture, three hours. M195F. Biological Sciences from Ancient Times to the Early 19th Century; M195G. Biological Sciences from the Early 19th Century to the Mid-20th Century. Mr. Frank (F, W)

197. Undergraduate Seminars. Seminar, three hours. Limited to 15 students meeting with a faculty member. Organized on a topics basis with readings, discussions, papers. Signups and descriptions of offerings each term are available in undergraduate counselor's office (6248 Bunch Hall). May be repeated for credit. When concurrently scheduled with courses 201A-201U or 203, undergraduates must obtain consent of instructor to enroll.

199. Special Studies in History. Intensive directed research program. Eight units may be applied toward the major requirements.

199A. Extensive reading and research in the field of proposed honors thesis. Report on work in progress to be made to sponsoring professor at regular intervals.

199B. Seminar meetings on research methods with continued reading and research culminating in draft of honors thesis.

199C. Revisions of draft and preparation of polished honors thesis; oral examination on thesis.

199I. Independent Study for Internships. Prerequisite: maintenance of 3.0 grade-point average in the major. Independent study course to be supervised only by Field Studies Office and faculty advisor. Further supervision to be provided by business for which student is doing internship. May not be used to satisfy requirement for course 197 or 199. Normally, only four units of internship with History Department are allowed. P/N grading.

Graduate Courses

Admission to all graduate courses is subject to consent of instructor and to appropriate language qualifications. For multiterm courses, credit and grades are given only on completion of the full seminar sequence, with In Progress grading until the last term unless otherwise noted. Topics courses and seminars may be repeated for credit.

M200V. Advanced Historiography: Afro-American. (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit.

M200X. Advanced Historiography: American Indian Peoples. (Same as American Indian Studies M200A.) Seminar, three hours. Designed to familiarize students with major genres of literature relating to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

200Y. Advanced Historiography in Application of Economics to History. Discussion, three hours.

M201A. Seminar in the Theory of History; Mr. Sokoloff, Ms. Yeager

201A-201U. Topics in History, Seminar, three hours. Topic titles are as follows for courses 200A-200U. Graduate courses involving reading, lecturing, and discussion of selected topics. Does not fulfill seminar requirements for Ph.D. degree. May be repeated for credit. When concurrently scheduled with course 197, undergraduates must obtain consent of instructor to enroll.

M201L, China — Seminar in Classical Historiography and Readings in Classical Studies. (Same as Chinese M201.) Seminar, three hours. Prerequisite: two years of classical Chinese or working knowledge of classical Chinese. Readings in late Imperial Chinese Service Examination essays.

Mr. Elman

202A-202B. Seminars in Comparative Modern Economic History. Discussion, three hours. Prerequisite: graduate standing. Study of problems of modern economics in the 19th and 20th centuries, including such topics as industrialization, growth, demography, development, and economic change. In Progress grading.

M203A-M203B. Social Theory and Comparative History. (Formerly numbered 203.) (Same as Political Science M291A-M291B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

Mr. Ashcroft, Mr. Brennan

204A-204B. Seminars in Near and Middle Eastern History. Seminar, three hours. Methodology, socio-economic and political change in the Arab world.

Ms. Marsot

205A-205B. Seminars in Medieval Middle Eastern History. Seminar, three hours.

Mr. Morony

206A-206B. Seminars in Social History of the Middle East. Seminar, three hours. Interrelationship of city, tribe, and village in the Middle East; role of such definable social groups as women, religious classes, middle classes, landlords, tribesmen, and peasants; social change. Mr. Keddie

M207. Seminar in Ancient Mesopotamia. (Same as Ancient Near East M250.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

Mr. Buccellati

209A-209B. Seminars in Ottoman and Modern Turkish History. Seminar, three hours.

Mr. Shaw

211A-211B. Seminars in Armenian History. Seminar, three hours. Mr. Hovannisian

C212. Methods in Armenian Oral History. Seminar, three hours. Prerequisite: proficiency in Armenian language. Lectures and laboratory in methods of taking, processing, and utilizing depositions and other oral sources for Armenian history, including project assignment in the field. May be concurrently scheduled with course C112D. Mr. Hovannisian

215A-215B. Seminars in Ancient History. Seminar, three hours. Mr. Chambers, Mr. Mello

216A-216B. Seminars in Byzantine History. Seminar, three hours.

217. Sources and Handbooks of Medieval History. Seminar, three hours. Prerequisite: reading knowledge of German or French. Introduction to types of medieval source materials and the handbooks needed to use them. Mr. Rouse

218. Medieval Latin Literary History. Seminar, three hours. Recommended prerequisite: reading knowledge of Latin and German or French. Examination of aspects of medieval history through study of paleography, medieval libraries, and transmission of ancient medieval authors. Mr. Rouse

219A. Paleography I. Seminar, three hours. Prerequisite: reading knowledge of Latin or German or French. History of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading.

Mr. Rouse (alternate years)

219B. Paleography II. Seminar, three hours. Prerequisite: reading knowledge of Latin and German or French. History of the manuscript book from the Carolingian renaissance through the invention of printing, with emphasis on dating and localization as well as on proficiency in reading.

Mr. Rouse (alternate years)

220A-220B. Seminars in Church and Monarchy in the Early Ages. Seminar, three hours. Textual studies and interpretative problems in constitutional, legal, and intellectual history of the Latin church and of Western European monarchies, with special attention to the German monarchy, from the 11th to 14th century.

Mr. Benson

221A-221B. Seminars in Medieval History. Seminar, three hours. Mr. R.I. Burns

222A-222B. Seminars in Medieval Intellectual History and History of Science. Seminar, three hours. Selected problems from medieval and early modern philosophy, science, political theory, theology.

Mr. Funkenstein

225. Colloquium for Entering Graduate Students in Modern European History. Seminar, three hours. Normally limited to and open only to all modern European history graduate students. Introduction to topics, methods, and historiography of modern European history.

Mr. Reilly, Mr. Wolt

226A-226B. Seminars in the Italian Renaissance. Seminar, three hours. Mr. R建军

227A-227B. Seminars in the Reformation. Seminar, three hours. Mr. D. Allen

229A-229B. Seminars in Early Modern European History. Seminar, three hours. Selected problems from medieval and early modern history.

Mr. Martins, Mr. Symcox

230A-230B. Seminars in Modern European History. Seminar, three hours. Mr. Berenson, Mr. Loewenberg, Mr. Silverman, Mr. Weber

231A-231B. Seminars in Modern European Intellectual and Cultural History. Seminar, three hours.

Mr. Loewenberg, Ms. Silverman, Mr. Weber, Mr. Wolt

232A-232B. Seminars in French History of the 19th and 20th Centuries. Seminar, three hours. Mr. Berenson, Ms. Silverman, Mr. Weber

233A-233B. Seminars in Russian/Soviet History. Seminar, three hours. Mr. Rogger

234A-234B. Seminars in Modern History of Spain, Portugal, and Italy. Seminar, three hours.
M236A. Proseminar in Political Psychology. (Same as Political Science M261A and Psychology M262A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making. Mr. Sears

236B. Seminar in Psychohistory. (Formerly numbered 236A-236B.) Seminar, three hours. Exploration of individual and group psychological processes and their uses in historical research. Mr. Friedlander, Mr. Loewenberg, Mr. Wohl

239A-239B. Seminars in English History: Middle Ages. Seminar, three hours. Mr. Waugh

240A-240B. Seminars in English History: Modern Ages. Seminar, three hours. Mr. Brewer, Mr. Urdank

244A-244B. Seminars in British Empire History. Seminar, three hours.

245. Colloquium in U.S. History. Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new methodological and conceptual approaches, use of source materials, and current state of U.S. historiography.

246A-246B. Seminar in Early American History. Seminar, three hours. Mr. Appleby, Mr. Nash

247A-247B. Seminar in the Middle Ages. Seminar, three hours. Ms. Appleyr, Mr. Nash

248A-248B. Seminar in the Renaissance. Seminar, three hours. Mr. Gatell

250A-250B. Seminars in U.S. History of the Middle 19th Century. Seminar, three hours. Mr. Gatell, Mr. Howe

252A-252B. Seminars in Recent U.S. History to 1930. Seminar, three hours. Mr. Coben, Mr. Hines, Mr. Schulman

253A-253B. Seminars in Recent U.S. History since 1930. Seminar, three hours. Mr. Hines, Mr. Weiss

254A-254B. Seminars in U.S. Social and/or Intellectual History. Seminar, three hours. Mr. Howe

255A-255B. Seminars in History of Business and Government in the American Economy. Seminar, three hours. Mr. Yeager

256A-256B. Seminars in American Diplomatic History. Seminar, three hours. Mr. Dallek

257A-257B. Seminars in U.S. Urban History. Seminar, three hours. Mr. Hines, Mr. Monkkonen

258A-258B. Seminars in Working Class History. Seminar, three hours. Mr. Laslett, Mr. Saxton

259A-259B. Seminars in Social History of Women in the U.S. Seminar, three hours.

260A-260B. Seminars in Native American History. Seminar, three hours. Ms. Meyer

261A-261B. Seminars in Afro-American History. Seminar, three hours. Social and political history of the Afro-American, including emphasis on development and structure of subcultures in American racial concepts and dilemmas, black and white. Mr. Hill

262A-262B. Seminars in Chicano History. Seminar, three hours. Mr. Gómez-Quiñones

263A-263B. Seminars in History of the American West. Seminar, three hours.

M264. History of American Education. (Same as Education M201C.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today. Mr. S. Cohen

M265. Latin American Research Resources. (Same as Latin American Studies M200 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results. Mr. Lauperhass

266A-266B. Seminars in Colonial Latin American History. Seminar, three hours. Mr. Lockhart

267A-267B. Seminars in Latin American History: 19th and 20th Centuries. Seminar, three hours.

M268A-M268B. Seminars in Recent Latin American History. (Same as Latin American Studies M268A-M268B.) Seminar three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In P. Wilkie grading.

275. Introduction to Professional Study of African History. Seminar, three hours. Required of all entering graduate students in African history. Strongly recommended for students with a history concentration in African Area Studies M.A. program. Source identification, research methodologies, historiographical traditions, historical interpretation, and approaches to teaching.

276. African Archaeology: Field Techniques (2 and 8 units). Seminar, three hours. Prerequisites: any introductory course in archeology and preferably an African history course. Field course on an African excavation to provide basic skills-reconnaissance, surveying, excavation techniques, conservation, and scientific sampling required by an archaeologist in Africa, together with introduction to ethnographic survey and oral data collection. Mr. Posnansky

277. African Archaeology: Data Analysis (2 and 8 units). Seminar, three hours. Prerequisite or corequisite: course 276. Field course to equip students to handle finds from excavations. Analysis, description, illustration, and interpretation of actual archaeologi cal and/or ethnographic collection. Mr. Posnansky

278A-278B. Seminars in African History. Seminar, three hours.

282A-282B. Seminars in Chinese History. (Formerly numbered 282A-282B-282C.) Seminar, three hours. Ms. Bernhard, Mr. Elman, Mr. Huang, Mr. von Glahn

285A-285B. Seminars in Modern Japanese History. Seminar, three hours. Mr. Notehelfer

288A-288B. Seminars in South Asia. Seminar, three hours. Mr. Wolfert

289A-289B. Seminars in Southeast Asia. Seminar, three hours. Mr. SarDesai

291A-291B. Seminars in Jewish History. Seminar, three hours. Studies in intellectual and social history of Jewish people from ancient times to the modern period. Mr. Funkeinstein, Mr. Zipperstein

293A-293B. Seminars in History of Religions. Seminar, three hours.

295. Theories of Scientific Change. Seminar, three hours. Historical and philosophical perspectives on science, focusing on rationality of scientific change and logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, Toulmin, Lakatos, Holton, Buchdahl, Feyn-}

History/Art History (Interdepartmental)

6248 Bunche Hall, (213) 825-3720

Scope and Objectives

The interdisciplinary major in history/art history allows students to study the relationship between art history and the history of society, politics, and culture.

Bachelor of Arts Degree

All applicants are processed and screened by the interdepartmental program committee. Lower division history and art history courses may be applied toward the general education requirements: a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major.
No course for the major may be taken on a P/NP grading basis except Art History 125.

If you wish to confer with a counselor regarding program planning and major requirements, contact the history/art history counselor at 825-3720.

Preparation for the Major
Required: History 1A-1B-1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

The Major
Required: History 100 or 101; 197 or 199; and courses as indicated in the following groups:

Group F — Two art history elective courses selected from the above lists. You may also take Art History M113, 125, 127, 197, 199 to meet this requirement.

---

Honors Collegium

A311 Murphy Hall, (213) 825-1553

The Honors Collegium is an unusual educational alternative designed primarily for students in their freshman and sophomore years. Entering freshmen with at least a 580 SAT verbal score who have satisfied the Subject A requirement and continuing students with a UCLA grade-point average of 3.0 who have satisfied the Subject A requirement may enroll in specially devised Honors Collegium courses with an interdisciplinary emphasis. The Collegium offers small classes and individual attention. It encourages animated discussion among students, as well as between students and professors. And it seeks to provoke scholarly exchange across the major disciplines in the University.

Each Collegium course is staffed by a director who is distinguished in teaching and scholarship, by a variable number of guest lecturers, and by additional specialists in their fields. Many Collegium courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Honors Programs Office, A311 Murphy Hall, to advise and help you plan an integrated academic program.

In 1990-91 the Honors Collegium will offer the following one-term courses, most of which carry four units of credit each; the six-unit courses are so indicated.

Lower Division Courses

1. Chemistry and the Logic of Discovery. Lecture, four hours; discussion, two hours. Designed for non-science majors. Exploration of laws, theories, methods, and techniques of chemistry and chemical physics, eliciting discussion of ethics and social impact of science. P/NP or letter grading.

2. Historical and Sociological Perspectives on Women and Work (6 units). Lecture, three hours; writing seminar, two hours. Exploration of the paradox of a postwar increase in women's employment and a comparative stasis in their range of occupations through investigation of historical development of women's work in the U.S. P/NP or letter grading.

4. Fiction and Freud's Masterwork. Study of Freud's The Interpretation of Dreams and Dicken's David Copperfield as autobiography, social history, methodology, and literature, and as a way of discovering a shared European history. P/NP or letter grading.

6. Chemical Ecology and Plant Life. Lecture, three hours; discussion, one hour. Consideration of how plants communicate their presence to other plants, animals, and microbes in a process involving chemical substances and known as chemical ecology. P/NP or letter grading.

7. Technology and Society. Exploration of technological and societal trade-offs which must be made in a democratic society and their long-term consequences; examination of ways to modify economic, political, educational, and ecological systems to make social and technological demands compatible. P/NP or letter grading.

8. Contemporary Fiction and Psychology of the Self. Seminar, three hours. Examination of relationship between personal and interpersonal dynamics in literature as they are illuminated by Heinz Kohut's theories of self-psychology. P/NP or letter grading.

9. Human Dimensions of Global Environmental Change. Seminar, three hours. Examination of changes in natural environment wrought by human action and, in turn, effects of these changes on human beings and their societies. P/NP or letter grading.

10. Historical and Sociological Perspectives on Women and Work (6 units). Lecture, four hours; discussion, one hour; writing seminar, two hours. Examination of progressive discovery of moving pictures from the late 18th to late 19th century and of creation of cinema culture. P/NP or letter grading.

11. Technology and Society. Exploration of technological and societal trade-offs which must be made in a democratic society and their long-term consequences; examination of ways to modify economic, political, educational, and ecological systems to make social and technological demands compatible. P/NP or letter grading.

13. Biological and Sociological Perspectives on Women and Work. Lecture, two hours; discussion, two hours. Study of cultural and industrial democracy, addressing both theories of worker rights and several cross-cultural case studies exemplifying experiments in democracy in the workplace. P/NP or letter grading.

14. AIDS and Social Policy in the U.S. Lecture, three hours; discussion, two hours. Study of economic and industrial democracy, addressing both theories of worker rights and several cross-cultural case studies exemplifying experiments in democracy in the workplace. P/NP or letter grading.

15. Economic and Industrial Democracy. Lecture, two hours; discussion, two hours. Study of economic and industrial democracy, addressing both theories of worker rights and several cross-cultural case studies exemplifying experiments in democracy in the workplace. P/NP or letter grading.

16. Contemporary Fiction and Psychology of the Self. Seminar, three hours. Examination of relationship between personal and interpersonal dynamics in literature as they are illuminated by Heinz Kohut's theories of self-psychology. P/NP or letter grading.

17. Archetypal Heroines. Seminar, three hours. Examination of archetypal women in classical/traditional literature of several cultures and their revised reconstructions in contemporary ones. P/NP or letter grading.

18. Science of Computation. Lecture, four hours; computer laboratory, two hours. Examination of science of computation, information processing, and mathematical proof in fields from solid-state physics to artificial intelligence. P/NP or letter grading.

19. The 1989's and Birth of the Cinema (6 units). Lecture, four hours; discussion, one hour; writing seminar, two hours. Examination of progressive discovery of moving pictures from the late 18th to late 19th century and of creation of cinema culture. P/NP or letter grading.

20. Human Dimensions of Global Environmental Change. Seminar, three hours. Examination of changes in natural environment wrought by human action and, in turn, effects of these changes on human beings and their societies. P/NP or letter grading.

21. Rise and Fall of Modernism (6 units). Seminar, three hours; writing seminar, two hours. Examination of progressive discovery of moving pictures from the late 18th to late 19th century and of creation of cinema culture. P/NP or letter grading.

22. Human Dimensions of Global Environmental Change. Seminar, three hours. Examination of changes in natural environment wrought by human action and, in turn, effects of these changes on human beings and their societies. P/NP or letter grading.

23. Minds, Brains, Humans, and Computers. Seminar, three hours; computer laboratory, three hours. Investigation into the mind/body problem and current theories of what constitutes the mind, including study of artificial intelligence and essentials of programming in LISP (an artificial intelligence program). P/NP or letter grading.

48. Computers, Science, and Computer Science. Seminar, three hours. Study of computers and nature of automatic computation, both in theory and in current practice, including discussion of information, processing, artificial intelligence, social effects of computerization, and capabilities and limitations of computer technology. (Key: Sp)

50B. Gender and Race: Constructions of Gender. Political Thought. Lecture, three hours; discussion, one hour. Course 50A is not prerequisite to 50B. Comprehensive introduction to Greek views of human nature with concentration on gender and race, especially as these issues are manifested in Plato's works. Examination of potential questions: pessimism, stoicism, rebellion, escapeism, etc. Readings from St. Benedict, Dostoevsky, Euripides, Hume, Kierkegaard, Rousseau, and Weil. P/NP or letter grading. Ms. Adams (Sp)

56. Structure and Development of Language. Lecture, four hours; discussion, one hour. Study of nature of human language, including its formal character (phonetics, syntax), differences and similarities in sign languages and spoken languages, language acquisition, relationship between language and other mental abilities, and autonomous nature of language as a system of knowledge. P/NP or letter grading. Ms. Curtiss (Sp)

61. Social Theory in the 20th Century. Lecture, three hours; discussion, one hour. Examination of the strikingly subjective thrust of 20th-century social thought which has emphasized cultural and emotional structure rather than the material, objective world. Focus on deconstruction, phenomenology, existentialism, and functionalism and the role of technology in readings from Durkheim to Jean-Paul Sartre. P/NP or letter grading. Mr. Entwinn (W)

62. Community and Self-Interest in History of American Culture (6 units). Lecture, four hours; discussion, one hour. Exploration of historical origins of the frequently contradictory values which inform American thought and culture: hierarchy and equality, institutional constraints and voluntary cooperation, sense of mission, and belief in the autonomous individual. Ms. Howe (W)

68. History of Social Thought. Lecture, three hours; discussion, one hour. Study of significant forms of social theory and social change from the English Revolution to beginning of the 20th century, including readings from Hobbes, Rousseau, Smith, Marx, and Nietzsche. P/NP or letter grading. Mr. Prager (Sp)

71. Physics of Music. Seminar, three hours; laboratory demonstration, two hours. Exploration of relationship between musical sound as a physical phenomenon and the aesthetic perception of it as music. Study of physical principles of instruments, role of nonacoustics, and theoretical basis of sound reproduction, including digital recording and signal processing. P/NP or letter grading. Mr. Greene (Sp)

73. Elementary Particles in the Universe. Lecture, two hours; discussion, 90 minutes. No special mathematical knowledge required. Examination of elementary particle physics: history of and current study in laboratories around the world and its role in assessing the early evolution of the universe. P/NP or letter grading. Mr. Clive (F)

83. Politics and the Rhetoric of Literature (6 units). Seminar, four hours; writing seminar, two hours. Examination of relationship among politics, rhetoric, and literature. Study of literature from classical times to the present, broadening into general discussions of development of political discourse in Western thought, particularly the correlation of structures, fundamental assumptions, and the practical business of living. P/NP or letter grading. Ms. Wilson (W)

86. Federico Garcia Lorca and the Literature of New York. Lecture/discussion, three hours. Designed to place Lorca in the international context of urban literature. Examination of Lorca's poems (in translation) and drawings as representations of New York in art, cinema, and literature. P/NP or letter grading. Mr. Morris (Sp)

87. Cognitive Revolution: Mind and Language, Culture and Ideology, Freedom and Creativity. Lecture, four hours; discussion, one hour. Examination of "cognitive revolution" in history of ideas, particularly the attempt to assimilate linguistics to the Galilean style of the natural sciences and impact this has had on diverse fields of study. P/NP or letter grading. Mr. Otero (Sp)

94. American Presidency: Psychocultural Perspectives. Seminar, three hours. Focus on six American presidents, all of whom have been influenced by a combination of liberal and conservative ideas. Exploration of their political actions through study of their personalities and the national and political culture in which they functioned. P/NP or letter grading. Mr. Dalek (F)

97. Issues in American Foreign Policy: Methodology of Assessment. Lecture/debate, three hours; discussion, one hour. Examination in debate format of wide range of views on contemporary foreign policy issues to train students how to discern the ideological origins of policy arguments. Examination of material in major foreign policy journals. P/NP or letter grading. Mr. Spiegel (Sp)

Upper Division Course

199. Directed Honors Studies. Prerequisites: minimum of four units completed in Honors Collegium with a grade of B or better, overall UCLA GPA of 3.0 or better, consent of instructor, and dean of Division of Honors and Undergraduate Programs. Special research-writing tutorial with a director of one of the Honors Collegium courses in order to pursue in greater depth a significant topic from one of the Collegium courses. May not be repeated for credit.

HUMANITIES

334D Royce Hall, (213) 825-7650

Professors

Arnold J. Band, Ph.D. (Hebrew, Comparative Literature; Distinguished Teaching Award), Chair Ross P. Shideler, Ph.D. (Scandinavian, Comparative Literature; Distinguished Teaching Award)

Samuel Weber, Ph.D. (English, Comparative Literature)

Pier-Maria Pasinetti, Ph.D., Emeritus (Italian, Comparative Literature)

Associate Professors

Katherine C. King, Ph.D. (Classics, Comparative Literature)

Kathleen L. Komar, Ph.D. (German, Comparative Literature; Distinguished Teaching Award)

Lucia Re, Ph.D. (Italian, Comparative Literature)

Assistant Professor

C.P. Haun Saussy, Ph.D. (Chinese, Comparative Literature)

Lower Division Courses

The following courses are made up of selected masterpieces of world literature. Humanities

1A, 1B, 1C, 1D, 2A, 2B, 2C satisfy the humanities general education requirement in the College of Letters and Science.

1A. World Literature: Antiquity to Early Middle Ages. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as Iliad or Odyssey, Greek tragedies, and works from the Bible, Virgil, Petronius, St. Augustine, and others such as Gilgamesh or Tristan and Isolt.

1B. World Literature: Late Middle Ages to the 17th Century. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2B. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as Shakespeare, Cervantes, Don Quixote, Dante's Divine Comedy, Boccaccio's Decameron, Cervantes Don Quixote, Shakespeare, Calderón, Molíre, and Racine.

1C. World Literature: Age of Enlightenment to the 20th Century. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2C. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoievsky, Kafka, Joyce, Wolfe, and Stevens.

1D. Great Books from the World at Large. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature. Texts from at least three of the following areas read in any given term: Asia, Caribbean, East Asia, Latin American, and Middle Eastern literature. P/NP or letter grading.

2A. Survey of Literature: Antiquity to Early Middle Ages. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Fulfills College of Letters and Science English Composition requirement and School of the Arts and School of Theater, Film, and Television Critical Reading and Writing requirement. Study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts include works and authors such as Iliad, Greek tragedies, Aspasia, Petronius, St. Augustine, or Tristan and Isolt.

2B. Survey of Literature: Late Middle Ages to the 17th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Fulfills College of Letters and Science English Composition requirement and School of the Arts and School of Theater, Film, and Television Critical Reading and Writing requirement. Study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's Divine Comedy, Cervantes' Don Quixote, Shakespeare, Calderón, Molíre, and Racine.

2C. Survey of Literature: Age of Enlightenment to the 20th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2B. Fulfills College of Letters and Science English Composition requirement and School of the Arts and School of Theater, Film, and Television Critical Reading and Writing requirement. Study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoievsky, Kafka, and James Joyce or Wallace Stevens.
Upper Division Courses
104. The 20th-Century Continental Novel: Mann and Proust. Prerequisites: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Study of works of the 20th century as works of art and as expressions of the historical and cultural dissolution felt in early 20th-century Europe. Mr. Pasinetti

C105. Comic Spirit. Prerequisites: upper division standing, literature major. Literary masterpieces, both dramatic and nondramatic, are presented to demonstrate the comic spirit, a pervasive aspect of literary traditions. Emphasis on how poets build on works of their predecessors. May be concurrently scheduled with Comparative Literature C205. Undergraduates read all works in translation. Mr. Band

M106. Hebrew Literature in English — Literary Traditions of Ancient Israel; Bible and Apocalypse. Prerequisites: upper division standing or consent of instructor. Study of the Bible and the Apocrypha (read in translation). Ms. Komst

C107. Classical Tradition: Epic. Seminar, three hours. Prerequisites: upper division standing, literature major. Study of selected works of the classical tradition. Emphasis on how poets build on works of their predecessors. May be concurrently scheduled with Comparative Literature C207. Ms. King

C109. Crisis of Consciousness in Modern Literature. Prerequisites: upper division standing, literature major. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Woolf, Sartre, and Steinbeck. May be concurrently scheduled with Comparative Literature C209. Undergraduates read all works in translation. Ms. Komst

110. Man and His Fictions. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Study of selected works of the classical tradition. Emphasis on how poets build on works of their predecessors. May be concurrently scheduled with Comparative Literature C211. Ms. King

C111. Classical Tradition: Tragedy. Seminar, three hours. Prerequisites: upper division standing or consent of instructor. Study of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in their own time. May be concurrently scheduled with Comparative Literature C211. Ms. King

C112. Satire. (Formerly numbered 102.) Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Examination of the nature of satire, both in its modern and classical forms. Ms. Komst

114. The Short Novel. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Study of selected works as works of literary art and as relevant intellectual values in interpretation of satire. Ms. Komst

115. Four Modern Dramatists. Study of several plays by four major modern dramatists, focusing on understanding specific elements in each work and authors’ possible interrelations. Pirandello, Beckett, and Pinter are read; fourth author is selected from Ionesco, Giraudoux, Cocteau. Mr. Braunmuler

116. Man and Society in the Renaissance. Lecture, three hours; discussion, one hour. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Exploration of the role played by authors and narrators in relation to treatment of history in rhetoric of Renaissance authors ranging from Italian humanists to Machiavelli and Shakespeare. Other authors include Poliziano and Lorenzo de’ Medici. May be concurrently scheduled with Comparative Literature C241. Undergraduates read all works in translation. Ms. Re

C117. The Mystery Novel. Prerequisites: upper division standing and literature major, or consent of instructor. Study of mystery and detective fiction in England, France, and the U.S. Development of origin, form, and historical significance of the mystery fiction through close readings of selected works. May be concurrently scheduled with Comparative Literature C297. Undergraduates read all works in translation. Dr. Hutter

118. Continental African Authors. Lecture, three hours. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Introduction to new set of African authors and attempt to discern similarities or differences they may have with major authors such as Achbehe, Ngugi, Armatu, Soyinka, etc. P/OP or letter grading.

M125. Interwar Central European Prose. (Same as German M119G and Slavic M125.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in the transitional period from the 1890s to the 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. This course from Humanities 1A, 18, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. exploration of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Woolf, Sartre, and Steinbeck. May be concurrently scheduled with Comparative Literature C205. Undergraduates read all works in translation. Ms. King

M126. Postwar Central European Prose. (Same as German M119H and Slavic M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. This course from Humanities 1A, 18, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. exploration of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Woolf, Sartre, and Steinbeck. May be concurrently scheduled with Comparative Literature C205. Undergraduates read all works in translation. Ms. King

C129. Archetypal Heroes in Literature. Lecture, three hours. Prerequisite: upper division standing. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Christus, and Orpheus in literature from antiquity to the modern period. Concurrently scheduled with Comparative Literature C229. Undergraduates read all works in translation. Ms. King

138. Ancient and Medieval Oral Poetry. Prerequisite: upper division standing, literature major. Study of primary texts believed to be orally composed, their origins, characteristic forms, and function. Readings include such primary texts as Odyssey, Beowulf, The Song of Roland, and selections of Norse poetry, as well as representative oral material such as Aeneid, Norse sagas, and discussions of modern African and Yugoslavian oral poetry. Ms. King

C139. Early Medieval Literature. Prerequisites: upper division standing, literature major. Survey of Latin and Germanic literatures from fall of Rome to beginning of the 12th century. May be concurrently scheduled with Comparative Literature C239. Undergraduates read all works in translation. Mr. Calder

C210. Medieval Epics. Prerequisites: upper division standing, literature major. Consideration of five medieval epics (Beowulf, El Cid, La Chanson de Roland, Nibelungenlied, and Njáls saga), with two objectives: first, critical understanding of each work, and second, understanding of the nature of epic literature. Assignments consist of extensive reading and short oral reports. May be concurrently scheduled with Comparative Literature C240. Undergraduates read all works in translation. Mr. Condon

C241. Literary Mediation of History in the Renaissance. Seminar, three hours. Prerequisites: upper division standing, literature major. Analysis of the presence and treatment of history in rhetoric of Renaissance authors ranging from Italian humanists to Machiavelli and Shakespeare. Other authors include Poliziano and Lorenzo de’ Medici. May be concurrently scheduled with Comparative Literature C241. Undergraduates read all works in translation.

C145. Renaissance Drama. Prerequisites: upper division standing and literature major, or consent of instructor. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiaveli, Lope de Vega, Bacon, Racine, Jonson, Shakespeare. May be concurrently scheduled with Comparative Literature C245. Undergraduates read all works in translation. Mr. Braunmuller

C160. Literature and the Visual Arts, 1700 to the Present. Lecture, three hours. Prerequisite: upper division standing and consent of instructor. Knowledge of art history valuable but not required. Assumptions that literature and the visual arts are in some degree expressions of cultural and philosophical patterns of eras. Readings include works of primary authors such as Shakespeare and Milton. Mr. Brautigam

C266. Modern Tragedy. Seminar, three hours. Prerequisites: upper division standing and consent of instructor. Evolution of the autobiography from spiritual (Augustine) and secular (Calvino) sources to transition in the 18th century which combined a literary practice with a new concern with identity. Readings include works of identity. Readings include works of such authors as Wordsworth, the Bronte sisters, Turgenev, Dostoevsky, and Mann. Mr. Moretti

C268. Romantic Autobiography. Seminar, three hours. Prerequisites: upper division standing, literature major, or consent of instructor. Evolution of the autobiography from spiritual (Augustine) and secular (Calvino) sources to transition in the 18th century which combined a literary practice with a new concern with identity. Readings include works of identity. Readings include works of such authors as Wordsworth, the Bronte sisters, Turgenev, Dostoevsky, and Mann. Mr. Moretti

C270. The Dream in English and German Romantic Literature. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the dream as a standard narrative technique in English and German Romantic literature. May be concurrently scheduled with Comparative Literature C270. Undergraduates read all works in translation. Mr. Burwick

C271. Dramatic Theory and Criticism in German and English Romanticism. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Theorization of the dream as a standard narrative technique in English and German Romantic literature. May be concurrently scheduled with Comparative Literature C270. Undergraduates read all works in translation. Mr. Burwick
C172. The Grotesque in Romantic Literature and Art. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the grotesque in visual and verbal arts of the Romantic period; aesthetics of tragic-comic interaction, demonic vision, and satirical sketches of man’s abnormality and perversity. May be concurrently scheduled with Comparative Literature C272. Undergraduates read all works in translation. Mr. Burwick

C173. Theory and Texts of the Fantastic. Seminar, three hours. Prerequisites: upper division standing, literature major. Investigation of theoretical genre separation from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Cézanne, Cortazar, Landoffi, and Calvino. May be concurrently scheduled with Comparative Literature C273. Undergraduates read all works in translation. Ms. Re

C175. The 19th-Century Novel. Seminar, three hours. Prerequisites: upper division standing, literature major. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with Comparative Literature C275. Undergraduates read all works in translation. Mr. Lehan

C176. Fiction and History. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kunzt. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the postmodern novel as it developed out of modernism. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the postmodern novel as it developed out of modernism. Mr. Aaron

C186. The Postmodern Novel. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the postmodern novel as it developed out of modernism. May be concurrently scheduled with Comparative Literature C286. Undergraduates read all works in translation. Mr. Lehan

C184. Alternative Tradition: In Search of a Female Voice in Contemporary Literature. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with Comparative Literature C284. Undergraduates read all works in translation. Mrs. Komar, Mr. Komar

Scope and Objectives
The prime aim of this graduate program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with three alternative major emphases: Indo-European linguistics, Indo-Iranian or other specialized language area studies, and European and related archaeology.

Ph.D. Degree
Admission
Students admitted to graduate standing must have a B.A. degree with a major in an Indo-European language field (e.g., German, Slavic, Celtic, Romance languages, Latin, Greek), linguistics (with concentration in historical and comparative linguistics), anthropology, or archaeology. Letters of recommendation (at least two, preferably three or four) are required. Graduate Record Examination (GRE) scores are not required. Potential applicants may request a brochure by writing to the Indo-European Studies Program, c/o Folklore and Mythology Center, 1037 AGSM, UCLA, Los Angeles, CA 90024-1459.

Admission to the program itself constitutes admission to the doctoral program; a master’s degree is not offered. Should deficiencies exist in prerequisites to specific work at the graduate level, you may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

Major Fields or Subdisciplines
The Ph.D. in Indo-European Studies is offered with three alternative major emphases: (1) Indo-European linguistics; (2) Indo-Iranian or other specialized language area studies; (3) European and related archaeology.

Foreign Language Requirement
French and German are required, one during the first year. A third language is added only when relevant to your field of specialization. Proficiency in a language may be demonstrated by (1) passing the Educational Testing Service (ETS) examination with a score of 600 or better, (2) completing a level five course with a grade of B or better, or (3) passing a departmental reading examination.

Course Requirements
The course requirements vary among the three major fields of specialization. General requirements for all students regardless of specialization include knowledge of Vedic Sanskrit and Homeric Greek, basic competence in Indo-Eu-
pean linguistics (including Indo-European Studies M150 and 210), mythology (e.g., Classics 168), and archaeology (including Indo-European Studies 131, 132). Additional requirements by field are as follows:

1. **Linguistics**—An advanced seminar in comparative grammar, a minimum of four ancient Indo-European languages from different subbranches, and additional units in courses offered by Linguistics (e.g., phonetics, structural linguistics) and related departments. These additional units should be selected in consultation with your adviser.

2. **Indo-Iranian or Other Specialized Language Area**—An advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different subbranches, and additional units in the area of specialization, to be selected in consultation with your adviser.

3. **European and Related Archaeology**—A minimum of one ancient Indo-European language, an advanced seminar in European archaeology, a course in analytical methods in archaeology, and additional units in archaeology, anthropology, and related fields, to be selected in consultation with your adviser.

**Teaching Experience**
Teaching experience is highly desired, but not available within the program and therefore is not required. The program works closely with its constituent departments in an attempt to provide some teaching experience.

**Qualifying Examinations**
When you have completed the required coursework, a series of written examinations covering the major and minor fields are administered. These consist of translation and analysis of set texts from the ancient Indo-European languages and diagnostic examinations in the other fields. Following successful completion of the written examinations, the University Oral Qualifying Examination, based on the written examinations and the dissertation prospectus, is administered by the doctoral committee. It is intended to probe your grasp of the entire field. Should you fail either the written or oral examinations, the interdepartmental degree committee may allow reexamination. After successful completion of the written and oral examinations, you are advanced to doctoral candidacy and begin work on the dissertation.

**Candidate in Philosophy Degree**
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**
A final oral defense of the dissertation is optional with the doctoral committee.

---

**Upper Division Courses**

1. **European Archaeology: Proto-Civilizations of Europe.** Survey of European cultures from beginning of the food-producing economy in the 7th Millennium B.C. to beginning of the Bronze Age in the 3rd Millennium B.C.
2. **European Archaeology: Bronze Age.** Prerequisite: course 131 or consent of instructor. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.

**Graduate Courses**

1. **Indo-European Archaeology: Advanced Course.** Prerequisite: course M150 or equivalent. Comparative study of phonology, morpholology, syntax, and lexicon. Problems in analysis and reconstruction. Mr. Anttila (F)
2. **Seminar in Indo-European Archaeology.** Prerequisite: course 210. Selected topics in Indo-European comparative grammar for advanced graduate students. In Progress grading.
3. **Directed Individual Studies.** (2 to 8 units).
4. **Preparation for Ph.D. Qualifying Examinations.** (2 to 8 units).
5. **Research for Ph.D. Dissertation.** (2 to 8 units).

251. Introduction to Baltic Linguistics
International Relations

4256 Bunche Hall, (213) 825-3862

Scope and Objectives

The undergraduate specialization in international relations can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in international relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers (in business, law, journalism, or library service) with an international emphasis and (2) those preparing to teach social sciences in the secondary schools. These students should structure their programs primarily to meet the preparation requirements of the professional school or instructional credential of their choice.

Courses in management and administration, and in oral and written communications, ordinarily increase the career options of students in this program.

Special Undergraduate Program

Preparation for the Specialization

Required: Political Science 20, 50, and two courses from 10, 40, 70, 80; History 1A-1B-1C or any three courses from 5A, 5B, 8A, 8B, 8C, 9A, 9B, 9D, 10A, 10B, 11A, 11B; Economics 1 and 2, 5, or 100; Sociology 1; Anthropology 9; Geography 3 or 5.

Upper Division

The political science major should be completed as follows: any four upper division political science courses in each of Fields II and IV and two additional courses both in Field I, Field III, Subfield IIa, or Subfield IIb.

Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under Portuguese, Italian, Germanic Languages, Near Eastern Languages and Cultures, African Languages, and East Asian Languages and Cultures. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

All courses must be taken for a letter grade.

Area Focus

Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Latin America, Africa, the Atlantic area, the Soviet sphere, East Asia, Southeast Asia, South Asia, or the Middle East.

For further information, contact Vicki Waldman, Political Science Counselor, in the program office.

Islamic Studies

(Interdepartmental)

Associate Professors

Irene A. Biernan, Ph.D. (Art History)
Gerry A. Hale, Ph.D. (Geography)
Michael G. Morony, Ph.D. (History), Chair
Thomas Penchoen, Ph.D. (Near Eastern Languages and Cultures)

Scope and Objectives

The undergraduate major in this discipline is called "Near Eastern Studies." For details, see the program by that name later in this chapter.

The designation of this interdepartmental degree program is meant to convey the broadest cultural concern with peoples and places influenced by Islam, rather than a narrow approach to Islam as religion alone. Islam as a culture-forming force in history may be studied and understood through the literate sources of Islamic civilization and/or through systematic observation and examination of behavioral patterns and social relations of Muslim peoples. The commonality of an "idealized" and a "functional" or "practical" Islam does not preclude a multiple number of valid and varied approaches to Islamic studies. The program, with its core emphasis on the major languages of the Islamic Middle East, is intended to provide an internal view of the dynamics of Islamic culture.

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an academic career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

Master of Arts Degree

Admission

In addition to the general University requirements, a Bachelor of Arts degree in Near Eastern Studies or equivalent is required. The interdepartmental degree committee passes on your application for admission to the program. You are normally expected to have completed the equivalent of Arabic 102A-102B-102C and Iranian 102A-102B-102C or Turkic Languages 102B-102C. In addition, you should have completed the equivalent of two years of Near Eastern history (classical and modern). Some coursework in Islamic culture and institutions may be applied toward the history requirement. Deficiencies in any of these prerequisites have to be removed by taking the appropriate courses without credit toward the advanced degree. No special application form is required.
The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants. No screening examination is required.

A departmental brochure may be obtained by writing to the Von Grunebaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA, Los Angeles, CA 90024-1480.

**Major Fields or Subdisciplines**

Arabic, Persian, Turkish, history of the Near East, political science, anthropology, economics, geography, sociology, Islamic art, Near Eastern music.

**Foreign Language Requirement**

You are required to show proficiency in either French or German. You are expected to pass the Educational Testing Service (ETS) graduate foreign language reading examination in French or German by the end of your third term in residence.

**Course Requirements**

A minimum of nine courses is required, five of which must be at the graduate level. You must take no fewer than four courses on the appropriate level in one Near Eastern language of your choice, and no fewer than five courses selected from the relevant upper division and graduate courses in history, political science, or any of the other fields represented in the program. The selection must be limited to two of these disciplines. The omission of history may be approved only in exceptional cases. Eight units of 500-series courses may be applied toward the total course requirement, provided they are not in the same discipline. If you intend to proceed to the Ph.D. in Islamic Studies, you should show proficiency in a second Near Eastern language (Arabic, Persian, Turkish). One of the two languages required for the Ph.D. is Arabic.

**Comprehensive Examination Plan**

The thesis plan is not available in this program. You must pass written examinations in one Near Eastern language, one in its literature, one in the history of the Near East, and one other in social sciences. The examinations are constructed by the instructor responsible for each discipline. Reexamination in exceptional cases is determined by the interdepartmental degree committee. The examiner or examiners are appointed by the chair of the interdepartmental degree committee.

**Ph.D. Degree**

**Admission**

Students intending to work for the Ph.D. in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Those who enter the program with an M.A. from another university should have attained a level of preparation in languages, history, and social sciences equivalent to that required for the M.A. at UCLA. In addition, students are expected to show proficiency in a second Near Eastern language (one of the two required languages is Arabic.) Those who have not done so should make up any deficiencies by taking the appropriate courses without credit toward the degree. No special application form is required, but applications must be accompanied by three letters of recommendation.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants. A departmental brochure may be obtained by writing to the Von Grunebaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA, Los Angeles, CA 90024-1480.

**Major Fields or Subdisciplines**

Arabic, Persian, Turkish, history of the Near East, political science, anthropology, economics, geography, sociology, Islamic art, Near Eastern music.

**Foreign Language Requirement**

At the beginning of your first term in residence, you must present to the chair of the interdepartmental degree committee a written statement explaining your preparation in one of the two modern languages required by the University (generally French and German). You are expected to pass the graduate foreign language reading examination in both languages by the end of your second year in residence. For work in some fields, reading knowledge of Italian, Spanish, or Russian may be substituted for one of the above European languages after satisfactory advisement. The Educational Testing Service (ETS) examination is acceptable.

**Course Requirements**

If you are entering directly into the Ph.D. program, course requirements are the same as in the M.A. program. Beyond this, you continue advanced courses in your two Near Eastern languages, in Near Eastern history, and in one of the social sciences, on specific advisement of the interdepartmental degree committee.

**Qualifying Examinations**

Written qualifying examinations in four fields are required: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history, and one other social sciences field (anthropology, economics, geography, political science, sociology). After successfully completing the written examinations, you must pass the University Oral Qualifying Examination in order to be advanced to doctoral candidacy. Reexamination in any field is at the discretion of the doctoral committee in consultation with the chair of the program.

Research proposals, dossiers, research papers, propositions, etc., are not permitted as alternatives to the written qualifying examinations.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**

With the approval of the doctoral committee at the time of the oral qualifying examination, the final oral examination may be waived.

**Islamic Studies Course List**

Anthropology 130. Study of Culture
150. Studies in Social Systems
156. Comparative Religion
161. Development Anthropology
M163. Women in Culture and Society
167. Urban Anthropology
176. Cultures of the Middle East
215. Field Training in Archaeology

Associate Professor
Lucia Re, Ph.D., Dottore in Lettere

Lecturers
Mirella Cheeseman, Dottore in Legge Maria Pellegri, Dottore in Lettere
Althea Reynolds, B.A., Ementa

Scope and Objectives
Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdepartmental graduate programs in Romance Literatures and Languages, Comparative Literature, and Folklore and Mythology.

Bachelor of Arts in Italian

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature. While literature courses constitute the bulk of the program, a good knowledge of the language is prerequisite to all upper division literature courses credited toward the major in Italian. The use of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available in the department publication, Programs in Italian Studies, and in the department office.

Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, or equivalent.

The Major
Required: Fourteen upper division courses out of 16 courses regularly offered every year or every other academic year, including Italian 102A-102B-102C, 113A-113B, 130, 190. An additional seven are to be selected from courses 114A through 122.

Three upper division courses from other departments are strongly recommended, as follows: History 132A or 132B, and English 110. Also recommended: Art History 106A, 106B, or 106C; upper division courses in another literature and philosophy and a second language (Latin, French, Spanish, or German, at least on level three). Programs must be organized in consultation with the departmental undergraduate adviser.
Master of Arts Degree

Admission
Three letters of recommendation should be sent to the Graduate Adviser, Department of Italian, 340 Royce Hall, UCLA, Los Angeles, CA 90024-1535.

Files of prospective graduate students meeting the University minimum requirements are screened by the departmental committee on admissions. Because the department offers the master’s degree as a step toward the Ph.D. degree, all students admitted to the M.A. program are designated as “first-stage doctoral students” in order to distinguish them from students in terminal master’s degree programs. This is for administrative purposes only and has no bearing on your acceptance into the program if you do not indicate on the application that your final degree objective is the Ph.D. Admission on a provisional basis may be recommended in case of deficiencies in preparation.

Major Fields or Subdisciplines
The M.A. degree is available with specializations in Italian literature and language.

Foreign Language Requirement
Reading knowledge of one other foreign language approved by the graduate adviser or successful completion of courses through at least level three is required. This requirement must be met at least one term before the comprehensive examination.

Course Requirements
Italian Literature Specialization —
(1) For the thesis plan, 12 courses are required, including Italian 200A, 200B, 200C, and 205B. At least nine courses must be in the 200 series.

(2) For the comprehensive examination plan, 12 courses are required, including Italian 200A, 200B, 200C, and 205B. The other eight courses must be distributed in three main literary periods — Middle Ages, Renaissance, modern (at least two courses in each period). Three of these courses may be upper division if approved by the graduate adviser. Related courses in other departments, such as History 205A-205B and Art History 230, are strongly recommended.

Italian Language Specialization —
(1) For the thesis plan, 12 courses are required, including Italian 200A, 200B, 200C, 259A-259B, Latin 232, and Linguistics 100 or 140 or both. At least nine courses must be in the 200 series.

(2) For the comprehensive examination plan, 12 courses are required, including Italian 130, 200A, 200B, 200C, 259A-259B, and Latin 232 or Italian 210A or both. The others should be courses on the Middle Ages (seminar on Dante strongly recommended), Renaissance, and modern times.

No 500-series courses may be applied toward the M.A. course requirements.

Thesis Plan
This plan is recommended for research-oriented students of exceptional merit. If you have completed your first year of graduate work with at least a 3.7 grade-point average, you may be nominated by one of the faculty members of the department for application to the thesis plan.

At this point you must have completed Italian 200A, 200B, 200C, and 205B, and at least two other graduate courses in Italian. On acceptance, the guidance committee helps you select six more graduate courses in preparation for the thesis.

The thesis must be at least 50 pages long and follow the rules and style of the UCLA Ph.D. dissertation regulations. It must be submitted in Spring Quarter of your second year of graduate work. After completion of the thesis, you must pass an oral examination testing your knowledge in the field of the thesis and your general competence in Italian literature.

Comprehensive Examination Plan
In general, the department favors the comprehensive examination plan, which consists of a minimum four-hour written examination to be given before the final examination period of Fall and Spring Quarters. The examination tests your general competency and does not have major and minor fields of emphasis. After the written examination, you are required to take an oral examination. In case of failure, you may be reexamined once, subject to approval by the examination committee and the chair of the department.

Ph.D. Degree

Admission
Three letters of recommendation from professionals in the field of Italian studies should be sent to the Graduate Adviser, Department of Italian, 340 Royce Hall, UCLA, Los Angeles, CA 90024-1535.

Prerequisite for entering the department’s doctoral program is an M.A. in Italian literature from UCLA or another university in the U.S. or the equivalent. Students with a master’s degree from another institution, or the equivalent, are required to pass part 1 of the Ph.D. qualifying examinations by the end of their third term in residence. They should expect to take part 2 of the examinations after approximately eight terms.

Students admitted to the Ph.D. program without the M.A. degree must take the qualifying examinations (part 2) at the end of the twelfth term in residence, carrying a normal course load.

Students holding the M.A. from UCLA normally take part 2 of the qualifying examinations at the end of their sixth term in residence.
Major Fields or Subdisciplines

Two centuries of Italian literature in the medieval, Renaissance and baroque, or modern area comprise the major fields, while two centuries of Italian literature from any of these areas make up the minor fields.

You may select a major in a literary genre or a minor outside the department, provided that it relates to your major field of specialization and has the department's approval.

Foreign Language Requirement

This requirement is normally met by passing courses through level three in at least two of the following languages: Latin, French, German, Spanish (subject to departmental approval). A foreign language used to satisfy the requirement for the master's degree in Italian may be applied toward fulfillment of this requirement. The language requirement must be satisfied before taking part 2 of the qualifying examinations, either by Educational Testing Service (ETS) or departmental examination or by petition for course credit to the Graduate Division.

Course Requirements

In addition to those required for the master's degree, at least 10 other quarter courses, of which no more than two 596 courses may apply, are required. You also take such courses as your guidance committee may prescribe for the qualifying examinations (such as Italian 595 or 597). All courses from Italian 201 on may be applied toward the Ph.D. degree.

Qualifying Examinations

The comprehensive examination for the M.A. in Italian at UCLA corresponds to part 1 of the Ph.D. qualifying examinations.

The department also requires both written and oral qualifying examinations (part 2), which must be taken during the same academic year, although not necessarily during the same term. Normally taken six terms after the M.A. degree, the written examination consists of two parts: an eight-hour examination in your major field and a six-hour examination in your minor field. Additionally, a two-hour University Oral Qualifying Examination is required for advancement to doctoral candidacy. A summary of requirements entitled "Regulations for the Ph.D. Examination" is available in the department. In case of failure, you may be reexamined on unanimous approval of the guidance committee, at least one academic term of additional residence.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

After acceptance of the dissertation in its final form, you may be required to take an oral examination which covers principally the field within which the dissertation falls.

Lower Division Courses

Enrollment in the Italian open language laboratory is required of all students in Italian 1, 2, 2A, and 3.

1. Elementary Italian — Beginning. Lecture, five hours; laboratory, one hour.

1A. Elementary Italian — Accelerated (8 units). Lecture, 10 hours; laboratory, two hours. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 1 and 2.

Mrs. Cheeseman in charge

1G. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.

2. Elementary Italian — Continued. Lecture, five hours; laboratory, one hour. Prerequisite: course 1 or one year of high school Italian.

Mrs. Cheeseman in charge

2A. Elementary Italian — Accelerated (Continued) (8 units). Lecture, 10 hours; laboratory, two hours. Prerequisite: course 1A or 2 or two years of high school Italian. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 3 and 4.

Mrs. Cheeseman in charge

2G. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.

3. Elementary Italian — Continued. Lecture, five hours; laboratory, one hour. Prerequisite: course 2 or two years of high school Italian.

Mrs. Cheeseman in charge

3A. Intermediate Italian — Accelerated (8 units). Lecture, six hours; laboratory, two hours. Prerequisite: course 2A or 3 or three years of high school Italian. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 4 and 5.

Mrs. Cheeseman in charge

4. Intermediate Italian. Lecture, five hours; laboratory, one hour. Prerequisite: course 3 or three years of high school Italian.

Mrs. Cheeseman in charge

5. Intermediate Italian. Lecture, five hours; laboratory, one hour. Prerequisite: course 4 or four years of high school Italian.

Mrs. Cheeseman in charge

6. Elementary Italian Conversation. Lecture, five hours (first six-week session). Encompasses conversational material included in course 1, with emphasis on traveler's vocabulary.

Mrs. Cottino-Jones, Mr. Tuttle

8A-8B-8C. Italian Conversation (2 units each). Prerequisite: consent of instructor. Intended for students who have taken three to six terms of language instruction and have developed considerable skills in Italian. Designed to further improve students' spoken proficiency through constant exposure and practice of the language. Each course may be repeated once for credit.

Mrs. Reynolds in charge

25. Advanced Italian. Lecture, five hours. Prerequisite: course 25. Advanced grammar and composition course with readings from select literary works.

Mrs. Cheeseman in charge

26. Italian Cinema and Culture. Lecture, two hours: discussion, two hours; film screenings, two to three hours. Survey of development of Italian cinema and culture from the 1920s to the present through analysis of principal aesthetic, literary, artistic, and philosophical movements in Italy as reflected in works of the nation's filmmakers and writers.

Mrs. Cottino-Jones, Ms. Re (F,W,Sp)

50A-50B. Main Trends in Italian Literature.

50A. Italian Literature from Its Origins to End of the Renaissance. Study of selected works by major writers of the period, including Dante, Petrarch, Boccaccio, Poliziano, Anostio, Machiavelli, Castiglione.

50B. Italian Literature from the Baroque Period to the Present. Study of selected works by major writers of the period, including Tasso, Byron, Vico, Parmi, Affari, Foscolo, Leopardi, Manzoni, Verga, Pirandello, Svevo, Mora, Ungaretti, Montale.

Upper Division Courses

Sixteen quarter units in Italian or equivalent are required for admission to any upper division course. Upper division courses for the majors are conducted in Italian.

102A-102B-102C. Italian Cultural Experience. Lecture, three hours. Study of cultural development of Italy conducted especially with a view to contemporary situations.

102A. From Disruption of Roman Unity to Feudal and Communal Society and Culture.

102B. From Renaissance Civilization to the Baroque Age.

102C. Historical and Cultural Issues from the Age of Enlightenment to Our Day.

105. Tradition and Innovation in Italian Culture. Lecture, three hours. Italy's basic social structures and cultural institutions delineated through their historical development and as they are manifest in stresses to which the industrializing state currently is subject.

Mr. Tuttle

110A-110B. Divine Comedy in English. Lecture, three hours.

113A-113B. Dante's Divina Commedia. Lecture, three hours. Focus on Divine Comedy. Selected readings from the text integrated with relevant information on scholasticism, classical tradition, medieval literature and poetics, and sociopolitical structure of Dante's world.

113A. General Introduction and Readings from Inferno.

113B. Readings from Purgatorio and Paradiso.

Mr. Cucchetti

114A-114B. Italian Literature of the Middle Ages. Lecture, three hours. Emphasis on Still Novo, Dante's minor works, Petrarch, and Boccaccio.

Mrs. Cottino-Jones, Mr. Tuttle

Mr. Betti

118. Italian Literature of the 18th Century. Lecture, three hours. Emphasis on Goldoni, Parini, Affari.

Mr. Betti

119. Italian Literature of the 19th Century. Lecture, three hours. Survey of the Romantic age as it expresses values and national aspirations of 19th-century Italy. Emphasis on the innovative approach to poetry as seen in works of Foscolo and Leopardi and to sociohistorical novels of Foscolo, Manzoni, and Verga.

Mr. Betti

120. Italian Literature of the 20th Century. Lecture, three hours. Brief introduction to Italian literature after unification of the country, followed by concentration on selected writers seen in their political, social, and artistic contexts.

Mr. Cucchetti, Ms. Re
121. Italian Cinema. Lecture, three hours. Comparative study of specific literary works and their translations into films and of different techniques in the two forms of expression. Texts include screenplays, and works on literary and film theory.

122. Italian Theater. Lecture, three hours. Emphasis on what is alive today (read and performed) in Italian theater. Texts range from the Renaissance to the present.

130. Advanced Grammar and Composition within a Literary Context. Lecture, three hours. Prerequisite: course 25. Study in depth of idiomatic phenomena of the language from both grammatical and syntactical points of view within a literary context. Mrs. Chesseman

131. Reading and Reciting. Lecture, three hours. Prerequisite: consent of instructor based on sufficient knowledge of Italian. Emphasis on diction, interpretation, and performance of one-act plays as vehicles for perfection of pronunciation, comprehension, and fluency. May be repeated twice for credit. Mrs. Reynolds

M140. From Boccaccio to Basile (In English). (Same as Folklore M140.) Lecture, three hours. Study of origins and development of the Italian novella in its themes, structure, historical context, and European ramifications. Designed for students in other departments who wish to become acquainted with either the premises or growth of similar literary genres. Also intended for students majoring in folklore and mythology, who are given insight into Italian popular tales which are the in the case of Boccaccio were translated into highly sophisticated literary forms, as well as when (as in the case of Basile) they become embedded into the folk tradition of the Western world. Mrs. Cottino-Jones

150. Modern Italian Fiction in Translation. Lecture, three hours.

M158. Women in Italian Culture. (Same as Women's Studies M158) Lecture, three hours. Designed with intent of examining role that women have played in Italian society. Concentration alternatively on the world of medieval and Renaissance "matriarch" and on literature of "women of our time." Historical and political documents and social and religious taboos presented and discussed, together with other data derived from literature and art. Italian majors required to read texts in Italian and to prepare papers written in Italian. Mrs. Cottino-Jones, Ms. Re

190. History of the Italian Language. Lecture, three hours. Main forces which have shaped literary or standard Italian and specific ways in which the language has evolved. Tracing of its changing relations with other European languages and survey of effects wrought by historical changes, events in taste, and altered social functions. Mr. Tuttle

195. Special Fields Research (2 units). Limited to senior Italian and special fields majors. Unscheduled tutorial in which paper (15 to 20 pages) will be written in either Italian or English which requires students to unify and synthesize their experience of combining two disciplines of study. Paper graded by ad hoc committee of faculty from department, with the chair in charge.

199. Special Studies (2 to 4 units). Prerequisite: consent of instructor. Course of independent study for advanced undergraduates who wish to pursue a special research project under direction and close supervision of a faculty member.

Graduate Courses

200A. Readings in Italian Literature. Lecture, three hours. Prerequisite: graduate standing. Literature of the generation dominated by the Franciscan movement, proceeding through culture of Frederick II's court to the three classics of the 14th century — Dante, Petrarch, and Boccaccio. Early humanists, post-classic generation, and cultural booming under Lorenzo il Magnifico. Mrs. Cottino-Jones

200B. Readings in Italian Literature. Lecture, three hours. Prerequisites: course 200A, graduate standing. Literature of the High Renaissance of central Italy in its three most popular genres (lyric poetry, chivalric poem, and theater), proceeding through Counter-Reformistic culture, especially of northern and southern Italy. Main Enlightenment figures and cultural evolution stemming from them. Mr. Betti

200C. Readings in Italian Literature. Lecture, three hours. Prerequisites: course 200B, graduate standing. Literature of the Romantic era, proceeding through study of literary figures of the Italian "Risorgimento." Various "novelists" movements, literature between the two wars, and contemporary generation. Mr. Betti, Mr. Coccetti, Ms. Re

201. Bibliography and Methods of Research. Lecture, three hours. Mrs. Cottino-Jones

205A-205B-205C. Methods of Literary Criticism. (Formerly numbered 205A-205B.) Lecture, three hours. 205A. Brief history of literary criticism. 205B. Presentation, discussion, and application of basic currents of criticism from stylistics to structuralism. 205C. Prerequisite: course 205B or consent of instructor. Presentation, discussion, and application of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism. Mrs. Cottino-Jones, Ms. Re

210A-210B-210C. Early Italian Literature. Lecture, three hours. 210A. Origins of Italian Language and Early Texts. Mr. Tuttle 210B. Scuola Siciliana and Early Poetry in Central and Northern Italy. Mr. Tuttle 210C. Dolce Stil Novo. Mr. Falassi

M211. Traditional Festivals and Festive Events. (Same as Folklore M211.) Lecture, three hours. Prerequisite: consent of instructor. Analysis of traditional expressive forms and behaviors inherent in selected festivals and festive events (e.g., carnival, community folk festivals, small festive gatherings), with emphasis on their structure and human dynamics. Mr. Falassi

212A. Theory of Textual Criticism. Prerequisite: graduate standing. Presentation and discussion of methods to be employed in preparation of a critical edition of a medieval or Renaissance literary text. Mr. Tuttle

250A. Seminars on Dante. Seminar, three hours.

251. Seminar on Petrarch. Seminar, three hours.

252. Seminar on Boccaccio. Seminar, three hours.

253A-253B-253C. Seminars on Chivalric Poetry in Italy. Seminar, three hours. Relationship between the genre and its French medieval sources, with study of its evolution in Italy through Pulci, Boiardo, Ariosto, and Tasso. Mrs. Cottino-Jones

254. Seminar on Machiavelli. Seminar, three hours.

255A-255B. Seminars on the Baroque. Seminar, three hours.

256A-256B. Seminars on the 18th Century. Seminar, three hours. Mrs. Cottino-Jones

257A-257B. Seminars on Romanticism. Seminar, three hours. Mr. Pasinetti

258A-258B. Seminars on Contemporary Italian Literature. Seminar, three hours. Mr. Coccetti, Ms. Re

259A-259B-259C. Studies in History of Italian Language. Seminar, three hours. Mrs. Cottino-Jones

259A. History of the Italian Language. Prerequisite: graduate standing. Historical survey of development of the language from medieval times to unification of the country (1861). Questions della lingua, general acceptance of Florentine speech, and its evolution into the national language. Mr. Tuttle

259B. Structure of Modern Italian. Prerequisite: graduate standing. Various tendencies in modern and contemporary Italian. Foreign influences in today's Italian language. Relationship between national language and the various dialects. Mr. Tuttle

259C. Italian Dialectology. Historical differentiation of Italian dialects considered in their areal dimension. Specific geographic problems and solutions illustrating growth of the discipline up to its present merging with sociolinguistics as dialects become more vertically defined. Mr. Tuttle
Kinesiology

Assistant Professors
David L. Glanzman, Ph.D.
Scott A. Henderson, Ph.D.

Lecturers
Glenn A. Gaesser, Ph.D.
Alan J. Garfinkel, Ph.D.
Dorothy M. Phillips, M.S. (Distinguished Teaching Award)

Scope and Objectives
Kinesiology is the study of the biochemical, morphological, and general physiological responses of the human to exercise and environmental conditions; the description of movement and the neuromuscular and biomechanical determinants of motor performance; and the development, acquisition, and modification of motor performance. The purpose of this study is intended to develop and integrate principles and concepts of human movement.

Bachelor of Science Degree

Pre-Kinesiology Major
All students intending to major in kinesiology are identified as pre-kinesiology majors until the pre-major requirements have been satisfied. Transfer students with 80 or more units who enter UCLA prior to Fall Quarter 1990 must have completed one year of general chemistry with laboratory in order to be admitted as pre-kinesiology majors.

Transfer students with 80 or more units who enter UCLA in Fall Quarter 1990 and thereafter must complete the following courses prior to admission: one year of general chemistry with laboratory, one year of calculus, one general biology course. Two calculus-based physics courses or two organic chemistry courses with laboratory are recommended.

The pre-kinesiology major requirements are Kinesiology 17A, 17B, 101A, 101B; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 12A, 132B/132BL, 153A/153AL; Biology 5, 7; Mathematics 3A, 3B, 3C (or 31A, 31B, 32A); Physics 6A, 6B (or 6A, 6C); one introductory statistics course; Psychology 10.

Premajor courses outside the department may be taken for a letter grade or on a P/NP basis; Kinesiology 17A, 17B, 101A, 101B must be taken for a letter grade (certain certification and graduate programs also require letter grades for courses). All premajor courses must be passed with a grade of C or better or a P and must be completed with an overall grade-point average of 2.0 or better. Repetition of more than two premajor courses in which a grade of D, F, or NP was received or repetition of any course more than once may result in dismissal from the premajor.

The Student Affairs Office in 2834 Slichter Hall petitions you into the major after you complete the premajor courses.

Transfer students are advised to take Kinesiology 17A, 17B, 101A, 101B at UCLA because these courses emphasize the movement aspects of anatomy and physiology needed in preparation for upper division kinesiology courses. If you intend to substitute anatomy or physiology courses taken at another institution, you must pass exemption examinations.

Transfer credit for UCLA Extension coursework and for any departmental courses (including courses 17A, 17B, 101A, 101B) is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required Core Courses: Kinesiology 120, 122, 124, 126.

A total of five upper division electives (20 units) is required. Although all five courses may be taken in kinesiology, three upper division courses (12 units) must be taken in the department. Courses 193, 196A-196B, and 400-level courses may not be applied toward this requirement. One or two of the five courses (up to eight units) may be taken in other departments related to your course of study. A list of approved extra-departmental courses is available in the Student Affairs Office.

A C average must be maintained in all upper division courses taken for the major. All upper division courses required for the major (including extra-departmental electives) must be taken for a letter grade.

Honors Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in premajor courses. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

Graduate Study

The department offers Master of Science and Doctor of Philosophy degrees in the following areas of concentration: (1) biomechanics, (2) cardiorespiratory function and adaptation, (3) movement performance and learning, (4) musculoskeletal function and adaptation, (5) neural control of movement, (6) social psychological aspects of human movement.

When applying for graduate work, you should specify an interest in one of these areas of concentration.

Admission

Applicants for graduate study are expected to have completed an undergraduate degree in kinesiology or the equivalent as outlined below.
under the master's and doctoral programs. A grade-point average of at least 3.0 (B) in all upper division undergraduate coursework is required. A departmental faculty committee considers applicants on the following bases: (1) prior scholastic performance, (2) three letters of recommendation, and (3) applicant's statement of purpose, which should include (a) relevant background or preparation, (b) field of emphasis, specific study interests, and type of research sought, (c) expectations, goals, degree objective, (d) specific courses in the department to be taken and the names of one or two departmental faculty members whose research area parallels the study interest.

A list of faculty names and research interests is available from the Department of Kinesiology, 2834 Slichter Hall, UCLA, Los Angeles, CA 90024-1568. Applicants are encouraged to communicate directly with the faculty; personal interviews are required for Ph.D. applicants.

Aptitude tests, including the Graduate Record Examination (GRE) or Miller's Analogies, are not required but may be submitted for consideration.

Applications for all terms must be submitted by Fall Quarter deadlines, since applications for all terms are reviewed only in January/February each year.

**Master of Science Degree**

Applicants without an undergraduate degree in kinesiology will receive serious consideration, particularly if undergraduate or other experiences provide a strong relationship to kinesiology. However, applicants are expected to complete minimum undergraduate preparation prior to graduate work. Completion of course deficiencies may take as much as an additional year of coursework, which may not be applied toward the master's degree. Required undergraduate preparation is equivalent to the following: (1) four required courses selected from cellular biology, inorganic chemistry, organic chemistry, introductory psychology, physics (mechanics), physics (electricity), calculus (differential), and calculus (integral), (2) one course each in statistics, human anatomy, and human physiology required for the B.S. degree in Kinesiology, (3) three of the four kinesiology core courses required for the B.S. degree, and (4) one elective from the proposed area of graduate study. Additionally, applicants in the physiologically based fields (cardiorespiratory, musculoskeletal, and neural) are required to have one year of inorganic chemistry, one year of organic chemistry/biochemistry, and two terms of calculus.

**Course Requirements**

The Master of Science in Kinesiology requires nine courses: five graduate-level kinesiology courses, two courses from a related field, one second-level statistics or research design course, and one other course from either kinesiology or a related field.

A minimum of six of the nine courses must be graduate-level (200) courses, toward which one 596 course may be applied. Lists of approved related field and statistics or research design courses may be obtained from the department.

A total of eight units of Kinesiology 596 must be taken for credit; only one course (four units) may be applied toward the minimum course requirement for the master's degree. Courses 597 and 598 may not be applied toward any of the course requirements for the degree. There is no limit on the number of times a master's student may enroll in course 597 or 598.

**Thesis Plan**

Students who elect the thesis plan for the master's degree must report the results of an original research investigation. Under the guidance of the thesis committee, you must propose a problem area or outline of study, conduct original research in a specific area, and report the results. With committee approval, you may submit either a thesis manuscript or a manuscript suitable for publication.

**Comprehensive Examination Plan**

Students who elect this plan must achieve a passing mark on a comprehensive examination. The general purpose of the plan is that students acquire a thorough understanding of a reasonably broad problem area, which must be specified in consultation with an adviser. The selection of courses in the department and the related field must be pertinent to the problem area, and justification is required with the petition for advancement to candidacy.

While a written examination is required, the committee may use additional means to evaluate the competency of the candidate. If you fail the comprehensive examination, you may not repeat it until the following term. Only one repetition is allowed.

**Ph.D. Degree**

Doctoral students are expected to have the basic preparation coursework in kinesiology required of master's students. Six of the eight preparation courses required for the M.S. are required of doctoral students. You must show substantial knowledge in one of the six kinesiology areas of concentration, and undergraduate and prior graduate work is evaluated in terms of your declared area of interest.

**Major Fields or Subdisciplines**

You select one of the six areas of concentration as a major and one area as a minor. These areas are expected to relate to your proposed dissertation problem.

**Course Requirements**

Fourteen courses are specified for the doctoral degree, some of which may be satisfied by prior graduate work. Selection of all courses must be approved by the guidance committee and is determined in part by the selection of major and minor areas of concentration.

A total of eight departmental courses is required, two of which must be seminars. One seminar course requirement may be met by enrolling in two terms of Kinesiology 290. Two 596 courses may be applied toward the degree requirements.

A minimum of three courses or 12 units in a related field outside the department is required. An approved list of courses in anatomy and cell biology, biological chemistry, biology, biostatistics, education, engineering, immunology, neuroscience, pharmacology, physiology, psychology, public health, and radiological sciences is maintained by the department. A fourth course, either departmental or in a related field outside the department, and two department-approved advanced statistics courses are also required.

**First-Year Doctoral Review**

After completion of three terms of coursework, the graduate affairs committee conducts a doctoral review to determine whether you (1) continue in the doctoral program, (2) enter the master's program, or (3) discontinue graduate study in the department. The review must be completed by the end of your fourth term of graduate work as a doctoral student.

**Teaching Experience**

Each candidate must complete two terms as a teaching assistant. All teaching evaluations become a permanent part of your departmental record.

**Qualifying Examinations**

Each doctoral student must take two written qualifying examinations: one in a major area and one in a minor area. These examinations, administered in Fall, Winter, and Spring Quarters, are scored (1) passed at the Ph.D. level of achievement, (2) passed at the master's level of achievement, or (3) failed. To continue in the doctoral program, you must pass each examination at the Ph.D. level of achievement. If you fail to do so, you may (1) complete the master's degree, (2) discontinue graduate work in the department, or (3) reschedule the area examinations once at the discretion of the guidance committee.

After successfully passing the departmental written qualifying examinations, a University Oral Qualifying Examination is conducted by the doctoral committee. Normally, the examination is held the term following the completion of written examinations, all coursework, and two terms of research work with your major
professor. If you do not pass, the examination may be rescheduled at the discretion of the doctoral committee.

Dissertation/Final Oral Examination

After advancement to candidacy, you must com- plete and submit a dissertation which meets the approval of the doctoral committee. A final oral examination is generally required, although the members of the doctoral commit- tee who are to approve the dissertation have the option to waive it in exceptional cases. The major emphasis in this examination is a de- fense of the dissertation.

Lower Division Courses

5. Issues in Human Physiology: Diet and Exercise. Lecture, three hours; discussion, one hour. Not open to kinesiology premajors or majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such ill- nesses as hypertension, diabetes, and heart dis- ease. Mr. Barnard 13. Introduction to Human Anatomy (6 units). Lect- ure, four hours; laboratory, four hours. Not open to kinesiology premajors and majors; any combination of courses 13 and 17A or 17B is equivalent to eight units.

Structural survey of human body, including skeletalmus- cular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examina- tion of human cadaver specimens. Ms. Phillips

17A. Human Anatomy (5 units). (Formerly numbered 14.) Lecture, three hours; laboratory, four hours. Pre- requisite: pre-kinesiology major or consent of instructor. Through study of skeletal, articular, and muscular sys- tems. Special emphasis on relating these body struc- tures to human movement capabilities. Laboratory in- cludes examination of projected human cadaver speci- mens. Ms. Phillips, Ms. Smith

17B. Human Anatomy. Lecture, three hours; laborato- ry, two hours. Prerequisite: course 17A or consent of instructor. Structural survey of human nervous, circula- tory, digestive, respiratory, and urogenital systems. Laboratory includes examination of human cadaver specimens. Ms. Phillips, Ms. Smith

Upper Division Courses

101A. Human Physiology. (Formerly numbered 12A.) Lecture, three hours; laboratory, two hours. Pre- requisite: Biology 5, Chemistry 132A, Physics 6B. Recom- mended: Kinesiology 17A. Topics include cell and mus- cle physiology, cellular neurophysiology, and endocri- nology. Mr. Chandler, Mr. Gaesser

101B. Human Physiology. (Formerly numbered 12B.) Lecture, three hours; laboratory, 90 minutes. Prerequi- site: course 101A, Biology 5, Chemistry 132A, Physics 6B. Recommended: Kinesiology 17B. Topics include respiration and cardiovascular, renal, and gastrointesti- nal physiology. Mr. Feldman, Mr. Gaesser

112. Mechanism of Adaptation in Mineralized Tis- sues. Prerequisite: course 124. Recommended pre- requisite or corequisite: course 122 or consent of instructor. Introduction to physiological mechanisms as- sociated with adaptation of cartilage and bone. Empha- sis on biochemical, biomechanical, and structural modifi- cations of mineralized tissues for accommodating al- terations of tissue load history and some diseases. Special topics include adaptive processes associated with exercise, osteoporosis, immobilization, and space flight.

115. Aquatic Kinesiology. Lecture, three hours; lab- oratory, two hours. Prerequisite: course 124. Study of man's adaptation to aquatic environment. Mr. Engstrom

117. Conditioning for Maximum Performance. Pre- requisite: course 124. Study of factors and conditions accelerating and retarding levels of performance and work under various physiological and environmental conditions. Mr. Gaesser

118. Cellular Dynamics of Exercise. Prerequisites: courses 124, 126. Cellular responses to acute and chronic exercise. Mr. Gaesser

120. Behavioral Bases of Movement (6 units). Lec- ture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework (except for course 101B). Examination of motor performance and motor learning and influence of selected psychological vari- ables on human movement. Ms. Scanlan

121. Biomechanical Bases of Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework (except for course 101B). Kinematic and kinetic principles under- lying human movement, focusing on human neuro- muscular and skeletal systems. Mr. Gregor, Mr. Zarnicke

124. Cardiorespiratory Bases and Environmental Factors Affecting Movement (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework. Response of cardiovascular and respiratory systems to acute and chronic exercise, environmental stress, and adaptation. Mr. Barnard, Mr. Gaesser, Mr. Henderson

125. Neurovascular and Metabolic Bases of Move- ment (6 units). Lecture, four hours; laboratory, three hours. Prerequisite: completion of premajor coursework. Metabolic, muscular, and neural processes un- derlying movement and adaptation to exercise. Mr. Chandler, Mr. Edgerton, Ms. Smith

134. Electromyographic Assessment. Lecture, two hours; laboratory, three hours. Prerequisite: course 122. Techniques of electromyographic analysis com- bining theoretical aspects with laboratory experience. Mr. Gregor

139. Dissection Anatomy. Lecture, two hours; labora- tory, six hours. Prerequisites: course 122, consent of instructor. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and nervous sup- ply. Ms. Phillips

140. Mechanisms of Neuromuscular Control. Prerequisite: course 126. Recommended: Psychology 5 or 15. Advanced topics in neurophysiology of sensorimotor systems. Mr. Chandler

141. Neuromotor Control of Posture and Move- ment. Prerequisites: courses 120 and 122 (may be taken concurrently). 126. Examination of theories for neuromotor control of posture, locomotion, and vol-untary movement. Mr. Smith

144. Neural Control of Physiological Systems. Pre- requisite: courses 124 and 126, or consent of instruc- tor. Role of central nervous system in control of respira- tion, circulation, sexual function, and bladder control. Material for each section to be developed by combina- tion of lecture and open discussion. Mr. Feldman

150. Human Movement Development. Prerequisite: course 119. Movement development throughout life, with emphasis on individual and societal determinants. Mr. Cratty

155. Perceptual Motor Education. Prerequisites: courses 120, 160. Movement problems of minimally neurologically handicapped, with emphasis on cerebral palsy and Down Syndromes. Mr. Cratty

175A. Group Dynamics in Sport. Prerequisite: course 120 or consent of instructor. Examination of group dynamics in sport. Topics include group produc- tivity, group structure, leadership, motivational factors, conflict. May be concurrently scheduled with course 2276.

M180A. Neurosence: From Molecules to Mind — Cellular Mechanisms (5 units). (Same as Biology M175A and Psychology M117A.) Lecture, four hours; discussion, one hour. Prerequisites: Biology 5, 7, and 8, Psychology 3B or 6B or 8C, or consent of instructor; any combination of Kinesiology 101A and M180A is equivalent to eight units. Cellular physiology, pharma- cology, molecular biology, and development of the nervous system. P/NP or letter grading.

M180B. Neurosence: From Molecules to Mind — Integrative Mechanisms (5 units). (Same as Biology M175B and Psychology M117B.) Lecture, four hours; discussion, one hour. Prerequisites: course 101A (or Biology 171 or Psychology 115) or M180A (or Biology M175A or Psychology M117A) or consent of instructor; any combination of Kinesiology 126 and M180B is equivalent to 10 units. Central and reflex mechanisms of homeostasis, sensory information processing, and motor control. P/NP or letter grading.

M180C. Neurosence: From Molecules to Mind — Neural Bases of Behavior (5 units). (Same as Biology M175C and Psychology M117C.) Lecture, four hours; discussion, one hour. Prerequisites: course 101B (or Psychology 115) or M180B (or Biology M175B or Psychology M117B) or consent of instructor. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

191A-191Z. Proseminars in Kinesiology. Prerequi- sites: upper division standing, consent of instructor. Limited to 15 students. Advanced study of special topics. May be repeated for credit with topic change.

193. Field Studies in Kinesiology. Lecture, one hour; fieldwork, six to eight hours. Prerequisites: courses 120, 122, 124, 126, or equivalent, consent of instructor via course application. Supervised field studies in specific careers related to kinesiology. May not be repeated for credit and may not be applied toward elective requirements, even for the major. (N.S.)

196A-196B. Laboratory Practicum in Kinesiology (2 units each). Laboratory, four hours. Prerequisites or corequisites: course 139, consent of instructor. Su- pervised practicum and training for advanced stu- dents who serve as undergraduate assistants in ba- sic anatomy course in preparation of laboratory mate- rials and innovative projects. May not be applied toward the major.

197A-197Z. Variable Topics in Kinesiology. Pre- requisite: consent of instructor. Variable topics course which covers specific subjects of special interest to undergraduate students. Eight units may be applied toward B.S. degree requirements.

199. Special Studies in Kinesiology. (Formerly num- bered 199A-199ZZ.) Prerequisites: kinesiology major with advanced junior standing and 3.0 GPA in the major, or senior standing, and consent of instructor and depart- ment chair. Directed independent research with a faculty sponsor. Consent by e-mail to Mr. Crafty (slichter Hall) must be submitted to the chair during first week of classes. Total of eight units of 199 and 199H may be applied toward elective requirements for the major.
Graduate Courses

209. Environmental Factors in Exercise. Prerequisites: courses 122, 124, and 126, or consent of instructor. Environmental pressure of high altitude and underwater diving, as well as temperature factors, as they affect work performance; adaptation to unusual environments.

211. Exercise Cardiovascular Physiology. Prerequisite: Physiology 201A. Attention to cardiovascular function and adaptations associated with regular exercise training.

221. Underwater Kinesiology. Prerequisites: courses 122 and 124, or consent of instructor. Biomechanical, physiological, methodological, and behavioral limitations to underwater activities.

230A. Muscle Dynamics. Prerequisite: course 122. Recommended: course 134. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; central and peripheral control mechanisms of muscle-neural and digital computer techniques.

230B. Musculoskeletal Mechanics. Prerequisites: course 122, Mathematics 3A, 3B. Mechanical parameters of moving human musculoskeletal system, including use of cinematographic, force platform, and digital computer techniques. Topics include biostatistics, biodynamics, and empirical data modeling.

232. Biomechanics of Musculoskeletal Injury. Prerequisites: course 122, consent of instructor. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues in normal and abnormal stress situations. Analysis of connective tissue growth processes, as well as adaptations associated with regular exercise training.

235. Dynamical Systems Modeling. (Formerly numbered 235A-235B.) Concepts of dynamical systems theory as applied to physiological systems. Introduction to qualitative theory of different equations and their computer simulation, and extensive approach to example in neurophysiology, biomechanics, and systems physiology.

240. Neural Systems for Motor Control. (Formerly numbered 240.) (Same as Neuroscience M262.) Prerequisite: course 141 or consent of instructor. Advanced topics in neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-related feedback at spinal segments and control of sensorimotor areas of cerebral cortex, in respect to modification of motor output.

241. Theories of Voluntary Motor Control. Prerequisite: course 240. Exploration and discussion of neural control systems for voluntary movement, including alpha-gamma linkage and other varieties of open loops. Some attention to neural models for motor learning and memory. Ms. Smith

247. Neural Control of Cardiopulmonary Function. (Same as Neuroscience M247.) Lecture, two hours per week; laboratory, two hours per week. Prerequisites: courses 124 or 126 or equivalent. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns in behavioral state or afferent signals and (3) responses to changes in state or afferent signals behavior. Behavioral stasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems.

250. Research Issues in Kinesiology (2 units). Seminar. Prerequisite: consent of instructor. Discussion of current research issues. Topics selected by participants in class. Two 290 courses may be used to satisfy one seminar course requirement for graduate program.

278. Group Dynamics in Sport. Prerequisite: course 120 or consent of instructor. Examination of group dynamics in sport. Topics include group productivity, group structure, leadership, motivational factors, cohesion, conflict. May be concurrently scheduled with course C178.

290. Research Issues in Kinesiology (2 units). Seminar. Prerequisite: consent of instructor. Discussion of current research issues. Topics selected by participants in class. Two 290 courses may be used to satisfy one seminar course requirement for graduate program.

291A-291B. Seminars in Cardiorespiratory Function and Adaptation (2 to 4 units each). Prerequisites: course M240 or consent of instructor. Selected topics in cardiorespiratory function and adaptation. Students required to present two-half-hour seminar.

292A-292B. Seminars in Biomechanics (2 to 4 units each). Prerequisites: courses 230A, 230B, consent of instructors. Selected topics in biomechanical motor control. Students required to present two-half-hour seminar.

293A-293B-293C. Seminars in Musculoskeletal Function and Adaptation (2 to 4 units each). Prerequisites: courses 235A-235B-235C. Prerequisite: course M240 or M243 or consent of instructor. Selected topics on neural adaptations to movement, metabolic aspects of exercise, and mechanisms of connective tissue. Students required to present two-half-hour seminar.

294A-294B-294C. Seminars in Neural Control of Movement (2 to 4 units each). (Formerly numbered 294A-294B-294C.) (Same as Neuroscience M265A-M265B-M265C.) Prerequisite: course M240 or M243 or consent of instructor. Selected topics on neural adaptations to movement behavior. Students required to present two-hour seminar.

295A-295B-295C. Seminars in Movement Performance and Learning (2 to 4 units each). Prerequisite: consent of instructor. Selected topics on current issues in acquisition and control of human movement. Students required to present two-half-hour seminar.

297A-297B-297C. Seminars in Social Psychological Aspects of Human Movement (2 to 4 units each). Prerequisites: courses 272 or M273 or consent of instructor. Selected topics on current issues in social psychological aspects of human movement. Students required to present two-half-hour seminar.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant for two terms. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. In-Service Practicum for Teaching Assistants in Kinesiology (2 units). Prerequisite: consent of instructor. Required of all teaching assistants. Supervised practicum in teaching laboratory courses in kinesiology; material preparation and use of teaching aids. May not be applied toward degree requirements. F/S grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students (2 to 8 units). Petition signed by faculty sponsor, graduate advisor, and host campus instructor. Five units maximum; consent of college, department chair, and host campus instructor. May not be applied toward the University M.S. or Ph.D. degree requirements. May not be applied toward the University M.S. or Ph.D. department for code. May not be applied toward M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 16 units). To be arranged with faculty member serving as student's comprehensive examination chair or doctoral committee chair. Course section identified by two-letter code using faculty member's initials (see department code). May not be applied toward M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

599. Research for and/or Preparation of Ph.D. Dissertation (2 to 16 units). To be arranged with faculty member serving as student’s dissertation committee chair. Course section identified by two-letter code using faculty member's initials (see department code). May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.
Courses in the specialization may also be applied toward the requirements of the major where appropriate.

For further information, contact the Institute of Industrial Relations (825-9603) or Professor Sanford M. Jacoby (825-1658).

José M. Cruz-Salvadores, M.A. (Spanish)
Ludwig Lauerhass, Ph.D. (History)
Juan Rios, M.A. (Dance)
Linda Rodriguez, Ph.D. (History)

Adjunct Associate Professor
Ichak Adizes, Ph.D. (Management)

Scope and Objectives
UCLA has been in the forefront of U.S. universi-
ties with significant teaching and research
interests in Latin American studies for more
than 50 years. More than 100 faculty mem-
bers from 22 departments and professional
schools regularly offer a broad range of courses with an
emphasis on Latin America. These course of-
ferings in the humanities, social sciences, fine
arts, and professional fields provide students a
unique opportunity to focus on Latin America,
a region of growing importance.

The Latin American Studies Program, coordi-
nated through UCLA’s Latin American Center,
offers the Bachelor of Arts and Master of Arts
degrees. In the undergraduate major students
develop a program combining language and
methodological training with interdisciplinary
studies in one of three areas: arts and human-
ities, social sciences, or ecology and environ-
ment. At the graduate level, students pursue
more specialized coursework and interests, cul-
minating in an interdisciplinary research study.
Cooperative degree programs with the UCLA
Schools of Architecture and Urban Planning,
Education, Engineering and Applied Science, Li-
brary and Information Science, Management,
and Public Health provide the opportunity to
combine the M.A. in Latin American Studies with
a master’s degree in a professional field.

Bachelor of Arts Degree
Undergraduate studies of the Latin American re-
region are designed to serve the needs of (1) stu-
dents desiring a general education focused on
the Latin American cultural region, (2) students
planning to enter business, government, or inter-
national agency service, (3) students preparing
to teach social sciences or language, and (4)
students preparing for advanced academic
study of Latin America.

Preparation for the Major
You must complete all preparation courses with a C (2.0) in each course; the courses are applicable
toward the Letters and Science lower divi-
sion general education requirements.

Foreign Language Requirement
Language requirements are uniform for all stu-
dents in the major regardless of core area. Profi-
ciency in two languages equivalent to (1) Span-
ish 25 and Portuguese 3 or (2) Portuguese 25
and Spanish 5 is required. In lieu of Portuguese
1, 2, and 3, you may take Portuguese 102A-
102B which are designed for students with a
background in Spanish. An indigenous lan-
guage of Latin America (i.e., Quechua) may be
substituted for the minor language.

Course Limitations
You may not take more than eight units of Latin
American Studies 199 for letter-grade credit
nor more than eight units in any single term. No
course taken on a Passed/Not Passed basis
may be applied toward the B.A. degree require-
ments. In order to register in a 199 course, you
must have advanced junior standing and an
overall GPA of 3.0, or senior standing.

Double Majors
Through judicious use of electives, you may find
it possible to obtain the B.A. degree with two
majors (e.g., Latin American studies and histo-
ry). Interested students who have achieved ju-
ior standing should consult the undergraduate
advisers of both departments involved, initiating
the appropriate petition with the undergraduate
adviser in Latin American Studies.

Study in Latin America
You are encouraged to spend up to one year in
Latin America either (1) to study with an educa-
tion abroad program, (2) to study in Latin Ameri-
can universities, (3) to conduct research, or
(4) to complete an internship in an international
or development agency. Full credit is granted
according to the individual programs arranged in
consultation with the undergraduate adviser.
Proposals must be presented in writing to the
interdepartmental committee.

Core Areas
You select one of three core areas as the focus
of your major: arts and humanities, social sci-
ences, or ecology and environment. Require-
ments for each core area are listed below.

Core I: Arts and Humanities
Preparation — Two courses from History 8A,
8B, 8C; Latin American Studies 99 (or 197 with
department consent); Spanish and Portugu-
ese M44; Art History 55A or 55B or Ethno-
musicology and Systematic Musicology 91K
and Dance 73B.

Core Area — Ten upper division courses from
the approved list of Latin American courses
distributed as follows:

(1) Core Concentration — Five courses from
literature and folklore or the arts (art, music,
dance, theater arts) or linguistics. Only one
course from the electives list may be applied
toward the core concentration.

(2) Theory and Methods — One course from
theory and methods.

(3) Internal Breadth — Four additional courses
from the arts and humanities core area but out-
side the core concentration. No more than two
of these may be electives.

External Breadth — From the approved list,
six upper division courses outside the arts and
humanities core area distributed as follows: two
courses in each of two core concentrations such
that at least one core concentration is selected
from the social sciences core (e.g., history) and
at least one is developed within the ecology and
environment core (e.g., public health). No more
than three external breadth courses may be electives.

Approved Undergraduate Course List
(1) Literature and Folklore

Folklore and Mythology M149. Folk Literature of the
Hispanic World
History 169. Latin American Ethnology
Portuguese (Spanish and Portuguese) 130A-130B.
Survey of Brazilian Literature
C131. Colonial Brazilian Literature
C132. Romanticism in Brazilian Literature
C133. Naturalism, Realism, and Symbolism in Brazil-
ian Literature
C134. 20th-Century Brazilian Literature: Poetry and Drama
C135. 20th-Century Brazilian Literature: Novel
Spanish (Spanish and Portuguese) 136A-136B.
Survey of Spanish-American Literature
C137. Literature of Colonial Spanish America
C139. Romanticism and Realism in Spanish-American Literature
C142. 20th-Century Spanish-American Literature: Fic-
tion and the Essay
C143. 20th-Century Spanish-American Literature: Po-
ey and Drama
C144. Mexican Literature
M149. Folk Literature of the Hispanic World
170B. Senior Honors Seminar: Topics in Spanish-
American Literature

Theory and Methods

Folklore and Mythology 101. Introduction to Folklore
199. Special Topics in Folklore and Mythology Studies
199. Special Studies in Folklore
Portuguese (Spanish and Portuguese) 199. Spe-
cial Studies
Spanish (Spanish and Portuguese) 119A. Intro-
duction to Study of Literature: Prose
119B. Introduction to Study of Literature: Poetry
119C. Introduction to Study of Literature: Drama
199. Special Studies

(2) Fine Arts

Art History C117A. Pre-Columbian Art of Mexico
C117B. Pre-Columbian Art of the Maya
C117C. Pre-Columbian Art of the Andes
Dance C173B. Dance of Mexico
C180B. Studies in Dance Ethnography
183A. Dance in Latin America
Ethnomusicology and Systematic Musicology
108A-108B. Music of Latin America
113. Music of Brazil
Film and Television 106C. History of African, Asian,
and Latin American Film

Theory and Methods

Anthropology *118A, 118B. Museum Studies
*133F. Aesthetic Anthropology
*137. Ethnography on Film
Art History *199. Special Studies in Art
Dance *199. Special Studies in Dance
Ethnomusicology and Systematic Musicology
*M180. Analytical Approaches to Folk Music
*C190A-C190B. Proseminars in Ethnomusicology
Film and Television: 199. Special Studies in Film and Television
Music: 199. Special Studies in Music

(3) Linguistics
Portuguese (Spanish and Portuguese) 100A. Phonology and Morphology
*100B. Syntax
*M118A. History of Portuguese and Spanish: Phonology
*M118B. History of Portuguese and Spanish: Morphology and Syntax
Spanish (Spanish and Portuguese) *100A. Introduction to Study of Spanish Grammar: Phonology and Morphology
*100B. Introduction to Study of Spanish Grammar: Syntax
*115. Applied Linguistics
*M118A. History of Portuguese and Spanish: Phonology
*M118B. History of Portuguese and Spanish: Morphology and Syntax
*119A. Introduction to Study of Literature: Prose
*119B. Introduction to Study of Literature: Poetry
*119C. Introduction to Study of Literature: Drama
*170C. Senior Honors Seminar: Topics in Hispanic Linguistics

Theory and Methods
Anthropology: *143. Field Methods in Linguistic Anthropology
Linguistics: *100. Introduction to Linguistics
*103. Introduction to General Phonetics
*110. Introduction to Historical Linguistics
*120A. Linguistic Analysis: Phonology
*120B. Linguistic Analysis: Grammar
*C164. Modern Theories of Language
*C165A. Linguistic Theory: Phonology
*C165B. Linguistic Theory: Grammar
*170. Language and Society: Introduction to Sociolinguistics
*199. Special Studies in Linguistics
Portuguese (Spanish and Portuguese): *199. Special Studies in Linguistics
Spanish (Spanish and Portuguese): *199. Special Studies in Linguistics

(4) Electives
Anthropology: *M140. Language in Culture
Ethnomusicology and Systematic Musicology: 20A. Musical Cultures of the World
*M110A-M110B. The Afro-American Musical Heritage
Film and Television: 112. Film and Social Change
Folklore and Mythology: *111B. Folk Art and Technology
*190. Selected Topics in Folklore and Mythology

Latin American Studies: 197. Interdisciplinary Topics in Latin American Studies
*199. Special Studies in Latin American Studies

Core II: Social Sciences
Preparation — Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Economics 40 or Sociology 18 or Statistics 50.

Core Area — Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) Core Concentration — Five courses from anthropology and sociology or economics or geography or history or political science. Only one course from the electives list may be applied toward the core concentration.

(2) Theory and Methods — One course from theory and methods.

(3) Internal Breadth — Four additional courses from the social sciences core area but outside the core concentration. No more than two of these may be electives.

External Breadth — From the approved list, six upper division courses outside the social sciences core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the arts and humanities core (e.g., fine arts) and at least one is developed within the ecology and environment core (e.g., public health). No more than three external breadth courses may be electives.

Approved Undergraduate Course List

(1) Anthropology and Sociology
Anthropology 114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)
114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)
114R. Ancient Civilizations of Andean South America
112T. Ethnohistory of Hispanic Cultures in the U.S. Southwest
173P. Cultures of Middle America
173Q. Latin American Communities
174P. Ethnography of South American Indians
174Q. Ethnography of South American Indians
Sociology 186. Latin American Societies

Theory and Methods
Anthropology *115P. Archaeological Field Training
*115Q. Archaeological Research Techniques
*115R. Strategy of Archaeology
116P. Laboratory Analysis in Archaeology
*M116Q. Dating Techniques in Environmental Sciences and Archaeology
*118A, 118B. Museum Studies
*M136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques
*137. Ethnography on Film
*138. Methods and Techniques of Ethnohistory
*139. Field Methods in Cultural Anthropology
*186A. Quantitative Methods in Anthropology
*186B. Models and Modeling in Anthropology
*199. Special Studies in Anthropology
Sociology *104. Introduction to Sociological Research Methods
*112. Introduction to Mathematical Sociology
*199. Special Studies

(2) Economics
Economics *110. Economic Problems of Underdeveloped Countries
*111. Theories of Economic Growth and Development
*112. Policies for Economic Development
*190. International Economics
*191. International Trade Theory
*192. International Finance

Theory and Methods
Economics *103A-103Z. Upper Division Research Seminars: Applications of Economic Theory
*M135. Economic Models of Public Choice
*M136. Economic Models of Political Conflict and Conflict Resolution
*199. Special Studies in Economics
Management: *197. Special Topics in Management

(3) History
History 165A-165B. Colonial Latin America
165C. Indians of Colonial Mexico
166. Latin America in the 19th Century
167A-167D. Latin America in the 20th Century
168. History of Latin American International Relations
169. Latin American Elitism
170A. Latin American Cultural History
170B. Classic Travel Accounts of Latin America since 1735
171. Mexican Revolution since 1910
173. Modern Brazil
174. Brazilian Intellectual History
197. Undergraduate Seminar: Latin America

Theory and Methods
History: *101. Introduction to Historical Practice
*199. Special Studies in History

Library and Information Science: 111C. Ethnic Groups and Their Bibliographies: Latino History and Culture

(4) Political Science
Political Science 130. Politics of Latin American Economic Development
131. Latin American International Relations
*139A-139Z. Special Studies in International Relations: Latin America
*149A-149Z. Special Studies in Politics: Latin America
163A-163B. Government and Politics in Latin America
169A-169Z. Special Studies in Comparative Politics: Latin America
199. Readings in Political Science: Latin America

Theory and Methods
Political Science *102. Statistical Analysis of Political Data
*104A-104B. Introduction to Survey Research
*M105. Economic Models of Public Choice
*119A-119Z. Special Studies in Political Theory
*137A-137B. International Relations Theory
*146. Political Behavior Analysis
*168B. Comparative Political Analysis

(5) Geography
Geography 121. Conservation of Resources: Underdeveloped World
*128. The World’s Ecosystems: Problems and Issues
*142. Population Geography
181. Middle America
182A. Spanish South America
182B. Brazil
*199. Special Study
Theory and Methods

Geography *171. Quantitative Analysis

(6) Electives

Anthropology *132. Technology and Environment
*134. Personality and Cultural Systems: Enculturation
*150. Study of Social Systems
*153. Evolution of Human Societies
*161. Development Anthropology
*183. Women in Culture and Society
*167. Urban Anthropology
*M168. Health in Culture and Society
Economics *120. Introduction to Urban and Regional Economics
*121. Urban Economic Analysis
*180. Comparative Economic Systems
Geography *108. World Vegetation
*129. Problems of the Environment: Seminar
*140. Political Geography
*148. Economic Geography
*150. Urban Geography
*152. World Cities
History M159A, M159B. History of the Chicano People
Latin American Studies 197. Interdisciplinary Topics in Latin American Studies
199. Special Studies in Latin American Studies
Political Science *124. International Political Economy
*167. Ideology and Development in World Politics
*181. Comparative and Development Administration
*183C. Comparative Urban Government
Sociology *116. Social Demography
*157. Social Stratification
*182. Political Sociology
*184. Social Change

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have an exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Core III: Ecology and Environment

Preparation — Two courses from History 8A, 8B, 8C; Latin American Studies 99; Geography 5; Statistics 50.

Core Area — Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) Core Concentration — Five courses from the core area. Only one course from the electives list may be applied toward the core concentration.

(2) Theory and Methods — One course from theory and methods.

(3) Internal Breadth — Four additional courses from the ecology and environment core area to be selected from theory and methods core courses or electives.

External Breadth — From the approved list, six upper division courses outside the ecology and environment core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the arts and humanities core (e.g., fine arts) and at least one is developed within the social sciences core (e.g., history). No more than three external breadth courses may be electives.

Approved Undergraduate Course List

Community Health Sciences 174E. Health, Disease, and Health Services in Latin America
Epidemiology M115. Disease Problems of Socioeconomic and Political Impact in Latin America
Geography 121. Conservation of Resources: Underdeveloped World
*128. The World’s Ecosystems; Problems and Issues
*142. Population Geography
181. Middle America
182A. Spanish South America
182B. Brazil
*199. Special Study

Theory and Methods

Anthropology *186A. Quantitative Methods in Anthropology
*186B. Models and Modeling in Anthropology
Biostatistics 100A, 100B, 100C. Introduction to Biostatistics
Community Health Sciences 181. Introduction to Social Research Methods in Health
Geography *171. Quantitative Analysis

Electives

Anthropology *132. Technology and Environment
*153. Evolution of Human Societies
*167. Urban Anthropology
M168. Health in Culture and Society
Community Health Sciences *161. Nutrition and Health
Economics *120. Introduction to Urban and Regional Economics
Geography *108. World Vegetation
*129. Problems of the Environment: Seminar
*140. Political Geography
*148. Economic Geography
*150. Urban Geography
*152. World Cities
Latin American Studies 197. Interdisciplinary Topics in Latin American Studies
199. Special Studies in Latin American Studies
Sociology *116. Social Demography

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have an exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Master of Arts Degree

Admission

In addition to University minimum requirements, the B.A. degree in Latin American Studies constitutes the normal basis for admission. Applicants with a degree in another field can be admitted but must complete certain undergraduate prerequisites subsequent to admission. Applicants with Latin American field experience or special methodological studies are given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

(1) Three academic letters of recommendation, unless you have been away from school for some time, in which case one of the letters may be from an employer.
(2) A minimum of a 3.0 or B average in the junior/senior years of college.
(3) A statement of purpose discussing your background in Latin American studies, proposed program of study, and future career plans.
(4) A minimum score of 1,000 on the General Test (combined verbal and quantitative sections) of the Graduate Record Examination (GRE).
(5) A resume or curriculum vitae describing academic and Latin American experience.

Students are admitted each term. Application deadlines are November 1 for Winter Quarter, February 1 for Spring Quarter, and January 15 (to be considered for financial assistance) or May 15 for Fall Quarter.

Fellowship applications for the academic year are due on January 15 prior to the Fall Quarter for which application is made. Prospective students may write for departmental brochures to the Academic Programs Office, Latin American Center, 10347 Bunche Hall, UCLA, Los Angeles, CA 90024-1483.

Major Fields or Subdisciplines

You are expected to develop and integrate three fields in Latin American studies, to be selected from the following: anthropology, art, economics, engineering, education, folklore, geography, history, law, library science, linguistics, management, music, political science, Portuguese, public health, sociology, Spanish, theater arts, and urban planning. At least one of the selected fields must be a social science.

Foreign Language Requirement

Proficiency equivalent to 24 quarter units of university-level Spanish and 12 quarter units of university-level Portuguese or 16 quarter units of university-level Portuguese and 20 units of university-level Spanish is required. Since these courses may not be applied toward the M.A. degree, you are encouraged to pass these proficiency levels by examination. A major Indian language of Latin America (i.e., Quechua) may be substituted for either Spanish or Portuguese. You must fulfill the foreign language requirement by examination or petition for a waiver of the examination if you have gained competency in another manner (i.e., native speaker, upper division coursework, Peace Corps service).

Course Requirements

Two plans are available. For the comprehensive examination plan, a minimum of nine courses is required, to be distributed among three fields or disciplines either on a 3-3-3 or 4-3-2 basis. Of the nine courses, five must be at the graduate level, with at least one in each of the three fields.
For the thesis plan (which requires prior approval), a minimum of 10 courses is required, to be distributed on a 4-3-3 basis among three fields. Three graduate-level courses are required in the first field, with one each in the two minor fields. All courses must be selected from the department-approved list of courses. Other courses must be petitioned in advance.

Courses numbered in the 300 and 400 series are not applicable toward the M.A. degree.

No more than eight units of 500-series courses may be applied toward the total course requirement for the M.A. degree; no more than four units may be applied toward the five graduate courses required for the degree.

Graduate courses may be repeated unless they are lecture courses.

Comprehensive Examination Plan
In addition to course requirements, you must submit three research papers written for at least two of your three fields of study. At least two of the papers must have been submitted for graduate courses in the 200 series. A three-member faculty committee representing your three fields evaluates the papers and grades them pass, pass subject to revision of one or more of the research papers, or fail. The M.A. degree is awarded on recommendation of the faculty committee. Copies of your papers must be filed in the Academic Programs Office of the Latin American Center.

Thesis Plan
Although you are generally expected to follow the M.A. comprehensive examination plan, in special cases you may be allowed to follow the M.A. thesis plan. You must develop a carefully prepared proposal that provides sound justification for the thesis plan, including provisions for funding any planned field research.

Once the thesis plan option has been approved, you select a three-member faculty thesis committee to work with you in the development of the thesis and to read, evaluate, and approve the drafts and final version. Once the final version is approved, the thesis committee recommends the award of the M.A. degree. By the end of the term before graduation, you must file for advancement to candidacy with the Graduate Division.

Cooperative Degree Programs
Several options are available to combine the M.A. in Latin American Studies with a professional degree. After acceptance by both the Latin American Studies Program and the respective professional school, you may pursue both degrees simultaneously. Articulated degree programs are currently available with the Schools of Education (M.Ed. in Curriculum), Engineering and Applied Science (M.S. in Engineering), Library and Information Science (M.L.S.), and Public Health (M.P.H.); articulat ed programs do not allow course credit to be applied toward more than one degree. Concurrent degree programs are available with the Graduate Schools of Architecture and Urban Planning (M.A. in Urban Planning) and Management (M.B.A.).

Lower Division Course
99. Introduction to Latin American Problems. Limited to 15 students. Interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

Upper Division Courses
M155. Disease Problems of Socioeconomic and Political Impact in Latin America. (Same as Epidemiology M115.) Lecture, six hours; discussion, six hours. Prerequisite: one upper division Latin American studies course. Social, economic, and political impact of important disease problems in Latin American countries. Mr. Wilkie.

197. Interdisciplinary Topics in Latin American Studies. Advanced interdisciplinary course for upper division students. May be repeated for credit with topic change.

198. Special Studies in Latin American Studies. (4 or 5 units). Prerequisite: upper division standing. Intensive directed research program in which students conduct interdisciplinary research or complete internship with an international agency or program dealing with Latin America. Faculty sponsorship and written reports required.

Graduate Courses
M200. Latin American Research Resources. (Same as History M255 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results. Mr. Lauerhass.

201. Statistical Resources for Latin American Research. Contemporary statistical materials important for research in Latin American studies. Discussion on qualitative and interpretative aspects of the material, especially as it relates to data developed for publication in Latin America's Statistical Abstract of Latin America and its Supplement Series.

225. Computer Methodologies in Latin American Studies and Anthropology. (Same as Anthropology M289.) Lecture, three hours. Prerequisite: consent of instructor. Basic principles of computing and information processing, along with their potential application in Latin American research. Examination of impact that computers are having in Latin American society. Mr. Behrens.

M250A, Indians of South America. (Same as Anthropology M272.) Lecture, three hours. Prerequisite: consent of instructor. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit. Mr. Wilbert.

250B. Interdisciplinary Seminar in Latin American Studies. Lecture, three hours. Prerequisite: consent of instructor. Problem-oriented seminar on critical areas stressed in University's cooperative programs in Latin America.

250C. Interdisciplinary Topics in Latin American Studies. Prerequisite: consent of instructor. Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

M258A-M258B. Seminars in Recent Latin American History. (Same as History M258A-M258B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress grading. Mr. Wilkie.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). May be repeated, but only four units may be applied toward the minimum graduate course requirement. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination. Ordinarily taken only during term in which student is being examined. S/U grading.

598. Research for and Preparation of M.A. Thesis. Only four units may be applied toward the minimum graduate course requirement. S/U grading.

Approved Graduate Course List
Refer to the Latin American Studies undergraduate section for the lists of approved undergraduate courses.

Fine Arts
Art History *201. Topics in Historiography of Art History C218A. Pre-Columbian Art of Mexico C218B. Pre-Columbian Art of the Maya C218C. Pre-Columbian Art of the Andes 220. Languages

Linguistics
Anthropology 204. Core Seminar: Linguistic Anthropology Linguistics *210A. Field Methods
**Law and Society**

4256 Bunche Hall, (213) 825-3862

**Scope and Objectives**

The undergraduate specialization in law and society can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in law and society. The program is designed to allow students to explore the relationships of law with ethics, economics, crime, and social and political institutions and theories.

**Special Undergraduate Program**

**Preparation for the Specialization**

*Required: Political Science 10, 40, 70, and 20 or 50; two courses from History 7A, 7B, Philosophy 4, 6, 22.*

**Upper Division**

The political science major should be completed as follows: Political Science 117; one course in Field I other than course 117; two courses in Field III; four courses in Subfield IIIa; two other political science electives; six courses from Anthropology 152, Economics 172, History 151A, 151B, Philosophy 150, 151A, 151B, 157A, 157B, 166, Sociology 145, 146, 147, 169.

For further information, contact Vicki Waldman, Political Science Counselor, in the program office.

---

**Linguistics**

2113 Campbell Hall, (213) 825-0634

**Professors**

Raimo A. Anttila, Ph.D. (Indo-European and General Linguistics)

Susan R. Curtiss, Ph.D.

Victoria A. Fromkin, Ph.D. (Distinguished Teaching Award)

Bruce P. Hayes, Ph.D.

Edward L. Keenan, Ph.D.

Mazizi Kunene, M.A. (African Languages and Literature)

Peter N. Ladefoged, Ph.D. (Phonetics; Distinguished Teaching Award)

Pamela L. Munro, Ph.D.

Russell G. Schuh, Ph.D. (Linguistics, African Languages), Chair

Robert P. Stockwell, Ph.D. (Distinguished Teaching Award)

William O. Bright, Ph.D., Emeritus

Paul M. Schachter, Ph.D., Emeritus (Distinguished Teaching Award)

**Associate Professors**

George D. Bedell, Ph.D.

Thomas J. Hinnebusch, Ph.D. (Linguistics, African Languages)

Nina M. Hyams, Ph.D.

Patricia A. Keating, Ph.D. (Distinguished Teaching Award)

Hilda J. Koopman, Ph.D. (Linguistics, African Languages)

Dominique L. Sportiche, Ph.D. (French, General Linguistics)

Edward P. Stabler, Ph.D.

Donca Steriade, Ph.D.

Adjunct Associate Professors

Ian Maddieson, Ph.D.

**Scope and Objectives**

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules which characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA’s Linguistics Department was judged second best in the nation in the quality of its faculty. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

**Undergraduate Study**

The majors described below are of three types: (1) a major which concentrates entirely on general linguistics, (2) several majors which combine the basic courses of the general program with a language concentration or other related fields, and (3) a major which concentrates entirely on an African language area. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have nonuniversity teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

**Bachelor of Arts in Linguistics**

This major is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables the undergraduate to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

**Preparation for the Major**

*Required: Completion of the equivalent of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages. In addition you must take two of the following: Philosophy 31, Psychology 10, one cultural anthropology course.*

**The Major**

*Required: A minimum of 11 upper division or graduate courses, including Linguistics 100, 103, 110, 120A, 120B, and either C164, C165A,
or C165B (both C165A and C165B are strongly recommended for students planning linguistics graduate work; course C164 is recommended for students not planning linguistics graduate work). The remaining five courses are electives, three of which must be linguistics courses. The other two may be in linguistics or in certain other fields as listed below. Electives have generally been selected from the following list (courses not on the list may be used as electives only in consultation with an adviser): Linguistics 104, 125, 127, 130, C135, 140, M146, M150, 160, C164, C165A, C165B, 170, 175, M176A, C180, C185A, 195, 196A, 196B, 199 (if four units), African Languages 190, Anthropology 143, Philosophy 127A, 127B, 172, Psychology 122, 123, English 121, 122, or upper division courses in a foreign language beyond the sixth term. Not all of these elective courses are necessarily given every year; consult an adviser regarding electives to be offered in a given year.

In addition to the 11 upper division courses, at least three courses (which may be either upper or lower division) are required in a language other than those in the Romance, Slavic, or Germanic families. These courses may be applied toward the foreign language requirement described above under “Preparation for the Major.” If you complete an advanced language course, you are considered to have completed the equivalent of whatever courses are prerequisite to that one (e.g., if you complete French 100A, you have automatically satisfied the requirement of the sixth term of work in one language).

Linguistics 195, or C196A and C196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, you must consult with the department's senior essay and honors counselor.

**Specialization in Computing**

Students in any of the linguistics majors (except linguistics and computer science) may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 60, Linguistics C180, C185A. You graduate with a bachelor's degree in your major and a specialization in computing.

**Honors Program**

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or 196A/196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

---

**Bachelor of Arts in Linguistics and Anthropology**

**Preparation for the Major**

Required: Completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages (at least three terms must be in a language other than those in the Romance, Slavic, or Germanic families). Anthropology 33 is strongly recommended, when offered.

**The Major**

Required: Fourteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B or 127, 125, 170, one other upper division linguistics course (recommended: 114), Anthropology M140, 144 or 145, one course from Anthropology 141, 142A, 143, or Sociology C124A, and three upper division electives from Anthropology 141, 142A, 143, 144, 145, the 130 series (one course only), the 170 series (one course only). Sociology C124A, C124B. Linguistics C165A and C165B are recommended for students planning to pursue graduate work in linguistics.

---

**Bachelor of Arts in Linguistics and Computer Science**

**Premajor in Linguistics and Computer Science**

Admission to the major is contingent on passing the following courses, which constitute the linguistics and computer science premajor, with a grade-point average of 3.3 or better and no grade lower than a C: Linguistics 100, Philosophy 31, Program in Computing 10A, 10B, 10C.

**Preparation for the Major**

Required: Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A, 10B, 10C, 30, completion of the sixth term in one foreign language and the third term in a second foreign language. Mathematics 31A and 31B must be passed with grades of C or better. Mathematics 61 is strongly recommended.

**The Major**

Required: Fourteen upper division courses as follows: Linguistics 100, 103, 104, 120A, 120B, either C164, C165A, or C165B (the last of these being most strongly recommended for this major), C180, C185A, one upper division elective in linguistics, Computer Science 111 or 181, 131, 132, 141, 163.

---

**Bachelor of Arts in Linguistics and East Asian Languages and Cultures**

**Preparation for the Major**

Required: Completion of the sixth term in either Chinese or Japanese; Philosophy 31; one cultural anthropology course; either Chinese 50 or Japanese 50, as appropriate; completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

**The Major**

---

**Bachelor of Arts in Linguistics and English**

**Preparation for the Major**

Required: English 3, 10A, 10B, 10C, Philosophy 31, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

**The Major**

Required: Fifteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either C164, C165A, or C165B, two upper division electives in linguistics, English 121, 122, 140A, and four electives from 141A, 141B, 142A, 142B, 143, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

---

**Bachelor of Arts in Linguistics and French**

**Preparation for the Major**

Required: French 1, 2, 3, 4, 5, 6, 12, 15, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

**The Major**

Required: Sixteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either C164, C165A, or C165B, two upper division electives in linguistics, French 100A, 100B, 100C, 103, 105, 106, and two elective upper division French literature courses.
Bachelor of Arts in Linguistics and Italian

Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, Latin 1, 2, 3, 4, 5, completion of the third term in one foreign language or the sixth term in Latin, Philosophy 31, one cultural anthropology course.

The Major
Required: Thirteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either C164, C165A, or C165B, two upper division electives in linguistics, Scandinavian 105 and 106, or 110 twice, 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

Bachelor of Arts in Linguistics and Philosophy

Preparation for the Major
Required: Philosophy 31, 32, and two courses from 1, 6, 7, 21; completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

The Major
Required: Fourteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either C164, C165A, or C165B, two upper division electives in linguistics, Scandinavian 105 and 106, or 110 twice, 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

Bachelor of Arts in Linguistics and Spanish

Preparation for the Major
Required: Spanish 1, 2, 3, 4, 5, M42, M44, completion of the sixth term in one foreign language or the third term in each of two foreign languages.

The Major
Required: Fifteen upper division courses as follows: Linguistics 100, 103, 110, 120A, 120B, either C164, C165A, or C165B, two additional upper division courses in linguistics (preferably 130 and 170), Spanish 100A, 100B, 115 or M118A, 119A, 119B, and two additional upper division Spanish courses.

Bachelor of Arts in African Languages

Preparation for the Major
Required: Nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

The Major
Required: A minimum of 15 upper division courses, including three courses in an African language; African Languages 150A-150B, 190, 192; Linguistics 100, 103; three courses selected from English 114, Ethnolinguistics and Systematic Musicology 136A, 136B, Geography 189, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, 140, 146, 170, Political Science 166A, 166B, 166C, Linguistics 162, and completion of the sixth term in one of the following non-African languages: Afrikaans, Arabic, Dutch, French, German, Portuguese.

Graduate Study

The programs leading to the M.A. and Ph.D. degrees in Linguistics are open to qualified graduate students who are interested in descriptive, theoretical, and historical linguistics. Preparation for graduate study in linguistics should be equivalent in as many respects as possible to the undergraduate curriculum in linguistics.

There is also a graduate program leading to a Ph.D. in Applied Linguistics. It is administered by an interdepartmental committee, not by the Department of Linguistics. The requirements of the program are stated earlier in this chapter.

Master of Arts Degree

Admission
Students are normally admitted to begin residence in Fall Quarter only (exceptions may be made by the chair). The deadline for submission of applications for Fall Quarter is December 31 of the previous year. This deadline may occasionally be extended for applicants who do not wish to be considered for fellowship support.

Applicants are asked to submit a statement of purpose, which should include their background for graduate study in linguistics and their immediate and long-range goals in the field. They should also have three scholars under whom they have studied submit letters to the department about their qualifications. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination (GRE) must be submitted with the application. There is no minimum score requirement. In addition, applicants must submit a copy of some research paper or other piece of writing in linguistics or a closely related field.

While not required for admission, Linguistics 100, 103, 110, 120A, 120B, C165A, C165B are prerequisites to graduate courses in their respective areas. At the time of admission, students are notified which, if any, of the above courses are required due to deficiencies. However, if there is any question of whether courses taken elsewhere are equivalent to the above courses, students must discuss this with their advisers.

Prospective students may request an information brochure from the Administrative Analyst, Department of Linguistics, 2113 Campbell Hall, UCLA, Los Angeles, CA 90024-1543. This brochure explains, in particular, advising methods and procedures for the formation of M.A. and Ph.D. guidance committees.

Specialization
At the M.A. level, three survey courses in phonology, syntax, and language change are required. You must also select four additional survey courses from a list of 11. These choices allow for a certain amount of specialization. The remaining two courses (of the nine graduate courses required) may be in any area of linguistics and provide additional opportunities for specialization.

Foreign Language Requirement
You must demonstrate knowledge of one research language before receiving an M.A. and a second research language before advancement to candidacy. Knowledge can be demonstrated by one of four methods: (1) a reading examina-
tion administered by the department, (2) a research paper based on extensive sources in the language, (3) a conversation examination showing knowledge in depth, (4) an Educational Testing Service (ETS) graduate language examination. One of the languages must have substantial literature on linguistics; the other may serve as a contact language for the second language must be other than the native language. The departmental language examination is administered by a four-member committee of the faculty, appointed by the chair. This is normally an oral examination, general in scope, and results in a terminal M.A. degree.

Comprehensive Examination Plan
After completing the required courses and the foreign language examination, you must pass a comprehensive examination administered by a four-member committee of the faculty, appointed by the chair. This is normally an oral examination, general in scope, and results in a terminal M.A. degree.

Ph.D. Degree
Admission
General admission requirements are the same as those listed for the M.A. Students who have done their earlier graduate work at UCLA are considered for admission into the Ph.D. program on the basis of the following: (1) completion of all requirements for the M.A. and (2) the faculty's evaluation of the quality of the M.A. thesis and of the student's overall work and promise.

If you have already received an M.A. in Linguistics from another department or institution, you must fulfill all the requirements expected of an M.A. candidate, including the coursework, unless work elsewhere is equivalent and satisfies the course requirements. Then there are two possible procedures: (1) you may submit a master's thesis written at another institution or department or (2) if you have not written a thesis elsewhere, you must submit a paper equal in depth and scope to a thesis. In either case an evaluation committee is appointed and, once the committee has approved the thesis or paper, it is submitted to the entire faculty who evaluates its quality and your accomplishments and promise.

Major Fields or Subdisciplines
You may specialize in syntax, semantics, phonology, phonetics, language change, morphology, typology, sociolinguistics, neurolinguistics, psycholinguistics, computational linguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

Foreign Language Requirement
A doctoral committee cannot be officially appointed until the foreign language requirement has been met. Details are given above under the "Foreign Language Requirement" for the M.A. degree.

Course Requirements
Candidates for the Ph.D. are required to have taken 36 units of graduate coursework beyond the M.A. requirements. These units must include Linguistics 210A, 210B, and 230, unless they have been used to fulfill the M.A. requirement, and eight units in an area distinct from that of the student's major area of concentration. The 36 units may not include courses 275, 597, or 599. Of the 36 units, no more than 12 units may be in course 596A. A maximum of four two-unit seminars may be included in the 36 units. At some time, you are expected to present some of the results of your research at a meeting of the Linguistics Department Colloquium. This is a requirement for the degree.

Qualifying Examinations
In order to be advanced to candidacy, you are required to prepare two original research papers in different areas or fields of linguistics. These papers are to be submitted to and approved by a doctoral guidance committee. A written prospectus of the dissertation must be submitted to the guidance committee, with a copy for the department file, one month prior to the oral examination. At this time, provided the language requirement has been met, an official doctoral committee must be established.

The University Oral Qualifying Examination is administered by the doctoral committee, based primarily on the topic of the dissertation research. The examination deals with the background necessary for you to pursue research on the specific topic. Reexamination is possible on recommendation of the committee. You are expected to take the examination and be advanced to candidacy no later than six terms after being admitted to the doctoral program.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
A final defense of the dissertation is required. The defense is not restricted to the doctoral committee and is scheduled at a time, and with advance notice, that will enable a substantial number of students and faculty to attend.

General Linguistics
Lower Division Courses
1. Introduction to Study of Language. Summary, for general undergraduates, of what is known about human language; unique nature of human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge.
10. Structure of English Words. Lecture. Three to four hours. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning etymology, semantic change, and abstract rules of English word formation.

98. Lower Division Seminar. (Formerly numbered 97.) Variable topics; consult Schedule of Classes, College of Letters and Science, or department for topics to be offered in a specific term. May be repeated for credit.

99. Special Studies in Linguistics (2 to 4 units). Prerequisite: consent of instructor. Supervised research or training. May be repeated for credit. P/NP or letter grading.

**Upper Division Courses**

100. Introduction to Linguistics. Introduction to theory and methods of linguistics: universal properties of human language, phonetic, phonological, morphological, syntactic, and semantic structures and analysis; nature and form of grammar.

103. Introduction to General Phonetics. Lecture, three hours; laboratory, two hours. Prerequisite or corequisite: course 100 or equivalent. Phonetics of a variety of languages and phonetic phenomena that occur in languages of the world. Extensive practice in perception and production of such phenomena.

104. Experimental Phonetics. (Formerly numbered C120.) Lecture, three hours; laboratory, one hour. Use of laboratory equipment for recording and measuring phonetic phenomena.

110. Introduction to Historical Linguistics. Prerequisites: courses 100, 103, 120A, and 120B or 127. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Sound change, grammaticalization, semantic change.

114. American Indian Linguistics. Strongly recommended prerequisite: course 100. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail.

120A. Phonology I. Prerequisites: courses 100, 103, and 120B. Introductions to phonological theory and analysis. Rules, representations, underlying forms, derivations. Justification of phonological analyses. Emphasis on practical skills with problem sets.

120B. Linguistic Analysis: Grammar. Prerequisite: course 100. Course 120A is not prerequisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistic formalization.

125. Semantics. Prerequisite: course 120B. Survey of most important theoretical and descriptive claims about the nature of meaning.

127. Syntactic Typology of Unlimited Universals. Prerequisite: course 100. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, language, existential or possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and grounding (subordination). Data from a range of languages presented and analyzed.

130. Child Language Acquisition: Introduction. Prerequisites: courses 100, 120A, and 120B, or consent of instructor. Survey of contemporary research and theoretical perspectives in acquisition of language. Emphasis on linguistic interpretation of existing data, with some attention to relationship with second language learning, cognitive development, and other topics. Discussion of acquisition of aspects of languages and universals of linguistic development.

132. Introduction to Psycholinguistics. Prerequisites: courses 100, 120A, 120B. Central issues in language and mind and generation of languages. Emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferencing, speech error models of sentence production, and computation of syntactic structure during production.

135. Theoretical Issues in Disorders of Language Development. Prerequisites: courses 1, 100, and 130, or consent of instructor. Introduction to the field of speech and language disorders. Focus on special problems entailed in teaching non-European languages.

146. Language in Culture. (Same as Anthropology M140.) Prerequisite: upper division standing or consent of instructor: study of language as an aspect of culture; relation of habitual thought and behavior to language, and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropologists of fields of biological, cultural, and social anthropology, as well as archaeology.

150. Introduction to Indo-European Linguistics. (Same as Indo-European Studies M150.) Prerequisites: one year of college-level study the language, 3 or 4 years of classical education, or proficiency in Latin or Greek, and knowledge of Indo-European languages and Indo-European languages from ancient to modern times; their relationships and chief characteristics.

160. Field Methods (6 units). Discussion, four hours; individual or group sessions, one to two hours. Prerequisites: courses 103, 120A, 120B. 3.5 grade-point average. Analysis of language unknown to members of faculty or student. Study of a native speaker of the language.

164. Modern Theories of Language. (Formerly numbered 164.) Prerequisites: courses 120A, 120B. Examination of contemporary theories of the nature of language, particularly in domains of syntax and phonology. Students who plan to take courses 165A, 165B should not take 164. Concurrently scheduled with course C240.

165A. Linguistic Theory: Phonology. Prerequisite: course 120A. Recommended for students who plan to do graduate work in linguistics. Theory of generative phonology; form of phonological rules; formal and substantial phonological universals. Concurrently scheduled with course C200A.

165B. Linguistic Theory: Grammar. Prerequisite: course 120B. Recommended for students who plan to do graduate work in linguistics. Theory of generative grammar; word formation and sentence formation; formal and substantive universals in syntax; relation between syntax and semantics. Concurrently scheduled with course C200B.

165C. Linguistic Theory: Syntax. (Formerly numbered 165C.) Prerequisites: courses 120A, 120B. Comprehensive survey of modern syntactic theory. Study of current developments in syntactic theory and analytical techniques. Concurrently scheduled with course C200C.

165D. Linguistic Theory: Morphology. Prerequisite: course 120B. Recommended for students who plan to do graduate work in linguistics. Theory of generative morphology; form of phonological rules; formal and substantial phonological universals. Concurrently scheduled with course C200D.

170. Language and Society: Introduction to Sociolinguistics. Prerequisite: course 100 or consent of instructor. Study of patterns of communication of language and social, cultural, and social context of language, problems of multilingual societies.

175. Linguistic Change in English. Prerequisites: courses 110, 120A, 120B. Principles of linguistic change as exemplified through detailed study of history of English pronunciation, lexicon, and syntax.

M176A. Structure of Japanese I. (Formerly numbered M176.) (Same as Japanese CM122.) Lecture, three hours. Prerequisites: Japanese 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English.

M176B. Structure of Japanese II. (Same as Japanese CM123.) Lecture, three hours. Prerequisites: two or more years of Japanese language study or consent of instructor. Survey of Japanese language at three different levels of organization: (1) word level—word class, verb morphology and semantics; (2) clause/sequence level—tense, aspect, modality; (3) discourse level—point of view, ellipsis, topicization, and discourse structure.

M177. Structure of Korean. (Same as Korean CM120.) Lecture, three hours. Prerequisites: two years of spoken Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, phonological, and phonetic characteristics of Korean in light of universal linguistics, with brief introduction to formation, typological features, and phonological structure of Korean.

M180. Survey of Mathematical Backgrounds for Linguistics. Prerequisites: courses 120B, C164, and C165A or C165B (may be taken concurrently). Prior mathematics knowledge not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each term. Concurrently scheduled with course C208.

M185A. Natural Language Processing I. (Formerly numbered 185.) Prerequisites: courses 120B, C180, Programming Computing 108. Recommended: course C146, Course C165A. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C208A.

M185B. Natural Language Processing II. Prerequisite: course C185A/C209A or consent of instructor. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C209B.

M195. Senior Essay. Prerequisite: consent of instructor. Limited to senior linguistics majors. Extended piece of writing is undertaken on a linguistic topic selected by the student to be completed under supervision of a faculty member. Consult professor in charge to enroll.

M196A. Honors Essay. Prerequisites: 3.5 GPA, course C165A or C165B (may be taken concurrently). Recommended (but not required): completion of both courses C165A and C165B before or during term in which course 196A is taken. Draft of extended piece of writing of high quality is required by the student under supervision of a faculty member. Consult professor in charge to enroll. In Progress grade (credit to be given only on completion of course 196B).

M196B. Honors Essay (2 units). Prerequisite: course 196A. Piece of writing drafted in course 196A is presented in a seminar, revised, and put into final form under supervision of a faculty member. Consult professor in charge to enroll.
248 / Linguistics / COLLEGE OF LETTERS AND SCIENCE

197. Special Topics in Linguistics. Prerequisite: course 1 or 100 or consent of instructor. Variable topics selected from any undergraduate linguistics courses in which students demonstrate prior depth knowledge. May be repeated for credit with topic change.

199. Special Studies in Linguistics (2 to 4 units). Prerequisites: courses 120A, 120B, consent of instructor. May be repeated for credit.

Graduate Courses

C200A. Linguistic Theory: Phonology. Prerequisite: graduate or consent of instructor. Theory of generative phonology; form of phonological rules; and formal and substantive phono- logical universals. Concurrently scheduled with course C165A. While topics of coverage are same for undergraduate and graduate students, depth of reading required of graduate students is greater, with more primary sources included. Also, graduate students expected to produce substantially deeper and more thorough research paper.

Mr. Hayes, Ms. Steriade

C200B. Linguistic Theory: Grammar. Prerequisite: graduate or consent of instructor. Theory of generative grammar; form of word formation and sentence formation; formal and substantive universals in syntax; relation between syntax and semantics. Concurrently scheduled with course C165B. While topics of coverage are same for undergraduate and graduate students, depth of reading required of graduate students is greater, with more primary sources included. Also, graduate students expected to produce substantially deeper and more thorough research paper.

Mr. Hayes, Ms. Steriade

201. Survey of Current Issues in Phonological Theory. (Formerly numbered 201A.) Prerequisite: course C165A/C200A. Survey of current theories and research problems in phonology.

Mr. Hayes, Ms. Steriade

Mr. Anttila, Ms. Munro, Mr. Stockwell

203. Survey of Phonetic Theory. Prerequisite: course 120A. Preliminaries to speech analysis. Functional anatomy of vocal organs; fundamental principles of acoustics and of acoustic theory of speech production; issues in perception of speech; nature and design of features for phonetic and phonological analysis.

Ms. Keating, Mr. Ladefoged

204. Survey of Experimental Phonetics. (Formerly numbered C204.) Prerequisite: course 103 or equivalent. Use of laboratory equipment to investigate articulatory, acoustic, and perceptual properties of speech. Topics include experimental design and statistics; theoretical basis of acoustic structure of speech sounds; computer-based speech processing, analysis, and modeling; perceptual and acoustic evaluation of synthetic speech.

Ms. Keating, Mr. Ladefoged

Mr. Hayes, Ms. Steriade

206. Survey of Current Issues in Syntactic Theory. (Formerly numbered 206A.) Prerequisites: course C165B/C200B, passing grade on proficiency examination in elementary logic. Survey of issues and research problems within a major current syntactic theory.

Ms. Koopman, Mr. Sporliche, Mr. Stowell

207. Survey of Formal Semantics. Prerequisite: course C180/C208 or equivalent. Survey of current approaches to model-theoretic semantics and its relation to current linguistic theory. Topics include generalizations, propositional grammars, Montague grammar, Boolean-based systems, generalized quantifier theory, logical form.

Mr. Keenan

C208. Survey of Mathematical Backgrounds for Linguistics. Prerequisites: courses 120A, 120B, C165B/C200B (may be taken concurrently). Prior mathematics knowledge not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each term. Concurrently scheduled with course C190B. Graduate students expected to complete additional problem sets.

Mr. Keenan

C209A. Natural Language Processing I. (Formerly numbered 209.) Prerequisites: courses 120B, C160, Program in Computing 108. Recommended: course C165B. Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C190B.

Mr. Stabler

C209B. Natural Language Processing II. (Formerly numbered 209.) Prerequisite: course C185A/C209A or consent of instructor. Extensions of basic language processing techniques to natural language: Chomsky hierarchy; whether natural languages are finite state, context free, context sensitive; categorial grammar, indexed grammar, IDLP grammar, tree adjoining grammar, feature systems; languages as models of first-order theories.

Mr. Keenan, Mr. Stabler

210A. Field Methods I (6 units). Prerequisites: courses C165A/C200A, C165B/C200B, grade of B or better in course 103 or in examination in practical phonetics. Analysis of a language unknown to members of class, and its genetic relationship to others of its family. May be repeated for credit.

Ms. Koopman, Ms. Munro

210B. Field Methods II (6 units). Prerequisite: course 210A in preceding term. Because different languages are investigated in different years, course 210B can only be taken as direct continuation of 210A in same year. When there are multiple sections, continuation must be in same section. May be repeated for credit with topic change.

Ms. Munro

212. Learnability Theory. (Not the same course as 212 prior to Fall Quarter 1990.) Prerequisite: course C180/C208 or consent of instructor. Survey of some of most significant results on capabilities of learners, given precise assumptions about their memory, time, and computational power, and precise assumptions about information provided by the environment.

Ms. Hyams, Mr. Stabler

213. Survey of Psycholinguistics. Survey of recent empirical and theoretical research in several subareas of psycholinguistics, including grammatical and lexical development in first language acquisition; psycholinguistic models of grammatical processing, especially syntactic parsing; brain bases for language acquisition; language breakdown.

Ms. Fromkin, Ms. Hyams

214. Survey of Current Syntactic Theories. Prerequisite: course 206. Survey of several current syntactic theories, compared with one another and with theory discussed in course 206, from point of view of theories' relative descriptive and explanatory power.

Mr. Stowell

215. Survey of Syntactic Typology. Prerequisite: course C165B/C200B. Current results in word-order universals; genetic classification of the world's languages; cross-language properties of specific construction types, including relative clauses, passives, and negative and passive construction systems, agreement systems, deixis systems, and types of sentence complements.

Mr. Keenan

216. Linguistic Theory: Syntax III. Prerequisite: course 206 or consent of instructor. Selected topics on syntactic theories of anaphora and quantification from the following areas: typology of binding categories (pronouns, anaphors, etc.); theory of locality conditions in binding theory; parametric variation in binding; quantifier movement; existential quantification and underspecification; strong and weak and crossed superiority; scope interactions; complex quantifier structures.

Ms. Koopman, Mr. Sporliche, Mr. Stowell

218. Survey of Formal Language Theory. Prerequisite: course C180/C208 or consent of instructor. Application of formal language theory to natural language: Chomsky hierarchy; whether natural languages are finite state, context free, context sensitive; categorial grammar, indexed grammar, IDLP grammar, tree adjoining grammar, feature systems; languages as models of first-order theories.

Mr. Keenan, Mr. Stabler

220. Linguistic Areas. Prerequisites: courses 120A, and 120B or 127. Recommended: courses C165A/C200A, grades of B or better in courses 120A, 120B, Program in Computing 60. Survey of recent research problems within a major current syntactic theory. Concurrently scheduled with course C185A. May be repeated for credit with topic change.

225. Linguistic Structures. Prerequisites: courses 120A, and 120B or 127. Recommended: courses C165A/C200A, grades of B or better in courses 120A, 120B, Program in Computing 60. Phonological and grammatical structure of a selected language and its genetic relationships to others of its family. May be repeated for credit with topic change.

230. History of Linguistics. Prerequisites: courses C165A/C200A, C165B/C200B. Aspects of history of linguistics. Different course offerings may deal with different areas of linguistics (e.g., phonology, syntax) or with different historical periods. May be repeated for credit with topic change.

Ms. Fromkin

C235. Theoretical Issues in Disorders of Language Development. Prerequisites: courses 1 or 100, and 130, or consent of instructor. Introduction to the field of language disorders of children. Some clinical syndromes which are associated with delayed or deviant language acquisition: aphasia, autism, mental retardation. Theories regarding etiology and relationship of these disorders to one another. Such questions as relationship of cognition to linguistic ability. Concurrently scheduled with course C135. Graduate students expected to apply more sophisticated knowledge and produce research paper of greater depth.

Ms. Curtiss

C240. Modern Theories of Language. Prerequisites: courses C165A or 120B, or consent of instructor. Not recommended for graduate linguistics students. Examination of contemporary theories of the nature of language, particularly in domains of syntax and phonology. Concurrently scheduled with course C164.

Mr. Bedel

M246C. Topics in Linguistic Anthropology. (Same as Anthropology M241.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

Proseminars numbered 251 through 254 may be taken for either two or four units. If a proseminar is taken for four units, a paper is required. Proseminars and seminars numbered 251 and above may be repeated for credit, having been approved by the Graduate Council as nonrepetitive in content.
251. Topics in Phonetics and Phonology I: Proseminar (2 or 4 units). Lecture, four hours. Prerequisite: course C165A-C200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 256A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

252. Topics in Syntax and Semantics I: Proseminar (2 or 4 units). Lecture, four hours. Prerequisite: course C165B-C200B. Course 206, 207, 214, or 215 may be required. Specialized topics in syntax and semantics. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 257A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

253. Topics in Language Variation I: Proseminar (2 or 4 units). Prerequisite: course 210. Course 202 may be required. Specialized topics in language variation. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 259A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

254. Topics in Linguistics I: Proseminar (2 or 4 units). Lecture, four hours. Prerequisites: courses C165A-C200A, C165B-C200B, consent of instructor. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, may be repeated for credit. Individual prosesminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 258A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

260A-260B-260C. Seminars in Phonetics (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. An oral presentation is required. May be repeated for credit. S/U grading.

261A-261B-261C. Seminars in Phonology (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

262A-262B-262C. Seminars in Syntax and Semantics (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

264A-264B-264C. Seminars in Special Topics in Linguistic Theory (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

265A. Specialized topics in phonetics and phonology. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 256A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

267A. Topics in Syntactic and Semantical Studies I: Proseminar. Prerequisite: course C165A-C200A. Courses 201, 203, or 204 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 257A. In Progress grading (credit to be given only on completion of course 257A).

268B. Topics in Theory and Semantics II: Proseminar (2 units). Prerequisite: course C165A-C200A. Courses 201, 203, or 204 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 258B. In Progress grading (credit to be given only on completion of course 258B).

275. Linguistics Colloquium. Prerequisite: completion of M.A. requirements. Specialized topics, generally presentations of new research by students, faculty, and visiting scholars. S/U grading.

276. Linguistics Colloquium (No credit). Prerequisite: graduate standing. Same as course 275, but taken without credit by students not presenting a colloquium. S/U grading.

282. Practicum in Practice (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

403. Practical Phonetics Training (1 unit). Extensive practice in production, perception, and transcription of sounds from a wide range of languages. Concurrently or post requisites: C165A-C200A, consent of instructor. Course 201, 202, 203, 204, 205, 206, 207, 208, 209A, 209B, 213, 214, or 215 may be required. Individual prosesminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May be repeated for credit. Meets with course 254. In Progress grading (credit to be given only on completion of course 259A).

422. Practicum in Phonetic Data Analysis (2 units). Prerequisite: graduate standing. Workshop in examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

596A. Directed Studies (1 to 8 units). Prerequisite: consent of instructor. Reading and research. May be repeated for credit. S/U grading.

596B. Directed Linguistic Analysis (1 to 8 units). Prerequisite: completion of M.A. requirements. Directed individual study or research. May be repeated for credit. S/U grading.

598. Research for M.A. Qualifying Examinations (1 to 8 units). Prerequisite: at least six graduate courses in linguistics. May be taken only in a term in which students expect to take comprehensive qualifying exam. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

599. Research for Ph.D. Dissertation (1 to 16 units). Prerequisite: advancement to Ph.D. candidacy. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

Lower Division Courses

1A-1B-1C. Elementary Swahili. Lecture, five hours. Major language of East Africa, particularly Tanzania. Mr. Hinnebusch.

2A-2B-2C. Intermediate Swahili. Prerequisites: courses 1A-1B-1C or consent of instructor. Mr. Hinnebusch.

7A-7B-7C. Elementary Zulu. Lecture, five hours. Most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Mr. Kunene.

8A-8B-8C. Intermediate Zulu. Prerequisites: courses 7A-7B-7C or consent of instructor. Mr. Kunene.

11A-11B-11C. Elementary Yoruba. Lecture, five hours. Prerequisite: consent of instructor. Major language of Western Nigeria. Mr. Hinnebusch.

12A-12B-12C. Intermediate Yoruba. Prerequisites: courses 11A-11B-11C or consent of instructor. Mr. Kunene.

31A-31B-31C. Elementary Bambara. Lecture, five hours. Prerequisite: consent of instructor. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Mandinka, Wolof, and other mutually intelligible dialects. Ms. Koopman.

41A-41B-41C. Elementary Hausa. Lecture, five hours. Major language of Northern Nigeria and adjacent areas. Mr. Schuh.
Upper Division Courses

103A-103B-133C. Advanced Swahili. Prerequisites: courses 2A-2B-2C or consent of instructor. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili. Mr. Schuh

123A-123B-133C. Advanced Yoruba. Prerequisites: courses 12A-12B-12C or consent of instructor. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba.

Ms. Koopman

143A-143B-143C. Advanced Hausa. Prerequisites: courses 42A-42B-42C or consent of instructor. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa.

Mr. Schuh

150A-150B. African Literature in English Translation. Prerequisite: History 10A or 10B. Course 150A is prerequisite to 150B. Narrative and didactic oral prose and poetry of sub-Saharan Africa and written prose and poetry of South Africa. Mr. Kunene

190. Survey of African Languages. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; illustrations from several representative languages, with appropriate language laboratory demonstrations and drills. Ms. Koopman

192. Comparative Studies in African Languages. Prerequisites: two quarter courses in an African language or course 190. Recommended prerequisite or corequisite: Linguistics 110. Comparison of structural and lexical features of a group of closely related languages, such as Southern Bantu, Southwestern Mandé, Akan, or Senufo.

199. Special Studies in African Languages (1 to 6 units). Prerequisite: consent of instructor. Instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available.

Graduate Courses

201A-201B. Comparative Niger-Congo. Prerequisites: Linguistics C165A, C165B, 220. Recommended: three quarter courses in one Niger-Congo language selected from courses 1A through 3C. 199. Investigation of relationships within the Niger-Congo family as a whole or within selected branches of the family.

Xiaoxi Xue, Ph.D.

Scope and Objectives
Gauss has called mathematics the “Queen of the Sciences.” It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics aims to provide courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

Undergraduate Study

Preliminary Examination in Mathematics
If you wish to enroll in Mathematics 3A or 31A, you must pass the Mathematics Diagnostic Test. This examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It will also be given on Monday, September 24, 1990, for Fall Quarter 1990; Wednesday, November 28, 1990, for Winter Quarter 1991; and Wednesday, March 6, 1991, for Spring Quarter 1991. For information, contact the Mathematics Student Services Office, 6356 Math Sciences.

Advanced Placement in Calculus
Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 3 or higher receive four units of credit and Mathematics 31A equivalency. Those who take the BC Test and obtain a score of 3 or higher receive eight units of credit and Mathematics 31A, 31B equivalency.

If you have had calculus in high school but do not have Advanced Placement Test credit, you may take beginning calculus (Mathematics 3A or 31A), or you may seek advanced placement by passing examinations in the subject. Consult the Student Services Office for further details.

Credit Limitations
Credit is given for at most one course in each of the following groups: (1) 3A, 31A, 31AH; (2) 3B, 3E (if completed Fall Quarter 1987 and thereafter), 31B, 31BH; (3) 3C, 3E (if completed prior to Fall Quarter 1987); (4) 3C, 32A, 32AH; (5) 110A, 117; (6) 132, 132H; (7) 140A, 141A; (8) M150A, Statistics M152A.

Mathematics 2, 36A, 36B, and Statistics 50 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 140A-140B-140C and 141A-141B are not open for credit to students with credit for Electrical Engineering 103.

Mathematics M150A and Statistics M152A are not open for credit to students with credit for Electrical Engineering 131A.

You may not take a mathematics course for credit if you have credit for a more advanced course which has the first course as a prerequisite. This applies in particular to the repetition of courses (e.g., if you wish to repeat Mathematics 31B, you must do so before completing course 32A).
Pre-Mathematics Major

All students who wish to enter one of the majors offered by the Mathematics Department must first register as pre-mathematics majors. After completing all required preparation courses for the major of your choice and before accumulating a total of 135 quarter units, you should apply for admission to the major by filing a change of major petition in the Student Services Office, 6356 Math Sciences. Transfer students must have completed a minimum of three preparation for the major and major courses at UCLA before petitioning to enter the major.

Admission Requirements — Students entering UCLA directly from high school who declare themselves as pre-mathematics majors at the time they apply for admission are automatically admitted as such.

UCLA students who wish to enter the pre-mathematics major must have a minimum grade of C– in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter the pre-mathematics major.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 units of calculus to enter the pre-mathematics major.

Undergraduate Majors

The Mathematics Department offers five majors: mathematics, applied mathematics, mathematics of computation, mathematics/applied science, and general mathematics.

The mathematics major is designed for students whose basic interest is mathematics; the applied mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the mathematics of computation major for individuals interested in the mathematical theory and the applications of computing; the mathematics/applied science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the general mathematics major for students planning to teach mathematics at the high school level. As part of the mathematics/applied science major, the department offers programs for students interested in the fields of actuarial science and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

If you plan to pursue graduate study in mathematics, you are strongly encouraged to take a three-term sequence of graduate-level courses during your senior year.

Bachelor of Science in Mathematics

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 6A, 6C, and one additional course from Physics 6B, 6D, 8E, Chemistry and Biochemistry 11A, 11B. Each course must be passed with a minimum grade of C–, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 101A, 101B, 115A, 120A, 131A-131B, 132, and at least five additional courses from 106 through 199 and Statistics M152A through 154B. The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Applied Mathematics

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 6A, 6C, and one additional course from Physics 6B, 6D, 8E, Chemistry and Biochemistry 11A, 11B. Each course must be passed with a minimum grade of C–, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 115A, 115B, 121A, either 131B or 132, 142; two two-term sequences from two of the following categories: numerical analysis — courses 140A-140B or 141A-141B, probability and statistics — course M150A or Statistics M152A or 154A, and course 150B or Statistics 152B or 154B, differential equations — courses 135A-135B; four additional courses from 110A through 199 and Statistics M152A through 154B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Mathematics of Computation

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C or 30, Physics 6A, 6C, and one additional course from Physics 8B, 8D, 8E, Chemistry and Biochemistry 11A, 11B. Each course must be passed with a minimum grade of C–, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 115A, 115B, 131A, two additional courses from 110A through 199 and Statistics M152A through 154B, and six courses from Plan A (scientific computing) — courses 131B or 132, 140A-140B-140C, and 135A-135B or 145/146, or Plan B (computation theory) — courses 114A-114B-114C and 118A-118B-118C, or Plan C (computational statistics) — courses 140A or 141A, M150A or Statistics M152A, Statistics 152B-152C, and M153A-M153B; three upper division computer science courses (12 units) selected from an approved list available in the Student Services Office.

Bachelor of Science in Mathematics/Appplied Science

The major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major that students, in consultation with a faculty advisor, design their own program. You may also select one of the established programs: the actuarial plan, the mathematics/economics plan, or the operations research plan. In the past, mathematics/applied science majors have combined the study of mathematics with fields such as physics, biology, chemistry, biochemistry, economics, and geography.

If you are interested in designing an individual program, you should meet with the undergraduate adviser, 6356 Math Sciences, during your sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and you must have a minimum overall GPA of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

The Major

Required: Fourteen courses, seven in the Mathematics Department selected from Mathematics 110A through 199 and Statistics M152A through 154B and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall GPA of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. If you will have 135 or more units by the end of the term in which you plan to enter the program, you will not be admitted to the major.
Actuarial Plan
Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 1 and 2, or 100. Economics 100 may not be applied as one of the upper division courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses for the major.

The Major: Seven Mathematics Department courses, including Mathematics 115A, 140A or 141A, 144, M150A-150B or Statistics M152A and 152B or M154A-154B, and two courses from 113, 140B or 141B, 151, Statistics M152C, M153A; seven outside courses, including Economics 101A, 101B, 102, 147A, 160, and two additional courses from Management 130, 190, English 131A through 131J, Economics 145 through 199.

Mathematics/Economics Plan
Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, Program in Computing 10A, and one other social sciences course.

The Major: Seven Mathematics Department courses, including Mathematics 110A or 117, 115A, 131A, 144, M150A or Statistics M152A or M154A, Statistics 152B or 154B, and one additional course from 110A through 199 and Statistics M153A, M153B; seven economics courses, including Economics 101A, 101B, 102, and four additional upper division courses, with at least three from 105AH, 105BH, and 141 through 147B.

Operations Research Plan
Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Economics 1 and 2, or 100, Program in Computing 10A, 10B, and two courses from 10C, 30, 60.

The Major: Seven courses in the Mathematics Department and seven in economics and management. Consult the department for recommended courses. Programs are designed so that students in this plan qualify for a specialization in computing.

Bachelor of Science in General Mathematics
The major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the mathematics, applied mathematics, or mathematics of computation major.

Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, and three courses from the Physics 6 or 8 sequence, the Chemistry and Biochemistry 11 sequence, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C–, and you must have a minimum overall GPA of 2.0 for the courses.

The Major
Required: Mathematics 106, 110A or 117, 115A, 123, M150A or Statistics M152A or M154A, one course from 131A through 136, one course from 140A through 147, and five additional courses from 110A through 199, 370, and Statistics M152A through 154B.

Specialization in Computing
Majors in mathematics, applied mathematics, or mathematics/applied science may select a specialization in computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, two courses from 10C, 30, and 60, and Mathematics 61 with a minimum grade of C– in each course and a combined GPA of at least 2.0, (3) completing at least two courses from Mathematics 141A, 141B, 149, 149HS. You must petition for admission to this program and are advised to do so after you complete Program in Computing 10B (petitions should be filed in the Student Services Office). You graduate with a bachelor’s degree in your major and a specialization in computing.

Honors
Honors Courses
The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics. Call the department (206-1286) for further details.

Honors Program
Students majoring in mathematics and applied mathematics who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. You may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall GPA of 3.6 or better. The program entails taking a specified sequence of courses as part of your major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

If you complete the program, you are awarded honors at graduation; if you demonstrate exceptional achievement, you are awarded highest honors. Consult the department for further information.

Graduate Study
Admission
Prospective graduate students in mathematics need not have an undergraduate mathematics major, but they should have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics — particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For admission to a master's degree program, you must have earned in those upper division mathematics courses a cumulative grade-point average of at least 3.2; for direct admission to the doctoral program, at least 3.5.

If you have already obtained a master's degree, you must have maintained an average of better than 3.6 in graduate study.

You must take the Graduate Record Examination (GRE) General Test and Subject Test in Mathematics and must submit three letters of recommendation from mathematicians who know your recent work.

Applications and a booklet, Graduate Studies in Mathematics at UCLA, are available from the Graduate Adviser, Department of Mathematics, 6356 Math Sciences, UCLA, Los Angeles, CA 90024-1555.

Master of Arts Degree
You may earn the M.A. degree in Mathematics under the comprehensive examination plan, either in the basic (pure mathematics) program, in an interdisciplinary program in applied mathematics, or in statistics.

Foreign Language Requirement
There is no foreign language requirement for master's students.

Course Requirements
Eleven courses are required for the M.A. degree, of which at least eight must be graduate courses, while the remaining three may be approved upper division courses. With consent of the graduate vice chair, students in the applied mathematics and statistics programs may take up to five of the required 11 courses in other departments, provided that these courses are in professional or scientific fields closely related to research in applied mathematics or statistics respectively.

You may enroll in Mathematics 596 any number of times and may apply up to two 596 courses toward the 11-course requirement for the M.A., provided you receive a B or better in these courses (not the grade S).

Comprehensive Examination Plan
You must pass two written qualifying examinations at the M.A. level within seven terms of full-time study. By program, the following examinations are required: (1) pure mathematics
Master of Arts in Teaching

The M.A.T. program serves the needs of present and prospective mathematics teachers in high school and junior college.

Foreign Language Requirement

There is no foreign language requirement for M.A.T. students.

Course Requirements

Eleven courses are required, as follows.

Core Courses — You must take Mathematics 201A-201B-201C and 202A-202B. Normally, you also take one term of course 596 while fulfilling the essay requirement described below.

Creden tial Requirements — If you plan to teach in secondary schools and do not already have valid credentials for such teaching, you should enroll in the single subject instructional credential program in the Graduate School of Education. Of the courses required by this program, you may receive M.A.T. credit only for the following: Education 100, 112, 312, 330A, 330B. Actual receipt of the credential is not a degree requirement. You should check with the Graduate School of Education for a full and up-to-date description of credential requirements and should submit a Graduate School of Education application for admission to the credential program.

Additional Courses — Besides the six core courses described above, you must take a seventh upper division or graduate course in mathematics. Particularly recommended are Mathematics 106, 110B, 110C, 111A, 111B, 131B, 135A, and Statistics 152B. Candidates on the junior college track normally take five 100- or 200-level courses in mathematics in addition to the six core courses. However, with prior approval of the graduate vice chair, such students may present for degree credit one course of a predominantly mathematical nature taken in another department.

You may not receive degree credit for Mathematics 104 or 370. In addition, you may not receive degree credit for more than two terms of course 596 or for more than two terms of any 300-series courses.

Essay Requirement — You must prepare a master's essay on some subject in mathematics related to your prospective teaching. You write this under the direction of a faculty member while enrolled in Mathematics 596.

Teaching Experience

Teaching experience is not a formal requirement for the M.A.T. degree, although students working for a secondary credential must take the supervised teaching course. M.A.T. students are eligible for teaching assistantships.

Comprehensive Examination Plan

In the M.A.T. program, you take one examination in mathematical subject matter and one in content and philosophy of secondary school mathematics. Ordinarily, these are administered in conjunction with Mathematics 201A-201B-201C and 202A-202B. Reexamination after failure is allowed.

Ph.D. Degree

Students may earn the Ph.D. degree in Mathematics at UCLA either in the classical (pure mathematics) program, in an interdisciplinary program in applied mathematics, or in statistics. There are many possible choices of fields within these programs, and you are urged to read the booklet, "Graduate Studies in Mathematics at UCLA," where the specialties of the faculty and the active research areas in the department are described in some detail.

Language Requirement

Prior to advancement to candidacy, you must fulfill one of the following requirements:

(1) Foreign Language Requirement — You must pass two written departmental language examinations, at least one of which must be in French, German, or Russian. In order to take an alternate non-English examination such as Italian, you must petition to the graduate vice chair. International students whose principal language of instruction in elementary and secondary education was not English may substitute English for one of the foreign languages.

(2) Foreign Language/Computer Project Requirement (for students in the applied program only) — You must pass one written departmental language examination in either French, German, or Russian and complete a computer language project approved by the graduate vice chair.

The foreign language examinations, offered each term, require the translation of material in some basic field of mathematics (a dictionary may be used). They may be taken any number of times until passed. One of the examinations must be passed within seven terms of registered full-time study, the second within 13 terms. In any event, one language examination must be passed before you take the first oral qualifying examination.

Course Requirements

In the pure mathematics and statistics programs, you must pass (with a grade of A or B) at least 12 courses from Mathematics 205A through 285L, but excluding the basic courses 210A-210B, 245A-245B, and 246A-246B. At most, three of these courses may be in the 285 series. You must also satisfy a seminar participation requirement by participating actively in at least two advanced seminars (normally you lecture twice for a total of 90 minutes). Credit for one seminar must be obtained within three registered terms after passing the written qualifying examinations, the other within five terms.

In the applied mathematics program, you must pass (with a grade of A or B) at least 16 approved graduate courses, including at least 12 courses from Mathematics 205A through 285L. At most, three of these may be in the 285 series.

Qualifying Examinations

You must pass four written qualifying examinations, at least two of which must be passed at the Ph.D. level. One examination (any level) must be passed within three terms of full-time study; three examinations must be passed within six terms of full-time study, and all four examinations must be passed within seven terms of full-time study. Students in the applied mathematics program are allowed to substitute an outside examination (at the M.A. level) for one of the regular departmental examinations. By program, the following examinations are required: (1) pure mathematics — algebra and real analysis (either one or both may be passed at the M.A. level, subject to the above restriction on the number of M.A. passes); (2) applied mathematics — real analysis and either numerical analysis or applied differential equations; (3) statistics — real analysis and probability at the M.A. level; theoretical statistics and applied statistics at the Ph.D. level. These examinations are offered early in Fall Quarter and toward the end of Spring Quarter.

After passing the four qualifying examinations, you may set up the doctoral committee which administers the University Oral Qualifying Examination for advancement to candidacy.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination may be waived by the doctoral committee, with the approval of the graduate vice chair.

Program in Computing

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation. It is strongly recommended for those who wish to take course 3 or 10A, but who have no prior experience in computing.
Students who would like one course in program- ming should take either course 3 (uses FORTRAN) or 10A (uses PASCAL), depending on the advice of their major department. The sequence (courses 10A, 10B, 10C, 30, 60) provides an extensive education in basic computer science. It is intended for Letters and Science majors who are completing a specialization in computing and for those planning to take upper division coursework in computer science. These students should take all or part of the sequence, depending on the advice of their major department.

**Lower Division Courses**

1. Introduction to Computers and Computing. Lecture, three hours; discussion, one hour; computer terminal, five hours. Fundamentals of computers and computer usage; applications software, editors, spreadsheets, file management, machine organization and computer hardware. Brief introduction to programming.

2. Introductory FORTRAN Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Students with credit for course 10A will not receive credit for this course. Basic principles of programming, using FORTRAN as example language. Terminal course intended for physical sciences and engineering majors who need to use the extensive library of existing FORTRAN programs. Students who wish to take more advanced Program in Computing courses should take course 10A rather than this course.

10A. Introduction to Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Recommended prerequisites: one year of high school mathematics, including some coordinate geometry, and one-half year of high school physics. Students with credit for course 3 will receive only two units of credit for this course. Basic principles of programming, using PASCAL as example language: algorithmic problem solving; program design and development; control structures and data structures; human factors in programming and program design.

10B. Intermediate Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10A. Review of structures, arrays, records, text processing; stacks; queues; linked lists; static and dynamic allocations; binary trees; binary search; quicksort.

10C. Advanced Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10B. Review of structures, arrays, records, text processing; stacks; queues; linked lists; static and dynamic allocations; binary trees; binary search; quicksort.

15. Introduction to LISP and Symbolic Computation (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10C. Review of structures, arrays, records, text processing; stacks; queues; linked lists; static and dynamic allocations; binary trees; binary search; quicksort.

16. Machine Organization and Assembly Language Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10C. Not open for credit to students with credit for Computer Science 30. Description of machine organization and operation. Representation of information, instruction sets and formats, addressing modes, memory organization and management, I/O processing and interrupts.

17. Data Structures and Algorithms. Lecture, three hours; discussion, one hour; computer terminals, 10 hours. Prerequisite: course 10B. Mathematics 31A, 31B, 61. Review of basic data structures: arrays, stacks, queues, lists, trees. Advanced data structures: priority queues, heaps, balanced trees. Sorting, searching, and program verification.

97. Special Topics in Programming. Lecture, three hours; discussion, one hour. Prerequisite: course 10A. Variable topics in programming not covered in regular programming in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

**Upper Division Courses**

110. Introduction to Concurrent Computation. Lecture, three hours; discussion, two hours; laboratory, 10 hours. Prerequisite: course 10C or equivalent familiarity with programming in C language. Introduction to programming of concurrent (parallel) computers. Shared and distributed memory models, multiprocessor architectures, available concurrent machines; parallel algorithms and development of concurrent programs; estimation of algorithmic performance; selected advanced topics.

197. Advanced Topics in Programming. Lecture, three hours; discussion, one hour. Consent of instructor. Variable topics in programming and the mathematics of programming not covered in regular programming in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

**Mathematics**

**Lower Division Courses**

A. Intermediate Algebra (No credit). Lecture, five hours. Mathematics A displaces four units on student's Study List but yields no credit toward degree. May not be applied toward Letters and Science general education math requirement. Not open to students with credit for other mathematics courses. Designed for students requiring review of elementary and intermediate algebra. Arithmetic operations on real numbers, algebraic notation, polynomials, rational expressions, linear and quadratic equations and inequalities, coordinate geometry.

1. Precalculus. Lecture, three hours; discussion, two hours. Prerequisites: course A with a grade of C- or better, or two and one-half years of high school mathematics. Function concept. Linear and polynomial functions and their graphs, zeros of polynomials. Inverse, exponential, and logarithmic functions. Trigonometric functions.

2. Finite Mathematics. Lecture, three hours; discussion, one hour. Prerequisite: course 1 or three years of high school mathematics. Not open for credit to students with credit for any course from Mathematics 110 through 199. Finite mathematics consisting of elements, logic, sets, combinatorics, probability, vectors, and matrices.

3. Calculus for Life Sciences Students. Lecture, three hours; discussion, one hour. Prerequisites: three and one-half years of high school mathematics (including trigonometry) and successful completion of Mathematics Diagnostic Test, or completion of course 1 with a grade of C- or better. Not open for credit to students with credit in another calculus sequence. Students with credit for course 5 will receive only two units of credit for this course. Techniques and applications of differential calculus.

3B. Calculus for Life Sciences Students (Honors). Prerequisites: course 31B or 31BH with a grade of A and consent of instructor. Honors sequence parallel to courses 32A, 32B.

3C. Calculus for Computer Laboratory (5 units). Lecture, three hours; discussion, one hour. Prerequisite: course 31A or 31B with a grade of C- or better. Transcendental functions; methods and applications of integration.

3PC. Calculus and Analytic Geometry with Computer Laboratory (5 units). Lecture, three hours; discussion, one hour. Prerequisite: course 31A or 31B with a grade of C- or better. Same material as course 31B with one additional computer laboratory hour. P/NP or letter grading.

32A. Calculus of Several Variables. Lecture, three hours; discussion, one hour. Prerequisite: course 31B with a grade of C- or better. Introduction to differential calculus of several variables.

32B. Calculus and Analytic Geometry with Computer Laboratory (5 units). Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry) and successful completion of Mathematics Diagnostic Test, or completion of course 1 with a grade of C- or better. Same material as course 31A with one additional computer laboratory hour. P/NP or letter grading.

32C. Calculus of Several Variables. Lecture, three hours; discussion, one hour. Prerequisite: course 32A with a grade of C- or better. Introduction to integral calculus of several variables.

33A. Matrices and Differential Equations. Prerequisites: courses 32A or 32AH. Introduction to matrix theory and differential equations.

33BH. Matrices. Differential Equations, and Infinite Series (Honors). Prerequisites: course 32BH, or 32B with a grade of A and consent of instructor. Honors sequence parallel to courses 33A, 33B.

33B. Infinite Series. Lecture, three hours; discussion, one hour. Prerequisite: course 33A or 32AH or consent of instructor. Infinite sequences and series; systems of differential equations.
38A. Fundamentals of Arithmetic. Lecture, three hours; discussion, one hour. Prerequisite: sophomore standing. Not open for credit to students with credit for any of courses 110A through 119. May not be applied toward Letters and Science general education requirements. Courses 38A, 38B, and 104 form one-year sequence for prospective elementary teachers in Diversified Liberal Arts Program. Counting numbers and other subsystems of real numbers; sets, operations, relations, algorithms; applications and problem solving. Emphasis on understanding arithmetic procedures.

38B. Fundamentals of Arithmetic. Lecture, three hours; discussion, one hour; laboratory, one hour to be arranged. Prerequisite: course 38A. Not open for credit to students with credit for any course from Mathematics 110A through 119. May not be applied toward Letters and Science general education requirements. Continuation of course 38A. Elementary number theory; probability and statistics; the microcomputer and simple instructional programs; measurement and approximation; coordinate geometry. Other topics appropriate for elementary classroom.

61. Introduction to Discrete Structures. Lecture, three hours; discussion, one hour. Prerequisites: courses 31A, 31B, and Program in Computing 104 or 3 or equivalent. Not open for credit to students with credit for course 110A. Course 110C may be taken concurrently with course 114A. Finite automata: Turing machines and other models of computation; recursive functions; Church's thesis; Gödel numbering of computations and partial recursive functions; incompleteness and undecidability of theorems of Gödel, Tarski, Church. Complexity of computations; time and space limitations; nondeterministic machines; polynomial classes; P and NP; complete problems; measures of complexity; speed-up and gap theorems; lengths of proofs.

70. History of Mathematics. Lecture, three hours; discussion, one hour. Prerequisites: course 115A. Measurement of interest, annuities, amortization, sinking funds, bonds, and other securities.

Upper Division Courses

Mathematics 113, 115A, 117, 131A, 132, 141A, 142, 144, 147, and Statistics 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

General and Teacher Training

104. Fundamental Concepts of Geometry. Lecture, three hours; discussion, one hour. Prerequisite: courses 38A and 38B or equivalent or consent of instructor. Designed for prospective elementary teachers. Informal geometry and topology; measurement of geometric figures, LOGO computer language, models and constructions appropriate for elementary classrooms.

106. History of Mathematics. Prerequisite: course 32A. Topics in history of mathematics, with emphasis on development of modern mathematics.

Algebra, Number Theory, and Logic

109. Transition to Upper Division Mathematics. Lecture, three hours; discussion, one hour. Prerequisite: course 33B or consent of instructor. Introduction to mathematical proof. Principle of mathematical induction. Informal geometries. Precise definitions of terms in set theory; set operations, relations, algorithms; and solving problems in set theory.

110AH-110BH-110CH. Algebra. (Honors). Prerequisite: consent of instructor. Honors sequence parallel to courses 110A-110B-110C.

111A-111B-111C. Theory of Numbers. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A or 117, and 115A, or consent of instructor. Divisibility, congruences, Diophantine analysis, selected topics in theory of primes, algebraic number theory (includes cryptography). Diverse applications involving inequalities, fundamental theorem of arithmetic, Hilbert's axiom of neutral (absolute) geometry, hyperbolic geometry, Poincaré's model, independence of parallel postulate.

Analysis

131A-131B-131C. Analysis. (Formerly numbered 131A-131B.) Lecture, three hours; discussion, one hour. Prerequisite: course 33A. Real numbers, point set topology in R^n, completeness, and derivatives of functions defined on R^n. Prerequisites: courses 33B, 115A, 131A. Riemann integral, sequences and series of functions, power series, Fourier series. 131C. (Formerly numbered 137.) Prerequisite: course 131B. Transformations and their derivatives, inverse and implicit function theorems, differential forms and theorems of Green, Gauss, and Stokes.

131AH-131BHH. Analysis (Honors). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors sequence parallel to courses 131A-131B. Courses 131A-131B and 132H form a full honors sequence in analysis.

131D-131DD. Partial Differential Equations. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Introduction to basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy-Reimann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

132H. Complex Analysis (Honors). (Formerly numbered 131CH.) Lecture, three hours; discussion, one hour. Prerequisite: course 131A. Honors course parallel to course 132. Courses 131AH-131BHH and 132H form a full honors sequence in analysis.

133. Integration on Manifolds. Prerequisite: course 131B. Integration theory for functions of several variables, multilinear algebra, differential forms, Stokes theorem on manifolds.

134. Measure and Integration. Prerequisite: course 131B or consent of instructor. Introduction to Lebesgue measure and integration.

135A-135B. Ordinary Differential Equations. Lecture, three hours; discussion, one hour. Prerequisites: courses 32A or 33A. First order differential equations; linear systems with constant coefficients, analytic coefficients, periodic coefficients, and linear systems with regular singular points; existence and uniqueness results; linear boundary and eigenvalue problems; two-dimensional autonomous systems, phase-plane analysis; stability and asymptotic behavior of solutions.

136. Partial Differential Equations. Lecture, three hours; discussion, one hour. Prerequisites: courses 32A, 33B. Linear partial differential equations, particularly of the second order: wave equation, heat equation, and Laplace's equation; appropriate boundary, initial value problems, and eigenvalue problems.

Applied Mathematics

140A-140B-140C. Numerical Analysis. Lecture, three hours; discussion, one hour. Prerequisites: courses 32A, 33A, or equivalent. Not open for credit to students with credit for courses 141A, 141B, or Electrical Engineering 103. Emphasis on both theory, with error analysis, and applications. Analysis of numerical methods for solving linear systems, systems of linear equations, and eigenvalue problems.

140B. Interpolation, approximation, fast Fourier transforms, and optimization. 140C. Differential equations, systems of nonlinear equations, and optimization.
141A-141B. Applied Numerical Methods. Lecture, three hours; discussion, one hour. Prerequisites: courses 32A, 32B, 33A, 33B, 115A, and Program in Computing 10A or equivalent. Not open for credit to students with credit for course 140A, 140B, or Electrical Engineering 103. Introduction to scientific computing, with emphasis on programming, algorithms, and applications. Computer programming, computer implementation for following areas: 141A. Non-linear equations, systems of linear equations, optimization, interpolation, differentiation, and integration. 141B. Differential equations, least-squares approximation, Monte Carlo methods, and linear programming.

142. Mathematical Modeling. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B and 33B, or consent of instructor. Introduction to fundamental principles and spirit of applied mathematics. Empirical models, heat conduction, and mechanical models are constructed for physical problems. Illustrations from many fields of endeavor (e.g., physical sciences, biology, economics, traffic dynamics, etc.).

143. Analytic Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B and 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange's equations; calculus of variations, variable mass, related topics in applied mathematics.

144. Linear Programming. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Not open for credit to students with credit for Electrical Engineering 136. Principles of linear programming, dual problems, applications to industrial and business problems. Additional topics such as sensitivity analysis, integer programming, distribution and transportation algorithms, and applications to game theory.

145. Fourier Methods for Differential Equations. Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Fourier series and integral transforms, separation of variables, eigenfunction expansions. Applications to such areas as mechanical vibrations, fluid flow, heat conduction, and wave propagation.

146. Methods of Applied Mathematics. Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

147. Game Theory. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or 144 or consent of instructor. Principles and techniques of game theory. Game theory and game form. Matrix games. Minimax theorem and calculation of optimal strategies. Stochastic games. Cooperative and noncooperative solutions of binomial games. Cooperative games and applications. Additional topics such as combinational games, repeated games, Lemke-Howson algorithm, assignment games and marriage problem, economic markets, cost allocation, measurement of voting power.

149. Mathematics of Computer Graphics. (Formerly numbered 166.) Lecture, three hours; discussion, one hour. Prerequisite: course 115A, and Program in Computing 10A or equivalent knowledge of programming in either PASCAL or C language. Study of homogeneous coordinates, projective transformations, interpolating and approximating curves, representation of surfaces, and other mathematical topics useful for computer graphics.

169S. Honors Seminar in Mathematics of Computer Graphics. (Formerly numbered 169S.) Lecture, three hours; discussion, one hour. Prerequisite: course 149, consent of instructor. Limited enrollment (admission to be based on performance in course 149; participants need not be in an honors program). Participating seminar on topics discovered in course 149. Each student prepares substantial course project and presents it to class.

Number Theory

205A-205B-205C. Number Theory. Prerequisites: courses 210A and 246A, or consent of instructor. Topics from analytic algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Selected topics from additive number theory, Diophantine approximation, partitions, class-field theory, lattice point problems, valuation theory, etc.

Algebra

210A-210B-210C. Algebra. Prerequisites: courses 110A-110B-110C or consent of instructor. Students with credit for courses 110B and/or 110C will not receive credit for former courses 210A, 210B, or 210C. Group theory, including theories of Sylow and Jordan-Hölder-Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. Prerequisite: course 210A or consent of instructor. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

212. Homological Algebra. Prerequisite: course 210A or consent of instructor. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

213A-213B. Theory of Groups. Prerequisite: course 210A or consent of instructor. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

214A-214B. Introduction to Algebraic Geometry. Prerequisite: course 210A or consent of instructor. Basic definitions and first properties of algebraic varieties in affine and projective space; irreducibility, dimension, singular and smooth points. More advanced topics such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

215A-215B. Commutative Algebra. Prerequisite: course 210A or consent of instructor. Topics from commutative algebra, including techniques of localization, prime ideal structure in commutative Noetherian rings, principal ideal theorem, Dedekind rings, modules, projective modules, Serre conjecture, regular local rings.

216. Further Topics in Algebraic Geometry. Prerequisites: courses 214A-214B or consent of instructor. Closer examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

Logic and Foundations

220A-220B-220C. Mathematical Logic and Set Theory. Prerequisites: courses 112A-112B-112C or equivalent. Model theory: compactness theorem; Lowenheim-Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: Church's thesis; recursively enume- rable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theories; quantifier elimination. Set theory: Zermelo-Fraenkel and von Neumann-Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing.
22A-222B. Lattice Theory and Algebraic Systems. Lecture, three hours. Prerequisite: course 210A or consent of instructor. Partially ordered sets, lattices, distributivity, elements of topology; free lattices, binary relations, order structures, lattices, distributive lattices, complete lattices, posets, lattices, completions for lattices, duality theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

223. Model Theory. Prerequisites: courses 220A-222A. Topics include model and ultraproducts, logic and model theory, representation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

22B. Set Theory. Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

223C. Recursion Theory. Prerequisites: courses 220A-220B-220C. Topics include degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

Geometry and Topology

225A. Differentiable Manifolds. (Formerly numbered 231A) Lecture, three hours. Prerequisite: courses 121 and 131A-131B, or consent of instructor. Smooth manifolds and maps, basic examples and properties, orientations, vector fields and integral curves, Lie brackets and Frobenius' theorem, Lie derivative, tensor fields, differential forms and exterior derivative, Stokes' theorem on manifolds.

225B. Introduction to Algebraic Topology. (Formerly numbered 231B) Lecture, three hours. Prerequisite: course 225A or consent of instructor. Elementary concepts of homotopy theory; covering spaces and fundamental groups; singular homology theory, axioms of homology, Mayer-Vietoris sequences, calculation of homology of standard spaces, applications, Betti numbers and Euler characteristic, cell complexes and cellular homology.

225C. Further Topics in Geometry and Topology. (Formerly numbered 231C) Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Topics may include cohomology (singular, cellular, de Rham), de Rham's theorem, degree theory, cup products, higher homotopy groups, transversality theory, Morse theory, Riemannian metric.

226A-226B-226C. Differential Geometry. Lecture, three hours. Prerequisite: course 225A or consent of instructor. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness; submanifolds, constant curvature. Geodesics; conjugate points, variational methods, Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symmetric spaces.

233. Partial Differential Equations on Manifolds. Lecture, three hours. Prerequisites: courses 225A and 251A, or consent of instructor. Topics may include Laplacian operator on a Riemannian manifold, eigenvalues, Atiyah-Singer index theorem, isoperimetric inequalities, elliptic estimates, harmonic functions, function theory on manifolds, Green's function, harmonic functions, and eigenfunctions, Morse theory, fixed point theorems, harmonic maps, positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

235. Topics in Manifold Theory. Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Emphasis on low-dimensional manifolds. Structure, oriented and cardinal arithmetic, Applications of phisms of manifolds, submanifolds (e.g., knots and links). Topics vary from year to year. May be repeated for credit by petition.

236. Topics in Geometric Topology. Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Decomposition spaces, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

237. Topics in Algebraic Topology. Lecture, three hours. Prerequisites: courses 227A-227B or consent of instructor. Fixed-point theory, fiber spaces and classifying spaces, characteristic classes, generalized homology and cohomology theories. Topics vary from year to year. May be repeated for credit by petition.

Analysis and Differential Equations

246A-246B-246C. Complex Analysis. Prerequisites: courses 245A-245B and 246A-246B-246C, or consent of instructor. Potential theory, subharmonic functions, harmonic measure; Hardy spaces; entire functions; invariant functions; Riemann surfaces; extremal length and extremal function theory, quasiconformal mappings. Topics vary from year to year. May be repeated for credit by petition.

254A-254B. Several Complex Variables. Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Introduction to analytic functions of several complex variables. The theorem: Cousin problems, domains of holomorphy, complex manifolds.

254A-254B. Topics in Real Analysis. Prerequisites: courses 245A-245B-245C and 246A-246B-246C. Selected topics in analysis and its applications to geometry and differential equations. Topics may vary from year to year. May be repeated for credit by petition.

Functional Analysis

255B-255C. Topics in Functional Analysis. Prerequisite: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert space, semigroups of operators, linear topological vector spaces, and other related areas.

258A-258B-258C. Topological Groups and Their Representations. Lecture, three hours. Prerequisite: course 255A or consent of instructor. Topological groups and their basic properties. Haar measure. Compact groups. Their representations. Duality and Fourier analysis on locally compact abelian groups. Invariant representations, Frobenius reciprocity. Representations of special groups (Lorentz, Galilean, etc.). Projective representations. Representations of totally disconnected groups.

271A. Tensor Analysis. Prerequisite: course 131A or consent of instructor. Algebra and calculus of tensors on n-dimensional manifolds. Curvilinear coordinate systems, scale factor, covariant and contravariant tensors, Christoffel symbols, Levi-Civita connection, curvature. Green-Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

272B. Mathematical Aspects of Fluid Mechanics. (No longer offered; formerly numbered M272B prior to Fall Quarter 1987.) Lecture, three hours. Prerequisite: course 272A or consent of instructor. Review of basic theory of moving continua, fluid equations, integral theorems. Simple solutions. Low Reynolds number flow, boundary layers where viscosity is negligible, vorticity, boundary layers and their separation, water waves, ship waves, compressional waves, shock waves, turbulence theory (overview).

Probability and Statistics

275A-275B. Probability Theory. Prerequisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

275C. Stochastic Processes. Prerequisites: courses 275A-275B. Selected topics such as Brownian motion and potential theory. Markov processes, infinite particle systems, Gaussian processes. Content varies from year to year. May be repeated for credit.

276C. Statistical Decision Theory. Prerequisite: course 276A. Invariant estimates and tests; best unbiased and locally best tests; multiple decision problems; acceptance sampling.

277. Data Analysis. Lecture, three hours. Prerequisites: course 276A and Statistics M153A, or consent of instructor. Introduction to applied statistics, linear regression, correlation, multiple regression, categorical data analysis, other topics.

278A. Multivariate Analysis. (Formerly numbered 278.) Lecture, three hours. Prerequisite: course 276B or consent of instructor. Distributions in several dimensions, partial and multiple correlation. Normal distribution theory. Wishart distribution, Hotelling’s T², Principal components, canonical correlation, discriminant analysis. Introduction to linear structural relations and factor analysis.

278B. Nonparametric and Robust Statistics. (Formerly numbered 278.) Lecture, three hours. Prerequisite: course 276B or consent of instructor. Development of nonparametric and robust procedures for hypothesis testing, estimation in one- and two-sample problems, linear and non-linear regression, multiple classification, density estimation.

278C. Decision Theory. (Formerly numbered 278.) Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes, admissible, and minimax decision rules. Invariant tests and estimates, best unbiased tests, locally best tests. Application to generalized linear model.

278D. Sequential Analysis. (Formerly numbered 278.) Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayesian estimation and hypothesis testing, sequential decision procedures, stopping rule procedures, optimality of sequential probability ratio test, Wald’s identity, asymptotic theory, and other topics.

M379A-M379B-M379C. Linear Statistical Models. (formerly numbered M 279A-M 279B-M 279C.) Lecture, three hours. Discussion, one hour. Prerequisites: Biostatistics 101C, Statistics 152C, or equivalent. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss-Markov theorem, fixed and random component models, balanced and unbalanced designs.
Statistics
Lower Division Course
50. Elementary Statistics. (Formerly numbered M210.) Lecture; three hours; discussion, one hour. Prerequisite: three years of high school mathematics or consent of instructor. Not open for credit to students with credit for any course from Mathematics 110A through 119 or Economics 40. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means.

Upper Division Courses
Students planning to pursue advanced degrees in statistics should enroll in the M152A, 152B-152C sequence. The 154A-154B sequence is less comprehensive than the 152 series. In particular, probability topics do not receive the same level of coverage. Courses 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

M152A. Probability Theory. (Formerly numbered M150A.) Lecture; three hours; discussion, one hour. Prerequisite: Mathematics 150A or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods.

Microbiology and Molecular Genetics
5304 Life Sciences, (213) 825-8482

Professors
Arnold J. Berk, M.D.
Frederick A. Eiserling, Ph.D.
C. Fred Fox, Ph.D.
H. Ronald Kaback, M.D.
Rafael J. Martinez, Ph.D.
Jeffrey H. Miller, Ph.D.
Shirlee L. Morrison, Ph.D.
Donald P. Nierlich, Ph.D.
Eli E. Sercarz, Ph.D.
Jack Stevens, Ph.D.
Bernadine J. Wisniewski, Ph.D.
Owen N. Witte, M.D. (President's Professor of Developmental Immunology)
June Lascelles, Ph.D., Emerita
M.J., Pickett, Ph.D.
Sydney C. Rittenberg, Ph.D., Emeritus
William R. Romig, Ph.D., Emeritus (Distinguished Teaching Award)

Associate Professors
Robert P. Gunsalus, Ph.D.
Aldons J. Lusis, Ph.D.

Assistant Professors
Patricia Hartzell, Ph.D.
Joan E. McEwen, Ph.D.
Virginia L. Miller, Ph.D.
Robert W. Simons, Ph.D.

Lecturer
Ralph Robinson, Ph.D.

Adjunct Professors
Keichi Itakura, Ph.D.
Gary Wilcox, Ph.D.

Scope and Objectives
Microbiology at UCLA is a diverse science that includes bacteriology, virology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in microbiology prepare for careers in medicine or dentistry, biotechnology and genetic engineering, industrial microbiology, and agricultural or environmental sciences, among others. The courses presented by the department lead to a Bachelor of Science degree in the field of study.

The graduate program emphasizes the areas of cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host-
parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology at the undergraduate level and depth and training in independent study and research for the graduate microbiologist.

Note: Several upper division and graduate courses in this department are multiple-listed with those in the Microbiology and Immunology Department in the UCLA School of Medicine. If you are interested in a fundamentally disease-oriented approach to microbiology, see the Microbiology and Immunology Department description in Chapter 16.

Bachelor of Science Degree

Pre-Microbiology Major

While you are completing the lower division preparation courses for the major, you are considered a pre-microbiology major. After completing the preparation courses for the major with at least an overall C– grade-point average and Microbiology and Molecular Genetics 101 with a grade of C– or better, you should petition to enter the major in the Student Affairs Office, 5205 Life Sciences. All preparation courses must be taken for a letter grade, you enter with 80 or more units of credit, in fairs Office, 5205 Life Sciences. All preparatory (two courses), calculus-based physics, general chemistry; Biology 5, 7, or equivalent; one order to specify pre-microbiology as your major and Microbiology and Molecular Genetics 596 may be applied toward the major. A maximum of four units of Microbiology and Molecular Genetics 199 may be applied toward the major. In addition, you must have junior standing and the sponsorship of a faculty adviser. The core of the program consists of three terms (minimum) of Microbiology and Molecular Genetics 199H research, culminating in a thesis. If the thesis is accepted by the honors committee, you are awarded the bachelor's degree with honors. The department also offers honors-designated courses each term for the elective program. For further information, contact the Student Affairs Office, 5205 Life Sciences.

Honors Program
An overall grade-point average of 3.2 and a 3.5 in the premajor and major are required to apply for departmental honors. In addition you must have junior standing and the sponsorship of a faculty adviser. The core of the program consists of three terms (minimum) of Microbiology and Molecular Genetics 199H research, culminating in a thesis. If the thesis is accepted by the honors committee, you are awarded the bachelor's degree with honors. The department also offers honors-designated courses each term for the elective program. For further information, contact the Student Affairs Office, 5205 Life Sciences.

Master of Arts Degree

Admission
Requirements for admission are the same as for the Ph.D. degree, with the addition of a research proposal. Students who select this program must obtain sponsorship for a laboratory research problem prior to submitting an application. The department accepts relatively few students whose objective is a master's degree; applicants must contact a potential faculty sponsor at the time of application.

Ph.D. Degree

Admission
For admission, you must have completed an undergraduate major in bacteriology, microbiology, or a related field with superior scholastic achievement. You should have preparation in calculus, physics, biology, genetics, organic and biological chemistry, and microbiology. Physical chemistry is strongly recommended. You may be admitted with background deficiencies to be remedied prior to or concurrent with graduate studies. Submit scores of the Graduate Record Examination (GRE) General Test directly to the department. The Subject Test in Biology or Chemistry is recommended. Evidence (via letters of recommendation, interviews, or direct knowledge) of superior research potential and motivation is also required. Completion of a master's degree is not normally required.

Applications, brochures, and additional information on the master's and Ph.D. programs are available from the Graduate Adviser, Student Affairs Office, Department of Microbiology and Molecular Genetics, 5205 Life Sciences, UCLA, Los Angeles, CA 90024-1489.

Course Requirements

Formal Lecture/Laboratory Courses
Biochemistry — Chemistry and Biochemistry M253 (six units; offered only in Fall Quarter; to be completed during the first year) is required.

Genetics and Regulation — One 200-level, four-unit course to be selected from the current course listings maintained in the Student Affairs Office is required.

A total of eight additional units of 200-level coursework to be selected from at least two of the following three subject areas is required: (1) general microbiology and cell biology, (2) host-parasite interactions and virology, (3) immunology. Acceptable courses are listed in the Student Affairs Office.

You are expected to complete a course in physical chemistry (Chemistry and Biochemistry 156). This requirement can be waived on the basis of work done before entering UCLA.

Student-Participation Seminar Courses
Each term, seminar courses in which students read and report on current scientific research literature are organized. You must enroll in five such courses (10 units) during your first two years in residence.

Laboratories
During your first 15 months in residence, you rotate for one term each through three laboratories within the department (outside laboratories are permissible with consent of the advisory committee). You normally enroll in Microbiology and Molecular Genetics 596 for four units of credit for each laboratory.

First-Year Proposal
By June 30 of your first year of study you must submit an original research proposal of approximately five pages. The topic may be based on a subject presented in a departmental professional seminar or on material from one of the seminar courses. Suggestions and evaluations are returned to you and used by the faculty to evaluate continuation into the second year.

Teaching Experience
The department considers teaching experience to be an integral part of the graduate program. All Ph.D. candidates are required to serve as teaching assistants or in some other formal teaching capacity for three terms. Prior experience at another institution is acceptable when approved by the departmental graduate adviser.

Qualifying Examinations
The written examination must be taken within 24 months of entry into graduate school and must be passed, if reexamination is required, no later than 27 months from the date of entry. (These periods may be extended with the written consent of the departmental graduate adviser and your mentor.)

The examination is administered by the doctoral committee which normally serves as the thesis committee as well. As a major part of the examination, you prepare and defend a written research proposal. Before presentation to the doctoral committee, you are encouraged to present the proposal before a student seminar group.
Dissertation/Final Oral Examination

A dissertation on a subject of your choice selected in consultation with your major professor is required. The final oral examination, administered by the doctoral committee, is a defense of the completed dissertation, presented as a professional seminar and open in part to the public.

Lower Division Courses

6. Introduction to Microbiology
   Lecture, three hours. Not open for credit to students with credit for course 101, former courses 7, 10, Biology 5, 6, 7, 8, or equivalent courses taken elsewhere. Designed for nontechnical students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. Mr. Robinson and the Staff (F,W,Sp)

8. Microbiology Laboratory (2 units). Laboratory, six hours. Optional laboratory, with emphasis on basic principles of diagnostic microbiology for students entering allied health professions. Focus on purposes and functions of clinical microbiology laboratory in diagnosis of infectious diseases, as well as application of aseptic disinfectant techniques. Practical insight and experience in modern medical procedures and new technologies. (F)

7. Developments in Biotechnology
   Lecture, three hours. Prerequisite: course 6 or Biology 2. Not open for credit to students with credit for course 101, Biology 5, or equivalent courses taken elsewhere. Survey of recent developments in biotechnology, with emphasis on use of single-cell organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including industrial fermentation, genetic fermentation, genetic engineering, and agricultural and food microbiology. P/NP or letter grading. Mr. Robinson (W,Sp)

Upper Division Courses

101. Fundamentals of Bacteriology
   Lecture, three hours; laboratory, six hours. Prerequisites: Biology 5, 7, Chemistry 153A/153AL. Historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology. Mr. Gunnsalus (Sp), Mr. Martinez (F), Ms. McEwen (Sp)

102. Introductory Virology
   Lecture, three hours; laboratory, four hours. Prerequisite: course 101. Biological properties of bacterial and animal viruses; replication; methods of diagnosis; interactions with host cells and multicellular hosts. Mr. Berk, Mr. Witte (W)

C103. Biochemistry of Host Defense Mechanisms
   (Formerly numbered C103B.) Lecture, three hours. Prerequisites: courses 101, CM185. Biochemical basis of host defense mechanisms, with emphasis on role of immunoglobulins in combating microbial invasion; biology and biochemistry of phagocytic cells and constitutive mechanisms of host defense. Concurrently scheduled with course C203. Mr. Martinez (Sp)

C104A. Mammalian Cell as a Microorganism (2 units).
   (Formerly numbered C104C.) Lecture, three hours. Prerequisites: Chemistry 132A, 132B, 153A, and 153C/153AL 144. Recommended: Chemistry 152 or 153C. Cultured mammalian cell as an experimental system for study of normal regulatory processes and disease mechanisms. Contents include regulation of cell growth in chemically defined medium; establishment, cloning, and characterization of cell lines, cultured cells as model systems in study of normal growth and development, disease mechanisms and cancer. May be concurrently scheduled with course C204A. Mr. Lusis (F, second five weeks)

C104B. Mammalian Cell Genetics (2 units).
   Lecture, two hours; discussion, two hours. Prerequisites: biochemistry, introductory genetics. Topics include cytogenetics, chromosomal organization and gene mapping, somatic cell mutants, eukaryotes and organelle genetics, cancer genetics, mouse genetics, targeted mutagenesis, analysis of simple and complex genetic diseases. Reading material includes reviews and recent original publications. May be concurrently scheduled with course C204B. Mr. Witte (Sp, five weeks)

C105. Molecular and Genetic Basis of Bacterial Infections

C111. Biology of Prokaryotic Cell
   Lecture, three hours; discussion, two hours. Prerequisites: Biology 101 and Chemistry 153C, or consent of instructor. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211. Ms. Wisnieski (Sp)

C112. Molecular Biology of Bacterial Growth
   Lecture, three hours. Prerequisites: course 101, Biology 8, Chemistry 153A. RNA Tumor Viruses (2 units). Formerly numbered C104E.) Lecture, four hours. Emphasis on molecular and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other intracellular systems. May be concurrently scheduled with course C104A. Mr. Martinez (F, first five weeks)

   (Formerly numbered 113B.) Lecture, three hours; discussion, two hours. Prerequisites: course 102, Biology 8, Chemistry 153A. Strongly recommended: Chemistry 153B. Emphasis on role of immunoglobulins in combating microbial invasion; biology and biochemistry of mammalian cells as model systems in study of normal growth and development, disease mechanisms and cancer. May be concurrently scheduled with course C212. Mr. Gunnsalus, Mr. Nietlich, Mr. Simons (W)

C119. Microbial Genetics and Molecular Biology
   (5 units). (Formerly numbered 119.) Lecture, three hours; discussion, two hours. Prerequisites: course 102, Biology 8, Chemistry 153A. Emphasis on roles of immunoglobulins in combating microbial invasion; biology and biochemistry of mammalian cells as model systems in study of normal growth and development, disease mechanisms and cancer. May be concurrently scheduled with course C212. Mr. Gunnsalus, Mr. Nietlich, Mr. Simons (W)

C120. Immunology
   Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 132B/132BL, 153A/153AL. Recommended concomitance: Chemistry 153C. Examination of immunological immune response, immunity, immunobiology, cellular and molecular aspects of humoral and cell immune reactions. Mr. Clark, Ms. Morrison, Mr. Sercarz (F)

M186. Experimental Design in Immunology. (Same as Biology M186 and Microbiology and Immunology M186.) Laboratory, 12 hours. Prerequisites: courses CM185, consent of instructor. Corequisite: course M187. Emphasis on limited number of situations designed to train students in organizing and evaluating immunological laboratory experiments. Mr. Clark, Mr. Sercarz (W)

M187. Immunology Seminar (2 units). (Same as Biology M187 and Microbiology and Immunology M187.) Prerequisites: course CM185, consent of instructor. Corequisite: course M186. Student presentation of selected papers from immunology literature. Designed to serve as forum for critical analysis of research papers. Mr. Clark, Mr. Sercarz (W)

195. Proseminar (2 units). Prerequisites: senior standing, consent of instructor. Discussion by small groups of students and instructor on current research literature. Topics vary each year. May be taken only once for credit in the major but may be repeated for University credit. (Sp)

199. Special Studies in Microbiology (2 to 8 units). Prerequisites: course 101 and Chemistry 152 or 153C, or 153B or Biology 144, recommended: Chemistry 153B. Designed to serve as forum for critical analysis of research papers. (F,W,Sp)

Graduate Courses

   (Formerly numbered C203B.) Lecture, three hours. Prerequisites: courses 101, CM185. Biochemical basis of host defense mechanisms, with emphasis on roles of immunoglobulins in combating microbial invasion; biology and biochemistry of phagocytic cells and constitutive mechanisms of host defense. Concurrently scheduled with course C103. Graduate term paper on topic approved by instructor required. Mr. Martinez (Sp)

C204A. Mammalian Cell as a Microorganism (2 units).
   (Formerly numbered C204C.) Discussion, four hours. Prerequisite: Chemistry 132A, 132B, 153A, and 153C/153AL 144. Recommended: Chemistry 153B. Emphasis on limited number of situations designed to train students in organizing and evaluating immunological laboratory experiments. May be concurrently scheduled with course C104A. Mr. Lusis (F, second five weeks)

C204B. Mammalian Cell Genetics (2 units). Lecture, two hours; discussion, two hours. Prerequisites: biochemistry, introductory genetics. Topics include cytogenetics, chromosomal organization and gene mapping, somatic cell mutants, eukaryotes and organelle genetics, cancer genetics, mouse genetics, targeted mutagenesis, analysis of simple and complex genetic diseases. Reading material includes reviews and recent original publications. May be concurrently scheduled with course C104B. S/U or letter grading. Mr. Lusis (F, first five weeks)
C204C. RNA Tumor Viruses (2 units). (Formerly numbered C204E.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Interactions of RNA tumor viruses with differentiating tissues, such as immune system and erythroid development. Concurrently scheduled with course C104C. Includes additional discussion section for graduate students on research literature and methodology. S/U grading.

C206. Molecular and Genetic Basis of Bacterial Infections. Lecture, three hours; discussion, one hour. Prerequisite: course 101, Biology 7. Recommended: Biology 8. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology Institute. These international symposia feature contributions of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C111. Term paper on research topic selected by each graduate student.

Ms. Miller (Sp)

C211. Biology of Prokaryotic Cell. Lecture, three hours; discussion, one hour. Prerequisite: courses 101 and Chemistry 153C, or consent of instructor. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C111. Term paper on research topic selected by each graduate student.

Ms. Wisnieski (F)

C212. Molecular Biology of Bacterial Growth. Lecture, three hours; discussion, one hour. Prerequisite: course 101, Biology 8, Chemistry 153A/153AL. Analysis of growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other multi-component cellular systems from perspective of contemporary research techniques. Concurrently scheduled with course C112. Includes additional discussion section for graduate students on research literature and methodology.

Mr. Gunsalus, Mr. Nierich, Mr. Simons (W)

C219. Microbiological Genetics and Molecular Biology (5 units). Lecture, three hours; discussion, two hours. Prerequisite: course 102, Biology 8, Chemistry 153A. Strongly recommended: Chemistry 153B. Integration, conceptual analysis of classical and modern molecular genetics of microbes, especially bacteria and their viruses, with emphasis on nature of the gene and control of gene expression. Concurrently scheduled with course C217.

212U-212Z. Seminars and Symposium on Molecular Biology (2 to 4 units each). Lecture, two hours; discussion, three hours. Prerequisite: consent of instructor. Seminar courses which integrate topically with material presented in Microbiological Genetics and Molecular Biology I and II. Seminars and discussions led by Department of Microbiology and Molecular Genetics faculty. These international symposia feature leading researchers in selected areas of molecular biology. Students receive abstract booklet for symposia and use abstracts as starting point for weekly presentations on topics to be treated at symposium; in this way they prepare for participation in symposium. Topics announced each year on September 1 by Department of Microbiology and Molecular Genetics.

Mr. Fox and the Staff (W)

M223. Membrane Research Seminar (2 units). (Same as Microbiology and Immunology M223.) Prerequisite: consent of instructor. Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

Ms. Wisnieski

M226A. Principles of Microbial Pathogenesis. (Same as Biology M226A and Microbiology and Immunology M226A.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. Critical discussions of current research articles on mechanisms by which microorganisms cause disease and direct the host response to infection. May be repeated for credit.

Mr. Miller and the Staff (W)

M226B. Principles of Microbial Pathogenesis. (Same as Biology M226B and Microbiology and Immunology M226B.) Lecture, one hour; discussion, three hours. Prerequisite: course M226A or consent of instructor. Reading and discussion of current literature in areas of cellular and molecular immunology. Emphasis on molecular and cellular approaches to understand host-microbial interactions.

Mr. Ahmed and the Staff (Sp)

M246. Computer Analysis of Genetic Organization. (Same as Biology M246.) Lecture, two hours; laboratory, six hours. Prerequisites: course C119 or Biology 144 or equivalent, and Biology 8. Lecture and laboratory instruction in computer techniques for the analysis of nucleic acids and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

Mr. Nierich, Mr. Simpson (Sp, alternate years)

250. Seminar in Microbial Metabolism (2 units). Prerequisite: consent of instructor. Discussion and student presentations of recent work in areas of gene regulation and physiology of bacterial metabolism.

Mr. Gunsalus, Ms. McEwen (F, W)

251. Seminar in Regulation and Differentiation (2 units). S/U grading. Mr. Gunsalus, Mr. Nierich (F)

252. Seminar in Microbial Pathogenesis (2 units). Prerequisite: consent of instructor. Limited to students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

256. Seminar in Microbial Cell Biology (2 units). Prerequisite: consent of instructor. Student presentations and critical discussion of current literature on various aspects of prokaryotic and eukaryotic cell biology and morphogenesis. May be repeated for credit.

Ms. McEwen (F)

256. Seminar in Microbial Molecular Genetics (2 units). Prerequisite: consent of instructor. Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic molecular genetics. Emphasis on nature of the gene and control of gene expression. May be repeated for credit. S/U or letter grading.

Mr. Simons (F, W)

M258A. Molecular Genetic Mechanisms of Immune Response (2 units). (Same as Biology M258A and Microbiology and Immunology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of immune system, T cell antigen receptor, and foci affecting differentiation. S/U or letter grading.

Mr. Kronenberg, Mr. Wall (W, five weeks)

M258C. T Cells and the MHC (2 units). (Same as Biology M258B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immune system recognition of self and nonself, T cell recognition of mte products and foreign antigens, MHC polymorphism, MHC-like systems, MHC-linked genes, MHC and disease, and non-HLA function of MHC. S/U or letter grading.

Mr. Clark, Ms. Scofield (Sp, five weeks)

M258D. Molecular Interactions in Immune Responses (2 units). (Formerly numbered M258D.) (Same as Biology M258D and Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunobiology of antibodies, antigens, and complement, antigenic recognition, antibody restriction. S/U or letter grading.

Mr. Schumaker, Ms. Wisnieski (F, five weeks)

M258E. Immunopathology: Immunology of Disease (2 units). (Formerly numbered M258B.) (Same as Biology M258E and Immunology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on cellular and autoimmune, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.

Mr. Porter (Sp, five weeks, alternate years)

M258F. Immunology Forum (2 units). (Same as Microbiology and Immunology M258F.) Reading and discussion of current research articles on idiotype networks, T cell tolerance at T and B cell levels, and gene control. S/U grading.

Mr. Sercarz (F, Sp)

M260. Immunology Forum 2 (2 units). (Same as Microbiology and Immunology M260.) Prerequisite: course CM185. Broad range of current topics in immunology presented and discussed in a seminar format. Continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U grading.

Mr. Sercarz (F, Sp)

M262A. Immunobiology of Cancer (2 units). (Same as Biology M262A and Immunology M262A.) Prerequisite: consent of instructor. Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies including cell-mediated immunity, tumor response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U grading.

Mr. Bonavida, Ms. Giorgi (Sp, W)

M262B. Immunology of AIDS (2 units). (Same as Biology M262B and Immunology M262B.) Lecture, one hour; discussion, one hour. Prerequisite: courses M258B, M258C, Microbiology and Immunology 202A, 202B, 202C, 202D, 202E, and 202F. Reading and discussion of current research articles on anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U grading.

Mr. Bonavida, Ms. Giorgi (F, five weeks)

M262C. Biological Individuality and Immunity (2 units). (Same as Biology M262C and Microbiology and Immunology M262C.) Prerequisite: course M258C. Review of current literature in the field of immunogenetics, with emphasis on studies involving genetics, immunologic and immunologic principles and techniques. Selected topics discussed and results interpreted; conclusions and experimental methods evaluated.

Ms. Scofield (Sp, alternate years)

M262D. Selected Topics in Immunology (2 units). (Same as Biology M262D and Microbiology and Immunology M262D.) Prerequisite: consent of instructor. Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

Mr. Wall (F, W, Sp)

M263. Molecular and Cellular Immunochemistry (2 units). (Same as Microbiology and Immunology M263.) Prerequisite: consent of instructor. Critical discussions of current literature in T and B cell immunity, with emphasis on molecular mechanisms.

Mr. Kronenberg, Mr. Sercarz (F, W, Sp)
270. Seminar in Molecular Virology (2 units). Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U grading. Mr. Bark; Mr. Witte (F, W, Sp).

280. Seminar in Molecular and Cellular Endocrinology (2 units). Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and cellular endocrinology. S/U grading. Mr. Fox (Sp).

CM285. Immunology. (Same as Biology CM285 and Microbiology and Immunology CM285.) Lecture. Three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 132B/132BL, 153A/153AL. Recommended concurrently: Chemistry 132C. Introduction to experimental immunology and immunochemistry; cellular and molecular aspects of humoral and cell immune reactions. Concurrently scheduled with course CM185. Mr. Clark; Ms. Morrison; Mr. Sercarz (F).

290. Seminar in Molecular Genetics (2 units). Lecture, one hour; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and cellular genetic analysis of cellular gene regulation. S/U grading. (F, W, Sp)

298. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Biology M298, Chemistry M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate advisor of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. S/U grading. (F, W, Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice/ship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Microbiology in Higher Education (2 units). Lecture-discussion/lab. Prerequisites: graduate standing, consent of instructor. Study of problems and methodologies in teaching microbiology, including workshops, seminars, apprentice teaching, and peer observation. S/U or letter grading. Mr. Nierlich.

566. Directed Individual Research (2 to 12 units).

569. Research for M.A. Thesis (2 to 12 units).

599. Research for Ph.D. Dissertation (2 to 12 units).

Molecular Biology
(Interdepartmental)

168 Molecular Biology Institute, (213) 825-1018

Professors
Daniel E. Atkinson, Ph.D. (Biochemistry)
Marcel A. Balduzzi, Ph.D. (Pathology)
Arnold J. Berk, M.D. (Microbiology and Molecular Genetics)
William R. Clark, Ph.D. (Biological Immunology)
Steven G. Clarke, Ph.D. (Biochemistry)
Asim Dasgupta, Ph.D. (Microbiology and Immunology)
Edward M. Feig, Ph.D. (Biochemistry)
Rajinder E. Dickson, Ph.D. (Biochemistry, Geophysics), Director
David D. Eisenberg, D.Phil. (Physical Chemistry, Molecular Biology; Distinguished Teaching Award)

Frederick A. Eisinger, Ph.D. (Microbiology and Molecular Genetics)
John H. Fessler, Ph.D. (Biological Chemistry)
C. Fred Fox, Ph.D. (Microbiology and Molecular Genetics, Molecular Biology)
Dohn G. Glitz, Ph.D. (Biological Chemistry)
Robert Goldberg, Ph.D. (Biochemistry)
Jay D. Grolla, Ph.D. (Biochemistry)
Michael Grunstein, Ph.D. (Biological Chemistry)
Harvey R. Herschman, Ph.D. (Biological Chemistry)
Wayne L. Hubbell, Ph.D. (Ophthalmology, Biochemistry)
H. Ronald Kaback, M.D. (Physiology)
Harumi Kamatsu, Ph.D. (Biochemistry)
James A. Lake, Ph.D. (Biological Chemistry, Molecular Biology)
Judith A. Lengyel, Ph.D. (Biological Chemistry, Molecular Biology)
Harold G. Martinson, Ph.D. (Biochemistry, Molecular Biology)
Jeffrey H. Miller, Ph.D. (Biological Chemistry)
Sherie L. Morrison, Ph.D. (Microbiology and Molecular Genetics)
Elizabeth F. Neufeld, Ph.D. (Biological Chemistry)
Donald P. Nierlich, Ph.D. (Microbiology and Molecular Genetics)
Dan S. Ray, Ph.D. (Biological Chemistry)
Emil Freier, Ph.D. (Biochemistry, Molecular Biology)
Leonard H. Rome, Ph.D. (Biological Chemistry)
Winston A. Salser, Ph.D. (Biological Chemistry)
Verne N. Schumaker, Ph.D. (Biochemistry, Molecular Biology; Distinguished Teaching Award)
David S. Sigman, Ph.D. (Biological Chemistry)
Larry Simpson, Ph.D. (Biological Chemistry)
J. Philip Thornton, Ph.D. (Biological Chemistry)
Allan J. Tobin, Ph.D. (Biological Chemistry)
Elaine M. Tobin, Ph.D. (Biological Chemistry)
Joan S. Valentine, Ph.D. (Inorganic Chemistry and Biochemistry)
Randolph Wall, Ph.D. (Microbiology and Immunology)
Richard L. Weiss, Ph.D. (Biochemistry)
Charles A. West, Ph.D. (Biochemistry; Distinguished Teaching Award)
Felix W. Wettstein, Ph.D. (Microbiology and Immunology)
William T. Wicks, M.D. (Biological Chemistry)
Bernard J. Wisnieski, Ph.D. (Microbiology and Molecular Genetics)
Owen N. Witte, M.D. (Microbiology and Molecular Genetics)
Paul D. Boyer, Ph.D. (Biochemistry)
George G. Weiss, Ph.D. (Biochemistry)
Irving Zablin, Ph.D., Emeritus (Biological Chemistry)

Associate Professors
Clifford F. Brunk, Ph.D. (Biological Chemistry)
Lawrence T. Feldman, Ph.D. (Microbiology and Immunology)
Robert P. Gunisals, Ph.D. (Microbiology and Molecular Genetics)
Michael Lovett, M.D., Ph.D. (Microbiology and Immunology)
Aldona J. Lustig, Ph.D., in Residence (Medicine, Microbiology and Molecular Genetics)
Kevin McIntee, Ph.D. (Biological Chemistry)
David I. Mager, Ph.D. (Biological Chemistry)
S. Larry Zupansky, Ph.D. (Biological Chemistry)

Assistant Professors
Renato J. Agulana, Ph.D. (Biological Chemistry)
Utpal Banerjee, Ph.D. (Biological Chemistry)
Jonathan Braun, M.D., Ph.D. (Pathology and Laboratory Medicine)
David A. Campbell, Ph.D. (Microbiology and Immunology)
Robert E. Cohen, Ph.D. (Biochemistry)
Stephan T. C. F. Durner, Ph.D. (Biological Chemistry)
Jeanne M. Erickson, Ph.D. (Biological Chemistry)

Juli F. Feigon, Ph.D. (Biochemistry)
Reid C. Johnson, Ph.D. (Biological Chemistry)
Mitchell Kronenberg, Ph.D. (Microbiology and Immunology)
Frank A. Laski, Ph.D. (Biological Chemistry)
Jorge R. Mancillas, Ph.D. (Anatomy and Cell Biology)
Joan E. McEwen, Ph.D. (Microbiology and Molecular Genetics)
Sabeen Merchant, Ph.D. (Biological Chemistry)
Virginia L. Miller, Ph.D. (Microbiology and Molecular Genetics)
Gregory S. Payne, Ph.D. (Biological Chemistry)
Robert W. Simons, Ph.D. (Microbiology and Molecular Genetics)

Adjunct Professor
James C. Paulson, Ph.D. (Biological Chemistry)

Scope and Objectives
The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are drawn from participating departments and from the Molecular Biology Institute. Areas for study include cell biology; developmental biology; DNA replication; repair; and recombination; gene expression; gene structure and regulation; immunobiology; microbiology/virology; oncogenes, growth control, and molecular pathology; plant molecular biology; protein structural biology; and structural biology.

Ph.D. Degree
Admission
Recommended undergraduate training for the Ph.D. program includes a major in a biological or physical science. Coursework should include mathematics through calculus, one year of general and organic chemistry, one year of physics, two terms of physical chemistry based upon the use of calculus, and one year of biology. Undergraduate requirements may be modified for qualified candidates with interests in certain areas. Candidates who enter the program with course deficiencies are expected to fulfill these early in the graduate program. In addition to University requirements, six terms of Molecular Biology M298 are required.

Only superior students are admitted, and in addition to the application, transcripts, and statement of purpose, three letters of recommendation are required. Graduate Record Examination (GRE) scores. Copies of materials sent to the Graduate Admissions Office should also be sent directly to the Graduate Office, Molecular Biology Program, 168 MBI, UCLA, Los Angeles, CA 90024-1570.

Course Requirements
The usual program is two regular courses per term in addition to laboratory research, or the equivalent of 12 quarter units of upper division
or graduate work. Six terms of Molecular Biology M298 are required.

**Teaching Experience**

Teaching experience is encouraged, as it is a skill needed for a future career.

**Qualifying Examinations**

Examinations are given in Molecular Biology M298, and four must be passed. The University Oral Qualifying Examination on original research proposed by the candidate independently of the Ph.D. adviser and on a topic distinct and separate from thesis research is held usually during the second year in the program. A "midstream seminar" must be presented during the third year in the program.

**Final Oral Examination**

The final oral examination is required of all students for the degree.

**Graduate Course**

M298. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Biology M298, Chemistry M298, Microbiology M298, and Microbiology and Immunology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

**Related Courses in Other Departments**

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the guidance committee or research supervisor, other related courses may be included in the program.

**Biological Chemistry** M221A-M221B, M248, M253, M255, M257, M263, M264A-M264B-M264C, M266A-M266B-M266C, M267, M298

**Chemistry and Biochemistry** M230G, M230D, M253, M257, 262, M263, M264A-M264B-M264C, M266, M267, M298

**Microbiology and Molecular Genetics** 250, 251, 256, M258A, M258B, M260, M262, M266, M298

**Microbiology and Immunology** 250, M256, M258A, M258B, M260, M262A, M262B, M263, M264, M298

**Scope and Objectives**

The Department of Musicology provides students with a broad understanding of the history and literature of the art music of Europe and the Americas and of its place in the development of Western culture. Courses cover virtually every period, style, and genre as well as particular areas of popular music and jazz which have been or may be influenced by Western art music.

The department is presently in the process of transferring its long-established graduate programs from the Music Department. As a result, proposals to offer discrete degrees in musicology are currently under review. Students with degrees in progress at the time this transfer is approved should work closely with the advisers in their areas to determine how this change affects their degree requirements and options. The following programs are offered through the Department of Music.

**Master of Arts in Music**

**Admission**

Applicants for the M.A. must have completed a Bachelor of Arts degree, or the equivalent, in Music or other fields of study, provided they have the musical training and musicianship necessary to pursue graduate work. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants for the Ph.D. must have completed a Master of Arts degree in Music (or an equivalent degree).

Applicants for both degrees (M.A. and Ph.D.) are also required to (1) take a departmental assessment examination (details are automatically sent after the application has been received), (2) submit a letter describing their background of study and stating their reasons for wishing to pursue graduate studies in music, (3) submit three letters of recommendation from former instructors and/or professionals with whom they have worked, and (4) submit a paper on an appropriate subject. Ph.D. applicants should submit the M.A. thesis.

No application can be considered until the examination has been taken and all of the above materials have been received. Letters of inquiry and applications must be submitted to Mary Crawford, Department of Music, 2539 Schoenberg Hall Annex, UCLA, Los Angeles, CA 90024-1616.

**Foreign Language Requirement**

Reading knowledge of German and a choice of French, Italian, or Latin is required.

**Course Requirements**

You are required to complete a minimum of nine courses, five of which must be at the 200 level. Music 200A, four courses from 201A through 201F, either 210 or 211 (students planning to enter the Ph.D. program are strongly advised to take both courses 210 and 211 in the first year of residence), 250A or 250B, and two terms of 260A through 260F are required. Only four units of Music 596A, 596B, 596C, or 596D and four units of course 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement.

Course 598 serves to guide the preparation of the thesis and should normally be taken during your last term in residence.

**Thesis Plan**

The thesis is an extended essay; its topic and the master's committee members are approved by your department.

**Final Examination**

The final examination is oral and includes discussion of both the thesis and related matters.

**Ph.D. in Music**

**Admission**

See "Admission" under the M.A. degree above.

**Foreign Language Requirement**

Reading knowledge of French, German, and a choice of Italian, Latin, or another language approved by the department is required.
Course Requirements
Music 200A, 201A-201F, 210, 211, 250A or 250B, and five terms of 260A through 260F are required. If you received the M.A. in historical musicology from UCLA, you normally take a minimum of three terms of courses 260A through 260F in the Ph.D. program. You may petition on the advice of your graduate adviser for exemption from specific requirements on the basis of equivalent work done at the M.A. level.

You may complete the residence requirement by electing courses (with consent of the graduate adviser) from the 200 series or the list of 100-level courses under "Course Requirements" for the M.A.

Qualifying Examinations
When you and your guidance committee believe you are ready to take the qualifying examinations, you should submit a schedule to the Student Services Office and the committee members listing the order in which the examinations are to be taken. The Student Services Office staff acts as proctor for the tests. Normally the written examinations are spread over a two-week period but should be completed within three weeks. Repeat examinations may be scheduled in consultation with the guidance committee and after a stipulated period of time. Contact the Student Services Office for details on the written examinations.

When you successfully complete the written examinations, the departmental oral qualifying examination can be scheduled. After passing this oral examination, you may submit your dissertation proposal and request for a doctoral committee; this committee administers the University Oral Qualifying Examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination
The dissertation is an extended monograph. A final oral examination is required by the department.

Lower Division Courses
1A-18B. Introduction to Musicology. Prerequisite: consent of department. Introduction to principles, problems, and methods of musical historiography through examination of selected issues and concepts.

2A-2B. Introduction to the Literature of Music. (Formerly numbered Music 2A-2B.) Lecture, four hours; laboratory, one hour. Prerequisite: Music 20A, 20B, or 20C, or permission of instructor. Course 2A is prerequisite to 2B. Designed for nonscience majors. 2A. Technical and formal principles of music literature through the mid-18th century. 2B. Music literature from the mid-18th century to the present.

26A-26B-26C. History and Analysis of Music I. (Formerly numbered Music 26A-26B-26C.) Lecture, four hours; laboratory, one hour. Prerequisite: Music 20A, 20B, 20C, or permission of instructor. Course 26A is prerequisite to 26B, which is prerequisite to 26C. History and literature of music from beginning of the Christian era to 1750, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition.

Ms. Gollmer, Mr. Reaney
28A-28B-28C. Early Music Laboratory (2 units each). (Formerly numbered 28.) Laboratory, three hours. Corequisite: course 26A or 26B or 26C. Practical laboratory in which students perform music of various periods, as correlated with courses 26A-26B-26C.

Mr. Bradshaw, Ms. Gollmer

Upper Division Courses
122. Studies in History of Musical Thought. Prerequisites: courses 1A-1B, 26A-26B-26C, 26A-26B-26C. Music 20A, 20B, 20C. Alternative conceptions of music from early 18th century to about 1800, with emphasis on its nature as a medium of expression to its nature as a primarily formal or abstract art form.

Mr. Cole, Mr. Saunders (F)
125A-125B-125C. History and Analysis of Music II. (Formerly numbered Music 125A-125B-125C.) Lecture, four hours; laboratory, one hour. Prerequisites: courses 26A-26B-26C, Music 20A, 20B, 20C, or consent of instructor. Course 125A is prerequisite to 125B, which is prerequisite to 125C. History and literature of music from 1750 to the present, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition.

Mr. Hudson, Mr. Knapp
C127A-C127F. Selected Topics in History of Music. (Formerly numbered Music C127A-C127F.) Discussion, three hours. Prerequisites to all courses: courses 1A-1B, 26A-26B-26C. Music 20A, 20B, 20C; in addition, 126A is prerequisite to 127D, 126B is prerequisite to 127E, and 126C is prerequisite to 127F. Designed as seminar for undergraduates in preparation for graduate work. Special aspects of music of each period studied in depth. May be concurrently scheduled with Music C227A-C227F. C127A. Middle Ages; C127B. Renaissance; C127C. Baroque; C127D. Classic; C127E. Romantic; C127F. 20th Century.

Mr. Bradshaw, Mr. Hudson, Mr. Reaney
130. Music of the U.S. (Formerly numbered Music 130.) Prerequisite: course 2A or consent of instructor. Study of art music in the U.S. from Colonial times to the present.

Mr. Stevenson
133. Bach. (Formerly numbered Music 133.) Lecture, two hours; laboratory, two hours. Prerequisite: undergraduate standing. Life and works of Johann Sebastian Bach.

Mr. Hudson
134. Beethoven. (Formerly numbered Music 134.) Lecture, two hours; laboratory, two hours. Prerequisite: undergraduate standing. Life and works of Ludwig van Beethoven.

Mr. Knapp

Mr. Saunders
139. History and Literature of Church Music. (Formerly numbered Music 139.) Prerequisite: course 2A or consent of instructor. Study of forms and liturgies of Western church music.

Ms. Gollmer and the Staff (Sp)

Mr. Cole, Mr. D’Aconne (W)
The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkish. To meet increasing demands for a knowledge of this area and its past and present, increasing demands for a knowledge of this area and its past and present, meet increasing demands for a knowledge of modern and ancient languages of the Near East: Arabic, Hebrew, Armenian, Semitics, and Turkic.

Undergraduate majors may be taken in ancient Near Eastern civilizations, Arabic, Hebrew, Iranian Studies, and Jewish studies. Masters and Ph.D. programs are offered in ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

Undergraduate Study

The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields you must meet the prerequisites and take the courses prescribed. Your adviser assists in selecting a plan of study developed around your interests.

You may combine your major with one in another department (double major) to enhance your educational opportunities. Due to the number of additional courses required, you are advised to consider this option early in your academic career and in consultation with program advisers in both majors.

Bachelor of Arts in Ancient Near Eastern Civilizations

There are four options for a major in ancient Near Eastern civilizations: (1) Mesopotamia, (2) Egypt, (3) Syria-Palestine, and (4) biblical studies.

Preparation for the Major

Prerequisites for options 1 and 2 are German 1 and 2; prerequisites for options 3 and 4 are Greek 1, 2, Hebrew 1A-1B-1C, 102A-102B-102C. Majors in all four fields are expected to continue their study of German or Greek beyond the prerequisite levels.

The Major

Majors in all four options are required to take 14 courses selected in consultation with the program adviser.

Majors selecting options 1, 2, and 3 are required to take four language courses as follows: option 1 — Semitics 140A-140B, 141, 142; option 2 — Ancient Near East 120A-120B-120C, 121A; option 3 — Semitics 130 and three terms of Hebrew 120. The remaining 10 courses for all three options are to be selected from the following: three literature courses from Ancient Near East 150A, 150B, 150C, Jewish Studies M150A; three courses in history and religion from Ancient Near East M104A, M104B, 130, 170, History 105, M191A, 193D, M203A, Iranian 169, 170; three courses in archaeology and art from Ancient Near East 160A, 160B, 161A, 161B, 161C, 162, Art History 101A, 101B; one course in research methodology (such as Anthropology 115Q, 115R, 116P, M116Q, or Linguistics 120A, 120B, or English 140A) taken preferably in another department with the consent of the adviser.

Majors selecting option 4 are required to take 14 courses as follows: three terms of Hebrew 120; Ancient Near East 150C, 162, 170; English 108B or History 194A; Greek 130; Jewish Studies M150A; History M191A; Semitics 130. The remaining three courses may be selected from Ancient Near East M104A, M104B, 130, 150A, 150B, 160A, 160B, Art History 101A, 101B, 105A, Classics 168, Greek 131, History 105, 193D, 194B, Iranian 169, 170, Latin 120.

Bachelor of Arts in Arabic

Students majoring in Arabic may combine the major with the interdepartmental specialization in business and administration to enhance their career opportunities. Due to the number of additional courses required, you are advised to consider this option early in your academic career.

Preparation for the Major

Required: Arabic 1A-1B-1C, 150A-150B.

The Major

Bachelor of Arts in Hebrew

Preparation for the Major

Required: Hebrew 1A-1B-1C, 102A-102B-102C, Jewish Studies M150A-150B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 103A-103B-103C, three terms of Hebrew 120 and/or 125; two courses from Hebrew 130, 135; two courses from Hebrew 140, 160; Hebrew 190A-190B; two additional courses in Hebrew or Aramaic to be approved by the adviser; two courses from History M191A, M191B, M192A, M192B.

Bachelor of Arts in Jewish Studies

Preparation for the Major

Required: Hebrew 1A-1B-1C, History M191A-M191B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 102A-102B-102C, 103A-103B-103C, 120 or 125, Jewish Studies M150A-150B, 151A-151B, 199, and four other upper division courses. At least two of the four must be courses in the areas of Hebrew, Jewish history, or Yiddish. The remaining two may be selected either from those areas or from courses with Jewish content given in other departments and approved by the adviser.

Master of Arts Degree

Admission

In addition to the regular University requirements, a bachelor's degree or its equivalent in the language area selected for the degree, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required. The GRE must be taken within 24 months prior to receipt of your admission application by the department. As a rule, you are not admitted if your grade-point average is below 3.25 or if your GRE score is below 1,600. Prospective students may write to the Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA, Los Angeles, CA 90024-1511.

You are assigned an adviser after being admitted. Subsequently, an examining committee is established to administer the comprehensive examination.

Major Fields or Subdisciplines

Ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

You may concentrate on either language or literature in your selected field but are required to do work in both. In the field of ancient Near
Eastern civilizations, the department also offers an archaeology emphasis.

**Foreign Language Requirement**

You are required to pass an examination in one major modern European language other than English by the beginning of your fourth term in residence. The choice of the language is determined in consultation with your adviser. You may satisfy this requirement by one of the following methods: (1) Educational Testing Service (ETS) examination with a minimum score of 550, (2) departmentally administered examination, (3) two years of language instruction at a UC campus, with grades of B or better. It is strongly recommended that if you intend to continue toward a Ph.D. degree, you acquire knowledge of a second major European language other than English while still a candidate for the M.A. degree.

**Course Requirements**

A minimum of nine upper division and graduate courses is required, at least six of which must be at the graduate level. All candidates are required to take one term of Near Eastern Languages 200.

In general, if you select either the language, literature, or archaeology option, you are required to study two Near Eastern languages, one of which is considered the major language. Student in Semitics or in Old Iranian study three languages.

In ancient Near Eastern civilizations, you may select as your major language any of the following: ancient Egyptian (including Coptic), Akkadian, Aramaic, Hebrew (including Syriac), Armenian, or Old Persian. For your second language, you may select any of the above or Hittite or Sumerian.

Students in Hebrew must select Hebrew and another Semitic language. In Turkic, you may select either two Turkic languages or Turkish and a second culturally related language. In Arabic, Armenian, and Iranian (modern), you select a major language and a second culturally related language.

Students in Semitics are required to study three Near Eastern languages, at least two of which should be Semitic (the third may be Hittite or Sumerian). In Old Iranian, you study Persian, Sanskrit, and Old and Middle Persian.

Twelve units of course 596 may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

**Comprehensive Examination Plan**

In general, you are required to take written comprehensive final examinations in your major and minor languages, as well as in the history and literature of your major field. Further details are available in the departmental Guide to Graduate Studies.

**Ph.D. Degree**

**Admission**

In addition to the regular University requirements, an M.A. or equivalent in your field, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required. The GRE must be taken within 24 months prior to receipt of your admission application by the department. As a rule, you are not admitted if your grade-point average is below 3.25 or if your GRE score is below 1,600. Prospective students may write to the Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA, Los Angeles, CA 90024-1511.

The M.A. program need not have been completed at UCLA. You are assigned an adviser after being admitted. Subsequently, an examining committee is established to administer the qualifying examinations.

**Major Fields or Subdisciplines**

Ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitic, Turkic.

You may concentrate on either language or literature in your selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

**Foreign Language Requirement**

Two modern major European languages other than English are required. The choice of languages must be approved by the adviser, who may also require additional language skills in modern and/or ancient languages if such skills are needed for scholarly work in the area of your interests.

The requirement is fulfilled by one of the following methods: (1) passing the Educational Testing Service (ETS) examination with a minimum score of 550, (2) departmentally administered examination, (3) two years of language instruction at a UC campus, with grades of B or better.

You are expected to pass one of the two required European languages at the beginning of your first term in residence and the second language no later than the beginning of your fourth term.

**Course Requirements**

If you select the language emphasis for the Ph.D., you are required to add a third Near Eastern language to the two that are required for the M.A. (for language options, see course requirements for the M.A. above). You must achieve high competence in two of your languages and familiarize yourself with the cultural backgrounds of each of the languages selected. You are also expected to take the equivalent of one year of general linguistics. Students in Semitics or in Old Iranian study three languages.

If you select the literature option, you are required to achieve high competence in two Near Eastern languages and their literatures (for language options, see course requirements for the M.A. above). You are also required to familiarize yourself, through appropriate coursework, with the history of your cultural area, and the methods of literary research and the history of literary criticism.

If you select the archaeology emphasis in the ancient Near Eastern civilizations specialization, you are required to achieve high competence in two ancient Near Eastern languages (for options, see course requirements for the M.A. above) and must be well-versed both in the history of the cultural area and in archaeological methodologies.

Further details regarding the choice of languages and examination requirements are available in the departmental Guide to Graduate Study.

**Qualifying Examinations**

You must pass the written qualifying examinations before your doctoral committee is formed.

Candidates in languages are examined in three Near Eastern languages and the literary and historical background of at least two of them. Candidates in literature are examined in the literatures written in two languages within the cultural area of concentration and the historical and cultural background of these languages, with emphasis on one of them. Candidates specializing in the archaeology of the ancient Near East are examined in two ancient languages and the history and archaeology of the ancient Near East.

When you have passed the written examinations, your doctoral committee administers the University Oral Qualifying Examination. Passing this examination allows you to advance to candidacy and begin work on your dissertation.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Final Oral Examination**

The department does not require an oral defense of the dissertation except when deemed necessary by the doctoral committee.

**Ancient Near East**

(Akkadian, Aramaic, Phoenician, and Ugantic are listed under Semitics.)

**Upper Division Courses**

M104A-M104B. Ancient Egyptian Civilization. (Same as History M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. Political and cultural institutions of ancient Egypt and ideas on which they were based. M104A. Chronological discussion of Prehistory, the Old and Middle Kingdoms, and the New Kingdom and the Late period until 332 B.C. Mr. Loprieno (alternate years)
Graduate Courses

21B. Late Egyptian. Lecture, three hours. Prerequisites: courses 121A-121B-121C, consent of instructor. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit. Mr. Loprieno

211A-211B. Egyptian Texts of the Greco-Roman Period. Lecture, three hours. Prerequisite: course 121C. Introduction to grammar and orthography of hieroglyphic texts from Greco-Roman temples. Text readings and translation of various textual types. Mr. Loprieno

220. Seminar in Ancient Egypt. Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit. Mr. Loprieno

221A-221B. Demotic. Prerequisite: course 121C. Introduction to Demotic grammar and orthography. Reading of texts from various genres. Mr. Loprieno

240A-240B-240C. Seminars in Sumerian Language and Literature. Lecture, two hours. Prerequisite: consent of instructor. Reading and interpretation of selected Sumerian literary texts. Mr. Loprieno

150A-150B-150C. Survey of Ancient Near Eastern Literatures in English. Lecture, three hours. Each course may be taken independently for credit. 150A. Sumerian, 150B. Egypt, 150C. Syria and Palestine. Mr. Buccellati, Mr. Loprieno, Mr. Segert

160A-160B. Introduction to Near Eastern Archaeology. Lecture, three hours. Terminology, geography, principles, strategy of research, bibliography, and general survey of Near Eastern archaeology. Ms. Carter (alternate years)

161A-161B-161C. Archaeology of Mesopotamia. Prerequisite: consent of instructor. Survey of main archaeological periods in Mesopotamia, with special emphasis on early prehistoric and historic periods and with reference to neighboring cultural areas. Each course may be taken independently for credit. Ms. Segert (alternate years)

152. Archaeology of Palestine. Lecture, three hours. Survey of archaeology of Palestine and the Near East from the beginning of the 19th century to the present. Conducted in Arabic. May be repeated for credit. Mr. Poonaivala

154A-164B-164C. Archaeology of Ancient Israelites. Prerequisites: courses 161A-161B-161C and History 105, or consent of instructor. Survey of major archaeological periods in Israel, with special emphasis on prehistoric and prehistoric periods with reference to neighboring cultural areas. Each course may be taken independently for credit. Ms. Segert

220A-220B-220C. Classical Uzbek (Chagatay). Lecture, three hours. Prerequisites: courses 101A-101B-101C or 111A-111B-111C or Iranian 102A-102B-102C or Arabic 102A-102B-102C or Hebrew 102A-102B-102C or consent of instructor. Language of classical Central Asian Turkic literature. Descriptive and historical grammar, text analysis, translation, and composition drills. Mr. Bodrogligeti

225A-225B-225C. Old Turkic: Turk and Uygur. Lecture, three hours. Prerequisites: course 180, consent of instructor. Textual and linguistic analysis of Turk and Old Uygur documents: inscriptions, Manichean and Buddhist literary works. Mr. Bodrogligeti (alternate years)

230A-230B-230C. Historical and Comparative Survey of Turkic Languages. Lecture, three hours. Prerequisite: course 180. Extinct and living Turkic languages. History of Turkic: developments in phonemic, grammatical, and lexical systems from the 8th to 20th century. Structural analysis of Turkic languages on comparative basis. Mr. Bodrogligeti

235A-235B. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Chipchak, and Old Anatolian. Lecture, three hours. Prerequisites: course 180, consent of instructor. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres. Mr. Bodrogligeti

240A-240B-240C. Advanced Ottoman. Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent or consent of instructor. Emphasis on different genres of Ottoman, writing (belles lettres as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research. Mr. Bodrogligeti, Mr. Jaeckel (F,W,Sp)

250A-250B-250C. Islamic Texts in Chagatay. Lecture, three hours. Prerequisites: courses 220A-220B-220C or consent of instructor. Phonetic and linguistic survey of basic Islamic source material written in Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics. Mr. Bodrogligeti

260A-260B. Seminars in Modern Turkish Literature. Seminar, two hours. Prerequisites: course 220B or equivalent, consent of instructor. Specific issues and trends in development of Turkish literature from middle of 19th century to the present. Mr. Jaeckel

290A-290B. Seminars in Classical Turkic Literature: Ottoman, Chagatay, and Azeri. Lecture, two hours. Prerequisites: courses 210A-210B-210C and/or 220A-220B-220C, consent of instructor. Survey of Islamic literatures of the Turks in classical period. Readings of Ottoman, Chagatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics. Mr. Bodrogligeti

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

Related Courses in Other Departments

Art History 104B. Eastern Islamic Art
History 111A-111B. History of the Turks
203A-209B. Seminars in Ottoman and Modern Turkic History

Near Eastern Studies (Interdepartmental)

5353 Bunche Hall, (213) 825-1374, 825-4601

Professors

Andras Bodrogligeti, Ph.D. (Near Eastern Languages and Cultures)
Yona Sabar, Ph.D. (Near Eastern Languages and Cultures)
Stanford J. Shaw, Ph.D. (History, Chair)
Georges Sabagh, Ph.D., Emeritus (Sociology)

Associate Professor
Irene A. Bierman, Ph.D. (Art History)

Assistant Professor
Sule Ozier, Ph.D. (Economics)

Scope and Objectives

The graduate major in this discipline is called "Islamic Studies." For details, see the program by that name earlier in this chapter.

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this particular area, (2) those who plan to live and work in the Near East whose careers will be aided by a knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.

Bachelor of Arts Degree

Preparation for the Major

Required: The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. You must also obtain reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or their equivalent in the language of your choice. You may substitute for the European language requirement Program in Computing 1 and one course from Economics 40, Political Science 6, Psychology 41, Sociology 18, or Statistics 50, plus one course from Economics 141, Geography 171, Political Science 102, Psychology M142, or Sociology 112. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 8, 9, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

The Major

Required: Sixteen courses as follows: (1) completion of the advanced level or equivalent in the same language taken in lower division; (2) History 106A-106B-106C and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Anthropology 110, 176, Art History 102A, 102B, 104A, 104B, C104C, Economics 110, 111, 112, 190, Geography 187, 188, Political Science 132A, 132B, 164, 165, Sociology 187. This program may be modified in exceptional cases with consent of the adviser.

If you are interested in doing graduate work in this field, see the M.A. and Ph.D. programs offered under "Islamic Studies" which is described earlier in this chapter.

For further information, contact Professor Stanford J. Shaw at the program address.
Organizational Studies (Interdepartmental)

4256 Bunche Hall, (213) 825-3862

Scope and Objectives

Organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in organizational studies brings together students and faculty from the Departments of History, Political Science, Economics, Sociology, Psychology, and Geography who share an interest in modern organizations. The program gives students a solid grounding in the organizational perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

Special Undergraduate Program

You may elect to combine this program with a departmental major and may petition to have the area of specialization recognized with the bachelor’s degree.

The option of completing an individual major in organizational studies is also open to qualified students. For more information on individual majors, see the beginning of Chapter 5.

If you have a departmental major, you should seek advising in your major department. If you are interested in the individual major, consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the social sciences.

Preparation for the Specialization

Required: At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1 and 2; Sociology 18 and 104 or equivalent; Political Science 80; Psychology 10; Sociology 1; Geography 4.

Upper Division

Required: Nine upper division courses, including (1) at least three courses outside your major department selected from Political Science 180, Sociology 168, 173, Management 190; (2) a minimum of three courses selected from one of the following suites within your major department: Political Science 142, 145, 146, 182A, 182B, 182C, 182D; Economics 101A, 147A, 147B, 170, 171; Sociology 132, 135, 156, 182; Geography 146, 148, 149; Psychology 135, 137A, 148; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside your major department; (4) internship experience in a governmental or service organization.

Professor Oscar Grusky (264 Haines Hall, 825-3232) is the program adviser. For further information, contact Vicki Waldman at the program address.

Philosophy

321 Dodd Hall, (213) 825-4641

Professors

Marilyn McCord Adams, Ph.D.
Robert Mennew Adams, Ph.D.
Rogers Albritton, Ph.D.
Tyler Burge, Ph.D.
Keith S. Donnellan, Ph.D.
Kit Fine, Ph.D.
Philippe Foot, M.A. (Gloria and Paul Griffin Professor of Philosophy)
Montgomery Furth, Ph.D.
David Kaplan, Ph.D.
D. Anthony Martin
Herbert Morris, Ph.D.
Warren S. Quinn, Ph.D., Chair
Alonzo Church, Ph.D., Emeritus
Donald Kalish, Ph.D., Emeritus
Wesley Robson, Ph.D., Emeritus
Robert M. Yost, Ph.D., Emeritus

Associate Professor

Joseph Almog, Ph.D.

Assistant Professors

Andrew Hsu, Ph.D.
Marc Lange, Ph.D.
Gavin Lawrence, Ph.D.

Scope and Objectives

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Philosophy Department was judged among the five best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

Philosopher, translated from the Greek, literally means “lover of wisdom.” The term has come to mean someone who seeks knowledge, enlightenment, and truth. The undergraduate program in philosophy is not directed at career objectives (although it is traditionally a good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed — whether history, religion, government, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

Bachelor of Arts Degree

Preparation for the Major

Required: Philosophy 7 or 21, 22, 31, and one other lower division philosophy course.

The Major

Required: Thirteen upper division or graduate philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.

Courses listed under “Special Studies” may be applied toward the major but not toward a group requirement. A maximum of eight units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

Honors Program

On recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses (eight units) in philosophy with an average GPA of 3.5.

Master of Arts Degree

Admission

It is the policy of the department to admit only those who plan to earn the Ph.D. degree. For admission requirements, see the description under “Ph.D. Degree.”
Foreign Language Requirement
You must demonstrate reading knowledge of French, German, Latin, or Greek. (When relevant to your research, another language may be substituted with consent of the department.) This requirement can be satisfied by passing, with a score of at least 500, the Educational Testing Service (ETS) Graduate School Foreign Language Test in an approved language. Alternatively, it can be satisfied by either of the methods in which the Ph.D. language requirement can be satisfied.

Course Requirements
You must complete at least nine upper division or graduate courses (36 units), excluding Philosophy 199, of which five courses (20 units) must be in the 200 series.

Courses in the 500 series may not be applied toward the course requirements for the M.A. in Philosophy.

Comprehensive Examination Plan
Students seeking the M.A. must pass the master's comprehensive examination (see the "Ph.D. Degree"). In case of failure, the examination may be repeated.

Ph.D. Degree
Admission
Admission to UCLA as a graduate student in philosophy requires approval both by the Graduate Division and by the Department of Philosophy. The University application and two official transcripts from each institution attended should be sent directly to Graduate Admissions; the departmental application, three letters of recommendation (on the official forms), a statement of purpose, a sample of your written work, official scores from the Graduate Record Examination (GRE) General Test (the Subject Test in Philosophy is not required), and official Test of English as a Foreign Language (TOEFL) scores for applicants whose native language is not English should be sent to the department graduate counselor. Departmental information and all applications can be obtained by writing to the Graduate Counselor, Department of Philosophy, 321 Dodd Hall, UCLA, Los Angeles, CA 90024-1451.

Admission to graduate study in philosophy is not probationary. At the end of your first year of study, however, the department conducts a review of your work, and results are discussed in a meeting between you and your graduate adviser.

Foreign Language Requirement
You must demonstrate reading knowledge of French, German, Latin, or Greek. (Another language may be substituted with consent of the department, if it is used in your doctoral work.) You may satisfy this requirement by completing, with a grade of C or better, the final course in a two-year sequence of college courses in an approved language. Alternatively, you may satisfy the requirement by passing the departmental language examination. Completion of the foreign language requirement is not required for admission to the doctoral program but is required by the University for advancement to candidacy.

Course Requirements
A Ph.D. candidate must complete, with a grade of B or better, the three first-year seminars, plus 11 additional upper division and graduate philosophy courses (not including individual studies courses), distributed as follows:

- Logic — Philosophy 135A and one other designated upper division or graduate course in logic in either the Philosophy or Mathematics Department. Consult the Manual for Graduate Students in Philosophy for the designated list.
- History of Philosophy — One graduate course in history of philosophy, plus Philosophy 100A, 100B, 100C (or equivalent graduate or undergraduate courses taken at UCLA or elsewhere).
- Ethics and Value Theory — One graduate-level course.
- Metaphysics and Epistemology — One graduate-level course.

Special Area Requirement — Two designated graduate courses in either metaphysics and epistemology or in ethics. Consult the Manual for Graduate Students in Philosophy for further details.

Electives — As many courses as needed to fulfill the requirement of 11 additional upper division or graduate philosophy courses.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor on the basis of its content and the departmental guidelines. Normally, no substitutions for these courses are allowed, but if you have done graduate coursework elsewhere, you may be permitted to substitute previous graduate coursework in exceptional cases.

Teaching Experience
Before receiving a Ph.D., you are required to spend three terms as a teaching assistant at UCLA.

Qualifying Examinations
The master's comprehensive examination consists of four different examinations. One is on logic. Consult the Manual for Graduate Students in Philosophy for further information about this examination.

There are also examinations on each of the three first-year seminars. These examinations last two hours and each occurs soon after the completion of the seminar to which it applies. The examination is passed or failed as a whole, which does not necessarily require passing of all four parts. A grade of B+ is the lowest passing grade on the whole examination or any of its parts; C+ is a failing grade.

Passing the four-part master's comprehensive examination constitutes completion of the written qualifying examination for the Ph.D.

Special Area Requirement — In the second and third years, you must satisfy two special area requirements — one in metaphysics and epistemology and one in ethics. You must take two specially designated graduate courses in one of the two areas and write a paper prepared in accordance with a specific format called a "proposition" in the other area.

The special course requirement in either metaphysics and epistemology or in ethics should be completed in your second year, with the proposition requirement covering the remaining area to be completed in your third year. Consult the Manual for Graduate Students in Philosophy for further details.

In the third year, you begin a new series of individual studies courses (Philosophy 596) with your dissertation supervisor to develop a well-defined dissertation project. A doctoral committee is selected and the University Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether you are able to complete the dissertation successfully. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of your preliminary investigations. In case of failure, the doctoral committee makes a recommendation for or against allowing a second oral examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination may be waived by the doctoral committee. This determination is usually made at the time of the oral qualifying examination.

Lower Division Courses
1. Beginnings of Western Philosophy. Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heracleitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks.

Mr. Albritton, Mr. Furth

2. Introduction to Philosophy of Religion. Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

Mr. Adams, Mrs. Adams
3. Personal and Social Ideals. Lecture, three hours; discussion, one hour. Study of various conceptions of human perfection and social utopias. Readings from such authors as Freud, Thomas More, Marx, B.F. Skinner, and Sartre.

4. Philosophical Analysis of Contemporary Moral Issues. Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in defense of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, and rights and duties of aliens.

5A. Philosophy in Literature. Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in the Western tradition.

Mr. Quin

5B. Introduction to Moral and Political Philosophy. Lecture, three hours; discussion, one hour. Study of some classic works in moral and political philosophy. Readings from such authors as Plato, Aristotle, Aquinas, and contemporary authors; discussion of the Western tradition. Mr. Morris

6. Historical Introduction to Moral and Political Philosophy. Lecture, three hours; discussion, one hour. Study of some classic works in moral and political philosophy. Readings from such authors as Plato, Aristotle, Aquinas, and contemporary authors; discussion of the Western tradition. Mr. Lange

7. Introduction to Philosophy of Mind. Lecture, three hours; discussion, one hour. Introduction to philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological states. Mr. Albritton, Mr. Almog, Mr. Burge

8. Introduction to Philosophy of Science. Lecture, three hours; discussion, one hour. Introduction to philosophical questions about nature of science, drawing examples from specific scientific theories and controversies that can be understood without much mathematical or technical background. What role does observation and explanation play in building and evaluating scientific theories? How should we view relations between science and common sense? Mr. Kaplan

9. Principles of Critical Reasoning. Nature of arguments: how to analyze and assess soundness of the reasoning they represent. Common fallacies that occur in arguments discussed in light of the rules. What counts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with expressions that convey thoughts, logic of scientific experiments and hypothetical reasoning in science, and some general ideas about probability and its application in making normative decisions (e.g., betting). Mr. Kaplan

10. Virtues and Vices. Lecture, three hours; discussion, one hour. Study of traditional theory of virtues and vices, and inquiry into its truth. Readings in Aristotle, Aquinas, and contemporary authors; discussion of concepts such as courage, wisdom, and justice. Should we accept traditional list of virtues and vices, or should it be revised? Mr. Lawrence

11. Skepticism and Rationality. Lecture, three hours; discussion, one hour. Study of theories of skepticism and rationality, and how our thoughts and actions depend on them. Mr. Lawrence

12. Ethics. Lecture, three hours; discussion, one hour. Study of traditional theory of ethical values and its application in making normative decisions (e.g., betting). Mr. Kaplan

13. Logic, First Course. Lecture, three hours; discussion, one hour. Recommended or required for many upper division courses in Group III. Systematic presentation of elementary theory of logic, including discussion of egoism, utilitarianism, justice, responsiblity, meaning of ethical terms, relativism, etc. Mr. Lawrence, Mr. Quinn

32. Logic, Second Course. Lecture, three hours; discussion, one hour. Prerequisite: course 31 (preferably in preceding term). Symbolic logic: extension of systematic development of course 31. Quantifiers, identity, definite descriptions. Mr. Burge, Mr. Fine, Mr. Kaplan

100A. History of Greek Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Survey of Greek philosophy, with emphasis on metaphysics and epistemology of Plato and Aristotle. Mr. Albritton, Mr. Furth

100B. Medieval and Early Modern Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Strongly recommended: course 100B. Courses 100A, 1008, and 1000 should be taken in immediately successive terms if possible. Survey of development of Greek metaphysics and epistemology within context of philosophical tradition, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes. Mrs. Adams

100C. History of Modern Philosophy, 1650-1800. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Strongly recommended: course 100B. Courses 100A, 100B, and 1000 should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of Locke (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science. Mr. Adams

Group I: History of Philosophy

101A. Plato — Earlier Dialogues. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Study of selected topics in early and middle dialogues of Plato. Mr. Furth

101B. Plato — Later Dialogues. Lecture, three hours; discussion, one hour. Prerequisite: course 101A. Study of selected topics in middle and later dialogues of Plato. Mr. Furth, Mr. Lawrence

102. Aristotle. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Study of selected works of Aristotle. Mr. Furth, Mr. Lawrence

104. Topics in Islamic Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Development of Islamic philosophy in its great age (from Kinds to Avempace, 850 to 1200), considered in connection with Islamic theology and mysticism. Mr. Lawrence

105. Medieval Philosophy from Augustine to Mal- monides. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Development of early medieval philosophy within framework of Judeo-Christian theology and its assimilation and criticism of Greek philosophical heritage. Focus on problem of universalism, existence and God, knowledge, guilt and innocence, and doctrine of the Trinity and atonement. Selected writings from Augustinian tradition in Maimonides read in English translation. Mrs. Adams

106. Later Medieval Philosophy. Prerequisite: one philosophy course or consent of instructor. Development of later medieval philosophy, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through 15th early centuries. Selected texts read in English translation. Mrs. Adams

Group II: Logic, Semantics, and Philosophy of Science

126A. Philosophy of Science. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instruction. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. Mr. Lange

110. Topics in Medieval Philosophy. Prerequisite: one philosophy course or consent of instructor. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209.

Mr. Albritton

111. Leibniz. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled. Mr. Adams

112. Locke and Berkeley. Prerequisite: one philosophy course or consent of instructor. Study of philosophies of Locke and Berkeley; emphasis may sometimes vary from one figure to other. May be concurrently scheduled with course C212.

Mr. Donnellan

114. Hume. Prerequisite: one philosophy course or consent of instructor. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.

115. Kant. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor. Survey of Kant's writings on related topics in 19th-century thought.

116. 19th-Century Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in 19th-century thought.

117. Late 19th- and Early 20th-Century Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in work of one or more of following philosophers: Boltzmann, Fregis, Husein, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

Mr. Albritton, Mr. Almog, Mr. Burge

119. Topics in Modern Philosophy. Prerequisite: one philosophy course or consent of instructor. Selected topics from recent or contemporary philosophy of the 20th century; study of a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219.

Mr. Adams

Group II: Logic, Semantics, and Philosophy of Science

126A. Philosophy of Science. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instruction. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. Mr. Lange
128. Philosophy of Science. Lecture, three hours; discussion, one hour. Prerequisite: course 31 or 128A or consent of instructor. Introduction to contemporary philosophy of science, focusing on problems of central importance.

128C. Philosophy of Science: Social Sciences. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws). May be repeated for credit with consent of instructor.

127A. Philosophy of Language. Prerequisite: course 31 or consent of instructor. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.

127B. Philosophy of Language. Prerequisite: course 32 or consent of instructor. Course 127A is not prerequisite to 127B. Selected topics similar to those considered in course 127A, but at more advanced and technical level. Mr. Kaplan.

128A. Philosophy of Mathematics. Prerequisites: courses 31, 32, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetization of analysis, ramified type theory and impredicative definition (Russell, Poincaré, Hilbert). Mr. Martin, Mr. Kaplan.

128B. Philosophy of Mathematics. Prerequisite: course 128A or consent of instructor. Intuitionism of Brouwer, Heyting, and later Weyl; predicativism of Hilbert. Mr. Martin.

129. Philosophy of Psychology. Lecture, three hours; discussion, one hour. Prerequisites: one four-unit psychology course, one philosophy course. Selected philosophical issues arising from psychology, relation of psychology to philosophy. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and analytic views; psychology and physiology. Mr. Burge.

130. Philosophy of Space and Time. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or course 128A. Philosophy of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutism versus relativism in space and time, philosophical implications of relativity theory.

131. Science and Metaphysics. Lecture, three hours; discussion, one hour. Prerequisite: two philosophy courses or consent of instructor. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality and direction of time, time-travel, backwards causation, realism, etc. May be repeated for credit with consent of instructor.

133. Topics in Logic and Semantics. Prerequisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics. Mr. Kaplan, Mr. Martin.

134. Introduction to Set Theory. Prerequisites: course 32 or upper division standing in mathematics, consent of instructor. Introduction to axiomatic set theory; sets, natural numbers, relations, functions, cardinality, infinity. Mr. Martin.

135A. Metatheory of Sentential Logic. Lecture, three hours; discussion, one hour. Prerequisite: course 32 or equivalent. Introduction to metatheory of classical sentential logic. Emphasis on fundamental metalogical ideas, including proof by induction, rigorous definitions of syntactic and semantic concepts, and proof of completeness. Discussion of philosophical significance of these ideas. Mr. Fine, Mr. Hsu.

135B. Metatheory of Predicate Logic. Lecture, three hours; discussion, one hour. Prerequisite: course 135A or equivalent. Classical first-order logic, its scope, and limits. Gödel's completeness theorem as main positive result. Some consideration to classical negative results on truth, decidability, and completeness, and relationship between first- and second-order logics. Mr. Fine, Mr. Hsu.

136. Modal Logic. Prerequisites: courses 31, 32. First course in two-term sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations, Lemmon-Scott completeness, invariance and expressiveness of modalities in tense and modal logic, quantification extension. Mr. Almog, Mr. Martin.

Group III: Ethics and Value Theory

150. Society and Morals. Lecture, three hours; discussion, one hour. Prerequisite: course 22 or consent of instructor. Critical study of principles and arguments in moral philosophy. May be repeated for credit with consent of instructor.

151A-151B-151C. History of Ethics. (Formerly numbered 151A-151B.) Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Course 151A is not prerequisite to 151B, which is not prerequisite to 151C. Selected Classics in Ancient Ethical Theories: Plato, Aristotle. 151B. Selected Classics in Modern Ethical Theories: Hume, Kant, Mill, etc. 151C. Selected Classics of Medieval Ethics. Mr. Lawrence, Mr. Quinn.

153A. Topics in Ethical Theory: Normative Ethics. Prerequisite: course 22 or consent of instructor. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated once for credit with consent of instructor.

153B. Topics in Ethical Theory: Metaethics. Prerequisite: course 22 or consent of instructor. Study of selected problems in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, etc. May be repeated once for credit with consent of instructor.

155. Medical Ethics. Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, health care allocation. Mr. Quinn.

156. Topics in Political Philosophy. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Recommended: course 22. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor.

157A-157B. History of Political Philosophy. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. May be repeated with consent of instructor. 157A. Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. 157B. Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

161. Topics in Aesthetic Theory. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

166. Introduction to Legal Philosophy. Prerequisite: one philosophy course or consent of instructor. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey the law. Mr. Morris.

Group IV: Metaphysics and Epistemology

170. Philosophy of Mind. Lecture, three hours; discussion, one hour. Prerequisites: two relevant philosophy courses or consent of instructor. Analysis of various problems concerning nature of mind and mental processes; such as mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

172. Philosophy of Language and Communication. Prerequisites: two additional philosophy courses or consent of instructor. Topics of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discourse.

175. Topics in Philosophy of Religion. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

177A. Existentialism. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.

177B. Historical Studies in Existentialism. Prerequisite: one philosophy course or consent of instructor. Study of central philosophical texts of one of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Buber, or Camus. Emphasis on educational aspect, teaching and interpretation of the texts. May be repeated for credit with consent of instructor.

178. Phenomenology. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Introduction to methods and phenomenological method of approaching philosophical problems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

179. Oriental Philosophy: Buddhism. Examination of central concepts and arguments in Buddhist philosophy, with emphasis on school of Mahayana Buddhism. Appropriate parallels to social concepts in the Western tradition.

182. Elements of Metaphysics. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of basic metaphysical questions; nature of physical world, of minds, and of universals; and views of the "self" by alternative systems (e.g., phenomenalism, materialism, dualism).

183. Theory of Knowledge. Prerequisite: course 21 or consent of instructor. Analysis of concept of empirical knowledge.
184. Topics in Metaphysics. Prerequisite: course 21 or consent of instructor. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositional possibilities and necessities, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor.

Mr. Albritton, Mr. Almog, Mr. Donnellan, Mr. Fine

185. Topics in Theory of Knowledge. Prerequisite: course 182 or 193 or consent of instructor. Intensive investigation of one or two selected topics or works in the theory of knowledge, such as a problem of induction, memory, knowledge as justified true belief. Topics announced each term. May be repeated for credit with consent of instructor.

Mr. Albritton, Mr. Burge, Mr. Donnellan

187. Philosophy of Action. Prerequisite: course 193 or consent of instructor. Study of various concepts employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception.

Mr. Albritton, Mr. Burge, Mr. Donnellan

188. Philosophy of Perception. Prerequisites: two philosophy courses or consent of instructor. Critical study of main philosophical theories of perception and arguments used to establish them.

189. Major Philosophers of the 20th Century. Prerequisite: course 193 or consent of instructor. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor.

Mr. Albritton, Mr. Burge, Mr. Donnellan

Special Studies

M192. Philosophical Analysis of Issues in Feminist Theory. (Formerly numbered 192.) (Same as Women's Studies M110D.) Lecture, three hours. Prerequisite for women's studies majors: Women's Studies 10; for other students: one philosophy course or consent of instructor. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories.

Mr. Adams

193. Christian Ethical Thought. Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment of their views on morality and religious life.

Mr. Adams

195. 19th- and 20th-Century Religious Thought. Lecture, three hours; discussion, one hour. Philosophical approach to Western religious thought of last 200 years, through study of selected works by such authors as Kant, Schleiermacher, Kerkegaard, Buber, and Tillich.

Mr. Adams

196. Undergraduate Seminar in Philosophy. Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Variable topics; consult Schedule of Classes or Department Announcements for topics offered in each term. May be repeated for credit with consent of instructor.

197. Reading and Writing Philosophy. Prerequisites: two lower or upper division philosophy courses. Designed to help philosophy students improve their ability to read philosophy and to write philosophical essays. Selected texts used to illustrate problems of reading and writing; students required to do and redo written work.

Mr. Quinn

199. Special Studies (2 to 8 units). Prerequisite: consent of instructor. Eight units may be applied toward degree requirements, but course cannot be substituted for a course in one of the four groups on basis of similarity of subject matter.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. Limited to and required of all first-year graduate students in philosophy. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

Group I. History of Philosophy

201. Plato. Prerequisite: consent of instructor. Study of major issues. Prerequisite: consent of instructor.

Mr. Adams

202. Aristotle. Prerequisite: consent of instructor. Analysis of major problems in Aristotle's philosophy based on reading, exposition, and critical discussion of relevant texts in English translation.

Mr. Furth, Mr. Lawrence

203. Seminar: History of Ancient Philosophy. Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor.

Mr. Furth

206. Topics in Medieval Philosophy. Prerequisite: consent of instructor. Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor.

Mrs. Adams

207. Seminar: History of Medieval and Renaissance Philosophy. Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor.

Mrs. Adams

208. Hobbes. Prerequisite: consent of instructor. Hobbes' political philosophy, especially the Leviathan, with attention to its relevance to contemporary political philosophy.

Mr. Adams

209. Descartes. Prerequisite: consent of instructor. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C109.

Mr. Albritton

210. Spinoza. Prerequisite: consent of instructor. Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduates.

Mr. Adams

211. Leibniz. Prerequisite: consent of instructor. Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduates.

Mr. Adams

212. Locke and Berkeley. Prerequisite: consent of instructor. Selected topics in philosophy of Locke and Berkeley. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C112.

Mr. Donnellan

214. Hume. Prerequisite: consent of instructor. Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114.

Mr. Donnellan

215. Kant. Prerequisite: consent of instructor. Intensive study of selected writings of Immanuel Kant.

Mr. Adams

216. 19th-Century Philosophy. Prerequisite: consent of instructor. Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

Mr. Adams

218. Topics in Modern Philosophy. (Formerly numbered 219.) Prerequisite: consent of instructor. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C119.

Mr. Adams

220. Seminar: Topics in History of Philosophy. Seminar, three hours. Prerequisite: consent of instructor. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor.

Mr. Adams, Mrs. Adams

Group II. Logic, Semantics, and Philosophy of Science

221A. Topics in Set Theory. Prerequisite: Mathematics 112A or consent of instructor. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, ordinals, transfinite hypothesis, inaccessible numbers. Formalization of set theory: Zermelo-Fraenkel; von Neumann-Godel theory. May be repeated for credit with consent of instructor.

Mr. Furth, Mr. Martin

221B. Non-Neumannian Set Theory. Prerequisite: course 221A or consent of instructor. Standard (so-called Z-F) set theory relies on a principle of limitations of size as means of avoiding antinomy. As this principle was first formulated explicitly as an axiom of set theory by von Neumann, set theories in which such fails may appropriately be spoken of as non-Neumannian. Possibilities in regard to non-Neumannian set theories explored; proposed axiomatizations and relative consistency proofs. May be repeated for credit with consent of instructor.

Mr. Martin

221C. History of Set Theory. Prerequisite: consent of instructor. Development of concept of set and axiomatic set theory; examining selected writings of Frege, Cantor, Russell, Zermelo, Godel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and rank hierarchy, ramification and predicativity, proper classes and sets as small classes, and particular Zermelo-Fraenkel axiomatic set theory. Emphasis on actual expressed ideas and views of various influential authors.

Mr. Martin

222A-222B-222C. Godel Theory:

222A. Prerequisites: several courses in logic, preferably including course 135B. First in series of three courses leading to Godel's incompleteness theorem and Tarski's definition of truth.

Mr. Martin

222B. Prerequisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Godel's incompleteness theorem and Tarski's definition of truth.

Mr. Martin

222C. Prerequisite: course 222B. Godel number theory and Godel theory. Final course in Godel theory sequence.

Mr. Martin

224. Philosophy of Physics. Prerequisite: consent of instructor. Selected philosophical topics related to physical theory, depending on interests and background of participants, including space and time, relativistic mechanics, foundations of statistical mechanics, and quantum mechanics.

Mr. Martin

225. Probability and Inductive Logic. Prerequisite: Computer Science or Mathematics 112A or 112B or consent of instructor.

226. Topics in Mathematical Logic. Prerequisite: consent of instructor. Content varies from term to term. May be repeated for credit with consent of instructor.

Mr. Kaplan, Mr. Martin

227. Philosophy of Social Science. Prerequisite: consent of instructor. Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students with primary interest and advanced preparation in a social science area are encouraged to enroll. May be repeated for credit with consent of instructor.

Mr. Adams
230. Seminar: Logic. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Almog, Mr. Fine, Mr. Kaplan, Mr. Martin

231. Seminar: Intensional Logic. Prerequisite: consent of instructor. Topics may include logic of sense and denotation, modal logic, modal logic of demonstratives, epistemic logic, intensional logic of Principia Mathematica, possible worlds semantics. May be repeated for credit with consent of instructor.

Mr. Almog, Mr. Fine, Mr. Kaplan, Mr. Martin

232. Philosophy of Science. Prerequisite: consent of instructor. Selected topics in philosophy of science. May be repeated for credit with consent of instructor.

Mr. Lange

233. Seminar: Philosophy of Physics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Lange

Group III. Ethics and Value Theory

241. Topics in Political Philosophy. Prerequisites: course 150 or 156 or 157A or 157B or any two philosophy courses or consent of instructor. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor.

Mr. Lawrence, Mr. Quinn

245. Seminar: History of Ethics. Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

246. Seminar: Ethical Theory. Prerequisite: consent of instructor. Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor.

Mr. Lawrence, Mr. Quinn

247. Seminar: Political Theory. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

248. Problems in Moral Philosophy. Prerequisite: consent of instructor. Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.

Mrs. Foot, Mr. Lawrence, Mr. Morris

255. Seminar: Aesthetic Theory. Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

Mr. Quinn

M256. Topics in Legal Philosophy. (Same as Law M217.) Lecture, three hours. Prerequisite: consent of instructor. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

Mr. Dolinko, Mr. Munzer

M257. Seminar: Philosophy of Law. (Same as Law M224.) Lecture, three hours. Prerequisite: consent of instructor. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

Mr. Morris

Group IV. Metaphysics and Epistemology

271. Seminar: Topics in Metaphysics and Epistemology. Discussion, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Albritton

275. Human Action. Prerequisites: two upper division philosophy courses or consent of instructor. Examination of theories, concepts, and problems concerning human actions. Topics may include analyses of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor.

Mr. Albritton

280. 20th-Century Continental Philosophy. Prerequisite: consent of instructor. Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.

Mr. Albritton, Mr. Donnellan

281. Seminar: Philosophy of Mind. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Burge

282. Seminar: Metaphysics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Albritton, Mr. Almog, Mr. Burge

283. Seminar: Theory of Knowledge. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Albritton, Mr. Donnellan

284. Seminar: Philosophy of Perception. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

285. Philosophy of Psychoanalysis. Prerequisite: consent of instructor. Examination of topics such as nature and validity of psychodynamic explanations and interpretations, psychoanalysis and language, metaphysical concepts such as the unconscious, the ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature. Mr. Moms

286. Seminar: Philosophy of Psychology. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Burge, Mr. Donnellan, Mr. Fine, Mr. Furth

287. Seminar: Philosophy of Language. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Burge, Mr. Donnellan, Mr. Fine, Mr. Furth

288. Seminar: Wittgenstein. Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Albritton, Mr. Hsu

289. Seminar: Philosophy of Religion. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Mr. Adams, Mrs. Adams, Mr. Albritton

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Philosophy (1 to 4 units). Prerequisite: consent of instructor. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

596A-596B. Directed Individual Studies (2 to 8 units each). Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U (course 596B) and letter (course 596A) grading.

599. Research for Ph.D. Dissertation (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

Thomas Müller, Ph.D.
Hidenori Sonoda, Ph.D.

Adjunct Professors
Muzaffer Atac, Ph.D.
ViktorDecyk, Ph.D.
Phillip Pritchett, Ph.D.

Scope and Objectives
Physics is a basic science with actual and potential applications in many fields. The undergraduate curriculum is broad and general with respect to physics but includes an introduction to theoretical and experimental work in specialized subfields of physics in the senior year. The Physics B.S. degree program is primarily directed at providing a basic foundation for students who intend to go on to graduate school in physics or related fields such as engineering or other physical sciences. However, for many this is a terminal degree preparatory to working as an engineer or technician in industry. The B.A. program in General Physics provides flexibility for students who are interested in fields outside of physics in which a strong background of knowledge of physics would be helpful.

The department offers a comprehensive graduate program leading to the Master of Science degree (en route to the Ph.D.), the Master of Arts in Teaching (M.A.T.), and the Ph.D., which is offered in theoretical or experimental work in a choice of subfields. It is the policy of the department to admit only students who plan to earn the Ph.D. degree.

Undergraduate Study
The Department of Physics offers a choice of two undergraduate majors: the B.S. degree program in Physics and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for either major must be taken for a letter grade.

Bachelor of Science in Physics
This major should be taken if you intend to continue toward the Ph.D. in Physics.

Preparation for the Major
Required: Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 9E; Chemistry and Biochemistry 11A, 11B/11BL, 11C (11CL is recommended but not required); Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available in the Undergraduate Office, 3-160 Knudsen Hall.

The Major
Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 131, three courses from the 180 series; three additional upper division lecture courses selected from 108, 114, M122, 123, 124, 126, 132, 140. An upper division mathematics course may be substituted for Physics 132 with consent of an adviser. A C average is required in the above courses. Reading knowledge of Russian, German, or French is recommended.

If you are preparing for graduate school, you should take additional courses in physics and mathematics. Physics M122, 123, 124, 126, 132, and 140 are recommended.

Transfer Students — Junior transfer students should preferably have completed (1) a two-year calculus-analytic geometry sequence or equivalent and (2) the calculus-based physics course at their previous college, but in no case should less than three semesters or four quarters of the mathematics and one year of the physics sequence be completed before transferring to UCLA. At least C grades in all mathematics and physics courses taken are required.

Honors Programs
The department offers three honors programs leading to graduation with honors or highest honors in physics. You are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

Bachelor of Arts in General Physics
The major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If you intend to continue work toward the Ph.D. in Physics, you are advised to work for the B.S. in Physics as described earlier.

Preparation for the Major
Required: Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 9E; Chemistry and Biochemistry 11A, 11B/11BL, 11C (11CL is recommended but not required); Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available in the Undergraduate Office.

The Major
Required: Physics 105A, 110A, 110B, 112, 115A, 131, one course from the 180 series, two upper division physics electives (excluding 185 and 199), and five upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

Instructional Credentials
You may earn credentials for teaching physical sciences and other subjects in California elementary and secondary schools. Completion of the Instructional Credential Program in the Teacher Education Laboratory is required. Consult the Graduate School of Education (201 Moore Hall) for information.

Graduate Study
The Department of Physics offers opportunities for graduate study leading to the M.S. (en route to the Ph.D.), M.A.T. (Master of Arts in Teaching), and Ph.D. degrees. Special emphasis is given to preparation in the following fields of physics: acoustics/low-temperature, elementary particles, intermediate energy and nuclear physics, plasma and astrophysics, solid-state and condensed matter, spectroscopy.

Admission
You must have an excellent undergraduate record in addition to meeting the University minimum requirements. You are required to take the Graduate Record Examination (GRE) Subject Test in Physics and to submit three letters of recommendation. International applicants who are applying for financial support (fellowships, teaching assistantships, and graduate student researcher appointments) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English.

Application materials may be obtained by writing to the Graduate Office, Department of Physics, 3-145G Knudsen Hall, UCLA, Los Angeles, CA 90024-1547.

Master of Arts in Teaching
Major Fields or Subdisciplines
It is not required to designate an area of specialization for the M.A.T. degree.

Course Requirements
This degree is a physics master's degree which also leads to qualification for instructional credentials at the secondary school or junior college level. Five graduate courses, five professional (300 series) courses, and 12% total courses are required.

(1) The five graduate physics courses must include Physics 370 and four courses from 210A, 210B, 215A, 221A, 221B.

(2) Also required are the courses necessary for completion of the preliminary State of California Single Subject Instructional Credential, K-12: Community Health Sciences 187, Education 100, 112, 312, 315A-315B, 330B, 330C. Courses in the 500 series may not be applied toward the M.A.T. degree.

Teaching Experience
Teaching experience is required insofar as the required education courses are concerned (supervised teaching at the secondary or junior college level).
Comprehensive Examination Plan
A passing grade on a written comprehensive examination is required. M.A.T. candidates who fail to qualify at the master’s level of achievement may take the examination a second time. Permission to take it a third time may be granted only under exceptional circumstances.

Master of Science Degree
Except for the Master of Arts in Teaching program, the department does not offer a terminal master’s degree. The M.S. degree is awarded to students in the Ph.D. program after they satisfy the requirements described below.

Course Requirements
The University requires a total of nine courses with an average grade of B or better for the M.S. degree. The Physics Department requires that a minimum of six of the nine be graduate courses in physics of which you must pass the five fundamental (core) courses: Physics 210A, 210B, 215A, 221A, 221B. Since knowledge of this material is tested on the written comprehensive examination, usually all or most of the five courses constitute your main course load in your first year of graduate study. Detailed syllabi for the courses are available in the Graduate Office, 3-145G Knudsen Hall. You must fulfill a breadth requirement by passing course 220 or 221C or 231A with a grade of B or better. In addition, if you have not taken course 132 or its equivalent as an undergraduate, you must do so at the beginning of your graduate program. The core and breadth requirements should be completed by your fifth term in residence.

Qualifying Examinations
All departmental graduate students (master’s and Ph.D.) take the same written comprehensive examination, which is graded as follows: (1) pass at the Ph.D. level of achievement, (2) pass at the master’s level of achievement, or (3) fail. This examination is normally taken prior to your fourth term in residence. All students in the Ph.D. program must pass the examination at the Ph.D. level of achievement. Permission to take it a third time may be granted only under exceptional circumstances.

No later than your fourth term in residence you are expected, in consultation with your adviser, to begin taking a series of courses, seminars, and tutorials to prepare you for original research in a given area of specialization. No later than your fifth term in residence you are expected to begin taking a sequence of Physics 596 courses with a faculty member in your chosen field of specialization. By the third term of the 596 sequence you are expected to make a substantive oral presentation describing the results of a problem in your 596 program before an audience which includes the faculty member(s) with whom you are taking course 596 and three other faculty members. No later than the end of your eighth term in residence you are expected to make a formal arrangement with a faculty member to serve as your Ph.D. research sponsor.

The doctoral committee conducts the University Oral Qualifying Examination, which may include (1) material in your field of specialization, (2) related material that members of the committee from other departments may wish to ask, and (3) discussion of the proposed dissertation problem. Committee members guide, read, approve, and certify the dissertation. At least two members from the Physics Department and at least one outside member must act in this capacity. A decision is also made at this time as to whether a final oral examination is required. When a satisfactory report on the completion of the written and oral qualifying examinations has been submitted, you are eligible to be formally advanced to candidacy for the Ph.D.

Final Oral Examination
This examination ordinarily is a discussion of your original work, including your dissertation and other related matters to be determined by the committee. It may be, if the committee so desires, a survey or comprehensive examination.

Lower Division Courses
Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take either Physics 10 or 3A if only one course is to be taken, or 3A and 3B as a two-course sequence. Physics 1Q is intended for entering freshman physics majors and normally is taken in your first term in residence. Although it is not a required course or a part of or prerequisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics.

Physics 3A, 3B, 3C form a one-year sequence of courses in general physics (with laboratory). In this sequence only algebra and trigonometry are used in providing a mathematical description of physical phenomena; calculus is not used.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences. However, unlike Physics 3A, 3B, 3C, calculus is used throughout, and successful completion of basic calculus courses is a prerequisite for admission to this sequence.

Physics 8A, 8B, 8C, 8D, 8E form a sequence of courses in general physics for majors in physics. The department takes into account prior preparation in physics. If you feel your background would permit acceleration, you may be exempted from one or more of courses 8A through 8E by taking the final examination with a class at the end of any term. These serve as placement examinations. A satisfactory score on one or both parts of the College Entrance Examination Board Advanced Placement Physics C Test may
also serve as a placement examination, but placement is not automatic. You should discuss such possibilities with your departmental adviser.

Physics 10 is a one-term, non-laboratory course which surveys the whole field of physics. Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to six units credit.

1Q. Contemporary Physics (2 units). Limited to physics majors. Review of current problems in physics, with emphasis on those being studied in research laboratories at UCLA. Significance of the problems and their historical context. Light P/NP grading. (F,W)

3A. General Physics: Mechanics of Solids and Fluids. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisites: three years of high school mathematics including trigonometry (or equivalent), three years of high school science, with emphasis on chemistry, or completion of one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 3A or equivalent. Fundamentals of classical mechanics: Newton's laws; conservation of momentum, angular momentum, energy; Kepler's laws; dynamics of systems of particles; fluid mechanics. (F,W)

3B. General Physics: Heat, Sound, Electricity and Magnetism. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 3A or equivalent. Temperature, heat, and laws of thermodynamics. Introduction to wave motion, resonance. Sound and acoustics. Electric and magnetic fields. Electric power. Elements of DC and AC circuits. (W,Sp)

3C. General Physics: Light, Relativity, and Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 3B or equivalent. Special relativity, quantum theory. Introduction to relativity. Electron and atom. Matter waves. Nuclear and particle physics. (F,Sp)

6A. Physics for Life Sciences Majors: Mechanics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Prerequisite: course 6B or equivalent. Corequisites: course 8AL, Mathematics 31B. Motion, Newton's laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation. (F,W,Sp)

8AL. Physics Laboratory for Scientists and Engineers: Mechanics (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 6A or consent of instructor. (F,W,Sp)

9B. Physics for Scientists and Engineers (Honors). (Formerly numbered 98B.) Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 8B or equivalent. Corequisites: course 8CL, Mathematics 32B. Electrodynamics: electric field and potential, capacitors and dielectrics. Currents, DC circuits, transistors in RC circuits. Magnetism: magnetic fields and forces, Ampere's law, Faraday's law, magnetic properties of matter. Maxwell's equations in integral form. Inductance and transistors in RL circuits. (F,W,Sp)

10B. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 10C or consent of instructor. (F,W,Sp)

11B. Physics for Scientists and Engineers: Modern Physics. Lecture/demonstration, three hours; discussion, one hour. Prerequisites: course 11A or equivalent. Corequisites: course 11A, Mathematics 32B. Electrodynamics: Maxwell's equations, wave propagation, Doppler effect. Special theory of relativity. (F,W,Sp)

12B. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism (1 unit). Lecture, one hour; laboratory, 90 minutes. Corequisite: course 12C or consent of instructor. (F,W,Sp)

13A. Electricity and Magnetism. Lecture, three hours. Prerequisite: course 131. Electrostatics and magnetostatics. (W)

14A-14B. Mechanics: Preparatory Courses. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3A, 3B, or 3C, or 31A. Corequisite for course 14A: Mathematics 31B. Introductory courses in mechanics that satisfy physics prerequisite for course 6B or 8B. Primarily intended for students who are inadequately prepared for course 6A or 8A. Lectures, demonstrations, discussions, laboratory, and small group problem-solving sessions.

Upper Division Courses

Prerequisites for all upper division courses: Physics 8A through 8E, Mathematics 31A, 31B, 32A, 32B, 33A, and (except for Physics 105A, 116) 33B, or consent of instructor. It is recommended that students take the 180 laboratories in their senior year.

105B. Analytic Mechanics. Prerequisite: course 104B or Mathematics 31B. Corequisites: course 8CH or 8C but in greater depth. (W)

108. Optical Physics. Prerequisite: course 110B. Interaction of light with matter; dispersion theory, oscillator theory, light scattering, interference, diffraction, polarization. Special theory of relativity. (F,Sp)

110A. Electricity and Magnetism. Lecture, three hours. Prerequisite: course 131. Electrostatics and magnetostatics. (W,Sp)

112. Thermodynamics. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Fundamentals of thermodynamics, including first, second, and third laws. Statistical mechanical point of view and its relation to thermodynamics. Some simple applications. (F,Sp)

114. Mechanics of Wave Motion and Sound. Vibrating systems and wave propagation in gases, liquids, and solids, including elements of hydrodynamics and elasticity. Applications in ultrasonics, low-temperature physics, solid-state physics, architectural acoustics. (F,Sp)

115A. Elementary Quantum Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 8E, 105B (may be taken concurrently), 131. Classical background, basic ideas, and methods of quantum mechanics. (W,Sp)

115B. Elementary Quantum Mechanics. Prerequisite: course 115A. Development of methods and concepts of quantum mechanics. (F,Sp)

116. Electronics. Lecture, three hours; laboratory, three hours. Alternating current circuits, vacuum tube characteristics and parameters, transistor characteristics and parameters, amplifiers, oscillators, oscillators, narrow-band amplifiers, hundert. (F,Sp)

M122. Plasma Physics. (Same as Electrical Engineering M185.) Prerequisite: course 110A or Electrical Engineering 101. Senior-level introductory course to physics of plasmas and ionized gases and fundamentals of controlled fusion. Particle motion in magnetic fields; fluid behavior, plasma waves; resistivity and transport; equilibrium and stability; kinetic effects. Discussion of illustrative laboratory experiments.

George Tsebelis, Ph.D.
John Zaller, Ph.D.

Scope and Objectives

The undergraduate program in political science aims to provide an understanding of basic political processes and institutions. It also covers the interaction between national states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

Bachelor of Arts Degree

Students officially admitted to the political science major for Fall Quarter 1989 and thereafter are expected to fulfill the requirements listed below. Continuing students admitted prior to Fall Quarter 1989 should consult the 1988-89 UCLA General Catalog.

Pre-Political Science Major

All students intending to major in political science must enroll as pre-political science majors. After completion of preparation for the major courses, you need to petition to enter the major in the Undergraduate Office, 4256 Bunche Hall.

Preparation for the Major

Required: Four lower division courses from Political Science 10, 20, 40, 50, 70, 80, including at least two courses from 10, 20, and 50. These lower division courses are prerequisites to upper division courses and 10, 20, 40, and 50 are required in those fields designated as your concentration or distribution field.

You must complete all premajor courses with a 2.0 grade-point average by the time you attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

The Major

Required: Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. You are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geogra-
tics may elect distribution fields in the general area of American politics (Field III) and in one of the special subfields (Ilia or Illib), or may satisfy the distribution requirement by taking the necessary courses in the two special subfields (Illa and Illib).

Course 70 and two upper division courses in public law are required for a special distribution in Subfield Illa; course 80 and two upper division courses in public organization and policy are required for a special distribution in Subfield Illb.

Note: No course may be applied toward both concentration and distribution requirements.

Also, courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 195A-195B-195C and 199 may not be applied toward either the concentration or distribution requirement.

Undergraduate Seminars

Each term the department offers a series of seminars (Political Science C197A-C197F) in each field. The prerequisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

Honors Program

The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. You should have substantial experience in writing research papers and take at least one seminar course in the Political Science C197 series before you enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A-195B-195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, 169, 179, and 189) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.

M.A. and Ph.D. Degrees

The aim of the graduate program is to train scholars in the discipline of political science, while also providing the additional professional skills relevant to their particular career objectives. The department ordinarily accepts only students who are seeking the Ph.D. degree (a master's degree may be earned as part of the process of completing the requirements for the Ph.D.).

Admission

In addition to University minimum requirements, the department requires three letters of recommendation, scores of the General Test of the Graduate Record Examination (GRE), and a sample of your analytical writing skills (e.g., senior or M.A. thesis, term paper). Applicants are selected on the basis of perceived promise. Prospective students may write for departmental brochures to the Graduate Studies Office, Department of Political Science, 4289 Bunche Hall, UCLA, Los Angeles, CA 90024-1472. The department does not have an application form in addition to the one used by the Graduate Admissions Office. The deadline for receipt of all application materials is December 31 prior to the Fall Quarter in which you plan to register.

Fields of Study

Five fields of study are offered to graduate students in the department: political theory; international relations; American politics; comparative politics; and formal theory and quantitative methods.

Foreign Language or Research Methodology Requirement

There is no foreign language requirement for the M.A. degree.

Prior to advancement to candidacy for the Ph.D., you must fulfill one of the following requirements:

(1) Foreign Language — You must obtain a minimum score of 550 on an Educational Testing Service (ETS) Graduate Student Foreign Language Test. In languages for which no ETS examination is given, you must take a department examination to test your proficiency at a level comparable to an ETS score of 550. You may also satisfy the requirement by completing, with a grade of B or better, the final course in a two-year sequence of college courses in a foreign language.

(2) Mathematics, Mathematical Economics, or Statistics — You must complete either (a) a sequence of three courses in mathematics or mathematical economics at or above Mathematics 31A (Mathematics 38A, 38B may not be applied) or (b) a sequence of three courses in statistics at or above the level of Political Science 200B. The same courses may not be applied toward both this requirement and satisfaction of either the major or minor field requirements.

You are required to pass the foreign language or methodology requirement before you can be advanced to candidacy for the Ph.D., but you may pass the requirement after the University Oral Qualifying Examination.
Course Requirements
(1) A minimum of four graduate courses is required in each of your two major fields. Each field designates the core courses needed to fulfill a major in that field.
(2) In addition, you are required to take Political Science 200A.
(3) You must take three courses in a minor field, of which at least two must be at the graduate level. In consultation with the graduate adviser, you may establish a minor field from three courses within or outside the department. If formal theory and quantitative methods is a major field, the minor must be taken within the department.
(4) All students must take two graduate courses as electives, selected from within or outside the department. If your minor is taken outside the department, one elective must be in one of the five fields, excluding the two major fields. It may not be course 596.
(5) Only one 596 course may be taken in each major and minor field.
Transfer Students — With the approval of the graduate adviser and the dean of the Graduate Division, a maximum of two graduate courses taken at another institution may be applied toward departmental course requirements. If the courses were taken at another UC campus, the number is increased to four, and if you already have an M.A. in Political Science, to six. Although you may have a master's degree at entrance, you must go through the qualifying examination process to qualify for the Ph.D.

After you have qualified to pursue the Ph.D., as a result of the qualifying examinations, you select your individual research adviser and chart the plan of study to be followed. You must be in residence for a minimum of two terms, during which time you are to satisfy the following minimum requirements:

(1) Minor Field — You must complete the three courses in your minor field and take a written examination or submit a paper appropriate for determining proficiency in your minor field by the end of the second term after passing your major field examinations. The minor field adviser you selected with the approval of the graduate adviser grades your examination or paper. If you fail the minor field examination, you may change minor fields. The examination in your new field counts as a retake examination.
(2) Directed Reading and Research — You must take Political Science 590A to research your proposed dissertation topic and 590B to prepare your research design for the dissertation. Normally, course 590B is taken preceding or during the term in which the Ph.D. oral examination is taken.

Qualifying Examinations
You must take the qualifying examinations in your two major fields by Fall Quarter of your third year. Retake examinations are taken in Spring Quarter of your third year. The outcome of the fall examinations determines whether you (1) qualify for the Ph.D. and obtain an M.A., (2) obtain an M.A. but must retake an examination in one or both fields to qualify for the Ph.D., or (3) fail to obtain an M.A.

Written examinations are given in each of the major fields. Each field committee provides assessments of the examinations as to whether (1) your performance is sufficient for the M.A. degree and (2) also qualifies you to begin work at the Ph.D. level. The following two-tier grading system is used for each examination: for the M.A., grades are pass and not pass; for the Ph.D., grades are not qualified, qualified, and qualified with distinction. To obtain an M.A. degree only, you must complete 12 courses and receive a grade of pass on at least one field examination. If you obtain a pass on both field examinations, you receive a departmental letter certifying competence in both fields.

To qualify for the Ph.D., you must receive a grade of qualified or qualified with distinction in both examinations.

Any failed (i.e., not pass or not qualified) examination may be retaken one time only at the next regular examination period. You may not change major fields if you fail your first examination in a field.

Once you have successfully completed all course and examination requirements and have prepared a formal research design for the proposed dissertation acceptable to the research adviser, you may proceed to the University Oral Qualifying Examination. The research design must be submitted to the oral examination committee at least two weeks before the examination. The purpose of the oral examination is to assess the adequacy of your preparation in undertaking the proposed dissertation, to suggest ways in which the research design may be strengthened, and to determine whether the proposed dissertation is feasible and can be completed successfully. After successful completion of the University Oral Qualifying Examination and the language or methodology requirement, you are advanced to candidacy.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination
Approval of a written dissertation by your doctoral committee constitutes the final requirement for the Ph.D. degree in Political Science.

The doctoral committee for each candidate decides whether or not a final oral examination should be required.

Lower Division Courses
1. Introduction to American Government. Lecture, three hours; discussion, one hour. Introduction to principles and problems of government, with particular emphasis on national government in the U.S. Fulfills American History and Institutions requirement but does not fulfill a preparation for the major requirement.

2. Introduction to Quantitative Research. Lecture, three hours; discussion, one hour. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as an aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration.

3. Mr. DeNardo, Ms. Geddes, Mr. Petrock, Mr. Zaller

10. Introduction to Political Theory. Lecture, three hours; discussion, one hour. Exposition and analysis of selected political theorists and concepts from Plato to the present.

Mr. Ashcraft, Mr. Campbell, Mr. Rapoport, Mr. Smith

20. World Politics. Lecture, three hours; discussion, one hour. Comparative study of constitutional principles, governmental institutions, and political processes in selected contemporary states, with emphasis on major European governments.

Mr. Lotofchie, Mr. Sklar

40. Introduction to Political Economy. Lecture, three hours; discussion, one hour. Introduction to political economy, especially application of economic reasoning to political and social phenomena. P/NP or letter grading.

Mr. Frieden, Mr. Lake

50. Introduction to Comparative Politics. Lecture, three hours; discussion, one hour. Comparative study of constitutional principles, governmental institutions, and political processes in selected contemporary states, with emphasis on major European governments.

Mr. Spiegel

50. Introduction to Comparative Politics. Lecture, three hours; discussion, one hour. Comparative study of constitutional principles, governmental institutions, and political processes in selected contemporary states, with emphasis on major European governments.

Mr. Spiegel

80. Introduction to Public Organization and Policy. Lecture, three hours; discussion, one hour. Introduction to processes of policy formation and implementation. Exploration of emergence and performance of government bureaucracies and their role in American political process. P/NP or letter grading.

Mr. Hobbs

88A-88F. Lower Division Seminars. Seminar, three hours. Prerequisite: freshman or sophomore standing. Opportunity to enhance writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult Schedule of Classes for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C- or higher.

Mr. Fried

88A-88F. Lower Division Seminars. Seminar, three hours. Prerequisite: freshman or sophomore standing. Opportunity to enhance writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult Schedule of Classes for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C- or higher.

Mr. Fried

88A-88F. Lower Division Seminars. Seminar, three hours. Prerequisite: freshman or sophomore standing. Opportunity to enhance writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult Schedule of Classes for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C- or higher.

Mr. Fried
Upper Division Courses

Prerequisite for all upper division courses: upper division standing or consent of instructor.

102. Statistical Analysis of Political Data. Prerequisite: course 6. Introduction to statistical inference. Topics include measures of central tendency, elementary probability theory, common probability distributions, least-squares and maximum likelihood estimation, confidence intervals and statistical tests, comparison of means, analysis of variance, and multiple regression and correlation. Techniques and topics illustrated with applications to a variety of political data. Mr. Petrocik, Mr. Zaller

104A-104B. Introduction to Survey Research. Discussion, three hours. Prerequisite: course 6. Courses in fundamentals of survey research as a method. 104A. Sampling theory and methods, writing of questions, questionnaire construction, and interviewing. Attitudes, attitude measurement, and attitude change. Participation in formulation of research problem. 104B. Prerequisite: course 104A. Conducting a survey. Development of survey questionnaire, designing a sample, collecting interviews, maintaining quality control, and coding interviews for machine tabulation. Performance of computer-aided analysis of some part of data and submission of written report of that research.

M105. Economic Models of Political Choice. (Same as Economics M135.) Prerequisites: Economics 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, and revelation and political bargaining. Mr. Hirshleifer, Mr. Rogowski, Mr. Stein, Mr. Wallerstein

M106. Economic Models of Political Conflict and Conflict Resolution. (Same as Economics M136.) Prerequisites: Economics 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor. Biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Models of the onset and termination of conflict. Conduct of war and strategy and tactics. Mr. Hirshleifer, Mr. Stein

Field I: Political Theory

111A. History of Political Thought: Ancient and Medieval Political Theory. Exposition and critical analysis of major political philosophers and schools from Plato to Machiavelli.

111C. History of Political Thought: Late Modern and Contemporary Political Theory. Exposition and critical analysis of major political philosophers and schools from Hobbes to Hegel to the present.

112. Nature of the State. Systematic analysis of modern concepts and problems of political association. Mr. Golden

113. Problems in 20th-Century Political Theory. Study and interpretation of theorists who have focused their analyses on social and political problems of the 20th century. Mr. Rocco

114A-114B. American Political Thought. Exposition and critical analysis of American political thinkers from the Puritan period to 1865.

114B. Prerequisite: course 114A or consent of instructor. Exposition and critical analysis of American political thinkers from 1865 to the present.

115. Theories of Political Change. Critical examination of theories of political change, relation of political change to changes in economic and social systems, and relevance of such theories for experience of both Western and non-Western societies. May be applied toward either Field I or IV. Mr. Lofchie

116. Marxism. Critical analysis of origins, nature, and development of Marxism political theory. Mr. Ashcraft, Mr. Wolfenstein

117. Jurisprudence. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. May be applied toward either Field I or IV. Mr. Gersten

118. Political Violence. Examination of one or several different uses of violence in the revolutionary process: demonstrations, mass uprisings, coup d'etat, assassination, and terrorism. May be applied toward either Field I or IV. Mr. Rapport, Mr. Tong

119A-119Z. Special Studies in Political Theory. Prerequisites: course 10, one additional course in Field I, consent of instructor. Intensive examination of one or more special problems appropriate to political theory. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Field II: International Relations

120. Foreign Relations of the U.S. Lecture, three hours; discussion, one hour. Survey of factors and forces entering into formation and implementation of American foreign policy, with special emphasis on contemporary problems. Mr. Frieden, Mr. Larson, Mr. Rosecrance, Mr. Spiegel, Mr. Stein

121. Studies in Formulation of American Foreign Policy. Study of formation of American foreign policy with respect to individual cases. Consult Schedule of Classes for topics to be offered in a specific term. Mr. Spiegel

122. World Order. Lecture, three hours; discussion, one hour. Prerequisite: course 20. Study of problems of international relations in community capable of cooperation and development. Mr. Wilkinson

124. International Political Economy. Prerequisite: course 20. Study of political aspects of international economic issues. Mr. Frieden, Mr. Lake

125. Arms Control and International Security. Arms control in context of international security in the nuclear age. Nuclear arms race; relationship between deterrence doctrines and nuclear war; roles of technology and ideology; nuclear proliferation; outer space. Mr. Zoppo

126. Peace and War. Prerequisites: courses 6, 20. Theory and research on causes of war and conditions of peace. Ms. Larson, Mr. Wilkinson

127A-127B. Atlantic Area in World Politics. 127A. Western Europe. External relations of United Kingdom, West Germany, Italy, and other European members of NATO, in regard to European security in context of the Atlantic Alliance. Mr. Zoppo

127B. U.S. and Europe. Prerequisite: course 127A or consent of instructor. Relations between the U.S. and Western European members of the Atlantic Alliance, in context of U.S.-Soviet relations. Mr. Zoppo

128A-128B. Soviet Sphere in World Politics. Prerequisite: course 20. Course 128A or consent of instructor is prerequisite to 128B. Contemporary survey of foreign policies and aspirations of the Soviet Union and other states in Soviet bloc; analysis of content and effects of Communist doctrine affecting relations between Soviet and democratic spheres. Mr. Anderson, Mr. Kolkowicz, Mr. Korobonski

129. Comparative Foreign Economic Policy. Examination of foreign trade, monetary, and investment policies of the U.S., Japan, France, and Federal Republic of Germany by Mr. Lake

130. Politics of Latin American Economic Development. Interaction of international and domestic factors in political and economic evolution of Latin America. Mr. Frieden

131. Latin American International Relations. Prerequisite: course 20. Major problems of Latin American international relations and organization in recent decades. Mr. Gonzalez

132A-132B. International Relations of the Middle East. Prerequisite: course 20. Contemporary regional issues and conflicts, with particular attention to inter-Arab politics, Arab-Israeli problem, and Persian Gulf area. Mr. Binder

132B. Role of the great powers in the Middle East, with emphasis on American, Soviet, and West European policies since 1945. Mr. Binder

133. International Relations of Sub-Saharan Africa. Contemporary regional issues and conflicts; foreign policies of African states; role of external powers. Mr. Keller, Mr. Lofchie, Mr. Sklar

134. Foreign Policy Decision Making and Tools of Strategy. Prerequisite: course 120 or consent of instructor. Contrasts purposeful and process models of individual and group decision making. Impact of strategic interaction and situational factors on foreign policy decision making. Implications for policy choice (e.g., threat assessment, the threat aspect of military/economic/diplomacy). P/NP or letter grading. Mr. Stein

135. International Relations of China. Prerequisite: course 20. Relations of China with its neighbors and their foreign powers, with emphasis on contemporary interests and policies of China vis-a-vis the U.S. and Soviet Union. Mr. Baum

136. International Relations of Japan. Prerequisite: course 20. Foreign policies of Japan and interests and policies of other countries, particularly the U.S., as they relate to Japan. Mr. Baerwald

137A-137B. International Relations Theory. 137A. (Formerly numbered C137A.) Examination of various theoretical approaches to international relations. P/NP or letter grading. Mr. Lake

137B. Alternative approaches to analysis of international and regional and their application to historical and contemporary cases. Mr. Stein

138A-138B-138C. Defense Studies. Prerequisite: course 20:

138A. Defense Strategy and Politics. Analysis of national and international security problems in the nuclear era, with special emphasis on the U.S.

138B. Conduct of Modern War. Study of recent and contemporary wars, with special emphasis on political and strategic problems.

138C. Military Policy and Organization. Study of institutional and policy framework in the national military field. May be applied toward either Field II or Subfield III.

139A-139B-139Z. Special Studies in International Relations. Prerequisites: two courses in Field II, or course 20 and one course in Field II, and consent of instructor. Intensive examination of one or more special problems appropriate to international relations. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

M139A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Economics M103A.) Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons; social, political, and security aspects of nuclear energy treating technological, bargaining, and stability issues. Mr. Intriligator (alternate years)
Field III: American Politics

140. Political Psychology. (Same as Psychology M138.) Prerequisite: Psychology 10. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of issues in American politics.

141. Public Opinion and Voting Behavior. Lecture, three hours; discussion, one hour. Study of character and formation of political attitudes and public opinion. Role of public opinion in elections, relationship of political attitudes to the vote, and influence of public opinion on public policy formulation.

Mr. Petrock, Mr. Zaller

142. Politics of Interest Groups. Systematic investigation of role of political interest groups in government process, with attention to internal organization, leadership, and political and social goals of such group systems, and functions of various types of groups and to strategy and tactics of influence.

Ms. Orren

143. Legislative Politics. Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society.

Mr. Marvick, Mr. Snowiss

144. The American Presidency. Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making.

Ms. Orren, Mr. Snowiss

145. Political Parties. Organization and activities of political parties in the U.S. Attention to historical development of the parties (from party formation, campaign functions and electoral role of the parties, membership problems and party activists, political finance, and policy formulation practices.

Mr. Marvick, Mr. Petrock

146. Political Behavior Analysis. Prerequisites: courses 6, 141. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141 and similar courses.

Mr. Marvick, Mr. Petrock, Mr. Zaller

M147A. Minority Group Politics. (Formerly numbered M147.) (Same as Chicano Studies M147.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Introduction to political economic and racial group politics in the U.S., and political behavior of Mexican American communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, social stratification systems, and cultural codes and modes of ideological discourse in each historical period.

Mr. Rocco

M147B. Minority Group Politics. (Formerly numbered M147.) (Same as Afro-American Studies M147.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Course M147A is not prerequisite to M147B. Examination of dynamism of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

Mr. Gilliam, Mr. Keller

M148. Mass Media and Elections. (Formerly numbered M197C.) (Same as Communication Studies M161.) Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of mass attitude formation and change, different types of media "effects," and role of the media in the American political process.

Mr. Eyngar

149A-149Z. Special Studies in Politics. Prerequisites: two courses in Field III, consent of instructor. Intensive examination of one or more special problems appropriate to American politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Field IV: Comparative Politics

152. British Government. Government and politics of the United Kingdom; British constitution, parliament, parties and elections, foreign policies, administrative problems, and local governments.

Mr. Freedman

153. Governments of Western Europe. Constitution and political structure and development of France and other states of continental Western Europe, with particular attention to contemporary problems.

Mr. Dogan, Mr. Rogowski, Mr. Tsebeis

153A. Game-Theoretic Approach to West European Politics. Course 153 is not prerequisite to 153A. Uses of elementary game-theory to investigate post-World War II Western European politics: social and political problems, relations between states. Mr. Rogowski. Particular emphasis on study of three West European countries — United Kingdom, France, and Federal Republic of Germany (West Germany). Consideration of current developments and comparisons with the U.S.

Mr. Tsebeis

154. Governments of Central Europe. Constitutional and political structure and development of Germany and other Central European states, with particular attention to contemporary problems.

Mr. Dogan, Mr. Wallerstein

155. Advanced Pluralist Democracies. Main features and major problems of economically advanced democracies, analyzed in comparative framework, topic by topic. Emphasis on cross-Atlantic comparisons, not only political but also sociological.

Mr. Dogan

156. Government of the Soviet Union. Intensive study of political and institutional organization of the Soviet Union and its component parts, with special attention to contemporary political issues, as well as party and governmental structures.

Mr. Anderson, Mr. Kolkowicz, Mr. Korbonski

157. Governments of Eastern Europe. Study of political and governmental organization of the Communist countries of Eastern and Central Europe (exclusive of the U.S.S.R.), with special reference to institutions, practices, and ideologies including interregional relations.

Mr. Korbonski

158. Chinese Government and Politics. Organization and structure of Chinese government, with particular attention to policies, doctrines, and institutions of Chinese Communism; political problems of contemporary China.

Mr. Baerwald

159. Japanese Government and Politics. Structure and operation of contemporary Japanese political system, with special attention to domestic political forces and problems.

Mr. Baerwald

Mr. Sisson

161. Government and Politics in South Asia. Comparative study of political change and development and performance of public institutions in Southern Asia, with special emphasis on India, Pakistan, and Bangladesh.

Mr. Sisson

163A-163B. Government and Politics in Latin America:

163A. Comparative study of governmental and political development, organization, and practices in the states of Middle America.

Ms. Owens

163B. Comparative study of governmental and political development, organization, and practices in the states of South America.

Ms. Geoces, Mr. Gonzalez

164. Government and Politics in the Middle East. Comparative study of government and politics of the North African states, including relationship between political development, political organization, and social structure.

Mr. Binder

Mr. Binder

166A-166B-166C. Government and Politics in Sub-Saharan Africa. Patterns of political change in Africa south of the Sahara, with special reference to nationalism, nation building, and problems of development.

Mr. Marvic, Mr. Eastern Africa, 166C; Eastern Africa, 189; Southern Africa.

Mr. Keller, Mr. Lochte, Mr. Sklar

166D. Special Topics in African Politics. Consult Schedule of Classes for topics to be offered in a specific term. P/NP or letter grading.

Mr. Keller (F,W,S)

167. Ideology and Development in World Politics. Comparative study of major modes of political and economic development in the world today. Relations between industrial and nonindustrial societies in light of recent developments about imperialism.

Mr. Sklar

168. Comparative Political Analysis. Lecture. Prerequisites: two courses in Field IV, or course 50 and one course in Field IV. Either course 168L or 168S is required of all students concentrating in Field IV (students with credit for course 168S will not receive credit for this course). Conducted as lecture course. Major approaches to study of comparative politics. Concepts and methodology of comparative analysis.

Mr. Baum, Ms. Golden

168A. Comparative Political Analysis Seminar. Prerequisites: two courses in Field IV, or course 50 and one course in Field IV, and consent of instructor. Either course 168L or 168S is required of all students concentrating in Field IV (students with credit for course 168L will not receive credit for this course). Conducted as seminar. Major approaches to study of comparative politics. Concepts and methodology of comparative analysis.

Mr. Dogan

169A-169Z. Special Studies in Comparative Politics. Prerequisites: two courses in Field IV, consent of instructor. Intensive examination of one or more special problems appropriate to comparative politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, 169, 179, and 189 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see courses 115, 181, 183C

Subfield Illa: Public Law

170. Anglo-American Legal System. Lecture, four hours; discussion, one hour. Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in the U.S. and remain relevant today.

Mr. Gersten

172A-172B. American Constitutional Law. Prerequisite: course 70.

172A. Constitutional questions concerning separation of powers, federalism, and relationship between government and property.

Mr. Gersten, Mr. Hobbs

172B. Protection of civil and political rights under the constitution.

Mr. Gersten, Mr. Hobbs

173. Government and Business. Nature of the cooperation and regulation of competition; government protection of economic interests; regulation of industries clothed with a public interest; government ownership and operation. May be applied toward either Subfield Illa or Illb.

Ms. Owens
17. Government and Labor. Labor force and nature of trade union; regulation of labor relations; problems to be considered: role of government in the wage and price structure; labor market equilibrium; requirements for effective legislation; labor policy and industrial democracy. Also see courses 117, 185.

Subfield Illb: Public Organization and Policy

180. Theories of Organization and Decision Making. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on organizational attributes, values, behavior patterns, and conceptualization of P/NP or letter grading. Mr. Chisholm, Mr. Zoppo.

179A-179Z. Special Studies in Public Law. Prerequisites: eight-hour requirement and four special problems appropriate to public law. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, 169, and 179 may be applied more than once toward the student requirement. No more than three of these courses may be applied toward the major. Also see courses 138C, 137, 174.

Special Studies

195A-195B-195C. Honors Seminars and Thesis. Prerequisites: one course in 197 series, 3.5 GPA in upper division political science courses, letter grading. Mr. Chisholm, Mr. Wilson.

198A-198B. Cross-national exploration of urban bureaucracies in the U.S., any special requirements, consent of instructor. Intensive examination of one or more special problems appropriate to public law. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, 169, and 179 may be applied more than once toward the student requirement. No more than three of these courses may be applied toward the major. Also see courses 138C, 173, 174.

Graduate Courses

Formal Theory and Quantitative Methods

200A. Statistical Methods I (6 units). Lecture, three hours. Corequisite: course 200AL. Introduction to statistical analysis of political data. Methods of data analysis, estimation, and inference. Mr. DeNardo, Mr. Zaller.

200AL. Statistical Methods Laboratory I (1 unit). Laboratory, three hours. Corequisite: course 200A.

201A. Introduction to Formal Political Analysis. (Formerly numbered 215A.) Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation represtation, vote trading. Mr. Schwartz, Mr. Wallerstein.

201B. Theory of Collective Choice. (Formerly numbered 205B.) Seminar, three hours. Recommended prerequisite for political science students: course 201A. Open to any student of politics, economics, philosophy, or mathematics with ability for deductive reasoning.

210A. Seminar, three hours. Graduate courses. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading. Mr. Shapley.
International Relations

220. International Relations Theory. (Formerly numbered 212A.) Discussion, three hours. Approaches to and central problems of international relations theory. Mr. Rosecrance, Mr. Stein

221. Advanced International Relations Theory. (Formerly numbered C210B.) Discussion, three hours. Introduction to contemporary problems in international relations theory. May be concurrently scheduled with course C197B. Mr. Lake, Mr. Stein, Mr. Wilkinson

222. Seminar on Strategic Interaction. Seminar, three hours. A strategic move influences the other person's choice by affecting his expectations of how we will behave. Discussion of theories of deterrence, coercive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic behavior, including psychology, bargaining theory, and game theory. Ms. Larson

223. Politics and Strategies of Modern War. (Formerly numbered C212B.) Seminar, three hours. Analysis of various national security problems in both military/technical and political dimensions. Development in some depth of issues likely to be raised in course 138A (not prerequisite). May be concurrently scheduled with course C197B. Mr. Kolokowicz, Mr. Rosecrance

225. American Foreign Policy. Discussion, three hours. Discussion of approaches used to explain foreign policy-making at individual, small group, bureaucratic, and domestic political levels. Selection to selected cases in American foreign policy. Ms. Larson

226. The Making of American Foreign Policy. (Formerly numbered C213A.) Seminar, three hours. Intensive analysis of policy formulation and analysis of selected contemporary problems in American foreign policy. Political and institutional factors affecting foreign policies; analysis of policy options. May be concurrently scheduled with course C197B. Mr. Spiegel

227. Foreign Policy Process. (Formerly numbered 231C.) Discussion, three hours. Prerequisites: courses 120 and 220, or consent of instructor. Political science and policy science approaches to national foreign policy process, with special focus on formulation and implementation of American foreign policy. Political and institutional factors affecting foreign policy in America. May be concurrently scheduled with course C197B. Mr. Zoppo

230. Contending Perspectives on International Political Economy. (Formerly numbered 232A.) Discussion, three hours. Survey of various theoretical approaches to international political economy. Mr. Lake

231. Markets, States, and International Political Economy. (Formerly numbered C232B.) Discussion, three hours. Examination of interrelations among international trade and investment and domestic political economics of both industrialized and industrializing societies. Mr. Frieden

233A-233B-233C. Political Economy Workshops (0 units, 0 units, 12 units). Discussion, two hours. Course 233A is prerequisite for 233B, which is prerequisite for 233C. Attendance at workshops is required. Open to graduate and upper-division undergraduate students. Students must register for each of the three workshops. No credit or a maximum grade of "pass." Grading: Progress. Mr. Frieden

234A-234B-234C. Workshops in National Security Policy and International Relations (0 units, 0 units, 12 units). Discussion, two hours. Course 234A is prerequisite to 234B, which is prerequisite to 234C. Examinations and seminars. Readings and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required. In Progress grading. Mr. Frieden, Mr. Lake

C239. Selected Topics in International Relations. (Formerly numbered C253.) Discussion, three hours. May be concurrently scheduled with course C197B.

Comparative Politics

240A-240B. Comparative Politics. (Formerly numbered 215A-215B.) Discussion, three hours. Course 240A and consent of instructor is prerequisite to 240B. Approaches to study of comparative politics and problems of comparative political analysis. Mr. Binder, Mr. Rogowski, Mr. Sisson

C241. African Studies. (Formerly numbered 250E.) Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Korbonski

C242. Chinese and East Asian Studies. (Formerly numbered 250G.) Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Baerwald

C243. Japanese and Western Pacific Studies. (Formerly numbered 250D.) Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Anderson

C244. Latin American Studies. (Formerly numbered 250A.) Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Anderson

C245. Middle Eastern Studies. (Formerly numbered C250F.) Discussion, three hours. May be concurrently scheduled with course C197D. Ms. Geddes, Mr. Gonzalez

C247. Russian and Slavic Studies. (Formerly numbered C250B.) Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Binder

C248. South Asian Studies. (Formerly numbered 250L.) Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Sisson

C250A. Western European Studies. (Formerly numbered C250H.) Seminar, three hours. May be concurrently scheduled with course C197D. Ms. Golden, Mr. Rogowski, Mr. Tsebelis

C250B. Political Development of Modern Europe. Discussion, three hours. Principal phases of political development from high feudalism to the present, together with theories of causation. Mr. Rogowski

C25A. Parties and Political Systems. Discussion, three hours. Political parties and political systems, party politics, and elections in comparative perspective. Mr. Tsebelis

C25B. Foundations of Representative Government. (Formerly numbered 236A-236B.) Discussion, three hours. Analysis of factors affecting development and functions of representative institutions in the U.S., Europe, and selected political systems of Africa, Asia, and Latin America. American politics or comparative politics field course. Mr. Siassen, Mr. Snowia

C253. Political Change in Communist Systems. Discussion, three hours. Examination of political content and consequences of structural reform in Communist systems; theories of post-Leninist political pluralization and convergence. Mr. Baum
254. Seminar on Social Class and Political Analysis. (Formerly numbered 227.) Discussion, three hours. Investigation of concept of social class as a tool of political analysis, with emphasis on current debates regarding definition and utility of class as an analytical category. Su or letter grading.

M. Ashcroft, Mr. Wallerstein

255. Seminar on Political Change. (Formerly numbered 271.) Seminar, three hours. Interdisciplinary seminar directed toward comparative analysis of political development and modernization.

M. Binder, Mr. Sklar

256. External Sources of Domestic Politics. Discussion, three hours. Theoretical and historical studies of impact of war and trade on domestic cleavages, policy, and institutions. Mr. Rogowski

257. Labor and Working-Class Politics. Discussion, three hours. Questions and topics on comparative labor and working-class politics. Mr. Golden

258. Seminar on Political Violence. Seminar, three hours. Empirical theory and research on causes, processes, and outcomes of violent social conflict, including mass political protest, riot, revolt, terrorism, and revolution. Mr. Tong

259. Selected Topics in Comparative Politics. (Formerly numbered 235.) Discussion, three hours. Critical examination of a major problem in comparative politics.

American Politics

260A. Survey Course in American Politics: Political Parties and the Electoral Process. (Formerly numbered 214A.) Discussion, three hours.

Mr. Ansolabehere, Mr. Marwick, Mr. Petrock, Mr. Zaller

260B. Survey Course in American Politics: American Political Institutions. (Formerly numbered 214B.) Discussion, three hours.

Mr. Aberbach, Ms. Orren

M261A. Proseminar in Political Psychology. (Formerly numbered M224A.) (Same as History M226A and Psychology M226A.) Discussion, three hours. Introduction to political psychology: psychopathology, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

Mr. Iyengar, Ms. Larson, Mr. Sears, Mr. Zaller

M261B. Mass Attitudes and Political Behavior. (Formerly numbered M224B.) Discussion, three hours. Prerequisite: course 141 or 260A or consent of instructor. Analysis of development and change of political attitudes in mass publics and their relationship to political participation and violence. May be concurrently scheduled with course C197C.

Mr. Petrock, Mr. Sears, Mr. Zaller

261C. Political Communication. Discussion, three hours. Broad survey of research bearing on role of mass media in the American political process. Topics include theories of persuasion, evolution of "media effects" research, reporting and advertising as determinants of election outcomes, adversarial versus deliberative journalism, and analyses of media bias.

Mr. Iyengar

M261D. Seminar in Political Psychology. (Formerly numbered M224D.) (Same as Psychology M228B.) Discussion, three hours. Prerequisite: course M261A or Psychology 220A or consent of instructor. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

Mr. Sears

M261E. Critical Problems in Political Psychology. (Same as Psychology M228C.) Discussion, three hours.

M262. Political Parties. (Formerly numbered C224.) Discussion, three hours. Critical examination of literature on party systems and organization. Special attention to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with course C197C.

Mr. Marwick, Mr. Petrock

C263. Political Recruitment. (Formerly numbered C224B.) Discussion, three hours. Critical evaluation of literature concerned with background figures and with screening and sponsoring mechanisms affecting their careers and political perspectives. May be concurrently scheduled with course C197C.

Mr. Petrock, Mr. Marwick

C264. Politics and Society. (Formerly numbered C224C.) Discussion, three hours. Application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with course C197C.

Mr. Gilliam

C265. National Economy and Society. (Formerly numbered C224A.) Discussion, three hours. Analysis of theoretical and practical relationships between economic organization and governmental institutions. Development and political implications of the market system, banking and finance, corporate enterprise, and organized labor.

Mr. Ansolabehere, Ms. Orren

C266. Group Theories of Politics. (Formerly numbered C224D.) Discussion, three hours. Critical appraisal of "group theory" approaches to study of political behavior, with special attention to empirical research problems and findings.

Ms. Orren

C268. Seminar in Political and Electoral Problems. (Formerly numbered 268.) Seminar, three hours. Prerequisite: two graduate courses in politics.

Mr. Ansolabehere, Mr. DeNardo, Mr. Schwartz

C269. Seminar in Political Behavior. Seminar, three hours.

C270. Legislative Behavior. (Formerly numbered C224E.) Discussion, three hours. Analysis of major approaches to study of representative institutions, with special emphasis on assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

Mr. Ansolabehere, Mr. Marwick, Mr. Snowiss

C271. Executive Politics and the Presidency. (Formerly numbered C224F.) Discussion, three hours. Analysis of executive organization and leadership, with emphasis on the American Presidency. Special attention to theories of organization and personality and relationship between the executive and other institutions and groups. May be concurrently scheduled with course C197C.

Mr. Aberbach, Mr. Snowiss

C272. Political Environment of the Federal Executive. (Formerly numbered C224L.) Discussion, three hours. Examination of political environment of the federal executive in the U.S. Special attention to executive- legislative relations.

Mr. Aberbach

C273. American Political Development. Discussion, three hours. National political institutions in historical perspective, theories of state building, state societal relations, political culture.

Ms. Orren

C275. Seminar on American Political Institutions. Seminar, three hours.

C276. Public Law. (Formerly numbered C216B.) Discussion, three hours. Systematic analysis of scope and nature of public law, with particular attention to its materials and methods as illustrated in concepts and doctrines from various of its subjective fields. May be concurrently scheduled with course C197C.

Mr. Hobbs

C277. Making of the Constitution. (Formerly numbered C233B.) Discussion, three hours. Examination of development of constitutional law during selected periods of American history, such as founding, Marshall and Taney eras, Civil War, Deal. Emphasis on both judicial and nonjudicial materials. May be concurrently scheduled with course C197E.

Mr. Hobbs

C278. Bill of Rights and the States. (Formerly numbered C233C.) Discussion, three hours. Examination of problems surrounding application to the states of Amendments 1 through 9. May be concurrently scheduled with course C197E.

Mr. Hobbs

C279. Seminar in Public Law. (Formerly numbered C252.) Discussion, three hours. May be concurrently scheduled with course C197E.

C280. Organization Theory Approaches to Organizational Analysis. (Formerly numbered C218.) Discussion, three hours. Analysis of several major conceptual alternatives for study of organizations, with emphasis on implications of these alternative theoretical approaches. Topics include structural-functional and systemic approaches to organization, rational-choice models, and social psychological analyses. Each alternative critically evaluated for its strengths and weaknesses as guide to understanding organizational analysis. May be concurrently scheduled with course C197F.

Mr. Chisholm

C281. Public Policy Studies. (Formerly numbered C219.) Discussion, three hours. Systematic analysis of nature and scope of public policy and its programmatic implications. Special emphasis on government organizations and process, as well as types of government intervention and stages of the policy process. Substantive focus primarily on American public policy and analysis. May be concurrently scheduled with course C197F.

Mr. D. Wilson

C282. Subnational Administrative Systems. (Formerly numbered C229.) Discussion, three hours. Analysis of state administrative systems, their local substructures, and their interaction. May be concurrently scheduled with course C197F.

Mr. Fried

C283. Seminar on Public Organization and Policy. (Formerly numbered C254.) Seminar, three hours. May be concurrently scheduled with course C197F.

M. Chisholm, M. Wilson

284. Seminar on Bureaucracy and Organization. (Formerly numbered 261.) Discussion, three hours. Prerequisite: consent of instructor. Exploration of topics in analysis of public and private bureaucracies and organizational theory. Topics include empirical theories of bureaucratic behavior, bureaucratic growth; bureaucratic behavior and political culture; organizational structures and strategies; and functions of the executive.

Mr. Chisholm, M. Wilson

Special Studies

With consent, credit may be applied toward any field.

290A, Modern Political Economy. (Formerly numbered 229A.) Discussion, three hours. Discussion of implications for understanding politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microeconomic theory and policy implications for understanding politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microeconomic theory and policy implications for understanding politics.

Mr. Ashcraft, Mr. Brenner

290A-290B. Introduction to Political Inquiry. (Formerly numbered M203A-M203B.) Discussion, three hours. 290B: Problems of Scientific Inquiry and Normative Discourse; 290B. Major Conceptual Frameworks and Approaches to Political Science. Prerequisite: consent of instructor. Introduction to historically rooted social theory and theoretically sensitive history.

Mr. Ashcraft, Mr. Brenner

293. Terrorism. Discussion, three hours. Analysis of the concept, relationship of terrorism to other forms of violence, history of the phenomena, various forms, and costs.

Mr. Rapport

294. Religion, Revolution, and Violence. Discussion, three hours. Examination of various aspects of the connections between religion and violence, as well as the connections between religion and revolution.

Mr. Rapport
375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Political Science. Workshop in teaching techniques, including evaluation of each student's own performance as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be taken only in term in which students are teaching assistants. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

590A. Directed Reading for Ph.D. Dissertation Proposal (0 units). Required of all Ph.D. students. Must be taken under supervision of research adviser prior to term in which oral examination is taken. Research for proposed dissertation topic and submission of bibliographic essay on that topic. In Progress grading (credit to be given only on completion of course 590A).

590B. Directed Research for Ph.D. Dissertation Proposal (8 units). Prerequisite: course 590A. Required of all Ph.D. students. Must be taken under supervision of research adviser prior to or during term in which oral examination is taken. Development and writing of research design for Ph.D. dissertation. With consent of research adviser, courses 233A-233B-233C may, by petition, be accepted as equivalent to courses 590A and 590B.

596. Directed Individual Study or Research (2 to 4 units). May be applied only three times toward minimum course requirement in first two years. May be repeated.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). May be repeated. S/U grading.

Elizabeth L. Bjork, Ph.D., Undergraduate Affairs Vice Chair
Robert A. Bjork, Ph.D.

Marion Jacobs, Ph.D.
Claire Kopp, Ph.D.
James G. Miller, Ph.D.
Jill Waterman, Ph.D.

Adjunct Associate Professors
Jacqueline D. Goodchilds, Ph.D.
Dennis McGinty, Ph.D.

Adjunct Assistant Professors
Paula Geiselman, Ph.D.
William McCarthy, Ph.D.
Dahlia Zaidel, Ph.D.
Patricia Zuckow, Ph.D.

Scope and Objectives
We all practice some form of intuitive psychology to understand ourselves and the world around us. In contrast, the psychology curriculum at UCLA focuses on psychology as a scientific discipline that uses systematic methods of investigation to understand general principles of human behavior, cognition, and emotion.

The curriculum treats psychology as a biosocial science; human behavior is viewed from both biological and social viewpoints. The biosocial perspective allows students to study a broad range of topics such as psychobiology, animal behavior, learning, motivation, perception, cognition, measurement, memory, social psychology, personality, and clinical, developmental, community, and health psychology.

According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments in the country in terms of faculty quality. The curriculum is both wide in terms of range of courses, and deep in terms of quality of the faculty.

The undergraduate curriculum provides a basic liberal arts foundation. It does not focus on training students to be only professional psychologists, but rather helps them to understand the world and our place in it. A choice of three majors, leading to either the B.A. or B.S. degree, is offered.

At the graduate level, the department offers training leading to the Ph.D. degree with em-
phases in various fields. The program is designed to prepare psychologists to function effectively as scientific investigators, college and university teachers, and professional psychologists.

Undergraduate Study
To meet the diverse needs of students, there are three different major curricula: the psychology major, the cognitive science major, and the psychobiology major. The first two lead to a Bachelor of Arts degree; the third culminates in a Bachelor of Science degree.

All courses required for these majors (which include lower division courses and major courses) must be taken for a letter grade. Graduate-level courses may not be applied toward degree requirements for any Psychology Department undergraduate major.

Bachelor of Arts in Psychology
The general psychology major emphasizes the experimental and research aspects of the field. It is a good choice for students with an interest in human behavior who wish to receive a general education in the liberal arts and sciences. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall, early in your career.

Preparation for the Major
You must file a petition in the Undergraduate Advising Office to declare the pre-psychology major; you are identified as a pre-psychology major until the preparation for the major requirements have been satisfied. The following required courses must be completed for a letter grade (a C – or better in each course and a 2.3 overall grade-point average in the preparation courses) before you reach 110 total units: Anthropology 7 or 10 or 12 or 15; Biology 2 or 3 or 5; Chemistry and Biochemistry 2 (if you have completed one year of high school chemistry with a C or better, this requirement is waived) or 11A; Mathematics 31A, 31B, 61; Philosophy 7 or 9; Physics 10 or 3A or 6A or 8A/8AL; Program in Computing 10A, 10B, 15; Psychology 10 or 11, 42; Psychology 41 (recommended) or Statistics 50 or Economics 40. Psychology 41 and 42 should be taken early in your career. You cannot take Psychology 42 until you have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

The Major
After completing the preparation courses, you must petition to enter the major at the Undergraduate Advising Office. You must have a 2.0 grade-point average in all upper division major courses, and each must be taken for a letter grade.

Required: (1) Psychology 110, 115, 120, 125, 130 (for students entering Fall Quarter 1987 and thereafter), 135; (2) one course from 111, 113H, 116, 121, 186 and one course from 126, 136A, 136B, 171A, 174; (3) three additional upper division elective courses (12 units) in psychology.

Bachelor of Arts in Cognitive Science
This major focuses on the study and implementation of intelligent systems, both human and artificial. Cognitive science involves the study of cognitive psychology, computer science, mathematics, and related disciplines. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall, early in your career.

Preparation for the Major
Admission to the major is limited. You are identified as a pre-cognitive science major until the preparation for the major requirements have been satisfied. The following required courses must be completed for a letter grade (a C or better in each course and a 2.5 overall grade-point average in the preparation courses): Anthropology 7 or 10 or 12 or 15; Biology 2 or 3 or 5; Chemistry and Biochemistry 2 (if you have completed one year of high school chemistry with a C or better, this requirement is waived) or 11A; Mathematics 31A, 31B, 61; Philosophy 7 or 9; Physics 10 or 3A or 6A or 8A/8AL; Program in Computing 10A, 10B, 15; Psychology 10 or 11, 42; Psychology 41 (recommended) or Statistics 50 or Economics 40. Psychology 41 and 42 should be taken early in your career. You cannot take Psychology 42 until you have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

The Major
After completing the preparation courses, you must petition to enter the major at the Undergraduate Advising Office. You must use the Psychology 188, each course must be taken for a letter grade.

Required: (1) Psychology 110, 115, 120, 125, 136, 185, 186, 188 (course 190C or 199 may be substituted for 188 if content is approved in advance by the Undergraduate Advising Office); (2) an additional three upper division elective courses (12 units) from Psychology 102 through 121, 123, 124A through 124I, M142, 150, 151, 153, 187, 189, 190B (if content is approved by the Undergraduate Advising Office), Computer Science 111 through M196B, Linguistics 100 through C185A, Mathematics 110A through 151, Philosophy 128A through 136, Statistics M152A through M153B.

Quantitative Methods Concentration
This concentration is intended to give students more extensive preparation in statistics. The following additional courses are required: Mathematics 32A, 32B, 33A, 33B, and either M150A-150B and 151, or Statistics M152A and 152B-152C. Psychology 41 is not required if you select this specialization.

Bachelor of Science in Psychobiology
This major is designed for students who plan to go on to postgraduate work in physiological psychology, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall, early in your career.

Preparation for the Major
You must file a petition in the Undergraduate Advising Office to declare the pre-psychobiology major; you are identified as a pre-psychobiology major until the preparation for the major requirements have been satisfied. The following required courses must be completed for a letter grade (a C – or better in each course and a 2.0 overall grade-point average in the preparation courses): Biology 5, 6, 7, 8; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL, 153A/153AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, and 8C/8CL; Psychology 10 or 11, 42; Psychology 41 (recommended) or Statistics 50 or Economics 40. Psychology 41 and 42 should be taken early in your career. You cannot take Psychology 42 until you have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

The Major
After completing the preparation courses, you must petition to enter the major at the Undergraduate Advising Office. You must use the Psychology 188, each course must be taken for a letter grade.

Required: (1) Biology 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115, 116, 120; (2) one course from Psy-

Developmental Disabilities Immersion Program Concentration

To earn this concentration, majors in psychology, cognitive science, and psychobiology must be accepted into the Developmental Disabilities Immersion Program. Information and applications are available from Field Studies Development, 70 Powell Library. The following courses are required: Psychology 127 (may also be applied as one of the three upper division electives required for the psychology major), 130 (also satisfies a core requirement for the psychology major), M180A, M180B, M181A-M181B, 193 (two terms). With the exception of course 193, each course must be taken for a letter grade. Students in the department who complete the requirements receive a certificate of completion from the department at graduation.

Specialization in Computing

Majors in psychology, psychobiology, and cognitive science may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major; (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15, 30, 60, (3) completing at least two courses from Psychology 150, 151, 185, 186. A grade of C or better is required in each course. You graduate with a bachelor's degree in your major and a specialization in computing.

Honors
Honors Courses
Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports and small group discussions, and may include field or research experience. All such courses offer credit toward departmental honors and College Honors.

Honors Program
Psychology, cognitive science, and psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. You work for a year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year you also participate in a weekly seminar (Psychology 190A-190B-190C) in which you discuss your thesis project and explore topics of interest with invited faculty members or other guests. In addition, you must take two (or more) psychology honors courses selected from a list provided by the department. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or highest honors. Consult the Undergraduate Advising Office early in your educational planning for further information and application forms.

Developmental Disabilities Immersion Program

The Developmental Disabilities Immersion Program is cosponsored by the Department of Psychology and the Department of Psychiatry and Biobehavioral Sciences and by the Office of Instructional Development — Field Studies Development. Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities.

Required core courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements (consult the Undergraduate Advising Office for details). Student individualized research projects are also part of the immersion experience.

For more information, contact the Undergraduate Advising Office (1531 Franz Hall) or Field Studies Development (70 Powell Library).

Infant Development Program

The Infant Development Program is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, and their parents. In addition, the program provides an opportunity for students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers through a two- or three-term sequence of Psychology 193. The program is located in Franz Hall and provides child care for 13 infants ranging in age from four months to two and one-half years.

Clinic for the Behavioral Treatment of Children

The Clinic for the Behavioral Treatment of Children carries out diagnosis, treatment, and research on children with severe psychological problems, such as autistic and schizophrenic children and those with severe developmental disorders. The treatment philosophy is largely behavioral/educational, with emphasis on language acquisition, peer and school integration, and parent training. Students are taught behavioral treatment procedures and work in an apprenticeship relationship to senior staff. Prior research has focused on variables controlling self-destructive behavior, perceptual deficits, language acquisition, and emotional/social attachments. The clinic serves as a teaching and research environment for both graduate and undergraduate students.

National Research Center on Asian American Mental Health

The National Research Center on Asian American Mental Health (NRCAMH) is one of several centers in the nation devoted to ethnic minority research, and the only one focusing on Asian Americans. NRCAMH acts in a national multidisciplinary leadership role in the conduct and promotion of applied and basic research regarding the mental health of various Asian groups (e.g., Chinese, Japanese, Koreans, Filipinos, Southeast Asians, etc.) in the U.S. The center provides undergraduate and graduate students with opportunity to participate in research projects, publish scholarly articles, and collaborate with other researchers in the field.

Preparation for Graduate Study

Although requirements for admission to graduate programs in psychology in most universities are satisfied by the above major requirements, both admission to graduate work and progress toward the degree may be impeded in certain areas of psychology if additional preparation is not obtained at the undergraduate level. For this reason, if you plan to do graduate work in psychology, you are advised to take additional work in methodology and statistics and to take advantage of the many advanced undergraduate courses in specific fields offered both by the Psychology Department and related departments. Consult the Undergraduate Advising Office for more information.

Ph.D. Degree

The graduate program in psychology leads to the Ph.D. degree. Although you may obtain the M.A. degree en route to the Ph.D., the department does not admit candidates for the M.A. degree only. For the Ph.D. degree, a thorough background in research methodology and psychological theory is required. Major specialized training is available in the areas of psychology listed below under "Major Fields or Subdisciplines."

A departmental brochure describing the graduate program in psychology is available in 3453 Franz Hall.
Admission

Admission to the Ph.D. program normally requires an undergraduate degree in psychology. However, students from other areas (particularly the mathematical, physical, biological, and social sciences) may be admitted. Admission is for Fall Quarter only and on a full-time basis only. Applicants must mail the following documents directly to the Psychology Department, 3453 Franz Hall, UCLA, Los Angeles, CA 90024-1563, by December 30 to be considered for admission the following Fall Quarter:

(1) The departmental Application for Admission to the Doctoral Program, available in 3453 Franz Hall.
(2) Three letters of recommendation.
(3) One official transcript from each college attended.
(4) Scores from the Graduate Record Examination (GRE) General Test and the Subject Test in Psychology (taken within the last three years).
(5) The Test of English as a Foreign Language (TOEFL), required of all international applicants whose native language is not English.

Students who are being considered as finalists for the clinical program may be required to meet with the clinical faculty for an interview.

Incoming students are expected to have had courses equivalent to the following: (1) Psychology 41; (2) two courses from Psychology 110, 115, 120; and (3) two courses from the following alternatives: (a) Psychology 125 or 127; (b) 130; and (c) 135. If you have completed one of the UCLA Psychology Department majors, you will have satisfied the undergraduate preparation requirements. If you have not had training in these areas, you need to take appropriate coursework or examinations. In addition, it is recommended that you have at least one course in biology or zoology, one course in mathematics, (e.g., calculus), and two courses in the physical sciences (physics and/or chemistry). A course in anthropology, philosophy, or sociology may be substituted for one of the physical sciences courses. Continuation in the Ph.D. program is contingent on successfully clearing undergraduate deficiencies by the end of your fourth term in residence.

Major Fields or Subdisciplines

You may major in clinical, cognitive, developmental, learning and behavior, measurement and psychometrics, personality, physiological, or social psychology. With the exception of clinical, you may minor in any of the areas listed above, as well as in health psychology. You may petition for individualized minors or a minor in experimental psychopathology. Training is also available in community psychology.

Course Requirements

General Course Requirements — All students, regardless of area, must fulfill the requirements listed below.

The core program must be completed within your first two years in residence. The core program includes four core courses, plus Psychology 250A, 250B, 251A-251B (and 251C, if an additional term is needed to complete the course).

Nine graduate courses (36 units), including Psychology 250A, 250B, 251A-251B (research project must be complete), and at least three of the four core courses are required for the M.A. degree. One 596 course (four units) may be applied. Courses in the 400 series may not be applied. All undergraduate deficiencies must be cleared.

By the end of the second year, you must complete at least one individual research course (596) and at least three second-year graduate courses, including one quantitative course from Psychology 238, 247A, 252, 253, 254A, 255, 256, M257, 258, 259, 287, 299.

During the third year, you must enroll in a minimum of three graduate-level courses, plus one term of course 596. At least one term of course 596 or 599 should be taken during the fourth year and each remaining year in the graduate program.

Major Area Course Requirements — Each area has its own specific requirements. A course may not be applied toward requirements in more than one major or minor area unless no other course options are designated. Requirements are as follows: clinical — Psychology 270A-270B-270C, 271A-271B-271C, 277A-277B (at least two courses must be numbered above 272); cognitive — courses 260A-260B, plus four courses, including at least two selected from 247B, 259, 261 through 266, and at least one from 268A through 268E or 269; developmental — courses 240A-240B, one course from 220A, 223, 225, one course from 205B, 205A, 261, 262, 263, 264, 266, two courses from 242A through 242F or 244, one of the quantitative courses listed under second-year requirements, and 299; learning and behavior — courses 200A, 200B, plus two courses from 204A, 204B, 204C, 208, 210, 281, 290, 293; measurement and psychometrics — five courses from 249, 252, 253, 254A, 255, 256, M257, 258; personality — courses 232, 233, 235, M239, 278; psychological — courses 205A-205B, three terms of course 212, and two approved physiological seminars (it is expected that students will take Anatomy and Cell Biology M206A, M206B as part of a minor in neuroscience); social — courses 220A-220B, 222A or 224, three social seminars taught by three different faculty members, and course 226 each term for the first three years of the program.

Qualifying Examinations

The qualifying examination generally consists of three separate sections. The first is an examination administered by the major area, which examines in breadth your knowledge of the major field. The second section is an individualized examination which examines in depth your knowledge of your area of specialization within the major field. The third section is the University Oral Qualifying Examination. All Ph.D. requirements listed above must be completed before this section can be taken. After successful completion of the oral examination, you are advanced to candidacy and may begin work on the dissertation.

Contact the department for the specific examination requirements of the various areas of specialization.

Practicum and Internship Requirements for Clinical Students

(1) At least six terms of approved supervised preinternship practicum (Psychology 401 — 12 to 15 hours per week) are required and are usually taken in the second and third years.
(2) The equivalent of one calendar year of supervised internship (Psychology 451) in an acceptable setting approved by the faculty, taken either full-time in one year or half-time in two years in one or two settings, is required. This is usually taken in the fourth or fifth year. Contact the department for further information on internship assignments.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is required of all candidates for the Ph.D. degree.

Psychology Clinic

The Psychology Clinic in the Department of Psychology is a major training center for clinical psychology students in the Ph.D. program. It provides a broad range of psychological services to clients, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and are encouraged to relate their case material to academic learning and current research. Students and faculty members are also involved in a variety of clinical research projects.
Lower Division Courses

10. Introductory Psychology. Not open to students who have taken PSY 44, 101, 105 or 110. Lecture, one hour; discussion, one hour; laboratory, one hour. Introduction to psychological thinking. (Formerly numbered PSY 20.) Lecture, three hours; discussion, two hours. Prerequisites: core courses 10, 41, 115 or 115H (for nonmajors). Examination of concordance and discordance between results from laboratory and applied research.

11. Principles of Psychology (5 units). Lecture, three hours; discussion, one hour; laboratory, one hour. Focus on selected topics in psychology at introductory level; lecture format designed for freshmen and sophomores. Not open to students with credit for former course 119B with Dr. Butcher prior to Fall Quarter 1988. Analysis of basic pharmacologic principles to include interaction of drugs with neurochemically significant substances in the brain.

11AH. Neuropsychopharmacology (Honors). (Formerly numbered 119CH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11B. Human Neuropsychopharmacology. (Formerly numbered 118E.) Lecture, three hours. Prerequisites: course 115, junior standing. Not open to students with credit for former course 118B prior to Fall Quarter 1988. Experimental and theoretical treatment of drug-behavior relationships. Particular emphasis on behavior and pharmacological mechanisms of drug action and interaction with neuronal function.

11DH. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11E. Stress and Bodily Disease. (Formerly numbered 118E.) Lecture, three hours. Prerequisites: core course 115, junior standing. Not open to students with credit for former course 118E with Dr. Grijalva prior to Fall Quarter 1988. Experimental and theoretical treatment of drug-behavior relationships; pharmacological approaches to mood, aggression, learning, motivation; experimental studies of addiction.

11F. Neuropsychology of Drug Abuse and Addiction. (Formerly numbered 118F.) Lecture, three hours; discussion, two hours; laboratory, two hours. Prerequisites: core courses 115, Biology 2, junior standing for nonmajors; core course 115, Biology 2, junior standing for nonmajors; core course 115, junior standing. Not open to students with credit for former course 118E with Dr. Butcher prior to Fall Quarter 1988. Analysis of basic pharmacologic principles to include interaction of drugs with neurochemically significant substances in the brain.

11GH. Neuropsychopharmacology (Honors). (Formerly numbered 119CH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11H. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11I. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11J. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11K. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11L. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11M. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11N. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11O. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11P. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11Q. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11R. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11S. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

11T. Behavioral Pharmacology (Honors). (Formerly numbered 118EH.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.
119K. Evolution of Intelligence. (Formerly numbered M119K.) (Same as Psychiatry M119K.) Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, 120, or 115; introductory statistics course, junior or senior standing, consent of instructor. Intelligence treated as neural information-processing capacity; its evolution in vertebrates correlated with evolution of enlarged brain. Quantitative approaches in evolutionary biology and neurosciences.

119L. Human Neuropsychology. Lecture, two hours. Prerequisites: courses 115, 120, consent of instructor. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions.

119M. Physiological Psychology of Learning. Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: course 115 and junior standing, or consent of instructor. Introduction to classical and current literature on mechanisms of learning, including both cell-biological mechanisms and brain circuitry.

120. Human Information Processing. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Recommended: course 110 or 115. Survey of how people acquire and retain nonverbal and verbal information. Perception, attention, memory, and representation of knowledge.

121. Laboratory in Human Information Processing. Prerequisites: courses 10, 41, 42, 120 (may be taken concurrently). Costs various methods and phenomena from research on human perception, memory, and cognition.

122. Language and Communication. Lecture, three hours. Prerequisite: course 10. Introduction to psychology of language. Use of verbal and nonverbal channels; interlinguistic and intralinguistic variation; animal communication; biological bases of language; production and comprehension of speech and writing; relation to perception, memory, and thought; cultural influences on language development.

123. Psycholinguistics. Prerequisite: junior standing. Current theory and research in psycholinguistics: survey of language acquisition, language perception, and language production; language physiology and pathology; problems of representation, sequencing, and timing in language and other cognitive skills; errors in speech production and perception.

124A. Sensation and Perception. (Not the same as course 124A prior to Fall Quarter 1990.) Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, 120, junior standing. Contemporary research and theory about visual and auditory perception. Topics include physiological mechanisms, psychophysical studies and models, and computational approaches.

124B. Visual Information Processing. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, and 120, or consent of instructor. Exploration of issues in visual information, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects.

124C. Human Memory. Lecture, two hours; discussion, one hour. Prerequisites: course 120, junior standing. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony.

124D. Principles of Human Performance. Prerequisite: psychology major standing or consent of instructor. Investigation into laboratory-based methods and principles of human performance. Topics include research methods for human performance, central control of movements, anticipation and timing, automaticity, sensory involvement in action such as vision and kinesthesis, role of reflexes, speed-accuracy trade-offs, and individual differences and abilities. Principles discussed should have relevance for numerous real-world situations in which complex perceptual-motor skills are required, such as in industrial or occupational settings, musical performances, vehicles control, and sport.

124E. Language and Cognition. Seminar, three hours. Prerequisites: courses 10, 41, 120, junior standing. Topics include representation of categories, feedback, and error detection in language and cognition; modularity; ambiguity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language.

124F. Thinking. (Formerly numbered 112C.) Lecture, three hours. Prerequisite: course 120. Analysis of experimental studies of human categorization, reasoning, decision making, problem solving, creativity, and related topics.

124G. Perceptions of Speech and Music. (Formerly numbered 124A.) Survey of theories and methods of auditory perception, with applications to speech and music. Brief review of auditory psychophysics and physiology, leading into perception of speech and music.

124H. Psychobiology. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, 120. Psychological approaches to the visual arts, with major focus on cognitive information processing and developmental analyses. Topics include comprehending and drawing pictures, film, advertising, aesthetics, creativity, and relationships of artistic skills to brain damage.

125. Personality. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Survey of major topics in the field of personality, including personality theory, personality assessment, and psychological, behavioral, and cultural role of perception, learning, and motivation in personality.

126. Personality Laboratory. Discussion, three hours; laboratory, three hours. Prerequisites: courses 41, 42, 125 (may be taken concurrently), psychology major standing. Laboratory experience with various topics in personality.

126H. Personality Laboratory: Emotions (Honors). Discussion, three hours; laboratory, three hours. Prerequisites: courses 10, 41, 42, psychology major standing. Presentations of major approaches to emotion and experimentation of some hypotheses from the theories. Use of different (basic) statistical techniques and experimental methodologies.

127. Abnormal Psychology. Lecture, three hours. Prerequisite: course 10. Study of dynamics and prevalence of major somatic and psychiatric disorders, with emphasis on treatment, social and legal issues in mental illness.

127H. Abnormal Psychology (Honors). Lecture, three hours. Prerequisite: consent of instructor. Overview of major somatic and psychiatric disorders, theories and research on causes of disorder, types of treatment, social and legal issues in mental illness.

128. Behavioral Medicine. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 127, junior or senior standing. Psychophysiologic (psychosomatic) disorders addressed via a biopsychosocial model of disease, with emphasis on interrelationships between physiology, personality, behavior, and social/environmental factors. Major focus on behavioral assessment and therapy for Type B behavior, diabetes, Type A behavior, treatment of anorexia and bulimia.

129A. Personality Measurement. Prerequisite: course 125. Rationale, methods, and content of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions.

129B. Introduction to Psychoanalysis. (Not the same as course 129B prior to Summer Quarter 1990.) Prerequisite: course 129A. Development of Freud's ideas from 1895 to 1926, with emphasis on how his theory evolved from a drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of developments beyond Freud, especially work of the British school under leadership of Klein, Winnicott, and Bim.

129E. Human Sexuality. Lecture, three hours. Prerequisite: senior psychology major standing. Overview of psychology of human sexuality. Psychological research, assessment, and therapy described in a format which highlights their significance for understanding human sexual functioning. Psychological mechanisms underlying expression of human sexuality.

129F. Human Sexuality Laboratory. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Exploration of developmental aspects of physical, mental, social, and emotional growth from birth to adolescence.

132A. Adolescent Development. Lecture, three hours. Prerequisite: upper division standing. Exploration of different orientations to persons with learning problems, emphasizing assessment and intervention approaches and psychological impact of such approaches. Discussion of major orientations, their measurement by means of attitude scales and/or questionnaires.

133A. Adolescent Development. Lecture, three hours. Prerequisites: courses 10, 41, 130. Advanced course that surveys theories related to adolescent development; classical theory of concepts and alternatives, especially with reference to problem of induction; effects of information processing variables, statistical and/or questionnaires-based, prior knowledge, and different supporting evidence.

133D. Social and Personality Development. Lecture, two hours; discussion, one hour. Prerequisites: courses 110, 130. Advanced course that surveys theories related to social and personality development during childhood. Topics include parent-child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations.

134. Psychology and Education. Lecture, three hours. Prerequisites: courses 10, 130. Application of principles of cognitive development, learning, and behavior to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and education of the disadvantaged.

135. Social Psychology. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Introduction to research on social and personality development during childhood and his social environment. Social influences on motivation, perception, and behavior. Development and change of attitudes and opinions. Psychological analysis of small groups, social stratiﬁcation, and mass phenomena.

136A. Social Psychology Laboratory. Lecture, one hour; laboratory, four hours. Prerequisites: courses 41, 42, 135 (may be taken concurrently), psychology major standing. Introduction to research designs and methods used to test social psychological hypotheses, including experiments, observation, content analysis, and/or questionnaires.

136B. Survey Methods in Psychology. (Formerly numbered C136B.) Lecture, two hours; laboratory, three hours. Prerequisites: courses 10, 41, 42, psychology major standing. Nature of attitudes and opinions and their measurement by means of attitude scales and public opinion surveys. Class projects and ﬁeldwork.

137A. Abnormal Psychology. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, 135. Psychology of personal relationships, interdependence, power, interpersonal motivation, and attraction.

137AH. Interpersonal Relations (Honors). Lecture, three hours. Prerequisite: consent of instructor. Introduction to research on social and personality development to small groups and interpersonal relationships; princi- ple of exchange, structures of relationships, attribution of attitudes, and recurrent patterns of interaction.
137A. Attitude Formation and Change. Lecture, three hours. Prerequisites: courses 10, 41, 135. Structure and function of attitude measurement, how they develop, and methods for changing them.

137C. Close Relationships. Lecture, three hours. Prerequisite: course 10 or 41 or 135 or consent of instructor. Examination of research and theory about development, dating, and marriage, with emphasis on how these relationships are affected by gender and changing sex roles.

137D. Introduction to Health Psychology. Prerequisite: course 10. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding psychological concepts and research. Psychological perspective on these problems, and how psychological perspective might be enlarged and extended in the medical area.

M137E. Work Behavior of Women and Men. (Same as Women's Studies M137E). Prerequisite: course 10 or Women's Studies 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, consensus and evaluation bias, job satisfaction, and interdependence of work and family roles.

137I. Interpersonal Influence and Social Power. Lecture, three hours. Prerequisite: course 135. Theory and research focusing on how people influence one another and resist such influence, and on the bases of social power. Motivations and effects of influence for the powerholder and target of influence. Applications to such problems as issues of power and leadership in organizations, relationships in health and power, relationships in the family, interpersonal influence in everyday life, social power of political figures.

137J. Language and Gender. Lecture, three hours. Prerequisites: course 10, junior standing. Examination of current topics at intersection of language and gender. Topics include sex differentiation in language cross-culturally; sex bias in lexicc and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; “women’s” and “men’s” language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

M138. Political Psychology. (Same as Political Science M140.) Prerequisite: course 10. Examination of behavioral, political, socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

M142. Advanced Statistical Methods in Psycholo-140gy. (Same as Psychology M142.) Lecture, two hours; discussion, 90 minutes. Prerequisite: course 41. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlational techniques, analysis variance, and multiple regression.

148. Industrial and Organizational Psychology. Lec-149ture, three hours. Prerequisite: course 10. Introduction to applications of psychology in industrial and other organizations.

150. Mathematical Models in Psychology. Lecture, two hours; discussion, two hours. Prerequisites: Mathematics 3C or 31B, Computer Science 10C or 10F, or consent of instructor. Review of theoretical models and experimental evidence for models describing various areas of psychology. Topics include mathematical computer models of learning, perception, cognition, and personality.

151. Computer Applications in Psychology. Lecture, two hours; discussion, two hours. Prerequisites: Computer Science 100 or 10F, consent of instructor. Topics include hardware and software computer problems in design, control, and analysis of experiments; programming problems arising in evaluation of models of psychological processes of various content areas such as learning, perception, social, personality, and clinical.

M153. Death and Suicide: Psychological and Sociological Aspects. (Same as Sociology M138.) Lecture, three hours. Prerequisite: junior standing. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; the relatives, supportive, interventions, and postventicures in relation to death and suicide; partial death; megaload of psychological autopsy; death of institutions and cultures. P/NP grading recommended (letter grading required if course to be applied toward psychology or sociology major).

M155. Psychological Methods. M155J. (Same as Women's Studies M155J.) Lecture, two hours; discussion, one hour. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological differences between men and women, sex differences in intellectual abilities and achievement, and insight of gender on social interaction.

168. Environmental Psychology. Prerequisites: courses 41, 125. Research-oriented course which surveys theoretical and methodological issues which comprise the area of environmental psychology. Discussion of human's environmental condition, psychological and social environments, measurement of identification of situations, and personality variables that are relevant to environmental psychology. Residential, therapeutic, and recreational environments within a unified framework.

170A. Behavior Modification. Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Applied behavior theory; study of application of principles derived from learning theory, as in classical and instrumental conditioning, to treatment of developmentally disabled, autistic, and schizophrenic children, adult schizophrenics, affective disorders, anxiety states, drug abuse, marital discord, etc. Lectures, discussions, and demonstrations.

170B. Fieldwork in Behavior Modification. Lecture, two hours; fieldwork, six hours. Prerequisites: course 110 with a grade of A or 170A, consent of instructor. Fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Focus on discharge and re-instate in community. (Additional laboratory work to be arranged).

170C. Advanced Fieldwork in Behavior Modification for Psychology Majors. Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: courses 170B, psychology major standing, consent of instructor. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. May include counseling, therapy, and related interventions with developmentally disabled clients.

170D. Practicum: Design and Implementation of Behavioral Interventions. (Formerly numbered 170C.) Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 171A, consent of instructor. Design and implementation of behavioral interventions with developmentally disabled children. Topics include goal selection, ethical considerations, behavioral contracting, client right and human use procedures, home and community management, parent and staff training, working with schools, clinical issues.

M172. The Afro-American Woman in the U.S. (Same as Afro-American Studies M172 and Women's Studies M172.) Prerequisite: upper division standing. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their own ethnic groups. Focus on race, class, and gender in understanding the Afro-American woman in institutions and cultures. Small group exercises integrated with lecture and discussion (additional laboratory work to be arranged).

175. Community Psychology. Prerequisites: junior or senior psychology major standing, consent of instructor. Application of psychological principles to understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation policies.

M175. Communication and Conflict in Couples and Families. (Same as Communication Studies M116) Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses 10 or 11, 41, and 127, or consent of instructor. Focus on communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce).

177. Counseling Relationships. Prerequisites: courses 10, 41, 127, junior or senior standing, and consent of instructor, or junior or senior psychology major standing. Conceptual and empirical foundations of psychological counseling; comparison of alternative models of counseling theories, methods, and effects on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention.

178. Human Motivation. Prerequisite: upper division standing. Examination of current theories of human motivation and their implications disciplines such as psychology, economics, and the behavioral sciences.

179. Human Motivation I. Lecture, two hours. Prerequisites: course 10, 41, 127, junior or senior standing, and consent of instructor, or junior or senior psychology major standing. Review of current theories of human motivation and their implications disciplines such as psychology, economics, and the behavioral sciences.
170. Health Behavior and Health Status of Ethnic Groups: Behavioral Perspective. Lecture, three hours. Prerequisites: course 10 or 11 or Consent of Health Sciences 180 or 182, junior or senior standing. Survey course of psychological aspects of health behavior and health status in major ethnic groups in the U.S. Emphasis on major diseases outlined by the U.S. Public Health Service (USPHS). M180A. Contemporary Problems in Mental Retardation. (Same as Psychiatry M180A.) Prerequisites: courses 10, 41, and 127 or 130. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of content, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion.

M180B. Contemporary issues in Mental Retardation. (Same as Psychiatry M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers.

185. Cognitive Science. Lecture, three hours. Prerequisites: courses 10, 41, 42, and 120, or consent of instructor. Survey of theories and methods in study of cognition. Topics include perception, attention, mental imagery, representation, elaboration and reconstruction of information in memory: schemata and prototypes; cognitive skills, problem solving and reasoning; comprehension, construction, and transformation of natural language; neuropsychology and models of brain function; artificial intelligence, knowledge representation, programming, and thinking.

186. Cognitive Science Laboratory. Lecture, one hour; laboratory, three hours. Prerequisites: courses 10, 41, 42, 120, 185 (may be taken concurrently). Individual and group computer-based projects: information processing methods and analyses; experimental tests of cognitive theories and models; simulation of cognitive processes in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers.

187. Psychology and Law. Lecture, two hours; discussion, one hour. Prerequisite: junior standing. Study of new topics on legal psychology, including suspects identification, witness reports, and police procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and/or discussions.

187H. Psychology and Law (Honors). Lecture, two hours; discussion, one hour. Prerequisite: junior standing, consent of instructor. Honors course parallel to course 187.

188. Fieldwork in Cognitive Science. Lecture, two hours; fieldwork, six hours. Prerequisites: cognitive science major standing, department consent. Fieldwork (approved community setting) or research (approved community setting) in applications of cognitive science. Credit may be repeated for credit with consent of instructor. Only one graded course may be applied toward undergraduate major degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

189. Directed Individual Research and Study. Prerequisites: junior or senior psychology major standing (some sections may require consent of instructor). Study of selected current topics of psychological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. Only one graded course may be applied toward psychology major degree. May not be applied as an elective toward psychology or cognitive science major.

200A. Animal Learning and Behavior. Basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning, and species-specific behavior.

200B. Human Learning and Behavior. Topics include human learning and conditioning and application of learning principles in etiology and treatment of a variety of psychological problems through case studies, systematic desensitization of anxiety states, behavior modification programs for schizophrenic children and adults, behavioral pharmacology, control of autonomic behavior, and therapeutic applications of psychology.

201. Current Issues in Learning and Behavior (1 unit). Discussion, 90 minutes. Prerequisite: graduate standing. Required of first-year learning and behavior students. Presentation of papers of current interest in learning, behavior, or applied behavioral analysis by experts in the field. Evaluation of their significance and methodology in detail. May be repeated for credit. Mr. Farselow, Mr. Minor (W/Sp)

204A-204B. Seminars on Critical Problems in Learning. Each course may be taken independently and in any order. Critical problems from following:

204A. Psychophysiology of Attention and Learning. Study of research and theories concerned with psychophysiology of attention and learning primarily in humans. Concepts and areas include orienting reflex, dominant focus, classical conditioning, and their implications for psychophysiology of psychopathology and psychotherapy. Mr. Maltzman

204B. Theories of Learning. Prerequisite: course 200A or equivalent. Critical discussion of major theories in learning, their applications, and implications. Mr. Maltzman

204C. Applied Learning. Lecture, three hours. Prerequisites: graduate standing in psychology, consent of instructor. Lectures and discussion on current research in application of learning principles to clinical and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc.

Mr. Garcia, Mr. Loavaa

204D. Fear and Anxiety. Lecture, three hours. Prerequisite: graduate training. Presentation of theoretical and empirical advances, from biological and behavioral perspectives, in the area of fear and anxiety. Integration of animal and human research.

Mr. Craske, Mr. Farselow, Mr. Minor

205A-205B. Physiological Correlates of Behavior. Lecture, three hours. Physiological substrate of behavior and neural and endocrine mechanisms which underlie psychological phenomena and behavior. New concepts of structural and functional organization in nervous systems and how these relate to behavioral and neurological dysfunction.

206. Psychophysiology of Brain Function. Modern concepts of functional organization of the brain, with particular reference to psychological phenomena and behavior. Current research in psychophysiology and electroencephalography bearing on perception, attention, drive, sleep-wakefulness, levels of consciousness, etc. Some emphasis on pathology of behavior resulting from brain injury. Mr. Beatty

207A-207B-207C. Seminars in Physiological Psychology. Prerequisite: course 115 or equivalent.

Mr. Butler, Mr. Ellison, Mr. Krasne

208. Seminar in Comparative Psychobiology. Mr. Arnold

209. Behavioral and Systems Neuroscience. (Same as Neuroscience 209.) Lecture, three hours. Prerequisites: Neuroscience 201, 202, 203, and 204, or consent of instructor. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of the nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

210. Comparative Psychobiology. Prerequisites: courses 115 or equivalent, consent of instructor. Survey of determinants of species-specific behavior, including genetic influences and learning. Mr. Arnold

Graduate Courses
220A-220B. Social Psychology. Prerequisite: graduate standing in psychology. Open to other students with consent of instructor. Intensive consideration of concepts, theories, and major problems in social psychology.

M. Brewer, M. Collins

220C. Introduction to Social Psychology. Lecture, three hours. Introduction to contemporary issues in social psychology and the role of psychological processes in power and influence. Service course for graduate students in education, sociology, political science, etc.

Mr. Sidanuis

221. Seminar in Attitude Formation and Change. Discussion, three hours. Prerequisites: courses 220A-220B or consent of instructor. Social psychological research and theories on opinions and attitudes. Effects of mass communication, social factors in assimilation of information and influence.

Mr. Gerard

222A. Seminar in Interpersonal Relations. Discussion, three hours. Prerequisites: courses 220A-220B or consent of instructor. Theory and evidence on interpersonal relations, with intensive study of theory of interdependence (interdependence, power, conflict, dispositions, and interpersonal processes).

Mr. Kelley, M. Raven

222B. Interpersonal Influence, Social Power, and Leadership. Lecture, two hours; discussion, two hours. Prerequisites: courses 220A-220B or consent of instructor. Review of theory on interpersonal influence and social power, with particular applications on health issues such as doctor/patient, doctor/nurse, and counselor/client relationships. Supervisor/worker, parent/child, husband/wife, and teacher/student interactions also considered.

Mr. Ruszen

223A. Survey Research in Psychology. (Formerly numbered C223A.) Lecture, three hours. Critical review of theory and practice of large-scale sampling, measurement, and analysis of beliefs, attitudes, and other psychological variables.

Mr. Shure

223B. Social Survey Research Seminar. Seminar, three hours. Designed to provide a statistical analysis of survey data.

224. Experimental Methods in Social Psychology. Lecture, three hours; prerequisites: courses 220A-220B or consent of instructor. Critical review of laboratory techniques and problems of experimental control and measurement encountered in research on social psychological phenomena.

Mr. Collins

225. Seminar in Critical Problems in Social Psychology. Discussion, three hours. Prerequisites: courses 220A-220B or consent of instructor. May be repeated for credit with consent of instructor.

226. Current Literature in Social Psychology (2 units). Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

227. Health Psychology. Lecture, two hours; discussion, one hour. Prerequisite: undergraduate degree or training in psychology. Psychological factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.

Ms. Taylor

M228A. Proseminar in Political Psychology. (Formerly numbered M228.) (Same as History M295A and Political Science M251A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

Mr. DeNey, G. Sears

M228B. Seminar in Political Psychology. (Formerly numbered M228.) (Same as Political Science M261D.) Discussion, three hours. Prerequisite: course 220A or Political Science M261A or consent of instructor. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

Mr. Sears

M228C. Critical Problems in Political Psychology. (Same as Political Science M261E.) Discussion, three hours.

229. Social Cognition. Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social information in their environment. Seminar provides broad background in the field and also gives depth and focus on particular research topics. Three-weekly papers, as well as a lengthy final paper, required.

Ms. Taylor

231. Psychology of Gender. Seminar, three hours. Prerequisite: one prior course on gender/women’s studies or consent of instructor. Critical evaluation of current research and theory concerning psychology of gender, drawing on work from various areas of psychology to understand sources of gender differentiation and its consequences for human behavior and social interaction.

M. Penley, M. Peplau

232. Human Sexuality. Lecture, three hours. Prerequisites: graduate standing. Designed to teach students how to carry out research on human sexual behavior. Contents include theory construction, scale development, physiological and endocrinological implications, relationships among sex hormones (in vivo and in vitro), ethical issues, methodological and statistical considerations, measurement of sexual arousal, fantasies, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning human sexual functioning.

M. Abramson

233. Seminar in Environmental Psychology. Prerequisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man-environment relationships. Use of human emotional responses to environment as intervening variables linking specific stimuli to qualities of a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to emotional response (dissociation used to explain within-individual differences in response to same environment over time or between-individual differences to same situation. Review of literature relating individual differences to personality traits in various reference groups for those environments.

M. Mehrabian

M234. Social Psychological Aspects of Competitive Youth Sport. (Same as Kinesiology M254.) Prerequisite: Kinesiology 100 or consent of instructor. Review of research concerning social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport.

M. Scanlan

236. Seminar in Mental Measurements. Mr. Woodward

M239. Personality, Motivation, and Attribution. (Same as Education M215.) Current research and theory relating personality variables to motivation, attraction, attitudes, personality styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

M. Woodward

240A-240B. Developmental Psychology. Lecture, three hours. Prerequisites: one undergraduate developmental psychology course, graduate standing, consideration of variables influencing cognitive social and emotional development of the human organism from conception through adolescence. Emphasis on research methodology and research base for current theories of development.

242A-242F. Seminars in Developmental Psychology. Seminar, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Each course may be taken independently and may be repeated for credit.

242A. Perceptual Development.

242B. Cognitive Development.

M. Greenfield, M. Jeffrey

242C. Socialization.

M242D. Social Development and Education. (Same as Education M217A.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.

Ms. Adelman

242E. Cognitive Factors in Learning Disorders.

242F. Development of Language and Communication.

M. Greenfield, M. Padilia

243A-243B. Seminars on Practical and Societal Issues in Developmental Psychology. Lecture, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Socialization processes in human development and implication for social-political, educational, research issues, values, and societal change. In Progress grading.

M. Nakamura

244. Critical Problems in Developmental Psychology. Lecture, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.

M245. Personality Development and Education. (Same as Education M217C.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and developmental issues.

M. Frey

M246. Psychological Aspects of Mental Retardation. (Same as Psychiatry M246.) Prerequisite: consent of instructor. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

M. Tymoch (F)

247A. Acquisition and analysis of data, on-line analysis of behavior, and control of experiments in diverse content areas of psychology (e.g., perception, social, clinical, personality, and physiological).

M. Carterette

247B. Prerequisite: course 247A or consent of instructor. Topics in human problem solving, information processing, automata, language cognition, and problems arising in computer simulation of behavior. Each student undertakes substantial project.

M. Carterette

249. Evaluation Research. Prerequisites: courses 250A, 250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

M. Woodward
250A. Advanced Psychological Statistics. Review of fundamental concepts. Basic statistical techniques as applied to design and interpretation of experimental and observational research.

Mr. Wickens, Mr. Woodward

250B. Advanced Psychological Statistics. Advanced experimental design and planning of investigations.

Mr. Wickens, Mr. Woodward

251A-251B-251C. Research Methods. Limited to psychology graduate students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms (normally three terms allowed). S/U grading. (Course 251A only)

252. Multivariate Analysis. Prerequisites: courses 250A, 250B. Introduction to analysis of data having multiple dependent measures. Topics include multivariate distributions, principal components analysis, multiple regression, canonical correlation, discriminant analysis, and multivariate analysis of variance. Example applications from a variety of psychological areas of research, including clinical, cognitive, physiological, and social. Computer implementation includes APL and standard statistical packages.

Mr. Woodward

Mr. Comrey

254A. Psychological Scaling. Formerly numbered 254.) Lecture, three hours. Prerequisite: graduate standing. Theory of measurement, law of comparative judgment, methods of unidimensional scaling, multidimensional scaling, and related topics of current interest.

Mr. Holman

254B. Cluster Analysis. Lecture, three hours. Prerequisite: graduate standing. Quantitative methods for classification. Theories and assumptions underlying major clustering methods. Use of computer methods in exploratory data analysis.

Mr. Holman

Mr. Woodward

256. Seminar on Critical Problems in Psychological Measurement. Critical examination of issues in major approaches to psychological measurement; relation in psychological methods and data to a general theory of measurement.

Mr. Mount

257. Multivariate Analysis with Latent Variables. (Same as Psychological Statistics 251.) Lecture, three hours. Prerequisite: consent of instructor. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate statistics. Computer modeling: testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factory analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

Mr. Mr. Bentler

258. Special Problems in Psychological Statistics. Prerequisites: courses 250A and 250B, or consent of instructor. Special problems in psychological statistics and data analysis.

Mr. Wickens

259. Quantitative Methods in Cognitive Psychology. Prerequisites: courses 250A and 250B, or consent of instructor. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc.

Mr. Wickens

261. Perception. Lecture, three hours. Prerequisite: consent of instructor. Concepts, theories, and research in study of perception. Considers the questions: What do things look, sound, smell, taste, feel as they do? What is the nature of perceptual systems? How do these systems process information?

Mr. Thomas

262. Human Learning and Memory. Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in human verbal learning and memory; verbal and nonverbal learning and memory processes, structure and organization of short- and long-term memory.

Mr. Bjork

263. Psycholinguistics. Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in psycholinguistics: coding and decoding, psycholinguistic parameters of language learning, speech recognition and perception.

Mr. French, Mr. MacKay

264. Judgment and Decision Processes. Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in judgment and decision processes: psychological scaling, contextual effects on rating scales, models for analysis of value decisions.

Mr. Parducci

265. Thinking. Lecture, three hours. Contemporary theory and research in thinking, problem solving, inference, semantic memory, internal representation of knowledge, and decision processes.

Mr. Cognitive Science

266. Cognitive Science. Lecture, three hours. Prerequisite: consent of instructor. Major issues in cognitive science. Representation of cognitive structures and higher-level processes. Specific areas include perception, learning and memory, problem solving, and reasoning. Relationships to artificial intelligence.

Mr. Richards, Mr. Wickens

268A-268E. Seminars in Human Information Processing. Seminar, three hours. Prerequisite: consent of instructor. Topics vary with interests of instructor. Each course may be taken independently and may be repeated for credit.

268A. Perception. Mr. Thomas

268B. Human Learning and Memory. Mr. Bjork

268C. Judgment and Decision Processes. Mr. Parducci

268D. Language and Thought. Mr. MacKay

268E. Human Performance. Mr. Beatty, Mr. Carterette

269. Seminar in Cognitive Psychology. Seminar, three hours. Prerequisite: consent of instructor. Discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.

270A. Analysis of phenomenological, theoretical, and research issues regarding etiology and mediating mechanisms in neurotic, affective, schizophrenic spectrum, and other personality disturbances.

270B. Principles and methods of psychological assessment and evaluation.

270C. Principles and methods of psychological intervention in individuals, families, and community settings.

271D. Clinical Research Laboratory (2 units). Discussion, one hour; laboratory, one hour. Corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C. Limited to graduate students in clinical psychology. Acquaints students with faculty research interests and involves them in their course 271 research at an early stage to insure completion. S/U grading.

Mr. Christensen

272A-272G. Advanced Clinical Psychological Methods. Formerly numbered 272A-272F.) Seminar, three hours. Prerequisite or corequisite: course 401 or 451. Each course may be taken independently for credit.

272A. Behavior Modification with Children. Prerequisites: courses 271A-271B-271C or consent of instructor. Course in series of clinical intervention and assessment offerings for second- and third-year clinical students that covers behavior modification research and practice in clinic, school, institution, and hospital settings.

Mr. Baker

272B. Psychotherapy with Adults.

272C. Clinical Interventions for Psychological Problems of Children.

272D. Family Therapy and Family Dynamics.

272E. Special Problems.

272F. Behavior Modification with Adults. Prerequisites: second-year standing in clinical psychology. Current cognitive behavior modification principles and techniques. Major conceptual issues; specific techniques demonstrated and practiced by students to cover a range of adult problems such as depression, stress and anxiety, anger management, assertion problems. Ms. Hammem, Ms. Mays

272G. Marital Therapies. Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 270A-270B-270C. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social learning, psychodynamic, and systems theories, with relevant research findings.

Ms. Christensen

273. Interpersonal Communication Seminar. Prerequisite: course 282 or consent of instructor. Development of a design for studying help-oriented interaction and communication in clinical and community settings. Initial focus on measuring interpersonal deficit, response styles, and training effects.

Mr. Goodman

Mr. Christensen

275. Clinical Approaches to Children Learning and Related Behavior Problems. Lecture, three hours; discussion, one hour. Prerequisite: doctoral standing. Theories and research issues and systems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Practicum experiences to illustrate course content and provide opportunities to improve research and clinical competence.

Mr. Adelman

277A-277B. Advanced Clinical Assessment. Formerly numbered 277.) Laboratory, two hours; additional hours to be arranged through Psychology Clinic. Corequisites: courses 272A-272B-272C. Graduate standing in clinical psychology. Preparation for developing and administering psychological test batteries, personality, and aptitude assessment of assessment to problems in psychology.

Mr. Mays, Mr. Hammem

278. Seminar in Motivation, Conflict, and Neurosis.

Mr. Feshbach

279. Seminar on Research in Psychopathology.
Semester (e.g., stress) as these can promote permanent illness, including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

281. Seminar in Behavior Therapy. Mr. Lovasik

282. Interpersonal Forms: Analysis of Human Interaction Structures. Lecture, two hours; laboratory, two hours. Conceptual and experimental study of six response modalities common to psychotherapy and everyday interaction: questions, silences, advice, interpretation, self-disclosure, and reflection. Laboratory work performed in conjunction with lecture and seminar sessions. Mr. Goodman

283. Psychopathology. Survey of dominant psychological attributes of particular forms of psychopathology, including analysis of status of various theories concerned with etiology and mediating mechanisms of personality, neurotic, schizophrenic spectrum, and affective disturbances.

284. Seminar in Clinical Psychology and Communication. Two hours. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

286. Issues and Concepts of Clinical Psychology. Open to graduate students in majors other than clinical psychology. Survey of major issues and alternatives in current practice. Emphasis on assessment and interpretation, with consideration of historical, theoretical, and research bases for current trends. Mr. Broen

287. Critical Problems in Clinical Research Methodology. Prerequisites: courses 250A, 250B. Special problems of measurement and design in clinical research. Mr. Christensen

288. Seminar on Research in Personality (1 unit). Prerequisite: graduate standing in personality. Required of all students majoring in personality. Current research, theory, and professional issues within area of personality Brown-bag format utilized to foster intellectual exchange and discussion. Students make at least one presentation per term and participate in discussions with faculty and guest lecturers.

290. History of Psychology. Philosophical and historical context of contemporary psychology. Major trends from the 19th century to contemporary issues. Mr. Maltzman

291. Principles of Behavioral Pharmacology. Prerequisite: consent of instructor. Intensive analysis of drug, brain, and behavior relationships. Discussion of nature and source of drugs, general aspects of pharmacology, neurotransmitters and basic neuropharmacology, principles of behavioral pharmacology, categories of psychopharmacological agents, and pharmacological approaches to study of drug addiction, schizophrenia, and other behavioral processes, both normal and pathological. Mr. Butcher

292. Biobehavioral Mechanisms of Stress and Disease. Lecture, three hours. Prerequisite: graduate standing in psychology or consent of instructor. Behavioral-pharmacology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. Usual and altered states of these systems (e.g., stress) as these can promote permanent tissue injury, disease, or improved bodily function, health enhancement. Mr. Castro, Mr. Grijalva, Ms. Morell

293. Behavioral and Psychopharmacological Problems of Alcoholism. Prerequisite: consent of instructor. Behavioral and psychopharmacological changes associated with alcoholism, along with theories concerning their etiology and treatment. Experimental approaches. Mr. Maltzman

M284A-M284D. Seminars in Neural and Behavioral Endocrinology (3 units, 2 units, 3 units, 2 units). (Same as Anatomy M255A-M255D.) Lecture, three hours. Topics include hormonal biochemistry and pharmacology. Hypothalamic-hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamic control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

M294A-M294D. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M236G, Education M222A, and Psychology M235.) Prerequisite: consent of instructor. Skill of observing and interpreting behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

M296. Neurobiology of Sleep (3 units). (Same as Neuroscience M259 and Psychiatry M249.) Lecture, one hour; discussion, two hours. Critical review of primary research on periodic nature of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. Mr. Lovaas

297. Issues in Social Development of the Minority Child. Seminar, three hours. Prerequisites: graduate standing, consent of instructor. Critical evaluation and integration of existing research on social psychological development of the minority child. Emphasis on socialization of cognitive and personality style, with goal of empirically clarifying issues raised in this area of developmental study.

298. Special Problems in Psychology. Content depends on interest of particular instructor. May be repeated for credit.

299. Developmental Methodology. Coverage of both theory and methods in measuring age-related changes in behavior. Experimental designs and data-analytic solutions to problems in measurement of change. Some experience in analysis of actual data sets. Mr. Kaye

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Practicum in Clinical Psychology (1 to 12 units). Prerequisites: courses 271A-271B-271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee).

401. Fieldwork in Speech Pathology (4 or 8 units). Prerequisite: consent of instructor. Practical work in hospitals and clinics in diagnostic testing and psychotherapy with speech disorders.

410A-410B-410C. Clinical Teaching and Supervision. Prerequisites: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively underway, consent of instructor and clinic steering committee. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology. Ms. Jacobs, Mr. Nakamura

420A-420B. Health Psychology Practicum (2 units each). Prerequisite: graduate standing. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in the medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in the field. Ms. Taylor

423. Social Survey Research Practicum. Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conducting and management of computer-assisted telephone interview surveys.

425. Health Psychology Lecture Series (2 units). Clinicians and researchers in health psychology from Los Angeles area present their research, programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading.

451. Internship in Clinical Psychology (6 to 12 units). Prerequisite: course 401. Limited to students who have successfully completed departmental qualifying examinations. May be repeated for credit. S/U grading.

454. Internship in Industrial Psychology (2 to 4 units).

490. Scientific Writing for Psychologists (2 units). Lecture, two hours; laboratory, two hours. Prerequisite: consent of instructor. Gives graduate students opportunity to improve their effectiveness in writing scientific papers for publication and proposals for dissertations or grants. May not be applied toward graduate degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Research and Study in Psychology (2 to 12 units). One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.)

597. Individual Studies (2 to 12 units). Intended primarily as preparation for Ph.D. qualifying examination. May be required by completion committees as a prerequisite for taking examinations.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations.

Religion, Study of (Interdepartmental)

383 Dodd Hall, (213) 825-7831, 825-4641

Professors
Marilyn McCord Adams, Ph.D. (Philosophy)
Robert Matthews Adams, Ph.D. (Philosophy), Chair
Rogers Albritton, Ph.D. (Philosophy)
Amin Banani, Ph.D. (Persian, History)
Bachelor of Arts Degree

Preparation for the Major

Required: History 4; Philosophy 2; two courses from Anthropology 9, East Asian Languages and Cultures 60, History 1A, 1B, 1C, 9A, 9C, 9D, 10A, 10B, 11A, 11B.

The Major

Required: A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 197) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to your course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Honors Program

The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. If you are admitted to honors, you should take three 199 courses under the guidance of the sponsoring professor. These courses are taken in the senior year and count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.

In order to qualify for admission, you should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor Robert M. Adams at the program address.

Upper Division Course

100. Undergraduate Seminar in Study of Religion. Prerequisite: consent of instructor. Limited to 20 students. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor.

Mr. Nagy

Study of Religion Upper Division Course List

Group I — Methods

Anthropology 133F. Aesthetic Anthropology

156. Comparative Religion

History 193A. History of Religions: Myth

193E. Special Topics in History of Religions

Philosophy 175. Topics in Philosophy of Religion

Study of Religion 100. Undergraduate Seminar in Study of Religion

Group II — Nonliterate and Ancient Religious Traditions

Ancient Near East (Near Eastern Languages) 130. Ancient Egyptian Religion

Anthropology 171. Civilization of Sub-Saharan Africa

174P. Ethnography of South American Indians

177. Cultures of the Pacific

Classics 166A. Greek Religion

166B. Roman Religion

168. Introduction to Comparative Mythology

Dance 181B. Dance in Southeast Asia

181D. Dance in Southeast Asia

C187A. Dance Cultures of Native American Indians

Folklore and Mythology M122. Celtic Mythology

M123A. Finnish Folklore and Mythology

M126. Baltic and Slavic Folklore and Mythology

M128. Hungarian Folklore and Mythology

M129. Folklore and Mythology of the Ugric Peoples

130. North American Indian Folklore and Mythology Studies

131. Folklore of India

M155. Oral Traditions in Africa

History 183D. Religions of the Ancient Near East

Iranian (Near Eastern Languages) 170. Religion in Ancient Iran

Group III — Western and Near Eastern Religious Traditions

Christianity

Classics M170A. Byzantine Civilization

Greek (Classica) *130. Readings in the New Testament

History 119. The Christian Church, 100-1517

120. The Christian Religion, 100-1350

125B. History of Modern Europe: Reformation

150C. History of Religion in the U.S.

194A. History of Early Christians

194B. Religious Environment of Early Christians

Philosophy 100B. Medieval and Early Modern Philosophy

Islam

Arabic (Near Eastern Languages) *120. Islamic Texts

History 107A-107B. Islamic Civilization

109A. History of North Africa from the Moslem Conquest: To 1578

Islamics (Near Eastern Languages) 110. Introduc- tion to Islam

Judaism

Hebrew (Near Eastern Languages) *120. Biblical Texts

*130. Rabbinic Texts

History M192A-M192B. Jewish Intellectual History

Jewish Studies (Near Eastern Languages) M150A-150B. Hebrew Literature in English

*Courses so marked have readings in foreign languages. See departmental course listings for prerequisites.

Scope and Objectives

The UCLA major in the study of religion is designed to give students a broad humanistic perspective. It introduces students to several religious traditions and thus to an appreciation of the very nucleus of civilization in various periods of history and various parts of the world, as well as to an understanding of fundamental human orientations. The program also provides opportunity to study one or more particular religious traditions in greater depth. Coherence and integrity in the program are furthered by courses dealing with philosophical problems in religion and with general anthropological reflections.
Scope and Objectives

The Romance Linguistics and Literature Program emphasizes modern linguistic and literary theories in the study of Romance languages. Linguistic and literary theories can be pursued independently or jointly; however, the integration of linguistic and literary knowledge is taken to be one of the highest aims of this interdepartmental graduate program.

Master of Arts Degree

Admission

The UCLA Bachelor of Arts degree in French, Italian, Portuguese, or Spanish, or the equivalent, is required. Applicants are expected to have a grade-point average of at least 3.4 in upper division courses, especially in those judged germane to their proposed program. Three letters of recommendation and the General Test of the Graduate Record Examination (GRE) are also required and should be submitted to the Chair, Romance Linguistics and Literature Program, 359 Royce Hall, UCLA, Los Angeles, CA 90024-1535. Students admitted from elsewhere whose preparation is considered deficient in view of their intended specialization are required to take specified upper division courses. Such courses may be taken concurrently with graduate courses, but they may not be applied toward the course requirements for the M.A. degree. Before enrolling for the first term in the program, new students must consult the program chair concerning the formation of their guidance committee. Students who know only the language of their major should prepare in at least one other Romance language during the first graduate year so they can take courses in their minor no later than the second year of graduate study.

Foreign Language Requirement

In addition to the Romance language of major interest and that of minor interest, you are required to take either Latin 3 or the equivalent, or Italian 3 or the equivalent (provided Italian is not your major), whether you specialize in linguistics or in literature. The language requirement must be completed no later than the term before you expect to receive your degree.

Course Requirements

Twelve courses are the minimum requirement, of which six courses (at least five of them graduate) must be in your major language, with specializa-

Susan Pfann, Ph.D. (Spanish)

*Courses so marked have readings in foreign languages. See departmental course listings for prerequisites.
Formal application is required of all students. Entering students who have completed the UCLA M.A. in Romance Linguistics and Literature with a high pass grade are automatically eligible for admission to the Ph.D. program; those who received a low pass grade are ineligible for admission. Students whose M.A. program registers deficiencies in scope or quality may be admitted but are required to complete three graduate courses (with grades of B or better) approved by the chair.

Following your formal admission, you select your guidance committee in consultation with the chair. You then meet as soon as possible with your committee to work out your program of courses and set a tentative date for the qualifying examinations. The guidance committee has final authority to prescribe the course of study. Until you have met with this committee and placed yourself under its direction, you are not officially in the Ph.D. program.

**Major Fields or Subdisciplines**

The program recognizes two fields of specialization: linguistics and literature.

**Linguistics** — Major fields include (1) the present-day grammar of the Romance language of your major interest and its relation to the grammar of its sister languages and to language in general, (2) the development of the Romance language of your major interest in relation to its sister languages (and possibly other interrelated cultural aspects) from the perspective of historical linguistics, and (3) the genetic and typological relationships of the Romance languages to other Indo-European languages and to language in general. The two minors may be other Romance languages, or one other Romance language plus a field of Romance literature.

**Literature** — Major fields include one of the following in the literatures of at least two Romance languages: (1) early Romance literature and philology, (2) Renaissance and baroque, (3) modern literature, preferably with emphasis in one century. The first minor may be one of the preceding fields not selected for the major. The second minor may be the same field or a new field in another Romance language, or some other related field in the major language or in Romance linguistics.

**Foreign Language Requirement**

In addition to the minimum of two Romance languages, Latin 3 or Italian 3 or the equivalent is required of all students in the program. Students selecting option 2 or 3 in linguistics or option 1 in literature must also take German, whereas those selecting option 1 in linguistics or option 2 or 3 in literature must take another foreign language to be determined by the guidance committee. In non-Romance languages, you must pass the Educational Testing Service (ETS) test. In languages where there is no such test, passing a departmental examination fulfills the requirement. This requirement may also be met by completing two years of college-level courses in the language with a grade of B or better or by fulfilling the foreign language requirement in connection with an M.A. obtained elsewhere. The foreign language requirement must be satisfied no later than the term before the qualifying examinations are taken.

**Course Requirements**

In each of the two specializations (linguistics or literature) the Ph.D. program consists of a major and two minors. The courses (a minimum program) are distributed as follows: major — five courses, first minor — three courses, second minor — two courses. At least one seminar is required in each of the three fields. In addition to those required for the master's degree (or equivalent) at least 10 other graduate courses (of which no more than two 596 courses may be applied), as well as such courses as the guidance committee may prescribe, are required. Linguistics 100 is required as a prerequisite for all students majoring in the linguistics field.

**Teaching Experience**

Teaching experience is not required but is desirable. Consult the chair regarding the availability of teaching assistantships.

**Qualifying Examinations**

The qualifying examinations, given by the doctoral committee during Fall, Winter, and Spring Quarters, consist of (1) a three-hour written examination in the major field, (2) a two-hour examination in the first minor, (3) a one-hour examination in the second minor, and (4) a two-hour University Oral Qualifying Examination in the three fields, at which time your prospectus for the dissertation is also discussed and approved. Failed portions of the examination may be repeated once after any remedial preparation the committee may specify.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Dissertation**

The dissertation may be on any subject within the general area of Romance linguistics and literature. If more than five calendar years elapse between advancement to candidacy and the presentation of the dissertation, the program may require revaluation of the qualifying examinations.

**Graduate Courses**

204A-204B, Romance Syntax: French (1 to 4 units each). Lecture, three hours. Prerequisites: Linguistics 120B, C165B/C200B, consent of instructor. Course 204A is prerequisite to 204B. Structure of French from point of view of contemporary syntactic theory, with emphasis on considerations of comparative syntax with other Romance languages. Topics include verbal/auxiliary system; wh-movement and Complementizer system; cleft constructions, causatives, inversion phenomena; question distribution; impersonal constructions; negation and subjunctive. S/U or letter grading.

Mr. Sporichche

211, Comparative Romance Syntax, Lecture, three hours. Prerequisite: French 204A or Portuguese 204A or Spanish 204A or consent of instructor. Comparative study of syntactic processes in Romance languages. Investigation of parameters underlying linguistic variation.

Mr. Otero, Mr. Quicoli

255, Topics in Romance Syntax (1 to 4 units). Prerequisite: consent of instructor. Topics in syntax of Romance languages, with emphasis on recent development in comparative studies: theoretical innovations based on Romance syntax.

Mr. Sporichche

596, Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of instructor and program chair. Study or research in areas or on subjects not offered as regular courses. Eight units may be applied toward M.A. degree requirements. S/U grading.

597, Preparation for Graduate Examinations (4 to 12 units). Prerequisite: consent of graduate advisor. Individual preparation for M.A. or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in that comprehensive or qualifying examinations are to be taken. S/U grading.

**Romance Linguistics and Literature Course List**

In consultation with the appropriate adviser(s), courses should be selected with an eye to the organic relationship between them, preferably among those listed below and/or their prerequisites:

**Introductory Courses**

Italian 201, Bibliography and Methods of Research Spanish 200, Research Resources

**Linguistics Courses**

Grammatical Theory: Linguistics 201, Survey of Current Issues in Phonological Theory Spanish M200, Research Resources

**Development of the Romance Languages**

**Italic Dialects: Latin 242, Italic Dialects and Latin Historical Grammar**

ROTC Programs

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Senior Division Reserve Officer Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920.

This voluntary training allows you to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing your college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). They are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of your major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for students who apply early in their sophomore year. All have leadership laboratories which help to build management skills. Active duty obligation following commissioning varies depending on type of commission, type of financial aid received, and individual requests for Active or Reserve Duty assignments.

Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of $100 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, 825-7381; Air Force, 825-1742; Navy, 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station,
NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Completed applications should be received prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Three- and two-year scholarship applications may be obtained from the appropriate UCLA department and must be submitted prior to February 1.

Aerospace Studies

210 Men’s Gym, (213) 825-1742

Professor
Gary A. Jorgenson, M.A., Colonel, Chair

Adjunct Assistant Professors
Robert J. Feliz, M.A., Major
Anthony D. Leppellere, M.B.A., Captain
Lynn M. Zabkar, M.S., Captain

Air Force ROTC Scope and Objectives

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

Four-Year Program

The four-year program is available to first-term freshmen and those full-time students with at least four years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A-1B-1C and 20A-20B-20C), followed by a two-year Professional Officer Course (POC) described under “Two-Year Program.” GMC participation requires one hour of academic class and one hour of leadership laboratory each week during the academic year. Students incur no military obligation for GMC participation unless they qualify and accept an Air Force ROTC scholarship during or after their sophomore year.

Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel expenses and are paid about $450 to cover incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

Two-Year Program

The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A-130B-130C and 140A, 140B, 140C. POC participation requires two hours of leadership laboratory and three hours of academic class each week during the academic year.

Prerequisites for the two-year program are successful completion of the GMC and a four-week field training course (see “Four-Year Program” above), or successful completion of a six-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the six-week field training program are encouraged to apply to the department chair early during Fall Quarter of their sophomore year. The application deadline normally is February 1, but earlier submission is recommended, as the selection board considers applications monthly. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, medical examination results, and performance during an officer board interview.

Students selected for the six-week summer field training are provided meals, quarters, clothing, travel expenses, and approximately $675 to cover incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see “Four-Year Program” above).

Students enrolled in POC incur a military obligation and are paid $100 per month during the academic year. Graduation and successful completion of POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

Freshman-Year Courses

1A-1B-1C. U.S. Military Forces in the Contemporary World (2 units each). Lecture, one hour. Air Force ROTC students should complete all three courses, preferably in sequence. Willingness to participate in class discussion required. P/NP or letter grading. 1A. Examination of roles and norms expected from military officers, with emphasis on characteristics of national power, U.S. national security apparatus, and key elements of current strategic doctrine. Role of U.S. Navy, Marine Corps, and Army. 1B. Focus on roles, missions, and organization of the Air Force, covering basic elements of air doctrine and functions of general purpose, strategic, and aerospace support forces. Emphasis on how aerospace forces are utilized during conflict, as well as current problems in defense procurement. 1C. “Threat assessment” of U.S.S.R. military and political policies and potential for military conflict in selected regions of the world. Examination of low-level conflict as represented by terrorist actions and guerrilla warfare. Analysis of basic elements of strategy which deter war. Capt. Zabkar (F,W,Sp)

Sophomore-Year Courses

20A-20B-20C. Developmental Growth of Air Power (2 units each). Lecture, one hour. Development of air power over past 80 years. Development of various concepts of employment of air power, with emphasis on factors which have prompted research and technological change. Key events and elements in history of air power, especially where these provide significant examples of impact of air power on strategic thought. P/NP or letter grading. Maj. Feliz (F,W,Sp)

Upper Division Courses

130A-130B-130C. Concepts of Air Force Management and Leadership. Lecture, three hours. Course 130A is prerequisite to 130B, which is prerequisite to 130C. Analysis of principles and functions of management, leadership, and organizational behavior, with special reference to the Air Force as a model. Problem solving, information systems and models, quantitative methods, and computer systems. Group discussions, case studies, films, and role-playing used as teaching devices. Communicative skills strengthened through preparation of written reports and oral presentations. P/NP or letter grading. Capt. Leppellere (F,W,Sp)

140A. Military Judicial System. Lecture, three hours. Introduction to military justice system, international laws of armed conflict relating to air operations, and foundations of military professionalism. Oral and written reports to strengthen communicative skills. P/NP or letter grading. Maj. Jorgenson

140B. The Military in American Society. Lecture, three hours. Forces and issues in social context of the American military. Influence of social norms, societal pressures, and cultural factors on functions and role of the military professional in the U.S. Communicative skills strengthened through extensive classroom presentations. P/NP or letter grading. Col. Jorgenson

140C. American Defense Policy. Lecture, three hours. U.S. security policy with respect to factors that influence its formulation, bureaucracy that formulates and implements it, and forms it has taken and may take in the future. Communication techniques strengthened, and communicative abilities oriented to Air Force requirements through preparation of papers and class presentations and discussion. P/NP or letter grading. Col. Jorgenson

199. Special Studies in Aerospace Studies (2 or 4 units). Prerequisite: consent of instructor. Course of study for undergraduates who wish to engage in independent research under direct supervision of a department faculty member. P/NP or letter grading. Col. Jorgenson

Military Science

142 Men’s Gym, (213) 825-7381, 825-7384

Professor
John L. Hitchcock, M.S., Lieutenant Colonel, Chair

Assistant Professors
Carl Cannon, M.B.A., Major
Edmund Davis, B.A., Captain
Steven Strang, M.B.A., Captain
Two-Year Program
This program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may also be given for completing three years of high school Junior ROTC, attending a paid ROTC Summer camp, joining the Army Reserve or National Guard (veterans may receive VA benefits concurrently with Advanced Course subscription allowances), completing two years of college-level Air Force or Navy ROTC, completing an ROTC compression course, or previous military service.

Commissioning
Successful completion of the Advanced Course program, one course each in computer literacy, mathematical reasoning, and U.S. foreign policy, and a bachelor's degree leads to a commission as a second lieutenant in the Army Reserve, National Guard, or Active Army. Distinguished graduates may qualify for a commission in the Regular Army.

Lower Division Courses

000. Leadership Laboratory (No credit). Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be currently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in classroom and to develop their confidence as future military leaders. (F)

10. Introduction to Leadership (2 units). Lecture, one hour; discussion, one hour. Introduction to leadership and motivational theory. Topics include nature of organizations, individual behavior, motivation and performance, values and organizational commitment, and influence processes. (W)

12. U.S. Defense Establishment (2 units). Study of the military institution and other elements of national power as instruments of national policy and strategy in conditions of peace and war. (Sp)

14. Principles of Land Navigation Applicable in Maneuver (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning System (GPS). (F)

18. Modern Guerrilla Warfare (2 units). Lecture, one hour; discussion, one hour. Prerequisite: undergraduate standing. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurrections. Topics include nonmilitary responses, military tactics, interrelationship of military and government, psychological warfare, and civic actions. (Sp)

Upper Division Courses

110. U.S. Military History (3 units). (Formerly numbered 22. 23.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Survey of U.S. military history from 1860 to the present. Causes of war, strategy, tactics, and technological developments set against economic, political, and diplomatic concerns. Impact of warfare on society. (F)

112. Psychology of Leadership II (3 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to various individual leadership styles and personalities to assist students in development of their own individual style. Different philosophies of leadership, along with dimensions of leader behavior. Special consideration to counseling, management, and communication techniques that must be mastered to be an effective leader. (Sp)

113. Theory of Learning Applied to Teaching (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Study of instructional processes, lesson content planning procedures, techniques of applied education, role of testing (including evaluation and analysis). Emphasis on improvement through group processes. (F)

123. Military Legal Systems (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to theory and application of military law and legal systems, with emphasis on Uniform Code of Military Justice and rights of the accused under the constitution. (F)

125. Decision Making (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Designed to present students who will become commissioned officers with new insight into modern methods of managerial decision making and into various steps involved in the process. Introduction to various components of leadership and functions of management in order to understand where areas of problem solving and decision making fit into leadership and management. Various steps which comprise the problem analysis and decision-making processes. (Sp)

126. Military Professionalism and Ethics (2 units). Lecture, 30 minutes; discussion, 60 minutes. Prerequisite: consent of instructor. Ethical concepts held by America's military institution. Classification of the military as a profession, special social responsibilities of those in the military, values related to and accepted by military society, and an ethical reasoning/decision-making process and model. (W)

199. Supervised Independent Study (1 to 3 units). Prerequisite: upper division standing, consent of instructor. Supervised independent study and research for undergraduate students who desire to pursue topics of their own selection.
Navy ROTC Scope and Objectives

Navy ROTC at UCLA offers subsidized and non-subsidized programs for college students who wish to serve their country as commissioned officers in the U.S. Navy or Marine Corps. The primary objectives of NROTC are to provide students with understanding of the fundamental concepts and principles of naval science; basic understanding of associated professional knowledge; appreciation of the requirements for national security; and a strong sense of personal integrity, honor, and individual responsibility.

NROTC enables college graduates to use their education in such military fields as marine engineering, nuclear propulsion engineering, aviation, and Marine Corps infantry, aviation, and combat service support roles. It also provides opportunity to develop leadership and management skills in a challenging environment of high responsibility.

The Department of Naval Science offers several programs for which U.S. citizenship is required.

College Program

This is a four-year program open to physically qualified men and women between the ages of 17 and 21. Students receive $100 per month in their junior and senior years and complete one summer training cruise after their third year. After graduation, students are commissioned as Ensign, U.S. Naval Reserve or Second Lieutenant, U.S. Marine Corps Reserve. A three-year active duty obligation is incurred.

Two-Year Program

Applications are accepted from UCLA students as well as incoming junior college transfers. After a six-week summer training period, students enroll in NROTC as juniors. Applicants should contact the department no later than March 1 of their sophomore year.

Freshman-Year Courses

1A. Introduction to Naval Science (1 unit). Introduction to structure of Department of the Navy and its legal framework. Relationships within Department of Defense, components of the Naval Service, shipboard organization, naval customs, courtesies, and terminology.

*Course to be taken by candidates for commissions in the Marine Corps or Marine Corps Reserve in lieu of courses 101A, 101B, 102B, 102C.

20B. Seapower and Maritime Affairs (2 units). Conceptual study of seapower, emphasizing historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, focusing on current abilities of specific nations to use the oceans to attain national objectives.

Sophomore-Year Courses

18. Naval Ship Systems I. Introduction to naval engineering, with emphasis on basic power cycles used in naval propulsion systems, basic thermodynamic principles inherent in ship propulsion, and salt water distillation systems. Detailed examination of ship hull and superstructure design, ship stability, and buoyancy.

20A. Naval Ship Systems II. Study of naval weapon systems, emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problems, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

Junior-Year Courses

101B. Navigation II. Prerequisite: course 101A. Study of rules of the road, shiphandling, and basic concepts of multiple ship formations and maneuvering. In-depth analysis of problems associated with operations on high seas and inland waters applying to civil and U.S. Naval craft.

*103. Evolution of Warfare. Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological developments have had on warfare and influence they continue to exert in age of limited warfare.

Senior-Year Courses

102B. Naval Leadership and Management I. Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer's role as a leader-manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication.

102C. Naval Leadership and Management II (2 units). Prerequisite: course 102B. Current leadership and management in the U.S. Navy. Areas include human resources management, personnel management, material management, and performance and career evaluation.

*104. Expeditionary Military Operations. Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

199. Supervised Independent Studies (1 to 4 units). Prerequisites: upper division standing, consent of instructor. Supervised independent study and research for undergraduate students who desire to pursue topics of their own selection. P/NC or letter grading.

 Scope and Objectives

The Bachelor of Arts degree in Russian Language and Literature is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Within the major, students concentrate either in Russian literature or Russian linguistics. Students typically begin their study of Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirements by combining regular coursework with summer programs or with the University of California Summer Program at Leningrad State University, which is open to students who have completed the equivalent of two years of study (American Council of Teachers of Foreign Languages — ACTFL — level 1). Students interested in this program should consult the undergraduate adviser as early in their program as possible.
The Bachelor of Arts degree in Slavic Languages and Literatures is designed to provide students with basic mastery of two Slavic languages and familiarity with their literatures, as well as general background in the cultural, political, and social history of the Slavic peoples. The program presents a considerable range of options to students with special interests and is especially oriented toward students with strong interest in Czech, Polish, or Serbo-Croatian.

The department also offers a Bachelor of Arts degree in Russian Studies in which students achieve a basic mastery of the Russian language, as well as familiarity with Russian and Soviet literature, history, and culture.

The graduate program provides advanced training in Slavic linguistics and literature leading to the master's degree and the Ph.D. The primary task of the department faculty is to develop and offer programs and the Leningrad semester program), Russian 121, 123, 130A, 140A.

You also must concentrate in either literature or linguistics. For the literature concentration, Russian 118, 119, 120 (all three may be taken in the sophomore year) and two courses from 124A through 124F, 125, 126, 130B, 130C, 134, 140B, 140C, 140D, M150 are required. For the linguistics concentration, Russian 122, Linguistics 100, one course from Linguistics 103, 110, 120A, 120B, and two courses from Slavic 201, 202, Russian 118, 119, 120, 124A through 124F, 125, 126, 130B, 130C, 134, 140B, 140C, 140D, M150, Linguistics 103, 110, 120A, 120B, 127 are required.

Bachelor of Arts in Slavic Languages and Literatures

Preparation for the Major

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), Slavic 99.

The Major

Required: Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1 +); courses 118, 119, 120 (all three may be taken in the sophomore year); one three-course sequence from Czech 102A-102B-102C, 102D-102E-102F, Polish 102A-102B-102C, 102D-102E-102F, Serbo-Croatian 103A-103B-103C, 103D-103E-103F (placement with consent of instructor); three courses from Czech 102D, 102E, 102F, Polish 102D, 102E, 102F, Serbo-Croatian 103D, 103E, 103F, Russian 102A, 102B, 102C, 121, 122, 123, 130A, 130B, 130C, 134, 140A through 140D, M150; two courses from Czech 155A, 155B, Polish 152A, 152B, Serbo-Croatian 154A, 154B, Slavic M125, M126.

Bachelor of Arts in Russian Studies

Preparation for the Major

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), and 99A.

The Major

Required: Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1 +), three courses in Russian literature, two courses from History 131A through 131D, two courses from Economics 182, Geography 184, Political Science 128A, 128B, 156, Russian M170, M180, and five additional courses selected from those listed above, from Russian language, literature, or linguistics courses, or from special courses (approved by the undergraduate adviser) offered by the Departments of Art, Art History, Design, Film and Television, History, Music, Political Science, Slavic Languages and Literatures, and Theater.

Graduate Study

The Department of Slavic Languages and Literatures at UCLA offers M.A. and Ph.D. degrees in Slavic Languages and Literatures.

Admission

In addition to the University minimum requirements, the department requires the equivalent of a UCLA B.A. in Slavic or Russian or three years of Russian language and a sufficient number of Russian history, literature, and linguistics courses so that you do not need more than one year (nine courses) to make up deficiencies. For application to the Ph.D. program, the department requires a UCLA M.A. in Slavic Languages and Literatures or its equivalent. If you do not hold a UCLA M.A. in Slavic Languages and Literatures, you are required to make up deficiencies as stipulated by the graduate adviser and take the M.A. examination as a screening examination within your first year.

All applicants must provide three letters of recommendation from persons capable of judging their academic potential. No departmental admission tests are necessary, but the Graduate Record Examination (GRE) is required.

A department brochure describing the curriculum in some detail (graduate and undergraduate) is available from the Graduate Adviser, Slavic Languages and Literatures, 115 Kinsey Hall, UCLA, Los Angeles, CA 90024-1502.

Major Fields or Subdisciplines

Candidates for the M.A. and Ph.D. degrees select a specialization in either literature or linguistics, with Russian as the principal language and literature. On the Ph.D. level, students may specialize in a language or literature other than Russian by special arrangement.

Master of Arts Degree

Foreign Language Requirement

There are two foreign language requirements which must be completed at least one term before the M.A. comprehensive examination: (1) you must pass a departmental Russian language proficiency examination which tests your ability to translate from Russian to English and vice versa. This examination may be retaken each term until a pass grade is achieved; (2) you must demonstrate ability to read scholarly literature in either French or German by one of three methods: (a) passing the appropriate Educational Testing Service (ETS) reading examination with a score of 500 or better, (b) passing the departmental reading examination, or (c) completing level five at UCLA in one of the languages with a grade of B or better (equivalent university-level coursework in French or German taken within two years of admittance may satisfy this requirement at the discretion of the graduate adviser).
Course Requirements
Slavic 200, 201. Russian 201A-201B-201C, 204, 212A, and 220A are required of all M.A. students.

Literature students must also take Russian 211A or 211B, 212B, 213, and 219.

Linguistics students must also take Slavic 202, 221, Russian 222B, and one course from 211A, 211B, 212B, 213.

Courses in the 500 series may not be applied toward the M.A. course requirements.

Comprehensive Examination Plan
Application for advancement to candidacy must be made no later than the second week of the term in which the M.A. examinations are to be taken and is accepted only if you have satisfied the foreign language requirement in French or German and have passed the Russian Language Proficiency Examination. Examinations are offered at the end of Fall and Spring Quarters. After you have declared your intention to take the examination in a given term, a committee consisting of three members is appointed by the chair. The comprehensive examination has two parts — written (three hours) and oral (two hours) — and is based on coursework and the departmental reading list. The examinations include materials from both subdisciplines. If you receive a pass grade on the written examination, you are admitted to the oral examination which is designed to test the fields of major interest and general background. It is conducted partly in Russian.

Your combined performance in the written and oral examinations is graded high pass, pass, or fail. A grade of high pass or pass is necessary to receive the M.A. degree; the grade of high pass is necessary to enter the Ph.D. program. Examinations may be repeated once; there is a six-month limit on retaking examinations graded pass and a one-year limit on examinations graded fail.

Ph.D. Degree
Admission
You are formally admitted to the Ph.D. program after (1) passing the UCLA M.A. comprehensive examination with a grade of high pass, (2) passing the reading examination in both French and German (see “Foreign Language Requirement”), and (3) demonstrating proficiency in modern Slavic languages other than Russian. Literature students must complete one year of the language of their second Slavic literature; linguistics students must complete one year of one language and two years of another (one of the languages should represent the West Slavic group, the other the South Slavic group). You may demonstrate equivalent proficiency through written and oral examinations in lieu of taking the language courses.

The comprehensive examination serves as a screening examination for admission to the doctoral program if you are entering UCLA with an M.A. from another institution. You may retake the examination once in order to achieve the necessary high pass grade.

Foreign Language Requirement
You must demonstrate ability to read scholarly literature in both French and German by completing one of the three methods listed under the master’s degree. With departmental consent, students specializing in linguistics may substitute reading knowledge in another language important to the study of Slavic linguistics (Finnish, Hungarian, Lithuanian, Latvian, Romanian, or a Turkic language relevant to East or South Slavic historical linguistics) and a score of 450 on the Educational Testing Service (ETS) examination in either French or German. Reading knowledge of two such languages may, by the same procedure, be substituted for the entire French or (more rarely) German examination.

Course Requirements
Before the formation of a doctoral committee, you must have been officially admitted to the doctoral program and have taken the following required courses.

Linguistics students must take Slavic 222, 223, and four other advanced linguistics courses or seminars (numbered above 220). Recommended preparation for linguists includes Linguistics 100, 103, 110, 120A, 120B, M150.

Literature students must take two courses from Slavic 230A-230B-230C; Russian 211A or 211B (to complement the M.A. course selection); and three additional advanced literature courses or seminars.

Candidates specializing in literature are advised to acquire sound general knowledge of modern Western European literature.

Qualifying Paper
You are required to submit to the faculty a qualifying paper that demonstrates your ability to conduct serious and original research. The paper must be received and approved by your faculty adviser (usually the prospective examination and dissertation committee chair) no later than one term preceding the term in which you expect to take the qualifying examinations.

Qualifying Examinations
All students are expected to have sound general knowledge of both Slavic philology and Russian literary history equivalent to that required for the M.A. at UCLA.

Students in linguistics must take one written examination on the structure of modern Russian and another on comparative Slavic linguistics, the history of Russian, and the history and structure of a second Slavic language. Each examination lasts three hours.

Students in literature must take a series of six examinations on Russian literature and one examination on a Slavic literature other than Russian. Each examination is one hour in length; all seven must be taken within a one-week time period.

If you receive a grade of pass on the written examination(s), you are admitted to a two-hour University Oral Qualifying Examination, which is designed to test the fields of major interest and general background, and which typically includes discussion of the dissertation topic.

After considering your overall performance in both the oral and written examinations, the committee assigns a cumulative grade. A pass grade entitles you to write a dissertation in order to receive the Ph.D. degree. At the committee’s discretion, you may be required to retake any or all portions of the Ph.D. examinations within one calendar year after the first attempt.

Within two terms (or one term and a summer) after passing the qualifying examinations, you must prepare a prospectus of the dissertation.

You are required to deliver a formal lecture in the California Slavic Colloquium no later than two calendar years after advancement to candidacy.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
A final oral examination is required except in case of geographically imposed hardship.

Slavic
Lower Division Course
99. Introduction to Slavic Civilization. Lecture, three hours. Introductory survey of social and cultural institutions of the Slavic peoples and their historical background.

M125. Interwar Central European Prose. (Same as German M1 119G and Humanities M125.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns.

M126. Postwar Central European Prose. (Same as German M1 119H and Humanities M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology.

177. Baltic Languages and Cultures (2 units). General survey of peoples speaking Old Russian, Lithuanian, and Latvian; their linguistic, historical, and ethnic affiliations.
Graduate Courses

200. Proseminar. Presentation/discussion, three hours. Prerequisite: graduate standing. Required for M.A. (linguistics, literature). Introduction to research tools and techniques, as well as broad exposure to metalinguistics of linguistics and literary criticism.

Linguistics

201. Introduction to Old Church Slavic. Lecture, three hours. Required for M.A. (linguistics, literature). Introduction to phonology and grammar; readings.

222. Introduction to West Slavic Languages, Lecture, three hours. Prerequisite: course 202. Recommended: Czech 102A-102B-102C or Polish 102A-102B-102C. Required for Ph.D. (linguistics). Introduction to structure and history of West Slavic languages.

223. Introduction to South Slavic Languages, Lecture, three hours. Prerequisite: course 202. Recommended: Serbo-Croatian 103A-103B-103C or Bulgarian 103A-103B-103C. Required for Ph.D. (linguistics). Introduction to structure and history of South Slavic languages.

224. Introduction to Ukrainian and Belorussian, Lecture, three hours. Prerequisite: course 202. Introduction to history and structure of Ukrainian and Belorussian.

229. Introduction to Slavic Bibliography (2 units). (Same as Library and Information Science M229C.) Prerequisite: consent of instructor. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts, survey of languages and translation systems, and acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of scholarly approaches; compilation of bibliographies. S/U grading.

241A-241B. Advanced Old Church Slavic, Lecture, three hours. Prerequisite: course 201. Advanced Readings in Canonical Texts: 241B. East, West, and South Slavic Receptions of Church Slavic.

251. Introduction to Baltic Linguistics, Lecture, three hours. Prerequisite: course 202. Introduction to Baltic linguistics, with special attention to relationship between Baltic and Slavic.

261. Slavic Paleography, Lecture, three hours. Prerequisite: course 201. Introduction to Slavic paleography: inscriptions, birchbark letters, Glagolitic and Cyrillic texts.

262A-262B. West Slavic Linguistics, Lecture, three hours. Prerequisite: course 222. 262A. Czech, 262B. Czechoslovak, Sorbian.

263A-263B. South Slavic Linguistics, Lecture, three hours. Prerequisite: course 223. 263A. Slovene; 263B. Bulgarian, Macedonian.

281. Seminar in Slavic Linguistics, Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

282. Seminar in Structural Analysis, Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

Literature

290. Seminar in Comparative Slavic Literature, Seminar, three hours. Prerequisites: courses 230A-230B-230C. Recommended: reading knowledge of one Slavic language in addition to Russian. Selected topics involving more than one Slavic literature or Slavic and Western literatures. May be repeated for credit with consent of instructor and graduate adviser.

295. Seminar in Literary Analysis, Seminar, three hours. Recommended prerequisite: reading knowledge of one Slavic language in addition to Russian. Selected topics from various Slavic and Western literatures, with emphasis on analytic methods. May be repeated for credit with consent of instructor and graduate adviser.

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship with active guidance of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor and graduate adviser.

597. Preparation for M.A. Comprehensive Examination, For Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of instructor and graduate adviser.

599. Research for Ph.D. Dissertation (2 to 12 units).

Bulgarian

Lower Division Course

99. Introduction to Bulgarian Civilization, Lecture, three hours. Introductory survey of social and cultural institutions of the Bulgarian people and their historical background.

Upper Division Courses

103A-103B-103C. Elementary Bulgarian, Recitation, five hours. Basic courses in the Bulgarian language.

154. Survey of Bulgarian Literature, Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Survey of Bulgarian literature from the Middle Ages to the present.

Czech

Upper Division Courses

102A-102B-102C. Elementary Czech, Recitation, five hours. Basic courses in the Czech language.

102D-102E-102F, Advanced Czech, Recitation, three hours. Prerequisite: course 102C.
Literature and Civilization Courses

25. The Russian Novel in Translation. (Formerly numbered 100.) Lecture, three hours. Designed for non-majors. Study of major works by the great 19th-century Russian novelists.

99A. Introduction to Russian Civilization. (Formerly numbered 99.) Lecture, three hours. Introductory survey of social and cultural institutions of the Russian people and early Soviet antecedents.

118. Survey of Russian Literature to Pushkin. Lecture, three hours. Prerequisite: upper division standing. Slavic majors should take this course during their sophomore year. Lectures and readings in English.

119. Survey of 19th-Century Russian Literature. Lecture, three hours. Prerequisite: upper division standing. Slavic majors should take this course during their sophomore year. Lectures and readings in English.

120. Survey of 20th-Century Russian Literature. Lecture, three hours. Prerequisite: upper division standing. Slavic majors should take this course during their sophomore year. Lectures and readings in English.

125. The Russian Novel in its European Setting. Lecture, three hours. Prerequisite: upper division standing. Slavic majors should take this course during their sophomore year. Lectures and readings in English.

126. Survey of Russian Drama. Lecture, three hours. Prerequisite: upper division standing. Major Russian plays from the 18th to 20th century. Lectures and readings in English.

127. Women in Russian Literature. Lecture, three hours. Prerequisite: upper division standing. Introduction to "alternative tradition" of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers. Lectures and readings in English.

130A-130B-130C. Russian Poetry. Lecture, three hours. Prerequisite: course 124B or consent of instructor.

130A. Introduction to Analysis of Poetic Texts. Lecture, three hours. Lectures and readings in Russian. 130A, 130B, and 130C are repeated for credit.

130B. From Mid-18th Century through Precursors of Symbolism; 130C. From Late-19th Century through Contemporary Soviet Verse.

140A. Introduction to Analysis of Prose Texts; 140B. Karamzin to Turgenev. (Formerly numbered 140A.) 140C. Dostoevsky and the historical background (Formerly numbered 140B.); 140D. Soviet and Emigre Writers. (Formerly numbered 140C.)

150. Russian Folk Literature. (Same as Folklore M150.) Lecture, three hours. Lectures and readings in Russian.

1510. Russian Folklore. (Same as Folklore M1510.) Lecture, three hours. General introduction to Russian folklore, including survey of genres and related folkloric phenomena. Lectures and readings in English.

1515. Russian Art. (Formerly numbered 151.) (Same as Art History M151.) Lecture, three hours. Recommended prerequisites: Art History 51, 54, 57. Knowledge of Russian not required. Survey of art and architecture of Russia from its beginning to the present day. Emphasis on development of Russian art in its religious, social, and political context.

193. Seminar in Russian Literature. Lecture, three hours. Prerequisite: course 6 or consent of instructor. Recommended: course 101C. Reading and discussions of selected authors; written seminar papers usually required.

Graduate Courses

140A-140B. Introduction to Analysis of Russian Texts. Lecture, three hours. Prerequisite: course 102C or consent of instructor. Required for M.A. (linguistics, literature). Introduction to literary and linguistic approaches to literary texts. Reading, translation, exercises, analysis, composition. Conducted in Russian.

203. Practicum in Russian. Lecture, three hours. Prerequisite: course 101C. Two terms per year required of Ph.D. students. Reading of advanced texts; advanced composition and conversation; stylistics. May be repeated for credit. S/U grading.

210. Readings in Old Russian Texts. Lecture, three hours. Prerequisite: Slavic 201 or consent of instructor. Readings in premodern Russian texts. May be repeated for credit.

241. Topics in Russian Phonology. Lecture, three hours. Prerequisite: course 220A. Selected topics in Russian phonology.

242. Topics in Russian Morphology. Lecture, three hours. Prerequisite: course 220A. Selected topics in Russian inflection and derivation.

243. Topics in Historical Russian Grammar. Lecture, three hours. Prerequisite: course 123, Slavic 221. Selected topics in Russian historical phonology, morphology, and syntax.

263. Russian Dialectology. Lecture, three hours. Prerequisite: Slavic 221. Phonology and grammar of modern Great Russian dialects.

264. History of the Russian Literary Language. Lecture, three hours. Prerequisites: course 204, Slavic 201. Evolution of literary Russian from the 11th to 20th century. Lectures and analysis of texts.

265. Advanced Russian Syntax. Lecture, three hours. Prerequisite: course 220B. Traditional and generative approaches to Russian syntax.

266. Russian Lexicology. Lecture, three hours. Examination of formal and semantic structure of Russian lexicon.

Literature and Civilization

211A-211B. Russian Literature before 1800. Lecture, three hours. Required for M.A. (literature). 211A. Old Russian Literature. (Formerly numbered 251A.) Survey of Old Russian literature from the beginning through the Kievan and Muscovite periods up to the 17th century. 211B. 18th-Century Russian Literature. (Formerly numbered 211B.) Lectures and readings in major and secondary writers. Analysis of selected literary works.

212A-212B. 19th-Century Russian Literature. (Formerly numbered 212.) Lecture, three hours.

212B. Age of Realism. Required for M.A. (literature). Survey devoted to emergence of critical and psychological realism, beginning with early works of Turgeney, Goncharov, and Dostoevsky, moving to major novels of Tolstoy, Dostoevsky, and Saltykov-Shchedrin, and concluding with works of the pre-symbolist period, especially the short stories of Chekhov.

214. Contemporary Russian Literature. Discussion, three hours. Prerequisite: course 213. Close readings in selected texts of poetry and prose, metropolitan and emigre, of recent vintage. May be repeated for credit. S/U or letter grading.

227. Linguistic Approaches to Russian Poetry. Lecture, three hours. Prerequisite: graduate standing. Introduction to use of linguistic methods in study of Russian poetic texts.

251. Topics in Old Russian Literature. (Formerly numbered 251B.) Lecture, three hours. Prerequisite: course 211A. Detailed discussion of particular writers, periods, or genres.

270. Russian Poetics. Lecture, three hours. Prerequisite: course 211A or consent of instructor. Introduction to technical study of Russian poetic and versification, with attention to metrics, stanza forms, rhyme, and development of various verse types from the 11th through the 18th centuries.

290. Seminar in Russian Prose. Seminar, three hours. Prerequisites: courses 130A-130B-130C. Recommended: course 270. Detailed study of a single author, period, or work. May be repeated for credit with consent of instructor and graduate adviser.

291A. Seminar in Old Russian Literature. Seminar, three hours. Prerequisite: course 211A. Selected topics from the 11th through the 17th century. May be repeated for credit with consent of instructor and graduate adviser.

291B. Seminar in 18th-Century Russian Literature. Seminar, three hours. Prerequisite: course 211B. Selected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

292. Seminar in 19th-Century Russian Literature. Seminar, three hours. Prerequisites: courses 212A-212B. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

293. Seminar in 20th-Century Russian Literature. Seminar, three hours. Prerequisites: courses 212A-212B. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.
294. Seminar in Russian Literary Criticism. Seminar, three hours. Prerequisites: courses 211B, 212A-212B, 213. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate advisor.

296. Seminar in History of Russian Culture. Discussion, three hours. Reading and discussion on selected topics in history of Russian culture.

Serbo-Croatian

Upper Division Courses

103A-103B-103C. Elementary Serbo-Croatian. Recitation, five hours. Basic courses in the Serbo-Croatian language.

103D-103E-103F. Advanced Serbo-Croatian. Recitation, three hours. Prerequisite: course 103C.

113A-113B-113C. Advanced Reading and Composition. Recitation, three hours. Prerequisite: course 103F or consent of instructor. Reading and translation of difficult texts; advanced composition.

154A-154B. Yugoslav Literature. Lecture, three hours. Lectures and readings in English. Survey of Yugoslav literature from the Middle Ages to the Present; 154B. Selected Topics.

Slovak

Graduate Course

222. Structure of Slovak. Lecture, three hours. Prerequisite: Slavic 202. Recommended: Slavic 222. Introduction to phonological and morphological structure of the Slovak language, especially as contrasted with Czech.

Ukrainian

Upper Division Courses

152. Ukrainian Literature. Lecture, three hours. Survey of structure and development of the Romanic language, with special emphasis on relationship of Romanian to other members of the Romance group.

Related Courses in Other Departments

Dance 74B, 1184B. Economics 182; Ethnomusicology and Systematic Musicology 101C, 128, 130; Geography 114; History 115A-115D, Linguistics 100, 103, 110, 120A, 120B, M150, as well as several of the graduate courses in linguistics; Political Science 128A-128B, 156, 157.

Carol Tavis, Ph.D. (Psychology)

Social Sciences Cluster Program

The Social Sciences Cluster Program presents integrated clusters of three social sciences courses with an interdisciplinary seminar. This coordinated four-course program offers students opportunity to complete their social sciences general education requirements (both historical and social analysis) in a single term. Each cluster revolves around a particular theme. Social sciences clusters for 1990-91 include the following:

The courses are taught by faculty members who are distinguished in teaching and scholarship. In addition, graduate students selected for their intellectual sophistication and teaching ability are the instructors for the Social Sciences 88 seminars.

The strengths of the course clusters are social, intellectual, educational, and practical. They create a unique experience at UCLA — 240 students taking the same classes for an entire term.

The current climate of reform for undergraduate education at UCLA has been enhanced by several initiatives undertaken both nationally and by the University of California. These efforts share the common theme that learning should be an active process, particularly in introductory general education courses. At large universities this is more easily stated than acted on. To meet this challenge, UCLA has received funding from the Ford Foundation and the College of Letters and Science to integrate general education courses in the social sciences.
Lower Division Courses

There is no major in social sciences; however, the following courses are offered for interested students.

20. Racial Minorities in the U.S. (Formerly numbered Afro-American Studies M20, American Indian Studies M20, Asian American Studies M20, Chicano Studies M20.) Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and culture of Afro-Americans, Asian Americans, Chicanos, and Native Americans in the U.S. Topics include origins and maintenance of inequality, ethnic images in literature and art, psychosocial dimensions of racism, social movements, and minorities in California.

30. Law and Society (3 units). Introduction to nature of legal institutions, processes, and norms.

88. Introduction to Social Sciences (3 units). Discussion, two hours. Introduction to methods, concepts, and practices of social scientific scholarship.

Jack Mearns, Ph.D.
Lynn Mulkey, Ph.D.

Scope and Objectives

Variety is the special characteristic both of the field of sociology and of the UCLA Department of Sociology, which was judged among the 10 best in the nation in a recent survey conducted by the Conference Board of the Associated Research Councils.

Sociology will have a particular appeal to those students whose interests are broad and unspecialized. At both undergraduate and graduate levels, students study history, politics, statistics and mathematics, race relations, demography, psychology, language, and many other topics. A sociology student becomes a member of an intellectual community in which all these interests are represented.

The primary purpose of the major in sociology is to enhance the student's capacity for critical analysis and understanding of social phenomena. It is intended, at the same time, to serve as preparation for careers in high school or junior college teaching, social work, architecture and urban planning, law, public health, and government service, among others. It also provides training for advanced graduate work in sociology and social psychology.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

Bachelor of Arts Degree

Preparation for the Major

Required: Sociology 1, 18 (or Statistics 50, Psychology 41, Economics 40, or Biostatistics 100A), one course from Group A (Mathematics 2, 3A), one course from Group B (Philosophy 8, 9, 31), one course from Group C (Anthropology 8, 9, Economics 1, 2, Geography 3, History 1A, 1B, 1C, Political Science 1, Psychology 10).

Sociology 2, 3, 4, 9 may be substituted for the Group B and/or Group C preparation requirements.

All courses required for the major in sociology, including lower division and allied field courses, must be taken for a letter grade. A 2.0 grade-point average is required for the preparation and for the major.

The Major

Required: Ten upper division sociology courses (40 units), which must include the following:

(1) Sociology 101 or 102, and 104. These courses, devoted to the systematic exploration of sociological methods and theories, should be completed as early as possible in your junior year.

(2) Four upper division courses as required by one of the specialized "Concentrations for the Major" listed below.

(3) Any four additional upper division sociology courses.

(4) Four upper division allied field courses (16 units) in other departments to complete the major. The allied fields are anthropology, economics, geography, history, political science, and psychology.

(5) English 100W (may be taken on a P/NP grading basis).

Concentrations for the Major

By the end of your junior year and no later than the beginning of your senior year, you are required to declare your specific concentration by filing a statement with the undergraduate counselor. The purpose of the concentration requirement is to expose you to systematic, in-depth work within a specific area of sociology. Completion of a concentration requires four upper division sociology courses. You must take a concentration's required course (if any) before declaring that concentration. You must select one of the following concentrations and meet its course requirements:
(1) **Comparative Studies of Nations and Societies**
   - Required: 183* or 184*
   - Two of the following: 116, 157, 158, 173, 182, 184*
   - One of the following: 183*, 185, 186, 187, 188, 189

(2) **Organizations and Work**
   - Required: 168* or 171*
   - Three of the following: 135, 147, 149, 157, 168*, 169, 170, 171*, 173, 182, 184

(3) **Political Sociology**
   - Required: 182
   - Three of the following: 103, 133, 147, 156, M175, 184, 185

(4) **Stratification, Race, and Ethnicity**
   - Required: 156* or 157*
   - Three of the following: 103, 112, 118, 134, 156*, 157*, 158, 159, 160, 171, 182, 184, 185, 189

(5) **Social Psychology**
   - Required: 132
   - Three of the following: 133, 134, 135, 136, 137, 160, M176

(6) **Ordinary and Deviant Interaction**
   - Four of the following: 106, C124A, C124B, 125, 126, 127, 145, 146, 147, 148, 149, 150, 160, 170

(7) **Quantitative Methods and Demography**
   - One of the following: 112, 113, 116
   - Three of the following: 105, 117, 118, 157, 187

Only eight units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

Courses 104, 210A, and 210B are recommended for students who intend to pursue graduate work in sociology.

**Specialization in Computing**

Majors in sociology may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, (3) completing two courses from Sociology 9, 112, 113. You graduate with a bachelor's degree in sociology and a specialization in computing.

**Honors Program**

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member.

The project culminates with an honors thesis or paper. Students intending to obtain advanced degrees will find this program especially useful. If you are selected, you enroll in Sociology 199HA-199HB-199HC in your senior year. These courses may be applied toward the 10 upper division courses required of all sociology majors. After completing the program, you graduate either with departmental honors or highest honors.

**Qualifications** — You must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available in the Undergraduate Counselor's Office, 254A Haines Hall. You should apply in the last term of your junior year.

**M.A. and Ph.D. Degrees**

The graduate program of the department takes as its primary aim the training of scholars who will conduct original research contributing to the advancement of sociological knowledge. For this reason, the department ordinarily accepts only students who are seeking the Ph.D. degree. A master's degree may be earned as part of the process of completing the requirements for the Ph.D.

**Admission**

In addition to the minimum University requirements, the department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with your written work and research experiences, (2) transcripts from all colleges where you have studied, (3) a statement of purpose, outlining reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these, (4) copies of one or two term papers or research reports you have written, (5) an official statement of scores on the Graduate Record Examination (GRE), and (6) for applicants whose native language is not English, the Test of English as a Foreign Language (TOEFL).

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the department.

In addition to relatively formal criteria (such as analytic proficiency and artfulness), the department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women and minorities are therefore encouraged to apply. The deadline for receipt of applications is January 15. Application forms and more detailed information are available from the Graduate Affairs Assistant, Department of Sociology, 254C Haines Hall, UCLA, Los Angeles, CA 90024-1551.

**Major Fields or Subdisciplines**

In the first two years you usually satisfy the course requirements for the M.A. degree and write a master's paper that is evaluated by the department in your sixth term of residence. During the first year of graduate study, and no later than the first term of the second year, you are expected to form a two-person master's committee to help you prepare the master's paper.

In the term following acceptance of your master's paper, usually at the beginning of the third year, you must affiliate with one of the department's five area programs in order to pursue more specialized, advanced study and research toward the Ph.D. The area programs represent the special strengths of the department in research and graduate instruction:

1. **Communities and Institutions** — Studies in community organization and local and institutional processes of deviance and social control, particularly as they are affected by race, ethnicity, gender, and class; social networks; ethnic conflict and cooperation; organization of immigrant and minority communities; gender relations; social organization of work and occupations; institutional processes in criminal justice and medical settings.

2. **Ethnomethodological, Phenomenological, and Observational Sociologies** — Studies of work especially in the sciences and professions, sociology of knowledge, sociology of law, deviance, social control, conversational and other forms of ordinary interaction, and historical studies of everyday interaction and consciousness.

3. **Macrosoiology** — Political sociology, economy and society, historical and comparative sociology, macrosociological theory, and comparative stratification.

4. **Quantitative Sociology** — Survey research methods, methods of applied and evaluation research, formal and social demography, social stratification, advanced social statistics, and mathematical sociology.

5. **Social Psychology** — Attitudes and social structure, collective behavior, socialization, social interaction and small group behavior, and organizational social psychology.

**Foreign Language Requirement**

There is no foreign language requirement for either the master's degree or the Ph.D. Students affiliated with the macrosociology area program are required to demonstrate reading knowledge of sociological texts in any foreign language.

**Course Requirements**

In addition to the departmental requirements, area programs and some subareas have their own course requirements for affiliated students.
Advanced Social Statistics Specialty — Sociology 216A-216B, 219A-219B, and electives selected from a list of eight recommended courses. Applied Sociology and Evaluation Research Specialty — Sociology 216A-216B, 219A-219B, 279, 280, and electives selected from a list of 14 recommended courses. Demography Specialty — Sociology 213A-213B, 226A-226B, courses in calculus and matrices, and two electives selected from a list of 11 recommended courses. Mathematical Sociology Specialty — Sociology 281, 596, preparation in calculus, matrices, and differential equations, two or more substantive sociology courses relevant to the areas in which mathematical modeling will be carried out, and electives selected from a list of seven recommended courses. Quantitative Social Stratification Specialty — Sociology 216A-216B, 239A-239B, 263, and two electives selected from a list of recommended courses. (5) Social Psychology — Completion of an undergraduate program equivalent to two of the department’s basic undergraduate social psychology courses and at least two courses in psychology, selected from the fields of learning, language and communication, personality, social psychology, and abnormal psychology; Sociology 224A-224B, 289A-289B-289C; a second methods sequence, in addition to the one required for the M.A., selected from courses 215A-215B, 216A-216B, or 217A-217B. Courses in the 500 series (596, 597, 599) are normally taken in preparation for the master's paper review, the field examinations, and for dissertation research. They may not be applied toward the course requirements for the degree.

Master’s Paper Review
By the end of your second year of study, you must submit an acceptable master's paper for approval by the general faculty. The paper must demonstrate a general competence in sociological theory, methodology, and selected substantive areas and in intellectual attainment. The paper should demonstrate that you (1) have an accurate grasp of the intellectual traditions of sociology, (2) can bring evidence to bear on theoretical problems, (3) can describe how some aspect of the social order works, and (4) can adequately handle research and methodological issues. The main concern is with your capacity to do doctoral-level work. After review of the paper, any of the following options may be recommended:

(1) The paper is passed. You are granted the M.A. and permitted to proceed to the Ph.D.
(2) The paper is passed conditionally. You are granted the M.A. and permitted to proceed to the Ph.D. after completion of specified revisions of the paper.
(3) You are granted a terminal M.A.
(4) The paper is not acceptable (you may resubmit at a later time or may be asked to withdraw).

Field and Qualifying Examinations
The department requires you to pass two field examinations before taking the University Oral Qualifying Examination for the Ph.D. The emphasis is on mastery and depth of understanding in two areas of specialized study. Field examinations are administered and evaluated under guidelines established by area programs. You may take both or just one of your field examinations in the area with which you are affiliated. Each area program also has procedures enabling unaffiliated students to take field examinations in that area. Details are available from area directors and from the graduate affairs assistant.

If your performance on the field examination is satisfactory, you may nominate a doctoral committee and take the University Oral Qualifying Examination. You must prepare a two-page abstract of the dissertation proposal for distribution to the entire departmental faculty no later than one week before the examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The optional final oral examination for the Ph.D. degree is given by the doctoral committee no later than six months after the completion of the dissertation. A decision to waive the final examination is optional on the part of the Ph.D. committee.

Lower Division Courses
1. Introductory Sociology. Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation.
2. Changing Society and Making History. Lecture, three hours: discussion, one hour. Leading question is how do politics, economics, and culture interact in creating society? Policies are provided by introductory level of study of contending substantive theories and contrasting methods of inquiry contained both in classic and exemplary contemporary works.

Mr. Chapple, Mr. Metheny, Mr. Siegel

3. Sociology of Everyday Life. Lecture, three hours: discussion, one hour. Examination of ways in which taken-for-granted aspects of everyday life and relationships are shaped by interactional, cultural, and historical institutions. Whether failed for Answers to critically observe tacit practices through which everyday life is constructed.

Mr. Emerson, Mr. Katz, Mr. Pollner

4. Jobs and Careers: Sociological Approach. Lecture, three hours: laboratory, three hours. Impact of technological change from computers and computing on people, jobs, business firms, industries, and educational and legal institutions. We are interested in the understanding that course also provides information on selected aspects of contemporary computers and history of computing. In addition to reading assignments and lectures, course involves direct experience in a computing laboratory.

Mr. McFarland

18. Interpretation of Quantitative Data. Prerequisite or corequisite: course 1. Satisfies statistics requirement for sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability: binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of American Sociological Review or leading social science journals.

31. Dilemmas of Third World Development. Lecture, three hours; discussion, one hour. Introduction to understanding dilemmas of Third World social development and prospects for progress in the future.

Mr. López, Mr. Zettlin

88A-88Z. Lower Division Seminars. Lecture, three hours. Limited to 15 freshmen and sophomores. Variable topics of current sociological interest. Consult Schedule of Classes or "Department Announcements" for topics and instructors.

Upper Division Courses

101. Development of Sociological Theory. (Formerly numbered 112) Comparative survey of basic concepts and theories in sociology from 1850 to 1960; classification of analytical schemes; critical analysis of trends in theory construction.

Mr. Horton, Mr. López, Mr. Mann

102. Contemporary Sociological Theory. (Formerly numbered 113) Critical examination of significant theoretical formulations from 1920 to the present; analysis of relation between theoretical development and current research emphasis.

Mr. Champagne, Mr. Mann, Mr. Szeneyi

103. Marxist Sociology. (Formerly numbered 114) Fundamentals of Marxist theory and method and their historical development. Attention to continuing debates within Marxism and to differences between Marxism and other schools of sociology. May not be applied toward theory requirement for the major.

Mr. Horton

104. Introduction to Sociological Research Methods. (Formerly numbered 109) Systematic treatment and quantitative research methods to use in sociological research (e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case materials). Fieldwork may be required.

Mr. Bailey, Mr. Freeman, Mr. TenHouten

105. Research Methods in Policy Analysis and Evaluation. (Formerly numbered 110.) Prerequisite: course 104 or consent of instructor. Recommended: course 104. Approaches for identifying and analyzing social problems and for assessment of policies and interventions for their control and management.

Mr. Freeman, Ms. Zucker

106. Field Research Methods (6 units). (Formerly numbered 117.) Lecture, two hours; discussion, two hours; fieldwork, 12 hours. Prerequisites: upper division standing, consent of instructor. Fieldwork and extensive field notes required. Theory and practice of field research, with particular emphasis on interactions between fieldwork role and substantive findings.

Mr. Emerson

112. Introduction to Mathematical Sociology. (Formerly numbered 116.) Prerequisites: course 18. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organization of society, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics).

Mr. Bailey, Ms. Oppenheimer

113. Statistical Analysis of Field Research. (Formerly numbered 118.) Lecture, three hours; laboratory, one hour. Prerequisite: course 18. Continuation of course 18, covering more advanced statistical techniques such as multiple regression, analysis of variance, or factor analysis. Content varies.

Students learn how to use the computer and write papers analyzing prepared data sets.

Mr. Bonacich, Mr. Lopez, Mr. Yamaguchi

Mr. Bonacich, Mr. TenHouten

117. Sociology of Family Demographic and Economic Behavior. (Formerly numbered 127.) Examination of demographic behavior associated with social organization of the family and its relationship to social system of economic system. European and American historical studies of family's economic and demographic characteristics and behavior in first half of course; U.S. experience since the 1930s in second half. Ms. Oppenheimer

118. Demography and Sociology of Women's Economic Roles. (Formerly numbered 160.) Prerequisites: courses 1 and 18 or Statistics 50 or Psychology 41 or Economics 40 or Biostatistics 100A, or consent of instructor. Sociological analysis of factors affecting women's economic roles in world of work and the family. Topics include demographic determinants of women's socioeconomic roles, women's changing place in the occupational structure, men's and women's contribution to socioeconomic status of the family, socioeconomic position of women without men to support them, future trends, and social policy affecting women's status.

C124A. Conversational Structures I. (Formerly numbered C144A.) Lecture, three hours. Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansion. May be concurrently scheduled with course C244A.

Mr. Schegloff

C124B. Conversational Structures II. (Formerly numbered C144B.) Lecture, three hours. Prerequisites: course C124A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations. May be concurrently scheduled with course C244B.

Mr. Schegloff

125. Normal Environments. (Formerly numbered 148.) Structural interpretation of concerted production, management, and alteration of perceived normal interpersonal environments. Fieldwork required.

Mr. Heritage, Mr. Pollner

126. Study of Norms. (Formerly numbered 149) Properties of norms, of normatively governed conduct, of lay and professional methods for describing, producing, using, and valuating norms in contrasting settings of socially organized activities; relevance of these properties for programmatic problems of analytic sociology. Fieldwork required.

Mr. Heritage, Mr. Pollner

127. Sociology of Knowledge. (Formerly numbered 159.) Prerequisite: course 1 or equivalent. Study of social production of modes of thought and forms of knowledge. Study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in every day, organizational, and extraorganizational contexts.

Mr. Pollner, Mr. TenHouten

128. Sociology of Emotions. Lecture, three hours; discussion, one hour. Prerequisites: course 1 and junior standing, or consent of instructor. Sociological theories and explanations of social conditions shaping and producing emotional experiences; effects of individual expression of emotions on social conditions; relations between thought, sensations, and the emotions; the self and emotions; social construction of emotions.

Mr. Katz, Mr. Rabow, Mr. TenHouten

132. Social Psychology. Sociological Approaches. (Formerly numbered 154.) Survey of contribution of sociologists to theory and research in social psychology, including theories of social control; conformity and deviance; reference groups; and interaction process.

Mr. Bonacich, Ms. Ortiz, Mr. Rabow

133. Collective Behavior. (Formerly numbered 150.) Prerequisites: courses 1, 15, or equivalent, upper division standing. Characteristics of crowds, mobs, publics, social movements; their relation to social unrest and their role in developing and changing social organizations and social controls.

Mr. Cooper

134. Culture and Personality. (Formerly numbered 151.) Prerequisites: courses 1, 15, or equivalent, upper division standing. Theory of relation of variations in personality to culture and group life, in primitive and modern societies, and influence of social role on personality. Ms. Allen

135. Group Processes. (Formerly numbered 152.) Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from a variety of theoretical viewpoints; implications of various research techniques and their applications.

Mr. Bonacich, Ms. Zucker

136. Process and Socialization in the Family. (Formerly numbered 153.) Prerequisites: courses 1, 18, or equivalent, upper division standing. Examination of processes of interaction, decision making, role formation, differentiation, conflict, integration, and socialization within the family and their interrelations with society.

Mr. Allen

137. Psychoanalytic Sociology. (Formerly numbered 155.) Prerequisites: courses 1, 18, or equivalent, upper division standing. Emphasis on the theoretical aspect to perspective to selected substantive areas and social processes, including but not limited to the dynamics of group development, delinquency, deviance, socialization, identity and self formation, role taking and role making.

Mr. Rabow
157. Social Stratification. (Formerly numbered 123.) Analysis of American social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, typology, size distribution, social mobility, consequences of stratification and problems of methodology. Mr. McFarland, Mr. Yamaguchi

158. Urban Sociology. (Formerly numbered 125.) Lecture, three hours. Description and analysis of urbanization and urbanism in the U.S. and the world.

Mr. Halle, Mr. Light, Mr. Oliver

159. Comparative Studies of Jewish Communities in the U.S. and Abroad. (Formerly numbered 137.) History, distribution, structure, and functions of major Jewish communities, with particular emphasis on North America and Israel. Mr. Shneidman

160. Interpersonal Conflict and Prejudice. (Formerly numbered 155.) Study of causes and consequences of group conflict, with emphasis on majority-minority relations in modern institutions: social movement and social psychological theories of prejudice; effects of minority status on the individual; and possibilities for attitude and behavior change. Mr. Liver

161. Comparative American Indian Societies. (Formerly numbered 135.) Lecture, three hours. Prerequisite: course 1. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Mr. Levine

162. Sex Roles and Society. (Formerly numbered M102A.) [Same as Women's Studies M162.] Lecture, three hours; discussion, one hour. Prerequisite: course 1 or Women's Studies 10 or consent of instructor. Exploration of cultural definitions of sex roles, functions of sex roles in society from a critical perspective. Topics include socialization and gender roles, contemporary sex roles, strain, and challenge to traditional notions of sex roles posed by feminist critique.

Mr. Champagne

163. Gender and Work. (Formerly numbered 163.) (Same as Women's Studies M164.) Lecture, three hours; discussion, one hour. Prerequisite: course 1 or Women's Studies 10 or consent of instructor. Exploration of relationships of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality.

Mr. Milkman

164. Organizations and Society. (Formerly numbered 121.) Sociological analysis of organizations and their social environment. Introduction to basic theoretical concepts, methods, and research on behavior of organizations in society.

Mr. Alvarez, Mr. Grusky

165. Political Sociology. (Formerly numbered 140.) Study of political aspects of social systems, including analysis of political aspects of social systems, including political impact of court decisions; legalization of social behaviors; contemporary social and political organizations; including political parties.

Mr. Alexander

166. Latin American Societies. (Formerly numbered 136.) Analysis of major institutions in the U.S. in historical and international perspective, with emphasis on topics such as industrialization, war, the state, politics, protection of minority participation, legal and illegal forms, public and private auspices.

Mr. López, Mr. Zeitz

167. Entrepreneurship. (Formerly numbered 165.) Lecture, three hours; discussion, one hour. Prerequisite: course 1. Description and analysis of entrepreneurship, including development, organization, and sources of social systems. Mr. Salvador, Mr. Ryan
Graduate Courses

201A. Japanese Society. (Formerly numbered 139.) Lecture, two and one-half hours; discussion, two hours. Prerequisites: consent of instructor. Analysis of social-structural characteristics and functioning of contemporary Japanese society, with focus on (1) forms of social interaction and social structure, (2) work, family, and the life course, and (3) education and opportunity. Emphasis on structural perspectives, with special emphasis on cultural perspectives. Mr. Yamaguchi

201B. Contemporary Socialist Societies. Lecture, three hours. Prerequisite: senior or junior standing. History of the socialist idea. Introduction to sociological literature on the socialist societies and socialist structure of actually existing socialist societies. Focus on the East European experience, with comparative outlook at other socialist experiments, particularly Soviet and Chinese communism. Mr. Zelény

195A-195Z. Special Topics in Sociology. (Formerly numbered 102A-102Z.) Prerequisite: upper division standing (some sections may require prior course-work or consent of instructor). Study of selected current topics of sociological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit and may be applied as elective units toward sociology major.

197. Undergraduate Seminar. Prerequisites: upper division standing, major in sociology, consent of instructor, and graduate standing. Bonitative research in sociology. Lectures, three hours; discussion, two hours. Prerequisites: upper division standing, 3.0 GPA in major, courses 1 and 18 or equivalent, consent of instructor and department chair. Course of independent study designed for graduate or undergraduate students who (1) desire a more advanced or specialized treatment of an area covered in regular course list and who present that course as a prerequisite or (2) desire work in an area of sociological analysis not covered by an upper division course. Only eight units are allowed. See undergraduate counselor for course contract.

199HA-199HB-199HC. Special Study for Honors. Prerequisite: honors program standing:

199HA. Design of research project to serve as student's honors thesis. Research proposal, detailed bibliography, and regular meetings with sponsoring faculty member required.

199HB. Continuation of work initiated in course 199HA. Series of progress reports are prepared in consultation with instructor.

199HC. Completion of written report or honors thesis.

204A-204B. Introduction to Practice of Social Research. Lecture, two hours. Required of first-year sociology graduate students. Introduction to practice of social research. In Progress grading. Mr. K. Berk

209A-209B. Data Analysis for Social Scientists. Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for graduate students in social sciences. In Progress grading. Mr. Berk

209C. Mathematics for Social Scientists. Lecture, three hours; computer exercises. Prerequisites: graduate standing, consent of instructor. Discussion of elementary mathematical techniques needed for more advanced statistics courses in various social sciences, psychology, and education. Calculus of sets, sets of numbers, sequences of numbers, notion of a function, polynomials, differentiation, elementary matrices, and vectors.

210A-210B. Intermediate Statistical Methods I, II. Lecture, three hours; discussion, two hours. Prerequisite: course 18 or equivalent. Required for M.A. degree by four area programs. Intermediate statistical methods using computers: probability theory, sampling distributions, hypothesis testing, interval estimation, multiple regression and correlation, experimental design, analysis of variance and covariance, contingency tables, sampling theory. In Progress grading.

210C-210D. Advanced Statistical Methods I, II. Lecture, three hours; discussion, two hours. Prerequisites: courses 210A-210B or equivalent or consent of instructor. Bonitative methods: theoretical paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. In Progress grading (credit to be given only on completion of both courses).

211A-211B. Comparative and Historical Methods: 211A. Strategies of Research and Conceptualization. Prerequisite: consent of instructor. Topics include relationship of theory and fact to social sciences, logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. In Progress grading (credit to be given only on completion of both courses).

211B. Research Techniques. Prerequisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript census, content analysis, collective biography, and secondary analysis.

212A-212B. Marxist Methodology. Prerequisite: course 101 or consent of instructor. Practice in dialectical method of attaining scientific knowledge about society as a process and mode of production. Critical examination of methodological issues and techniques of practical field research.

213A-213B. Techniques of Demographic and Ecological Analysis. Prerequisite: course 210A or equivalent. Procedures and techniques for collection, evaluation, and analysis of demographic and ecological data; models of population and ecological structure and change; applications to study of social structure and social change.

214A-214B. Naturalistic Methods for Recorded Data. Prerequisite: courses 214A-214B or consent of instructor. Special features of audio and video recordings as sources of data; problems of description and analysis, and problems posed by audio and video data; analysis of single cases and analytically defined collections; use of computer to organize research with recorded data. Mr. Horton

214B. Social Participation. Prerequisite: course 214A or equivalent. Lecture, one hour; laboratory, two hours. Analysis of social data; development and use of a computer program for social data analysis, with special emphasis on ethnographic research. Mr. Schegloff

215A-215B. Experimental Sociology. Prerequisites: course 210A or equivalent, consent of instructor. Basic fundamentals of experimental method, particularly as it is used in social psychology. In Progress grading.

216A-216B. Survey Research Methods. Course in methodology and techniques: formulation of research problem; study design; hypotheses; sampling; measurement; questionnaire design; schedule construction and interviewing; data collection; processing and tabulation; analysis and interpretation; presentation of findings; cross-national, replicative, panel, and other complex survey designs. Consent of instructor required to participate in survey research project. In Progress grading.

220C. Ethnomethodological Fieldwork. Prerequisite: consent of instructor. Examination of techniques used in ethnmethodological research, practice in critical evaluation of research, and directed experience in conduct of an extended investigation employing ethnmethodological procedures. In Progress grading.

221A-221B. Advanced Statistical Methods I, II. Lecture, three hours; discussion, two hours. Prerequisites: courses 210A-210B or equivalent or consent of instructor. Bonitative methods: theoretical paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. In Progress grading (credit to be given only on completion of both courses).

222. Foundations of Ethnomethodological, Phenomenological, and Analytic Sociologies. Lecture, three hours; discussion, one hour. Prerequisites: courses 210A-210B or equivalent or consent of instructor. Examination of various approaches to basic micro- and macro-ecology, including classical and neoclassical sociology, social system and social structure, sociology, culture, city-size distributions, effects of population density on animals and humans, proxemics, loneliness, and effects of physical environment on humans.

224A-224B. Problems in Social Psychology. Prerequisites: course 210A, consent of instructor. Basic course for graduate students intending to specialize in social psychology. 224A. Major theoretical contributions to the field. 224B. Current work being done in department in several subfields.
225A. Demographic Perspectives on Relationship of Family and Economic Systems. Prerequisites: courses 210A, 210B, or consent of instructor. Examination of interrelationship of family and economic systems in societies at different levels of economic development, focusing particularly on the U.S. experience. Central to course: (1) analysis of how demographic factors affect economic and family systems; (2) how these systems, and changes in them, affect demographic variables; and (3) how this two-way process influences relationship of family and economic systems. Lecture and readings. 225B. Individual research projects involving term paper and classroom reports of results. Ms. Oppenheimer

227. Sociology of Knowledge. Prerequisite: graduate standing or consent of instructor. Survey of theories and research regarding the nature of systems of knowledge and role of intellectual and artistic elites in Western societies. Mr. Horton

228A-228B. Critical Issues in Macrosociology. Lecture, two hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Introduction to the area of macrosociology in which exemplary works are read, studied for substance and methods, and critiqued in seminar and in written papers. Usually taught by faculty of varying orientations. In Progress grading. Mr. Mann, Mr. Szelenyi, Mr. Zettlin

229. Processes of Social Control. Prerequisite: graduate standing or consent of instructor. Current theory and research on social control processes. Specific topics include conceptual issues, informal social control mechanisms, relationship between informal and formal control systems, typification and practical concerns in processing of social control cases, and problems of "rationality" in social control decision making. Mr. Emerson

230. Capitalism and Socialism. (Not the same as course 230 prior to Fall Quarter 1989.) Lecture, one hour; discussion, two hours. Prerequisite: graduate standing. Historical and sociological foundations of cross-systemic, comparative sociological research and, in particular, to East-West comparative work in order to gain better understanding of sociological character of both capitalist and socialist societies in Eastern Europe, Eastern Asia, the U.S.S.R., and China. Mr. Szelenyi

M231. Structure of Occupations. (Same as Education M231.) Lecture, two hours; discussion, two hours. Shifts in occupational structure of the U.S., changing skill requirements for jobs, effects of automation on work environments, and role of formal and informal education in preparing people for occupations. Mr. O'Shea, Ms. Wrigley

232. Survey Data Acquisition. Lecture, three hours. Prerequisites: courses 210A-210B. Traditional topics on survey research practice in study design, instrument design, sampling, interviewing, and data management. Parallel coverage of research literature on various sources of error, in particular those that influence survey results. Ongoing Survey that employs Computer-Assisted Telephone Interviewing is available as a resource for course. Mr. Shure

233. Foundations of Political Sociology. Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Survey of the field of political sociology, oriented around critical themes in major theoretical traditions and contemporary exemplars. Special attention to comparing perspectives on power, theory of the state, and relationship of class structure to politics. Mr. Prager, Mr. Roy

234. Sociology of Community Organization. Prerequisites: graduate standing, consent of instructor. Survey of recent and classical research dealing with predominantly political institutions, problem of order, and organization of communal life in the village and metropolis. Mr. Horton

235. Comparative Ethnic Stratification. Lecture, one hour; discussion, two hours. Prerequisite: graduate standing. Survey of research on consensual ethnic stratification and ethnic and racial stratification in both industrial and developing societies, and variety of theoretical approaches that have attempted to explain it. Emphasis on recent debates among pluralist, class analysis, and rational choice theoretical perspectives. Mr. López

236. Social Change in the Middle East. Analysis of sources, extent, and types of social change in the Middle East, with emphasis on origin and constitutive factors of internationalization and urbanization. Mr. Levine

237. Seminar in Theory and Research in Comparative Social Analysis (2 units). (Not the same as course 237 prior to Fall Quarter 1989.) Prerequisite: graduate standing. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, North America and Western Europe, developed capitalist and socialist countries and the Third World, and implications for theory construction and social research. S/U grading. Mr. Szelenyi

238A-238B. Fieldwork in Minority Communities. Seminar, two hours. Preliminary condition: graduate standing, consent of instructor. Designed to supply graduate students with conceptual and methodological skills for working minority communities. Greater Los Angeles and the laboratory. Emphasis on both ethnographic and survey research techniques. In Progress grading. Mr. McFarland, Mr. Freeman, Mr. Yamaguchi

239A-239B. Quantitative Research on Social Stratification and Social Mobility. Lecture, three hours; discussion, two hours. Prerequisite: course 210A or equivalent. Introduction to English language research literature on quantitative social stratification and social mobility in the U.S. and abroad. In Progress grading. Mr. McFarland, Mr. Freeman, Mr. Yamaguchi

240. Mathematics of Population. Prerequisite: prior knowledge of matrices, calculus, and probability theory. Discrete and continuous deterministic and probabilistic models of growth and composition of a one-sexed population classified by age, plus selected topics on more complicated population models. Mr. McFarland

241. Theories of Gender in Society. Lecture, one hour; discussion, two hours. Gender stratification in society and sociology; extent of gender diversity in human societies past and present; link between systems and processes absent in classical macrosociology; can masculinist paradigms make space for gender or does a feminist-informed sociology necessitate a fresh approach? Mr. McFarland

242. Analysis of Categorical Data. Lecture, three hours. Prerequisites: courses 210A-210B or Statistics M152A and 152B-152C or equivalent or consent of instructor. Log-linear and log-binomial analysis (hierarchical log-linear models, logit models, association models, quasi-association models, latent structure models, latent-trait models). Mr. Yamaguchi

243. Interaction and Institutions. Lecture, three hours. Examination of ethnographic and conversational analytic research on structure and processes of interaction in several institutional settings, taken from the following: medicine, criminal justice, psychiatry, social welfare, education, mass communications. Mr. Shor

C244A. Conversational Structures I. Lecture, three hours; discussion, one hour. Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and sequences of discussions with expanded moves. May be concurrently scheduled with course C124A. Graduate students have additional assignments and/or meet as a group one additional hour each week. Mr. Schegloff

244B. Conversational Structures II. Lecture, three hours; discussion, one hour. Prerequisite: course C244A. Consideration of some more expanded sequence structures, of interactional sequences, and overall structure of organization of conversations. May be concurrently scheduled with course C124B. Graduate students have additional assignments and/or meet as a group one additional hour each week. Mr. Schegloff

245. Cultural Sociology: Classical and Contemporary Approaches. Lecture, one hour; discussion, two hours. Exploration of classical approaches to cultural dimension of social life — Weberian, Durkheimian, Parsons, and critical — and living traditions they have spawned. Examination of contemporary efforts at constructing a new cultural sociology. Theoretical focus, with consideration of case studies. Mr. Alexander

246. Cultural Studies: Hermeneutic, Semiotic, and Poststructural Traditions. Lecture, one hour; discussion, two hours. Examination of cultural analysis as it has evolved outside the discipline of sociology. On premise that these extra-sociological approaches provide critical resources in advancing the current sociological theory. Theoretical and comparative emphasis, with consideration of case studies. Mr. Alexander

247. Neurosociology. Prerequisites: graduate standing, consent of instructor. Relationships between aspects of social structure and higher cortical functions. Mr. TenHouten

248. Sociology of Cognitive Development. Prerequisite: graduate standing or consent of instructor. Analytic work on development of cognition in its various cultural and situated contexts. Mr. TenHouten

M249A. Sociocultural Aspects of Health and Illness: Health Professions. (Same as Community Health Sciences M283F.) Lecture, three hours. Prerequisites: Community Health Sciences 182, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Sociocultural examination of concepts "health" and "illness" and role of various health professions, especially physicians. Attention to meaning of professionalism and professional-client relationships within a range of organizational settings. Mr. TenHouten

M249B. Sociocultural Aspects of Health and Illness: Health Behavior. (Same as Community Health Sciences M283G.) Seminar, three hours. Prerequisites: Community Health Sciences 182, three psychology, sociology, or anthropology courses, or consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick role behavior. Mr. Berkanevic

250. Methodological Problems. Mr. Bailey, Mr. TenHouten

251. Topics in the Problem of Social Order. Mr. Katz, Mr. Rabow

252. Criminology. Mr. Katz, Mr. Rabow

253. Quantitative Methods in Sociology. Mr. Bailey, Mr. Bonacich, Mr. Freeman

254. Sociology of Law. Social control functions of law and legal institutions, with particular attention to contrast between law-ways of stateless and tribal societies and community legal cultures and institutions, primarily those of criminal law. Mr. Emerson, Mr. Katz, Mr. Prager

255A-255B. Selected Issues in Sociological Theory. Seminar. Prerequisite: consent of instructor. Course 255A is not ordinarily prerequisite to 255B. Examination of selected themes or problems in classical or contemporary sociological theory and in history of development of sociological thought. Mr. Champagne

256. Demography. Mr. Bailey
257. Demography of Marriage Formation and Dissolution. Discussion, three hours. Prerequisites: course 210; consent of instructor. Extensive and intensive critical examination of major approaches to analysis of marriage formation and dissolution, with focus primarily on demographic literature. Ms. Oppenheimer

258. Talk and Social Institutions. Lecture, three hours. Prerequisite: consent of instructor. Introduction to methods of conversation analysis, with particular reference to interaction in institutional contexts. Examination of relations between design of specific interactional activities and larger social and institutional contexts in which those activities are embedded. Mr. Clayman, Mr. Heritage

259. Social Structure and Economic Change: Historical and Comparative Perspectives. Mr. Zeltin

260. Economy and Society. Discussion, two hours. Prerequisite: graduate standing or consent of instructor. Review and critique of major analytical traditions in economy and society. Mr. Light, Mr. Zeltin

261. Ethnic Minorities. Mr. Levine

M262. Selected Problems in Urban Sociology. (Same as Afro-American Studies M200C.) Seminar. Prerequisite: consent of instructor. Ms. Cheng, Mr. Zeltin

263. Social Stratification. Mr. Treiman

264. Personal Identity in Historical Perspective. Lecture, three hours. Prerequisite: graduate standing. Examination of distinctive features of personal identity in contemporary society through use of historical materials on various aspects of private life. Topics include home, food, clothing and appearance, personal odor, and cleanliness in everyday life. Mr. Katz, Mr. Pollner

265. Problems in Organization Theory. Mr. Alvarez, Mr. Grusky, Ms. Zucker

266. Selected Problems in Analysis of Conversation. Prerequisite: course C124A or consent of instructor. Mr. Poliner, Mr. Schegloff

267. Selected Problems in Communication. Mr. Poliner, Mr. Schegloff

268. Selected Problems in Psychosocial Sociology. Discussion, three hours. Recommended prerequisite: at least one year of methods courses. Selected problems in interpretation of personal identity and psychoanalysis, which may be substantive (group development, socialization, culture, deviance, collective behavior) or methodological; latter focuses on clinical fieldwork and experimental use of psychoanalytic and sociological techniques. Mr. Rabow

269. Collective Behavior. Mr. Allen

270. Selected Problems in Socialization. Mr. Allen

271. Ethnomethodology. Mr. Foy, Mr. Zeltin

272. Topics in Political Sociology. Mr. Roy, Mr. Zeltin

273. Attitudes and Social Structure. Mr. Champagne, Ms. Heth

274. Selected Problems in Sociology of Africa. Prerequisite: graduate standing, consent of instructor. Selection of problems in sociology of Africa from among following fields: urbanization, racial and ethnic relations, national integration, and political change.

M275. Contemporary Issues of the American Indian. (Same as American Indian Studies M200C and Anthropology M269.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world. Building on interdisciplinary knowledge acquired in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

276. Selected Topics in Sociology of East Asia. Prerequisites: graduate standing, consent of instructor. Selected problems in China, or in China and Japan comparatively. Possible topics include (1) China's Great Proletarian Cultural Revolution, (2) internal contradictions in Chinese society: male-female relationships, class struggle, intellectual property, media, authority-narrative class struggle under socialism, etc. (3) China and Japan: two models of development. Ms. Cheng

277. Japanese Society: Selected Topics. Lecture, two and one-half hours. Prerequisite: graduate standing. Social structural characteristics and functioning of contemporary Japanese society, with special emphasis on the role of historical materialist theory in its development and evaluation of functional (or rational) and cultural explanations of selected social phenomena. Topics include forms of social interaction, work organization, family, education, and equality. Mr. Yamaguchi

278. Selected Problems and Issues in Mass Media Research. Seminar, two hours. Prerequisites: graduate standing, consent of instructor. Foci include multivariate analysis and response bias. Emphasis on research on audience; problems of comparative, international media research; exposure and socialization; social, psychological, and political effects of technological innovation. Mr. Levine

279. Seminar in Media Research. Seminar, two hours: discussion, one hour. Opportunities for applied research experiences, distinctive features of applied work, and procedures employed in various areas of research. Examination of representative work in specific areas of applied research. Mr. Berk, Mr. Freeman

280. Seminar in Evaluation Research. Prerequisite: graduate standing. Technical and political aspects of implementing evaluation research studies. Role of research in social policy development, as well as procedures for undertaking process and impact evaluations. S/U or letter grading. Mr. Freeman

281. Selected Problems in Mathematical Sociology. Prerequisite: consent of instructor. Exploration of some mathematical models of sociological processes. Possible topics include models of social groups, social mobility, kinship relations, organizations, social interaction. Mr. Bonacich, Mr. McFarland, Mr. Yamaguchi

282. Organizations and the Professions. Mr. Alvarez

283. Applied Sociology. Discussion, two hours. Prerequisite: graduate standing. Examination of roots and intellectual traditions underlying contemporary interest and work in applied sociology. Discussion of range of methodological perspectives used in applied research, utility of social research in various substantive domains and conflicts and controversies related to ideological activities, competence and performance requirements, and identification with and participation in the discipline. Mr. Berk, Mr. Freeman

284. Topics in Mental Health and Illness. Prerequisites: course 148 or equivalent, graduate standing. Mr. Grusky, Mr. Pollner

285A-285Z. Special Topics in Sociology. Seminar, three hours. Prerequisite: graduate standing. Seminar on selected current topics of sociological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit.

286. Event History Analysis. Lecture, three hours. Prerequisites: courses 209A-209B and 209C, or 210A-210B, or equivalent, or consent of instructor. Logit models for discrete-time event history models; piecewise exponential hazards models based on log-linear analysis; proportional hazards, nonparametric hazards, and stratified models based on Cox's partial likelihood method; and accelerated failure-time regression models. S/U or letter grading. Mr. Yamaguchi

M287A-M287B. Population Policy and Fertility. (Same as Community Health Sciences M274A-M274B.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 100A, Community Health Sciences 171A, 171B, Epidemiology 112, or equivalent, graduate standing, consent of instructor. Course Material may be prerequisite to M287B. Analysis of research concerning fertility and population policy, with special emphasis on human fertility. Ms. Blake

M287C. Seminar in Population Policy and Fertility. (Same as Community Health Sciences M274C.) Prerequisites: courses M287A-M287B equivalent, graduate standing, consent of instructor. Course Material may be prerequisite to M287B. Analysis of research concerning fertility and population policy, with special emphasis on human fertility. Ms. Blake

288A-288B-288C. Mental Health Services for Persons with AIDS (2 units each). Lecture, one hour; discussion, one hour. Prerequisite: graduate standing. Required of students in social psychology area program, but open to all graduate students in good standing. Forum for presentation of original research in social psychology designed to develop ability to understand, critically evaluate, and present research in fields relevant to study of social psychology. May be repeated for credit. Ms. Freeman, Mr. Grusky

289A-289B-289C. Social Psychology Seminars (2 units each). Lecture, one hour; discussion, one hour. Prerequisite: graduate standing. Required of students in social psychology area program, but open to all graduate students in good standing. Forum for presentation of original research in social psychology designed to develop ability to understand, critically evaluate, and present research in fields relevant to study of social psychology. May be repeated for credit. In Progress and S/U grading.

290A-290B-290C. Communities and Institutions Seminars (2 units each). Lecture, one hour; discussion, one hour. Prerequisite: graduate standing. Required of students in communities and institutions area program, but open to all graduate students in good standing. Seminar for presentation of advanced work in communities and institutions designed to contribute to theoretical and methodological knowledge of work in this program and to critically evaluate avenues for further work and developments. May be repeated for credit. In Progress and S/U grading.

291. Moral Solidarity in Communities. Comparative analysis of social solidarity and collapse of social solidarity in voluntary and traditional communities. Contrasts more and less solidarity types, with special reference to uptonian communities and developmental processes. Mr. Light

292A-292B-292C. Research Development. (Students taking a minor field examination may be exempt.) Mr. Grusky

293A-293B-293C. Colloquium in Ethnomethodological, Phenomenological, and Observational Sociologies (2 units each). Prerequisites: courses C124A and C124B or 217A-217B or 218A-218B and 222, or consent of instructor. Participants present ongoing work and read and discuss exemplary past work of common interest. Continuing colloquium in which participation is expected of faculty and graduate students affiliated with ethnomethodological, phenomenological, and observational sociologies area program (students taking a minor field examination may be exempt on request). S/U grading.

294A-294B-294C. Research Seminars in Macrosociology. Discussion, two hours. Prerequisite: consent of instructor. Required of students in macro sociology area program. Training in conduct, presentation, and critical evaluation of original research and analysis of substantive and methodological questions in macro sociology. Ms. Zeitlin

295A-295B-295C. Seminars in Quantitative Sociology (2 units each). Ongoing seminar in quantitative sociology area program. Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned or conducted or conduct a research project recently completed, including didactic presentations on important developments in the area. Students required to make a presentation each term they are enrolled for credit. S/U grading.
Scope and Objectives

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department’s courses are primarily designed to serve the four B.A. programs: B.A. in Spanish (Plan A), B.A. in Spanish and Linguistics (Plan B), B.A. in Portuguese, and B.A. in Spanish and Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the Instructional Credential in Spanish, B.A. and M.A. programs in Latin American Studies, M.A. program in Folklore and Mythology, and M.A. and Ph.D. programs in Comparative Literature and Romance Linguistics and Literature.

Bachelor of Arts in Spanish and Portuguese

Students who have taken Spanish elsewhere and wish to enroll in UCLA Spanish classes for the first time must take the placement test given around the fifth week of each term. Consult the Schedule of Classes.

Preparation for the Majors

Required: Spanish 25 or equivalent as determined by the placement test; courses M35, M42, M44, or equivalent.

The Major, Plan A (Spanish Language and Literature)

The Major, Plan B (Spanish and Linguistics)

Required: Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Portuguese is recommended.

The major consists of 15 upper division courses, including Spanish 100A, 100B, 105, 115, M118A, M118B, 127, Linguistics 100, 103, 110, 120A, 120B, and three electives in Spanish.

Honors Program

To qualify for graduation with departmental honors, you must achieve a 3.0 overall grade-point average and a 3.5 grade-point average in the major and have completed two of the three senior honors seminars (Spanish 170A, 170B, 170C) with appropriate grades.

Bachelor of Arts in Portuguese

Preparation for the Major

Required: Portuguese 3, 25, M35, M42, M44, or equivalent.

The Major (Portuguese Language and Literature)

Required: Thirteen upper division courses, including Portuguese 100A, 100B, 105, 120A-120B, 130A-130B, and six elective courses in Portuguese, or four electives in Portuguese plus two courses from areas that complement your program approved by the undergraduate adviser in Portuguese.

Portuguese and Linguistics Concentration

Required: Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A, M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

Double Majors

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/ Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.
Study in a Portuguese-Speaking Country
You are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with your individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

Bachelor of Arts in Spanish and Portuguese

Preparation for the Major
Required: Spanish 25, Portuguese 25, M35, M42, M44, or equivalent.

The Major
Required: Six upper division courses in language and linguistics, including Spanish 100A, 100B, Portuguese 100A, 100B, M118A or M118B, and either Spanish 105 or Portuguese 105; nine upper division courses in literature selected from one of the following groups: group A (peninsular literature to 1700) — Spanish 123, 124, 127, Portuguese C124, C125, C126, and three other literature courses, one of which must be in Spanish and one in Portuguese; group B (peninsular literature from 1700 to the present) — Spanish 128, 130, 133, Portuguese C127, C128, C129, and three other literature courses, one of which must be in Spanish and one in Portuguese; group C (Spanish-American and Brazilian literature from 1900) — Spanish 137, 139, 140, Portuguese C131, C132, C133, and three other literature courses, one of which must be in Spanish and one in Portuguese; group D (Spanish-American and Brazilian literature from 1900 to the present) — Spanish 142, 143, Portuguese C134, C135, and five other literature courses, two of which must be in Spanish and two in Portuguese.

Master of Arts in Spanish

Admission
Admission to the M.A. program is based on careful review of your academic record by the graduate admissions committee. Minimum requirements include a B.A. in Spanish or the equivalent from UCLA or another recognized university, a satisfactory score on the Graduate Record Examination (GRE) General Test, and three letters of recommendation, preferably from professors with whom you have studied in the major field, who can comment on your potential as a graduate student. For admission information, write to the Department of Spanish and Portuguese, 5310 Rolfe Hall, UCLA, Los Angeles, CA 90024-1532.

You may be required to take one or more complementary courses (which may not be applied toward the M.A.) if the committee determines that some area of your preparation in language or literature is deficient.

Foreign Language Requirement
You are required to study one of the following languages: French, German, Italian, Latin, Portuguese, or another language approved by your guidance committee. The requirement may be fulfilled by (1) passing the Educational Testing Service (ETS) language examination with a score of 500 or better, (2) passing the University reading examination in one of these languages when no ETS examination is available, or (3) passing at least a level three course at UCLA.

Course Requirements
Eleven graduate Spanish courses are required, at least one of which must be a seminar taken only after the appropriate preseminar. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

Three plans of study for the M.A. in Spanish are offered: Plan A, Linguistics; Plan B, Literature; Plan C, Linguistics and Literature.

Plan A (Linguistics) — Spanish M200, one graduate course in literature offered by the department, and nine elective graduate courses are required. You must select one major field (five courses) and one minor field (three courses) from the following areas of specialization: phonology and morphology; syntax; diachronic or synchronic language variation. One additional course must be selected from an area outside your major and minor fields.

Plan B (Literature) — Spanish M200, one course from 202 through 209, and nine elective graduate courses are required. You must select one major field (four courses) and one minor field (three courses) from the following areas of specialization: Spanish literature from its beginning to 1700; Spanish literature from 1700 to the present; Spanish-American literature from its beginning to 1900; Spanish-American literature from 1900 to the present. Two additional courses must be selected from areas outside your major and minor fields.

Plan C (Linguistics and Literature) — Spanish M200 and 10 elective graduate courses, five in literature and five in linguistics, are required. The five literature courses are to be selected from three of the fields specified in Plan B, two courses from each of two areas and one from another. Of the five courses in linguistics, one must be in phonology and morphology, one in syntax, and one in diachronic or synchronic language variation.

Comprehensive Examination Plan
One term before you propose to take the comprehensive examination, you must present to your guidance committee reading lists which constitute the basis for your examination. Students in Plan A receive a list of essential reading when they enter the plan and must present one reading list for the major field and one for the minor field. If you are in Plan B, you also must present for approval one reading list in your major field and one in your minor field. Plan C students must present for approval reading lists representing the literature fields (the reading list for linguistics is established by the guidance committee).

Thesis Plan
You may petition to present a thesis in lieu of taking the comprehensive examination only after you complete five graduate courses. The graduate advisor and your committee will approve your petition only if they find evidence of exceptional ability and promise in your term papers and coursework.

Master of Arts in Portuguese

Admission
The UCLA Bachelor of Arts in Portuguese or the equivalent is required. Other admission requirements are the same as those for the M.A. in Spanish.

Major Fields
You must select one major field and two minor fields from the following specialization areas: Portuguese literature; Brazilian literature; Portuguese linguistics.

Foreign Language Requirement
You are required to study one of the following languages: French, German, Italian, Latin, Spanish, or another language approved by your guidance committee. The requirement may be fulfilled by (1) passing the Educational Testing Service (ETS) language examination with a score of 500 or better, (2) passing the University reading examination in one of these languages when no ETS examination is available, or (3) passing at least a level three course at UCLA.

Course Requirements
Portuguese M200, M201, and eight elective graduate courses in Portuguese are required, at least one of which must be a seminar. You must select four courses in your major field and two courses in each of your two minor fields. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

Comprehensive Examination Plan
The examination consists of (1) a three-hour written test in your major field and (2) a 90-minute written test in each of your two minor fields. One term before you propose to take the comprehensive examination, you must present for approval to your guidance committee one reading list for your major field in literature (approximately 15 authors and 30 works) and one
Ph.D. in Hispanic Languages and Literatures

Admission
The UCLA Master of Arts in Spanish or in Portuguese, or the equivalent, is required. Three letters of recommendation are also required from professors familiar with your work as a graduate student, to be addressed to your capacity for research-oriented doctoral studies and possible entry into the profession. The Graduate Record Examination (GRE) General Test is also required. A combined score of 1,000 is preferred; the verbal score is considered more important than the quantitative.

Students who hold the M.A. in Spanish or in Portuguese from UCLA fall into one of three categories and are so notified on receipt of the degree. The categories are (1) low pass (terminal M.A.) — not eligible for admission into the Ph.D. program, (2) mid pass — may continue toward the Ph.D. on a probationary basis, and (3) high pass — automatically eligible to enter the Ph.D. program.

Major Fields or Subdisciplines
The department recognizes the following areas of specialization, from which you select one major field and two minor fields, together with an optional complementary support area: (1) Spanish linguistics; (2) Portuguese linguistics; (3) diachronic Hispanic linguistics and philology; (4) medieval Spanish literature; (5) Renaissance and Golden Age Spanish literature; (6) 18th- and 19th-century Spanish literature; (7) 20th-century Spanish literature; (8) colonial and 19th-century Spanish-American literature; (9) 20th-century Spanish-American literature; (10) early Portuguese literature; (11) modern Portuguese literature; (12) Brazilian literature; (13) Spanish and Luso-Brazilian folklore.

Foreign Language Requirement
Reading knowledge of two foreign languages in addition to both Spanish and Portuguese is required. The languages are selected in consultation with your guidance committee. The requirement may be fulfilled by (1) passing the Educational Testing Service (ETS) language examination with a score of 500 or better, (2) passing the University reading examination in the language when no ETS examination is available, or (3) passing at least a level three course at UCLA. You must fulfill the requirement in one of the languages no later than the sixth term of graduate study.

Course Requirements
After the B.A., a minimum of 20 graduate courses is required. Spanish or Portuguese M201 may be required if you do not have prior credit for it. You normally take a minimum of six graduate courses in your major field, of which at least two must be seminars. In each of the minor fields, you normally take a minimum of four graduate courses, of which at least one must be a seminar.

Qualifying Examinations
The qualifying examinations, given during the fifth and sixth weeks of Fall, Winter, and Spring Quarters, consist of (1) a four-hour written examination in the major field, (2) a two-hour written examination in each minor field, and (3) a two-hour University Oral Qualifying Examination on the three fields and at which your prospects for the dissertation is discussed and approved. The written examinations are normally taken no later than nine terms after receiving the B.A. and six terms after receiving the M.A. Only students who pass the qualifying examinations are advanced to candidacy for the Ph.D.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
The final oral examination is optional at the committee's discretion.

Spanish
Lower Division Courses
Spanish 1 through 3 use Shumway and Forbes' *Español en español*. The method is inductive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, read, and write Spanish.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the Schedule of Classes or the department office for test dates.

1. Elementary Spanish. Discussion, five hours; laboratory, one hour.
2. Reading Course for Graduate Students. Lecture, three hours. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.
3. Elementary Spanish. Discussion, five hours; laboratory, one hour. Prerequisite: course 1 or equivalent as determined by placement test.
4. Reading Course for Graduate Students. Lecture, three hours. Prerequisite: course 1G or equivalent. May not be applied toward degree requirements. S/U grading.
5. Intermediate Spanish. Discussion, five hours; laboratory, one hour. Prerequisite: course 3 or equivalent as determined by placement test.
6. Intermediate Spanish. (Not the same as course 6 prior to Fall Quarter 1990.) Discussion, five hours. Prerequisite: course 5 or equivalent. Review and analysis of the more sophisticated and complex syntactic structures of Spanish, verb morphology, and lexical discrimination. Students who have completed course 5 with a grade of A – or better may enroll directly in course 6.

6A. Intermediate Spanish for Spanish Speakers. (Formerly numbered 6.) Prerequisite: proficiency as determined by placement test. Concentration on formal aspects of the language (i.e., spelling, punctuation, accentuation, composition, reading, and traditional grammar) in lieu of course 6.

8A-BB. Spanish Conversation (2 units each). Discussion, three hours. Course 8A is open to students with credit for course 4 or equivalent. Students who have completed course 3 with a grade of B or better may be admitted. (F,W,Sp)

9A-BB. Advanced Conversation (2 units each). Discussion, three hours. Prerequisite: course 8B or equivalent. (F,W,Sp)

25. Advanced Spanish. Prerequisite: course 5 or equivalent. Concentration on building of vocabulary and attainment of a high degree of comprehension in preparation for courses in literature.

25A. Composition for Spanish Speakers. (Formerly numbered 26.) Lecture, three hours. Prerequisites: course 5 or equivalent; consent of instructor. Practice in reading and writing of Spanish for students with oral proficiency in Spanish (in lieu of course 25).

M35. Spanish, Portuguese, and Nature of Language. (Same as Portuguese M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses, study of language and its relation to other areas of human knowledge.

M42. Civilization of Spain and Portugal. (Same as Portuguese M42.) Required of majors. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses. Conducted in English. Mr. Cruz-Salvadores

M44. Civilization of Spanish America and Brazil. (Same as Portuguese M44.) Required of majors. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses. Conducted in English. Mr. Reeve, Mr. Skirius

60A-60B-60C. Hispanic Literatures in Translation. (Formerly numbered 180A-180B-180C.) Lecture, three hours. Classroom discussion, analysis of selected works in translation. Course work: discussion, papers, and examinations in Spanish. 60A. Spanish Literature; 60B. Spanish-American Literature; 60C. Don Quijote.
Upper Division Courses

Prerequisite to all upper division courses is Spanish 25 or equivalent as determined by the placement test.

100A. Introduction to Study of Spanish Grammar: Phonology and Morphology. Lecture, three hours. Prerequisite: course M35. Analysis of phonemic and morphological systems of Spanish. Ms. Plann

100B. Introduction to Study of Spanish Grammar: Syntax. Lecture, three hours. Prerequisite: course M35. Study of syntactical systems of Spanish. Mr. Otero, Ms. Plann

105. Spanish Composition. (Formerly numbered 105A, 105B.) Lecture, three hours. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns.

107. The Spanish of Southern California. Lecture, three hours. Prerequisites: courses M35, 100A, and 100B, or consent of instructor. Analysis of pronunciation, word formation, syntax, and lexicon of the Spanish of Southern California, with attention to regional features, social and age levels of speech, and influence from English.

115. Applied Linguistics. Lecture, three hours. Prerequisites: courses M35, 100B. Survey of major linguistic problems faced by teachers of Spanish.

Ms. Plann

M118A. History of Portuguese and Spanish Phonology. (Same as Portuguese M118A.) Lecture, three hours. Prerequisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Latin to modern times.

Ms. Plann, Mr. Quicoli, Mr. Smith

M118B. History of Portuguese and Spanish Morphology and Syntax. (Same as Portuguese M118B.) Lecture, three hours. Prerequisites: courses M35, 100B. Major features of development of Portuguese and Spanish languages from their origins in Latin to modern times.

Mr. Otero, Ms. Plann, Mr. Quicoli

119A. Introduction to Study of Literature: Prose. Lecture, three hours. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in prose literature of Spain and Spanish America, particularly in the novel and essay.

Mr. Otero

119B. Introduction to Study of Literature: Poetry. Lecture, three hours. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in the poetry of Spain and Spanish America.

Mr. Otero

119C. Introduction to Study of Literature: Drama. (Formerly numbered 119C.) Lecture, three hours. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in the drama of Spain and Spanish America.

Mr. Otero

120A-120B. Survey of Spanish Literature. Lecture, three hours. Introduction to principal periods, currents, and authors of Spanish literature.

Mr. Gimeno, Mr. Johnson, Mr. Rodriguez-Cepeda

122. Medieval Literature: Prose. Lecture, three hours. Recommended prerequisite: course 120A. Study of main genres through representative works. Mr. Gimeno

123. Medieval Literature: Poetry. Lecture, three hours. Recommended prerequisite: course 120A. Study of main genres through representative works. Mr. Gimeno

124. Golden Age: Poetry and Drama. Lecture, three hours. Recommended prerequisite: course 120A. Study through representative works, of the Golden Age poetry and drama.

Mr. Johnson, Mr. Rodriguez-Cepeda

125. Golden Age: Prose. Lecture, three hours. Recommended prerequisite: course 120A. Study through representative works, of the Golden Age prose writing in Spain, with particular emphasis on Lazarillo de Tormes and the picaresque tradition.

Mr. Johnson, Mr. Rodriguez-Cepeda

127. Golden Age: Don Quijote. Lecture, three hours. Recommended prerequisite: course 120A. Development of the main themes of the Golden Age, with particular reference to Don Quijote.

Mr. Johnson, Mr. Rodriguez-Cepeda

128. The Enlightenment and Romanticism in Spain. Lecture, three hours. Recommended prerequisite: course 120B. Study through representative works, of main manifestations of thought and literature from 1700 to 1850.

Mr. Benitez, Mr. Rodriguez-Cepeda

130. Post-Romanticism, Realism, and Naturalism in Spain. Lecture, three hours. Recommended prerequisite: course 120B. Development of main trends of Spanish literature from 1850 to 1898.

Mr. Benitez, Mr. Smith

132. 20th-Century Spanish Prose. Lecture, three hours. Recommended prerequisite: course 120B. Study of several representative works of Spanish prose literature since 1898.

Mr. Morris

133. 20th-Century Spanish Poetry and Drama. Lecture, three hours. Recommended prerequisite: course 120B. Study of several representative works of Spanish poetry and drama since 1898.

Ms. Arora, Mr. Luzuriaga, Mr. Reeve, Mr. Skirius

137. Literature of Colonial Spanish America. Lecture, three hours. Recommended prerequisite: course 136A. Study of principal genres and authors from the Conquest to 1810.

Ms. Arora

138. Neo-Realism and Realism in Spanish-American Literature. Lecture, three hours. Recommended prerequisite: course 136A. Study, through representative literary works, of most important currents of thought and literary trends from 1810 to 1860.

Mr. Luzuriaga, Mr. Reeve, Mr. Skirius

140. Modernismo. Lecture, three hours. Recommended prerequisite: course 136A. Study, through representative works, of principal characteristics of modernismo in Spanish-American literature.

Ms. Arora

Ms. Arora, Mr. Luzuriaga, Mr. Reeve, Mr. Skirius

144. Mexican Literature. Lecture, three hours. Recommended prerequisite: course 136B. Study of major movements and authors of Mexican literature.

Mr. Reeve, Mr. Skirius

145. Introduction to Chicano Literature. (Same as Chicano Studies M145.) Lecture, three hours. Prerequisite: course 25 or 26. Recommended prerequisite: course 120B. Study through representative works, of the Chicano literary tradition.

Mr. Reeve, Mr. Skirius

151A-151B. Women in Hispanic Literature. Discussion, three hours. Study of works by and about women, with emphasis on portrayals of women, women's roles, and women's expression within the Hispanic socio-ideological context.

Ms. Arora

161. Film and Literature of the Spanish-Speaking World. Lecture, three hours. Topical analysis (conducted in English) of main literary and historical themes of Hispanic culture through films and literary texts. Course 197 may not be taken concurrently with course 161.

Mr. Otero

170A. Senior Honors Seminar: Topics in Spanish Literature. Lecture, three hours. Prerequisite: senior Spanish major with 3.5 GPA in the major. Directed research on topics within general area of Spanish literature. Two senior seminars required for departmental honors.

Mr. Otero

170B. Senior Honors Seminar: Topics in Spanish-American Literature. Lecture, three hours. Prerequisite: senior Spanish major with 3.5 GPA in the major. Directed research on topics within general area of Hispanic literature. Two senior seminars required for departmental honors.

Mr. Otero

199. Special Studies (2 to 4 units). Prerequisite: consent of instructor. Eight units may be applied toward the major requirements.

Graduate Courses

M200. Research Resources. (Same as Portuguese M200.) Lecture, three hours. Identification and use of research resources for graduate students.

Mr. Benitez, Mr. Smith

M201. Literary Theory and Criticism. (Same as Portuguese M201.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism.

Mr. Benitez, Mr. Otero

202. Phonology and Morphology. Lecture, three hours. Phonological and morphological systems of Spanish and their interaction.

Mr. Otero, Ms. Plann

204A-204B. Generative Grammar. Lecture, three hours. Prerequisite: consent of instructor. Course 204A or consent of instructor is prerequisite to 204B. Generative approach to the Spanish language, with some consideration of bearing of syntax, semantics, and phonology on style, metathesis, and meter.

Mr. Otero

205A-205B. Development of Portuguese and Spanish Languages. (Same as Portuguese M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

Mr. Otero, Mr. Smith

209. Diallektology. Lecture, three hours. Major dialect areas of peninsular and American Spanish, with distinguishing features of each. Influence and contribution of cultural and historical features, including indigenous languages, to their formation.
221. Medieval Lyric Poetry. Lecture, three hours. Readings of and lectures on Spanish lyric poetry from the beginning to 1500. Mr. Gimeno

222. Medieval Epic and Narrative Poetry. Lecture, three hours. Readings of and lectures on Spanish epic and narrative poetry from the beginning to 1500. Mr. Gimeno

223. Medieval Prose. Lecture, three hours. Readings of and lectures on Spanish prose from the beginning to 1500. Mr. Gimeno

224. Poetry of the Golden Age. Lecture, three hours. Readings of and lectures on Spanish poetry from 1500 to 1700. Mr. Moms, Mr. Rodriguez-Cepeda

Readings of and lectures on Spanish poetry from 1500 to 1700. Mr. Moms, Mr. Rodriguez-Cepeda

225. Drama of the Golden Age. Lecture, three hours. Readings of and lectures on the comedia. Mr. Rodriguez-Cepeda

226. Prose of the Golden Age. Lecture, three hours. Readings of and lectures on fictional, didactic, religious, and historical writings. Mr. Johnson

227. Cervantescas. Lecture, three hours. Readings of and lectures on works of Cervantes. Mr. Johnson

228. The Enlightenment. Lecture, three hours. Readings of and lectures on representative works of the period. Mr. Benitez

229. Romanticism. Lecture, three hours. Readings of and lectures on representative works of the period. Mr. Benitez

230. Realism and Naturalism. Lecture, three hours. Readings of and lectures on literary works, particularly novels, from 1850 to 1898. Mr. Benitez, Mr. Smith

231. Major Currents in Modern Spanish Literature. Lecture, three hours. Introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898. Mr. Morris

232. Spanish Prose Literature from 1898 to the Civil War. Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period. Mr. Morris

233. Spanish Prose Literature after the Civil War. Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period. Mr. Morris

234. Spanish Drama and Poetry from 1898 to the Civil War. Lecture, three hours. Readings of and lectures on representative plays and poems. Mr. Morris

235. Spanish Drama and Poetry after the Civil War. Lecture, three hours. Readings of and lectures on representative plays and poems of the period. Mr. Morris

236. Literature of the Spanish Conquest. Lecture, three hours. Readings of and lectures on chronicles, poems, and indigenous accounts of the Spanish Conquest. Ms. Arora

237. Baroque, Enlightenment, and Neoclassicism in Colonial Literature. Lecture, three hours. Readings of and lectures on representative texts. Ms. Arora

240. Major Currents in Modern Spanish-American Literature. Lecture, three hours. Study of principal trends in modern Spanish-American literature, particularly naturalismo and modernismo. Mr. Luzuriaga

241A-241B. Contemporary Spanish-American Short Story. Lecture, three hours. Study of important short story writers from modernism to the present. Mr. Reeve

243A-243B. Contemporary Spanish-American Poetry. Lecture, three hours. Intensive study of important poets of Spanish America from modernism to the present. Mr. Reeve

244A-244B. Contemporary Spanish-American Novel. Lecture, three hours. Study of important novelists from modernism to the present. Mr. Reeve

246. Contemporary Spanish-American Drama. Lecture, three hours. Readings of and lectures on representative Spanish-American dramatists and theater movements in the 20th century. Mr. Luzuriaga

247. Chicano Literature. Lecture, three hours. Study of major movements and authors of Mexican American literature. Ms. Arora

248. Folk Literature of the Spanish and Portuguese Worlds. (Same as Folklore M249 and Portuguese M249.) Lecture, three hours. Intensive study of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech. Ms. Arora

Seminar courses (M251A through 290) may be taken for a maximum of eight units each with consent of the appropriate guidance committee and with topic change.

M251A-M251B. Studies in Galactic-Portuguese and Old Spanish. (Same as Portuguese M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galician-Portuguese and Old Spanish. Mr. Otero, Mr. Smith

256A-256B. Studies in Spanish Linguistics. Lecture, two hours. Study of problems in analysis and description of the contemporary Spanish language. Mr. Otero

257. Studies in Dialectology. Discussion, two hours.

262A-262B. Studies in Medieval Spanish Literature. Discussion, two hours. Mr. Gimeno

264A-264B. Studies in Golden Age Spanish Literature. Discussion, two hours. Mr. Johnson, Mr. Morris, Mr. Rodriguez-Cepeda

265. Cervantescas. Discussion, two hours. Mr. Benitez

267. Studies in Dialectology. Discussion, two hours.

270A-270B. Studies in 18th-Century Spanish Literature. Discussion, two hours. Mr. Benitez

271A-271B. Studies in 19th-Century Spanish Literature. Discussion, two hours. Mr. Benitez

272A-272B. Studies in 20th-Century Spanish Literature. Discussion, two hours. Mr. Benitez, Mr. Smith

277A-277B. Studies in Colonial Spanish-American Literature. Discussion, two hours. Ms. Arora

278A-278B. Studies in 19th-Century Spanish-American Literature. Discussion, two hours. Ms. Arora

280A-280B. Studies in Contemporary Spanish-American Literature. Discussion, two hours. Ms. Arora

281. Studies in Chicano Literature. Discussion, two hours. Mr. Heizer

286A-M286B. Studies in Hispanic Folk Literature. (Same as Folklore M286A-M286B.) Lecture, two hours. Ms. Arora

290. Special Topics. Lecture, two hours. Variable topics; consult Schedule of Classes or department counselor for topics to be offered in a specific term.

310. Teaching Spanish in Elementary School. Lecture, three hours.

372. Teaching Composition (2 units). Prerequisites: graduate standing, consent of instructor. Seminar on teaching writing in Spanish language classes. May not be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Spanish at College Level. Prerequisite: graduate standing in department. Basic concepts of modern theories of language and language acquisition which underlie modern methods of second language teaching. S/U grading.

596. Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of graduate adviser and chair. Study or research in areas or subjects not offered as regular courses. No more than four units may be applied toward M.A. course requirements.

597. Preparation for Graduate Examinations (4 to 12 units). Prerequisites: official acceptance of candidacy by department, consent of graduate adviser, individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

Portuguese

Lower Division Courses

No credit is allowed for completing a less advanced course after completion of a more advanced course in grammar and/or composition.

1. Elementary Portuguese. Discussion, five hours; laboratory, one hour.

2. Elementary Portuguese. Discussion, five hours; laboratory, one hour. Prerequisite: course 1 or equivalent.

3. Intermediate Portuguese. Discussion, five hours; laboratory, one hour. Prerequisite: course 2 or equivalent.

8A-8B. Portuguese Conversation (2 units each). Discussion, three hours. Prerequisite: course 3 with a grade of C or better.

25. Advanced Portuguese. Prerequisite: course 3 or equivalent.

M35. Spanish, Portuguese, and Nature of Language. (Same as Spanish M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

40A-40B. Portuguese, Brazilian, and African Literature in Translation. (Formerly numbered 140A-140B.) Lecture, three hours. Reading and discussion of selected works in translation. Papers and examinations in English. 40A. Portuguese and Portuguese-African Literature; 40B. Brazilian Literature. Mr. Dias, Mr. Hulet

M42. Civilization of Spain and Portugal. (Same as Spanish M42.) Required of majors. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses. Conducted in English. Mr. Cruz-Salvadores

M44. Civilization of Spanish America and Brazil. (Same as Spanish M44.) Required of majors. Highlights of civilization of Spanish America and Brazil with emphasis on the artistic, economic, social, and historical development as background for upper division courses. Conducted in English. Mr. Reeve, Mr. Skirius
Upper Division Courses

Prerequisite to all upper division courses is Portuguese 25 or consent of instructor.

100A. Phonology and Morphology. Lecture, three hours. Analysis of phonetic, phonemic, and morphological systems of Portuguese. Mr. Quicoli
100B. Syntax and Semantics. Course 100A. Lecture, three hours. Study of the grammatical structures and linguistic patterns. Mr. Quicoli

101A. Advanced Reading and Conversation. Lecture, three hours. Reading and discussion of works by modern Brazilian and Portuguese authors.

102A-102B. Intensive Portuguese. Prerequisite: foreign language experience (other than Portuguese) or consent of instructor. Development of speaking and reading skills equivalent to those covered in an intensive practical tradition and to meet special needs of advanced undergraduate and graduate students.

105. Advanced Composition and Style. Practice in writing Portuguese with appropriate vocabulary, syntactical structures, and stylistic patterns.

M118A. History of Portuguese and Spanish: Phonology. Same as Spanish M118A. Lecture, three hours. Study of historical phonological developments of Portuguese and Spanish from their origin in Vulgar Latin to modern times. Ms. Penn, Mr. Quicoli, Mr. Smith

M118B. History of Portuguese and Spanish: Morphology and Syntax. Same as Spanish M118B. Lecture, three hours. Prerequisites: courses M35, 100B. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. Ms. Penn, Mr. Quicoli, Mr. Smith

120A-120B. Survey of Portuguese Literature. Lecture, three hours. Introduction to principal periods, currents, and authors of Portuguese literature. Mr. Dias

C124. Medieval Portuguese Literature. Lecture, three hours. Study of main genres of medieval Portuguese and Galician literature through representative works. May be concurrently scheduled with course C224.

C125. Renaissance Portuguese Literature. Lecture, three hours. Study of main genres of Renaissance Portuguese literature, with particular emphasis on the works of Luis de Camoens. May be concurrently scheduled with course C225.

C126. Baroque and Neoclassical Portuguese Literature. Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C226.

C127. Romanticism and Realism in Portuguese Literature. Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C227.

C128. Post-Romanticism and Naturalism in Portuguese Literature. Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C228.

C129. 20th-Century Portuguese Literature. Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C229.

C130A-130B. Survey of Brazilian Literature. Lecture, three hours. Introduction to principal periods, currents, and authors of Brazilian literature. Mr. Hulet

C131. Colonial Brazilian Literature. Lecture, three hours. Study of most important authors to 1830. May be concurrently scheduled with course C231.

C132. Romanticism in Brazilian Literature. Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C232.

C133. Naturalism, Realism, and Symbolism in Brazilian Literature. Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C233.

C134. 20th-Century Brazilian Literature: Poetry and Drama. Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C234.

C135. 20th-Century Brazilian Literature: Novel. Lecture, three hours. Study of most important Brazilian novelists. May be concurrently scheduled with course C235.

C136. Film and Literature of the Portuguese-Speaking World. Lecture, three hours. Not open for credit to students with credit for course 197. Topical survey (conducted in English) of major literary and historical themes of Brazilian culture, through films and literary texts, from colonial beginnings to the present.

C137. Undergraduate Seminar. Lecture, three hours. Variable topics course with readings, discussions, and papers; consult Schedule of Classes or department counselor for topic to be offered in a specific term.

C138. Special Studies (1 to 4 units). Prerequisite: consent of adviser and instructor. Eight units may be applied toward the major requirements.

Graduate Courses

M200. Research Resources. Same as Spanish M200. Lecture, three hours. Identification and use of research resources for graduate students.

M201. Literary Theory and Criticism. Same as Spanish M201. Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism.

M202. Synchronic Morphology and Phonology. Lecture, three hours. Study of theoretical synchronic linguistics as applied to Portuguese. Mr. Quicoli

M204A-204B. Generative Grammar. Lecture, three hours. Prerequisite: consent of instructor. Course 204A or consent of instructor is prerequisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, semiotics, and phonology on style, metaphor, and meter. Mr. Quicoli

M205A-M205B. Development of Portuguese and Spanish Languages. Same as Spanish M205A-M205B. Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

M224. Medieval Portuguese Literature. Lecture, three hours. Study of main genres of medieval Portuguese and Galician literature through representative works. May be concurrently scheduled with course C224.

M225. Renaissance Portuguese Literature. Lecture, three hours. Study of main genres of Renaissance Portuguese literature, with particular emphasis on the works of Luis de Camoens. May be concurrently scheduled with course C225.

M226. Baroque and Neoclassical Portuguese Literature. Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C226.

M227. Romanticism and Realism in Portuguese Literature. Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C227.

M228. Post-Romanticism and Naturalism in Portuguese Literature. Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C228.

M229. 20th-Century Portuguese Literature. Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C229.

C231. Colonial Brazilian Literature. Lecture, three hours. Study of most important authors to 1830. May be concurrently scheduled with course C131.

C232. Romanticism in Brazilian Literature. Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C132.

C233. Naturalism, Realism, and Symbolism in Brazilian Literature. Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C133.

C234. 20th-Century Brazilian Literature: Poetry and Drama. Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C134.

C235. 20th-Century Brazilian Literature: Novel. Lecture, three hours. Study of most important Brazilian novelists. May be concurrently scheduled with course C135.

M249. Folk Literature of the Spanish and Portuguese Worlds. Same as Folklore M249 and Spanish M249. Lecture, three hours. Intensive study of folklore of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

M251A-M251B. Studies in Galapagos and Spanish Colony. Same as Spanish M251A-M251B. Lecture, two hours. Study of problems related to historical development of Galapagos and Old Spanish.

M252. Studies in Early Portuguese Literature. Discussion, two hours. Mr. Dias

M253. Studies in Modern Portuguese Literature. Discussion, two hours. Mr. Dias

M254. Studies in Early Brazilian Literature. Discussion, two hours. Mr. Dias

M270. Teaching Portuguese in Secondary School. For future teachers in this field. Mr. Hulet

M275. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

M596. Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of graduate adviser and chair. Study or research in areas or subjects not offered as regular courses. No more than eight units may be applied toward M.A. course requirements.

M597. Preparation for Graduate Examinations (4 to 12 units). Prerequisites: official acceptance of candidacy by department, consent of graduate adviser. Independent study for M.A. comprehensive examinations. May be taken only once for each degree examination and only in a term that comprehensive or qualifying examinations are to be taken. S/U grading.

Speech

334 Kinsey Hall, (213) 825-3303

Professors
Neil M. Malamuth, Ph.D. (Communication Studies), Chair
Donald E. Hargis, Ph.D., Emeritus
Charles W. Lomas, Ph.D., Emeritus

Associate Professors
Paul T. Rosenthal, Ph.D. (Communication Studies; Distinguished Teaching Award)
Ralph Richardson, Ph.D., Emeritus

Lecturers
Dee A. Bridgewater, Ph.D.
Mardie S. Gregory, M.A.
Thomas E. Miller
Sonya H. Packer
Debra L. Schultz, Ph.D.

There is no major in speech; however, the following undergraduate courses are offered for interested students.

Lower Division Courses

1. Principles of Oral Communication. Prerequisite: satisfaction of Subject A requirement. Theory and practice of informal public speaking, including selection of content, organization of ideas, language, and delivery; practice in extemporaneous and manuscript speaking; training in critical analysis through reading and listening to contemporary speeches.

2. Public Speaking and Discussion. Prerequisite: course 1. Continuation of course 1, with special emphasis on group discussions, panels, symposia, debates, and formal public speaking. Critical analysis of speeches in both contemporary and historical settings.

Upper Division Courses

144. Speech and Community Action. Prerequisite: consent of instructor. Intensive laboratory-based, observation-oriented study of speech and communication practices of action groups, protest groups, and public officials involved with the metropolitan Los Angeles urban crises.

175. Speeches of Abraham Lincoln. Introduction to full span of Lincoln’s speaking career. His methods of preparation, influence of associates, his style, his delivery, and lastly, his effect on the nation.

Master of Arts in Teaching English as a Second Language (TESL)

Admission

Students normally apply for the M.A. in TESL if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only at the beginning of Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor’s degree.

After admission, you must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is required in order to continue into the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser and are due by December 30 of the year prior to admission. The program requires three letters of recommendation in support of the application. You are requested to submit the letters of recommendation directly to the Graduate Adviser, Department of Teaching English as a Second Language and Applied Linguistics, 3300A Rolfe Hall, UCLA, Los Angeles, CA 90024-1531. Since admission is limited to approximately 25 students per year, it is important that supporting papers be submitted by January 15.

The admissions committee screen all applications, using the following criteria: grade-point average (must be 3.0 or better), Graduate Record Examination (GRE) scores (required...
only of applicants whose native language is English), letters of recommendation, statement of purpose, and relevant professional experience. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study TESL at UCLA; (2) special qualifications and experience as a teacher; (3) knowledge of languages other than English; and (4) knowledge of other cultures.

International students who hold a bachelor’s or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from both the Test of English as a Foreign Language (TOEFL) and the UCLA English as a Second Language Placement Examination (ESLPE). However, the department recommends that applicants who can waive the TOEFL requirement submit GRE scores, if possible. All other applicants must take the TOEFL, submitting the score as part of the application process.

Foreign Language Requirement
Students whose native language is English generally use their Fall and Winter Quarter electives to acquire or perfect knowledge of the native language or dialect of the pupils to whom they expect to teach English. This can be done by taking any one of four combinations of two courses: (1) two foreign language courses; (2) one foreign language course plus a corresponding course in the Linguistics 220 or 225 series; (3) one foreign language course plus Teaching English as a Second Language and Applied Linguistics M224; (4) course 227 plus an unrestricted elective.

Those particularly interested in working with Mexican American, Asian American, or American Indian pupils normally choose the third of these alternatives. When there is doubt as to which language is most appropriate, a non-European language should be selected because of the greater broadening of linguistic horizons that such a selection offers. For a foreign language courses that deal with linguistic structure should be selected whenever possible.

Nonnative speakers of English, depending on the results of the UCLA English as a Second Language Placement Examination (ESLPE), may be required to take a course to improve their practical command of English. Exemption from the foreign language requirement may be granted if you can demonstrate a strong need to take other electives and have an unusually extensive background of previous foreign language study. For more information, contact the graduate adviser.

First-Year Curriculum
The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Teaching English as a Second Language and Applied Linguistics 370, Linguistics 100, foreign language requirement or elective (course depends on language requirement plan)
Winter Quarter: Courses 122, 241, foreign language requirement or elective (course depends on language requirement plan)
Spring Quarter: Courses 106 or 107 or 109, 380, 103 or Linguistics 103

Exceptions to the above requirements are made only after consultation with the graduate adviser.

Of the nine courses required in the first year, at least seven must be in TESL and applied linguistics, linguistics, or structure of language courses in language departments.

Successful completion of the above courses qualifies students for a TESL certificate (which is not a California State Instructional Credential).

Teaching Experience
One term of supervised teaching is required during the first year unless you have had extensive teaching experience. If this requirement is completed at UCLA in an adult education setting, you are eligible for the California Adult Education Credential in ESL (call 825-4581 for more information). The California Basic Educational Skills Test is required of all applicants for the credential.

Second-Year Curriculum
A total of 14 courses is required for the M.A. degree, including a minimum of four 200-series courses. Four of the nine courses taken during the first year (usually Teaching English as a Second Language and Applied Linguistics 122, 241, 103 or Linguistics 103, and Linguistics 100) and, in special cases, two of the electives (100 or 200 series only) may be applied toward the University’s nine-course minimum requirement for master’s degrees. This leaves five courses, at least two of which must be at the graduate level, to be completed in consultation with the graduate adviser during the second year.

Eight units of 500-series courses may be applied toward the M.A. degree, but only four units may be applied toward the graduate course requirement. You must enroll in course 598 each term you are registered; however, only four units may be applied toward the degree (to be taken either in Spring Quarter of your first year or Fall Quarter of your second year).

Course 400 is a seminar in which TESL M.A. candidates present and defend the results of their thesis research. Enrollment is required in Spring Quarter but does not count as one of the 14 courses required for the M.A.

The electives taken during your second year should be selected, in consultation with the faculty M.A. adviser and the chair of your thesis committee, as a sequence of related courses relevant to your thesis topic. Any changes in the program must be approved by both the committee chair and the M.A. adviser.

Thesis Plan
By the end of the fourth term, your thesis proposal, signed by two faculty members, is submitted to the faculty. At this time, plans for the thesis are approved and the thesis committee is established.

Upper Division Courses

103. Phonetics for Teachers of English as a Second Language. (Formerly numbered English 103K) Prerequisite: consent of instructor. Analysis of phonological structure of contemporary English, with attention to differences between British and American speech. Drill directed toward individual needs. Ms. Goodwin, Mr. Rand

106. Writing in the ESL Context. (Formerly numbered English 106K) Provides opportunities for practice and improvement in writing skills and thus fulfills composition requirement for TESL M.A. degree. Survey of important theoretical and methodological issues related to teaching writing/composition to ESL students and examination of appropriate classroom materials and authentic student compositions. Ms. Holten (F)

107. Reading in the ESL Context. (Formerly numbered English 107K) Provides opportunities for practice and improvement in reading and writing skills and thus fulfills composition requirement for TESL M.A. degree. Survey of important theoretical and methodological issues related to teaching reading and writing to ESL students and examination of appropriate classroom materials. Ms. Jensen (W)

109. Literature in the ESL Context. (Formerly numbered English 109K) Provides opportunities for practice and improvement in writing skills and thus fulfills composition requirement for TESL M.A. degree. Survey of important theoretical and methodological issues related to teaching literature to ESL students and examination of appropriate classroom materials. Strong emphasis on the cultural basis for literature. Mr. Povey (Sp)

122. Introduction to Structure of Present-Day English (for Teachers of English as a Second Language). (Formerly numbered English 122K) Prerequisite: Linguistics 100 or consent of instructor. Introductory study of those grammatical structures of English most important in ESL classroom. Aims to provide insights from traditional, structural, and particularly transformational grammar. Ms. Celce-Murcia (W)

Graduate Courses
All graduate courses are open to qualified graduate students from other departments with consent of department.
264. English for Specific Purposes. (Formerly numbered English 284K.) Study of methodologies for needs analysis, curriculum development, and testing for specific academic, professional, and vocational groups who require English as a foreign or second language. Mr. Campbell (W)

265. Studies in African Literature in English. (Formerly numbered English M285K.) (Same as English 285K.) Lecture. May be repeated for credit. Prerequisites: one semester of English as a Second Language (ESL), and reading and language background. May be counted as a specialty course by students in TESL and applied linguistics. Emphasis varies according to current topics of concern in the field. Mr. Campbell, Ms. Ochs (W)

267. Experiential Seminar in Second Language Learning. (Formerly numbered English 227K) Lecture, one hour; laboratory, four hours. Prerequisites: graduate standing. Students learn an uncommonly taught language with use of authentic language materials (video and audio recordings and print materials). Discussion of experience in terms of issues in language learning and language teaching. Mr. Campbell, Mr. Lynch (W)

268. Current Issues in Language Education. (Formerly numbered English 228K) Specialized topics in language education of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical concern in the field. Ms. Celce-Murcia, Mr. Rand

271. Cross-Linguistic Topics in Second Language Acquisition. (Formerly numbered English 271K.) Lecture, one hour; discussion, three hours. Prerequisites: course 261, Linguistics 100. Advanced seminar on second language acquisition in which a particular linguistic topic (e.g., development of tense-aspect, reference, subordination, agreement) is pursued from cross-linguistic and applied linguistic perspectives. Students focus on language-specific vs. universal (i.e., cross-linguistically valid) mechanisms of second language development. Readings from research on a variety of languages in second language education, along with related research on first language acquisition, pidgins and creoles, language contact, and language loss. May be repeated for credit with topic change. Mr. Andersen (Sp)

280. Language Policy in Developing Countries. (Formerly numbered English 280K.) Prerequisite: consent of instructor. Use of and need for English in countries such as Nigeria and the Philippines; factors affecting language policy in their school systems; applicability of research techniques of sociolinguistics and psycholinguistics to problems of language policy. Mr. Povey
English as a Second Language (ESL) Service Courses

3308 Rolfe Hall, (213) 825-4378

Courses 32, 33A, 33B, 33C, 34, 35, 36, 103, 106, 107, 109 are only for students whose native language is other than English. Placement in these courses is established on the basis of the UCLA English as a Second Language Placement Examination (ESLPE), which students whose native language is not English must take in addition to the Subject A Examination (see "Subject A" in Chapter 2).

Depending on the results of this examination, you may either be exempt from any special ESL requirement or may be required to take one or more courses. You are placed into the ESL track at a particular level and must enroll in one ESL course each term, beginning in your first term in residence at UCLA, until the sequence is completed. The required sequence for undergraduates is English as a Second Language 33A, 33B, 33C, and 33E; each course must be passed with a grade of C or better (C — or a Passed grade is not acceptable). The required sequence for graduate students is English as a Second Language 33A, 33B, and 33C; each course must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. If you do not achieve a minimum score on the placement examination, you may be required to spend a term studying elementary English exclusively, through UCLA Extension, before retaking the ESLPE and continuing through the appropriate sequence of courses at UCLA.

Undergraduates may satisfy the English Composition requirement by completing course 36 with a grade of C or better (C — or a Passed grade is not acceptable). Admission into course 36 is determined by a Composition Placement Test administered the first day of each class term.

Lower Division Courses

32. Oral Communication Skills for ESL Students. (Formerly numbered English 32.) Prerequisite: grade of C or better in course 32B or proficiency demonstrated on English as a Second Language Placement Examination. Course 33C may be taken concurrently. Develops oral skills that prepare nonnative speakers of English to participate in class discussion, make oral presentations before an audience, ask and answer questions posed by the audience, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

33A. Low Intermediate English as a Second Language. (Formerly numbered English 33A.) Prerequisite: grade of C or better in course 33A or proficiency demonstrated on English as a Second Language Placement Examination. Course 33C may be taken concurrently. Develops oral skills that prepare nonnative speakers of English to participate in class discussion, make oral presentations before an audience, ask and answer questions posed by the audience, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

33B. High Intermediate English as a Second Language. (Formerly numbered English 33B.) Prerequisite: grade of C or better in course 33A or proficiency demonstrated on English as a Second Language Placement Examination. Place candidates for Ph.D. in Applied Linguistics. S/U grading. (Formerly numbered English 33B.) Prerequisite: grade of C or better in course 33C or proficiency demonstrated on English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Focus on production of fully developed, stylistically sophisticated expository and argumentative essays based on complex academic readings. Additional emphasis on grammatical structure and style.

33C. Advanced English as a Second Language. (Formerly numbered English 33C.) Prerequisite: grade of C or better in course 33B or proficiency demonstrated on English as a Second Language Placement Examination. Focus on improving reading rate and comprehension, expanding academic vocabulary, and developing critical reading skills.

Scope and Objectives

Cities are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in urban studies brings together students and faculty from the Departments of History, Political Science, Economics, Sociology, Psychology, and Geography who share an interest in the modern city. The program gives students a solid grounding in the urban perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

Upper Division Courses

103. Pronunciation for ESL Students. (Formerly numbered English 103J.) Prerequisite: grade of C or better in course 33C or proficiency demonstrated on English as a Second Language Placement Examination. Detailed and systematic study of the sounds of American English and way in which they are put together in connected speech, applied to improvement of student's own accent.

106. Advanced Composition for ESL Students. (Formerly numbered English 106J.) Prerequisite: grade of C or better in course 33E or proficiency demonstrated on English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Focus on production of fully developed, stylistically sophisticated expository and argumentative essays based on complex academic readings. Additional emphasis on grammatical structure and style.

109. Introduction to Literature for ESL Students. (Formerly numbered English 109J.) Prerequisite: grade of C or better in course 33C or proficiency demonstrated on English as a Second Language Placement Examination. Selections from English and American literature presented so as to make full allowance for students' linguistic and cultural problems and to contribute to increasing command of the English language.

Urban Studies (Interdepartmental)

4256 Bunche Hall, (213) 825-3862
Special Undergraduate Program

You may elect to combine this program with a departmental major and may petition to have the area of specialization recognized with the bachelor’s degree.

The option of completing an individual major in urban studies is also open to qualified students. For more information on individual majors, see the beginning of Chapter 5.

If you have a departmental major, you should seek advising in your major department. If you are interested in the individual major, consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

Preparation for the Specialization

Required: At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1 and 2; Sociology 18 and 104 or equivalent; Political Science 40; Psychology 10; Sociology 1; Geography 4.

Upper Division

Required: Nine upper division courses, including (1) at least three courses outside your major department selected from Sociology 158, Economics 120, Geography 150, Anthropology 167, Psychology 168; (2) a minimum of three courses selected from one of the following suites within your major department: Political Science 181, 183A, 183B; Economics 121, 130, 133; Sociology 132, 156, 160; Geography 145, 146, 150, 151, 152, 156; History 154A, 154B, 154C, 154D; Psychology 127, 135, 137A; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside your major department; (4) internship experience in an urban governmental or community service organization.

Professor Eric Monktron (5262 Bunche Hall, 825-3376) is the program adviser. For further information, contact Vicki Waldman at the program address.

Adjunct Associate Professor

Jacqueline D. Goodchilds, Ph.D. (Psychology)

Scope and Objectives

The Women’s Studies Program, established in 1975, is an interdisciplinary academic program spanning departments, disciplines, and ideologies and offering two options for study: an undergraduate major and a specialization. Students wishing to focus their studies on multidisciplinary perspectives in order to create a coherent and comprehensive analysis of women and gender may elect the major. Those wishing to enhance study in a traditional discipline may elect the women’s studies specialization in addition to a major in their chosen discipline.

The program offers the singular opportunity to study the full range of human experience and arrangements of social organization from the perspectives of those whose participation has been traditionally distorted, omitted, neglected, or denied — women. Students develop critical reasoning and analytical skills, research and communication skills, a deep appreciation for complexities of power, asymmetries in gender relations across time, class, and cultures, and conceptual tools for social change. Strong emphasis on multidisciplinary and multiethnic approaches assures a broader exposure to the humanities and social sciences than is commonly available within disciplinary confines. A background in women’s studies offers unique contextual validation for today’s woman and prepares students for a wide range of career and life choices, as well as for advanced study in traditional disciplines and the professions.

The field of women’s studies has exploded over the past 20 years. It has developed a theoretical base, body of knowledge, and perspective which cannot be attained as a by-product of studying other fields. Where the study of women has been neglected or omitted, the field develops new knowledge through research and fills in gaps in the existing curriculum. Further, women’s studies generates new perspectives on existing knowledge of women and gender, offers a critique of accepted beliefs and ideas, intellectually challenges existing structures of knowledge, and introduces new conceptual paradigms.

The core faculty members who teach women’s studies courses come from various UCLA departments and professional schools. Many professionals within and outside the University contribute their time, expertise, and enthusiasm. A women’s studies committee composed of the director, faculty members, and a student representative sets program policies and curricula.

The program sponsors a Student Association for Women’s Studies and assists other student groups with extracurricular programming on feminist issues. Research in women’s studies is sponsored in cooperation with the Center for the Study of Women. A library of information related to women’s studies is housed in the program office.

While no formal graduate program exists at UCLA at this time, graduate students are invited to use the program’s resources, attend lectures and events, and participate in the faculty seminar on women, culture, and theory.

Requirements for the Undergraduate Programs

Admission

To be admitted to either the major or specialization, you must have completed Women’s Studies 10, be in good standing, and formally register with the program. You are encouraged to declare your major or specialization as early as possible and to discuss your proposed course of study with the director or undergraduate adviser.

You are encouraged to draw on the University’s diverse resources in creating your major or specialization program. You may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women’s studies approved list, you may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.
Bachelor of Arts in Women's Studies

The interdisciplinary major in women's studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

All courses applied toward the major must be taken for a letter grade, and you must have a GPA of 2.0 or better in women's studies courses to receive credit for completing the program. Courses in which you receive a grade below C may not be applied toward the major.

Preparation for the Major

Required: Women's Studies 10.

The Major

Required: Thirteen upper division courses as follows:

1. Three core courses, including Women's Studies 197 (departmental 197 courses may not be applied), one course from 110A through M110D, and one course on the study of American ethnic minority women from the approved list of women's studies credit courses issued each term by the program.

2. Four distribution courses, one from each of four different departments, selected from the approved list of women's studies courses.

For the purpose of the ethnic studies requirement and the distribution requirement, appropriate Council on Educational Development (CED) field studies, and Women's Studies 110A, 110B, 110C, M110D, 120, 130, 170, and 185 may be considered.

3. Six additional concentration courses from one or two of the fields in which your distribution courses have been taken. You may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, women's health, or lesbian studies.

Four units of Women's Studies 199 may be applied toward either the distribution or concentration requirement for the major (departmental 199 courses are not affected by this limit).

Women's Studies Specialization

The specialization augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the women's studies specialization.

You must take three core courses (Women's Studies 10, 197, and one course from 110A through M110D), plus five upper division elective courses from the approved list of women's studies credit courses issued each term by the program. One course on American ethnic minority women is strongly recommended. At least one of the five courses must be taken in a department other than the major department. Up to two may be experimental courses offered by the Council on Educational Development (CED). No more than four units of course 199 may be applied.

All courses applied toward the specialization must be taken for a letter grade, and you must have a GPA of 2.0 or better in women's studies courses to receive credit for completing the program. Courses in which you receive a grade below C may not be applied toward the specialization.

Lower Division Courses

10. Introduction to Women's Studies: Feminist Perspectives on Women and Society. Lecture, two and one-half hours; discussion, one hour. Introduction to study of women and men; feminist theory; perspectives of women and men on change in structure, roles of women and men; social roles of women and men and movements for social change.

Upper Division Courses

110A. Feminist Theories: Social and Political. Lecture/discussion, three hours. Prerequisite: course 10. Examination in depth of differing feminist theorists' perspectives on social and political issues. Social and political positions of women and men; feminist theory and social and political issues; feminist theory in the workplace, family, cultural institutions; historical basis of women's subordination; the female experience; the male experience; relations between women and men; intersections of ethnicity, class, and gender; violence against women; cultural images of women and men; social roles of women and men and movements for social change.

Supporting Upper Division Courses

M107A. American Women Writers. (Formerly numbered M107.) (Same as English M107A.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

Ms. Banta, Ms. Rowe, Ms. Smith

M107B. British Women Writers. (Formerly numbered M107.) (Same as English M107B.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

Ms. Lewis, Ms. Melior, Ms. Yeazell (W)

M107C. Special Topics in Women and Literature. (Formerly numbered M107.) (Same as English M107C.) Prerequisite: satisfaction of Subject A requirement. Specialized study course in women and literature, with emphasis on a period, genre, particular theme, or nontraditional literary grouping.

Ms. Cheung, Ms. Melior, Ms. Saldivar-Hull

M137E. Work Behavior of Women and Men. (Same as Psychology M137E.) Prerequisite: course 10 or Psychology 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

Ms. Goodchilds

M148. Women in Higher Education. (Same as Education M148.) Prerequisite: upper division standing. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.

Ms. Astin
M158. Women in Italian Culture. (Same as Italian M158.) Lecture, three hours. Designed with intent of examining role that women have played in Italian society. Concentration alternatively on the world of medieval and Renaissance "matriarch" and on "liberated" women of our times. Historical and political documents and social and religious taboos presented and discussed, together with other data derived from literature and art. Italian majors required to read texts in Italian and to prepare papers written in Italian.

Mrs. Cottino-Jones

M162. Sex Roles and Society. (Formerly numbered M102.) (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Prerequisite: course 10 or Sociology 1 or consent of instructor. Consideration of sociological literature pertaining to development and functions of sex roles in society from a critical perspective. Topics include socialization and gender norms, contemporary sex role strain, and challenge to traditional notions of sex roles posed by feminist critique.

Ms. Hart

M163. Women in Culture and Society. (Same as Anthropology M163.) Lecture, three hours. Prerequisite: Sociology 9. Systematic approach to study of sex roles from an anthropological perspective. Critical review of relevant theoretical issues supported by ethnographic material from traditional cultures and contemporary American culture.

Ms. Sacks

M164. Gender and Work. (Same as Sociology M164.) Lecture, three hours. Prerequisite: course 10 or Sociology 1 or consent of instructor. Exploration of relationships of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality.

Ms. Milkman

M165. Psychology of Gender. (Same as Psychology M165.) Lecture, two hours; discussion, one hour. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.

Ms. Peplau

M170. Jurisprudence of Sexual Equality. Prerequisites: course 10 and one course from 110A through M110D or Political Science 10 or Philosophy 6 or 0 or consent of instructor. Exploration of models of equality described and/or advocated by legal theorists — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment or pregnancy leave policy) for purposes of comparison and critique.

Ms. Littleton

M172. The Afro-American Woman in the U.S. (Same as Afro-American Studies M172 and Psychology M172.) Prerequisite: upper division standing. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

Ms. Mays

Supporting Courses in Other Departments

Check with the program office for additional course listings.

Anthropology 151. Marriage, Family, and Kinship

263P. Gender Systems

Asian American Studies 105. Asian American Women

Classics 150A. Origins of the Western View of Women: The Female in Greek Thought

150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought

Communication Studies 153. The Media and Aggression Against Women

Community Health Sciences 176E. Family and Sexual Violence

English 180X. Specialized Studies in Literature

French 145. Topics in French Literature: From Nature (Female?) to Culture (Male?)

158. Woman in French Literature

History 137A-137B-137C. History of Women in Europe 156C-156D-156E. Social History of American Women 156F-156G. History of the American Family

197. Undergraduate Seminars

Humanities C184. Alternative Tradition: In Search of a Female Voice in Contemporary Literature

Political Science 149A. Special Studies in Politics: Women and the Political Process

179A. Special Studies in Public Law: Women and Law

Psychology 197A. Social Psychology of the Lesbian Experience

231. Psychology of Gender

World Arts and Cultures

(Interdepartmental)

An intercollege, interdepartmental major in world arts and cultures is open to students in both the College of Letters and Science and the School of the Arts. You enroll in the college or school of your choice and fulfill the general education requirements of that college or school. For details on this undergraduate major, see Chapter 6 on the School of the Arts.
School of the Arts

J. Bernard Kester, Acting Dean

The School of the Arts is a stimulating academic center dedicated to the education of socially aware and technically skilled artists. It serves as a vital component of the Los Angeles arts community and a resource for the entertainment industry and related fields. While the school offers a broad intellectual and cultural exchange for students, it also provides a learning environment where they can pursue and develop academic and creative excellence.

In addition to a quality education in the arts and liberal studies, students may contribute to the UCLA/Los Angeles community through direct participation in over 35 dance productions, four art and design exhibitions, and 200 music concerts.

The school has five departments — Art, Dance, Design, Ethnomusicology and Systematic Musicology, and Music — and one intercollege, interdepartmental program — World Arts and Cultures.
School of the Arts

A239 Murphy Hall, (213) 825-9705

The departments of the School of the Arts both borrow from and add to the rich and varied cultural life of the campus. Students in the Departments of Art and Design are taught to understand the broad panorama of the visual arts, while those in the Dance Department have opportunity to study ballet, modern, and ethnic dance forms. Students in the Department of Ethnomusicology and Systematic Musicology study all styles of music in the world from an ethnographic perspective. And the Music Department offers specializations in performance and composition, music theory, and performance.

World arts and cultures is an undergraduate major which integrates art, dance, music, theater, anthropology, and folklore and mythology into one unique program. This interdisciplinary major is offered jointly by the School of the Arts and the College of Letters and Science.

Informative brochures on the school are available from the Student Services Office, A239 Murphy Hall, UCLA, Los Angeles, CA 90024-1427.

If you are interested in obtaining instructional credentials for California elementary and secondary schools, consult the Graduate School of Education, 201 Moore Hall.

Bachelor of Arts Degrees

Admission

In addition to the University of California Undergraduate Application, departments in the School of the Arts require auditions, portfolios, or evidence of creativity. Detailed information on departmental requirements is mailed to you on receipt of your application. Deadline date for applications is November 30, 1990, for admission in Fall Quarter 1991.

The Study List

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After your first term, you may petition to carry more than 17 units (up to 20 units maximum) if you have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If you have not filed your Study List by the end of the second week of classes, you must obtain the consent of the dean of the school to continue for that term.

Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

Degree Requirements

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see "Undergraduate Degree Requirements" in Chapter 2 of this catalog.

School of the Arts students enrolled in English as a Second Language 33A, 33B, 33C must take the courses for a letter grade.

School Requirements

The general requirements of the School of the Arts must be completed with a grade-point average of 2.0 or better.

Reciprocity with Other UC Campuses — Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to arriving at UCLA are not required to complete the School of the Arts general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to Director of Student Services, School of the Arts, A239 Murphy Hall, UCLA, Los Angeles, CA 90024-1427.

Transfer Core Curriculum — Transfer students from non-UC schools have the option to fulfill UCLA's lower division general education requirements by completing a transfer core curriculum prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and California community colleges. The transfer core curriculum significantly eases the transfer process, as all of UCLA's general education requirements are fulfilled when you complete it. If you select the transfer core curriculum, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the School of the Arts general education requirements. The Office of Undergraduate Admissions and Relations with Schools determines, at the point of admission, your completion of the transfer core.

*These majors have been transferred to the College of Letters and Science.
SCHOOL OF THE ARTS / 339

For specific courses that fulfill the general education requirements, consult the Student Services Office before enrolling. Courses listed below are used only as a guideline for 1990-91. Note: Courses that include the review of film or television may not be applied toward any general education requirements.

English Composition and Rhetoric (4 Units)
English 3 with a grade of C (2.0) or better must be completed by the end of your freshman year and may not be taken on a Passed/Not Passed basis.

Critical Reading and Writing (4 Units)
One course from English 4, Humanities 2A, 2B, or 2C with a grade of C (2.0) or better must be completed by the end of your sophomore year and may not be taken on a Passed/Not Passed basis.

Foreign Language (12 Units)
Three terms of one foreign language through level three are required. This requirement must be completed by the end of your sophomore year. If at least four quarter units of level three are completed without taking level one or two, an additional eight units must be completed from courses listed below in science, social sciences, or humanities. International students whose entire secondary education has been taken in a language other than English may petition to be exempt from the foreign language requirement.

Science (8 Units)
One course in physical or biological sciences and one course in natural sciences, mathematics, or another physical/biological science are required.

Physical and Biological Sciences Courses
- Astronomy 3, 4, 81, 82, Atmospheric Sciences 2, 3, 10H, 11, Biology 2, 3, 5, 6, 7, 8, 13, 20, 25, chemistry, Earth and Space Sciences 1, 2, 5, 9, 10, 15, 51A, 51B, Honors Collegium 73, Kinesiology 13, 17A, Microbiology and Molecular Genetics 6, physics (except Physics 10, 14A, 14B).

Other Natural Sciences and Mathematics Courses
- Anthropology 7, 10, 12, Atmospheric Sciences 1, 5, 6, 8, Biology 10, 35, 70, Earth and Space Sciences 8, 16, 20, 115, Geography 1, 2, 5, Honors Collegium 5, 40, mathematics (no computer, remedial, historical, or statistical), Physics 10, 14A, 14B, Psychology 15, 115, 116.

Social Sciences (12 Units)
Two courses from the Department of History (one in any period prior to 1600, one in any period after 1600) and one other social sciences course are required. Note: Survey courses in history which cover "antiquesto present" may be applied only on history after 1600 or on other social sciences courses.

Other Social Sciences Courses — Anthropology 8, 9, 33, 44, 60, and selected upper division courses; Economics 1, 2, 5, and selected upper division courses; Geography 3, 4, and selected upper division courses; history (except medical or geological); Honors Collegium 2, 3, 7A, 42, 56, 61, 62, 68, 75, 94, 97; Near Eastern languages (Ancient Near East 163A, 163B, Jewish Studies 140A, 140B, 141, 142); Political Science 1, 10, 20, 40, 50, 70, 80, and selected upper division courses; Psychology 10, 11, 42, and selected upper division courses; Sociology 1, 2, 3, 4, 31, and selected upper division courses.

Humanities (12 Units)
One course in the arts, one course in literature, and one course in philosophy and/or religion are required. Performance, studio, or film and television courses and those in your major field do not meet this requirement.

Literature Courses — Selected courses in English, ethnic, American, or foreign literature, including works in translation; Classics 10, 20, 40, 41, 142, 143, 161, 162; Folklore and Mythology 15, 101, 108, 113, 130; Honors Collegium 51; humanities, except those that are M courses.

Philosophy/Religion Courses — Anthropology 156; Classics 166A, 166B; East Asian languages (Chinese 160, 165, 175, East Asian Languages and Cultures 60, Japanese 160, 175, Korean 175); Near Eastern languages (Ancient Near East 130, Iranian 170, Islamic 110); Philosophy 1 through 32 and selected upper division courses.

A few course areas that may NOT be applied toward the general education requirements are multiple-listed (M) courses, business, communications, creative writing, criminology, education, engineering, family life, marriage and child care, field studies, home economics, independent studies, interdisciplinary studies, journalism, law, mass media, public health, special or selected topics, and speech. Also no 198, 199, or CED courses and no seminars, proseminars, or freshman seminars may be applied toward the general requirements of the school.

Additional Nonmajor Field Requirements
Three upper division courses (12 units) must be completed outside your major field. These courses may not be applied toward the general education requirements. Studio, performance, activity, independent study, debate courses, children's theater, creative dramatics, internships, and field studies courses may not be applied as additional nonmajor courses. Consult your departmental or school counselor for clarification.

Unit Requirements
Double majors in the school, or between the school and other academic units, are not permitted. You must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Entrance Examination Board (CEEB) Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If you take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

Residence Requirements
You are "in residence" while enrolled and attending classes at UCLA as a major in the School of the Arts. Of the last 45 units completed for the bachelor's degree, 35 must be earned in residence in the School of the Arts. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.
Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

**Major Requirements**
A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). All majors include both lower and upper division courses. Those listed under "Preparation for the Major" (lower division) must be completed before upper division major work is undertaken.

You must complete your major with a scholarship average of at least 2.0 (C) in all courses in order to remain in the major and must be recommended by the chair of your major department. All courses in your major department must be taken for a letter grade.

As changes in major requirements occur, you are expected to satisfy the new requirements asof possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of the Arts may require a general final examination.

**Scholarship and Minimum Progress**
A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applying to the general education and University requirements.

**Minimum Progress** — You are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; you are placed on probation if you fail to pass these units. You are subject to dismissal if you fail to pass at least 32 units in three consecutive regular terms in residence.

**World Arts and Cultures**
The interdepartmental major in world arts and cultures is open to students in both the School of the Arts and the College of Letters and Science. You enroll in the college or school of your choice and fulfill the general education requirements of that college or school. Counseling is available — consult Silvily Kessler Thomas in the World Arts and Cultures Office, A129 Fowler Building. For details on the major, see the section later in this chapter.

**Honors**
To receive Dean's Honors in the School of the Arts, you must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on your transcript for the appropriate term. You are not eligible for Dean's Honors in any given term if you receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors with the Bachelor's Degree are awarded to students with superior grade-point averages. To be eligible, you must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are: cum laude, an overall average of 3.575; magna cum laude, 3.674; summa cum laude, 3.77.

**Counseling and Program Planning**
The School of the Arts offers preadmission advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check sent to each student. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of the Arts, A239 Murphy Hall (825-9705).

**Graduate Study**
The advanced degree programs offered in the School of the Arts provide graduate students with unique research opportunities when combined with special resources, such as the University Research Library, the special collections of the Art and Music Libraries, and the University's exhibition and performance halls.

The School of the Arts cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Arts Management. Participating students serve quarter-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

A program in teaching is offered by the Graduate School of Education in each of the arts areas. Fellowships, grants, and assistantships are available through the dean of the Graduate Division. The Graduate affirmative Affairs Office provides counseling, academic support, and financial assistance to ethnic minority students.

**Admission**
In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. In general, samples of your work (dance or music audition, art portfolio, etc.) are required. Detailed information can be found in the departmental listings which follow.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

**Other Requirements**
Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings which follow for specific requirements and procedures.

**Art**

1300 Dickson Art Center, (213) 825-3281

**Professors**
Samuel Amato, B.F.A.
William J. Brice
Raymond B. Brown, M.A.
Chris Burden, M.F.A.
Elliott J. Elgart, M.F.A.
Robert F. Heinecken, M.A.
Lee Mullican, Emeritus
Gordon M. Nunes, M.A., Emeritus

**Associate Professor**
Charles Ray, M.F.A.

**Assistant Professors**
Barbara Drucker, M.F.A.
Roger Herman, M.F.A.
Mark McFadden, M.F.A.
Patria Wickman, M.F.A.

**Lecturers**
Anne-Marie Karlsen, M.F.A.
Don Suggs, M.F.A.

**Visiting Assistant Professor**
Paul McCarthy, M.F.A.

**Scope and Objectives**
Art courses include painting and drawing, sculpture, printmaking, photography, and new alternative media (which include performance, installation, video, and other nontraditional media). Students are introduced to diverse media and ideas in lower division courses and have the opportunity to specialize in upper division. Individual expression is encouraged in a general way for those who wish careers requiring art-related knowledge and in a specific sense for those who go on to careers as professional artists.

The Department of Art curricula lead to the Bachelor of Arts, Master of Arts, and Master of Fine Arts degrees. All programs benefit from the rich and varied art resources at UCLA and in the Los Angeles community.
Bachelor of Arts Degree

Preparation for the Major
Required: Art 5A, 5B, 5C, 15A, 15B, and two courses from Art History 50 through 57.

The Major
Required: A minimum of 14 upper division courses, including Art 130, 133, 137, 140, 145, 147, and 148; two courses from Art History 101A through 121B (or one course from Art History 101A through 121B, and Art 149), and five courses of art electives. It is recommended that you have each term’s program approved by the departmental adviser.

Master of Arts Degree

Admission
Students are admitted in Fall Quarter only. Regular admission requires a B.A. or equivalent and faculty consent following the annual review of creative work in February. Applicants must submit slides (maximum 20) or videotape (if applying to the video field) to the Counselor, Department of Art, 1300 Dickson, UCLA, Los Angeles, CA 90024-1615.

Provisional admission may be granted for work with faculty sponsors for three terms, pending reconsideration of regular admission.

Major Fields or Subdisciplines
Drawing, painting, sculpture, printmaking, photography, and alternative media. No limit to the variations, extent, or value of these designations is intended.

Course Requirements
A minimum of 36 quarter units of art courses numbered 130 through 279 (or courses from other departments that may be recommended by your adviser or committee chair) is required, with a B average or better.

Within those 36 units, a minimum of 20 quarter units in the 200 series must be taken in your field of specialization.

A minimum of 36 quarter units of art history, theory, and criticism in undergraduate and/or graduate study is required. Art history courses completed at the undergraduate level may be applied toward the 36-unit art history requirement but may not be applied toward the 36 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be applied toward the 36-unit art history requirement and toward the total units required for the degree. Subjects related to your special interest may be substituted by petition.

A total of eight units of Art 596 may be applied toward the 36 units required for the degree; four units may be applied toward the graduate course requirement.

Comprehensive Examination Plan
Each degree is granted on the basis of the quality of work as demonstrated in the exhibition which accompanies the final comprehensive examination. The number of units of credit attained is irrelevant to this judgment.

A preconcluding review of work precedes the final comprehensive examination. The examination, usually oral, includes a formal exhibition of work and a document of vita, photo records of works, and a statement of the artist. The document is retained as property of the University.

Master of Fine Arts Degree

Admission
Students are admitted in Fall Quarter only. See “Admission” under the Master of Arts degree above.

The M.A. is not prerequisite to the M.F.A. but may be elected as your stated degree objective. Usually, however, students proceed directly to the M.F.A. as a terminal degree. The unit requirements applied to the M.A. do not apply to the M.F.A., with the exception of the accumulative art history units.

Major Fields or Subdisciplines
Drawing, painting, sculpture, printmaking, photography, and alternative media. No limit to the variations, extent, or value of these designations is intended.

Course Requirements
A minimum of 72 quarter units of art courses numbered 130 through 279 is required, with a B average or better. Within those 72 units, a minimum of 40 quarter units in the 200 series must be taken in your field of specialization.

A minimum of 40 quarter units of art history in undergraduate and/or graduate study is required. Art history courses completed at the undergraduate level may be applied toward the 40-unit art history requirement but may not be applied toward the 72 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be applied toward the 40-unit art history requirement and toward the total units required for the degree. Subjects related to your special interest may be substituted by petition.

A total of 12 units of Art 596 may be applied toward the 72 units required for the degree; four units may be applied toward the graduate course requirement.

Comprehensive Examination Plan
Same as the plan offered for the Master of Arts degree, as noted above.

Lower Division Courses

5A. Introduction to Art. Studio, eight hours; five hours arranged. Creative work in fine arts related to historical and contemporary issues selected from media such as drawing, painting, sculpture, printmaking, photography, and new forms and concepts (performance, video, nonobject art).

5B. Introduction to Art. Studio, eight hours; five hours arranged. Prerequisite: course 5A. Continuation of course 5A.

5C. Introduction to Art. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B. Continuation of courses 5A, 5B.

15A. Intermediate Art. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C. Continuation of courses 5A, 5B, 5C, with increased emphasis on individual creative development.

15B. Intermediate Art. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A. Continuation of courses 5A, 5B, 5C, 15A, with increased emphasis on individual creative development.

Upper Division Courses

130. Drawing. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Varied media and subject; drawing as an intrinsically expressive mode. May be repeated for a maximum of 16 units.

Mr. Elgart and the Staff (F,W,Sp)

133. Painting. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Varied media, purposes, subjects, structures, presentation, meaning. May be repeated for a maximum of 16 units.

Mr. Amato, Mr. Herman, and the Staff (F,W,Sp)

137. New Genre. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Projects in installation, performance, video, film, and other nontraditional media and processes. May be repeated for a maximum of 16 units.

Mr. Burden and the Staff (F,W,Sp)

140. Printmaking. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Selected studies in fine printmaking, historical and contemporary: woodcut, etching and engraving, lithography, silk screen, mixed media. May be repeated for a maximum of 16 units.

Mr. Brown and the Staff (F,W,Sp)

145. Sculpture. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Selected studies in sculpture, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units.

Mr. Ray and the Staff (F,W,Sp)

147. Photography. Studio, eight hours; five hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Selected projects in photography and related media. Varied approaches, processes, and application of photographic medium within context of art, fundamentals in technique, with adjacent studies in theory, aesthetics, and history of photography. May be repeated for a maximum of 16 units.

Mr. Heincken, Mr. McFadden (F,W,Sp)

148. Studio Analysis and Criticism. Discussion, four hours. Studio, nine hours arranged. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Analysis and criticism of individual creative work with ideas. May be repeated for a maximum of 16 units.

Mr. Gray (F,W,Sp)

149. Art and Artists-History and Theory. Discussion, three hours. Prerequisites: courses 5A, 5B, 5C, 15A, and 15B, or consent of instructor. Discussion and analysis of artists and art, historical and contemporary. May be repeated twice for credit.
Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

271. Painting (2 to 8 units). Tutorial, eight hours. Tutorial studies in painting and associated media.

272. Graduate Printmaking (2 to 8 units). Tutorial studies in traditional and experimental printmaking. Selected studies in intaglio, lithograph, woodcut, silk screen, photo printmaking, and mixed media. Mr. Brown

273. Graduate Sculpture (2 to 8 units). Tutorial studies with specific attention to ongoing nature, specificity, and approach to each student's particular discipline. Individual studio visits and consultation. Mr. Ray

274. Photography (2 to 8 units). Tutorial, eight hours. Tutorial studies concentrating on development of individual students’ artwork. Studio emphasis with adjacent studies in theoretical and critical analysis. Specific attention to original, expressive, social, and humanistic values of art. Mr. Honecker, Mr. McFadden

275. New Genre (2 to 8 units). Tutorial, eight hours. Prerequisite: consent of instructor. Tutorial studies in alternative media, including installation, performance, video, film, and other nontraditional media and processes. Mr. Burden

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

696. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor.

The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

Dance

124 Dance Building, (213) 825-3951

Professors
Elise Dunin, M.A.
Judy Mitoma, M.A.
Carol Scothorn, M.A.
Doris Siegel
Allegre Snyder, M.A., Chair
Emma Lewis Thomas, Ph.D.
Pia Gilbert, Emerita
Alma M. Hawkins, Ed.D., Emerita (Distinguished Teaching Award)
Marion Scott, Emerita

Associate Professors
Erna Dosamantes, Ph.D.
Angelia Leung, M.A.

Assistant Professors
Judith Alter, Ed.D.
Linda Goodman, Ph.D.
Colin Quigley, Ph.D.

Lecturers
Peter Abligui, M.A.
Ronald Brown
Kai Ganado, M.A.
Judith Gantz, M.A.
Margaret Hills
Martha Kaiman, M.A., M.F.A.
Loretta McCray
Juan Rios, M.A.
Kevin Ritter, M.F.A.
Heidi Ronick, M.A.
Suenobu Togi
Mdha Yoth, M.S.

Scope and Objectives

Bodily skill, artistry, and deep understanding are necessary for an intelligent and creative artist. Dancers at UCLA receive extensive movement experience in contemporary dance, ballet, improvisation, and ethnic forms through practical work in studios, workshops, and performances. The art of dance is explored in costume design, lighting and scenic design, music and sound, and video. The development and relevance of dance are studied through courses in dance history, ethnology, notation, therapy, kinesiology, and education. Modern choreography is the basis of the UCLA program in dance.

UCLA offers the Bachelor of Arts degree in Dance combining preprofessional training with the liberal study essential to the development of each dancer’s own creative potential. The graduate program awards the Master of Arts and Master of Fine Arts degrees in Dance, designed for students preparing to continue professionally as choreographers, performers, designers, teachers, and researchers, with specific areas of focus in choreography/performance, dance ethnology, and dance education. A Master of Arts degree in Dance/Movement Therapy is also offered. The therapy program is approved by the American Dance Therapy Association.

Bachelor of Arts Degree

The dance major offered through the School of the Arts leads to the Bachelor of Arts degree. Students who wish to confer with the departmental counselor regarding program planning and major requirements should contact Wendy Temple in the department office.

Preparation for the Major

The Major

Required: A total of 58 units of upper division coursework, including Dance 100A-100B, 100C, 113A-113B-113C, C120, 123A, 123B, 132A-C132B, 134A, 134B, 141, 144, 148, 149, and four units selected from upper division dance electives.

Admission to the upper division major is determined by a screening and evaluation conducted during Spring Quarter of your sophomore year. All entering transfer students are auditioned for placement in technique and choreography classes.

Master of Arts in Dance

Admission

A bachelor’s degree with an undergraduate major in dance or equivalent experience is required. Some of this experience may have been gained outside the academic setting through such avenues as studio work. The department has its own application form (in addition to that used by the Graduate Admissions Office); three letters of recommendation and an audition are also required.

The audition looks at your technical proficiency and creative potential, which is expected to be no lower than the level of the UCLA undergraduate junior. Special attention is given to the creative aspects of dance. Because the department recognizes the importance of diversity and specialization at the graduate level, you are evaluated according to your primary focus (i.e., education, therapy, ethnology, or history).

Prospective students may write to the Department of Dance, 124 Dance Building, UCLA, Los Angeles, CA 90024-1608, for departmental brochures which give additional information on the graduate program.

Foreign Language Requirement

There is no foreign language requirement. However, if you specialize in dance ethnology and plan to do fieldwork, it is recommended that, during your graduate study or before, you gain working knowledge of the language of your research area.
Course Requirements
Nine courses (or more depending on your specialization) are required, distributed as follows:
(1) Dance 230; (2) four courses (16 units) in the department at the graduate level (200 series); (3) four courses (16 units) in or outside the department at the upper division or graduate level. These may not be classes taken to fulfill deficiencies nor technique or ethnic performance classes.

These requirements are to be partially fulfilled by one of the following patterns: (1) courses 151, 211A-211B-211C, 251A-251B (dance education); (2) courses C279A-C279B, 280A-280B-280C, 280D (dance ethnology).

Eight units of 500-series courses (596A, 596R, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement.

Other areas such as dance history, philosophy and criticism, dance kinesiology, dance production, dance and media, music for dance, and dance notation may be pursued on the advice of the chair or an adviser after you have been in the graduate program for several terms and have identified a unique interest and competence in one of these areas.

While fieldwork is not a requirement for those specializing in the area of dance ethnology, it is strongly suggested as part of that program.

Teaching Experience
Teaching experience is not a requirement for the degree. It is highly recommended; however, for those graduating with a focus in dance education.

Thesis Plan
If you select the thesis plan, you prepare a report of the results of your original research or creative work. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the graduate faculty committee. If the thesis plan is accepted, a thesis committee is formed. Conditions for reexamination in case you fail the first presentation are based on the support of several faculty members.

Comprehensive Examination Plan
You must declare your intention to take the comprehensive examination plan in your third or fourth term by preparing a written proposal of the plan, which is presented and defended before a panel of faculty. The examination, administered by a committee of Dance Department faculty, consists of three written questions and an oral section. Each committee member grades all questions. In order to pass, each question must be graded pass or better. If any questions are failed, you may retake the failed portion(s) once only.

Master of Fine Arts in Dance
Admission
Only individuals with exceptional talent and/or professional experience are accepted. Admission is by audition in which you must demonstrate exceptional promise in either choreography or performance. Auditioners in choreography show three original works. Performers present selected sections from the repertoire of their choice; ethnic and historical performers must show substantial command of the technique. Successful completion of the first-year curriculum (including all prerequisites) determines continuation in the program.

Foreign Language Requirement
There is no foreign language requirement. However, if you are a performer of ethnic dance, it is recommended that you gain working knowledge of the language of the culture in which you are specializing.

Course Requirements
You are required to complete 24 courses (96 units) as follows: at least six courses at the 400 level, including Dance 441 and 490, and at least eight courses at the 200 level, including 230 and 240A through 240D. Only four units of 500-level courses may be applied toward the degree. You must enroll in a studio class (performance, technique, repertoire) every term except while in an internship or during your final term.

Comprehensive Examination
You prepare a major concert in your third year, or a series of concerts in your second and third years, in which you are the principal choreographer and/or performer, and produce, direct, and oversee production elements. A document with visual materials and written production record is required. An oral defense of the concert works must be presented to the comprehensive examination faculty.

Lower Division Courses
1A-1F. Fundamentals of Modern Dance (2 units each). Studio, three hours. Designed for nondance majors. Courses must be taken in sequence. Study of dance technique, improvisation, and choreography. Critical viewing, reading, and discussion of modern dance artists’ historical/aesthetic styles. (F,W,Sp)

6F-6W-6S. Fundamentals of Ballet (0 units, 0 units, 2 units). Laboratory, four hours. Prerequisite: dance major or consent of instructor. Students admitted in Fall Quarter only. Study of ballet techniques and principles, including dance terminology. In Progress grading. Ms. Hills (F, W, Sp).

7F-7W-7S. Fundamentals of Ballet (0 units, 0 units, 2 units). Laboratory, four hours. Prerequisite: dance major or consent of instructor. Students admitted in Fall Quarter only. Study of ballet techniques and principles, including dance terminology. In Progress grading. Ms. Hills (F, W, Sp).

10. Introduction to Dance (2 units). Introduction to the many and varied theoretical aspects of dance as a discipline. Mrs. Snyder (F, W, Sp).

11A-11F. Modern Dance Technique and Choreography (2 units each). Lecture, one hour; studio, three hours. Limited to dance majors. Experiences designed to achieve beginning to intermediate levels of kinesthetic awareness and technical and improvisational skills, as well as understanding of the creative process of structure and form in dance compositions. (F, W, Sp).

20. Music Analysis for Dance (2 units). Lecture, two hours; laboratory, one hour. Study of elements of music, music structures, and their relationship to dance, with emphasis on rhythmic analysis, dance accompaniment, and teacher- accompaniment roles. Ms. McCray (F).
23L. Laboratory in Conditioning for Dancers (2 units). Laboratory, four hours. Specific conditioning program to include warm-up, stretching, and endurance training. Personalized attention enables students to increase their ability to dance more efficiently and to prevent dance injuries. P/NP grading.

25A. Beginning Labanotation (2 units). Lecture, two hours; laboratory, one hour. Prerequisite: course 12A. Continued study in Labanotation with experience in recording dance movement and interpreting notated score. Ms. Dunin, Ms. Leung, Mrs. Scothorn (F, W, Sp).

40. Introduction to Dance Theater (2 units). Lecture, two hours; laboratory, two hours. Prerequisite: course 11A or consent of instructor. Study of creative elements of choreography, sound score, and design and how they interact with practical elements of personnel, materials, and procedures in presenting dance theater.

48. Laboratory in Dance Production (1 unit). Laboratory, two hours. Realization of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. Must be repeated once in another year. P/NP grading. Mrs. Dunin, Ms. Leung, Mrs. Scothorn (W).

71A. Survey of Dance in Selected Cultures (2 units). Studio, three hours. Introduction to dances and their movement characteristics in Western and non-Western cultures. Mrs. Dunin, Mr. Quigley (F, Sp).

71B. Dance of Indonesia (4 units). Studio, three hours. Dance experience not required. Introduction to technique and repertory of dance traditions (e.g., Java, Bali, Sunda). Ms. Mitoma (F, W, Sp).

71C. Dance of Japan (2 units). Studio, three hours. Dance experience not required. Technique and repertory from the court dance tradition (e.g., Gagaku). Mr. Togi (F, W, Sp).

71D. Dance of India (2 units). Studio, three hours. Dance experience not required. Introduction to dance in India, with emphasis on a particular tradition (e.g., Bharata Natyam). Ms. Yosh (F).

71E. Dance of Korea (2 units). Studio, three hours. Dance experience not required. Technique and repertory of a selected dance tradition (e.g., Korean classical and folk).

72B. Dance of Ghana (2 units). Studio, three hours. Dance experience not required. Introduction to technique and repertory of a selected region.

73B. Dance of Mexico (2 units). Studio, three hours. Dance experience not required. Introduction to forms and styles in dances of several ethnographic regions. Emphasis on identifying dance characteristics through actual dancing. Mr. Rios (F).

74B. Dance of Yugoslavia (2 units). Studio, three hours. Dance experience not required. Introduction to forms and styles in dances of several ethnographic regions. Emphasis on identifying dance characteristics through actual dancing. Ms. Gantz (F, W).

74C. Dance of Spain (2 units). Studio, three hours. Dance experience not required. Technique and repertory of dances from selected ethnographic regions.

74D. Traditional Dances in the British Isles and Their Anglo-American Derivatives (2 units). Studio, three hours. Historical and regional overview and survey of vernacular dance traditions of the British Isles and their derivatives in North America, including both ceremonial and social forms, some of which have a strong presentional quality as well. Mr. Quigley.

76B. Dance of Israel (2 units). Studio, three hours. Dance experience not required. Technique and repertory from selected ethnographic regions.

79A-79Z. Dance of a Selected Culture (2 units each). Studio, three hours. Introduction to forms and styles in dance of a selected culture area.

80A-80B. Movement as Cultural Behavior (2 units each). Studio, three hours. Prerequisite: world arts and cultures experience or consent of instructor. Study in laboratory examination of individual and cultural factors which affect expressive movement in cultures. Experimental classes which enhance kinesthetic and movement awareness of self and others through cultural perspective. Ms. Mitoma (W, Sp).

Upper Division Courses

100A-100B-100C. Modern Dance: Intermediate Technique and Choreography. Lecture, three hours; laboratory, four hours. Prerequisite: course 11F. Limited to dance majors. Intermediate to advanced levels of technical skill emphasizing musicality, spatial awareness, and movement complexity. Choreographic assignments include use of composed music, group forms, and stage space. Mr. Brown, Mrs. Scothorn (F, W, Sp).

101A-101B-101C. Intermediate Modern Dance Technique (2 units each). Lecture, two hours; laboratory, two hours. Technique levels II and III. Emphasis on improving technical skill. Each course may be repeated once. Mr. Brown, Mr. Ganado, Ms. Leung (F, W, Sp).

C102A-C102B-C102C. Advanced Modern Dance Technique (2 units each). (Formerly numbered 102A-102B-102C.) Lecture, two hours; laboratory, five hours. Technique levels IV and V. Studies in advanced technique, with emphasis on performing skills. Each course may be repeated once. Concurrently scheduled with courses C402A-C402B-C402C. Mr. Brown, Mr. Ganado, Ms. Leung (F, W, Sp).

103. Improvisation in Dance (2 units). Studio, four hours. Prerequisite: dance major or consent of instructor. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and projection may be repeated twice. Ms. Kaiman.

105A-105B-105C. Intermediate Ballet (2 units each). Laboratory, three hours. Prerequisites: courses 7F-7W-7S or consent of instructor. Courses must be taken in sequence. Study of techniques and principles of classical ballet, including phrasing, combinations, and repertory. Each course may be repeated once. Ms. Hils (F, W, Sp).

107A-107B-107C. Baroque Dance. Lecture, two hours; laboratory, two hours. Prerequisite: course 20 or equivalent experience in performance. Emphasis on Baroque dance as a performing art. Critical analysis of dance as a creative experience and role of form and social issues in dance. Ms. Alter (F).

108A-108B-108C. Classical Ballet. Lecture, two hours; laboratory, two hours. Prerequisite: course 20 or equivalent experience in performance. Emphasis on classical ballet as a performing art. Critical analysis of dance as a creative experience and role of form and social issues in dance. Ms. Alter (F).

109A-109B-109C. Contemporary Dance and Movement Analysis. Lecture, three hours; laboratory, three hours. Prerequisite: dance major or consent of instructor. In-depth study of selected topics in dance. Ms. Gutman (F, W).

110A-110B-110C. Advanced Ballet (2 units each). (Formerly numbered 107A-107B-107C.) Lecture, two hours; laboratory, five hours. Technique course 107C. Advanced technique in classical ballet, with emphasis on performing skills. Each course may be repeated once. Concurrently scheduled with courses C407A-C407B-C407C. Ms. Hils (F, W, Sp).

113A-113B-113C. Advanced Modern Dance Technique, Choreography, and Performance (2 units each). Lecture, three hours; laboratory, four hours. Prerequisite: course 103C. Advanced technique studies, with emphasis on developing performance qualities: dynamics, focus, projection, expressive range. Independent work in solo and group choreography culminating in final performance project. Ms. Kaiman (F, W, Sp).

114. Form and Structure in Choreography. Lecture, one hour; laboratory, three hours. Prerequisite: dance major or consent of instructor. Study of craft of choreography. Emphasis on form, phrasing, ABA, theme and variations, rondo. Lecture, one hour; studio, five hours. Prerequisite: dance major or consent of instructor. Study of craft of choreography. Emphasis on form, phrasing, ABA, theme and variations, rondo. Ms. Kaiman (W, Sp).

C120. Music as Dance Accompaniment. Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation; plucking and strumming of imagery. Chorographic composer relationships. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C220. Ms. McCray (Sp).

122. Movement Variables: Topics in Dance (2 units). Lecture, two hours; laboratory, one hour. Examination of coordination and expression applied to dance as a performing art. Critical analysis of qualitative motion factors of weight, space, time, flow. Personalized attention to increase students' ability to work efficiently and expressively. May be repeated twice. Prerequisite: course 100C.

123A. Anatomy for the Dancer. Prerequisite: course 11F or consent of instructor. Study of human musculoskeletal system as related to dance.

123C. Projects in Dance Kinesiology. Prerequisite: course 123B. Independent study of selected topics introduced in courses 123A and 123B. Ms. Gantz (Sp).

125. Principles of Movement Analysis: Laban Analysis. Lecture, two hours; laboratory, two hours. Prerequisite: dance major or consent of instructor. Basic principles of Laban analysis. Emphasis on experiential understanding of movement through study of motion factors and elemental concepts of spatial dynamics. Focus on qualitative area of movement to further comprehension of dance as a creative art form. Ms. Gantz (W).

126. Advanced Labanotation. Lecture, two hours; laboratory, two hours. Prerequisite: course 25B. Skills in reading and writing complex movement; reorganization and score preparation in modern dance; ballet, and ethnic dance. Ms. Gantz, Mrs. Scothorn (Sp).

132A-C132B. Philosophical Bases and Trends in Dance (4 units, 2 units). (Formerly numbered 132A-132B.) Course 132A is prerequisite to C132B. Critical analysis of dance as a creative experience and role of professional and educational dance in our society. Study of present-day concepts and their relationships to other art forms and cultures. Course C132B is concurrently scheduled with C231B. Ms. Alter (F, W).

C133. Baroque Dance: Analysis and Re-creation. Lecture, two hours; laboratory, two hours. Prerequisites: courses 134A and 134B or equivalent experience, consent of instructor. Analysis and re-creation of Baroque dance as a performing art. Emphasis on Baroque dance as a performing art. Critical analysis of dance as a creative experience and role of form and social issues in dance. Ms. Alter, Mrs. Thomas (F).

C134A. History of Dance in Western Culture, Origins to 1600. Development of dance styles in Western culture; function in society and relationship to contemporary artistic expression; ancient Egypt through European Renaissance. Ms. Alter, Mrs. Thomas (F).

C134B. History of Dance in Western Culture, 1600 to the Present. Prerequisite: course 134A or consent of instructor. Survey of dance styles in European and American cultures from early baroque to the present. Ms. Alter, Mrs. Thomas (W).

141. Lighting Design for Dance Theater. Lecture, four hours; laboratory, two hours. Prerequisites: courses 11F or consent of instructor. Lighting for dance: examination of aesthetics, principles, and technical elements. Application to selected choreographies to be publicly performed.

142. Advanced Studies in Dance Theater Lighting (2 or 4 units). Lecture, four hours; laboratory, four hours or more. Prerequisite: course 141 or consent of instructor. Analysis of diverse dance theater lighting problems at advanced level and individual development of creative solutions. May be taken for a maximum of four units. (W, Sp.)
144. Costume and Scenic Design Concepts for Dance Theater. Prerequisite: course 11F or consent of instructor. Study of theory for conceptualizing dance performance environments, communication via visual elements, artistic properties of costume and sets media, and procedures for producing dance costumes and sets in order to facilitate choreographer/designer communication. Mrs. Ritter (F,Sp).

145. Advanced Dance Costuming. (Formerly numbered 189E.) Lecture, three hours; laboratory, six hours. Prerequisite: course 144 or consent of instructor. Theory of dance costume construction as it relates to design intent, enhancement, accomodation, and impact on movement. Choice of textiles, construction methodology, fabric modification, and accessories. Laboratories include design projects currently in production. Mr. Ritter.

148. Advanced Laboratory in Dance Production (1 unit). Laboratory, two hours. Prerequisites or corequisites: courses 141 and 144, or consent of instructor. Further development and application of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. May be repeated once. P/NP grading. (Sp)

149. Dance Performance Practicum (1 unit). Laboratory, four hours. Dancing in selected choreography in public performance. P/NP grading. (F, W,Sp)

151. Foundations of Dance Education. Lecture, two hours; laboratory, two hours. Prerequisite: consent of instructor: dance major or consent of instructor. Introduction to movement concepts, skills, and teaching principles for modern dance instruction. Supervised teaching laboratory included. Ms. Gantz; Ms. Leung (F-W).

152. Dance as Culture in Education. Lecture, two hours; laboratory, two hours. Prerequisite: course 70 or consent of instructor. Theoretical and practical aspects of teaching ethnic dance, especially in higher education. Mrs. Dunin (F).

153. Creative Dance for Children. Lecture, three hours; laboratory, one hour. Prerequisite: dance major or consent of instructor. Introduction to movement concepts, skills, and principles for teaching children's dance; emphasis on dance as a creative medium of expression. Ms. Leung (Sp).

160. Introduction to Dance/Movement Therapy (2 units). Lecture, one hour; laboratory, three hours. Prerequisite: course 100C or consent of instructor. Group processes and dynamics in both nonverbal (movement) and verbal (symbolic) communication. Students achieve a significant level of psychological insight to assist in functioning professionally as effective dance/movement therapists. Ms. Ronick.

171B. Dance of Indonesia (2 units). ( Formerly numbered 171C.) Lecture, three hours. Prerequisite: course 71B or consent of instructor. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sundan). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471B.

171C. Dance of Japan (2 units). (Formerly numbered 171C.) Studio, three hours. Prerequisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471C.

171D. Dance of India (2 units). (Formerly numbered 171D.) Studio, three hours. Prerequisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471D.

171E. Dance of Korea (2 units). (Formerly numbered 171E.) Studio, three hours. Prerequisite: course C471E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471E.

C172B. Dance of Ghana (2 units). (Formerly numbered 172B.) Studio, three hours. Prerequisite: course C472B. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C472B.

C173B. Dance of Mexico (2 units). (Formerly numbered 173B.) Studio, three hours. Prerequisite: course C473B. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C473B.

C174B. Dance of Yugoslavia (2 units). (Formerly numbered 174B.) Studio, three hours. Prerequisite: course 74B or consent of instructor. Dance technique of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C474B.

C174C. Dance of Spain (2 units). (Formerly numbered 174C.) Studio, three hours. Prerequisite: course 74C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C474C.

174D. Traditional Dances in the British Isles and Their Anglo-American Derivatives (2 units). Studio, four hours. Prerequisite: course 74D or consent of instructor. Particular genres involving more challenging technique than emphasized in course 74D, such as English ceremonial dance or solo step dancing. Mr. Quigley.

C176B. Dance of Israel (2 units). (Formerly numbered 176B.) Studio, three hours. Prerequisite: course 76B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C476B.

C175A-C175Z. Dance of a Selected Culture (2 units each). (Formerly numbered 175A-179Z.) Studio, three hours. Prerequisite: course 75Z. Concurrently scheduled with courses C475A-C479Z.

C180A-C180B. Studies in Dance Ethnography. (Formerly numbered 180A-180B.) Concurrently scheduled with courses C279A-C279B. C180A. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographic and development of skills in Labanotation. C180B. Prerequisite: course C180A or consent of instructor. Participant observation of the dance, with an emphasis on notational skills to analysis of movement in that event. Mrs. Dunin, Mr. Quigley (Sp).

181B. Dance in Southeast Asia. Prerequisite: course 181A or consent of instructor. Survey of selected regional, social, and court dances of Indonesia, Cambodia, Thailand, and the Philippines. Social, historical, and aesthetic factors. Lectures illustrated with demonstrations, films, and slides. Ms. Mitoma.

181C. Dance in East Asia. Prerequisite: course 181A or consent of instructor. Survey of dances of Japan, China, and Korea and factors which have influenced their development and social function. Consideration of relationship of dance to other art forms. Lectures illustrate in relation to music, aesthetic principles, and by ideological and aesthetic systems. Lectures illustrated with demonstrations, films, and slides. Ms. Mitoma.

181D. Dance in South Asia. Prerequisite: course 181A or consent of instructor. Survey of dance forms in India and Sri Lanka. Factors influencing development of dance, its social function, and its relationship to other art forms. Lectures illustrated with demonstrations, films, and slides. Ms. Yodh (W).

182A. Dance Cultures of Africa. Illustrated survey of dance in sub-Saharan cultures, role of dance in society, historical background, and related folklore. Mr. Abligu (F).

183A. Dance in Latin America. Prerequisite: course 73B or C173B or consent of instructor. Introduction to dances of Latin America, factors influencing their development and cultural context. May be repeated once. Concurrently scheduled with course CM183A.

C184B. Dance in the Balkans. ( Formerly numbered 118B.) Introduction to dances of the Yugo-slav, Greeks, Romanians, Bulgarians, and Albanians. Special attention to calendrical and life cycle dance events of these populations in Southeast Europe and the Americas. Lectures illustrated with video, films, and slides. Concurrently scheduled with course C474B.

Mrs. Dunin.

CM184D. Dance in the British Isles and North Africa: Anglo-American Tradition. (Same as Folklore CM184D.) Introduction to folklore research on dance, drawing examples primarily from the British Isles and related traditions in North America. Topics include search for origins, structural analysis of dance forms, and relationship to dance in its contexts. Concurrently scheduled with course CM284D.

Mr. Quigley.

C187A. Dance Cultures of Native American Indians. (Formerly numbered 178A.) Illustrated survey of native American Indian dance, role of dance in society, historical background, and related folklore. Concurrently scheduled with course CM187A.

190. Advanced Dance Performance (2 units). Lecture, one hour; laboratory, three hours. Study and performance of major choreography. May be repeated twice. (F, W, Sp)

191. Repertory Dance Tour (2 or 4 units). Lecture, two hours; laboratory, four hours. Prerequisite: dance major or consent of instructor. Preparation and performance of dance concerts in the community, with special emphasis on problems of touring dance company with a variable repertoire. Ms. Kalman (F, W, Sp).

197A-197B. Proseminar: Dance Perspectives (2 units each). Prerequisite: upper division standing or consent of instructor. Consideration of aesthetics evolving from the work of great artists of our time.

199. Special Studies in Dance (2 to 8 units). Prerequisite: senior standing, consent of instructor.

Graduate Courses

211A-211F. Advanced Choreography. Lecture, two hours; laboratory, two hours. Prerequisite: course 11C or equivalent. Theories and practices of advanced choreography for students who have reached the level of self-initiation of substantial creative works. Refinement and realistic self-evaluation; critical course by acknowledged choreographers. Ms. Scorhorn (F, W, Sp).

C220. Music as Dance Accompaniment. Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation for dance. Composer-composer relationships. History of music for dance, with emphasis on contemporary trends. Match for dance performance. May be concurrently scheduled with course C120. Graduate students must complete two additional assignments. May not be applied toward M.A. degree requirements. Mrs. McCray (Sp).

225A-225B. Theories of Movement: Laban Analy- sis. Lecture, two hours; laboratory, two hours. Theories of Laban movement analysis as means for analyzing and understanding various forms of human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance patterns and timing. Ms. Gantz (W, 225A; Sp, 225B).
240D. Production Arts Seminar (2 units). Lecture, three hours. Prerequisite: consent of instructor. Corequisites: courses 241I-241N. Topics from current problem domains of students preparing M.F.A. concert productions.

249. Dance and the Visual Media. Examination of aesthetic differences between dance, film, and video. Analysis of the record and documentary dance film, choreo-cinema, impact of MTV and VHS, as well as integration of media with performance.

Ms. Snyder

C279A-C279B. Studies in Dance Ethnography. Concurrently scheduled with courses C180A-C180B. C279A. Development of observation and recording skills for study of dance events, including both an ethnological consideration of selected ethnographies and development of skills in Labanotation. C279B. Prerequisite: course C279A. Participant observation of the dance event and application of Labanotation skills to analysis of movement in that event.

Mrs. Dunin, Mr. Quigley

280A-280D. Advanced Studies in Dance Ethnology. (Formerly numbered 280A-280D.) Corequisites: courses C279A-C279B or consent of instructor. Dance in the field viewed as an event of culture and human behavior. C280A. Survey of literature of the field of dance ethnology and related fields of anthropology, folkore, and performance studies. C280B. Advanced studies in methodology and training in fieldwork to develop dance-focused ethnographic skills with emphasis on ethnographic interview. C280C. Advanced studies in methodologies, ethnical questions, and training in fieldwork to develop dance-focused ethnographies with emphasis on ethnological tools for documentation. C280D. Completion of fieldwork project through methodological skills developed in courses C280A-280C.

Mr. Dunin, Mrs. Snyder (F,W,S)
451. Teaching Assistant Seminar (2 units). Lecture, one hour; laboratory, three hours. Required of all Dance Department teaching assistants. Lecture, discussion, three hours. Prerequisites: consent of instructor. Laboratory field study to provide teaching experience in the community school or other approved site. No more than four units may be applied toward M.A. degree requirements. S/U grading. (F, W, Sp)

C471B. Dance of Indonesia (2 units). Studio, three hours. Prerequisite: course 71B or consent of instructor. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sundan). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171B. Ms. Mitoma

C471C. Dance of Japan (2 units). Studio, three hours. Prerequisite course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171C. Mr. Togi

C471D. Dance of India (2 units). Studio, three hours. Prerequisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171D. Ms. Yodh

C471E. Dance of Korea (2 units). Studio, three hours. Prerequisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171E.

C472B. Dance of Ghana (2 units). Studio, three hours. Prerequisite: course 72B. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C172B.

C473B. Dance of Mexico (2 units). Studio, three hours. Prerequisite: course 73B. Dance techniques of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C173B. Mr. Rios

C474B. Dance of Yugoslavia (2 units). Studio, three hours. Prerequisite: course 74B. Dance techniques of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C174B. Mrs. Dunin

C474C. Dance of Spain (2 units). Studio, three hours. Prerequisite: course 74C. Techniques and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C174C.

C476B. Dance of Israel (2 units). Studio, three hours. Prerequisite: course 76B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C176B.

C479A-C479Z. Dance of a Selected Culture (2 units each). Studio, three hours. Prerequisite: course 79 (in corresponding culture area). Dance technique of a selected culture area. May be repeated for a maximum of four units. Concurrently scheduled with courses C479A-C479Z.

480. Seminar in Research Topics (2 units). Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students required to make a presentation each term they are enrolled for credit. May be repeated for a maximum of eight units. S/U grading.

490. Projects in Choreography and Performance (4 to 8 units). Tutorial, one three-hour rehearsal per unit per week minimum. Prerequisite: course 240C or consent of instructor. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography or performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student and fully staged performance of works. May be repeated for a maximum of 12 units. Ms. Mitoma, Mrs. Soothorn

498. Professional Internship in Dance (4, 8, or 12 units). Full- or part-time supervised fieldwork. Prerequisites: advanced standing in M.F.A. program, consent of instructor. Internship in dance, theater, film, or television organization. Participation in creative, administrative, or technical work of professionals in their specialties. Mrs. Soothorn

596A. Directed Individual Study or Research (2 to 8 units). May be repeated for a maximum of 12 units. Ms. Mitoma, Mrs. Scothorn

596B. Directed Study or Research in a Hospital or Clinic (2 to 8 units). S/U grading.

Visiting Associate Professor
Janice Tanaka, M.F.A.

Scope and Objectives

The Department of Design offers a foundation of core courses, including color theory, perceptual drawing, three-dimensional design, computer, photography, and history, followed by a comprehensive group of integrated upper division courses in ceramics, fiber/textile, graphics, video, computer imagery, and environmental design which includes interior space planning and industrial design.

Design students are encouraged to work in experimental modes where materials and processes give new information and in the best of circumstances allow familiar visual and spatial relationships to be seen in new and diverse ways. The tools of design students range from
highly technical electronic video and computer

to the loom, potters wheel, camera, drafting
table, pen, brush, and sometimes solely the
hand and word. Through a balance of courses
in theory, criticism, and practice, students de-
velop in both vision and competence to realize
new methods and new forms, both functional
and expressive.

The Department of Design curricula lead to the
Bachelor of Arts, Master of Arts, and Master of
Fine Arts degrees. All programs benefit from
the rich and varied art resources at UCLA and
in the Los Angeles community.

Bachelor of Arts Degree

Preparation for the Major

Required: Design 31A, 31B, 32A, 32B, 32C,
35A, 35B, 35C, and one course from Art histo-
ry 50 through 57.

The Major

Required: Twelve upper division courses, se-
lected in consultation with the adviser, includ-
ing Design 161E, 162A, 165A, 167A, 171A,
three courses from 161A, 161C, 161G, 161H,
161J, and History 154C or 154D, and four up-
per division design electives.

It is recommended that you have each term's
program approved by the departmental advis-
er.

Note: Consult the Schedule of Classes for
courses restricted to majors only.

Master of Arts in Art

As a result of changes within the Design De-
partment, this degree is under proposal to be
renamed as a Master of Arts degree in Design.

Admission

Students are admitted in Fall Quarter only. An
acceptable portfolio is required, in the form of
slides (maximum 20) or videotape (if applying
to the electronic imagery field). Acceptance is
by a majority vote of the design faculty.

Applicants are expected to have a bachelor's
degree from an accredited institution; it need not
be in art or design. A minimum grade-point aver-
age of 3.0 overall in undergraduate upper divi-
sion work is required. Your initial advisory com-
mittee is formed immediately after you are ac-
cepted.

Prospective students may contact the Coun-
selor, Department of Design, 1200 Dickson,
UCLA, Los Angeles, CA 90024-1456, for bro-
cures and information.

Fields of Concentration

Communication imagery, image transfer, elec-
tronic imagery, computer imagery, ceramics,
fiber structures, textiles, industrial design, ex-
hibition design.

Course Requirements

A minimum of 36 quarter units in the depart-
ment (or nondepartmental courses with the
graduate adviser's consent) selected from
courses numbered 161A through 299 (and
possibly 596) is required, with a B average or
better. These must include a minimum of 20
quarter units of design courses numbered
above 200, of which at least four units must be
from Design 290 and of which at least eight
units must be devoted to a comprehensive
project in your area of study. In addition, eight
quarter units of art history are required (if you
have a B.A. or B.F.A. in Art which includes a
background in the history of art, you may sub-
stitute eight units in other courses that are ger-
mane to your graduate pursuit).

A total of eight units of course 596 may be
applied toward the 36 units required for the
degree; four units may be applied toward the
graduate course requirement.

Comprehensive Examination Plan

The M.A. program focuses on a scholarly project
associated with a field of study and mastery of
the technology. You meet with your committee
to assess your progress on the comprehensive ex-
amination project throughout your two years in
the program. Objectives of the design program
are presented to students via faculty interaction,
committee process, the graduate design curricu-
rum, individual design practice, oral examina-
tion, and a master's statement exhibition of work
accomplished.

Master of Fine Arts in Art

As a result of changes within the Design De-
partment, this degree is under proposal to be
renamed a Master of Fine Arts degree in De-
sign.

Admission

Admission requirements and procedures are
especially the same as for the M.A., except
that the M.F.A. degree is the highest academic
degree awarded in the studio disciplines of art
and is conferred on the basis of outstanding
achievement and consistent demonstration of
quality throughout an original body of creative
work. A higher standard of demonstrated abil-
ity and preparation in the area of intended
study is usually applied in the portfolio review.

Fields of Concentration

Communication imagery, image transfer, elec-
tronic imagery, computer imagery, ceramics,
fiber structures, textiles, industrial design, ex-
hibition design.

Course Requirements

A minimum of 72 quarter units of upper divi-
sion and graduate design courses is required, of
which at least four units must be from Design
290 and of which at least 12 units must be
devoted to a comprehensive project in your
area of study.

Within those 72 units, a minimum of 52 quarter
units in the 200 and 500 series must be taken
in the field of specialization.

A minimum of 40 quarter units of art history
in undergraduate or graduate study is required. Art
history courses completed at the undergraduate
level can be applied toward the 40-unit art histo-
ry requirement but cannot be applied toward the
72 units required for the degree. Students with
few or no art history courses in undergraduate
study may take art history upper division or grad-
uate courses at UCLA as electives to be applied
in the 40-unit art history requirement and
toward the total units required for the degree.
You may substitute a maximum of 12 units in
other courses that are germane to your graduate
pursuit, with the faculty adviser's consent.

A total of 12 units of course 596 may be applied
toward the graduate and elective course re-
quirements for the degree.

Comprehensive Examination Plan

The M.F.A. program focuses on the fostering of
mature, professional-quality work with
emphasis on experimentation and mastery of
the technology associated with the field of
study. You meet with your committee to assess
your progress on the comprehensive examina-
tion project throughout your three years in
the program. Objectives of the design program
are presented to students via faculty interaction,
committee process, the graduate design curricu-
rum, design practice, oral examination, and a
thesis exhibition of work accomplished.

Lower Division Courses

30A. Nature of Design. Lecture, three hours; dis-
cussion, one hour. Open to nonmajors. Under-
standing the design process, with emphasis on development of a
visual language; study of historic, scientific, techno-
logical, economic, and cultural factors influencing de-
sign in our physical environment.

31A. Fundamentals of Design: Color. Lecture, two
hours; laboratory, four hours. Course 32A may be
taken concurrently. Exploration of color in theory and
practice. Development and articulation of sensory
concepts.

31B. Fundamentals of Design: Form. Lecture, two
hours; laboratory, four hours. Course 32B may be
taken concurrently. Interrelation of three-dimensional
form concepts as foundation for creativity; origin-
ation and solution of problems.

32A. Perceptual Drawing. Demonstration/discussion/
laboratory, eight hours. Course 31A may be taken con-
currently. Translation of perception through delineation,
drawing, and other descriptive media.

32B. Visual Presentation. Studio, six hours. Prereq-
site: course 32A. Course 31A or 31B may be taken con-
currently. Translation of idea through delineation,
drawing, and other descriptive media.

32C. Drawing Methodologies. Studio, eight hours.
Fundamentals of graphic representation, including
orthographic and isometric projection methods, mecha-
nical drawing and drafting, layout techniques, and intro-
ductory computer-aided drafting.

Mr. Vasa in charge
35A. Introduction to Photography. Lecture, two hours; studio, four hours. Introduction to camera operation, photo processing, laboratory and lighting procedures. Mr. Brown, Mr. Kataoka

35B. Introduction to Tools and Processes. Lecture, two hours; studio, four hours. Introductory design shop course to develop necessary skills with traditional tools and power equipment, including fundamentals of joining, fastening, and finishing both natural and industrial materials, and their appropriate application in fabrication of design prototypes. Mr. Carter

35C. Introduction to Computer. Lecture, two hours; studio, four hours. Introduction to the computer as a design tool and image development medium; overview of hardware and software, including microcomputers, disk operating systems (DOS), image processing systems, desktop publishing, computer-aided modeling, and computer-aided pattern design. Mr. Lee

Upper Division Courses

(I) Historical and Comparative Studies in Design

161A. Ceramics. Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. Evolution of ceramic form through geographic, social, and technological influences. Mr. Saxe

161C. Communication Design. Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. Study of symbols, signs, and images within social, cultural, and historical context; analysis of print and electronic forms. Mr. Brown, Mr. Kataoka

161E. Modern Design History. Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. Historical survey of development of Western industrial culture. Studies of major factors influencing transition from industrial societies to postindustrial information societies. Mr. Lee

161G. Shelter. Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. Survey of physical characteristics of shelter forms within social, cultural, and historical contexts. Analysis of impact of environment, sociocultural factors, and technological influences. Mr. Kester

161J. Video Imagery. Lecture, three hours; laboratory, to be arranged. Analysis of videographic form. Mr. Kataoka

162A. Ceramics. Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to ceramic materials and processes as a medium of cultural and individual expression. Investigation of handforming methods. Mr. Bermudez, Mr. Saxe

162B. Ceramics. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Introduction to use of potter's wheel. May be repeated after completion of courses 162B through 162F. Mr. Bermudez, Mr. Saxe

162C. Ceramics. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Creative development of ceramic materials and processes, with emphasis on indirect methods of forming such as use of molds and mechanically produced ceramic elements. May be repeated after completion of courses 162B through 162F. Mr. Bermudez, Mr. Saxe

162D. Ceramics. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Investigation of ceramic surface treatments and their relation to ceramic form; study of traditional and experimental materials and processes to achieve appropriate fired surfaces necessary for function and as means of creating decorative and expressive imagery. May be repeated after completion of courses 162B through 162F. Mr. Saxe

162E. Primitive Ceramics. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Investigation of materials and methods of Neolithic and other early ceramic traditions. Emphasis on creative use of primitive ceramic technology to better understand the nature of clay and effects of firing. Firing in the field without a kiln. May be repeated after completion of courses 162B through 162F. Mr. Bermudez, Mr. Saxe

162F. Advanced Ceramics. Studio, six hours. Prerequisites: courses 162A, 162B, 165A, 167A, 171A. Introduction of advanced technique in use of potter's wheel. Emphasis on individual creative experimentation with materials and methods introduced in courses 162A through 162E, in conjunction with advanced projects incorporating wheel-formed elements. May be repeated after completion of courses 162B through 162F. Mr. Saxe

165A. Fundamentals of Communication Design. Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to basic elements of graphic design and development of visual communication concepts. Exploration of letterforms, typography, symbols, and imagery through graphic and electronic media. Mr. Brown, Mr. Kataoka

165B. Communication Design: Printed Image. Studio, six hours. Prerequisite: course 165A. Development of concepts exploring visual potential of the graphic image. Technologies include screen printing, xerography, laser printing, ink jet, thermo dye — sublimated printing, offset lithography, video printing, and other reproduction processes. May be repeated after completion of courses 165B through 165E. Mr. Brown, Mr. Kataoka

165C. Communication Design: Video Image. Studio, six hours. Prerequisite: course 165A. Use of video technology (video editing, storage, and reproduction devices) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication. May be repeated after completion of courses 165B through 165E. Mr. Kataoka, Ms. Tanaka

165D. Communication Design: Computer Image. Studio, six hours. Prerequisite: course 165A. Exploration of the computer as an image-generating tool. Development of visual ideas for print, television, and film applications using original images, videography, typography, and photography. May be repeated after completion of courses 165B through 165E. Mr. Kataoka, Mr. Brown

165E. Advanced Communication Design: Special Studios I. Studio, six hours. Prerequisites: three courses from 165A through 165D. Synthesis of studies and media presented in courses 165A through 165D. Studio initiative encouraged, with emphasis on use of two or more media. May be repeated after completion of courses 165B through 165E. Mr. Brown, Mr. Kataoka

165F. Advanced Communication Design: Special Studios II. Studio, six hours. Prerequisites: minimum of three courses from 165A through 165E, consent of instructor. Emphasis on conceptual versatility based on experience in prior communication design courses. Students should be well-versed in all technologies available in program. May be repeated once. Mr. Brown, Mr. Kataoka

167A. Form in Industrialized Materials. Studio, six hours. Prerequisites: courses 31A through 35B. Exploration of form in relation to industrialized materials and manufacturing processes. May be repeated once. Mr. Kataoka, Mr. Saxe

167C. Human Factors in Product and Space Planning. Studio, six hours. Prerequisites: courses 167A, 167B. Studies in psychological and physical requirements for designing spaces. Interpretation of anthropometric ergonomic information. Development of design concepts relating to needs and use of objects and spaces. Computer applications included. May be repeated after completion of courses 167B through 167F. Mr. Carter, Mr. Shapira

167D. Industrial Design: Product Development I. Studio, six hours. Prerequisites: courses 167A, 167B. Intermediate-level product planning, research, and development as a design tool. Studies in relation of design methodology to use of informal constraints. Development of design concepts and their realization at model and prototype stage. May be repeated after completion of courses 167B through 167F. Mr. Shapira

167E. Industrial Design: Product Development II. Studio, six hours. Prerequisites: courses 167A, 167B. Product planning, research, and development of design problems and information systems of higher complexity. Study of design implications of considerations of relation of design concepts to social, economic, and environmental impacts. May be repeated after completion of courses 167B through 167F. Mr. Shapira

167F. Advanced Industrial Design: Product Design, Research, and Innovation. Studio, six hours. Prerequisites: courses 167A, 167B. Further studies in computer applications in industrial design, from ideation, conceptualization, and programming to model building and manufacturing. Mr. Carter, Mr. Shapira

170A. Introduction to Space Planning. Lecture, two hours; studio, four hours. Prerequisites: courses 31A, 31B, 32A, 32B, 32C, 35A, 35B. Human factors and functional requirements in determining spatial configurations and relationships. Emphasis on interior requirements in generating a building envelope. Emphasis on environmental factors in creating exterior private and urban scale public spaces. May be repeated once for credit.

171A. Textiles. Fundamentals of Fiber, Form, and Structure. Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to terminology and scope of the field; orientation to materials and equipment; expansion of design concepts and theories toward making of fabrics; fundamental experiments in fabric making, dyeing, and pattern making. Mr. Bassler, Ms. Medel

171B. Fabric Surface. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Not open to students with credit for course 171A prior to Fall Quarter 1987. Patterning through use of linocut and silk screen processes, including experiments in traditional and random pattern systems; experiments utilizing single and multiple lino and screen printings. May be repeated after completion of courses 171B through 171F. Mr. Bassler, Ms. Medel

171C. Fabric Dye Processes. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Not open to students with credit for course 171B prior to Fall Quarter 1987. Patterning through use of photographic dye systems and procedures, including immersion, direct application, and resist. May be repeated after completion of courses 171B through 171F. Mr. Bassler

171D. On-Loom Textile Construction. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Experimentation utilizing loom for structural patterning, including two- to eight-harness weaves; float and supplementary elements; introduction to computer-generated patterns. May be repeated after completion of courses 171B through 171F. Mr. Bassler
171E. Non-Loom Fabric Making. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Not open for credit to students with credit for former course 1648. Introduction to terminology of the field, orientation to material and equipment, expansion of design concepts to construct fabrics without the loom. May be repeated after completion of courses 171B through 171F. Mr. Bassler

171F. Textile Construction. Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Development of two- and three-dimensional structures utilizing the loom, including experiments in construction of multiple-layer weaves, weaving in manipulation of woven surface, experiments in architecturally scaled fabrics. May be repeated after completion of courses 171B through 171F. Mr. Bassler

(III) Proseminars in Design

189. Topics in Design. Lecture/discussion, three hours; laboratory, to be arranged. Prerequisite: consent of adviser and instructor. Examination by faculty members of specific problems relevant to design theory and performance. Topics announced in advance. May be repeated for a maximum of 16 units.

Mr. Toporovsky

193. Proseminar in Design: Senior Studies. Proseminar, three hours. Prerequisite: consent of adviser. Open to senior and advanced students through design faculty advisers. Examination by faculty members of specific problems relevant to design theory and performance. Topics announced in advance. May be repeated twice.

197. Honors Course. Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 in major, consent of instructor, junior or senior standing. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art (2 to 8 units). Hours to be arranged. Prerequisites: 3.0 GPA in major, consent of instructor, senior standing. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

Mr. Brown, Mr. Kataoka

284. Ceramics (2 to 8 units). Tutorial or seminar, to be arranged. Prerequisite: consent of instructor. Advanced creative research utilizing ceramic media. Emphasis on development of original, expressive, individually produced ceramic art. Mr. Saxe

287. Form and Structure Tutorial (2 to 8 units). Hours to be arranged. Exploration of form, with emphasis on expression experimentation in materials and processes. Mr. Vasa

288. Fiber Structures (2 to 8 units). Laboratory, two to four hours. Advanced formative work in traditional and experimental processes of fabric construction utilizing fiber media. Mr. Bassler, Mr. Kester

290. Design Seminar: Collaborative View. Formerly numbered 290A-290B-290C. Seminar, three hours. Critical and theoretical examination of concepts underlying the creative process, including initiation of an idea, its development, and its social and historical context. Mr. Kester, Mr. Lee

292. Shelter (2 to 8 units). Development of individual projects to investigate concepts of shelter. Exploration of technical and contemporary forms, methods, and materials. Mr. Shapira

293. Interior Space Design (2 to 8 units). Concept and practice of designing interior spaces. Evaluation of visual and functional needs for interior spaces (ranging from personal to social spaces) in two- and three-dimensional projects involving color, light, surface, materials, equipment, furniture, etc. Mr. Kester

294. Industrial Design (2 to 8 units). Laboratory, two to four hours. In-depth studies in topics such as design and management, person-object compatibility, visual identity programs, containing systems, transportation, design for developing countries, ergonomics, urban components, area studies, materials, and processes. Mr. Shapira

295. Exhibition Design (2 to 8 units). Laboratory, two to four hours. Interpretation and presentation of materials for exhibitions. Students may elect to work with instructor and gallery staff on regularly scheduled productions or they may outline their own project and proceed by producing studies, renderings, or schematics by fabricating models. Mr. Carter

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor. The Department of Design reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

Ethnomusicology and Systematic Musicology

1642 Schoenberg Hall Annex, (213) 206-3033

Danny Lee
Tsun Y. Lai
Ernest Siva, M.M.
Suenobu Togi
Ikuo Yuge, B.A.

Scope and Objectives

Currently two graduate multidisciplinary approaches to the study of world music — ethnomusicology and systematic musicology — are offered through the Music Department. As a result of the establishment of the School of the Arts, proposals to offer discrete degrees in ethnomusicology and systematic musicology are under review. For ethnomusicology and systematic musicology graduate courses, see the Department of Music later in this chapter.

Ethnomusicology is a research field that combines the various techniques of musical analysis with the methods of the social sciences and humanities (i.e., the study of cultural systems including music). Although originally focused on folk, tribal, and Asian classical music traditions, ethnomusicology at UCLA includes the study of all styles of music in the world, including popular music, jazz, and even Western classical music when approached from a cultural perspective. The graduate program in ethnomusicology provides students with broad knowledge of world musics, as well as of the musicalological and ethnomusicological methods currently used in their study.

The object of systematic musicology, a multidisciplinary field, is to answer fundamental questions on the nature and properties of music, not only as art but as empirical phenomena. At UCLA, this research orientation integrates the perspectives of aesthetics and philosophy, music theory, acoustics, sociology, psychology, organology, and semiotics, any of which can be cross-cultural, focusing on the systems or models discernible through these disciplines.

Master of Arts in Music

Admission

Applicants for the M.A. in either program must have completed a bachelor's degree in music or related fields of study. If your degree is not in music, you must provide evidence of your musical ability. You are required to submit (1) official transcripts of record; (2) a clear statement of purpose, (3) three letters of recommendation, (4) a research or term paper, and (5) proof of musical background or performance ability interpreted on a worldwide scale. For students with a bachelor’s degree in music, the degree itself satisfies the musical background requirement. For students in other fields, the requirement is satisfied by official transcripts showing at least two years of music coursework, including music history and theory, or by an audition or monitored recording of any musical tradition.
SCHOOL OF THE ARTS / Ethnomusicology and Systematic Musicology / 351

Foreign Language Requirement
For ethnomusicology, reading knowledge of French or German is required (another language relevant to your research may be substituted by petition). For systematic musicology, reading knowledge of German or French is required.

Course Requirements
Ethnomusicology — Music 200B, 253, 254A, C290A-C290B, two courses in one musical culture, and two electives on the recommendation of your mentor. If you have not taken Ethnomusicology and Systematic Musicology 20A-20B-20C or their equivalent, you must audit or take them for credit, which may not be applied toward the degree. Music 280 may be taken but also may not be applied toward the M.A. (you are encouraged to participate in course 280, particularly in Spring Quarter when it often serves as a department colloquium). Performance Requirement — A minimum of two terms of ethnomusicology performance organizations (Ethnomusicology and Systematic Musicology 91A-912), which may not be applied toward the degree.

Systematic Musicology — Music 200A, 200B, three terms of 272, one course from 255, 269, 273, or 275, and three electives on the recommendation of the graduate adviser.

Only four units of Music 596A, 596B, or 596C and four units of course 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement.

Thesis Plan
With departmental approval M.A. students in ethnomusicology may follow either the thesis or comprehensive examination plan; students in systematic musicology must use the thesis plan which is an extended essay. In ethnomusicology the thesis is an extended essay or other equivalent presentation involving the original investigation of a problem or subject of limited scope, approved by the department.

The thesis topic and the master’s committee members are approved by your area.

Comprehensive Examination Plan
In ethnomusicology the comprehensive examination consists of two written examinations, one in theory and method in ethnomusicology and one in a world music culture area or other approved topic reflecting your course of study. Failed examinations may be retaken only once during the following year. In addition, for advancement to the Ph.D. program, you must submit a research paper written during your master’s studies as demonstration of writing and scholarly abilities.

Final Examination
The final examination is oral and includes discussion of both the thesis and related matters. A final oral examination is required under both plans, providing opportunity for you to defend your thesis or research paper and written examination responses, and for your committee to explore further your suitability for admission to the doctoral program.

Ph.D. in Music
Admission
Applicants for the Ph.D. program in either area must normally have completed an M.A. or equivalent degree in one of the following: ethnomusicology, Western music, a non-Western music tradition, a related discipline, or area studies with a music specialization. If your qualifications do not meet the requirements for the department’s M.A. degree, you must complete remedial coursework, as recommended by the department, before beginning the Ph.D. program.

Foreign Language Requirement
For ethnomusicology, reading knowledge of French or German (unless otherwise justified) and a language relevant to your dissertation research is required (if the second language is your native language, English may be substituted). For systematic musicology, reading knowledge of French and German is required.

Course Requirements
You may petition, on the advice of your graduate adviser, for exemption from specific requirements on the basis of equivalent work done at the M.A. level.

Ethnomusicology — Music 200B, 253, 254A, C290A-C290B, two Fall or Winter Quarters of Music 280, and eight courses from 248, 254B, 255, M258, 273, 275, 276, 280, 281A, 281B, 282, 284, 285, 286A, 286B, 287, 288, and 289, and selected courses in Western music, a related discipline, or particular nonmusic area as recommended by your mentor. No more than two 500-series courses and two courses outside the program may be applied toward the degree. In addition, you must enroll in Music 280 every Spring Quarter when it often serves as a department colloquium. Performance Requirement — At least three terms of ethnomusicology performance organizations (Ethnomusicology and Systematic Musicology 91A-912).

Systematic Musicology — Music 200A, 200B, five terms of 272, and one term of 255, 269, 273, or 275. If you received the M.A. in systematic musicology from UCLA, you normally take a minimum of two terms of course 272 in the Ph.D. program.

Qualifying Examinations
When you and your guidance committee believe you are ready to take the qualifying examinations, you should submit a schedule to the Music Department Student Services Office and the committee members listing the order in which the examinations are to be taken. The Student Services Office staff acts as proctor for the tests. Normally the written examinations are spread over a two-week period but should be completed within three weeks. Repeat examinations may be scheduled in consultation with the guidance committee and after a stipulated period of time. Contact the Student Services Office for details on the written examinations.

When you successfully complete the written examinations, the departmental oral qualifying examination can be scheduled. After passing this oral examination, you may submit your dissertation proposal and request for a doctoral committee; this committee administers the University Oral Qualifying Examination.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination
The dissertation is an extended monograph; a final oral examination is required by the department.

Lower Division Courses
1A-1B. Fundamentals of Sound and Music of the World (2 units, 4 units). (Formerly numbered Music 5A-5B-SC.) Lecture, two hours; laboratory, one hour. Prerequisite: consent of instructor. Not open for credit to students with credit for former Music 5A-5B-SC. Acoustical makeup of sound (pitch, tone quality); tuning systems; modes and scales; harmony and polyphony; rhythm and meter; notational systems; relationships of music to culture. Laboratory includes ear training and instrumental techniques.

20A-20B-20C. Musical Cultures of the World. (Formerly numbered Music 140A-140B-140C.) Prerequisite: consent of instructor. Course 20A is not prerequisite to 20B, which is not prerequisite to 20C. Survey of musical cultures of the world (excluding Western art music), role of music in society and its relationship to other arts; consideration also to scale structure, instruments, musical forms, and performance standards.

20A. Europe and the Americas. Not open to students with credit for former Music 140A. 20B. Near East and Africa. Not open to students with credit for former Music 140B. 20C. South Asia, Southeast Asia, and the Far East. Not open to students with credit for former Music 140C.
Upper Division Courses

108A-108B. Music of Latin America. (Formerly numbered Music 131A-131B.) Prerequisite: consent of instructor. Course 108A surveys history and characteristics of Latin American music and its major composers, including comparison of various Afro-American musical genres from slave era to the present, including traditions in the West Indies and Central and South America. Ms. DjeDje

111. Ellingtoniana. (Same as Afro-American Studies 120A.) Ellington, his music, and the far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists, and work in dance, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington. Mr. Burrell (W)

113. Music of Brazil. (Formerly numbered Music 157.) Lecture, three hours. Prerequisite: consent of instructor. Not open to students with credit for former Music 157. History of ethnic and art music in Brazil, with some reference to Portuguese antecedents. Mr. Jairazbhoy

117. American Popular Music. (Formerly numbered Music 144.) Recommended prerequisite: Music 1A or equivalent. Not open to students with credit for former Music 144. Survey of history and characteristics of American popular and jazz music and its major composers, including comparison between traditional pre-1950 popular music and trends in post-1950 popular music. Mr. Jairazbhoy

118. Development of Jazz. (Formerly numbered Music 132A-132B.) Prerequisite: Musicology 2A or consent of instructor. Course 120A is prerequisite to 120B. Course 120A is not open to students with credit for former Music 132A; 120B is not open to students with credit for former Music 132B. Introduction to jazz, its historical background and its development, focusing on major artists and related modes of musical behavior. Mr. Lui

121. Cross-Cultural Perspectives in Jazz. (Formerly numbered Music 159W.) Prerequisite: consent of instructor. Exploration of assimilation and retention of jazz from the U.S. in various countries, with particular emphasis on cultural and social factors; form and function of new jazz-ethnic music blends. Mr. Porter

128. Folk Music of Eastern Europe. (Formerly numbered Music 142A.) Prerequisite: consent of instructor. Not open to students with credit for former Music 142A. Introduction to and styles of traditional music in Eastern Europe (including the Balkans). Historical and ethnomusicological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area. Mr. Porter

130. Folk Music of the Mediterranean. (Formerly numbered Music 142B.) Lecture, three hours. Prerequisite: consent of instructor. Not open to students with credit for former Music 142B. Introduction to and styles of traditional music in the Mediterranean basin, particularly features of contrast, similarity, and cross-cultural interaction. Historical and ethnomusicological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area. Mr. Racy

133A-133B. Music of Africa. (Formerly numbered Music 143A-143B.) Lecture, three hours. Prerequisites: Courses 20A or consent of instructor. Course 133A is not open to students with credit for former Music 143A; 133B is not open to students with credit for former Music 143B. Investigation of historical and cultural background and the broad field of study, including use of music as a stimulus, tests and measurements, and related modes of musical behavior. Mr. Kendall

146. Folk Music of South Asia. (Formerly numbered Music 148.) Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Not open to students with credit for former Music 146. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence. Ms. DjeDje

146. Folk Music of South Asia. (Formerly numbered Music 148.) Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Not open to students with credit for former Music 146. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence. Ms. DjeDje

146. Folk Music of South Asia. (Formerly numbered Music 148.) Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Not open to students with credit for former Music 146. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence. Ms. DjeDje

157. History of Chinese Opera. (Formerly numbered Music 145.) Prerequisite: consent of instructor. Not open to students with credit for former Music 145. Survey of dramatic elements in Chinese operas, including staging, musical accompaniment, and use in context of Chinese society. Mr. Lui

160A. Survey of Music in Japan. (Formerly numbered Music 141A.) Lecture, three hours. Not open to students with credit for former Music 141A. Survey of traditional and contemporary musical settings. Mr. Burrell (W)

160B. Studies in Japanese Court Music. (Formerly numbered Music 141B.) Lecture, two hours; laboratory, two hours. Prerequisite: minimal musical ability. Not open to students with credit for former Music 141B. In-depth study of Japanese court music, including construction, development, and use in context of Japanese court procedures. Mr. Togi, Mr. Yuge

172A-172B. Psychology of Music. (Formerly numbered Music 137A-137B.) 172A. Not open to students with credit for former Music 172A. Designed for non-majors. Study of psychological background and the broad field of study, including use of music as a stimulus, tests and measurements, and related modes of musical behavior. 172B. Prerequisites: Music 20A, 20B, 20C, and Musicology 26A-26B-26C, or consent of instructor. Not open to students with credit for former Music 172B. Study of psychological factors and problems in music from points of view of listener, performer, and composer. Mr. Kendall

173. Experimental Research in Music. (Formerly numbered Music 184.) Lecture, three hours. Prerequisites: Music 20A, 20B, 20C, 120A, 120B, and Musicology 26A-26B-26C, or consent of instructor. Recommended for majors in all specializations. Not open to students with credit for former Music 184. Analysis of research methods and techniques used in musical research and in various research projects and situations in which a knowledge of music is not prerequisite to the research being undertaken. Mr. Kendall

176. Problems in Musical Aesthetics. (Formerly numbered Music 187.) Lecture, three hours. Prerequisites: Music 20A, 20B, 20C. Musicology 26A-26B-26C, or consent of instructor. Not open to students with credit for former Music 187. Critical approach to musical problems of aesthetic analysis, description, values, theories, including both Western and non-Western considerations. Mr. Kendall.

C179. Proseminar in Systematic Musicology. (Formerly numbered Music C191.) Lecture, three hours. Prerequisite: consent of instructor. Not open to students with credit for former Music C191. Introduction to the broad field of systematic musicology, including basic readings in aesthetics/philosophy; anthropology, sociology, and ethnomusicology; psychology; and acoustics. May be concurrently scheduled with Music C291. P/NP or letter grading. Mr. Kendall.

M180. Analysis of Traditional Music. (Formerly numbered Music M180.) Lecture, three hours. Prerequisites: courses 10A-10B-10C and 20A-20B-20C, or consent of instructor. Not open to students with credit for former Music M180. Intensive study of methods and techniques necessary to understand Western folk music. Mr. Porter.

181. Anthropology of Music. (Formerly numbered Music 148.) Prerequisites: courses 10A-10B-10C and 20A-20B-20C, or consent of instructor. Not open to students with credit for former Music 149. Cross-cultural examination of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure. Mr. Rice.

C190A-C190B. Proseminars in Ethnomusicology. (Formerly numbered Music C190A-C190B.) Lecture, three hours. Prerequisites: courses 10A-10B-10C and 20A-20B-20C, or consent of instructor. Not open to students with credit for former Music C190A-C190B. May be concurrently scheduled with Music C290A-C290B.

199E. Special Studies in Ethnomusicology (2 to 4 units). Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in ethnomusicology resulting in research project. May be repeated for a maximum of eight units. Mr. Jairazbhoy and the Staff.

199S. Special Studies in Systematic Musicology (2 to 4 units). Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in systematic musicology resulting in research project. May be repeated for a maximum of eight units. Mr. Kendall and the Staff.

Graduate Courses
See Music

History/Art History
(Interdepartmental)

For details on this undergraduate major, see Chapter 5 on the College of Letters and Science.
nomusicology and Systematic Musicology 91A-91Z. In addition, you are required to take one college year—or at least one course at level three—of French, German, Italian, or Spanish, which may be used to fulfill the school language requirement.

The Major

**Required:** A minimum of 48 units in upper division, including Music 120A, 120B, one course from 102, 105, 120C (individual specializations may specify a given course), Musicology 126A-126B-126C, and six courses selected from one of the specializations listed below.

**Music Education** — Music 100A-100B-100C, 116, 117A, 117B, 120C, 193, eight units from 115A through 115E. You are encouraged to take additional coursework from 112A, 112B, 118A, 118B, 118C, 118D, 118E, 118F, Ethnomusicology and Systematic Musicology 176 as your schedule allows. If you are considering a music education specialization, you are encouraged to meet with a music education advisor during your freshman year.

**Theory** — Music 120C and six courses from 101, 102, 103A, 103B, 104A, 104B, 105.

**Graduate Study**

**Admission**

Application for admission/fellowship due ................................ December 30
Supplementary application materials due ........................................... January 15
Assessment examination ... end of January
Notice of acceptance or denial sent .................................................... by March 15
Late applicants must meet the following deadlines:
Late applications for admission only (from addresses in the U.S. only) accepted until ....................... March 1
Supplementary application materials due ........................................... April 1
Assessment examination .................. early April
Notice of acceptance or denial sent .................................................... by May 15
Failure to meet any deadline may result in a delay in action on an application for admission, as well as that for a fellowship or assistantship.

For all areas of specialization, the application and all supplementary materials described below must be submitted to Mary Crawford, Department of Music, 2539 Schoenberg Hall Annex, UCLA, Los Angeles, CA 90024-1616.

**Ethnomusicology** — Applicants for the M.A. must have completed a Bachelor of Arts degree in Music or other fields of study related to ethnomusicology. If your degree is not in music, you must provide evidence of your musical ability. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants for the Ph.D. must have completed a Master of Arts degree in Music (or an equivalent degree). The degree normally will have been taken in the same field of concentration as the proposed doctorate. If you wish to obtain a doctorate in a field other than that of the M.A., additional coursework, as prescribed by the department, must be completed.

Applicants for all degrees (M.A., M.F.A., and Ph.D.) are also required to (1) take a departmental assessment examination (details are automatically sent after the application has been received), (2) submit a letter describing their background of study and stating their reasons for wishing to pursue graduate studies in music, (3) submit three letters of recommendation from former instructors and/or professionals with whom they have worked, and (4) submit written examples of their work. For all branches of musicology and music education, a paper on an appropriate subject should be submitted; for composition, musical scores; for M.F.A. applicants, a repertoire list and sample concert or recital programs. Ph.D. applicants should submit the M.A. thesis or composition, if possible. M.F.A. applicants also are required to demonstrate by audition their general musical proficiency in their area of specialization. No application can be considered until the examination has been taken and all of the above materials have been received.

**Major Fields**

The Music Department offers the degrees of Master of Arts and Doctor of Philosophy in the fields of historical musicology, ethnomusicology, systematic musicology, composition, and music education, and Master of Fine Arts (performance practices) in all classical solo instruments, voice, opera, and conducting.
Instructional Credential in Music
You may earn credentials for teaching music and other subjects in California elementary and secondary schools in conjunction with the Graduate School of Education; completion of the instructional credential program in the Teacher Education Laboratory is required. Interested applicants should consult the Graduate School of Education (201 Moore Hall) and the faculty adviser in music education for information.

Master of Arts Degree

Foreign Language Requirement
Reading knowledge of a foreign language is required by each area as follows: composition — French, German, Italian, or Latin; ethnomusicology — French or German (another language relevant to your research may be substituted by petition); historical musicology — German and a choice of French, Italian, or Latin; music education — German, French, Italian, or Spanish; systematic musicology — German or French.

Course Requirements
You are required to complete a minimum of nine courses, five of which must be at the 200 level. Only four units of Music 596A, 596B, 596C, or 596D and four units of course 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. Upper division courses that may be applied toward the minimum nine courses include 103A, 103B, 104A, 104B, 106B*, 106C*, 107A*, 107B*, 107C*, 109A, 109B, 109C, 112A, 112B, 116**, 117A**, 117B**, 118A, 118B, 151A, 151B, 156, 175 (four units only), Ethnomusicology and Systematic Musicology 106A, 106B, 106C, 113, M126, 128, 130, 136A, 136B, 146, 147, 156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 173, 176, M180, 181. Course 598 serves to guide the preparation of the thesis and should normally be taken during your last term in residence.

Course requirements for each field are as follows:

Composition — Music 200A, one course from 251A through 251D, 252A, 252B, and 252C in sequence (with the option of substituting course 596A for 252C), 266A or 266B, and three electives on the recommendation of the graduate adviser. In addition to the thesis, you are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. You are also responsible for the campus presentation of one original work during each year of residency.

Ethnomusicology — Music 200B, 253, 254A, C290A-C290B, two courses in one musical culture, and two electives on the recommendation of your mentor. If you have not taken Ethnomusicology and Systematic Musicology 20A-20B-20C or their equivalent, you must audit or take them for credit, which may not be applied toward the degree. Music 280 may be taken but also may not be applied toward the M.A. (you are encouraged to participate in course 280, particularly in Spring Quarter when it often serves as a department colloquium).

Performance Requirement — A minimum of two terms of ethnomusicology performance organizations (Ethnomusicology and Systematic Musicology 91A-91Z), which may not be applied toward the degree.

Historical Musicology — Music 200A, four courses from 201A through 201F, either 210 or 211 (students planning to enter the Ph.D. program are strongly advised to take both courses 210 and 211 in the first year of residence), 250A or 250B, and two terms of 260A through 260F.

Music Education — You may choose either the thesis or comprehensive examination plan. Within each plan you must select a course of study that covers a special field of interest — choral, instrumental, or general topics — as listed below. For the thesis plan, Music 200A, 200B, C225, three courses from 118A, 118B, 270A through 270G (required in the special fields), and three elective courses from one of the special fields below are required. For the comprehensive examination plan, Music 200A, C225, four courses from 118A, 118B, 270A through 270G (required in the special fields), and three elective courses from one of the special fields below are required.

Course requirements for the special fields are as follows: choral — Music 118A (four units), 270E, and elective courses selected from 112B, 174A through 174C (four units only), C227A through C227F, 596A, 596B, 596C, 596D, 598, Ethnomusicology and Systematic Musicology 172B, 176, Musicology 135A, 135B, 135C; instrumental — Music 118B (four units), 270F, and elective courses selected from 106A, 106B, 106C, 112A, 175 (four units only), C227A through C227F, 261A through 261F, 596A, 596B, 596C, 596D, 598, Ethnomusicology and Systematic Musicology 170, 172B, 176; and general topics — two courses selected under advisement from Music 270A through 270G and elective courses selected from 175 (four units only), C227A through C227F, 596A, 596B, 596C, 596D, 598, Ethnomusicology and Systematic Musicology 172B, 176.

Systematic Musicology — Music 200A, 200B, three terms of 272, one course from 255, 269, 273, or 275, and three electives on the recommendation of the graduate adviser.

Thesis Plan
All M.A. students must use the thesis plan, except those specializing in music education or ethnomusicology who may follow either the thesis or comprehensive examination plan. In all areas except composition and ethnomusicology the thesis is an extended essay. In composition the thesis is a work proposed by the student and approved by the composition and theory division. In ethnomusicology the thesis is an extended essay or other equivalent presentation involving the original investigation of a problem or subject of limited scope, approved by the department.

The thesis topic and the master's committee members are approved by your department or area.

Comprehensive Examination Plan
In ethnomusicology the comprehensive examination consists of two written examinations, one in theory and method in ethnomusicology and one in a world music culture area or other approved topic reflecting your course of study. Failed examinations may be retaken only once during the following year. In addition, for advancement to the Ph.D. program, you must submit a research paper written during your master's studies as demonstration of writing and scholarly abilities.

In music education you may use the comprehensive examination plan in lieu of the thesis plan only if you are not going on to the Ph.D. in the Music Department. The plan has three components: (1) the realization in performance of a creative project appropriate to elementary, secondary, or higher education (e.g., choral or instrumental ensemble performance, original curricular design, original compositions or transcriptions); (2) a paper equivalent to a graduate seminar paper, including research, description of procedures, and analysis of the selected project; and (3) a final conference and evaluation.

Final Examination
The final examination is oral and includes discussion of both the thesis and related matters. This examination does not apply to music education students electing the comprehensive examination plan.

In ethnomusicology, under both plans, a final oral examination is required, providing opportunity for you to defend your thesis or research paper and written examination responses, and for your committee to explore further your suitability for admission to the doctoral program.

Master of Fine Arts Degree

Foreign Language Requirement
Reading knowledge of French, German, or Italian is required. International students may petition to substitute English. Candidates in
the opera specialty must also be fluent in speaking one of these languages. The language requirement should be satisfied by the end of your first year in residence.

**Course Requirements**

You are required to complete a minimum of 18 courses, including at least six at the 200 level and six or more in the 400 series. Only four units of Music 596A, 596B, 596C, or 596D and eight units of course 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. The minimum residence requirement for the M.F.A. is two years.

Course requirements are as follows: Music 200A, two terms of 261A through 261F, six terms of 400-level performance instruction, two terms (eight units) of 598, and seven elective courses. Conducting students declare either a choral or instrumental specialization. Six terms of course 475 are required in the area of specialization (i.e., choral or instrumental) and at least two terms in the other area. (On a two-year program, the ratio would be four to one.) Recommended electives include courses 175, 596A, 596B, 596C, 596D, Ethnomusicology and Systematic Musicology 170, 176, and additional courses from the 200 and 400 series. A maximum of four units of chamber ensembles (course 175) may be applied toward the minimum 18 courses. Course 598 serves to guide the preparation of the final project and should normally be taken during your last two terms in residence.

Each year you must complete a solo recital on campus (preferably a noon concert) with a faculty committee in attendance to evaluate the performance. Conducting students present a program, or a substantial portion thereof, approved by the conducting faculty, either on or off campus.

The final project is to be completed during your last year in residence. A solo recital and appropriate scholarly paper are required in all areas. In addition, a major operatic performance is required in the area of opera. Conducting students present an on-campus program, or a substantial portion thereof, with one of the department's performance organizations. The scholarly paper should be equivalent to a graduate seminar paper (15 to 25 pages in length) and should be concerned with performance problems which can be elucidated through research and analysis. The final version of the scholarly paper, with the accompanying recital program, must be submitted to the department in the format of a thesis.

The language requirement and a majority of the coursework must be completed before you submit the final project proposal and request for an M.F.A. committee. The proposal, which is to include the complete recital program and an abstract of the scholarly paper, should be submitted by the second quarter of your last year in residence.

**Ph.D. Degree**

**Admission**

See “Admission” under Graduate Study above. In addition, applicants for the Ph.D. in music education must have two years of teaching experience at the elementary or secondary level to be considered for admission.

**Foreign Language Requirement**

Reading knowledge of foreign languages is required by each area as follows: composition — two languages selected from German, French, Latin, Italian, Russian, Spanish, or, for students whose native language is not English, English (you may not use both English and the native language); ethnomusicology — French or German (unless otherwise justified) and a language relevant to your dissertation research (if the second language is your native language, English may be substituted); historical musicology — French, German, and a choice of Italian, Latin, or another language approved by your department; music education and systematic musicology — French and German.

**Course Requirements**

You may petition to your department or area, on the advice of your graduate adviser, for exemption from specific requirements on the basis of equivalent work done at the M.A. level.

Course requirements for each field of study are listed below. In each area, you may complete the residence requirement by electing courses (with consent of the graduate adviser) from the 200 series or the list of 100-level courses under “Course Requirements” for the M.A.

**Composition**

Music 200A, one course from 251A through 251D, six terms of 252A, 252B, 252C in sequence (with the option of substituting course 259A for 252C), and 266A or 266B. If you received the M.A. in composition from UCLA, you normally take a minimum of three terms of courses 252A, 252B, 252C in sequence in the Ph.D. program. If you received the M.A. in composition elsewhere, you normally take six terms of courses 252A, 252B, 252C in sequence, with the option of substituting course 259A for either or both 252Cs. In addition to the dissertation, you are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. You are also responsible for the campus presentation of one original work during each year of residency.

**Ethnomusicology**

Music 200B, 253, 254A, C290A-C290B, two Fall or Winter Quarters of course 280, and eight courses from 248, 254B, 255, M258, 273, 275, 276, 280, 281A, 281B, 282, 284, 285, 286A, 286B, 287, 288, 289, and selected courses in Western music, a related discipline, or particular nonmusic area as recommended by your mentor. No more than two 500-series courses and two courses outside the program may be applied toward the degree. In addition, you must enroll in course 280 every Spring Quarter when it often serves as a department colloquium. Performance Requirement — At least three terms of ethnomusicology performance organizations (Ethnomusicology and Systematic Musicology 91A-91Z).

**Historical Musicology**

Music 200A, 201A-201F, 210, 211, 250A or 250B, and five terms of 260A through 260F. If you received the M.A. in historical musicology from UCLA, you normally take a minimum of three terms of courses 260A through 260F in the Ph.D. program.

**Music Education**

**Systematic Musicology**

Music 200A, 200B, five terms of 272, and one term of 255, 269, 273, or 275. If you received the M.A. in systematic musicology from UCLA, you normally take a minimum of two terms of course 272 in the Ph.D. program.

**Qualifying Examinations**

When you and your guidance committee believe you are ready to take the qualifying examinations, you should submit a schedule to the Student Services Office and the committee members listing the order in which the examinations are to be taken. The Student Services Office staff acts as proctor for the tests. Normally the written examinations are spread over a two-week period but should be completed within three weeks. Repeat examinations may be scheduled in consultation with the guidance committee and after a stipulated period of time. Contact the Student Services Office for details on the written examinations.

When you successfully complete the written examinations, the departmental oral qualifying examination can be scheduled. After passing this oral examination, you may submit your dissertation proposal and request for a doctoral committee; this committee administers the University Oral Qualifying Examination.
Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

In all fields but composition, the dissertation is an extended monograph. In composition, the dissertation consists of (1) an extended composition accompanied by a short description of the style and techniques of the work and (2) an analytical monograph dealing with some aspect of 20th-century music.

A final oral examination is required by the department.

Lower Division Courses

1A-1B. Fundamentals of Music. Lecture, two hours; discussion, two hours. Designed for nonmusic majors.

1A. Introduction to elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. 1B. Prerequisite: course 1A. Diatonic harmony; four-part writing, including inventions, seventh, secondary dominants, and modulation; organization of melody and accompaniment; simple analysis; sight-singing and ear training.

Mr. Henderson, Ms. Karp

3A-3B. Preparatory Theory for Music Majors (2 units each). Lecture, two hours; discussion, one hour. Prerequisite: music major or consent of instructor. Course 3A is not open for credit to students with credit for course 1A; course 3B is not open for credit to students with credit for course 1B. Course for music majors in music fundamentals, including musicianship, theory, and terminology.

Mr. Anderson

4A-4B-4C. Basic Musicianship (2 units each). Laboratory, three hours. Class instruction in elementary ear training and keyboard skills.

Ms. Sheffield

60A-60B. Graduate Review of Music History and Analysis (2 units each). Prerequisite: graduate standing. Designed to help entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated for credit. S/U grading.

60C. Graduate Piano Sight-Reading (2 units). Prerequisite: graduate standing. Designed to help entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated. S/U grading.

60G. Graduate Piano Sight-Reading Laboratory (2 units). Lecture, two hours; laboratory, one hour. Prerequisites: course 1A or equivalent; consent of instructor. Individualized, self-instructional approach for development of sight-singing skills through use of a music computer, keyboard instrument, and linear program learning.

61A-12B. Countertop (2 units each). Lecture, four hours. Corequisites: courses in the 11A-11F series.

12A. Prerequisites: aptitude, achievement, and piano skills tests. 19th-century modal counterpoint in two parts, including writing of motets. 12B. Prerequisites: courses 12A, 14B, 18th-century modal counterpoint in two parts, including writing of inventions.

15. Art of Listening. Lecture, three hours; laboratory, one hour. Acquisition of listening skills through direct interaction with live performers, composers, and performers. Relationship of listening to theoretical, analytical, historical, and cultural considerations. Music as art and music as a cultural by-product.

Mr. Winter

20A. Music Theory I. Lecture, two hours; discussion, six hours. Prerequisite: passing score on departmental placement exam. Not open for credit to students with credit for both course 20A and former course 11A (with grades of C or better). Theory: species counterpoint through fifth species; description of triads and inversions. Musicianship: advanced sight-singing; fixed-do solfeggio of diatonic melodies; one-part dictation of diatonic melodies; two-part dictation of small-composition melodic and harmonic sequences; note-against-note melodies; simple rhythm dictation; use of triple, quarter, and basedrums.

20B. Music Theory II. Lecture, four hours; discussion, four hours. Prerequisites: course 20A with a grade of C (2.0) or better, consent of instructor. Not open for credit to students with credit for both former courses 1B and 14A (with grades of C or better). Theory: diatonic harmony through secondary dominants and diminished sevenths; modulations to dominant and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass notation. Musicianship: harmonic dictation, including secondary dominants and diminished sevenths, but not modulations; more advanced two-part dictation; chromatic one-part dictation; more advanced sight-singing; keyboard (three-part open score in homophonic textures, introduction to treble clef).

20C. Music Theory III. Lecture, four hours; discussion, four hours. Prerequisites: course 20B with a grade of C (2.0) or better, consent of instructor. Not open for credit to students with credit for both former courses 11C and 14B (with grades of C or better). Theory: chromatic harmony including development of tonality; 1800 to 1850; appropriate analysis and style composition. Musicianship: advanced sight-singing; two-part contrapuntal dictation; keyboard harmony (harmonic sequences in major and minor keys); reading in open score of four homophonic parts in four clefs.

Admission to courses 60A through 65 and the option of individual instruction or group instruction is based on the decision of the performance faculty at the time of the audition. Students may re-audition at the beginning of each academic year to gain admission to the courses. Permission to change from group instruction to individual instruction is based on the jury examination in Spring Quarter.

60A-65. Undergraduate Instruction in Performance (2 units each). Limited to music majors (all lower division majors, and upper division majors not in performance specialization). Individual instruction of one hour per week. Students must perform a practicum once during academic year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit.

60A. Violin. Ms. Kamei, Mr. Treger

60B. Viola. Mr. Wilson

60C. Cello. Mr. Oliver

60D. String Bass. Mr. Zibits

60E. Harp. Ms. Neill

60F. Classical Guitar. Mr. Norman, Mr. Yates

60G. Viola da gamba. Ms. Marcus

60K. Lute. Ms. Winter

61A. Flute. Ms. Kamei, Mr. Treger

61B. Oboe. Mr. Winter

61C. Clarinet. Mr. Gray

61D. Bassoon. Mr. Steinmetz

61E. Saxophone. Mr. Guarnieri

62A. Trumpet. Mr. Todd

62B. French Horn. Mr. Booth

62C. Trombone. Mr. Johnson

62D. Tuba. Mr. Johnson

63. Percussion. Mr. Peters

64A. Piano. Ms. Mrs. Harris-Heggie, Mr. Tzerko, and the Staff

64B. Organ. Mr. Harmon

64C. Harpsichord. Mr. Mrs. Karp

65. Voice. Mr. Mrs. Mussard and the Staff

90A. Concert Choir (2 units). Activity, four hours. Prerequisite: audition. Select mixed ensemble of 50 to 60 voices performing chorale music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Weiss

90B. Collegiate Chorus (2 units). Nonaudition mixed chorus of 50 to 150 voices performing medium- and concert-length choral works from baroque to the present. Collegiate Chorus performs only as part of 'Choral Union,' a large chorus made up of all of the choral ensembles. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Weiss

90C. Chamber Singers (2 units). Activity, three hours. Prerequisite: audition. Select mixed ensemble of 16 to 20 voices performing chamber choral music of all periods, with emphasis on Renaissance and baroque music. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Weiss

90D. Opera Workshop (2 units). Activity, six hours. Prerequisite: audition. Rehearsal and performance of scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Weiss

90E. Symphony Orchestra (2 units). Activity, four hours. Prerequisite: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Krachmalnick

90F. Wind Ensemble (2 units). Activity, four hours. Prerequisite: audition. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Lee

90H. Collegium Musicum (2 units). Activity, three hours. Prerequisite: audition. Group performance of vocal chamber music of all periods, with emphasis on Renaissance and baroque eras on period instruments. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Marcus

90J. Men's Glee Club (2 units). Activity, three hours. Prerequisite: audition. Select mixed ensemble of 40 to 45 voices performing male choral music of all periods, with emphasis on popular and folk arrangements. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Krachmalnick

90K. Women's Chorus (2 units). Activity, three hours. Prerequisite: audition. Select female chorus of 45 to 55 voices performing treble choral music of all periods, with emphasis on music after 1750. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Weis

90M. Marching and Varsity Bands (2 units). Activity, four hours. Prerequisite: audition. Select mixed ensemble of 20 to 30 voices performing band music of all periods, with emphasis on movement and period horas. May be repeated for credit without limitation. P/NP or letter grading.

Mr. Winter
Upper Division Courses

100A-100B-100C. Music in American Education (2 units each). Lecture, three hours; laboratory, one hour. Prerequisites: courses 20A, 20B, 20C. This course is prerequisite to 103C. Designed for music majors, particularly elementary education students. Study of music literature applicable to elementary school programs. 113A. Emphasis on listening analysis, musicianship, and improvisation. 113B. Advanced class performance—music reading, singing, and folk instruments. 

113A-113B. Music Literature for Children. Lecture, three hours; laboratory, one hour. Prerequisites: course 1A and Musicology 2A, or consent of instructor. Course 113A is prerequisite to 113B. Designed for nonmusic majors, particularly elementary education students. Study of music literature applicable to elementary school programs. 113A. Emphasis on listening analysis, musicianship, and improvisation. 113B. Advanced class performance—music reading, singing, and folk instruments. 

116. Introduction to Conducting (2 units). Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A. Fundamentals of conducting, including basic skills, techniques, analysis, and repertoire. 

117A-117B. Study and Conducting of Choral and Instrumental Literature (2 units each). Lecture, three hours. Prerequisites: course 116 or consent of instructor. Study and practical conducting as related to study of choral and instrumental music. 117B. Instrumental. 

118A-118B. Advanced Study and Conducting of Choral and Instrumental Literature (2 units each). Lecture, two hours; laboratory, two hours. Prerequisites: courses 116 and 117A and 117B, or consent of instructor. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each course may be repeated once for credit. 118A. Choral. 118B. Instrumental. 

120A. Music Theory IV. Lecture, four hours; discussion, four hours. Prerequisites: course 120B with a grade of C (2.0) or better, passing score on departmental first-year examination. Not open for credit to students with credit for both courses 120A and 120B. Advanced music theory: counterpoint in choral prelude; part-writing; exposition and first modulation of a three-part invention; canon techniques; analysis of inventions, canons, and fugues. Music composition: simple technique of extended choral melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulation melodies; elementary score reading. 

120B. Music Theory V. Lecture, four hours; discussion, four hours. Prerequisites: course 120A with a grade of C (2.0) or better, consent of instructor. Theory: baroque counterpoint including choral prelude; two-part invention; exposition and first modulation of a three-part invention; canon techniques; analysis of inventions, canons, and fugues. Music composition: simple technique of extended choral melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulation melodies; elementary score reading. 

120C. Music Theory VI. Prerequisites: course 120B with a grade of C (2.0) or better, consent of instructor. Not open for credit to students with credit for both courses 119B and 120B. Advanced theory: advanced harmonic dictation; preparation for departmental examination. 

121. Special Topics in 20th-Century Music. Lecture, three hours. Prerequisites: courses 120A, 20A, 20B, 20C, 120A, 120B, and 120C, or consent of instructor. In-depth study of certain aspects of 20th-century musical style ranging from individual composers and schools to ideological or stylistic concerns. May be repeated once for credit. 

150. Introduction to Music Criticism. Lecture, three hours. Prerequisites: music major or consent of instructor. Readings and discussion of music criticism past and present, and exercise in the writing of criticism of live concert events and recordings. Designed to aid students (performers, critics, or listeners) in verbalizing the experience of listening to music. 

157. New Orleans Jazz. Lecture, three hours; discussion, two hours. Major black and Creole figures in the popular and development of jazz in New Orleans from turn of the 20th century through the 1960s, with emphasis on polyrhythmic patterns, local musical idioms, and stylistic analysis. 

160A-165. Undergraduate Instruction in Performance for the Performance Specialist (2 units each). Limited to upper division music majors who have been accepted by audition into performance specialization. Individual instruction of one hour per week. Students must perform in a noon concert once during their junior year and must present a full recital in their senior year. Grades are assigned by applied instructor in Fall and Winter Quarters, and by jury examination in Spring Quarter. May be repeated for credit. 

160A. Violin. Ms. Kamei, Mr. Treger 

160B. Viola. Ms. Kamei, Mr. Treger 

160C. Cello. Mr. Oliver 

160D. String Bass. Mr. Zibitz, Ms. Neill 

160E. Harp. Mr. Zibitz, Ms. Neill 

160F. Classical Guitar. Mr. Norman, Mr. Yates 

160G. Voice da gamba. Ms. Marcus 

160H. Lute. Ms. Lute 

161. Flute. Mr. Stokes 

161B. Oboe. Ms. Northcutt 

161C. Clarinet. Mr. Gray 

161D. Bassoon. Mr. Steinmetz 

161E. Saxophone. Mr. Gray 

162A. Trumpet. Mr. Guarneri 

162B. French Horn. Mr. Todd 

162C. Trombone. Mr. Booth 

162D. Tuba. Mr. Johnson 

163. Percussion. Mr. Peters 

164. Piano. Mrs. Harris-Heggie, Mr. Tzerko, and the Staff 

164B. Organ. Mr. Harmon 

164C. Harpsichord. Ms. Kar 

165. Voice. Mr. Mussard and the Staff
C167. Selected Topics in Keyboard Literature. Lecture, three hours. Corequisite: course 164A or 164B or 164C or consent of instructor. In-depth study of selected topics in keyboard literature, focusing on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C225.

174A-174B. The Language of Song (2 units each). (Formerly numbered 174A-174E.) Prerequisite: music major. Sounds of the language as applied to singing, including use of International Phonetic Alphabet, translation of art song texts, and application to student's current vocal repertoire. Background in the language is encouraged. 174A. German; 174B. French; 174C. Italian. Mr. Hasl 175. Chamber Ensembles (2 units). Prerequisite: and Historical. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be repeated for credit.

C176. Electronic Music Composition. Lecture, three hours; studio, three hours. Prerequisites: course 156, advanced experience and accomplishment in serious composition (art music), consent of instructor. Limited enrollment. Examination of original compositional materials culminating in a composition at least five minutes in duration. May be concurrently scheduled with course C228.

Mr. Bourland

C185. Historical and Philosophical Foundations of Music Education. Lecture, three hours. Prerequisites: completion of undergraduate music education specialization or consent of instructor. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C225.

193. Foundations of Music Education (2 units). Lecture, two hours; laboratory, two hours. Prerequisites or corequisites: course 20A, sophomore standing. Historical, philosophical, and practical introduction to the field of music education. Miss Hooper 199. Special Studies in Music (2 or 4 hours). Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in music resulting in research project. May be repeated for a maximum of eight units.

Mr. Harmon and the Staff

Graduate Courses

200A. Research Methods and Bibliography (6 units). Lecture, three hours. Prerequisite: graduate standing. Survey of general bibliographic material in music.

200B. Research Methods and Bibliography (6 units). Lecture, three hours. Prerequisite: consent of instructor. Research study of problems in music, concentrating on some of the major historical and philosophical issues. Ms. Goiller

200C. Advanced Research Methods and Bibliography. Lecture, three hours. Prerequisites: courses 140A-140B-140C and Ethnomusicology 250A, which is prerequisite to 250B. Courses may be repeated for a maximum of eight units. Mr. Bradshaw, Mr. Hudson, Mr. Reaney

250A. Seminar in Comparative Music Theory (6 units). Lecture, three hours. Prerequisite: consent of instructor. Comparative study of codified music theories of select cultures—Western and non-Western—considered in themselves and as expressions of their societies. Theory considered as a science of music; its place between cultural values and artistic practice in different civilizations.

250B. Seminar in History of Music Theory (6 units each). Lecture, three hours. Course 250A is prerequisite to 250B. 250A. Music Theory from Antiquity through Zarini. 250B. Music Theory from Rameau to the Present. Ms. Goliner, Mr. Reaney

251A-251D. Seminars in Special Topics in Composition and Theory. Seminar, three hours. Intensive exploration of specialized aspects of composition. May be repeated for credit. 251A. Orchestration; 251B. Scoring for Media; 251C. Specific instrumental families; 251D. Compositional Analysis. Mrs. Barkin 252A-252B-252C. Seminars in Composition (6 units each). Lecture, three hours. Prerequisites: courses 106B, 107C. Course 252A is prerequisite to 252B and 252C. Course 252B may be taken out of sequence only with consent of instructor. May be repeated for credit. Mr. Travis 253. Seminar in Notation and Transcription in Ethnomusicology (6 units). Lecture, three hours. Prerequisites: courses 140A-140B-140C and Ethnomusicology 190A-190B, or consent of instructor. Ms. Devaile 254A-254B. Seminars in Field and Laboratory Methods in Ethnomusicology (6 units each). Lecture, three hours. Prerequisites: Ethnomusicology 190A-190B or consent of instructor. Seminar includes experience in handling of technical apparatus, films, recording, processing, and editing field projects. Ms. Heth, Mr. Jairazbey

255. Organology (6 units). Seminar, three hours. Prerequisites: courses 140A-140B-140C and 250A-250B, or consent of instructor. Seminar in science of musical instruments: investigation of theories of systematic, analytic, and applied branches of organology using both Western and non-Western instruments. Ms. Devaile

256. Seminar in Musical Form (6 units). Lecture, three hours. Prerequisites: Musicology 126A-126B-126C. Analysis of structural organizations in music.

Ms. D'Aconele

257. Seminar in Music of the U.S. and Canada. Seminar, three hours. Prerequisite: Musicology 130.

M258. Seminar in Folk Music. (Same as Folklore M258.) Seminar, three hours. Prerequisite: consent of instructor.

Mr. Porter

260A-260F. Seminars in Historical Musicology (6 units). Lecture, three hours. Prerequisites: courses 200A, 210A-210B-210C, and 210D or 211 (either may be taken concurrently). May be repeated for credit. 260A. Medieval Music; 260B. Renaissance; 260C. Baroque; 260D. Classical; 260E. Romantic; 260F. General Topics.

261A-261F. Problems in Performance Practices. Seminar, three hours. Prerequisites: courses 151A-151B or consent of instructor. Investigation of primary sources and printed studies as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. 261A. Medieval; 261B. Renaissance; 261C. Baroque; 261D. Classical; 261E. Romantic; 261F. Contemporary.

266A-266B. Seminars in Music of the 20th Century. Seminar, three hours. Prerequisites: Musicology 126A-126B-126C. Discussion and analysis of major works of the 20th century before World War II. Emphasis on study of groups of works written at the same time and their place in history. 266B. Discussion and analysis of composers and their works from 1945 to the present. Mr. Carlson

267. Selected Topics in Keyboard Literature. Lecture, three hours. Prerequisites: courses 464A or 464B or 464C or consent of instructor. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C167.

Ms. Karp

289. Seminar in History of European Instruments. Seminar, three hours.

270A-270G. Seminars in Music Education (6 units each). Lecture, three hours. Prerequisite: consent of instructor. May be repeated for credit. Mr. Kendall

275. Seminar in Aesthetics of Music (6 units). Lecture, three hours. Prerequisite: Ethnomusicology 170 or consent of instructor. May be repeated once for credit. Mr. Kendall

276. Seminar in Psychology of Music (6 units). Lecture, three hours. Prerequisite: Ethnomusicology 173 or consent of instructor. Selected topics in psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated for credit. Mr. Kendall

277. Seminar in Anthropology of Music. Discussion, three hours. Prerequisites: courses C290A-C290B. Analysis of current anthropological paradigms and issues that have a major impact on ethnomusicology. Mr. Rice

278. Seminar in Music of Mainland Southeast Asia. Discussion, three hours. Prerequisite: graduate standing. Presentation of materials concerning musical performance traditions of Laos, Cambodia, Vietnam, Thailand, and Burma, both in mainland Southeast Asia and in the American context, with perspectives from archaeology, history, performance theory, applied ethnomusicology.

Mr. Rice

279. Seminar in Balkan Music. Discussion, three hours. Major issues in study of Balkan music, including song text analysis, music instruments, dance music, rituals and customs, minorities, and ideology. Mr. Rice
280. Seminar in Ethnomusicology (6 units). Lecture, three hours. Prerequisites: courses 140A-140B-140C, 200A, 200B, Ethnomusicology C190A-C190B. May be repeated for credit. Mr. C.290A-C290B. Proseminars in Ethnomusicology. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Basic reading of the field of ethnomusicology from the late 19th century to the present. May be concurrently scheduled with courses 190A-C190B. Additional assignments, as well as evidence of greater depth of study, required of graduate students. M. DeVaive

282. Music of Indonesia Seminar, three hours. Prerequisite: consent of instructor. Designed to introduce the student to the study of music of the Balinese and other Indonesia islands during second term. Concurrent participation in Near East performance group required. Mr. Racy

283A-283B. Seminars in Special Topics in Ethnomusicology. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Designed to utilize special interests and expertise of regular and visiting faculty; topics of current interest presently offered in ethnomusicology program.

284. Music of Arabic-Speaking Near East. Lecture, three hours. Prerequisite: consent of instructor. Investigation of historical and cultural background, historical, social and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance group required. Mr. Racy

285. Music of Tibet. Seminar, three hours. Prerequisite: consent of instructor. Study of traditional music of Tibet as cultural, art, and folklore in its cultural matrix and its relationship with other arts. Topics include traditional instrumental and ensemble models and styles in forms and stylistic analysis.

286A-286B. Classical Music of India. Seminar, three hours. Prerequisite: consent of instructor. Study of history, theory, and practice of north and south Indian classical music. During first term, emphasis on music history and theory; second term, analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in Indian performance group required. Mr. Jainzabnoy

C290A-C290B. Proseminars in Ethnomusicology. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Basic literature and schools of thought in the field of ethnomusicology from the late 19th century to the present. May be concurrently scheduled with courses 190A-C190B. Additional assignments, as well as evidence of greater depth of study, required of graduate students. Mr. Loza, Mr. Racy

291. Proseminar in Systematic Musicology. Lecture, three hours. Prerequisite: consent of instructor. Introduction to the broad field of systematic musicology, including basic readings in aesthetics/philosophy, musical theory, anthropological, sociological, and ethnomusicological perspectives. May be concurrently scheduled with courses 190A-C190B. Mr. Kendall

370. Music in General Education (2 units). Prerequisites: passing grade in Independent Study with emphasis on music and related performing arts of Bali and other Indonesian islands during second term. Concurrent participation in Near East performance group required. Ms. DeVaive

371. The Marching Band in Secondary Education (2 units). Prerequisites: courses 193 and 195, or consent of instructor. Study of contemporary marching band as a component of the music curriculum in secondary education, including current approaches, practices, and problems associated with the marching band. May be repeated twice for credit. Mr. Anderson, Miss Hooper

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

460A-465. Graduate Instruction in Performance (6 units each). Limited to M.F.A. students. Individual instruction of one hour per week, with performance laboratory at discretion of instructor. Intensive study and preparation of musical literature in area of specialization. May be repeated for credit. 460A. Violin; 460B. Viola; 460C. Cello; 460D. String Bass; 460E. Harp; 460F. Classical Guitar; 460G. Viola da gamba; 460H. Saxophone; 461A. Flute; 461B. Oboe; 461C. Clarinet; 461D. Bassoon; 461E. Saxophone; 462A. Trumpet; 462B. French Horn; 462C. Trombone; 462D. Tuba; 463. Percussion; 464A. Piano; 464B. Organ; 464C. Harpsichord; 465. Voice.

470. Opera Studio for Graduate Students. Laboratory, six hours. Prerequisites: graduate standing, consent of instructor. Performance techniques and repertoire for graduate students in opera.

472. Master Class in Opera (6 units). Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of opera literature. May be repeated for credit. Mr. Krachmalnick

475. Master Class in Conducting (6 units). Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of musical literature in special field of conducting. May be repeated for credit.

495. Introductory Practicum for Teaching Apprentices in Music (2 units). Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Music Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

56A. Directed Individual Studies in Orchestra and Composition (2, 4, or 6 units). Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit. 56B. Directed Individual Studies in Musicology (2, 4, or 6 units). Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit. 596C. Directed Individual Studies in Music Education (2, 4, or 6 units). Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit. 596D. Directed Individual Studies in Performance Practices (2 to 12 units). Prerequisite: graduate standing. Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units). S/U grading.

598. Guidance of M.A. Thesis or M.F.A. Final Project (4, 8, or 12 units). M.A. candidates may apply four units toward degree requirements; M.F.A. candidates may apply eight units toward degree requirements. May be repeated for credit. S/U grading.

599. Guidance of Ph.D. Dissertation (4, 8, or 12 units). May be repeated for credit. S/U grading.

Scope and Objectives

The interdisciplinary major in world arts and cultures is available to students in both the School of the Arts and the College of Letters and Science. The course of study is designed to provide students with the conceptual tools with which to examine and extract meaning from the arts — regardless of language, culture, or geographical location. Students view the arts not as isolated phenomena, but as dynamic aesthetic forms which embody cultures, history, and belief systems. The program is unique in that it places emphasis on cross-cultural study rather than the conventional focus on Western "high art" traditions. Techniques of inquiry and analysis are taken from both the arts and letters and science frameworks and therefore require investigative research as well as aesthetic sensibility. The program encourages that both approaches be given equal consideration. In addition to these resources, the program utilizes UCLA's opportunities for participation in dance, music, and theater performance classes.

Students are encouraged to consider the Education Abroad Program during their junior year. Individuals interested in careers in elementary and secondary education should consult the program's student affairs officer.

Bachelor of Arts Degree

Admission

New students are admitted to the major only in Fall Quarter. Procedures and guidelines for the selection of freshmen and transfer students are approximately the same. Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, and a personal essay. For freshman applicants, college placement test scores are also considered.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. An interview with the program chair may also be required. You are advised to take world arts and cultures courses during the term in which you apply to the program and must submit grade cards to the student affairs officer for courses completed at the end of that term. You must have a minimum 3.0 grade-point average and no more than 120 quarter units. Change of major petitions are accepted in October for Winter Quarter and in April for Fall Quarter.

Concentrations

The anthropology concentration stresses both the empirical and theoretical foundations of cultural anthropology.

The art history concentration has particularly strong offerings for students interested in Asia, Africa, and the Americas.

The dance concentration includes studio opportunities, theory and research techniques, and history courses in both Western and non-Western dance.

The folklore and mythology concentration exposes students to a wide range of folklore forms derived from a diversity of cultures. (UCLA offers no undergraduate degree in folklore.)

The music concentration focuses on basic theory and skill in both Western and non-Western music. The theory option requires skill levels equivalent to lower division music majors, while the world musicianship option emphasizes ethnomusicology.

The theater concentration explores three fundamental aspects of Western and non-Western theater: (1) history and literature, (2) visual design, and (3) production and performance techniques.

Majors should be aware that the upper division course requirements in the major and in their college or school may not meet the upper division requirement for graduation (72 units for Letters and Science, 64 for the Arts). Additional upper division units may need to be taken to reach the unit total.

Foreign Language Requirement

One year of a college-level foreign language or its equivalent is required of both School of the Arts and College of Letters and Science students. All courses in any foreign language, except foreign literature in English translation, may be applied toward this requirement.

General College/School Requirements

You must satisfy the general education requirements of your school or college (Arts or Letters and Science). You may select either requirements of your school or college (Arts or Letters and Science). You may select either.

If you wish to confer with the student affairs officer regarding planning and major requirements, contact Silvily Kessler Thomas in the program office (206-3696).

The Major

The major includes a core of 28 units from anthropology, art history, dance, folklore and mythology, music, and theater; a concentration consisting of 36 units in one of these six disciplines; an eight-unit senior colloquium; and 12 units of upper division elective coursework.

The following courses are required:

(1) A core of seven interdepartmental courses (28 units): Anthropology 9, Art History 55A or 55B or 56A or 56B, Dance 70, 80A-80B, Ethnomusicology and Systematic Musicology 1A-1B, Folklore and Mythology 101, Theater 102E.

(2) A concentration of nine courses (36 units) in one of the following areas (you must declare a concentration by the beginning of your junior year):

Anthropology — Courses 60, M163; group A: course 130 or 150; group B: course 44 or 133R; group C: any five upper division courses from 110 through 186B, including one area course from 171 through 177.

Folklore and Mythology — Course 172; group A: one course from M111, 118, M180; group B: two courses from CM106, M123B, 124, M154A, M154B, M181, Classics 161, 168; group C: five courses from Folklore and Mythology 108, M112, M121, M122, M123A, M125, M126, M127, M128, M129, 130, 131, M142, M149, M150, M155, M170, M182, 190, German 134.

(3) World Arts and Cultures 190A-190B. These courses are the culmination of the major and focus on the ethnic communities of Los Angeles for field research. You select research topics on individual artists, community arts groups, or a genre of the arts.

(4) Three elective courses (12 units) which may be considered from the list below (you may petition to include courses not listed). In order to meet degree requirements, the electives must be related to the major and approved by the concentration adviser. The three courses selected to meet this requirement must be upper division courses from three different areas outside the area of concentration.
Honors Program

Majors enrolled in the College of Letters and Science who have a cumulative GPA of 3.0 overall and a cumulative GPA in major coursework of 3.5 or better are eligible to participate in the College Honors program. Interested students should consult the student affairs officer and the Honors Programs Office.

Upper Division Courses

100. Introduction to World Arts and Cultures. Lecture, three hours. Limited to world arts and cultures majors. Introduction to concepts and theories which integrate and underlie the multidisciplinary world arts and cultures major. Mr. Newman (Sp)

120. Field Studies in World Arts and Cultures. Seminar, two to four hours; fieldwork in community settings, eight to 12 hours. Field studies in the arts. Seminars, guest speakers, and field trips provide theory and methodology related to ethnographic research and/or internship placements. Projects emphasize ethnic communities or international arts organizations. May be repeated once for credit.

178. World Arts and Cultures Senior Colloquium. Limited to senior world arts and cultures majors. May be taken twice for a maximum of eight units. (F,Wsp)

Upper Division Electives

This is a suggested list only; many other options exist that may be petitioned.

Anthropology 110. World Archaeology
113P. Archaeology of North America

160. Fundamentals of Play Direction
C190B. Role of Management in Educational and Community Theater
The School of Theater, Film, and Television consists of the Department of Theater and the Department of Film and Television, which are recognized as national centers for higher education in these fields. From the ancient roots of theater as one of humanity's most essential and vital expressions to the avant-garde video, from the actor working in an empty space to the most technologically advanced areas of film, video, and stage production, students engage in the study and practice of these art forms, which together have reflected civilization's awareness of its own evolving consciousness in an unbroken time continuum extending from the remote past into the future. In its programs, the school recognizes and affirms the points of contact and interaction between these disciplines as well as their inherent differences as art forms and the different needs they fill in society.

Situated in the diverse and culturally rich environment of Los Angeles and drawing on the many resources of the campus at large, including the UCLA Center for the Performing Arts and the UCLA Film and Television Archive, the school provides the ideal setting for students to engage in the study and practice of these art forms so integral to a healthy and dynamic society.
School of Theater, Film, and Television

The Department of Theater and the Department of Film and Television are essential components of the rich intellectual, cultural, and professional life of UCLA. Depending on the degree involved, the school's programs are either strongly professional in nature or oriented toward advanced study and research in an atmosphere that recognizes and often draws on studio practice. Students in undergraduate courses receive a broadly based, liberal education within the context of either theater or film and television. The various specializations of the Master of Fine Arts degree are professional programs geared to preparing talented and highly motivated students for careers in the worlds of theater, film, and television. The M.A. and Ph.D. programs include critical study and research enhanced by an awareness of creativity and practice within the medium.

In the Department of Theater, approximately 275 undergraduate and 125 graduate students interact with over 35 faculty members, outstanding guests of national and international standing, and a professional staff of 35 in an exciting artistic community of theater production and study. Resources include the three theaters of the Macgowan Hall complex. Specializations in the Master of Fine Arts program include acting, directing, playwriting, design, technology and production management, and the producer's program. Most specializations include an internship.

In the Department of Film and Television, approximately 250 graduate and 90 undergraduate students are taught by a faculty of 35, whose number includes members of the Los Angeles and international film and television communities. Graduate specializations are offered in the areas of film and television production, screenwriting, animation, and the producer's program. The department's resources in Melnitz Hall include three sound stages, three television studios, extensive editing, scoring, and viewing facilities, and a complete animation laboratory for both traditional and computer-generated animation. The UCLA Film and Television Archive, the largest in the U.S. outside the Library of Congress, forms a unique and priceless resource for research and class use.

Additionally the school participates in the undergraduate interdisciplinary world arts and cultures major which integrates art, dance, music, theater, anthropology, and folklore and mythology into one unique program. Informative brochures on the school are available from the Student Services Office, A239 Murphy Hall, UCLA, Los Angeles, CA 90024-1427.

If you are interested in obtaining instructional credentials for California elementary and secondary schools, consult the Graduate School of Education, 201 Moore Hall.

Bachelor of Arts Degrees

Admission

In addition to the University of California Undergraduate Application, departments in the School of Theater, Film, and Television require supplementary material. Detailed information on departmental requirements is mailed to you on receipt of your application. Deadline date for applications is November 30, 1990, for admission in Fall Quarter 1991.

The Study List

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After your first term, you may petition to carry more than 17 units (up to 20 units maximum) if you have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If you have not filed your Study List by the end of the second week of classes, you must obtain the consent of the dean of the school to continue for that term.

Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

Degree Requirements

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see "Undergraduate Degree Requirements" in Chapter 2 of this catalog.

School of Theater, Film, and Television students enrolled in English as a Second Language 33A, 33B, 33C must take the courses for a letter grade.

School Requirements

The general requirements of the School of Theater, Film, and Television must be completed with a grade-point average of 2.0 or better.

Reciprocity with Other UC Campuses — Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to arriving at UCLA are not required to complete the School of Theater, Film, and Television general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to Director of Student Services, School of Theater, Film, and Television, A239 Murphy Hall, UCLA, Los Angeles, CA 90024-1427.

SCHOOL OF THEATER, FILM, AND TELEVISION / 367

Transfer Core Curriculum — Transfer students from non-UC schools have the option to fulfill UCLA’s lower division general education requirements by completing a transfer core curriculum prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed upon by the University of California and California community colleges. The transfer core curriculum significantly eases the transfer process, as all of UCLA’s general education requirements are fulfilled when you complete it. If you select the transfer core curriculum, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the School of Theater, Film, and Television general education requirements. The Office of Undergraduate Admissions and Relations with Schools determines, at the point of admission, your completion of the transfer core.

For specific courses that fulfill the general education requirements, consult the Student Services Office before enrolling. Courses listed below are used only as a guideline for 1990-91. Note: Courses that include the review of film or television may not be applied toward any general education requirements.

English Composition and Rhetoric (4 Units)
English 3 with a grade of C (2.0) or better must be completed by the end of your freshman year and may not be taken on a Passed/Not Passed basis.

Critical Reading and Writing (4 Units)
One course from English 4, Humanities 2A, 2B, or 2C with a grade of C (2.0) or better must be completed by the end of your sophomore year and may not be taken on a Passed/Not Passed basis.

Foreign Language (12 Units)
Three terms of one foreign language through level three are required. This requirement must be completed by the end of your sophomore year. If at least four quarter units of level three are completed without taking level one or two, an additional eight units must be completed from courses listed below in science, social sciences, or humanities. International students whose entire secondary education has been taken in a language other than English may petition to be exempt from the foreign language requirement. Proficiency examinations may not be used to complete the foreign language requirement. The motion picture/television major requires completion of the language prior to entry into the major.

Science (8 Units)
One course in physical or biological sciences and one course in natural sciences, mathematics, or another physical/biological science are required.

Physical and Biological Sciences Courses — Astronomy 3, 4, 8, 82; Atmospheric Sciences 2, 3, 10H, 11; Biology 2, 3, 5, 6, 7, 8, 13, 20, 25, chemistry, Earth and Space Sciences 1, 2, 5, 9, 10, 15, 51A, 51B, Honors Collegium 73, Kinesiology 13, 17A, Microbiology and Molecular Genetics 6, physics (except Physics 10, 14A, 14B).

Other Natural Sciences and Mathematics Courses — Anthropology 7, 10, 12; Atomspheric Sciences 1, 5, 6, 8; Biology 10, 35, 70; Earth and Space Sciences 8, 16, 20, 115, Geophysics 1, 2, 5, Honors Collegium 5, 40, mathematics (no computer, remedial, historical, or statistical); Physics 10, 14A, 14B; Psychology 15, 115, 116.

Social Sciences (12 Units)
Two courses from the Department of History (one in any period prior to 1600, one in any period after 1600) and one other social sciences course are required. Note: Survey courses in history which cover “antiquity to present” may be applied only on history after 1600 or on other social sciences courses.

Other Social Sciences Courses — Anthropology 8, 9, 33, 44, 60, and selected upper division courses; Economics 1, 2, 5, and selected upper division courses; Geography 3, 4, and selected upper division courses; history (except medical or geological); Honors Collegium 2, 3, 7A, 42, 56, 61, 62, 68, 75, 94, 97; Near Eastern languages (Ancient Near East 163A, 163B, Jewish Studies 140A, 140B, 141, 142); Political Science 1, 10, 20, 40, 50, 70, 80, and selected upper division courses; Psychology 10, 11, 42, and selected upper division courses; Sociology 1, 2, 3, 4, 31, and selected upper division courses.

Humanities (12 Units)
One course in the arts, one course in literature, and one course in philosophy and/or religion are required. Performance, studio, or film and television courses and those in your major field do not meet this requirement.

Literature Courses — Selected courses in English, ethnic, American, or foreign literature, including works in translation; Classics 10, 20, 40, 41, 142, 143, 161, 162; Folklore and Mythology 15, 101, 108, 113, 130, 131; Honors Collegium 51; humanities, except those that are M courses.

Philosophy/Religion Courses — Anthropology 156; Classics 166A, 166B; East Asian languages (Chinese 160, 165, 175, East Asian Languages and Cultures 60, Japanese 160, 175, Korean 175); Near Eastern languages (Ancient Near East 130, Iranian 170, Islamics 110); Philosophy 1 through 32 and selected upper division courses.

A few course areas that may NOT be applied toward the general education requirements are multiple-listed (M) courses, business, communications, creative writing, criminology, education, engineering, family life, marriage and child care, field studies, home economics, independent studies, interdisciplinary studies, journalism, law, mass media, public health, special or selected topics, and speech. Also no 198, 199, or CED courses and no seminars, proseminars, or freshman seminars may be applied toward the general requirements of the school.

Additional Nonmajor Field Requirements
Three upper division courses (12 units) must be completed outside your major field. These courses may not be applied toward the general education requirements. Studio, performance, activity, independent study, debate courses, internships, and field studies courses may not be applied as additional nonmajor courses. Consult your departmental or school counselor for clarification.

Unit Requirements
Double majors in the school, or between the school and other academic units, are not permitted.

You must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.
Credit earned through the College Entrance Examination Board (CEEB) Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If you take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

Residence Requirements
You are "in residence" while enrolled and attending classes at UCLA as a major in the School of Theater, Film, and Television. Of the last 45 units completed for the bachelor's degree, 35 must be earned in residence in the School of Theater, Film, and Television. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

Major Requirements
A major is composed of not less than 14 courses (36 units), including at least nine upper division courses (36 units). The theater major includes both lower and upper division courses. Those listed under "Preparation for the Major" (lower division) must be completed before upper division major work is undertaken. The motion picture/television major requires upper division work only.

You must complete your major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major and must be recommended by the chair of your major department. All courses in the school must be completed for a letter grade only.

As changes in major requirements occur, you are expected to satisfy the new requirements as soon as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of Theater, Film, and Television may require a general final examination.

Scholarship and Minimum Progress
A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applying to the general education and University requirements.

Minimum Progress — You are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; you are placed on probation if you fail to pass these units. You are subject to dismissal if you fail to pass at least 32 units in three consecutive regular terms in residence.

Honors
To receive Dean's Honors in the School of Theater, Film, and Television, you must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on your transcript for the appropriate term. You are not eligible for Dean's Honors in any given term if you receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors with the Bachelor's Degree are awarded to students with superior grade-point averages. To be eligible, you must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are: cum laude, an overall average of 3.575; magna cum laude, 3.674; summa cum laude, 3.77.

Counseling and Program Planning
The School of Theater, Film, and Television offers preadmission advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check sent to each student. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of Theater, Film, and Television, A239 Murphy Hall (825-9705).

Graduate Study
The advanced degree programs offered in the School of Theater, Film, and Television provide graduate students with unique research opportunities when combined with special resources, such as the University Research Library, the special collections of the Theater Arts Library, and the University's exhibition and performance halls.

The School of Theater, Film, and Television cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Arts Management. Participating students serve quarter-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

The Producer's Program is a relatively new M.F.A. management program in the Departments of Theater and Film and Television, with options in either theater or motion picture/television.

A program in teaching is offered by the Graduate School of Education in each of these areas. Fellowships, grants, and assistantships are available through the dean of the Graduate Division. The Graduate Affirmative Affairs Office provides counseling, academic support, and financial assistance to ethnic minority students.

Admission
In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings which follow.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Other Requirements
Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings which follow for specific requirements and procedures.

Scope and Objectives
The purpose of the Film and Television Department is to develop in its students a scholarly, creative, and professional approach to the film and television arts. The aim of the department is to train graduates who will eventually make original contributions in the field of their work.

The department offers graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Theater Arts. The programs are currently under review to offer discrete degrees in film and television.

Bachelor of Arts in Motion Picture/Television
Preparation for the Major
Admission to this major is not automatic. You may not apply until just prior to achieving full standing as a junior at the University. You must have at least 84 quarter units (56 semester units) of credit and have completed the general University and School of Theater, Film, and Television requirements before entering the major. You must also obtain departmental consent by (1) filing a letter of intention, (2) giving evidence of creative or critical ability when requested, and (3) providing additional material as determined by the department.

The Major
The major in motion picture/television consists of 68 upper division units taken in the junior and senior years. These include Film and Television 130B, 166 (eight units), 185 (eight units); one of the following writing courses: 131, 135 (eight units), 181B; two of the following film or television history courses: 106A (six units), 106B (six units), 106C (six units), 106D, 106E, 108 (six units), 110A; two of the following film or television criticism courses: 107 (six units), 110B, 110C, 112 (six units), 113 (six units), 114 (six units), 116; one additional history or criticism course (four or six units); 14 to 24 units of film and television elective courses to total a minimum of 68 upper division units in the major. It is recommended that the majority of the required courses be completed during the junior year.

You should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Note: Students are required to perform assignments on each other’s projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Consult the Schedule of Classes for courses limited to majors only.

Graduate Study
The department offers the Master of Arts (M.A.), Master of Fine Arts (M.F.A.), and Doctor of Philosophy (Ph.D.) degrees in Theater Arts.

Admission
Students are admitted in Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year in each program. The department does not have an application in addition to the one used by the Graduate Admissions Office, and no screening examination prior to admission is required. For further information, contact the Student Affairs Office, Department of Film and Television, UCLA, Los Angeles, CA 90024-1622.

Additional admission requirements are noted under each specific program.

Master of Arts in Theater Arts
Admission
In addition to the Graduate Admissions Office application, you must submit a sample of scholarly or critical writing, a statement of purpose, three letters of recommendation, Graduate Record Examination (GRE) scores, and proof of competence in English for international students whose native language is not English (e.g., TOEFL scores). Consult the Student Affairs Office, Department of Film and Television, UCLA, Los Angeles, CA 90024-1622, for further information.

Major Fields or Subdisciplines
The program requires that you be conversant in both film and television, as you are tested on each in the comprehensive examination.

Foreign Language Requirement
You may be required to demonstrate competence in a foreign language if necessary to support the research in your area of specialization.

Course Requirements
A minimum of nine courses is required, five of which must be 200-level courses in film and/or television history, theory, and criticism. Of the five courses, Film and Television 206C, 208B, and 217 are required core courses. In addition, course 200 is required of all students. All five graduate-level courses must be completed with a grade of B or better.

Only eight units of courses 596A, 596B, 596C, and 598 may be applied toward the total course requirement for the degree; however, none of these courses may be applied toward the minimum graduate course requirement.

Thesis Plan
Before beginning work on the thesis, you must obtain approval of a subject dealing with history, aesthetics, or criticism in film and television and a general plan of investigation from the film and television studies committee. A thesis committee is formed when you are within one term of completing the coursework, at which time you are eligible to advance to candidacy. You must present the adviser and the committee with a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If your thesis fails to pass the committee, you may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.

Comprehensive Examination Plan
The written examination consists of two days of testing, four hours each day, and examines a broad range of knowledge in film and television. After completion, your committee grades you either pass or fail. You may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the term in which it was first taken. The examination is required of all M.A. students applying to the Ph.D. program.

Master of Fine Arts in Theater Arts
Admission
Applicants with diverse backgrounds and undergraduate majors in areas other than theater, film, or television arts are encouraged. You must state clearly your degree objective (M.F.A.) and the area of specialization desired within the program: animation, film/television production, screenwriting, or producers program. All areas of specialization require three letters of recommendation.
If you intend to concentrate in film/television production, you must submit a description of the film or television project you plan to undertake in graduate study. The description should be in proposal or treatment form, two to three pages in length.

If you intend to concentrate in writing, you must submit samples of creative writing such as screenplays, short stories, plays, poems, etc.

If you intend to concentrate in animation, you must submit a description of the animation project you plan to undertake during graduate study, preferably in storyboard form. Other creative work may be submitted.

If you intend to concentrate in the producers program, you must submit a portfolio of supporting material which shows evidence of creative background.

Consult the Student Affairs Office, Department of Film and Television, UCLA, Los Angeles, CA 90024-1622, for further information.

**Foreign Language Requirement**

There is no foreign language requirement for the M.F.A. degree.

**Course Requirements**

A total of 18 courses (72 units) is required, five of which must be at the graduate level. At least three courses must be in the 200 series in film history, aesthetics, or structure. Course requirements for each specialization are available from the Student Affairs Office.

Only 15 units of Film and Television 596 may be applied toward the total course requirement, and only eight of these units may be applied toward the minimum graduate course requirement. Only four units of course 596A and four units of course 596B may be taken prior to advancement to candidacy. Courses 596C through 596F may be taken only after advancement to candidacy.

Fieldwork and internships are not required but may be taken as courses which may be applied toward the degree.

**Comprehensive Examination Plan**

The comprehensive plan is satisfied by fulfilling projects appropriate to your specialization. No later than the beginning of your final term in residence, you must submit for approval to the M.F.A. committee the appropriate documents for advancement to candidacy and a list of at least three faculty members who will serve on your committee. Consult the Student Affairs Office for further information.

**M.A.-African Area Studies/M.F.A.**

The Department of Film and Television and the African Area Studies Program have an articulated degree program which allows students to combine study for the M.A. in African Area Studies and the M.F.A. in Theater Arts. Articulated programs do not allow course credit to be applied toward more than one degree. Interested students should write to the Graduate Adviser, Student Affairs Office, UCLA Film and Television Department.

**Ph.D. in Theater Arts**

 Admission

Completion of an M.A. degree equivalent to that offered by the UCLA Department of Film and Television is required. In exceptional cases, students with an M.A. outside the field are considered for direct admission to the program. The dossier submitted for admission must contain a letter describing your reasons for wishing to earn the Ph.D., the master's thesis or writing samples that demonstrate a high level of ability to write criticism or historical narrative, three letters of recommendation, GRE scores, and proof of competence in English for international students whose native language is not English (e.g., TOEFL scores).

Further information is available from the Student Affairs Office, Department of Film and Television, UCLA, Los Angeles, CA 90024-1622.

**Major Fields or Subdisciplines**

You are expected to understand film and television within their social contexts as significant forms of art and communication, and to achieve by disciplined study a mastery of their history, theory, and criticism.

**Foreign Language Requirement**

Mastery of one foreign language is required and must be demonstrated by one of the following methods: (1) passing the Educational Testing Service (ETS) examination in French, Spanish, German, or Russian with a score of 500 or better, (2) completing level five or equivalent, with a minimum grade of C, in any foreign language, or (3) passing a UCLA language examination given in any foreign language department. When mastery of more than one foreign language is necessary for your dissertation study, you are required to take courses or pass examinations in the additional language(s). Normally, the required foreign language examinations must be passed by the end of your first year in residence.

**Course Requirements**

During your first six terms in the Ph.D. program, you must take 13½ courses. During your first year in residence, Film and Television 211B, 215, and 273 must be completed, while course 274 is required in your sixth term. In addition to this core sequence, course 496 is also required. Further, you must select nine graduate elective courses, at least six of which must be from film and television studies offerings. You must select from these elective courses three areas of concentration, chosen to broaden your familiarity and competence with various and diverse subject matters. A suggested list of concentrations is as follows: film theory, criticism, narrative studies, film and the other arts, authors, genres, documentary, film history, American film, European film, non-Western film and television, television studies, media and society, film and television as a business enterprise, and film and television production. It is expected that the dissertation topic will emerge from one of the concentrations.

**Teaching Experience**

Every student must complete Film and Television 496.

**Qualifying Examinations**

At the end of your second term in residence, you must take a preliminary oral examination conducted by the critical studies committee. The committee tests your progress to date and determines your general fitness to continue in the doctoral program. You present a plan of study at this time; guidelines are available from the Student Affairs Office.

After completion of all language and course requirements and approval of a dissertation prospectus, you are eligible to take and required to pass a written qualifying examination administered in three-hour segments during two successive days. Information regarding the examination is available from the chair of the critical studies committee. You may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the term in which it was first taken.

After you pass the written examination, a doctoral committee is formed to administer the University Oral Qualifying Examination. You are advanced to candidacy only on successful completion of this examination.

**Candidate in Philosophy Degree**

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

**Dissertation/Final Oral Examination**

A dissertation demonstrating your ability to carry out independent and significant inquiry in a historical, theoretical, or critical field of film and/or television is required. Final award of the Ph.D. depends on successful completion of the dissertation.

A final oral examination, held after completion of the dissertation, may be required at the option of the dissertation committee.

**Upper Division Courses**

106A. History of the American Motion Picture (8 units). (Formerly numbered Motion Picture/Television 106A.) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the American motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.
106B. History of the European Motion Picture (6 units). (Formerly numbered Motion Picture/Television 106B.) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the European motion picture both as a developing art form and as a medium of mass communication. May be repeated twice for credit with consent of department and topic change.

106C. History of African, Asian, and Latin American Film (6 units). (Formerly numbered Motion Picture/Television 106C.) Lecture/screenings, eight hours; discussion, one hour. Critical, historical, aesthetic, and social study of film with its historical context and social dimensions of film structure, aesthetics, and language.

106D. Development of Film in Europe and the U.S. from WWI through the Depression. (Formerly numbered Motion Picture/Television 106D.) Lecture/screenings, eight hours; discussion, one hour. Interdisciplinary and comparative approach to development of film in Europe and the U.S. from the silent era through the Depression. Particular emphasis on interrelationship of film with its historical context and social dimensions of film structure, aesthetics, and language.

106E. Development of Film in Europe and the U.S. from WWI to the Present. (Formerly numbered Motion Picture/Television 106E.) Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in the motion picture. Development of critical standards and examination of techniques of teaching and persuasion used in selected documentary, propaganda, and/or interpretive films.

107. Experimental Film (6 units). (Formerly numbered Motion Picture/Television 107.) Lecture/screenings, eight hours; discussion, one hour. Critical study of current issues and problems related to public and commercial broadcast programming and management, including analysis of contemporary criticism of broadcast media.

110A. History of Broadcasting. (Formerly numbered Motion Picture/Television 110A.) Lecture/viewing, six hours; discussion, one hour. Critical study of broadcasting here and abroad. Consideration of social responsibilities and educational implications of broadcasting.

110B. Problems and Issues in Broadcast Media. (Formerly numbered Motion Picture/Television 110B.) Lecture, four hours; discussion, two hours; laboratory, to be arranged. Prerequisite: consent of instructor. Study of current issues, problems, and/or consent of instructor. Laboratory, eight hours; other, four hours. Study and analysis of unconventional developments in the motion picture. Development of critical standards and examination of techniques of teaching and persuasion used in selected documentary, propaganda, and/or interpretive films.

110C. World Media Systems. (Formerly numbered Motion Picture/Television 110C.) Lecture/viewing, four hours; discussion, one hour. Prerequisites: course 110A or equivalent, upper division standing, consent of instructor. Global analysis of internal and external broadcasting environments, with emphasis on thematics, content, and/or consent of instructor. Global analysis of internal and external broadcasting environments, with emphasis on thematics, content, and/or consent of instructor.

111. Film and Social Change (6 units). (Formerly numbered Motion Picture/Television 111.) Lecture/screenings, eight hours; discussion, one hour. Development of documentary and dramatic films in relation to and as a force in social development.

113. Film Authors (6 units). (Formerly numbered Motion Picture/Television 113.) Lecture/screenings, eight hours; discussion, one hour. In-depth study of a specific film author (director or writer). May be repeated once for credit with consent of department and topic change.

114. Film Genres (6 units). (Formerly numbered Motion Picture/Television 114.) Lecture/screenings, eight hours; discussion, one hour. Study of a specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social drama). May be repeated once for credit with consent of department and topic change.

116. Film Criticism. (Formerly numbered Motion Picture/Television 116.) Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism.

126. Acting for Film and Television. (Formerly numbered 126A.) Laboratory, six hours. Prerequisite: consent of instructor. Projects in acting for television, video, and film. May be repeated twice for credit.

128. Media and Ethnicity. (Formerly numbered Motion Picture/Television 128.) Prerequisite: consent of instructor. Study of the Asian American experience, exploration of impact and uses of media on contemporary American ethnic communities. Role and techniques of media influence besides community utilization and production.

130A. Screenwriting Fundamentals (2 units). (Formerly numbered 134A.) Lecture, one hour. Corequisite: consent of instructor. Study of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle, Egri.

130B. Screenwriting Fundamentals Workshop. (Formerly numbered 134A.) Discussion, three hours. Prerequisite: consent of instructor. Limited to film and television majors. Completion of a short film in Super 8mm, including writing, production, and editing.

135. Advanced Screenwriting Workshop (8 units). (Formerly numbered Motion Picture/Television 135.) Workshop, three hours. Prerequisites: course 130B and/or consent of instructor. Course in film and television writing. Original screenplays to be developed. May be repeated twice for credit.

150. Basic Cinematography: Film and Electronic. (Formerly numbered Motion Picture/Television 150.) Lecture, three hours; laboratory, three hours. Prerequisites: course 130B, consent of instructor. Limited to film and television majors. Introduction to image control and motion picture photography through exposure, lighting, and selection of film, camera, and lens. Supervised projects in photography to complement material covered in lecture.

151. Design for Film and Television. (Formerly numbered Motion Picture/Television 151.) Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Techniques of art direction. May be repeated twice for credit if (or only if) repeated, students required to design and complete a separate project.

152. Film and Television Sound Recording. (Formerly numbered Motion Picture/Television 152.) Lecture, three hours; laboratory, to be arranged. Prerequisite: course 166, consent of instructor. Limited to film and television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises.

153. Color Cinematography. (Formerly numbered Motion Picture/Television 153C.) Lecture, three hours. Prerequisite: consent of instructor. History and uses of color. Examination of color use with emphasis on present-day methods in film and television production. Comparative study of additive and subtractive systems as employed by Technicolor, Ansoo, Kodak, and others.

154. Film Editing. (Formerly numbered Motion Picture/Television 154.) Lecture, three hours; laboratory, to be arranged. Prerequisite: course 166, consent of instructor. Limited to film and television majors. Introduction to artistic and technical problems of film editing, with practical experience in editing of image and synchronized sound.

164. Film Directing. (Formerly numbered Motion Picture/Television 164.) Laboratory, to be arranged. Prerequisites: course 166, consent of instructor. Study of problems faced by a film director and various approaches to their solution. May be repeated twice for credit.

165. Television Directing. (Formerly numbered Motion Picture/Television 165.) Laboratory, six hours. Prerequisites: courses 130B, 166, 185, consent of instructor. Introduction to and supervised exercises in television directing. Study of and practice in creative use of cameras, sound, composition, and communication with those in front of and behind the camera. May be repeated twice for credit.

166. Undergraduate Production I (8 units). (Formerly numbered Motion Picture/Television 166.) Lecture, four hours; laboratory, eight hours; other, four hours. Prerequisite: consent of instructor. Limited to film and television majors. Completion of a film in Super 8mm, including writing, production, and editing.

176A-176B. Undergraduate Production II (8 units each). (Formerly numbered Motion Picture/Television 176A-176B.) Laboratory, to be arranged. Prerequisite: course 166, consent of instructor. Limited to film and television majors. Completion of a film, television, or video production, including its writing, production, and editing.

177. Film and Television Acting Workshop (2 units). (Formerly numbered Motion Picture/Television 177.) Laboratory, four hours. Prerequisite: consent of instructor. Workshop providing opportunities for students to rehearse, perform, and evaluate their scenes under supervision and criticism of instructor. Focus on different production styles; which perform on may need to adjust are (1) single-camera experience, (2) multiple-camera experience, and (3) preproduction rehearsals with director. May be repeated twice for credit (to accommodate performer's circumstances).

178. Technical Film and Television Laboratory (2 or 4 units). (Formerly numbered Motion Picture/Television 178.) Laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Study of various aspects of film and television production. May be repeated for a maximum of 12 units, but only eight units may be applied toward film and television major.

181A. Animation Design in Film and Television. (Formerly numbered Motion Picture/Television 181A.) Lecture, three hours; laboratory, three hours. Prerequisite: consent of instructor. History and use of speech, rhythm, and graphic design to form effective communication on film.

181B. Writing for Animation (4 or 8 units). (Formerly numbered Motion Picture/Television 181B.) Lecture, six hours; laboratory, to be arranged. Prerequisites: course 181A, consent of instructor, storyboard at first class meeting. Research and practice in creative writing and planning for animated film. May be repeated for a maximum of 16 units.

181C. Animation Workshop (4 or 8 units). (Formerly numbered Motion Picture/Television 181C.) Lecture, six hours; laboratory, to be arranged. Prerequisite: course 181A, consent of instructor, storyboard at first class meeting. Organization and integration of various creative arts used in animation to form a complete study of a selected topic. May be repeated for a maximum of 16 units.
185. Undergraduate Television and Video Production (8 units). (Formerly numbered Motion Picture/Television 185.) Three hours lecture and two hours laboratory per week. (Additional hours to be arranged.) Prerequisite: consent of instructor. Limited to film and television majors. Instruction and exercises in planning and production of remote on-location television programs.

187A-187B-187C. Producing and Directing Field Television Programming. (Formerly numbered Motion Picture/Television 187A-187B-187C.) Laboratory, three hours (additional hours to be arranged). Prerequisites: course 185, consent of instructor. 187A. Introduction to field or remote broadcasting utilizing single-camera video. Educational goals in student productions to be clarity of concept, simplicity in production, and meeting deadlines. 187B-187C. Instruction and supervised exercises in planning and production of remote on-location television programs.

189. Overview of Motion Picture Industry. (Formerly numbered Motion Picture/Television 189.) Discussion, three hours. Prerequisite: consent of instructor. Even if perspective of a few early efforts in the industry, basic structure and techniques of production pictures from early beginnings to present, stressing methods of operation and influence of social and economic pressures that contributed to changing financial, distribution, and exhibition practices.

192. Film and Television Internship (4 to 8 units). (Formerly numbered Motion Picture/Television 192.) Field experience, to be arranged. Prerequisite: consent of instructor. Limited to senior film and television majors. Internship at film and television industry organizations. May be taken for a maximum of eight units.

193A. Film Curatorship. (Formerly numbered Motion Picture/Television 193A.) Lecture, two hours; discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Study of principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to archival-library design for research and teaching.

193B. Television Curatorship. (Formerly numbered Motion Picture/Television 193B.) Lecture, two hours; discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Study of principles and techniques of television curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to archival-library design for research and teaching.

199. Special Studies in Film and Television. (2 to 8 units). (Formerly numbered Motion Picture/Television 199.) Prerequisites: senior standing, 3.0 GPA in major, consent of instructor. May be taken for a maximum of eight units.

### Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate advisor. Graduate courses are not open to undergraduate students.

200. Bibliography and Methods of Research in Film and Television (6 units). (Formerly numbered Motion Picture/Television 200.) Discussion, three hours; laboratory, four to six hours. Examination and analysis of selected historical movements such as expressionism, socialist realism, surrealism, neorealism, New Wave, etc. May be repeated twice for credit.

Prerequisites: graduate standing, consent of instructor. Studies in interrelationships between film and fine arts, or performing arts, or literature, with emphasis on ways these other arts have influenced film. May be repeated twice for credit.

206A. Seminar in European Film History (6 units). (Formerly numbered Motion Picture/Television 206A.) Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106B, graduate standing, consent of instructor. Study of film history of Europe. May be repeated twice for credit.

206C. Seminar in American Film History (6 units). (Formerly numbered Motion Picture/Television 206C.) Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106A, graduate standing, consent of instructor. May be repeated twice for credit.

208A. Seminar in Film Structure (6 units). (Formerly numbered Motion Picture/Television 208A.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of structural and formal techniques of film and television. May be repeated twice for credit.

208B. Seminar in Classical Film Theory (6 units). (Formerly numbered Motion Picture/Television 208B.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of various film conventions, both fictional and nonfictional, and of role of structure in motion picture.

208C. Seminar in Contemporary Film Theory (6 units). (Formerly numbered Motion Picture/Television 208C.) Discussion, three hours; film screenings, four to six hours. Prerequisites: consent of instructor. Study of recent developments in the field of film and television. May be repeated twice for credit.

209A. Seminar in Documentary Film (6 units). (Formerly numbered Motion Picture/Television 209A.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Nonfictional film and its relation to contemporary culture.

209B. Seminar in Fictional Film (6 units). (Formerly numbered Motion Picture/Television 209B.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Film as fiction and its relation to contemporary culture.

210. Seminar in Contemporary Broadcast Media. (Formerly numbered Motion Picture/Television 210.) Discussion, three hours; laboratory, three hours. Prerequisite: consent of instructor. Critical study of animated film: its historical development and its structure, style, and use.

211A. Seminar in Historiography. (Formerly numbered Motion Picture/Television 211A.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to motion picture/television M.A. candidates. Examination of function and methods of writing film and television history as seen in works of key historians in the U.S. and Europe.

211B. Seminar in Historiography. (Formerly numbered Motion Picture/Television 211B.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to motion picture/television Ph.D. candidates. Examination of function and methods of writing film and television history as seen in works of key historians in the U.S. and Europe.

211C. Seminar in Historiography. (Formerly numbered Motion Picture/Television 211C.) Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Special study of specific historiographical problems. Examination of works by key historians in the field.

214. Seminar in Film and Television (6 units). (Formerly numbered Motion Picture/Television 214.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies of works by key historians in the field.

216. Seminar in Film and Television. (6 units). (Formerly numbered Motion Picture/Television 216.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Special study of specific historiographical problems. Examination of works by key historians in the field.

218. Culture, Media, and Society. Lecture, four hours; screenings, to be arranged. Prerequisite: consent of instructor. Emphasis on "discourse of the other(s)", ways film and television is positioned vis-a-vis mainstream critical discourse.

219. Seminar in Film and Society (6 units). (Formerly numbered Motion Picture/Television 219.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies of ways film affects and is affected by social behavior, belief, and value systems; considered in relation to role of media in society. May be repeated once for credit.

220. Seminar in Television and Society. (Formerly numbered Motion Picture/Television 220.) Discussion, three hours; laboratory, four hours. Prerequisites: graduate standing, consent of instructor. Study of ways television forms affect and are affected by social behavior, belief, and value systems; study of technological and social aspects of the medium. May be repeated once for credit.

221. Seminar in Film Authors (6 units). (Formerly numbered Motion Picture/Television 221.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Specialized examination of works of outstanding creators of films. May be repeated twice for credit.

222. Seminar in Film Genres (6 units). (Formerly numbered Motion Picture/Television 222.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Intensive examination of works of outstanding creators of films. May be repeated twice for credit.

223. Seminar in Film and Television. (Formerly numbered Motion Picture/Television 223.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Studies of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.
247. Production Planning in Film and Television. (Formerly numbered Motion Picture/Television 247.) Discussion, three hours. Prerequisite: consent of instructor. Analysis of procedures and problems in preparing a script for film or television production, with emphasis on role of production manager in breaking down scripts, setting up shooting schedule, planning postproduction, and preparing budgets.

268. Seminar in the Short Film. (Formerly numbered Motion Picture/Television 268.) Lecture, two hours; discussion, two hours. Prerequisites: graduate standing, consent of instructor. Study of problems presented by conceptualization of form and structure of the short film with both critical and student examples. 6 units.

270. Seminar in Film Criticism. (Formerly numbered Motion Picture/Television 270.) Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of key aesthetic questions of analysis and evaluation in relation to specific films and photography or film criticism. May be repeated once for credit.

271. Seminar in Television Criticism. (Formerly numbered Motion Picture/Television 271.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of theoretical and ideological impulses of selected films from contemporary and post-1960 cinema. May be repeated once for credit.

272. Seminar in Contemporary Film and Television Criticism (6 units). (Formerly numbered Motion Picture/Television 272.) Discussion, three hours; film and television screenings, four to six hours. Limited to film and television Ph.D. candidates. Study and practice of analytic and critical response, with emphasis on contemporaneous film and television. May be repeated once for credit.

274. Seminar in Research Design. (Formerly numbered Motion Picture/Television 274.) Discussion, three hours. Prerequisite: second-year standing in motion picture/television Ph.D. program. Examination of general principles that govern formulation of major research projects and preparation of a prospectus for Ph.D. dissertation.

276. Seminar in Non-Western Films. (Formerly numbered Motion Picture/Television 276.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of aesthetic and ideological impulses of selected films from Asia, Africa, and Latin America.

277. Seminar in Narrative Studies. (Formerly numbered Motion Picture/Television 277.) Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of writings on theory of narrative structure and their significance for analysis of film forms.

289A-289B-289C. Current Business Practices in Film and Television. (Formerly numbered Motion Picture/Television 289A-289B-289C.) Prerequisites: course 247, graduate standing, consent of instructor. Examination of current status of financing-production-distribution agreements, union agreements, music, copyright, etc., necessary to understand the film and television industry. May be taken in any sequence.

291A-291B-291C. Role of Management in Entertainment Industry. (Formerly numbered Motion Picture/Television 291A-291B-291C.) Prerequisites: course 247, graduate standing, consent of instructor. Study of artistic, social, and economic criteria for decision making in production and distribution of motion pictures and entertainment programs. May be taken in any sequence.

292A-292B-292C. Network Television Management and Decision Making. (Formerly numbered Motion Picture/Television 292.) Lecture, two hours; discussion, two hours. Prerequisites: course 247, graduate standing, consent of instructor. Study of business structure and economic, social, and artistic criteria currently utilized by network television management. Only eight units may be taken for credit.

293. Seminar in Film and Television Curatorship. (Formerly numbered Motion Picture/Television 293.) Discussion, three hours; laboratory, six hours. Prerequisites: graduate standing, consent of instructor. Study and practice of issues in archival research and administration.

298A-298B. Special Studies in Film and Television (2-8 units each). (Formerly numbered Motion Picture/Television 298A-298B.) Lecture/discussion. Prerequisites: graduate standing, consent of instructor. Seminar study of problems in film and television, organized on topic basis. May be repeated once for credit. 375. Apprentice Practicum (1-6 units). (Formerly numbered Motion Picture/Television 375.) Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Film Image Design Laboratory. Lecture, two hours; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Conceptualization and design of nonfictional film imagery. One-minute experiments in the relation of meaning to technique, including manipulation of optics, photochemical hours (additional hours required). May be repeated once for credit.

402A-402B. Advanced Workshops in Fiction (8 units each). (Formerly numbered Motion Picture/Television 402A-402B.) Lecture, 12 hours; fieldwork, to be arranged. Prerequisites: courses 401A-401B, 433, consent of instructor. Limited to 10 students per section. Production of a 20-minute fictional film or television project. Students preplan, test, and complete a working prototype in one afternoon by end of first term and work as crew for each other in rotating assignments. In second term students complete postproduction of their projects.

403A-403B-403C. Advanced Documentary Workshops (4 to 8 units each). (Formerly numbered 403A-403B.) Lecture/discussion/laboratory, 16 to 24 hours; fieldwork, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Production of advanced individual documentary film/video projects. Students conceptualize, research, write, shoot (on location), and edit projects to completion. May be repeated once for credit.

404. Lighting andCamera for Television (4 units). (Formerly numbered 404.) Lecture, 12 hours; discussion, 8 hours. Prerequisites: consent of instructor. Limited to film and television graduate students. Study and practical experience in lighting and camera techniques for television. May be repeated once for credit.

405. Television Production Workshop (8 units). (Formerly numbered 405A.) Lecture, eight hours; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Students prepares and produce a television project. Must be open to students with credit for former course 405C. Basics of television production and direction, focusing on studio multiple camera with minimal use of remote camera. Use of various formats of video production, including independent, digital video, live broadcasting, projects, culminating in a narrative three-camera project.

406. Experimental Video Workshop. (Formerly numbered 406.) Lecture, six hours; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Not open to students with credit for former course 406A. Introduction to independent and experimental video with examination of impact of new video technologies in television, covering concepts of video art, new television, digital video, high-definition TV, film and tape postproduction.

407. Video Documentary Workshop (8 units). Laboratory, 12 hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Exploration of documentary video, including development of a variety of international works and producing a short documentary project using single-camera field production techniques.

408A-408B. On-Line Editing. (Formerly numbered 483.) Discussion, four hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Individual instruction in electronic editing. 408A. On-Line Editing. 408B. On-Line Editing. 409. Directing the Actor for the Camera. Workshop, six hours; laboratory preparation, two to four hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Team-taught with five weeks of intensive work devoted to the director of photography and camera techniques, and five weeks to offer basic strategies to elicit good performances from actors. Emphasis on problems faced when directing actors for film.

410A-410B. Film Production Workshops (8 units, 12 units, 4 units, 4 units). (Formerly numbered 401A-401B.) Lecture/discussion/laboratory, 24 hours; fieldwork, to be arranged. Prerequisites: courses 405, 406, 407, consent of instructor. Limited to film and television graduate students. Production workshop spanning four terms designed to give experienced students an in-depth look at projects of film production (the tools and a practicum of the medium) as each student writes/directs/edits a 10-minute film.

417. Lighting for Film and Television (6 units). (Formerly numbered 450B.) Lecture, three hours; discussion, one hour; laboratory, six hours. Prerequisites: consent of instructor. Limited to film and television graduate students. Lectures, supervised exercises on a stage or in an exterior, screenings of scenes, and discussions aimed at learning to master the lighting to create an appropriate mood or atmosphere of a premeditated scene recorded on a film or through an electronic system. May be repeated twice for credit.

418. Cinematography and Directing (8 units). (Formerly numbered 450C.) Lecture, three hours; discussion, one hour; laboratory, seven hours. Prerequisites: course 417, consent of instructor. Limited to film and television graduate students. Not open to students with credit for former course 450C. Supervision of student films of short dramatic projects on the sound stage and exterior location that explore the complexity of the process, emphasizing balance and collaboration essential to both director and cinematographer. In all courses, establishing and varied technical, production, and creative aspects.

419. Advanced Cinematography. (Formerly numbered 450A.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 417, 418, consent of instructor. Limited to film and television graduate students. Not open to students with credit for former course 450A. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses.
43A. Direction of Actors for Film and Television. (Formerly numbered 423.) Lecture, four hours; work- shop, five hours; laboratory, one hour; consent of instructor. Limited to film and television graduate students. Exercises in analysis of script and character for purpose of directing actors in film and television productions. Emphasis on eliciting best possible performance from students. May be repeated for credit. 

423B. Advanced Direction of Actors for Film and Television. Studio workshop, six hours. Prerequisites: course 423A, consent of instructor. Limited to film and television graduate students. Advanced study and practice in directing actors before camera. Emphasis on developing techniques to immediately enhance communication between director and actor on the set in order to maintain continuity from shot to shot.

431. Introduction to Film and Television Screenwriting. Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Advanced study and practice in directing actors on set before camera. Emphasis on developing techniques to immediately enhance communication between director and actor on the set in order to maintain continuity from shot to shot.

433. Writing the Short Screenplay. (Formerly numbered Motion Picture/Television 433.) Lecture, three hours. Prerequisites: courses 401A-401B, consent of instructor. Limited to film and television graduate students. Principles and practices of film and television screenwriting. May be repeated twice for credit.

434. Advanced Screenwriting (8 units). (Formerly numbered Motion Picture/Television 434.) Discussion of full-length screenplays and the processes used in writing of original film and television screenplays. May be repeated for a maximum of 16 units.

454A-454B. Advanced Film Editing. (Formerly numbered Motion Picture/Television 454A, 454B.) Lecture, three hours; laboratory, one hour; consent of instructor. Limited to film and television graduate students. Study of role of editing fictional and nonfictional production, with emphasis on techniques and procedures used in manipulation of sound track in sync dialogue cutting, post syncing, and music and sound effects cutting, including offscreen narration, dialogue substitution, and playback tracks.

454B. Directed Editing. (Formerly numbered Motion Picture/Television 454B.) Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students.

454A. Study of role of editing fictional and nonfictional production, with emphasis on techniques and procedures used in manipulation of sound track in sync dialogue cutting, post syncing, and music and sound effects cutting, including offscreen narration, dialogue substitution, and playback tracks.

459A-459B. Directing for Film and Television. (Formerly numbered Motion Picture/Television 459A-459B.) Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Analysis and exploration, with specific scenes, of differences and many similarities in directional approach to same literary material in three media.

464A-464B. Advanced Film Directing (8 units each). (Formerly numbered Motion Picture/Television 464A-464B.) Hours to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Special problems in direction of fictional and documentary films.

464A. Advanced Film Directing. (8 units each). (Formerly numbered Motion Picture/Television 464A-464B.) Lecture, two hours; laboratory, six hours. Prerequisites: consent of instructor. Limited to film and television graduate students. Special problems in direction of fictional and documentary films.

464B. Advanced Television Directing (8 units each). (Formerly numbered Motion Picture/Television 464A-464B.) Lecture, two hours; laboratory, six hours. Prerequisites: consent of instructor. Limited to film and television graduate students. Special problems in direction of fictional and documentary films.

475. Film I (8 units). (Formerly numbered Motion Picture/Television 475.) Discussion, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of basic techniques of film production, including preproduction planning and production of a short film.

476. Video I (8 units). (Formerly numbered Motion Picture/Television 476.) Discussion, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of basic techniques of television and video production, including completion of one or more projects.

477. Film II (8 units). (Formerly numbered Motion Picture/Television 477.) Discussion, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Group experience in film production with each member rotating on crew work in production of individual or collective projects.

478. Video II (8 units). (Formerly numbered Motion Picture/Television 478.) Discussion, three hours; laboratory, to be arranged. Prerequisites: course 185 or 476, graduate standing, consent of instructor. Group experience in video production with each member rotating on crew work in production of individual or collective projects.

479A-479B-479C. Film III (4 or 8 units each). (Formerly numbered Motion Picture/Television 479A-479B-479C.) Laboratory, six hours; consent of instructor. Course 178 may be taken concurrently. May be repeated for credit.

501. Cooperative Program (2 to 8 units). (Formerly numbered Motion Picture/Television 501.) Prerequisites: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

505A-505B-505C. Directed Individual Studies: Research (2 to 12 units). (Formerly numbered Motion Picture/Television 505A-505B-505C.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

506B. Directed Individual Studies: Writing (2 to 12 units). (Formerly numbered Motion Picture/Television 506B.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

506C. Directed Individual Studies: Directing (2 to 12 units). (Formerly numbered Motion Picture/Television 506C.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.
596D. Directed Individual Studies: Design (2 to 12 units). (Formerly numbered Motion Picture/Television 596D.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596E. Directed Individual Studies: Acting (2 to 12 units). (Formerly numbered Motion Picture/Television 596E.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596F. Directed Individual Studies: Production (2 to 12 units). (Formerly numbered Motion Picture/Television 596F.) Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

597. Preparation for Ph.D. Qualifying Examinations in Film and Television (2 to 8 units.) (Formerly numbered Motion Picture/Television 597.) Hours to be arranged. May be repeated for a maximum of 12 units. S/U grading.

598. M.A. Thesis in Film and Television (2 to 8 units). (Formerly numbered Motion Picture/Television 598.) Hours to be arranged. Prerequisite: advancement to Ph.D. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units. S/U grading.

599. Ph.D. Dissertation in Film and Television (2 to 12 units). (Formerly numbered Motion Picture/Television 599.) Hours to be arranged. Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units. S/U grading.

Scope and Objectives
Theater study offers an opportunity to investigate fundamental cultural, social, ethical, and political issues in the context of artistic expression enriched by historical perspective. The curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores the verbal and visual elements of its language as revealed through the dynamics of theater production. With this in mind, texts are studied, ideas are explored, and students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater.

The departmental degrees offer comprehensive study of theater and drama in programs that recognize the interrelation of critical thought and studio practice. At the undergraduate level, the B.A. degree provides students with an overview of the major component parts of theater in a liberal arts framework. The various specializations of the Master of Fine Arts degree offer in-depth studio practice combined with critical studies for students whose objectives are primarily professional in nature. The Ph.D. degree, which also recognizes studio practice, offers an intensive course of study in the critical and historical aspects of theater and drama as an art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

Bachelor of Arts in Theater

Admission
All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission at the junior level to the following Fall Quarter. There are no mid-year admissions. On receipt of your application the department notifies you of the screening process, which may involve a written personal essay, letters of recommendation, an audition, portfolio review, or interview.

Preparation for the Major
Required: Theater 5A, 5B, 5C, 10, 20, English 90.

The Major
Required: A total of 60 upper division units, including Theater 130A, 140A, 141A, 142A, 160 or 161A*, 170, C172 (eight units); 28 units of approved upper division theater electives (to include two to four units of film and television coursework). Through certain of these required courses, you are responsible for completing specific production assignments related to production activity of the theater curriculum during each term in residence.

Graduate Study
The department offers three-year professional training programs leading to the Master of Fine Arts (M.F.A.) in Theater Arts, with specializations in acting, directing, and design and production (scenic design, costume design, lighting design, sound design, or production management/technology). The producers program and playwriting are two-year specializations that also lead to the M.F.A. in Theater Arts. The department also offers the Doctor of Philosophy (Ph.D.) in Theater Arts, with a history/criticism emphasis, and the Master of Arts (M.A.) degree which may be obtained only en route to the Ph.D.

Admission
Students are admitted in Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year in each program. The department does not have an application in addition to the one used by the Graduate Admissions Office, and no screening examination prior to admission is required. For further information, contact the Student Affairs Office, Department of Theater, UCLA, Los Angeles, CA 90024-1622. Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable and the department is not responsible for such material.

*If course 161A is used to complete the requirement, 30 units of electives are required.
In addition to satisfying minimum University requirements for graduate admission, you must:

1. Have completed an undergraduate major in any area comparable to that offered at UCLA.
2. Provide the department with at least three letters of reference and a statement of purpose.

Additional admission requirements are noted under each specific program.

**Master of Arts in Theater Arts**

**Admission**

The M.A. degree is awarded only in conjunction with study in the Ph.D. degree program to students who have successfully completed one year of graduate work and all requirements for the M.A. degree, and who either do not wish to continue or are not passed by the Ph.D. committee to continue in the doctoral program. Requirements include the results of the Graduate Record Examination (GRE), a sample of scholarly or critical writing, a statement of purpose, and other information (resumé, portfolio, script, production book, interview, etc.) that may be required to establish the quality of your work in the specialization. Consult the Student Affairs Office, Department of Theater, UCLA, Los Angeles, CA 90024-1622, for further information.

**Major Fields**

The program leads to a general graduate degree, though there are opportunities, through your electives and thesis or research paper topics, to stress a particular interest such as acting, design, directing, dramatic writing, and theater history and criticism.

**Foreign Language Requirement**

The program does not require a foreign language, but you are urged to develop proficiency in either French, German, Spanish, or Italian.

**Course Requirements**

You are required to complete a minimum of 10½ courses (42 units), five of which must be at the graduate level, in at least one year of intensive study, laboratory exercises, and research leading to the successful completion of either the thesis or comprehensive examination plan. You are required to take an active part in the production program of the department as partial fulfillment of the degree requirements.

The required courses are Theater 200, 245, and C272 (a two-unit course to be taken three times). After consultation with your adviser, you select seven other courses, including one graduate course in theater history (205A, 205B, or 205C), one graduate course in theater production theory (240, 241, 290A, or 290B), and five other courses which emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs are required to take courses 205A, 205B, and 205C.

Only eight units from the 596 series may be applied toward the total course requirement, and only four of these units may be applied toward the minimum graduate course requirement. No 596 courses may be applied toward the total course requirement.

**Thesis Plan**

Before beginning work on the thesis, you must obtain approval of a subject dealing with the history, aesthetics, criticism, or techniques of the theater and a general plan of investigation from the M.A. committee. A thesis committee is formed when you are within one term of completing the coursework, at which time you are eligible to advance to candidacy. You must present the adviser and the committee with a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If your thesis fails to pass the committee, you may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.

**Comprehensive Examination Plan**

If you elect this plan, you must complete an examination consisting of a 50-page research paper which may be associated with four units of Theater 596A, a one-hour oral defense of the paper, and a two-part, six-hour written examination covering theater history and production practice. The examination normally occurs during your final term in residence, at which time you should have advanced to candidacy.

**Major Fields of Study**

The areas of specialization for the M.F.A. program are as specified above.

**Foreign Language Requirement**

There is no foreign language requirement for the M.F.A. degree.

**Course Requirements**

For the two-year playwriting and producers programs a total of 18 courses (72 units) is required.

You must take five graduate-level courses for the producers program and eight and one-half for playwriting. Only 16 units of Theater 596 may be applied toward the total course requirement and the minimum graduate course requirement.

For the three-year programs in acting, directing, and design and production (scenic design, lighting design, costume design, sound design, and production management/technology) a total of 23½ courses (94 units) is required. Only 12 units of course 596 may be applied toward the total course requirement. You must take 20¼ graduate-level courses for the acting, directing, scenic design, and production management/technology specializations, 22½ for sound design and lighting design, and 23 for costume design.

Specific course requirements for each specialization are available in the Student Affairs Office.

**Fieldwork and Internships**

Occasionally, students fulfill project requirements in the field. Certain specializations may take advantage of opportunities offered by professional theaters or other organizations.

**Comprehensive Examination Plan**

The comprehensive plan is satisfied by fulfilling a series of creative projects appropriate to your specialization. On completion of the final creative project or the last term in residence, whichever is last, you must file for advance-
ment to candidacy. The committee then reviews and evaluates your record. Your participation in the final review is at the discretion of the committee.

Ph.D. in Theater Arts

Admission

You must submit evidence of potential as a practicing scholar as indicated by (1) breadth and depth of advanced coursework in history, theory, and criticism, (2) imagination and quality of scholarly writing, and (3) academic achievements and potential as indicated by grade-point average, Graduate Record Examination (GRE) scores, awards, scholarships, fellowships, etc. Additionally, you should demonstrate awareness and experience in one of the major fields of the theater, such as directing, dramaturgy, or design.

Students may be admitted with an M.F.A., M.A., or B.A. degree. The dossier submitted for admission must contain a statement of purpose indicating areas of interest appropriate to the doctoral degree, as well as a thesis or other writing samples.

Further information is available from the Student Affairs Office, Department of Theater, UCLA, Los Angeles, CA 90024-1622.

Major Fields or Subdisciplines

The Ph.D. student in theater is expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production, and dramatic literature.

Foreign Language Requirement

Mastery of one foreign language approved by the Ph.D. committee is required and must be demonstrated by one of the following methods: (1) passing the Educational Testing Service (ETS) examination in French, Spanish, German, or Russian with a score of 500 or better, (2) completing level five or equivalent, with a minimum grade of C, in any foreign language, or (3) passing a UCLA language examination given in any foreign language department. The foreign language requirement may be completed after admission to the Ph.D. program; however, you are encouraged to complete five quarters or three semesters of a foreign language appropriate to Ph.D. research objectives prior to admission. Language courses taken toward fulfillment of the language requirement cannot be applied toward the degree.

Course Requirements

During the first six terms (two academic years), you must complete a minimum of 12 graduate courses (200 or 500 level) and two professional courses (Theater 495A and 495B). Courses 216A, 216B, 216C are required. The remaining nine courses are elective graduate courses, seminars, or tutorials. Of these electives, no more than four may be taken outside the department and no more than two may be tutorials. In addition, the distribution of electives must include at least one each in the areas of Western or non-Western theater study. These electives must augment the required courses so as to constitute a definable area of study associated with the dissertation topic. The dissertation is a historical, critical, analytical, or experimental study of a theater topic.

Teaching Experience

Every student must complete Theater 495A and 495B.

Qualifying Examinations

At the end of your second term in residence, you must take a preliminary oral examination administered by a representative committee of the faculty. The committee specifies the area of review, tests your background preparation and progress to date, and determines your general fitness to continue in the doctoral program. After completion of all language and course requirements, approval of a dissertation prospectus, and appointment of a dissertation committee, you are required to pass a written qualifying examination administered during four successive days. Information regarding the examination is available from the Ph.D. committee. With approval of the department chair, you may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the term in which it was first taken.

After you pass the written examination, a doctoral committee is formed to administer the University Oral Qualifying Examination. You are advanced to candidacy only on successful completion of this examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

A dissertation demonstrating your ability to carry out independent and significant inquiry in a historical, theoretical, or critical field of theater is required. Final award of the Ph.D. depends on successful completion of the dissertation.

A final oral examination, held after completion of the dissertation, may be required at the option of the dissertation committee.

Lower Division Courses

5A. History and Drama of Theater from Primitive Times to 1640. Lecture, three hours; discussion, one hour. Required of theater majors. History of influence of different cultures, traditions, and technologies on development of theater as a social institution.

5B. History and Drama of Theater from 1640 to 1900. Lecture, three hours; discussion, one hour. Required of theater majors. History of influence of different cultures, traditions, and technologies on development of theater as a social institution.

5C. History and Drama of Theater from 1900 to the Present. Lecture, three hours; discussion, one hour. Required of theater majors. History of influence of different cultures, traditions, and technologies on development of theater as a social institution.

10. Fundamentals of Theater, Film, and Television. Lecture, four hours; discussion, one hour; laboratory, two hours. Required of theater majors in first term in residence. Basic study of artistic relationship between management, writing, history, criticism, directing, acting, design, technical direction, cinematography, and animation in theater, film, and television production. Emphasis on understanding each of the arts which contribute to the final presentation.

20. Acting Fundamentals. Lecture/laboratory. Required of theater majors. Introduction to interpretation of drama through art of the actor. Development of individual insights, skills, and disciplines in presentation of dramatic material to an audience.

Upper Division Courses

100. Teaching Theater. Lecture, three hours. Prerequisite: courses 160 or 161A and 162A, or consent of instructor. Highly recommended for students pursuing a secondary instructional credential. Study of current methods and problems of production as related to secondary level.

102D. History of European Theater. Lecture, three hours. Prerequisite: consent of instructor. Not open for credit to students with credit for more than one course from 5A, 5B, 5C series. Survey of development of theater from the Greeks to the present.

102E. Theater of Non-European World. Lecture, three hours; discussion, one hour. Survey of theater forms of non-European world in which primary attention is concentrated on examination and analysis of traditional dance-drama and puppet theaters of East Asia, Southeast Asia, South Asia, the Middle East, and Africa. Analogous forms from European theater included for comparative purposes.

103A. African American Theater History: Slavery to Mid-1800s. Lecture, three hours. Prerequisites: upper division standing, consent of instructor. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s.

103B. African American Theater History: Minstrel Stage to Rise of the American Musical. Lecture, three hours. Prerequisite: upper division standing, consent of instructor. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical.

M103C. Origins and Evolution of Chicano Theater. (Same as Chicano Studies M103C.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

M103D. Contemporary Chicano Theater. (Same as Chicano Studies M103D.) Lecture, three hours. Prerequisite: upper division standing. Study of current trends in Chicano theater as reflected in works of contemporary Chicano dramatists and theater artists.

103E. African American Theater History: The Depression to the Present. Lecture, three hours. Prerequisite: upper division standing, consent of instructor. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present.

103F. Native American Theater. Prerequisite: consent of instructor. Study of American Indian theater as an evolving art form.
104D-104E-104F. History of American Theater. Lecture, three hours. From the Revolutionary War to the Civil War; 104E. From the Civil War to WWI; 104F. From WWI to the Present. May be repeated twice for credit.

105. Main Currents in Theater. Lecture, three hours. Critical examination of leading theories of theater from 1887 to the present. Study and discussion of modern styles of production.

111A. Selected Topics on History of European Theater from 1890 to 1900. Lecture, three hours. Formerly numbered 102A. May be repeated twice for credit.

111B. Selected Topics on History of European Theater from the Renaissance to the 16th Century. Lecture, three hours. Formerly numbered 102A. May be repeated twice for credit.

111C. Selected Topics on History of European Theater from 1900 to the Present. Formerly numbered 102B. Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Renaissance to 1900. May be repeated twice for credit.

112. Production Problems for the Child Audience. Lecture, two hours; laboratory, four hours. Prerequisites: course 111, consent of instructor. Advanced treatment of techniques of construction, design, and related costume materials. Courses 142A, 140A, and 141A may be taken in any sequence, but not concurrently.

112B. Advanced Costuming for the Stage. Lecture, three hours; laboratory, four hours. Prerequisites: course 142A, consent of instructor. Special problems in procuring, designing, construction, and management of costumes used in theatrical productions.

113. Scenic Design for the Theater. Prerequisite course 10, consent of instructor. Basic principles of design as applied to interpretation and presentation of visual aspects of dramatic art. Study of styles, techniques, and methods of design for theater arts. Translates ideas into visual forms. May be repeated once for credit.

114A. Theater Sound Techniques (2 units). Lecture, two hours; laboratory, two hours. Prerequisite course 10 or an equivalent approved. Study of equipment and techniques utilized in recording and reproduction of sound for the theater.

114B. Advanced Theater Sound. Lecture, three hours; laboratory, four hours. Prerequisite: course 144A or consent of instructor. Detailed study of the sound, with emphasis on composition and execution of theater sound tracks, recording techniques, and acoustic reinforcement.

115. Costume Design for the Theater. Lecture/lab, Prerequisite: consent of instructor. Design of costumes for theatrical presentations. Study of use of silhouette, fabrics, color, and decoration as related to theatrical characterization. May be repeated once for credit.

116. Scene Painting Techniques (2 units). Lecture, three hours; laboratory, four hours. Prerequisite: consent of instructor. Study of scenic painting techniques and materials and their relation to realization of color design and elevations. May be repeated once for credit. Concurrently scheduled with course C446.

117. Puppet Theater (2 units). Lecture/laboratory, four hours. Prerequisites: course 111 and consent of instructor. Development of design analysis and planning related to rigging, manipulation, and full production. Emphasis on communication, artistic expression, and pantomime. May be repeated once for credit.

118. Advanced Creative Dramatics (2 to 4 units). Lecture, four hours; other, to be arranged. Prerequisite: consent of instructor. Practical application of creative drama process. Exploration of interrelationships of the arts to traditional disciplines of learning.

120. Acting Workshop (2 units). Laboratory, to be arranged. Prerequisites: course 20, consent of instructor. Course 160, 161A, 161B, and 161C may be taken concurrently. Workshop which provides students with opportunity to rehearse, perform, and criticize scene work. May be repeated once for credit.

122. Makeup for the Stage (2 units). Prerequisite: consent of instructor. Art of makeup and its relation to the production as a whole. History, aesthetics, materials, and procedures of makeup.

123. Intermediate Acting for the Stage. Lecture/laboratory. Prerequisite: course 20, consent of instructor. Study and practice of art of acting through perfecting of techniques and application of those techniques to acting problems.

124A. Voice for the Stage. Lecture/laboratory. Prerequisite: course 20, consent of instructor. Development of voice techniques for the stage. Includes work in relaxation, breathing, balance, and speech. May be repeated twice for credit.

124B. Speech for the Stage. Lecture, four hours; laboratory, two hours. Prerequisites: courses 20, 123, 124A (with demonstration of high skills level), 125A, consent of instructor. Designed to acquaint students with international phonetic alphabet and its uses and to exercise students' skills in pronunciation, enunciation, and development of diction versatility.

125A. Movement for the Actor. Lecture/laboratory. Prerequisites: course 20, consent of instructor. Physical awareness for the actor, concentrating on warming up these skills.

125B. Advanced Movement for the Actor. Lecture/laboratory. Prerequisites: course 125A, consent of instructor. Advanced and contemporary approach to classical and modern movement for the stage actor.

130A. Fundamentals of Playwriting I. Lecture, three hours. Prerequisite: consent of instructor. Designed to stimulate students' critical and creative faculties through preparation of original material for the theater. Guidance in completion of the play. May be repeated twice for credit.

130B. Fundamentals of Playwriting II. Lecture, three hours plus conference. Prerequisites: course 130A, consent of instructor. Study in original material for the theater, its preparation and development. Designed to give further insight into critical and creating aspects of short and full-length plays and guidance in completion of one-act and full-length plays. May be repeated twice for credit.

130C. Writing for American Musical Theater. Lecture/laboratory, three hours. Prerequisite: consent of instructor. Study of techniques involved in writing a libretto for musical theater: opening numbers, romance, subplot, and comedy. May be repeated once for credit.

132. Manuscript Evaluation for Theater. Lecture, three hours. Prerequisite: course 130A, consent of instructor. Principles and practices in evaluation of manuscripts for theater. May be repeated once for credit.

133A-133B-133C. Script Development Workshops. Laboratory, three hours. Prerequisite for playwriting workshops: consent of instructor. Group in preparation of a script for production, focusing on collaboration and process between playwright and director, scene work, staged readings, casting, rehearsal, and full production. Emphasis on communication, artistic expression, and pantomime. May be repeated twice for credit.

136. Advanced Acting for the Stage. Lecture/laboratory. Prerequisites: courses 123, 124A, 125A, consent of instructor. Study and practice of art of acting through a progression to more advanced acting problems. May be repeated twice for credit. Concurrent enrollment with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units.

137A-137B-137C. Continuum Study in Acting for the Stage. Lecture/laboratory. Prerequisites: courses 123, 124A, 125A, consent of instructor. Techniques of characterization and performance in advanced and complex acting problems. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units.

138. Special Problems in Performance Techniques. Lecture/laboratory. Prerequisites: courses 123, 124A, 125A, consent of instructor. Study of complex problems in voice, movement, and acting. May be repeated twice for credit.

140A. Scenic Techniques for the Stage. Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Intensive study of stage scenery techniques; tools, hardness, and materials and their relationship to the art of theatrical scenic design through analysis of scenic design history, overall production concepts, and design styles.

140B. Advanced Scenery for the Stage. Lecture/laboratory. Prerequisite: course 140A. Advanced study of scenery techniques of the professional stage, including design analysis and planning related to rigging, shifting, and construction techniques.

141A. Lighting Techniques for the Stage. Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Required of theater majors. Intensive study of stage lighting, with emphasis on relationship of lighting instruments and control equipment to lighting design. Courses 141A, 140A, and 142A may be taken in any sequence, but not concurrently.
161A. Continuum in Directing for the Stage (2 units). Lecture/laboratory, six hours. Prerequisite: consent of instructor. Course 121 may be taken concurrently. Intensive development of primary directing skills and process, including text analysis and exploration of craft fundamentals as a basis for director-actor communication and effective staging. Students work in proscenium and ensemble settings with scenes from plays of American realism. May be applied toward major requirement in directing.

161B. Continuum in Directing for the Stage. Lecture/laboratory, six hours. Prerequisites: course 160 or 161A, consent of instructor. May be taken concurrently. Further development of craft elements of directorial method, with additional emphasis on psychological aspects of director-actor communication. Students work in arena and proscenium configurations with scenes from the period of early realism through expressionism.

161C. Continuum in Directing for the Stage (6 units). Lecture/laboratory. Prerequisites: course 161B, consent of instructor. Course 121 may be taken concurrently. Motion in three-quarter and environmental configurations, students direct plays of style in production by staging scenes from period plays (Greek through Romantic eras) and from contemporary non-realistic works.

162A. Intermediate Play Direction. Lecture/discussion, two hours; laboratory, eight hours. Prerequisites: course 160 or 161A, consent of instructor. Application of stage direction techniques to the one-act play. Each student directs a one-act play to be performed under rehearsal conditions. Material taken from published sources.

162B. Advanced Play Direction. (Formerly numbered 162B.) Lecture, four hours; laboratory, six hours. Prerequisites: course 160 or 161A, consent of instructor. Special problems in direction of original one-act plays under production conditions. May be repeated once for credit with consent of instructor. Concurrently scheduled with course C162.

170. Theater Laboratory. Lecture, four hours; laboratory, eight hours. Prerequisites: courses 140A, 141A, 141A, 142A, consent of instructor. Required of theater majors. Laboratory in theater production under supervision. Translation of ideas and concepts into the dramatic form. May be taken for a maximum of four units.

171A. Advanced Theater Laboratory (2 or 4 units). Hours to be arranged. Prerequisite: consent of instructor. Creative participation as actor or stage manager in public presentation of departmental productions. May be repeated for a maximum of eight units.

171B. Advanced Theater Laboratory (2 or 4 units). Hours to be arranged. Prerequisite: consent of instructor. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

172. Technical Theater Laboratory (2 units). Hours to be arranged. Prerequisite: consent of instructor. Required of theater majors. Laboratory in various aspects of theater production. Must be repeated for a maximum of eight units. Course assignment may be repeated more than once. Concurrently scheduled with courses C272 and C472.

C190A. Role of Producer in Professional Theater (2 units). Study of structure governing economic and artistic decision-making processes in professional theater in the United States. Concurrently scheduled with course C294A.

C190B. Role of Management in Educational and Community Theater (2 units). Study of artistic, social, and economic criteria in administration of education and community theater. Concurrently scheduled with course C294B.

191. The Touring Company (2 to 12 units). Lecture, 20 hours; laboratory, 22 hours. Prerequisite: consent of instructor. Rehearsal and technical preparation of a touring company to perform touring and performance of that work on tour.

192. Motion Picture, Television, and Theater Internships (2, 4, or 8 units). Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Prerequisite: consent of instructor. Limited to junior Department of Theater majors. Internship at various studios or theaters accentuating creative contribution, organization, and work of professionals in their various specialties. May be taken for a maximum of eight units.

199. Special Studies in Theater Arts (2 to 8 units). Hours to be arranged. Prerequisite: senior standing. 3.0 GPA in major, consent of instructor. May be taken for a maximum of eight units.

**Graduate Courses**

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate adviser. Graduate courses are not open to undergraduate students.

200. Bibliography and Methods of Research in Theater Arts.

202A. Seminar in Western Classical Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Examination of theatrical production and dramatic form in the Greek and Roman periods. May be repeated twice for credit.

202B. Seminar in Medieval Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.

202C. Seminar in Renaissance and Baroque Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theatrical production and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

202D. Seminar in Bourgeois and Romantic Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

202E. Seminar in Modern Consciousness in Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of prototype of modern experience as encountered in work of Ibsen and Strindberg. May be repeated twice for credit.

202F. Seminar in Modern Realism. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theater's re-interpretation of science, politics, and revolution. May be repeated twice for credit.

202G. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in symbolism and avant-garde theater. Exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit.

202M. Seminar in American Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in development of theatrical production and dramatic writing in American theater. May be repeated twice for credit.

202N. Seminar in Theater Architecture and Scenic Design. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of playhouse and scenic environment, relating historic and contemporary concepts. May be repeated twice for credit.

202P. Seminar in Traditions of African Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theatrical forms of traditional African societies, including Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean) through examination of character, structure, performance modes, and style. May be repeated twice for credit.

202R. Seminar in East Asian Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

202S. Seminar in South Asian Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of South Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

202T. Seminar in Southeast Asian Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of Southeast Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

204. Theater Genres. (5 units). Seminar, four hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.

205. Themes in World Theater and Drama (5 units). Seminar, four hours. Prerequisites: graduate standing, consent of instructor. Selected topics in world theater, including those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean). May be repeated four times for credit.

205A-205B. Background of Theatrical Art. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of selected areas of theater and drama that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

205A. Background of Theatrical Art. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of selected areas of theater and drama that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

205B. Classical and Medieval Periods. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of selected areas of theater and drama that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

205C. Renaissance, Baroque, and Rococo Periods. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of selected areas of theater and drama that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

205D. Naturalistic, Symbolist, and Symbolist Periods. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of selected areas of theater and drama that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

205E. Seminar in American Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.

205F. Seminar in Modern Realism. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.

205G. Seminar in Modern Theatricalism. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.

205H. Seminar in Modern Consciousness in Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.

205I. Seminar in Theater Architecture and Scenic Design. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.

205J. Seminar in Theater Ethics and Issues. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.

205K. Seminar in Critical and Historical Methods. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.

205L. Seminar in Critical and Historical Methods. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of the Middle Ages. May be repeated twice for credit.
217A. Research and Practice in Puppet Theater (2 units). Laboratory, four hours. Prerequisites: graduate standing, consent of instructor. Studies in contemporary modes of psychoanalytic and archetypal criticism for theater.

220F-220W-220S. Seminar in Theater (0 units, 0 units, 2 units). Seminar, two hours bimonthly or five times per term. Prerequisite: graduate standing in M.F.A. program and consent of instructor. Guided completion of scripts for the stage. S/U grading.

230A-230B-230C. Advanced Playwriting (4 to 8 units each). Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selecting characters for contemporary work. May be repeated once for credit.

241. Research in Technical Theater. Prerequisites: graduate standing, consent of instructor. Research in technical processes and equipment in theater.

242A-242B-242C. History of Style and Ornamentation. Prerequisites: graduate standing, consent of instructor. In-depth study of history of costume, architecture, interiors, furnishings, and their interrelationships from early Western culture through the late Gothic period. Emphasis on those periods most prolific in dramatic literature and on resources and research techniques for visual arts.

243A-243B-243C. Advanced Problems in Design for the Theater. Prerequisites: graduate standing, consent of instructor. Advanced study and practice in design of stage productions. Determination of approach and style in scenic design.

244A. Advanced Theater Laboratory (2 or 4 units). Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Creative participation as assistant director, stage manager, or performer in public presentation of departmental productions. May be taken for a maximum of four units.

244B. Advanced Theater Laboratory (2 or 4 units). Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Creative participation as assistant director, stage manager, or performer in public presentation of departmental productions. May be taken for a maximum of four units.

245. Production Planning in Theater. (Formerly numbered 245A-245B.) Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Development of planning procedures through analysis of multi-scene production.

260. Problems in Direction for the Stage. Lecture, four hours; laboratory, approximately 30 hours. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Design, construction, and performance of a full-length production with puppets as cultivating exercise for candidates for M.F.A. degree in puppet theater. Development of research in an area of puppet making, design style and techniques used in construction of puppets, rationale for use of puppets for particular project presented, and final justification and analysis of completed work.

262. Research and Practice in Stage Direction. Lecture, four hours; laboratory, six hours. Prerequisite: graduate standing in M.F.A. program and consent of instructor. Study of special problems in direction of original one-act plays under production conditions. May be repeated once for credit with consent of instructor. Concurrently scheduled with course C162B.

263. Production Project in Direction for the Stage (4 to 6 units). Discussion, one hour; laboratory, 15 to 24 hours per week of rehearsal (three to six weeks depending on project). Prerequisites: graduate standing, consent of instructor. Direction of a dramatic work for public performance. Discussion and critique of work in progress. May be repeated for a total of no more than 12 units.

264. Problems in Direction for the Stage. Lecture, four hours; laboratory, approximately 30 hours. Prerequisites: graduate standing, consent of instructor. Problems in interpretation and direction of historical or classical drama through medium of laboratory scene work.

272. Production and Performance Laboratory (2 units). Lecture, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Credit for creative production assignments required of all M.A. students during first three terms in residence. May be repeated twice for credit. Concurrently scheduled with course C162B.

290A. Role of Management in Artistic Decision Making in the Theater. Prerequisite: consent of instructor. Descriptive study of criteria for decision making in artistic institutions, including roles of the institution, society, economic environment of the arts, and artistic value systems of arts organizations.

290B. Programming and Planning Policies in the Theater. Prerequisite: consent of instructor. Analysis of social, artistic, and economic roles of the arts as reflected in programming policy. Examination of social goals pursued in establishing relationships between the arts and their environment.

294A. Artistic Control of Theatrical Production by Professional Producer (2 units). Prerequisites: graduate standing, consent of instructor. Study of structure governing economic and artistic decision-making processes in professional theater of America and historical development of involvement of producer in artistic process. Concurrently scheduled with course C162B.

298A-298B. Special Studies in Theater Arts (2 to 4 units each). Lecture/discussion. Prerequisites: graduate standing, consent of instructor. Seminar study of problems in theater arts, organized on topic basis. May be repeated once for credit.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

417. Production Project for Puppet Theater (8 units). Laboratory, 30 hours; consultation, five hours. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Design, construction, and performance of a full-length production with puppets as cultivating exercise for candidates for M.F.A. degree in puppet theater. Development of research in an area of puppet making, design style and techniques used in construction of puppets, rationale for use of puppets for particular project presented, and final justification and analysis of completed work.

420A-420B-420C. Advanced Techniques in Acting. Lecture/laboratory, six hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater.

420A. Exercises in sense memory, personalization, and objectives to help students respond truthfully to real and imaginary stimuli by developing concentration, awareness, imagination, and spontaneity.

420B. Extended work in improvisations and exercises in order to apply these techniques to a role. Beginning with monologues, work progresses to two-person scenes. Through these efforts students begin to personalize character's emotional needs and drives.

420C. Preparation and presentation of two-person scenes utilizing sensory work and "objectives" on a more refined basis. Students are able to find similarities and differences between themselves and characters and to play these elements truthfully and spontaneously.

421A-421B-421C. Advanced Projects in Acting (4 or 8 units each). Lecture/laboratory, six hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater. Development of work techniques for and in character and to play these elements truthfully and spontaneously.

421A. Class exercises in acting. Preparation and presentation of roles under performance conditions.

422. Advanced Acting for Theater, Film, and Television (8 to 12 units). Studio/laboratory. Intensive performance experience as a member of a professional repertory company. May be repeated once for a maximum of 24 units. S/U grading.

422A-422B-422C. Advanced Techniques in Voice for the Stage (2 or 4 units each). Lecture/laboratory, four hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater. Development of vocal technique focusing on breath control, pronunciation, relaxation, limbering, breathing, articulators, and resonators. Special vocal problems for the actor.

424D-424E-424F. Special Problems in Voice for the Actor (2 or 4 units each). Lecture/laboratory, four hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater. Extension of first-year work, with increased demands on voice. Range and breathing capacity extension. Articulation and phonetic alphabet. Advanced voice problems.

425A-425B-425C. Advanced Techniques in Movement for the Stage (2 or 4 units each). Lecture/lab- oratory, four hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater. Physical awareness for the actor. Special emphasis on warming up the body, relaxation, gymnastics (balance, falls, stunts), movement techniques, and stage combat.

425D-425E-425F. Special Problems in Movement for the Actor (2 or 4 units each). Lecture/laboratory, four hours. Prerequisite: consent of instructor. Limited to M.F.A. acting candidates in theater. Physical awareness for the actor. Special emphasis on warming up the body, relaxation, gymnastics (balance, falls, stunts), movement techniques, and stage combat.
431. Special Topics in Playwriting. Discussion, three hours. Prerequisites: graduate standing in M.F.A. playwriting program and/or consent of instructor. Analysis and practice of varied aspects of playwright's art. Variable content selected from topics such as comedy writing, docudrama, writing for alternative audiences, adaptation from stage to screen, children's theatre, or improvisational techniques. May be repeated twice for credit.

432. Manuscript Evaluation. Lecture, four hours; laboratory, to be arranged. Prerequisites: course 132 and consent of instructor, or candidate in M.F.A. writing program and consent of instructor. Evaluation of manuscripts of beginning writers, including but not limited to those produced in Film and Television 130B. May be taken twice for credit (once each year of M.F.A. residence).

433A-C433B-C433C. Script Development Workshops. Laboratory, three hours. Prerequisites for playwrights and directors: graduate standing, consent of instructor. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and full production. Emphasis on communication, artistic growth, and professional process. Concurrently scheduled with courses C133A-C133B-C133C.

435AF-435AW-435AS. Problems in Advanced Writing for the Stage (0 units, 0 units, 2 units). Prerequisite: consent of instructor. Limited to M.F.A. candidates. Review discussion and critique of playwriting projects. May be repeated for a maximum of six units. In Progress and S/U grading.

440A-440B-440C. Development of Costume Design Construction Technologies for Theater. (Formerly numbered 444.) Discussion, two hours; laboratory, two hours. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Study of effect of artistic and stylistic ideas on mode and dress of men and women.

441A-441E. Advanced Problems in Lighting Design. Lecture/laboratory. Prerequisites: graduate standing, consent of instructor. 441A. Study and practice in lighting the actor, emphasizing textural and character analysis from lighting designer's perspective, conceptual development, effects of light on stage, use of color, and relationship of lighting designer to the actor. 441B. Study of use of light and color to define space, effect of light on scenery and costumes, lighting for arena/thrust theaters, multiscreen production lighting patterns, and moving scenery. 441C. Prerequisites: courses 441A, 441B, consent of instructor. Advanced study of lighting design related to a range of theatrical forms, including professional theater production, music theater, opera, musical comedy, touring, and repertory situations. Discussion of theatrical stage union relationships and musical analysis for lighting designer. 441D. Advanced study and practice in scenic projection and media techniques, with emphasis on analysis, design, and execution of theatrical projection and photographic technique for the stage. 441E. Study of design, selection, operation, and performance of lighting instruments, dimming equipment, and control systems as they relate to design of performance lighting.

442A-442B-442C. Advanced Problems in Costume Design. Lecture/discussion. Prerequisite: consent of instructor. Advanced study of costume design for theatrical productions. Development of costume designs from theatrical scripts, with emphasis on production styles and character revelation. Scripts vary in period and style to give design practice in major costume periods and artistic styles. 442D-442E-442F. Advanced Problems in Costume Design. Prerequisites: graduate standing, consent of instructor. 442D. Costume design and methodology for the large-scale production. Special problems and techniques unique to opera, ballet, and musical comedy costume design. 442E. Intensive study of professional design practice in film and television. 442F. Practical analysis of textile usage, history, and fabric modification for theatrical costume design.

443. Problems in Design (2 or 4 units). Lecture/laboratory, four hours (additional hours as required). Prerequisites: consent of instructor. Study and practice in design techniques for theater. May be repeated for a maximum of 12 units.

444A-444B-444C. Advanced Problems in Sound Design. Lecture/laboratory. Prerequisites: graduate standing, consent of instructor.

444A. Technology. Study of sound and acoustics as they relate to theater sound design, audio technology, and design and configuration of equipment and techniques associated with recording, mixing, and processing of effects and music tracks. 444B. Recording. Advanced study and practice in preparation and recording of theater sound designs, with emphasis on analysis of script, conceptual development, and application of multitrack recording techniques to realize the design. 444C. Prerequisites: course 444B, graduate standing, consent of instructor. Study and practice in processing and mixing of live and recorded sound, mix-down of multitrack recordings; preparation and editing of sound tracks; sound reinforcement in the theater.

446. Research and Practice in Scene Painting Techniques (2 units). Lecture/laboratory, three hours. Prerequisites: graduate standing, consent of instructor. Study of scenic painting techniques and materials and their relation to realization of color design and elevations. Concurrently scheduled with course C146. Each graduate student (1) researches a new painting method or technique and (2) solves a specific scenic problem or examines a particular period. Result is a theatrical scene painting project related to that research.

448. Computer-Aided Design and Drafting for Theater. Lecture/laboratory. Prerequisites: course 149B or consent of instructor, graduate standing. Study of use of computer-aided design and drafting techniques for the designer.
459A-459B. Directing for Theater, Film, and Television. Lecture, three hours. Prerequisite: consent of instructor. Limited to graduate students in Department of Theater. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in three media.

460AF-460AW-460AS. Problems in Advanced Direction for the Stage (0 units, 0 units, 2 units). (Formerly numbered 460A.) Hours to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Review discussion and critique of directing projects. May be repeated for a maximum of six units. In Progress and S/U grading.

460B. Problems in Advanced Direction for the Stage. Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of a published play under rehearsal conditions. Discussion and critique of work in progress.

460C. Problems in Advanced Direction for the Stage. Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of a full-length original play under rehearsal conditions. Discussion and critique of work in progress.

462. Production Project in Direction for the Stage (4 or 8 units). Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of an original play under minimal production conditions. Discussion and critique of work in progress.

463. Production Project in Direction for the Stage (8 or 12 units). Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of a play under fully produced theater conditions.

472. Production and Performance Laboratory (2 to 8 units). Laboratory, to be arranged. Prerequisites: M.F.A. candidate, consent of instructor. Credit for creative production projects required of all M.F.A. students. May be repeated three times for a maximum of 16 units. Concurrently scheduled with courses C172 and C272.

474. Advanced Problems in Theater Design (2 or 4 units). Discussion, three hours; laboratory, 12 hours to be arranged. Prerequisites: graduate standing, consent of instructor. Study and practice in preparation and performance of dramatic works for public performances as a contributing artistic member of a departmental production. Creative responsibilities include designer, technical supervisor, production manager, choreographer, or dramaturge. May be repeated for a maximum of 16 units.

495A. Problems in Teaching Theater Arts. Lecture/laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of and practice in teaching theater arts at college and university level.

495B. Problems in Teaching Theater Arts (2 or 4 units). Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Demonstration of competence in theater production through successful completion of a major teaching production assignment. May be repeated for a maximum of 12 units.

496. Practice of Teaching Theater Arts (2 units). Discussion. Required once of all teaching assistants or associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to the teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated. S/U grading.

498. Professional Internship in Theater, Film, and Television (4, 8, or 12 units). Full- or part-time at a studio or on a professional project. Prerequisites: graduate standing, advanced standing in M.F.A. program, consent of instructor. Internship at various film, television, or theater facilities accentuating creative contributions, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596A. Directed Individual Studies: Research (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596B. Directed Individual Studies: Writing (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596C. Directed Individual Studies: Directing (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596D. Directed Individual Studies: Design (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596E. Directed Individual Studies: Acting (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596F. Directed Individual Studies: Production (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

597. Preparation for Ph.D. Qualifying Examinations in Theater Arts (2 to 8 units). May be repeated for a maximum of 12 units.

598. M.A. Thesis in Theater Arts (2 to 8 units). Prerequisite: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units.

599. Ph.D. Dissertation in Theater Arts (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units.

Musicology 135A-135B-135C. History of Opera
For most of the twentieth century, U.S. technological know-how, prowess, and leadership reigned supreme. Now, evidence of a significant decline in U.S. competitiveness in the world market abounds. A reversal of this process promises to be a most arduous task. We at the University can contribute to this effort in many ways, but perhaps most effectively through the training of students for the frontiers of technology and through an acceleration of technology transfer to industry. The field of engineering has become much more complex in recent years. The challenges and rewards of the profession have never been greater.

UCLA is a top choice among engineering schools. Students receive thorough grounding in the fundamentals of engineering and in their primary specializations from outstanding faculty members. The curricula are structured to include significant exposure to the humanities, social sciences, and fine arts. In fall 1987 the School of Engineering and Applied Science began a five-year, nearly $100 million expansion of its facilities. The new engineering building opened in spring 1990, and plans for further expansion and renovation of existing facilities are under way.

A program of collaboration with industry and federal research laboratories, including establishment of interdisciplinary research centers focusing on significant issues of interest to those outside the academic community, continues to be phenomenally successful. The school fosters a balanced approach to education — teaching and research as an independent intellectual endeavor and in the service and support of the industrial and business communities.

Whatever the future, the school will be ready for the challenges that a new century will hold. To the parent, we ask you to entrust the future of your sons and daughters into our capable hands. To the student, we invite you to join this dynamic school in all of its excitement and promise. Be a part of the great success story of UCLA.
School of Engineering and Applied Science

Office of Student Affairs:
6426 Boelter Hall
Graduate: (213) 825-2682
Undergraduate: (213) 825-2826

Bachelor of Science Degrees

Students in the School of Engineering and Applied Science may elect one of the nine four-year curricula listed below.

(1) Bachelor of Science in Aerospace Engineering
(2) Bachelor of Science in Chemical Engineering
(3) Bachelor of Science in Civil Engineering
(4) Bachelor of Science in Computer Science
(5) Bachelor of Science in Computer Science and Engineering
(6) Bachelor of Science in Electrical Engineering
(7) Bachelor of Science in Engineering with a specialization in bioengineering*
(8) Bachelor of Science in Materials Engineering
(9) Bachelor of Science in Mechanical Engineering

*Bioengineering is an interdepartmental program listed under "Schoolwide Programs, Courses, and Faculty" at the end of the departmental listings.

The school offers instruction in acoustical engineering, aerospace engineering, applied plasma physics and fusion engineering, bioengineering, ceramic engineering, chemical engineering, civil engineering, computer engineering, control systems engineering, earthquake engineering, electrical and electronics engineering, general engineering, environmental engineering, fluid mechanics, geotechnical engineering, information and communications theory, manufacturing engineering, materials science, mechanical engineering, metallurgy, nuclear engineering, soil mechanics, solid mechanics, structural engineering, systems science, and water resources.

Admission

Applicants for admission to the school must satisfy the general admission requirements of the University as outlined in the section entitled "Undergraduate Admission" in Chapter 2. You must select a specific major within the school when applying for admission. In the selection process many elements are considered, including grades, test scores, and academic preparation.

Freshman applicants are strongly advised to take the tests required by the University for admission on or before December 2. Reports of test scores are needed to give full consideration to admission requests; ask the testing agencies to send your results directly to the UCLA Undergraduate Admissions Office.

Applicants are encouraged to apply either at the freshman or junior level. Students who begin their college work at a California community college are expected to remain at the community college to complete the lower division requirements in chemistry, mathematics, physics, and the recommended engineering courses before transferring to the University. Experience indicates that transfer students who have completed the recommended lower division program in engineering at California community colleges are able to complete the remaining requirements for one of the B.S. degrees in six terms (two academic years) of normal full-time study. Some students who select certain majors, such as computer science and engineering or chemical engineering, may be required to complete additional lower division courses as prerequisites for the major sequence.

Admission as a Freshman

While many students take their first two years in engineering at a community college, an applicant may qualify for admission to the school in freshman standing. It is anticipated that admission will require that the following subjects be taken when satisfying the University admission requirements:

- Algebra ................. 2 years
- Plane geometry ............. 1 year
- Trigonometry ............... ½ year
- Chemistry and physics with laboratory .................. 2 years

It is also highly recommended that you take a course in technical drafting while in high school.

Freshman applicants whose entire secondary schooling was outside the U.S. must pass, with satisfactory scores, the College Board Scholastic Aptitude Test (verbal and mathematics sections) and Achievement Examinations in English composition, physics, and mathematics before a letter of admission to engineering can be issued. Arrangements to take the tests in another country should be made directly with the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Test scores should be forwarded to UCLA.

Admission as a Junior

Applicants for admission to the school in junior standing should have completed 21 to 23 courses (84 to 92 quarter units) in good standing, including the following minimum subject requirements:

<table>

Lower Division Preparation for the Majors

**Mathematics**
Analytic geometry and calculus, 8 units; calculus of several variables, 8 units; matrices and differential equations, 4 units; infinite series, 4 units (total of 24 quarter units minimum)

**Physics**
Calculus-based courses in mechanics of solids, vibration, wave motion, sound, fluids, heat, kinetic theory, electricity, magnetism, electromagnetic waves, light and relativity, with laboratory (total of 16 quarter units minimum)

**Chemistry**
Two quarters or two semesters of general chemistry with laboratory (total of 10 quarter units minimum)

**Engineering**
Digital computer programming, using a higher-level language such as FORTRAN IV, PASCAL, or PL/1 (4 units); other courses: statics, dynamics, graphics and descriptive geometry, surveying, circuit analysis, properties of materials, strength of materials, additional chemistry, additional computer science (total of 24 quarter units minimum)

**Additional Courses**
Life sciences (4 units), English composition (4 units), humanities-social sciences-fine arts (total of 20 quarter units minimum)

UCLA Equivalent Courses

**Mathematics**
31A, 31B
32A, 32B
33A, 33B

**Physics**
8A/8AL*, 8B/8BL*, 8C/8CL*, 8D/8DL*

**Chemistry and Biochemistry**
11A, 11B/11BL***

**Computer Science**
10† or Civil Engineering 15A and 15B⊥⊥; engineering core†† courses; free electives⊥⊥

---

(1) Two and one-fourth courses in chemistry, equivalent to UCLA’s Chemistry and Biochemistry 11A, 11B/11BL (only Chemistry and Biochemistry 11A is required for the computer science and engineering degree; the chemical engineering curriculum also requires Chemistry and Biochemistry 11C/11CL, 132A, 132B/132BL, which do not need to be taken prior to admission to UCLA); (2) six courses in mathematics, equivalent to UCLA’s Mathematics 31A, 31B, 32A, 32B, 33A, 33B; (3) four courses in physics, equivalent to UCLA’s Physics 8A, 8B, 8C, 8D, and physics laboratory courses (8AL, 8BL, 8CL, 8DL), depending on curriculum selected.

It is strongly recommended that transfer students complete a course equivalent to UCLA’s English 3 in addition to the minimum admissions requirements.

Students transferring to the school from institutions which offer instruction in engineering subjects in the first two years, particularly California community colleges, are given credit for certain engineering core requirements.

Students who have been admitted to senior standing in the school on the basis of credit from another institution, from UCLA Extension, or from another college or school of the University must complete, after admission, eight upper division courses which satisfy part of their approved major field sequence.

**Degree Requirements**

The requirements for the Bachelor of Science degrees in Aerospace Engineering, Chemical Engineering, Civil Engineering, Computer Science, Computer Science and Engineering, Electrical Engineering, Engineering, Materials Engineering, and Mechanical Engineering consist of completing the minimum number of required units (from 187 to 201 units, depending on the curriculum selected), the general University requirements, and the school requirements for scholarship and senior residence. You must also satisfy the curricular requirements for the curriculum you choose to follow.

**University Requirements**

University requirements in scholarship, Subject A or English as a Second Language (ESL), and American History and Institutions are discussed in detail in the “Undergraduate Degree Requirements” section in Chapter 2.

**Scholarship and Minimum Progress Requirements**

At least a 2.0 grade-point average must be achieved in all upper division University courses offered in satisfaction of the subject and elective requirements of the curriculum. In addition, a 2.0 minimum grade-point average in upper division mathematics, upper division core courses, and the major field is required for graduation.

Full-time undergraduate students in the School of Engineering and Applied Science must complete a minimum of 36 units in three consecutive terms in which they are registered.

**Senior Residence Requirement**

Of the last 48 units completed for the bachelor’s degree, 36 must be earned in residence in the School of Engineering and Applied Science on this campus. No more than 16 of the 36 units may be completed in Summer Sessions at UCLA.

**Study Lists and Credit Limitations**

Study Lists require approval of the dean of the school or a designated representative. It is your responsibility to present Study Lists which reflect satisfactory progress toward the Bachelor of Science degree, according to standards set by the faculty; advisers in the Office of Student Affairs are available to help you. Study Lists or programs of study which do not comply with these standards may result in enforced withdrawal from the University or other academic action. You are expected to enroll in at least 12 units each term. If you enroll in less than 12 units, you must obtain approval by petition to the dean prior to enrollment in courses. The normal program is 16 units per term. You may not enroll in more than 18 units per term unless an Excess Unit Petition is approved in advance by the dean.

You must attain a minimum grade of C to satisfy the English 3 requirement, which must be met before you have completed 90 quarter units (a grade of C – does not satisfy this requirement).
After 213 quarter units, enrollment may not normally be continued in the school. You may petition the dean for special permission to continue work required to complete the degree. This regulation does not apply to Departmental Scholars.

After you have completed 105 quarter units (regardless of where these units have been completed), you will not receive unit credit or subject credit for courses completed at a community college.

Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor's degree.

No credit may be applied toward the bachelor's degree for Chemistry and Biochemistry 2 or its equivalent after one year of high school chemistry has been completed with a grade of C or better.

No credit is granted toward the bachelor's degree for college foreign language courses equivalent to quarter levels one and two if the equivalent of level two of the same language was completed with satisfactory grades in high school.

Credit for Transfer Students

A course in digital computer programming, using a higher-level language such as FORTRAN IV, PASCAL, or PL/1, satisfies the Computer Science 10 requirement. Many sophomore courses may be selected in some curricula — see curriculum requirements.

(5) One course in engineering and science in society (four units). One of the humanities-social sciences-fine arts electives is available in the Office of Student Affairs. (See the electrical engineering curriculum for the history and literature requirement and the computer science curriculum for its requirements.)

(6) English 3, which must be completed with a minimum grade of C within your first 90 units.

(7) One life sciences course (four units) to be selected from an approved list (required in some curricula — see curriculum requirements).

(8) Free elective courses (four to 12 units) may be selected in some programs (see curriculum requirements in individual departments). The free electives may be selected from any courses yielding credit acceptable to the University of California except CLEP, certain remedial courses, and special courses designated by the school and posted in the Office of Student Affairs. However, in programs which include free elective units, it is strongly recommended that you select additional technical courses for some of these units.

(9) The engineering design content of your program must total at least one half-year of design experience.

(10) The engineering science content of your program must include a minimum of one year of engineering science units.

You may use the curriculum in effect when you begin full-time continuous study in engineering at UCLA, or you may select the curriculum in the UCLA General Catalog in effect at graduation. California community college transfers may also select the curriculum in the catalog in effect at the time they began their community college work in an engineering program, providing attendance has been continuous since that time.

Attend the Conference on Planning Electives conducted by the School of Engineering and Applied Science to help you plan your curriculum. The conference is held during the third week of each term. For time and place, consult the Office of Student Affairs.

The Elective Selection form approved by the faculty adviser must be submitted for approval by the associate dean, Student Affairs, Office of Student Affairs, during the third term of the sophomore year. The deadline is announced each term in the school's Undergraduate Enrollment Instructions brochure.

Members of the Office of Student Affairs staff are available to assist you with University procedures and to answer any questions you may have in regard to general requirements. Pay them a visit.

Passed/Not Passed Grading

You may take one course per term on a Passed/Not Passed basis if you are in good academic standing and are enrolled in at least three and one-half courses (14 units) for the term. Only humanities-social sciences-fine arts and free electives may be taken on a Passed/Not Passed basis. For more details on P/NP grading, see "Units and Grading Policy" in Chapter 4.

Honors

Departmental Scholars

If you are an exceptionally promising junior or senior, you may be nominated as a Departmental Scholar to pursue bachelor's and master's degree programs simultaneously. See "Academic Excellence" in Chapter 2 and the Announcement of the UCLA School of Engineering and Applied Science for details.

Dean's Honors List

Students following the engineering curricula are eligible to be named to the Dean's Honors List each term. Minimum requirements are a course load of 16 units (12 units of letter grade) with a grade-point average equal to or greater than 3.7.

Honors with the Bachelor's Degree

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. Students eligible for University honors at graduation must have completed 90
or more units (for a letter grade) at the University of California and must have attained a grade-point average which places them in the top five percent of the school (GPA of 3.803 or better) for summa cum laude, the next five percent (GPA of 3.694 or better) for magna cum laude, and the next 10 percent (GPA of 3.475 or better) for cum laude.

In addition to fulfilling the minimum criteria for honors established by the University, you must fulfill the School of Engineering and Applied Science criteria, which is based on an upper division grade-point average, to be awarded honors at graduation. For all designations of honors, you must have a minimum 3.25 grade-point average in your major field courses. To be eligible for an award, you should have completed at least 80 upper division units at the University of California.

Tau Beta Pi
The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs “to foster a spirit of liberal culture in engineering colleges.”

Special Programs and Activities

Extracurricular Activities
The faculty strongly encourages students to participate in the many extracurricular activities available on campus, especially those of most relevance to engineering. Among these are the student engineering society (the Engineering Society, University of California), student publications, and programs of the many technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school’s Executive Committee.

Women in Engineering
Women make up approximately 20 percent of the undergraduate and 11 percent of the graduate enrollment in the School of Engineering and Applied Science. Today’s opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a “males only” field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE), recognizing that women in engineering are still a minority, has established a UCLA student chapter which sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers. The UCLA chapter of SWE, in conjunction with other Los Angeles schools, also publishes an annual resume book to aid women students in finding jobs and presents a career day for women high school students.

Continuing Education
Continuing Education in Engineering is under the academic leadership of the School of Engineering and Applied Science and is managed by UCLA Extension. The department offers evening classes, short courses, special programs, and on-site educational training. The Extension Office (540 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. For information, call 825-4100 (class program) or 825-3344 (short course program).

Graduate Study

Admission
In addition to meeting the requirements of the Graduate Division, applicants to the graduate engineering programs are required to take the General Test of the Graduate Record Examination (GRE). In some cases applicants are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area. Applicants for the graduate computer science programs are required to take the GRE General Test and Subject Test in Mathematics or Computer Science. Specific information about the GRE may be obtained from the department of interest.

Students entering the Engineer/Ph.D. program normally are expected to have completed the requirements for the master’s degree with at least a 3.25 grade-point average and to have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having an M.S. degree.

Graduate students without adequate preparation may be admitted provisionally and may be required to take additional coursework which may not be applied toward the degree. After you arrive at UCLA, the adviser will help you plan a program which will remedy any such deficiencies.

For information on the proficiency in English requirements for international graduate students, refer to “Graduate Admission” in Chapter 3.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the department in which you are interested, School of Engineering and Applied Science, UCLA, Los Angeles, CA 90024-1600.

Undergraduate Courses

No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Engineering 106B, 106C, 106D, 109, Chemical Engineering M105A, 199, Civil Engineering 106A, 108, M115, 199, Computer Science 199, Electrical Engineering 100, 100L, 101, 102, 103, 199, Materials Science and Engineering 199, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A, 105D, M109A, 199.

Individual departments within the School of Engineering may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Consult with your graduate adviser on departmental requirements and restrictions.

Master of Science Degrees

Major Fields or Subdisciplines
The M.S. program is centered around one major field. The major fields and subdisciplines offered at the M.S. level in most cases parallel those listed below for the Ph.D. program. There are some differences (e.g., manufacturing engineering in the Department of Mechanical, Aerospace, and Nuclear Engineering is offered only at the M.S. level). Contact the department concerned regarding possible differences between the M.S. and Ph.D. fields and subdisciplines.

You are free to propose to the school any other field of study, with the support of your adviser.

Course Requirements
A total of nine courses is required for the M.S. degree, including a minimum of five graduate courses. (Some fields require more than five; obtain specific information from your department of interest.) A majority of the total formal course requirement and of the graduate course requirement must consist of courses in the School of Engineering. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis. In the comprehensive examination plan, at least five of the nine courses must be in the 200 series; the remaining four courses may be either 200-series graduate or upper division undergraduate courses. No 500-series courses may be applied toward the comprehensive examination plan requirements.

Thesis Plan
The thesis must either describe some original piece of research that you have done, usually but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic in your major field of study. You would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Comprehensive Examination Plan
The comprehensive examination, which is offered every term, is required in written form only. Your comprehensive examining committee may conduct an oral query after review of
Cooperative Degree Programs

The School of Engineering and Applied Science has established two joint degree programs with other schools and departments on campus which allow you to earn two master's degrees simultaneously: the M.B.A./M.S.-Computer Science and the M.A.-Latin American Studies/M.S.-Engineering. Contact the Office of Student Affairs for details.

Master of Engineering Degree

The Master of Engineering (M.Engr.) degree is granted to graduates of the Engineering Executive Program, a two-year work-study program consisting of graduate-level professional courses in the management of technological enterprises. For full details, write to the Office of Student Affairs, School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Los Angeles, CA 90024-1601 (825-1704).

Engineer Degree

The School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses each). The Ph.D. and Engineer degree programs are administered interchangeably in the sense that a student in the Ph.D. program may exit with an Engineer degree. The time spent in either of the two programs may also be applied toward the minimum residence requirement and time limitation for the other program.

Ph.D. Degrees

Major Fields or Subdisciplines*

Chemical Engineering Department — Chemical engineering.
Civil Engineering Department — Earthquake engineering, geotechnical engineering, structures, water resource systems engineering.
Computer Science Department — Artificial intelligence, computer network modeling and analysis, computer science theory, computer system architecture, programming languages and systems, scientific computing (biomedical systems, physical systems, societal systems).
Electrical Engineering Department — Applied plasma physics and fusion engineering, circuits and signal processing, communications and telecommunications engineering, control systems, electromagnetics, integrated circuits and systems, operations research, quantum electronics, solid-state electronics.
Materials Science and Engineering Department — Ceramics and ceramics processing, materials science, mechanical metallurgy, metallurgy and metals processing.
Mechanical, Aerospace, and Nuclear Engineering Department — Applied dynamic systems control, applied plasma physics and fusion engineering, dynamics, fluid mechanics, heat and mass transfer, nuclear science and engineering, structural and solid mechanics.
Schoolwide Fields — Applied mathematics (established minor field only), biocybernetics, man-machine-environment systems.
Schoolwide Programs — Biocybernetics, man-machine-environment systems.

Requirements

All candidates must fulfill the minimum requirements of the Graduate Division (see "Requirements for Graduate Degrees" in Chapter 3). Major and minor fields may have additional course and examination requirements. For further information, contact the individual departments.

Graduate Certificate of Specialization

A certificate of specialization is available in all areas, except computer science, offered by the School of Engineering and Applied Science. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100- or 200-series courses, at least two of which must be at the graduate level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three terms of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed for a Certificate of Specialization in the School of Engineering and Applied Science may subsequently be applied toward master's and/or doctoral degrees.

Professors

Traugott H.K. Frodorke, Ph.D.
Sheldon K. Friedlander, Ph.D. (Ralph M. Parsons Professor of Chemical Engineering)
Elidon L. Knuth, Ph.D.
Kien Nobe, Ph.D. (Distinguished Teaching Award)
Selim M. Senkan, Ph.D.
Vincent L. Vilker, Ph.D. Chair
A.R. Frank Wazzan, Ph.D., Dean
Lawrence B. Robinson, Ph.D., Ementus
William D. Van Vorst, Ph.D., Ementus

Associate Professors

David T. Allen, Ph.D.
Yoram Cohen, Ph.D.
Vasilios Manousouvakhis, Ph.D.
Owen I. Smith, Ph.D.

Assistant Professors

Robert F. Hicks, Ph.D.
Harold G. Monbouquette, Ph.D.

Lecturer

Dwight A. Landis, M.S.

Scope and Objectives

The Department of Chemical Engineering conducts active undergraduate and graduate programs of teaching and research in the areas of thermodynamics, mass transfer, complex mixture engineering and catalysis, electrochemistry and corrosion, combustion science, spectroscopy of complex systems, cryogenics and low-temperature processes, biochemical and bio-

*You may propose to the school any other field of study with the support of your adviser. Instructions on the definition of acceptable ad-hoc fields and procedures for their approval are available in each department office.
medical engineering, computer-aided process design and control, particle technology, pollution control, and polymer engineering. Students are trained in the fundamental principles of these fields while learning a sensitivity to society's needs — a crucial combination in addressing the question of how industry can grow and innovate in an era of economic, environmental, and energy constraints. Faculty members in the department are active in the Biotecnology Research and Education Program sponsored by the National Science Foundation and the State of California, the National Center for Intermedia Transport Research sponsored at UCLA by the Environmental Protection Agency, and the Engineering Research Center for Hazardous Substances Control established at UCLA by the National Science Foundation.

The undergraduate curriculum leads to a B.S. in Chemical Engineering, is accredited by ABET and AIChE, and includes a bioengineering option for students who wish to pursue careers in biotechnology or medicine. The department also offers graduate courses and research leading to M.S. and Ph.D. degrees. Both graduate and undergraduate programs closely relate teaching and research to important industrial problems.

Bachelor of Science in Chemical Engineering

The goal of the ABET-accredited chemical engineering curriculum is to provide a high quality, professionally oriented education in modern chemical engineering. The bioengineering option exists as a subset of courses within the accredited curriculum. Balance is sought between design and science.

The Major

Course requirements are as follows (193 minimum units required):

(1) Four general engineering courses: Chemical Engineering M105A, Civil Engineering 108, Electrical Engineering 100, 103.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 106, 107, 108A (satisfies the engineering economics requirement), 108B, 104A, 104B (satisfies the laboratory requirement); M192A; Chemistry and Biochemistry 113A.

(3) Two elective courses from Chemical Engineering 110, 111, 112, 113, 114, C115, C116 (other courses in engineering, mathematics, and the sciences may be selected in consultation with your adviser), and three upper division chemistry elective courses (except Chemistry and Biochemistry 110A, 190, 196A-196F, 199A-199Z) selected in consultation with your adviser. If you specialize in the bioengineering option, substitutions are made, in consultation with your adviser, for some of the electives.

(4) English 3: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL; Computer Science 10C or 10F; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BBL, 8C/8CL, 8D/8DL.

(5) Six courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement).

Graduate Study

For information on graduate admission to the chemical engineering program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

Upper Division Courses

100. Introduction to Chemical Engineering. (Formerly numbered 137.) Prerequisites: Mathematics 32B (may be taken concurrently), Chemistry 11C/11CL, Physics 8B. Introduction to analysis and design of industrial chemical processes. Material and energy balances. (F)

101A. Momentum Transfer. Prerequisites: courses M105A, Mathematics 33A, 33B. Introduction to analysis of fluid flow in systems of interest to chemical engineering practice. Fundamentals of momentum transport, Newton's law of viscosity, Navier-Stokes equations, interphase momentum transport and friction factors, flows in conduits and around submerged objects. (W)

101B. Heat Transfer. Lecture, four hours; discussion, one hour. Prerequisite: course 101A. Introduction to analysis of heat transfer in systems of interest to chemical engineering practice. Fundamentals of thermal energy transport, Fourier's law of heat conduction, forced and free convection, radiation, interphase heat transfer, heat exchanger analysis. (W)

101C. Mass Transfer. Lecture, four hours; discussion, one hour. Prerequisites: courses 100, 101B, 102. Introduction to analysis of mass transfer in systems of interest to chemical engineering practice. Fundamentals of mass species transport, Fick's law of diffusion, diffusion in chemically reacting flows, interphase mass transfer, multicomponent systems. (Sp)

102. Chemical Engineering Thermodynamics. (Formerly numbered 137A.) Prerequisites: courses 100, M105A. Thermodynamic properties of pure substances and solutions. Phase equilibrium, Chemical properties reaction equilibrium. (W)

103. Separation Processes. (Formerly numbered 137C.) Prerequisites: courses 100, 101B, 102. Application of principles of heat, mass, and momentum transport to design and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis. (Sp)

104A. Chemical Engineering Laboratory. (Formerly numbered 139A.) Laboratory, eight hours. Prerequisites: courses 100, 101B, 102, M105A. Basic introductory laboratory experiments illustrating applications of principles of thermodynamics, chemical kinetics, and transport phenomena to practical systems. Experiments include examples of heat transfer, fluid flow, chemical thermodynamics, and homogeneous chemical kinetics. (Sp)

104B. Chemical Engineering Laboratory II. (Formerly numbered 139B.) Laboratory, eight hours. Prerequisites: courses 101C, 102, 104A. Course consists of four experiments, each of two weeks duration. After each experiment, students prepare a detailed report that includes sections on background material, theoretical development, procedures, experimental results, scale-up and design considerations, and error analysis. (F)

M105A. Introduction to Engineering Thermodynamics. (Same as Mechanical, Aerospace, and Nuclear Engineering M105A.) Lecture, four hours; recitation one hour. Prerequisites: Physics 8B, Mathematics 32B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. (F,WSp)

106. Chemical Reaction Engineering. (Formerly numbered 137D.) Prerequisites: courses 100, 101C, 102. Fundamentals of chemical kinetics and catalysis. Introduction to analysis and design of homogeneous and heterogeneous chemical reactors. (F)

107. Process Dynamics and Control. (Formerly numbered 138.) Prerequisites: courses 101C, 103, 106. Introduction to modeling and start-up behavior of chemical engineering processes. Chemical process control elements. Design and applications of chemical process computer control. (W)

108A. Process Economics and Analysis. (Formerly numbered 137E.) Prerequisites: courses 101A, 102, 103, 106. Integration of chemical engineering fundamentals such as transport phenomena, thermodynamics, separation operations, and reactor engineering and simple economic principles for purpose of designing chemical processes and evaluating alternatives. (W)

108B. Chemical Process Computer-Aided Design and Analysis. (Formerly numbered 137F.) Prerequisites: courses 103, 106, 108A. Computer Science 10F. Introduction to application of some mathematical and computing methods to chemical engineering design problems; use of simulation programs as an automated method of performing steady state material and energy balance calculations. (Sp)

110. Introduction to Statistical Thermodynamics. (Formerly numbered 130A.) Prerequisite: course M105A. Calculations of expected values and variances of thermodynamic functions for perfect monatomic gas, Einstein monatomic crystal, photon gas, electron gas in a magnetic field, perfect absorbed new, perfect dissociated gas, and Debye monatomic crystal. Calculations of gross emission rates from surfaces. (Mr. Knuth (F))

111. Introduction to Cryogenics and Low-Temperature Processing. (Formerly numbered 138A.) Prerequisite: course M105A. Liquification of gases to cryotemperatures, LNG processes, liquid hydrogen, and liquid helium cryosystems for superfluids and applied superconductivity. (Mr. Frederking (W))

112. Polymer Processes. (Formerly numbered 138B.) Prerequisites: course 101A, Chemistry 132A. Formation of polymers, criteria for selecting a reaction scheme, polymerization techniques. Polymer characterization. Mechanical properties. Rheology of macromolecules, modeling and experimental methods to characterize non-Newtonian fluids. Polymer process engineering. (Mr. Cohen (Sp))

113. Pollution Control Technology. (Formerly numbered 138C.) Prerequisites: courses 103, 106. Integration of chemical engineering fundamentals such as transport phenomena, chemical kinetics, and environmental pollution concerns for purpose of designing control devices and of analyzing fate of pollutants in the environment. (Mr. Cohen, Mr. Friedlander, Mr. Vilker (W))
211. Cryogenics. (Formerly numbered 230C.) Prerequisite: course 102. Study of basic phenomena in low temperature and cryogenic engineering; liquefaction of gases and liquid helium; adsorption and cryointerfering cooling methods, and superfluid systems; Meissner state, type I and type II systems; applied superconductivity cryogenics. Mr. Frederking

240. Fundamentals of Aerosol Technology. Prerequisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, combustion, and industrial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Mr. Friedlander (W)

250. Corrosion and Correlated Chemical Reactions. Prerequisite: course 108B. Application of optimization methods in chemical process design; computer aids in process engineering; systematized flow sheet invention; process synthesis; chemical reaction engineering for large-scale chemical engineering processes. Mr. Manousiouthakis (F)

259. Departmental Seminar (2 units). Prerequisite: graduate standing in chemical engineering. Seminar by leading academic and industrial chemical engineers to discuss recent technological advances in the discipline. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as assistant in chemical engineering, consent of instructor. May be repeated for credit under active guidance and supervision of a regular faculty member responsible for course instruction and research. Usually taken after student has been advanced to candidacy. S/U grading.

397. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Preparation for Ph.D. preliminary examinations in chemical engineering, consent of instructor. Petition to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. Self-directed study on recent technological advances in the discipline. Usual taken after student has been advanced to candidacy. S/U grading.

598. Research and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis proposal. 3 to 12 units. S/U grading.

599. Research and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

Scope and Objectives

The civil engineering programs at UCLA include structural engineering, structural mechanics, biomechanics, geotechnical engineering, earthquake engineering, water resource systems engineering, environmental engineering, and decision making and engineering management. The ABET-accredited civil engineering curriculum leads to a B.S. in Civil Engineering, a broad-based education in structural engineering, geotechnical engineering, and water resource systems. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study.

At the graduate level, M.S. and Ph.D. degree programs are offered in a number of areas, including structures, structural mechanics, earthquake engineering, mechanics of solids, soil mechanics, environmental engineering, and water resource systems engineering. In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to critical problems in earthquake engineering and in the development of new technologies for water treatment and pollution control.

Bachelor of Science in Civil Engineering

The objective of the civil engineering curriculum is to graduate seniors with an academically sound and practical background in civil engineering. A balanced program, including engineering science, design, and laboratory courses in civil engineering, is stressed. The ongoing goal of the program is to provide well-qualified graduates for the engineering profession or for graduate civil engineering schools in the U.S.

The Major

Course requirements are as follows (192 minimum units required):

(1) Seven core courses: Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A. Civil Engineering 108, Electrical Engineering 100, 103, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103.

(2) Civil Engineering 106A, 120, 121, 130, 135A, 135B, 151, one course from 141, 142, one course from 155, 163, 164; one mathematics course from Mechanical, Aerospace, and Nuclear Engineering 191A, 192A (or Chemical Engineering M192A), 192B, 192C, 193A, 193B.

(3) Twenty-four elective units, to be selected from the courses listed below, which must include at least 11 design units and eight units of laboratory:

- Geotechnical Engineering — Civil Engineering 121, 128L, Earth and Space Sciences 100, 139.
- Structures — Civil Engineering 135B, 135C, 135L, M137, 137L, 141, 142, 142L, 142X, 143, 147.
- Systems Analysis — Civil Engineering M140, 175.
- Water Resources and Environmental Engineering — Civil Engineering 150, 156, 157, M161, 163, 164.
- English 3; Chemistry and Biochemistry 11A, 11B/11BL; Civil Engineering 15A, 15B; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C, 8D; one life sciences elective course.

(5) Six courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter).

(6) One humanities, social sciences, and/or fine arts course to satisfy the engineering and science in society requirement.

(7) Three free elective courses.

Graduate Study

For information on graduate admission to the civil engineering program and requirements for the M.S. and Ph.D. degrees, see “Graduate Study” at the beginning of this chapter.

Lower Division Courses

15A. Introduction to Computing in Civil Engineering (2 units). Lecture, two hours; laboratory, two hours. Overview of operating systems for microcomputers, file editors, spread sheats, data base programs, SEASnet facilities. Introduction to programming. Civil engineering applications.

Mr. Dong (W,Sp)

15B. Introduction to FORTRAN Programming (2 units). Formerly numbered 15.) Lecture, two hours; laboratory, two hours. Prerequisite: course 15A. Introduction to programming using structured FORTRAN. Selected topics in programming, with emphasis on numerical techniques as applied to engineering problems.

Mr. Dong (W,Sp)

Upper Division Courses

Mr. Dracup (W,Sp)

Mr. Dracup (W,Sp)

M15. Engineering and Policy: Resources and Risk (Formerly numbered M109A). Same as Mechanical, Aerospace, and Nuclear Engineering M109A.) Lecture, two hours; recitation, two hours. Prerequisite: sophomore or higher standing in engineering. Philosophical, sociological, and institutional implications of engineering-based risk and decision making. Emphasis on opportunities for useful development of resources, inherent risks, and responsibilities of engineers in the decision process. Emphasis on thoughtful student discussion.

Mr. Perrine (W)

120. Principles of Soil Mechanics. (Formerly numbered 185A.) Prerequisite: course 108. Recommended: Earth and Space Sciences 1. Soil as a foundation for structures and as a material of construction. Soil formation, classification, physical and mechanical properties, compaction, bearing capacity, earth pressures, consolidation and shear strength.

Mr. Lade (F)
121. Design of Foundations and Earth Structures. (Formerly numbered 185B.) Prerequisite: course 120. Lecture and laboratory, three hours; two laboratory sessions. Site investigation, including determination of soil properties for design. Design of footings and piles, including stability and settlement calculations. Design of slopes and retaining structures. Limited enrollment. Mr. Lade (W)

129L. Soils Mechanics Laboratory. (Formerly numbered 185L) Lecture, one hour; laboratory, eight hours. Prerequisite: course 120 or consent of instructor. Laboratory experiments to be performed by students to obtain soil parameters required for assigned design problems. Also, the effects of earthquake loading on the shear strength of cohesive and frictional soils will be investigated. Field procedures and equipment will be discussed. Lecture topics include: stress analysis and the determination of bearing capacities of shallow and deep foundations, the dynamic behavior of soil and embankment structures, and the use of stability analysis in the design of slope stabilization measures.

130. Elementary Structural Mechanics. (Formerly numbered 166.) Prerequisite: course 108. Introduction to two-dimensional elasticity, stress strain laws, yield and fatigue; bending of beams; torsion of thin-walled cross sections. Fracture, and individual projects. Mr. Fourney (F)

130F. Experimental Fracture Mechanics. (Formerly numbered 166F) Lecture, two hours; laboratory, four hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 157 or equivalent. Elementary introduction to fracture mechanics and experimental techniques used in fracture, crack tip stress fields, strain energy release rate, toughness, fatigue crack growth and fatigue life of structural components, mixed mode fracture, and individual projects. Mr. Fourney (F)

130L. Experimental Structural Mechanics. (Formerly numbered 166L) Lecture, two hours; laboratory, four hours. Prerequisite: course 130 or equivalent. Lecture and experiments in limit analysis of various aspects of structures. Elastic and plastic analysis of structural elements in multiaxial stress states. Buckling of columns, plates, and shells. Effects of actual boundary conditions on structural performance. Evaluation of structural fasteners. Mr. Fourney (F)

135A. Elementary Structural Analysis. (Formerly numbered 167A) Lecture, four hours. Or enrollment in Multivariable Calculus (Mathematics 18) or equivalent. Or enrollment in Introduction to Computer Engineering and Information Science 140B. Mr. Wong (Sp)

135B. Intermediate Structural Analysis. (Formerly numbered 167B)Prerequisite: course 135A. Or enrollment in Multivariable Calculus (Mathematics 18) or equivalent. Or enrollment in Introduction to Computer Engineering and Information Science 140B. Mr. Dong (F)

135C. Computer Analysis of Structures. (Formerly numbered 165C) Prerequisite: course 135A. Recommended concurrently course 135B. Mathematical formulation and solution of displacement and force methods. Symmetry/antisymmetry principles. Approximate analysis techniques for estimation/validation of computer results. Inference lines. Mr. Rust (F)

135L. Structural Design and Testing Laboratory. (Formerly numbered 165L.) Lecture, two hours; laboratory, eight hours. Prerequisites: courses 15A, 15B, 135A, or equivalent. Senior standing, consent of instructor. Limited enrollment. Computer-aided optimum design, construction, instrumentation, and test of a small-scale model structure. Use of computer-based data acquisition and interpretation systems for comparison of experimental and theoretical results. Mr. Felton (Sp)

135T. Introduction to Mechanical Vibrations. (Formerly numbered M167A.) Lecture, four hours; other, eight hours. Prerequisites: course 136, Mechanical, Aerospace, and Nuclear Engineering 102. Fundamentals of vibration theory and applications to structures. Introduction to the concepts of one and two degrees of freedom systems, including damping. Normal modes, coupling, and normal coordinates. Vibration isolation devices, vibrations of continuous systems. Mr. Bendiksen, Mr. Fourney (F)

137L. Mechanical Vibrations Laboratory. (Formerly numbered 168L.) Laboratory, eight hours. Corequisite: course M137 or Mechanical, Aerospace, and Nuclear Engineering M169A. Introduction to instrumentation for dynamic measurements, including computer data acquisition. Determination of natural frequencies and damping factors from free vibrations. Determination of natural frequencies, mode shapes, and damping factors from forced vibrations. Dynamic stiffness, nonlinear behavior of systems. Mr. Fourney (F)

139. Introduction to Biostuctural Mechanics. (Formerly numbered 160.) Prerequisite: course 108 or equivalent. Introduction to biostuctural mechanics of human biomechanical system. Structural characteristics and behavior of skeletal and muscular structures in response to mechanical trauma. Elastic and viscoelastic properties of hard and soft tissues. Mathematical modeling. Design characteristics of hip prostheses and anthropometric gait analysis. Mr. Robey (Sp)

140. Numerical Optimization Methods for Engineering Design. (Formerly numbered M129E) (Same as Mechanical, Aerospace, and Nuclear Engineering M129F) Prerequisites: Computer Science 10F, Mathematically Intelligent Programming (Mathematics 131A, 131B, 131C) or Mathematical Statistics (Mathematics 132A, 132B). Systematic presentation of numerical optimization methods for engineering design: one-dimensional minimization, unconstrained minimization, linearly constrained minimization, general nonlinear programs, symbolic optimization, gradient, non-linear behavior of systems. Mr. Fourney (F)

141. Design of Steel Structures. (Formerly numbered 167A) Lecture, three hours; recitation, three hours. Or enrollment in Multivariable Calculus (Mathematics 18) or equivalent. Or enrollment in Introduction to Computer Engineering and Information Science 140B. Mr. Huang (Sp)

142. Design of Reinforced Concrete Structures. (Formerly numbered 167B.) Lecture, three hours; recitation, three hours. Prerequisite: course 135A. Design of reinforced concrete members, beams, columns, and slabs. Mr. Sela (F)

142L. Reinforced Concrete Structural Laboratory. (Formerly numbered 167L.) Laboratory, eight hours. Prerequisite: course 142. Experimental verification of strength design methods used for reinforced concrete elements. Full- or near full-scale slab, beam, column, and joint specimens tested to failure. Mr. Sela (Sp)

142X. Reinforced Concrete Construction Laboratory (2 units). (Formerly numbered 167X.) Laboratory, four hours. Prerequisite: junior standing. Design and fabrication methods used for construction of reinforced concrete members. Full- or near full-scale slab, beam, column, and joint elements fabricated, laborated, and cast in the laboratory. Mr. Sela (F)

143. Design of Prestressed Concrete Structures. (Formerly numbered 167C) Prerequisite: course 135A. Prestressing and post-tensioning techniques. Properties of concrete and prestressing steels. Loss of prestress. Analysis of sections for flexural stresses and ultimate strength. Design of beams by allowable stress and strength methods. Only handling design of continuous beams and slabs. Mr. Sela (Sp)

147. Design and Construction of Tall Buildings. (Formerly numbered 180B.) Prerequisite: course 141 or 142. Introduction to total design process and professional aspects of structural engineers. Limited enrollment. Mr. Perrine (W)

151. Introduction to Water Resources Engineering. (Formerly numbered 184B.) Prerequisites: Mechanical, Aerospace, and Nuclear Engineering 101 or permission of the instructor. Principles of hydraulics, flow of water in open channels and pressure conduits, reservoirs and dams, hydraulic machinery, hydroelectric power, introduction to system analysis and design applied to water resources engineering. Mr. Yeh (W)

155. Water Quality Control Systems. (Formerly numbered 184D.) Prerequisites: Mechanical, Aerospace, and Nuclear Engineering 103 and upper division engineering, or consent of instructor. Biological, chemical, and physical bases of water quality; quality and pollution; potability and chemical aspects of treatment and reclamation; analysis and design of water and wastewater treatment systems; field trip. Dracup (F)

156. Water Quality Control Laboratory. (Formerly numbered 184E.) Laboratory, eight hours. Prerequisites: course 155 (may be taken concurrently). Chemistry 11A, 11B. Basic laboratory techniques and practice for characterization and analysis of water and wastewaters. Selected experiments include measurement of biochemical oxygen demand, suspended solids, dissolved oxygen hardness, and other parameters used in wastewater treatment. Mr. Salen (F)

157. Design of Water Quality Control Systems. (Formerly numbered 184F) Lecture, two hours; laboratory, four hours. Prerequisite: course 155. Design of water and wastewater treatment plants, hydraulic profiles, conceptual design, process design and control, economic evaluation of design. Field trip. Mr. Elmido (Sp)

157A. Design of Water Resources Systems. Lecture, four hours; other, eight hours. Prerequisites: course 151, Mechanical, Aerospace, and Nuclear Engineering 103 and upper division engineering, or consent of instructor. Basic laboratory techniques and practice for characterization and analysis of water and wastewater systems. Topics include: water quality and pollution; potability and chemical aspects of treatment and reclamation; analysis and design of water and wastewater treatment systems; field trip. Mr. Dracup (F)

161. New Energy Technology: Resources, Conversion, Constraints. (Formerly numbered M134A) (Same as Mechanical, Aerospace, and Nuclear Engineering M134A.) Prerequisite: Chemical Engineering 101 or Mechanical, Aerospace, and Nuclear Engineering M101A or equivalent in physics or chemistry of constraint of instructor. Energy resources: fossil fuels, nuclear fuels, hydro, solar, wind, geothermal, and biomass systems. Conversion methods for power production and other applications. Examples of failures and successes of dynamic, economic, and environmental constraints. Mr. Penne (F)

163. Air Pollution Control. (Formerly numbered 181A.) Prerequisite: senior standing or consent of instructor. Sources of air pollutants and their atmospheric transport, dispersion, and photochemical reactions. Design and operational basis for stationary and mobile source control systems. Overview of current regulatory trends. Mr. Perrine (W)

164. Waste and Hazardous Waste Management. (Formerly numbered 181B.) Prerequisite: senior standing or consent of instructor. Waste sources and handling. Resource recovery processes and system design. Reporting and testing requirements for landfill, incineration, and hazardous waste disposal. Leachate transport, monitoring, and design for groundwater protection. Mr. Perrine (W)
175. Introduction to Elements of Decision Making. (Formerly numbered 174A.) Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 135A or equivalent mathematics course. Elements of decision making and the decision process. Decision and utility theory. Formulation of utility functions and objective functions. Subjective probabilities. Bayesian approach to value of information. Risk sharing and group decisions. Methods of eliciting judgments; bias and scoring rules.

Mr. Rubinstein (F)

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. (F, W, Sp)

Graduate Courses

220. Shear Strength of Soil and Stability of Slopes. (Formerly numbered 285A.) Prerequisite: course 120. Detailed study of fundamental concepts of shear strength. Permeability, consolidation, strength testing, of strength measurement. Slope stability and analysis techniques using circular and noncircular failure surfaces, effect of side forces, total and effective stress analysis. Methods of analysis and solution techniques. Mr. Lade (F)

221. Foundation Engineering. (Formerly numbered 285B.) Prerequisites: courses 120, 220, Principles of foundation design, including theory of consolidation, impeded drainage, stress distribution, settlement analysis, allowable bearing capacity for shallow foundations, piles, and footers; laterally loaded shafts. Mr. Lade (W)

222. Soil Dynamics. (Formerly numbered 285C.) Prerequisites: courses 120, 220. Design of foundations for vibrating equipment. Strength and stress-strain relations for soil under cyclic loading conditions. Fundamentals of soils as applied to seismic response of earth structures and foundations. Design of embankments, retaining walls, and foundations for earthquake loading. Mr. Vucetic (Sp)

223. Earth Pressures and Earth Retaining Structures. (Formerly numbered 285D.) Prerequisite: course 120, graduate standing. Basic concepts of theory of earth pressures behind retaining structures, with special application to design of retaining walls, bulkheads, and excavation bracing; effects of flexibility of bulkheads, creep in soils, and construction techniques. Mr. Vucetic (Sp)

224. In-Situ Testing and Foundation Design. Prerequisites: courses 220, and 221 or consent of instructor. Design of in-situ (field) testing to obtain conventional soil strength and compressibility properties. Design of foundation based on in-situ test data. Discussion of SPT, CPT, PTM, and other in-situ methods. Mr. Lade (Sp)

228. Advanced Soil Mechanics Laboratory. (Formerly numbered 285L.) Prerequisites: courses 120, 121, 220, 221. Lectures and laboratory studies of advanced aspects of soil properties and their application to design. Permeability, consolidation, strength testing, pore water pressure measurements, advanced instrumentation and measurement techniques. Preparation of engineering reports. Mr. Lade (Sp)

229. Seminar on Advanced Topics in Soil Mechanics. (Formerly numbered 285F.) Prerequisites: grad- standing in engineering, consent of instructor. Topics may vary each term to cover subjects such as earth dam design, seepage through soils, consolidation, constitutive laws, finite difference and finite element methods with special application in soil mechanics, theories of elasticity and plasticity, and case histories. Mr. Lade (Sp)

M220. Applied Linear Elasticity. (Formerly numbered M256B.) (Same as Mechanical, Aerospace, and Nuclear Engineering 256B.) Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 256A or consent of instructor. Review of general principles. Equations of linear isotropic elastodynamics. Two-dimensional problems. Torsion and bending. Three-dimensional problems. Saint Venant's principles. Elasticity, variational principles. Mr. Mal, Mr. Muki (W)

M231. Inelastic Effects in Structures and Materials. (Formerly numbered M264C.) Prerequisite: course 130 or equivalent or consent of instructor. Analysis of non-linear static and dynamic response of structures. Mathematical and physical theories of plasticity and creep and their basic assumptions. Static and dynamic analysis of inelastic beams, columns, frames, and plates. Localized plastic deformation in material and structure. Mr. Dong (Sp)

M232. Theory of Plates and Shells. (Formerly numbered 264A.) Prerequisite: course 130 or Mechanical, Aerospace, and Nuclear Engineering 156A or consent of instructor. Small and large deformation theories of thin plates; energy methods; free vibrations; membrane theory of shells; axisymmetric deformations of cylindrical and spherical shells, including bending. Mr. Nelson (W)

M233. Mechanics of Composite Material Structures. (Formerly numbered 264D.) Prerequisite: course 130 (or introductory course on linear elasticity or continuum mechanics or consent of instructor) and 232 or equivalent. Review of analysis of stress and strain. Anisotropic and transversely isotropic materials. Analysis of laminated anisotropic plates and shells based on classical and refined theories. Elastodynamic theory of vibrations and waves in laminated anisotropic plates and shells. Analysis of edge effects, joints, and fracture. Failure theories and fatigue for composite materials. Mr. Dong (Sp)

M234. Advanced Topics in Structural Mechanics. (Formerly numbered 265D.) Prerequisites: graduate standing in engineering, consent of instructor. Current topics in composite materials, computational methods, finite element analysis, structural synthesis, nonlinear mechanics, and structural mechanics in general. Topics may vary from term to term.

M235A. Advanced Structural Analysis. (Formerly numbered 265A.) Prerequisite: course 135B. Review of elasticity theory; theorem on virtual work, stationary value of potential and complementary potential; Castigliano's theorems; stiffness, flexibility, and strain energy matrices for truss, beam elements; matrix force and displacement analysis of trusses, frames; introduction to finite element methods.

M235B. Finite Element Analysis of Structures. (Formerly numbered 265B.) Prerequisites: courses 130 and 235A, or consent of instructor. Direct energy formulation techniques for deformable systems; solution methods for linear equations; analysis of structural systems with one-dimensional elements; introduction to variational calculus; discrete element displacement, force, and mixed methods for membrane, plate, shell structures; instability effects.

M235C. Nonlinear Structural Analysis. (Formerly numbered 265C.) Prerequisite: course 235B or consent of instructor. Static and dynamic analysis of non-linear inelastic structures; conservative, nonconservative material behavior; geometric nonlinearities, Lagrangian, Eulerian description of motion; finite element methods in geotechnical nonlinear problems; postbuckling behavior of structures; solution to nonlinear boundary, geometric, iterative, programming methods.

Mr. Nelson (Sp)

M236. Stability of Structures I. (Formerly numbered 266A.) Prerequisite: course 130 or 135B or equivalent. Elastic buckling of bars. Different approaches to instability problems. Inelastic buckling of columns and beam columns. Columns and beam columns with linear, nonlinear, combined torsional and flexural buckling of columns. Buckling of plates. Mr. Schmitt (Sp)

M237A. Dynamics of Structures. (Formerly numbered M269A.) (Same as Mechanical, Aerospace, and Nuclear Engineering M269A.) Prerequisite: course M137. Principles of dynamics. Determination of normal modes and frequencies by differential and integral solution techniques. Transient and steady state response. Emphasis on derivation and solution of governing equations. Mr. Bendiksen, Mr. Dong, Mr. Friedmann (F)

M237C. Introduction to Probabilistic Dynamics. (Formerly numbered M269C.) (Same as Mechanical, Aerospace, and Nuclear Engineering M269C.) Prerequisite: course M137. Response of structural and mechanical systems to random vibrations. Stationary and nonstationary excitations. Response of systems with random parameters. Discrete and continuous linear systems. Applications to earthquakes, wind seismic, and earthquake loads due to gaging inaccuracies, train vibrations.

Mr. Hart (Sp, even years)

M238. Optical Metrology. (Formerly numbered 266A.) Prerequisite: consent of instructor. Study of modern techniques in experimental mechanics, including dimensional analysis and measurement techniques and measurement techniques. Emphasis on techniques of modern optics, photoelasticity, and interferometry. Mr. Himmel (Sp)

M240. Optimum Structural Design. (Formerly numbered M267A.) Prerequisite: course M235 or Mechanical, Aerospace, and Nuclear Engineering 261A or consent of instructor. Synthesis of structural systems and design as applied to load analysis problems; techniques for synthesis and optimization; application to aerospace and civil structures.

Mr. Feit, Mr. Schmitt (W)

Mr. Seina (Sp)

M244. Structural Loads and Safety for Civil Structures. (Formerly numbered 267E.) Prerequisite: course 141 or 142 or 143. Concept of structural safety. Factors of safety and quantification of loads in building codes. Probability of failure and quantification of loads in probabilistic approaches to structural safety. Relationships between factor of safety and probability of failure.

Mr. Seina (W)

M245. Earthquake Engineering. (Formerly numbered 268A) Prerequisite: course M137 or 230 and 235A. Engineering seismology: strong earthquake motion, microtremors, wave velocity and damping, induced vibrations, spectral analysis; earthquake characterization and fault breaks. Site evaluation. Structure-earth system response. Introduction to earthquake resistive design of buildings, bridges, and dams. Theory and field experiments.

Mr. Seina (W)

M246. Structural Response to Ground Motions. (Formerly numbered 268B.) Prerequisite: course M137. Spectral analysis of ground motions: response, time, and Fourier spectra. Response of structures to ground motions due to earthquakes and nuclear explosions. Computational methods to evaluate structural response. Response analysis, including evaluation of contemporary design standards. Limitations due to idealizations.

Mr. Hart, Mr. Seina (Sp)
250A. Surface Water Hydrology. (Formerly numbered 284A.) Prerequisite: course 150 or consent of instructor. In-depth study of surface water components of hydrologic cycle. Instantaneous and unit hydrograph, dynamic wave equations, rainfall-runoff models using system investigation and physical hydrology. Stochastic hydrology: time-series analysis, Markovian streamflow generating models, and generation of multivariate synthetic streamflow applications. Mr. Dracup, Mr. Yeh (W)

251. Water Resources Systems Engineering. (Formerly numbered 284C.) Prerequisite: course 151. Application of mathematical programming techniques to water resources systems. Topics include reservoir regulation, optimal timing, sequencing and sizing of water resources projects, and real-time conjunctive operations of ground and surface water-related systems. Emphasis on mathematical modeling of water quality. Mr. Dracup, Mr. Yeh (Sp)

252. Engineering Economics of Water and Related Natural Resources. (Formerly numbered 284G.) Prerequisite: one or more courses from Economics 1, 2, 100, 101A, and 101B, or consent of instructor. Economic theory and applications in management of water and related natural resources; application of price theory to water resource management, electric power supply, petroleum and natural gas management, and renewable resources; benefit-cost analysis with applications to water resources planning. Mr. Dracup, Mr. Yeh (Sp)

253. Mathematical Models for Water Quality Management. (Formerly numbered 284H.) Prerequisite: course 155 or consent of instructor. Development of mathematical models for water quality control systems. Emphasis on numerical techniques to solve nonlinear partial differential equations arising out of water quality and chemical engineering research. Mr. Stensstrom (W)

254. Aquatic Chemistry. (Formerly numbered 284J.) Lecture, three hours, laboratory, two hours. Prerequisite: course 155. Dilute aqueous solution chemistry of acid/base reactions, precipitation, production and dissolution reactions, and oxidation/reduction reactions, as applied to water and wastewater treatment processes as well as natural and polluted waters. Laboratory experiments. Mr. Elimelech (F)

255. Advanced Water Quality Control Systems I. (Formerly numbered 284K.) Prerequisite: courses 155 and 254 (latter may be taken concurrently), or consent of instructor. Physical, chemical, and biological basis for design of water quality control systems. Properties of water, water quality standards, reaction stoichiometry. Field trip. Mr. Elimelech (W)

255B. Advanced Water Quality Control Systems II. (Formerly numbered 284L.) Prerequisite: course 255A. Physical, chemical, and biological basis of water quality control systems. Principles and design of conventional and advanced water and wastewater treatment systems. Field trip. Mr. Stensstrom (Sp)

258A. Membrane Separations in Aquatic Systems. (Formerly numbered 289A.) Prerequisite: course 254. Applications of membrane separations to desalination, water reclamation, brine disposal, and ultrapure water systems. Discussion of reverse osmosis, ultrafiltration, microfiltration, and exchange technologies for both practical and theoretical standpoint. Mr. Stensstrom (Sp)

259. Selected Topics in Water Resources (2 units). (Formerly numbered 284F.) Prerequisites: graduate standing, consent of instructor. Review of recent research and development in management of water resources. Water and hydroelectric supply systems. Water quality management. Water law and institutions. Economic planning and optimization of water resources development may be repeated once for credit. Mr. Dracup, Mr. Stenstrom (F)

260. Advanced Topics in Hydrology and Water Resources. Lecture, four hours; other, eight hours. Prerequisites: courses 250A, 250B, and 251, or consent of instructor. Current research topics in inverse problems of parameter estimation, experimental design, conjunctive use of surface and groundwater, multivariate water resources planning, and optimization of water resource systems. Topic may vary from term to term. Mr. Yeh (F)

262A. Introduction to Atmospheric Chemistry. (Same as Atmospheric Sciences M203A.) Lecture, three hours. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmospheric chemical processes; air pollution; chemistry and dynamics of air pollution. Mr. Dracup, Mr. Yeh (Sp)

262B. Atmospheric Diffusion and Air Pollution. (Same as Atmospheric Sciences M224B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; population dispersion in urban complexes; chemical and physical factors affecting dispersion; meteorological aspects of air pollution. (Sp)

265. Geohydrochemical Engineering. (Formerly numbered 281.) Prerequisites: course 250B, graduate standing in engineering; permission of instructor. Economic aspects of air pollution. (Sp)

275. Multiattribute Decision Making with Conflict Objectives. (Formerly numbered 274L.) Prerequisite: course 175. Structuring of models for multiattribute decision problems. Theory of quantifying preferences over multiple objectives. Multiattribute utility theory. Structuring of models for conditional strategies under conflict situations. Theory of meta-games and metarationality. Mr. Pearl, Mr. Rubinstein (W)

276. Perspectives of Systems Representation. (Formerly numbered 274K.) Prerequisite: course 275 or consent of instructor. Mathematical and conceptual models used in analysis and synthesis of engineering Sociotechnical systems. Mathematical representations of interpretative models. Decomposition using tools of graph theory and information theory. Growth of models. Models for conditional strategies under conflict situations. Mr. Pearl, Mr. Rubinstein (Sp)

279. Asymptotic Methods. (Formerly numbered M292A.) (Same as Mathematics M274A.) Lecture, three hours. Prerequisites: Chemical Engineering M192A or Mechanical, Aerospace, and Nuclear Engineering M192A, Mathematics 132, or equivalent. Fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase, Watson's lemma, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems. Mr. Muki (F)

296AA-296ZZ. Seminars: Current Topics in Civil Engineering (2 to 4 units). (Formerly numbered 289AA-289ZZ.) Prerequisite: consent of instructor. Lectures, discussions, and student presentations and projects in areas of current interest in civil engineering. May be repeated for credit. S/U grading.

298. Seminar in Engineering (2 to 4 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Field trip. May be repeated once for credit under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Dong (F, W, Sp)

495. Teaching Assistant Training Seminar (2 units). Prerequisite: appointment as teaching assistant in Civil Engineering Department. Seminar on communication of civil engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading. Mr. Dong (Sp)

95A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

95B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

95R. Research and Preparation for M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Supervised independent research with M.S. candidates, including thesis prospectus. S/U grading.

599. Research and Preparation for Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

737. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Dong (W)
The School of Engineering and Applied Science offers M.S. and Ph.D. degrees in Computer Science, as well as minor fields for graduate students seeking engineering degrees. The John E. Anderson Graduate School of Management and the Computer Science Department offer a concurrent degree program which enables students to obtain the M.S. in Computer Science and the M.B.A. (Master of Business Administration).

Bachelor of Science in Computer Science and Engineering

The ABET-accredited computer science and engineering curriculum at UCLA provides the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. This curriculum has major components from the Computer Science and Electrical Engineering Departments. Within the curriculum students study all aspects of computer systems from electronic design, based on solid-state physics concepts, through logic design, integrated circuit selection and design, MSI, LSI, and VLSI concepts and device utilization, machine language design, implementation and programming, operating system concepts, system programming, higher-level language skills, and application of these systems. Students are prepared for employment in the high-technology industries which interface with information and digital systems.

The Major

Course requirements are as follows (187 minimum units required):

(1) Five core courses: Computer Science 11, 12, 13, 30, Electrical Engineering 103.
(2) Computer Science 111 or 130, 131, 141, 151A, 151B, 181; Electrical Engineering 10, 102, 110, 115A, 115C; eight laboratory units (Computer Science 152A, 152B, 171L, and Electrical Engineering 100L); Civil Engineering 106A (satisfies the engineering economics requirement — Economics 101A or 102 or 111 is also acceptable); one probability and statistics course selected from Statistics M152A, Electrical Engineering 131A, or Computer Science 112.
(3) Three elective courses from Computer Science 111 through C196L or Electrical Engineering 116, 121A, or 123A. Course 199 may normally be taken only as a free elective; however, you may petition for exceptions in extraordinary situations.
(4) English 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Chemistry and Biochemistry 11A.
(5) Seven courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement).
(6) Three free elective courses.

Bachelor of Science in Computer Science

The computer science curriculum is a newly approved program of study at UCLA designed to accommodate students who want full professional preparation in computer science but do not have a strong interest in computer systems hardware. The curriculum consists of major components in computer science, a minor or technical support area, and a core of courses from the social sciences, life sciences, and humanities. Within the curriculum, you study subject matter in software engineering, principles of programming languages, data structures, computer architecture, theory of computation and formal languages, operating systems, computer modeling, compiler construction, and artificial intelligence. Majors are prepared for employment in a wide range of industrial and business environments.

The Major

Course requirements are as follows (187 minimum units required):

(1) Four core courses: Computer Science 11, 12, 13, 30.
(2) Computer Science 111, 112, 130, 131, 132, 141, 151A, 151B, 161, 181; Mathematics 141A or Electrical Engineering 103; four laboratory units (Computer Science 152A, 152B); one upper division probability course selected from an approved list.
(3) Two elective upper division computer science courses (an optional senior honors thesis may be used to satisfy one of these courses).
(4) A minor or technical support area composed of a coherent group of three upper division courses selected from an approved list of fields and course combinations.
(5) English 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 8A/8AL, 8B/8BL, 8C/8CL.
(6) Four humanities courses, four social sciences courses, and two life sciences courses selected from an approved list for this curriculum.
(7) Three free elective courses.

Graduate Study

For information on graduate admission to the computer science program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.
Computer Science Breadth Requirement

Candidates for the M.S. or Ph.D. degree in Computer Science must satisfy the computer science breadth requirement by the end of the fourth term in graduate residence at UCLA. This requirement is satisfied by mastering the contents of six undergraduate courses in computer science selected from the following two groups:

Group 1 (four required courses or equivalent)

Group 2 (two required courses or equivalent)

— Computer Science 111, 112, 131 or 132, 161 or 163 or 168, 171 or 174, 170 or 172 or 173 or 270A.

Competence in any or all courses may be demonstrated by one of three methods:

1. Satisfactory completion of the course at UCLA with a grade of B− or better.
2. Satisfactory completion of an equivalent course at another university with a grade of B− or better.
3. Satisfactory completion of a final examination in the courses at UCLA.

In addition, for each degree students must complete at least one Computer Science 201 course per term with a grade of Satisfaction.

M.B.A./M.S.-Computer Science

The Department of Computer Science in the School of Engineering and Applied Science and the John E. Anderson Graduate School of Management offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. (Master of Business Administration) in three academic years. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Department of Computer Science.

Lower Division Courses

1. Principles of Computer Science
   Lecture, four hours; laboratory, two hours; other, six hours. Not open for credit to computer science majors. Introduction to fundamental scientific principles of computation. Programming in LISP. Systems software, including interpreters, and operating systems. Computer hardware design and implementation. Theory of computation, including computability and complexity. Applications, including artificial intelligence and scientific computing.

   Mr. Kay (W)

2. Computer Literacy and Appreciation
   Lecture, three hours; laboratory, one hour. Introduction to computers for students without prior experience. Survey of computer technology, computer applications, and how machines represent and process information. Insight into development, power, limitations, and social impact of modern computer systems.

   Mr. Kay; Mr. Levine (Sum)

Upper Division Courses

111. Operating Systems Principles
   Lecture, four hours; laboratory, two hours. Prerequisites: courses 30, 141. Introduction to design and performance evaluation of modern operating systems. Mapping and binding of addresses. Organization of multiprocessor and multiprocessing systems; interrupts, process model, and interlocks. Resource allocation models and problem of deadlocks. Scheduling, synchronization, memory management, virtual memory I/O control, file systems.

   Mr. Jefferson; Mr. Muntz (Wsp)

112. Computer System Modeling Fundamentals
   Prerequisite: upper division standing. Basic tools necessary for the pedagogical use of richly-featured and distributed computer systems, including such topics as sets, combinatorics, generating functions, probability theory, transforms, Markov chains, baby queueing theory, costing and pricing, network optimization. Presentation of this set of tools in a fashion that is rich with examples from computer systems field.

   Mr. Kleinnrock (Fsp)

118. Computer Network Fundamentals
   Lecture, four hours; discussion, two hours. Prerequisites: upper division standing. Development of functions required to operate computer communications networks. Development of methodology for implementing these functions in procedures called protocols. Organization around ISO-OSI “seven-layer” architecture with review of each layer. Specific functions defined and available alternatives studied. Presentation of several applications and case studies based on existing public and private networks.

   Mr. Gerla, Mr. Kleinnrock (F)

130. Software Engineering
   Lecture, four hours; laboratory, two hours. Prerequisites: courses 11, 12, 13 or equivalent. Structured programming, program specifications, program proving, modules, control data types, programming languages. Software tools, software control systems, program testing, team programming.

   Mr. Bagrodia (Sp)

131. Programming Languages
   Lecture, four hours; laboratory, two hours. Prerequisites: courses 12, 13, 15, 30, 132, 134. Study, comparison, and evaluation of alternative strategies and languages for language specification, description, data control, program modularity, instruction sequencing, and language implementations. Use of a few languages selected from FORTRAN 77, ADA, SNOC, FORTRAN 90, LISP, MODULA 2, and PROLOG to illustrate particular implementations of some of above features.

   Mr. Bagrodia, Mr. Jefferson (Wsp)

132. Compiler Construction
   Lecture, four hours; recitation, two hours. Prerequisites: courses 12, 14, 15, 181. Compiler structure, lexical and syntactic analysis, semantic analysis and code generation, theory of parsing.

   Mr. Bagrodia, Mr. Martin (W)

141. Basic Methods of Data Organization
   Lecture, four hours; laboratory, two hours. Prerequisites: courses 12 and 13, or consent of instructor. Fundamental techniques for organizing and manipulating data, stressing relationships to performance, time/storage trade-offs. Sequential and linked storage allocation for linear and tree structures. Implementations of data structures, implementation, traversals, mathematical properties. Graphs and networks: memory representation, algorithms. Dynamic storage allocation. External storage devices. Data base concepts and applications. Recursive data structures, sorting-searching, algorithmic analysis, graph theory, concepts underlying file management.

   Mr. Cardenas; Mr. Gerla (Fsp)

151A. Computer Architecture I
   Lecture, four hours; recitation, two hours. Prerequisites: course 10C or 11, Physics BC. Introduction to digital systems. Specification and implementation of combinational and sequential circuits. SSI/MOS/LSI standard modules and their use in digital systems. Specification and implementation of algorithmic systems. Models for data and control systems. Hardware and microprogrammed approaches. Arithmetic algorithms and their implementation.

   Mr. Avizienis; Mr. Eroegovac; Mr. Lang, Mr. Levine (F, Wsp)

151B. Computer Systems Architecture II (Intermediate)
   Lecture, four hours; discussion, two hours. Prerequisites: course 151A. Recommended: courses 30, 152A. Machine organization and design, formal description, comparative study of machine instruction sets and formats, data representation and floating point, addressing structures, mechanism of procedure calls, memory organization and management, microprogramming, I/O processing and interrupts, and reliability aspects.

   Mr. Levine, Mr. Rennels, Mr. Tamir (Wsp)
151C. Design of Digital Systems. Prerequisites: courses 151A, 151B, 152A. Design of complex digital systems using hierarchical, modular Mentor-aided design tools for system design and simulation, implementation of complex circuits using programmed array logic, design projects.

Mr. Lang, Mr. Rennells (W;Sp)

152A. Introductory Design Laboratory (2 units). Laboratory, four hours. Prerequisite: course 151A. Hands-on design, implementation, and debug of digital logic circuits, use of computer-aided design tools, design for testability, use of the 91200 and the Mentor-aided simulation tools. Laboratory, four hours. Prerequisite: courses 152A, 171 (may be taken concurrently). Tests and measurements of digital and analog signals and systems as encountered in analysis, on-line computer-aided telecommunication facility, terminals, microprocessors, interfaces, and standards (e.g., RS 232, IEEE 488). May be repeated for credit with consent of instructor.

Mr. Carlyle, Mr. Karpus (F;Sp)

Mr. Aoki, Mr. McNamee (W)

174. Elements of Computer Graphics. Lecture, two hours; laboratory, two hours. Prerequisite: course 141 or consent of instructor. Hardware and software elements of computer graphics systems. Graphics languages. Graphic workstations and specialized I/O devices. Design and development of interactive graphics programs.

Mr. Dyer, Mr. Korf (F;Sp)

180. Introduction to Algorithms and Complexity. Lecture, four hours; discussion, two hours; other, six hours. Prerequisites: Mathematics 33B, 61, junior standing in computer science. Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy method, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures; relationships, statistical errors, coherence functions, data acquisition, and processing techniques.

Ms. Greibach, Mr. Kahng, Mr. Parker (W)

181. Introduction to Formal Languages and Automata Theory. Lecture, four hours; discussion, two hours. Prerequisites: Mathematics 61, and senior standing in computer science or consent of instructor. Grammars, automata, and languages. Finite-state languages and finite-state automata. Context-free languages and pushdown automata. Unrestricted rewriting systems, regular languages, Turing machines. Observa-

Mr. Dyer, Mr. Korf (W)

168. Vision in Man and Machine. Lecture, four hours; discussion, two hours; other, six hours. Prerequisites: courses 161 and 170, or consent of instructor. Use of computational aspects of processing visual information to present a unified treatment of early vision, allowing transfer of concepts from analysis of visual stimuli to analysis of the processing of signals in communication devices. Observation, experimentation with biological and electronic systems. Use of artificial intelligence techniques. Their organization into data structures and processing by dedicated computing architectures. Issues in image segmentation based on aggregation of feature descriptions.

Mr. Carlyle, Mr. Skrzypek (W)

168L. Computer Vision Laboratory (2 to 4 units). Laboratory, eight hours. Prerequisites: course 168, senior standing, consent of instructor. Image acquisition, storage, processing, and analysis. Design and implementation of algorithms for low-level vision. Experiments in motion, texture, color, edge detection, binary and gray-level images. Scheme-based personal computer vision station. 

Mr. Carlyle, Mr. Skrzypek

170. Basic Methodologies for Computer Modeling and Analysis of Dynamic Systems. Prerequisites: Mathematics 33A, 33B. Introduction to computer-oriented techniques for modeling and analysis of systems which evolve with time, such as mechanical, electrical, or non-electrical engineering examples. Linearity, impulse responses, stability, state variables, algorithms for filtering and control.

Mr. Aoki, Mr. Carlyle, Mr. DiStefano

171. Real-Time Computer Systems. Prerequisite: senior standing or consent of instructor. Survey of fundamentals, with emphasis on hardware and systems concepts. Adapting digital computers to interfaces, including multiprogramming, bus structure, interrupt, and time-sharing considerations. Digital communication, remote consoles, sampling, quantizing, multiplexing, analog-digital conversion, and data reconstruction.

Mr. Karpus, Mr. Levine (F)

171L. Real-Time Systems Laboratory (2 to 4 units). Laboratory, four to eight hours. Prerequisites: senior standing, consent of instructor. Recommended: courses 152A, 171 (may be taken concurrently). Tests and measurements of digital and analog signals and systems as encountered in data acquisition, on-line computing, telecommunication facility, terminals, microprocessors, interfaces, and standards (e.g., RS 232, IEEE 488). May be repeated for credit with consent of instructor.

Mr. Carlyle, Mr. Karpus (F;Sp)

199. Special Studies (2 to 8 units). Prerequisites: upper division standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member; laboratory, two to four hours. Prerequisites: course M196B, consent of instructor. Interdisciplinary experimental laboratory techniques. Care, use, and design of laboratory instrumentation. Specialized use of hardware, software, and computers. Laboratory automation. Comprehensive experimental design, including simulation. Radioactive isotope use and safety. Experimental animals, controls, and kinetic stimulus-response experiments. Concurrently scheduled with course C296L.

Mr. DiStefano (Sp)

Graduate Courses

201A-201B-201C. Computer Science Seminars (2 units each). (Formerly numbered 201.) Prerequisite: graduate standing in computer science. Lectures on current research topics in computer science. May be repeated for credit. In Progress and S U grading.

Mr. Estrin (F;Sp)

202. Advanced Computer Science Seminar. Prerequisite: completion of major field examination in computer science or consent of instructor. Current computer science research problems and techniques, methodology, and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original pieces of work in the specialized area. May be repeated for credit.

Mr. Estrin (F;Sp)

209AA-209ZZ. Research Seminars in Computer Science (2 to 4 units each). Prerequisite: consent of instructor. Discussion of advanced topics and current research in algorithmic processes that describe and transform information: theory, analysis, design, efficiency, implementation, and application. May be repeated for credit. S/U grading.

Mr. Kleinrock (W)

Mr. Kleinrock, Mr. Munz (W)

214. Data Transmission in Computer Communications. Prerequisites: course 112; graduate standing in computer science. Discrete data streams; error rates, transductions; digital data transmissions via analog signaling in computer communication; media characteristics, systems methodologies, performance analysis; modulation, demodulation, propagation effects; digital transmission systems — physical layers in computer communication links; national/international standards; tests and measurements.

Mr. Carlyle
215. Computer Communications and Networks. Prerequisite: course 112. Resource sharing, computer traffic characteristics, multiplexing, network structure; packet switching and other switching techniques; ARPANET and other computer network examples; network delay and analysis; network design and optimization; network protocols; network control; serial and ground radio packet switching; local networks; commercial network services and architectures. Optional topics include extended error control techniques; network protocol simulation; computer networks and their use in architecture design. Mr. Chu, Mr. Kleinrock (F,Sp)

216. Distributed Multiaccess Control in Networks. Prerequisite: discussion of "Distributed". Topical development of field of distributed control and access to computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and control. Mr. Kleinrock (Sp)

219. Current Topics in Computer System Model- ing. Prerequisite: consent of instructor. Review of current literature in an area of computer system modeling in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. Mr. N. 2.1 Economics of Computers. Prerequisite: consent of instructor. Basic economic factors in data processing. Buyers and sellers; products; applications; major cost factors. Selection and orientation of computer processing system. Mr. Melkanoff (even years)

222. Control and Coordination in Economics. (Same as Economics 222A.) Lecture, three hours. Prerequisite: graduate standing in economics or engineering or consent of instructor. Recommended: appropriate mathematics course. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalent control; decision making under learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading. Mr. Aoki

231A. Advanced Topics in Programming Lan- guages. Prerequisite: course 131. Presentation, analysis, discussion of "Distributed". Topical developing field of distributed control and access to computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and control. Mr. Melkanoff (odd years)

231B. Advanced Topics in Computer Language Design. Prerequisite: courses 132, 141, 143, 151, 232A, 232B. Treatment of current topics in computer language, including design goals of modern languages, levels of abstraction, methodologies for standardization, and proposals for new problem-oriented and external characteristics. Enrolment limited to students with individual application of language design principles. Mr. Melkanoff

232A. Operational Semantics of Programming Languages. Prerequisites: courses 131, 181 (may be taken concurrently). Interpreter models of program execution. Control flow graphs, denotational semantics of languages. Implementation of language semantics; information structure adjustment. Mr. Martin

232B. Languages of Programming Languages. Prerequisites: courses 131, 181. Network structure: packet switching and other switching techniques; ARPANET and other computer network examples; network delay and analysis; network design and optimization; network protocols; network control; serial and ground radio packet switching; local networks; commercial network services and architectures. Optional topics include extended error control techniques; network protocol simulation; computer networks and their use in architecture design. Mr. chu, Mr. Kleinrock (F,Sp)

233. Correctness Proofs. Prerequisite: consent of instructor. Theoretical and practical aspects of correctness proofs. Partial correctness, total correctness, and termination. Axiomatic semantics and proof systems. Abstraction and correctness of implementations. Formulation, execution, and assessment of correctness proofs. Topics of current research interest. Mr. Martin

234C. High-Level Language Computer Architec- ture. Prerequisites: courses 131, 232A or 232B. Study of machine architectures to facilitate direct or register memory access, parallelism, and use of microinstructions. Exploration of microprogramming and microprogrammable machines, measurements and their use in architecture design. Mr. Aoki

239. Current Topics in Computer Science: Programming Languages and Systems (2 to 12 units). Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer science programming languages and systems in which instructor has developed special proficiency as a consequence of research interests. May be repeated for credit with topic change. (F,WSp)

241A. Data Management Systems (6 units). Lecture, four hours; laboratory, two hours. Prerequisites: courses 131, 141, or equivalent. File management in programming languages, storage devices, and operating systems. Secondary index organizations. Data base systems architecture, design, and models (network, hierarchical, and relational). Logical and physical structures. Query languages. Commercial data base systems. Data base design, performance, security, and integrity. Mr. Cardenas (F)

241B. Data Base, Software, and Information Sys- tems (6 units). Prerequisites: courses 131 and 141 to 12 units. Lectures, four hours. Prerequisite: consent of instructor. Design, implementation, and management of information systems. Application development methodology. Logical and physical design. Query languages. Commercial data base systems. Data base design, performance, security, and integrity. Mr. Cardenas (W)

242A. Privacy and Security in Computer Informa- tion Systems. Prerequisite: course 111 or consent of instructor. Analysis of technical difficulties of producing secure computer information systems that provide guaranteed controlled sharing, with emphasis on software models and design. Examination and critique of current systems and practices. Possible certifiability of such systems. Relevant social issues.

242A. Relational Data Bases. Prerequisites: courses 131, 141. Relational model: data definition and operations; relational languages. Relational data bases: experimental and commercial; design methodology. Mr. Parker (W)

243B. Abstract Data Types and Program Specifi- cation. Prerequisites: courses 141, 181. Notions of abstract data type and abstract program specification permit one to understand how programs manipulate data, independently of their implementations. These notions also give powerful techniques for program structuring and verification. Programming of correct programs. Mr. Martin

249. Current Topics in Data Structures (2 to 12 units). Prerequisite: consent of instructor. Review of current literature in an area of data structures in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. (F,W,Sp)

252A. Computer System Design: Arithmetic Pro- cessors. Prerequisite: course 214A or consent of instructor. Concepts of number systems, digital numbers, algorithms; logic and organization of digital arithmetic processors; conventional arithmetic; algorithmic and bit-oriented organization and operation of arithmetic; redundant, signed-digit, residue number systems; error detecting codes for digital arithmetic; algorithm evaluation by analysis and simulation. Mr. Avizienis, Mr. Ercegovac, Mr. Lang (W)

252B. Advanced Topics in Fault-Tolerant Comput- ing. Prerequisite: course 253A. Analysis and discussion of modeling, design, and evaluation of fault-tolerant computer systems. Emphasis on current research results and new systems in stages of design and development. May be repeated for credit with topic change. Mr. Avizienis, Mr. Rennels (Sp)

254A. Computer Memories and Memory Systems. Prerequisite: course 215A or consent of instructor. Generic types of memory systems; control, access modes, hierarchies, and allocation algorithms. Characteristics of systems and techniques for design and development of computer memories. Mr. Avizienis, Mr. Rennels (Sp)

255A. Principles and Examples of Architectures for VLSI System Design. Prerequisite: course 241A or 241B. Architecture, optimization, implementation, and interconnection of complex digital structures. Task partitioning and allocation, precedence relationship, response time models, microprocessor-based distributed processing system, system reconfiguration, error recovery, file allocation, directory design, deadlock, synchronization, commit protocols, query optimization, data translation. Examples, design, and trade-offs. Mr. Chu (W)

255A. Advanced Computer Architecture. Prerequisites: courses 111, 121A, and 151B, or consent of instructor. Functional and structural analysis of computer systems. Architecture and organization at microprogramming, machine language, and operating system level. Processor organization and system control. Architecture and organization of computer systems. Effect of sequencing mechanisms, granularity, coupling, and locality. Organizations of control, memory, interconnection, and processing elements. Evaluation of execution, and assessment of system organization and performance of vector computers, array computers, loop-level multiprocessors, process-level multiprocessors, and dataflow computers. Mr. Ercegovac, Mr. Lang (Sp)

256. Principles and Examples of Architectures for VLSI System Design. Prerequisite: course 214A or 214B. Architecture, optimization, implementation, and interconnection of complex digital structures. Task partitioning and allocation, precedence relationship, response time models, microprocessor-based distributed processing system, system reconfiguration, error recovery, file allocation, directory design, deadlock, synchronization, commit protocols, query optimization, data translation. Examples, design, and trade-offs. Mr. Chu (W)

257. Computer System Design: Fault Tolerance. Prerequisite: course 214A or 214B. Architecture, optimization, implementation, and interconnection of complex digital structures. Task partitioning and allocation, precedence relationship, response time models, microprocessor-based distributed processing system, system reconfiguration, error recovery, file allocation, directory design, deadlock, synchronization, commit protocols, query optimization, data translation. Examples, design, and trade-offs. Mr. Chu (W)
258A. LSI in Computer System Design. (Same as Electrical Engineering 2516A.) Lecture, four hours; laboratory, four hours. Prerequisites: graduate standing in computer science or electrical engineering, consent of instructor. LSI/VLSI design and application in computer systems. Fundamentals of design techniques that can be used to implement complex integrated systems on a single chip. Emphasis on computer-aided design and implementation of VLSI design tools. In Progress grading.

Mr. Rennels (W, M258B; Sp, M258C)

258D. VLSI CAD Techniques. Prerequisite: graduate standing in computer science or electrical engineering or consent of instructor. In-depth analysis of VLSI design techniques, including building block layout, placement and routing algorithms, simulation, design verification and timing, analog/digital design synthesis, testing, silicon compilation, expert system applications, and automatic performance optimization.

Mr. McNamara

259. Current Topics in Computer Science: System Design/Architecture. (2 to 12). Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer science system design in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

(F.W,Sp)

261A. Problem Solving and Search. (Formerly numbered 277A.) Prerequisites: course 141, programming experience in higher-level language, graduate standing. Examination of major families of problem-solving techniques, and of the heuristics involved in the development of programs that can be used for solving problems. Emphasis on mathematical rigor and complexity analysis of search algorithms.

Mr. Korf (F)

262A. Reasoning with Partial Beliefs. (Formerly numbered 274A.) Prerequisite: course 112 or Electrical Engineering 101A Or equivalent. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesan inference using belief networks representation.

Mr. Pear (F)

262B. Knowledge-Based Systems. (Formerly numbered 274B.) Prerequisite: course 262A. Maple representation of judgmental knowledge and uncertain relationships. Inference on inexact knowledge bases, rule-based systems — principles, advantages, and limitations. Heuristic search techniques. Automated planning systems. Knowledge acquisition and explanation producing techniques.

Mr. Pearl

262C. Computer Methods of Data Analysis and Model Formation. (Formerly numbered 274C.) Prerequisites: course 112 or equivalent consent of instructor. Techniques of using computers to interpret, summarize, and form theories of empirical observations. Mathematical analysis of trade-offs between computational complexity, storage requirements, and precision in inference tasks. Application of these techniques to the implementation of expert systems.

Mr. Pearl

262Z. Current Topics in Cognitive Systems. (Formerly numbered 274Z.) Prerequisites: course 262A, consent of instructor, additional prerequisites for each offering as announced in advance by department. Theory, design, and implementation of intelligent systems that can represent or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, decision support systems, computer vision, and machine learning. Conceptual design and implementation of intelligent systems may be repeated for credit with topic change.

Mr. Pearl (W)

Mr. Dyer (F or W)

263B. Language and Memory. Prerequisites: course 263A, knowledge of LISP or PROLOG. Recommended: course 264A. Advanced natural language processing emphasizing on organization of human memory for language comprehension. Episodic and semantic memory. Subjective understanding and modeling ideograms. Emphasis on organizational principles in memory during comprehension. Cross-contextual re-memding and thematic abstraction.

Mr. Dyer (F or W)

264A. Artificial Intelligence Programming I. Prerequisite: consent of instructor. Recommended: knowledge of LISP or PROLOG. Introduction to tools, techniques, and issues in artificial intelligence programming. Functional programming for artificial intelligence applications. Review of LISP and introduction to Haskell. Functional LISP (e.g., T, Scheme). Lambda calculus, closures, data-driven and object-oriented programming, flavors, d-nets, resolution-based deductive systems.

Mr. Dyer (F or W)

264B. Artificial Intelligence Programming II. Prerequisite: course 264A or consent of instructor. Advanced techniques of logic programming. Artificial intelligence programming languages (e.g., PROLOG, AMORD, DUCK, CONNIVER, PLANNER, QA4, KRL, ACTORS, etc.) and artificial intelligence features (e.g., nonmonotic logics, data-dependencies for truth maintenance, metarules, semantic networks, frame-based systems).

Mr. Dyer (F or W)

Mr. Dyer (W or Sp)

267A. Neural Models. (Formerly numbered 275A.) Prerequisites: graduate standing, consent of instructor. Review of major neurophysiological milestones in understanding neuronal and neural system behavior. Emphasis on brain theories that are important for modern computer science and, in particular, on models of sensory perception, sensory-motor coordination, and cerebellar and cerebral structures and function. Students required to prepare a paper analyzing research in one area of interest.

Mr. Vidal (W)

267B. Artificial Neural Systems and Connectionist Computing. Prerequisites: graduate standing, consent of instructor. Analysis of major connectionist computing paradigms and underlying models of biological and physical processes. Examination of past and current implementations of artificial neural networks along with their applications to associative knowledge processing, generalization, and segregation learning. Fast and adaptive robot control. Students required to prepare a paper analyzing research in one area of interest.

Mr. Vidal (Sp)

Mr. Skrzypek (W)

268S. Seminar in Computational Neuroscience (2 units). Prerequisite: consent of instructor. Intended for students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as a paradigm for parallel and concurrent computation in application to problems of perception, vision, multimodal sensory integration, and robotics. May be repeated for credit. S/U grading.

Mr. Skrzypek (W or Sp)

269. Seminar: Current Topics in Artificial Intelligence (2 to 4 units). Prerequisite: consent of instructor. Review of current literature and research progress in an area of artificial intelligence in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

(F.W,Sp)

270A. Computer Methodology: Advanced Numerical Methods. Prerequisites: graduate standing in computer science or engineering. Electrical Engineering 103A or equivalent. May be repeated for credit with topic change. Principles of computer treatment of selected numerical problems in algebraic and differential systems, transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to numerical analysis and computational algorithms, development of special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

Mr. Carlisle, Mr. Karpul (F, Sp)

Mr. Karpul (Sp)

271C. Seminar in Advanced Simulation Methods (2 to 6 units). Prerequisites: consent of instructor. Discussion of advanced topics in simulation of systems characterized by ordinary and partial differential equations. Topics include (among others) simulation languages, dataflow machines, array processors, and advanced mathematical modeling techniques. Topics vary each term. May be repeated for credit. S/U grading.

Mr. Karpul (W, Sp)

272A. Digital Computer Modelling and Analysis of Dynamic Data Sources. Prerequisite: course 170 or equivalent or other introductory systems course or consent of instructor. Development of digital computer algorithms for interactive modeling of dynamic data sources and analytical tools for sequential decision making in time-variant, cause-effect representations of empirical and perhaps nonstationary data generated by such data sources.

Mr. Aoki

272B. Analytical and Computational Methods for Modeling and Optimization of Dynamic Systems. Prerequisite: course 170 or equivalent. Recommended: intermediate-level knowledge of linear algebra. Development of analytical and computer-aided analysis and design tools for modeling, decision analysis, and optimization of dynamic systems. Linear and nonlinear system methods, model selection and simplification, sensitivity analysis, least squares and Kalman filtering, and optimal control algorithms.

Mr. Aoki, Mr. DiStefano (W)

276A. Pattern Analysis and Machine Intelligence. Prerequisites: graduate standing, consent of instructor. Fundamentals of pattern recognition, feature extraction and selection, autonomous learning, clustering, and machine intelligence. Mr. Klinger

276B. Structured Computer Vision. Prerequisites: graduate standing, consent of instructor. Methods for computer processing of image data. System concepts, and algorithms for image analysis, radiologic and robotic applications. Mr. Klinger

276C. Speech and Language Communication in Artificial Intelligence. Prerequisite: course 276A or 276B or consent of instructor. Topics in human-computer communication: interaction with pictorial information systems, sound and symbol generation by humans and machines, semantics of data, systems for speech and text for computer input and output in applications. May be repeated for credit with topic change.

Ms. Greibach (F, W, Sp)

278A-280ZZ. Algorithms. Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Selections from current literature in an area of computer science methodology in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

280A-280ZZ. Algorithms. Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Selections from current literature in an area of computer science methodology in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

Ms. Greibach (F, W, Sp)

281A. Computability and Complexity. Prerequisite: course 181 or compatible background. Concepts fundamental to the study of computable processes and of the complexity and generality of algorithms; computational complexity and generality of algorithms; algorithms for particular application areas. Subtitles of some current sections: Principles of Design and Analysis (280A); Graphs and Networks (280C). May be repeated for credit with consent of instructor and with topic change.

Mr. Carlyle

284A-284ZZ. Topics in Automata and Languages. Prerequisites: course 181, additional prerequisites for each offering as announced in advance by department. Selections from current literature, formal languages, grammars, machines, operators; pushdown automata, context-free languages and their generalizations, parsing; multidimensional grammars, developmental systems, machine-independent complexity, undecidability of general problems, "easy" and "hard" problems.

Ms. Greibach, Mr. Parker (Sp)

287D. Discrete State Systems. Prerequisite: consent of instructor. Recommended: course 181. Finite-state machines, transducers, and their generalizations; regular expressions, transduction expressions, realizability; decomposition, synthesis, and design considerations; topics in state and system identification and fault diagnosis, linear machines, probabilistic machines, applications in coding, communication, computing, system modeling, and simulation.

Mr. Carlyle

288S. Seminar in Theoretical Computer Science (2 units). Prerequisites: courses 280A, 281A, consent of instructor. Independent research. Discussion of advanced topics and current research in such areas as algorithms and complexity models for parallel and concurrent computation, and formal language and automata theory. May be repeated for credit. S/U grading.

Mr. Greibach (F, W, Sp)

289A-289ZZ. Current Topics in Computer Theory (2 to 12 units each). Prerequisite: consent of instructor. Review of current literature in an area of computer theory in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics.

Ms. Greibach (F, W, Sp)

296A. Modeling Methodology for Biomedical Systems. (Formerly numbered M270C.) (Same as Medicine M270C.) Prerequisite: course 170 or Electrical Engineering 142 or Mathematics 115A or Mechanical, Aerospace, and Nuclear Engineering 171C or equivalent. Foundations of multicompartmental, noncompartmental, and dynamic systems modeling methods. Special emphasis on their applications and limitations in biomedical sciences and other limited data environments. Models for experiment design, data analysis, basic studies of mechanism, and control theory of biomedical processes. Model parameter estimation algorithms.

Mr. DiStefano (F)

296B. Optimal Experiment Design and Control for Biological and Other Dynamic Systems. (Formerly numbered M270D.) (Same as Biocomputational Medicine 270D.) Prerequisites: courses 272B and 296A, or consent of instructor. Theory and algorithms for designing optimal experiments for quantifying or optimal inputs for controlling dynamic systems in biocomputational medicine. Optimal sampling schedules for parameter estimation. Control optimization and variations for designing optimal test-inputs. Algorithms, software, and applications in medicine and engineering.

Mr. diStefano (W)

296C. Advanced Topics and Research in Biocybernetics. (Formerly numbered M270E.) (Same as Medicine M270E.) Prerequisite: course M296A or consent of instructor. Recommended: course M296B. Research techniques and experience on special topics involving models, modeling methods, or experiments in biomedical and biological sciences. Review and critique of the literature. Research problem formulation, Solution methods. Individual student projects. M.S. and Ph.D. theses.

Mr. DiStefano (Sp)

C296L. Biocybernetics Research Laboratory (2 to 4 units). (Formerly numbered C270L) Lecture, one to two hours; discussion, one to two hours; laboratory, two to four hours. Prerequisites: course M196B, consent of instructor. Interdisciplinary experimental laboratory techniques. Care, use, and design of laboratory instrumentation. Specialized research hardware, software, and computers. Laboratory automation. Comprehensive experimental design, including simulation, radioactive isotope use and safety. Experimental animals, controls, and kinetic stimulus-response experiments. Concurrently scheduled with course C196L.

Mr. Carson

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Mr. Chu (F, W, Sp)

495. Teaching Assistant Training Seminar (2 units). Prerequisite: graduate standing in Computer Science Department. Seminar on communication of computer science materials in classroom: preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

Mr. Klinger

599. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in computer science, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisites: graduate standing in computer science, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in computer science, consent of instructor. Preparation for Ph.D. oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisite: graduate standing in computer science, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in computer science, consent of instructor. Petition forms to request enrollment may be obtained from the Assistant Dean, Graduate Studies. S/U grading.

For details on this undergraduate program, see Chapter 5 on the College of Letters and Science.
Bachelor of Science in Electrical Engineering

The ABET-accredited electrical engineering curriculum gives an excellent background for either graduate study or employment. The two main objectives are to provide (1) a deep and fundamental education in electrical engineering as well as in basic sciences and mathematics and (2) specialized education in one branch of electrical engineering so that the student develops expertise in it.

Students officially admitted to the electrical engineering major for Fall Quarter 1988 and thereafter must fulfill the following requirements. Continuing students admitted prior to Fall Quarter 1988 and following a program in an earlier UCLA General Catalog may change to the program listed below.

The Major

Course requirements are as follows (190 minimum units required):

1. Five core courses: Electrical Engineering 101, 102, 103, and two courses from Materials Science and Engineering 14, Civil Engineering 108, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A (or Chemical Engineering M105A). 105D.

2. Electrical Engineering 10, 110, 115A, 121A, 121B, 132A, 141, 161, Computer Science 151A; four two-unit courses selected from the laboratory courses offered by the Electrical Engineering Department, Computer Science 152B and, by petition only, Electrical Engineering 199; Mechanical, Aerospace, and Nuclear Engineering M192A and either Electrical Engineering 131A or a course in statistical mechanics; Mathematics 132.

3. Any five major field elective courses (20 units) selected from those offered by the Electrical Engineering Department. With approval of the adviser, two may be selected from courses related to electrical engineering in other departments.

4. English 3; Chemistry and Biochemistry 11A, 11B/11BL; Computer Science 10C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

5. Four courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement) AND three courses from History 1A, 1B, 1C, Humanities 1A, 1B, 1C, 2A, 2B, 2C (selection of a course in the Humanities 2 sequence precludes the corresponding course in the Humanities 1 sequence and vice versa; courses must be completed within the first 90 units). English 3 may be replaced with a second free elective if one of the courses in the Humanities 2 sequence is selected.

6. One free elective course from any department, selected by the student in consultation with the adviser to supplement and strengthen the major field electives.

Graduate Study

For information on graduate admission to the electrical engineering program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

Lower Division Course

Mr. Luhmann (F,W,Sp)

Upper Division Courses

100. Electrical and Electronic Circuits. Lecture, four hours; recitation, one hour. Prerequisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 8C. Electrical quantities, circuit principles, signal waveforms, AC circuits, semiconductor devices, small signal models, amplifiers, electrical and electronic instruments.

Mr. Samueli (F,W,Sp)

100L. Circuit Analysis Laboratory (2 units). Laboratory, four hours. Prerequisite or corequisite: course 100 or 115A. Experiments with circuits containing linear and nonlinear devices; transient and steady state behavior of circuits.

Mr. Samueli (F,W,Sp)

101. Engineering Electromagnetics. Lecture, four hours; recitation, one hour. Prerequisites: Physics 8C, Mathematics 32A and 32B, or 33A and 33B. Electromagnetic field concepts; Maxwell's equations; static and quasi-static fields; field energy; energy flow and Poynting vector; electromechanical interactions; waves in unbounded media and on two-wire transmission lines; reflection and refraction; lossy media; skin effect; analogs to electromagnetic fields.

Mr. Alexopoulos (F,W,Sp)

Mr. Levin (F,W,Sp)

Mr. Jacobsen (F,W,Sp)

110. Circuit Analysis II. Lecture, four hours; discussion, one hour. Prerequisite: course 10. Corequisite: course 102. Analysis of second and higher-order linear circuits. RLC circuits, characteristic roots, phasors, impedance, network functions, poles and zeros, coupled inductors, convolution, application of Laplace transforms to linear circuits.

Mr. Levan (F,W,Sp)

112. Linear Network Synthesis. Lecture, four hours; discussion, one hour; other, seven hours. Prerequisite: course 111L. State equations of discrete-time systems. Filter design. State equations for discrete-time systems. Network structures for digital filtering. Introduction to digital filter design techniques. Mr. Temes (F).

115AL. Electronics Laboratory I (2 units). Prerequisite: course 1100L. Recommended: course 115A. Experimental determination of device characteristics, resistive diode circuits, single-stage amplifiers, compound transistor stages, effect of layout on single-stage amplifiers. Mr. Martin (F,W,S).

115B. Electronics II. Lecture, four hours; recitation, one hour. Prerequisite: course 115A. Electron device-circuit-environment interactions, with emphasis on multistage, multiloop feedback amplifiers. Mr. Abidi (F,W,S).

115BL. Electronics Laboratory II (2 units). Laboratory, four hours. Prerequisite: course 115AL. Recommended: course 115B. Experimental and computer studies of multistage, wideband, tuned, and power amplifiers, and multiloop feedback amplifiers. Introduction to thick-film hybrid techniques. Construction of amplifiers using hybrid thick-film techniques. Mr. Abidi (F,W,S).

115C. Digital Integrated Circuits. Lecture, four hours; recitation, one hour. Prerequisites: courses 115A, 115B. Computer Science 151A. Modern logic families (TTL, PL, ECL, NMOS, CMOS). IC layout, MSI digital circuits (flipflops, registers, counters, PLAs, etc.). Digital machine realization techniques. VLSI memories, A/DS, VLSI systems (time permitting). Laboratory experiments in switching circuits. Mr. Martin (F,W,S).

115CL. Pulse and Digital Methods Laboratory (2 units). Laboratory, four hours. Corequisite: course 115C. Digital circuits laboratory, with three different digital families characterized (PL, TTL, ECL, NMOS). Use of synchronous machine techniques for building simple circuits, culminating in a 4-bit successive approximation A/D converter. Mr. Martin (F,S).

115E. Design Laboratory in Microcomputer Hardware and Interface. Lecture, two hours; laboratory, six hours. Prerequisites: Computer Science 51B, 115B. Second-level design laboratory in microcomputer hardware and interfacing. Address, data, and control buses. I/O devices including serial interfaces, parallel interfaces, and timers. Address language programming. Design of new peripheral and microprocessor interfaces. Mr. Willson (Sp).

116. Communication Circuits. Lecture, four hours; recitation, one hour. Prerequisites: courses 102, 115B. Signals and spectra. Signal distortion in transmission filters, transmission bandwidth requirements. Random signals and noise, linear modulation, exponential modulation circuits and characteristics. Commercial communication systems. Mr. Samueli (F).

117. Introduction to Power Electronics. Lecture, four hours; recitation, one hour. Prerequisite: course 115A. Electrical and thermal characteristics of power semiconductor devices, including diodes, transistors, and thyristors, and their application to power conditioning, conversion, and control. Emphasis on device limitations and design considerations. Examples from the case of bipolar and MOS transistors, inverters, DC and AC motor drives. Mr. Luhmann, Mr. Pan (F).

118. Integrated Circuit Components and Design. Lecture, four hours; discussion, one hour. Prerequisites: courses 115B, 121A. Realization of active and passive components in integrated circuit design. Passive components: resistors, capacitors, metal interconnections. Active devices: NPN and PNP BJTs, design rules; FET device. Design interactions and layout rules. Mr. Abidi (F).

121A. Physical Principles of Semiconductor Devices. Lecture, four hours; discussion, one hour. Prerequisites: courses 10 or 101, and 101. Introduction to quantum mechanics and semiconductor fundamentals. Introduction to principles of semiconductor devices, survey of semiconductor device physics, principles of operation of p-n junctions. Mr. Viswanathan (F,W).

121B. Principles of Semiconductor Device Design. Lecture, four hours; discussion, one hour. Prerequisite: course 121A. Introduction to operation of bipolar and MOS transistors, equivalent circuit, high-frequency behavior, voltage limitations. Mr. Viswanathan (W,S).

122A. Semiconductor Devices Laboratory (2 units). Laboratory, four hours. Prerequisite: course 121A. Design, fabrication, and characterization of junction, field effect, and other semiconductor devices. In particular students perform various processing tasks such as wafer preparation, doping, implantation, diffusion, metallization, sintering, and photolithography. Mr. K. Wang, Mr. Woon (F).

122B. Solid-State Devices Laboratory (2 units). Laboratory, four hours. Prerequisite: course 121A. Experimental measurement of electronic, magnetic, thermal, and optical properties of p- and n-type semiconductors as used in design of devices. Mr. K. Wang, Mr. Woon (W).

123A. Fundamentals of Solid-State I. Lecture, four hours; recitation, one hour. Prerequisite: junior standing in engineering. Introduction to atom concepts, quantum mechanical principles, energy level in complex atoms, quantum statistics, crystal structure, energy levels in solids, band theory. Mr. Fetterman, Mr. Viswanathan (F).

123B. Fundamentals of Solid-State II. Lecture, four hours; recitation, one hour. Prerequisite: course 123A. Discussion of solid-state properties, lattice vibrations, thermal properties, dielectric magnetic, and superconducting properties of solids. Mr. Fetterman, Mr. Stafudd (W).

124. Semiconductor Physical Electronics. Lecture, four hours; recitation, one hour. Prerequisite: course 123B. Band structure of semiconductors, semiconductors, semiconductor surfaces, optical and thermal properties; application to design of devices. Mr. Liboff (Sp).

131A. Probability. Prerequisites: Mathematics 33A, 33B. Introduction to theory and application of probability, including random variables and vectors, distributions and densities, characteristic functions, limit theorems, preliminary concepts of stochastic processes. MR. Rubin (W).

131B. Introduction to Stochastic Processes. Prerequisites: courses 102, 131A. Introduction to theory and application of stochastic processes, emphasizing stationary processes — properties and operations, measures and theorems of convergence, generation of processes with application to simulation. Elements of spectral analysis and FFT. Mr. Mortensen, Mr. Yao (Sp).

136. Introduction to Optimization Techniques. Lecture, four hours; recitation, one hour. Prerequisites: courses 102, 131A. Introduction to linear programming, gradient projection and reduced gradient methods, Lagrangian methods. Students are expected to use school's microcomputers. Mr. Aoki, Mr. Jacobsen (W).

141. Principles of Feedback Control. Prerequisite: course 102 or consent of instructor. Classical and state-space methods of analysis and design of feedback control systems as applied to problems selected from engineering, biology, and related areas. Corequisites: courses 131A, 132B. Mr. P.K.C. Wang (W).

142. Linear Systems: State-Space Approach. Prerequisite: course 102. State-space methods of linear system analysis and design, with application to problems in networks, control, and system modeling. Mr. Wiberg (W).

161. Electromagnetic Waves. Lecture, four hours; discussion, one hour. Prerequisite: course 101. Review of transmission line theory; guided waves in enclosed waveguide and on surfaces; Smith chart; excitation of guided waves; phase and group velocity; cavity resonators; concept of Q; perturbation theory; waves in complex media (ferries, crystals, semiconductors, plasmas). Mr. Yeh (F,Sp).

162B. Antenna Design II. Lecture, four hours; recitation, one hour. Prerequisite: course 162A. Radiation patterns of horns, slots, and patch antennas. Design of microwave antennas. Energy conversion and power flow in electromechanical interactions; electromechanics of actuators and rotating AC synchronous and induction machines and DC machines. Linear machines. Mr. Mortensen (W)

183. Electromechanical Energy Conversion. Lecture, four hours; recitation, one hour. Prerequisite: course 182.100 for mechanical engineers, 182.200 for electrical engineers. Energy conversion and power flow in electromechanical interactions; electromechanics of actuators and rotating AC synchronous and induction machines and DC machines. Mr. Orchard (F)

M185. Plasma Physics. (Same as Physics M122.) Prerequisite: course 101 or Physics 110A. Senior-level introductory course to physics of plasmas and ionized gases. Kinetic theory and transport, fluid and magnetic motion in magnetic fields; fluid behavior, plasma waves; resistivity and transport; equilibrium and stability; kinetic effects. Discussion of illustrative laboratory experiments.

Mr. Chen (F), even years; Sp

199. Special Studies (2 to 8 units). Prerequisites: sensor spanning, consistent of instructor. Individually investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Only two units may be applied toward degree; the two units must be approved by petition and can be used only as a replacement for a regular Electrical Engineering laboratory course. Students may take additional 199 courses, but they may not be applied toward degree. (F, W, Sp)

Graduate Courses

2015. Electrical Engineering Seminar (2 units). Prerequisite: graduate standing in engineering. Lectures on current research topics in electrical engineering. (F, W, Sp)

M206B. Analytical Methods of Engineering II. (Same as Mechanical, Aerospace, and Nuclear Engineering M209B.) Prerequisite: course M206A or Mechanical, Aerospace, and Nuclear Engineering M221A or consent of instructor. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and integral representations. Mr. Gibson, Mr. Wiberg (W)

M206C. Analytical Methods of Engineering III. (Same as Mechanical, Aerospace, and Nuclear Engineering M209C.) Prerequisite: course M206B or consent of instructor. Special functions, integral transforms, asymptotic expansions, stability theory, optimization techniques for engineering problems. Mr. Balsekhan, Mr. Levan (W)

M208. Advanced Circuit Design. Prerequisite: course 133C or consent of instructor. Advanced circuit design methods, optimization techniques, and circuit synthesis. Mr. Fiedler (W)

M209. Advanced Circuit Design. Prerequisite: course M206B or consent of instructor. Advanced circuit design methods, optimization techniques, and circuit synthesis. Mr. Fiedler (W)

M210. Advanced Circuit Design. Prerequisite: course M206B or consent of instructor. Advanced circuit design methods, optimization techniques, and circuit synthesis. Mr. Fiedler (W)

M212. Advanced Circuit Design. Prerequisite: course M206B or consent of instructor. Advanced circuit design methods, optimization techniques, and circuit synthesis. Mr. Fiedler (W)

M213. Advanced Circuit Design. Prerequisite: course M206B or consent of instructor. Advanced circuit design methods, optimization techniques, and circuit synthesis. Mr. Fiedler (W)

M214. Advanced Circuit Design. Prerequisite: course M206B or consent of instructor. Advanced circuit design methods, optimization techniques, and circuit synthesis. Mr. Fiedler (W)

M215A. Analog Integrated Circuit Design. Prerequisite: course M125B. Advanced integrated circuit design for optimum high-frequency response. Operational amplifiers, improved input impedance and slew rate, pole-zero compensation, circuit design techniques for optimum S/N. Voltage multipliers, D/A and A/D converters, Mr. Ablard (W)

M216A. LSI in Computer System Design. (Same as Computer Science M256A.) Lecture, four hours; laboratory, four hours. Prerequisite: graduate standing in computer science or electrical engineering, consent of instructor. Design and application of high-speed computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. Mr. Viswanathan (F, W)

M216B-M216C. LSI in Computer System Design. (Same as Computer Science M256A-M256C.) Lecture, four hours; laboratory, four hours. Prerequisite: course M216A. LSI and VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress grading. Mr. Abidi, Mr. Martin (Sp)

M219A. Special Topics in Electrical Circuit Theory. Prerequisites: course 210B or 211A or 211B. Advanced treatment of topics selected from research areas in electric circuit theory. Mr. Orchard (F)

M219B. Special Topics in Electrical Circuit Theory. Prerequisites: course 210B or 211A or 211B. Advanced treatment of topics selected from research areas in electric circuit theory. Mr. Orchard (F)
21A. Physics of Semiconductor Devices I. Prerequisite: course 121A. Physical principles and design considerations of junction devices.

Mr. K. Wang, Mr. Woo (F)

21B. Physics of Semiconductor Devices II. Prerequisite: course 121A. Principles and design considerations of field effect devices and charge-coupled devices. Mr. Viswanathan (Sp)

21C. Microwave Semiconductor Devices. Prerequisite: course 121A. Physical principles and design considerations of microwave solid-state devices: Schottky barrier mixer diodes, IMPATT diodes, transistors, electron devices, tunnel diodes, microwave transistors.

Mr. Pan, Mr. K. Wang (W)

22. Integrated Circuits Fabrication Processes. Prerequisites: courses 118, 121A. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include crystal growth, epitaxy, growth, oxidation, diffusion, ion-implantation, chemical vapor deposition, etching, lithography, and metalization. Introduction of advanced process simulation tools.

Mr. Woo (Sp, odd years)

223. Solid-State Electronics I. Prerequisites: courses 124 and 270, or consent of instructor. Energy band theory, electronic band structure of various elementary, compound, and alloy semiconductors, defects in semiconductors, recombination mechanisms, transport properties.

Mr. Fettermann, Mr. Pan (F)

224. Solid-State Electronics II. Prerequisite: course 223. Techniques to solve Boltzmann transport equation, various scattering mechanisms in semiconductors, high-field transport properties in semiconductors, Monte Carlo method, optical properties.

Mr. Pan (W, even years)

225. Superlattices and Quantum Wells. Prerequisite: course 223. Theoretical methods for calculating electronic and optical properties of semiconductor quantum wells, superlattices, and tunnel structures. Quantum size effects and low-dimensional systems. Application to semiconductor devices, including negative resistance diodes, tunnel detectors.

Mr. K. Wang (W)

229. Seminars on Advanced Topics in Solid-State Electronics. Prerequisites: courses 223, 224. Current research areas, such as radiation effects in semiconductor devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electron emission.

Mr. F.W.Spencer

229S. Advanced Electrical Engineering Seminar (2 units). Prerequisite: successful completion of Ph.D. major field examination or consent of instructor. Seminar on current research topics in solid-state and quantum electronics, Section 1 or in electronic circuit theory and applications, Section 2. Students report on a tutorial topic and a research paper in their dissertation area. May be repeated for credit. S/U grading.

Mr. Rubin (F)

230A. Estimation and Detection in Communication and Radar Engineering. Prerequisite: course 131A or equivalent. Applications of estimation and detection concepts in communication and radar engineering: random signal and noise analysis, signal detection and estimation, and error probability evaluations.

Mr. Rubin (F)

230B. Digital Communication Systems. Prerequisite: course 230A. Basic concepts of digital communication systems and applications; representation of binary and analog waveforms; geometric interpretation of signals; communication in white Gaussian noise; comparisons of digital modulation schemes, transmission over real channels; applications to satellite systems.

Mr. Yao (Sp)

Mr. Rubin (F)

230D. Signal Processing in Communications. Prerequisite: course 241B or consent of instructor. Basic digital signal processing techniques for estimation and detection of signals in communication and radar systems. Techniques for channel equalization and other estimation and control problems. Discrete-time signal processing concepts, decoders, and cryptographic systems. Conventional and public key cryptosystems and key management.

Mr. Yao (Sp)

231C. Rate Distortion Theory and Source Coding Techniques. Prerequisites: courses 236A, 236B, or consent of instructor. Sources and distortion measures, rate distortion function, and its applications to discrete and continuous sources, source coding theorems, carications of practical coding systems to theoretical bounds, speech and image quantization.

Mr. Yao (Sp)

231D. Spread Spectrum Communications. Prerequisite: course 231A. Spread spectrum digital communication systems for multiple-access applications. Basic design approaches, models, and general analysis for spread spectrum systems. Direct sequence spread binary-phase-shift keying (BPSK) and frequency-hopped multiple-frequency-shift keying (FSK) signals. Multiple access in spread spectrum digital radio networks.

Mr. Bambos (Sp)

Mr. Yao (Sp)

232A. Stochastic Modeling with Applications to Telecommunication Systems. Prerequisite: course 131A or equivalent. Introduction to stochastic processes as studied to apply technology of telecommunication systems and traffic engineering. Renewal theory; discrete-time Markov chains; continuous-time Markov jump processes. Applications to traffic and queuing analysis of basic telecommunication system models.

Mr. Rubin (F)

232B. Telecommunication Switching and Queueing Systems. Prerequisite: course 232A. Queueing models and analysis with applications to digital switching systems and integrated-service telecommunication systems. Fundamentals of traffic engineering and queueing theory. Queue size, waiting time, binary and multi-purpose queuing systems and analysis for Markovian and non-Markovian models.

Mr. Rubin (W)

232C. Telecommunication Architecture and Networks. Prerequisite: course 232B. Analysis and design of integrated-service telecommunication networks and multiple-access procedures. Stochastic analysis of priority-based queueing system models. Queuing networks; network protocol architectures; error control; routing, flow, and access control. Applications to access area, packet-radio, satellite, and computer communication networks.

Mr. Rubin (Sp)

232D. Telecommunication Networks and Multiple Access Communications. Prerequisite: course 232B. Performance analysis and design of telecommunication networks and multiple-access communication networks. Topics include architectures, multiplexing and multiple-access, message delays, error/fault control, switching, routing, protocols. Applications to local-area, packet-radio, satellite, and computer communication networks.

Mr. Rubin (W)

232E. Graphs and Network Flows. Prerequisite: course 136 or consent of instructor. Solution to analysis and synthesis problems which may be formulated as systems of graphs and networks. Topics include flow and cut theory, connectivity, computer and communication networks.

Mr. Rubin (W)

236A. Linear Programming. Prerequisite: Mathematics 115A or equivalent knowledge of linear algebra. Basic graduate course in linear and combinatorial programming. Simplex method, duality, geometry, complementarity, and more advanced topics.

Mr. Jacobsen (W)

236B. Nonlinear Programming. Prerequisite: course 236A or equivalent. Basic graduate course in nonlinear programming. Convex sets and functions and their basic properties. Applications to engineering and economic optimization problems. Applications to stochastic programming.

Mr. Jacobsen (F)

236C. Optimization Methods for Large-Scale Systems. Prerequisite: course 236B. Theory and computational procedures for decomposing large-scale mathematical programming problems. Generalized linear programming, decomposition algorithms, column generation, economic implications, application to stochastic programming and optimal control. Topics in nonlinear or convex optimization.

Mr. Jacobsen (W)

Mr. Jacobsen (W)

238. Reliability Theory with Applications. Prerequisite: course 131A or equivalent. Basic graduate course in reliability theory. Reliability models for complex systems, optimization of reliability systems for discrete and continuous cases. Finite-state and continuous-time Markov chains; discrete-time Markov jump processes. Applications to traffic and queuing analysis of basic telecommunication system models.

Mr. Rubin (F)

239A. Topics in Communication. Prerequisite: consent of instructor. Topics in one or more special aspects of communication systems, such as noise-coded communication systems, optical communication, time-varying channels, feedback channels, broadcast channels, coding and decoding techniques. May be repeated for credit with topic change.

Mr. Jacobsen (Sp)

239B. Topics in Operations Research. Prerequisite: consent of instructor. Topics in one or more of selected topics from areas such as integer programming; combinatorial optimization; network synthesis; scheduling, routing, location, and design problems; inventory control and stockpiling; optimizations for practical computer programming; stochastic programming; applications in engineering, computer science, economics. May be repeated for credit with topic change.

Mr. Jacobsen (Sp)

Mr. Balakrishnan (F)
240B. Linear Optimal Control. Prerequisites: courses 141 or equivalent and 240A, or consent of instructor. Introduction to optimal control, with emphasis on detailed study of LQR, or linear regulators with quadratic cost criteria. Relationships to classical control system design.

Mr. Levan (W)

240C. Optimal Control. Prerequisite: course 240B. Applications of variational methods. Pontryagin's maximum principle, dynamic programming and nonlinear programming to problems of optimal control theory and practical systems.

Mr. P.K.C. Wang (Sp)

241A. Stochastic Processes. Prerequisite: course 131B or equivalent. Fundamentals and applications of second-order theory stochastic processes. Correlation and spectral density. Gaussian process, processing by dynamic systems, Bayes rule and conditional expectation; mean-square estimation and Kalman filtering.

Mr. Mortensen (F)

241B. Kalman Filtering. Prerequisite: course 131B or equivalent. Fundamentals and applications of second-order theory stochastic processes. Correlation and spectral density. Gaussian process, processing by dynamic systems, Bayes rule and conditional expectation; mean-square estimation and Kalman filtering.

Mr. Mortensen (F)

241C. Stochastic Control. Prerequisites: courses 240B, 241B. Estimation and control of linear discrete-time and continuous-time stochastic systems; separation theorem and applications; Kaman filtering.

Mr. Balakrishnan (W)

242. Nonlinear Control. Prerequisite: course 240B. Techniques for studying nonlinear control systems, with emphasis on their stability; Liapunov's direct method; input-output stability; Popov's method; limit cycles.

Mr. P.K.C. Wang (W)

M243. Biological Control Systems. (Same as Anesthesiology M222.) Prerequisite: course 141 or equivalent. Introduction to application of control theory to modeling and analysis of biological control systems, such as respiratory system, cardiovascular system, and neuromuscular system. Emphasis on solving problems of current interest in biomedicine.

Mr. Ward, Mr. Wiberg

249S. Topics in Control. Prerequisite: consent of instructor. Thorough treatment of one or more aspects of control theory and applications, such as computational methods for optimal control; stability of distributed systems; identification; adaptive control; nonlinear control; applications of control to flight control, control reactor, process control, biomedical problems. May be repeated for credit with topic change.

Mr. Alexopoulos, Mr. Yeh (F, 260A; W, 260B)

261. Microwave and Millimeter Wave Circuits. Prerequisites: course 162A or consent of instructor. Rectangular and circular waveguides, microstrip, stripline, line, and dielectric waveguide distributed circuits, with applications in microwave and millimeter wave integrated circuits. Substrate materials, surface wave phenomena. Analytical methods for discontinuity effects. Design of passive microwave and millimeter wave circuits.

Mr. Alexopoulos (Sp)

Mr. Elliott (W, even years)

Mr. Rahmat-Samii (W)

Mr. Alexopoulos (W)

270. Quantum Electronics I. Prerequisite: course 123A or consent of instructor. Review of quantum mechanics, approximation methods, interaction of radiation and matter.

Mr. L. Stafsudd (F)

271. Quantum Electronics II. Prerequisite: course 270 or consent of instructor. Optical beams and resonators, interaction of light with atoms (including amplification and saturation), properties of lasers (including power output and mode effects).

Mr. Joshi, Mr. Liu (W)

272. Quantum Electronics III. Prerequisite: course 271 or consent of instructor. Properties of laser oscillators, including transient phenomena, quantum mechanical effects, and behavior of high-gain laser media.

Mr. Joshi, Mr. Liu (Sp)

273. Quantum Electronics IV. Prerequisites: courses 172 and 270, or consent of instructor. Quantization of fields, nonlinear optical susceptibilities, electrodynamical optical effects, symmetry, frequency-difference-frequency, and harmonic generation, parametric amplification and oscillation, stimulated Raman and Brillouin scattering, four-wave mixing, self-focusing, current research topics in nonlinear optics.

Mr. Liu, Mr. Stafsudd (W)

279S. Quantum Electronics Seminar (2 units). Prerequisite: consent of instructor. Current research topics in quantum electronics, lasers, nonlinear optics, optoelectronics, ultrafast phenomena, fiber optics, optoelectronic devices. May be repeated for credit. S/U or letter grading.

Mr. Liu (F, W, Sp)

285A. Plasma Waves and Instabilities. Prerequisites: courses 101, and M185 or Physics M212. Wave phenomena in plasmas described by macroscopic fluid theory. Nonlinear plasma waves in uniform magnetic fields. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydromagnetic waves, whistlers and helicon waves, and their classification. Illustrative experiments.

Mr. Chen, Mr. Luhmann (W)

285B. Advanced Plasma Waves and Instabilities. Prerequisites: courses M185, and 285A or Physics M222A. Interaction of intense electromagnetic waves with plasmas: waves in inhomogeneous and bounded plasma, nonlinear wave coupling and damping, parametric instabilities, anomalous resistivity, shock waves, echoes, laser heating. Emphasis on experimental considerations and techniques.

Mr. Chen, Mr. Luhmann (Sp)

Mr. Chen (F, odd years)

Mr. Chen (W)

Mr. Chen (Sp)

298. Seminar in Engineering (2 to 4 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice practicums with an active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual or Tutorial Studies (2 to 12 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in electrical engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.
Environmental Science and Engineering (Interdepartmental)

This interdisciplinary graduate program, which leads to the Doctor of Environmental Science and Engineering (D.Env) degree, provides scientific training in the enlightened management of the environment through a broad range of environmental disciplines. For details on this program, see Chapter 18 on the School of Public Health.

Materials Science and Engineering

6531K Boelter Hall, (213) 825-5534

Professors
Alan J. Ardell, Ph.D.
Ron van F. Bursnash, D.Sc.
David L. Douglass, Ph.D.
Bruce S. Dunn, Ph.D.
John H. Lyman, Ph.D.
John D. Mackenzie, Ph.D. (Nippon Sheet Glass Company Professor of Materials Science), Associate Dean
Kanji Ono, Ph.D.
Aly H. Shabaik, Ph.D., Vice Chair
George H. Sines, Ph.D.
Christian J.N. Wagner, Dr.reer.nat., Acting Chair
Alfred S. Vue, Ph.D.

Associate Professors
Nancy M. Haegel, Ph.D.
William Klement, Jr., Ph.D.

Assistant Professors
Steven Crouch-Baker, Ph.D.
Jenn-Ming Yang, Ph.D.

Adjunct Professor
Ryochi Kikuchi, Ph.D.

Adjunct Associate Professor
Marek A. Przystupa, Ph.D.

Scope and Objectives

At the heart of materials science is an understanding of the microstructure of solids. "Microstructure" is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about.

Materials engineering, on the other hand, is concerned with the design, fabrication, and nondestructive testing of engineering materials. Such materials must fulfill simultaneously dimensional, property, quality control, and economic requirements. Several manufacturing steps may be involved: (1) primary fabrication, such as solidification or vapor deposition of homogeneous or composite materials; (2) secondary fabrication, including shaping and microstructural control by operations such as mechanical working, machining, sintering, joining, and heat treatments; (3) nondestructive testing, which measures the degree of reliability of a processed part.

The department has recently initiated a program in electronic materials which provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and opto-electronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

The undergraduate program leads to the Bachelor of Science degree in the Materials Engineering. Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the department's materials engineering major. A joint major field, chemistry/materials science, is offered to students enrolled in the Department of Chemistry and Biochemistry (College of Letters and Science). Several courses in the undergraduate curriculum also play an important role in one of the options of the manufacturing engineering program.

The graduate program allows for specialization in one of the following fields: materials science, metallurgy and metals processing, mechanical metallurgy, and ceramics and ceramics processing.

Bachelor of Science in Materials Engineering

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents. Course requirements are as follows (187 minimum units required):

1. Six core courses: Chemical Engineering M105A (or Mechanical, Aerospace, and Nuclear Engineering M105A), Civil Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 105D.
2. Materials Science and Engineering 110, 120, 130, 131, 132, 150, 160, 190; 131L and 161L, plus two additional laboratory units from 111 (one unit of lab credit), 143L, 147L, 191L; Mechanical, Aerospace, and Nuclear Engineering 191A, M192A or Chemical Engineering M192A (satisfies the mathematics requirement); Civil Engineering 106A (satisfies the engineering economics requirement).
3. Four elective courses from Chemical Engineering 114, Civil Engineering 135A, Electrical Engineering 121A, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 143A, 143B, 147B, 147E, 151, 161, 162, Mechanical, Aerospace, and Nuclear Engineering 158A (the design content of the elective courses and the elective laboratory must total eight units).
4. English 3; Chemistry and Biochemistry 11A, 11B/11BL; Computer Science 10C or 10F; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL; one life sciences elective course.
5. A minimum of seven courses from the humanities, social sciences, and/or fine arts approved list (at least three must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement, which also may be satisfied within the free electives).
6. Two free elective courses.

Graduate Study

For information on graduate admission to the materials science and engineering program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

Lower Division Courses

14. Science of Engineering Materials, Lecture, three hours; demonstration, one hour; recitation, one hour. Prerequisites: Chemistry 11A, 11B/11BL, Physics 8A, 8B. Physics 8C may be taken concurrently. General introduction to different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between structure (crystals and microstructure) and properties of technological materials. Illustration of their fundamental differences and their applications in engineering. Mr. Douglass (F,W,Sp)

15. Introduction to Manufacturing Engineering. Manufacturing processes, materials and design in manufacturing; productivity, competitive aspects of manufacturing, manufacturing planning, production scheduling, flexible manufacturing systems, economic and social aspects of manufacturing. Mr. Shabaik (P)
Upper Division Courses

M107A. Principles of Biotechnology. (Same as Psychology M153.) Prerequisite: upper division standing. Principles of biocatalysis, fermentation, and genetic engineering design context. Emphasis on how physiological, psychological, and sociological factors affect integration of man into environmental, informational, and managerial systems through engineering design.

110. Introduction to Materials Characterization A (Crystal Structure and X-Ray Diffraction of Materials). (Formerly numbered 145A.) Lecture, three hours; laboratory, two hours. Prerequisite: course 14. Modern methods of materials characterization; fundamentals of crystallography, properties of X-rays, X-ray diffraction; powder method, Laue method; determination of crystal structures; phase diagram determination; and properties of elemental and X-ray spectroscopy; design of materials characterization procedures. Mr. Wagner (F)

111. Introduction to Materials Characterization B (Electron Microscopy). (Formerly numbered 145B.) Lecture, two hours; discussion, one hour; laboratory, four hours. Prerequisites: courses 14, 110. Introduction to electron, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schroedinger equation. Crystal bonding and lattice vibrations. Mechanisms and changes in magnetic, optical, electrical conductivity, absorption, magnetic behavior, and dielectrical properties. Mr. Ardel (W)

121. Materials Science of Semiconductors. (Formerly numbered 140A.) Prerequisite: course 120. Structure and properties of elemental and compound semiconductor materials. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, bandgap engineering, development of new materials for optoelectronic applications. Ms. Haegel (Sp)

122. Principles of Electronic Materials Processing. (Formerly numbered 140B.) Prerequisite: course 14 or equivalent. Description of basic semiconductor materials and devices, development and characterization of silicon, III-V compounds, and films. Discussion of principles of CVD, MOCVD, LPE, and MBE; metals and dielectrics. Mr. Yue (W)

130. Phase Relations in Solids. (Formerly numbered 141.) Prerequisites: course 14, Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A. Summary of thermodynamic laws, equilibrium criteria, solution thermodynamics, mass transport, clinical and ternary phase diagrams, glass transitions.

131. Diffusion and Diffusion-Controlled Reactions. (Formerly numbered 142A.) Prerequisite: course 130. Diffusion in metals and ionic solids, nucleation and growth theory; precipitation from solid solution, stress-tested decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth. Mr. Douglass (F)

131L. Diffusion and Diffusion-Controlled Reactions Laboratory (2 units). (Formerly numbered 142L.) Corequisite: course 131. Design of heat-treating cycles and performing experiments to study diffusion, growth of intermediate phases, recrystallization, and grain growth. Analysis of comparison of results with theory. Mr. Douglass (F)

132. Structure and Properties of Metallic Alloys. Prerequisite: course 131. Physical metallurgy of steels, lightweight alloys (Al and Ti), and superalloys. Strengthening mechanisms, microstructural control methods for strength and toughness, and design. Grain boundary segregation. Mr. Ono (Sp)

143A. Mechanical Behavior of Materials. Prerequisite: course 14 or equivalent. Recommended: Civil Engineering 108. Plastic flow of metals under simple and complex loading, stress rate and temperature effects, dislocations, fracture, microstructural effects, mechanical and thermal treatment of steel for engineering applications. Mr. Sines (F,W)

143B. Failure Analysis of Metals. Prerequisite: course 143A. Experimental methods for fracture mechanics, mechanical testing of metals, fractography, and microstructural analysis. Fractography, joining technology, and mechanical behavior. Engineering and legal aspects. Case histories. Mr. Douglass (Sp, even years)

143L. Mechanical Testing Laboratory (2 units). Laboratory, four hours. Prerequisite or corequisite: course 143A. Experimental techniques for measurement of mechanical properties of metals and ceramics. Elastic constants, tensile, compression and bending test, fracture toughness, fatigue, and creep testing. Mr. Ono, Mr. Sines (W,Sp)

147B. Manufacturing Processes. Prerequisite: course 147A. Theoretical foundation for cold forming processes; rolling, extrusion, and forging. Conventional metal removal. Solidification processes and casting. Powder metallurgy. Mr. Shabak (Sp)

147C. Chemical Metallurgy. Prerequisite: course 131. Chemical and nuclear engineering, development of new materials for optoelectronic applications. Modern production processes used in fabrication of ceramics and glasses for structural and decorative applications, optics, and electronics. Processing operations, including modern techniques of powder synthesis, greenware forming, sintering, glass melting. Microstructure properties relations in ceramics, fracture analysis and design with ceramics. Mr. Arab (F)

161. Laboratory in Ceramics and Glasses. (Formerly numbered 146B.) Lecture, four hours; discussion, one hour. Prerequisite: course 160 or equivalent. Recommended corequisite: course 161. Processing of common ceramics and glasses. Acquisition of some practical experience through project work in ceramic and glass processing design. Mr. Mackenzie (W)

161L. Laboratory in Ceramics and Glasses (2 units). (Formerly numbered 146L.) Laboratory, four hours. Prerequisite: course 160 or equivalent. Recommended corequisite: course 161. Processing of common ceramics and glasses. Acquire some practical experience through project work in ceramic and glass processing design. Mr. Mackenzie (W)

162. Electronic Ceramics. (Formerly numbered 146F.) Prerequisites: course 14, Electrical Engineering 108 or equivalent. Utilization of ceramics in microelectronic devices: thick film and thin film resistors, capacitors, and substrates; design and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electric-optic devices; optical wave guide applications; electronic components. Mr. Dunn (W, odd years)

180B. Machine and Systems Biotechnology. Prerequisite: course M107A or consent of instructor. Qualitative and quantitative methods for assessing the role of human synergetic abilities applied to display-control design, decision-making problems, and task definition; problems of man-machine interactions in large-scale systems. Mr. Lyman (Sp)

190. Materials Selection and Engineering Design. (Formerly numbered 140E.) Prerequisites: courses 132, 150, 160. Explicit guidance among the myriad materials available for design in engineering. Properties and applications, selection principles, the selection of ceramic, and composite materials, coatings. Materials selection, treatment, and serviceability emphasized as part of successful design. Design projects. Mr. Sines (Sp)

191L. Computer Methods and Instrumentation in Materials Science (2 units). Prerequisites: upper division standing in materials science and engineering, knowledge of BASIC or C or assembly language. Introduction to experimental techniques, real-time data acquisition and processing, computer-aided testing. Mr. Yang (W)
Graduate Courses

Mr. Crouch-Baker, Mr. Kikuchi (W)

Mr. Dunn, Ms. Haegel (F)

241. Oxidation of Metals. Prerequisite: course 130 or equivalent or consent of instructor. Kinetics and mechanism of gas-solid reactions. Absorption and phase-boundary reactions. Nucleation of reaction products, defect structure of oxides, crystal structure and morphology of oxide films, factors influencing adhesion of surface films.

Mr. Douglass (W)

242A. Plasticity Theory Applied to Metalworking I. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 158A. Fundamental concepts describing mechanisms of plastic deformation of homogeneous solids. Yield criteria. Methods of solution, including slip line field, of problems involving plastic deformation, with examples involving plane strain and as-wrought deformation. Extrusion problem. Application of methods of solution.

Mr. Sabaak (F, odd years)

242B. Material Removal Processes. Prerequisite: course 147B. Classification of material removal processes; single-point, multiple-point, and abrasive material removal operations; mechanics of orthogonal and oblique machining; stress, strain, strain rate, and temperature analyses; tool wear, tool life, and tool materials; optimization; and symbolics in machining.

Mr. Sabaak (F, even years)

243A. Fracture of Structural Materials. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 158A or equivalent. Engineering and scientific aspects of crack nucleation, slow crack growth, and unstable fracture. Fracture mechanics, dislocation models, fatigue, fracture in reactive environments, alloy development, fracture-safe design.

Mr. Ono (Sp, even years)

243B. Design for Fatigue Reliability. Prerequisites: one or more courses from 143A, Mechanical, Aerospace, and Nuclear Engineering 156A, and 158A, or equivalent. Prediction of fatigue life of machines, structures, and vehicles with statistical confidence. Design against fatigue. Focus on techniques for optimization and prediction of fatigue life. Focus on lifetime prediction and fatigue crack growth.

Mr. Ono (F, odd years)

243C. Dislocations and Strengthening Mechanisms in Solids. Prerequisite: course 143A or Mechanical, Aerospace, and Nuclear Engineering 158A. Elastic and plastic behavior of crystals, geometry, mechanics, and interaction of dislocations, mechanisms of yielding, work-hardening, and other strengthening.

Mr. Ono (F, odd years)

244. Electron Microscopy. Prerequisite: course 111 or equivalent. Essential features of electron microscopy, geometry of electron diffraction, kinematic and dynamical theories of electron scattering, imaging and evaluation of micrographs, atomic-scale structure, and theory of defects in crystals. Fringe formation, direct lattice resolutions, Lorentz microscopy, laboratory applications of complex theory.

Mr. Wagner (Sp, odd years)

245C. Diffraction Methods in Science of Materials. Prerequisite: course 110 or equivalent. Theory of diffraction of waves (X rays, electrons, and neutrons) in crystalline and noncrystalline materials. Long- and short-range order in crystals, structural effects of plastic deformation, crystal plasticity, and arrangement of grains in liquids and amorphous solids.

Mr. Wagner (Sp, odd years)

246A. Mechanical Properties of Nonmetallic Crystalline Solids. Prerequisite: course 160. Material properties of nonmetallic crystalline solids, including atomic bonding and structure, atomic-scale defects, microstructural features, residual stresses, temperature, stress state, strain rate, size, and surface conditions. Methods for evaluating mechanical properties.

Mr. Mackenzie (W, odd years)

246B. Structure and Properties of Glass. Prerequisite: course 160. Structure of amorphous solids and glasses. Conditions of glass formation; theories of percolation and degrees of glass structure. Mechanical, electrical, and optical properties of glass and relationship to structure.

Mr. Mackenzie (W, even years)

Mr. Dunn, Mr. Mackenzie (Sp, even years)

247A. Solid-State Reactions. Prerequisite: course 131. Phenomenology and atomistic mechanisms of solid-state diffusion. Subjects will focus on the evolution of physical processes in solids. Topics may include mass transport, chemical reactions, and interfacial reactivity, and the effects of defects on these processes. Applications of phase diagrams. Students report on current topics in solidification.

Mr. Yee (Sp, even years)

248A. Experimental Methods in Materials Synthesis. Prerequisite: bachelor's degree in chemistry, physics, or engineering. Techniques used in materials synthesis: temperature measurement, vacuum techniques, methods of heating and quenching, consolidation and refining of metals, crystal growth, thin film deposition and thick film deposition. Laboratory experiments and demonstrations.

Mr. Bunshah (F)

248B. Deposition Technologies and Their Applications. Prerequisites: courses 160 and 248A, or consent of instructor. Deposition methods used in high-technology applications. Theory and experimental methods for deposition of thin films. Vapor deposition (CVD), plasma spray, electrodeposition. Applications in semiconductor, chemical, optical, mechanical, and metallurgical industries.

Mr. Bunshah (Sp, odd years)

249AA-249AZ. Seminars in Materials Science and Engineering (2 to 16 units). Prerequisites: graduate standing in materials science and engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topics.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeat- ed for credit. S/U grading.

Mr. Dunn (F, W, Sp)

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in materials science and engineering, consent of instructor. May be repeated for credit. May be used to request enrollment may be obtained from as- sistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisites: graduate standing in materials science and engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examination (2 to 16 units). Prerequisites: graduate standing in materials science and engineering, consent of instructor. Supervised independent research for M.S. degree.

597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units). Prerequisites: graduate standing in materials science and engineering, consent of instructor. Supervised independent research for M.S. degree. Supervised independent research for M.S. degree.

599. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in materials science and engineering, consent of instructor. Supervised independent research for M.S. degree. Supervised independent research for M.S. degree.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in materials science and engineering, consent of instructor. Supervised independent research for M.S. degree. Supervised independent research for M.S. degree.
Scope and Objectives

The Mechanical, Aerospace, and Nuclear Engineering Department encompasses professional disciplines that are often divided into separate departments at other engineering schools. Curricula in aerospace engineering and mechanical engineering are offered on the undergraduate and graduate levels, while nuclear engineering is a graduate program. The recent Conference Board of Associated Research Councils' study ranked UCLA's mechanical engineering program ninth in the nation for both teaching and research.

Because of the scope of the department, faculty research and teaching cover a wide range of technical disciplines. Research in thermal engineering emphasizes basic heat and mass transfer processes as well as thermal hydraulics. Topics in the area of design, dynamics, and control include robotics, mechanism design, control and guidance of aircraft and spacecraft, helicopter dynamics and aeromechanics, dynamics and control of large space structures. Studies in structural mechanics range from fracture mechanics and wave propagation, structural dynamics and aeroelasticity of helicopters and jet engine blades, computational transonic aeroelasticity to structural optimization and synthesis, and mechanics of composite structures. In the area of fluid mechanics and acoustics, investigations are under way on combustion, flow instabilities, turbulence and thermal convection, aeroacoustics, and unsteady aerodynamics of turbo-machines, helicopter rotors, and fixed-wing aircraft. Other areas of research include applied plasma physics, surface modification by plasma, fusion reactor design, experimental tokamak confinement physics; light water reactor safety; reliability and risk assessment methodology; societal risk management; and nuclear materials. The department also has research activity in computer-aided design and manufacturing.

At the undergraduate level, the department offers accredited programs leading to Bachelor of Science degrees in Aerospace Engineering and in Mechanical Engineering. The former includes opportunity to emphasize propulsion, aerodynamics, preliminary design, dynamics and control, or structures and space technology, while the latter includes opportunity to emphasize mechanical systems — design and control; power systems and thermal design; manufacturing processes; or fluids engineering.

At the graduate level, the department offers programs leading to M.S. and Ph.D. degrees in Mechanical Engineering, Aerospace Engineering, and Nuclear Engineering. An M.S. in Manufacturing Engineering is also offered.

Bachelor of Science in Aerospace Engineering

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeroelasticity, dynamics, control and guidance, propulsion, and energy conversion.

Course requirements are as follows (190 minimum units required):

(1) Nine department core courses: Civil Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A, 105D, 157, M192A.

(2) Twelve aerospace engineering core courses:

(3) Sixteen technical elective units (which should contain enough design units to satisfy the overall program requirement of at least 24 design units) selected from Mechanical, Aerospace, and Nuclear Engineering 131A/131AL, 132A, 133A (thermodynamics, heat, and mass transfer); 153A (aerodynamics); 155, 163A, 164, M168A*, 171C or Electrical Engineering 142, Civil Engineering 137L (dynamics and control); Mechanical, Aerospace, and Nuclear Engineering 161A*, 161B, 161C (space technology); 156A, 158A, M166C, M168; Civil Engineering 130F (structural and solid mechanics); Mechanical, Aerospace, and Nuclear Engineering 162A, 162C, M192F (design and mechanisms); Materials Science and Engineering 143A, 143L, 147B.

(4) English 3; Chemistry and Biochemistry 11A, 11B/11BL; Computer Science 10F or Program in Computing 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

*Unless taken as part of the core.
(5) A minimum of 28 units from the humanities, social sciences, and/or fine arts approved list (at least three courses must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement). It is strongly recommended that you take at least one economics course.

Bachelor of Science in Mechanical Engineering

The ABET-accredited mechanical engineering program is designed to provide a basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers, with an option in mechanical systems — design and control; power systems and thermal design; manufacturing processes; or fluids engineering.

Course requirements are as follows (192 minimum units required):

1. Nine department core courses: Civil Engineering 108, Electrical Engineering 100 (also 100L — see item 2 below), Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A, 105D, 157, M192A.

2. Ten mechanical engineering core courses: Electrical Engineering 100L (may be taken concurrently with 100), Materials Science and Engineering 147B, Mechanical, Aerospace, and Nuclear Engineering 131A, 133A, 156A, 162A, 162B, 162M, M169A, 171A.

3. Twenty technical elective units, of which at least four should be laboratory units, to be selected from one of the subject areas listed below; no more than eight units may be taken from any one of subgroups a, b, c:

   **Fluids Engineering**

   (a) Mechanical, Aerospace, and Nuclear Engineering 157A.

   (b) Electrical Engineering 103, Mechanical, Aerospace, and Nuclear Engineering 150A, 150B, 153A, 192B, 192C.

   (c) Mechanical, Aerospace, and Nuclear Engineering 136, 150P, 151, 153C, 161A, 161B.

   **Manufacturing Processes**

   (a) Materials Science and Engineering 143L, 147L, 161L, Mechanical, Aerospace, and Nuclear Engineering 163B, 163C, 194B, 195L.

   (b) Materials Science and Engineering 143A, Mechanical, Aerospace, and Nuclear Engineering 163A, 164.

   (c) Civil Engineering 175, Mechanical, Aerospace, and Nuclear Engineering 155, 174, 194A.

   **Mechanical Systems — Design and Control**

   (a) Civil Engineering 130F, 137L, Materials Science and Engineering 143L, Mechanical, Aerospace, and Nuclear Engineering 162C, 163B, 194B.

   (c) Materials Science and Engineering 143A, Mechanical, Aerospace, and Nuclear Engineering 163A, 168, 194A.

   **Power Systems and Thermal Design**

   (a) Mechanical, Aerospace, and Nuclear Engineering 131AL.

   (b) Electrical Engineering 103, Mechanical, Aerospace, and Nuclear Engineering 132A, 135, 150A, 192B, 192C.

   (c) Mechanical, Aerospace, and Nuclear Engineering 134B, 136, 150P, 151, 161B.

   (4) English 3; Chemistry and Biochemistry 11A, 11B/11BL; Computer Science 10C or 10D; Mathematics 32B, 33A, Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Mechanical, Aerospace, and Nuclear Engineering 94.

   (5) A minimum of 24 units from the humanities, social sciences, and/or fine arts approved list (at least three courses must be upper division; at least three — with two upper division — must be in the same academic department or otherwise reflect coherence with respect to subject matter; and one must satisfy the engineering and science in society requirement).

   (6) Four free technical elective units selected from upper division courses offered by the department; you are strongly encouraged to consult your adviser.

   (7) Four free elective units selected from the department, other departments in the school, or outside the school; you may wish to consult your adviser before selecting a course to fulfill this requirement.

Graduate Study

For information on graduate admission to the mechanical, aerospace, and nuclear engineering programs and requirements for the M.S. and Ph.D. degrees, see “Graduate Study” at the beginning of this chapter.

Lower Division Courses

2. Toxic Waste Control. Lecture, three hours; discussion, one hour. Specifically designed to satisfy in part the Letters and Science general education requirement. Intended for students interested in toxic wastes. Topics include sources of toxic substances, effects on public health and environment, technological solutions, public policy, and risk assessment.

   Mr. Kastenberg (F,Sp)

94. Introduction to Computer-Aided Design and Drafting. Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional computer-aided design and drafting systems. Students use one or more on-line computer systems to design and display various objects.

   Mr. Melkand (F)

Upper Division Courses

102. Mechanics of Particles and Rigid Bodies. Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 33A, Physics 8A. Newtonian mechanics (statics and dynamics) of particles and rigid bodies. Fundamental concepts of mechanics. Statics, kinematics, and kinetics of particles and rigid bodies. Impulse-momentum and work-energy relationships. Applications.

   Mr. Mingori (F,WSp)

103. Elementary Fluid Mechanics. Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 32B, 33A, Physics 8B. Introductory course dealing with application of principles of mechanics to flow of compressible and incompressible fluids.

   Mr. Kelly, Mr. Meecham (F,WSp)

M105A. Introduction to Engineering Thermodynamics. (Same as Chemical Engineering M105A) Lecture, four hours; recitation, one hour. Prerequisites: Physics 8B, Mathematics 32B, 33A. Transport phenomena; heat conduction, mass species diffusion, convective heat and mass transfer, and radiation. Engineering applications in thermal and environmental control.

   Ms. Lavine (F,WSp)

M105A. Engineering and Policy: Resources and Risk. (Same as Civil Engineering M115.) Lecture, two hours; recitation, two hours. Prerequisites: sophomore or higher standing in engineering. Philosophical, sociological, and institutional implications of engineering-based risk and decision making. Emphasis on opportunities for useful development of resources, inherent risks, and responsibilities of engineers in decision making. Emphasis on thoughtful student discussion.

   Mr. Kastenberg (W)

   Mr. Catton (F,Sp)

131AL. Thermodynamics and Heat Transfer Laboratory. Laboratory, eight hours; recitation, four hours. Prerequisites: courses 131A, 157. Experimental study of physical phenomenon and engineering systems using modern data acquisition and processing techniques. Experiments include study of heat transfer phenomena and testing of a cooling tower, heat exchanger, and internal combustion engine. Students take and analyze data and discuss physical phenomena.

   Mr. Mills (Sp)

132A. Mass Transfer. Lecture, four hours; discussion, eight hours. Prerequisites: courses 105D, 131A. Principles of mass transfer by diffusion. Mass transfer by convection in laminar and turbulent flows. Simultaneous heat and mass transfer. Applications including combustion of solids and volatile fuels, evaporation and condensation, ablation and transpiration cooling, gas absorption and catalysis.

   Mr. Mills
133A. Engineering Thermodynamics. Lecture, four hours; other, eight hours. Prerequisites: courses 103, M105A, 105D. Applications of thermodynamic principles to engineering processes. Energy conversion systems. Rankine cycle and other cycles, refrigeration, psychrometry, reactive and nonreactive flow systems. Mr. Dhir (F)

M134A. Nuclear Energy Technology: Resources, Chemistry, Conversions, (Same as Geology 161F.) Prerequisite: course M105A or equivalent in physics or chemistry or consent of instructor. Energy resources: fossil fuels, nuclear fuels, hydro, solar, wind, geothermal, and biomass sources. Concepts and analysis methods for power production and other energy uses. Considerations of thermodynamic, economic, and environmental constraints. Mr. Kastenberg

134B. Solar Energy Use and Control. Lecture, four hours; other, eight hours. Prerequisites: senior standing or equivalent or consent of instructor. Nature and availability of solar radiation; review of selected heat transfer topics pertinent to solar energy collection and use; design analysis of nonfocusing solar energy collector-converters and methods of energy production; selected applications. Mr. Mills

135. Fundamentals of Nuclear Power. Prerequisite: junior standing. Introduction to nuclear engineering; nuclear physics, neutron cross sections, nuclear fission and fusion, reactor design and analysis of reactors. Criticality, one-group neutron diffusion theory, heat removal, and heterogeneous effects. Mr. Kastenberg (F)

136. Thermal Hydraulic Design of Nuclear and Other Power Systems. Prerequisite: senior standing. Thermal hydraulic design of nuclear and other power systems, power generation and heat removal, power cycle, thermal hydraulic component design, control plant design, steady state and transient operation. Mr. Dhir

137. Introduction to Fusion Engineering and Reactor Design. (Formerly numbered 135D.) Prerequisite: course 135 or consent of instructor. Fusion reactions, fuel cycle, power systems, fusion facility design. Mr. Mills, Mr. Monkewitz (F,W)

154A. Preliminary Design of Aircraft. Prerequisite: course 154S. Classical preliminary design of an aircraft, including weight estimation, performances, or configuration and analysis. Mr. Meecham (W)

154S. Flight Mechanics, Stability, and Control of Aircraft. Prerequisites: courses 154A, 150B. Aircraft performance, flight mechanics, stability, and control: simple basic ingredients needed for design of an aircraft. Effects of airplane flexibility on stability derivatives. Mr. Friedmann (F)

155. Intermediate Dynamics. Lecture, four hours; other, eight hours. Prerequisite: course 102 or equivalent. Development of Newtonian mechanics in curvilinear coordinates, Lagrange's equation, variational principles; central force motion; kinematics and dynamics of a rigid body. Euler's equations, motion of rotating bodies, oscillatory motion, normal coordinates, orthogonality relations. Mr. Gibson (Sp)

156A. Advanced Strength of Materials. Prerequisite: Civil Engineering 108. Columns and beam columns. Torsion; Airy's stress functions, stress concentrations. Loads on bolts, rolling, hollow shafts, bending, normal and curved shafts, torsion, normal and curved shafts. Mr. Mal (Sp)

157. Basic Mechanical Engineering Laboratory. Laboratory, eight hours; other, four hours. Prerequisites: courses 103, M105A, 105D, Civil Engineering 108A, or consent of instructor. Basic principles and performance of basic experiments in heat transfer, fluid mechanics, structures, and thermodynamics. Primary sensors, transducers, recording equipment, signal processing, and data analysis. Mr. Mills, Mr. Monkewitz (F,W)

160A. Fluid Mechanics. Prerequisites: courses 103, 150A, or equivalent. Advanced aspects of potential flow theory. Incompressible flow around thin airfoils (Cf, Cm) and wings (lift, induced drag). Gas dynamics: oblique shocks, Prandtl-Meyer expansion. Linearized supersonic and subsonic flow theory and thin airfoils and waves. Wave drag. Transonic flow. Mr. Kelly (Sp)

160B. Aerodynamics. Prerequisites: courses 103, 150A, or equivalent. Advanced aspects of potential flow theory. Incompressible flow around thin airfoils (Cf, Cm) and wings (lift, induced drag). Gas dynamics: oblique shocks, Prandtl-Meyer expansion. Linearized supersonic and subsonic flow theory and thin airfoils and waves. Wave drag. Transonic flow. Mr. Kelly (Sp)

161A. Introduction to Astronautics. Prerequisite: course 102. Space-environment of Earth, trajectories and orbits, step rockets and staging, two-body problem, orbital transfer and rendezvous, problem of three-bodies, elementary perturbation theory, influence of Earth's oblateness. Mr. Gibson (F)

161B. Introduction to Space Technology. Lecture, four hours; other, eight hours. Recommended prerequisites: courses 102, 105D, 160P. Space propulsion requirements for typical space missions, thermoch-
153. Motion Control of Computer-Controlled Machines. (Formerly numbered 163L.) Laboratory, eight hours. Prerequisites: courses 163A and 174B. Consent of instructor. Recommended: courses 162B, 163B. Hands-on experience with articulated computer-controlled machines, with emphasis on motion planning and control. Design and implementation of servo control of DC motors, gear trains, multiaxis interpolation, and programming of industrial robots. Final project required. Mr. Shiller (W)

166A. Analysis of Flight Structures. Prerequisite: Civil Engineering 108. Introduction to two-dimensional elasticity, stress-strain laws, yield and fatigue; bending of beams; torsion of beams; warping; torsion of thin-walled cross sections; shear flow, shear-lag; combined bending and warping. Structures made of composite materials, bend- ing and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, nonsymmetric laminates, micromechanics of composites. Mr. Westmann (W)

168. Introduction to Finite Element Technology. Lecture, four hours; laboratory, four hours; other, four hours. Prerequisites: Civil Engineering 108, Computer Science 10F. Mathematics 33A. Introduction to finite element method (FEM) and its matrix formulation; computer implementation of FEM concepts; practical use of FEM codes. Preprocessing and post- processing techniques; graphics display capabilities; geometric and analysis modeling; interactive engineering systems; links with computer-aided design. Recent trends in FEM terminology; design optimization. Term projects using FEM computer codes. Mr. Schmit (Sp)

M169A. Introduction to Mechanical Vibrations. (Same as Civil Engineering M137.) Lecture, four hours; other, eight hours. Prerequisites: course 102, Civil Engineering 108. Dynamics of the classical vibrating systems, vector spaces; geometric concepts; transformations and matrices; canonical forms. Stability Controllability and observability. State representation of nonlinear systems; linearization. Emphasis on modeling concepts, applications, and computer-aided problem solving. Mr. Speyer

174. Risk, Reliability, and Quality Assurance. (Formerly numbered 174B.) Prerequisite: course 139A or consent of instructor. Introduction to use of probabilistic methods in engineering: reliability analysis; statistical quality control of manufacturing and other engineering processes: Acceptance sampling and decision making. Methods for reliability and risk assessment. Fault and event tree analysis. Mr. Apostolakis (W)

175. Applications of Probabilistic Risk Analysis. (Formerly numbered 136A.) Prerequisite: consent of instructor. Applications of probabilistic models for failure of components, subsystems, and systems. Deriva- tion and application of models for sources of errors, distribution, dose-response relationships, and cost/benefit re- lationships. Emphasis on several case studies (e.g., hazardous waste control, energy systems, and high- level radioactive waste). Mr. Kastenberg, Mr. Okrent

180A. Environmental Biotechnology. Prerequisite: Materials Science and Engineering M107A or consent of instructor. Physical, physiological, and psychological aspects of interaction between man and thermal, atmospheric, radiative, and mechanical agents and energies in the environment. Biological and physical requirements for engineering control of the environment; applications to complex systems. Mr. O'Brien

191A. Laplace Transforms and Applied Complex Variables. Lecture, four hours; discussion, two hours. Prerequisites: Mathematics 32A, 32B, 33A, 33B. Introduction to Laplace transformation: applications to electrical and mechanical problems, convolution-type integral equations, difference equations, and simple boundary value problems in partial differential equations. Complex variable theory, contour integrals, res- idues; application to transform inversion and partial differential equations. Mr. Ghoniem (W,Sp)

M192F. Numerical Optimization Methods for Engi- neering Design. (Same as Civil Engineering M140.) Prerequisite: Computer Science 10F, Mathematics 33A, 33B. Recommended: Mathematics 115A. Systems of nonlinear equations; optimization meth- ods for engineering design, one-dimensional minimization, unconstrained minimization, linearly constrained minimization, general nonlinear problems, approxima- tion, interpolation, least-square techniques, optimization of systems. Advantages and limitations of numerical optimi- zation. Applications to general design in mechanical, aerospace, and manufacturing engineering. Mr. Schmit (F)

193A. Engineering Probabilities and Stochastics. Prerequisite: junior standing in engineering. Sets and sets and algebra; sample spaces; classification and conditional probability; discrete and continuous random variables; probability distribution, increment, and density functions; Chebychev's inequality. La- place-Fourier transforms; law of large numbers, central limit theorems; discrete and continuous stochastic processes. Mr. Meechan

194A. Introduction to Geometric Modeling for Computer-Aided Design. Lecture, four hours; other, eight hours. Corequisite: course 194B. Fundamentals in geometric modeling for computer-aided design. Analy- sis of field equations, curves and surfaces. Space curves, including splines, Bézier curves, and composite curves. Parametric sur- faces, curves on surfaces. Transformation and analyt- ical properties of curves and surfaces in CAGD. Mr. Melkanoff, Mr. Yang (W)

194B. Computer-Aided Design Laboratory. Labora- tory, eight hours; other, four hours. Corequisites: course 194A, FORTRAN programming language. Design and utilization of on-line computer-aided graphical systems, including interactive graphics, curves, surfaces, and their transformations. Mr. Melkanoff, Mr. Yang (W)

195A. Numerically Controlled Machine Program- ming and Control Software Design. Lecture, four hours; other, eight hours. Prerequisite: FORTRAN programming language. Advanced programming of machining processes in APT, including programming through use of MACRO and transformation matrices. Introduction to IBM APT-AC numerically controlled programming. Design and implementation of postpro- cessors. Mr. Melkanoff (F)

195L. Numerically Controlled Manufacturing Ma- chinery Laboratory. Laboratory, eight hours. Prereq- 199. Special Studies (2 to 8 units). Prerequisites: selection by department, consent of instructor. Individual study of selected topics to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. (F, W, Sp)

Graduate Courses

201. Mechanical, Aerospace, and Nuclear Engi- neering Seminar (2 units). Prerequisite: graduate standing in engineering. Lectures on current research and development in manu- facturing engineering, S/U grading. Mr. Friedman

232A. Nuclear Materials Engineering. Prerequisites: courses 135, Materials Science and Engineering, and 137A. Nuclear materials, reactor materials, synthesis, testing, and current study of one or more aspects of fuel and solid breeder swelling and restructuring, gas release, release rates, release mechanisms, and current study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurements. May be repeated for credit with topic change.

239A-239GZ. Special Topics in Nuclear Engineering (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

237A. Principles of Magnetic Confinement Fusion. Prerequisite: consent of instructor. Fundamental principles of fluid dynamics applied to study of fluid resistance. States of fluid motion discussed in order of increasing complexity. May be repeated for credit with topic change.

237C. Fusion Reactor Technology and Design. (Same as Electrical Engineering M287.) Prerequisite: courses 135, 137. Magnetic fusion reactor concepts and technological components, solid and liquid breeder blankets, neutrinos, fuel cycles, in-vessel components, radiation shielding, magnets, systems analysis, and reactor design. May be repeated for credit with topic change.

238A-238Z. Seminars: Current Topics in Transport Phenomena (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, student presentations, and topics in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

239DA-239DZ. Seminars: Current Topics in Nuclear Engineering (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, student presentations, and topics in areas of current interest in nuclear engineering. May be repeated for credit. S/U grading.

239FA-239FZ. Special Topics in Transport Phenomena (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in reactor physics, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

239GA-239GZ. Special Topics in Nuclear Engineering (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

239HA-239HZ. Special Topics in Fusion Physics, Engineering, and Technology (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

239BA-239BZ. Seminars: Current Topics in Transport Phenomena (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, student presentations, and topics in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

239DA-239DZ. Seminars: Current Topics in Nuclear Engineering (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, student presentations, and topics in areas of current interest in nuclear engineering. May be repeated for credit. S/U grading.

239FA-239FZ. Special Topics in Transport Phenomena (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in reactor physics, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

239GA-239GZ. Special Topics in Nuclear Engineering (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

239HA-239HZ. Special Topics in Fusion Physics, Engineering, and Technology (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

239BA-239BZ. Seminars: Current Topics in Transport Phenomena (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, student presentations, and topics in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

239DA-239DZ. Seminars: Current Topics in Nuclear Engineering (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, student presentations, and topics in areas of current interest in nuclear engineering. May be repeated for credit. S/U grading.

239FA-239FZ. Special Topics in Transport Phenomena (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in reactor physics, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

239GA-239GZ. Special Topics in Nuclear Engineering (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

239HA-239HZ. Special Topics in Fusion Physics, Engineering, and Technology (2 to 4 units each). Prerequisite: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.
251B. Marine Hydrodynamics. Prerequisite: course 250A or equivalent or consent of instructor. Application of advanced aspects of potential flow theory to calculate the forces on and motion of objects having slender mass, force on two-dimensional hydrofoils, drag due to ship waves, response of a body to wave excitation. Mr. Kelly

251C. Fluid Dynamics of Pollution. Prerequisite: course 150A or consent of instructor. Designed to introduce to engineers and scientists various disciplines fluid mechanical aspects of pollution problems. Fluid dynamics of photochemical smog, oil slicks, and pollution in waterways. Mr. Kelly

252A. Stability of Fluid Motion. Prerequisite: course 150A or consent of instructor. Mechanisms by which laminar flows can become unstable and lead to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence. Mr. Kelly (W, odd years)

252B. Statistical Theory of Turbulence. Prerequisite: course 150A or consent of instructor. Development of statistical methods of wide utility in engineering applied to turbulent flows. Topics include stochastic processes, kinematics of turbulence, energy decay, Kolmogorov similarity, analytical theories, and origins of Reynolds stresses. Mr. Meachem

253A. Advanced Engineering Acoustics. Advanced studies in engineering acoustics, including theory of conventional wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids. Mr. Meachem

253C. Sound and Vibration. Prerequisite: consent of instructor. Theoretical analysis of interaction of sound and structures, acoustic transmission through fluid layers and walls; structural wave propagation; multidimensional random processes using wave number and frequency space; response and radiation of infinite and finite structures; statistical energy analysis. Mr. Meachem

254A. Special Topics in Aerodynamics. Prerequisites: courses 150A, 150B, M192A, 192B, or 192C, or equivalent, or consent of instructor. Special topics of current interest in advanced aerodynamics. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics. Mr. Friedmann

254B. Helicopter Engineering. Prerequisites: course 150A. Civil Engineering 10B. Recommended: courses M191A, Introduction to Engineering covering basic areas of helicopter design, aerodynamics, performance, stability and control, fatigue, and elements of rotor dynamic analysis. Class problem covering preliminary design of a helicopter is central part of course. Mr. Friedmann (W)

255A. Advanced Dynamics. Prerequisites: courses 155 and M169A, or consent of instructor. Variational principles and Lagrange's equations. Kinematics and dynamics of rigid bodies; procession and nutation of spinning bodies. Mr. Mingson (W)

255B. Mathematical Methods in Dynamics. Prerequisite: course 255A. Concepts of stability; state-space interpretation; stability determination by simulation. Methods of solution: the Hamiltonian as a Liapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear analysis; parametric excitation and nonlinear resonance. Application to mechanical systems. Mr. Kelly (W)

256A. Mechanics of Deformable Solids. Prerequisites: courses 158A and 166A, or consent of instructor. Kinematics of deformation, strain tensors, invariance, compatibility; conservation laws; stress tensors; equilibrium equations; constitutive equations; general theory, linearization, anisotropy; reciprocity linear isotropic elastic problems, plane and generalized plane problems; dynamic problems. Mr. Mal (F)

256B. Applied Linear Elasticity (Same as Civil Engineering 230.) Prerequisite: course 256A or consent of instructor. Review of general principles. Equations of linear isotropic elastic two-dimensional problems. Saint Venant’s principles. Reciprocity theorem, variational principles. Mr. Mal (W)

256C. Plasticity, Creep, and Thermal Stresses. Prerequisite: course 156A or 158A or consent of instructor. Incremental plastic stress-strain relations. Strain compatibility and stress-strain relations in thermal analysis. Unified treatment of plastic strain, creep strain, and thermal strain. Elastic-plastic, and creep analyses of beams, columns, shafts, frames, and plates. Mr. Westmann

256F. Analytical Fracture Mechanics. Prerequisites: course 156A, 158A, or 166A, and Materials Science and Engineering 243A. Review of modern fracture mechanics, elementary stress analyses; analysis of equations of motion; boundary conditions; crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells. Mr. Westmann

257A. Elastic Wave Propagation I. (Same as Earth and Space Sciences M224A.) Prerequisite: course 158A or 166A or consent of instructor. Review of elastic theory; elastic waves in unbounded media; reflection and refraction of plane elastic waves; surface waves and guided waves in multilayered media; waves generated in earth models; acoustical applications; attenuation; representative applications in engineering and seismology. Mr. Mal (W)

257B. Elastic Wave Propagation II. (Same as Earth and Space Sciences M224B.) Prerequisite: courses 158A, 166A, or Earth and Space Sciences 243A. Review of modern fracture mechanics, elementary stress analyses; analysis of equations of motion; boundary conditions; crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells. Mr. Westmann

258. Experimental Techniques in Fluid Mechanics and Thermal Science. Prerequisite: consent of instructor. Survey of wind tunnels and other facilities for research in fluid mechanics, aerodynamics, and heat transfer; analysis of their critical design features. Modern sensors, instruments, and measurement techniques. Signal processing and storage by analog and digital methods. Mr. Charwat

259A. Seminar on Advanced Topics in Fluid Mechanics. Prerequisite: consent of instructor. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to term paper or oral presentation (possible help from guest lecturers). Mr. Mal (W)

259B. Seminar on Advanced Topics in Solid Mechanics. Prerequisite: consent of instructor. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids. Mr. Mal

260A-260ZZ. Seminars: Current Topics in Mechanical Engineering (2 to 4 units each). Prerequisite: consent of instructor. Lectures, discussions, and studies in areas of current interest in mechanical engineering. May be repeated for credit. S/U or letter grading.

262A. Advanced Mechanisms and Mechanical Systems. Prerequisite: course 162A. Kinematic analysis and synthesis of mechanisms and mechanical systems, with special emphasis on use of vector, analytical methods. Use of computer techniques, with broad group of example systems. Mr. Yang (Sp)

263A. Electromechanics of Computer-Controlled Machines. Lecture, four hours; other, eight hours. Prerequisite: course 171A. Recommended: courses 255B, 163B, 163C. Mechanics and control problems of computer-controlled electromechanical systems, with special emphasis on analysis of energy flow between mechanical, electrical, and control components when applied to electromechanical and piezoelectric systems and control systems with mechanical flexibilities. Mr. Yang (W)

263B. Topics in Modeling and Dynamics of Aerospace Vehicles. Prerequisites: courses 171A, 255A, 255B. Recommended: course 255C. Dynamics, modeling, and stability of aerospace vehicles; improvement of performance using active control; applications to maneuvering and dual-element spacecraft, space station and hypersonic flight. Mr. Shiller (Sp)

263C. Mechanics and Trajectory Planning of Industrial Robots. Mr. Miyake (F), four hours; other, eight hours. Prerequisite: course 163A or consent of instructor. Theory and implementation of industrial robots. Design considerations. Kinematic structure modeling, trajectory planning, and system dynamics. Differential motion and static forces. Individual student project studies. Mr. Yang (W)

263D. Advanced Robotics. Prerequisite: course 263C or consent of instructor. Current research topics in robot motion planning dynamics and control. Kinematics and dynamics of redundant manipulators and multiple cooperating robots, and robots in zero gravity environment. Time optimal motion planning, obstacle avoidance, and dynamic performance of articulated robotic manipulators. Mr. Shiller (Sp)

265A. Optimum Structural Design. (Same as Civil Engineering M240.) Prerequisite: course 261A or Civil Engineering 235A or consent of instructor. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures. Mr. Felton, Mr. Schmitz (W)

266B. Failure of Structural Systems. Lecture, four hours; other, eight hours. Prerequisite: Civil Engineering 135B. Exploration of a current area of research depth. Mr. Sines (F)

269A. Dynamics of Structures. (Same as Civil Engineering M237A.) Prerequisite: course M169A. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equations and solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation. Mr. Bendiksen, Mr. Friedmann (F)
269B. Advanced Dynamics of Structures. Prerequisites: courses M269A, Civil Engineering 265A. Analysis of linear and nonlinear response of structures to dynamic loadings. Stresses and deflections in structures. Structural damping and self-induced vibrations. Mr. Friedmann (W)

M269C. Introduction to Probabilistic Dynamics. (Same as Civil Engineering M237C.) Prerequisite: course M169A. Response of structural and mechanical systems to random vibrations. Stationary and nonstationary excitations. Response of systems with random parameters. Discrete and continuous linear systems. Applications to earthquakes, wind sway of buildings, gust response, vibrations due to gearing inaccuracies, train vibrations. Mr. Friedmann (Sp, even years)

269D. Aeroelastic Effects in Structures. Prerequisites: courses M269A, Civil Engineering 265A. Analysis of stresses and deflections in structures from aerodynamic excitation. Flow induced instability and response of structural systems. Mr. Bendiksen, Mr. Friedmann (Sp, odd years)

271B. Dynamic Systems Stochastic Estimation and Control. Prerequisites: courses 171C, 165A, and 217A, or consent of instructor. Applied treatment of optimal state estimation and stochastic control problems for continuous and discrete-time dynamic models with state-space descriptions. Kalman filtering, smoothing, and prediction algorithms. Stochastic optimal control; separation principle. Emphasis on efficient numerical computations. Applications in various fields. Mr. Speyer (W)

271C. Dynamic Systems Identification, Stability, and Adaptive Control. Prerequisite: course 271A or consent of instructor. Recommended: course 271B. Nonlinear system stability. Dynamic systems modeling, identification, and parameter estimation techniques. Combined identification and control and self-adaptive control. Mr. Speyer (W)

271D. Seminar and Special Topics in Dynamic Systems Control. Prerequisite: consent of instructor. Seminar on current research topics in dynamic systems modeling, control, and applications. Topics selected from process control, differential games, nonlinear estimation, adaptive filtering, industrial and aerospace applications, etc. Mr. Speyer (Sp)

291C. Integral Equations in Engineering. Prerequisite: Mathematics 290B. Introduction to generalized function theory and Green’s functions. Convergence of partial series to integral equations and classification of integral equations. Solution to integral equations with degenerate kernels; discussions of successive approximations and Fredholm and Hilbert-Schmidt theory. Mr. Webbmann (Sp)

295A. Computer-Aided Manufacturing. Prerequisites: courses 94, 163A, 163L, 195L. Analysis of usage of computer in manufacturing. Manufacturing information systems; group technology; computer-aided manufacturing process planning; flexible manufacturing systems. Mr. Melkanoff (F)

295B. Computer-Integrated Manufacturing. Prerequisite: course 295A. Systems analysis and design of computer-integrated manufacturing, including automated factories and flexible manufacturing systems. Mr. Melkanoff (W)

298. Seminar in Engineering (2 to 4 units). Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, fellow, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Friedmann (F, W, Sp)

497A-497B. Field Project in Manufacturing Engineering. Lecture, two hours. Prerequisite: consent of instructor. Teams of students perform detailed system analysis and plan design of manufacturing engineering systems at various manufacturing plants. In Progress grading. Mr. Melkanoff (W, 497A; Sp, 497B)

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units). Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.
106C. Experimental Design Laboratory. Laboratory, eight hours. Prerequisite: course 106B or equivalent. Creative experimental projects for student designs in any engineering domain where individual students have preparation and interest, exemplifying professional method. Predicted idealized performance compared to experimentally achieved realities. Student prize competition entries encouraged.

106D. Engineering Systems Design Laboratory. Laboratory, eight hours. Prerequisites: course 106C, advanced senior standing. Similar to course 106C and normally a continuation thereof. Design projects generally emphasizing productivity, energy, environment, and process cost-benefit studies.

109. The Engineer and Society. Prerequisite: senior standing. Selected lectures, discussions, oral and written reports related to creative engineering, its sociological and ecological impacts, present, future, and past relationships. Maximum student participation in topical selection and class structuring. Creativity and original thinking emphasized.

Mr. O'Brien (F, W, Sp)

Graduate Courses

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

(F, W, Sp)

470A-470D. The Engineer in the Technical Environment (3 units each). Limited to students in Engineering Executive Program. Theory and application of quantitative methods in analysis and synthesis of engineering systems for purpose of making management decisions. Optimization of outputs with respect to dollar costs, time, material, energy, information, and manpower. Case studies and individual projects.

471A-471B-471C. The Engineer in the General Environment (3 units, 3 units, 1.5 units). Limited to students in Engineering Executive Program. Influences of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. In Progress grading for courses 471B-471C only.

472A-472D. The Engineer in the Business Environment (3 units, 3 units, 3 units, 1.5 units). Limited to students in Engineering Executive Program. Language of business for the engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through cooperation and participation with California business corporations and government agencies. In Progress grading (credit to be given on completion of courses 472B and 472D).

473A-473B. Analysis and Synthesis of a Large-Scale System (3 units each). Recitation, two and one-half hours. Limited to students in Engineering Executive Program. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for a goal-oriented technical group. In Progress and S/U grading.

495. Teaching Assistant Training Seminar. Prerequisites: graduate standing in engineering, appointment as a teaching assistant. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisites: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

Professors Emeriti

Edward P. Coleman, Ph.D.
J. Morley English, Ph.D.
Alfred C. Ingersoll, Ph.D.
Herbert B. Nottage, Ph.D.
Arthur F. Pillsbury, Engineer
Allen B. Rosenstein, Ph.D.
Bonham Spence-Campbell, E.E.
In recent years Los Angeles has emerged as a dominant and growing center of finance and trade, reflecting the continued shift of the national agenda west to the Pacific Rim and south toward Mexico and Latin America. This growth of intense commercial activity has been linked to important developments in the arts, sciences, and communications, producing a regional culture of great ethnic diversity, energy, and momentum. The UCLA Graduate School of Architecture and Urban Planning (GSAUP) has recently established a Center for Regional Policy Studies to address environmental, transportation, social policy, and urban design issues, while a flourishing local architectural culture is receiving increasing international attention.

Professional education and research are the central concerns of GSAUP within a context of rapid professional change and experimentation. Our belief is that a curriculum in architecture and urban planning responsive to the emerging needs of this important region can make a significant contribution to professional development. The school has created the Urban Innovations Group (UIG) as an independent, nonprofit, professionally managed practice arm where faculty and students undertake architectural, urban design, and planning projects on a contract basis. To supplement the classroom experience and to help bring the public and the professional community into active relationship with the school, a series of public lectures, conferences, and various exhibits are scheduled throughout the academic year.

A noted regular faculty is supplemented by distinguished visitors, while the student body is international in character. Developed as a small school with an enrollment of about 350, GSAUP encourages close interaction between faculty and students to maximize the educational experience.
Graduate School of Architecture and Urban Planning

1317 Perloff Hall, (213) 825-3791

The Graduate School of Architecture and Urban Planning (GSAUP) at UCLA offers programs of study leading to the degrees of Master of Architecture (M.Arch.), M.A. in Architecture, M.A. in Urban Planning, Ph.D. in Architecture, and Ph.D. in Urban Planning. Currently, the school offers educational opportunities for a broad spectrum of careers, including a number that are not yet common in practice, but which reflect emerging social needs. It offers a choice of two major programs: Architecture/Urban Design and Urban Planning.

Architecture/Urban Design

Barton Phelps, M.Arch.

Scope and Objectives

Architecture/Urban Design at UCLA offers four degree programs tailored to the needs of different groups of students: M.Arch. I, M.Arch. II, M.A., and Ph.D. M.Arch. I is a three-year first professional degree program which is accredited by the National Architectural Accrediting Board (NAAB). It does not assume any prior background in architecture. Students who do have some prior architecture background (e.g., a four-year undergraduate degree) may also enter the program and may petition to waive certain required courses and substitute more advanced electives in their place. M.Arch. I graduates normally pursue professional careers in architectural practice.

M.Arch. II is an advanced professional degree program for students who already hold a first professional degree in architecture. It provides opportunities for intensive concentration in a variety of areas of professional specialization. The M.A. and Ph.D. degree programs provide opportunities to pursue research and scholarship in the field of architecture. Graduates typically pursue academic or applied research and consulting careers.

Master of Architecture I

Admission

The M.Arch. I program is open to students holding a bachelor's degree (or its equivalent) comparable in standards and content to a bachelor's degree from the University of California. Applicants are accepted from students with a variety of backgrounds. No academic or experiential training in architecture is required, although some students have had experience in the field prior to admission.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a "creative" portfolio. No admission tests are required. In addition to the application for graduate admission, applicants should submit the "Departmental Supplement," available from the Admissions Office, Architecture/Urban Design, Graduate School of Architecture and Urban Planning, B315 Perloff Hall, UCLA, Los Angeles, CA 90024-1467.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Major Fields or Subdisciplines

No in-depth specialization is required within the context of the M.Arch. I program. However, you are required to concentrate several elective courses within a single curricular area. A minimum of three elective courses must be taken within this curricular area, including two courses in theory and one studio application, during the second year of study.

Specializations are currently available in the following areas: urban design; policy, programming, and evaluation (including social building); technology (including energy conserving design); design theory and methods (including computer-aided design); history, analysis, and criticism of architecture.

Course Requirements

You must complete a minimum of 27 courses, at least 24 of which must be four-unit courses at the graduate level (200 and 400 series). The total number of units required is 108. The required courses, listed below, must be taken in the sequence indicated.

First Year

Fall: Courses 200, 411, 421
Winter: Courses 412, 431, 436
Spring: Courses 413, 432, 442

Second Year

Fall: Courses 414, 433, elective (in sequence), elective
Winter: Courses 415, 441, elective (in sequence)
Spring: Courses 402 or 403, 201, elective
Third Year

Fall: Courses 415 or 402 or 403, 291, elective
Winter: Courses 461, 496, elective
Spring: Course 597A, elective

You must complete an elective sequence consisting of at least three related courses, terminating in a 402 or 403 advanced studio (normally in Spring Quarter of your second year). The elective sequence is intended to allow you to gain in-depth knowledge of a chosen area of specialization and to apply that knowledge in a design studio. Elective sequences are offered in the following areas: (1) urban design, (2) architectural design, (3) policy, programming, and evaluation, (4) technology, (5) design theory and methods, (6) history, analysis, and criticism of architecture. The examinations are administered by the appropriate curriculum area committees.

Master of Architecture II

Admission

The M.Arch. II program emphasizes advanced studies in architecture and requires that applicants hold a five-year B.Arch. degree or equivalent.

You must state your major area of specialization on your application, as you are admitted to a specific major and may change only by petition to the advanced graduate studies curriculum committee. A minimum of three academic terms in residence is required. This is a full-time program, and you are expected to remain continuously in residence until all academic work is completed, unless a leave of absence is granted.

If your native language is not English, you are required to score at least 580 on the Test of English as a Foreign Language (TOEFL). In addition, you must take the English as a Second Language Placement Examination (ESLPE) at arrival at UCLA and, beginning in your first term in residence, take any required English as a Second Language courses. Because such courses may not be applied toward the minimum course requirement, you should expect to spend additional time in residence. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

Major Fields

You are required to select your major area of specialization. You must state your major area of specialization on your application, as you are admitted to a specific major and may change only by petition to the advanced graduate studies curriculum committee. A minimum of three academic terms in residence is required. This is a full-time program, and you are expected to remain continuously in residence until all academic work is completed, unless a leave of absence is granted.

If your native language is not English, you are required to score at least 580 on the Test of English as a Foreign Language (TOEFL). In addition, you must take the English as a Second Language Placement Examination (ESLPE) at arrival at UCLA and, beginning in your first term in residence, take any required English as a Second Language courses. Because such courses may not be applied toward the minimum course requirement, you should expect to spend additional time in residence. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

Major Fields

You are required to select your major area at the time of application to the program and must take a minimum of 24 units of coursework in that area. The six major areas include architectural design; urban design; policy, programming, and evaluation; technology; design theory and methods, including CAD; and history, analysis, and criticism of architecture.

Course Requirements

A minimum of 44 units of coursework (normally 11 four-unit courses) is required. At least 32 units must be at the graduate level; eight units of Architecture and Urban Planning 597A or eight units of course 596A are to be included in the 32 units. The remaining 12 units may be either upper-division or graduate courses. No more than eight units of 596 courses may be applied toward the requirements for graduation.

Students in architectural design are required to complete at least 12 units of advanced design studio work plus 12 units of approved seminar courses.

Comprehensive Examination Plan

 admits that course and may be granted at the faculty member's discretion, possibly by means of a special examination.

If you can demonstrate that you already have adequate background in topics covered by specific required courses, you may petition to waive those courses and replace them with electives. However, permission to waive required courses does not reduce the minimum number of 27 courses required for the M.Arch. I degree nor does it reduce the nine-term residency requirement. The petition should be addressed to the faculty member responsible for that course and may be granted at the faculty member's discretion, possibly by means of a special examination.

You must enroll in eight units of Architecture and Urban Planning 597A, which may not be taken until all other required courses have been successfully completed. You may also apply eight units of course 596A toward the elective course requirements for graduation. Eight of the 16 units may be applied toward the graduate course requirement. All independent 500-series work must be undertaken with the guidance and approval of an Architecture/Urban Design faculty member and is graded on an S/U basis.

Students in urban design must complete at least 12 units of advanced design studio work plus 12 units of approved seminar courses.

Students in the other four major areas (policy, programming, and evaluation; technology; design theory and methods, including CAD; history, analysis, and criticism of architecture) are required to complete an approved sequence of three core courses consisting of two lecture/seminar courses which establish substantive foundations and a project course (Architecture and Urban Planning 403) which explores applications, plus 12 units of elective courses in the major area.

There may be more than one approved core sequence in each of the areas. The curriculum committee establishes and publishes a list of approved core sequences, which is reviewed and revised as necessary on a yearly basis. In special cases you may propose core sequences not on the list for approval by the committee.

Thesis Plan

Under this plan you may submit either a research project or a design project. A three-person thesis committee must be established. A research project or a design project, both of which must consist of a research project or design project on the approved topic. It may, in exceptional cases, be presented after three terms in residence, but you should normally expect to take from four to six terms to complete the thesis plan. The thesis must be submitted within two years after entry into the program.

Comprehensive Examination Plan

Under this plan you are required to establish a comprehensive examination committee, consisting of a research project or design project on the approved topic. It may, in exceptional cases, be presented after three terms in residence, but you should normally expect to take from four to six terms to complete the thesis plan. The examination must be submitted within two years after entry into the program.

Master of Arts in Architecture

Admission

This program offers an academic degree and prepares students to do specialized research or teaching in fields related to the architectural and urban design professions. Applicants are required to hold a bachelor's degree (or its equivalent comparable in standards and content to a bachelor's degree from the University of California). They should possess the experience and knowledge that would allow them to do ad-
vanced research in whatever aspect of architecture they plan to explore within the context of the master’s program.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a “creative” portfolio. No admission tests are required. In addition to the application for graduate admission, applicants should submit the "Departmental Supplement," available from the Admissions Office, Architecture/Urban Design, Graduate School of Architecture and Urban Planning.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

**Major Fields or Subdisciplines**

There are four major areas of concentration: policy, programming, and evaluation; technology; design theory and methods; and history, analysis, and criticism of architecture. In addition, you have the option of the open M.A. wherein you structure your own area of interest from the courses offered by the school.

**Degree Requirements**

(1) Candidates for the M.A. are expected to be in residence at UCLA for at least two years and undertake six terms of study.

(2) You must select and pursue one area of specialization.

(3) A thesis or a comprehensive project is required. When the committee members have signed the thesis proposal, you may take at least four and no more than eight units of Architecture and Urban Planning 598A and begin work on the thesis itself. The course should be taken at some point during your last year of study.

(4) You are required to complete a minimum of 16 courses (64 units) of graduate or upper division work, at least five (20 units) of which must be 200-series courses and at least two (eight units) of which must be 500-series courses. No more than 20 units of 500-series courses may be applied toward the total unit requirement for the degree.

(5) Up to seven courses may be taken from upper division or graduate courses offered campuswide.

(6) The University of California minimum requirements for the Master of Arts degree must be completed.

(7) You must enroll in at least four and no more than eight units of course 598A. You may also apply 12 units of course 598A toward the unit requirements for graduation.

(8) Courses in the 400 series may not be applied toward the graduate course requirement for the M.A. degree, but a limited number may be applied toward the elective course requirements.

**Thesis or Comprehensive Examination Plan**

M.A. students can choose to present a design project as a comprehensive examination (see M.A. plan I) or to do a research thesis. They should make this determination at least three months prior to the anticipated date of graduation.

**Ph.D. in Architecture**

**Admission**

Applicants must hold a bachelor’s degree from an accredited college or university. It is anticipated that most applicants will have completed a first professional degree in architecture (a five-year B.Arch. or a professional M.Arch. degree). Students with degrees in other fields are also encouraged to apply but may, at the discretion of the Ph.D. program committee, be required to complete specific coursework as a condition of admission.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, a proposed program of studies, a short biographical résumé, and examples of research and/or creative work. An interview may also be required.

Applicants whose native language is other than English are required to pass the Test of English as a Foreign Language (TOEFL) before entering. Refer to “Proficiency in English” under “Graduate Admission” in Chapter 3 for further information.

Criteria considered for admission include (1) evidence of capacity for original scholarship and research in architecture, and ability to achieve eminence in the field, (2) an outstanding academic record, including grades (3.5 minimum GPA), Graduate Record Examination (GRE) scores, and references, (3) demonstration in the work submitted of adequate communication skills, particularly writing skills, and (4) presentation of a clear and realistic statement of purpose.

**Preliminary Evaluation of Research Skills**

Students who have any background deficiencies in research skills essential for work in their chosen areas of Ph.D. specialization (e.g., mathematics, statistics, or computing) are required to round out their knowledge early in their residence. The Ph.D. program committee conducts a formal evaluation of each student before the end of the first year in residence to assure adequacy of research skills. In order to undergo the evaluation you must have made up any background deficiencies and present a research paper or other evidence of capacity for original work.

If you are unable to satisfy the committee of the adequacy of your research skills, you will either be given specific advice on how to make up remaining deficiencies and be reevaluated at a later date, or else be advised to leave the program. If you do not satisfy the committee by the end of the sixth term, you are subject to termination from the program.

**Major Fields**

Students are required to undertake programs of study that include one major area selected from the following: policy, programming, and evaluation; technology; design theory and methods, including CAD; and history, analysis, and criticism of architecture.

Majors outside these areas, or combinations of some of them, may be undertaken, subject to the approval of the Ph.D. program committee if supported by qualified faculty members willing to provide the necessary instruction and guidance.

**Minor Field Requirement**

You are required to include in your program of study at least one minor field, which must be from outside the Architecture/Urban Design Program (i.e., outside the school or within the Urban Planning Program). The objectives of the minor field requirement are to assure adequate academic breadth in your preparation and to encourage participation in the general intellectual life of the University. Students planning their minor field courses are advised accordingly.

The normal method of demonstrating competence in the minor field is to complete at least 16 units of coursework, which represents a unified course of study in that field, with grades of B or better. If a qualified Architecture/Urban Design faculty member is willing to provide the necessary supervision, the Ph.D. program committee may accept an alternative method of completing this requirement (e.g., a substantial research project).

**Mathematics, Computing, or Foreign Language Requirement**

You are expected to develop adequate skills in mathematics, computing, or foreign languages, as appropriate to your field of specialization, and are strongly advised to complete this requirement as early as possible. One of the following is required.

**Foreign Language Requirement** — You must fulfill one of the following:

(1) Satisfactory reading knowledge of two foreign languages relevant to your field of specialization as demonstrated by one of the following methods: (a) a Graduate School Foreign Language Test (GSFLT) score of 500 or better, (b) a passing grade on the Departmental Language Examination, or (c) taking and completing with grades of B or better two courses from French 3, German 3, Italian 3, Spanish 5.

(2) Superior knowledge of one foreign language relevant to your field of specialization as demonstrated by one of the following methods: (a) a GSFLT score of 600 or better, (b) distinction on the Departmental Language Examina-
tion, or (c) taking and completing with a grade of B or better one course from French 5, German 6, Italian 5, Spanish 25.

(3) English, if your language of education is not English.

Mathematics or Computing Requirement — Proficiency in mathematics and computing as demonstrated by passing an approved group of four graduate or upper division courses in mathematics, statistics, and/or computing with grades of B or better. The courses must not overlap in content and normally require prerequisites which may not be applied toward the four-course requirement.

Courses applied toward this requirement may not also be applied toward a major or minor field requirement.

Course Requirements

Generally you are required to take sufficient coursework to provide adequate preparation for the qualifying examination and the dissertation.

Each student in the program is required to take a proseminar in architectural theory, normally in Fall Quarter of the first year. The proseminar is intended to establish a general orientation to the field of architecture that will ensure that you have an appropriate foundation for the acquisition of competence in the theory, methods, and history of architecture. In consultation with your adviser, you are expected to take whatever additional coursework is necessary to reach the required level.

Holders of a professional degree in architecture before admission to the program must complete four terms in residence and 48 units of coursework in order to become eligible to take the qualifying examination. If you have an M.Arch. I, M.Arch. II, or M.A. degree in Architecture from UCLA, the Ph.D. program committee may, at its discretion, reduce these requirements to three terms in residence and 36 units of coursework. All other candidates are required to complete six terms in residence and 72 units of coursework.

Half of the units must be graduate courses in architecture/urban design, and an overall GPA of 3.0 or better must be maintained. In exceptional cases, and with prior approval of the Ph.D. program committee, upper division courses may be applied toward these requirements. At least 32 units must be in 200-series courses.

Each of the major field core sequences of three to five courses includes one project course (Architecture and Urban Planning 403), which focuses on the practical application of research results to architectural problems and provides opportunity to explore interrelations between the research and professional concerns of the field.

Students who are admitted to the Ph.D. program without having the background of a professional degree in architecture are required to take, in addition to the other course requirements, at least 24 units of graduate-level courses in architecture as recommended by their adviser and approved by the Ph.D. program committee.

No more than eight units of course 596A may be applied toward degree requirements, but eight units of course 597A and as many units of course 599A as necessary may be applied.

Qualifying Examinations

After successful completion of (1) the preliminary evaluation of research skills, (2) the mathematics, computing, or foreign language requirements, and (3) the coursework requirements, you may apply to take the qualifying examinations. They consist of a comprehensive written examination in the major field, a written examination in the minor field (this may be waived under certain circumstances), and an oral examination focusing primarily on your proposed dissertation. The qualifying examinations should be completed in one term and must not extend over more than two terms.

The major and minor field examinations are conducted by a five-member examination committee. The written examination in the major field is a substantial exercise followed by an oral presentation to the committee. The work must demonstrate your ability to teach an introductory course in the field and contribute to the progress of the field through scholarship and research. The written examination in the minor field is a short exercise and may be waived for candidates who hold a recognized master's degree in the field in which the minor is located, or at the discretion of the examination committee on the basis of outstanding grades (at least two A grades out of the four minor field courses).

The University Oral Qualifying Examination, conducted by the doctoral committee, takes place after successful completion of the two written qualifying examinations. It explores your proposed dissertation topic and your ability to undertake the proposed work successfully. After passing the oral examination, you are advanced to candidacy (the C.Phil. degree is not awarded) and may begin work on your dissertation.

Final Oral Examination

The examination involves a verbal defense of the completed dissertation before the doctoral committee.

Upper Division Courses

187. Planning and Designing Our Cities. Introduction to urban planning and urban design, with emphasis on methods and tools used in practice. Overview of planning field; physical planning for redevelopment, for projects in expanding areas, and for new towns. Lectures (with illustrated examples), field visits, and presentation of students' own projects create framework for expanding understanding of urban planning and design process. Mr. Kamnitzer

190. Human Environment: Introduction to Architecture and Urban Planning. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelter, space, and environment, to social, political, economic, technological, and theoretical determinants of urban form and different methods of analyzing our architectural heritage. Ms. Favro

203. Decision Making in Planning and Design. Lecture, three hours. Exploration of challenges of decision making in general and in the design professions, which have far-reaching effects not only on clients but also on professionals' own prospects. Psychological and mathematical approaches for improving decision quality. Mr. Adelson

204. Imaging the Future. Seminar, three hours. Introduction to social and technological forecasting, including nature and limitations of forecasting, ideology and values in forecasting, review of integrative forecasting techniques, and role of forecasting in environmental planning, design, and management processes. Mr. Adelson

219. Special Topics in the Built Environment (2 to 8 units). Lecture, three hours. Seminar on topics in the built environment selected by the faculty. May be repeated for credit. 224A-224B. Formal Theory of Composition. Lecture, three hours. Examination of design as a formal enterprise in which rules are adopted and then followed to compose, describe, and evaluate designs. Development in detail of historical, contemporary, and new examples in architecture, painting, sculpture, and other line and applied arts. Ms. Knight, Mr. March (F, W)

226A. Introduction to Graphics Programming. Lecture, three hours. Design-oriented introduction to computer graphics programming using PASCAL language. Ms. Liggett

226B. Computer-Aided Design and Modeling. Function and structure of modern CAD systems, practical and theoretical aspects of their use and evaluation; two- and three-dimensional geometry; attributes and customization. Mr. Eastman

227A. Computer Programming Applications in Architecture and Urban Planning. Lecture, three hours. Prerequisite: course 227A or equivalent. Theory and implementation for computer modeling of three-dimensional shapes and volumes; various representations; transformations, surface modeling. Mr. Eastman
227C. User Interaction Techniques in Design. Lecture, three hours. Prerequisite: course 227A or equivalent. Software algorithms and techniques for implementing modern computer-user interfaces; raster operations; cognitive models; window management systems.

227D. Data Bases in Design. Lecture, three hours. Prerequisite: course 227A or equivalent. Survey of data base management systems and their application to design and engineering. Physical and logical level system design; special issues associated with engineering and design, including metatuple management and storing of geometry.

228A-228B. Computational Foundations of Architectural Design. Lecture, three hours. Prerequisite: consent of instructor. Introduction to composition and description of architectural designs in algorithmic processes; alternative representations of shapes and their corresponding algebras, shape grammars and languages of designs, description schemes.

242. Climate Responsive Design. Prerequisite: professional degree in architecture or consent of instructor. Theory and method of design of buildings which specifically respond to local climate; intensive course in building climatology for advanced graduate studies students.

243. Energy Modelling. Prerequisite: one course in climatology and one course in environmental controls. Geometric description of a building and computerized modeling of its instantaneous energy flows, using one of the large energy analysis computer programs such as DOE 2.1B.

247B. Energy/Resource-Conserving Solar Design and Practice. Lecture, three hours. Prerequisites: course 247A and one climatology course, or consent of instructor. Examination of methods and tools of solar energy design and solar design in the built environment.

248A. Passively Integrated Solar Systems: Heating. (Formerly numbered 443A.) Prerequisites: courses 242 and 442, or consent of instructor. Analysis of different passively integrated solar systems for heating buildings, considering their anticipated performance and suitability for different climates and building types. Focus on quantitative aspects, including calculations of performance in terms of energy saving and expected indoor environmental conditions.

248B. Passively Integrated Solar Systems: Cooling. (Formerly numbered 443B.) Prerequisites: courses 242 and 442, or consent of instructor. Analysis of different passively integrated solar systems for cooling buildings, considering their anticipated performance and suitability for different climates and building types. Focus on quantitative aspects, including calculations of performance in terms of energy saving and expected indoor comfort conditions.

255A-255B. Climatic Issues in Urban Design. Seminar, three hours. In-depth examination of impact of urban design (e.g., urban density, urban profile, public parks) on some aspect of urban climate, such as urban temperature, wind field, solar radiation availability, etc. to design and engineering. Physical Mr. Givoni

258. Urban Morphology. Lecture, three hours. Exploration of urban space from a structuralist perspective. Primary emphasis on relationships between socioeconomic, experiential, and formal structures of the urban environment.

271. Elements of Urban Design. Lecture, three hours. Introduction of basic knowledge of elements and methods of urban design. Multidisciplinary approach leading to understanding of political, socioeconomic, and technological framework of urban systems and its dynamic interrelations.

272. Real Estate Development for Planners and Architects. Introduction to real estate development process specifically geared to students in planning, urban design, and architecture. Real estate market analysis, planning, and market studies, design, marketing, and sales efforts, development plan, and feasibility study. Lectures and projects integrate development process with project design solutions which are iteratively modified to meet economic feasibility tests.

274. Introduction to Physical Planning. Lecture, 90 minutes; discussion, 90 minutes. Overview of physical planning processes: alternative representations of shapes and structural systems for heating building climatology and one course in environmental controls. Mr. Milne

276. Qualitative Research Methods for Planners and Designers. Lecture, 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, user needs analysis, participant observation, questionnaire construction, interview techniques. Projects include student's own research.

277. Housing for Developing Countries. Discussion, three hours. Considerations of sociocultural, economic, and political factors in design of shelter, active, passive, and photovoltaic solar/wind systems and recycling; development, conservation, and limits to growth.

278. Qualitative Research Methods for Planners and Designers. Lecture, 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, user needs analysis, participant observation, questionnaire construction, interview techniques. Projects include student's own research.

279. Housing for Developing Countries. Discussion, three hours. Considerations of sociocultural, economic, and political factors in design of shelter, active, passive, and photovoltaic solar/wind systems and recycling; development, conservation, and limits to growth.

281A. History of the Built Environment in the U.S. (Formerly numbered 281.) Lecture, two hours; discussion, one hour. Open to graduate students working toward completion of some research assignment, three hours. Examination of solution types for given situations.

282A. Roots of Modernism. Lecture, three hours. Overview of developments in Western architecture during the 18th and 19th centuries, covering Romantic and historicist trends of the 18th, eclectic preferences of the 1800s, and turn-of-the-century modern developments including Art Nouveau. Mr. Jenkins

282B. Modern and Postmodern Architecture. Lecture, three hours. Examination of 20th-century architectural developments from revolutionary concepts of modern movement, including their manifestations in International style, to current eclectic trends of postmodernism.

284/284B. Environmental Psychology. Lecture, three hours. Introduction to models, concepts, and theories concerning impact of the environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, and attitudes toward the environment, effects of crowding and stress, personal space and territoriality.

285. Motion in Architectural Theory. Seminar, three hours. Orientation for Ph.D. students to traditional architectural theory, scholarship, and research and the current research directions and questions, through intensive reading and critical discussion.

287. Architecture in Europe and the Middle East, 400-1500. Lecture, three hours. Prerequisite: consent of instructor. Study of East-West relationships, cultural concerns, and social interactions as seen through some major urban and architectural developments in Europe and the Middle East.

288. Renaissance and Baroque Architecture. Lecture, three hours. Examination of European architecture from the 15th to 17th century, with primary focus on developments in the Italian peninsula. Examination of Renaissance and baroque structure and forms, and of the ideas and ideals which underlie the appearance of these structures as well as aesthetic characteristics.

289. Special Topics in Architecture and Urban Design (2 to 4 units). Prerequisite: consent of instructor. Selected academic topics initiated by students, student teams, or faculty and directed by a faculty member. May be repeated for credit.

290. History and Theory of Landscape. Lecture, three hours. Historical introduction to principles of garden design. Exploration of key ideas and concepts through case studies of gardens, landscape architecture, and vernacular landscape.

291A-291B. Theory of Architectural Programming (2 units each). (Formerly numbered 291.) Lecture, 90 minutes; discussion, 90 minutes. Exploration of concepts and methods of architectural programming and its interrelation to design process; planning of design process; various techniques for determination of program contents, basic conditions, resources, and constraints; identification of selection process for given situations. In Fall and Spring.

292. Social Meaning of Space. Discussion, three hours. Evolution of concept of space from its origins in ritual and primitive social organizations, concentrating on the child's evolving concept of space. Examination of solution types for given situations.

294A-294B. Environmental Psychology. Lecture, three hours. Examination of model, concepts, and theories concerning impact of the environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, and attitudes toward the environment, effects of crowding and stress, personal space and territoriality.

296. Proseminar in Architectural Theory. Seminar, three hours. Orientation for Ph.D. students to traditional architectural theory, scholarship, and research and the current research directions and questions, through intensive reading and critical discussion.

297. Group Process in Design. Lecture, two hours; discussion, two hours; laboratory, two hours. Prerequisite: course 291A or consent of instructor. Examination of solution types for given situations.
414. Major Building Design I. Studio, 12 hours. Prerequisite: second-year standing. Design projects which enable students to concentrate on specific architectural issues, with emphasis either on treatment in large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, environmental controls, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form. (F)

415. Major Building Design II. Studio, 12 hours. Prerequisite: course 414. Design projects which enable students to concentrate on specific architectural issues, with emphasis either on treatment in large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, mechanical systems, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form. Special emphasis on integration of environmental control systems. (F)

416. Comprehensive Design Studio (4 to 8 units). Studio, 12 hours. Prerequisites: completion of required sequence, including course 414 and consent of instructor. Course offers students opportunities to prepare major projects in a professional setting by designing the physical, programmatic, and environmental aspects of the project. (F, W, Sp)

421A-421B. Architectural Drawing (2 units each). (Formerly numbered 421.) Discussion, 90 minutes; studio, 90 minutes. Description of architectural drawing techniques and skills, including sketching, diagramming, freehand drawing, drafting techniques, introduction to axonometric projection and perspective. In Progress grading. (F, W)

422. Advanced Architectural Drawing (2 to 4 units). Discussion, three hours; studio, three hours. Prerequisites: courses 421A-421B or consent of instructor. Emphasis on exploration of interrelationship between drawing and design. Development of more advanced design strategies and modes of graphic exploration and presentation. (W)

433. Structures III. Lecture, three hours. Prerequisites: course 432, consent of instructor. Introduction to structural analysis. Structural materials and structures. Wind loads: distribution with height, design for comfort, structure behavior under lateral loads. Steel construction and concepts for high-rise structures. Structural materials in timber and steel. Structural materials in concrete and masonry. 90 minutes. Design of buildings. Mr. Aroni, Mr. Iyengar (Sp)

436. Construction Documents. Studio, eight hours. Prerequisite: consent of instructor. Office/field communications explored through design of simple structure and creation of key working drawings and outline specifications. Introduction to CADD (computer-aided design and drafting) systems for this purpose. Mr. Schoen (Sp)

441. Environmental Control Systems. Prerequisite: consent of instructor. Design of mechanical systems necessary for functioning of large buildings: air handling, fire and life safety, heating, ventilation, and horizontal circulation, communication and electrical power distribution, analysis of interaction of these systems and their integrated effects on architectural form of a building. (W)

442. Building Climatology. Prerequisite: basic physics. Design of buildings which specifically respond to local climate; utilization of natural energies, human thermal comfort; sun motion and sun control devices; use of plant materials and landform to modify microclimate; interaction of architectural form and physical constraints, user needs, performance specifications. Systems engineering and design. Measurement regulation, modular coordination, closed systems, open systems, design of systems, subsystems, components, elements, and materials. (W)

444. Light and the Visual Environment. Prerequisite: one course in building climatology or consent of instructor. Exploration of extent to which physical form of a building controls the luminous environment of its occupants. Flexibility of design and systems; perception of light. Illumination of spaces; parameters of human visual comfort. Mr. Milne

445. Architectural Acoustics (2 to 4 units). Lecture, three hours. Prerequisite: consent of instructor. Applied course in acoustical design in architecture, including design of partitions to provide good sound insulation. Acoustic materials. Acoustical design of auditoriums. Control of noise in HVAC systems. Mr. Harris

448. Communication and Diffusion of Innovation. Seminar. Prerequisite: one course in the building industry and design professions. Successful creation and introduction of innovative products, processes, and technologies. Students expected to contribute to the meager literature of the field through case studies and projects. Mr. Givoni, Mr. Milne (Sp)

461. Architectural Practice. Seminar, three hours. Historical development of the profession; role of architect in contemporary society; current forms of practice and emerging trends. Contractual relationships, ethical responsibility, office management and promotion. Case studies of practical process. Mr. Lotery (W)
Urban Planning

Professors
Leland S. Burns, Ph.D.
John Friedmann, Ph.D.
Dolores Hayden, M.Arch.
Peter Kamnitzer, M.P.I., M.Arch.
Peter Morris, B.A.
Donald Shoup, Ph.D.
Edward W. Soja, Ph.D.
Martin Wachs, Ph.D. (Distinguished Teaching Award)

Associate Professors
Leobardo Estrada, Ph.D.
J. Eugene Grigsby III, Ph.D.
Susanna B. Hecht, Ph.D.
Allan D. Heskin, Ph.D., LL.B., Program Head
Jacqueline Leavitt, Ph.D.
Robin Liggett, Ph.D. (Distinguished Teaching Award)
Paul Ong, Ph.D.
Michael Storper, Ph.D.

Assistant Professor
Margaret FitzSimmons, Ph.D.

Scope and Objectives
The professional urban planner works on the creation and management of the urban envi-

ronment, including its physical, economic, and social elements. Housing, transportation, air
and water quality, the preservation of historic communities, and the development of commu-
nity-level economic and employment pro-
grams are some of the tasks undertaken by
recent graduates of the UCLA Urban Planning
Program. Graduates have taken positions in
local, state, and national governments, and in-
creasingly with private companies whose prod-
ucts and services affect the urban environ-
ment. While most UCLA graduates find posi-
tions in the U.S., the program offers the oppor-
tunity to specialize in development planning
abroad, including rural development, and
many graduates have found positions in Latin
America, Africa, and Asia.

The program offers a two-year Master of Arts
degree and a Ph.D. Concurrent degree pro-
grams allow students to combine study for an
M.A. in Urban Planning with work toward an
M.B.A. in the John E. Anderson Graduate
School of Management, a J.D. in the School
of Law, or an M.A. in Latin American Studies.

The Urban Planning Program at UCLA takes
pride in its collegial atmosphere. It features a
lively mix of students from diverse academic
backgrounds, drawn from many foreign coun-
tries and from every avenue of American life. It
includes many members of racial and ethnic
minority groups. A number of student organi-
zations provide an interesting program of ex-
tracurricular activities.

Requirements for Graduate Degrees

Admission
The Urban Planning Program admits students
in Fall Quarter only, and you should begin the
application process a year in advance.

Prospective applicants may obtain a detailed
program statement and Graduate Division ap-
lication by writing to Admissions, Urban Plan-
ning Program, Graduate School of Architec-
ture and Urban Planning, B102 Perloff Hall,
UCLA, Los Angeles, CA 90024-1467.

A statement of purpose, letters of recommen-
dation, grade-point averages, and relevant ex-
erience are all considered in the review pro-
cess for admission. Applicants must submit
transcripts from each college or university at-
tended and are encouraged to submit Gradu-
ate Record Examination (GRE) scores. The
Test of English as a Foreign Language
(Toefl) is required of applicants whose na-
tive language is not English, unless they have
completed at least two years of university-level
coursework at an English-language institution.
A score of 600 on the TOEFL is expected; ap-
plicants with a score below 550 are not consid-
ered for admission. Refer to "Proficiency in
English" under "Graduate Admission" in
Chapter 3 for further information.

Areas of Concentration
You should select an area of concentration by
the end of your first term in the program. The
areas of concentration distinguish between
different kinds of issues and contexts in which
planners characteristically become engaged,
as a professional career or a field of research.
They are not meant to be mutually exclusive.
The four areas of concentration are:

Urban and Regional Development — This
area of policy concentration concerns the in-
terrelated aspects of area development in both
the U.S. and Third World nations. The per-
spective on questions of area development is
that of political economy and spatial analysis.
Industrialization, urbanization, and rural de-
velopment are major focal points of interest.
Within this area, you are expected to select an
emphasis either on developments within the U.S.
and other advanced industrial countries, with a
focus on local community and labor market
areas, or development in the Third World.

Social Policy and Analysis — The analysis of
social services includes questions of produc-
tion and distribution — how efficiently are ser-
vice providers, who pays, and who benefits?
These questions lead to more fundamental
ones about the functions of planning and so-
cial policy. Social policy comprises the whole
context of social actions which together deter-
mine the distribution of goods, services, and
opportunities between rich and poor, men and
women, young and old, and people of different
ethnic and social origins. You may specialize in
transportation, housing, community and local
development, social services, social policy, or
analytic methods.

Environmental Analysis and Policy — The nat-
ural environment is both the context within
which all human activities take place and a
social product of those activities. Environmen-
tal planning begins as an attempt to mitigate
often unforeseen consequences of economic
growth and expansion where these seem to
threaten social well-being and continuing po-
litical consensus. A special feature of this area
of concentration is its emphasis on problems
arising from the intensive use of environmental
resources, viewed from the perspective of po-
litical economy.

The Built Environment — This area of con-
centration represents a blending of urban planning
and architecture. It deals with the social and
economic forces affecting the three-dimen-
sional built environment on an urban scale.
Within this area, you can select one of three
specializations — history, theory, and criticism of the built environment; public policy and the built environment; or urban design and physical planning.

Additional Areas of Concentration — In special circumstances, you may devise your own area in consultation with appropriate faculty members. Final approval of the proposed additional area of concentration must be obtained from the program head.

International Development Studies

If you wish to focus your studies on policy and planning problems of newly industrializing countries, you can do so in the context of one of the major areas of concentration. Several faculty members have extensive experience abroad and a continuing research interest in these areas. Coursework is currently offered in rural development, urbanization policies, housing, the environmental and social impacts of resource-based development, the role of women in development, and alternative development models. In addition, a number of courses are concerned with the evolving world economy, general development issues, and related ideological questions.

In its several area studies centers, UCLA has major institutional resources that facilitate research and furnish a rich environment in which to study development issues in a global context. Opportunities for work exist with international agencies, voluntary agencies, and foreign governments. Doctoral students generally pursue careers in teaching, research, and consulting.

Master of Arts in Urban Planning

The M.A. degree is fully accredited by the Planning Accreditation Board, a joint undertaking of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Course Requirements

You must complete a minimum of 72 units. Students generally take 12 units per term, completing the program in two years.

Core Course Requirement — The core areas comprise knowledge common to all areas of planning, regardless of your specific focus. Six core courses (24 units) are required, including Architecture and Urban Planning 207, 220A (waiver by examination), 220B, two core courses in theory and context, and one additional course selected from those remaining on the core courses list in methods, theory and context, and/or practice.

On entering the program, you must pass examinations indicating competence in basic mathematics and microeconomics before enrolling in courses 220A and 207 respectively. Copies of sample examinations are mailed with admission offers to applicants accepted into the program. An undergraduate course in college algebra or precalculus should provide suitable background to pass the basic mathematics examination. An undergraduate course in microeconomics should be sufficient preparation for the microeconomics examination.

You are strongly encouraged to prepare for the examinations before enrolling so you can take courses 207 and 220A offered only once per year in Fall Quarter during your first term of studies.

Area Course Requirement — You must select an area of concentration. A list of courses is prepared for each area of concentration, from which you are required to select at least six (24 units); two are generally specified.

Fieldwork Requirement — Master’s students who come to the Graduate School of Architecture and Urban Planning without substantial prior experience in planning are required to complete eight units (300 total hours) of fieldwork. Fieldwork is defined as clinical or “real world” experience with a planning office, a private organization involved in planning, a community action agency, or applied research within a clinical context (excluding conventional university-based research projects). Details on fulfilling this requirement are available in the program office.

You are encouraged to seek waivers for requirements which have been met in your previous education.

Thesis or Comprehensive Examination Plan

In partial fulfillment of the requirements for the M.A. degree, you are required to complete either a thesis or one of two comprehensive examination plans (Plan A or Plan B) during your second year of study. Each option has its own deadline for selection, and once a deadline has passed, you are limited to options with subsequent deadlines.

Thesis Plan — The master’s thesis is intended to provide the opportunity for independent scholarly research and should be the length and quality of a publishable journal article. If you select this option, in order to meet established deadlines, you must begin thesis work no later than Fall Quarter of your second year. Academic credit for thesis preparation is given through Architecture and Urban Planning 205 (four units required in Winter Quarter) and 598P (eight units over two terms).

Comprehensive Examination Plan A (Long-Term Project) — A client-oriented project is recommended for students who are more interested in practical application of what they have learned in their coursework than in scholarly research. The time span and magnitude of the final project approximates that of the thesis. Academic credit for project involvement is given through Architecture and Urban Planning 597P (four units each in Winter and Spring Quarters of your second year of studies).

As an alternative under Plan A, you may take courses 217A-217B (group comprehensive project sequence), offered Winter and Spring Quarters, to fulfill the comprehensive examination requirement.

Comprehensive Examination Plan B (Two-Week Examination) — Examinations for all areas of concentration are normally offered during the break between Winter and Spring Quarters. A committee of three faculty members (appointed by the area of concentration coordinator) offers, reads, and grades the examination. No course credit is received.

Concurrent Degree Programs

J.D./M.A.—Urban Planning

The Graduate School of Architecture and Urban Planning and the School of Law offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both schools and receive both the J.D. and M.A. degrees at the end of four years.

Students interested in the program must apply and be admitted to the School of Law, the Urban Planning Program, and the Graduate Division. For additional information, contact the graduate counselor in the Urban Planning Program.

M.A.—Latin American Studies/M.A.—Urban Planning

The Urban Planning Program and the Latin American Studies Program offer a two-year concurrent plan of study leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The degree program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Students should apply through the Urban Planning Program. Further details may be obtained from the graduate counselor in the Urban Planning Program.

M.B.A./M.A.—Urban Planning

The Graduate School of Architecture and Urban Planning and the John E. Anderson Grad-
uate School of Management offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service.

Students must contact both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Graduate School of Architecture and Urban Planning Admissions Office. Further details may be obtained from the graduate counselor in the Urban Planning Program.

Ph.D. in Urban Planning

A more detailed description of the program is available from the graduate counselor.

Admission

Students admitted to the Ph.D. program must have a master's degree in planning or a closely related field and a minimum 3.5 grade-point average in all graduate work completed. Employment experience in planning or a closely related field is strongly recommended.

In your statement of purpose, you should address the following questions: (1) career plans and how a Ph.D. in planning will contribute to those plans, (2) your intended area of concentration, and (3) specific research interests and dissertation plans. Before you can be accepted into the program, two faculty members must agree to assume responsibility for guiding you in your studies.

Foreign Language Requirement

A foreign language is not required either for admission or completion of the doctoral program. However, students who are expecting to do dissertation research abroad are strongly advised to obtain the necessary language skills prior to beginning such research.

Course Requirements and Qualifying Examinations

You must demonstrate a high level of competence in an area of concentration and in planning theory and history as measured by coursework and doctoral examinations. In addition, you must satisfy requirements in research methods and outside coursework and are required to take Architecture and Urban Planning 208 to aid in preparation of dissertation research and writing.

Planning Theory and History Requirement

Planning theory is concerned with the ways that philosophers and social scientists have examined the question of how scientific and technical knowledge are to be joined to practice and action, with particular emphasis on the field of urban and regional planning. Planning history looks at how planning has evolved in the U.S., Western Europe, and elsewhere in the world as a form of institutionalized practice.

Two advanced courses, Architecture and Urban Planning 210B and 210C, are required during the first year and must be passed with grades of A- or better. You may choose to waive the two courses by taking a six-hour comprehensive written examination.

Area of Concentration Requirements/Examination

The area of concentration is defined as a subject in which you are prepared to teach a sequence of courses and to conduct advanced research. The area should be generally recognized by academics in other planning schools and should be substantially broader than a dissertation topic.

You must prepare for an area of concentration examination by submitting for approval a plan of study to your advisory committee and to the coordinator of doctoral studies, preferably no later than the beginning of Winter Quarter of your first year. The plan must include (1) a short description of the area selected for study, (2) an indication of your major focus of research, (3) a short bibliography, and (4) a list of suggested courses and research papers through which you propose to prepare for the area examination. The list of courses must include a minimum of three from outside the department and three methods courses (see below). Once approved, the plan is filed with the graduate counselor. The normal time for completion of the area of concentration requirement is two academic years.

The examination has two parts — written and oral. The written examination is given each term simultaneously to all eligible students on Friday of the seventh week of classes; the oral examination is given before the end of the same term. You may receive academic credit to prepare for the examination by enrolling in Architecture and Urban Planning 597P.

Research Methods Requirement

You must first demonstrate competence in statistical methods at the master's level (Architecture and Urban Planning 220B or equivalent) either by completing course 220B with a grade of B+ or better or by submitting a waiver petition with appropriate documentation.

Additionally, as part of your plan of study, you must take a preapproved set of three advanced courses in research methods. These courses must be closely related to your area of concentration and must be completed with a grade of B+ or better. You may petition to waive this requirement on the basis of prior coursework.

Oral Qualifying Examination

After successful completion of all requirements in planning theory and history, the area of concentration, research methods, and outside coursework, you are required to take the University Oral Qualifying Examination at which you defend your dissertation proposal. The examination is administered by a committee consisting of a minimum of five faculty members, two of whom must be from outside the school, and should be taken no later than the end of your third year of doctoral study. To assist in the development of the proposal, you are required to complete Architecture and Urban Planning 208, preferably by the end of your first year.

Dissertation/Final Oral Examination

The doctoral committee guides you in preparing the dissertation, which is to be a monograph representing an original contribution to planning knowledge.

The final oral examination, taken only at the discretion of the doctoral committee, involves a defense of the completed dissertation.

Upper Division Courses

179. Variable Topics in Urban Planning (2 to 8 units). Lecture, three hours. Variable topics course in selected subjects in social policy and public services, urban and regional development, natural environment and resources, and the built environment. May be repeated for credit.

187. Planning and Designing Our Cities. See listing under "Architecture/Urban Design." Mr. Kamnitzer

197. Planning for Minority Communities. Lecture, three hours. Introduction to inner-city policy issues on three separate levels: (1) each student develops a comprehensive inner-city urban program using materials from Alternatives Inner-City Future Exercise, (2) each student is expected to identify value assumptions and theories of social justice implicit or explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions that emphasize minority issues which affect implementation. Mr. Estrada (F)

199. Special Studies (2 to 8 units). See listing under "Architecture/Urban Design."

Graduate Courses

M202A. Public Control of Land Development (3 to 6 units). (Same as Law M266.) Lecture, three hours. Analysis of legal and constitutional constraints on land-use planning and development; administrative and environmental regulatory processes, including relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required. Mr. McGee (WSp)
205. Research Seminar for Master's Thesis. Discussion, three hours. Prerequisite: A grade of B or better in courses 203 and 206. Seminar, two hours; discussion, one hour. Examination of selected topics in planning and related social science. Simple regression, correlation, causal relationships, and methodology. Topics include housing, environmental planning, urban development, and regional planning. May be repeated for credit.

206A. Urban Data Analysis: Demographic Applications. Lecture, three hours; laboratory, one hour. Prerequisites: courses 205 and 206. Use of computer programs for analysis of demographic and other socioeconomic data. Topics include data sources and applications. May be repeated for credit.

206B. Urban Data Analysis: Planning Models. Lecture, three hours; laboratory, one hour. Prerequisite: course 205. Use of computer programs for analysis of demographic and other socioeconomic data. Topics include data sources and applications. May be repeated for credit.

207. Public Resource Allocation. Lecture, three hours. Prerequisite: passing score on microeconomics, macroeconomics, or a combination of the two. Use of computer programs for analysis of public resource allocation problems. Topics include review of marginal analysis, difference between efficiency, and equity, public goods, and free-rider problem. May be repeated for credit.

208. Seminar in Advanced Research Methods. Lecture, three hours. Prerequisites: doctoral standing, consent of instructor. Required of Ph.D. students in second year. Process of developing dissertation proposal; introduction to alternative conceptions of science. Topics include current research in planning. May be repeated for credit.

209. Special Topics in Planning Theory (2 to 8 units). Lecture, three hours. Seminar on topics in planning theory selected by faculty. May be repeated for credit.

210A. History of Planning Thought since 1800. Lecture, three hours. Prerequisite: reading list of major works on historical development of planning. May be repeated for credit.

210B. Comparative History of Planning Practice. (Formerly numbered 212.) Lecture, three hours. Limited to Ph.D. and advanced M.A. students. History of city planning, its criticism, and principles of planning through the 19th and 20th centuries. Comparison of development of the field in several countries, especially English-speaking countries.

210C. Colloquium in Planning Theory. (Formerly numbered 210B.) Lecture, one hour; discussion, two hours. Prerequisite: consent of 210A. Limited to Ph.D. students. Introduction to some central theoretical issues of contemporary planning.

211. Law and the Quality of Urban Life. Lecture, three hours. Introduction to law as an urban discipline, focusing primarily on property law and the role of law in urban planning. Topics include ownership of land, use of land, and the role of law in urban planning. May be repeated for credit.

212. Professional Development Seminar. (Formerly numbered 223B.) Lecture, 90 minutes; discussion, 90 minutes. Topics include professional ethics, case studies, and professional responsibilities. May be repeated for credit.

213. Urban and Regional Economic Development. Lecture, three hours. Critical history of the evolution of urban and regional economics. Topics include the role of urban and regional economics in shaping the economic development of regions.

214. Theories of Economic Change and Growth. Lecture, three hours. Prerequisites: courses 213 or equivalent. Examination of the role of economic change and growth in shaping the economic development of regions.

215. Spatial Statistics. Formerly numbered M215B. Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Specific techniques useful in analyzing spatial data and models of spatial distributions.

216A. Urban Planning: Regional and International. Lecture, three hours. Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

217A-217B. Comprehensive Planning Project. Prerequisite: second-year standing. Comprehensive planning project focused on a particular city or region. May be repeated for credit.

218. Urban and Regional Economic Development. Lecture, three hours. Prerequisites: courses 213 and 215. Examination of the role of urban and regional economics in shaping the economic development of regions.

219. Special Topics in the Built Environment (2 to 8 units). Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

220. Quantitative Analysis in Urban Planning I. Lecture, three hours. Prerequisite: passing score on mathematics proficiency examination given first day of class. Introduction to mathematical and statistical concepts and methods with applications in urban planning. May be repeated for credit.

220B. Quantitative Analysis in Urban Planning II. Lecture, three hours. Prerequisite: course 220A or equivalent. Examination of the role of mathematical and statistical concepts and methods with applications in urban planning. May be repeated for credit.

221. Evaluation Methods. Lecture, three hours. Prerequisites: courses 220 and 220A. Examination of methods used to evaluate the effectiveness of planning programs and policies. Topics include the role of evaluation in urban planning. May be repeated for credit.

222. Institutional and Organizational Change. Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

223. Professional Development Seminar. (Formerly numbered 223B.) Lecture, 90 minutes; discussion, 90 minutes. Topics include professional ethics, case studies, and professional responsibilities. May be repeated for credit.

224. Introduction to Urban Planning. Lecture, three hours. Examination of the role of urban planning in shaping the economic development of regions.

225. Special Topics in Planning Methods (2 to 8 units). Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

228. Special Topics in Planning Methods (2 to 8 units). Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

231. Urban Housing and Community Development (3 to 6 units). (Same as Law M285.) Lecture, three hours. Examination of the role of urban planning in shaping the economic development of regions.

232A. Introduction to Regional Planning: Evolution of Regional Planning. Lecture, three hours. Examination of the role of urban planning in shaping the economic development of regions.

233. Political Economy of Urbanization. Review of basic mathematical concepts fundamental to urban and regional planning. Examination of the role of urban and regional economics in shaping the economic development of regions.

234. Urban and Regional Economic Development. Lecture, three hours. Examination of the role of urban and regional economics in shaping the economic development of regions.

235A. Urban and Regional Economic Development. Lecture, three hours. Examination of the role of urban and regional economics in shaping the economic development of regions.

236A. Urban and Regional Economic Development. Lecture, three hours. Examination of the role of urban and regional economics in shaping the economic development of regions.

237. Urban and Regional Economic Development. Lecture, three hours. Examination of the role of urban and regional economics in shaping the economic development of regions.

238. Urban and Regional Economic Development. Lecture, three hours. Examination of the role of urban and regional economics in shaping the economic development of regions.

239. Urban and Regional Economic Development. Lecture, three hours. Examination of the role of urban and regional economics in shaping the economic development of regions.

240. Urban and Regional Economic Development. Lecture, three hours. Examination of the role of urban and regional economics in shaping the economic development of regions.
236B. Urban and Regional Economic Development II. Lecture, three hours. Prerequisite: course 236A. Examination of local economic development theory and history and issues associated with different public policies. Topics include changing patterns of employment, job creation, job retention, and forms of income redistribution aimed at stabilizing a community's economy, with particular concern for women, minorities, and the poor. Ms. Haas (Sp)

236C. Urban and Regional Economic Development III. Discussion, three hours. Prerequisite: course 236B. Advanced seminar in community economic development, involving case study analysis, fieldwork, and individual student projects. Ms. Haas (F)

238. Advanced Seminar in Urban and Regional Development. Lecture, two hours; discussion, two hours. Prerequisite: doctoral standing or consent of instructor. Advanced research seminar on major issues in urban and regional development theory and policy. Topics usually reflect faculty research projects and change from year to year. May be repeated for credit. Mr. Soja (Sp)

239. Special Topics in Urban and Regional Development Policy (2 to 8 units). Seminar on topics in urban and regional development policy selected by faculty. May be repeated for credit.

241A. Urban Transportation Planning I. Lecture, three hours. Historical development of urban transportation planning and current political and administrative frameworks for planning; relationship between transportation systems and urban form; historical review of automobile and public transit systems; urban highway and transit planning programs; financing of urban transportation; environmental and social impacts of transportation systems; current policy dilemma; controlling the automobile, promoting mass transit, energy issues, needs of elderly and handicapped. Mr. Wachs (F)

241B. Urban Transportation Planning II. Prerequisites: courses 207, 220B, and 241A, or consent of instructor. Economic and social basis for travel; basic data sources for examining urban travel and transportation; techniques of forecasting and analyzing travel; mathematical models of travel; trip generation, trip distribution, modal split, traffic assignment, and route choice; uses of forecasts and approaches to transportation system and project evaluation. Mr. Wachs (Sp)

241C. Urban Transportation Planning III. Lecture, three hours. Prerequisites: courses 207 and 220B, or consent of instructor. Financing street and highway systems; public transit finance, including fare and subsidy policy; transportation system management and transportation demand management; ridesharing; transportation programs to meet needs of elderly and disabled. Mr. Wachs (Sp)

M242A. Topics in Asian American Studies: Asian Migration to the U.S. (Same as Asian American Studies M297B.) Prerequisite: graduate standing or consent of instructor. Emphasis on Asia as main regional source for international migrants. Topics include patterns and theories of international migration and their relevance to the Asian experience, sending and receiving country perspectives, research and policy issues. S/U or letter grading.

M242B. Topics in Asian American Studies: Urbanization in Asia — Policy Issues and Problems. (Same as Asian American Studies M297C.) Prerequisite: graduate standing or consent of instructor. Urbanization in less-developed countries in Asia with specific reference to its peculiar features and characteristics, and relationship of urbanization to the development process. Topics include urbanization development, structural and policy determinants of urbanization, urban policy and strategies, and country case studies. S/U or letter grading.

244. Housing Markets. Lecture, three hours. Ways that housing markets should but sometimes do not work in developed economies. Interaction of demand factors such as population distribution, household formation, income, and credit, as well as their particular impacts on groups of the population. Topics include filtering, housing search, segregation, pricing, production efficiency, organization of construction industry, market failure, and appropriate policy responses. Mr. Burns (W)
245. Urban Public Finance. Lecture, three hours. Prerequisites: courses 207 and 220A, or consent of instructor. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefit assessments to finance neighborhood public investment, private and intergovernmental contracting as method of supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market.

Mr. Shoup (W)

246. Housing in Social and Economic Development Policy. Lecture, three hours. Seminar on dimension of housing in national and regional development strategies, with focus on policies for Third World nations. Topics include nature of housing "need," market responses, evolution of housing policy, theory of intervention, alternative policies for increasing housing supply. Numerous case studies.

Mr. Burns (Sp)

249. Special Topics in Social Policy and Analysis (2 to 8 units). Lecture, three hours. Seminar on topics in social policy and analysis selected by faculty. May be repeated for credit.

250. Introduction to Social Policy. Lecture, three hours. Analysis of demographic changes, history, needs, and ideological debates which affect development of social policy in the U.S., compared with Western Europe.

Mr. Morriss (W)

251. Planning for Multiple Publics. Lecture, three hours. Exploration of planning needs of various social groups in urban settings, using existing literature and research studies to determine appropriate mechanisms of planning for multiple publics. Analysis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and methodological problems of planning for multiple publics.

Generalized in the context of one case study.

253. Social Theory for Planners. Lecture, three hours. Prior knowledge of sociological theory useful but not essential. Sociological tradition as it relates to issues of change, role of the state, and relationship between knowledge and values as they affect planning. Insights and crucial issues which have arisen from social theory as they relate to concerns of planning and social policy. Contemporary developments in urban sociology.

Mr. Harris (Sp)

254. Survey Methods in Planning. Lecture, three hours. Prerequisite: course 220B or equivalent. Use of surveys in planning. Conducting of a small area survey, with emphasis on methods to obtain quality data appropriate for planning: questionnaire development, sample design, interviewing, data coding, and analysis. Presentation of survey to planners or public agencies.

Mr. Levine (W)

256. Social Impact Analysis. Lecture, three hours. Exploration of ways of assessing and determining social impacts on communities resulting from large-scale planning projects. Students develop mitigation measures to address identified adverse consequences.

Mr. Grigsby (F)

260A. Political Economy and the Environment. Lecture, three hours. Debate about environmental policy is increasingly couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and alter economic relationships in the global market system. Examination of assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy.

Ms. FitzSimmons (W)

260B. Politics, Institutions, and the Environment. Lecture, three hours. Planners face some important dilemmas in designing institutions and policies intended to correct or offset environmental impact. Introduction to these problems, focusing on essential theoretical questions that must be addressed in attempts to control environmental problems. Examination of problems of environmental development in policy in light of growing environmental movements; evaluation of current approaches to environmental problems, considering their institutional forms and epistemological foundations.

Mr. Gottlieb (Sp)

261. Land-Use Control: Economic and Structural Perspectives. Lecture, two hours; discussion, one hour. Prerequisites: courses 260A and 260B, or consent of instructor. Comparative study of regulatory methods of land-use control to command or plan methods. Basics of land use as a commodity in first part: land economics, land markets. Development, historically, of a structuralist perspective on use of land in cities and regions in second part. Land-use regulation (in third part) in light of first two, to see how effective it is in steering course of land development. Regulatory approach compared with real planning.

Ms. Pinet (W)

262A. Urban Environmental Problems: Toxics—Science and Policy. Lecture, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Biologically active chemicals in urban environments are focus of increasing public concern. Toxicological and health effects health experts and planners are being asked to assess risks such substances present and to take such risks into account in planning process. Toxics pose a planning problem which requires simultaneous consideration of toxicology and environmental issues, as well as a broad range of policy considerations, including environmental issues, economic development questions, and social services policy.

Ms. Simmons, Mr. Froines (Sp)

262B. Urban Environmental Problems: Water Resources. Lecture, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Water is life and wealth in California, which has world's most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments are increasing. Examination of impact of water development; review of geography of California water generally. Use of water in California: agricultural irrigation, water pricing, water rights, and water districts. Consideration of a resource planning perspective in contrast to a strict development-oriented approach.

Mr. Gottlieb (W)

263. Natural Resource Conservation. Discussion, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Exploration, through reading, discussion, and student presentations, of meaning of resource conservation, its desirability, and ways of achieving it. Emphasis on integrated management of public lands, though students may attend particularly to a specific resource (minerals, water, timber, wilderness).

Ms. Pinet (M)

264. Environmental Law (3 to 6 units). (Same as Law M290C.) Lecture, three to three and one-half hours. Examination of the field of environmental law through analysis of various legal issues and public policy: legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as a means of illustrating policy issues. May be repeated for credit.

Ord. (Sp)

265. History of American Environmentalism. Discussion, three hours. Prerequisites: courses 260A, 260B. Readings, discussion, and student papers on conservationist/preservationist movement at turn of the century, environmental implications of those concepts of regional integration developed by RPAA and others in the 1920s which were institutionalized in the New Deal, rise of environmental activism after World War II, and emergence of a legislative and judicial framework for environmental polices.

Mr. Gottlieb (F)

266. City and Countryside in the Third World. Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of impact of mercantilism, colonization, capitalism, and socialism on various urban and rural socioeconomic structures in the Third World. Presentation, through evaluation of theoretical writings and current policy dilemmas, of complexities in development of countries. Emphasis on linkages between policy and rural and urban impacts. Gives students important background for courses 267A, 267B, and many of the other planning courses addressing Third World issues.

Ms. Connims (F)

267A. Resource-Based Development Planning. Discussion, three hours. Recommended prerequisite: course 266. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region) associated with it, its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development.

Ms. Hecht (F)

267B. Rural Development Issues. Lecture, three hours. Recommended prerequisite: course 266. Development more thoroughly of themes raised in earlier courses. Topics may include peasants, development and the state, decision-making, commodification of land reform, agrarian revolution, and special problems of tropical development. May be repeated for credit with consent of instructor.

Mr. Hecht (Sp)

268. Advanced Seminar in Environmental Analysis and Policy. Lecture, discussion. Prerequisite: consent of instructor. Examination of broad issues related to environmental and resource planning. Generally intended for second-year M.A. and Ph.D. students. May be repeated for credit.

269. Special Topics in Environmental Analysis and Policy (2 to 8 units). Lecture, three hours. Seminar on topics in environmental analysis and policy selected by faculty. May be repeated for credit.

270. Homelessness: Housing and Social Service Issues. Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what social services and housing are available, programs — existing and proposed — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless.

Ms. Leavitt (F)

272. Real Estate Development for Planners and Architects. See listing under "Architecture/Urban Design." Mr. Kamnitzer, Mr. Schwartz (W)

273. Site Planning. Lecture, 90 minutes; laboratory, 90 minutes. Introduction to principles of site planning and design. Introduction to the planning problems which require simultaneous consideration of toxicology and other issues of science, and a broad range of policy considerations, including environmental issues, economic development questions, and social services policy.

Ms. Goldstein (W)

274. Introduction to Physical Planning. See listing under "Architecture/Urban Design." Mr. Goldstein (W)

275. Inner-City Housing Policies: Old and New Approaches. Lecture, 90 minutes; discussion, 90 minutes. Study of abandonment, gentrification, and displacement in inner cities, with emphasis on New York City. Look at research on housing conditions and community development policies, with particular emphasis on limited equity cooperatives; analysis of rehousing policies; review of new conceptual and legislative proposals.

Mr. Haskin, Ms. Leavitt (W)

276. Planning Workshop (4 to 8 units). Lecture, one hour; discussion, one hour; laboratory, four hours. Prerequisite: consent of instructor. Planning projects with focus on physical planning.

277. Historic Preservation: Principles and Practices. Lecture, 90 minutes; discussion, 90 minutes. Overview of preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, and social issues.

Ms. Goldstein (Sp)
278. Qualitative Research Methods for Planners and Designers. See listing under "Architecture/Urban Design." Ms. Loukaitou-Sideris (W)

281A. Introduction to History of the Built Environment in the U.S. (Formerly numbered 281.) Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. Introduction to history of physical forms of urbanization in America; survey of economic, political, social, and aesthetic forces behind creation of built environments Americans have experienced in their daily lives. Ms. Hayden (Sp)

281B. Advanced Seminar in History of the Built Environment. Discussion, three hours. Prerequisite: course 281A. Extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on history of the built environment in the U.S. Ms. Hayden

283. History of the American Household and American Home. Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: course 281A or consent of instructor. Introduction to history of housing design in the U.S., emphasizing changing roles of women and men from Colonial times to the present and effects of these social changes on physical form of the dwelling and settlement. Discussion of concerns of professional architects and planners, as well as activity of bankers, builders, and homemakers. Ms. Hayden

284. Looking at Los Angeles. (Not the same as course 284 prior to Fall Quarter 1986.) Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city.

285. Great Planning Debates: Gender. Lecture, 90 minutes; discussion, 90 minutes. Seminar on substantial literature on complex relationships between gender, race, and class in urban planning. Alternative theories describe an inadequate fit between American households, housing, and services and document environmental inequities women and children face in contemporary cities. Students prepare oral seminar reports on topics such as social service provision, housing, transportation planning, economic development, and safe public spaces. Ms. Sandercock (W)

375. Teaching Apprentice Practicum (1 to 4 units). See listing under "Architecture/Urban Design." Ms. Leavitt

404. Joint Planning/Architecture Studio. Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; "New American House" for nontraditional households; guide to setting up shelters for homeless in Los Angeles County; working with resident leaders at Los Angeles City public housing development. Ms. Leavitt

494. Supervised Independent Teaching (2 to 8 units). Supervised individual teaching experience. May be repeated for credit. S/U grading.

496F. Field Projects (2 to 8 units). May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596F. Research in Planning (2 to 8 units). May be repeated for credit.

597P. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). May be repeated for credit. S/U grading.

598P. Preparation for M.A. Thesis in Urban Planning (2 to 8 units). May be repeated for credit. S/U grading.

599P. Ph.D. Dissertation Research in Planning (2 to 8 units). May be repeated for credit. S/U grading.
As the number one public graduate school of education in the nation, the UCLA Graduate School of Education (GSE) is widely recognized for its integration of theory and practice. Since GSE is at the forefront in academic excellence, research, and innovative programs, all levels of education from kindergarten through graduate school are benefited.

The school attracts prominent scholars and is internationally known for its research centers in evaluation, higher education, and other fields. GSE endeavors to improve educational practice, enhance theoretical and applied research, expand the study and criticism of educational policy, and advance the education of professional leaders and specialists.

Students come from throughout the world to study with the school's renowned faculty. Whether students choose to pursue a Ph.D., an Ed.D., a master's degree, or a services, specialist, or instructional credential, they will graduate with a broad understanding of educational theory and tested practice.

Alumni of the school can be found all over the world — on faculties of major universities, in research, in administration, in curriculum development, and in the classroom.
Graduate School of Education

Harry Handler, Ph.D.
Madeline Hunter, Ph.D.
Leslie Koltai, Ed.D.

Adjunct Associate Professor
Philip Ender, Ph.D.

Degrees Offered
Master of Education (M.Ed.)
Master of Arts (M.A.) in Education
Doctor of Education (Ed.D.)
Doctor of Philosophy (Ph.D.)

Requirements for Graduate Degrees

Admission
Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are:
1. Scores on the quantitative and verbal sections of the Graduate Record Examination (GRE). (Note: The Miller Analogies and Dopl
tall Mathematical Reasoning Test may be substituted for the GRE.)
2. At least three letters of recommendation documenting qualifications and/or professional experience.
Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis in area; preference is given to applicants with relevant background and experience.

Curricular Divisions

Administration, Curriculum, and Teaching Studies

Educational Psychology

Social Research Methodology
Social Sciences and Comparative Education

Teacher Education

Academic Interinstitutional Programs

Special Studies

Undergraduate Specialization in Education Program
91A through 91E, 191B through C191E, 197, 199

Specific degree programs and participating divisions or emphases are indicated below. Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each program.

Master of Education — Administrative and policy studies in education; bilingual/cross-cultural education; curriculum and the study of schooling; teacher education.

Master of Arts in Education — All divisions, except administration, curriculum, and teaching studies.

Doctor of Education — All divisions, except social sciences and comparative education.

Doctor of Philosophy in Education — All divisions.

Master of Education
The Master of Education (M.Ed.) professional degree program is designed for individuals preparing for mid-level professional positions in schooling or for advanced professional study; it is the appropriate degree to provide professional foundation study in preparation for the Ed.D. program.

Admission
Requirements are applicable in accordance with the selected field of emphasis:
(1) Administrative and Policy Studies in Education — Possession of a valid instructional credential is preferred. Students with a demonstrated commitment to improving American schooling are sought for admission.
(2) Bilingual/Cross-Cultural Education — Completion of an approved program of professional preparation leading to a preliminary instructional credential is required, as is classroom experience — as a teacher or aide — for at least two years, at any level of schooling. Evidence of professional competence and conscientiousness, as well as the necessary second-language proficiency, are also required.
(3) Curriculum and the Study of Schooling — Persons with above-average capabilities and interest in curriculum and instruction are sought. Experience as a practitioner in the emphasis field is advantageous.
(4) Teacher Education — This is a four-term program leading to qualification for a Multiple or Single Subject Instructional Credential and a Master of Education degree. Experience in working with children is advantageous.

Course Requirements
A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing, although no specific upper division courses are necessary. At least five courses (20 units) must be in the professional education (400) series. No 500-series courses may be applied toward the degree. Education 597 may be taken on an optional basis. A field experience minimally approximating one course is required for all M.Ed. emphases. Courses must be completed with grades of C or better and with an overall grade-point average of at least 3.0.

Comprehensive Examination Plan
There is no thesis plan offered in this program. Comprehensive examinations for master's degrees are offered twice yearly, once in Fall Quarter and once in Spring Quarter, and consist of:
(1) A comprehensive written examination designed to assess (a) comprehension of the professional knowledge basic to the selected field of emphasis, including key concepts and principles, major theoretical positions, and fundamental issues and (b) understanding of the broad educational context in which the selected professional field resides.
(2) A performance component designed to assess competency in the solution of problems in the selected professional field; a test of whether knowledge can be applied in a real or simulated professional setting.
Information regarding examination foci for any selected M.Ed. emphasis may be obtained from the Office of Student Services.

Thesis Plan
Under this plan, you prepare a thesis which is a report of the results of original investigation. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the Graduate School of Education and your thesis committee chair. The Theses and Dissertations Adviser and the Graduate Division publication, Regulations for Thesis and Dissertation Preparation, provide guidance in the final preparation of the manuscript. The department does not require a formal examination in connection with the thesis plan.

Doctor of Education
The Doctor of Education (Ed.D.) professional degree program is designed to meet the needs of individuals preparing for careers in basic research or for advanced graduate study; it is the appropriate prerequisite education degree to the Ph.D. degree program.

Course Requirements
A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing, although no specific upper division courses are necessary. Six courses (24 units) must be taken in the Education 200 and 500 series. No more than two 500-series courses (eight units) may be applied toward the divisional course minimum and toward the graduate course minimum.

Two courses must be selected from Education 200A, 200B, 210A, 210B. Additional courses to complete the 36-unit requirement may be selected from offerings in Education and/or other departments with consent of the assigned faculty adviser and division head. Courses must be completed with grades of C or better and with an overall grade-point average of at least 3.0.

Thesis Plan
Under this plan, you prepare a thesis which is a report of the results of original investigation. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the Graduate School of Education and your thesis committee chair. The Theses and Dissertations Adviser and the Graduate Division publication, Regulations for Thesis and Dissertation Preparation, provide guidance in the final preparation of the manuscript. The department does not require a formal examination in connection with the thesis plan.

Doctor of Education
The Doctor of Education (Ed.D.) professional degree program is designed to meet the needs of individuals preparing for careers in basic research or for advanced graduate study; it is the appropriate prerequisite education degree to the Ph.D. degree program.
Admission
To be admitted, you must have a master's degree in education or equivalent, at least two years of successful professional experience in education or equivalent (may be completed prior to advancement to candidacy for all divisions except administration, curriculum, and teaching studies which requires the experience as a prerequisite to admission), and demonstrated evidence of potential for professional leadership. You are admitted by a division and must formally apply for a change of division.

Course Requirements
A minimum of 18 courses is required, as follows:

1. Three research methods courses, with no more than two introductory (first tier) courses and at least one intermediate/advanced (second tier) course, selected from the departmental list approved for the Ed.D.
2. Nine education courses, of which at least six must be from the Education 400 series; all courses must be approved by the faculty adviser.
3. Three supplemental courses selected from offerings in the school or in another UCLA professional school or department.
4. A sequential three-term field practicum (Education 499A-499B-499C) in which you engage in field research activities and submit a field research paper or similar product by the end of the sequence.

Individual school course requirements may be waived, under exceptional circumstances, at the discretion of the advisory committee on graduate degrees, admissions, and standards; wherever academic background is needed, a faculty adviser may recommend additional coursework.

Qualifying Examinations
After satisfying the above requirements, you are eligible to take the following qualifying examinations:

1. A written examination which tests the core knowledge of the division and emphasis you have selected. The questions reflect a professional orientation. The examination may be repeated once if failed the first time.
2. The University Oral Qualifying Examination, conducted by the doctoral committee, which employs topics from both education and the cognate discipline(s) that are related to your written research proposal. In case of failure, the examination may be repeated once on the recommendation of your division.

At the present time both examinations are offered twice yearly, once in Fall Quarter and once in Spring Quarter.

For further information on the written and oral qualifying examinations, contact the Office of Student Services.

Dissertation/Final Oral Examination
The dissertation, required of every candidate for the Ed.D. degree, must embody the results of your independent investigation and must contribute to professional knowledge in education and the improvement of school practice.

A final oral examination is conducted which may be open to faculty, students, and other interested professionals.

Ph.D. in Education
The Doctor of Philosophy (Ph.D.) in Education is a strongly research-oriented academic degree designed for individuals preparing for careers in basic research or college-level instruction. Major focus includes theory, research methodology, basic studies, and in-depth knowledge in education and an approved cognate field.

Admission
A master's degree or equivalent in either education or the selected cognate field is required. You are admitted by a division and must formally apply for a change of division.

Foreign Language Requirement
Information regarding a foreign language requirement within a selected division is available from the graduate adviser in the Office of Student Services.

Course Requirements
An individualized program of study is determined by you and the faculty adviser and must conform to division and school requirements. Eighteen courses are required as indicated below; at least 10 must be in the 200 series:

1. A sequential three-term research practicum (Education 299A-299B-299C) designed to provide an overview of research in the field of study. You complete a research paper by the end of the sequence.
2. Five courses from offerings in your selected division.
3. Three upper division or graduate courses from other academic departments of the University related to your proposed area of research (the cognate).
4. Appropriate research methods courses to enable demonstration of intermediate/advanced-level competence in at least one area of research methodology. This requirement may be satisfied by completing three methodology courses, as specified on the list approved by the Graduate School of Education (available from the Office of Student Services).

You may choose the remainder of the courses (to complete the required total); such courses must be in compliance with the selected division’s guidelines and must be approved by the faculty adviser.

Individual school course requirements may be waived, under exceptional circumstances, at the discretion of the committee on graduate degrees, admissions, and standards; wherever academic background is needed, a faculty adviser may recommend additional coursework.

Qualifying Examinations
After satisfying the above requirements, you are eligible to take the following qualifying examinations:

1. A written examination which tests the core knowledge of the division and emphasis you have selected. The questions reflect a research and theoretical orientation. The examination may be repeated once if failed the first time.
2. The University Oral Qualifying Examination, conducted by the doctoral committee, which employs topics from both education and the cognate discipline(s) that are related to your written research proposal. In case of failure, the examination may be repeated once on the recommendation of your division.

At the present time both examinations are offered twice yearly, once in Fall Quarter and once in Spring Quarter.

For further information on the written and oral qualifying examinations, contact the Office of Student Services.

Dissertation/Final Oral Examination
The dissertation, required of every candidate for the Ph.D. degree, must embody the results of your independent investigation, must contribute to the body of theoretical knowledge in education, and must deal with interrelations of education and the cognate discipline(s).

A final oral examination is conducted which may be open to faculty, students, and other interested researchers.

Cooperative Degree Programs
General information regarding the following cooperative degree programs is available from the Office of Student Services, 201 Moore Hall.

J.D./Education Program
The Graduate School of Education and the School of Law offer a concurrent plan which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both schools, students are awarded both degrees on its completion. (This program will not be offered in 1990-91.)

M.A.-Latin American Studies/M.Ed.
The Graduate School of Education and the Latin American Studies Program offer an ar-
ticated degree program which allows students to combine study for the M.A. in Latin American Studies and the M.Ed., with an emphasis in curriculum. Articulated programs do not allow course credit to be applied toward more than one degree.

UCLA/CSULA Joint Ph.D. in Special Education

A joint Ph.D. program in Special Education is offered by UCLA and California State University, Los Angeles. The goals of the joint program are (1) the stimulation and preparation of research workers of high competence in the various fields of special education, (2) improved preparation for potential teachers of exceptional individuals, and (3) improved preparation of personnel for research and in policy formation in the public schools of California. Specific information regarding emphases and requirements is available from the joint doctoral adviser at UCLA (126B Moore Hall) or the chair of the Department of Special Education at CSULA.

Certificate (Credential) Programs

The California Commission on Teacher Credentialing has authorized the Graduate School of Education to offer professional programs that lead to (1) the Multiple Subject Instructional Credential, (2) the Single Subject Instructional Credential, (3) the Bilingual Emphasis Instructional Credential, (4) the Administrative Services Credential, (5) the Pupil Personnel Services Credential, (6) the School Psychologist Services Credential, and (7) the Severely Handicapped Specialist Credential. Programs leading to items 5 and 6 above will not be offered in 1990-91.

Lower Division Courses

91A. Infant Care and Development. (Formerly numbered 98D.) Using scientific methods to answer questions about how to raise children, educational researchers, psychologists, and anthropologists try to replace myths and anecdotes with a verifiable understanding of children's development and problems and choices that parents face in raising children. Mr. Blount-Jones

91B. Child Care: Research, Practice, and Policy. (Formerly numbered 99B.) Examination of psychological research on influences of early child care on children's concurrent and subsequent development, with the research linked to basic research in developmental psychology and education. Discussion of influence of research on the policy process. Ms. Howes

91C. Elementary and Secondary Education. (Formerly numbered 98B.) Prerequisites: consent of department, upper division standing preferred. Social sciences overview of major policy issues in American public education. General introduction to social sciences research in analysis of educational policy issues and to methods for exploring major policy issues. Topics include school finance, equal educational opportunity, testing and evaluation, teacher compensation, and school law. Mr. Bruno

91D. The Teaching Profession. (Formerly numbered 98C.) Prerequisites: consent of department, upper division standing preferred. Introduction to the field of education. Experts within Graduate School of Education and experienced school personnel present a variety of topics in education and provide opportunity to visit diverse educational settings. Mr. Kouns

91E. Perspectives of the American College. Examination of historical conditions that have shaped American higher education and consequent differential characteristics, trends, and practices that bear on dynamics of American higher education. Emphasis on interrelated research and academic, social, and policy issues underlying the diverse system of American higher education as it exists today and as it might exist tomorrow. Designed to be relevant to student, student affairs, and institutional agents. Mr. Trent

Upper Division Courses

100. Cultural Foundations of Education. Prerequisite: consent of instructor. Analysis of significant problems and issues in contemporary American education, including historical and social frameworks of American culture. Elements of American higher education and consequent differences, with special emphasis on identifying and explaining effects of college experience on student development and achievement. Mr. Trent

101. Special Education. (Formerly numbered 91B.) Lecture, three hours; discussion, one hour. Prerequisite: course 180, consent of instructor. Critical analysis of social psychological issues in college and university student development and achievement. Examination of intellectual and personal development of individuals vis-a-vis differential college environments and interpersonal experiences with respect to students' gender, culture, motivation, involvement, and expectations. Mr. Trent

C191A. Philosophy of Education: Ethics and Values. Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C206D. Mr. Ericson

191B. Issues in Education: Historical Perspectives. (Formerly numbered C191B.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Introduction to topics of American education as access, diversity, parental choice, cultural literacy, teacher empowerment, and role of popular media in historical perspective. Mr. Cohen

C191C. Economics of Education. Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated particularly in context of current issues in American education. Concurrently scheduled with course C244B. Mr. Bruno, Mr. Jamison, Mr. Solmon

191D. Politics of Education. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C207. Mr. Torres

C191E. Educational Anthropology. Recommended prerequisite: Anthropology 9. Study of education through research and the method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural ecology. Concurrently scheduled with course C203C. Mr. Koontz

192. Theory and Practice of the Teaching and Learning Function. Lecture, three hours; practicum placement. Prerequisite: consent of instructor. Analysis of learning theory and teaching practice in light of research on student characteristics, learning environments, student-instructor interaction, and outcomes of instruction. Application of theory and research to practice. Mr. Trent

197. Current Issues in Education. Prerequisite: consent of instructor. Variable topics course organized on selected current issues basis, integrating field observations and readings through seminar discussions. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor.

199. Special Studies. Prerequisites: senior standing, consent of instructor. To be arranged with faculty member who will direct the study.

Graduate Courses

200A. Historical Research and Writing. Methods of historical research and writing for students who are or will be engaged in research and in report or paper or thesis writing, regardless of their field of interest. Mr. S. Cohen
206. Research Survey Methods in Education. Prerequisite: course 210A or equivalent. Problems of conceptualization, organization, and gathering non-experimental quantitative and qualitative data.

Mr. O'Shea

200C. Analysis of Survey Data in Education. Lecture, three hours; laboratory, two hours. Prerequisite: course 200B. Introduction to techniques of processing and analyzing non-experimental and quasi-experimental quantitative data.

Mr. O'Shea

M201C. History of American Education. (Formerly numbered CM201C.) (Same as History M264.) History of educational thought and of social forces impinging on American education from the 1880's to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

Mr. S. Cohen

202. Evaluation Theory. Prevalent evaluation theories and perspectives. Mr. O'Shea, Ms. Wrigley

C203. Educational Anthropology. (Formerly numbered 203.) Recommended prerequisite: Anthropology 10; Sociology 101. An introduction to the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and knowledge change. Concurrently scheduled with course C191E.

204A. Introduction to Education and the Social Sciences. (Not the same as course 204A prior to Fall Quarter 1987.) Prerequisite: consent of division. Interdisciplinary course intended to introduce students to the study of educational issues, texts, and modes of thought through social sciences and comparative perspectives.

Mr. S. Cohen and the Staff

204B. Introduction to Comparative Education. Examination of conceptual and methodological questions underlying comparative education. Particular attention to development of the field and to styles of social analysis which may be applied to comparative and cross-national studies in education.

Mr. Hawkins, Mr. Nkinyangi, Mr. Rust

204C. Education and National Development. Prerequisite: graduate standing or consent of instructor. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development in less-industrialized countries of the world.

Mr. Hawkins, Mr. Nkinyangi

204D. Minority Education: Cross-Cultural Per- spective. Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems.

Mr. Hawkins, Mr. Nakanshi

204E. International Efforts in Education. Prerequisite: graduate standing or consent of instructor. Critical analysis of complex world of "development coop- eration," with particular reference to bilateral and multilateral efforts in education.

Mr. Nkinyangi

204F. Nonformal Education in Comparative Per- spective. Comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. Types of programs include, among others, consciousness raising, community action, skills training, literacy, and extension programs. Mr. Muthrin

205. Computers in the Educational Process. Introduction to theory, experimentation, evaluation, and future of computer systems in education, with emphasis on computer-assisted instruction (CAI), and use of computers to teach programming and to foster development of writing, computational, and filing skills.

Ms. Dorr

206A. Philosophy of Education: Introduction. Systematic introduction to the field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values.

Mr. Ericson, Mr. Weinberg

206C. Introduction to Conceptual Analysis. Conceptual analysis of recurrent and contemporary themes in the field. Emphasis on development of logical and linguistic skills used in analysis of educational problems and issues.

Mr. Ericson

C206D. Philosophy of Education: Ethics and Values. (Formerly numbered 206D.) Study of ethics and value theory in teaching and learning, educational organization, and curriculum development. Concurrently scheduled with course C191A.

Mr. Ericson

207. Politics of Education. (Formerly numbered 207.) Prerequisite: one approved research methods course required for master's degree. International issues in GSE. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political problems, and traditions for public policy and evaluative group in education policy formation and implementation. Concurrently scheduled with course C191D.

Mr. Hawkins, Mr. Torres

208A. Perspectives on the Sociology of Education. Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher-student relationships, reform in education at elementary, secondary, postsecondary levels.

Mr. O'Shea, Ms. Wrigley

208C. Explanation in the Social Sciences and Educational Research. Lecture, two hours; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Overview of basic statistical techniques and forms of explanation relevant to inquiry in education from vantage point of various social and behavioral sciences disciplines.

Mr. Burton Jones, Mr. Ericson

209C. Problems in Research and Evaluation in Higher Education. Critical review of research and evaluation studies of higher education, with special attention to need for studies of new programs and institutions to design and methodology in evaluative research.

Mr. Aslin

209D. System of Higher Education. Analysis of structure and function of American postsecondary education from systems perspective. Emphasis on structure of systems and comparative characteristics (function, inputs, outputs) of different types of institutions.

Mr. Aslin, Mr. Clark

210A. Introduction to Research Design and Statistics. Fundamentals of research design. Language of research. Planning and conduct of research. Interpretation and reporting of research findings. Mr. Ender and the Staff

210B. Statistical Inference. Prerequisite: knowledge of research design and univariate descriptive statistics. Regression, correlation, inference, normal curve tests, t-tests, simple and factor analysis of variance, and selected nonparametric tests.

Mr. Ender and the Staff

210C. Analysis of Variance. Prerequisite: course 210B or equivalent. Completely randomized designs, randomized block designs, nested designs, and their combinations into advanced factorial designs using fixed-effects models. Analysis of variance and multiple comparison and regression analysis. Analysis of mixed-effects models and regression and multiple regression and experimental designs. Ms. Webb and the Staff

Mr. Muthrin and the Staff

210E. Factor Analysis. Prerequisites: courses 210D, 211B. Exploratory factor analysis, rotations, confirmatory factor analysis, multiple-group analysis and testing.

Mr. Muthrin

211A. Measurement of Educational Achievement and Aptitude. Prerequisite: course 210A. Critical study of tests of achievement and aptitude, with emphasis on group tests; relation of achievement to aptitude; social implications of measurement of intelligence; elements of validity and reliability.

Mr. Burstein, Ms. Webb

211B. Measurement in Education: Underlying Theory. Prerequisite: course 211A. Measurement theory as applied to testing, focusing primarily on classical test theory; implications of theories for test construction and selection; current status of validity and reliability theory.

Mr. Burstein, Ms. Webb

211C. Item Response Theory. Prerequisites: courses 210C, 211B, or equivalent. Item response theory, applications to educational achievement tests, item bias, test information, test equating, computerized adaptive testing.

Mr. Muthrin

212A. Learning and Education. Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction.

Mr. Muthrin

212B. Motivation and Affect in Educational Pro- cess. Prerequisites: courses 210A, 212A. Review of theoretical and empirical literature on motivational factors in school settings and conditions for acquisition of affective outcomes. Mr. Graff

212C. Cognition and Creativity in Education. Prerequisite: course 212A. Review of theoretical and empirical literature on cognitive processes in school learning, including knowledge acquisition, comprehension, metacognition, and creativity.

Mr. Witten

213A. Counseling Psychology in School and Community. Prerequisite: graduate standing or consent of instructor. Analysis and in-class application of student personnel service theory and methods, with emphasis on student assessment and development, task groups, and evaluation.

Mr. Healy

213B. Legal and Ethical Issues in Counseling Psychology. Prerequisite: course 213A. Ethical and legal codes relevant to psychological services in schools and community; relation of value systems and personality; case studies in implications of personal values in counseling situations. Mr. Berry

213C. Group Counseling Theory and Process. Lecture, three hours; discussion, one hour. Prerequisites: courses 214A, 214B, or consent of instructor. Group productivity, leadership in groups, social perception, attitude formation, and effect of behavior changes in individuals and groups. Evaluation of social, psychological, and educational principles related to therapeutic experiences of individuals in small groups. Mr. Berry, Ms. Tidwell

214A. Counseling Theory and Practice. Alternatives in counseling practice in relation to theories of personality development and functioning, research on effectivness of counseling, professional issues in counseling, educational aspects of counseling.

Mr. Healy, Mr. Skager

214B. Advanced Counseling Theory and Practice. Limited to advanced degree candidates whose major interest is counseling and to selected high school and college counselors. Counseling procedures, educational planning, and methods for helping students handle personal problems that interfere with school progress; critical evaluation of procedures.

Mr. Healy

214C. Principles of Career Planning. Examination of nature of careers across ages and ethnic and sex groups in order to determine implications for career decisions in postindustrial society. Mr. Healy

214D. Career Counseling. Depth study of current theories, principles, problems, and practices of career counseling.

Mr. Berry, Mr. Healy
Site: course 214A or equivalent. Theory and practice.

214E. Substance Abuse and Addiction. Mr. Skager

214F. Student Problems: Social Context. Ms. Skager

217B. Cognitive Development and Education. Mr. Skager

217C. Personality Development and Education. Mr. Skager

217D. Language Development and Education. Mr. Skager

217F. Human Development and the Educational Process. Mr. Skager

218A. Multiple Regression Analysis. Mr. Skager

218B. Advanced Quantitative Models in Non-experimental Research: Multilevel Analysis. Mr. Skager

218C. Structural Equation Modeling. Mr. Skager

218D. Analysis of Categorical and Other Nonnormal Data. Mr. Skager

219. Laboratory: Advanced Topics in Research Methodology. Ms. Skager

220A. Inquiry into Schooling: Organization and Change. Mr. Skager

220B. Inquiry into Schooling: Curricular Problems and Policy Issues. Mr. Skager

221. Computer Analyses of Empirical Data in Education. Mr. Skager

222A. Laboratory for Naturalistic Observations: Developing Skills and Techniques. Mr. Skager

222B. Design Issues in Naturalistic Research. Mr. Skager

222C. Qualitative Data Reduction and Analysis. Mr. Skager

223. Aesthetics and the Curriculum. Mr. Skager

224. Problems and Issues in Bilingual and Multicultural Education. Mr. Skager

225A. Issues in Education of Exceptional Individuals. Mr. Skager

225B. Advanced Issues in Education of Exceptional Individuals. Mr. Skager

226. Research in Education of Learning Handicapped Individuals. Mr. Skager

227B. Research on Cognitive and Language Characteristics of Exceptional Individuals. Mr. Skager

227C. Research on Behavioral and Social Characteristics of Exceptional Individuals. Mr. Skager

228. Observation Methods and Longitudinal Studies. Mr. Skager

231. Structure of Occupations. Mr. Skager

232. Instructional Analysis. Mr. Skager

234. Education and Social Stratification. Mr. Skager

235. Education and Work. Mr. Skager
236. Human Abilities. Prerequisite: course 210B or equivalent. Nature, development, and measurement of intellectual abilities and their relations to learning and instruction. Review of research and theory of ability and test development. Ms. Webb

237. Principles for Effective Media. Prerequisites: courses 210A and 212A, or consent of instructor. Evolution of theoretical principles underlying effective media content and media utilization. Consideration of particular differences among print, computers, and audiovisual media, in and out of schools. Role of research in development of such materials. Ms. Baker, Ms. Dorr

238. Cross-National Analysis of Higher Education: Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change. Mr. Clark

239. Organization and Governance of Educational Systems. Academic organizations, precollegiate and postsecondary, are most appropriately studied as complex, professionalized organizations. Emphasis on characteristics of educational institutions and systems as organizations: environmental relations, governance structures, processes, and patterns of decision making and policy-making. Mr. Kolts and the Staff

241. Research Methodology in School Administration. Prerequisite: consent of instructor. Examination of research problems and strategies in school administration. Mr. Catterall, Mr. Erickson

242. Economic Analysis for Educational Policy and Planning. Prerequisite: graduate standing. Introductory course focusing on concepts and quantitative methods from economics, statistics, and operations research applied to educational policy and planning issues. Instruction in programming microcomputers for instruction (BASIC) and management information systems (dBASE). Mr. Bruno

246A. Seminar: Mathematical Modeling in Educational Policy Analysis. Prerequisite: course 242 or consent of instructor. Stochastic and deterministic modeling techniques for educational policy, planning, and operations research. Mathematics review and instruction in use of MPS (Mathematical Programming System) and development of software for Monte Carlo computer simulation studies in education. Mr. Bruno

248. Seminar: Operations Research—Methods and Applications in Education. Prerequisite: course 242 or consent of instructor. Application of advanced mathematical modeling techniques of operations research to educational policy and planning. Design of computer-based management information systems in education using dBASE. Mr. Bruno

247. Seminar: Personnel Training for Corporate Setting. Lecture, two hours; discussion, two hours. Survey of major topics on personnel training methods used by organizations to facilitate learning of job-related behavior on part of their employees. Topics include needs assessment, maximizing trainees' learning, training methods, and evaluating training programs. Mr. Bruno

248. Seminar: Perspectives on Lifelong Learning. From interdisciplinary perspective, lifelong learning is studied theoretically and as an area of educational research, policy, and practice. Conceptual distinctions among major proponents of lifelong learning and implications for schooling. Mr. Bruno

249A. Seminar: National Evaluations of Postsecondary Education. Critical review of national evaluation studies of higher education, including programs of general education and professional and graduate school programs; emphasis on design, methodology, and interpretation of large-scale evaluation studies. Mr. Astin

249B. Seminar: Institutional Research and Program Evaluation. Prerequisite: instructor consent. Review of institutional evaluation studies, with consideration of scope of information needed for various purposes and problems of interpreting this information to appraise overall institutional functioning and effectiveness. Mr. Trent

251A. Seminar: Philosophy of Education, Epistemology. Prerequisite: consent of instructor. Mr. Ericson

251C. Seminar: Philosophy of Education, Social Science Problems—Methodological Perspectives. Prerequisite: course 206C or consent of instructor. Mr. Ericson

251D. Seminar: Philosophy of Education, Problems in Ethics and Values. Prerequisite: course C206D or consent of instructor. Mr. Ericson

251E. Seminar: Philosophy of Education, Selected Issues. Prerequisite: consent of instructor. Mr. Ericson

252A. Seminar: Educational Organizations. Prerequisite: course 208A or consent of instructor. Mr. O'Shea, Ms. Wrigley

252B. Seminar: Education and Social Change. Prerequisite: course 208A or consent of instructor. Mr. O'Shea, Ms. Wrigley

252C. Seminar: Human Resources and Economic Development. (Formerly numbered 252C.) (Same as Community Health Sciences M272J.) Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investment. Mr. Jamison

253A. Seminar: Current Problems in Comparative Education. Mr. Astin

253B. Seminar: African Education. Prerequisite: graduate standing or consent of instructor. Contemporaray issues in African educational systems, including questions of access and equity, quality and efficiency, relevance and responsiveness, links between schools and communities, and policy and practice in education. Mr. O'Shea

253C. Seminar: Asian Education. Mr. Hawkins

253D. Seminar: Latin American Education. Mr. Torres

253E. Seminar: European Education. Mr. Rust

253F. Seminar: Education in Revolutionary Societies. Multidisciplinary and comparative study of socialist educational theory examined through writings of Marx, Lenin, Mao, and others. Implementation of this theory in specific case studies, along with comparative assessments of nonsocialist nations. Mr. Hawkins, Mr. Rust

253G. Seminar: The Asian American and Education. Basic issues and topics related to Asian Americans in the field of education. Examples of issues and topics include Asian Americans and the community, socioeconomic status, education-to-work transition, language and culture. Mr. Nakashima

253H. Seminar: The Chicano-Hispanic and Education. Basic issues and topics related to the Chicanos and other Hispanic groups in education. Review of literature on specific educational levels and Chicano student progress (e.g., early childhood, elementary, higher education; specific topics: assessment, access, tracking, segregation; implications for schooling). Mr. Hawkins

254. Seminar: History of Education. Prerequisite: course 242C. Study of current movements in historiography of education and critical reading of texts in history of education. Mr. S. Cohen

255A-255B. Seminar: Special Topics. (Formerly numbered 255.) Prerequisite: consent of instructor. May be repeated for credit. 255A. Measurement: Design; 255C. Data Analysis.

256A. Seminar: Special Topics in School Learning. Prerequisite: consent of instructor. Ms. Graham, Mr. Wittrock

256B. Seminar: Special Topics in Development. Prerequisite: consent of instructor. Ms. Skager and the Staff

257. Seminar: Qualitative Research Methods in Counseling Psychology. Prerequisite: consent of instructor. Mr. Skager and the Staff

258A. Seminar: Problems in Instructional Research. Mr. Levine, Mr. Wittrock

258B. Seminar: Problems in Instructional Development. Mr. Levine, Mr. Wittrock

259A. Seminar: Research on Characteristics of Students. Mr. Trent

259B. Seminar: Research Characteristics of Educational Environments.

260. Seminar: Principles of Curriculum and Instruction. Mr. Topkis

261A. Seminar: Early Childhood Education. Prerequisite: course 421A.

261E. Seminar: Education and Work. Mr. Silberman and the Staff

261F. Seminar: Cognitive and Personal Development of College Students. Examination of cognitive development of college students; issues of personal and social development, including leadership and interpersonal relations and skills. Ms. Astin

262A. Seminar: The Social Studies. Ms. Gutierrez

262B. Seminar: Reading. Ms. Gutierrez

262F. Seminar: Research Topics in Bilingual/Multicultural Education. Prerequisite: consent of instructor. Ms. Valadez

262L. Seminar: Contemporary Issues in Education and Work. Mr. Wilms

262J. Seminar: Economic Education. Ms. Kourlisky

263. Seminar: Higher Education. (Formerly numbered 261F.)

264. Seminar: Teacher Education. Prerequisite: consent of instructor. Research, issues, and practices in preservice and in-service teacher preparation, evaluation, and certification. Social, philosophical, and methodological issues and current trends in America and abroad. Opportunities to observe, participate in, and discuss teacher education programs. Ms. Baker, Ms. Dorr

266. Seminar: Special Topics in Special Education (2 to 6 units). Prerequisite: consent of instructor. Focus on research and clinical problems in special education. Introduction to a range of clinical services and research strategies. Exploration of current topics in the field.

268. Seminar: Exceptional Individual Differences. Prerequisite: social standing. M281A. Seminar: Human Behavioral Ecology. (Same as Anthropology M229A and Psychiatry M279A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology. Mr. Blurton Jones

M281B. Seminar: Reproduction, Families, and Parenting. (Same as Anthropology M229B and Psychiatry M279B.) Prerequisite: consent of instructor. Seminar for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences. Mr. Blurton Jones
315A-315B. Principles and Methods for Teaching Reading for Multiple Subject Instruction (2 units each). Prerequisite: consent of instructor. Course 315A is prerequisite to 315B. Reading instruction in elementary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading. Ms. Kourilsky

316A-316B. Principles and Methods for Teaching Reading for Single Subject Instruction (2 units each). Prerequisite: consent of instructor. Course 316A is prerequisite to 316B. Reading instruction in secondary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading. Ms. Kourilsky

317B. Principles and Methods for Teaching Elementary Science — 3-4 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 3-4. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading. Mr. Catterall

317C. Principles and Methods for Teaching Elementary Science — 5-6 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 5-6. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading. Mr. Catterall

318A-318B. Principles and Methods for Multiple Subject Instruction (2 units each). Prerequisite: consent of instructor. Course 318A is prerequisite to 318B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading. Ms. Kourilsky

319. Principles and Methods for Teaching Composition — 1-2 (6 to 12 units). Prerequisite: consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading. Ms. Kourilsky

321A. Principles and Methods for Teaching Physics — 7-12 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of physics and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading. Mr. Catterall

321B. Principles and Methods for Teaching Chemistry — 7-12 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of chemistry and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading. Mr. Catterall
UCLA's inverted fountain near Franz Hall.
326. Principles and Methods for Teaching English Language Arts — K-12 (6 to 12 units). Prerequisite: consent of instructor. Emphasis on teaching a literature-based language arts program incorporating process skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.
   Mr. Catterall

   Mr. Catterall

328. Principles and Methods for Integrating Content and Language Instruction (6 to 12 units). Prerequisite: consent of instructor. Theoretical rationale for integrating language teaching and content instruction for ESL students at intermediate or advanced level in English. Various Sheltered English techniques described, modeled, and used in hands-on workshops involving peer and expert coaching. S/U grading.
   Mr. Catterall

329. Integrating the Elementary School Curriculum — K-6 (6 to 12 units). Prerequisite: consent of instructor. Open to credentialed teachers. Interdisciplinary strategies emphasizing reading and writing in the context of mathematics, science, and social studies. Promoting enrichment follow-up activities in other disciplines such as social studies and art. S/U grading.
   Mr. Catterall

330A. Observation and Participation: Single Subject Instruction (2 to 6 units). Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which a single subject is taught, normally in secondary schools. Preparation for supervised teaching. S/U grading.
   Ms. Kouristol

330B. Supervised Teaching: Single Subject In- struction (2 to 10 units). Prerequisite: course 330A, consent of instructor. Practice teaching under daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading.
   Ms. Kouristol

330C. Supervised Teaching: Single Subject In- struction (2 to 10 units). Prerequisites: course 330B, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading.
   Ms. Kouristol

331. History and Geography Themes in U.S. History and World History Courses (6 to 12 units). Prerequisite: consent of instructor. Emphasis on new curricular reform elements written into the 1987 California Framework. Lectures, seminars, and demonstrations on fundamental issues in history, with examples deriving from the History-Social Science Framework. S/U grading.
   Mr. Catterall

332. The Immigrant Experience (6 to 12 units). Prerequisite: consent of instructor. Readings, films, interviews, and field trips to foster understanding of compo- sition, origins, landscape expression, and ambitions of Los Angeles' new populations, since this city is the destination of many immigrant groups entering the U.S. S/U grading.
   Mr. Catterall

334. Supervised Teaching: Higher Education. Mr. A. Cohen

360. Teaching Clinical Practicum. Discussion, two hours; fieldwork, two hours. Prerequisite: consent of instructor and director of Teacher Education Labora- tory. Seminar and directed field experience. Examination and analysis of different methods of subject matter instruction.
   Ms. Kouristol

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice- ship under active guidance and supervision of a regular faculty member responsible for curricu- lum and instruction at the University. May be repeated for credit. S/U grading.

400. Foundations of Education Policy Analysis. Prerequisite: consent of instructor. Principles of deci- sion making and policy formulation, implementation, and analysis in context of the educational system. Critical perspectives include effectiveness and equity of educational delivery systems and programs, and complex nature of education governance in con- temporary America. Mr. Bruno, Mr. Catterall

401. Structure and Functions of Schools as Com- plex Organizations. Prerequisite: consent of instruc- tor. Critical analysis of alternative assumptions about organization, function, and goals of educational organizations as they are. Application to special circumstances of schools and to contemporary issues and problems in school leadership, improve- ment, education policy, and work in adult development. Erickson

   Ms. Oakes

   Mr. Dorr-Bremre, Ms. Kouristol

410A-410B. Fundamental Issues in Higher Educa- tion, Work, and Adult Development. Course 410A is prerequisite to 410B. Course sequence designed to orient new students to issues, ideas, and literature that constitute the division. Emphasis on underlying social and political issues that shape higher education, work, and adult development. Erickson

411A. Introduction to Educational Evaluation. Intro- duction to systematic evaluation as it applies to appraising educational programs. Consideration of program evaluation as means of improving quality of educa- tion. Ms. Oakes, Mr. Weinberg

411B. Procedural Problems in Evaluation. As- sessment methodologies appropriate for evaluation problems. Writing evaluation proposals, developing program monitoring procedures, selecting appropriate evaluation design strategies, coping with ethical considerations, framing the decision context, and reporting evaluation results.
   Mr. Akin, Mr. Burstein

412A. Criterion-Referenced and Norm-Referenced Test Construction. (Formerly numbered 230.) Prereq- uisite: course 211A. Construction of criterion and norm-referenced assessment instruments. Appropri- ateness of different assessment devices considered in relation to research, development, and evaluation.

412B. Intersecting Dimensions of Teaching and Testing. Prerequisite: consent of instructor. Designed to help students develop goals and skills based on symbiotic relationship between assessment and in- struction at all levels of educational achievement levels. Mr. Oakes

415A. Appraisal of Intelligence. Prerequisites: courses 210A, 211A. Concepts and theories leading to development of individual cognitive assessment instruments; issues and implications relating to appli- cation and current practices of utilizing such tests in a multicultural society. Laboratory experience includes administration and interpretation of standardized in- struments; case studies.
   Mr. Healy, Ms. Tiwell

415B. Human Appraisal in School Counseling and School Psychology. Prerequisites: course 415A, con- sent of instructor. Survey and demonstration of major techniques of psychological testing with emphasis on their applicability to problems found in the school setting. Research and theoretical issues con- cerned with appraisal.
   Mr. Skager, Ms. Tidwell

420A. Principles of Curriculum. Critical examination of basic concepts underlying determination of purposes, selection and organization of learning experi- ences, and evaluation process. Ms. Crabtree

421A. Programs and Research in Early Childhood Education. Prerequisite: one course from develop- ment series. Examination of child care programs; relation of preschool parent programs to family development and role of programs in the community.
   Ms. Feshbach

421E. Issues in Application of Child Development and Education to Social Policy. Prerequisites: inter- relationships among policymakers and social scientists in development, implementation, and evaluation of policies affecting children and their families. Students learn to design and conduct interviews, analyze legisla- tive documents, and present analyses to policy- makers.
   Ms. Dorr, Ms. Feshbach, Ms. Stipek

422. Inquiry into Schooling: Basic Issues. Critical examination of basic issues and problems in organi- zation and reconstruction of precollegiate schooling. Consideration of historical development and chang- ing functions of schooling in American society; school organization; school alternatives; problems in management of educational change. Ms. Oakes

   Ms. Feshbach

424A. Social Studies in the Curriculum. Advanced study in social studies curriculum development; prob- lems in defining objectives and organizing single and multidisciplinary programs; critical review of literature on cognitive and affective learning in social science, with emphasis on experimental study of instructional programs.
   Ms. Crabtree

424B. Reading in the Curriculum. Prerequisite: course 210A. Study of reading curricula and instruc- tional procedures, with emphasis on rationale and research underlying their development and research comparing their effectiveness.
   Ms. Gutierrez

424C. Language in the Curriculum. Advanced study in school language curriculum; application to improvement of curriculum in the field.
   Ms. Gutierrez

424G. Curriculum Design for Bilingual Education. Prerequisite: consent of instructor. Advanced study of curriculum design for bilingual educational programs. Philosophical basis for bilingual programs; theories of learning and instruction; diagnostic and achievement language assessment; development of instructional component; program evaluation.
   Ms. Valadez

430. Higher Education and the Labor Market. Benefits of education from an economic perspective; labor market for college graduates; college as preparation for work; manpower forecasting and Ph.D. manpower policy; effects of higher education on public and private enterprises; policies toward doctoral labor market and adults in postsecondary education. Mr. Solmon

431A. Administration in Higher Education. Overview of college and university administration and introduction to policy research and analysis in postsecondary institutions. Case studies of administrative problems, policies, and practices. Management information systems, resource allocation, and issues related to responsibility, authority, and participation in administrative decisions. Mr. Kotai and the Staff

431B. Curriculum and Instruction in Higher Education. Principles of curriculum and instruction in postsecondary programs. Theory and practices in goal-setting, testing, media selection, and related instructional responsibilities. Preparing to teach college-level students. Mr. A. Cohen

431C. Innovative Forms and Practices in Higher and Continuing Education. New institutional forms (e.g., external degree programs and other nontraditional approaches to higher education, neighborhood learning centers, and peoples' colleges). Methodological innovations such as computer-assisted instruction, credit by examination, and independent study. Mr. A. Cohen

432. Seminar: Professional Topics in Higher Education. Ms. Atlin and the Staff

433A. Instructional Product Development. Prerequisite: consent of instructor. Examination of procedures employed in systematic development of instructional products. Students acquire competencies associated with those procedures. Ms. Baker, Ms. Dorr

433B. Technological Development in Educational Media. Prerequisite: course 433A. Theory, current problems, and anticipated trends in instrumentation and systems development for educational applications and research, including computer-aided instruction, communication satellites, and other advanced systems; theory and laboratory practice with instrumentation in educational research. Ms. Baker, Ms. Dorr

437A. Principles of Curriculum in Economic Education. Theories, principles, and concepts related to understanding the business and economic system; their application to teaching in secondary school. Ms. Kourilsky

437B. Corporate Educational Programs. History and scope of corporate training programs; current educational problems in training programs within industry as they are affected by automation and technological change. Mr. Silberman

440. Administration of the Instructional Program. Examination of current educational problems in society and strategies of their solution through curriculum policy and practice, instructional design and operation, in-service training of teaching staff. Mr. Erickson

441A. Instructional Supervision A. Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rationale and degree of learning, retention and transfer, monitoring and adjusting instruction to meet needs and capacities of learners. Ms. Hunter

441B. Instructional Supervision B. Prerequisite: course 441A or equivalent. Basic techniques of script-taping instructional episodes, planning teacher conferences through analysis of script-tapes, conducting and analyzing growth-evolving teacher conferences. Conducting mini-lessons to demonstrate elements of good instruction. Mr. Hunter

442B. Legal Aspects of Educational Management and Practice. Examination of structures and kinds of law governing educational systems in the U.S.: constitutional dimensions of church/state relations; employees' civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights. Mr. Biegel

443. Policy Analysis in Education. Prerequisite: consent of instructor. Overview of political, economic, and legal context of educational policy formation. Identification and examination of issues that impact on matters (e.g., bilingual education, desegregation, affirmative action, role of subordinates in policy-making process). Mr. Catterall

444A. Legal Aspects of Access to Public Education. Prerequisite: course 442B or consent of instructor. Study of access to public education focused on issues of affirmative action, testing, tracking, bilingual/educational special education, correctional education, and malpractice suits. Mr. Catterall

444B. Equity of Educational Opportunity through Desegregation and Finance Case Law. Prerequisite: course 442B or consent of instructor. Concentrated review of definition of equality of educational opportunity as it is being developed by the courts in cases concerning desegregation and educational finance.

447. Seminar: Educational Policy and Planning, Special Studies (1 to 4 units). Prerequisite: consent of instructor.

448A. Urban School Leadership. Prerequisite: consent of instructor. Analysis of problems of urban school leadership. Emphasis on changing nature of the urban principalship, with considerable attention to role of other school and community agencies that interact with the urban school leader. Mr. Knox

448B. Urban Leadership Laboratory. Prerequisite: consent of instructor. Analysis of and opportunity to practice human and technical skills requisite for success as an urban school leader. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics. Mr. Caldwell, Mr. Erickson

460. Seminar: Special Issues in Evaluation. Topics and instructors vary each term. Recent emphases included evaluation utilization and cost-effectiveness evaluation. Mr. Alkin

461A. Seminar: Adult Education.

461B. Seminar: Adult Education in Other Countries.

461C. Seminar: Community Service and Development Programs in Postsecondary Education.

462. Seminar: Community College. (Formerly numbered 261D.) Topics include problems and practices in community college curriculum formation, instruction, student flow, administration, and evaluation.

470A. Seminar: Large Systems and Individual Schools. Prerequisite: consent of instructor. Mr. Handler

470B. Seminar: Educational Government. Prerequisite: consent of instructor. Mr. Handler

481. Knowledge and inquiry in the Classroom. Prerequisite: consent of instructor. Logical features of instruction and their application to inquiry techniques in teaching and learning. Various conceptions of truth, belief, and fact and opinion, and their application to classroom learning situations. Mr. Weinberg

489. Instructional Strategies in Education. Prerequisite: consent of instructor. Methods for academic instruction, including research and active participation in the adversary approach, forms of debate, role playing, interaction process analysis, and feedback instruments. Practical emphasis on social sciences and humanities instruction, K-12. Ms. Kourilsky

490A. Instructional Decision Making. Prerequisite: consent of instructor. Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences in classroom settings permit students systematically to apply and evaluate alternative instructional strategies.
By any standard, the UCLA School of Law is recognized as one of the nation's great law schools. This reputation is based on excellence in scholarship, a rigorous educational program, and the quality of the faculty which includes eminent authorities in all major fields of law.

The educational program at the UCLA School of Law is rigorous and competitive, but it takes place in a humane environment where there is a genuine spirit of community. The student body of the school is intellectually distinguished, interesting, and culturally diverse.

The school's strong clinical program offers courses in lawyering skills such as interviewing, counseling, negotiation, and trial advocacy. UCLA students, alumni, and faculty have collaborated to pioneer clinical legal education. Students see more focus on the attorney/client relationship; they see more of what will ultimately face them as lawyers and policymakers.

An extensive and diversified student extern program, one of the most highly regarded moot court programs in the nation, and a basic philosophy that teaches law students to think clearly and analytically, but with compassion, all contribute to the distinction of the school.
School of Law

General Information:
1242 Law, (213) 825-4841
Admissions: 71 Dodd Hall, (213) 825-2080

Professors
Richard L. Abel, LL.B., Ph.D.
Norman Abrams, J.D., Associate Dean
Reginald H. Alleyne, Jr., LL.B., LL.M.
Alison G. Anderson, J.D. (Distinguished Teaching Award)
Taimie Lee Tysan Bryant, Ph.D., J.D., Acting

James D. Sumner, Jr., LL.B., LL.M., J.S.D.
Harold E. Verrall, M.A., J.D.
Kenneth H. York, LL.B.

Assistant Professor
Myra K. Saunders, M.L.S., J.D., in Residence, Law Librarian

Lecturers
Angelo Ancheta, J.D.
Steven K. Derian, M.A., J.D.
Bryan K. Fair, J.D
Susan Cornell Gillig, J.D., Assistant Dean, Clinical Programs
Sharon Hartmann, J.D.
Ronald Imhoff, Ph.D., J.D.
Kristine S. Knaplund, J.D.
Marlene Maerowitz, J.D.
Sandu Purnell, Ph.D., J.D.
Pamela Woods, J.D.

Adjunct Professor
Daniel Brenner, M.A., J.D.

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The candidate for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 16 hours

Juris Doctor Degree

Admission
Students beginning their professional work are admitted only in Fall Semester. You must have received a bachelor's degree from a university or college of approved standing before beginning work in the school. You are also required to take the Law School Admission Test (LSAT). The admissions committee considers grades and test scores and, in appropriate cases, such additional factors as ability in languages other than English, work experience or career achievement, previous positions of leadership or other special achievements, ethnic background, prior community or public service, unusual life experiences, overcoming a physical handicap or other disadvantage, career goals, economic disadvantages, and any other characteristic which may indicate that you will contribute to the educational and other benefits of a diversified student body.

For detailed information about the academic programs offered by the School of Law, the fees, and the semester-system calendar by which it operates, obtain the Announcement of the UCLA School of Law by contacting the Admissions Office, School of Law, 71 Dodd Hall, UCLA, Los Angeles, CA 90024-1476.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Residence and Unit Requirements
The candidate for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 16 hours.
each semester. The second- and third-year cur-
riculum is elective, except for a required course in 
professional responsibility. In addition to the 
courses in the regular law school curriculum, stu-
dents may take two courses for credit in other 
disciplines within the University. Graduate stu-
dents may enroll in upper division law courses on 
a limited basis. Law courses are not open to 
non-UCLA students.

Attendance and Grades — The right to take 
examinations and the privilege of continuing as a 
student in the school are conditioned on 
regular classroom attendance. Information on 
the grading system, which is based on a nu-
merical scale of 50 to 100, may be obtained 
from the Office of the Assistant Dean for Stu-
dents. Standards for satisfactory performance 
and for graduation are prescribed by the faculty 
and are published separately. They may also 
be obtained from the above office.

Curriculum

The school offers courses of instruction within 
the school and supervised educational expe-
riences outside it in an effort to enable its stu-
dents to think intelligently and to prepare them 
for careers of practice and public service. To 
this end the school employs several instruc-
tional techniques in a variety of subject areas.

In the first year of their legal education stu-
dents are exposed to an intensive study of 
Anglo-American legal reasoning in a series of 
fields which have historically dominated legal 
thought. In conjunction with these courses stu-
dents also receive training in the use of legal 
bibliography and in effective legal writing and 
oral advocacy.

In the second and third years students have an 
opportunity to engage in a number of different 
fields of law and law-related study.

Concurrent Degree Programs

The School of Law offers three concurrent degree 
programs which allow you to fulfill the require-
ments of the J.D. and another graduate degree 
simultaneously.

Education Program/J.D.
The School of Law and the Graduate School of 
Education offer a concurrent plan which allows 
students to design a program of study leading to 
the J.D. and any advanced degree in educa-
tion (M.Ed., M.A., Ed.D., or Ph.D.). If the pro-
gram meets the degree requirements in both 
schools, students are awarded both degrees on 
its completion.

M.A.—Urban Planning/J.D.
The School of Law and the Graduate School of 
Architecture and Urban Planning offer a con-
current plan of study providing an integrated 
curriculum for students planning to specialize in 
the legal aspects of urban problems. Educa-
tion in planning offers an overview of theories 
and methods that permit identification and treat-
ment of urban problems; education in law 
offers insight into the institutional causes and 
possibilities for treatment of these problems. 
Students pursue studies in both schools and 
receive both the J.D. and M.A. degrees at the 
end of four years.

Students interested in the program must apply 
and be admitted to the School of Law, the Ur-
ban Planning Program, and the Graduate Divi-
sion.

M.B.A./J.D.
The School of Law and the John E. Anderson 
Graduate School of Management offer a con-
current program which enables students to 
prepare for careers where law and manage-
ment overlap and where understanding of both 
fields is necessary. Examples of such areas 
would include public service, international 
trade, industrial relations, corporate law, and 
specialized areas of management consulting. 
The program makes it possible to earn the J.D. 
and M.B.A. in four academic years. Students 
interested in such a program should apply to 
both schools simultaneously.

Master of Laws Degree

The school offers a graduate law program 
leading to the Master of Laws (LL.M.) degree to 
outstanding American and international stu-
dents interested in pursuing graduate studies. 
Law school graduates with outstanding rec-
ords who may be interested in this program 
should contact the Admissions Office for fur-
ther information.

Other Programs

Clinical Program

The school permits students to participate in 
clinical training. These activities consist of 
fieldwork in a variety of federal and state agen-
cies accompanied by seminars in the school 
which seek to analyze and expand the agency 
experience.

Extern Program

The school offers an extern program which 
gives students the opportunity to work in legal 
agencies away from the school for as long as 
six months (including the summer), for which 
they receive academic credit. Extern programs 
have been offered in Washington, DC, San 
Francisco, New York, and Hawaii.

First-Year Courses

The first year of law school is designed to intro-
duce students to legal analysis using a variety of 
substantive fields. Each of the following courses is required of all first-year students.

100. Contracts (5 units). Law governing private agreements. Analysis of criteria for determining whether or not a particular promise or voluntary agreement is legally enforceable and survey of major legal issues affecting enforceable agreements. Problems of interpreting contract language, role of con-
tract in a market society, conflict between commercial need for certainty and demands of individual fairness, and relationship between contract law and other areas of law.

Ms. Anderson, Mr. Asinow, 
Ms. Littleton, Mr. McGovern, Mr. Rossetti

110. Legal Research and Writing (5 units). Year-
long course teaches first-year students how to find 
the law, how to analyze it, and how to communicate 
their conclusions in writing. Focus on skills of analyzing 
legal authority, developing arguments to solve specific legal problems where there is conflicting authority, and structuring legal writing which is clear, informa-
tive, and persuasive.

Mr. Ancheta, Mr. Fair, 
Mr. Imhoff, Ms. Maerowitz, Ms. Purnell, Ms. Woods

110B. Facts, Clients, and Lawyers (3 units). Cover-
age of both the substantive law of products liability 
and theory and practice of fact investigation, orga-
nized around a simulated products liability case, with 
students representing plaintiff and defendant in case 
(half the class assigned to each party). Preparation of 
short research and writing assignments and exer-
cises involving doctrinal and factual aspects of case.
Discussion of interviewing techniques and nature of lawyer-client relationship. Opportunity to interview 
clients or law and expert witnesses from witness pro-
gram.

Mr. Binder, Ms. Maerowitz, Ms. Woods

120. Criminal Law I (4 units). Selected topics in 
substantive criminal law. Consideration of principles 
underlying definition of crime; examination of various attempts to eliminate requirement of mens rea and 
consideration of such general doctrines as ignorance of fact and ignorance of law, causation, attempt, com-
plicity and conspiracy; inquiry into principles of justifi-
cation and excuse, with particular attention to doc-
times of necessity, intoxication, insanity, diminished 
capacity, and automatism. Emphasis on basic theory 
of criminal law and relationship between doctrines of 
criminal law and various justifications for imposition 
of punishment.

Mr. Abrams, Mr. Arenella, 
Ms. Crenshaw, Mr. Dolinho, Mr. Garcia, Mr. McGee

130. Property (5 units). Analysis of property as a 
social institution and particularly of dynamics of the 
system for recognizing and protecting competing 
claims to resources. Major problem areas include his-
torical development of various kinds of interests in 
property, sale and financing of real estate, housing, 
landlord and tenant, and public and private land-use 
planning and development.

Ms. Blumberg, 
Mr. Dukeminier, Ms. French, Mr. Lowenstein, 
Mr. Munzer, Mr. Sander

140. Torts (4 units). Personal injury law as it has 
developed within the Anglo-American legal tradition. 
Concept of negligence, refinements of negligence 
law, and doctrine of intentional torts. Contemporary 
rules of strict liability. Effort to identify basic purposes 
which our tort law system achieves or should achieve.

Mr. Abel, Ms. Anderson, 
Ms. Olsen, Mr. G. Schwartz

145. Civil Procedure (5 units). Processes that courts 
follow in deciding disputes in noncriminal cases. Way 
in which conflicts are framed for courts, stages through 
which litigation goes, division of power among various 
decision makers in the legal system and between state 
and federal courts, territorial limitations on exercise of 
judicial power, principles that define consequences of a 
decision once a court has finished with a case, and 
special opportunities and problems of litigations involv-
ing multiple disputes.

Mr. Alayne, Mr. Bauman, 
Mr. Becker, Mr. Caminker, Mr. Fortbath, 
Ms. Goldberg-Ambrose, Mr. Graham, Mr. Lethin, 
Ms. White, Mr. Yeazell
148. Constitutional Law I (4 units). Ways in which the U.S. Constitution (1) distributes power among various units of government in the American political system and (2) limits exercise of that power. Structural limitations on government: division of powers between the nation and states in the federal system, and separation of powers among the three branches (legislative, executive, and judicial) of national government. Civil War Amendments (13th, 14th, and 15th) as limits on states and as sources of congressional power. Proper role of judiciary in limiting action of other branches of government. Mr. Eule, Mr. Goldstein, Mr. Karst, Mr. Lowenstein, Mr. Varat

Second- and Third-Year Courses* All of the courses in the second- and third-year curriculum are elective with the exception of Law 312. Students must complete the professional responsibility requirement to graduate, either by preparing a paper in consultation with a faculty member or by completing one of the sections of course 312. The different sections vary in emphasis.

312. The Legal Profession (2 to 3 units). Course has two central themes. One is distribution of legal services, including topics such as social structure of the profession, different roles and specialties of law practice, and how the profession is regulated. Second theme is the lawyer's representation of clients, including legal, professional, ethical, moral, and political problems arising out of the lawyer's various roles — representative of client, officer of the court, member of a profession. Various sections may offer different emphases with respect to rules regulating the profession (ABA Model Code of Professional Responsibility and ASA Model Rules of Professional Conduct) and in course requirements. Some sections require a paper in lieu of or in addition to an examination. Mr. Abel, Mr. Dolinko, Ms. Menkel-Meadow, Mr. Sander

Elective Courses

200. Constitutional Law I. Ways in which the U.S. Constitution (1) distributes power among various units of government in the American political system and (2) limits exercise of those powers. Structural limitations on government: division of powers between the nation and states in the federal system, and separation of powers among the three branches (legislative, executive, and judicial) of national government. Civil War Amendments (13th, 14th, and 15th) as limits on states and as sources of congressional power. Proper role of judiciary in limiting action of other branches of government. Ms. Crenshaw, Mr. Eule, Mr. Karst, Mr. Liebeler, Mr. Lowenstein, Mr. Varat

201. Constitutional Law II. First Amendment's guarantees of freedoms of speech, press, and assembly, and First Amendment's prohibition of establishment of religion and its guarantee of free exercise of religion. Jurisdictional limitations on federal courts' exercise of the power of judicial review. Mr. Eule, Mr. Goldstein, Mr. Karst, Mr. Lowenstein, Mr. Varat

202. Constitutional Criminal Procedure. Criminal process insofar as it is affected by constitutional and statutory prescriptions and proscriptions. Restraints on law enforcement officers including such police activities as arrest, stop-and-frisk, inspection and detention of various kinds; taking of statements; modern techniques of electronic surveillance; and seizure of property. Mr. Abrams, Mr. Arenella, Mr. Dolinko, Mr. Goldstein, Mr. McGee

207. Community Property. Detailed examination of California community property system which regulates property relations between husband and wife during marriage and termination of marriage by divorce. Community property raises many questions about nature of marriage and various forms of gainful human activity. Ms. Blumberg, Ms. Prager

208. Real Property Secured Transactions. Use of law as security for debt. California and other representative jurisdictions. Certificates of title, title insurance, and registration of interest in real estate. Mr. Goldstein, Mr. Warren

209. Real Estate Finance. Fundamental economic concepts, and issues involved in buying and selling real estate. Relationships among sellers, buyers, and brokers through analysis of listing agreements, contracts of sale, mortgages and other security devices, escrow agreements. Comparison between residential and commercial development settings, with consideration of issues of financing real estate development as well as the closely related questions raised by enforcement of security interests in real estate through foreclosure.

211. Evidence. Law of evidence is concerned with process by which parties may prove facts which are essential to the existence of rights and liabilities in civil and criminal litigation. Rules for determining relevance of evidence, qualifications which must be met by witnesses, regulation of form and manner of interrogating witnesses, privileges granted to certain persons and interests, evidential corroboration, status of expert witnesses and problems of proving technical facts, and rules governing documentary proof. Rule excluding hearsay evidence and exceptions to that rule. Mr. Abrams, Mr. Bergman, Mr. Garcia, Mr. Graham, Mr. Lowenstein

212. Federal Courts. Selected problems in the jurisdiction and lawmaking powers of federal courts, including appellate jurisdiction of the Supreme Court; federal habeas corpus; federal-question jurisdiction of federal district courts; intervention by federal courts in state court proceedings; and choice of law in federal courts.

Ms. Goldberg-Ambrose, Mr. Karst, Mr. Varat

214. Civil Rights (Section 2). Survey course intended to review both the casual and remedial relationship of law to racial discrimination. Brief review of historical development of race as a legal issue past and present; and current developments in housing, voting, employment, and education. Identification of various competing visions of racial equality that are reflected in civil rights legislation, in case law, and in the ongoing debate about the definition of discrimination. Review of several critiques of antidiscrimination law, with special attention to those questioning effectiveness of existing reformation schemes. Ms. Crenshaw

215. Poverty Law and Administration. Major income maintenance programs in the U.S. to Aid to Families with Dependent Children; Supplemental Security Income; Food Stamps; General Relief; Disability; and Social Security (OASDI). Interaction of law, policy, and administrative practice. Consideration of how the deserving and undeserving poor, family structure and policy work and welfare, and moral behavior. Reform efforts include legal services and public interest law. Section may be taken for credit or pass/fail.

Mr. Handler

216. Administrative Law. Much of modern government is administered by agencies of government rather than by legislation. Substantive sources of law (and limits on) administrative authority. Procedural norms with which agencies must comply in the course of adjudication or rule-making. Judicial review as a technique for correcting administrative error or abuse. Individual's rights to participation in its cultural life, and due process in individuals' interactions with public agencies. Mr. Asimow, Mr. Schwartz

M217. Topics in Legal Philosophy. (Same as Philosophy M256.) Prerequisite: consent of instructor. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor. Mr. Dolinko

218. Topics in Legal Philosophy: Gender Differences and Rationality. Female and male examiners of facts and persons and their bodies, with special reference to issues of whether some body rights are property rights. Principal focus on the transferability, whether by gift, will, or sale, of "body parts," which can include both countable portions of the human body, such as kidneys, and noncountable portions, such as blood or semen. Readings from classical and contemporary philosophical and legal writers. Some philosophical topics and concepts. Mr. Mekel-Meadow

220. Federal Taxation I. Fundamentals of federal income taxation, particularly as they apply to individuals. Gross income, taxpayer to whom income will be attributed, deductions and credits available in common situations. Emphasis on tax consequences of living in two countries, and of certain transactions and activities. Ms. Crenshaw, Mr. Karst, Mr. Zolt

221. Federal Taxation II. Prerequisite: course 220. Course 230 may be taken concurrently. Application and extension of principles of course 220 to partner/partnership, S corporation, and other taxation of business activities. Federal al income tax consequences of formation of partnerships and corporations, distributions to partners and shareholders, and liquidations and sales of partnership or shareholder interests. Mr. Asimow, Mr. Thompson, Mr. Zelt

222. Federal Taxation III. Federal taxation of gifts and decedents' estates; federal income taxation of trusts and estates. Emphasis on tax planning techniques. Of considerable importance to anyone who expects to inherit a large estate. Mr. Hoffman

228. Taxation Of Mergers And Acquisitions. Prerequisites: courses 220, 230. Recommended: course 221. Various aspects of taxation of mergers and acquisitions, including (1) taxable stock acquisitions, (2) taxable asset acquisitions, (3) leveraged buyouts, (4) tax-free acquisitive reorganizations, and (5) limitations on carryover of losses. Examination of current proposed revisions of the mergers and acquisitions and leveraged buyout provisions of the Code.

Mr. Thompson

230. Business Associations. Issues that must be addressed when people decide to form joint economic ventures and how these issues are resolved in the law of agency, partnership, and corporation. Federal securities laws and their impact on planning for an operation of business ventures.

Ms. Anderson, Mr. Klein, Mr. Ramseyer

233. Partnership Planning. Prerequisites: courses 220, 230. Recommended: one accounting course. Advanced problem-oriented course that examines organization, structuring, operation, and dissolution of partnerships. Detailed substantive study of statutory and common law of partnerships, partnership taxation, and financial and economic considerations related to partnership structure and operations. Discussion of problems involving real estate, oil and gas, motion picture, and other contemporary partnership ventures and how these issues are resolved in the law.

Mr. Klein

234. Law and Accounting. Prerequisite: consent of instructor (for students with more than two undergraduate accounting courses). Recommended for students with no prior accounting training. Basic concepts of financial reporting by business enterprises. Bookkeeping; underlying principles of accounting. Relevance of accounting data to legal decision making, including implications of financial accounting on planning and structuring businesses, compliance with federal securities laws, and reporting for federal income tax purposes. Provides potential lawyer with understanding and background to read, comprehend, and interpret financial statements.

Mr. Klein

235. Business Planning. Prerequisites: courses 220, 230. Course 221 may be taken concurrently. Advanced course on establishment, structuring, and reorganizing of business enterprises, primarily in the corporate form. Analysis of four or five realistically complex problems, examining state and federal corporate problems, federal income tax implications, and financial and accounting aspects of each problem, in order to prepare specific and comprehensive answers. Member of faculty and student teams work with businesses, considering all realistic alternatives and justifying choices made.

Mr. Thompson

Mr. Thompson

242. Insurance Law. Basic introduction to general principles of insurance law, including definitions of person and interests protected, formation of contract of insurance, insurable interest, concealment, misrepresentation, warranties and conditions, limitations on coverage, waiver and estoppel, measure of recovery, indemnity and subrogation. Obligations of insurer and insured during currency of insurance contract; occurrence of risk insured against. Issues of current significance in insurance litigation, including insurer's duty to settle, insurer's duty to defend, insurance of progressive diseases (asbestosis), insurability of putative damages, and problems arising out of tripartite relationship between insurer, broker, and insured.

Mr. Liebler

245. Antitrust II. Prerequisite: course 240. Historic Sherman Act monopolization and merger cases. Economic underpinnings of oligopoly theory, which presumably forms basis for current antitrust policy toward concentrated industries; validity of so-called "Market Concentration Doctrine." Current antitrust efforts aimed at monopoly and "shared monopoly." Mr. Liebler

247. Law and Economics. Economics background not required. Basic theory of voluntary exchange and conditions necessary for a voluntary exchange system to maximize community welfare, applied to various types of legal problems in attempt to gauge extent to which legal rules contribute to (or hinder) maximization of such welfare. Mr. Liebler, Mr. Sander

248. Bankruptcy. Examination of Bankruptcy Code and related statutes from viewpoint of what the commercial lawyer should know about the field in order to advise clients in planning and carrying out business transactions. Emphasis on liquidation of debtors' estates, reorganization of debtors' businesses, and avoiding powers of the trustee in bankruptcy. Treatment of consumer debtor in bankruptcy.

Mr. Jordan, Mr. Warren

Mr. Jordan, Mr. Warren

Mr. Jordan

252. Unfair Competition and Business Torts. Survey of five ways in which law regulates the competitive process, encourages innovation, and governs rights of property owners and the public. Fair competition, trademark, false advertising, and business tort law. Patent law covered very briefly, primarily for comparative purposes rather than as a complete introduction to that area. "Business torts" includes interference with contracts and business advantage, trade secret theft, right of publicity, and RICO — popular federal racketeering statute.

Mr. Wiley

253. Regulated Industries. Theoretical justifications for, and fundamental criticisms of, leading types of economic regulation. Survey of regulatory structures and issues in transportation, communication, and energy utility sectors, using statutes, cases, and secondary material to introduce students to legal issues that tradition and government officials are still facing. Analytical approaches to problems, empirical tests, and aspects of deregulation of movement in these three sectors.

Mr. Wiley

255. Tort Law and Economics. Prerequisites: reasonable understanding of economics and at least minimal understanding of basic college microeconomics. Exploration of literature analyzing tort law from an economic perspective: to assess and profit from its strengths and to consider its limitations.

Mr. G. Schwartz

259. Labor Arbitration. Practice, procedures, and substantive law of labor arbitration, with emphasis on what labor arbitrators actually do in their interpretation and functioning of bargaining agreements. Problems involved in content of labor arbitration agreements; how are they actually selected by union and employer? How might the fact that the arbitrator is mutually selected and mutually paid by the union and employer make for effective decision-making in labor arbitration cases? Utility of using the labor arbitration model as a dispute resolution mechanism outside the labor environment: domestic disputes, landlord-tenant disputes, etc.

Mr. Alleyne

260. Labor Law I. Basic information concerning laws and decisions which provide framework for national labor policy in the private sector. National Labor Relations Act, Labor Management Relations Act, Railway Labor Act, and Nemo-La Guardia Antitrust. Emphasis will include collective bargaining; selection of bargaining representatives and determination of bargaining units; unfair labor practices; emergency disputes; federal-state jurisdiction; application of antitrust laws; and grievance and arbitration procedures.

Mr. Alleyne, Mr. Becker, Jones

261. Labor Law II. Prerequisite: course 260 or consent of instructor. Collective bargaining in the public sector (government employment at federal, state, and local levels). Differences in labor law in private and public sectors, and responses of federal and state legislatures and of courts to special problems of collective bargaining in the public sector.

Mr. Alleyne, Mr. Becker

262. Law of the Collective Agreement. Prerequisite: course 260. Limited to 10 students. Examination of understanding of labor arbitration by comparative study of the decision of issues brought to labor arbitration which have also been presented to the NLRA and federal courts. Use of materials exhibits actual arbitration cases. Each student works with three case files, functioning as union advocate in one, employer advocate in a second, and arbitrator in the third. Each student prepares two briefs, one arbitration opinion and award, and a research paper.

Mr. Jones

263. Employment Discrimination. Title VII of 1964 Civil Rights Act and similar statutes prohibit discrimination based on race, sex, national origin, religion, age, and handicap. Examination of substantive and procedural law that has developed under these statutes; consideration of social policy goals and assumptions underlying that development. Specific topics include: disparate treatment; disparate impact; programmatic theories of discrimination; employment testing and test validation, statistical proof, equal pay and comparable worth, affirmative defenses (business necessity, bona fide occupational qualifications, bona fide seniority systems), affirmative action and reverse discrimination, obligations of government contractors, class actions, and administrative and judicial remedies.

Mr. Alleyne, Ms. Littleton

264. Workers' Compensation and Workers' Injuries. Study of ways in which law responds to phenomenon of workers' injuries and occupational disease. Labor market and unionization, workers' compensation, federal OSHA job-safety regulation program, and state workers' compensation systems. Tort law as a source of tort claims and remedies. Treatment of tort law as a source of workers' injuries provokes. Workers' compensation considered both as a compensation program and as a tort-like rule of strict liability.

Mr. G. Schwartz

267. Indian Law. Special legal status of American Indians and Indian tribes and tension between moral/legal claims and political forces. Sources and scope of federal, state, and tribal power on Indian reservations; property law concepts unique to Indian tribes and Indians; rights to American Indians in relation to federal, state, and tribal governments and to United States and other Indians.

Ms. Goldberg Ambrose
269. Law, Foreign Policy, and National Security. Various legal considerations and restraints, both national and international, affecting formulation of foreign policy and protection of national security. Decision-making process, including constitutional balance between executive and legislative branches, foreign relations power of the President, War Powers Resolution and Treaty Power. Role of bureaucratic politics, Congressional utilization of foreign policy and its attempts to subject intelligence activities to the rule of law. Problem of protecting national security information in a free society and other Bill of Rights issues. Role of international law affecting national security, including the UN Charter, and multilateral and bilateral arms control obligations.

Mr. Trimble

270. International Law. Role of law and legal institutions in international relations and in government foreign affairs decision making, particularly on the part of the U.S. Nature and source of international law and how it is applied in the relations of states. Allocation of responsibility for decision making within the international system and how conflicts in assertion of jurisdiction are resolved. Major limitations on exercise of authority by states. Use of force by states, paramilitary groups, and international organizations.

Mr. Trimble

271. International Business Transactions. Fundamental legal issues arising in international licensing, franchising, and investment. Legal and financial institutional framework within which international business is conducted; national and international limitations affecting movement of goods, transfer of technology, and flow of capital; organization, financing, and protection of international business undertakings; use of agents, distributors, and licensees; problems of contract negotiation and dispute resolution in an international setting; and foreign investment.

Mr. Rosett

272. International Economic Law and Organization. Public international law affecting private economic activity, primarily in areas of trade, investment, and monetary affairs; roles of the GATT, IMF, World Bank, UNCTAD, and UN Center on Trans-National Corporations; and U.S. law governing negotiation and implementation of international agreements.

Mr. Trimble

273. International Human Rights. Examination of theoretical and practical issues behind achievements and limitations of international human rights movement. How did the notion originate and develop into its present form and content? Is the concept of rights necessary or useful to achieving objectives of protection and promotion of human dignity and personal liberty throughout the world? Ought there to be a dichotomy between civil and political rights as opposed to economic, social, and cultural rights? Is it possible to evolve "new generations of human rights," such as right to development and right to peace, and fit them into preexisting schemes, or would these "rights" operate better under separate arrangements? Emphasis on developments, content, and enforcement machinery of what is known as the International Bill of Human Rights. Particular attention to question of how national sovereignty and interests influence a country's position regarding formulation and enforcement of human rights standards.

Ms. Gunning

274. Trademark Law. Survey of law of trademark and unfair competition. Trademarks are the commercial symbols — most commonly names, like "Tide" or "Honda" — that tell consumers who makes what. The balance that law strikes between allowing businesses to copy each others' products and preventing them from confusing consumers about the true maker of those products.

Mr. Wiley

275. Comparative Law: Commercial. Examination of growing unification of commercial law around the world. Investigation of (1) documentary sales transaction, with emphasis on use of the letter of credit and bill of lading, (2) dispute resolution, particularly arbitration and judicial assistance under international treaties and conventions, (3) United Nations Convention on the Settlement of Investment Disputes, and (4) major limitations on exercise of authority by states. Role of the World Bank, UNCTAD, and UN Center on Trans-National Corporations; and U.S. law governing negotiation and implementation of international agreements.

Mr. Rosett

Mr. Trimble

277. Comparative Law: Japanese Law. Designed to introduce the non-specialist law student to major features of the Japanese legal system, the product of a different historical and cultural experience which has allowed waves of influence from other legal traditions over generations has assimilated these experiences into a unique legal system. Relation of structures, processes, and personnel of Japanese law to other features of Japanese society and history. Organization, recruitment, and decision-making processes in major processes of dispute resolution within and outside the courts.

Ms. Bryant, Mr. Ramseyer, Mr. Rossett

278. Comparative Law: Japanese Law, Selected Readings (2 units). Prerequisite: reading knowledge of Japanese at third-year level. Designed to introduce students to a variety of Japanese-language legal materials. Reading of law review articles and other sources (e.g., selections from contracts, cases, or treatises). Research paper required. Mr. Ramseyer, Mr. Rossett

279. Aviation Law. Regulation of aviation and air transport under both international and domestic law. Nature and sources of aviation law, legal regime of airspace and aircraft, and regulation of users of airspace, including jurisdiction over hijackings and other offenses committed aboard aircraft. Role of Civil Aeronautics Board in regulation of domestic air transport. Regime of liability for international air carriers established by the Warsaw Convention and subsequent instruments, and liability of persons in control of aircraft, and service facilities, and air traffic control and advisory services.

Mr. Trimble

280. Aviation Law, Regulated. Regulation of aviation and air transport under both international and domestic law. Nature and sources of aviation law, legal regime of airspace and aircraft, and regulation of users of airspace, including jurisdiction over hijackings and other offenses committed aboard aircraft. Role of Civil Aeronautics Board in regulation of domestic air transport. Regime of liability for international air carriers established by the Warsaw Convention and subsequent instruments, and liability of persons in control of aircraft, and service facilities, and air traffic control and advisory services.

Mr. Trimble

281A-M281B. Child Abuse and Neglect (2 to 4 units each). (Formerly numbered M282A-M282B.) (Same as Architecture M244A-M244B.) (Same as Architecture and Urban Planning M264.) Prerequisite: consent of instructor. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by members of the faculties of the Schools of Dentistry, Education, Law, Medicine, Nursing, and Public Health and the Department of Psychology, as well as by the relevant public agencies.

Mr. Goldstein

282. Education and the Law. Exploration of recent, ongoing controversies in education law, with emphasis on the often-conflicting rights of students and educators in public schools. Key areas of concentration include liability for injuries on public school grounds, efforts to curtail student speech, parameters of the right to receive information and ideas, and extent to which a legal system can require or enforce a right to equal educational opportunity. Major, volatile topics such as school finance, standardized testing, handicapped rights, and bilingual education provide examples of how law can be used to shape educational policy in the 1990s.

Mr. Biegel

283. Space Law. The legal framework surrounding activities in space. Topics include the general international legal regime established by the 1967 Treaty of outer space and outer space, and legal problems raised by defense activities, use of geosynchronous orbits, remote sensing, direct broadcast satellites, communications systems, and commercial launch services. Liability problems, and indemnification, insurance, intellectual property, and export controls. Long-range issues raised by human exploration and colonization of space.

Mr. Trimble

M285. Governance: State, Regional, and Local (2 to 4 units). (Same as Architecture and Urban Planning M202A.) Analysis of legal and constitutional constraints on land-use planning and development; administrative and environmental regulatory processes, including the relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required.

Mr. McGee

M287. Urban Housing and Community Development (2 to 4 units). (Same as Architecture and Urban Planning M231.) Examination of past 40 years of federal and state programs to stem urban decline and improve housing in the U.S.; comparison and contrast of legal and public policy, social, and economic aspects of public housing segregation, mortgage subsidies, landlord-tenant law, urban renewal, and community organizing. Research paper required. Mr. McGee, Mr. Sander

M290. Environmental Law (2 to 4 units). (Same as Architecture and Urban Planning M254.) Examination of the field of environmental law through analysis of various legal issues and public policy: legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as a means of illustrating policy issues underlying the field.

Mr. McGee

Mr. Trimble

295. Criminal Procedure. Process by which courts decide guilt or innocence of those accused of crime and selection of an appropriate penalty. Right to bail and other devices by which accused persons can be released following arrest and pending trial. Process by which prosecutor decides what charges to file and limits on charging power, including the grand jury and preliminary hearing. Criminal pleading, including process of plea bargaining. Trial process, including right to trial by jury and sentencing procedures.

Mr. Arenella

Mr. Abrams, Mr. Dolinko

M301. Art Law (3 units). (Formerly numbered 301.) (Same as Art History M270.) Prerequisite: consent of instructor. Knowledge of fine arts, arts management, or international law desirable. Limited enrollment; management and administration of art collections may be registered with consent of instructors. Legal issues related to the fine arts. Consideration of U.S. domestic law as well as international treaties and foreign law in addressing owner's rights to art and impact on political power relationships. Statutory reforms enacted in past 10 to 15 years at federal and state levels. Right to vote, reapportionment, political parties, bribery, campaign finance, incumbency, ballot propositions, lobbying, and conflict of interest.

Ms. Olsen

319. Law and the Political Process. Recommended prerequisite or corequisite: course 201. Ways in which laws governing the political process affect and interact political power relationships. Statutory reforms enacted in past 10 to 15 years at federal and state levels. Right to vote, reapportionment, political parties, bribery, campaign finance, incumbency, ballot propositions, lobbying, and conflict of interest.

Mr. Lowenstein

325. Law and Psychiatry. Law affecting the many persons identified as seriously mentally ill has rapidly changed in past 30 years, especially with respect to standards for involuntary civil commitment: rights of those committed, including right to treatment and to decline treatment; guardianship; doctor-patient confidentiality; discrimination against the mentally handicapped; insanity and related defenses; competence to stand trial; and criminal dispositions. Attitudes concerning psychiatrists, psychotherapy, and mental illness have also changed. Exploration of these changes, with emphasis on impact of constitutional adjudication on the rights of patients and of court-appointed guardians and psychiatrists and lawyers regarding dependence and paternalism, and liberty and constraint; whether imposition of legal rules on medical practices has diminished human suffering.

Mr. Goldstein

326. Health Law and Administration. Major programs in health care financing (Medicare, Medicaid, private insurance, medically indigent) and health care organization (private practice, HMOs, preferred providers, etc.). Effects of cost containment and administration's pro-competitive strategy. Selected topics include the professions, hospitals, quality control (including malpractice), antitrust, alternative approaches to health care, medical experimentation, special health problems of the poor, the elderly, women, minorities, and the defective newborn.

Mr. Handler

327. Communications Law. Survey course on laws related to major industries regulated by the Federal Communications Commission (broadcasting, cable, satellite, telecommunication). Libel, false light, invasion of privacy, commercial use of the mass media, including fairness doctrine, political speech, and ownership restrictions. Review of policy bases for regulation and proposals for change. Analysis of the political process affecting communication technologies, including cable and satellites. Review of principles of common carrier regulation, as applied to examination of telecommunications industry in aftermath of the divestiture of the Bell System.

Mr. Brenner

331. Immigration Law. Overview of immigration and naturalization process from practitioner's point of view. Nonimmigrant and immigrant visas, consular practice, deportation/exclusion proceedings, naturalization and citizenship, constitutional issues related thereto, and specific remedies available.

Mr. Gunning

335. Religious Legal Systems. Literature and institutions of a religious legal system. Offered from time to time by different instructors in Canon law, Islamic law, and Rabbinic legal tradition. Content varies depending on particular tradition under study; emphasis on concerns common to a legal system based on divine authority. Extent of human authority to interpret and modify the received law to meet new circumstances, relations between religious law and secular law, and role of religion in political life. Consideration of a wide variety of texts, including works of Jewish, Islamic, and Christian theologians, and members of the critical legal studies movement. Reading of major works in feminist legal theory; emphasis on practical effects such theory may have on a variety of issues of importance to men and women.

Ms. Blumberg, Mr. Goldstein

356. Patent Law. Designed for future general or business lawyers who should be able to recognize a patent problem or a related intellectual-property problem, and for prospective patent lawyers. Patents related to trade secrets, copyrights, and trademarks. Classic policy tension between technological progress and free competition, or patents vs. antitrust law. Use of patents to illuminate several general law areas. Constitutional base of patent system; how mandate is effectuated or defeated in practice. Broadening of professional responsibility insight by an ethics paradox peculiar to patent law. Patent office negotiation and strategic application of principles of persuasion.

Mr. Wiley

363. Conflict of Laws. Problems resulting from multistate (both sides, state and foreign nation) disputes. Choice of law problem, constitutional limitations on state choice of law, recognition of foreign judgments and jurisdiction. Analysis of governmental interests impacting the choice of law. Mr. Bauman

Mr. Burg

317. Family Law. The family can be both a haven of intimacy and a hell of oppression. The many different realities of family life shape and are shaped by the set of legal rules and standards known as family law. Broad theoretical approach to study of family law — marriage, divorce, child custody, support obligations — with questions about relationship between law and society and about nature and limits of law. Traditional principles and policies of family law in context of a variety of controversial issues, such as role of sexual abuse in child custody proceedings, legal recognition of alternative forms of family life, reproductive technologies, contrariety between religious and civil law, and court orders to control pregnant women, and myth of state neutrality in the family.

Ms. Olsen

319. Law and the Political Process. Recommended prerequisite or corequisite: course 201. Ways in which laws governing the political process affect and interact political power relationships. Statutory reforms enacted in past 10 to 15 years at federal and state levels. Right to vote, reapportionment, political parties, bribery, campaign finance, incumbency, ballot propositions, lobbying, and conflict of interest.

Mr. Lowenstein

325. Law and Psychiatry. Law affecting the many persons identified as seriously mentally ill has rapidly changed in past 30 years, especially with respect to standards for involuntary civil commitment: rights of those committed, including right to treatment and to decline treatment; guardianship; doctor-patient confidentiality; discrimination against the mentally handicapped; insanity and related defenses; competence to stand trial; and criminal dispositions. Attitudes concerning psychiatrists, psychotherapy, and mental illness have also changed. Exploration of these changes, with emphasis on impact of constitutional adjudication on the rights of patients and of court-appointed guardians and psychiatrists and lawyers regarding dependence and paternalism, and liberty and constraint; whether imposition of legal rules on medical practices has diminished human suffering.

Mr. Goldstein

326. Health Law and Administration. Major programs in health care financing (Medicare, Medicaid, private insurance, medically indigent) and health care organization (private practice, HMOs, preferred providers, etc.). Effects of cost containment and administration's pro-competitive strategy. Selected topics include the professions, hospitals, quality control (including malpractice), antitrust, alternative approaches to health care, medical experimentation, special health problems of the poor, the elderly, women, minorities, and the defective newborn.

Mr. Handler

327. Communications Law. Survey course on laws related to major industries regulated by the Federal Communications Commission (broadcasting, cable, satellite, telecommunication). Libel, false light, invasion of privacy, commercial use of the mass media, including fairness doctrine, political speech, and ownership restrictions. Review of policy bases for regulation and proposals for change. Analysis of the political process affecting communication technologies, including cable and satellites. Review of principles of common carrier regulation, as applied to examination of telecommunications industry in aftermath of the divestiture of the Bell System.

Mr. Brenner

349. European Community Law. For more than thirty years a unique set of legal institutions has been developing to support economic and political integration of Western Europe. In recent years the process has accelerated with the aim of completing integration of the internal market by 1992. Examination of structures and institutions of the community, law-making processes they use, and their approach to several salient substantive economic problems.

Mr. Rosett

401. Investigation and Discovery in Complex Litigation (Clinical). Process of development of discovery facts, relationship between discovery of facts and proof at trial, and range of formal and informal discovery devices available for use in complex litigation. Through fieldwork with public and private plaintiffs and defense firms, students work on various aspects of investigation and discovery in major pieces of litigation under supervision of an experienced litigator. Mr. Binder, Ms. Gillig

402. Clinical Seminar (Clinical). Students spend one term working virtually full time in a small law firm housed in the Law School Clinic. Under faculty supervision, each student works with one or two cases, interviewing and counseling clients, writing and arguing motions, preparing written documents, taking depositions, and developing closing arguments. Students also participate in class sessions and simulated videotaped exercises designed to develop their lawyering skills. Subjects include interviewing, counseling, motion practice, deposition practice, negotiation, and trial advocacy. Mr. Binder

405. Trial Advocacy (Clinical). Designed to provide training in the full range of skills needed by a trial advocate. Throughout series of classes emphasizing development of courtroom advocacy and other lawyering skills: case planning, direct and cross-examination of witnesses, opening statement and closing argument, client and witness interviewing, case investigation, negotiation, and examination of expert witnesses. In Fall Semester role-play exercises are legal or nonlegal in nature, capped off with a mock trial. During Spring Semester students actually appear in court and represent indigent clients under direct supervision of instructors. Mr. Bergman, Mr. Moore

408. Legal Negotiation (Clinical). Theoretical and practical aspects of process of negotiating transactions and disputes in our legal system. Negotiation theory, using both legal and behavioral sciences materials, in context of specific negotiation and mediation strategies and tactics are successfully employed; ethical and normative implications of negotiating, role negotiation plays in our legal system, both in dispute resolution and in legal planning; negotiating, both from planning and behavioral perspectives. Ms. Menkel-Meadow

500. Seminar in Constitutional Law. Selected topics in constitutional law. Mr. Kerst, Mr. Varat

501. Seminar in Taxation: Time-Tax Issues. Comparison of an income tax and a consumption tax, proceeding to various theoretical issues such as the proper deduction for depreciation, relationship between treatment of payor and payee, and role of loans and the interest deduction. Applications of basic principles to treatment of such issues as reserved rents, sale of a life estate, and various rules added to the Code by the 1984 act (e.g., economic performance). Mr. Klein

502. Seminar in Taxation: Corporate and Tax Issues in Corporate Acquisitions. Prerequisite: course 221. Examination of selected corporate and tax aspects of corporate acquisitions, including financial and accounting considerations, selecting a target company, takeover strategies and defensive tactics in offers. Consideration of federal income tax treatment of corporate acquisitions. Mr. Zott

503. Seminar in Comparative Tax Systems. Prerequisite: course 220. Process of taxation, structure of a tax system, and effects of taxation, with emphasis on elements of tax systems of the U.S., Japan, Great Britain, and Germany. Topics include tax-making process, enforcement and compliance considerations, choice of tax base, taxation of business entities, economic consequences of different types of taxes, and use of tax system as a component of economic policy. Mr. Ramseyer, Mr. Zott

504. Seminar in Criminal Law: Rethinking Criminal Law Excuse Theory. Examination of both the determinist's objection to criminal law's blaming practices and responses to that challenge offered by philosophers, psychiatrists, and legal theorists who attempted to reconcile a deterministic view of human action with criminal law excuse theory. Examination of theoretical premises of both approaches, with emphasis on specific complete and partial excuses such as insanity, duress, provocation, diminished responsibility, and ”ghetto-defense.” Mr. Arendell

505. Seminar in Criminal Law: Death Penalty. Is death penalty morally impermissible? Is it immoral even if it has a deterrent effect? Or are there situations in which it is morally improper not to apply the death penalty (even if it has no extra deterrent effect)? Exploration of these questions, with emphasis on such topics as the allegedly arbitrary and discriminatory manner in which death sentences are carried out, risk of executing the innocent, and whether retention or abolition of the death penalty better comports with respect for the sanctity of human life. Mr. Dolinko
tension between saying that women own their bodies and bond covenants. Topics include determinants of financial distress and likelihood of bankruptcy proceedings. ms. goldberg-ambrose

504. Seminar in Theory of Property: Property Rights in Body Parts. Philosophical examination of the metaphysical and moral status of the fetus and of the tension between saying that women own their bodies and therefore have complete control over them and saying that it demeans women to think of their bodies in terms of concept of property at all. Relevant literature includes not only a portion of the many philosophical and psychiatric discussions of abortion but also writings on in vitro fertilization and frozen embryos. Some philosophical background helpful but not required. Ms. Munzer

505. Seminar on Business Associations — Corporate Debt: Use and Terms. Study of use of debt in financing business and the terms of debt obligations; conflicts between debtholders and equityholders and between bond covenants. Topics include determinants of financial structure, various bond covenants and terms of loan agreements, types of debt instruments, junk bonds, and differences and relationships among duration, control, and risk. Mr. Klein

507. Seminar in Labor Law: Problems of Procedure and Evidence in Labor Arbitration Hearings. Special problems of evidence and procedure encountered in the labor arbitration hearing: administration of evidence seized from employee personal belongings on company property; application of “self-incrimination” and other evidentiary “privilege” doctrine; treatment of “workplace conessions”; propriety of calling the grievant-employee as an adverse witness; employees’ right to refuse to testify; and the admissibility of evidence concerning criminal offenses. In order to determine and critically evaluate these issues, students will be required to address legislative or litigative solutions to these problems. Mr. Firestone

512. Seminar on Selected Problems in Social Welfare and Health. Prerequisite: consent of instructor. Limited enrollment. Year-long research seminar on topics selected by students with consent of instructor, with emphasis on empirical-policy research outside the School of Law and preferably in the community. Joint class meetings to discuss topics, methods of approach, and preliminary findings, but most of work to be independent research. Mr. Handler

513. Seminar on Environmental Law: NEPA and SEPAAs. Consideration of role of administrative agencies and courts in implementation of environmental study through impact statements/reports. In the context of case study review of actual EISs/EIRs, evaluation of “substantive” authority versus “minor” procedural review in control and mitigation of adverse environmental impacts. Ms. mcgee

514. Seminar in Comparative Family Law. Comparative law and family law issues. Selected topics in family law examined from a comparative perspective. Practical and theoretical difficulties of comparative legal research as well as the substantive family law issues. Topics include abortion/contraception/family planning, divorce, intrafamily violence, and marital property. Ms. mcgee

519. Seminar: Comparative Japanese Law — Selected Readings. (Formerly numbered 519.) (Same as Japanese M196.) Prerequisite: reading knowledge of Japanese at third-year level. Designed to introduce students to a variety of Japanese-language legal materials. Reading of law review articles and other sources as time permits (e.g., selections from contracts, cases, or treaties); titles vary from term to term. Classroom work may be based on the latest research with outside projects with consent of instructor. Ms. Ramseym

522. Seminar in Private Land-Use Planning. Constitutional, statutory, and public policy limits on private land use of housing consumers; implications of racial and religious discrimination, gender and life-style discrimination, restraints on trade and competition, restraints on alienation, and limits on interferences with privacy and personal autonomy examined primarily in context of subdivision covenants and homeowners’ associations. Ms. French

524. Seminar: Philosophy of Law. (Same as Philosophy M257.) Prerequisite: consent of instructor. Selected topics in philosophy of law. May be repeated for credit. Ms. Mcgee

525. Seminar in Communications Law. Prerequisite: course 327. Students select specific topics in communications law, with emphasis on effect of new technologies on legal issues associated with a particular problem, and may work on an issue that is designed to address legislative or litigative solutions to the problem. Students’ work may be used in ongoing litigation or in current legislative deliberations. Ms. Million

526. Seminar: Urban Affairs (2 to 4 units). (Same as Architecture and Urban Planning M202C.) Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; recent trends in homeownership; impact of housing on local, state, and national economic development. Ms. mcgee

531. Seminar: Law and Development in Latin America. Role of law in economic, political, and social change in the developing countries of Latin America, compared to function of law and policy in the U.S. in allocation of wealth and natural resources. Consideration of the civil law tradition in Latin America. Examination of nexus between existing socioeconomic relationships and legal institutions; exploration of role of law as an instrument of both reform and counter-revolution. Ms. Mcgee

535. Seminar in Arbitrated Alcohol and Drug Workplace Disputes. Study of evolving arbitral and judicial standards in drug and alcohol workplace disputes. Representative topics include sufficiency of just-cause to test employees for drugs; disputes over accuracy of urine and blood analysis tests for drugs; role of rehabilitation as a factor in the decision to discipline for drug or alcohol abuse; differing (and possibly discriminatory) treatment of drug-abuse offenders vis-à-vis alcohol abuse offenders; appropriate linkage of off-duty ingestion with on-duty impairment; appropriate impact on the arbitrator of drug and alcohol abuse in the workplace; and implications of mandatory drug tests. Mr. Ramsey

539. Seminar on Sports Law. Legal issues pertaining to both professional and amateur sports. Representative issues include federal labor issues (particularly those raised by collective bargaining and arbitration processes); antitrust issues (including those raised by attempts to control by collective bargaining, the transfer of player-agent relationships, and antitrust issues raised by the NCCA’s regulation of amateur sports); and sex discrimination. Mr. Derian

536. Seminar in Appellate Advocacy. Appellate practice and skills necessary for effective appellate advocacy. Generalized principles of brief writing and oral argument. Cases from current u.s. Supreme Court decisions to 50 to 100 pages to participate in an oral argument before a panel consisting of faculty members and other students in seminar. Mr. Eule

545. Seminar in Civil Rights: Voting Rights. Exploration of tension between antidiscrimination law and principles of democratic participation. Limitation of voting rights; ways in which judges and legislators have attempted to provide remedies for racially based exclusions from political and social institutions while upholding American concepts of democracy. Ms. Crenshaw

555. Seminar in Feminist Legal Theory. Designed primarily for those who have completed course 329 (consent of instructor for other students). Assumes familiarity with the basics of sex discrimination law. Exploration of development in the last decade of a new field of jurisprudence, using feminists’ varying definitions and applications of the statutory concept of “equality” as the organizing theme. Reading of feminist legal theorists’ own descriptions of the field and their contributions to it. Ms. Littleton

555. Seminar in Legal Theory/Toward Feminist Jurisprudence. During past five years, sex discrimination scholarship has moved beyond its initial focus on legal doctrine and constitutional arguments to develop a criticism of the legal system itself. Impact that feminist theory is having on legal theory highlighted by recent wave of major works in feminist legal theory and discussion on practical effects these theoretical formulations have on a variety of legal issues of importance to men and women. Ms. Isenberg

559. Seminar on Sports Law. Legal issues pertaining to both professional and amateur sports. Representative issues include federal labor issues (particularly those raised by collective bargaining and arbitration processes); antitrust issues (including those raised by attempts to control by collective bargaining, transfer of player-agent relationships, and antitrust issues raised by the NCAA’s regulation of amateur sports); and sex discrimination. Mr. Derian
564. Seminar in Evidence. Prerequisite: course 211. Selected topics include plain error doctrine, problems raised by testimony of young children, relationship between scientific conclusions of expert and character evidence, problems in relation to "other witnesses" evidence, and expert testimony under federal rules. Mr. Letwin

565. Seminar in Legal History: Black Slavery and Freedom, 1630-1868. Contested meanings and boundaries of "slavery" and "freedom" in legal and political cultures of the North and South at critical moments in their histories. How race and class figured in legal oppression of blacks, and how blacks and others have sought to use law to extend their freedom. Introduction to a variety of ways of doing legal history and of exploring the interplay of law, politics, and society. Topics include genesis of slave codes, history of law of slavery, abolitionist jurisprudence and legal activism. Constitution as a terrain of sectional conflict, emancipation and Reconstruction: ex-slaves and ex-slaves contest the boundaries of the new freedom, rise of Jim Crow, emergence of modern civil rights movement and legacy of antiblackness, de-segregation and voting rights struggles, relations between legal and other forms of political action, and achievements and limits of the "second reconstruction" of 1954 to 1968. Mr. Forbath

566. Seminar in American Legal History, 1776-1986. Recommended prerequisite: course 337. Designed for students interested in doing original historical research. Reading of a handful of historians whose studies illuminate important issues or methodological problems. Progress reports and presentations. Mr. Forbath

567. Seminar in Comparative Legal Education and Evaluation of Students and Faculty. Advanced legal education; class stratification in legal education; testing legal education; teaching methods; law school politics; recruitment of students and faculty, etc. Ms. Anderson

568. Seminar in Administrative Law. Major subjects: consent of instructor. Law schools as institutions through the government or individually through the public school sex education; (6) transsexuals and transgenerational sexual interaction; (4) fornication (intercourse with a consenting unmarried female); (5) prohibited behavior utilizing the following topics: (1) homosexuality; (2) fornication; (3) punishment of consensual sexual conduct and evaluation of those discussions. Mr. Trimble

574. Seminar in European Economic Community. Structures and institutions of European communities, their lawmakers, processes, and administration. Interaction and conflict between community law and national law, and growing role of European court in mediating between the nations and communities. Processes of the court and parallels between American constitutional development and that in Europe. Mr. Rosett

575. Seminar in Business Planning. Prerequisites or corequisites: courses 220, 221, 230. Tax and corporate law aspects of important problems in the life of an enterprise, such as formation of a corporation, compensation of employees, recapitalization, stock redemptions, acquisitions, and corporate divisions. Mr. Asimow

576. Seminar in Arms Control and Legal Process. Role of sanctions and dispute-settlement techniques in arms control agreements. Original plan of United Nations against role it has actually played in international peacekeeping. Recent arms control efforts such as Nuclear Test-Ban Treaty, Nonproliferation Treaty, and SALT, with a view to assessing the potential for enhancing compliance with these through international cooperation. Comparison with the experience of the GATT and IMF, as well as some of the more theoretical literature on reasons why nations comply with international law. Mr. Trimble

577. Seminar in Law and the Political Process. Ways in which laws governing the political process affect and reflect political power relationships. Statutory reforms enacted in past 10 to 15 years at federal and state levels. Right to vote, representation of political parties, bribery, campaign finance, incumbency, ballot propositions, lobbying and conflict of interest. Mr. Lowenstein

578. Seminar on Law and Computers. Prerequisite: consent of instructor. No prior computer experience required. Selected topics involving law on the one hand, and emerging computer systems and artificial intelligence, protection of computer software and hardware as intellectual property, privacy, and use of computers in various legal settings on the other. Mr. Asimow

579. Seminar in Immigration Law: Aliens' Rights. Prerequisite: course 331. Emphasis on three substantive areas of immigration-related law that are legally and politically salient: citizenship and naturalization, refugee and asylum law, and employment rights of aliens. Introduction to fundamental law in topic-specific institutions, development of critical perspective on extant law. Basic statutory framework and traditional judicial gloss placed on various legal requirements and procedures for attainment of certain status or equality of treatment at the workplace. Development of understanding of theories of migration, drawing crucial distinctions between labor and political migration, foreign policy and the role of the judiciary in implementing our legal regime, and political structures. Demonstration that our history of race relations, foreign policy, and economic structures have a predominant effect on our legal structures and enforcement. Mr. Trimble

580. Seminar in Law, Psychiatry, and Human Sexuality. Interface between law, psychiatry, and sexual behavior in America, with particular reference to sexual behavior as a dimension of personality and psychopathology as either mental illness or alternate life-style and its application to (a) analysis of sodomy laws, (b) immigration restrictions, (c) military prohibitions, (d) state prohibitions, (e) medical practices of custody decisions where a parent is homosexual; (2) behavioral and social effects of pornography; (3) age of consent and transgenerational sexual interaction; (4) fornication (intercourse with a consenting unmarried female); (5) prohibited procreative behavior utilizing the following topics: (1) homosexuality; (2) fornication; (3) punishment of consensual sexual conduct and evaluation of those discussions. Mr. Trimble

581A-S81B. Seminar on Child Abuse and Neglect. Augusts lectures offered in courses M281A-M281B with discussions of lectures, additional readings, presentation of research and field placement experiences, field trips, and interdisciplinary practice. Mr. Goldstein

582. Seminar in Theories of Process. Exploration of growth and development of legal process. About recognizing disputes and keeping the peace? About preserving a delicate political compromise? About furthering substantive goals? About finding the truth? Or about the authoritative enforcement of norms? Each has been proposed as a central goal of civil procedure, and the choice among them has consequences for the general design of procedural law as well as small procedural details. Writers on this topic include Blackstone, Bentham's attack on Blackstone, modern proponents of alternative dispute resolution, economic analysis of litigation, those who argue that civil litigation has replaced religion as a moral oracle, and those who use comparative law as a way of analyzing American procedure. Using both classical and modern writings on procedure, seminar aims at developing a framework for discussing and comparing procedural system and proposed changes in it. Mr. Yeazell

583. Research Seminar on Homeless Families. Legal and policy issues presented by homeless and near-homeless families in our society. Empirical research on nature, extent, and causes of homelessness and lack of homelessness among families. Advocacy strategies for homeless families, including group litigation and shelter-based advocacy. Students research existing public policy in area and outline possible research questions, such as welfare, legal services, housing, health, education, and family policy. They develop policy recommendations in each area and explore strategies for implementation. Students situate themselves in an interdisciplinary UCLA faculty/professional workshop on homeless families in which students participate. Ms. White
Our society has become a world of information. Over half of the nation's workforce is now directly engaged in producing, processing, and distributing information in one form or another. Education, scientific and technical development, banking and financial management, government and corporate management — all depend increasingly on accurate, relevant, and readily available information. New technologies have produced a wealth of forms in which we may distribute and transfer information. Printed media have been supplemented by photographic, audiovisual, and computer-processible forms. As a result, libraries and information systems of all kinds have become crucial agencies for the management of the resulting flood of information.

The field of library and information science is concerned with the processes involved in these information agencies and, more generally, in the use of information in our society. How are records with essential information, whatever their form may be, to be acquired, preserved, organized, retrieved, and made available? How is information best used in making decisions and in meeting the goals of society as a whole, as well as those of specific organizations?

Education in the field must provide competence with both old and new methods for the processing of information and old and new approaches to the management of libraries, information centers, and information systems in organizations of all kinds. It is this goal to which UCLA's Graduate School of Library and Information Science is dedicated.
Graduate School of Library and Information Science

120 Powell Library Building, (213) 825-4351

Professors
Harold Borko, Ph.D.
Robert M. Hayes, Ph.D.
Beverly P. Lynch, Ph.D., Dean
Russell Shank, D.L.S.
Elaine Svenonius, Ph.D.

Lawrence Clark Powell, Ph.D., Litt.D., L.H.D., H.D., Emeritus
Robert Vosper, M.A., LL.D., Emeritus

Associate Professors
Marcia J. Bates, Ph.D.
Christine L. Borgman, Ph.D.
Mary Niles Maack, D.L.S., Associate Dean
John V. Richardson, Ph.D.
Diana M. Thomas, Ph.D.

Assistant Professors
Donald O. Case, Ph.D.
Claire Chu, M.L.S.
Michele Cloonan, Ph.D.
Stephen Stern, Ph.D.
Virginia A. WALTER, Ph.D.

Lecturers
Jennifer Abramson, M.L.S.
Celine Alvey, M.L.S.
Karen Andrews, M.L.S.
Philip C. Bartin, M.L.S.
Bruce Bennion, Ph.D.
Barbara Booth, M.L.S.
Cathy Brown, M.L.S.
Alison Bunting, M.L.S.
Mary Carter, M.L.S.
Richard Chabran, M.L.S.
Susan C. Curzon, Ph.D.
Nina David, M.L.S.
Leon Ferder, Ph.D.
Shirley Goldstein, M.L.S.
Miki Goral, M.L.S.
Esther Grasier, M.L.S.
Bethany Johnson, M.L.S.
Joan Kaplowitz, Ph.D.
Ludwig Lauerhaas, Ph.D.
James T. Maccaferri, Ph.D.
Eldythe Moore, M.L.S.
Constance W. Nyhan, M.L.S.
Terese Omidsalari, M.L.S.
Nancy O'Neil, M.L.S.
Mary I. Purucker, M.L.S.
Ray Reese, M.L.S.
Marcia Reed, M.L.S.
Maureen Russell, M.L.S.
Myra Saunders, J.D., M.L.S.
Rita Scherrei, Ph.D.
Lise Snyder, M.L.S.
Frank H. Spearman III, M.B.A.
Daniel Strehl, M.L.S.
Gail A. Yokote, M.L.S.
Elizabeth R. Baughman, M.L.S., M.A., Senior Emerita
Elizabeth R. Eisenbach, M.L.S., Senior Emerita
Betty Rosenberg, M.A., Senior Emerita

Adjunct Professor
G. Edward Evans, Ph.D.

Visiting Assistant Professor
J. Denny Haythorn, J.D., M.L.S.

Applicants may write to the Graduate School of Library and Information Science, 120 Powell Library Building, UCLA, Los Angeles, CA 90024-1520, for the school's announcement and application materials.

Degrees Offered
Master of Library Science (M.L.S.)
Post-M.L.S. Certificate of Specialization
Doctor of Philosophy (Ph.D.) in Library and Information Science

Master of Library Science

Admission
Students are admitted in Fall Quarter only. In addition to Graduate Division requirements and application procedures (see Chapter 3), the school requires:

1. A statement of purpose.
2. Graduate School of Library and Information Science application materials provided in the school's announcement.
3. An official report of a score on the General Test of the Graduate Record Examination (GRE) taken within the past five years.
4. For international students whose native language is not English, an official report of scores received on the Test of English as a Foreign Language (TOEFL), including the Test of Written English (TWE).
5. Three letters of recommendation.
6. Satisfaction of the following entrance requirements: (a) reading knowledge of a foreign language, which may be met by completing three quarters or two semesters of college-level study in the language with minimum grades of C or by passing the Graduate School Foreign Language Test (GSFLT) with a minimum score of 500. The school will accept a passing grade on a foreign language test administered by another UCLA department that meets that department's graduate degree requirements; and, for languages not covered by the GSFLT, the passing of a reading test supervised by the appropriate UCLA foreign language department; (b) a statistics requirement, satisfied by completing a college-level course with a minimum grade of C; (c) a computer programming requirement, met either by completing a college-level course with a minimum grade of C or by passing a proficiency examination administered by the school (most standard languages such as PL/1, FORTRAN, COBOL, PASCAL, and BASIC are acceptable, as is a college-level course in the use of data management systems such as dBASE3, KNOWLEDGEMAN, CONDOR, or C).

The dean may permit postponement of one or more of these requirements for full-time students, but completion of these courses at a later time may represent a serious work overload for the new student. In any case, all requirements must be completed before beginning your fourth term in residence. Part-time students may not enroll in the program until they have completed the entrance requirements.

Applicants not meeting the required grade-point average of 3.0 may be admitted in exceptional cases if GRE scores, letters of recommendation, or other factors indicate unusual promise. While work experience is not a requirement for admission, consideration is given to such experience in reviewing the total application.

The committee on M.L.S. and certificate admissions may request a report of an interview conducted by the dean or a person designated by the dean as qualified to conduct an interview.

For further information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Course Requirements
As a full-time student, you are normally required to enroll in three courses per term in order to complete the program in six terms. Part-time enrollment may be permitted if you are working in a library or information center, but you must complete the program in 10 terms.

Eighteen courses (72 quarter units) are required for graduation from the M.L.S. program. Coursework must provide evidence both of basic professional competencies and of knowledge in a field of specialized competence.

Basic Professional Competence — The requirement is met by completing nine core courses: Library and Information Science 400, 402, 410, 411, 420, 421, 430, 440, and at least one
Cooperative Degree Programs

To participate in a cooperative program, you must make application to and be admitted by both this school and the other UCLA school or department. Fulfilling the combined set of program requirements normally takes three years.

M.A.-History/M.L.S.

This concurrent degree program of the Graduate School of Library and Information Science and the Department of History allows you to combine historical study with the tools of the information professional and to obtain two degrees — the M.L.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from this school and the History Department.

M.A.-Latin American Studies/M.L.S.

This specialization is an articulated degree program of the Graduate School of Library and Information Science and the Latin American Studies Program. You can obtain two degrees — the M.L.S. and the M.A. in Latin American Studies. However, no course may be used for credit toward more than one degree. The program provides broad training in library and information science, as well as the opportunity to explore and analyze on an advanced level the social, political, and cultural issues characteristic of Latin American societies.

M.B.A./M.L.S.

A concurrent degree program jointly sponsored by the Graduate School of Library and Information Science and the John E. Anderson Graduate School of Management, this specialization is designed to provide an integrated set of courses for students who seek careers which draw on liberal arts knowledge of a field of specialization in librarianship, bibliography, or information science. The field of specialization and the specialized coursework must be approved by a faculty adviser. The requirement ordinarily is met by the completion of nine additional courses, which may include internships. Relevant coursework in other departments or schools is encouraged. You may petition to have prior coursework applied to your specialization.

During the second year, you may apply for an internship of one to three terms either on campus or off campus at a library or information center. The internship is a regularly scheduled course and may be applied toward the 18 required courses.

No more than eight units of course 596 may be applied toward the total course requirement; only four units may be applied toward the minimum requirements of the Graduate Division. In order to enroll in any S/U graded course, including 500-series courses, you must be in good academic standing.

Comprehensive Examination Plan

A comprehensive examination consisting of two components is required. The written test breadth component is offered in Fall, Winter, and Spring Quarters and is designed to demonstrate your understanding of library and information science services as a totality. It does not cover the basic professional competencies individually but deals with the field in a unified form. To be eligible to take the written test component, you must complete one year of academic residency, satisfy all outstanding entrance requirements, and complete (or be in the process of completing) all nine core courses.

The specialization component of the comprehensive examination requires you to complete an elective course in which a major paper (normally in the area of your specialization) is produced. A grade of B or better must be earned in the course; you may not use the same course to satisfy both the paper and the research methods requirements.

Your course program may begin in any term of the academic year. If you are admitted for a preliminary term to complete prerequisite courses, that term is not counted toward the minimum residence requirements.

Part-time enrollment is encouraged to provide flexibility for the working librarian. Opportunities for relevant coursework outside the department and internships, both on and off campus, are available.

Three general areas of specialization have been authorized: librarianship, bibliography, and information science. Further specialization within these fields is possible. A minimum of nine courses (100-, 200-, 400-, and 500-series) must be completed in the Graduate School of Library and Information Science and other departments of the University.

In addition to taking coursework in your area of specialization, you must complete a paper or project in that area, which demonstrates a considerable amount of work and thought and is of publishable quality. The specialization paper or project is required even if you have an advanced degree in which a thesis or dissertation was a requirement and must be approved by your faculty adviser.

Ph.D. Degree

Admission

Students are admitted in Fall Quarter only. In addition to Graduate Division requirements and application procedures, the school requires:

1. A master’s degree or the equivalent from an institution of recognized standing, representing academic preparation equivalent to that required for a comparable degree from the University of California.

2. Evidence of basic professional competence.

This would be satisfied by an M.L.S. degree from a program accredited by the American Library Association; or by completing Library and Information Science 400, 402, 410, 411, 420, 421, 430, 441, and at least one graduate-level research methodology course such as 205, 240, 241, 260, 261, or 290.

3. Satisfaction of the same entrance requirements as listed in item 6 under the M.L.S. degree.

4. A statement of purpose which identifies your proposed area of specialization, accompanied by appropriate evidence of qualifications for pursuing a doctoral program (in the form of published work, master’s thesis, or two research papers, written in English).

5. A total score of 1,200 or better on the General Test of the Graduate Record Examination (GRE), with at least 500 in each of the two parts (verbal and quantitative). The examination must have been completed within five years prior to application for admission.
Dissertation/Final Oral Examination
The third formal requirement of the program is that you research, write, and defend a dissertation. The final oral examination, required of all library students, is administered by members of the doctoral committee, who also evaluate the dissertation.

Upper Division Courses
Upper division courses may not be applied toward the M.L.S. degree.

110. Information Resources and Libraries. Prerequisite: sophomore standing or consent of instructor. Not open for credit to M.L.S. students. Introduction to bibliographic and information resources and relevant research methodology, covering both general and specialized materials. Designed to facilitate knowledgeable use of libraries and efficient retrieval of information. Some sections focus on specific subject areas (such as science and technology).

111A-M111E. Ethnic Groups and Their Bibliographies. Introduction to bibliographical and research tools and methods for students with interests in ethnic groups. 111A. American Indian History and Culture; 111B. African American History and Culture; 111C. Latino History and Culture; 111D. Asian American History and Culture; M111E. Jewish History and Culture. (Same as Jewish Studies M111E.) Sections on other ethnic groups may be added. Offered in collaboration with the several centers for ethnic studies. May not be repeated for credit.

124. Information Access Systems. Exploration of new and established channels for providing information to the general public, including videotex, electronic publishing, data bases, information utilities, computer mail and bulletin boards, and conventional library operations. Each information technology studied on basis of its history, economics, technical characteristics, relation to other media, and potential for social relevance.

140. Computer Programming for Library Operations and Services. Introduction to computer programming and data base management in the library information center environment. Concepts of data organization and record and file structure, with emphasis on data description. Students required to create and execute a variety of programs on microcomputer and/or mainframe systems for bibliographic, administrative, and management information applications.

Graduate Courses
Graduate division undergraduate students must obtain consent of the instructor to enroll in 200-series courses and consent of the dean of the school to enroll in 400-series courses.

Graduate students from other schools or departments who wish to take courses in the Graduate School of Library and Information Science also must obtain consent of the instructor prior to enrolling.

The following courses are offered infrequently:

M202. Folklife Archiving. (Same as Folklore M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklife archival collections, supplemented by firsthand experience in creating and managing data bases, utilizing both manual and computerized techniques.

205. Research Methodology in History of Bibliography. Library and Information Science. Introduction to historiography as it relates to librarianship. Identification of key primary and secondary source material for writing history in the field. Critical analysis and evaluation of selected bibliographical literature on librarians and information specialists, as well as influential histories of various areas in the profession. Problem-oriented approach.
228. Legal Bibliography. Introduction to source materials of the law, with emphasis on primary authority, but coverage includes secondary authority and indexes and finding aids which the lawyer and professional law librarian use to gain access to legal information.

229B. Africana Bibliography and Research Methods. (Same as Africana Area Studies M229B.) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized data bases. S/U grading.

229C. Introduction to Slavic Bibliography (2 units). (Same as Slavic M229C.) Prerequisite: consent of instructor. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line data bases; compilation of bibliographies. S/U grading.

231. Contemporary Information Industry and Distribution of Information. Examination of major institutions and processes of information production and distribution in contemporary society — informational content in which libraries operate. Emphasis on changing market stresses, trends in competition among information providers such as financial intermediaries, computer and telecommunications companies, and entertainment industry conglomerates; and new media of publication and display.

240. Principles of Information Systems Analysis and Design. Theories and principles of special systems development, including determination of requirements, technical design and evaluation, and internal organization.

241. Measurement and Evaluation of Information Systems and Services. Prerequisite: one research methods course. Recommended: one library automation course. Measurement and evaluation of information retrieval systems and services from points of view of both the manager and the user, meeting desired objectives. Review of principles of measurement. Study of literature in which measures have been developed to evaluate effectiveness of document collections, reference and information retrieval services, document delivery systems, content of book and serial collections, including circulation, acquisitions, and document description.

243. Human/Computer Communication. Survey of issues related to human/computer communication. Role of the computer in society, psychological aspects of use of computers, and ethical aspects of computer systems considered for their significance to systems design and user training. Students perform several on-line assignments and write term paper on one of the topics covered in course.

245. Data Base Management Systems. Theories, principles, and practicalities of database systems, including data models, retrieval mechanisms, evaluation methods, and storage, efficiency, and security considerations.

247. Seminar on Special Topics in Information Science. Prerequisites: courses 240, 242, 243, or 405, or consent of instructor. Content varies from term to term to allow emphasis on specialized topics in information science, such as computer- and telecommunications-based systems, acquisition strategies, and indexing and classification, bibliographic and linguistic text processing, and measures of relevance and system effectiveness. May be repeated for credit with consent of instructor.

251. Reading and Reading Interests. Interests of the common reader, excluding children, with special reference to types of library patrons. Fiction and subject categories, popular and standard: philosophy, religion, social sciences, art, music, literature, history, science. Survey of development of major periods and procedures, indexing and classification, bibliographic and linguistic text processing, and measures of relevance and system effectiveness. May be repeated for credit with consent of instructor.

260. Historical Bibliography. Early records and the manuscript period; history of the printed book and of periodicals; book and serial publication, on-line, serials, methods, and production. Parallel history of scholarship, the book trade, and book collecting in ancient, medieval, and modern Western civilization.

262. Seminar on Historical Bibliography. Prerequisites: course 260 or consent of instructor. Special studies in the history of specific historical periods, subject categories, popular and standard: philosophy, religion, and social sciences, art, music, literature, history, science. Emphasis on role of the librarian in responding to needs and abilities of children through individualized reading guidance.

265. Historical Indexing. Early records and the manuscript period; history of the printed book and of periodicals; book and serial publication, on-line, serials, methods, and production. Parallel history of scholarship, the book trade, and book collecting in ancient, medieval, and modern Western civilization.

266. Analytical Bibliography. Recommended (but not prerequisite): course 270 or equivalent in background or experience. History and methods of analytical bibliographic, with emphasis on recent scholarship. The book as a physical object and its relationship to transmission of the text. Emphasis on handpress books. Theories of Bradshaw, Procior, Greg, McKenzie, Pollard, Esdaile, Bowers, Stevenson, Hinman, McKenzie, and others.

267. Seminar on Historical Bibliography. Prerequisites: course 260 or consent of instructor. Special studies in the history of specific historical periods, subject categories, popular and standard: philosophy, religion, and social sciences, art, music, literature, history, science. Emphasis on role of the librarian in responding to needs and abilities of children through individualized reading guidance.

268. Historical Indexing. Early records and the manuscript period; history of the printed book and of periodicals; book and serial publication, on-line, serials, methods, and production. Parallel history of scholarship, the book trade, and book collecting in ancient, medieval, and modern Western civilization.

270. Historical Indexing. Early records and the manuscript period; history of the printed book and of periodicals; book and serial publication, on-line, serials, methods, and production. Parallel history of scholarship, the book trade, and book collecting in ancient, medieval, and modern Western civilization.

271. Seminar on Historical Bibliography. Prerequisites: course 260 or consent of instructor. Special studies in the history of specific historical periods, subject categories, popular and standard: philosophy, religion, and social sciences, art, music, literature, history, science. Emphasis on role of the librarian in responding to needs and abilities of children through individualized reading guidance.

272. Research Seminar in Library and Information Science. Prerequisite: doctoral standing or consent of instructor. Emphasis in recent contributions to theory, research, and methodology. May be repeated for credit. S/U grading.

273. Information-Seeking Behavior. Study of factors and influences, both individual and social, associated with human being's needs, used, and acting on information. Topics include information theory, human information processing, information flow among social and occupational groups, and research on information needs and uses.

274. Television and the Public Interest (2 units). Prerequisites: courses 420 and 421, or consent of instructor. Introduction to information needs of the business world. Encyclopedias, directories, yearbooks, indexes, loose-leaf services, government publications, data bases, and other sources of business literature.

282. Records Management (2 units). Principles of records control from creation to disposal. Designed as overview of records and information management to make students aware of information processing problems of business and how a coordinated records and information management program can improve information access and utilization.

290. Research Methodology. Prerequisite: consent of instructor. Role of research in bibliography, librarianship, and information science. Identification and design of research problems. Historical, statistical, analytical, and descriptive techniques.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice in teaching networks and practical skills. May be repeated for credit. S/U grading.

400. Information Professions. Historical and comparative overview of information professions and functions of libraries and information centers in society. Unity of librarianship and information science, heightened through discussions of computer applications to information storage and retrieval systems, natural language text processing, and automation of various library processes. S/U grading.

405. Automation of Library Processes. Overview of automation of library processes. Emphasis on computer-aided cataloging, acquisition, and circulation of printed and electronic formats. Presentation of basic on-line catalogs, serials, acquisitions, and circulation systems, integrated systems, data conversion, library networks, and developments in new technologies such as local-area networks and optical disks. Emphasis on practical skills and field experience in library automation; liberal use of guest speakers currently involved in automation projects.

412. Cataloging and Classification of Nonbook Materials. Prerequisites: courses 410, 411. Problems in cataloging and classification of selected non-book materials (e.g., films, maps, pictorial works, sound recordings) as separate collections and integrated collections.

413. Thesaurus Construction (2 units). Overview of major thesauri in use in manual and on-line environments. Emphasis on their construction and evaluation and principles underlying their design.

420. Information Resources and Services I. History and philosophy of information resources and services. Introduction to reference process (including question negotiation and development of search strategies) and to information resources in print and electronic formats. Presentation of basic on-line searching skills; students use several data bases.
421. Information Resources and Services II. Prerequisite: course 420. Topics include evaluation of reference sources and services; communication of information in a multicultural environment; user education/bibliographic instruction; economic and administrative issues; effect of computers on library systems. Stresses importance of current and emerging trends. Study of print and electronic versions of selected tools.

425. Computer-Based Information Resources. Prerequisites: courses 420, 421. Emphasis on use of reference, theoretical and practical use of retrieval and search programs. Explains hardware and software requirements. Analyses of information needs of scientists and business/labor, coupled with investigations into specific data bases addressing those needs.

426. User Education/Bibliographic Instruction: Theory and Technique. Prerequisite: consent of instructor. Uses of user education/bibliographic instruction in libraries and other information retrieval environments. Examination of a variety of user education/bibliographic instruction theories and methodologies, including overview of planning and administration. Identification of problems in user education/bibliographic instruction. Applications of methods of teaching use of libraries and information resources.

433. Serials (2 units). Prerequisites: courses 410, 420. Examination of this class of material. Emphasis on problems of recognition, acquisition, cataloging, analysis, and corporate entry. Language barriers, automation, and standardization.

441. Management Issues in Libraries and Other Information Agencies. Prerequisite: consent of instructor. Principles of management, emphasizing management techniques applicable to libraries of various types and to library systems. Special attention to management of human as well as technical resources.

442. Library Personnel Management. Basic principles of personnel management. Survey of current personnel practices in libraries; how basic principles apply or need to be modified to fit the library setting.

444. Information Networks. Problems in formulation, funding, and operation of information networks. Survey of some of the major networks, including institutional and computer systems.

446. Library Services and Literature for Youth. Overview of literature and programs which are of interest to children and adolescents (primary, grades K to 8; and above). Discussion of special problems in working with young people and psychology of the teenager.

447. Library Space Planning (2 units). Introduction to space planning and programming techniques and how they apply to libraries. Emphasis on use of existing space, but planning new buildings included. Reading blueprints, use of scales, contracts, use of consultants.

461. College, University, and Research Libraries. Organization, administration, collections, facilities, finances, and problems of college and university librarians and their relationships within institutions of which they are a part. Functions of research libraries and work of staffs in serving scholars.

465. Library Services and Programs for Children. Presentation of principles and actions in public, school, academic, and special libraries. Emphasis on programs and services geared to children and adults in various situations, with emphasis on the folklore, and oral interpretation with emphasis on modern imaginative literature. Readings and discussion of selected works and fantasy literature, society, child development, and library programming. Studies of their use in class and in a library or community setting and to read stories aloud.

466. Storytelling to Children and Adults. Oral Interpretation of Literature. Practical storytelling to children and adults in various situations, with emphasis on the folklore, and oral interpretation with emphasis on modern imaginative literature. Readings and discussion of selected works and fantasy literature, society, child development, and library programming. Studies of their use in class and in a library or community setting and to read stories aloud.

472. Law Librarianship. Introduction to law librarianship; organization of professional associations and special subject areas. Problem-oriented approach.

474. Serials and Special Collections (2 units). Study of serials and special collections; historical development of subject collections; relationship of libraries to other institutions and their users. Emphasis on library development.

475. Legal Libraries. Organization, administration, collections, facilities, finances, and problems of public and special law libraries. Survey of legal materials and research techniques not covered in other courses. Emphasis on public and special law libraries throughout the U.S.; distinctive character and distribution of legal materials.

486. Issues and Problems in Preservation of Library Materials. The role of libraries in the preservation of information and knowledge as recorded in written, pictorial, and sound materials. Emphasis on the nature of materials that are threatened with obsolescence, and techniques for their conservation.

487. Preservation of Library Materials. The role of libraries in the preservation of information and knowledge as recorded in written, pictorial, and sound materials. Emphasis on the nature of materials that are threatened with obsolescence, and techniques for their conservation.

488. Library Sciences and Information Science. Introduction to the field of library and information science. The role of libraries and information centers in society. Emphasis on the nature of materials that are threatened with obsolescence, and techniques for their conservation.

489. Library Service to Special Population Groups. Prerequisite: consent of instructor. Special problems encountered by school, public, academic, special, and research libraries in meeting needs of mentally-handicapped, physically-handicapped, special, and institutionalized populations.

490. Professional Communication (2 units). Designed to increase librarians' sensitivity to language in different contexts. Exploration of the range of stylistic and syntactic options open to students for presenting proposals, reports, and research results and covering all aspects of professional communications; written, oral, and visual, including computer-generated. S/U grading.

491. Interpersonal Communication Issues in Library Systems. Examination of interpersonal communication issues and application of techniques in a variety of organizational and interpersonal settings, with emphasis on the role of language in communication, organization and institution, and in the library.

494. Training and Supervision of Teaching Assistants (2 units). Hours to be arranged (20 hours per term). Prerequisite: appointment as a teaching assistant or Extension Division instructor. Orientation, introduction to supervision methods, and techniques for teaching assistant supervision. May be repeated twice. S/U grading.

495. Directed Individual Study or Research (2 to 4 units). Supervised professional training in a library or information center approved by the faculty of the school. Minimum of 120 hours per term, including weekly critiques of bibliographic, administrative, and service problems. May be repeated twice. S/U grading.

496. Directed Individual Study or Research (2 to 4 units). Supervisor: consent of instructor. Directed special studies in a field of bibliography, librarianship, and library education. Emphasis on the nature of materials that are threatened with obsolescence, and techniques for their conservation.

497. Directed Studies for Ph.D. Qualifying Examinations (4 to 8 units). Supervisor: consent of instructor. Directed special studies in a field of bibliography, librarianship, and library education. Emphasis on the nature of materials that are threatened with obsolescence, and techniques for their conservation.

498. UCLA Internship (2 units). Training in a library or information center approved by the faculty of the school. Minimum of 120 hours per term, including weekly critiques of bibliographic, administrative, and service problems. May be repeated twice. S/U grading.

499. UCLA Internship (2 units). Training in a library or information center approved by the faculty of the school. Minimum of 120 hours per term, including weekly critiques of bibliographic, administrative, and service problems. May be repeated twice. S/U grading.
Because the world is changing rapidly and unpredictably, today's professional manager must learn the concepts and principles of management that make adjustments to new conditions possible. At UCLA's John E. Anderson Graduate School of Management (AGSM), which is consistently ranked among the best such schools in the nation, students prepare to become first-rate managers with both specialized skills and a broad understanding of the general economic, business, and managerial environment. This background enables them to become effective and efficient directors of organizations and people whether they are in the private, public, or not-for-profit sector.

Specifically, AGSM offers the business community a wide range of continuing education programs that provide state-of-the-art information in a variety of fields. Through its faculty, the school advances the art and science of management by engaging in basic research in all fields of management and by educating scholars who can continue to create this new knowledge.

AGSM students come from diverse professional and educational backgrounds and seek equally diverse personal and professional goals. Whether they choose to pursue the professional M.B.A., the academic M.S., or a Ph.D. in Management, they graduate with a broad understanding of people and organizations and with a sound technical background in the economic and mathematical concepts of management planning and decision making.
John E. Anderson Graduate School of Management

3250 Anderson Graduate School of Management, (213) 825-7935

Professors
Robert B. Andrews, Ph.D. (Operations and Technology Management), Associate Dean
Michael J. Brennan, Ph.D. (Finance; Goldyne and Irwin Heaths Professor of Money and Banking)
John W. Buckley, Ph.D. (Ernst and Young Professor of Accounting)
Elwood S. Bufta, Ph.D. (Operations and Technology Management; Times Mirror Professor of Management Strategy and Policy)
Lee G. Cooper, Ph.D. (Marketing)
Bradford Cornell, Ph.D. (Finance)
Samuel A. Cubert, Ph.D. (Behavioral and Organizational Science)
Michael R. Darby, Ph.D. (Business Economics)
José de la Torre, D.B.A. (Organization and Strategic Studies)
David K. Eitelman, Ph.D. (Finance)
Donald Erlenkotter, Ph.D. (Management Science, Operations and Technology Management)
Eric G. Flamholtz, Ph.D. (Accounting, Human Resource Management and Industrial Relations)
William A. Fogel, Ph.D. (Human Resource Management and Industrial Relations)
Arthur M. Geoffrion, Ph.D. (Management Science)
Glen W. Graves, Ph.D. (Management Science)
Marlin Greenberger, Ph.D. (IBM Professor of Computers and Information Systems)
Dominique M. Hanssens, Ph.D. (Marketing)
Alfred E. Hoffman, Ph.D. (Finance)
Harold K. Kassarjian, Ph.D. (Marketing)
Larry J. Kimbell, Ph.D. (Business Economics)
Paul Kircher, Ph.D., C.P.A., Recalled (Accounting)
Arche Kleingartner, Ph.D. (Human Resource Management and Industrial Relations)
J. Clayburn La Force, Ph.D. (Business Economics), Dean
David Lewin, Ph.D. (Human Resource Management and Industrial Relations)
Bennet P. Lientz, Ph.D. (Information Systems)
Steven A. Lippman, Ph.D. (Management Science)
James B. MacQueen, Ph.D. (Management Science)
Robert Hal Mason, Ph.D. (Organization and Strategic Studies)
Fred Massarik, Ph.D. (Behavioral and Organizational Science)
John J. McDonough, D.B.A. (Behavioral and Organizational Science, Accounting)
Bill McKelvey, Ph.D. (Organization and Strategic Studies)
Bruce L. Miller, Ph.D. (Accounting)
Dael J.B. Mitchell, Ph.D. (Human Resource Management and Industrial Relations)
Donald G. Morrison, Ph.D. (Marketing; William E. Leonhard Professor of Management)
William G. Ouchi, D.Litt., Ph.D. (Organization and Strategic Studies), Assistant Dean
Anthony P. Raia, Ph.D. (Behavioral and Organizational Science, Organization and Strategic Studies), Vice Chair
Richard W. Roll, Ph.D. (Alliest Professor of Insurance and Finance)
Rakesh K. Sarin, Ph.D. (Operations and Technology Management; Paine Professor of Management)
Eduardo S. Schwartz, Ph.D. (Finance; California Professor of Real Estate and Land Economics)
Carol A. Scott, Ph.D. (Marketing), Associate Dean and Chair
E. Burton Swanson, Ph.D. (Information Systems)
Sheridan D. Titman, Ph.D. (Finance), Vice Chair
J. Fred Weston, Ph.D., Recalled (Warren C. Corder Professor of Money and Financial Markets; Distinguished Teaching Award)
Harold M. Williams, J.D.
James Q. Wilson, Ph.D. (Organization and Strategic Studies; James A. Collins Professor of Management)

Professors Emeriti
William F. Brown, Ph.D.
Joseph D. Carrabino, Ph.D., P.E.
Fred E. Case, D.B.A.
John C. Clessen, Ph.D.

Marvin M. May, Ph.D. (Finance)

Adjunct Assistant Professors
William L. Dougan, Ph.D. (Organization and Strategic Studies)
Jason L. Frand, Ph.D. (Information Systems)
Ernest J. Scalborg, Ph.D., Assistant Dean
Leonard Weil, B.A. (Finance)

The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.
The school does not offer an undergraduate major in management; however, several undergraduate courses in management are offered. Enrollment in Management 120A, 120B, 122, 124, 130, 133, and 140 is open only to students in the economics/business program (see Chapter 5 for details on this program). Enrollment in other courses, although open to all University students who have completed the prerequisites, is limited, and non-AGSM students are advised not to count on gaining admission to them in order to meet the requirements of other departments or programs.

### Degrees Offered

- Master of Business Administration (M.B.A.)
- Master of Science (M.S.) in Management
- Doctor of Philosophy (Ph.D.) in Management

### Master of Business Administration

The two-year, full-time program leading to the Master of Business Administration (M.B.A.) degree is designed to prepare managers for business enterprises and for public/not-for-profit organizations.

The program aims to develop general management perspectives and knowledge while imparting expertise in student-selected fields of specialization. Along with mastery of subject matter, the M.B.A. program stresses integrating the lessons of various academic disciplines and functional fields, translating theory into practice, questioning the past and planning for the future, and self-guided learning as a continuing basis for effective managerial work.

### Admission

Although no specific undergraduate major is required for entrance, you must complete matrix algebra and differential calculus before entering the M.B.A. program and be familiar with the basic operations of a Macintosh or MS/DOS-based microcomputer. You are required to take the Graduate Management Admission Test (GMAT). Any questions about the GMAT should be addressed to the Educational Testing Service, Box 966, Princeton, NJ 08541, (609) 771-7590. The local phone number in Los Angeles is (818) 578-1971.

International applicants who hold degrees from universities or colleges where English is not the primary language are required to take the Test of English as a Foreign Language (TOEFL). Refer to “Proficiency in English” under “Graduate Admission” in Chapter 3 for further information.

You must complete the M.B.A. Application, which includes the application for admission to graduate standing. Admission is for Fall Quarter only; completed applications, with full documentation, must be filed with AGSM by March 18.

Consideration is given to your academic record; score on the GMAT and, for applicants whose native language is not English, score on the TOEFL; potential for management as evidenced by work experience and community, extracurricular, or other experience; and letters of recommendation. Preference is given to applicants who have had full-time management-related work experience since completing their bachelors’ degrees. Those few students admitted directly from baccalaureate programs who choose to work before entering graduate school will have their admission honored for three years.

Small group information sessions are offered by the M.B.A. Admissions Office several days a week throughout most of the year on an appointment basis. Call 825-6121 to arrange attendance.

Applications and information about the M.B.A. program are available in the M.B.A. Program Office, 3371 Anderson Graduate School of Management, UCLA, Los Angeles, CA 90024-1448.

### Areas of Study

- Accounting: behavioral and organizational science; business economics; finance; human resource management and industrial relations; information systems; management science; marketing; organization and strategic studies; operations and technology management; urban land economics. Interdisciplinary studies are offered in arts management, entertainment management, entrepreneurial studies, international and comparative management, and public/not-for-profit management.

### Course Requirements

The three required elements of the M.B.A. program are the management core, the advanced electives totaling at least 24 courses (96 units), and the management field study. Management core subjects cover the fundamentals of disciplines which underlie the practice of management. Advanced electives provide specialized knowledge and skills for a particular field of management work.

**Management Core** — The management core consists of 11 courses on subjects basic to the practice of management, including Management 402, 403, 405, 408, 410, 411, 412, 420, one course from 409, 414, and two courses from 404, 406, 407.

**Advanced Electives** — These focus on one or more fields of specialization within the broad realm of management. Students design programs of study to meet their specific academic needs and professional goals. Eight electives must be selected from regular AGSM courses, and you are encouraged to emphasize two or more areas of study.

You must also select at least three additional free electives, subject only to general University regulations. These electives normally must be taken while enrolled in the program. They may support or complement the remainder of your program of study.

A maximum of two four-unit 596 courses may be applied toward the 96-unit requirement.

### Management Field Study — The two-term management field study project (courses 444A-444B) consists of teams of four or five students who serve as management consultants to business firms or other organizations. Conclusions are summarized in a report which serves in lieu of a comprehensive final examination for members of the team. The field study is judged by standards applicable to professional management consulting.

### Extracurricular Activities

A variety of student organizations promote both professional competence in many areas and the development of contacts among students, alumni, faculty, and business executives. Many opportunities are presented for students to become involved in planning events with executives in both the public and private sectors, to participate in day-long programs at various organizations, and to meet with company representatives and alumni. Extracurricular activities are an integral part of life at AGSM, and all students are encouraged to participate.

### Concurrent Degree Programs

J.D./M.B.A.

The John E. Anderson Graduate School of Management and the School of Law offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Students interested in such a program should apply to both schools simultaneously.

M.A.-Latin American Studies/M.B.A.

The John E. Anderson Graduate School of Management and the Latin American Studies Program jointly sponsor a three-year concurrent degree program designed for individuals preparing for careers in international management with a special focus on the Latin American region. Establishment of the program was predicated on
the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies. Students should request application materials from the M.B.A. Admissions Office and the Latin American Studies Program.

**M.A.-Urban Planning/M.B.A.**

The John E. Anderson Graduate School of Management and the Graduate School of Architecture and Urban Planning offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service. Students must contact both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Graduate School of Architecture and Urban Planning Admissions Office.

**M.L.S./M.B.A.**

A concurrent degree program jointly sponsored by the John E. Anderson Graduate School of Management and the Graduate School of Library and Information Science, this specialization is designed to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in the two professional fields. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Graduate School of Library and Information Science.

**M.N./M.B.A.**

The John E. Anderson Graduate School of Management and the School of Nursing offer a concurrent degree program designed for students interested in employment in all sectors of the health care delivery system, including hospitals, corporate health care headquarters, home health care agencies, and long-term care facilities, as well as policy-making bodies and consulting firms. Students must request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the School of Nursing Student Affairs Office.

**M.P.H./M.B.A.**

The John E. Anderson Graduate School of Management and the School of Public Health, Department of Health Services, offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Health Services Management Program, UCLA School of Public Health. GMAT scores are required for admission.

**M.S.-Computer Science/M.B.A.**

The John E. Anderson Graduate School of Management and the Department of Computer Science in the School of Engineering and Applied Science offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Department of Computer Science.

**Executive M.B.A. Program**

Designed for mid-career managers with strong records of achievement, the Executive M.B.A. Program enables executives to obtain high quality advanced management education while continuing in their full professional roles. The program is limited to 60 participants with superior academic records and a minimum of eight years of work experience and five years of managerial experience.

The intensive two-year course of study leads to a regular M.B.A. degree. The emphasis is on general management training, increased competence in management specialties, organizational and interpersonal skills, and sophisticated understanding of the integration of businesses and their environments.

Classes are held at AGSM on Fridays and Saturdays every other week, with three- to five-day residential sessions held at conference sites at the beginning and end of the program. Further information and application materials may be obtained by writing to the Assistant Dean, Executive M.B.A. Program, 4383 Anderson Graduate School of Management, UCLA, Los Angeles, CA 90024-1481.

**M.S./Ph.D. Programs**

**Admission**

All applicants are required to take the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants who hold a degree from a non-English-speaking university are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 2 for further information. Three letters of recommendation must be submitted with the completed application. All application materials, including transcripts, should be sent directly to the Doctoral Office, 3379 Anderson Graduate School of Management, UCLA, Los Angeles, CA 90024-1481.

Applications are accepted for Fall Quarter admission only; the deadline for submission of applications and complete documentation is January 31.

Program information and application materials may be obtained from the Doctoral Office. All applicants to the M.S. or Ph.D. program are strongly urged to arrange an interview with at least one faculty member in their proposed area of concentration or major field area. The interview should take place before February 1.

**Master of Science Degree**

The academic master's program is a full-time program which leads to the Master of Science degree in Management. Some students enter the program with the goal of eventual acceptance into the doctoral program; for others, the M.S. is a terminal degree. In either case, the program's emphasis is on advanced specialized training and the development of research capability.

**Major Field**

Management science.

**Course Requirements**

A maximum of 16 courses may be required. The four prerequisite courses and three managerial core course requirements may be waived on the basis of prior coursework. Nine graduate courses (methodological core, depth field, and four units of Management 598) are required and cannot be waived.

1. Prerequisites (four courses): Mathematics 32B, Statistics M152A, 152B, and two terms of computer programming.
2. Managerial Core (three courses): Management 403, 405, 408.
3. Methodological Core (five courses; deviations may be approved by the chair of the management science academic unit): Management 203A, 210A, 210B, 210C, 216A.
4. Depth Field: Three courses which support your thesis research.
5. Master's Thesis (one course): Four units of Management 598.

Four units of course 596 may be applied toward the minimum graduate course requirement.

**Thesis Plan**

A thesis is required for the Master of Science degree. Students generally establish a thesis committee during their fifth term. Plans for the thesis should be presented to the committee for approval at the beginning of the sixth term.
Ph.D. Degree

The doctoral program is a research-oriented degree program which leads to the Ph.D. in Management. The program includes intensive training in research methods applicable to problems of organizations in the public and private sectors. It prepares students for careers in university teaching and research or as staff specialists in business firms and other organizations. The program offers students substantial opportunities to discover their own, unique scholarly focus and competence.

Major Fields

Accounting; behavioral and organizational science; business economics; finance; human resource management and industrial relations; information systems; international and comparative management; management science; marketing; organization and strategic studies; operations and technology management.

Course Requirements

The research preparation requirement consists of two parts: (1) a course requirement and (2) a research paper. You are required to take five research courses which are not part of the major field area. These courses must be completed before taking the oral qualifying examination and may not be waived by prior graduate work. The research paper must be submitted to and accepted by the research paper committee no later than Spring Quarter of your third year of study.

The breadth requirement consists of eight courses which are clearly outside your major field area. You should use these courses to become more knowledgeable about the basic elements of several other management disciplines and functional areas or to define a minor field or research and teaching proficiency. Three of these courses may be waived by prior coursework. They must be completed before you take the oral qualifying examination.

Students, in consultation with a major field advisor, design a course of study which prepares them to pass the major field examination.

Qualifying Examinations

Proficiency in the major field area is determined by a written examination, supplemented in some areas by an oral examination. The major field examination must be passed by the end of Spring Quarter of your third year of study.

You are required to present the substance of your dissertation proposal in a formal seminar to which all Ph.D. students and faculty are invited.

When all the preliminary requirements have been fulfilled (coursework, research paper, major field examination, seminar), the University Oral Qualifying Examination can be held; if passed, you are advanced to candidacy. The oral qualifying examination must be passed within four and one-half years of the date of entrance into the program.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The school requires that students take a final oral examination; this requirement may be waived only under exceptional circumstances.

Lower Division Courses

1A-1B. Elementary Accounting. Prerequisite: sophomore standing. Course 1A is prerequisite to 1B. Introduction to accounting theory and practice. Recording, analyzing, and summarizing procedures used in preparing balance sheets and income statements at term. Payroll and tax accounting, partnership and corporation accounts, manufacturing and cost accounting, and supplementary statements in second term.

120B. Intermediate Financial Accounting II. (Formerly numbered 120.) Prerequisite: course 120A. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of liability recognition and expense, including leases, bonds, and pensions. Shareholder's equity, including earnings per share. Accounting for changing prices.

122. Cost Accounting. Prerequisites: course 12B, Economics 40, or equivalent. Nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis.

123. Auditing. Prerequisite: course 12B. Concepts and problems in verification of financial and related information, including ethical, legal, and other professional issues. Historical developments and current concerns.

124. Advanced Accounting. Prerequisites: courses 120A, 120B. Partnerships and joint ventures; installment sales and consignment sales; home office and branch relationships; corporate combinations; preparation of consolidated statements; foreign branches and subsidiaries; receiverships; estates and trusts; government units; actuarial science.

127. Federal Income Taxation. Prerequisite: course 12B. Recommended: course 120A. Basic concepts of federal income taxation pertaining to individuals; in- come and deductions, areas of special tax procedure pertaining to gains and losses from sales and exchanges. Tax considerations in business and investment decisions.

128. Special Topics in Accounting. Lecture, three hours. Prerequisite: consent of instructor. Selected topics in public accounting, including mergers and acquisitions, public-company status and the going-public process, role of the partner, serving an entrepreneurial client, fund accounting, and filing and accounting of payroll and quarterly tax returns. Discussion of a case study of current interest in the accounting profession.

130. Business Finance. Lecture, three hours: discussion, one hour. Prerequisites: course 120A or 120B, Economics 40, or equivalent. Study of forms and sources of financing business firms large and small, corporate and noncorporate. Emphasis on financial planning and developing judgment in formulating decisions on financial problems. Financial problems considered in their social, legal, and economic effects.

133. Investment Principles and Policies. Prerequisites: consent of instructor. Analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to industrial relations. Mr. Mutter.

140. Elements of Production and Operations Research. Prerequisites: Mathematics 3A, 3B, 3C, 3E, Economics 40, or equivalent. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities. Analytical models and methods for allocation, transportation, inventories, replacement, scheduling, and facilities design. Mr. Finloder and the Staff.

150. Elements of Industrial Relations. Principles and methods of effectively utilizing human resources in organizations. Relationship between social, economic, and other environmental factors and current problems in industrial relations. Mr. Hutchings.

175. Elements of Real Estate and Urban Land Economics. Examination of business decision making as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, building, financing, managing, marketing, and using urban property.

182. Leadership Principles and Practice. Knowledge and skills leading to effectiveness in interpersonal situations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratory.

190. Management Theory and Policy. Prerequisite: course 130. Study of basic concepts and theory of management. Emphasis on operational analysis of manager's role in all types of organizations. Management issues in areas of planning, organizing, staffing, directing, and controlling. Mr. Erenkotter and the Staff.

197. Special Topics in Management. Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit.

Graduate Courses

Graduate courses are ordinarily open to students admitted in graduate standing. As a condition for enrollment, you must submit to the instructor in charge of the course evidence of satisfactory preparation for the work proposed.

200. Advanced Microeconomics. (Formerly numbered 200A.) Seminar, three hours. Prerequisite: course 40B or consent of instructor. Economist's approach to organization and competitive interaction. Topics include game theory, threat credibility, incentive contracts, information advantages, and entry deterrence.

201. Advanced Macroeconomics. Seminar, three hours. Prerequisite: course 200. Prerequisites: courses 40B or consent of instructor. Microeconomic approach to macroeconomic issues. Topics include optimal taxation, price stability, and interest rate determination.

201B. Econometrics and Business Forecasting. Lecture, three hours. Prerequisite: consent of instructor. Development of standard topics in applied econometrics and forecasting. Emphasis on assuming and evaluating classical normal linear regression model, special problems in application, and interpretation of results. Practical applications extensively developed in student exercises.

202A. Regulation. (Formerly numbered 201D.) Lecture, three hours. Prerequisite: course 405 or consent of instructor. Reasons for government intervention in theory and practice. Effect of regulation on business. How regulation and deregulation occur. Areas include public utilities, banking, pollution, and the political process. Mr. Rasmussen.

202B. Analytics of Competitive Strategy. Discussion, three hours. Prerequisites: courses 402 and 405, or consent of instructor. Development and analysis of strategic management decisions concerning competition and cooperative situations. Problems include competitive bidding, tacit collusion, and strategies in repeated settings.

202C. Empirical Studies in Industrial Organization. Discussion, four hours. Prerequisites: courses 402, 405, and computer courses. Investigating factors influencing size of industries, their size distribution, and conditions of entry and exit. Implications of such industry characteristics, derived for decisions having to do with firm output, prices, advertising, and research and development. Mr. Weston.

203A. Economics of Decision. (Formerly numbered M203A.) Prerequisites: rudiments of economic theory, calculus, probability, and statistics. Basics of single-person decision theory from a normative viewpoint. Expected utility theory with objective and subjective probability. Departures from utility theory behavior. Introduction to multiperson decision theory. Mr. Bikhchandani, Mr. Erlenkotter.

203B. Economics of Information. (Formerly numbered M203B.) Discussion, three hours. Prerequisites: rudiments of economic theory of the firm, calculus, probability, and statistics. Course 203A or consent of instructor. Optimal decision and information models. Reliability and accuracy of information and risk aversion, stochastic dominance, and their impact on economic decisions in a stochastic environment. Mr. Lippman.

205A. International Business Economics. Prerequisites: course 202A or consent of instructor. International business environment, international economic institutions, national and regional trade policies and developments, trends in foreign markets, and international monetary problems, studied for their impact on organization and operation of the international corporation. Mr. Mitchell.

205B. Comparative Market Structure and Competition. Prerequisite: course 205A or consent of instructor. Comparative study of public policies toward competition, monopoly, and network-reinforced competitive practices in key industries in selected countries.

205C. Business Forecasting for Foreign Economies. Prerequisite: course 201A or consent of instructor. Forecasting changes in business activity, population, industrial structure, productivity. Gros National Product and its components for selected countries.

207. Resource Administration of Nonmarket Activities. (Formerly numbered 207A.) Seminar, three hours. Prerequisite: course 405 or consent of instructor. Examination of behavior of managers in profit vs. not-for-profit sectors to determine critical variables that explain observed differences in behavior. Use of methodology of microeconomics, particularly utility maximization.

208. Public Services and Private Functions. (Formerly numbered 207B.) Prerequisites: courses 405 and 406, or consent of instructor. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of the notion of private and public provision in financing and provision of public goods and services.

209. Selected Topics in Business Economics. (Formerly numbered 208.) Prerequisite: consent of instructor. Special topics in business economics. Current issues and problems concerning competition, output, and prices in business economics. May be repeated for credit.

210A. Mathematical Programming. Discussion, three hours. Prerequisite: linear algebra. Comprehensive development of theory and computational methods (linear programming) with applications to a variety of areas. Mr. Graves.

210B. Applied Stochastic Processes. Discussion, three hours. Prerequisite: Mathematics M150A or Electrical Engineering 131A. Fundamentals of stochastic processes, including Poisson processes, renewal theory, and Markov chains. Sequential stochastic (usually Markovian) decision processes in discrete and continuous time. Emphasis on problem formulation and characterization and computations of optimal policies, often via dynamic programming; applications to inventory, queuing, maintenance, reliability, and replacement problems. Mr. Lippman, Mr. Mamer.

211A. Nonlinear Mathematical Programming. Prerequisites: course 210A, Mathematics 32A, or equivalent. Theory, methods, and application of optimization of nonlinear systems. Review of classical optimization methods; optimality and duality theory for convex programs; main computational approaches to convex programming; survey of current computer codes and computational experience. Mr. Graves.

211B. Large-Scale Mathematical Programming. Prerequisite: course 210A or equivalent. Theory and computational methods for optimizing large-scale linear and nonlinear programs. Exploitation of special structures with combinatorial, dynamic, multidimensional, and algebraic aspects to obtain practical solution procedures in spite of large numbers of variables and/or constraints. Mr. Graves.

212A. Management Science Models I. Prerequisites: course 407, Mathematics 31B. Broad survey of deterministic models of management science, including solution methods and applications management. Solution methods include linear programming, network optimization, integer programming, nonlinear programming, and dynamic programming methods. Applications include corporate planning, finance, marketing, production and operations management, distribution, and project management. Mr. Erlenkotter, Mr. Geoffrion.

212B. Management Science Models II. Prerequisites: course 212A, Mathematics 32A, or equivalent. Broad survey of deterministic models for managerial decision making. Application areas include finance, marketing, production, facilities design, and energy systems. Mr. Lippman, Mr. Mamer.

212C. Management Science Models III. Prerequisites: courses 212A, 212B. In-depth reviews of actual management science applications. Emphasis on professional skills needed for successful practical application. Mr. Mamer, Mr. Morrison, Mr. Tang.

213A. Intermediate Probability and Statistics. Prerequisite: course 402 or equivalent. Introduction to probability theory and hypothesis testing as applied to management. SAS programs used in this course and its sequels. Mr. Mamer, Mr. Morrison, Mr. Tang.

213B. Statistical Methods in Management. Prerequisite: course 213A or consent of instructor. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to management studies.

Mr. Cooper, Mr. Hanssens, Mr. MacQueen.

213C. Introduction to Multivariate Analysis. Prerequisite: course 213B or consent of instructor. Introduction to modeling of multivariate models in management science. Emphasis on organizing and representing information; interpretation of coefficients of multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminant analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models).

Mr. Cooper, Mr. Hanssens, Mr. Morrison.

214B. Behavioral Science Models. Prerequisite: consent of instructor. Formulation, analysis, and interpretation of behavioral and psychological variables in social systems. Emphasis on stochastic process models for aspects of individual and group behavior such as learning, problem solving, classification, communication, bargaining, and decision making. Mr. MacQueen.

215D. Time-Series Analysis. Prerequisite: course 213B or consent of instructor. Univariate Box-Jenkins analysis, transfer functions, and intervention analysis. Relationship between econometric and time-series models. Multiple time-series analysis. Numerical computer applications in modeling and forecasting. Mr. Hanssens.

216A. Simulation of Operational Systems. Discussion, three hours. Prerequisite: background in FORTRAN, PL/1, PL/C, or other batch computing language available on campus and in basic statistics (course 402 or equivalent) and modeling (course 407 or equivalent). Computer simulation methodology, including design, validation, operating procedures, and analysis of results of simulation experiments. Applications to simulation of management problems.

217A. Statistical Decision Theory. Prerequisite: course 213A or equivalent. Relationships among statistical decision theory, game theory, and classical statistical inference, with emphasis on sequential analysis and dynamic decision processes; axiomatic foundations, Bayes’ and minimax solutions, applications to selected models of dynamic decision problems. Mr. MacQueen.

217B. Game Theory. Prerequisite: course 213A or equivalent. Nature of models for rational behavior in presence of conflicts of interests, zero-sum and nonzero-sum games, two-person and many-person games, theories of the art, philosophical and computational limitations, relations with individual and group decision making. Mr. MacQueen.

218A. Selected Topics in Management Science (1 to 4 units). Prerequisite: consent of instructor. New developing topics and viewpoints. Topics have included reliability and optimal maintenance theory, large-queue, multiple-time-outage analysis, and dynamic decision processes; axiomatic foundations, Bayes’ and minimax solutions, applications to selected models of dynamic decision problems. Mr. MacQueen.

218B. Game Theory. Prerequisite: course 213A or equivalent. Nature of models for rational behavior in presence of conflicts of interests, zero-sum and nonzero-sum games, two-person and many-person games, theories of the art, philosophical and computational limitations, relations with individual and group decision making. Mr. MacQueen.

218C. Selected Topics in Business Statistics (1 to 4 units). Prerequisite: consent of instructor. Special topics in statistical methods. Current developments in statistical theory and practice. Analysis of recent literature. Topics and instructors announced in advance. Mr. MacQueen.

218X-218Y-218Z. Current Issues in Management Science (1 to 4 units each). Current issues and research on a variety of topics in general area of management science. May be repeated for credit.

220B. Intermediate Financial Accounting II. Prerequisite: course 220A or consent of instructor. Concepts and principles of financial accounting. Intended to enhance students' understanding of published corporate financial statements. Emphasis on financial statement analysis. Mr. Ely, Mr. Miller

220C. Advanced Financial Accounting. Prerequisites: courses 220A and 220B, or consent of instructor. Continuation of courses 220A and 220B, with emphasis on a range of topics, including accounting for partnerships, mergers, combinations, and parent-subsidiary relationships. Review of litigation procedures, including reorganizations, receiverships, and bankruptcy. Mr. Farrell

221. Current Issues in Accounting. Prerequisite: consent of instructor. Forum for discussion of contemporary issues in accounting and information systems, in colloquium format. Drawing on prominent speakers in the field, course requires students to formulate a position paper on each topic presented. Mr. Buckley

222. Cost Accounting. Prerequisite: course 403. Nature, objectives, and procedure of cost accounting and control; job costing and process costing; joint product costing; solutions to production accounting problems; allocation and absorption; uses of cost accounting data for management decision making. Mr. Suh

223. Auditing. Prerequisite: course 403. Theory and practice underlying auditors' examination and reporting on financial statements, including professional ethics, internal control, and selection and application of auditing procedures, with emphasis on generally accepted auditing standards. Mr. Miller

226. International Accounting. Prerequisite: course 403. Comparative analysis of accounting concepts and practices in other countries; study of contrasts between various systems; problems of accounting for international corporations, including transfers of funds and income measurement; accounting influences on economic development. Mr. Farrell

227A. Taxation Principles and Policy. Discussion, three hours. Prerequisite: course 403. Study of fundamental income tax principles encountered in business, investment, employment, and personal decisions. Special emphasis on structuring real estate and securities transactions. Current trends in law and policy. Mr. Klein

227B. Taxation and Business Planning. Discussion, three hours. Prerequisite: course 403. Study of tax principles specific to financial institutions, analysis of taxation and absorption; uses of cost accounting data for management decision making. Mr. May, Mr. Titman, Mr. Weston

227C. Profit Sector Financial Policy. Prerequisite: course 220. Identifying and solving financial problems through use of cases. Application of financial theory and financial techniques to business problems, using written reports and classroom discussion. Mr. May, Mr. Titman, Mr. Weston

228. Evaluating Financial Statement Information. Lecture, three hours. Prerequisite: course 220. More detailed advanced coverage of short-range problems of financial management. Coverage of current assets, current liabilities, and their interrelationships. Mr. Miller

228B. Portfolio Management. Prerequisite: course 220. Focus on entire portfolios rather than individual assets. Review of portfolio theory as applied to portfolio decision making and evaluation of achieved portfolio performance. Case studies of portfolio construction. Mr. Roll

228D. Option Markets. Prerequisite: course 220. Organization and role of organized put and call markets. Arbitrage and hedging relationships, valuation of options, implementation of option trading strategies, perspective of corporate securities as options, function of options in securities markets, and innovations in option markets. Students learn fundamentals of hedging and spreading by playing an option trading game. Writing a term paper analyzing the student's trading strategies. Mr. Geske

233A. Money and Capital Markets. Prerequisite: course 220. Application of interest theory and flow analysis to pricing determination processes in market for bonds, mortgages, stocks, and other instruments. Study of market flow from credit markets. Analysis of costs of capital in individual industries. Mr. Cornell, Mr. Roll

233B. Financial Institutions. Prerequisites: courses 220, 230, 233A. Study of financial positions and practices of commercial banks, savings and loan associations, pension funds, insurance companies, and other major financial institutions. Review of current major problems facing senior managers of these financial institutions. Mr. Andersen, Mr. Roll

233C. Speculative Markets. Prerequisite: course 220. Study of theory and evidence of capital market efficiency, including stock market, bond market, commodity future markets, options market, money markets, and foreign exchange markets. Mr. Roll

234A. International Financial Markets. Lecture, three hours. Prerequisites: courses 220, 408. Conceptual understanding of foreign exchange market, Eurocurrency market, international bond market, and underwriting and placement in foreign countries. Emphasis on underlying economic principles, although where relevant, institutional features helpful in understanding structure and operations of the markets to be dealt with in detail. Mr. Eiterman

234B. Financial Management of Multinational Corporations. Lecture, three hours. Prerequisite: course 220. Financial management of multinational firms from perspective of a financial vice president or other financial officer within the company. Topics include measuring foreign exchange risk, managing that risk with both contractual and operating strategies, foreign investment decisions, capital budgeting and cost of capital in an international perspective, political risk, working capital management, and performance evaluation and control. Mr. Chowdry

235A. Problems in Insurance Management. Discussion, three hours. Prerequisite: consent of instructor. Advanced consideration of problems of insurance management. Actuarial, underwriting, investment, marketing, and regulatory problems related to insurance activities. Mr. Hofflander

238. Special Topics in Finance. Prerequisites: course 220, consent of instructor. Intended for master's students. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. Mr. Geske

239A. Theory of Exchanges under Uncertainty. Prerequisites: course 220, consent of instructor. Foundations of theory of exchange development as introduction to the field of finance. May be repeated for credit. Topics drawn primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Mr. Geske

239B. Theory of Investment under Uncertainty. Prerequisites: courses 220 and 239A, or consent of instructor. Foundations of theory of firm capitalization and investment decisions, with special attention to questions of exchange and allocative efficiency. Primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Mr. Geske

239C. Empirical Research in Finance. Prerequisites: course 220, training in econometrics, consent of instructor. In-depth study of empirical research in the field of finance, with emphasis on market efficiency, capital asset pricing, and option pricing. Primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Mr. Geske

239D. Ph.D. Seminar in Finance. Prerequisites: course 220, courses in the 239 series. Intended for Ph.D. students. Advanced topics in finance theory and empirical research. May be repeated for credit with instructor change. Mr. Geske

239E. Speculative Markets. Prerequisite: courses 220, 239A, 239C. Study of theory and evidence of capital market efficiency, including stock market, bond market, commodity future markets, options market, money markets, and foreign exchange markets. Mr. Roll
240B. Operations Planning, Scheduling, and Control. Prerequisite: course 407 or consent of instructor. Forecasting, inventory planning, aggregate planning, job-shop scheduling models, and automated manufacturing systems, with emphasis on managerial relevance and usefulness of models in solving or providing insights into real-world problems.

240C. Design of Operational Systems. Prerequisite: course 407. Issues, concepts, objectives, and criteria in determination of capabilities, characteristics, and configurations of manufacturing and service systems. Examination of analytic and synthesizing methodologies for selection of capacity, location, technology, processes, material movement and storage, systems, facilities, work group size, and job design.

240D. Operations Strategy and Policy. (Formerly numbered 244.) Discussion, three hours. Definition and scope of operations strategy and its relation to corporate and corporate strategy. (Not the same as course 242A) Emphasis in global competition, positioning the system to match market requirements, capacity decisions, product and process technology, work force and job design, job satisfaction, cost control, and operational relevance and usefulness of models in solving management problems, with emphasis on characterizing the form of special cases. May be repeated for credit with topic change.

242A. Models for Operations Planning, Scheduling, and Control. (Formerly numbered 242A.) Prerequisite: course 212A or equivalent. Survey of research studies and recent literature in operations planning, scheduling, and control. Emphasis on economic, social, and political considerations that affect the design and operation of systems, facilities, and service systems, including long-range forecasting, operational economics, capacity, location, facilities, processes/technology, work, and work structures.

242B. Models for Operations System Design. Prerequisite: doctoral standing. Survey of research literature on operations and decision making in manufacturing and service systems, with emphasis on economic, social, and political considerations that affect the design and operation of systems, facilities, and service systems, including long-range forecasting, operational economics, capacity, location, facilities, processes/technology, work, and work structures.

243A. Planning for Facilities Systems. (Formerly numbered 242A.) Prerequisite: course 212A or equivalent. Planning of location, expansion, and replacement for interdependent systems of facilities. Examination of spatial and dynamic economic considerations. Applications in selected industries and public systems.

243B. Inventory Theory. Prerequisite: course 210B or consent of instructor. General discussion of inventory models with emphasis on optimal policy methods and efficient computational methods. Consideration of deterministic, stochastic, discrete-time, and continuous-time models.

243C. Scheduling Models for Intermittent Systems. Prerequisite: course 407. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent heuristic approaches, current research in coordinated interaction of computer models, and man-machine interaction.

243X-243Y-243Z. Operations and Technology Management Seminars (1 unit, 1 unit, 2 units). (Formerly numbered 245X-245Y-245Z.) Discussion, 90 minutes to three hours. Prerequisite: doctoral standing. Required of all students in operations and technology management. Seminar reports dealing with special topics. May be repeated for credit with topic change.

246. Special Topics in Marketing and Technology Management. (Formerly numbered 246A.) Lecture, three hours. Studies of advanced subjects of current interest in operational management. Emphasis on current issues and applications of special knowledge to operational problems. Topics vary each term. May be repeated for credit with topic change.

246A. Strategy/Policy/Analysis and Formulation in Public and Private Nonprofit Sectors. Prerequisite: completion of management analysis requirement for M.B.A. program. Application of several techniques for strategy/policy analysis and formulation. Specific topics include forecasting/scenario writing, multiple objective decision making, cost analysis, risk/benefit analysis, and social experimentation. Limitations of methodologies examined. Concepts illustrated through current applications and case studies.

246B. Budgeting and Resource Allocations in Public Sector. Prerequisite: courses 403 and 408, or consent of instructor. Resource allocation objectives/techniques in federal, state, and local government. Budget analyzed as a planning device, vehicle for allocational decision making, financial control mechanism, and budgeting for political choices. Provides some insight into the budgetary functions performed by those responsible for resource allocation.

247A. Environment of the Art World. (Formerly numbered 270.) Prerequisite: consent of instructor. Consideration and analysis of political, social, economic, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Examination of present policies and trends and potential future developments.

247B. Role of Management in Artistic Decision Making. (Formerly numbered 272.) Prerequisite: consent of instructor. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value of programs. Staff and policies of arts organizations.

247C. Legal Environment of Arts Management. (Formerly numbered 271.) Prerequisite: consent of instructor. Exploration of way in which laws affect arts organizations. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit problem areas. Topics vary each term. May be repeated for credit with topic change.

248A. Special Topics in Public and Private Nonprofit Management. (Formerly numbered 248.) Prerequisite: consent of instructor. Studies of advanced subjects of current interest in operational management. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit problem areas. Topics vary each term. May be repeated for credit with topic change.

248B. Special Topics in Arts Management. (Formerly numbered 274.) Prerequisite: consent of instructor. Exposition of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

250A. Labor Relations: Process and Law. Prerequisite: course 250B or consent of instructor. Topics include development and training; history and philosophy of the labor relations field; participatory management; motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

250B. Human Resource Management: Process and Law. Prerequisite: course 243). Emphasis on systematic exposure to theoretical and empirical literature concerning administrative and legal aspects of human resource management. Topics include processes of managing human resources and impact of governmental policies on employer-employee relations.

250C. Behavioral Foundations of Human Resource Management. Prerequisite: course 250B or consent of instructor. Topics include development and training; history and philosophy of the labor relations field; participatory management; motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

251. Managing Human Resources. Management of people in organizations, intended for managers as well as personnel specialists. Organized at three related but distinguished levels of analysis: (1) day-to-day utilization of people as organizational resources to achieve optimal productivity, satisfaction, retention, and development; (2) personnel management function or system that performs specialized human resource functions; and (3) special subject, or systems of human resources, including strategic planning for human resources, union-management relations, and design of corporate culture.

252. Systems of Employee-Management Participation. Prerequisite: consent of instructor. Designed to provide understanding of systems of employee-management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing, etc.

253. Employee Discipline, Discharge, and Grievance Disposal. Prerequisite: consent of instructor. Emphasis on conflict in the management of human relations; theoretical and empirical findings. Principles and philosophies that underlie resolution of labor-management impasses, with emphasis on grievance procedures, arbitration, mediation, and fact-finding.

254. Analysis of Labor Markets. Prerequisite: consent of instructor. Problems of verifying hypotheses concerning labor market behavior and application of data to labor management problems. Problems of operationally defining labor market concepts. Critical evaluation of available labor market data. Case studies applying these data to managerial problems.

255. Comparative Industrial Relations. Prerequisite: course 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of industrial relations systems within their political, social, and economic environments. Institutions, philosophies, and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; influence of resolution of conflicts.

256A. International Management. (Formerly numbered 256B.) Prerequisite: consent of instructor. Emphasis on understanding, predicting, and influencing human behavior in organizations.
258. Seminar in Human Resource Management and Industrial Relations. 2-3 units. Formerly numbered 258A. Lecture. Credit, three hours. Prerequisite: course 254. Development of programs and practices to meet human resource management and industrial relations needs, including human resource planning, recruitment, training, management development, career progression, and evaluation. May be repeated for credit.

259A. Employment Planning and Evaluation. Lecture, three hours. Prerequisite: course 254. Development of programs and practices to meet human resource needs, including human resource planning, recruitment, training, management development, career progression, and evaluation.

259B. Equal Employment Opportunity Management. Lecture, three hours. Prerequisite: course 254. Development and administration of programs to provide equal employment opportunities in employing organizations. Current statutory and case law and administrative agency requirements.

260A. Advanced Marketing Management. Prerequisite: course 411 or consent of instructor. Development-oriented course concerned with solution of product, price, promotion, and distribution channel problems. Extensive use of case studies.

260B. Marketing Strategy and Planning. Prerequisite: course 411 or consent of instructor. Development of a framework for strategic marketing planning. Analysis of a few, yet powerful, conceptual frameworks which have broad application. Within framework of the strategic marketing plan, development of key elements in annual marketing planning process.

261A. Management in the Distribution Channel. Prerequisite: course 260A or consent of instructor. Examination of decisions in the distribution channel. Issues of power in the distribution channel and trade-offs between alternative channel systems.

261B. International Marketing Management. Prerequisite: course 260A or consent of instructor. Opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

262. Price Policies. Prerequisite: course 260A or consent of instructor. Consideration of such concepts as product classification, demand, competition, and costs, as they affect price-setting. Topics include price leadership, geographical pricing, price discrimination, price warfare, and leader pricing studied in relation to price-making process. In addition, attention to price policies of individual firms in which these concepts are applicable.

263A. Consumer Behavior. Prerequisite: course 411 or consent of instructor. Study of nature and determinants of consumer behavior. Emphasis on influence of sociopsychological factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers' attitudes, consumption, and purchasing behavior.

264A. Marketing Research: Design and Evaluation. Prerequisite: course 411 or consent of instructor. Methods of measuring and predicting forces affecting marketing, including quantitative aspects of demand, consumer reaction to product characteristics, effectiveness of advertising and other promotional methods, and interorganizational systems on sales efficiency and effectiveness of competitors' strategies.

264B. Mathematical Models in Marketing. Prerequisite: course 260A or equivalent or consent of instructor. Use of mathematical models in solving marketing problems. Discussion on models concerned with such problems as brand switching, media selection, pricing, competitive strategy, scheduling, allocation problems, and waiting time.

265A. Marketing and the Law. Prerequisite: course 260A or consent of instructor. Detailed study of legislative enactments (federal, state, or local) which influence operation of institutions engaged in marketing activities, together with analysis of judicial decisions which have interpreted these laws.

265B. Social Issues in Marketing. Prerequisite: course 260A or consent of instructor. Environmental impact of marketing in society; study of theories, methods, and relationships for evaluating transaction behavior in a scientific and humanitarian context; macroanalytic perspectives in marketing.

266A. Product Management. Prerequisite: course 260A. Development of a framework for identifying and evaluating alternative growth strategies of the firm. Product addition, modification, and deletion decisions, and processes by which these decisions can be made in an optimal manner.

266B. Advertising Policy. Prerequisites: courses 260A and 263A, or consent of instructor. Study of formulation of advertising policies, involving analysis of cases dealing with role of advertising in marketing, definition of advertising objectives, strategy, appropriation policy, media selection, evaluating advertising results, and organization of advertising function.

268. Selected Topics in Marketing. Prerequisite: course 260A or consent of instructor. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students.

269A. Research in Marketing. Prerequisite: course 260A or consent of instructor. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, marketing segmentation, new product development and introduction, pricing, sales forecasting, market research, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues.

269B. Research in Marketing. Prerequisite: consent of instructor. Intended for Ph.D. students. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, marketing segmentation, new product development and introduction, pricing, sales forecasting, market research, and sales force management examined critically.

269C. Quantitative Research in Marketing. Prerequisite: consent of instructor. Intended for Ph.D. students in management and related fields. Students are assumed to have good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. Focus on a range of quantitative models as applied in marketing research.

269D. Behavioral Research in Marketing. Prerequisite: consent of instructor. Empirical research in consumer behavior. Study of behavioral research problems from theoretical as well as practical perspectives. Intended for Ph.D. students who will be conducting research in consumer behavior or related areas.

269E. Special Research Topics in Marketing. Prerequisite: doctoral standing. Advanced selected topics in marketing, with emphasis on thorough examination of one or two topics in current research and theoretical development. Not available for credit toward degree.

269X-269Y. Workshops in Marketing (1 unit, 1 unit, 2 units). Prerequisite: doctoral standing. Required of all students during first two years of their Ph.D. work. Series consists of a number of leading scholars in the field, who/discuss and make presentations to marketing faculty and Ph.D. students. Active participation and intellectual interchange, which helps students gain a richer perspective on the field of marketing. In Progress grading.

270A. Information Systems Applications. (Formerly numbered 225A.) Prerequisite: course 404. Basic concepts and uses of information systems in organizations. Use of information technology in support of individual and organizational information processing. Description of types of information systems. Impact of control on planning and control information on human behavior.

270B. Information Systems for Planning and Control. (Formerly numbered 225B.) Prerequisites: courses 250A, 250B, and 250C. Design of systems to support management planning and control. Approaches and techniques employed at strategic, managerial, and operational levels. Specific consideration of accounting and budgeting methods. Impact of planning and control information on human behavior.

270C. Measurement in Information Systems. (Formerly numbered 225C.) Prerequisite: course 404. Role of measurement in management information and decision support systems. Logic and technique of measurement. Applications in individual, organizational, and societal performance.

270D. Simulation for Management. (Formerly numbered 224E.) Discussion, three hours. Prerequisites: knowledge of computer programming and basic statistics, consent of instructor. Design, implementation, and use of discrete-event simulation models using a general purpose simulation language (e.g., SIMSCRIPT). Emphasis on management simulation and programming, and preparation of results (e.g., statistical analysis, graphics, animation). Extensional programming assignments.

270E. Expert Systems for Management. Prerequisite: second-year M.B.A. or doctoral standing or consent of instructor. Expert systems in management and decision support systems, including rule and frame-based systems, certain and uncertain inference, expert system feasibility and development, available commercial systems, and current applications. Project that develops an expert system required.

271A. Information Systems Technology. (Formerly numbered 224A.) Discussion, three hours. Prerequisite: course 404. Survey of computer hardware, software, telecommunications, and data base technology. Selection and implementation of information systems for management applications. Methods for costing system hardware and software and for assessing computer performance. Trade-off analysis of comparative computer configurations.

271B. On-Line and Network-Based Systems. (Formerly numbered 224F.) Prerequisites: courses 271A and 272A, or consent of instructor. Distributed processing, Networked minicomputer systems. Data communication technology. Data security in computer networks. Cost/benefit analysis for design, configuration, and implementation of on-line and computer networks. Applications to computer utilities, commercial enterprises, and government and medical and government networks.

271C. Measurement in Information Systems. (Formerly numbered 225C.) Prerequisite: course 404. Role of measurement in management information and decision support systems. Logic and technique of measurement. Applications in individual, organizational, and societal performance.
271C. Data Base Management Systems. (Formerly numbered 224D.) Discussion, three hours. Prerequisite: courses 271A and 272A, or consent of instructor. Features and capabilities of generalized data base management systems, including system classification, comparison of software features, and evaluation of specific systems. Emphasis on management use of such systems. Field trips by students may be required.

Mr. Silver, Mr. Sprowls

272A. Information Systems Development. (Formerly numbered 224C.) Discussion, three hours. Prerequisite: course 404. Concepts and methodologies for determining user requirements; overview of database management systems, with emphasis on the relational model. Project required, using a microcomputer-based CASE tool and relational database software.

Mr. Frand, Mr. Sprowls

272A. Information Systems Management. (Formerly numbered 224B.) Discussion, three hours. Prerequisite: course 404. Managing information systems within organizations. Role of chief information officer. Frameworks for understanding information systems functions. Issues of planning, project management, computer operations, software testing, user interface, and departmental computing, managing information systems professionals, cost of services, organizational aspects.

274A. Special Topics in Information Systems. (Formerly numbered 224G.) Prerequisite: consent of instructor. Examination in depth of issues or problems concerned with theory and practice of computing and management and use of information systems. Course may have a single theme or may deal with a number of topics. May be repeated for credit.

274B. Frontiers in Information Systems. (Formerly numbered 225D.) Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in information systems. Emphasis on recent contributions to theory, research, and methodology. May be repeated for credit.

Mr. Greenberger

274C-274Y-274Z. Current Research Areas in Information Systems (1 unit, 1 unit, 2 units). (Formerly numbered 225X-225Y-225Z.) Discussion, two hours. Prerequisite: doctoral standing. Year-long sequence associated with Information Systems Colloquium Series. Regularly scheduled presentations of current research and state-of-the-art developments in information systems field. Study and discussion of research presented. May be repeated for credit. S/U grading system.

Mr. Olson

275. Urban Land and Real Estate Markets. (Formerly numbered 275B.) Lecture, three hours. Prerequisite: course 405 or consent of instructor. Development and use of economic and management principles and methods to analyze and project urban land uses and land values; study of demand for and supply of industrial, commercial, retail, recreational, and residential space in context of urban development, real estate decision making, and the regulatory environment.

Mr. Mittelbach

276A. Theory of Urban Property Valuation. Discussion, three hours. Prerequisite: course 406 or equivalent. Use of systems approach to prepare feasibility and valuation studies which systematically analyze factors which create value in urban or generalized data properties. Analysis of particular social, economic, political, and physical forces which influence property values. Students encouraged to use computer-based instruction.

276B. Comparative and International Urban Land Studies. Discussion, three hours. Analysis of private and public decisions shaping urban growth and change in developed and developing nations. Emphasis on economic, social, political, and physical forces influencing urban structure, land-use patterns, growth of jobs, and distribution of jobs and people in the built environment. Not offered every year.

Mr. Mittelbach

277A. Housing Market Systems. Discussion, three hours. Prerequisite: consent of instructor. Concepts, models, and methods to study and forecast local, regional, and national housing markets; consumer and investor behavior; residential land development and building; primary and secondary residential mortgage markets; private and public forces influencing housing supply and prices.

277B. Housing Policy. Discussion, three hours. Prerequisite: consent of instructor. Alternate housing strategies, policies, and programs; housing for low and moderate income groups; urban renewal; community service mix; affordable housing; housing quality; innovation and efficiency in production, distribution, and delivery of residential capital and housing services; roles of private enterprise.

Mr. Mittelbach

278A. Urban Real Estate Financing and Investing. Discussion, three hours. Prerequisite: consent of instructor. Investor-oriented course in which real estate and business trends are evaluated to determine alternative real estate investment opportunities. Use of current financial, economic, and investment theories and techniques to real estate investment opportunities in case studies and short case problems to illustrate development of investment strategies.

Mr. Mittelbach

278B. Sources, Uses, and Flows of Real Estate Capital. Discussion, three hours. Analysis of economic capital, and mortgage markets to determine potential availability and costs of mortgage money from alternative sources. Sources of various sources of funds to determine factors influencing decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions.

Mr. Mittelbach

279A. Special Studies in Urban Land Economics. Limited to master's or Ph.D. candidates working on thesis or dissertation-related research. May be repeated for credit.

279B. Selected Topics in Urban Land Economics. Discussion, laboratory, and practical work. Building on second-year graduate standing or consent of instructor. Designed for students who wish to pursue a particular topic in housing, real estate, or urban land economics in depth on individual or cooperative basis. All work is computer-based; however, students are provided introduction to use of computers (preferably PCs) in various kinds of real estate analysis. May be repeated for credit.

279X-279Y-279Z. Urban Research and Development for Housing, Planning, and Community Development (1 unit, 4 units, 1 unit). Prerequisite: graduate standing or consent of instructor. Exploration of urbania and its problems; prospects and prescriptions for delivery of a quality life. Macroscopic and microscopic exploration as related to problems of a selected urban area.

280A. Important Studies in Human Systems. Prerequisite: doctoral standing or consent of instructor. Survey of seminal studies of human systems. Summarization and critique of literature focal to evaluation and current status of the field. Review of such topics as personality, motivation, group and intergroup behavior, systems theory, and organizational design and development.

Mr. Massarik

280B. Survey of Research Philosophies and Methods. Prerequisite: doctoral standing or consent of instructor. Broad introduction to objectivist and subjectivist philosophies of science, and psychology and sociology of science. Critique of laboratory and field research methods; field studies; descriptive methods; interview, participatory observation, questionnaire, and unobtrusive methods of data collection.

280C. Personal and Professional Development. Prerequisite: doctoral standing or consent of instructor. Provides setting where students may explore their own professional values in process of testing and learning values and standards important in human systems Ph.D. program and held by the broader community of system researchers and interveners.

Mr. Culbert

280D. Research Design for Human Systems Studies. Prerequisite: course 280A or 280C or consent of instructor. Temporal and logical sequences in process of designing studies of human systems, including optimizing the fit of research topic, observation, and data collection methods and data analysis techniques. Actively involves students in preparation of research proposals.

Mr. Culbert

280F. Human Systems Research Seminar. Prerequisite: course 280D or consent of instructor. Exploration of various research methods and problems encountered in applying them. Students are actively involved in seminal reports and in class critique of course members' dissertation research designs. May be repeated for credit.

281A. Sociotechnical Systems. Prerequisite: graduate standing. Introduction to systems concepts and view of worth and values of methods, including self and technical systems open to forces from the surrounding environment. Focus on developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations.

Mr. Dave

281B. People in Organizations. Prerequisite: graduate standing. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior in organizations, as may arise from individual, group, and social behavior. Special attention to knowledge about satisfaction motivation and productivity in organizations.

282. Task Group Processes. Prerequisite: course 281B or consent of instructor. Study of factors affecting small group processes, and interrelationships of work groups in sociotechnical systems. Emphasis on understanding how group activities interrelate with physical/technical environment. Impacts practical knowledge of task group functioning through class exercises and field observations.

Mr. Culbert

284A. Organization Design. Prerequisite: course 281A or consent of instructor. Survey of organizational design and traditional approaches to influencing and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from managerial point of view. Use of experience-based learning methods to aid diagnosis and understanding of one's own influence styles.

Mr. Culbert

285B. Managerial Interpersonal Communication. Prerequisite: course 281B or consent of instructor. Organizational, interpersonal, and personality factors affecting interpersonal communications. Styles and modes of communication in one-to-one, group, and indirect communication settings. Opportunities offered to deepen understanding of one's own communicative styles and skills. Not offered this year.

Mr. McDonough

287. Sensitivity Training Groups and Their Facilitation. Prerequisite: consent of instructor. Emphasis on process content of instructor through group or application to department. Development of cognitive and experiential understanding of dynamics of sensitivity training groups and their facilitation. Relevant theory, research findings, and case studies; translation of these inputs into practice.
288B. Selected Topics in Behavioral Science. Prerequisite: doctoral standing or consent of instructor. Prerequisites: course 288A or course in human behavior. Exploration of the field through study and analysis of topics and issues in the behavioral sciences. May be repeated for credit.

288C. Current Issues in Sociotechnical Systems and Organization Design. Prerequisite: doctoral standing or consent of instructor. Current topics in analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe and the U.S. In-depth discussions of selected job and organizational design approaches. May be repeated for credit.

289. Current Issues in Human Systems Change and Development through Consulting. Prerequisite: doctoral standing or consent of instructor. Current topics in philosophy, art, and technology of improving organizations and increasing managerial effectiveness through consulting interventions. In-depth treatment of consultant entry and leaving, diagnosing, process consultation, consciousness raising, team building, values, etc., depending on student and faculty preferences. May be repeated for credit.

289F. Selected Topics in Organizational Behavior. Prerequisite: doctoral standing or consent of instructor. Psychological and social psychological aspects of human behavior and performance in organizations. Theoretical models, models, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit.

289G. Current Issues in Human Systems Studies. Prerequisite: doctoral standing or consent of instructor. In-depth study of theory and research pertaining to a particular subject matter or such topics as cross-cultural, organizational change, action, and multivariate research, depending on student and faculty interest. May be repeated for credit.

289Y-289Z. Behavioral and Organizational Sciences Workshops (1 unit, 1 unit, 2 units). Discussion, two hours. Prerequisite: doctoral standing. Designed to expose Ph.D. students to research within the field while at same time requiring that each Ph.D. student develop a critical framework for evaluating and integrating recent research. May be repeated for credit. S/U grading. Massanari, Mr. de la Torre

290. Organization Theory. Prerequisite: course 242 or consent of instructor. Analysis of theory and practice of organizational function of organizing through study of the literature, case analyses, and seminar discussion. Individual projects and reports. Mr. Kelman

291. Planning and Control. Prerequisite: course 242 or consent of instructor. Analysis of theory and practice of managerial function of planning and control. Implementation of objectives through policy formulation, decision making, and control. Individual projects and reports.

292A. Research and Development Policy. Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting innovation and innovation transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of forecasting technological futures. Mr. Goodman

292B. Models of Organization Behavior. Prerequisite: consent of instructor. Theoretical frameworks for developing explanatory and predictive models of complex organizations. Exercises in constructing formal models, usually in mathematical or stochastic form, and, where appropriate, using materials from field studies to develop empirical tests. These models may be used to discover implications for systems change recommended in sociotechnical field study.

292C. Comprehensive Planning in Public Sector. Prerequisite: consent of instructor. Evolving modes of planning and control with particular emphasis on public sector. Development of policy through standard setting, bargaining, and regulating governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technical feasibility. Mr. de la Torre

293A. Political Environment of American Business. Formerly numbered 293D. Lecture, three hours. Prerequisite: consent of instructor. Evaluation of certain criticisms made by business of the American political system and the ways in which it has contributed to the understanding of principal features of American politics, especially as they influence business enterprise. Mr. Wilson

293B. Morality of Capitalism. Lecture, three hours. Prerequisite: consent of instructor. The case for and against the morality of business enterprise. Social, ethical, and moral aspects of managerial decision making and their implications for society. May be repeated for credit.

294A. Strategy Formulation and Implementation. Prerequisite: consent of instructor. Case course dealing with strategy decisions and their implementation, executive action, and administrative behavior involved in managing total enterprises. Students are concerned with how problems are perceived in company situations to develop ideas essential to overall managerial direction.

294B. Environmental Impacts on Management. Prerequisite: consent of instructor. Examination of ways in which business, government, labor, and consumer systems can be affected by external environmental problems. Methods studied for developing and evaluating alternative managerial solutions which permit organizations to assist in improving current and future environmental quality. Mr. Schollhammer

295A. Entrepreneurship and Venture Initiation. Prerequisite: consent of instructor. Exploration of entrepreneurial particularly concerned with formation and operation of new business ventures. Significance and crucial aspects of exploring new business opportunity and starting a business. Mr. Schollhammer

295B. Small Business Management. Prerequisite: consent of instructor. Exploration of crucial aspects in managing small business enterprises. Emphasis on identification and analysis of characteristic operating problems of small firms and application of appropriate methods or techniques for their solution. Mr. Schollhammer

295C. Corporate Entrepreneurship. Prerequisite: consent of instructor. Inquiry into nature of entrepreneurial and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identifying, development, and exploitation of technical and organizational innovations, management of new products or processes, and effective new venture management in a corporate context. Mr. Schollhammer

296A. International Business Management. Discussion, three hours. Prerequisite: course 205A or consent of instructor. Identification, analysis, and resolution of management issues of policy and action within context of a multinational corporation, with emphasis on problems of adaptation to different sociological, political, and economic environmental characteristics on planning, structuring of organizational relationships, coordination and control in multinational firms. Mr. de la Torre

296B. International Comparative Management Research. Prerequisite: doctoral standing or consent of instructor. In-depth study of theory and research pertaining to international business and comparative management. Emphasis on recent research developments and methodological issues. Imports knowledge on design and conduct of international/comparative management research.

297A. Comparative and International Management. Prerequisite: course 412 or consent of instructor. Comparative and international management of multinational enterprises. Students will be encouraged to develop a multinational perspective, and to conduct research in this area. May be repeated for credit.

297B. International Business Policy. Prerequisite: course 205A, consent of instructor. Analysis of key international and global challenging management decisions. Mr. de la Torre

297C. International Business Law. Prerequisites: courses 205A, 296A. Legal environments in which international business operates; overseas business relationships and organizations; antitrust, taxation, foreign exchange, and securities regulation. Mr. de la Torre

297D. International Business Negotiations. Prerequisite: course 296A. Examination of international business negotiations of multinational enterprises with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/disolution of joint ventures, external ownership management control, terms/conditions for technology transfer, investment incentives. Mr. de la Torre

298A. Special Topics in Management Theory. Prerequisite: doctoral standing or consent of instructor. Examination of depth of problems or issues of current concern in management theory. Emphasis on current concern in management theory. May be repeated for credit.

298B. Special Topics in International and Comparative Management. Prerequisite: doctoral standing or consent of instructor. Examination of depth of problems or issues of current concern in multinational enterprises. Emphasis on current concern in management theory. May be repeated for credit.

298C. Special Topics in Sociotechnical Systems. Prerequisite: doctoral standing or consent of instructor. Examination of depth of problems or issues of current concern in sociotechnical systems. Emphasis on current concern in management theory. May be repeated for credit.

298D. Special Topics in Management (1 to 4 units of credit). Prerequisite: consent of instructor. Examination of depth of problems or issues of current concern in management. Emphasis on current concern in management theory. May be repeated for credit.

298Y-298Z. Management Strategy and Policy Workshops (1 unit, 1 unit, 2 units). Discussion, three hours. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management and policy. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit. S/U grading. Massanari

299R. Research Methods in Management. Prerequisite: doctoral standing. Provides feedback and evaluation of papers prepared for research requirement. Quarterly meetings to discuss expectations of research committee and Doctoral Office. Students must enroll the term in which they are submitting their research paper. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses are acceptable toward the M.B.A., M.S., and Ph.D. degrees within the limitations and conditions prescribed by the curricula of the John E. Anderson Graduate School of Management.

400. Mathematics for Management. Prerequisite: graduate standing. Fundamental mathematics for business, including topics from matrix algebra, probability, statistics, and calculus, with emphasis on calculations and decision making in business firms. S/U grading.

401. Managerial Economics. Prerequisite: graduate standing. Introduction to measurement and determination of economic activity in the aggregate and to role of prices in decision making of the organization. National income accounting, basic economic policy, markets and prices, competition and monopoly, applications.

402. Data Analysis, Statistics, and Decision Making. Prerequisite: graduate standing. Introduction to probability, decision theory, and statistical inference, with emphasis on solution to actual business problems.

403. Financial Accounting. Lecture, three hours. Prerequisite: graduate standing. Fundamental financial accounting methods and procedures, with emphasis on financial statements. Provides basis for firm understanding of the language of business — accounting.

404. Information Systems. Prerequisite: graduate standing. Introduction to information systems in organizations from perspective of general manager. Managerial and strategic uses of information systems, information technology that underlies these systems, ways such structures and systems tend to influence the firm, and ways such systems are developed and managed.

405. Managerial Economics. Analysis of decision making in the firm, competitive policies and market structure, revenue and cost behavior.

406. Macroeconomics and Forecasting. Prerequisite: graduate standing. Sales, costs, and profit forecasting. General business forecasting and cyclical mechanisms.

407. Managerial Model Building. Prerequisite: course 400 or 402 or equivalent. Survey of uses of formal modeling approaches in managerial decision making. Emphasis on model types and formulations, and use of solutions obtained from computer routines. Application areas include finance, marketing, production, and public systems.

408. Managerial Finance. Analysis of major decision areas of managerial financial management, aimed at principles generally applicable to all types of organizations. Emphasis on financial planning and control sources of funds, developing objectives and standards which lead to effective allocation and use of organization’s resources.

409. Human Resource Management and Industrial Relations. Prerequisite: graduate standing. Designed for prospective general managers who want to learn about critical issues and strategic questions involved in managing human resources. Emphasis on four key policy areas that define human resource management: employee influence, human resource flows, rewards systems, and work systems.

410. Operations and Technology Management. Lecture, three hours. Prerequisites: courses 402, 403, 405, 408, 411. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities for both intermit- tent and continuous systems. Production organizations, analytical models and methods, design and development of control systems for production operations.

412. Management of Organizations. Prerequisite: graduate standing. Integrative approach to theory and practice of management in complex organizations, emphasizing managerial roles in designing organizational structures, maintaining planning, control, information, incentive systems, different patterns of human interaction such structures and systems tend to produce.

413A. Programming for Management Applications. Lecture, three hours. Prerequisite: graduate standing. Building management application systems. Programming in a high-level procedural language. Software specification, design, coding, testing, implementation, and maintenance. Extensive programming assignments.

414. Managerial Problem Solving: Individual. (Formerly numbered 440.) Prerequisite: graduate standing. Study and practice of individual decision making and problem solving in managerial situations. Emphasis on solution methods, interpersonal communication, and various decision-making techniques. Relationships among the individual, managerial roles, and complex organizations as they influence the managerial process.

415. Management Policy. Prerequisite: course 412. Evaluation and formulation of organization’s overall policies and strategies. Economic, heuristic, and social process approaches to policy formulation, environmental analysis, and organizational appraisal. Senior management’s role in managing the policy process.

420. Management Policy. Prerequisite: course 412. Evaluation and formulation of organization’s overall policies and strategies. Economic, heuristic, and social process approaches to policy formulation, environmental analysis, and organizational appraisal. Senior management’s role in managing the policy process.

422. Analysis and Communications. Discussion, three hours. Prerequisite: graduate standing. Study and practice of oral and written management communication, including audience analysis, persuasion, revising and editing, presentation of technical information, and use of computer technology. Organized around writing and speaking exercises. Personal attention to students’ written and oral presentations.

423. Advanced Management Theory. Advanced study of management theory in formally organized enterprise through significant readings; discussion of advanced approaches and techniques developed from applied theory; use of theory to integrate methods and findings of quantitative and behavioral sciences; lectures on sophisticated application of management theory in practice.

441. Managerial Problem Solving: Complex Systems. Prerequisite: course 414. Study of organizational and interorganizational problem solving, including identification, formulation, data collection, forecasting, assumption testing, solution methods, implementation, evaluation, control, and dealing with conflict and ambiguity. Organization of projects in which problem solving is experienced at various levels of complexity.

444A-444B. Management Field Study. Must be taken in two consecutive terms in second year (or its equivalent) for part-time students. Supervised study of an organization, including establishment of client consultant relationship, identification of problem or strategic question, design of study, collection and analysis of data, development and reporting of implementable recommendations. In Progress grading.

450. Fieldwork in Behavioral Science Management Development (4 or 8 units). Prerequisites: courses 287, consent of instructor. Supervised practical fieldwork, with emphasis on sensitivity training laboratories, creativity and personal growth laboratories, simulated managerial behavior laboratories, etc.

451. Fieldwork in Organizational Development (2 to 12 units). Prerequisite: course 284B or consent of instructor. Supervised practical fieldwork in organizational development consultation in interpersonal, group, intragroup, total organization, and interorganizational settings.

452. Fieldwork in Technical Assistance for Minority Business Enterprise (1 to 4 units). Prerequisite: completion of first year of master’s program or consent of instructor. Supervised field experience in business consulting and other forms of technical assistance for business firms and management in ethnic communities, seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.

453. Fieldwork in Arts Management (4 to 12 units). Prerequisite: consent of instructor. Supervised field experience and practical work in all phases of an arts organization (pictorial, performing, or community), concentrating on its managerial problems and its relationship to the community and society.

454. Fieldwork in Organizations. Prerequisites: completion of two terms of M.B.A. program, consent of supervising faculty and director of M.B.A. program. Supervised, nonpaid practical experience or fieldwork in an organization, including development of a solution of predetermined assignment(s) pursuant to a defined program of study which may include formal classwork. May not be repeated for credit.

455. Preparation for Teaching Business and Management. Prerequisites: graduate standing, consent of instructor. Study of problems and methods in teaching management. Seminars, workshops, and practice teaching. May not be applied toward M.B.A., M.S., or Ph.D. degree requirements. S/U grading.

The following individual study or research courses (501 through 599) may be used, within limitations and conditions prescribed by the school, to satisfy minimum higher degree requirements.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA AGSM graduate adviser and associated dean, and host campus in administrative department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A-596N. Research in Management (1 to 8 units each). Prerequisite: consent of director of master’s program or director of Ph.D. program by special petition. Directed individual study or research. May be repeated.

JOHN E. ANDERSON GRADUATE SCHOOL OF MANAGEMENT / 471
Executive M.B.A. Program

Admission to the Executive M.B.A. program is prerequisite for enrollment in the following courses:

461. Managerial Problem Solving (2 units). Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting individual’s diagnostic and decision-making skills. Use of readings, cases, decision simulations, and discussions to explore areas of charting job and career progress, working with others, and making good use of models once they have been developed.

463. Data Analysis and Management Decisions under Uncertainty. Survey of statistical model building, with emphasis on managerial interpretation of statistical summary of data. Classical statistics covered through multiple regression to support courses in finance and marketing that follow. Fundamental approaches to decision making under uncertainty.

464. Managerial Accounting. Familiarizes the manager with functions of accounting by focusing on use of external financial reports for evaluating corporate performance and use of accounting information for internal planning and control. Mr. Buckley

465. Quantitative Methods for Managers. Survey of modeling approaches to managerial planning and decisions. Emphasis on ability to recognize situations where models can be used advantageously, to work effectively with model building specialists, and to make good use of models once they have been developed.

466A-466B. Financial Policy for Managers (4 units, 2 units). Modern financial management deals with decision making under uncertainty for corporate financial management; for portfolio investment; for financial institutions, and for international financial management. Focus on learning sound theoretical tools and applying them in casework.

468. Economic Forecasting (2 units). Macroeconomic theory and its application to business forecasting. Major economic indicators and their historical description of the U.S. economy; theoretical tools that business economists use to analyze impacts of monetary and fiscal policy; macroeconomic techniques applicable to business decisions. Mr. Kimbell

469. Management of Human Resources. Introduction to major areas of human resource management personnel management, labor economics, labor law, and labor relations — accomplished by examining some major concepts, theories, and research related to each of these topic areas, as well as some practical problems for managers posed by each. Mr. Flamholtz

470A. Introduction to Action Research and Policy Analysis (2 units). Provides methods of organizational and strategic analysis to determine relationship of the organization with its environment. Mr. Goodman

470B. Strategic Overview (2 units). Preparation of a strategic overview of a selected international company entailng collection and analysis of primary and secondary data, including (but not limited to) interviews of corporate executives, corporate financial and marketing data, industry reports, and customer and competitor interviews and/or surveys. Mr. Goodman

470C. Action Research Project (2 units). Further research and analysis of one of the strategic issues facing the selected company and identified in the strategic overview (course 470B). Mr. Goodman

470D. Seminar on Policy Analysis (2 units). Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate personnel. Mr. Goodman

472. Marketing Strategy and Policy. Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions. Ms. Scott

473. Managerial and Organizational Processes. Development of an understanding of workings of large, complex organizations, with emphasis on macroanalytic, rather than on microanalytic, approach. Mr. Ouchi

474. Operations and Technology Management. Systems, Strategies, and Policies. Lecture, three hours. Analysis of strategic and operating policies and decisions for systems that produce goods and services. Examination of role of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems. Mr. Buffa, Mr. Yost

475. International Managerial Policies and Strategies. Study of economic and business decisions in an international context, with emphasis on formulation and implementation of management strategies in multinational enterprises. Application of concepts of international economic analysis and exploration of international corporate strategies. Mr. de la Torre, Mr. Schollhammer

476. Competitive Strategy and Business Policy. Study of general management task of forging a corporate competitive strategy. Emphasis on economics of business rivalry within a variety of industrial settings and implications of changing environments on business strategy. Mr. Goodman

477. The Manager and Business/Society Relationships. While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, basic economic structure, and social responsibility. Mr. Wilson

478. Selected Topics in Management (2 units). Examination of selected problems and issues in an area of current concern in management. Mr. Schollhammer
The UCLA School of Social Welfare is one of the nation's great professional schools of social work. Its mission is to contribute to the understanding of the social, economic, and political forces which are shaping our individual and communal lives and to use that knowledge to help in developing appropriate social policy and social work practice responses — whether under public, voluntary, occupational, or proprietary auspices.

Social workers are employed as planners, policy analysts, administrators, and direct service providers in all of the human services, including health, family and child welfare, mental health, services to the aged, manpower development and training, etc. Social workers are concerned with the causes, treatment, and prevention of personal and social ills and with the broader trends in the society which impact on the well-being of individuals, families, and communities. The school's objective is to prepare its graduates not only for practice as it is but for imaginative leadership in creating the social work practice of the future.
School of Social Welfare

247 Dodd Hall, (213) 825-2892

Master of Social Welfare

Admission

In addition to University minimum graduate admission requirements, the master's program of the School of Social Welfare requires a minimum of five courses in social sciences or a combination of social science and social welfare subjects as prerequisite undergraduate preparation for graduate study in the field of social work. Completion of courses in psychology and sociology is expected, but an elementary statistics course with a grade of B or better is required.

A grade-point average of 3.0 or better is required in all courses taken during the junior and senior years. However, applicants with a GPA below 3.0 may be considered when there is clear evidence of capacity for academic achievement and professional development. In addition, the school applies the following criteria in the selection of candidates: personal suitability for professional education and potential for successful social work practice, a satisfactory state of health, and an adequate financial and personal plan to permit completion of degree requirements.

The General Test of the Graduate Record Examination (GRE) is required, as are official transcripts from every school attended since high school. GRE results must be submitted prior to any evaluation of the application for admission. GRE scores must be less than five years old and may be repeated to achieve a higher score, if desired. The highest GRE General Test score achieved is evaluated for admission. In addition, international students whose native language is other than English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information. The school may request that you take specified additional examinations to assist in the assessment of candidacy for admission.

Five letters of recommendation are required. In addition, an autobiographical statement and a professional concepts and goals statement must accompany the application.

Admission to the school requires simultaneous application to (1) the School of Social Welfare and (2) the Graduate Division. Both applications and the school brochure can be obtained by writing to School of Social Welfare Admissions, 247 Dodd Hall, UCLA, Los Angeles, CA 90024-1452, or by calling 825-7737.

Major Fields or Subdisciplines

Direct social work practice with individuals, families, and small groups, planning/administration, and social welfare administration are offered as social work methods. Concentrations are available in child and family welfare, health and aging, and mental health.

Course Requirements

A total of 76 units in courses in the School of Social Welfare is required, including three courses in social welfare policy and services, three courses in the human behavior and social environment sequences, six courses in methods of social work practice, four courses in social welfare research, plus five terms of field instruction. Appropriate substitutions or waivers may be made by the dean. You may, with consent of the dean, take courses in other graduate schools of the University in fulfillment of the degree requirements.

With consent of the instructor and dean, you may substitute tutorial studies of comparable material in the 500 series for either required or elective courses. Only Social Welfare 596A and 597A may be taken. A maximum of nine units of 500-series courses may be applied toward the entire graduate course requirement for the degree.

Practicum Requirements

There is a concurrent field placement in each of the two years. Time in placement may vary according to guidelines established by the school, but approximately 1,300 hours are required.

Thesis Plan

While no University-approved master's thesis is required for the M.S.W. degree, the curriculum requires theoretical courses in research methodology. As a component of the second-year research course, the satisfactory completion of an individual research project, or participation in a group research project concerned with a social welfare problem, is required.
Comprehensive Examination Plan
All M.S.W. candidates must pass an oral comprehensive examination in Spring Quarter of the second year of study. The examination may cover the entire range of the program.

Doctor of Social Welfare
Admission
In addition to the University minimum requirements, the school requires completion of an M.S.W. degree program with a superior record from an accredited school of social work. This requirement may occasionally be waived if an applicant possesses a postgraduate degree and professional experience in a related field. Such candidates, however, are required to fulfill specified requirements in the M.S.W. program in addition to the normal doctoral requirements.

Admission criteria include the quality of your performance in previous undergraduate and graduate study, capacity for doctoral-level scholarship, ability to express yourself clearly in writing, success in professional employment and other pertinent experience, results of the Graduate Record Examination (GRE), and personal qualifications indicating suitability for advanced study and research.

The General Test of the GRE is required, as are official transcripts from every school attended since high school. In addition, international students whose native language is other than English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). Refer to “Proficiency in English” under “Graduate Admission” in Chapter 3 for further information. The school may request that you take specified additional examinations to assist in the assessment of candidacy for admission.

Five letters of recommendation and a typewritten statement of professional and educational objectives are required. To exemplify your communication skills, you may submit any of the following: published articles, master’s thesis, or other theoretical/research-oriented unpublished papers.

Although a personal interview is not required as part of the application procedure, whenever possible a conference is arranged with a member of the doctoral faculty.

Prospective students must apply separately to the School of Social Welfare and to the Graduate Division. Both applications and the school brochure are available by writing to the School of Social Welfare Doctoral Program, 247 Dodd Hall, UCLA, Los Angeles, CA 90024-1452.

Major Fields or Subdisciplines
The program trains research-oriented scholars to advance the field of social welfare and social work through research and knowledge development, and to assume leadership roles in academic, policy, and practice settings. The curriculum is organized into three major areas — specialization in a substantive area of social work, integration of social and behavioral science knowledge into social work, and research methods. Programs of study are planned in relation to the special and individual needs and interests of the students.

Course Requirements
There is a minimum core of required courses which includes two seminars on practice theory and research, two seminars on social welfare policy, and two graduate-level courses in statistics. In addition, you are required to take (1) at least three graduate-level courses in the social and behavioral sciences outside the school related to your specialization in social work, (2) two courses in advanced research methods, and (3) three terms of research internship. A dissertation seminar in your second year is also required.

Every effort is made to individualize the curriculum around your area of interest and plans for dissertation. In order to achieve this goal, a variety of patterns is used, including tutorials, small seminar groups, special courses in the M.S.W. program, and courses in other departments and schools of the University. You must complete course requirements and your dissertation within a maximum of 20 terms of full-time enrollment.

Qualifying Examinations
The qualifying examinations consist of two parts — (1) an examination in a substantive field of social work, reviewing current theory and research, that is given at the end of the second term of your first year and (2) a series of three major papers demonstrating your knowledge and analytical skills in (a) a substantive area of social work, (b) application of social and behavioral science knowledge to social work, and (c) utilization of research methods to a problem area. Each paper must be evaluated by a two-member committee.

The qualifying examinations are graded on a pass/fail basis, and passing them is prerequisite to pursuing the dissertation. If you fail one or more components, you may be permitted to retake the examination(s) only on recommendation of the doctoral committee.

Advancement to doctoral candidacy follows successful completion of the written qualifying examinations and the University Oral Qualifying Examination which covers the dissertation proposal and related areas. It is administered by the doctoral committee, which consists of three faculty members from within the school and two from other University departments.

Dissertation/Final Oral Examination
The dissertation must be an independent and original investigation which contributes to the existing body of knowledge in social welfare. The choice of methodology and logical development of your proposal must be approved by your dissertation committee, according to the regulations of the Graduate Division.

After acceptance of the dissertation in its final form, you may be required to take a final oral examination which covers the field within which your dissertation falls.

Graduate Courses
Consult the school for curriculum updates.

201A-201B. Dynamics of Human Behavior (3 units each). (Formerly numbered 201A-201B-201C.) Biopsychosocial factors associated with individual and group behavior and development as applicable in social functioning of individuals and groups. Emphasis on theoretical issues and research evidence which contribute to a unified theory of human development.

202A-202B. Dynamics of Human Behavior (2 units each). Prerequisites: courses 201A-201B. Deviation from normality or stresses in physical, emotional, and social areas of human functioning as those problems relate to role and function of the social worker.

203. Integrative Theory and Research in Human and Social Behavior (2 units). Prerequisite: consent of instructor. Integrative course which brings together theory and practice of social work in a variety of topical areas relevant to the profession. Includes identification of problem areas and populations at-risk requiring further examination. S/U grading.

205A. Cross-Cultural Awareness (2 units). Designed to aid students in development of professional perspectives that will allow them to work effectively with members of myriad cultural groups, to discuss with clarity alternative concepts of culture in determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U grading.

205B. Group Conflict and Change (2 units). (Formerly numbered 205.) Study of phenomena of group conflict and change as they appear in the social welfare matrix of groups, communities, and social institutions; relationship between conflict and social and cultural change; major research contributions in understanding of these phenomena.

220. History and Philosophy of Social Welfare (2 units). History of social work as a field: body of knowledge, method and process, and point of view analyzed within context of economic, political, social, philosophical, and scientific climate of the period.

221A. Social Welfare Policy and Services I (2 units). Nature, roles, and history of welfare institutions in different societies; applicable social system theory with special reference to values as seen by different components of the welfare system; theory and research about needs met and not met, about various welfare policies and organizational forms; and about social change to prevent needs.

221B. Social Welfare Policy and Services II (2 units). Understanding of significant theoretical constructs and relevant empirical evidence dealing with how organizations develop and maintain their internal functions. Development of beginning skill in organizational analysis. Special attention to organizational analysis of social welfare services.

225A. Social Welfare Policy: Formulation and Analysis. Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor. Examination of principal issues in development, formulation, and adoption of U.S. social welfare policies, with particular focus on income distribution and redistribution. Emphasis on analysis of social policy issues and conceptual frameworks for analysis.

225B. Social Welfare Policy: Implementation and Evaluation. Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor. Examination of issues in implementation and evaluation of social welfare policies, particularly those pertaining to provision, organization, and delivery of social services, including auspices funding, distribution, criteria for effectiveness, and use of quantitative methods in policy analysis.

230A. Theory of Direct Social Work Practice I (3 units). Lecture, two hours; laboratory, two hours. Prerequisites: required social work practicum. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. Laboratory provides environment in which to learn specific clinical skills. S/U or letter grading.

230B. Theory of Direct Social Work Practice II, II (2 units each). Corequisite: required social work practicum. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. S/U or letter grading.

240A. Theory of Social Work Practice in Administration, Planning, and Community Organization I (3 units). Lecture, two hours; laboratory, two hours. Corequisite: required social work practicum. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system, administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention. Computer skills taught for analysis. S/U or letter grading.

240B-240C. Theory of Social Work Practice in Administration, Planning, and Community Organization II, II (2 units each). Corequisite: required social work practicum. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system, administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention.

241A-241B-241C. Advanced Theory of Social Work Practice Method (Administration, Planning, and Community Organization) I, V, VI (2 units each). Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory.

242. Counseling Families of Handicapped Children (2 units). (Same as Psychiatry M242.) Prerequisites: consent of instructor. Techniques and issues in counseling families through the child's handicap, birth, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises.

245A. Development of Social Work Practice Theory: Epistemology of Practice. Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor. The guiding scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals learn, apply, accumulate, and modify their practice knowledge; science; and practice; and their interactions.

245B. Development of Social Work Practice Theory: Models of Social Work Practice Research. Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor. Research for practice, with major emphasis on methods of interventional research which seeks to design, test, evaluate, and disseminate innovative intervention technologies.

258. Critical Problems in Social Welfare (2 units). Prerequisites: doctoral standing and/or consent of instructor. Review of areas of research of concern to the profession. In Progress and S/U grading.

281A-281B-281C. Advanced Social Welfare Research (2 units each). Individual or group research projects requiring intensive examination and analysis of a social problem area, directed toward development of research knowledge and techniques for social work practice. In Progress grading.

285A-285B-285C. Research in Social Welfare, Prerequisites: doctoral standing and/or consent of instructor. Review of areas of research of concern to social workers, with special attention to design, instrumentation construction, data collection, data processing, data reduction, analysis, and interpretation. Designs studied include survey, panel, experimental observation, and theory development research.

286A-286B-286C. Survey of Research Methods. Prerequisites: doctoral standing and/or consent of instructor. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation, research design, sampling, comparative analysis, and survey; sampling; statistical methods; methods of observation and techniques of data analysis.

290A-290B-290C. Seminars in Social Work (2 units each). Series of seminars dealing with trends in social work and social welfare, with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research.

M290D. Women, Health, and Aging; Policy Issues (2 or 4 units). (Same as Health Services M241.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent, consent of instructor. Social and economic context of older women's aging, major physical and psychological changes older women experience, and the delivery of health services to this population, and policies that respond to their health needs.

M290E-M290F-M290G. Child Abuse and Neglect (2 units each). (Same as Community Health Sciences M272F-M272G-M272H, Dentistry M290A-M290B, and Nursing M290A-M290B-M290C.) Prerequisites: consent of instructor. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by members of the faculties of the Schools of Dentistry, Education, Law, Medicine, Nursing, and Public Health and the Department of Psychology, as well as by the relevant public agencies.

401A-401B-401C. Practicum in Social Work (2 units, 4 units, 4 units). Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunity to discuss the practicum experience with others in the setting and the Department of Social Work, arranged for students in keeping with their major field of study. In Progress and S/U grading.

402A-402B-402C. Advanced Practicum in Social Work (6 units, 4 units, 2 units). Laboratory, 24 hours. Prerequisites: courses 401A-401B-401C. Practicum in social work, arranged for students in keeping with their major field of study. In Progress and S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean. Arranged for students in departments of graduate study. Consent of dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Special Study and Research for M.S.W. Candidates (2 to 8 units). Individual programming for selected students to permit pursuit of a subject in greater depth.

596B. Special Study and Research for D.S.W. Candidates (2 to 8 units). Prerequisites: doctoral standing and/or consent of instructor. S/U or letter grading.

597A. Preparation for M.S.W. Comprehensive Examination (2 to 8 units). Prerequisite: consent of instructor.

597B. Preparation for D.S.W. Qualifying Examinations (2 to 8 units). Prerequisites: doctoral standing and/or consent of instructor.

599A. D.S.W. Dissertation Research (2 to 8 units). Prerequisites: doctoral standing and/or consent of instructor.
The UCLA School of Dentistry has developed a national and international reputation for its teaching and research activities. Challenging educational and training programs prepare the dental student for a professional career dedicated to patient treatment and service. The curriculum is carefully designed to prepare students for changes in treatment modalities and health care delivery systems. Students become actively involved in preventive dental care early in their training and soon make valuable contributions to the clinical health team. The clinical instruction system emphasizes a patient care approach in which each patient is treated comprehensively. Students interact with their colleagues, faculty, and dental auxiliary personnel in much the same way as they later will interact in a private or group practice.

Opportunity exists for dental students to undertake programs designed to meet their special needs; fourth-year electives encourage more advanced training in an area of particular interest. In addition to basic and applied research programs within the school, students participate in community service programs such as the Wilson-Jennings-Bloomfield Venice Dental Center, the Downtown Los Angeles Children’s Dental Clinic, and the Mobile Dental Clinic, the latter in conjunction with the University of Southern California. Postdoctoral study can be undertaken in one of several dental specialties, and an active continuing education program directed by UCLA faculty members provides a variety of short courses for members of the dental profession and their auxiliaries.
A3-042 Dentistry, (213) 825-6141

The UCLA School of Dentistry offers three principal areas: basic health sciences courses, didactic dental courses, and clinical experience. The first two years of the curriculum are devoted to didactic coursework in the basic health and dental sciences. The final two years emphasize training and instruction in the clinical fields, including endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, oral surgery, oral and maxillofacial surgery, anesthesia, orthodontics, pediatric dentistry, periodontics, and removable prosthodontics.

For further details on the D.D.S. program and a listing of the courses offered, see the Announcement of the UCLA School of Dentistry. Available from the Office of Student Affairs and Admissions, School of Dentistry, A3-042 Dentistry, UCLA, Los Angeles, CA 90024-1762.

Postdoctoral Programs

The School of Dentistry offers the following opportunities for postdoctoral study: a one-year general practice residency program; a one-year advanced education in general dentistry program; a one-year residency in maxillofacial prosthodontics; a four-year oral and maxillofacial surgery residency training program; a three-year combined orthodontic-pediatric dentistry program; and two-year programs in the specialties of orthodontics, pediatric dentistry, periodontics, prosthodontics, and endodontics.

Information on these postdoctoral programs can be obtained by writing directly to their respective directors, UCLA School of Dentistry, Los Angeles, CA 90024-1668.

Oral Biology

63-050 Dentistry, (213) 825-1955

Professors
George W. Bernard, D.D.S., Ph.D.
Colin K. Franker, Ph.D.
Louis J. Goldberg, D.D.S., Ph.D., Chair
Douglas Junge, Ph.D.
No-Hee Park, D.M.D., Ph.D.
John A. Yagiela, D.D.S., Ph.D.
Norman S. Simmons, D.M.D., Ph.D., Emeritus

Associate Professor
Lawrence Wolinsky, D.D.S., Ph.D.

Scope and Objectives

The M.S. program in Oral Biology is intended to prepare students for teaching and research careers in dentistry while introducing them to modern approaches to research in the biology of the oral-facial area. The core curriculum is made up of basic science courses in embryology and histology, microbiology, immunology, biochemistry, and pharmacology, and therapeutics, all directly related to oral-facial problems. In addition, students take research methods, a course in biostatistics, and any of several electives in related areas.

All students carry out a thesis project, working in a laboratory in the School of Dentistry, Dental Research Institute, or other divisions of the Center for the Health Sciences. Each is exposed to modern research methodology and supervised by a faculty member with research experience. Many students are in cooperative D.D.S./M.S. programs or resident programs in specialty areas, and many are dentists trained in other countries.

Master of Science Degree

Admission

Applicants are expected to have an acceptable bachelor’s degree with a strong background in the biological and chemical sciences or a Doctor of Dental Surgery degree or the equivalent (i.e., D.M.D.) from an accredited university. The Graduate Record Examination (GRE) and the Dental Aptitude Test (DAT) are not required but may be submitted. Three letters of recommendation are required as part of the admissions packet. There is no separate application form other than that required by the Graduate Division. International students are considered individually after evaluation of their curriculum and training and must take an English language proficiency examination. Refer to “Proficiency in English” under “Graduate Admission” in Chapter 3 for further information. Contact the Graduate Adviser, Oral Biology Sec-
Major Fields or Subdisciplines
Areas of specialization or subdisciplines which may be followed to complement or complete the degree requirements include anatomy, biological chemistry, cell biology and virology, immunology, microbiology, pharmacology, and physiology.

Course Requirements
The program requires a total of 36 units, 17 of which must be at the graduate level. Seven graduate core courses are required: Oral Biology 202, 204, M205, M206, 207, 208, M214. These should be taken during your first year of graduate study. Course 260 and Biomathematics 160 are both required for completion of the degree.

Courses 596 and 598 are required 500-series courses. You are eligible to take two to eight units at a time on an S/U grading basis as many times as needed. A maximum of eight units of 500-series courses may be applied toward the total course requirement, of which four units may be applied toward the minimum graduate course requirement.

Thesis Plan
The master’s thesis is intended to demonstrate your ability to design and carry out a research project and then to analyze and present the resulting data. The thesis must be prepared according to high standards of experimental design and data analysis. The subject of the thesis must be approved by the graduate adviser and by the faculty member who will direct the work of the thesis. After completing course requirements, you should prepare and send to your graduate committee a brief description of the proposed research project. The committee then discusses the proposal with you and makes suggestions.

The thesis should be prepared mainly in consultation with the sponsor, although other committee members are available for assistance. At least two weeks should be allowed between completion of the thesis and termination of the program, to allow committee members to read and comment on the manuscript.

Final Oral Examination
A final oral defense of your thesis is required.

Articulated Degree Program
The M.S. degree in Oral Biology has been structured so that students pursuing a dental degree or certificate in the UCLA School of Dentistry have an opportunity to participate in the program. These students must submit a separate application to the Graduate Admissions Office.

Graduate Courses
201. Orofacial Mycoses (2 units). Presentation of major fungal infections which manifest as orofacial lesions, with emphasis on cellular and subcellular basis for pathogenesis. Focus on biology of these pathogens and host response to mycosis.
Mr. Franker (F)

204. Antibiotics and Antimicrobial Agents (2 units). Summary of current information on chemistry, synthesis mode of action, and mechanism of resistance for generically grouped antimicrobial substances. Emphasis also on pharmacokinetic complications of antibiotic usage.
Mr. Franker (F)

205. Oral Sensory Physiology (2 units). (Same as Physiology M208.) Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Sensory mechanisms in normal and abnormal oral function. Organization of sensory systems in general, sensory transduction and neural coding, oral touch and temperature perception, pain mechanisms, dental pain sensitivity, physiology and abnormalities of taste and olfaction.
Mr. Junge (Sp)
M206. Current Topics in Oral Immunology (2 units). (Same as Microbiology and Immunology M206.) Review of anatomy and physiology of oral cavity, intestines, and related lymphatic and blood vascular systems in reference to immune system. Secretory and systemic immune systems, with particular emphasis on unique properties of SIgA. Discussion in terms of recent experimental findings of ability to process enteric antigens, to respond, and to regulate enteric immunity. Role that enteric immunity may play in diseases of the GI tract, such as dental caries and inflammatory bowel diseases. Students participate in discussions following each lecture and present seminars based on review of relevant scientific literature.

Mr. Goldberg (F)

207. Brainstem Control of Rhythmical Movements (2 units). Discussion of central nervous system mechanisms which coordinate and control contraction patterns of muscles which are involved in orofacial behaviors such as sucking, chewing, and swallowing. Emphasis on interaction among brainstem reflexes, pattern generators, and "voluntary control centers." Discussion of role of neuromodulators in control of these behaviors.

Mr. Miyasaki (Sp)

208. Biochemistry of Saliva and Dental Caries (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Embryology of bone tissue; bone as an organ; growth and development of specific bones; biochemistry and physiology of bone; remodeling of bone; crystallography of hydroxyapatite; pathological calcifications; pathology of bone; mechanisms and lineage of calcification; clinical correlations.

Mr. Bernard (W)

225. Gross Postnatal Craniofacial Growth and Development (2 units). Designed primarily to develop a critical sense in evaluation of research literature and appreciation of dynamic complexity of postnatal craniofacial growth. At each session students present reviews and critiques of original articles, followed by group discussion. Specific aspects of the following general topics on growth of bone and bones considered in detail: historical review; modes of growth; general and craniofacial (mandible, midface, cranium) growth; methods of assessing; factors affecting; and conflicting hypotheses. Students encouraged to pursue their particular interest.

Mr. Sarnat (Sp)

226A-226B. Craniofacial Growth and Development (2 units each). Prerequisite: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region. Students required to present seminars on assigned topics which aid their understanding and analysis of course content that has application to their specific and professional fields. In Progress grading.

Mr. Dixon and the Staff (F,W)

227. Dental Embryology and Histology (2 units). Description and interpretation of important stages in development of the orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of the orofacial apparatus which are of significance to clinical dental specialists.

Mr. Dixon (F)

228. Dental Pharmacology and Therapeutics (2 units). Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on autonomic and central nervous systems.

Mr. Yagiela (F)

280. Oral Biology Seminar (1 unit). Research seminar to discuss faculty and student research of oral biology and related disciplines. Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

Mr. Park (F,W,Sp)

M293. Major Concepts in Oncology. (Same as Microbiology and Immunology M293 and Pathology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology; genetics, membranes, molecular synthesis and control, cell cycle, control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

Mr. Hankinson (W)

596. Directed Individual Study or Research (2 to 8 units). S/U grading.

A modern school of medicine exists in many minds and in many places. It includes many more disciplines than all those available to such physicians as Copernicus and John Locke, famous for discoveries well beyond medicine then or now. UCLA School of Medicine faculty and students may be found in the Molecular Biology Institute and in the Department of Physiology, in the clinics, wards, and operating rooms of the UCLA Medical Center and Los Angeles County Harbor-UCLA Medical Center, in the Health Sciences Computer Center, in the Louise Darling Biomedical Library, and in dozens of other clinical and scientific facilities.

Regarded by many physicians and medical faculty to be among the best in the nation, UCLA's School of Medicine encompasses a wide range of clinical specialties, including neurology, obstetrics and gynecology, ophthalmology, pediatrics, radiation oncology, and surgery. Graduate work leading to the M.S. and/or Ph.D. degrees is offered through the Graduate Division, either separately or in conjunction with the M.D. program, in 10 different disciplines.

Each department of the school is staffed by a distinguished faculty of respected researchers and practitioners. They have at their disposal some of the most technologically advanced equipment and facilities, including one of the nation's 35 hospital-based biomedical cyclotrons producing shortlived radioisotopes for research and diagnostic nuclear medicine procedures.
School of Medicine

12-109 Center for the Health Sciences, (213) 825-6081

The UCLA School of Medicine offers an M.D. degree program, several allied health programs in affiliation with other hospitals and universities, and a number of postgraduate medical training programs. In addition to specialties in medicine, neurology, obstetrics and gynecology, ophthalmology, pediatrics, radiation oncology, and surgery, which lead to the M.D. degree, a range of master’s and doctoral degrees is offered through the Graduate Division.

M.D. Degree Program

The four-year curriculum leading to the degree of Doctor of Medicine (M.D.) at UCLA is designed to develop a comprehensive scientific and humane approach to patient care that includes basic sciences, preventive medicine, diagnosis, and therapeutics. Clinical skills are taught in the context of anatomical, molecular, pathophysiological, and psychosocial factors in health, disease, and treatment.

During the first two years, which are devoted mainly to the basic sciences with only periodic, brief clinical exposure, instruction is primarily in the form of lectures and laboratory sessions, demonstrations, and tutorials. In the last two years, instruction in patient care is given in the form of required and elective clinical clerkships at the UCLA Medical Center or at one of many affiliated hospitals.

All of the medical school departments participate in the medical curriculum leading to the M.D. degree. If you are interested in details on the M.D. curriculum and a listing of courses offered in each department, or if you wish to make application to the M.D. program, you should obtain a copy of the Announcement of the UCLA School of Medicine from the Office of Student Affairs, School of Medicine, 12-109 CHS, UCLA, Los Angeles, CA 90024-1720. You are also referred to Chapter 5 of this catalog for details on the four-year premedical studies program offered by the College of Letters and Science.

Graduate Programs

Master’s and/or doctoral degrees are offered through the UCLA Graduate Division in the following fields: anatomy, biological chemistry, biomathematics, biomedical physics (Department of Radiological Sciences), experimental pathobiology, microbiology and immunology, neuroscience, nurse anesthesia, pharmacology, and physiology. Detailed information on these programs, for which admission to the School of Medicine is not required, is provided in the departmental listings which follow.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

Additional Programs

Articulated Degree Programs

The School of Medicine offers an articulated degree program in conjunction with the Graduate Division which allows you to earn both the M.D. and Ph.D. in six to seven years, depending on your course of study and research. The Ph.D. may be awarded in one of several medical science fields. For more information, contact the associate dean for Education in Medical Science and Educational Development at 825-8117 or 206-5964.

In addition, an arrangement with the School of Public Health enables you to pursue the M.P.H. degree while attending medical school. Interested students should consult the Student Affairs Office in the School of Public Health.

Allied Health Programs

Programs in allied health include animal care technician, dental assistant, dental hygienist, dietetics technician, emergency medical technician, social work, pharmacy, respiratory therapist, vocational nurse, medical technologist, nurse anesthetist, operating room nurse, physician’s assistant, physical therapist, prosthetist-orthotist, radiologic technologist, radiation therapy technologist, and ultrason sound technologist. Information regarding these programs may be obtained from the Office of Allied Health Programs in the UCLA Center for the Health Sciences (825-6711).

Postgraduate Medical Training Programs

Postgraduate training programs, including residencies, are available at several off-campus sites in addition to those offered at the UCLA Medical Center. Programs offered at the allied institutions broaden the scope of the teaching programs by providing extensive clinical facilities, special population settings, and diverse practice modes. Information about these programs is available from the Office of Student Affairs, UCLA School of Medicine.

*The department admits only applicants whose objective is the Ph.D.
Anatomy and Cell Biology

73-235 Center for the Health Sciences, (213) 825-9555

Professors
George W. Bernard, D.D.S., Ph.D.
P. Dean Bok, Ph.D. (Dolly Green Professor of Ophthalmology; Distinguished Teaching Award)
Nathaniel A. Buchwald, Ph.D., in Residence
Carmine D. Clemente, Ph.D.
Edwin L. Cooper, Ph.D., Vice Chair
Richard W. Young, Ph.D.

John K. Lu, Ph.D.
Paul E. Micevych, Ph.D.
Earle E. Crandall, M.D., Ph.D., F.A.C.S., Clinical
Nicholas C. Brecha, Ph.D., in Residence
Nathaniel A. Buchwald, Ph.D., in Residence
Carolyn R. Housner, Ph.D., in Residence

Anatomy and Cell Biology

look forward to an academic career in medical and dental schools or research institutes and, in accord with this, the department strives to produce graduates soundly qualified both for teaching of anatomical subjects at this level and for the conduct of productive research in morphology, cell biology, or some related area. An M.S. degree is also available to individuals whose major interests and training lie in allied fields. The department does not offer an undergraduate degree. An informational brochure may be obtained by writing to the Vice Chair, Department of Anatomy and Cell Biology, 73-235 CHS, UCLA, Los Angeles, CA 90024-1763.

Requirements for Graduate Degrees

Admission
Applicants must have a bachelor’s degree in a physical or biological science or in a premedical curriculum. Introductory courses in zoology, one year of general and organic chemistry, and one year of college physics are required. Courses in comparative anatomy, embryology, cell biology, genetics, and elementary statistics are highly recommended.

You must submit (1) transcripts of grades for all college-level work; (2) the results of the Graduate Record Examination (GRE), including the Subject Test in Biology or in your undergraduate major, (3) at least three letters of recommendation from professors stressing potential for successful completion of graduate studies and creative independent research, and (4) an essay describing your background, work experience, interests, and career goals. Selected applicants are asked to an interview with an admissions committee of faculty and graduate students.

Major Fields or Subdisciplines

The major fields in which graduate research may be undertaken include (1) neuroanatomy and neurophysiology, (2) neuroendocrinology, and (3) cell biology, including immunology.

Master of Science Degree

The M.S. degree in Anatomy is available to applicants who have specialized objectives (e.g., students in bioengineering, medical illustration, physical therapy, and other paramedical specialties), as well as to international students who can plan only a limited stay in this country. Provision can also be made for medical and dental professionals at the postdoctoral level who wish to pursue a limited research project and will satisfy all requirements of the program.

Course Requirements

A total of 36 units of coursework is required, 20 of which must be in graduate-level courses. Eight units of Anatomy and Cell Biology 597 or 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement. All M.S. candidates must take two courses selected from 201 (seven units), M206A (five units), 207 (12 units), and 209 (five units); courses M203A-M203B (eight units); one departmental seminar; other courses essential to the student’s program; courses in the minor field (for those under the comprehensive plan). If course 201 (seven units) is selected, tutorial course 254 (two units) must be taken concurrently, making a nine-unit requirement.

Thesis or Comprehensive Examination Plan

You may elect either the thesis or examination plan. For the thesis plan, a committee of the adviser and two department members approves the thesis proposal, usually at the start of your second academic year. All members participate in criticism and approval of the eventual thesis; there is no oral defense. Under the comprehensive examination plan, you must demonstrate in a written examination a grasp of the general principles of anatomy, as well as an understanding of some related field that is relevant to your objectives.

Ph.D. Degree

Course Requirements

(1) You are required to take for credit three of the following courses or course combinations: Anatomy and Cell Biology 201 and 254; M206A (neuroscience students also take M206B); 207; 209. One of the following course sequences is also required: Physiology 201A-201B or Biological Chemistry 201A-201B.

(2) Participation in at least two departmental seminars.

(3) Completion of such other courses as are essential for your research interest.

(4) Completion of a “breadth requirement” consisting of the equivalent of eight units of work. This may be satisfied by a foreign language examination.

(5) Rotation through two research laboratories, one term each, with course 290 or 596 credit (two units).

Teaching Experience

Since the anatomy profession generally imposes relatively heavy teaching obligations, students are required to gain teaching experience in at least one of the major anatomy courses.

Qualifying Examinations

The written comprehensive examination is intradepartmental and intended to evaluate your capacity to organize and integrate information gained in the major core courses. All students must take the examination at the end of the
second year and are encouraged to do so the first year. After passing this examination and spending perhaps a year in a laboratory, taking seminars, and reading in the field of research interest, you must take a University Oral Qualifying Examination before an ad hoc doctoral committee which evaluates your knowledge of the research field and ability to formulate a practicable and significant research program.

The Anatomy and Cell Biology Department may decline to admit any student to the qualifying examination if, in its judgment, the student is inadequately prepared, is not sufficiently interested in those fields of research in which the department can offer sufficient guidance, or is for other reasons not adaptable to the program.

Candidate in Philosophy Degree
You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination
After you complete the research and writing of the dissertation, you must defend it in a final oral examination before the doctoral committee in closed session. You are also expected to give a final public seminar on your findings.

Upper Division Courses

102. Gross Anatomy of the Human Body (8 units). (Formerly numbered 102A-102B). Lecture, four hours; laboratory, 12 hours. Prerequisite: dental student standing or consent of instructor. Systemic and topographical human anatomy, with dissection of human cadaver. Emphasis on head and neck. P/NP grading. Mr. Adinolfi and the Staff (Sp)

104. Mammalian Histology (6 units). Lecture/laboratory, three-hour sessions. Prerequisite: dental student standing or consent of instructor. Lectures, demonstrations, and laboratories dealing with structural organization of tissues and organs at microscopic level. Mr. Campbell and the Staff (F)

106. Functional Neuroanatomy. Lecture/laboratory, three two-hour sessions. Prerequisite: dental student standing or consent of instructor. Lectures, demonstrations, and laboratories dealing with structure and functional organization of nervous system. Mr. Harper and the Staff (W)

199. Individual Special Studies (2 to 8 units). Prerequisite: consent of instructor. Studies in anatomy and related subject areas appropriate for training of particular students, which may include reading assignments or laboratory work leading to a final oral or written report. S/U or letter grading.

Graduate Courses

201. Microscopic Anatomy and Cell Biology (7 units). (Formerly numbered 101). Lecture/laboratory, two to three three-hour sessions (16-week semester). Prerequisite: medical student standing or consent of instructor. Microscopic study of structure and function of tissues and cells, with special reference to the human body. Mr. Young and the Staff (F)

202A-202B. Electronics for Neuroscientists. Lecture, two hours; laboratory, four hours. Prerequisite: consent of instructor. Development of understanding of electronic methods used in neuroscience. Basic principles of passive networks, operational amplifiers, analog and digital electronics, waveform generation, signal conditioning, data acquisition methods, and neurophysiological instrumentation systems. S/U or letter grading. Mr. Cooper (F)

209. Cell Molecular Structure and Function (5 units). Lecture, four hours; discussion, one hour. Prerequisite: consent of instructor. Introduction to cell biology for graduate students in basic medical sciences. Topics include membrane structure and function; biosynthesis of organelles, intercellular junctions, endocytosis, extracellular matrix, cytoskeleton and motility, intercellular and intracellular signaling, immunity and gene structure, function and replication. Mr. Bok and the Staff (F)

211. Cellular Basis of Learned Behavior (2 units). Lecture/discussion, one two-hour session; laboratory, to be arranged. Prerequisites: microscopic anatomy, mammalian physiology. Anatomy and physiology of cerebral structures involved in learning, memory, motivation, and conditioned reflexes. Mr. Woody (F)

M225. Biology of Bone (2 units). (Same as Oral Biology M214). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Embryology of bone tissue; bone as an organ; growth and development of specific bones; biochemistry and physiology of bone; remodeling of bone; crystallography of hydroxyapatite; pathological calcifications; pathology of bone; mechanisms and lineage of calcification; clinical correlations. Mr. Bernard (W)

M229. Oral Embryology and Histology. (Formerly numbered M203.) (Same as Oral Biology M203). Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues. Mr. Bernard and the Staff (Sp)

M240. Cellular and Molecular Neurochemistry. (Formerly numbered M221A.) (Same as Biological Chemistry M221A, Neuroscience M240, Pharmacology M221A, and Psychiatry M221A). Lecture, three hours. Prerequisites: biochemistry, basic neurochemistry, consent of instructor. Introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, gliogenesis, plasticity and regeneration.

M241. Cellular and Molecular Neurochemistry. (Formerly numbered M221B.) (Same as Biological Chemistry M221B, Neuroscience M241, Pharmacology M221B, and Psychiatry M221B). Lecture, three hours. Introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, gliogenesis, plasticity and regeneration, and aging. Mr. OlSEN

M246. Neuroactive Peptides: Molecular Biology to Function (2 units). (Formerly numbered M235). (Same as Medicine M235, Neuroscience M246, and Physiology M235.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biological activity of peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading. Mr. Brecha, Ms. Reeves, Ms. Tache (W)

251. Problems in Developmental and Comparative Immunology (2 units). Prerequisite: consent of instructor. Review of current literature emphasizing early development and evolution of immune competence. Mr. Cooper (W)
252. Seminar on Basic and Quantitated Neurophysiology (2 units). Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Lecture series on basic neurophysiology. Early lectures by invited specialists on their specific fields. Later lectures by each student on a topic selected and prepared in collaboration with instructor. 

Mr. Segundo (Sp, even years)

253. Communication and Coding in Nervous Systems. Lecture/discussion, one two-hour and two 30-minute sessions. Prerequisite: consent of instructor. Presentation, discussion, and critique of efforts to quantify neuronal function where essence of mathematics is expressed in qualitative and physiologically meaningful terms (e.g., stability, neurons as analyzers of spike trains, identification of synaptic operators). 

Mr. Segundo (Sp, odd years)

254. Structure and Function of Cells and Tissues (2 units). (Formerly numbered 201.) Lecture, one hour; discussion, one hour. Prerequisites or corequisites: course 201, consent of instructor. Current topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

Mr. Young and the Staff (F)

M255A-M255D. Seminars in Neural and Behavioral Endocrinology (3 units, 2 units, 3 units, 2 units). (Same as Psychology M294A-M294D.) Lecture, three hours. Topics include hormonal biochemistry and pharmacology. Hypothalamic-hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function. 

Mr. Gorski and the Staff (W, M255A, M255C; Sp, M255B, M255D)

256. Seminar in Cell Structure and Function (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Selected topics in cell biology emphasizing those areas which are of current interest. Analysis of various techniques being used to study the cell. 

Mr. Dirksen and the Staff (W,Sp)

258. Seminar in Neuroscience (2 units). Prerequisite: basic neurology. Topics of current interest or ongoing research projects; examination of both content and method of presentation. May be repeated for credit. 

Mr. Scheibel (F, odd years; W, even years)

M261. Neuronal Circuit Analysis (2 units). (Same as Neuroscience M261.) Lecture/discussion, three hours. Prerequisite: courses M206A, M206B, or equivalent. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of basic neuronal circuits serving different control functions. 

Mr. Schlag (W)

265. Evolution of Cancer (2 units). Prerequisite: consent of instructor. Review of current literature emphasizing appearance of tumors and neoplasms in representative invertebrates, fishes, amphibians, and reptiles. Theories of cancer development from the evolutionary viewpoint. 

Mr. Cooper (W)

290. Tutorials in Anatomy (2 units). Tutorial, one hour. Prerequisite: consent of instructor. Individual study with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to instructor and student. S/U grading.

290A-390B. Peer Review System (2 units each). Prerequisite: advancement to candidacy in integrative or systems biology or consent of instructor. Introduction to peer review system for evaluation of research proposals. After consideration of grant review process, each student prepares abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

Mr. Gorski (W,Sp, odd years)

494A-495F. Preparation for Teaching in Anatomical Sciences (2 to 4 units each). Prerequisites: graduate standing, consent of vice chair and instructor. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. Maximum of three 495 courses may be taken; none may be repeated. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with neighboring institutions. S/U grading.

596. Directed Individual Study or Research (2 to 12 units).

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units).

598. Thesis Research for M.S. Candidates (2 to 12 units).

599. Dissertation Research for Ph.D. Candidates (2 to 12 units).

Medical History Division

Professors

Ynez V. O'Neill, Ph.D., in Residence
L. R. C. Agnew, M.D., Emeritus
Franklin D. Murphy, M.D., Sc.D., Emeritus

Associate Professor

Robert G. Frank, Jr., Ph.D., Division Chief

Lecturer

Elizabeth R. Lomax, M.D., Ph.D.

Upper Division Courses

107A-107B. Historical Development of Medical Sciences. Lecture, three hours. Major contributions of medicine and medical personalities from earliest times. 107A. Contributions of medicine and medical personalities from earliest times through 1650. 107B. Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

Mr. Frank (Sp), Ms. O'Neill (W)

Mr. Frank (F,W)

244. History of American Medicine (1 unit). Survey of history of medicine in the United States from Colonial period to the present. (Sp)

246. History of Neurophysiology: Its Impact on Psychology and Medicine (2 to 4 units). Lecture, one hour; seminar, two hours. Development of experimental neurophysiology from its scientific roots in the 17th century through recognition of the excitability of nervous system, to use of this characteristic in revealing functions of central nervous system. Discussion of interaction of neurophysiological ideas with contemporaneous philosophy and medicine. Lectures may be taken independently.

Ms. Lomax, Ms. O'Neill (Sp)

250. History of Medical Psychology (2 units). Lecture, one hour; examination of themes underlying modern mental health theories. Beginning with review of contemporary thinking, lectures focus on various factors shaping present concepts of mental disorders and provide a framework for understanding current issues.

Ms. Lomax, Ms. O'Neill (W)

259. Directed Individual Studies in Medical History (2 to 12 units). Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences.

(F,W,Sp)

Scope and Objectives
The Department of Anesthesiology in the School of Medicine offers a program leading to the Master of Science degree in nurse anesthesia. This program prepares qualified registered nurses in the specialty of anesthesia and qualifies the graduate to sit for the certification examination given by the Council on Certification of Nurse Anesthetists. The graduate attains a high level of clinical competence combined with an extensive body of didactic knowledge relevant to the specialty. The program is designed to lead to careers in the clinical practice of nurse anesthesiology and the teaching of nurse anesthesiology with the opportunity for participating in research in the area.

Master of Science in Nurse Anesthesia
Admission
The following admission requirements must be met:
(1) A Bachelor of Science degree in Nursing or other appropriate undergraduate degree.
(2) Graduation from an accredited nursing program satisfactory to the program and to the UCLA Graduate Division. You may be required to enroll in certain additional undergraduate courses prior to final consideration by the program.
(3) Mandatory evidence of status as a registered nurse in the State of California.
(4) Completion of a minimum of one year of experience as a graduate nurse in an acute care area of nursing, preferably an intensive care unit.
(5) Professional and academic competence attested through three letters of recommendation.
(6) Graduate Record Examination (GRE) General Test results submitted to the program.
(7) Successful completion of the following undergraduate-level courses: (a) inorganic chemistry, organic chemistry, and biochemistry, (b) introductory physics, (c) biology, (d) anatomy, (e) physiology, (f) English, (g) psychology, (h) statistics, and (i) a course in methods of research (highly recommended).
(8) A scholarship record satisfactory to the Graduate Division and the Nurse Anesthesia Program. Transcripts must be sent to both.
(9) Preinterview with the program director or designee, observation in the clinical practice, and final interview with the admissions committee. Approximately five to 10 students are selected for admission in Fall Quarter by the admissions committee which meets annually in January. Information regarding the program may be obtained by writing to the Department of Anesthesiology, 56-125 CHS, UCLA, Los Angeles, CA 90024-1778. All applicants must apply to both the department and the Graduate Division. Separate applications are needed.

Foreign Language Requirement
There is no foreign language requirement for the M.S. degree.

Course Requirements
A total of 36 units of coursework is required, of which must be in graduate-level courses. Required courses include Anesthesiology 215A, 215B, 220, 221, 223, 225, 290, 597 or 598A, 598B, Biomechanics 170A, Physiology 100, and four units from the Anesthesiology 210A, 210B, 210C sequence.
Course 598B may be repeated twice, but only four units of 500-series courses may be applied toward the graduate course requirement. Letter grading may be used in 500-series courses.
Professional courses (22 units) are required for certification eligibility and graduation: Anesthesiology 400A through 400G, 401, 402A, 402B.

Thesis Plan
If you elect this option, your thesis committee is established during the second year of the program. The thesis proposal is written and approved during Winter or Spring Quarter of your second year. You must take a written comprehensive examination for course completion.

Comprehensive Examination Plan
Students electing this option must demonstrate theoretical and clinical competence in the field. This option is generally recommended for students continuing to doctoral degree study. The oral examination is general in scope and may include information from all aspects of the curriculum. A written comprehensive examination is also required for course completion. Examinations are offered quarterly.

Other Requirements
(1) You must complete all requirements for the Master of Science degree in a minimum of 10 terms, but no more than 12 terms, of consecutive full-time enrollment.
(2) The program does not discriminate on any basis unless a handicap is determined by the admissions committee to preclude the safe clinical practice of anesthesia.
(3) You must complete a minimum of 550 cases as the primary anesthetist.
(4) You must meet all program requirements for graduation to qualify for the certification examination of the Council on Certification of Nurse Anesthetists.

Graduate Courses
210A. Chemistry and Physics of Nurse Anesthesia I (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Study of principles of chemistry and physics as applied specifically to practice of anesthesia.
Mr. Griffin
210B. Chemistry and Physics of Nurse Anesthesia II (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of study of principles of chemistry and physics as applied specifically to practice of anesthesia.
Mr. Griffin
210C. Chemistry and Physics of Nurse Anesthesia III (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of study of chemistry and physics as related to anesthesia management, with specific emphasis on biochemistry as related to acid-base balance and theories of narcosis.
Mr. Griffin
215A. Pharmacology of Nurse Anesthesia I. Lecture, four hours; discussion, two hours. Introduction to basic pharmacological principles as applied to administration of anesthesia. Study of uptake and distribution, mechanism of action, fate, and toxicology as related to anesthetics.
Ms. Gold and The Staff
215B. Pharmacology of Nurse Anesthesia II. Lecture-discussion. Study of pharmacology of adjunct drugs influencing anesthesia administration, including their uptake and distribution, mechanism of action, fate, biotransformation, and toxicology.
Ms. Gold and The Staff
220. Respiratory Anatomy and Physiology for Nurse Anesthetists (2 units). (Formerly numbered 220A.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Study of structure and function of respiratory system, with emphasis on anatomy and physiology at cellular level.

Ms. Mann, Ms. Ward

221. Cardiovascular Anatomy and Physiology for Nurse Anesthetists (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Integrated study of anatomy and physiology of C-V system as related to management of anesthesia administration.

Ms. Grogan

M222. Biological Control Systems. (Same as Electrical Engineering 241.) Prerequisite: Electrical Engineering 141 or equivalent. Introduction to application of control theory to modeling and analysis of biological control systems, such as respiratory system, cardiovascular system, and neuro muscular system. Emphasis on solving problems of current interest in biomedicine.

Mr. Wirberg

223. Anatomy and Physiology of Endocrine and Excretory Systems for Nurse Anesthetists (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Integrated study of endocrine and excretory systems as related to management of anesthesia administration.

Ms. Peter

225. Anatomy and Physiology of Nervous System for Nurse Anesthetists (2 units). (Formerly numbered 225A.) Lecture, two hours; discussion, one to two hours. Prerequisite: consent of instructor. Integrated study of anatomy and physiology of nervous system as related to management of anesthesia administration.

Ms. Peter

290. Anesthesia Seminar for Nurse Anesthetists (2 units). Discussion, two to three hours. Discussion of research methods, basic statistics, and critical scientific paper analyses in relation to anesthesia research and practice.

Ms. Waugaman and the Staff

400A. Basic Clinical Anesthesia for Nurse Anesthetists I (2 units). Lecture, three hours; laboratory, 30 hours. Prerequisite: courses 402A, 402B. Correlation of techniques of anesthesia administration with basic science knowledge as applied in the clinical area with supervised practice. S/U grading.

Mr. Foster, Ms. Waugaman

400B. Basic Clinical Anesthesia for Nurse Anesthetists II (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400A. Continuation of practice of techniques of anesthesia administration as applied in the clinical area with supervised practice. S/U grading.

Mr. Foster, Ms. Waugaman

400C. Basic Clinical Anesthesia for Nurse Anesthetists III (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400B. Continuation of techniques of anesthesia administration as applied in the clinical area with supervised practice. S/U grading.

Mr. Foster, Ms. Waugaman

400D. Clinical Anesthesia for Nurse Anesthetists IV (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400C. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

Mr. Foster, Ms. Waugaman

400E. Clinical Anesthesia for Nurse Anesthetists V (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400D. Practice of refinements of anesthetic techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

Mr. Foster, Ms. Waugaman

400F. Clinical Anesthesia for Nurse Anesthetists VI (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400E. Practice of refinements of anesthetic techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

Mr. Foster, Ms. Waugaman

400G. Clinical Anesthesia for Nurse Anesthetists VII (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400F. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

Ms. Coon and the Staff

401. Legal Aspects and Bioethics (2 units). Lecture, two hours; discussion, 30 minutes to one hour. Prerequisite: consent of department. Introduction to history, bioethics, and legal aspects of nurse anesthesia. Exploration of psychology related to the patient undergoing surgery and anesthesia.

Ms. Waugaman

402A. Fundamentals of Anesthesia Practice for Nurse Anesthetists. (Formerly numbered 402.) Lecture, four hours; discussion, one to two hours. Prerequisite: consent of instructor. Introduction to basic principles of anesthesia administration, including preanesthetic assessment, physical examination, techniques and procedures, and anesthesia for specialized techniques and surgery.

Mr. Foster and the Staff

402B. Fundamentals of Anesthesia Practice for Nurse Anesthetists (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of techniques and procedures, and anesthesia for specialized techniques and surgery.

Mr. Foster

597. Preparation for M.S. Comprehensive Examination (2 units). Prerequisite: consent of instructor. Opportunity to pursue comprehensive study in anesthesia and related areas on individual basis, with opportunity for discussion of material with instructor.

Mr. Foster, Ms. Waugaman

598A. Research in Anesthesia I (2 units). Prerequisite: consent of instructor. Opportunity to pursue anesthesia research outlets for thesis preparation. Independent research of quality suitable for publication required. May be selected instead of oral comprehensive examination for completion of M.S. program.

Mr. Foster, Ms. Waugaman

598B. Research in Anesthesia II (2 units). Prerequisite: course 598A. Opportunity to pursue anesthesia research outlets for thesis preparation. Independent research of quality suitable for publication required. May be selected instead of oral comprehensive examination for completion of M.S. program. May be repeated twice for credit.

Ms. Waugaman

Professors Emeriti
Rosllyn B. Allin-Slater, Ph.D.
Samuel Eiduson, Ph.D.
Robert M. Fink, Ph.D.
Isaac M. Harary, Ph.D.
Ralph W. McKee, Ph.D.
Joseph F. Nyc, Ph.D.
John G. Pierce, Ph.D.
George J. Popjak, M.D., D.Sc.
Sidney Roberts, Ph.D.
Emil L. Smith, Ph.D.
Marion E. Swendseid, Ph.D.
Irving Zabin, Ph.D.
Stephen Zamenhof, Ph.D.

Associate Professors
Judith C. Gasson, Ph.D., in Residence
Kevin McNeney, Ph.D.
David J. Meyer, Ph.D.
Patrice J. Zamenhof, Ph.D.
S. Larry Zipursky, Ph.D.

Assistant Professors
Reid C. Johnson, Ph.D.
Gregory S. Payne, Ph.D.

Adjunct Professors
Kathryn L. Calame, Ph.D.
James C. Pauison, Ph.D.

Scope and Objectives
Modern biochemistry is both intellectually and methodologically a wide-ranging and expanding field of science; it has grown well beyond its initial definition as the chemistry of living things. People who call themselves biochemists work in areas as diverse as medical research, nutrition, pharmacology, crystallography, virology, genetic manipulation, and cellular or molecular biology, as well as the "traditional" studies of metabolism, enzymology, and molecular structure.

The Biological Chemistry Department at UCLA attempts to provide students with the necessary background for continued growth in this fast-changing science. As a part of the School of Medicine, the department is involved in the basic education of students who will be practicing physicians, as well as medical research specialists. But through its graduate program and its interactions with other graduate departments, it deals with students whose primary interests are in biochemistry and other related sciences.

The department emphasizes biochemical research leading to the Ph.D. degree; the faculty represents a variety of research areas, and graduates find employment in a multiplicity of research or research-related fields, as well as in teaching. The department also offers limited opportunities for research or nonresearch study toward the M.S. degree.

Assistant Professors
William T. Wickner, M.D.

Adjunct Professors
Kathryn L. Calame, Ph.D.
James C. Pauison, Ph.D.
Requirements for Graduate Degrees

Admission
In addition to the University's minimum requirements, which include a bachelor's degree (preferably in chemistry or a biological science), students should normally have completed the following: general chemistry, quantitative chemistry, organic chemistry (with laboratory), general physics, mathematics through calculus, and general biology (or bacteriology, botany, zoology, biochemistry, or molecular biology). More advanced courses in these areas are also recommended where possible.

You are expected to take the Graduate Record Examination (GRE) General Test, preferably in October or before, but no later than December of the year prior to expected admission. It is strongly recommended that you also take the GRE Subject Test in either Biology or Chemistry. In exceptional circumstances, the GRE test requirements may be waived by the departmental graduate admissions committee. If your native language is other than English, you are expected to take an appropriate examination which tests proficiency in English (e.g., TOEFL) prior to the time of application to this department.

There is no separate application form required for admission to the department, but at least three letters of recommendation are required. Have them sent directly to the Graduate Information Office at the address below.

Departmental brochures and information may be obtained by writing to the Graduate Information Office, Department of Biological Chemistry, 33-257 CHS, UCLA, Los Angeles, CA 90024-1737.

Course Requirements
All graduate students must take the four core courses (Biological Chemistry M248, M253, M255, and M267) unless excused by the graduate adviser. (See additional course requirements under each degree program.)

Written Qualifying Examination
After completing the core course requirements (see above), you must take the departmental written examination (usually given in July). This examination is formulated by the departmental graduate student guidance committee from questions submitted by the various faculty members, who also evaluate your answers to the questions. The committee evaluates your overall performance on the examination and makes a recommendation to the departmental faculty of one of the following: (1) pass at the Ph.D. level of achievement; (2) pass at the master's level of achievement; (3) fail.

The departmental faculty can approve or change the recommended action and can authorize a reexamination in case of failure (consent is rarely given to take the test a third time).

The faculty may also recommend or require additional coursework in specific areas prior to taking the examination a second time, or before taking final action on the results of the written examination.

Master of Science Degree

Course Requirements
In addition to the core course requirements described above for all students, elective courses must be taken to complete the total of nine courses (36 units) required for the degree.

No more than two courses (eight units) in the 500 series may be applied toward the total course requirement, and only one (four units) of the two courses may be applied toward the minimum graduate course requirement (20 units) for the degree.

With consent of the graduate adviser, Biological Chemistry 596, 597, and 598 may be taken if they are appropriate to your program. Course 596 is graded on an S/U or letter basis; 597 and 598 are graded S/U only.

Comprehensive Examination Plan
In general, the department prefers students to enter directly into the Ph.D. program, but if you enter the master's program, the comprehensive examination plan is preferred. Only in exceptional situations is a student approved for the thesis plan. In either plan you must pass the departmental written examination at the master's level of achievement (see above). Only course requirements and the written examination are needed to complete the comprehensive examination plan.

Thesis Plan
In addition to coursework, a written thesis is required. A thesis committee helps you plan the thesis research, determines the acceptability of the thesis, administers a final examination (if deemed appropriate), and recommends appropriate action on the granting of the degree. In the event of an unacceptable thesis or performance on the final examination (if one is given), the thesis committee determines if it is appropriate for additional time to be granted to rewrite the thesis or to be reexamined.

Ph.D. Degree

Admission
Students are not required to obtain a master's degree prior to admission into the doctoral program and do not usually obtain a master's degree as part of the normal progress toward the Ph.D.

Course Requirements
In addition to the general course requirements listed above, students in the Ph.D. program are expected to complete:

(1) Biological Chemistry 220A-220B-220C (each term during the first year). You must arrange for at least two rotations in the laboratories of different faculty members to help in the selection of a research adviser.

(2) A total of six units of elective courses in addition to the core courses described above. One of the courses must be a scientific language/instrumentation course (e.g., computer language, statistics, electron microscopy). Elective courses may be selected from those offered by any department.

(3) Courses 596, 597, and/or 599 during terms in which research (596, 599) or study for written or oral examinations (597) is part of your program. Course 599 is for students who have passed their oral examinations; course 596 is for those who have not.

Teaching Experience
All students in the doctoral program are expected to participate in teaching activities by assisting the faculty in a laboratory for medical students (usually one day a week for one term during the second year) and by assisting in the grading of examinations (usually one to two times per term starting in the second year).

Qualifying Examinations
If you have passed the departmental written examination at the Ph.D. level of achievement (see above), you should consult with the department chair, who is responsible for nominating faculty members to serve on your doctoral committee.

The University Oral Qualifying Examination, which must be passed before you can be advanced to candidacy, consists of the presentation and defense of two short research proposals to the doctoral committee. One proposal should be unrelated to your dissertation research. The other proposal should discuss your proposed dissertation research. The doctoral committee determines whether you pass the examination and whether reexamination is allowed in case of failure. The examination may be repeated only once. It is expected that students will complete the University Oral Qualifying Examination by the beginning of the third year of graduate work.

Final Oral Examination
The doctoral committee may elect to waive the final oral examination.

Articulated Degree Program
Students may apply for the M.D./Ph.D. program by making simultaneous application for graduate standing in this department and for admission to the School of Medicine. Acceptance by both of the concerned units is necessary. Certain changes in the requirements (e.g., fewer required courses) allow some savings in time compared to separate M.D. and Ph.D. degrees.
Graduate Courses

201A-201B. Biological Chemistry (5 units each). (Formerly numbered 201, 202, 203.) Lecture, six hours. Prerequisites: organic chemistry; consent of instructor required for nonmedical students. Primarily for first-year medical students and runs throughout School of Medicine's second semester. General biochemistry with emphasis on mammalian systems. Structure, function, and metabolism of major cellular components. To receive credit, both courses must be taken together in same academic year. In Progress grading (W).

204. Biological Chemistry Laboratory (3 units). (Formerly numbered 101E.) Discussion, one hour; laboratory, six hours. Prerequisite: consent of instructor required for nonmedical students. Experiments illustrating techniques and procedures in specifically related biochemistry; analysis of experimental results. S/U or letter grading.

Mr. Edmond, Mr. Rome, and the Staff (Sp, eight weeks)

Mr. McEntee and the Staff (Sp)

220A-220B-220C. Research Laboratory Rotations (6 to 8 units each). Prerequisite: consent of instructor. Students arrange apprenticeships in laboratories of one or more departmental faculty members and engage in a research project under close faculty direction. Allows students to acquire in-depth laboratory experience in specific research areas and facilitates an informed decision on their part in selection of thesis/research adviser. S/U or letter grading.

Mr. Howard and the Staff (F, 220A; W, 220B; Sp, 220C)

M221A. Cellular and Molecular Neurochemistry. (Same as Anatomy M240, Neuroscience M240, Pharmacology M221A, and Psychiatry M221A.) Lecture, three hours. Prerequisites: biochemistry, basic neuroscience, consent of instructor. Introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, gliogenesis, plasticity and regeneration, and aging.

M221B. Cellular and Molecular Neurochemistry. (Same as Anatomy M241, Neuroscience M241, Pharmacology M221B, and Psychiatry M221B.) Lecture, three hours. Introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, gliogenesis, plasticity and regeneration, and aging.

M248. Molecular Genetics. (Same as Biology M248.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in biochemistry and molecular biology. Topics include mutagenesis, mutant selection, recombination, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.

Mr. McEntee and the Staff (Sp)

M253. Macromolecular Structure (6 units). (Same as Chemistry M253.) Lecture/discussion, five hours. Prerequisites: courses 201A-201B, or Chemistry 110A, 110B, 110C, 153A, 153B, 153C, and 156, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure cloning and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. (W)

M255. Biological Catalysis (2 units). (Same as Chemistry M255.) Prerequisites: Chemistry 110A and 153A, or equivalent, or consent of instructor. Reaction mechanisms in molecular biology: experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes.

Mr. Siggia (Sp)

M257. Physical Chemistry of Biological Macromolecules (2 units). (Same as Chemistry M257.) Prerequisites: Chemistry 110A and 153A, or consent of instructor. Theory of hydrodynamic, thermodynamic and biochemical principles used to study structure and function of biological macromolecules. (W)

M263. Metabolism and Its Regulation. (Same as Chemistry M263.) Lecture, three hours. Prerequisites: courses 201A-201B, or Chemistry 153B, 153C, or 156, and 110A, or equivalent, or consent of instructor. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics (2 units each). (Same as Chemistry M264A-M264B-M264C.) Prerequisite: consent of instructor. Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

Mr. Edwards (F, M264A; W, M264B; Sp, M264C)

M266A-M266B-M266C. Seminars in Molecular Embryology (2 units each). (Same as Biology M266A-M266B-M266C.) Prerequisite: consent of instructor. Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

Mr. De Robertis, Mr. Zipursky

M267. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Chemistry M267.) Lecture/discussion, five hours. Prerequisites: courses 201A-201B or Chemistry 153B and 153C, or equivalent, or consent of instructor. Recommended: course M253. Cell cycle DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development.

Mr. Herschman (W)

M296. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biology M296, Chemistry M296, Microbiology M296, Microbiology and Immunology M296, and Molecular Biology M296.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F, W, Sp)

596. Directed Individual Study and Research (2 to 12 units). Hours to be arranged. Prerequisite: consent of instructor and graduate adviser. S/U grading.

597. Preparation for Examinations (2 to 4 units). Prerequisite: consent of graduate adviser. Individual study for Ph.D. qualifying examinations or M.S. comprehensive examination. S/U grading.

Scope and Objectives

As biology advances rapidly in quantitative research methods, both the need for and possibility of closely associated theoretical research increases. On numerous medical and medical science frontiers — such as human genetics, oncology, pharmacology, neurosciences, and physiology — biomathematics is contributing both in its basic research and the development of specialized computer software to support investigation and health care. UCLA has one of the few departments in this relatively new, rapidly evolving field.

The Department of Biomathematics welcomes both undergraduate and graduate students in other majors to its courses in biomedical computing, modeling, and statistics. Premedical majors with mathematical/computer interests can receive early guidance toward an M.D./Ph.D. program in Biomathematics. The department is responsible for statistical and biomathematical training in the medical curriculum.
The department's orientation is away from abstract modeling and toward theoretical research vital to the advancement of current biomedical research frontiers. The doctoral program reflects this in requirements for advanced training in a biomedical research specialty and for the mathematical and computing skills required to contend realistically with complex phenomena encountered in biology and medicine. The art of biomathematical research is developed individually from the first year on. The master's program adapts to the various needs of researchers desiring supplemental biomathematical training, people preparing to provide methodological support to researchers in biology or medicine, or students pursuing a stepwise approach to graduate training in biomathematics.

Requirements for Graduate Degrees

Admission

High academic achievement in one scientific or mathematical field is required. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) should be taken. At least three letters of recommendation are required from faculty competent to evaluate your qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the Graduate Admissions Office application forms, you are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to the Chair, Graduate Admissions Committee, Department of Biomathematics, AV-617 CHS, UCLA, Los Angeles, CA 90024-1766.

You are admitted to either program after you have achieved admission to the Graduate Division and have been approved by the departmental graduate admissions committee.

Master of Science Degree

Course Requirements

In fulfilling the University's minimum requirement of nine courses, master's candidates must complete at least five graduate-level courses in biomathematics, three of which must be selected from Biomathematics 201, 202, 203, 204.

No more than two 596 courses may be applied toward the required nine courses, and none may be applied toward the graduate course requirement.

Thesis Plan

You generally are required to follow the comprehensive examination plan. Permission to undertake a thesis plan must be given by the departmental advisory committee, which must approve the thesis committee, as well as your plans for the thesis.

Comprehensive Examination Plan

A written comprehensive examination administered by a committee consisting of at least three faculty members appointed by the chair, with approval of the advisory committee, covers material presented in your coursework. This is usually the written comprehensive examination for the doctoral program given during the summer, but in exceptional cases a special committee and written examination are provided.

Ph.D. Degree

Major Fields or Subdisciplines

Each student completes the requirements for a field of special emphasis in biology. Presently approved fields of special emphasis for which courses of study have been developed include genetics, immunology, molecular biology, neurosciences, pharmacology, and physiology. Others may be added in response to students' requests.

Course Requirements

The following courses are required:

Biomathematics — 201, 202, 203, 204, and eight units from 205, 206, 207A or M207B (but not both), 209.

Mathematics — Five graduate courses with a grade-point average of 3.6 or better from an approved list, with two substitutions possible if especially appropriate to your research field. Consent may be given by the advising committee at the time of admission to the program to count prior graduate courses for full or partial completion of this requirement.

Biology — Courses required for the field of major biological emphasis.

Independent Research — Each student must take at least four units of Biomathematics 596 with a member of the Biomathematics Department each year prior to taking the written comprehensive examination. As you progress, there is increasing emphasis on research and encouragement to publish. Failure to advance in capacity for independent, creative research is a primary indication for recommended withdrawal from the program.

The following courses are recommended:

Mathematics — By individual study or coursework, you should have strength in differential equations, probability and statistics, and real and complex analysis. Offerings in the Department of Mathematics are especially recommended.

Statistics — Additional training in biostatistics is highly recommended (see offerings in the School of Public Health).

Computer Methods — You must be a facile programmer and acquainted with numerical methods needed for your area of research. The numerical analysis sequence in the Department of Mathematics and computing courses in biomathematics are suggested.

Biology and Biological Chemistry — A broad background is expected, from molecular to organ-system levels. This probably will be provided in requirements for the field of major biological emphasis; supplemental coursework will be advised, if needed.

Teaching Experience

One teaching preceptorship (Biomathematics 596) is required. You participate fully in the planning and delivery of one course in the Biomathematics Department. The emphasis is on your training in all aspects of preparing for and offering a course; this is not a service-oriented teaching assignment.

With consent of the advisory committee, a student who does not plan to pursue an academic teaching career may, for one term, participate at the level of one 596 course in the individual-instruction activities of a member of the department faculty (e.g., informal instruction of biomedical scientific collaborators, planning and guiding individual reading programs, developing and administering term projects in research).

Qualifying Examinations

In the summer, the department offers a written comprehensive examination to test your competence in biomathematics. Full-time students must take this by the end of two academic years of study and part-time students by the end of three.

The qualifying examination in the field of major biological emphasis usually is the regular comprehensive examination for doctoral students in that field and is taken prior to the examination that advances them to candidacy. Students entering with a Ph.D. in a biological field are exempt from the above requirements. Students with an M.D. are exempt from the required coursework; exemption from the examination may be granted by joint action of the curriculum and advisory committees in consultation with advisers from the specialty area.

The University Oral Qualifying Examination, administered by the doctoral committee appointed by the dean of the Graduate Division, critically probes the quality, scope, and feasibility of your proposed dissertation work. It explores the integration and strength of biomathematical, mathematical, and biological expertise in your intended area of research. You advance to candidacy after passing this examination.
Final Oral Examination
A final oral examination is required of all candidates and is a defense of the dissertation, administered by the doctoral committee.

Upper Division Courses

110. Elements of Biomathematics. Lecture, three hours; laboratory, three hours. Prerequisite: calculus. Analysis of deterministic models. Conditions under which deterministic and probabilistic descriptions of biological phenomena are appropriate. Both approaches are applied to selected examples in physiology and biology. Mr. Engel (F) 120A-120B. Computing and Informatics in Biology and Medicine (2 units each). Lecture, two hours; laboratory, one hour; self-instruction in computing, to be arranged. Prerequisite: consent of instructor. Biomedically oriented introduction (for students with heavy laboratory schedules) to basic computing concepts, use of widely available software on microcomputers and large computers, survey of biomedical applications/data bases, programming. P/NP or letter grades. Mr. McCoy, Ms. Newton (F: 120A; W: 120B) M153A-M153B. Introduction to Computational Statistics. (Formerly numbered M153.) (Same as Biostatistics M101D-M101E and Statistics M153A-M153B.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152A, or equivalent. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. M153A. SMOP, SAS and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. M153B. Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression. Mr. Jennrich (F: M153A; W: M153B) CM156. Human Genetics. (Same as Biology CM156.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. M153A. SMOP, SAS and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. M153B. Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression. Mr. Jennrich (F: M153A; W: M153B) Graduate Courses

200. Research Frontiers in Biomathematics (2 units). Prerequisite: consent of instructor. Series of presentations by faculty members on research frontiers in biomathematics. S/U grading. (F, even years) 201. Deterministic Models in Biology. Prerequisite: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental models, hyperbolic catastrophe control mechanisms, and cellular/animal population models. Ms. Newton (F) 202. Fourier Analysis in Biology. Prerequisite: knowledge of calculus, linear algebra, and probability. Introduction to theory of Fourier transforms and Fourier series from point of view of generalized function and applications to differential equations, spherical and cylindrical coordinates; development of potential distribution in spherical and cylindrical cells and synctia; computer simulation of potential barriers for ions traversing a membrane pore. Mr. Peskoff (Sp) 205. Electric Potential Problems in Membranes, Cells, and Tissues. Prerequisite: knowledge of differential equations and electrostatics, or consent of instructor. Review of electrostatics; potential problems in rectangular, polar, and cylindrical coordinates; modeling subthreshold electrical properties of cells; microelectrode measurements of intracellular potentials; boundary conditions for current flow across membranes; egenfunction expansions and singular perturbations as methods of computer in analysis of electrochemical phenomena and potential distribution in spherical and cylindrical cells and synctia; computer simulation of potential barriers for ions traversing a membrane pore. Mr. Peskoff (Sp) 206. Modeling of Cellular Systems (2 to 4 units). Students who can contribute to class either as biologists or theoreticians may attend. Expected performance is based on each individual's background. Study of recently reported characterizations of differentiating systems, flow cytometry, etc. Development of deterministic, stochastic, and computer simulation models from simple dividing systems through special cell populations. Biological assumptions, indications for various approaches, and relationships to laboratory research and clinical applications. Ms. Newton (F) 207A. Theoretical Genetic Modeling. Lecture, three hours; discussion, one hour. Prerequisite: upper division mathematics or human genetics or consent of instructor. Theoretical foundations underlying modern molecular, population and evolutionary genetics. Theoretical genetics and genetic epidemiology. Topics include use of likelihood methods, segregation analysis, ascertainment bias, linkage analysis, genetic heterogeneity, and population structure. Computer software in genetics. M207B: students may take either and are encouraged to take both. (F, odd years) M207B. Applied Genetic Modeling. (Formerly numbered M207.) (Same as Anthropology M222F.) Lecture, three hours; discussion, one hour. Prerequisites: Anthropology M222Q and graduate standing, or consent of instructor. Methods of computer-oriented genetic analysis. Topics include segregation and linkage analysis, polygenic (quantitative) methods, and population structure. Includes laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements 207A; students may take either and are encouraged to take both. Ms. Spence (F, even years) 209. Problems in Fluid and Electrolyte Management (2 units). Prerequisites: biochemistry, physiology, FORTTRAN equivalent. Principles of fluid and electrolyte balance and acid-base chemistry. Brief review of osmolality and osmotic pressure, mechanisms of physiologic control, with reference to research literature. Development and demonstration of principles for management of acute imbalance, using computer-based patient simulation. Depending on each student's interests, special topics in analysis of patient data, design of parental and dialysis fluids, mathematical principles, patient simulation using on-line patient data, or analysis of physiologic mechanisms. Mr. DeLand (F) 215. Interactive Graphics for Biomedical Research. (Formerly numbered 215A.) Prerequisite: facility with FORTRAN or consent of instructor. Training to develop interactive graphics software for biomedical research and medical applications. Lecture and computer graphics technology, software systems, examples of biomedical applications. Significant term project in students' areas of interest. S/U or letter grades. Ms. Newton (Sp) 220. Kinetic and Steady State Models in Pharmacology and Physiology. Recommend: knowledge of linear algebra, differential equations, and statistics. Designed for biologists and theoreticians. Modeling and data analysis in pharmacokinetics, enzyme kinetics, and membrane binding. Topics include compartmental and noncompartmental approaches, steady state analysis of transport and binding processes, and optimal experimental design. Mr. Landau (Sp)
M230. Computed Tomography: Theory and Applications. (Same as Radiological Sciences M230.) Prerequisite: consent of instructor. Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, characteristics of CT, physics in CT, and various biomedical applications. Mr. S-C. Huang (W)

M232. Statistical Analysis of Incomplete Data. (Same as Biostatistics M202F.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 101C, Statistics 152C, or equivalent, consent of instructor. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading. Mr. Little (Sp, odd years)

M234. Applied Bayesian Inference. (Same as Biostatistics M202F.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 200C, M205A, and Statistics 152C, or consent of instructor. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading. Mr. Little (Sp, even years)

CM256. Human Genetics. (Same as Biology CM256.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 153A/153AL. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Mr. Merriam (Sp)

M270. Optimal Experiment Design and Control for Biological and Other Dynamic Systems. (Same as Computer Science M296B and Medicine M270D.) Lecture, three hours; discussion, one hour. Prerequisites: Computer Science 272B and M296A, or consent of instructor. Theory and algorithms for designing experiments for quantifying or optimizing functions of inputs for controlling dynamic systems in engineering and life sciences. Optimal sampling schedules for parameter estimation. Control optimization and variations for designing optimal test inputs. Algorithms, software, and applications in medicine and engineering. Mr. Landaw (W)

M280. Statistical Computing. (Same as Biostatistics M207J and Mathematics M280.) Lecture, three hours. Prerequisites: Mathematics 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Mr. Jennrich (F)

M281. Survival Analysis. (Same as Biostatistics M201K.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 100C, Statistics 152C, or equivalent, consent of instructor. Statistical methods for analysis of survival data. Mr. Elashoff (F)

596. Directed Individual Study or Research in Biomatics (2 to 12 units). Individual study or research in topics not yet covered by offerings of department. May be repeated for credit with topic change. (F,W,Sp)

597. Preparation for M.S. or Ph.D. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of graduate adviser. Individual study. S/U grading. (F,W,Sp)

Medical

37-120 Center for the Health Sciences, (213) 825-6275

Chairs
Yay Liang W. Go, M.D., Executive Chair
Roy T. Young, M.D., Executive Vice Chair
Robert S. Sparkes, M.D., Vice Chair, Academic Affairs

Scope and Objectives
The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught informatic acquisition through history taking, physical examination, and laboratory evaluation; information synthesis through achieving a differential diagnosis and evaluative plan; and medical decision making for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician-patient relationship.

Instruction in the department is provided in the second, third, and fourth years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff. The department offers a broad range of advanced clinical clerkships in general and subspecialty, ambulatory and hospital-based internal medicine, at all the major affiliated centers.

For further details on the Department of Medicine and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Microbiology and Immunology

43-239 Center for the Health Sciences, (213) 825-5661

Professors
Benjamin Bonavida, Ph.D. (Immunology)
Asim Dasgupta, Ph.D. (Virology)
John L. Fahey, M.D. (Immunology)
Sydney M. Finegold, M.D., in Residence (Bacteriology)
Sidney H. Gulub, Ph.D. (Immunology)
Marcus A. Horwitz, M.D. (Bacteriology)
Dexter H. Howard, Ph.D. (Microbiology)
David T. Inagawa, Ph.D. (Virology)
James N. Miller, Ph.D. (Bacteriology; Distinguished Teaching Award)
Debi P. Nayak, B.V.Sc., Ph.D. (Virology)
Jack G. Stevens, D.V.M., Ph.D. (Virology, M. Philip Davis Professor of Microbiology and Immunology), Chair
Jerold A. Turner, Ph.D. (Parasitology)
Randolph Wall, Ph.D. (Immunology)
Felix Q. Wettstein, Ph.D. (Virology), Vice Chair
Telford H. Work, M.D., M.P.H., D.T.M.&H. (Virology)
Ruth A. Boak, M.D., Ph.D., Emerita
David McVickar, M.D., Ph.D., Emeritus
Margaret S. Sellers, Ph.D., Emerita (Distinguished Teaching Award)
Henry E. Weiner, Ph.D., Emeritus
Stephen Zamenhof, Ph.D., Emeritus

Associate Professors
Rafi Ahmed, Ph.D. (Virology)
Irvin S.Y. Chen, Ph.D. (Virology)
Lawrence T. Feldman, Ph.D. (Virology)
Michael Lovett, M.D., Ph.D. (Bacteriology)
Ronald H. Stevens, Ph.D. (Immunology)

Assistant Professors
David A. Campbell, Ph.D. (Parasitology)
Patricia J. Johnson, Ph.D. (Parasitology)
Mitchell Kronenberg, Ph.D. (Immunology)
Otoriel Martinez-Maza, Ph.D. (Immunology)
Jeffery F. Miller, Ph.D. (Bacteriology)
Virginia L. Scottfield, Ph.D. (Immunology)
Stephen T. Smale, Ph.D. (Immunology)

Lecturers
Margery L. Cook, Ph.D. (Virology)
Maurice L. White, Ph.D. (Bacteriology)

Adjunct Associate Professor
George C. Fareed, M.D. (Virology)

Scope and Objectives
The desire to explain natural phenomena, including disease, is the basis for most students' interest in biological sciences. The Microbiology and Immunology Department in the UCLA School of Medicine is disease oriented. The emphasis is on pathogenesis of infection, malignancy, and immunological response of the host to these changes of immunological dysfunction. All tools available from molecular biology to morphological methods are applied to these problems.
Microbiology and immunology are interwoven disciplines. Microbiology has played a central role in all aspects of biological sciences, including morphogenesis, genetics, developmental biology, physiology, biochemistry, and cell biology. An understanding of microbiology is thus fundamental to biological research. Immunology, once a branch of microbiology, is now a major biological discipline and a basic component of disease-oriented microbiology.

The graduate program in microbiology and immunology is closely associated with advanced (postdoctoral) training in research, clinical and public health diagnostic work, and industrial applications. Careers in microbiology and immunology include industrial appointments and clinical laboratory supervision in both government agencies and private enterprises and academic positions.

**Master of Science Degree**

The department does not accept students whose sole objective is a master's degree.

**Ph.D. Degree**

**Admission**

In addition to the University minimum requirements, the following items are required:

1. A bachelor's degree with a major in either the biological or physical sciences.
2. At least a B+ in chemistry, physics, and mathematics; at least a B average in biology (upper division and prior graduate study).
3. Three favorable letters of recommendation.
4. Graduate Record Examination (GRE) General Test and Subject Test in Biology.
5. Acceptable statement of purpose.
6. An interview with members of the department graduate student committee when indicated.

For departmental brochures and/or application forms, write to the Graduate Student Office, Department of Microbiology and Immunology, 43-204 CHS, UCLA, Los Angeles, CA 90024-1747.

**Major Fields or Subdisciplines**

You are expected to be competent in both microbiology and immunology. However, you must do your thesis work in one of the following divisions: immunology, medical microbiology, or virology.

**Foreign Language Requirement**

There is no foreign language requirement for the degree.

**Course Requirements**

1. Microbiology and Immunology CM185, 208, M226A, M226B are required and must be completed during your first year of study.
2. Course 596 is required. You complete at least two laboratory rotations during your first year of study.
3. Chemistry and Biochemistry M253 and two courses in molecular biology (Microbiology and Immunology 250, 264) are required.
4. Additional course requirements are determined by your major field and your preceptor.

**Teaching Experience**

Teaching experience is encouraged but not required.

**Qualifying Examinations**

The departmental written qualifying examination is to be taken at the end of your first year of graduate study. The examination consists of written tests in all three areas of study (immunology, microbiology, and virology). You select one area as your major and the other two as your minor areas. The examination in microbiology (major or minor) covers the fields of bacteriology, and either mycology or parasitology. The examinations require factual knowledge, the ability to analyze experimental work, and the capacity to design problem-solving experiments and are graded on a pass/fail basis. Each examination may be repeated once if not passed. The makeup examination is administered no earlier than three months and no later than six months after the failure, unless specified remedial work requires a longer period for proper preparation.

You must complete the University Oral Qualifying Examination within three years (nine terms) after entering the program. Advance- ment to candidacy is awarded after successful completion of this examination. If inadequacies are encountered, you may be required to repeat the examination.

The topic of your research proposal must be in a different area and use a different approach from that of your thesis project and research, but within the fields of interest in the department. You must be able to explain the research and results and demonstrate general knowledge of microbiology and immunology.

**Dissertation/Final Oral Examination**

The details of the dissertation requirement are supervised by your professor and doctoral committee. The dissertation must demonstrate an original and independent contribution to scientific knowledge acceptable for publication in a major scientific journal and be presented in the University-required format.

The final oral examination is optional with the doctoral committee. However, you are required to present a special seminar based on your dissertation.

**Upper Division Courses**

**CM185. Immunology.** (Formerly numbered M185.) (Same as Biology CM185 and Microbiology CM185.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 132B/132BL, 153A/153AL. Recommended corequisite: Chemistry 153C. Introduction to experimental immunobiology and immunohistochemistry; cellular and molecular aspects of humoral and cell immune reactions. Concurrently scheduled with course CM285.

Mr. Clark, Mr. Sercarz (F)

**M186. Experimental Design in Immunology.** (Same as Biology M186 and Microbiology M186.) Laboratory, 12 hours. Prerequisites: course CM185, consent of instructor. Corequisite: course M187. Emphasis on a limited number of situations designed to train students in organizing and evaluating immunological laboratory experiments.

Mr. Clark, Mr. Sercarz (W)

**M187. Immunology Seminar (2 units).** (Same as Biology M187 and Microbiology M187.) Prerequisites: course CM185, consent of instructor. Corequisite: course M186. Student presentation of selected papers from immunology literature. Designed to serve as forum for critical analysis of research papers.

Mr. Clark, Mr. Sercarz (W)

**199. Directed Individual Research Studies in Microbiology and Immunology (2 to 8 units).** Prerequisite: senior standing, consent of instructor (based on written research proposal). Individual research projects carried out under direction of a professor.

(F,W,Sp)

**Graduate Courses**

Undergraduates may enroll in some graduate courses with consent of instructor.

201. Microbiology and Immunology (8 units). Lecture/laboratory. Limited to medical students. Study of infectious agents of human disease, with emphasis on host-parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites, and viruses, and principles of prevention, treatment, and laboratory diagnosis.

(F)

**202A. Fundamentals of Immunology (2 units).** Prerequisite: consent of instructor. Introduction to experimental immunobiology and immunohistochemistry; cellular and molecular aspects of humoral and cell-mediated immune functions.

(F)

**202B. Medical Bacteriology (2 units).** Prerequisite: consent of instructor. Characteristics of bacterial rickettsiae and chlamydiae associated with diseases of humans; host-parasite interactions and immunity; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics as it pertains to pathogenicity.

(F)

**202C. Medical Virology (2 units).** Prerequisite: consent of instructor. Biological properties of animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts, introduction to tumor viruses.

(F)

**202D. Medical Mycology and Parasitology (2 units).** Prerequisite: consent of instructor. Morphology, physiology, and pathogenicity of fungi which cause human and animal diseases. Study of morphology, biology, host-parasite relationship, public health problems, and control of protozoa, helminths, and arthropods parasitic in and on humans and animals.

(F)
208. Molecular Biology of Animal Viruses. Lecture, three hours. Prerequisites: courses in general biochemistry and general microbiology, virology (consent of instructor may be obtained in special cases). Students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus-cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanisms involved in control and regulation of replication, transcription, and translation of viral genome and its complex interactions with the host cell. Mr. Miller and the Staff (W).

210. Medical Mycology (3 units). Lecture, four hours. Prerequisite: consent of instructor. Study of morphology, physiology, and pathogenicity of fungi causing human and animal diseases. Mr. Howard (Sp).

215. Interdepartmental Course in Tropical Medicine (2 units). (Same as Medicine M215, Pathology M215, and Pediatrics M215.) Lecture, two and one-half hours. Prerequisites: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. Mr. Turner (Sp, alternate years).

223. Membrane Research Seminar (2 units). (Same as Microbiology M223.) Prerequisite: consent of instructor. Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

226A. Principles of Microbial Pathogenesis. (Same as Biology M226A and Microbiology M226A.) Lecture, one hour; discussion, three hours. Prerequisites: courses 202A, 202B, 202C, and 202D, or equivalent. Consent of instructor. Lecture/discussion format designed to analyze basic pathogenesis of bacterial and mycotic infections. Emphasis on molecular and cellular approaches to understanding host-microbial interaction. Mr. Miller and the Staff (W).

226B. Principles of Microbial Pathogenesis. (Same as Biology M226B and Microbiology M226B.) Lecture, one hour; discussion, three hours. Prerequisites: courses 202A, 202B, 202C, and 202D, or equivalent. Consent of instructor. Lecture/discussion format designed to analyze basic pathogenesis of parasitic and viral infections. Emphasis on molecular and cellular approaches to understanding host-microbial interaction. Mr. Ahmed and the Staff (Sp).

250. Cell and Molecular Biology. Lectures and student seminar presentations. Review of selected current topics in molecular and cellular biology. Topics include recent experimental results on organization, expression, and regulation of genes in eukaryotic cells. S/U or letter grading. Mr. Feldman (W).

251. Selected Topics on History of Microbiology (2 units). Lecture, one hour; discussion, one hour. Consideration of history of infectious diseases, their host-parasite relationships, ecology, pathogenesis, epidemiology, diagnosis, and immunity. Systems and subjects may change each quarter. S/U grading. Mr. Howard (W).

255. Seminar in Viral Oncology (2 units). (Same as Pathology M255.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, onco genes, development, and cellular regulation. Mr. Baluda.

256A. Molecular Genetic Mechanisms of Immune Response (2 units). (Same as Biology M256A and Microbiology M256A.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185 or 202A or consent of instructor. Reading and discussion of current research articles on immune system and the molecular basis of immunity. Mr. Braun, Mr. Stevens (W, five weeks).

258B. Biology of Cells: Development, Repertoire, and Activation (2 units). (Same as Biology M258B and Microbiology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Reading and discussion of current research articles on development, repertoire, and growth and differentiation of immune cells. Mr. Braun, Mr. Schenfield (Sp, five weeks).

258C. T Cells and the MHC (2 units). (Same as Biology M258C and Microbiology M258C.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Reading and discussion of current research articles on structure of human and murine MHC chromosomes and genes, T cell recognition of mite products and foreign antigens; MHC polymorphism, MHC-like systems, MHC-linked antigens, MHC diseases, and nonimmune function of MHC. S/U or letter grading.

258D. Molecular Interactions in Immune Responses (2 units). (Formerly numbered 258DF.) (Same as Biology M258D and Microbiology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185 or 202A or consent of instructor. Reading and discussion of current research articles on immune responses and the molecular basis of immunity. Mr. Macher, Mr. Schenfield (Sp, five weeks).

260. Immunology of Cancer (2 units). (Formerly numbered 262.) (Same as Biology M260A and Microbiology M260A.) Prerequisite: consent of instructor. Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of papers on scientific meetings. May be repeated for credit. S/U grading. Mr. Bonavida (F, W, Sp).

262B. Immunology of AIDS (2 units). (Same as Biology M293B, Epidemiology M214, and Microbiology M262B.) Lecture, one hour; discussion, one hour. Prerequisites: consent of instructor. Reading and discussion of current research articles on HIV and AIDS. Mr. Braun (W).

262C. Biological Individuality and Immunity (2 units). (Formerly numbered 254.) (Same as Biology M293C and Microbiology M262C.) Prerequisite: consent of instructor. Reading and discussion of current literature in the field of immunogenetics, with emphasis on fundamental studies involving genetic and immunologic principles and mechanisms. Mr. Kronenberg, Mr. Sercarz (F, W, Sp).

264. Molecular Microbiology and Cell Biology (2 units). Prerequisite: consent of instructor. Discussion of selected current topics related to microbial and cell biology, with special emphasis on understanding of basic phenomena at the molecular level. S/U grading. Mr. Feldman (F).

270. Immunology in Disease (2 units). Lecture, one hour; discussion, one hour. Prerequisite: basic immunology. Introduction to role of immune processes in disease for students with prior knowledge of basic immunology. Topics include immunodeficiency, immune deficiencies, intermediate hypersensitivity reactions, autoimmune disease, and immune complex-mediated diseases, together with transplantation immunology, tumor immunology, and animal studies linking stress to immune changes. Student is expected to prepare a 20- to 30-minute presentation on a selected topic. Mr. Feinberg (W, alternate years).

274. Interactions of Immune System and Nervous System (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Overview of interactions between the immune system and nervous system. Review of research on CNS effects on immune function and vice versa, as well as human and animal studies linking stress to immune changes. Mr. Feinberg, Mr. Kenney (F, alternate years).

275. Biology of HIV (2 units). Lecture, one hour; seminar, one hour. Prerequisites: consent of instructor. Overview of virologic and immunologic aspects of HIV disease for epidemiologists or other health scientists. Brief discussion of clinical manifestations and biosafety in the laboratory. S/U or letter grading. Mr. Giorgi (Sp).
CM285. Immunology. (Same as Biology CM285 and Microbiology CM285.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 8, Chemistry 132/132BL, 153A/153AL. Recommended corequisite: Chemistry 153C. Introduction to experimental immunobiology and immunohemistry; cellular and molecular aspects of humoral and cell immune reactions. Concurrently scheduled with course CM185.

Mr. Clark, Mr. Sercarz (F)

M293. Major Concepts In Oncology. (Same as Oral Biology M293 and Pathology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncolgy. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control, physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading. Mr. Hankinson (W)

M296. Seminar on Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M296, Biology M296, Chemistry M296, Microbiology M296, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

(F,W,Sp)

596. Directed Individual Study or Research (2 to 8 units). Laboratory, to be arranged. Prerequisite: consent of graduate adviser. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 6 units).

599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units). Research on an original problem in the field of microbiology and immunology to be selected by graduate student with advice of adviser. Fields of study may be in bacteriology, immunology, mycology, parasitology, virology, tumor biology, or cell biology.

Molecular Biology (Interdepartmental)

The Ph.D. degree program in Molecular Biology draws its staff members from participating departments in the health and life sciences and from the Molecular Biology Institute. For details on this interdisciplinary program, see Chapter 5 on the College of Letters and Science.

Judith L. Smith, Ph.D. (Kinesiology)
Allan J. Tobin, Ph.D. (Psychology)
John H. Walsh, M.D. (Medicine)
Claude G. Wassel, M.D., in Residence (Neurology)
Charles D. Woody, M.D., in Residence (Psychiatry and Biobehavioral Sciences)
Eran Zaidel, Ph.D. (Psychology)
Benaic M. Wenzel, M.D., Ementa (Physiology)

Associate Professors

Rafi Ahmed, Ph.D. (Microbiology and Immunology)
Nicholas C. Brecha, Ph.D., in Residence (Anatomy and Cell Biology)
Scott H. Chandler, Ph.D. (Kinesiology)
Harry T. Chugani, M.D., in Residence (Neurology)
Eric Halper, Ph.D., in Residence (Psychiatry and Biobehavioral Sciences)
Michael S. Lutfy, Ph.D. (Psychology)
Wendy B. Macklin, Ph.D., in Residence (Psychiatry and Biobehavioral Sciences)
Jean E. Merrill, Ph.D. (Neurology)
Pau E. Micewych, Ph.D. (Anatomy and Cell Biology)
Michael J. Raleigh, Ph.D., in Residence (Psychiatry and Biobehavioral Sciences)
Jerome M. Siegel, Ph.D., in Residence (Psychiatry and Biobehavioral Sciences)
Arthur W. Toga, Ph.D. (Neurology)
S. Larry Zipursky, Ph.D. (Biological Chemistry)

Assistant Professors

Keith L. Black, M.D., in Residence (Surgery)
Stephen T. Crews, Ph.D. (Biology)
Carolyn R. Houser, Ph.D., in Residence (Anatomy and Cell Biology)
José R. Mancillas, Ph.D. (Anatomy and Cell Biology)

Adjunct Professor

James F. McGinnis, Ph.D. (Anatomy and Cell Biology)

Assistant Clinical Professor

Michael S. Levine, M.D. (Medicine)

Associate Researcher

Dennis J. McGinty, Ph.D. (Anatomy and Cell Biology)

Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

For further details on the Department of Neurology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Neuroscience (Interdepartmental)

Louis J. Goldberg, D.D.S., Ph.D. (Oral Biology)
Ronald M. Harper, Ph.D. (Anatomy and Cell Biology)

Scope and Objectives

The goal of the interdepartmental program is to educate students for careers in neuroscience research and teaching. Students completing this program should be able to address both traditional and novel problems in neuroscience, armed with contemporary concepts and techniques. The program recognizes that neuroscience studies the structure and organiza-
tion of nervous systems; intercellular and intra-
cellular communication, including the cellular and 
molecular basis of neurotransmitter pro-
duction and reception; development, including 
the molecular and cellular basis of trophic in-
teractions; behavior; cognition; and the neuro-
biological and molecular bases of neurological 
and neuropsychiatric disorders.

Ph.D. Degree

Admission

All applicants must satisfy the University mini-
mum requirements. In addition, Graduate Rec-
ord Examination (GRE) scores are required. 
Recommended preparation includes mathe-
matics through calculus and courses in gener-
al chemistry, organic chemistry, biochemistry, 
physic, basic biology, and physiology. Three 
letters of recommendation are required.

Information regarding the program may be 
obtained by writing to the Neuroscience Office, 
73-346 CHS, UCLA, Los Angeles, CA 90024-
1761.

Major Fields or Subdisciplines

Molecular neuroscience, cellular neuroscience, 
systems neuroscience, behavioral neurosci-
ence, clinical neuroscience.

Course Requirements

Basic course requirements include Neurosci-
ence M201, M202, M203, M204, M205, 210A-
210B-210C, 211A-211B-211C, one biostatistics 
course, and three additional advanced neuro-
science courses. Each first-year student must 
also obtain research experience in the laborato-
ries of at least two Neuroscience faculty mem-
bers.

Teaching Experience

Teaching experience is required for the degree 
and is available through teaching assistant-
ships or other means.

Qualifying Examinations

A written qualifying examination is required fol-
lowing completion of the core requirements. 
The objective of this examination is to test your 
basic knowledge and ability to relate knowl-
edge in different neuroscience areas. After 
passing the written qualifying examination, 
you and your adviser select your doctoral com-
mittee to administer the University Oral Qual-
ifying Examination.

When you have passed the oral examination, 
you are advanced to candidacy and may begin 
work on the dissertation.

Final Oral Examination

The final oral examination is required.

Graduate Courses

M201. Neuroanatomy, Structure of Nervous Sys-
tem (Same as Anatomy M202). Lecture, three 
hours; laboratory, one hour. Prerequisites: Biology 166 or 
171 or equivalent, consent of instructor. Anatomy of 
central and peripheral nervous system at the central 
and histological and regional system level. Emphasis on 
contemporary experimental approaches to morpho-
 logical study of nervous system in discussions of cir-
cuity and neurochemical anatomy of major brain re-
 gions. Consideration of representative vertebrate and 
primate systems. Mr. Sanes.

M202. Cellular Neurophysiology. (Formerly num-
bered M202.) Lecture, three hours; discussion, one 
hour. Prerequisites: Physics 3B or equivalent, Biology 
166 or 171 or equivalent. Advanced course in cellular 
physiology of neurons. Action and membrane poten-
tials, channels and channel blockers, gates, ion 
pumps and neuronal homeostasis, synaptic recep-
tors, drug-receptor interactions, transmitter release, 
modulation by second messengers, and signal trans-
duction. Mr. Fain, Mr. Gunderson, Mr. Weiss.

M203. Neurochemistry. (Same as Psychiatry M203.) 
Lecture, three hours; discussion, one hour. 
Prerequisites: Biological Chemistry 201A-201B or 
equivalent, basic biochemistry, consent of instructor. 
Introduction to neurochemistry for neuroscience stu-
dents. Topics include protein structure and function, 
lipid structure and metabolism, nucleic acids/molec-
ular biology. Mr. Campagnoni, Mr. Olsen.

M204. Cellular and Molecular Developmental 
Neurobiology (Same as Anatomy M204, Biology 280, 
Physiology M204, and Psychiatry M204.) 
Lecture, three hours; discussion, one hour. 
Prerequisites: courses M201, M202, and M203, or Biological Chem-
istry 210A-210B, consent of instructor. Study of 
processes of development and molecular processes that regulate development 
of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neu-ogenesis, generation of neuronal diversity, cell sur-
face interactions and growth factors, neurons and 
glial proliferation and migration, axonal outgrowth 
and guidance, synaptogenesis, trophic interaction, 
plasticity, regeneration, and aging. Mr. de Vellis, Mr. Grinnell, Ms. Macklin, Mr. Zupursky.

(Same as Psychology M209.) Lecture, three hours. 
Prerequisites: courses M201, M202, M203, and 
M204, or consent of instructor. Introduction to funda-
mentals of behavioral and systems neuroscience, 
with emphasis on role of behavioral analysis in under-
standing the functioning of nervous system and iden-
tifying anatomical circuits, cell physiological pro-
cesses, and molecular mechanisms that mediate be-
evaviorally defined functions. Mr. Gallistel.

M210A-210B-210C. Introduction to Current Litera-
ture in Neuroscience (2 units each). Critical discus-
sion of current research literature related to topics of 
the above core courses in neuroscience graduate cur-
riculum. S/U grading. Mr. Sanes.

M210A. Corequisites: courses M201, M202, M203. 
M210B. Corequisite: course M204. 
M210C. Corequisite: course M205.

M211A-211B-211C. Evaluation of Research Litera-
ture in Neuroscience (2 units each). Prerequisites: 
courses M201, M202, M203, M204, and M205, 
or consent of instructor. Advanced critical analysis 
of current research in neuroscience. S/U grading.

M215. Seminar in Neuroscience (2 units). (Formerly 
numbered 233.) Topics of current importance pres-
ented for discussion. S/U grading.

M240. Cellular and Molecular Neurochemistry. (For-
merly numbered M221A.) (Same as Anatomy M240, 
Biological Chemistry M221A, Pharmacology M221A, 
and Psychiatry M221A.) Lecture, three hours. Prerequi-
sites: biochemistry, basic neurochemistry, consent of 
instructor. Introduction to developmental neurobiology, 
with emphasis on cellular and molecular mechanisms. 
Topics include neurogenesis, cell lineages, generation 
of neuronal diversity, neural growth factors, cell prolif-
eration, migration, synaptogenesis, trophic interac-
tions, gliogenesis, plasticity and regeneration, and aging. Mr. de Vellis.

M241. Cellular and Molecular Neurochemistry. (For-
merly numbered M221B.) (Same as Anatomy M241, 
Biological Chemistry M221B, Pharmacology M221B, 
and Psychiatry M221B.) Lecture, three hours. Introduc-
tion to developmental neurobiology, with emphasis on 
cellular and molecular mechanisms. Topics include 
neurogenesis, cell lineages, generation of neuronal di-
versity, neural growth factors, cell proliferation, migra-
tion, synaptogenesis, trophic interactions, gliogenesis, 
plasticity and regeneration, and aging. Mr. Tsai.

M246. Neuroactive Peptides: Molecular Biology to 
Function (2 units). (Formerly numbered M235.) 
(Same as Anatomy M246, Medicine M235, and 
Physiology M235.) Prerequisite: consent of instructor. 
Presentation of concepts of structure, function, and 
tissues by surveying their chemistry, anatomy, and phys-
iology. Experimental approaches used to study bio-
logically active peptides. Review of current information 
about each of the major gut and brain peptides. S/U or 
letter grading. Mr. Brecha, Ms. Sterni.

M247. Neural Control of Cardiopulmonary Func-
tion. (Same as Kinesiology M247.) Lecture, two 
hours; discussion, two hours. Prerequisite: Kinesiol-
ogy 124 or 126 or equivalent. Cardiorespiratory te-
mostasis is accomplished via central nervous sys-
tem (CNS) control of respiratory and circulatory 
pumping systems. Focus on CNS mechanisms un-
derlying (1) generation of respiratory rhythm, sympa-
thetic discharge, baroreflex, and chemoreflex; (2) patterns of motor outflow, and (3) responses to 
changes in behavioral state or afferent signals. Em-
phasis on critical reading of literature. Mr. Feldman.

M254. Interdisciplinary Research Seminar (2 units). 
Lectures and discussions on many different discipli-
ary approaches to knowledge of brain function in or-
der to broaden experience of students studying in fields 
other than that of lecturer; new information and depth from students in fields closely related to subject 
discussed. Mr. Gjedde.

M255. Functional Organization of Behavior (2 
units). (Formerly numbered M201A-M201B-M201C) 
(Same as Psychiatry M255.) Prerequisite: consent of 
instructor. Development of behaviors within different 
species and functional uses of behaviors; use of an 
evolutionary biological perspective as the framework. 
Research studies take into account the functional be-
avior of animals. S/U or letter grading. Mr. McGuire, Mr. Woody

M257. Structure and Function of Limbic System (2 
units). (Formerly numbered M204.) Prerequisite: con-
sent of instructor. Current knowledge of mammalian 
limbic system presented by surveying studies of develop-
damental anatomy, intrinsic synaptic organiza-
tion, synaptic chifacters, and their functions in 
memory and cognition association with limbic system function. S/U or letter grading. Mr. Bab.

M258. Functional Neuropsychology (2 units). 
(Formerly numbered M216.) (Same as Psychiatry 
M258.) Lecture, two hours; discussion, one hour. Pre-
requisites: graduate standing, consent of instructor. 
Interdisciplinary course integrating current research 
publications in neuroanatomy, molecular neurobi-
ology, synaptic neurophysiology, event-related poten-
tials, neuropsychology of amnesia, and cognitive psychology of normal memory into a realistic model. 
S/U or letter grading. Mr. Halgren
Obstetrics and Gynecology

27-117A Center for the Health Sciences, (213) 206-2056

Chair
Roy M. Pitkin, M.D.

Vice Chairs
Charles R. Brinkman III, M.D. (Harbor-UCLA)
Ezra C. Davidson, M.D., in Residence (King/Drew)
William J. Dignam, M.D. (UCLA Medical Center)
George Mikhail, M.D., in Residence (Olive View)

Scope and Objectives

The undergraduate program in obstetrics and gynecology is designed to teach students the physiology of women in infancy, childhood, and adolescence, an understanding of reproductive endocrinology during the menopausal years, experience in the management of obstetric deliveries, and an understanding of the changes in the postmenopausal years. The program includes experience in the management of normal and pathological obstetrical conditions, the anatomical and physiological variations following childbirth, and gynecological abnormalities not necessarily related to reproduction.

Students work on the wards and in the outpatient clinics during the third year, with clinical experience continuing during the fourth year in the advanced clinical clerkship.

Subspecialty units provide instruction in perinatal medicine, general gynecology, gynecologic oncology, reproductive endocrinology, and family planning and sex counseling.

For further details on the Department of Obstetrics and Gynecology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Pathology and Laboratory Medicine

1P-109D Center for the Health Sciences, (213) 825-5719

Professors
Marcel A. Baluda, Ph.D.
Judith A. Berliner, Ph.D., in Residence
Pasquale A. Cancilla, M.D., Chair
Alistair J. Cochran, M.D., in Residence
Faramarz Naeim, M.D., in Residence
Donald E. Paglia, M.D.
Lawrence D. Petz, M.D., in Residence
David D. Porter, M.D.
Dennis O. Roddigeon, Ph.D., in Residence
Dorothy L. Rosenthal, M.D., in Residence
George S. Smith, M.D.
Julien L. Van Lancker, M.D.
M. Anthony Verity, M.D.
Roy L. Walford, M.D.

Associate Professors
Oliver Hankinson, Ph.D., in Residence
William Lewis, M.D.

Assistant Professors
Sanford H. Barsky, M.D.
Linda G. Baum, M.D., Ph.D.
Jonathan Braun, M.D., Ph.D.
Thomas A. Drake, M.D., in Residence
Wayne W. Grody, M.D., Ph.D., in Residence
Lee H. Hibberson, M.D.
S. David Hudnall, M.D., in Residence
Nir Kossovsky, M.D.
Scope and Objectives
Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in prevention, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years. Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope. A combined education in breadth and depth is indispensable; it is this education, as it is applied to injuries and reaction to injuries, that is the goal of the Ph.D. program in Experimental Pathology.

Master of Science Degree
Students are generally accepted into the program for the purpose of obtaining a Ph.D. in Experimental Pathology. However, the department also awards an M.S. degree in Experimental Pathology in cases where a student is unable to finish the full Ph.D. program but whose completed work is adequate to the standards and minimum requirements set for a master's degree.

The general requirements for the M.S. degree are the same as those for the Ph.D., with the following exceptions:

1. Only 10 units of the listed electives are required in addition to the core courses.
2. You are also expected to enroll in a minimum of eight units of Pathology and Laboratory Medicine 599 each term, starting in your third year. These may not be applied toward the minimum course requirement for the degree.
3. You must pass the written qualifying examination at the master's level. A thesis is also required, which encompasses individual research.

Ph.D. in Experimental Pathology
Admission
In addition to the University minimum requirements, Graduate Record Examination (GRE) General Test scores and three letters of recommendation are required. There is no application form in addition to the one used by the Graduate Division. Because of the sequencing of classes, applicants are generally considered for admission to Fall Quarter only. For departmental brochures, write to the Chair, Department of Pathology and Laboratory Medicine, 1P-109D CHS, UCLA, Los Angeles, CA 90024-1732.

Students intending to take advanced degrees in the Department of Pathology and Laboratory Medicine must have a bachelor's degree in physical or biological sciences or in the premedical curriculum. M.D.s are also encouraged to apply. Minimum course requirements for admission normally include one year of calculus, physics, general chemistry, organic chemistry, and biological sciences. One course each in molecular biology, immunology, and histology is recommended and is required before taking the written qualifying examination. In some cases, deficiencies in the prerequisites may be fulfilled in the first year of study.

Course Requirements
Required: Pathology and Laboratory Medicine 231A, 242A-242B, 244, 250A-250B-250C, 251, M293, and Biomathematics 170A. Three laboratory rotations must be taken to intelligently select a thesis adviser. In addition, if you are beginning the program with a bachelor's degree, you must select 20 units from remaining pathology courses and related biomedical areas of interest at the upper division or graduate level. Within these electives, you must take courses to obtain basic knowledge of biochemistry and molecular biology. If you are entering the program with a master's degree or M.D., you may have fewer elective units to complete for the Ph.D.

Teaching Experience
You may assist for one or two terms in medical or dental pathology courses to gain teaching experience.

Qualifying Examinations
After the core course requirements are completed (usually at the end of the second year), a comprehensive written qualifying examination covering core courses and required basic knowledge is administered. If examiners feel that some questions should be elaborated on orally, you must do this within three months of the written examination. If failed, the examination may be repeated.

Six months to one year after completion of the written examination, the University Oral Qualifying Examination is administered by the doctoral committee. This examination normally includes discussion of the subject matter of your proposed dissertation topic. You are expected to have done preliminary work before the examination and to demonstrate wide and comprehensive knowledge of your special subject. After passing, you are advanced to candidacy.

Final Oral Examination
All candidates are required to defend their dissertation at an oral examination open to the public. The purpose of the dissertation is to demonstrate ability for independent investigation and proficiency in the field.

Upper Division Course
199. Special Studies (2 units). Supervised laboratory research, 10 hours. Prerequisite: consent of instructor. Fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems. Mr. Foos and the Staff

231A. Pathological Anatomy and Physiology (8 units). Lecture, two hours; discussion, six hours; laboratory, four hours; three six-hour courses to be given. Prerequisites: graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. Mr. Paglia and the Staff (P)

231B-231C. Pathophysiology of Disease (6 units each). Prerequisites: course 200A, graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. In Progress grading.

Mr. Cochran and the Staff (WsP)

232. Topics in Vertebrate Neurobiology (2 units). Introduction to cell biology of vertebrate central nervous system, with special reference to its development, structure, and potential disease processes.
242A-242B. Molecular Mechanisms in Disease (2 units each). Prerequisites: course 231A, consent of instructor. Course 242A and consent of instructor are prerequisite to 242B. Description of molecular events resulting from administration of injurious chemical and physical agents (u.v., X-rays, carcinogens, toxins, etc.) and from reactions to injuries (e.g., necrosis, degeneration, hyperplasia, neoplasia, inflammation, etc.) and interpretation of structural and functional disturbances in terms of molecular alterations.

Mr. Van Lancker and the Staff

244. Environmental Pathology. Prerequisite: Anatomy 209 or equivalent. Discussion of structure function relationships in cells and extracellular matrix. Emphasis on ultrastructural changes in disease and theories of how these changes are mediated.

Ms. Berliner, Ms. Frank

245. Environmental Pathology. Prerequisites: graduate standing, consent of instructor. Designed to explore interrelationships of man with his total environment. Presentation of series of special topics to discuss effect on man of changes in compositions of air, water, soil, and other materials. S/U grading.

250A-250B-250C. Pathology Graduate and Student Seminars (2 units each). Limited to and required of all students in experimental pathology. Review and discussion of current literature and research in special topics of experimental pathology.

251. Pathology Graduate Student Laboratory Seminar (2 units). Prerequisite: consent of instructor. Consists of 10 two-hour seminars, conducted by Pathology and Laboratory Medicine Department staff and guest lecturers, which may include demonstrations of apparatus and methods dealing with new and advanced experimental techniques of value in experimental pathology. Subjects include biochemistry, biological and morphological techniques in tissue fractionation, tissue culture, and radioautography (electron microscopy, etc.) that are frequently used in study of disease mechanisms.

Mr. Hankinson, Mr. Rodgerson

254. Seminar in Experimental Neuropathology (1 unit). Prerequisite: consent of instructor. Weekly seminar series presented by experts working at forefront of research on diseases of nervous system. New experimental approaches and laboratory model systems for studying diseases such as Alzheimer’s and Huntington’s diseases, epilepsy, neuroblastoma, and multiple sclerosis. S/U grading.

Mr. Sidell, Mr. Verity

255. Mapping the Human Genome (2 units). Prerequisite: consent of instructor. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of disease genes. S/U or letter grading.

Mr. Gatti

256. Seminar in Viral Oncology (2 units). (Same as Microbiology and Immunology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

Mr. Baluda

257. Introduction to Toxicology. (Same as Pharmacology M257.) Prerequisite: Pharmacology 241 or consent of instructor. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

Mr. Baluda

258. Pathologic Changes in Toxicology. (Same as Pharmacology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

Ms. Berliner (F,W)

262. Biology of Aging (2 units). Lecture, one hour; discussion, one hour. Prerequisite: graduate standing. Introduction to biology of aging, with emphasis on mammalian and cellular aging — survival curves, biochemical, immunological, immunogenetic, and neuroendocrine alterations over the life cycle, accelerated aging, life-extension strategies; major theories of aging. S/U or letter grading.

Ms. Effros, Mr. Walford

M293. Major Concepts in Oncology. (Same as Microbiology and Immunology M293 and Oral Biology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

Mr. Hankinson, Mr. Seeger (W)

596. Directed Individual Study or Research (4 to 12 units). Individual research with members of the staff or of other departments, the latter for purpose of supplementing programs available in department. S/U grading.

Pediatrics

22-373 Davies Children’s Center, (213) 825-4128

Executive Chair
William F. Friedman, M.D. (James H. Nicholson Professor of Pediatric Cardiology)

Executive Vice Chair
Solomon A. Kaplan, M.D.

Chairs
Carol D. Berkowitz, M.D., Acting (Harbor-UCLA: Distinguished Teaching Award)
S. Douglas Fraser, M.D. (Olive View)
David L. Rimmoh, M.D., Ph.D. (Cedars-Sinai)
Robert J. Schlegel, M.D. (King/Drew)

Scope and Objectives
The Department of Pediatrics encompasses four teaching hospitals: UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The UCLA Medical Center integrates its clinical program and teaching activities with the Olive View Medical Center. The clinical fundamentals course offers medical students detailed instruction in the techniques of the clinical examination of pediatric patients. The required six-week clinical clerkship in pediatrics is given at one of the four medical centers. In-depth electives in the Department of Pediatrics are listed in the School of Medicine Handbook of Clinical Courses, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.
Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

Master of Science Degree

The Pharmacology Department offers the Ph.D. degree, and students may obtain the M.S. degree; however, the department normally does not admit candidates for the M.S. degree only.

Ph.D. Degree

Admission

In addition to meeting University requirements for graduate admission, you must have received a bachelor's degree in a biological or physical science or in the premedical curriculum. Graduate Record Examination (GRE) scores, Test of English as a Foreign Language (TOEFL) scores for international students, and three letters of recommendation are also required.

In suitable cases, students who have course deficiencies may be admitted to graduate standing, but any deficiencies must be removed within a specified time. The following courses must be taken at UCLA only if mastery of the subject matter has not been demonstrated at the time of admission by completion of an equivalent course within the previous summer. This would provide an uninterrupted period of over two months to work on a research project.

As part of course 200 you must submit a report of your activities in the various research groups by the end of the term. The report should include the nature of the project, how you participated, the results obtained, and a critical evaluation of the project.

Teaching Experience

Seminar presentations are required of all students in the graduate program.

Qualifying Examinations

Examinations are given in all courses except seminars and research. These are in the form of written examinations, oral examinations, term papers, and/or laboratory practicals.

After completing the first two years of study, you are required to take a departmental comprehensive examination consisting of a written part and an oral part. You are then recommended for continuation toward the Ph.D. degree, for further remedial study, or for termination. Questions are intended to test for a rational, analytical approach to problem solving and for ability to integrate material learned in different courses. You are expected to know basic principles of pharmacology and the status of topics of current interest in pharmacology.

After passing the departmental comprehensive examination, you must take the University Oral Qualifying Examination within 18 months. This examination is administered by the doctoral guidance committee. Most questions concentrate on the background literature, experimental methods, and implications of your field of interest and dissertation project. When you pass this examination, you are eligible to petition the Graduate Division for advancement to Ph.D. candidacy.

If you fail any one of the above required examinations, you may be reexamined at a later date determined by the guidance committee.

Final Oral Examination

A final oral examination is administered after submission of the dissertation.

Articulated Degree Program

The Department of Pharmacology offers an articulated M.D./Ph.D. program with the UCLA School of Medicine. Candidates must be accepted by the School of Medicine Admissions Office in order to qualify.

Upper Division Courses

110. Drugs: Mechanisms, Uses, and Misuse. Lecture, four hours (seven weeks); discussion, four hours (three weeks). Prerequisites: Biology 5, 6, 7, or equivalent. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse. Mr. Jenden (W)

199. Special Studies (2 to 8 units). Prerequisite: consent of instructor and department chair. Special studies in pharmacology, including either readings or projects or laboratory work or both, designed for appropriate training of each student. (F,W,S)

Graduate Courses

200. Introduction to Laboratory Research (2 to 4 units). Prerequisite: consent of instructor. Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor a report covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. (F,W,S)

203. Clinical Pharmacology (2 units). (Formerly numbered 202.) Lecture, two hours; discussion, zero to two hours. Prerequisites: courses 211A-211B. Series of lectures and case presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutics by reference to pharmacokinetics, mechanisms of action, and disposition of drugs. Mr. Catlin in charge (Sp)

211A-211B. Principles of Pharmacology (4 units, 2 units each). (Formerly numbered 201A-201B.) Lecture, three to eight hours; discussion, zero to nine hours. Prerequisites: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapeutics. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine. Mr. Igname in charge (F,W)

212A-212B. Graduate Consultancy; Clinical Pharmacology (2 units each). Prerequisite: M203A. Introduction to current therapeutic concepts. Topics of current interest. (Same as Anatomy M240.) Biological Chemistry M221A, Neuroscience M240, and Psychiatry M221k) Lecture, three hours. Prerequisites: biochemistry, basic neurochemistry, consent of instructor. Introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, gliogenesis, plasticity and regeneration, and aging. Mr. de Weir (F)

M221B. Cellular and Molecular Neurochemistry (Same as Anatomy M241, Biological Chemistry M221B, Neuroscience M241, and Psychiatry M221B) Lecture, three hours. Introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, gliogenesis, plasticity and regeneration, and aging. Mr. Green (W)

M221C. Cellular and Molecular Neurochemistry (Same as Anatomy M241, Biological Chemistry M221B, Neuroscience M241, and Psychiatry M221B) Lecture, three hours. Introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, gliogenesis, plasticity and regeneration, and aging. Mr. Green (Sp)
234A-234B-234C. Experimental Methods in Pharmacology (2 units each). Prerequisite: consent of instructor. Laboratory, survey of experimental methods and instrumentation used in analysis, identification, and study of mechanisms of action of pharmacologically active compounds.

Mr. Chang, Mr. Fukuto, Mr. George (F,W,Sp)

236. Neuropharmacology. Prerequisite: neurophysiology. Advanced neuropharmacology, including actions and modes of action of drugs, interactions between drugs and nervous tissue, movements of drugs through blood brain barrier, and distribution to central nervous system; problems of central transmission. Prerequisite: course 241, consent of instructor. Detailed examination of mechanisms of drug action at organ, tissue, cellular, and molecular levels, emphasizing receptors, neurotransmitters, autonomic and central nervous system pharmacology.

Mr. George, Mr. Gundersen, Ms. Howard, Mr. Olsen (F,W,Sp)

238. Behavioral Toxicology. Prerequisite: consent of instructor. Lectures and discussions designed to examine effects of exposures to a wide variety of chemical and physical agents on behavior of total organism as it adjusts to changes in its physical and social environments. Such effects may be reflected as subtle disturbances of behavior before classic symptoms of toxic states become apparent. Consideration to methodologies by which such disturbances may be measured, to state of present knowledge, and to application of knowledge in regulating risks of both prenatal and postnatal exposure. Particular emphasis on relevance of this knowledge to human behavior.

Mr. Russell (Sp)

241. Introduction to Chemical Pharmacology. Prerequisite: organic and biological chemistry, Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, and excretion.

Mr. Cho (F)

251. Seminar in Pharmacology (2 units). Seminars presented by students, faculty, and guest lecturers on a variety of topics. S/U grading.

Mr. Fukuto, Mr. Gundersen (W)

253. Seminar in Environmental Toxicology (2 units). Prerequisite: consent of instructor. Oral reports and discussions of current research on chemical pollutants in environment, their effects on biological systems, and mechanism of these effects.

Mr. Jenden (F,W,Sp)

M257. Introduction to Toxicology. (Same as Pathology M257.) Prerequisite: course 241 or consent of instructor. Biochemical and systemic toxicology, basic mechanisms of toxicity, and interaction of toxic agents with specific organ systems.

Mr. Cho, Mr. Froines (W)

M258. Pathologic Changes in Toxicology. (Same as Pathology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

Ms. Berliner (F,W)

261. Introduction to Clinical Pharmacology (2 units). Prerequisite: consent of instructor. Lectures, case presentations, and discussions designed to acquaint graduate students with special problems and effects encountered in clinical use of drugs, including absorption, metabolism and excretion, drug interactions and interference with clinical laboratory analysis.

Ms. Berliner (F,W)

261. Special Topics in Pharmacology (2 to 4 units). Prerequisite: consent of instructor. Examination in depth of topics of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced Ph.D. candidates, academic staff, or visiting faculty. May be taken twice for credit.

(F,W,Sp)

596. Directed Individual Research in Pharmacology (4 to 12 units).

599. Research for and Preparation of Ph.D. Dissertation (4 to 12 units).

Physiology

53-237 Center for the Health Sciences, (213) 825-6717

Professors
Francisco J. Bezanilla, Ph.D.
Allan J. Brady, Ph.D.
Jennifer S. Buchwald, Ph.D.
Michael H. Chase, Ph.D., in Residence
Sergio Clani, Ph.D.
Jared M. Diamond, Ph.D.
George Eisenman, M.D.
Joy S. Frank, Ph.D., in Residence
Alan D. Grinnell, Ph.D.
Earl Homsher, Ph.D., Vice Chair
Douglas Junge, Ph.D.
H. Ronald Kaback, M.D.
Yoshiaki Kidokoro, M.D., Ph.D., in Residence
Glenn A. Langer, M.D. (Castera Professor of Cardiology)
Kenneth D. Philipson, Ph.D., in Residence
Donald B. Lindsley, Ph.D., Emeritus
Edward H. Rubinstein, M.D., Ph.D.
George Sachs, D.Sc. (Leon J. Tiber, M.D., and David S. Alpert, M.D., Professor of Medicine)
John M.C. Tormey, M.D.
Julio Vergara, Ph.D.
Susan A. Ward, D.Phil., M.A.
Brian J. Whipp, D.Sc., Vice Chair
Ernest M. Wright, D.Sc., Chair
Donald B. Lindsey, Ph.D., Emeritus
Wilfred F.H.M. Mommaerts, Ph.D., Emeritus
Dorothy F. Sonnenschien, M.D., Ph.D., Emeritus
Bernice M. Wenzel, Ph.D., Emeritus

Associate Professors
Sally J. Krasne, Ph.D.
Michael S. Letinsky, Ph.D.

Assistant Professor
Diane M. Pappadiaz, Ph.D.

Lecturer
Jessie O. Washington, D.V.M.

Adjunct Professor
Arthur Peskoff, Ph.D.

Scope and Objectives

Physiology is the science of the functional activities of the human body. This covers a wide range, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its special disciplines of understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, neurobiology, communication and information, organ systems and integrative phenomena, and behavioral physiology.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Physiology Department was judged fifth best in the nation in terms of the quality of its faculty. In addition to the Ph.D. program, the department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.

Ph.D. Degree

Admission

Candidates for admission to graduate standing in the Department of Physiology are expected to pursue the Ph.D. degree. The department does not admit candidates for the M.S. degree. Ph.D. students must conform to the general admission requirements set by the Graduate Division and have received a bachelor's degree in a biological or physical science or in the premedical curriculum. In general, at the time of admission, you should have completed courses in mathematics through calculus and differential equations (equivalent to Mathematics 31A, 31B, 33A); physics (12 quarter units); chemistry (16 quarter units, including quantitative analysis, physical and organic chemistry); biology or zoology (16 quarter units, including comparative vertebrate anatomy).

In certain cases, at the discretion of the department, students lacking some of the preparation but having a strong background in areas pertinent to physiology may be admitted to graduate standing, provided that deficiencies are made up. Successful completion of the first-year curriculum requires knowledge of physical chemistry (at least equivalent to Chemistry 110A and 156) and differential equations (equivalent to Mathematics 33A). It is strongly recommended that these or equivalent courses be taken prior to admission. If not, these deficiencies must be removed within a specified time after admission, which would likely extend the first-year curriculum into the second year.

The Graduate Record Examination (GRE) General Test is required as well as the Subject Test in Biology or in your major field. Medical College Admission Test (MCAT) scores are accepted in lieu of the GRE. Three letters of recommendation are required and should be addressed to the Director of Graduate Studies. Completion of a master's program is not required.

An application packet and/or departmental brochure is available from the Graduate Student Office, Department of Physiology, 53-237 CHS, UCLA, Los Angeles, CA 90024-1751.

President and Chancellor

Regents of the University of California

The University of California, Los Angeles

Los Angeles, California 90024-1751
Major Fields or Subdisciplines

Cellular electrophysiology; membrane transport; excitation, contraction, energetics, and protein chemistry of muscle; fundamental neurophysiology; cardiovascular, respiratory, and gastrointestinal physiology.

Course Requirements

The graduate training program consists of a core requirement (Neuroscience M202, M205, Physiology 201A-201B, 205) which must be completed within your first two years of study. A second series of at least three courses applicable to your research interest(s) and one advanced course in physiology outside your major area of interest are also required. Your curriculum must be approved by the graduate committee and your faculty adviser. One laboratory rotation is required within the first two years, prior to taking the written comprehensive examination.

Qualifying Examinations

The written comprehensive examination is given at the end of your formal coursework (core curriculum and specialty courses); it may contain an oral section covering your area of specialization. Recommendations following the examination are based on the total and specific areas of competence revealed by the examination, performance in coursework during the year, and recommendations of staff with whom you have had close association. Marginal performance in all areas with excellence in none is not considered acceptable.

Following successful completion of the departmental comprehensive examination, you must select a sponsor who acts as chair of your doctoral committee and directs your thesis research project. The committee members conduct the University Oral Qualifying Examination to establish that you are capable of conducting a productive research project. At this point in your training, you normally will have completed all formal coursework, will have passed the departmental comprehensive examination, and will have devoted approximately a year to a research project. After successful completion of the oral qualifying examination, you are advanced to candidacy.

Final Oral Examination

The final oral examination is optional with the doctoral committee.

Upper Division Courses

100. Elements of Human Physiology (6 units). Prerequisite: consent of instructor. Special studies in physiology, including either reading assignments or laboratory work or both, designed for appropriate training of each student.

Graduate Courses

201A-201B. Organ System Physiology (6 units each). (Formerly numbered 100, 102.) Lecture, six hours; laboratory, three and one-half hours. Prerequisite: medical student standing or enrollment in qualified graduate program, consent of instructor. Recommended corequisites: courses M203A-M203B. Runs throughout School of Medicine’s second semester. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system. To receive credit, both courses must be taken together in same academic year. In Progress grading.

Mr. Torrey and the Staff (Sp)
M203A-M203B. Basic Neurology. (Formerly numbered 203A-203B.) Prerequisite: medical student standing; consent of instructor. Runs throughout School of Medicine’s second semester. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system. To receive credit, both courses must be taken together in same academic year. In Progress grading.

Mr. Letinsky, Mr. Schlag, and the Staff (Sp)
M204. Cellular and Molecular Developmental Neurobiology. (Same as Anatomy M204, Biology M280, Neuroscience M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 210A-210B, consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

M205. Physical Chemistry of Membranes and Cellular Systems. Prerequisite: consent of instructor. Provides mathematical and physical background to understand current approaches in cell electrophysiology and membrane transport. Survey of ordinary differential equations, multivariate functions, Fourier series, and integrals. (Formerly numbered 205.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Sensory mechanisms in normal and pathological states. Properties of pumps and carriers in cell membranes and ion (Na, K, H, and Ca) transport across plasma membranes of single cells and epithelial cells.

M221. Ion-Permeable Channels in Cell Membranes. (Formerly numbered 217B.) Prerequisite: consent of instructor. Properties of pumps and carriers in cell membranes and ion (Na, K, H, and Ca) transport across plasma membranes of single cells and epithelial cells.

Mr. Sachs, Mr. Wright
225. Ionic Selectivity and Molecular Architecture of Channels (6 units). Lecture, three hours; laboratory, three hours; reading period, 12 hours; independent study, 6 units. Prerequisite: consent of instructor. Integration of crystallographic knowledge of molecular architecture of ion binding sites in proteins with functional information about ion permeation across ion channels. Introduction to general principles at an advanced level. Half lecture, half microcomputer laboratory on molecular graphics.

Mr. Eisenman (Sp)
226. Excitation-Contraction Coupling in Muscle (2 to 6 units). (Formerly numbered 21A.) Prerequisite: consent of instructor. Detailed study of relationship between membrane excitation and contraction activation in muscle.

Mr. E. Wright
227. Biochemistry and Mechanics of Muscle (2 to 6 units). (Formerly numbered 21B.) Prerequisite: consent of instructor. Detailed study of biochemistry, energetics, and contractile mechanisms in muscle.

Mr. Brady, Mr. Hornshaw
228. Epithelia: Structure and Function (2 units). Prerequisite: consent of instructor. Lectures and seminars on physiology of epithelia cells, with particular emphasis on membrane transport. S/U grading.

Mr. Wright (W)
M235. Neuroactive Peptides: Molecular Biology to Function (2 units). (Same as Anatomy M246, Molecular Biology M246, and Neuroscience M246.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approach to understanding these active molecules. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

Mr. Brecha, Mr. Reeve, Ms. Tache (W)
250A-250B-250C. Critical Topics in Physiology (2 to 8 units each). (Formerly numbered 212A-212B-212C.) Prerequisite: consent of instructor. Advanced treatment of critical topics in physiology by staff for graduate and postdoctoral students in biomedical sciences.

260. Use of Laboratory Animals in Research. Prerequisite: consent of instructor. Introductory course for graduate students in medical and biological sciences, covering principles and practical problems in handling and use of common laboratory animal species.

596. Directed Individual Study or Research (2 to 12 units). Prerequisite: consent of instructor.

597. Preparation for M.S. Candidates (2 to 12 units). Prerequisite: consent of instructor. Introductory course

599. Dissertation Research for Ph.D. Candidates (2 to 12 units). Prerequisite: consent of instructor.
The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its programs for psychiatry interns and residents and for medical students (courses for medical students are listed in the Announcement of the UCLA School of Medicine and the School of Medicine Handbook of Clinical Courses).

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course prerequisites determined by specific educational programs. Additional information is available from the department office.

**Programs**

The Developmental Disabilities Immersion Program is cosponsored by the Department of Psychology and the Department of Psychiatry and Biobehavioral Sciences and by the Office of Instructional Development — Field Studies Development. Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities. Required core courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements. Student individualized research projects are also part of the immersion experience. Students interested in the program should contact the Office of Instructional Development — Field Studies Development (70 Powell Library) or the Psychology Undergraduate Advising Office (1531 Franz Hall).

The department offers a 12-month Clinical Psychology Internship, which is a Graduate Division certificate program. Students enrolled in clinical psychology programs at APA-approved universities are eligible to apply. Applications are accepted through December 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact the Psychology Internship Training Office, 68-265 NPI&H (825-6606).

A certificate is also awarded by the department to qualified graduate students who successfully complete the Mental Retardation and Other Developmental Disabilities Training Program. The program fulfills the internship requirement for the Ph.D. program in clinical psychology and the master's program in social welfare, and for the disciplines of speech pathology, occupational therapy, and nutrition at nearby universities. Further, it satisfies selected state licensure and clinical placement requirements in psychology, speech and lan-
guage, special education, social welfare, nursing, psycholinguistics, occupational therapy, and nutrition. Interested students should contact the program training director, 3302 Medical Plaza 300 (825-0051), for further information.

Information on clinical practicums which are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

**Upper Division Courses**

**M112. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M136Q.) Prerequisite: consent of instructor. Skill of observing and recording behavior in natural settings, with emphasis on field training in practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

**M119. Evolution of Intelligence and Behavior in Humans through Naturalistic Observations.** (Same as Psychology M119K.) Lecture, two hours; discussion, two hours. Prerequisites: Psychology 15 or 115, introductory statistics course, junior or senior standing, consent of instructor. Intelligence treated as neural information-processing capacity; its evolution in vertebrates correlated with evolution of enlarged brains. Quantitative approaches in evolutionary biology and neurosciences.

Mr. Jenson (W)

**M142. Advanced Statistical Methods in Psycholinguistics.** (Same as Psychology M142.) Lecture, two hours; discussion, 90 minutes. Prerequisite: Psychology 41. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlation, analysis of variance, and multiple regression.

Mr. Nihira (W)

**175. Women Physicians: Professional and Gender Issues.** Professional socialization of women in medicine. Developmental stages of medical training and practice (premedical, college, internship, residency, and various specialties of medical practice). Women trainees and physicians in various careers participate in class presentations. Ethnographic research project based on clinical preceptorship experience required.

Mr. Combs (F)

**M180A. Contemporary Problems in Mental Retardation.** (Same as Psychology M180A.) Prerequisites: Psychology 10, 41, and 127 or 130. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Focus on problems related to mental retardation. Issues include research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion.

Mr. Fluharty and the Staff (W)

**M180B. Contemporary Issues in Mental Retardation.** (Same as Psychology M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychosocial educational issues in immersing retardates in ongoing field experiences through lectures, discussions, media, and six student papers.

Mr. Baker (Sp)

Mr. Silverstein and the Staff (W/Sp)

**M190. Ethology: Physiology of Behavior and Learning in Animals.** (Same as Psychology M190.) Prerequisites: Psychology 115, junior standing. Basic course for undergraduate students which integrates systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with broad biological, evolutionary perspective.

Mr. Sotysky (W)

---

**M200. Colloquium on Biobehavioral Sciences (1 unit).** Prerequisite: consent of instructor. Vehicle for continuing education on recent advances in various scientific fields relevant to behavior in its biobehavioral and biosocial contexts. Forum for pertinent interdisciplinary dialogue. Speaker presents information from their area of competence to expand ideas on relevance of this material to broader issues of behavior.

Mr. West

**M203. Neurochemistry.** (Same as Neuroscience M203B.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 201A-201B of equivalent, basic biochemistry, consent of instructor. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids, molecular biology, cell signaling, and cellular and molecular development. Complete.

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Anatomy M204, Biology M280, Neuroscience M204, and Physiology M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M203B or M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include cell signaling, early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

Mr. de Vellis, Ms. Macklin (W)

**205. Madness in the Enlightenment: Care and Cure of Mental Illness in the Age of Reason.** Prerequisites: graduate standing, consent of instructor. Exploration of writings of physicians and reformers of the Enlightenment who studied the mentally ill, treated them, and recorded their theories, findings, and recommendations between ca. 1750 and 1850.

Ms. Weisner (F)

**207A-207B-207C. Hypnosis Seminars (2 units each).** Prerequisite: psychology intern, psychiatric resident, member of (or trainee in) one of the licensed mental health professions, or consent of instructor. Exploration of hypnosis, intended to prepare mental health professionals for clinical applications, involving didactics, demonstration, practice, and feedback. Following training in inductions and development of classic hypnotic phenomena (e.g., age regression, hypnoanesthesia), focus on psychotherapeutic applications, including direct symptom removal, behavioral methods, and hypnoanalysis. Emphasis on developing skill for application in clinical practice. S/U grading.

Ms. Marnell, Ms. Weiner (W)

**208A-208B-208C. Clinical Neuropsychology (2 units each).** Lecture, 90 minutes. Prerequisites: graduate or postgraduate standing, consent of instructor. Introduction and review of neuropsychological concepts. Developmental and functional systems of the brain, analytic and synthetic activities of the brain, effects of generalized and focal brain impairment on behavior, and introduction to use of neuropsychological test instruments.

Ms. Asarnow, Ms. LaRue, Mr. Marsh (F, W, Sp)

**209A-209B. Behavior Therapy Practicum (2 units each).** Discussion, 90 minutes. Prerequisite: consent of instructor. Theoretical underpinnings of behavior therapy, assessment and treatment of depression, anxiety, sexual disorders, eating disorders, pain, social skills deficits, psychological problems of chronic physical illness, and nonadherence to medical and psychological treatments.

Mr. Munford (F, W)

**M210. Seminar in Psychosocial Studies.** (Formerly numbered M210A-M210B.) (Same as Anthropology M234.) Seminar. Lecture, three hours. Limited to presentation of state of research in psychosocial studies. Survey of work in child development and socialization, personality, psychobiology, transpersonal psychiatry, deviance, learning, perception, cognition, and psychosocial perspectives on change.

Mr. Kernan (W)

**M211. Sociocultural Perspectives on Mental Retardation.** (Same as Anthropology M234F.) Lecture, three hours. Prerequisites: consent of instructor. Exploration of concepts such as "intelligence," "competence," and "adaptive behavior" in varying Western societies as background to study of the phenomenon of mental retardation in the West, particularly the U.S. Topics include cross-cultural perspectives, analysis of institutional confinement, policies of deinstitutionalization and normalization, and current issues involving adaptation and "quality of life." Discussion of topics such as communicative competence, work, crime, deviance, sexuality, and marriage. May be repeated for credit.

Mr. Edgerton (W)

**M212. Cultural Modes of Thought.** (Same as Anthropology M235P.) Lecture, three hours. Prerequisites: consent of instructor. Exploration of cultures of learning, perception, thinking, and intelligence. Fields of cross-cultural psychology, in addition to cognitive anthropology. Focus on learning and thinking in non-Western cultures, including problems of education in ethnic areas within the U.S.

Mr. Price-Williams (W)

**M213A-M213B. The Individual in Culture.** (Same as Anthropology M235A-M235B.) Lecture, three hours. Course M213A is prerequisite to M213B. In this course, students explore anthropological, psychological, and sociological perspectives on the individual and culture.

Mr. Weisner (F)

**M214. Selected Topics in Cross-Cultural Study of Socialization and Childhood.** (Same as Anthropology M236P.) Lecture, three hours. Prerequisite: consent of instructor. Methods, ethnographic data, and theoretical exploration of current issues involving socialization, cultural issues on learning, perception, thinking, and intelligence. Fields of cross-cultural psychology, in addition to cognitive anthropology. Focus on learning and thinking in non-Western cultures, including problems of education in ethnic areas within the U.S.

Mr. Weisner (F)

**M218. Basic Core Courses in Mental Retardation Research (2 units each).** (Same as Anthropology M237A-M237B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Required of all MRRC trainees. Systematic overview of mental retardation and sciences basic to this field of study. Language, methods, aims, and contributions of various disciplines that contribute to the field. Lecture, discussion, reading, and preparation of multidisciplinary research designs with potential for prevention or amelioration of mental retardation. S/U grading.

Ms. Buchwald, Mr. Medgerton, Mr. Levine (W)

**M221A. Cellular and Molecular Neurochemistry.** (Same as Anatomy M240, Biological Chemistry M221A, Neuroscience M240, and Pharmacology M221A.) Lecture, three hours; discussion, two hours. Prerequisites: biochemistry, basic neurochemistry, consent of instructor, introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, plasticity and regeneration, and aging.

Mr. de Vellis, Ms. Macklin (W)

**M221B. Cellular and Molecular Neurochemistry.** (Same as Anatomy M241, Biological Chemistry M221B, Neuroscience M240, and Pharmacology M221B.) Lecture, three hours; discussion, two hours. Prerequisites: biochemistry, basic neurochemistry, consent of instructor, introduction to developmental neurobiology, with emphasis on cellular and molecular mechanisms. Topics include neurogenesis, cell lineages, generation of neuronal diversity, neural growth factors, cell proliferation, migration, synaptogenesis, trophic interactions, plasticity and regeneration, and aging.

Mr. Olsen (W)

---

**SCHOOL OF MEDICINE / Psychiatry and Biobehavioral Sciences / 505**
240. Assessment and Treatment of Afro-American Families (3 units). Seminar, two hours. Prerequisites: graduate standing, consent of instructor. Aids mental health professionals and trainees in evaluation and treatment of Afro-American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guest form basis for staff evaluation and case management with an Afro-American family. Ms. Bass, Ms. Wyatt (Sp)

242. Parent and Child Psychotherapy Seminar (1 unit each). Prerequisite: consent of instructor. Seminar meets throughout year. During Summer Quarter emphasis on initial clinical and research evaluation as well as early treatment of the child and family. During Fall, Winter, and Spring Quarters instructors use videotaped sessions and notes from their own clinical work to discuss such topics as diagnostic criteria, family system techniques, stressing work with parents and children, and such theoretical and technical issues as transference, resistance, overdetermined nature of symptoms, and termination. Student presentations encourage students to consider what they must do in order to amplify clinical and theoretical issues and to become familiar with ongoing cases which are part of a systematic outcome study. Mr. Heinicke

243A-243B-243C. Mental Retardation Interdisciplinary Core Curriculum (1 unit each). Lecture, 90 minutes; discussion, one hour. Prerequisites: consent of instructor. Seminar meets throughout year. During Summer Quarter emphasis on major topics of mental retardation, including epidemiology, nosology, assessment, identification, education, psychological and emotional development, behavior management, and preparation of future mental retardation workers. Mr. Tymchuk (F)

M224. Neurobiology of Sleep (3 units). (Same as Neuroscience M259 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural mechanisms underlying the control of REM and NREM sleep after reviewing sleep, behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading. Mr. Siegel (F)

M250. Medical Anthropology. (Same as Anthropology M266, Community Health Sciences M271, and Nursing M260.) Seminar, three hours. Prerequisite: consent of instructor. The Community Health Sciences 130. Epidemiology 112, and one upper division psychology, sociology, or anthropology course, or equivalent, or consent of instructor. Cross-cultural aspects of human behavior as they relate to perception, treatment, incidence, and prevalence of disease and illness.

Ms. Brown, Ms. Scrimshaw

253. Seminar: Child Development (1 unit). Prerequisite: consent of instructor. Techniques of development, systems of child development. Development of children's thinking and problem solving. Presented as assigned readings by students plays major role in each session. Mr. Canwell

254. Counseling Families of Handicapped Children (3 units). (Same as Psychology M242.) Seminar, two hours. Prerequisites: consent of instructor. Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological skills and community resources, reactions of genetic counseling, placement, and developmental crises.

Ms. Gottlieb

255. Functional Organization of Behavior (2 units). (Formerly numbered M201A-M201B-M201C.) (Same as Psychology M255.) Seminar, two hours. Prerequisite: consent of instructor. Development of behaviors within different species and functional uses of behaviors; use of an evolutionary biological perspective as the framework. Research studies, their relevance to counseling and the functional behavior of animals. S/U or letter grading.

Mr. McGuire, Mr. Woody (F)

256. Basic Clinical Child Psychology (1 unit). Prerequisite: consent of instructor. Weekly seminars covering basic clinical aspects of child psychology. Readings provided for basis of discussion on topics including interviewing of parents and children, diagnosis, and related syndromes.

Mr. Canwell

257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders (3 units each). Laboratory, 90 minutes; didactic, 90 minutes. Prerequisite: consent of instructor. Didactic and practical training in communication and its dysfunction as these relate to language disorders seen in interdisciplinary medical setting. Provides background for graduate and postgraduate students who plan to engage in clinical work and/or clinical research in which language disturbances of childhood and adolescence are relevant.

Ms. Balfaxe (F,Sp)

M258. Functional Neuropsychology (2 units). (Formerly numbered M216.) (Same as Neuroscience M258.) Lecture, two hours; discussion, one hour. Prerequisites: consent of instructor. Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological skills and community resources, reactions of genetic counseling, placement, and developmental crises.

Ms. Gottlieb

259. Legal and Ethical Issues with Vulnerable Populations (3 units). Discussion, 90 minutes; laboratory, three and one-half hours. Prerequisite: consent of instructor. Discussion of current laws dealing with vulnerable populations (e.g., children, developmentally disabled people, elderly people); philosophical and ethical issues, and how to resolve them. Use of videotapes and discussion of cases.

Mr. Tymchuk (W)
260. The Chronically Medically Ill Child and Family. Lecture, three hours; seminar, one hour. Prerequisite: consent of instructor. Examination from a biopsychosocial perspective of ramifications of chronic illness affecting life-style and development of the child and family, including examination of relevant theoretical models and research. Clinical application to assessment and intervention strategies. Ms. Betz (F,Sp).

261. Psychopathology of Mental Retardation (1 unit). Seminar, 90 minutes. Prerequisite: consent of instructor. Examination of current research findings and clinical practice concerning dually diagnosed populations. Nosology, theoretical issues, assessment and therapeutic interventions pertaining to populations with mental retardation and emotional disorders. Ms. Jacobs, Mr. Mondy (Sp).

262A-262B-262C. Clinical Fieldwork in Developmental Disabilities and Chronic Illness (1 to 4 units each). Prerequisites or corequisites: courses 243A-243B-243C, consent of instructor. Placement and supervision of clinical and consultation activities of interdisciplinary trainees in various community agencies, hospitals, or other related settings serving developmentally disabled or chronically medically ill children, youth, or adults. Supervision done jointly by community personnel on site, in collaboration with interdisciplinary faculty. S/U grading.

264. Biofeedback: Theory, Research, and Clinical Application. Seminar, two hours; laboratory, one hour. Prerequisite: consent of instructor. Introduction to concepts and techniques of biofeedback, including review of experimental literature and applications to various clinical problems (hypertension, headache, pain and anxiety, sexual dysfunction, cardiac arrhythmias, neuromuscular disorders, etc.). Training in use of portable biofeedback devices. Consideration of research and clinical issues. Ms. Foreman (W).

265. Mind and Brain in Evolution (2 units). Prerequisite: consent of instructor. Review of fossil evidence on organic evolution of the brain and implications of that evidence for evolution of mind and intelligence, with emphasis on quantitative approaches. Although some implications for cognitive psychology and individual differences are considered, the evolutionary analysis is "above the species level." Mr. Jerison (Sp).

266A-266B-266C. Psychophysiological Research (1 unit each). (Formerly numbered 227A-227B-227C.) Lecture, three hours; seminar, 90 minutes. Prerequisite: consent of instructor. Advanced seminar and discussion of ongoing laboratory research, involving concepts, experimental design, measurement, and data analysis. Current topics include regulation of physiological and subjective reactions to stress, psychophysiological research on diabetes, discrimination and control of blood pressure, and behavioral regulation of postural hypertension. Mr. Shapiro (F, W, Sp).

M270. Neural Basis of Memory. (Same as Neuroscience M273.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory. Mr. Haigens, Mr. Woody 272. Psychological Anthropology. (Same as Anthropology M234Q.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and the theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

M273. Advanced Seminar in Medical Anthropology. (Same as Anthropology M263Q, Community Health Sciences M279H, and Nursing M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. Ms. Browner (Sp).

274. Neuropsychophysics and Behavior (3 units). Prerequisites: graduate standing, consent of instructor. Analysis of strategies and approaches used to study behavior of mammalian organisms. Special emphasis on recent developments in electrophysiological recording techniques and how such developments relate to classical concepts of brain function. Mr. Levine (Sp).

275A-275B. Sociobiology Seminar (2 units each). Prerequisite: consent of instructor. Review of sociobiological literature as it currently transcends disciplines. Discussion of social and biobehavioral topics. Mr. Haigens, Mr. Syndulko (F, W).

276. Neuropsychological Plasticity in Adults (3 units). Prerequisite: consent of instructor. Critical examination at multiple levels of brain function changes with aging — from structural changes at cellular, neurochemical, neuroanatomical, and neurological levels on one hand to functional changes in sensory, motor, mnemonic, and intellectual abilities on the other. Evaluation of behavioral, pharmacological, and transplantation techniques to enhance or restore function.

Mr. Haigens, Mr. Syndulko.

277. From Research to Practice: Biobehavioral Contributions (2 units). Prerequisite: consent of instructor. Overview of biobehavioral research as it is currently transcending disciplines and preventive practices across disciplines. S/U grading.

M279A. Seminar: Human Behavioral Ecology. (Same as Anthropology M229A and Education M261A.) Lecture 1 hour; discussion 3 hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology. Mr. Burton Jones.

M279B. Seminar: Reproduction, Families, and Parenting. (Same as Anthropology M229B and Education M218B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences. Mr. Burton Jones.

M279C. Seminar: Selected Topics in Human Ethology. (Same as Anthropology M229C and Education M281C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavioral methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptations: evolutionary and ontogenetic. Mr. Burton Jones.

M280. Seminar on Reproduction and Women's Health. (Formerly numbered 280.) (Same as Anthropology M269P, Community Health Sciences M276D, and Nursing M280.) Seminar, three hours. Analysis, using a cross-cultural approach, of sociocultural and political economic factors that affect reproduction and women's health. Topics include relationships between women's domestic and extra-domestic roles and their health, and impact of new reproductive technologies. Ms. Browner (F).

281. Behavioral Therapy in an Educational Setting. Lecture, one hour; laboratory, six to 10 hours. Prerequisite: consent of instructor. Supervised experience in classroom working with exceptional children. Theoretical background furnished through one-hour weekly lecture.

290. Quantitative Analysis of Ethnographic Data. Prerequisite: graduate standing. Pedagogical and experiential training in quantification and analysis of ethnographic data, including principles of psychological scaling and techniques of behavior measurement as applied to ethnographic data and application of univariate and multivariate statistical methods for analysis of ethnographic data. Mr. Nihira (F).

298. Current Topics in Biobehavioral Sciences (1 to 4 units). Prerequisite: consent of instructor. Current issues in biobehavioral sciences offered on selective basis depending on instructor interest and topical relevance of problems. Consult Schedule of Classes for topics and instructors. May be repeated for credit.

404. Individual Case Supervision (1 to 4 units). Prerequisite: consent of instructor and department chair. Based on written proposal to be structured by instructor and student prior to enrollment; additional information and proposal forms available in Office of Continuing Education, CA-454 NPB. One-to-one supervision of individual therapy cases, including analyses of patient data, supervision of ongoing treatment, informal didactic sessions on personality theory, and applications to patient management.

413. Community Meeting: 2-West (1 unit). Prerequisite: assignment to Unit 2-West, consent of instructor. One-hour course devoted to individual experience in leading a large group of patients and staff. Leadership by rotation. Thirty-minute preceptual instruction each week.

416. Treatment Planning Meetings (1 unit). Prerequisite: consent of instructor. Treatment and management of patients in particular, discussion of consultation biobehavioral consultation team, and interdisciplinary skills. Emphasis on formulating accurate diagnostic assessments and planning effective biobehavioral treatment programs. Methods of the milieu (somatic therapies, behavioral techniques, family therapy, group process, individual and dyadic treatment, etc.).

429. Child Outpatient Team (1 unit). Prerequisite: consent of instructor. Weekly team meetings to coordinate clinical activities of trainees in Child Outpatient Department. Discussion of literature and theoretical topics related to selected cases. S/U grading.
449. Parent Training Intervention Workshop (2 units). Lecture, 90 minutes; discussion, one hour. Prerequisite: consent of instructor. Advanced clinical trainees learn behavioral techniques of assessment and treatment of parent-child problems. Lectures, case presentations, and workshops on various skills necessary. Mr. Frankel

462. School Intervention by Child Psychiatrists. (Formerly numbered 462A-462B-462C) Seminar, two hours. Prerequisite: consent of instructor. Knowledge of childhood psychiatric problems; administrative experience in schools through 462A; didactic experience, 462B; and group supervision. Each trainee selects a local elementary or junior high school as site of field experience in consultation. Supervision focuses on assessing needs of the school and initiating the consultation. Seminars consider theories of consultation, systems theory as applied to schools, organization of school systems, professional roles represented in the school (e.g., teachers, counselors, principals, etc.), and their special problems. In Progress grading. Mr. Cantwell

465. Pediatric Psychopharmacology (1 unit). Prerequisite: child psychiatry fellow or consent of instructor. Designed for all fellows in child psychiatry. Background of childhood psychopharmacology, clinical evaluation of psychotropic drugs with children; clinical indications for various psychotropic drugs. Clinical supervision of individual cases provided along with seminars and discussions of various articles. Mr. Cantwell

471. Grand Rounds (No credit). Prerequisite: second-year resident in Child Service, child psychiatry fellow, or consent of instructor. Each month one second-year child psychiatry fellow presents a major clinical problem. Senior faculty discussants preside. The presenting trainees expected to cover pertinent literature and to assemble critical elements of information on case or problem at hand. Most sessions eligible for Continuing Medical Education credit.

M472A. Nursing Care of Developmentally Disabled. (Same as Nursing M410A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours. Prerequisite: consent of instructor. Study of the health and social conditions of childhood and their effects on the individual and family. Content based on normative developmental models with consideration for sociocultural diversity. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience. Ms. Betz (F)

M472B. Nursing Care of Developmentally Disabled. (Same as Nursing M410B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: course M472A and/or consent of instructor. Study of philosophical and conceptual models affecting care delivery for developmentally disabled. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention. Ms. Betz (W)

M472C. Nursing Care of Developmentally Disabled. (Same as Nursing M410C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: course M472B and/or consent of instructor. Exploration and participation in assessment, planning, and delivery of health care to developmentally disabled in a variety of settings. Emphasis on expanded role of the nurse. Ms. Betz (Sp)

478. Clinical Genetics Rounds (No credit). Prerequisites: medical graduate, consent of instructor. Weekly discussion of medical and genetic aspects of one or more disorders presented by the trainees. Ms. Crandall

479. Genetics Clinic Presentation (No credit). Prerequisite: consent of instructor. Weekly clinical teaching session on patients seen in preceding genetics clinic. In-depth discussion on genetics of each disorder. Ms. Crandall and the Staff

480. Analysis of Human Chromosome Studies (1 unit). Prerequisite: consent of instructor. Chromosome karyotypes prepared in cytogenetics laboratory during preceding week presented and discussed with reference to clinical findings. Teaching includes interpretation of abnormal karyotypes and technical aspects of routine and special chromosome studies. Mr. Sparkes

481. Chromatography Review (No credit). Prerequisites: precritical course or biochemistry, consent of instructor. Weekly seminar with presentation of amino acid chromatogram carried out during preceding week. Interpretation of abnormal chromatograms together with technical aspects of tests used. Mr. Cederbaum

485. Medical Genetics Seminar (No credit). Prerequisites: introductory course, consent of instructor. Weekly lecture series intended for those interested in genetics or in specific topic to be presented. Speakers are invited for their expertise or research in some special area related to genetics and may be from UCLA or elsewhere. Discussion and questions from audience encouraged. Ms. Crandall and the Staff

508 / Psychiatry and Biobehavioral Sciences / SCHOOL OF MEDICINE

Radiology

Radiation Oncology

B3-109 Center for the Health Sciences, (213) 825-9304

Chair
Robert G. Parker, M.D.

Vice Chair
Guy J.F. Juillard, M.D.

Scope and Objectives
The Department of Radiation Oncology includes clinical divisions at the UCLA and Wadsworth VA Medical Centers, divisions of experimental radiobiology and medical radiation physics, and the A. Frederick Rasmussen, Jr., Clinical Neutron Therapy Facility. Research and teaching facilities are available at both medical centers. The primary clinical mission of the department is the management of patients who have cancer, although ionizing radiations also are used for preparing patients for bone marrow transplantations and for altering the immune systems of patients with a range of illnesses. Knowledge of the disease in question, the comparative efficacy of radiation therapy and other methods, radiation biology and pathophysiology, and the physical characteristics of varying radiations is essential.

Research interests range from clinical problems through cellular kinetics, radiation modifiers, radiation chemistry, molecular biology, immunology, and basic and applied physics. The educational programs serve medical, dental, nursing, and radiation therapy technologist students, and community and postgraduate physicians who are qualifying for certification in radiation oncology by the American Board of Radiology.

For further details on the Department of Radiation Oncology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Radiological Sciences

1V-365 Center for the Health Sciences, (213) 825-7811

Professors
Zoran L. Barbaric, M.D. (Diagnostic Radiology), Vice Chair
Jorge R. Barrio, Ph.D. (Nuclear Medicine)
Edward J. Hoffman, Ph.D., in Residence (Nuclear Medicine, Biophysics)
H.K. Huang, D.Sc. (Medical Imaging), Biomedical Physics Program Director
Sung-Cheng (Henry) Huang, D.Sc. (Nuclear Medicine, Biophysics)
Hooshang Kangarloo, M.D. (Diagnostic Radiology; Distinguished Teaching Award), Executive Chair
John C. Mazziotta, M.D. (Nuclear Medicine)
William H. McBride, D.Sc. (Radiation Oncology)
Amos Norman, Ph.D. (Radiological Sciences; Radiation Oncology)
Michael E. Phelps, Ph.D. (Nuclear Medicine; Jennifer Jones Simon Professor of Biophysics)
Heinrich R. Scheibert, M.D., Ph.D. (Nuclear Medicine)
James B. Smathers, Ph.D. (radiology Oncology)
Milo M. Webbem, M.D., LL.B. (Nuclear Medicine)
H. Rodney Withers, M.D., D.Sc. (Radiation Oncology)

Associate Professors
James D. Collins, M.D. (Diagnostic Radiology)
Randall A. Hawkins, M.D., Ph.D., in Residence (Nuclear Medicine)
Robert B. Lufkin, M.D. (Diagnostic Radiology)

Assistant Professors
Denis B. Buxton, Ph.D., in Residence (Nuclear Medicine)
Kelby K. Chan, Ph.D., in Residence (Medical Imaging)
Paul Cho, Ph.D., in Residence (Medical Imaging)
Diane C. Chugani, Ph.D., in Residence (Nuclear Medicine)
Kuo Ting (Bruce) Ho, Ph.D., in Residence (Medical Imaging)
Nagichett Sayamurthy, Ph.D., in Residence (Nuclear Medicine)
Brent K. Stewart, Ph.D., in Residence (Medical Imaging)
Ricky Taira, Ph.D., in Residence (Medical Imaging)
The biomedical physics graduate program in the Department of Radiological Sciences offers training in four specialties: biophysics, medical imaging, medical physics, and radiation biology. Specialized facilities for training and research are available in the departmental clinical laboratories, the Laboratory of Biomedical and Environmental Sciences, the Image Processing Laboratory, and a number of associated hospitals. Highly specialized equipment includes the biomedical cyclotron, the radiation oncology cyclotron, the picture archiving and communication system (PACS), the positron emission tomography (PET) scanners, the stereotactic gamma irradiator, and many VAX and Sun computers with image processor systems. Students are trained to work both as professional medical physicists and as independent investigators.

Graduates in biomedical physics can expect to engage in any combination of clinical service, consultation, research, and teaching. Biomedical physicists are usually employed in hospitals frequently associated with a medical school, where they are members of the academic staff. They are also in demand in high technology private industry engaging in research and development of diagnostic equipment. In government agencies, biomedical physicists are involved in the formulation and enforcement of regulations applied to the use of radiation in health care delivery.

They are also in demand in high technology private industry engaging in research and development of diagnostic equipment. In government agencies, biomedical physicists are involved in the formulation and enforcement of regulations applied to the use of radiation in health care delivery.

Requirements for Graduate Degrees

Admission
In addition to the University's minimum requirements, candidates for admission are required to have a bachelor's degree with a major in a science. Also, it is expected that all applicants will have had (1) one year of college physics (calculus-based), plus the equivalent of Physics 8E, (2) two years of college mathematics (differential equations), equivalent to Mathematics 31A, 31B, 32A, 32B, 33A, 33B, (3) one year of college chemistry and one term of biochemistry, (4) one course each in anatomy and physiology, (5) at least one computer science course, and (6) one statistics course. Deficiencies in the above courses must be removed prior to advancement to candidacy.

Scores from the Graduate Record Examination (GRE) General Test, taken in the last three years, should be sent to the department. Three letters of recommendation are required. If you already have a master's degree, one of the letters should be from your adviser.

A brochure describing the program in biomedical physics may be obtained from the Department of Radiological Sciences, Biomedical Physics Graduate Program, 1V-365 CHS, UCLA, Los Angeles, CA 90024-1721.

Master of Science in Biomedical Physics

Course Requirements
A minimum of eleven courses, including eight core courses (Radiological Sciences 200A, 200B, 203, 204, 205, 207, 209, and 260A or 260B), course 208A or 208B, and Biostatistics 100A and 100B, are required for the M.S. degree. In addition, you must take three clinical rotations (Radiological Sciences 202A-202B-202C).

For students with a medical physics background or a career objective other than practicing medical physicist, a more sharply focused curriculum may be advised.

Courses 596 and 598 may be applied toward the degree. Eight units of 500-series courses may be applied toward the total course requirement, four units toward the minimum graduate course requirement.

Thesis or Comprehensive Examination Plan
You are required to write a thesis (Plan I) based on a research project or to pass a comprehensive examination (Plan II) consisting of material selected from the core courses. The examination is offered at least once a year and may be repeated once.

Ph.D. in Biomedical Physics

Admission
Admission to the doctoral program requires (1) selecting a specialty, (2) passing either all of the core courses with grades of B or better or the M.S. comprehensive examination, and (3) passing a written specialty qualifying examination which may be repeated once. Completion of a master's program is not required.

Qualifying Examinations
The qualifying examination for admission to the Ph.D. program should be taken by the end of your sixth term in residence. Once the qualifying examination is passed and you have selected a research topic in your specialty for the dissertation, you should, within a reasonable time frame agreed on with the dissertation adviser, form a doctoral committee and schedule the University Oral Qualifying Examination. This examination covers your mastery of the biomedical physics curriculum, particularly the areas of the proposed dissertation topic.

If you do not complete the dissertation within four years after taking the written qualifying examination, you may be required to take it again.

Final Oral Examination
The final oral examination, or dissertation defense, is required.

Upper Division Course

Graduate Courses

200A. Physics and Chemistry of Nuclear Medicine. Lecture, one hour; laboratory, three hours. Prerequisite: consent of instructor. Nuclear structure, statistics of radioactive decay, nuclear radiations and their interaction with matter, nuclear decay processes, nuclear reactions, and compartment models. Physical and chemical properties of radioactive preparations used in nuclear medicine. Mr. Hoffman (F)

200B. Nuclear Medicine Instrumentation. Lecture, one hour; laboratory, three hours. Prerequisite: course 200A. Introduction to nuclear medicine instrumentation, including well ionization chambers, probe and well scintillation detectors, scintillation cameras, and single photon emission computed tomography. Mr. Graham (W)

201. Medical Radiation Accelerator Design. Lecture, three hours. Prerequisite: course 203. Overview of physical principles involved in design of current particle accelerators (electron, proton, heavy particle) and analysis of characteristics of current accelerators and facility design. Mr. Myers (Sum)

202A-202B-202C. Applications of Medical Physics to Clinical Problems. Selected studies in clinical use of radiotopes: 202A. Nuclear Medicine. Prerequisite: course 200B or consent of instructor.
202B. Diagnostic Radiology. Prerequisites: courses 200A, 205, and 205A-205B; or consent of instructor. (F,W,Sp)

202C. Radiation Therapy. Prerequisites: courses 203, 204, and 207, and 206A-206B, or consent of instructor. (F,W,Sp)

204. Introductory Radiation Biology. Effect of ionizing radiation on chemical and biological systems. Mr. McBride (W)

205. Physics of Diagnostic Radiology. Production of X rays, basic interactions between X rays and matter, X-ray systems, components, physics of medical radiography, radiographic image quality, fluoroscopy, image intensifiers, special procedures, X-ray protection. Laboratory experiments illustrate basic theory. Mr. Taira (F)

206. Advanced Instrumentation. Prerequisites: courses 200A, 200B, 205, 209, 210. Introduction to recent advances in digital diagnostic imaging systems. Topics centered on instrumentation include film digitizers, image equipment interfaces, computed radiography (CR), digital subtraction angiography (DSA), computed tomography (CT), magnetic resonance imaging (MRI), and picture archiving and communication systems (PACS). Mr. Ho, Mr. Stewart (Sp)

207. Dosimetry and Health Physics. Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Dosimetry of ionizing radiation, concepts in radiation protection, recommendation of national council on radiation protection and measurements, maximum permissible dose levels. Shielding calculations. Layout and design of radiographic installation. Mr. Herman, Mr. Norman (F)

208A-208B. Medical Physics Laboratory. Prerequisites: courses 203, 205. Techniques for measuring ionizing and nonionizing radiation, applications to problems in radiological sciences. Mr. Herman (F, 208B; Sp, 208A)

209. Digital Techniques in Radiological Sciences. Lecture, three hours; laboratory, one hour. Prerequisites: one course in FORTRAN or another computer language; consent of instructor. Basics of digital technology used in radiological sciences. Concepts and experience necessary to undertake radiological research in a diverse computing environment. Discussion of relationship between computers and diagnostic equipment with regard to data acquisition, equipment interfacing, and data analysis. Mr. Chan, Mr. Cho (F)

210. Principles of Medical Imaging. Prerequisites: course 200A, 200B, 205, 209. Study of image representation in spatial and frequency domains. Methods of measuring PSF, LSF, ESF, MTF, and signal to noise ratio. Other topics include Fourier method, histogram analysis, filter design, sampling theory, optics and system analysis, image compression, and ROC analysis. Mr. Chan, Mr. H.K. Huang (W)

211. Medical Ultrasound. Lecture, 90 minutes; laboratory, two hours. Prerequisite: at least one calculus course; for non-Radiological Sciences Department students: consent of instructor. Designed to teach graduate biomedical physics students to calibrate ultrasound medical imaging equipment, to evaluate new instrumentation and research in the field, and to initiate their own research into clinical ultrasound studies. Ms. Kimme-Smith (W)

212. Biochemical Basis of Positron Emission Tomography (PET). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Introduction to biochemical processes and application of radioisotopes to study metabolism noninvasively by positron emission tomography (PET). Validation of kinetic models to derive quantitative information from PET. Introduction to clinical and experimental application of PET. Mr. Buxton (F)

213. Quantitative Autoradiography. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Application of quantitative autoradiography for estimating brain and heart functions. Topics include 2-deoxyglucose method for metabolic rate; iododeoxyglucose method for blood flow; amino acid method for protein synthesis; quantitative receptor autoradiography; neuroanatomy and neurophysiology of autoradiography and PET scan interpretation. Mr. Ackermann

214. Medical Image Processing Systems. Prerequisites: courses 209, 210, consent of instructor. Architectures, design, and programming of medical image processing systems. Use and development of benchmark programs to evaluate performance of image processing systems. Provides experience with at least five different image processing systems. Mr. H.K. Huang, Mr. Stewart (Sp)

215. Breast Imaging Physics and Instrumentation. Lecture, three hours; laboratory, two hours. Prerequisites: consent of instructor. Review of modals of radiation physics. Applications of imaging technologies to mammography, including X-ray generators, tubes, xerography, ultrasound, MRI, and digital units. Quality control, dose measurements on dedicated, recently manufactured equipment. Ms. Kimm-Smith (F)

216. Fundamentals of Dosimetry. Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Review of various interactions of radiation with matter and introduction to fundamentals of radiation dosimetry. Overview of dosimetry instrumentation as well as radiation sources in laboratory. Mr. Myers (W)

217. M320. Computed Tomography: Theory and Applications. (Same as Biomathematics M230.) Prerequisite: consent of instructor. Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedical engineering. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications. Mr. S-C. Huang (W)

260A-260B-260C. Seminars in Medical Physics (2 units each). Joint critical study by students and instructors of knowledge pertaining to medical physics. Periodic contributions made by visiting scientists. Discussion of research in progress. May be repeated. Mr. Norman

268. Radiopharmaceutical Chemistry. Lecture, two hours; discussion, two hours. Biochemical principles of radiopharmaceutical design, utilization, and synthesis, with emphasis on positron-emitting labeled radiopharmaceuticals for PET. Application of radiopharmaceuticals to in vivo quantitative estimation of biochemical and pharmacological parameters in humans with PET (i.e., membrane transport, metabolism, biosynthesis, and neurotransmission). Mr. Barrio (Sp)

269. Seminar in Medical Imaging (1 unit). Prerequisite: consent of instructor. Continuous registration required of students in medical imaging specialty. Topics of current interest in medical imaging, with lecturers from the department, other universities, and private industry. Mr. H.K. Huang, Mr. Stewart (F,W,Sp)

495. Special Studies in Biomedical Physics. Discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Teaching assistance in graduate laboratory courses under supervision of a faculty member. S/U grading.

596. Research in Biomedical Physics (4 to 12 units). Directed individual study or research. Only one 596 course may be applied toward M.S. degree requirements. May be repeated for credit.

597. Preparation for Ph.D. Qualifying Examinations. May not be applied toward M.S. degree requirements. May not be repeated. S/U grading.

Surgery

72-131 Center for the Health Sciences, (213) 825-7017

Executive Chair
Michael J. Zinner M.D. (William P. Longmire, Distinguished Professor of Surgery)

Executive Vice Chair
Donald G. Mulder, M.D.

Vice Chairs
Edward P. Passaro, Jr., M.D. (Wadsworth VA)
Howard A. Reber. M.D. (Sepulveda VA)
Jesse E. Thompson, Jr., M.D. (Olive View)
S. Eric Wilson, M.D. (Harbor-UCLA)

Scope and Objectives

The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain broad knowledge of diseases treated by surgical means, to understand the pathology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the impact of surgical illness on the patient and the patient's family and environment.

Third-year students participate in a 12-week core clerkship in clinical surgery. UCLA, Wadsworth VA, and Harbor-UCLA Medical Centers provide individual sections, each of which has a special orientation depending on the patient population and the individual staff. During the fourth year students may elect to take additional clinical clerkships with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For further details on the Department of Surgery and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

598. Research for and Preparation of M.S. Thesis (4 to 12 units). Two 598 courses (or 598 and 596 combined) may be applied toward M.S. degree requirements. May be repeated. S/U grading.

The excellent reputation of the UCLA School of Nursing has been achieved by the faculty, students, and graduates. The school is recognized nationally and internationally for its fine undergraduate and graduate programs.

Faculty members are selected for their expertise, both in clinical areas of specialization and in research, and for their ability to transmit knowledge. In addition, highly skilled nurses practicing in many clinical settings are affiliated with the school and participate in the educational process.

In the curriculum, strong emphasis is placed on clinical competency and research. Faculty members are particularly cognizant of the needs of patients who represent a broad ethnic, racial, and cultural spectrum and have provided an emphasis on cultural diversity within the curricula. The School of Nursing has especially good technological support established to enhance the learning; for example, computer, media, and print resources are available for student use and are integral to the environment.

Students are selected for their capabilities, background, and potential for contributions to the profession and are prepared as highly competent professional nurses. Alumni, employed at all levels in many employment settings in different geographical areas, well represent the School of Nursing.

The school offers outstanding educational opportunities. Faculty, staff, and administration are proud of the accomplishments and recognition of the school and its graduates and that the school continues to be in the forefront in preparing the future leaders in nursing.

Frances M. Wiley, R.N., M.N.

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. If you are interested in the academic programs offered, you are urged to attend a counseling session or request a copy of the Announcement of the UCLA School of Nursing by writing to the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702 (825-7181).

History and Accreditation
In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of a graduate basic program in nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1965 the Master of Nursing degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted.

The baccalaureate program has been continuously approved by the California Board of Registered Nursing since 1949. The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The Accrediting Service of the National League for Nursing has granted full accreditation to the programs since 1954.

Degrees Offered
Bachelor of Science (B.S.)
Master of Nursing (M.N.)
Doctor of Nursing Science (D.N.Sc.)

Bachelor of Science Degree
The baccalaureate program leading to the Bachelor of Science degree provides for a close intertwining of general and professional education. The physical, social, and emotional health aspects of nursing are emphasized throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers.

Credit by examination is available to qualified students on review of previous education.

Admission
The School of Nursing strives to attain a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on scholarship, diverse life experiences, and disadvantage. You must have completed a minimum of 84 quarter units, with grades of C or better in prerequisite courses and an overall grade-point average of 2.8 or better. Three letters of recommendation are also required. Diverse life experiences, including previous employment, volunteer work, and community service which reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantage such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical handicaps. Completed applications should reflect clearly identified career goals and documentation of your potential in nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits 50 students each Fall Quarter. In addition to the regular UC Undergraduate Application Packet which must be returned in the self-addressed envelope included in the packet, an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702.

You can find a discussion of the prenursing curriculum and prehealth advising in "Preparing for a Professional School" in Chapter 5.

Degree Requirements
The Bachelor of Science degree is granted on fulfillment of the following requirements.

1. You must complete 45 required courses (180 quarter units) of college work and satisfy the general University requirements.

2. Of the required 45 courses, at least 21 courses must be in general education, including the courses listed under the "Prenursing Curriculum" in Chapter 5 on the College of Letters and Science.
(3) You must complete at least 26.5 courses (106 quarter units) of upper division coursework toward the degree, including Nursing 101, 104A, 104B, M105, 109, 120A through 120G, 184, two courses from 190A through 190F, 192, 193, 195, four electives, Biostatistics 100A, Epidemiology 112.

(4) You must maintain an overall grade-point average of C (2.0) or better in all courses taken while a student in the School of Nursing.

(5) You must complete all required nursing courses in the school and receive grades of C or better in the following courses: Nursing 101, M105, 109, 120A through 120G, and two courses from 190A through 190F.

(6) You must be enrolled in the School of Nursing during your final three terms in residence; the last nine courses must be completed while so enrolled.

Study Lists — You may not enroll in more than four courses per term unless a petition is approved in advance by the assistant dean.

Honors

Dean's Honors

Dean's Honors are awarded annually to undergraduate students completing the academic year with distinction. To be eligible you must achieve an overall grade-point average of 3.75 on a minimum of 36 graded units of work completed during the academic year.

Honors with the Bachelor's Degree

Honors are awarded at graduation to students with a superior overall grade-point average. The levels of honors and the requirements for each level are: summa cum laude, an overall average of 3.85; magna cum laude, 3.65; cum laude, 3.5. To be eligible you must have completed at least 90 University of California units for a letter grade.

School of Nursing Faculty Award

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor's and the master's program with the highest grade-point average in all nursing courses.

Master of Nursing Degree

In the Master of Nursing (M.N.) degree program, students contribute to improving nursing care through the application of advanced knowledge in nursing research, theory, and clinical practice. Throughout the program, the structure for nurse-educator relationships and research is provided by the nursing process. This is a deliberate problem-solving activity which includes assessment, diagnosis, intervention, and evaluation. In addition to their clinical specialization sequence, students may elect courses in teaching, consultation, and/or administration as preparation to meet their specific career goals.

Admission

You must provide evidence of the following:

1. Graduation from a recognized college or university having a National League for Nursing-accredited baccalaureate nursing program satisfactory to the School of Nursing and to the Graduate Division OR

Graduation with a baccalaureate degree in nursing from an international institution with a nursing program satisfactory to the School of Nursing and to the Graduate Division. You may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees OR

Registered nurse with a baccalaureate degree in a health-related field. You may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees.

2. Status as a licensed registered nurse in the State of California.

3. An upper division statistics course or a lower division statistics course with content equivalent to Biostatistics 100A, to be completed before entering the school.

4. An upper division nursing research course taken at an NLN-accredited institution and equivalent to Nursing 193, to be completed before entering the school.

5. An upper division physical assessment course equivalent to Nursing 192, to be completed before entering the school.

6. Professional and/or academic competence in nursing attested through three letters of recommendation.

7. A scholarship record satisfactory to the Graduate Division and to the School of Nursing.

8. A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) for applicants from foreign countries in which English is not the primary language and medium of instruction, whether licensed registered nurses in the U.S. or not (scores must be submitted prior to consideration for admission). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

9. A passing score on the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination for international applicants who are not licensed registered nurses in the U.S., prior to consideration for admission.

In addition to the Graduate Division application, you must file the Application for Admission to the School of Nursing, available through the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702. Application deadlines are June 1 for Fall Quarter and December 31 for Spring Quarter. For information on admission to graduate standing, see Chapter 3.

Major Fields or Subdisciplines

The School of Nursing offers graduate studies in the following areas.

Maternal-Child Health — Maternity, neonatal critical care, pediatrics.

Medical-Surgical Nursing — Cardiopulmonary, critical care/chronic care, nursing administration, oncology.

Primary Ambulatory Care / Family Nurse Practitioner — Family, gerontology, occupational health.

Psychiatric-Mental Health Nursing

You may choose to add preparation in education or administration to your clinical requirement.

Degree Requirements

(1) A minimum of 11 courses (44 units) in the 100, 200, 400, and 500 series is required; eight of the courses (32 units) must be taken in the School of Nursing, with five (20 units) in the 200 and 400 series. Additional coursework is required to fulfill the requirements for certain areas of specialization. A total of eight units of 500-series courses may be applied toward the total course requirement for the degree.

(2) A minimum grade-point average of 3.0 is required. Grades of B are required in graduate clinical nursing courses in order to advance to the next clinical course in a series.

(3) A minimum of three terms of full-time enrollment (eight units per term) is required for academic residence.

(4) Successful completion of a comprehensive examination or a thesis is required.

Course Requirements

You must successfully complete the following courses:

1. Research in nursing (Nursing 204).

3. Management, consultation, and professional issues (Nursing 220A — not required for administration students — and 220B).

4. Clinical practice (Nursing 401, 402, 403, 405, 416, 417, 420A through 429C). Clinical course requirements vary for each specialty area; not all courses are required in each specialty.

5. Clinical specialization.

Additional course requirements vary according to specialty area listed below.

Maternal-Child Health

Maternity Clinical Nursing Specialty — The goal of this specialty is to develop clinical specialists who take a leadership role in the nursing management of the childbearing family in all phases of the reproductive cycle. Students develop individualized plans of study to meet their

Pediatric Clinical Nursing Specialty — The goal of this specialty is to develop clinical specialists who take a leadership role in the nursing management of a selected group of neonates, children, and families. Guided options include neonates, children, and families experiencing acute/critical illness, chronic illness, developmental disabilities, or oncology. Required courses include Nursing 203, 204, 209A, 209B, 212, 220A, 220B, 223, 421A, 421B, 421C.

Neonatal Critical Care — The primary goal of this option is the expansion of knowledge and clinical expertise necessary for neonatal critical care nurse practitioners. By combining newly learned physiological, developmental, and psychosocial knowledge, nurses can become highly skilled and caring practitioners for newborns. Two or more years of experience in a Level III nursery are highly recommended. Required courses include Nursing 203, 204, 209A, 209B, 212, 220A, 220B, 223, 264, 403, 420A, 420B, 420C.

Medical-Surgical Nursing Specialty — The graduate of the medical-surgical nursing program is a specialist who takes leadership in the care of one or more specific groups of clientele whose health problems may be classified according to biological systems, pathology, acuity levels, medical treatment modalities, physical functions, or psychophysiological functions. Graduates choose from existing clinical options (i.e., cardiopulmonary, critical care/chronic care, nursing administration, and oncology), and within each option they develop individualized plans of study to meet personal and career objectives.

Cardiopulmonary — This option is designed to prepare clinical nurse specialists to meet an increasing demand for improved health services for patients with cardiopulmonary diseases. Several years of experience in acute coronary/pulmonary care settings (medical and/or surgical) and/or in cardiac/pulmonary rehabilitation is highly recommended before entering this option. Graduates are expected to function as cardiopulmonary nurse clinicians, teachers, consultants, or research associates. Required courses include Nursing 203, 204, 209A, 209B, 210, 211, 214, 215, 220A, 220B, 423A, 423B, 423C.

Critical Care/Chronic Care — The goal of this option is to prepare clinical nurse specialists in critical care or chronic care nursing. Students are encouraged to develop clinical focus in either area. At least two years of prior experience in medical-surgical nursing is highly recommended. Graduates are expected to function as critical care or chronic care clinicians, educators, consultants, or researchers. Required courses for the critical care option include Nursing 203, 204, 209A, 209B, 216, 217, 220A, 220B, 423A, 423B, 423C. Required courses for the chronic care option include Nursing 203, 204, 209A, 209B, 220A, 220B, 232, 233, 423A, 423B, 423C.

Nursing Administration — This option focuses on organizational theory, health services and financial management, and the practice of nursing administration. Students gain the basic knowledge and skills required of nursing administrators in a volatile health care environment. Nursing content develops the knowledge of advanced management practice needed to plan and evaluate nursing services. Health services and financial management content provides a framework for organizing, directing, and coordinating health care resources. The program requires six terms of full-time study, and a 10-week spring administrative residency. Stipends for the residency program are provided by the institutions in which the residency is completed.

In addition to the required courses in the School of Nursing, students in this program take courses in the School of Public Health, Department of Health Services, and the John E. Anderson Graduate School of Management. Required courses include Nursing 203, 204, 209A, 209B, 219, 220B, 428A, 428B, 428C, and four health services management/financial management courses (Management 409, Health Services 130, 436, and one organizational theory course).

Oncology — The comprehensive care of the cancer patient requires that nurses be prepared in theory and skills to minister to the patient's total needs — physical, psychological, emotional, social, and spiritual. This option is designed to prepare clinical nurse specialists for the interdisciplinary team responsibility for cancer prevention, treatment, and rehabilitation. In addition to clinical competence in preventive, detection, and rehabilitative phases of cancer care, emphasis is directed to the preparation of the clinician in research, teaching, administration, and consultation. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220B, 416, 417, 423A, 423B, 423C.

Primary Ambulatory Care/Family Nurse Practitioner Specialty — This specialty prepares family nurse practitioners to take a leadership role in the care of individuals throughout the life span. The focus is on collaborative practice to assure comprehensive quality health care and health maintenance in outpatient, work site, nursing home, or home health settings. Emphasis is on the assessment, treatment, and evaluation of the client's responses to actual or potential health problems which may be chronic or acute and include primary prevention. Special options are available in occupational health or gerontology, with additional coursework. Required courses include Nursing 203, 204, 208A, 208B, 220A, 220B, 264, 402, 429A-429B, 429C.

Gerontology — Courses in the gerontology nurse practitioner option focus on the knowledge and skills needed for leadership roles in primary health care for older adults in ambulatory and long-term care facilities, at home, and in alternative settings. Required courses include those listed under the family nurse practitioner specialty above, Nursing 221, 425A.

Occupational Health — This option integrates principles of occupational health assessment and care with primary ambulatory care of the adult. Practitioners evaluate the individual as seen within the work setting as well as within the family group. Primary focus and emphasis is on health status assessment, health promotion, illness/accident prevention, hazard control, screening, surveillance, and rehabilitation of adult workers.

Requirements are met through a combination of courses and experiences specific to the delivery of occupational health care services. Required courses include those listed under the family nurse practitioner specialty above, Nursing 412, Environmental Health Sciences 156, 256, Epidemiology 112.

Psychiatric-Mental Health Nursing Specialty — The primary intent of this specialization is the preparation of clinicians who can function in leadership, educational, research, practice, and consultative roles in mental health settings serving individuals, groups, and families from diverse cultural backgrounds. The specific bases for practice are theories and research on personality development, function and dysfunction, biopsychosocial theories of mental illness, and psychotherapeutic approaches to nursing assessment, diagnosis, and treatment of clients' responses to mental health problems.

This specialty prepares graduates for practice as mental health nurse counselors serving individuals, groups, and families with acute or chronic mental health problems. Students, in consultation with faculty members, select an area of focus among the following settings and/or populations: psychiatric or community mental health settings with adults or children, consultation liaison, or ethnic mental health. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220B, 405, 424A, 424B, 424C.

Thesis Plan

If you choose the thesis plan, you normally select a thesis committee by the beginning of your third term or following completion of Nursing 204 and 205A or 205B. You are expected to complete the thesis within the normal five- to seven-term time period. Completed theses should be filed approximately two weeks before the awarding of the degree.

Comprehensive Examination Plan

The comprehensive examination is given in written form and is scheduled each term. You are eligible to take the examination during the term in which you are advanced to candidacy.
and may repeat the examination, in its entirety or in part, twice. You must complete all requirements for the degree within one calendar year after advancement to candidacy.

Concurrent Degree Program

M.B.A./M.N.
The School of Nursing and the John E. Anderson Graduate School of Management offer a concurrent degree program designed for students interested in employment in all sectors of the health care delivery system, including hospitals, corporate health care headquarters, home health care agencies, and long-term care facilities, as well as policy-making bodies and consulting firms. Students must request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the School of Nursing Student Affairs Office.

Doctor of Nursing Science Degree

The Doctor of Nursing Science (D.N.Sc.) degree program is research oriented with a focus on clinical nursing research. The goal is the development of scholars who, through the conduct of original research and the generation of theory, will build the knowledge base for professional practice. The curriculum allows students to obtain the theoretical and scientific knowledge necessary for scholarly pursuit in nursing.

Admission
Priority is given to graduates of accredited master's degree programs in nursing. Individuals admitted to doctoral study with a bachelor's degree in nursing and a master's degree in a non-nursing field are required to make up clinical specialty deficiencies by taking clinical courses in one of the current master's clinical specialty programs. Such courses may be taken concurrently with doctoral courses. Individuals admitted to doctoral study with a bachelor's degree in nursing are required to complete a program of master's courses in nursing at UCLA as a prerequisite to entry into doctoral courses.

A philosophy of science course (Philosophy 227 or 232 or its equivalent) is a prerequisite to the program. The course may be taken after admission has been granted and/or concurrently with nursing theory courses during your first year in the program but must be completed prior to taking the written qualifying examination.

Applications are reviewed on an individual basis by the doctoral program committee. Applicants whose application materials indicate a high potential for success in the doctoral program are interviewed. Preference is given to applicants who demonstrate (1) capacity for original scholarship and nursing research as evidenced by prior publications, (2) consistent research objectives and career goals, (3) research objectives congruent with those of the faculty in the School of Nursing, and (4) scholarly verbal and written communication skills.

You must provide evidence of the following:
1. A Master of Nursing degree; a Bachelor of Science degree in Nursing and a master's degree in a non-nursing* field; or a Bachelor of Science degree in Nursing*. Degrees must be from a National League for Nursing-accredited program satisfactory to the School of Nursing and to the Graduate Division.
2. A scholarship record satisfactory to the Graduate Division and to the School of Nursing, with a minimum grade-point average of 3.5.
3. A combined verbal, quantitative, and analytic score of at least 1,500 on the Graduate Record Examination (GRE), taken within the past five years.
4. An upper division statistics course with content equivalent to Biostatistics 100A, 100D, or Biomathematics 170A.
5. A graduate research in nursing course with content equivalent to Nursing 204.
6. A graduate nursing theory course with content equivalent to Nursing 203.
7. A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) for applicants from foreign countries in which English is not the primary language and medium of instruction (scores must be submitted prior to consideration for admission). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.
8. A passing score on the nursing and English portions of the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination for international applicants who are not licensed as registered nurses in the U.S., prior to consideration for admission.
9. Status as a licensed registered nurse; prior to entrance into any clinical practicum, evidence of current licensure as a registered nurse in the State of California is mandatory.
10. Four letters of reference affirming your potential for scholarly, investigative, and creative endeavors in nursing.
11. Examples of scholarly papers and/or creative works.
12. A statement of educational objectives, specific focus of research, and program and career goals.
13. Curriculum vitae.

Areas of Study

Students in the doctoral program focus their study in one of three areas: (1) sociocultural diversity — formulation, investigation, and evaluation of social and cultural similarities and differences that influence the perceptions of health and illness, the treatment of illness, and the utilization of health services; (2) psychophysical environment — formulation, analysis, and investigation of the effects of the psychological and physical environments (both internal and external) on health/illness states, on cooperation with treatment regimens, and on preventing hospitalization and rehospitalization; (3) health-illness continuum — formulation, analysis, and evaluation of measures to enhance the patient's ability to promote, maintain, or regain health states and to combat illness states.

Degree Requirements
You must meet the University minimum standards for doctoral degrees. School of Nursing requirements are as follows:

1. Completion of core and cognate courses required for your area of focus.
2. Successful completion of a written qualifying examination and the University Oral Qualifying Examination.

Course Requirements

Core Courses
The following core courses are required of all students in the program:

1. Nursing science (Nursing 206A, 206B).
3. One statistics sequence (Biostatistics 206A-206B, or Psychology 252 and 253, or Sociology 210A-210B, or equivalent, subject to approval of your faculty adviser and the doctoral program committee chair).
4. One major area of study course (Nursing 226 or 227 or 228).

Cognate Courses
A minimum of 24 units of cognate courses relevant to your major area of study (sociocultural diversity, psychophysical environment, or health-illness continuum) is required and must be approved by your adviser and the doctoral program committee.
Qualifying Examinations

The written qualifying examination must be passed after completion of the basic core courses. The examination evaluates three areas of knowledge: the basic concepts of nursing science, nursing research methods and analysis, and the basic concepts of your selected area of study. Normally no more than one reexamination is permitted.

The University Oral Qualifying Examination, taken after completing the course requirements, evaluates your dissertation proposal. You are responsible for obtaining the consent of five or more faculty members to serve on your doctoral committee.

After passing the University Oral Qualifying Examination, you may apply for advancement to candidacy. Formal notice is contingent on approval by the chair of the doctoral committee and the dean of the Graduate Division.

Final Oral Examination

When the dissertation is completed and approved by all committee members, a meeting for oral defense, which may be open to the public, is scheduled. All members of the committee, both certifying and noncertifying, must be present. You are expected to respond to any substantive and/or methodological questions raised during the meeting.

Upper Division Courses

101. Introduction to Art and Science of Nursing (8 units). Lecture, four hours; laboratory, 12 hours; autotutorial laboratory, variable. Introduction to nursing theory and practice. Content includes the following modules: nursing process, pharmacology, interpersonal and technical skills. Methodology includes laboratory, lectures, autotutorial laboratory, and clinical application. Ms. Lee and the Staff

104A. Behavior of Man in Health and Illness (2 units). Prerequisite: consent of instructor. Limited to nursing students. The health-illness continuum from framework of social and biological sciences. Content includes role theory, developmental theory, transcultural communication theory, and other theories relevant to nursing practice. Ms. Mintz-Binder (F)

104B. Behavior of Man in Health and Illness. Lecture, two hours; discussion, two hours. Prerequisite: course 104A. Examination of health-illness continuum from framework of illness as a stressor and coping, two hours; laboratory, 18 hours (five weeks). Prerequisites: courses 101, M105, 102. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical concepts of growth and development related to nursing care of the child and its family. Ms. Fredrickson, Ms. Opas

120C-120D. Medical-Surgical Nursing of Adults and Older Adults I, II (6 units each). Lecture, six hours (five weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, M105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical concepts of reproduction to nursing care of the family. Ms. Killion

120E. Psychiatric/Mental Health Nursing (5 units). Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, M105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of mental health content related to nursing care of individuals, groups, or communities. Ms. Currier, Ms. Wilson (W)

125. Community Health/Gerontological Nursing (5 units). Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, M105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of community health concepts to nursing care in community health agencies. Ms. Mintz-Binder (F)

122G. Medical-Surgical Nursing of Adults and Older Adults III. Lecture, six hours (five weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 120C-120D. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical content, including aging process, related to medical-surgical nursing care of the adult/older adult patient. Ms. Munday, Ms. Wilson (Sp)

M158. Health in Culture and Society. (Same as Anthropology M168.) Prerequisite: upper division standing. Examination of theories and methods of medical anthropology in relation to cross-cultural health systems, role networks, ancy, and group boundaries. Required of third-year nursing students. Lecture and discussion, with emphasis on a correla- tive approach to anatomy and physiology of human body systems. Ms. Mintz-Binder (F)

109. Communication in Health Care (3 units). Lecture, two hours; laboratory, three hours. Prerequisite for non-nursing students: consent of instructor. Study of basic communication and group process theory and its application to practice. Laboratory experience, with emphasis on development of each individ- ual's ability to communicate effectively in a dyad and in a small group. Ms. Mintz-Binder (F)

189. Human Sexuality. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Lecture, three hours; discussion, one hour. Prerequisite: courses 101, M105, 109, 120A. Designed to provide present with review of the synthesis of assessment skills and knowledge covering the life span. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and the required text are mandatory. Ms. Hart-Kepler and the Staff
193. Introduction to Research. Introduction to planning a research project based on a simple question. Rules for definition of terms, alternative methods of writing purposes, selecting a sample, choosing a data collection instrument, planning for data analysis, protection of human rights, reading research reports, and writing a research proposal. Ms. Vredeveen and the Staff

194. Computer Systems in Health Care. Lecture, three hours; laboratory, three hours; field trips. Introductory course in review and evaluation of computer systems in nursing administration, education, and practice. Ms. Omery

195. Nursing Leadership in a Changing Environment (3 units). Theories of leadership, management, and change explored in relationship to delivery of patient care services. Issues of professional socialization; methods of providing leadership in a changing health care environment. Ms. Omery

196. Health Care Problems of Minority Group Members. Prerequisite: Sociology 1. Description and discussion of special health care problems that members of minority groups face which may become a part of socioeconomic status as well as ethnic background and subcultural differences. Ms. Omery

199. Special Studies in Nursing (2 to 16 units). Prerequisites: senior standing and/or consent of instructor. Individual study of a problem in the field of nursing. May be repeated for credit, but only four units may be applied toward degree requirements. P/NP or letter grading. Ms. Vredeveen and the Staff

Graduate Courses

Research in Nursing, Nursing Theory, and Cultural Diversity

202. Philosophical Foundations of Science of Nursing. Prerequisite: doctoral standing or consent of instructor. Designed to explore major schools of thought in contemporary Western philosophy of science, with emphasis on ways in which these schools may and do influence nursing science and practice. Ms. Omery

203. Theoretical Frameworks for Nursing Practice. Comparative study of selected conceptual models of nursing and the recipient of nursing, with particular emphasis on regulatory model, adaptation model, complementary model, and complementary model. Ms. Vredeveen and the Staff

204. Research in Nursing: Advanced Course. Prerequisite: course 193 or equivalent upper division bachelor's degree. Survey of basic research methodology course. Complex research designs and analysis of multiple variables, with emphasis on techniques for control of variables, data analysis, and interpretation of results. Analysis in depth of interrelationship of theoretical frameworks, design, sample selection, data collection instruments, and data analysis techniques. Content discussed in terms of clinical nursing research problems. Ms. Vredeveen and the Staff

205A. Qualitative Research Methods in Nursing. Prerequisite: course 204. Emphasis on nursing research designs utilizing field method approach, ethnomet hodology, and/or inductive methods. Ms. Omery

205B. Quantitative Research Methods in Nursing. Prerequisite: course 204. Emphasis on nursing research designs requiring statistical analysis of data. Ms. Vredeveen

206A. Nursing Theory Development: Issues and Methods. Lecture, two hours; seminar, two hours. Prerequisites: courses 203 and Philosophy 227 or 232 or equivalent. Issues and methods of developing nursing theories and models, including characteristics, significance, and function of theories and models, and rationale for theory development in nursing. In Progress grading (credit to be given only on completion of course 206B). Ms. Flaskeur

206B. Nursing Theory Development: Application and Integration. Lecture, two hours; seminar, two hours; laboratory, two hours. Prerequisites: courses 203 and Philosophy 227 or 232 or equivalent. Issues and methods of application and integration of nursing theory in practice, education, administration, and research, including characteristics, significance, and function of nursing theories and models in testing nursing theories. Ms. Dracup

207. Research in Nursing: Measurement of Clinical Variables. Lecture, two hours; discussion, two hours. Prerequisites: courses 204, and 205A or 205B or equivalent. Analysis of methods of measurement of physiological and psychological variables relevant to clinical nursing research, with emphasis on purposes, underlying assumptions, strengths, and limitations of measurement techniques. Analysis of techniques to develop reliability, validity, sensitivity of measurement instruments. Ms. Dracup

208. Research in Nursing: Measurement of Outcomes. Discussion, three hours; field application, six to eight hours. Prerequisites: courses 206A, 207. Measurement theories, including topics related to validity, reliability, and sensitivity, and to problems of developing measurement instruments. Emphasis on opportunity to develop knowledge and skills through course content and individualized direct involvement in a clinical research project. Ms. Seraydarian

209A. Human Responses to Illness. Lecture, three hours; discussion, one hour. Introductory graduate-level nursing research course, with emphasis on psychological, sociocultural, and role-related responses to illness. Designed to provide conceptual base that nurses can use in assessing, diagnosing, planning, and intervening in these human responses to illness. Ms. Anderson, Ms. Killion

209B. Human Responses to Illness. Lecture, three hours; discussion, one hour. Emphasis on techniques for control of variables, data analysis, and interpretation of results. Corequisite: upper division human physiology course. Advanced treatment of topics presented in lectures and seminars, with emphasis on current research. Application of knowledge to nursing problems. Ms. Seraydarian

210. Respiratory Physiology as It Relates to Nursing. Lecture, three hours; discussion, one hour. Prerequisites: upper division human physiological course. Aspects of life span development relevant to understanding health needs in middle and later years. Changes in biological, cognitive, and psychosocial processes; implications for professional practice. Ms. van Servellen

211. Cardiovascular Physiology as It Relates to Nursing. Lecture, three hours; discussion, one hour; seminars. Prerequisite: upper division human physiological course. Aspects of life span development relevant to understanding health needs in middle and later years. Changes in biological, cognitive, and psychosocial processes; implications for professional practice. Ms. Seraydarian

212. Discontinuities in Family Health during Reproductive Years. Lecture, two hours; discussion, one hour. Overview of selected problems with health connotations that are potentially disruptive to the family during childbearing years. Selected problems examined in depth. Pertinent variables affecting family's definition of situation, resources, strategies for coping and utilization of professional services; their relevance for nursing practice. Ms. Reeder

214. Human Responses to Cardiovascular Illness. (Formerly numbered 415.) Corequisite: course 211. Emphasis on basic methods of assessing cardiovascular function in health and illness, with emphasis on their application in clinical nursing practice. Ms. Reeder

215. Human Responses to Respiratory Illness. (Formerly numbered 410.) Corequisite: course 211. Emphasis on basic methods of assessing respiratory function in health and disease, with emphasis on commonly seen respiratory diseases. Acute, chronic, and rehabilitative focus. Ms. Cooper

216. Human Responses to Critical Care I. Lecture, three hours; discussion, one hour. Prerequisites: courses 206A, 206B. Application of theory/research to health and illness-related phenomena of behaviors occurring as health status changes, self-definition of health and illness, relationship of patients and health care providers, and societal influences on health behaviors. Ms. Reeder

219. Essentials of Accounting and Budgeting in Health Care Organizations. Prerequisite: graduate standing in nursing administration or consent of instructor. Introduction to concepts, issues, and techniques of accounting and budgeting with which a nurse administrator must be familiar. Major topics include cost behavior and analysis, cost accounting, forecasting, capital, operating, and cash budgets, and budgetary control systems. Ms. Seraydarian

220A. Essentials of Nursing Management. Lecture, two hours; discussion, one hour; laboratory, three hours. Study of management theories and their application to nursing service in health care environments. Emphasis on basic management functions of planning, organizing, staffing, leading, and controlling. Use of group process, lecture, and laboratory techniques. Ms. van Servellen

220B. Consultation and Professional/Ethical Issues. Lecture, three hours; discussion, one hour. Recommended prerequisites: course 220A, one graduate-level clinical practice course. Study of theories and practices of professional role development in health care environments. Emphasis on consultation and professional and ethical issues as foundation for advanced nursing practice. Lectures, panel presentations, and group discussion. Ms. van Servellen

221. Theoretical Frameworks for Developmental Problems, Middle and Later Years. Aspects of life span development relevant to understanding health needs in middle and later years. Changes in biological, cognitive, and psychosocial processes; implications for professional practice. Ms. Gottesman, Ms. Zahr

222. Management of Developmental Problems, Early Years. Lecture, two hours; discussion, two hours. Study of selected human developmental theories, hypothetices, and concepts as they relate to children. Professional role development in health care environments. Emphasis on role development and implications of pertinent literature. Ms. Gottesman, Ms. Zahr

226. Psychophysical Environmental Influences on Health-Illness Behaviors and Health Outcomes. Lecture, two hours; discussion, two hours. Prerequisites: courses 206A, 206B. Study of theory and research on stress and coping, adverse physical aspects of environment, and social and interpersonal climates and their influence on health behaviors. Ms. Nyamathi

227. Nursing's Role in Health-Illness Continuum. Lecture, three hours; discussion, one hour. Prerequisites: courses 206A, 206B. Application of theory/research to health-illness-related phenomena of behaviors occurring as health status changes, self-definition of health and illness, relationship of patients and health care providers, and societal influences on health behaviors. Ms. Nyamathi

228. Socialcultural Variations in Health and Illness. Lecture, two hours; discussion, two hours. Prerequisites: courses 206A, 206B. Relationship of sociocultural factors to health systems and diagnosis and treatment of illness, ethnomedical systems, and integration of sociocultural variables into clinical nursing research. Ms. Flaskeur
Clinical Practice

401. Nursing Assessment and Intervention. Lecture, two hours; laboratory, four to eight hours. Prerequisite or corequisite: course 203, instruction and experience in systematic assessment of patients for identification of nursing problems. Discussion and evaluation of major modes of intervention practice.

402. Primary Diagnosis for Nurse Practitioners. (Formerly numbered 402E.) Lecture, three hours; laboratory, three hours. Prerequisites: courses 192 or equivalent, admission to nurse practitioner specialty area of primary ambulatory care section, consent of instructor. Collection, analysis, and reporting of data used by the nurse practitioner in identification of patient problems. Principles and practice in history taking, physical examination, laboratory, and other diagnostic methodology. Pathology and pathophysiology integrated in a systems approach.

Ms. Keenan and the Staff

403. Assessment and Care of High-Risk Neonates. Lecture, two hours; laboratory, six hours. Prerequisite: consent of instructor. Overview of concepts and techniques of nursing assessment of the at-risk fetus/neo-nate and related clinical implications for practitioners. Ms. Gottesman and the Staff

405. Assessment in Psychiatric Nursing. Lecture, two hours; laboratory, six hours. Preparatory course for advanced clinical practice. Critical examination of concepts and strategies which affect assessment of psychological behavior.

Ms. Ver Steeg

410A. Nursing Care of Developmentally Disabled. (Same as Psychiatry M472A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: consent of instructor. Study of the handicapping conditions of childhood and their effects on the individual and family. Content based on normative developmental models with consideration for sociocultural diversity. Emphasis on prevention, systematic assistive treatment, and support of the family. Introduction to implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience. Ms. Betz (F)

410B. Nursing Care of Developmentally Disabled. Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course 410A and/or consent of instructor. Study of philosophical and conceptual models relating to delivery for developmentally disabled. Emphasis on primary, secondary, and tertiary prevention. Ms. Betz (W)

410C. Nursing Care of Developmentally Disabled. (Same as Psychiatry M472C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course 410B and/or consent of instructor. Exploration and participation in assessment, planning, and delivery of health care to developmentally disabled in a variety of settings. Emphasis on expanded role of the nurse. Ms. Betz (Sp)

412. Perspectives of Occupational Health Nursing Practice (3 units). Lecture, three hours; two half-day field experiences per term. Prerequisite: consent of instructor. Presentation of current occupational health within a nursing framework. Analysis of elements of worksite health programs; discussion of nursing leadership role in ensuring a safe and healthy workplace. Ms. Glazer

Ms. Sarna

417. Advanced Concepts in Cancer Nursing. Lecture, three hours; clinical observation and field trips, three hours. Prerequisite: course 250. Second clinical practicum in cancer care. Emphasis on development and refinement of clinical skills in management of patients with cancer.

Ms. Gottesman and the Staff

240A. Clinical Care of Intermediate and Recovering High-Risk Neonates (3 to 10 units). Lecture, three hours; discussion, one hour; laboratory, 18 hours. Prerequisite: course 403. First clinical practicum in care of high-risk neonates. Emphasis on development and refinement of clinical skills in care of high-risk neonates.

Ms. Gottesman and the Staff

240B. Clinical Care of Critically Ill-High-Risk Neonates (3 to 10 units). Lecture, three hours; discussion, one hour; laboratory, 18 hours. Prerequisite: course 420A. Second clinical practicum in care of high-risk neonates. Emphasis on development and refinement of clinical skills in care of high-risk neonates.

Ms. Gottesman and the Staff

240C. Advanced Clinical Care of High-Risk Neonates (8 units). Lecture, one hour; discussion, one hour; laboratory, 18 hours. Prerequisite: course 420B. Offers students opportunity to assume greater responsibility in managing care of high-risk neonates at all levels of care.

Ms. Gottesman and the Staff

241A. Clinical Nursing Care of Children (8 units). Lecture, two hours; laboratory, two hours; discussion, one hour; laboratory, 15 hours. Prerequisites: courses 203, 223. Application of a theoretical model and the nursing process to a specific, identifiable client population in a pediatric setting, with special emphasis on assessment and diagnosis. Content covers each aspect of nursing process.

Ms. Gottesman, Ms. Zahr

241B. Advanced Clinical Nursing Care of Children (8 units). Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 421A. Role of the clinical nurse specialist in pediatric nursing, with emphasis on practitioner component of the role. Students identify a selected population for whom direct care is planned and implemented within a conceptual framework for nursing intervention. Emphasis is on development of a researchable clinical question.

Ms. Gottesman, Ms. Zahr

241C. Clinical Specialization in Nursing Care of Children (8 units). Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 421A. Role of the clinical nurse specialist in pediatric nursing, with emphasis on practitioner component of the role. Students identify a selected population for whom direct care is planned and implemented within a conceptual framework for nursing intervention. Emphasis is on development of a researchable clinical question.

Ms. Gottesman, Ms. Zahr

242A. Clinical Maternity Nursing (8 units). Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 203. Emphasis on developing skills in intervention during all phases of the client's care. Prerequisites: courses 203. Emphasis on developing skills in intervention during all phases of the client's care.

Ms. Ludington and the Staff

242B. Advanced Clinical Maternity Nursing (8 units). Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 422A. Knowledge and clinical expertise refined and extended, with emphasis on high-risk conditions in the reproductive process. Emphasis on prescriptive, intervention, and evaluative phases of nursing process and on teaching, counseling skills, and collegial relations.

Ms. Konias-Griffin and the Staff

Functional Preparation

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curricular and instruction at the University. May be repeated for credit. S/U grading.
Clinical specialization in Psychiatric Nursing (6 units). Discussion, one hour; laboratory, 15 hours. Prerequisite: course 422B. Required for maternity specialization. Advanced clinical practice to foster consolidation of knowledge and skills. Emphasis on consultation and staff development dimensions of clinical nurse specialist role.

Ms. Konstant-Giffin and the Staff

Advanced Clinical Medical-Surgical Nursing (8 units). Lecture, two hours; laboratory, 18 hours. Prerequisites: courses 203, 204, 209A, 209B, 220A (may be taken concurrently). Advanced course in theory and practice of nursing care of adults. Emphasis on critical evaluation, integration, and application of scientific and theoretical knowledge within an advanced nursing practice role. Focus on acutely ill patients.

Ms. Nyamath and the Staff

Clinical Specialization in Medical-Surgical Nursing (8 units). Lecture, two hours; laboratory, 18 hours. Prerequisite: course 423A. Study of clinical specialization and other expanding roles in nursing. Emphasis on continued refinement and extension of professional knowledge and skills in a selected clinical area in care of patients with chronic health problems. Practicum planned in congruence with students' career goals.

Ms. Chang and the Staff

Clinical Specialization in Medical-Surgical Nursing (6 units). Discussion, two hours (five weeks); laboratory, 15 hours (10 weeks). Prerequisite: course 423B. Required for medical-surgical nursing specialization. Advanced knowledge and clinical skills provided to equip students to perform in clinical nurse specialist roles. Emphasis on practitioner, educator, consultant, and researcher roles.

Advanced Clinical Psychiatric Nursing (5 units). Lecture, one hour; discussion, two hours; laboratory, six hours. Prerequisites: courses 424A and consent of instructor. Focus on process of psychotherapy, with specific emphasis on knowledge and skills of assessment and individual therapy practice.

Advanced Clinical Psychiatric Nursing (8 units). Discussion, three hours; laboratory, 15 hours. Prerequisite: course 424A. Refinement and extension of understanding of the process of psychotherapy of individuals, groups, and families.

Ms. van Servellen and the Staff

Clinical Specialization in Psychiatric Nursing (10 units). Discussion, two hours; laboratory, 24 hours. Prerequisite: course 424B. Supervised internship. Students select setting and population.

Ms. van Servellen and the Staff

Advanced Clinical Gerontological Nursing. Lecture/discussion, three hours; laboratory, three hours. Prerequisite: one graduate nursing theory course. Principles and practice of assessment of psychosocial variables in health problems of the elderly. Emphasis on integrated understanding of multiple variable influences in total health. Application of knowledge and skills of psychological nursing intervention in rehabilitation of the chronically ill aged.

Ms. Mendelsohn

Clinical Specialization in Gerontological Nursing (8 units). Discussion, three hours; laboratory, 30 hours maximum. Prerequisite: course 425A. Extension and demonstration of competencies in planning and implementation of nursing programs in health problems of the elderly.

Clinical Nursing Management. Lecture, one hour; discussion, 30 minutes; laboratory, seven and one-half hours. Prerequisite: one organizational theory course. Application of management theory in a health care setting, with emphasis on organizing nursing care of groups of patients. Students work with nurse managers and clinical specialists in developing a unit philosophy, objectives, policies, standards of practice, and care evaluation mechanisms.

Ms. Burner

Advanced Clinical Nursing Management. Lecture, one hour; discussion, 30 minutes; laboratory, seven and one-half hours. Prerequisite: course 428A. Examination of role of the nurse in managing scarce resources, with emphasis on patient classification systems, staffing, and assignment of nursing personnel. Cost-effective management of human and financial resources explored extensively.

Ms. Burner

Nursing Administration Residency (8 units). Prerequisites: courses 428A, 428B. Required field residency experience. Students apply management theory to administration of nursing services in a variety of health care settings. Provides organizational-based environment in which students can develop skills in management practice.

Ms. Burner

Preceptorships in Primary Ambulatory Care Nursing (8 units each). Lecture, four hours; laboratory, 15 hours. Prerequisites: courses 264, 402. Theory and clinical practice in nursing management and evaluation of health problems in selected ambulatory population. Emphasis on health maintenance. Attention to developmental and cognitive needs of clients in relation to family, social, and cultural structures.

Ms. Davis-Sharts and the Staff

Special Studies

Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward M.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

Directed Individual Studies for Graduate Students (4 to 8 units). Prerequisite: consent of instructor. Opportunity for graduate students in nursing to pursue special research interests. May be repeated for credit, but only four units may be applied toward M.N. degree requirements. S/U grading.

Individual Study for Comprehensive Examination (4 to 8 units). May be repeated once for credit, but only four units may be applied toward M.N. degree requirements. S/U grading.

Research for Thesis (4 to 8 units). Prerequisite: consent of instructor. May be repeated for credit, but only four units may be applied toward M.N. degree requirements. S/U grading.

Research for and Preparation of D.N.Sc. Dissertation (2 to 8 units). Individualized faculty supervision of doctoral dissertation research by student's chair. May be repeated for credit, but only eight units may be applied toward doctoral degree requirements. S/U grading.
Public health is concerned with understanding, preventing, and controlling disease, and with promoting health in populations. Its goal is to ensure that the protection and improvement of the health of the public is accomplished by the most effective means consistent with equity for all individuals.

The mission of the UCLA School of Public Health is to develop, integrate, and apply pertinent knowledge from the biological, physical, and social sciences to enhance community health. In this context health is defined as a positive condition requiring not only the control of disease but also the presence of sufficient physical and mental vigor to promote well-being and improve the quality of life. To fulfill this mission the school (1) educates future public health professionals, (2) conducts research to protect and improve health and health services, and (3) contributes knowledge, expertise, and service to the community.

Students are prepared for careers in the public and private sectors, in health agencies, hospitals, industry, and voluntary organizations, and for careers in research and teaching.
School of Public Health

16-071 Center for the Health Sciences, (213) 825-5516

The School of Public Health offers graduate programs leading to both academic and professional degrees in five departments. The Department of Biostatistics develops statistical and analytical techniques for public health use. The Department of Community Health Sciences has three divisions: behavioral sciences and health education, concerned with the study and implementation of behavior which prevents disease and enhances health; nutritional sciences, concerned with investigating the role of nutrients in disease processes and promoting good nutritional practices; and population and family health, which identifies health problems of and promotes health in high-risk groups such as women, children, and the poor. The Department of Environmental Health Sciences elucidates health hazards in the general environment and in the workplace. The Department of Epidemiology is concerned with the nature, extent, and distribution of disease and health in populations. And the Department of Health Services deals with the organization, quality, and distribution of health care services. The school is also responsible for the administration of the interdepartmental degree program in environmental science and engineering.

Admission

In addition to requiring that applicants hold a bachelor’s degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings which follow. Help in deciding on a department is available in the school’s Student Affairs Office.

For information on the proficiency in English requirements for international graduate students, refer to “Graduate Admission” in Chapter 3.

Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings which follow for specific requirements and procedures.

Biostatistics

51-254 Center for the Health Sciences, (213) 825-5250

Professors

Abdelmonem A. Afifi, Ph.D., Dean
Potter C. Chang, Ph.D.
Robert M. Elashoff, Ph.D.
Donald Guthrie, Ph.D., in Residence
Robert I. Jennrich, Ph.D.
Peter A. Lachenbruch, Ph.D.
Virginia A. Clark, Ph.D., Emerita
Wilfrid J. Dixon, Ph.D., Emeritus
Olive Jean Dunn, Ph.D., Emerita
Raymond J. Jessen, Ph.D., Emeritus
Frank J. Massey, Jr., Emeritus

Associate Professors

William G. Cumberland, Ph.D., Chair
Virginia F. Rack, Ph.D.
Jeremy M.G. Taylor, Ph.D., in Residence

Assistant Professors

Dorota M. Dabrowska, Ph.D.
Nathaniel Schenker, Ph.D.
Robert E. Weiss, Ph.D.
Weng Kee Wong, Ph.D.

Lecturers

Martin L. Lee, Ph.D.
Jean L. Mickey, Ph.D., Emerita

Adjunct Assistant Professors

David W. Giertson, Ph.D.
Jin-Kae Jack Lee, Ph.D.
James W. Sayre, Dr.P.H.

Scope and Objectives

In recent years biostatistics has become one of the most stimulating areas of applied statistics. The field encompasses the methodology and theory of statistics as applied to problems in the life and health sciences. Biostatisticians are trained in the skilled application of statistical methods to the solution of problems encountered in public health and medicine. They collaborate with scientists in nearly every area related to health and have made major contributions to our understanding of AIDS, cancer, and immunology, as well as other areas. Further, biostatisticians spend a considerable amount of time developing and evaluating the statistical methodology used in those projects. The Department of Biostatistics offers M.S. and Ph.D. degrees in Biostatistics and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in biostatistics. All students receive a balanced education, blending theory and practice.

Requirements for Graduate Degrees

Admission

Application forms and the Announcement of the UCLA School of Public Health may be obtained by writing to the Office of Student Affairs, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the UCLA Application for Graduate Admission, Fellowships, and Financial Support must be completed. Three letters of recommendation (with at least two from for-
School of Public Health

The preferred deadline for graduate applications is January 15, 1991, for Fall Quarter 1991 admission. Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. Majors in mathematics, computer science, or a field of application in biostatistics are preferred. Your undergraduate preparation should include calculus and linear algebra. If your undergraduate coursework has been deficient in breadth of fundamental training, you must take specified undergraduate courses after admission.

Prior field experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE), The Medical College Admission Test (MCAT), Dental Admission Test (DAT), or Graduate Management Admission Test (GMAT) may be accepted in lieu of the GRE under certain circumstances. Strong emphasis is placed on the quantitative and analytical components of the GRE; the department does not have a minimum combined score requirement.

Courses

Refer to the UCLA Application for Graduate Admission, Fellowships, and Financial Support for the Test of English as a Foreign Language (TOEFL) requirement for international applicants.

Master of Public Health

The M.P.H. with a specialization in biostatistics is a professional degree in the field of public health. You are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

Admission

Your prior program of study should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences and one course in physical sciences. At least one year of calculus is required.

If your prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for your proposed area of specialization, you must include courses in those sciences in your graduate program; these may not be applied toward the minimum requirements for the degree.

Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses, at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree. No more than 18 full courses may be required for the degree.

Required school core courses include Biostatistics 100A or 101A, Community Health Sciences 183, Environmental Health Sciences 150 or 155, Epidemiology 112, and Health Services 130. Each core course may be waived if you have taken a similar college-level course elsewhere and can pass the waiver examination.

In addition to the courses, at least three courses (two or four units) outside your area of specialization are strongly recommended.

Required department courses include Biostatistics 101A, 101B, and 101C (in exceptional circumstances, courses 100A, 100B, 100C, and 100D may be substituted); 200A, 401E or 401F or 401G; 402A, 402B (satisfies the field training requirement); three courses from 403, 404, 405, 406. Epidemiology 211A and 211B are recommended. Elective courses should be selected in public health, biostatistics, or mathematics. Students whose mathematics preparation does not include sufficient calculus must take courses in the Mathematics Department while in the M.P.H. program.

Only courses in which you receive a grade of C− or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all required courses and 3.0 (B) overall during graduate residence at the University of California.

Comprehensive Examination Plan

You must pass two comprehensive examinations, one in biostatistics and a centrally administered written examination in the general field of public health. If you fail either examination, you may be reexamined once.

The schoolwide core comprehensive examination is administered twice each academic year, usually the first Saturday in May and November. The examination in biostatistics is given each May.

Field Training

Field training in an approved public health program is required of candidates who have not had prior relevant field experience. Biostatistics 402A and 402B satisfy this requirement.

Master of Science Degree

The Master of Science is a research-oriented degree within the general field of biostatistics. Teaching experience is not required.

Admission

In addition to the general requirements for admission, your undergraduate preparation should include Mathematics 31A, 31B, 32A, 32B, 33A, 33B (second-year calculus), or the equivalent.

Course Requirements

The M.S. degree requires a minimum of nine graduate and upper division courses, of which at least five must be graduate courses in the 200 and 500 series. The five required graduate courses must be in biostatistics or mathematical statistics, including at least three courses in biostatistics.

Areas of Specialization

Areas of specialization and typical course plans are listed below.

Biostatistics

Unless previously taken, the following courses must be included in the degree program: Biostatistics 101A, 101B, 101C, M101D, 200A, 200B-200C, 204E, 402A, 402B; any two courses from 201E, 201F, 201G, 201H, 201J, M201K, 201M; Statistics M152A, 152B-152C.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics, may be selected with your advisor's consent.

A written report and written comprehensive examination covering the above course material are required.

Biostatistical Health Data Management

Unless previously taken, the following courses must be included in the degree program: Program 1 in Computing, Biostatistics 101A, 101B, 101C, M101D, 200A, 200B-200C, 203A, 203B, 403, 404 or 405, Statistics M152A, 152B-152C.

One public health course in a department other than Biostatistics is selected with your advisor's consent.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics, are selected with your advisor's consent.

A written report and written comprehensive examination covering the above course material are required.

Comprehensive Examination Plan

The thesis plan is not used. The written comprehensive examination is taken during Spring Quarter of the academic year of your Biosta-
Electives, selected in consultation with your adviser, should be chosen from courses in mathematics, biostatistics, survey research methods, operations research, computer data processing, and other appropriate areas.

Screening/Qualifying Examinations
A written screening examination of all students entering the doctoral program is required and must be successfully completed before the end of your first year in the program (if not taken prior to entering). Courses covered by this and other examinations are determined in consultation with your adviser and the department faculty.

Before advancement to candidacy, you must pass written examinations in biostatistics administered by the department faculty. Normally no more than one reexamination after failure is allowed. The doctoral committee is nominated after you have made a tentative decision on a dissertation topic. The doctoral committee administers the University Oral Qualifying Examination after you have successfully completed the written examinations.

Final Oral Examination
A final oral examination is required of all candidates.

Ph.D. Degree
The Ph.D. in Biostatistics is an advanced research degree that emphasizes depth of knowledge and research skills. The dissertation must demonstrate your ability for independent scholarly investigation.

There is no foreign language requirement for the Ph.D.; teaching experience is recommended but not required.

Admission
Qualifications for admission are those currently specified by the Graduate Division (see Chapter 3). Normally, students receive an M.S. in Biostatistics before admission to the Ph.D. program. Undergraduates with sufficient coursework in mathematics and statistics are considered for admission directly into the Ph.D. program.

Course Requirements
There are no specific course requirements. However, your program of study must be approved by the department and must include, at the graduate level, three areas of knowledge: biostatistics, mathematical statistics, and a third field of application such as biology, epidemiology, infectious diseases, medicine, microbiology, pharmacology, physiology, psychology, zoology, or public health. You are encouraged to participate in the biostatistics consulting laboratory for one term each year. Recommendation for the degree is based on your attainments rather than on the completion of specified courses.

Final Oral Examination
A final oral examination is required.

Upper Division Courses
100A. Introduction to Biostatistics. (Formerly numbered Public Health 100A.) Lecture, three hours; laboratory/quiz, two hours. Prerequisites: upper division standing, one biological or physical sciences course. Students who have completed courses in statistics may enroll only with consent of instructor. Not open for credit to students with credit for course 101A. Introduction to methods and concepts of statistical analysis. Sampling situations, with special attention to those occurring in biological sciences. Topics include distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size.

100B. Introduction to Biostatistics. (Formerly numbered Public Health 100B.) Lecture, three hours; laboratory/quiz, two hours. Prerequisites: course 100A or equivalent, consent of instructor. Not open for credit to students with credit for course 101B. Introduction to analysis of variance, linear regression, and correlation analysis.

106C. Introduction to Biostatistics. (Formerly numbered Public Health 106C.) Lecture, three hours; laboratory/quiz, two hours. Prerequisites: course 100B or equivalent, consent of instructor. Design of experiments, analysis of variance, multiple and polynomial regression analysis with biomedical applications.

100D. Introduction to Biostatistics. (Formerly numbered Public Health 100D.) Lecture, three hours; laboratory, two hours. Prerequisites: course 100B or equivalent, consent of instructor. Not open for credit to students with credit for course 101B. Introduction to the concepts of probability used in biomedical sciences. Enumeration statistics and nonparametric methods. Comparison of nonparametric with analogous parametric tests. Discussion of power and sample size.

101A. Basic Biostatistics. (Formerly numbered Public Health 101A.) Lecture, three hours; quiz, one hour. Prerequisite: Mathematics 31B or equivalent. Not open for credit to students with credit for course 100A. Basic concepts of statistical analysis applied to biological sciences. Topics include random variables, sampling distributions, parameter estimator, statistical inference.
M101D-M101E. Introduction to Computational Statistics. (Formerly numbered Public Health M101D-M101E) (Same as Biomathematics M153A-M153B and Statistics M153A-M153B) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. M101D. BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; analysis of variance and covariance; nonparametric regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

F. (M101D: W. M101E)

103. Statistics for Public Health. (Formerly numbered Public Health 103.) Lecture, three hours; laboratory, two hours. Prerequisites: upper division standing, one biological or physical sciences course. Open to students in M.P.H. and nursing programs; may not be used as prerequisite for course 100B. Introduction to sources of demographic and health information, methods of calculating and interpreting vital and health statistics, and elementary methods for statistical inference.

105. Application of Statistical Theories in Biomedical Research. (Formerly numbered Public Health 105.) Lecture, three hours: discussion, one hour. Prerequisite: Mathematics 115C or consent of instructor. Review of statistical theories essential to biostatistics. Illustration of applications by examples. Topics include delta method, order statistics, asymptotic properties of MLEs, iterative algorithms for MLEs, generalized likelihood ratio tests for categorical data, and transformations.

108. Special Studies in Biostatistics. (Formerly numbered Public Health 199.) Prerequisites: upper division standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

Graduate Courses

200A. Biostatistics. (Formerly numbered Public Health 200A.) Lecture, three hours; discussion, one hour. Prerequisites: courses 100A, 100B, 100C, or 101C, one other statistics course, consent of instructor. Study design, sampling, determination of sample size, data screening, types of measurements and determination of appropriate analysis, and unidimensional scale construction. S/U or letter grading for nonmajors only.

200B-200C. Biostatistics. (Formerly numbered Public Health 200B-200C.) Lecture, three hours; discussion, one hour. Prerequisites: courses 101D, 200A, linear algebra, advanced calculus 209B. Multiple linear regression, including model validation, influence of observations, regression diagnostics; discriminant analysis; principal components; factor analysis. 200C. Measures of association and analysis of categorical data, theory of generalized linear models.

201E. Special Topics: Statistical Methods for Categorical Data. (Formerly numbered Public Health M201E.) Lecture, three hours; discussion, one hour. Prerequisites: courses 100B or 101B, Statistics 152C or equivalent, consent of instructor. Statistical techniques for analysis of categorical data; discussion and application of model for binary data, and estimation of parameters from contingency tables. 201F. Special Topics: Distribution Free Methods. (Formerly numbered Public Health 201F.) Lecture, three hours; discussion, one hour. Prerequisites: course 100D or 101B, and Statistics 152C, or consent of instructor. Theory and application of distribution free methods in biostatistics.

201G. Special Topics: Statistical Simulation Techniques. (Formerly numbered Public Health 201G.) Lecture, three hours; discussion, one hour. Prerequisites: course 100D or 152C, or consent of instructor. Theory and methods for sampling finite populations and estimating population parameters. 201H. Special Topics: Supplemental Topics. (Formerly numbered Public Health 201H.) Lecture, three hours; discussion, one hour. Prerequisites: course 100C, Statistics 152C, or equivalent, consent of instructor. Topics in biostatistics not covered in other courses.

202A. Survival Analysis. (Formerly numbered Public Health M202A) (Same as Biomathematics M281) Lecture, three hours; discussion, one hour. Prerequisites: course 100C, Statistics 152C, or equivalent, consent of instructor. Statistical methods for analysis of survival data. 201M. Introduction to Statistical Methods for Biological Assays. (Formerly numbered Public Health 201M.) Lecture, three hours; discussion, one hour. Prerequisites: course 101C, Statistics 152C. Topics include standard statistical procedures for estimation of relative potency, density of microorganisms, and density of radioactivity, models used for these procedures, and statistical considerations for designing such assays.

202F. Statistical Analysis of Incomplete Data. (Formerly numbered Public Health M202F.) (Same as Biomathematics M232.) Lecture, three hours; discussion, one hour. Prerequisites: course 101C, Statistics 152C, or equivalent, consent of instructor. Discussion of statistical analysis of incomplete data sets, with particular emphasis on biomathematics, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression analysis, computer programs, and main computational methods. 202G. Simultaneous Statistical Inference. (Formerly numbered Public Health M202G.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200C, 202A, Statistics 152C. Methods and theory of simultaneous statistical inference.

202H. Applied Bayesian Inference. (Formerly numbered Public Health M202H.) (Same as Biomathematics M234.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200C, 202A, and Statistics 152C, or consent of instructor. Bayesian approach to statistical inference, with emphasis on prior probability distributions and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approach to linear and non-linear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

202J. Statistical Graphics. (Formerly numbered Public Health 202J.) Lecture, three hours; discussion, one hour. Prerequisites: courses 101A, 101B, 101C, 200A, consent of instructor. Graphical data analysis emphasizes use of visual displays of quantitative data to gain insight into data structure by exploring patterns, revealing relationships, and to enhance classical numerical analyses, especially assumption validity checking. Principles of graph construction, graphical methods, and perception issues.

202K. Statistical Methods in AIDS (2 units). (Formerly numbered Public Health 202K.) Lecture, three hours; laboratory, two hours. Prerequisites: course 203A, consent of instructor. Data collection, analysis, and applications in biostatistics.

203A. Data Base Management Systems. (Formerly numbered Public Health 203A.) Lecture, three hours; laboratory, two hours. Prerequisites: course 403 or equivalent, consent of instructor. Data base and data base models applied to medical and public health studies; design of data bases for efficient data retrieval and statistical analysis using package data base management systems.

203B. Systems Analysis for Health Data. (Formerly numbered Public Health 203B.) Lecture, three hours; laboratory, two hours. Prerequisites: course 203A, consent of instructor. Health data computer processing, including identification and evaluation of health information systems, statistical packages, and computer languages; design, development, testing, and maintenance of a computer system for managing health data.

204E. Seminar in Biostatistics (2 units). (Formerly numbered Public Health 204E.) Prerequisites: course 200B, two courses from 201E through 201J, consent of instructor. Current developments of methodology and problems in applications of biostatistics.

204F. Advanced Seminar in Biostatistics (2 units). (Formerly numbered Public Health 204F.) Prerequisites: course 200C, consent of instructor. Current research in biostatistics. May be repeated for credit. S/U grading.

205A-M205B-M205C. Linear Statistical Models. (Formerly numbered Public Health M205A-M205B-M205C) (Same as Mathematics M279A-M279B-M279C) Lecture, three hours; discussion, one hour. Prerequisites: course 101C, Statistics 152C, or equivalent, consent of instructor. Linear statistical models, distribution of quadratic forms, Gauss-Markov theorem, fixed and random component models, balanced and unbalanced designs.

206A-206B. Multivariate Biostatistics. (Formerly numbered Public Health M206A-M206B) Lecture, three hours; discussion, one hour. Prerequisite: course 202A or equivalent. Multivariate analysis as used in biological and medical situations. Topics from component analysis, factor analysis, discriminant analysis, analysis of dispersion, canonical analysis.

207E. Advanced Topics: Stochastic Processes. (Formerly numbered Public Health 207E.) Lecture, three hours. Prerequisites: upper division mathematics, including statistics and probability. Stochastic processes applicable to medical and biological research.

207F. Advanced Topics: Mathematical Epidemiology. (Formerly numbered Public Health 207F.) Lecture, three hours. Prerequisites: course 207E or equivalent, upper division mathematics (including statistics and probability). Mathematical theory of epidemiology with deterministic and stochastic models and problems involved in applying the theory.

207G. Advanced Topics: Statistical Genetics. (Formerly numbered Public Health 207G.) Lecture, three hours. Prerequisites: upper division mathematics, including statistics and probability. Introduction to statistical genetics.
207H. Statistical Methods for Research Biological Assays (Formerly numbered Public Health 207H) Prerequisite: course 201M. Topics include statistical methods developed for research assays for which standard procedures do not apply.

207K. Advanced Topics: Survival Analysis. Lecture, three hours; discussion, one hour. Prerequisite: Mathematics 276C, same as Biostatistics 207J. Recommended: course M201K, Mathematics 276C. Censoring and truncation, single sample problems, K-sample comparisons, Cox regression model, hazard rate and density estimation, estimation in Markov chains and Markov renewal processes, multivariate models, competing risks.

207L. Advanced Topics: Recent Developments. (Formerly numbered Public Health 207L) Lecture, three hours; discussion, one hour. Prerequisite: courses 207K. Advanced topics and developments in biostatistics not covered in Biostatistics 201 or 207 series, or in other courses. Possible topics include time-series analysis, classification procedures, corresponding analysis, etc.

400. Field Studies in Public Health (2 or 4 units). (Formerly numbered Public Health 400.) Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion and case finding. Students must find field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total requirement for M.S. only.

401E. Statistical Methods in Clinical Trials. (Formerly numbered Public Health 401E.) Lecture, three hours; discussion, two hours. Prerequisite: course 100C or 100D or Statistics 152C or equivalent. Design of studies in animal and human experimentation; various types of controls; prognostic factors, survivorship, life tables, analysis of survival studies; organization of clinical trials — administration, comparability, protocols, clinical standards, data collection and management. S/U grading for nonmajors only.

401F. Statistical Methods for Longitudinal Data. (Formerly numbered Public Health 401F) Lecture, three hours. Prerequisites: courses 100C or 100D or Statistics 152C or equivalent. Epidemiology 112, consent of instructor. Design and analysis of longitudinal or panel studies. S/U grading for nonmajors only.

401G. Statistical Methods for Case-Control Studies. (Formerly numbered Public Health 401G.) Lecture, three hours. Prerequisites: courses 100C and 100D, or 101C. Statistical designs, sampling statistics, and exploratory data analysis. Special topics such as exploratory analyses, multipli- city of analyses, cross-validation, small sample performance of variance estimators, measurement error in the covariates, and incomplete data.

401H. Special Topics: Applied Statistics. (Formerly numbered Public Health 401H) Lecture, three hours; discussion, one hour. Prerequisites: course 100C, consent of instructor. Special topics in applied statistics not covered in other courses in professional series.

402A. Principles of Biostatistical Consulting (2 units). (Formerly numbered Public Health 402A) Lecture, one hour; discussion, one hour. Prerequisites: course 100B and Statistics 152B. Presentation of structure and problems of consulting: faculty and student consultant, client. Reviews of actual statistician-client interactions and case studies.

402B. Biostatistical Consulting. (Formerly numbered Public Health 402B) Lecture, two hours; laboratory, two hours. Prerequisites: courses 100C and 402A, or consent of instructor. Principles and practices of biostatistical consulting. May be repeated for credit. S/U grading.

403. Survey Methods of Health Data. (Formerly numbered Public Health 403) Lecture, three hours; laboratory, two hours. Prerequisites: at least one statistics course, two research methodology courses, Program in Computing I or equivalent, consent of instructor. Concepts of health data management, design and maintenance of large data bases on tapes or disks; computing tools and techniques facilitating data retrieval for statistical analysis, tabulation and report generation useful to biostatisticians, health planners, and other health professionals.

404. Principles of Sampling. (Formerly numbered Public Health 404.) Lecture, three hours; discussion, one hour. Prerequisites: course 100B, Epidemiology 112, or equivalent, consent of instructor. Statistical aspects of design and implementation of a sample survey. Techniques for analysis of data, including estimates and standard errors. Avoiding improper use of survey data.

405. Demographic Materials and Methods. (Formerly numbered Public Health 405.) Lecture, three hours; laboratory, two hours. Prerequisites: course 100A or 101A, Community Health Sciences 180, Epidemiology 112 or 114, or equivalent, consent of instructor. Basic demographic data analysis and interpretation. Population growth, structure, geographic distribution, mortality, fertility, and migration.

406. Applied Multivariate Biostatistics. (Formerly numbered Public Health 406.) Lecture, three hours, laboratory, one hour. Prerequisites: course 100B, at least two upper division research courses, consent of instructor. Use of multiple regression, principal components, factor analysis, discriminant function analysis, logistic regression, and canonical correlation in biomedical data analysis. S/U grading for nonmajors only.

409. Introduction to Microcomputers (2 units). (Formerly numbered Public Health 409.) Lecture, one hour; laboratory, one hour. Prerequisites: upper division physical, biological, or social sciences courses or consent of instructor. Introduction to microcomputers and their applications. M. Lachenbruch

495. Teacher Preparation in Biostatistics (2 to 8 units). (Formerly numbered Public Health 495.) Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). (Formerly numbered Public Health 501.) Prerequisite: consent of UCLA graduate advisor and department chair, and campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward UCLA graduate degree requirement; may not be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units). (Formerly numbered Public Health 502.) Prerequisite: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UA Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while UH Cr/Ncr-graded courses appear as S/U grades. Grade points from these courses are not counted toward graduate degree. UH grade point average.

506. Directed Individual Study or Research (2 to 8 units). (Formerly numbered Public Health 506.) Prerequisite: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

507. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units). (Formerly numbered Public Health 507.) Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research (2 to 8 units). (Formerly numbered Public Health 598.) Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.
Adjunct Assistant Professors
Roger A. Clemens, Dr.P.H. (Nutritional Sciences)
Pamela Erickson, Dr.P.H. (Population and Family Health)
Daniel H. Ershoff, Dr.P.H. (Behavioral Sciences and Health Education)
Stewart A. Laidlaw, Ph.D. (Nutritional Sciences)

Scope and Objectives
The objective of the Department of Community Health Sciences is to develop, integrate, and apply biomedical, psychological, and social approaches to the promotion and preservation of health. In order to accomplish this, the breadth of the instructional and research programs encompasses the following interrelated professional disciplines: (1) populations - their demographic characteristics, mental, physical, and reproductive health status, and health behaviors. Vulnerable groups, particularly women and children, are of particular concern; (2) nutrition - the understanding of underlying biologic mechanisms and their implications for improving the nutritional status of populations, especially groups at high risk, with emphasis on underprivileged communities, the elderly, women, and children; (3) health and illness - health education, disease prevention, and health promotion: the influence of health behavior and social forces on disease and its distribution in the population, and the development of health education and community organization strategies to prevent disease and promote health through changing health behavior and public policy. The department believes that strategies which successfully address such needs incorporate academic and professional expertise in these three areas.

Within the department, the behavioral sciences and health education division studies the social and psychological factors which are related to health status and strategies for effective prevention of disease and promotion of health. Areas of study and research interest include health behavior (e.g., smoking, AIDS, and other communicable diseases, contraception, health behavior of special populations such as ethnic minorities, the aged, etc.); program evaluation studies; the social organization and politics of health policy (e.g., access to health services, problems of long-term care, and public policy and its impact on health); and health education modalities (e.g., patient education, community education, community organization and participation, occupational health education). Most of the division's graduates are prepared as professional health educators. The division offers master's and doctoral degrees.

Work in the nutritional sciences division begins with the understanding of physiological and biochemical principles and the metabolic functions of nutrients. The program of study focuses on normal nutrition, the prevention of disease, and the promotion of health throughout life. The variety of the degrees offered reflects the multidirectional curriculum approaches available. The division has two master's degree programs — the M.P.H. and M.S. in Public Health. Qualified applicants to the M.P.H. program may also apply to a Dietetic Internship offered by the Wadsworth Veterans Administration Medical Center and approved by the American Dietetic Association. For further information, contact the Dietetic Internship Director 691/W120, West Los Angeles VA Medical Center, Wadsworth Division, Los Angeles, CA 90073. An M.P.H. with specialization in both nutritional sciences and behavioral sciences and health education is also available. There are two doctoral programs — the Dr.P.H. and Ph.D. in Public Health. A doctoral training program for cancer control is also offered.

The population and family health division uses a multidisciplinary approach that focuses on training for leadership in national and international service and research concerning health problems, programs, and policies for families. The curriculum encompasses not only the traditional emphasis on pregnant women and young children, but also on older children and adolescents and aspects of women's health throughout the life course. The program also includes consideration of population dynamics and growth, fertility patterns, reproductive outcomes, family planning, and public policy in these domains. The international track emphasizes the health and nutrition of pregnant and lactating mothers and young children and primary health care in less technologically developed Third World countries. The national (domestic) track emphasizes the health of women, children, and adolescents, especially among groups that are economically or socially disadvantaged, including cultural factors in diverse populations. The division offers programs leading to the M.P.H. and Dr.P.H. degrees.

Requirements for Graduate Degrees

Admission
Application forms and the Announcement of the UCLA School of Public Health may be obtained by writing to the Office of Student Affairs, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the UCLA Application for Graduate Admission, Fellowships, and Financial Support must be completed. Three letters of recommendation are required, two from former professors and one from an employer (if no employer, three former professors) before an application is considered complete. It is your responsibility to ensure that the application file is complete.
The preferred deadline for graduate applications is January 15, 1991, for Fall Quarter 1991 admission. Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. No screening examination is required for admission. If your undergraduate coursework has been deficient in breadth of fundamental training, you must take specified undergraduate courses after admission. Except for the population and family health division, prior field experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation. In addition, you must be accepted by and accommodated in a division of the Department of Community Health Sciences.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE). The Medical College Admission Test (MCAT) or Dental Admission Test (DAT) may be accepted in lieu of the GRE by some divisions under certain circumstances. (Note: The nutritional sciences and population and family health divisions require GRE scores. MCAT or DAT scores are accepted only for applicants already holding M.D. or D.D.S. degrees.) Applicants at the master's level require a minimum combined (verbal and quantitative) score of 1,100. Applicants at the doctoral level need a minimum combined (verbal and quantitative) score of 1,200. The analytical section is not required.

Specific Concentration Requirements

Students concentrating in nutritional sciences should have a bachelor's degree in biological, physical, or chemical sciences or related areas, with coursework including one year of general chemistry (including quantitative analysis or inorganic chemistry), one year of organic chemistry and/or biochemistry, mathematics through calculus, one year of biological sciences (including microbiology and physiology), and two quarters or one semester of physics (physics is not required for the M.P.H. program). Substitutions for these requirements will be considered for applicants with an otherwise superior academic background.

Applicants who do not qualify for admission to the M.P.H. program because they lack courses in basic nutrition and therapeutic nutrition may, on recommendation of the faculty, be admitted to the M.S. program. Students admitted to the M.S. program are eligible to petition to transfer to the M.P.H. program after satisfactorily completing courses in basic nutrition (equivalent to Community Health Sciences 162) and therapeutic nutrition (equivalent to courses 166A, 166B).

Applicants interested in population and family health are expected to have some prior experience in the health field (paid or volunteer) and preferably a bioscience or behavioral science background.

Master of Public Health

The M.P.H. is a professional degree in the field of public health. You are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses, at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree. No more than 18 full courses may be required for the degree.

Required school core courses include Biostatistics 100A or 101A, Community Health Sciences 183, Environmental Health Sciences 150 or 155, Epidemiology 112, and Health Services 130. Each core course may be waived if you have taken a similar college-level course elsewhere and can pass the waiver examination.

In addition to the core courses, at least three courses (two or four units) outside your area of specialization are strongly recommended. Only courses in which you receive a grade of C- or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Areas of Specialization

Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

Behavioral Sciences and Health Education

Community Health Sciences 181 or 125, 182, 280, 282, 287, 295A, 481, 482 (eight units), and 484 are required. In addition, three elective courses from the list of specialty areas are required. Individual and experimental courses may not be applied toward the required course units. Additional courses may be elected, in consultation with your faculty advisor, from within the department or in other schools/colleges at UCLA. Normally two years or six terms are needed to complete the course requirements. Candidates with a prior doctoral degree or advanced preparation in a related field may complete an M.P.H. degree in one year. In addition, it is possible for students to elect an additional area of concentration in another division.

Nutritional Sciences

Emphasis is on community nutrition. Required courses include Chemistry and Biochemistry 153C or Biological Chemistry 201A-201B, Community Health Sciences 165 or 261A, 260E, 260F, 260G, 260H, 262 or 263 (may be repeated for credit), 400, 460, 461, 463A, 463B.

Of the courses listed above, at least six graduate courses (at least two must be in the 400 series) and at least one seminar course (262, 263) are required.

A minimum of 56 units is required. You must take two seminars during your course of study. If residence is extended beyond four terms, more than two seminars are required.

M.P.H. students may be eligible to undertake two areas of specialization — nutritional sciences, and behavioral sciences and health education. If you plan to follow this track, you should first have your plan approved by your academic adviser in the nutritional sciences division and then submit a petition to the behavioral sciences and health education division. Students with dual areas of specialization are assigned an academic adviser in each division. In addition to the school and nutritional sciences division requirements, you must take Community Health Sciences 181 or 125, 182, 484, and three courses from 280, 282, 287, 295A, 481. You must pass one comprehensive examination covering both areas (about 75 percent of the questions are from nutritional sciences, with 25 percent from behavioral sciences and health education). If you successfully complete the above requirements, you are eligible for membership in the Society for Public Health Education.
Population and Family Health
Emphasis is on population, family health, family planning, reproductive and women's health, maternal and child health, and international health (including applied nutrition, aspects of training methodologies and curriculum design, communications strategies, community and primary health care). Two tracks are available - domestic (U.S.) and international (primary health care). You are required to complete at least 16 units (for health professionals) or 20 units (for generalists) of departmental courses offered in selected tracks, plus Community Health Sciences 125, 171A, 400, 596. Elective courses are selected in consultation with your faculty adviser.

Students with a professional degree may graduate with an M.P.H. in one academic year (48 units). Students without a professional health degree need four to six terms (60 units) of study.

Comprehensive Examination Plan
You must pass two comprehensive examinations, one in the area of specialization and a centrally administered written examination in the general field of public health. If you fail either examination, you may be reexamined once.

The schoolwide core course comprehensive examination is administered twice each academic year, usually the first Saturday in May and November. The examination in the major field is administered by your division.

Field Training
Field training in an approved public health program is required of candidates who have not had prior relevant field experience. A minimum of four units, but no more than eight, is required.

Interdepartmental International Health Studies
The school offers several options for international or domestic students interested in international health. Faculty in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations in cross-cultural settings.

If you are interested, specify the division most relevant to your skills area on your application, clearly indicating your international interests. You will be given an appropriate adviser and directed to additional faculty members interested in internationally oriented training, service, and research.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to apply to the population and family health division.

Cooperative Degree Programs
Following are descriptions of combined programs of study leading to the M.P.H. degree. In the articulated degree programs listed below, no course may be used for credit toward more than one degree.

M.A.-African Area Studies/M.P.H.
The School of Public Health and the African Area Studies Program have an articulated degree program whereby you can work sequentially for the master's degree in African area studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Area Studies Program, UCLA African Studies Center, and/or the Office of Student Affairs, UCLA School of Public Health.

M.A.-Latin American Studies/M.P.H.
The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. degree program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

Preventive Medicine Residency Program
An accredited residency in general preventive medicine is available to physicians through the School of Public Health. The residency is designed to prepare qualified physicians for leadership roles in public health practice and preventive medicine teaching and research. Completion of the program can lead to board eligibility in public health and general preventive medicine — a specialty recognized by the American Board of Preventive Medicine.

The residency currently consists of at least two years of work but may be completed over a longer period of time. The first part is comprised of formal studies for the Master of Public Health (generally in either family health, epidemiology, or health services). Other areas (e.g., maternal and child health) may be considered on an individual basis. Application must be made simultaneously for both the residency and admission to the School of Public Health for the M.P.H.

The second part consists of supervised field training in preventive medicine and public health, which is individually organized for each resident's particular interests and needs. A variety of opportunities is available through UCLA, including close working relationships with the Los Angeles County Department of Health Services, the Jonsson Comprehensive Cancer Center, and other city and county health departments in the state. New affiliations are developed as the need arises. Residents may also undertake studies toward qualification for a more advanced degree in public health — the Dr.P.H. or Ph.D. — or do research in collaboration with members of the faculty. Physician applicants who have completed M.P.H. studies at an accredited school of public health may be admitted directly into the field training part. Generally speaking, a license to practice medicine is a prerequisite to field training. Many residents are working members of health departments and complete the program over a period of several years. For further information, contact the Office of Student Affairs, UCLA School of Public Health.

Master of Science in Public Health
The Master of Science is a research-oriented degree within the general field of public health. It includes the preparation of a thesis or comprehensive examination/major written report. Teaching experience is not required.

Course Requirements
You must complete at least one year of graduate residence at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Community Health Sciences 597 may not be applied toward the degree requirements. No more than 18 full courses may be required for the degree.

Required school core courses include Biostatistics 100A, 100B, and Epidemiology 112. Each core course may be waived if you have taken a similar course elsewhere and can pass the waiver examination.

Only courses in which you receive a grade of C — or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.
Areas of Specialization
Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

Behavioral Sciences and Health Education
Community Health Sciences 181 or 125, 182, 281, 482, 484, and four to six divisional core courses (selected from an approved list) are required. Electives, selected in consultation with an adviser, must include the Community Health Sciences 283 series and research methods courses. Normal program length is six terms.

Nutritional Sciences
Emphasis is on basic and applied nutritional research. Required courses usually include Biological Chemistry 201A-201B, Community Health Sciences 260E, 260F, 260G, 260G, 261A, 261B, 262 (may be repeated for credit), and 596 or 598 (may be repeated for credit).

You must complete a thesis. A minimum of 52 units is required; five of the courses listed above must be at the graduate level (200 or 500 series). It is expected that after the first term you will take a seminar each term.

Thesis Plan
If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before you file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Comprehensive Examination/Report Plan
If the comprehensive examination/report option is approved, a guidance committee of three faculty members is appointed. A written comprehensive examination on your major area of study must be passed. If you fail, you may be reexamined once.

The preparation of a major written research report is required; it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Master of Science in Preventive Medicine and Public Health
The program is not admitting new students at this time.

Doctor of Public Health
The Doctor of Public Health (Dr.P.H.) is the highest professional degree for the public health generalist. You are expected to focus on public health practice and to acquire broad knowledge related to professional skills. The dissertation is of an applied, practical, problem-solving nature and must demonstrate your ability for independent investigation.

There is no foreign language requirement; teaching experience is recommended but not required.

Admission
In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.P.H. or a master's degree in an appropriately related field (if the master's degree is in a field other than public health, you must have taken the equivalent of the M.P.H. mandatory core courses or include them in the course of study after admission), (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by a division in the department to the School of Public Health, (5) approval by the admissions policy committee and the associate dean for Student Affairs. Screening or evaluation examinations may be required by each division.

Course Requirements
The course requirements in the major field depend on the division and the field you select. You must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/divisions other than your major division.

The major division also requires an additional area of concentration which may be either inside or outside the school. In divisions that allow it, an equivalent field experience completes while a doctoral student and approved by the guidance committee may be substituted for the additional area of concentration.

Areas of Specialization
Areas of specialization and typical course plans, in addition to courses required for the master's degree, are listed below.

Behavioral Sciences and Health Education
At least four advanced research methods/ statistics courses and at least five advanced courses from a list designed and offered by the division are required. In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/divisions other than your major division are required for breadth; four of these must be in only one other department/division. Two terms of research experience prior to beginning the dissertation are required, as is participation in Community Health Sciences 286 (divisional doctoral seminar) and 288. Elective courses should be selected in consultation with your adviser. Written qualifying examinations in both the major and minor areas of concentration are required.

Nutritional Sciences
Recommended courses include Biological Chemistry 201A-201B, Community Health Sciences 260E, 260F, 260G, 260H, 261A, 262 or 263 (may be repeated for credit and must be taken once per year), 265 (may be repeated for credit and must be taken each term), 400, 460, 461, 463A, 463B, 495, 596, 599 (latter three may be repeated for credit). Conversational Spanish is also recommended.

In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/divisions other than your major division are required for breadth. The major division also requires an additional area of concentration which may be either inside or outside the school (e.g., biology, biostatistics).

Population and Family Health
Course content for the major field includes courses needed for the divisional M.P.H., the divisional doctoral seminar, and two advanced courses in research methodology. Beyond the master's degree requirements, a minimum of 48 units (four terms with an average of 12 units each) is required. Of these, at least 20 units must be in this division, in addition to the divisional doctoral seminar.

In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/divisions other than your major division are required for breadth (you may petition to include up to two 100-level courses). The major division also requires 18 units in an additional area of concentration which may be either inside or outside the school.

Qualifying Examinations
Before advancement to candidacy, you must pass written examinations in the major field, administered by the division faculty. Normally no more than one reexamination after failure is allowed. The doctoral committee is nominated after you have made a tentative decision on a dissertation topic. The doctoral committee administers the University Oral Qualifying Examination after you have successfully completed the written examinations.

Final Oral Examination
A final oral examination is required of all candidates.

Ph.D. in Public Health
The Ph.D. in Public Health is an advanced research degree that emphasizes depth of knowledge and research skills. The dissertation must demonstrate your ability for independent scholarly investigation.
Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.S. in a field of public health or an appropriately related field (students with an M.P.H. need to satisfy the course requirements of the M.S. in a field of public health before or after admission), (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by a division in the department to the School of Public Health, (5) approval by the admissions policy committee and the department chair. Screening examinations may be required by each division.

In the behavioral sciences and health education division, you must satisfy the divisional core requirements for the M.P.H. or M.S. in a field of public health (depending on your background) at a level acceptable for the doctoral program. Coursework may be waived by examination if equivalent courses have been taken elsewhere.

Major Fields or Subdisciplines

Behavioral sciences and health education, nutritional sciences.

Course Requirements

The courses needed to pass the written examination in your major field depend on the division and field you select.

The minor must be in a field cognate to the major field in public health. A strong minor is required, with at least four full graduate courses (16 units) or equivalent from a department that grants a Ph.D. Biostatistics is the only department considered cognate to a major in public health.

Qualifying Examinations

Before advancement to candidacy, you must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.

Final Oral Examination

A final oral examination is required of all candidates.

Lower Division Course

Behavioral Sciences and Health Education

Ms. Kurtzman

Upper Division Courses

Population and Family Health

125. Applied Social Science Methodology. (Formerly numbered Public Health 125.) Lecture, two hours; discussion, two hours; laboratory, one hour. Prerequisites: Biostatistics 100A or equivalent, consent of instructor. Applied procedures for conducting research in family health. A research design comprises one course requirement.

Ms. Bourque, Ms. Sorenson

Nutritional Sciences

160. Principles of Food and Nutrition (2 units). (Formerly numbered Public Health 160.) Prerequisites: one biology, chemistry, or physiology course, consent of instructor. Not open for credit to students specializing in nutrition. Principles of nutrition and nutritional requirements for normal growth and development.

Ms. Alfin-Slater, Mr. Jelliffe

161. Nutrition and Health (2 units). (Formerly numbered Public Health 161.) Prerequisites: one biology course, one chemistry course, consent of instructor. Not open for credit to nutrition majors. Basic and clinical nutrition theory and practice for students in health sciences curriculum.

Ms. Alfin-Slater, Mr. Jelliffe

162. Nutrition. (Formerly numbered Public Health 162.) Lecture, three hours. Prerequisites: organic chemistry, Biology 7, or equivalent. Metabolic aspects of carbohydrates, fats, proteins, vitamins, and minerals. Digestion and absorption of nutrients, energy and protein requirements, mineral and vitamin metabolism.

Ms. Castro

163. Biologic Processes. (Formerly numbered Public Health 163.) Lecture, three hours. Prerequisites: one year of organic chemistry, Biology 7, consent of instructor. Analysis of diseases, fat, carbohydrate, protein, and other nitrogen compounds and lipids; role of hormones and enzymes in metabolism; physiological processes.

Ms. Alfin-Slater

165. Clinical Nutrition Laboratory (2 units). (Formerly numbered Public Health 165.) Discussion, one hour; laboratory, four hours. Prerequisites: one quantitative analysis course or equivalent, one year of organic chemistry, Biology 7, consent of instructor. Analytical procedures for determining various constituents of blood and urine.

Mr. Eckert

166A. Therapeutic Nutrition (2 units). (Formerly numbered Public Health 166A.) Prerequisites: courses 162, 163, or equivalent, consent of instructor. Recent findings in the field of diet and disease and modifications made in normal diet for pathological conditions.

Ms. Carlisle

166B. Therapeutic Nutrition (2 units). (Formerly numbered Public Health 166B.) Prerequisites: courses 162, 163, or equivalent, consent of instructor. Recent findings in the field of diet and disease and modifications made in normal diet for pathological conditions.

Ms. Carlisle

167. Biologic Processes: Physiology and Nutrition. (Formerly numbered Public Health 167.) Lecture: three hours. Prerequisites: course 160, consent of instructor. Metabolism of lipids, carbohydrates, and proteins; role of hormones and enzymes in metabolism; physiological processes occurring in various organs.

Ms. Alfin-Slater

Population and Family Health

170. Family Health and Biosocial Development. (Formerly numbered Public Health 170.) Lecture, two hours; discussion, two hours. Prerequisites: Psychobiology 130 or Psychology 100 or equivalent, consent of instructor. Biosocial factors related to normal human physical, intellectual, and emotional growth and development from a family and public health perspective.

Mr. Katz

170E. Genetics and Public Health. (Formerly numbered Public Health 170E.) Lecture, three hours; discussion, one hour. Prerequisites: one biology course, consent of instructor. Public health significance of genetic disease, biological basis of genetic diseases and birth defects, services available in areas of diagnosis, treatment, and prevention, and legal, social, and ethical implications of genetic disease.

171A. Family Health and Population: Principles and Issues. (Formerly numbered Public Health 171A.) Prerequisites: one or more behavioral or natural sciences courses, consent of instructor. Biosocial aspects of family formation, reproductive physiology and behavior, "at risk" aspects of pregnancy and childbirth, and primary women's health care services. Physical aspects of growth, physical, intellectual, and social development from infancy to old age and adolescence.

Ms. Aneshensel

174E. Health, Disease, and Health Services in Latin America. (Formerly numbered Public Health 174E.) Prerequisite: one upper division Latin American studies or public health course. Introduction to health, disease, and health services in Latin America. Prerequisites: Health Services 130 or equivalent or two upper division or graduate social or behavioral sciences or medical sciences courses, consent of instructor. Historical overview of policies and implementation of public health in People's Republic of China from 1949 to the present. Emphasis on relevance for public health in other developing countries.

Mr. Neumann

176. Human Sexuality and Sexual Health. (Formerly numbered Public Health 176.) Lecture, three hours; discussion, one hour. Prerequisites: Health Services 130 or equivalent or two upper division or graduate social or behavioral sciences or medical sciences courses, consent of instructor. Interdisciplinary review of sexual physiology and sexual behaviors followed by consideration of pregnancy and its prevention, sexual dysfunction, and sexually transmitted disease. Psychosocial, cultural, political, and health care aspects.

177A. Principles of Genetic Counseling (2 units). (Formerly numbered Public Health 177A.) Prerequisites: course 170 or 171A, Biology 8. Theoretical basis: current research, and practical considerations and techniques of counseling, especially as practiced in genetics settings.
17B. Principles of Genetic Counseling (2 units). (Formerly numbered Public Health 177B.) Prerequisites: course 177A. Counseling principles and techniques arising from such diverse areas as prenatal care, diagnosis, abortion, adoption, sterilization. Counseling in relation to grief and mourning; theories underlying alternative counseling models pertinent to these areas.

17C. Principles of Genetic Counseling (2 units). (Formerly numbered Public Health 177C.) Prerequisites: courses 171A, 177A, consent of instructor. Evaluation of counseling process and outcome; clinical research; the counselor as a team worker; ethical and administrative issues.

178. Legal Aspects of Family Health (2 units). (Formerly numbered Public Health 178.) Prerequisites: courses 171A, 177A, consent of instructor. Legal research; the counselor as a team worker; ethical and social issues, environmental health, and consumer protection.

181. Introduction to Social Research Methods in Health. (Formerly numbered Public Health 181.) Lecture, four hours; assignments, eight hours. Prerequisites: Biostatistics 100A or equivalent, consent of instructor. Basic methods and techniques in designing and conducting health research using a variety of methods. Discussions of students' own research plans.

182. Behavioral Sciences and Health. (Formerly numbered Public Health 182.) Lecture, three hours. Prerequisite: one social science course. Basic concepts in behavioral sciences pertinent to health and medical care; cultural and social class variations in health status; health team and community relations; community decision making in public health.

Mr. Goldstein, Mr. Kar

183. Behavioral Sciences and Health Education. Lecture, three hours; discussion, one hour. Prerequisite: graduate standing in M.P.H. program (behavioral sciences and health education/population and family health majors exempted). Development of broad appreciation of psychosocial factors as they affect health and their implications for public health. Review of theories, models, and modalities of health education for public health promotion and disease prevention interventions.

Mr. Kar, Ms. Scrimshaw

187. Health Education for Teacher Credentials (2 units). (Formerly numbered Public Health 187.) Limited to students in teacher education credential program. Required for California State Instructional Credential. Teaching-learning process as applied to personal and community health education. Topics include psychoactive drugs (alcohol, tobacco, and narcotics); human sexuality; nutrition and community health resources.

Mr. Lindor

189. Community Cancer Education. (Formerly numbered Public Health 189.) Lecture, three hours; project and fieldwork, one hour. Prerequisites: Biology 30 or equivalent, consent of instructor. Exploration of process of cancer education through community resources, culminating in student-generated community field-study proposal and presentation.

Ms. Brown

Special Studies

198. Special Studies (2 to 4 units). (Formerly numbered Public Health 198.) Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided study under direct supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

Graduate Courses

Nutritional Sciences

200. International Health: Overview (2 units). Lecture, 90 minutes; discussion, 30 minutes. The state of health in less technically developed areas, especially vulnerable groups. Assessment of such problems, followed by overall program considerations (WHO "Health for All") and brief coverage of special programpmatic emphases, with description of activities of organizations working internationally. Mr. Jelliffe

260E. Advanced Nutrition: Vitamins. (Formerly numbered Public Health 260E.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 205A-205B or equivalent, consent of instructor. Comprehensive treatment of vitamin nutrition and metabolic-nutrient interactions. Mr. Laidlaw

260F. Advanced Nutrition: Proteins (2 units). (Formerly numbered Public Health 260F.) Prerequisites: course 162 or equivalent, Biostatistics 100A, Biological Chemistry 205A-205B or Chemistry 152 (may be taken concurrently), consent of instructor. Comprehensive treatment of protein nutrition and metabolic-nutrient interactions. Ms. Alfin-Slater, Mr. Iacono, Mr. James

Ms. Carisle

261A. Laboratory Instrumentation and Methods. (Formerly numbered Public Health 261A.) Lecture, one hour; lab, six hours. Prerequisites: courses 162, 167, one 200-level nutrition course in 200 or 400 series. Review of literature in selected areas of public health nutrition. May be repeated for credit.

Mr. Panaqua

261B. Advanced Laboratory Techniques in Nutritional Science. (Formerly numbered Public Health 261B.) Lecture, one hour; lab, six hours. Prerequisites: course 261A, consent of instructor. Current biochemical methods emphasizing design of nutritional experiments.

Ms. Castro

262. Seminar in Nutrition (2 units). (Formerly numbered Public Health 262.) Prerequisites: courses 162, 167, one 200-level nutrition course in 200 or 400 series. Review of current literature in nutritional science. Emphasis on methodology and data evaluation. May be repeated for credit.

263. Seminar in Public Health Nutrition (2 units). (Formerly numbered Public Health 263.) Prerequisites: courses 162, 167, one 200-level nutrition course in 200 or 400 series. Review of literature in selected areas of public health nutrition. May be repeated for credit.

264E. Clinical Nutrition Problems (2 units). (Formerly numbered Public Health 264E.) Prerequisites: one or more 200-level nutrition courses. Biological Chemistry 205A or 205B. Nutrition and nutrient-metabolic interactions in various disease states such as cardiovascular disease, diabetes, and obesity. Ms. Alfin-Slater, Mr. Koppie, Ms. Swendsen

264F. Clinical Nutrition Problems (2 units). (Formerly numbered Public Health 264F.) Prerequisites: one or more 200-level nutrition courses. Biological Chemistry 205A or 205B. Nutrition and nutrient-metabolic interactions in various disease states such as cardiovascular disease, diabetes, and obesity. Ms. Alfin-Slater, Mr. Koppie, Ms. Swendsen

265. Doctoral Research Seminar In Nutritional Sciences (2 units). (Formerly numbered Public Health 265.) Prerequisites: consent of instructor. Comprehensive treatment of mineral nutrition and metabolic-nutrient interactions.

Mr. Laidlaw

266. Seminar in Population and Family Health. (Formerly numbered Public Health 266.) Lecture, one hour; lab, six hours. Prerequisites: courses 261A, consent of instructor. Current nutritional problems. May be taken concurrently, consent of instructor. Comprehensive treatment of mineral nutrition and metabolic-nutrient interactions.

Ms. Alfin-Slater, Mr. Iacono, Mr. James

267. Seminar in Nutrition for Childbearing Age and Children, Including Early Development (2 units). (Formerly numbered Public Health 267.) Prerequisites: courses 125, 171A, 171B, consent of instructor. New knowledge and approaches in selected health and social problems of families, women of childbearing age, and children, including early development, day care, and genetic counseling.

Mr. A. Chang

270. Maternal and Child Nutrition. (Formerly numbered Public Health 270.) Prerequisites: courses 161, 170, 171A, or equivalent, consent of instructor. Nutrition of mothers, infants, and children in countries at various levels of socioeconomic development; measures for prevention and treatment of protein-calorie malnutrition; relationship between nutrition and mental development; impact of ecological, social, economic, and cultural factors on nutrition, nutrition education, and service.

Mr. Jelliffe, Ms. Neumann

M271. Medical Anthropology. (Formerly numbered Public Health 271.) (Same as Anthropology M271.) Prerequisites: Biostatistics 100D or 101C, Epidemiology 211A-211B, and one prior nutrition course, or consent of instructor. Designed to prepare students for conduct of research relating cultural beliefs, values, and practices to health and disease. Emphasis on data evaluation. May be repeated for credit. S/U grading.

Ms. Scrimshaw

272. Seminar on Current Issues in Maternal and Child Health (2 units). (Formerly numbered Public Health 272.) Prerequisites: courses 171A, 171B, Health Services 130 or equivalent, consent of instructor. New knowledge and approaches in selected health and social problems of families, women of childbearing age, and children, including early development, day care, and genetic counseling.

Mr. A. Chang

272D. Adolescent Health and Health Behavior. (Formerly numbered Public Health 272D.) Lecture, two hours; discussion, two hours, assignments, eight hours. Prerequisites: courses 125, 171A, Biostatistics 100A, and Epidemiology 112, Health Services 130, and one upper division psychology, sociology, or anthropology course, or equivalent, or consent of instructor. Comprehensive treatment of behavioral aspects of adolescent health as they relate to perception, treatment, incidence, and prevalence of disease and illness.

Mr. Scrimshaw

276E. Seminar in Nutrition. (Formerly numbered Public Health 276E.) Prerequisites: courses 162, 167, one 200-level nutrition course in 200 or 400 series. Review of literature in selected areas of public health nutrition. May be repeated for credit.

Ms. Aneshensel
M272F-M272G-M272H. Child Abuse and Neglect (2 units each). (Same as Development M300-SA-M300-SB-M300-SC, Education M276F, and Psychiatry M276F.g.) Lecture, three hours; discussion, two hours; laboratory, one hour. Prerequisites: course 176E, or equivalent, consent of instructor. Recent significant contributions of behavior science and sociology to the understanding of child abuse and neglect, with lectures by members of the faculties of the Schools of Dentistry, Education, Law, Medicine, Nursing, and Public Health and the Department of Psychology, as well as by the relevant public agencies.

M272J. Human Resources and Economic Development. (Same as Education M252C.) Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments. Mr. Jamison

M273. Qualitative Research Methodology. (Formerly numbered Public Health M273J.) (Same as Anthropology M284.) Discussion, three hours; laboratory, one hour. Prerequisites: course 125 or 181, Biostatistics 100A, one undergraduate or graduate social science, psychology, anthropology, or sociology course, consent of instructor. Intensive seminar-field course in qualitative research methods, including interviewing, observation, and analysis of the 'data. Mr. Scrimshaw

M274A-M274B. Population Policy and Fertility. (Formerly numbered Public Health M274A-M274B.) (Same as Sociology M287A-M287B.) Lecture, three hours; discussion, one hour. Prerequisites: courses 171A, 171B, Biostatistics 100A, Epidemiology 112, or equivalent, graduate standing, consent of instructor. Course M274A is prerequisite to M274B. Analysis of research concerning major issues in population policy, with special emphasis on human fertility. Ms. Blake

M274C. Seminar in Population Policy and Fertility. (Formerly numbered Public Health M274C.) (Same as Sociology M287C.) Seminar, three hours; discussion, one hour. Prerequisites: courses M274A-M274B or equivalent, graduate standing, consent of instructor. Review of current literature in population policy and fertility in conjunction with student research reports. May not be repeated for credit. Ms. Blake

M275. Human Lactation: Biological and Public Health Significance (2 units). (Formerly numbered Public Health M275.) Lecture, two hours; discussion, two hours; laboratory, one hour. Prerequisites: courses 171A, 171B, Biostatistics 100A, Epidemiology 112 or equivalent, consent of instructor. Biological and medical aspects of human lactation in industrialized and developing countries. Mr. Jelliffe

M276. Culture and Human Reproduction. (Formerly numbered Public Health M276.) Lecture, three hours; discussion, two hours; laboratory, one hour. Prerequisites: courses 171A, 171B, Biostatistics 100A, Epidemiology 112, or equivalent, consent of instructor. Exploration of human behavior related to reproduction. Cross-cultural exploration in population policy and fertility with conjunction with student research reports. Ms. Browner

M276D. Seminar on Reproduction and Women's Health. (Formerly numbered Public Health M276D.) (Same as Anthropology M286F, Nursing M286F, and Psychiatry M286F.) Seminar, three hours. Analysis, using a cross-cultural approach, of sociocultural and political economic factors that affect reproduction and women's health. Implications for health professionals, especially physicians. Attention to meaning of professionalization and professional-client relationships within a range of organizational settings. Mr. Goldstein

M283F. Sociocultural Aspects of Health and Illness: Health Professions. (Formerly numbered Public Health M283F.) (Same as Sociology M284.) Lecture, three hours. Prerequisites: course 125, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on life-styles and other sociocultural factors associated with general susceptibility to disease and subsequent mortality. Mr. Berkanovic

M283G. Sociocultural Aspects of Health and Illness: Health Behavior. (Formerly numbered Public Health M283G.) (Same as Sociology M284.) Lecture, three hours. Prerequisites: course 125, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick role behavior. Mr. Berkanovic

M284. Ecology of Mental Illness. (Formerly numbered Public Health M284.) Lecture, three hours; discussion, two hours. Prerequisites: courses 170A, 170B, Sociology 132 or equivalent, 135, or outside assignments, 10 to 12 hours. Prerequisites: course 125, Biostatistics 100A, 100B, or equivalent, consent of instructor. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Ms. Bourque

M287. Questionnaire Design and Administration. (Formerly numbered Public Health 277.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: course 125, Biostatistics 100A, 100B, or equivalent, consent of instructor. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Ms. Bourque

M288. Clinical Genetics (2 units). (Formerly numbered Public Health 278.) Lecture, 90 minutes; discussion, 30 minutes. Prerequisites: course M274A-M274B or equivalent. Biostatistics 100A, Epidemiology 112, consent of instructor. In-depth view of genetic disorders, their clinical manifestations, and characteristic approaches to management of the patient and family.

M279. Advanced Seminar in Population and Family Health (2 units). (Formerly numbered Public Health 279.) Prerequisites: doctoral standing, consent of instructor. Current research in population and family health. May be repeated for credit. S/U grading.

M279D-279E-279F. Seminars in Preventive Medicine (2 units each). (Formerly numbered Public Health 279D-279E-279F.) Prerequisites: Biostatistics 100A, Epidemiology 112, Health Services 130, upper division division health services, biostatistics, biostatistics, population and family health, and physiology courses, or equivalent, consent of instructor. Three- term sequence devoted to analysis of current issues, practices, research, literature, and policy and trend analysis in preventive medicine. Design of administrative, epidemiologic, and clinical methods. S/U grading. Ms. Neumann

M279H. Advanced Seminar in Medical Anthropology (2 units). (Formerly numbered Public Health 279H.) Prerequisites: Biostatistics 100A, Epidemiology 112, Medicine M273. Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. Ms. Browner (Sp)

Behavioral Sciences and Health Education

280. Change Determinants in Health-Related Behavior. (Formerly numbered Public Health 280.) Prerequisites: course 182, three courses from Psychology 135, 170A, Sociology 132 or equivalent. Consent of instructor. Unified behavioral science approach to natural determinants of change, as foundation for planned change in health-related behavior at community, group, and individual levels. Ms. Siegel

281. Advanced Social Research Methods in Health. (Formerly numbered Public Health 281.) Lecture, two hours; laboratory, two hours. Prerequisites: courses 484 or equivalent, Biostatistics 100B, 406, consent of instructor. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques. Ms. Siegel

282. Communications in Health Promotion and Education. (Formerly numbered Public Health 282.) Lecture, two hours; discussion, two hours. Prerequisites: course 182 and three social sciences or communications courses, or consent of instructor. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques. Mr. Kar

283E. Social Epidemiology I. (Formerly numbered Public Health 283E.) Lecture, two hours; discussion, one hour. Prerequisites: Epidemiology 112, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on life-styles and other sociocultural and psychological factors associated with general susceptibility to disease and subsequent mortality. Mr. Berkanovic

283F. Sociocultural Aspects of Health and Illness: Health Professions. (Formerly numbered Public Health M283F.) Lecture, three hours. Consent of instructor: course 125, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick role behavior. Mr. Berkanovic

284. Ecology of Mental Illness. (Formerly numbered Public Health M284.) Lecture, three hours. Prerequisites: course 125, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick role behavior. Mr. Berkanovic

285. Community Problems in Mental Disorders. (Formerly numbered Public Health M285.) Lecture, three hours. Prerequisites: course 125, three psychology, sociology, or anthropology courses, or equivalent, consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick role behavior. Mr. Berkanovic
287. Community Organization in the Health Field. (Formerly numbered Public Health 287.) Lecture, two hours; laboratory, one hour; fieldwork, four to six semesters. Prerequisites: course 128, at least three public health, sociology, or anthropology courses or equivalent. The theory and practice of community organization applied to public health problems, including analysis of relevant factors in physical and social environment and development of community-based intervention strategies to improve health and health services. Opportunity to study organizations through field work and to discuss community organization theory in context of students’ experiences. Mr. Brown

288. Current Problems in Health Education. (Formerly numbered Public Health 288.) Lecture, one hour; discussion, three hours. Prerequisites: course 128 and three other public health and/or social sciences courses, or consent of instructor. Current problems and findings in health education content areas, such as nutrition, mental health, family health, conscience health, safety, and communicable and chronic diseases.

288A. Introduction to Cancer Control Research (2 units). Prerequisites: Medicine M293 and three courses in behavioral sciences and health education courses or consent of instructor. Provides students with working knowledge of cancer control objectives for the nation, rationale and various phases of cancer control research, and presentation of cancer control interventions, including smoking cessation prevention, cancer screening, and dietary and psychosocial interventions. Ms. Griz, Mr. Marcus

289. Issues in Program Evaluation. (Formerly numbered Public Health 289.) Discussion, three hours; reading and research paper, one hour. Prerequisites: course 281 or equivalent, consent of instructor. Discussion of current and perspectives of selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum required for M.P.H. degree.

291. Advanced Topics in Health Survey Research Methods. (Formerly numbered Public Health 291.) Lecture, two hours; discussion, two hours. Prerequisites: course 281 or equivalent, consent of instructor. Special topics in health survey research methods. Design of special purpose surveys; recent interviewing techniques; diaries and memory aids; measurement error, including response bias, social desirability, response validity; telephone interviewing; obtaining informed consent; confidentiality and ethical issues in survey research data. Mr. Goldstein

292. Alcohol and Drug Abuse: Social Policy Perspectives (3 units). (Formerly numbered Public Health 292.) Prerequisite: consent of Instructor. Alternative stress perspectives, including analysis of relevant factors examined and implications assessed for public policy regarding their control. Prevention efforts and findings from California and national surveys, with primary emphasis on alcohol use and abuse.

293. Alcoholism and Drug Abuse among Women. (Formerly numbered Public Health 293.) Prerequisite: consent of instructor. Discussion of psychosocial aspects of abuse of alcohol and other drugs among women. Topics include etiology, prevention, treatment, hormonal influences, and role of the family. Emphasis on current theoretical perspectives and research findings.

294. Introduction to Occupational Health Education. (Formerly numbered Public Health 294.) Lecture, one hour; discussion, two hours; outside assignment, one hour. Prerequisites: Environmental Health Sciences 156, two sociology, psychology, or education courses, consent of instructor. Health education theory and practice as applied to occupational health and safety. Emphasis on design and evaluation of education programs dealing with health and safety issues for workplace settings.

295A. Advanced Community Health Education. (Formerly numbered Public Health 295A.) Lecture, two hours; discussion, two hours; presentation, course 182, three upper division social sciences or public health courses, consent of instructor. Before planning the educational components of a health program, one must assess behaviors and factors influencing the health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing a community-based educational program.

295B. Research in Community and Patient Health Education. (Formerly numbered Public Health 295B.) Lecture, three hours; discussion, two hours. Prerequisites: course 182 and three upper division social sciences or public health courses, or consent of instructor. Application of conceptual, theoretical, and evaluative skills to community-based health education risk-reduction programs. Computer applications, data management, and research methodologies taught through mini-projects and management and analysis of program data bases. Mr. Morisky

297. Social and Behavioral Perspectives on Work and Health. (Formerly numbered Public Health 297.) Prerequisites: course 294, Environmental Health Sciences 155, two psychology or sociology courses, or equivalent, consent of instructor. Discussion of current and behavioral research, issues, and perspectives on work and health.

400. Field Studies in Public Health (2 or 4 units). (Formerly numbered Public Health 400.) Prerequisites: course 129 or equivalent, consent of instructor. Discussion, three hours; laboratory, one hour. Prerequisites: course 294, Environmental Health Sciences 155. Health Sciences 130 may be taken concurrently, consent of instructor. Lecture with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. 2-4 units may be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum required for M.P.H. degree.

417. Injury Prevention Strategies and Countermeasures (2 units). (Same as Epidemiology M417 and Health Services M417.) Prerequisites: Biostatistics 100A, Epidemiology 112, two upper division biological or life sciences courses, or equivalent, consent of instructor. Lecture with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U grading. Mr. A. Chang, Mr. Kraus

Nutritional Sciences

460. Principles of Public Health Nutrition. (Formerly numbered Public Health 460.) Prerequisites: course 262 or 263, Biostatistics 100A, Health Services 130 (may be taken concurrently), consent of instructor. Survey of methods of evaluating and improving nutritional status of population groups.

461. Computer Use in Nutritional Assessment. (Formerly numbered Public Health 461.) Lecture, two hours; laboratory, six hours. Prerequisites: courses 126 or equivalent, 460, Biostatistics 100A, Epidemiology 112 (may be taken concurrently), consent of instructor. Collection and computer analysis of data for purposes of nutritional assessment of population groups.

463A. Preparation for Practicum in Public Health Nutrition. (Formerly numbered Public Health 463A.) Discussion, two hours; laboratory, five hours. Prerequisites: courses 165, 460 (may be taken concurrently), Epidemiology 112, Chemistry 153C, consent of instructor. Students analyze a public health nutrition problem and prepare a project to conduct and evaluate the public health nutrition practicum. Ms. Hunt

463B. Practicum in Public Health Nutrition. (Formerly numbered Public Health 463B.) Discussion, two hours; laboratory or fieldwork, 10 hours. Prerequisites: courses 400 (may be taken concurrently), 461, 463A, consent of instructor. Students analyze a public health nutrition problem and conduct and evaluate the public health nutrition practicum. Ms. Hunt

Population and Family Health

470A. International Health Agencies and Programs. (Formerly numbered Public Health 470A.) Prerequisites: three upper division or graduate social health, or behavioral sciences courses, consent of instructor. Historical development and functions of international health organizations. Key problems and trends in international health, with special emphasis on medical-religious missions, private foundations, and others disseminating information, money, and services. Mr. Neumann

470B. Advanced Issues in International Health. (Formerly numbered Public Health 470B.) Lecture, two hours; discussion, two hours. Prerequisites: courses 270, 470A or 472A or 475 or equivalent, Health Services 240, consent of instructor. In-depth focus on major health care issues confronting recipients in less-developed countries and donors of technical and financial assistance. Mr. Neumann

471A. Women’s Health: Principles, Programs, and Policies. (Formerly numbered Public Health 471A.) Prerequisites: course 171A, Biostatistics 100A, Environmental Health Sciences 155, Health Services 130 or equivalent, consent of instructor. In-depth consideration of health services, programs, and issues relevant to nonreproductive women’s health care. Subjects include health status of women, endocrinological issues, chronic diseases, cancer, surgery in women, psychosocial and life-style issues, and women’s health services.

471B. Perinatal Health Care: Principles, Programs, and Policies. (Formerly numbered Public Health 471B.) Prerequisites: course 171A, Biostatistics 100A, Environmental Health Sciences 155, Health Services 130 or equivalent, consent of instructor. Comprehensive examination of perinatal health care, including perinatal epidemiology, outcome measurement, public programs, controversies surrounding new technology, regionalization, organization of services at federal, state, and county levels, and medical-legal issues.

471C. Family Planning: Public Health Principles, Programs, and Policies. (Formerly numbered Public Health 471C.) Prerequisites: course 171A, Biostatistics 100A, Environmental Health Sciences 155, Health Services 130 or equivalent, consent of instructor. Critical review of public health issues in area of family planning, abortion, and sterilization, with emphasis on health care problems, delivery of services, and public programs.

472A. Maternal and Child Health in Developing Areas. (Formerly numbered Public Health 472A.) Prerequisites: courses 270, 470A, or equivalent, consent of instructor. Major health problems of mothers and children in developing areas, stressing causation, management, and prevention. Particular reference to adapting programs to limited resources in cross-cultural milieux. Ms. Neumann
472B. Recent Developments in Maternal and Child Health in Disadvantaged Countries (2 units). (Formerly numbered Public Health 472B.) Prerequisites: courses 171A, 171B, 270, or equivalent, consent of instructor. Analytic in-depth consideration of recent advances in the field of international maternal and child health, with special reference to developing countries. 

472D. Overseas Refugee Health Programs (2 units). (Formerly numbered Public Health 472D.) Lecture, one hour; discussion, one hour. Prerequisites: courses 171A, 270 or 472A, Epidemiology 112, or equivalent, consent of instructor. Comprehensive overview of health problems of overseas refugee situations: courses 171A, 270 or 472A, Epidemiology 112, or equivalent, consent of instructor. Comprehensive overview of health problems of overseas refuge situations and of programs designed to deal with these special circumstances. Mr. Jelliffe

473A. Handicapped Children: The Public Health Concept (2 units). (Formerly numbered Public Health 473A.) Prerequisites: courses 170 or equivalent, consent of instructor. Analytic in-depth consideration of recent developments in child health and health problems of handicapped children in the U.S. and exploration of alternatives of priorities, approaches, services, and policies aimed at ameliorating these problems.

Mr. Katz

473D. Child Health in the U.S. (Formerly numbered Public Health 473D.) Lecture, three hours; discussion, one hour; field trip, three hours. Prerequisites: courses 171A, 171B, Epidemiology 112, Health Services 130, consent of instructor. Examination of health problems affecting children, and adolescents in the U.S. in the exploration of alternatives of priorities, approaches, services, and policies aimed at ameliorating these problems.

Mr. Katz

473F. Research Seminar in Community Child Health Services (2 units). (Formerly numbered Public Health 473F.) Discussion, one hour; laboratory, one hour; field trips, two hours. Prerequisites: courses 125, 171A, Biostatistics 100A, Health Services 130, or equivalent, consent of instructor. Examination and development of evaluation strategies for existing community child health services at the local level and development of evaluation strategies for selected topics in program management. Emphasis on collaborative research and consultation skills, with participation of local health department personnel.

Mr. Chang

474. Self-Care and Self-Help in Community Health. (Formerly numbered Public Health 474.) Lecture, two hours; discussion, two hours. Prerequisites: Epidemiology 112, Health Services 130, fieldwork internship, or equivalent, consent of instructor. Ms. Jelliffe

475. Planning and Development of Family Health Programs. (Formerly numbered Public Health 475.) Lecture, two hours; discussion, two hours. Prerequisites: courses 125 or 470A, 170, 270, Biostatistics 100A, or equivalent, consent of instructor. Theory, guidelines, and team exercise for planning community health/first planning projects in the U.S. and in developing countries. Problems include criteria for needs identification, goal setting, budget and work plan development; funding; staffing; evaluation design; data and cost analysis; and project presentation.

Mr. Neumann

476A. Analysis of Family Health and Welfare Data. (Formerly numbered Public Health 476A.) Lecture, three hours; discussion, two hours; assignments, 12 hours. Prerequisites: courses 125 or 181, 277, Biostatistics 100B, or equivalent, consent of instructor. Analysis and interpretation of family data sets, case studies, and experimental data in area of applied family health and fertility. Computer used as a tool in management and analysis of data necessary for interpreting and preparing research articles.

Mr. Neumann

477. Assessment of Family Nutrition. (Formerly numbered Public Health 477.) Prerequisite: course 270. Assessment of nutritional status of families in developing countries, with special reference to limited resources, terrain, and cross-cultural factors. Stresses anthropometric methods and techniques.

Mr. Jelliffe, Ms. Neumann

478. Anthropometric Nutritional Assessment (2 units). (Formerly numbered Public Health 478.) Prerequisites: courses 170 or equivalent, consent of instructor. Anthropometric assessment of nutritional status. Examination of nutritional status of children in developing countries using anthropometry.

Ms. Bourque

479. Food and Nutrition Planning: Policies and Programs in World Context. (Formerly numbered Public Health 479.) Lecture, two hours; discussion, two hours. Prerequisites: course 270, consent of instructor. Analysis and applied experiences in cyto genetic laboratory procedures, including culturing, harvesting, microscopy, photography, and interpretation of results.

479D. Nutrition Education and Training: Third World Considerations. (Formerly numbered Public Health 479D.) Lecture, two hours; discussion, one hour; student participation, one hour. Prerequisites: course 270, consent of instructor. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary health care services, mass media, communications, and international educational programs.

Mr. Jelliffe

480. Health Education in Clinical Settings. (Formerly numbered Public Health 480.) Lecture, two hours; discussion, two hours. Prerequisites: courses 280, 282, Health Services 130, consent of instructor. Analysis of role, methods, and techniques of health education in hospitals, clinics, and outpatient settings. Observation and discussion of clinical activities in the medical center in relation to the process of health education.

Ms. Li

481. Program Planning and Administrative Relationships in Health Education. (Formerly numbered Public Health 481.) Lecture, two hours; discussion, two hours. Prerequisites: courses 171A, 270, 472A, Epidemiology 112, Health Services 130, consent of instructor. Study of administration concepts; relationships and applicability to health education settings. Responsibilities for planning and implementation of health education programs for health educators. Ms. Li

482. Practicum in Health Education (4 or 8 units). (Formerly numbered Public Health 482.) Discussion, two hours; fieldwork, six or eight hours. Prerequisites: courses 182, 280, consent of instructor. Study of community health education programs in health departments. Analysis of data for understanding, planning, implementing, and evaluating need-directed health education and medical-care programs.

Ms. Hoffman

483. Social Interventions for Health Promotion and Evaluation. (Formerly numbered Public Health 483.) Lecture, two hours; discussion, one hour; seminar, one hour. Prerequisites: courses 182, 280, or equivalent, one social sciences course, or equivalent, consent of instructor. Introduction to principles of research methods and program evaluation as they are applied to public health programs in the community.

Mr. Berkanovic

484. Intensive Degree Programs in Community Health Education. (Formerly numbered Public Health 484.) Lecture, three hours; field trips, outside readings, and reports, one hour. Prerequisites: course 182, Biostatistics 100A or 103, Epidemiology 112, consent of instructor. Identification and discussion of role of public health in suicide and homicide prevention, and death and dying. Lectures range from vital statistics to role of behavioral scientist in prevention, intervention, and postvention of suicide and homicide.

Mr. Brown

485. Community Organization Seminar. (Formerly numbered Public Health 485.) Seminar, three hours. Prerequisites: course 287, three public health or social sciences courses, consent of instructor. Advanced seminar on theoretical and practical aspects of community organization and evaluation. Field trips and term projects focusing on participation, leadership, outreach, coalitions, and related issues of community organization and social change applied to health problems.

Mr. Brown

486. Health Education in International Settings. (Formerly numbered Public Health 486.) Lecture, two hours; discussion, two hours. Prerequisites: course 182 or one upper division psychology, sociology, or medical sciences course, Epidemiology 112, Health Services 130, one upper division research methods or epidemiology course, consent of instructor. Survey of current developments in health education in international settings. Emphasis on alternative strategies, programs, and evaluation techniques for international health workers. Acquisition of skills in designing training programs for development, renewal of staff competencies, and redirection of staff activities.

Ms. Li

487. Special Studies

488. Professional Writing for Public Health (2 units). (Formerly numbered Public Health 488.) Lecture, two hours; discussion, two hours. Prerequisites: consent of instructor. Practice in writing reports, grant proposals, abstracts, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various professional journals to help participants improve both their prose style and their editorial abilities. S/U or letter grading.

Ms. Li
495. Teacher Preparation in Community Health Sciences (2 units). (Formerly numbered Public Health 495.) Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). (Formerly numbered Public Health 501.) Prerequisite: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units). (Formerly numbered Public Health 502.) Prerequisite: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, whereas UH Cr/NCr-graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

596. Directed Individual Study or Research (2 to 8 units). (Formerly numbered Public Health 596.) Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units). (Formerly numbered Public Health 597.) Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U grading.

598. Mentor's Thesis Research (2 to 8 units). (Formerly numbered Public Health 598.) Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Associate Professors
Climis A. Davos, Ph.D.
John R. Froines, Ph.D.
Shane Que Hee, Ph.D.
Jane L. Valentine, Ph.D.

Lecturers
Frank C. Gomez, Dr.P.H.
Ahmad A. Hassan, Ph.D.
Mario Panaqua, B.A.
Walter Wegst, Ph.D.

Visiting Professor
Akula Venkatram, Ph.D.

Adjunct and Visiting Associate Professors
Edward J. Faeder, Ph.D., Adjunct
Paolo F. Rico, Ph.D., Visiting

Adjunct and Visiting Assistant Professors
David Bradford, Ph.D., Adjunct
Nabil El-Sayed, Ph.D., Adjunct
Laura M. Lake, Ph.D., Adjunct
Douglas M. Mackay, Ph.D., Visiting
Edward J. O'Neill, M.D., M.P.H., Adjunct
Diane Perry, Ph.D., Adjunct

Scope and Objectives
The primary concern of the Department of Environmental Health Sciences is the relationship between human health and biological, chemical, and physical hazards in the community and workplace environments.

The department trains professionals and researchers to identify and measure agents of environmental concern, evaluate their health and environmental impacts, develop means to control or eliminate these agents, and evaluate the effectiveness of programs directed at improving environments. This educational process is accomplished through several degree programs which offer specialized study in selected areas of environmental health sciences and share a common core of knowledge. In addition, research programs related to these areas of specialization are conducted by the faculty.

Academic areas of concentration include air pollution, environmental management, environmental toxicology, industrial hygiene, water quality, and environmental science and engineering.

The department offers M.S. and Ph.D. degrees in Environmental Health Sciences and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in environmental health sciences. In addition, a unique doctoral degree (D.Env.) is offered by the interdepartmental Environmental Science and Engineering Program which is administered through the department.

Requirements for Graduate Degrees

Admission
Application forms, the Announcement of the UCLA School of Public Health, and descriptive brochures and applications for the Environmental Science and Engineering Program may be obtained by writing to the Administrator, Environmental Health Sciences Department, 56-070 CHS, UCLA, Los Angeles, CA 90024-1772.

The preferred deadline for graduate applications is January 15, 1991, for Fall Quarter 1991 admission. Applications received after the deadline will be evaluated on a first-come, first-served basis.

Master's Applicants

The department requires the following:

(1) A bachelor's degree with a grade-point average of at least 3.0.

(2) A combined (verbal and quantitative) Graduate Record Examination (GRE) score of at least 1,100.

(4) A score of at least 550 on the Test of English as a Foreign Language (TOEFL) for international students whose native language is other than English.

Doctoral Applicants

The department requires the following:

(1) A bachelor's degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least one year of chemistry (including organic chemistry or biochemistry), physics, biology, and mathematics through calculus.

(2) A junior/senior grade-point average of at least 3.0.

(3) A combined (verbal and quantitative) Graduate Record Examination (GRE) score of at least 1,200.

(5) A score of at least 550 on the Test of English as a Foreign Language (TOEFL) for international students whose native language is other than English.

Master of Public Health

The M.P.H. is a professional degree in the field of public health. You can obtain the M.P.H. with a concentration in air pollution, environmental management, environmental toxicology, industrial hygiene, or water quality.
Course Requirements
Required school core courses include Biostatistics 100A, Community Health Sciences 183, Environmental Health Sciences 150, 400, Epidemiology 112, and Health Services 130. Each core course may be waived if you have taken a similar college-level course elsewhere and can pass the waiver examination.

Required department core courses include Biostatistics 100B, Environmental Health Sciences 153, 154, 156, 253A, 255, M411, 450 (or 458). You also must take at least 12 additional units in the department at the 200 level and additional courses as required by your area of concentration. A total of eight units must be in the 400 series.

Only courses in which you receive a grade of C– or better may be applied toward the requirements for a master’s degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan
You must pass two comprehensive examinations, one in environmental health sciences and a centrally administered written examination in the general field of public health. If you fail either examination, you may be reexamined once.

The schoolwide core comprehensive examination is administered twice each academic year, usually the first Saturday in May and November. The examination in environmental health sciences is administered by the department.

Field Training
Field training in an approved public health program is required of candidates who have not had prior relevant field experience. A minimum of four units, but no more than eight, is required.

Master of Science Degree
The Master of Science is an research-oriented degree within the general field of environmental health sciences. It includes the preparation of a thesis or comprehensive examination/major written report. You may concentrate in air pollution, environmental management, environmental toxicology, industrial hygiene, or water quality. Teaching experience is not required.

Course Requirements
You must complete at least one year of graduate residence at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Environmental Health Sciences 597 may not be applied toward the degree requirements. No more than 18 full courses may be required for the degree.

Required school core courses include Biostatistics 100A, 100B, and Epidemiology 112. Each core course may be waived if you have taken a similar course elsewhere and can pass the waiver examination.

Required department core courses include Environmental Health Sciences 150, 153, 154, 156, 253A, 255 (may be repeated for credit), M411, 458, 598 (courses 153 and 154 are not required of industrial hygiene majors). You must also take additional courses as required by your area of concentration.

Only courses in which you receive a grade of C– or better may be applied toward the requirements for a master’s degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Thesis Plan
If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before you file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Comprehensive Examination/ Report Plan
If the comprehensive examination/report option is approved, a guidance committee of three faculty members is appointed. A written comprehensive examination on your major area of study must be passed. If you fail, you may be reexamined once.

The preparation of a major written research report is required; it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Doctor of Public Health
The Doctor of Public Health (Dr.P.H.) is an advanced professional degree in the field of public health. You can obtain the Dr.P.H. with a concentration in air pollution, environmental management, environmental toxicology, industrial hygiene, or water quality. The dissertation is of an applied, practical, problem-solving nature and must demonstrate your ability for independent investigation.

There is no foreign language requirement for the Ph.D.; teaching experience is recommended but not required.

Course Requirements
You must fulfill the minimum requirements of the Graduate Division (see “Requirements for Graduate Degrees” in Chapter 3). Courses in your major field as recommended by your adviser and guidance committee are required, as are courses in a minor field related to environmental health sciences in a department outside the School of Public Health that grants a Ph.D. or in the Department of Biostatistics. This usually consists of three or four full courses, as specified by the department offering the minor.

Qualifying Examinations
Before advancement to candidacy, you must pass a departmental written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.
150. Environmental Health. (Formerly numbered Public Health 150.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 5, Chemistry 11A, Mathematics 3A, Physics 3A or 6A. Broad coverage of environmental health, including airborne and waterborne pollutants; pollutants from urban industrial and agricultural wastes; toxicology: carcinogenesis; environmental diseases; occupational health and safety; and historical issues in occupational health. Introductions to various related disciplines (e.g., occupational epidemiology, health education). Attention specifically to interface of science and public policy. Required of all departmental industrial hygiene students. Theoretical and practical applications of occupational health in agricultural, industrial, and occupational environments. Mr. Mustafa

151A. Geochemistry of Groundwater (2 units). Prerequisites: Chemistry 11A, 103, Earth and Space Sciences 1, 100, and/or consent of instructor. Geochemistry of groundwater as impacted by the geologic environment and other natural factors and changes caused by human activities. Emphasis on groundwater contamination in urban, industrial, and occupational environments. Mr. Mustafa

152. Biological Effects of Air Pollution. (Formerly numbered Public Health 152.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 5, Chemistry 11A, or equivalent, consent of instructor. Survey of biological effects and assessment methods of airborne contaminants present in urban, industrial, and occupational environments. Mr. Mustafa

153. Public Health and Environmental Microbiology. (Formerly numbered Public Health 153.) Lecture, three hours; laboratory, one hour. Prerequisites: Biology 7, one organic chemistry course, or equivalent, consent of instructor. Introduction to environmental microbiology, emphasizing the role of microorganisms in composition due to water use, acidification of natural waters, acids and bases, carbon dioxide cycle, solubility reactions, oxidation and reduction, and global distribution of volatile toxic compounds. Mr. Mah

154. Environmental Management. (Formerly numbered Public Health 154.) Lecture, four hours; discussion, one hour. Prerequisites: Economics 100, Political Science 142 or 143, or equivalent, consent of instructor. Introduction to foundations and principles of environmental management, decision making, and evaluation of environmental policies and programs. Mr. Davos

155. Introduction to Environmental Health. (Formerly numbered Public Health 155.) Lecture, three hours; discussion, one hour. Prerequisites: one college chemistry or biology course or equivalent, consent of instructor. Introduction to environmental health, including coverage of sanitary principles and chronic and acute health effects of environmental contaminants. Mr. Mustafa

156. Introduction to Occupational Safety and Health. (Formerly numbered Public Health 156.) Prerequisites: Biology 5, one chemistry course, or equivalent, consent of instructor. Scientific, legal, and historical issues in occupational health. Introduction to various related disciplines (e.g., occupational medicine, nursing, industrial hygiene, toxicology, epidemiology, health education). Mr. Froines

157G. Health Hazards of Industrial Processes. (Formerly numbered Public Health 157G.) Lecture, two hours; field trips, four hours. Prerequisite: course 156. Industrial processes. Principles and occupational health hazards that arise from them. Mr. Froines, Mr. Hinds, Mr. Que Hee

157H. Physical Agents in the Work Environment (2 units). (Formerly numbered Public Health 157H.) Prerequisites: courses 156, 256 (may be taken concurrently), consent of instructor. Physics, measurement methods, health effects, and control methods for radiation (ionizing and nonionizing), noise, and heat in the workplace environment. Mr. Hinds, Mr. Wegst

199. Special Studies (2 to 4 units). (Formerly numbered Public Health 199.) Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

Graduate Courses

250A. Transport and Fate of Organic Contaminants in the Environment. (Formerly numbered Public Health 250A.) Prerequisites: master's degree in science, engineering, or public health, one year of calculus, and one organic or physical chemistry course, or consent of instructor. Review of multimedia aspects of environmental contamination. Focus on organic contaminants in the subsurface, with detailed consideration of predominant chemical and biochemical processes. Mr. Mackay

250B. Atmospheric Transport and Transformations of Airborne Chemicals. Prerequisites: scientific training. college-level or public health major, one year of calculus, and one course each in physics, organic chemistry, and physical chemistry, or consent of instructor. Role of regional or long-range transport, and atmospheric chemistry of fates of airborne chemicals in phenomena such as acid rain. Theoretical concepts, experimental, and computer modeling. Stratification, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Mr. Venkatram, Mr. Winer

251. Chemical Behavior of Aquatic Systems. (Formerly numbered Public Health 251.) Lecture, three hours. Prerequisites: course 150, Chemistry 11A, Mathematics 3A, consent of instructor. Chemistry of natural waters, acids and bases, carbon dioxide cycle, solubility reactions, oxidation and reduction, and applied problems. Mr. Valentine

252. Environmental Microbiology (formerly numbered Public Health 252.) Lecture, three hours. Prerequisites: courses 150, 153, or equivalent, consent of instructor. Basic concepts of eutrophication, indicators of organisms, aquatic microbes; assessment of biological treatment practices in water reuse and/or purification. Mr. Mah

253A. Environmental Toxicology. (Formerly numbered Public Health 253A.) Lecture, four hours; discussion, one hour. Prerequisites: Chemistry 152 or Biological Chemistry 202 and 203, consent of instructor. Essentials of toxicology, dose response, physical, chemical, or biological agents that adversely affect man and environmental quality. Mr. Froines

253B. Environmental Toxicology: Trace Contaminants (formerly numbered Public Health 253B.) Lecture, three hours; discussion, one hour. Prerequisite: course 253A. Essentials of toxicology in relation to trace contaminants. Mr. Froines

254. Environmental Decision Systems Analysis. (Formerly numbered Public Health 254.) Lecture, four hours; discussion, one hour. Prerequisites: course 154, Mathematics 3C, or equivalent, consent of instructor. Techniques and models of systems analysis and decision making/laboratory demonstrations, one hour. Prerequisites: courses 156, 257E, 257F, consent of instructor. In-depth coverage of regional or long-range transport, and atmospheric chemistry of fates of airborne chemicals in phenomena such as acid rain. Theoretical concepts, experimental, and computer modeling. Stratification, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. Mr. Mah

255. Seminar in Health Effects of Environmental Contaminants (2 units). (Formerly numbered Public Health 255.) Prerequisites: courses 150, 153, 154, 156, or equivalent, consent of instructor. Emphasis on health effects of air, water, environmental pollutants on man and review of research literature. May be repeated for credit. Mr. Mah

256. Occupational Disease. (Formerly numbered Public Health 256.) Prerequisites: course 156, consent of instructor. Introduction to health effects of occupational exposures, including recognition, evaluation, and prevention of occupational diseases. Emphasis on concepts of disease mechanisms, manifestations, and classification relevant to professionals in disciplines related to occupational health.

257E. Properties and Measurement of Airborne Particles (3 units). (Formerly numbered Public Health 257E.) Prerequisites: course 156, Biostatistics 100A, 100B (may be taken concurrently), one year of chemistry, mathematics through calculus, consent of instructor. Required of all departmental industrial hygiene students. Mr. Que Hee

257G. Industrial Hygiene Measurements Laboratory (3 units). (Formerly numbered Public Health 257G.) Corequisites: courses 257E, 257F. Limited to industrial hygiene majors. Laboratory methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environments. Mr. Hinds, Mr. Que Hee

257H. Control of Airborne Contaminants in Industry. (Formerly numbered Public Health 257H.) Lecture, two hours; laboratory, two hours. Prerequisites: consent of instructor. Principles and application of control technology to industrial environments, including general and local exhaust ventilation, air cleaning equipment, and respiratory protection. Mr. Hinds

257I. Biological Monitoring in Occupational Health (2 units). (Formerly numbered Public Health 257I.) Prerequisites: courses 150, 156, one year of chemistry, one biology course, consent of instructor. Principles and application of biological monitoring for assessment of occupational exposure to organic and inorganic chemicals. Mr. Que Hee

258B. Advanced Methods for Chemical Analysis of Environmental Samples. (Formerly numbered Public Health 258B.) Lecture, three hours; discussion/laboratory demonstrations, one hour. Prerequisites: courses 258A or equivalent, basic analytical chemistry. Survey of advanced methods for assessment of environmental contamination by chemical methods. Sampling, sample pretreatment, chemical analysis, quality assurance, and data analysis. With emphasis on contemporary methods applied to all media (air, water, soils, sludges, and biota). Mr. Que Hee

258C. Identification and Analysis of Hazardous Waste (2 units). Prerequisites: courses 156 and 257F, or consent of instructor. Designed to define, identify, label, and quantify hazardous wastes and hazardous conditions that will be protected. Provides a critical understanding of all analytical aspects of hazardous waste. Mr. Que Hee

259A. Critical Review of Scientific Basis of Occupational Standards. (Formerly numbered Public Health 259A) Prerequisites: courses 156, 257B, Biostatistics 100A, 100B. Special emphasis on critical evaluation of the literature. Attention specifically to interface of science and regulatory standards. Mr. Que Hee
495. Teacher Preparation in Environmental Health Sciences (2 units). (Formerly numbered Public Health 495.) Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master’s degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). (Formerly numbered Public Health 501.) Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master’s degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

502. UCL/A Hawaii Western Consortium Exchange (4 to 16 units). (Formerly numbered Public Health 502.) Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while C or NC graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

596. Directed Individual Study or Research (2 to 8 units). (Formerly numbered Public Health 596.) Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units). (Formerly numbered Public Health 597.) Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirement. May be repeated for credit. S/U grading.

598. Master's Thesis Research (2 to 8 units). (Formerly numbered Public Health 598.) Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Scope and Objectives

Enlightened management of the environment is necessary to maintain a suitable quality of life. Such management requires scientists trained in a multiplicity of environmental disciplines. These interdisciplinary, interactive skills are developed through the UCLA graduate Environmental Science and Engineering Program, leading to the Doctor of Environmental Science and Engineering (D.Env.) degree.

The goal of the program is to prepare professional environmental analysts to deal with the complexities of various courses of action on the environment and resources, to develop recommendations for sound environmental policies, and to devise means to implement policies adopted.

The present focus of the program, that of interdisciplinary training in the environmental sciences and its application, is a successful one. Graduates have been employed in technical assessment and management positions with governmental agencies, consulting firms, and industrial firms concerned with environment-related projects.

No undergraduate major is offered; however, studies can be arranged along several routes. Students with majors in the natural sciences, geography/ecosystems, public health, or engineering who have environmental or energy problem solving as a professional goal may wish to supplement their course preparation in consultation with the program faculty.
Although participating faculty members are mainly from the College of Letters and Science and the School of Engineering and Applied Science, the program is administered through the School of Public Health.

Doctor of Environmental Science and Engineering

Admission

In addition to meeting University minimum standards, you must have an excellent scholastic record (3.0 GPA in undergraduate work and 3.5 in graduate work) and must be acceptable to the interdepartmental committee. Your overall academic record, including Graduate Record Examination (GRE) scores, must reflect exceptional verbal and quantitative skills. Three letters of recommendation are required. You must hold a master's degree in engineering, public health, or one of the natural sciences to be formally admitted to the program.

Students with graduate training in fields of science and engineering who have not earned a master's degree may be considered for admission. In these cases you must show evidence of graduate training equivalent to the master's degree, including some research experience. Students with a bachelor's degree may be informally affiliated with the program while earning a master's degree in one of the participating departments.

All students must have taken the following preparation courses: (1) one year of introductory biology with laboratory; (2) one year of general chemistry with laboratory, including analytical methods, and one term of organic chemistry; (3) one course or equivalent experience in elementary programming and use of computer hardware and software; (4) one course in introductory geology with laboratory; (5) one year of calculus and one course in elementary statistics; (6) one year of introductory physics with laboratory. Any of the courses may be taken after you arrive at UCLA. Conditional admission is given to students who are otherwise qualified.

Subject to available funds, the program offers fellowships or graduate student researcher appointments to eligible first-year students. Prospective students may write for descriptive brochures to the Environmental Science and Engineering Program, School of Public Health, 46-081 CHS, UCLA, Los Angeles, CA 90024-1772.

Major Fields or Subdisciplines

Specialties within the program include, but are not limited to, the assessment and management of hazardous substances in the air, soil, and water environments, migration of contaminants in groundwater, health risks of toxic substances, and environmental problems common to the U.S. and Latin American countries. Also, you may slant your work toward greater emphasis either on the science engineering side or on the science policy side of your specialty.

Course Requirements

A minimum of 15 courses after admission to the program is required, including three core courses offered by the program faculty. At least three breadth courses, in addition to the core coursework, must be at the graduate level. Breadth courses from the following categories are selected in consultation with your faculty adviser. Exact requirements depend on your previous training.

Environmental Science — Five courses, including environmental chemistry; environmental biology, microbiology, and ecology (two courses); environmental geology; and atmospheric sciences.

Environmental Engineering and Technology — Seven courses, including hydrology; advanced statistics, computer science, or applied mathematics; engineering (three courses); and toxicology or epidemiology.

Social Sciences/Law — Three courses, including one in environmental law.

Electives — Three courses, of which individual instruction and research may be used to satisfy all or part of the requirement.

Core Courses — You must complete three four-unit core courses, offered by the program faculty, with grades of B or better. The courses cover critical issues and methods in environmental science, engineering, and policy. Successful completion of each core course is prerequisite for advancement to the problems course sequence.

Seminar — You are required to enroll in Environmental Science and Engineering M411 each term you are in residence.

Problems Course — Before proceeding to the problems course sequence, you must have completed a minimum of 12 breadth courses and the three core courses and have the approval of the program faculty. Twenty-four quarter units of the Environmental Science and Engineering 400 series (problems course sequence) are required and may be met by completing three consecutive terms (eight units per term) on a single theme, or as a minimum, at least two consecutive terms devoted to a single theme plus one term of participation or activity approved by the faculty. Enrollment in more than one problems course per term is not allowed. Normally problems course credit is earned only through courses offered by the program. However, you may petition the faculty for permission to earn problems course credit through multidisciplinary environmental projects offered in other departments at UCLA.

Qualifying Examinations

The written qualifying examination is normally taken during your second year in residence, after completing the core courses and most of the breadth courses. If all or parts of the examination are failed, one and only one repeat is allowed — at the next offering. The written examination covers the material in the core courses, the breadth courses, and selected topics in classical and contemporary subjects in the program's areas of interest. A reading list is provided.

When you have completed all other course requirements and are in the final term of the problems course, a doctoral committee is established. The committee conducts the University Oral Qualifying Examination, which explores the depth, breadth, and extent of your preparation, with appropriate emphasis on practical problems and situations. After successful completion of the oral examination and the problems course requirements, you are advanced to candidacy.

In case of failure, you may repeat the oral examination once after completing any additional coursework or individual study the doctoral committee may recommend.

Internship

Once you have been advanced to candidacy, an 18- to 24-month internship in your field of interest is arranged at an outside institution. Arrangements for the internship are your responsibility and must be approved by the doctoral committee, the interdepartmental committee, and the dean of the Graduate Division. Supervision during the field training experience is by your doctoral committee. During the internship, you must register for eight units of a 599 course in each academic-year term.

Dissertation/Final Oral Examination

A dissertation is required and should be a scholarly treatment of the problem area in which you have worked, but not a description of the totality of the experience. It should show evidence of critical thought and originality. No later than nine months after advancement to candidacy and the beginning of the internship, you are required to present a written prospectus, including an outline, of the dissertation and defend it before your doctoral committee. After completing the internship, you must return to UCLA to present an open seminar.

The final oral examination may be required at the option of your doctoral committee and includes the problems course, internship experience, and a defense of your dissertation. If the seminar and all other elements of your performance are judged satisfactory, you are awarded the degree of Doctor of Environmental Science and Engineering (D.Env.).
Graduate Courses

400A. Environmental Science and Engineering Problems Course (8 units). Prerequisite: consent of instructor and program chair. Primarily intended for students enrolled in environmental science and engineering doctoral program. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

400B. Environmental Science and Engineering Problems Course (8 units). Prerequisites: successful completion of course 400A, consent of instructor and program chair. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

400C. Environmental Science and Engineering Problems Course (8 units). Prerequisites: successful completion of course 400B, consent of instructor and program chair. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems.

400D. Environmental Science and Engineering Problems Course (8 units). Prerequisite: successful completion of course 400C and of internship approved by Environmental Science and Engineering Interdepartmental Committee. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems.

410. Environmental Science and Engineering Workshop (2 units). Prerequisite: consent of instructor. Primarily intended for students enrolled in environmental science and engineering doctoral program. Development of analytical or experimental skills essential to solution of environmental problems studied within courses 400A, 400B, 400C, and 400D.

M411. Environmental Health Sciences Seminar (2 units). (Formerly numbered 411.) (Same as Environmental Health Sciences M411.) Prerequisite: consent of instructor. Required of graduate students in environmental health sciences for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

595. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisite: consent of instructor and program chair. Supervised investigation of advanced environmental problems. S/U grading.

Epidemiology

Epidemiology has been defined as the study of the distribution and determinants of disease and injury in human populations. Epidemiologists study variations of disease in relation to such factors as age, sex, race, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

Epidemiology is a young field with constantly expanding boundaries. The range of activities that may be at least partly epidemiologic includes determination of the health needs of populations, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are borrowed from other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of purely epidemiologic methodology which includes not only statistical methodology and principles of study design, but a unique way of thinking that is beyond the rote memorization of rules. The contribution of epidemiology to any study involving groups of people is being increasingly recognized and demanded.

Epidemiologists may work in many settings, including international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, colleges and universities, and numerous research projects privately and publicly sponsored.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in Epidemiology and, through the School of Public Health, the M.P.H. and Dr.P.H. with a specialization in epidemiology.

Requirements for Graduate Degrees

Admission

Application forms, the Announcement of the UCLA School of Public Health, and the Epidemiology Handbook may be obtained by writing to the Office of Student Affairs, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the UCLA Application for Graduate Admission, Fellowships, and Financial Support must be completed. Three letters of recommendation are required, two from former professors and one from an employer (if no employer, three former professors) before an application is considered complete. It is your responsibility to ensure that the application file is complete.

The preferred deadline for graduate applications is January 15, 1991, for Fall Quarter 1991 admission. Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. No screening examination is required for admission. If your undergraduate coursework has been deficient in breadth of fundamental training, you must take specified undergraduate courses after admission. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation. In addition, you must be accepted by the Department of Epidemiology.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE) General Test, Medical College Admission Test (MCAT) or Dental Admission Test (DAT) scores are accepted only for applicants already holding M.D. or D.D.S.
degrees. Applicants at the master’s level require a minimum combined (verbal and quantitative) score of 1,100. Applicants at the doctoral level need a minimum combined (verbal and quantitative) score of 1,200. The analytical section is not required.

Refer to the UCLA Application for Graduate Admission, Fellowships, and Financial Support for the Test of English as a Foreign Language (TOEFL) requirement for international applicants.

Master’s Applicants
Your prior program of study should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and others that constitute an adequate preparation for the proposed area of specialization.

If your prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for your proposed area of specialization, you must include courses in those sciences in your graduate program; these may not be applied toward the minimum requirements for the degree.

Master of Public Health
The M.P.H. with a specialization in epidemiology is a professional degree in the field of public health. You are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

Course Requirements
You must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses, at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree. No more than 18 full courses may be required for the degree. The Biomedical Knowledge Screening Examination is required of all students except those with a prior doctorate in the health sciences (M.D., D.D.S., D.V.M., D.N.Sc.).

Required school core courses include Biostatistics 100A, Community Health Sciences 183, Environmental Health Sciences 155, Epidemiology 114, Health Services 130, one behavioral sciences course (two or four units), each core course may be waived if you have taken a similar college-level course elsewhere and can pass the waiver examination.

Required department core courses include Biostatistics 100B, Epidemiology 210, 211A-211B, 400 (for predoctoral students), 596 (for postdoctoral students). At least eight additional units must be selected from epidemiology courses in infectious and tropical diseases (116, 212D, 212H, 212L, M214, 216A, 216B, 218A, 218B, 219, 220A, 220B, 222), quantitative methods (211C, 211D, 223), chronic diseases (212E, 212G, 215A, 215B, 225), problems of developing countries (212F, 212M, 415, 418), injuries (212I, 212K, M417), and other topics (212J, M212N, 213, 217, 221, 226, 227, 410A, 410B, 411, 414).

Students holding a doctorate in an appropriate biomedical science may petition for waiver of course 400. You must also submit a report demonstrating competence in epidemiology. For predoctoral students the report may not be submitted prior to completion of course 400, which must be taken after completion of course 211B. Course 596, for postdoctoral students, may be taken concurrently with 211B.

Only courses in which you receive a grade of C– or better may be applied toward the requirements for a master’s degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan
You must pass two comprehensive examinations, one in epidemiology and a centrally administered written examination in the general field of public health. If you fail either examination, you may be reexamined once.

Both examinations are administered twice each academic year, usually the first Saturday in May and November. The examination in epidemiology is administered by the department after you complete the departmental requirements.

Field Training
Field training in an approved public health program is required of candidates who have not had prior relevant field experience. A minimum of four units, but no more than eight, is required.

Interdepartmental International Health Studies
The school offers several options for international or domestic students interested in international health. Faculty in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations in cross-cultural settings.

If you are interested, specify the department most relevant to your skills area on your application, clearly indicating your international interests. You will be given an appropriate adviser and directed to additional faculty members interested in internationally oriented training, service, and research.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to apply to the Community Health Sciences Department.

Cooperative Degree Programs
Following are descriptions of combined programs of study leading to the degree of M.P.H., and the articulated degree programs listed below, no course may be used for credit toward more than one degree.

M.A.-Latin American Studies/M.P.H.
The School of Public Health and the Latin American Studies Program have an articulated degree program whereby you can work sequentially for the master’s degree in Latin American studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in Latin American Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, Latin American Studies Program, UCLA, and/or the Office of Student Affairs, UCLA School of Public Health.

M.A.-Latin American Area Studies/M.P.H.
The School of Public Health and the Latin American Area Studies Program have an articulated degree program whereby you can work sequentially for the master’s degree in Latin American area studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in Latin American Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, Latin American Studies Program, UCLA, and/or the Office of Student Affairs, UCLA School of Public Health.

Preventive Medicine Residency Program
An accredited residency in general preventive medicine is available to physicians through the School of Public Health. The residency is designed to prepare qualified physicians for leadership roles in public health practice and preventive medicine teaching and research. Completion of the program can lead to board eligibility in public health and general preventive medicine — a specialty recognized by the American Board of Preventive Medicine.
The residency currently consists of at least two years of work but may be completed over a longer period of time. The first part is comprised of formal studies for the Master of Public Health (generally in either family health, epidemiology, or health services). Other areas (e.g., maternal and child health) may be considered on an individual basis. Application must be made simultaneously for both the residency and admission to the School of Public Health for the M.P.H.

The second part consists of supervised field training in preventive medicine and public health, which is individually organized for each resident’s particular interests and needs. A variety of opportunities is available through UCLA, including close working relationships with the Los Angeles County Department of Health Services, the Jonsson Comprehensive Cancer Center, and other city and county health departments in the state. New affiliations are developed as the need arises. Residents may also undertake studies toward qualification for a more advanced degree in public health — the Dr.P.H. or Ph.D. — or do research in collaboration with members of the faculty. Physician applicants who have completed M.P.H. studies at an accredited school of public health may be admitted directly into the field training part. Generally speaking, a license to practice medicine is a prerequisite to field training. Many residents are working members of health departments and complete the program over a period of several years. For further information, contact the Office of Student Affairs, UCLA School of Public Health.

Master of Science Degree

The Master of Science is a research-oriented degree within the general field of epidemiology. It includes the preparation of a thesis or comprehensive examination/major written report. Teaching experience is not required.

Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement: only four units of either course may be applied toward the minimum graduate course requirement. Epidemiology 597 may not be applied toward the degree requirements. No more than 18 full courses may be required for the degree.

Required core courses include Biostatistics 100A, 100B, Epidemiology 114, 210, 211A-211B. At least 15 additional units must be selected from epidemiology courses in infectious and tropical diseases (116, 212D, 212H, 212L, M21A, 216A, 216B, 218A, 218B, 219, 220A, 220B, 222), quantitative methods (211C, 211D, 223), chronic diseases (212E, 212G, 215A, 215B, 225), problems of developing countries (212F, 212M, 415, 418), injuries (212I, 212K, M417), and other topics (212J, 212N, 213, 217, 221, 226, 227, 410A, 410B, 411, 414). Each core course may be waived if you have taken a similar course elsewhere and can pass the waiver examination.

Only courses in which you receive a grade of C- or better may be applied toward the requirements for a master’s degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before you file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Comprehensive Examination/Report Plan

If the comprehensive examination/report option is approved, a guidance committee of three faculty members is appointed. A written comprehensive examination on your major area of study must be passed. If you fail, you may be reexamined once.

The preparation of a major written research report is required; it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Master of Science in Preventive Medicine and Public Health

The program is not admitting new students at this time.

Doctor of Public Health

The Doctor of Public Health (Dr.P.H.) with a specialization in epidemiology is the highest professional degree for the public health generalist. In addition to epidemiological training, you are expected to focus on public health practice and to acquire broad knowledge related to professional skills. The dissertation is of an applied, practical, problem-solving nature and must demonstrate your ability for independent investigation.

There is no foreign language requirement; teaching experience is recommended but not required.

Admission

In addition to the University minimum requirements, the department requires satisfactory performance on the Graduate Record Examination (GRE), completion of the M.S. in Public Health or in Epidemiology, and courses equivalent to Biostatistics 100A, 100B, Epidemiology 114, 211A-211B.

Course Requirements

A detailed course plan is developed in consultation with your faculty adviser in the department and in your cognate field. Ph.D. candidates must minor in a cognate field that offers its own Ph.D. degree. Additional courses in biostatistics and epidemiology are also required.
Qualifying Examinations

Before advancement to candidacy, you must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.

Final Oral Examination

A final oral examination is required of all candidates.

Upper Division Courses

111. Epidemiology, Public Health, and the Armas Race (2 units). (Formerly numbered Public Health 111.) Lecture, one hour; laboratory, four hours. Prerequisites: consent of instructor. Overview of history and current status of the arms race, with emphasis on medical and public health consequences of nuclear weapons and public health consequences of the arms race. P/NP or letter grading. Mr. Haile

112. Principles of Epidemiology. (Formerly numbered Public Health 112.) Lecture, two hours; laboratory, four hours. Prerequisites: one full biological sciences course. Not open for credit to students who have taken course 114. Introduction to epidemiology, including factors governing health and disease in populations. Ms. Coulson, Mr. Kraus

114. Epidemiology I. (Formerly numbered Public Health 114.) Lecture, two hours; laboratory, four hours. Prerequisites: Biostatistics 100A (may be taken concurrently), one full biological sciences course, consent of instructor. Not open for credit to students with credit for course 114. Introduction to epidemiology, including factors governing health and disease in populations. Mr. Frerichs, Ms. Vischer

M115. Disease Problems of Socioeconomic and Political Impact in Latin America. (Formerly numbered Public Health M115.) Seminar as Latin American Studies M115.) Lecture, six hours; discussion, six hours. Prerequisites: one upper division Latin American studies course. Social, economic, and political impact of important disease problems in Latin American countries. Mr. Work

116. Epidemiology of Nosocomial Infections (2 units). (Formerly numbered Public Health 116.) Prerequisites: course 112 or Microbiology 101 or Microbiology and Immunology 2025 or equivalent, consent of instructor. Introduction to epidemiology of hospital-acquired infections, their detection and control. Mr. Greenwood

199. Special Studies (2 to 4 units). (Formerly numbered Public Health 199.) Prerequisites: senior standing. Consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

Graduate Courses

210. Principles of Infectious Disease Epidemiology. (Formerly numbered Public Health 210.) Lecture, three hours. Prerequisites: course 211B, graduate standing. Epidemiology and control of infectious diseases. Mr. Barr

211A-211B. Epidemiologic Methods I and II. (Formerly numbered Public Health 211A-211B.) Lecture, four hours; discussion, one hour. Prerequisites: Biostatistics 100A, 100B, at least two upper division biology or social sciences courses, consent of instructor. Recommended but not required: course 112 or 114 or equivalent. Comprehensive coverage of concepts, principles, and methods in epidemiology, with emphasis on study design, statistical analysis, and causal inference. Theoretical and quantitative emphasis, focusing on investigation of disease etiology and other causal relationships in public health. Mr. Morgenstern

211C-211D. Epidemiology: Theory and Methodology. (Formerly numbered Public Health 211C-211D.) Prerequisites for course 211C: course 211B, Biostatistics 100A or equivalent, consent of instructor; for course 211D: course 211C or equivalent, consent of instructor. Advanced principles and methods of epidemiologic analysis. Topics include relating prevalence and incidence, analysis of clustering, methods of analysis for time-series data, information bias, the generalization of results, and meta-analysis. Comprehensive coverage of concepts, principles, and methods in epidemiology with emphasis on study design, statistical analysis, and causal inference. Theoretical and quantitative emphasis, focusing on investigation of disease etiology and other causal relationships in public health. Mr. Greenland

212D. AIDS: A Major Public Health Challenge. (Formerly numbered Public Health 212D.) Prerequisites: course 112 or 114, Biostatistics 100A or 101A, Health Services 130 or equivalent, one full biological sciences course, consent of instructor. Presentation of epidemiologic, biologic, psychological, and clinical characteristics of AIDS and HIV-1 infection. Discussion of policy implications and intervention strategies. S/U or letter grading. Mr. Detels

212E. Epidemiology of Cardiovascular Disease (2 units). (Formerly numbered Public Health 212E.) Lecture, one hour; discussion, one hour. Prerequisites: course 211A, consent of instructor. Theoretical, practical, and controversial aspects of cardiovascular epidemiology in developed and developing countries. Mr. Longnecker

212F. Parasitic Diseases and Global Health. (Formerly numbered Public Health 212F.) Prerequisites: course 112 or 114 or equivalent, one-year sequence in biology, zoology, or microbiology or equivalent, consent of instructor. Overview of major human parasitic diseases in terms of their biology, occurrence, distribution, and transmission in nature; diseases they cause and impact they have on health of populations; interaction with other disease states; and interventional strategies for their control. S/U or letter grading. Mr. Ash

212G. Epidemiology of Neurologic Disease (2 units). (Formerly numbered Public Health 212G.) Prerequisites: course 211B or equivalent, consent of instructor. Epidemiologic characteristics of selected chronic neurologic diseases, with particular emphasis on etiology and possible control. Ms. Visscher

212H. Epidemiology of Arthropod-Borne Disease. (Formerly numbered Public Health 212H.) Prerequisites: course 211B, consent of instructor. Epidemiologic aspects of diseases carried by arthropods, emphasizing life cycle and ecology of vectors as related to epidemiology of viral, rickettsial, bacterial, protozoal, and helminthic diseases. Mr. Barr

212L. Epidemiology of Nonintentional Injuries. (Formerly numbered Public Health 212L.) Lecture, three hours; discussion, two hours. Prerequisites: course 112, Biostatistics 100A, Environmental Health Sciences 155, or equivalent, one full biological or social sciences course, consent of instructor. Pertinent epidemiology methods for study of nonintentional trauma, including that from motor vehicle crashes, occupational exposure, and external causes of death. Mr. Kraus

212J. Occupational Epidemiology. (Formerly numbered Public Health 212J.) Lecture, two hours; discussion, two hours. Prerequisites: course 211A or equivalent, consent of instructor. Methodological considerations, approaches, and limitations in epidemiological studies of occupational and environmental health. Mr. Kraus

212K. Epidemiology of Assault, Homicide, and Suicide (2 units). (Formerly numbered Public Health 212K.) Lecture, two hours; discussion, one hour. Prerequisites: course 112, Biostatistics 100A, Environmental Health Sciences 155, or equivalent, one full biological or social sciences course, consent of instructor. Presentation and evaluation of epidemiologic research approaches to study of violent injury, focusing on description of injury, incidence description, risk factor analysis, and control evaluation. Mr. Kraus

212L. Sexually Transmitted Diseases: Epidemiology and Control. (Formerly numbered Public Health 212L.) Prerequisites: course 112 or 114, Biostatistics 100A, Microbiology 101 or 105 or equivalent, consent of instructor. Sexually transmitted diseases, medical/biological aspects, epidemiology and control in developed and developing countries. S/U or letter grading. Ms. Visscher

212M. Cancer Epidemiology in Developing Countries. Lecture, two hours; discussion, two hours. Prerequisites: course 112 or 114 or equivalent, Biostatistics 100A, two full biology courses, consent of instructor. Regional distribution and pattern of cancer in the developing world. Descriptive and analytical parts of course pave way to concepts of cancer prevention and control and how it can be achieved in countries with limited resources and a multitude of competing health problems. Mr. Ibrahim

M212N. Nutritional Epidemiology (2 units). (Formerly numbered Public Health 212N.) Lecture, two hours; discussion, two hours. Prerequisites: course 211A-211B, Biostatistics 100D or 101C, and one prior nutrition course, or consent of instructor. Designed to prepare students for conduct of research relating diet to health. Topics include measurement error, validity of diet assessment instruments, total energy intake in analysis, evaluation of data, data relating diet to colon cancer and heart disease. Mr. Longnecker

213. Environmental Epidemiology. (Formerly numbered Public Health 213.) Lecture, two hours; discussion, one hour; independent study, three hours. Prerequisites: course 112 or 114, Biostatistics 100B, Physics 3C or equivalent, graduate standing, consent of instructor. Methodologic problems and approaches of epidemiology for assessing health impact of major types of environmental exposures. Mr. Kraus

M214. Immunology of AIDS (2 units). (Formerly numbered Public Health 214.) (Same as Biology M214B, Microbiology M214B, and Microbiology and Immunology M202B.) Lecture, one hour; discussion, one hour. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, 202D, Microbiology 258B, or equivalent, consent of instructor. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.
215A. Epidemiology of Cancer. (Formerly numbered Public Health 215A.) Prerequisites: course 112, Biostatistics 100A, consent of instructor. Epidemiologic concepts and methods as applied to cancer. Classifications in cancer epidemiology. Models of causal association. Mr. Hale

215B. Epidemiology of Cancer (2 units). (Formerly numbered Public Health 215B.) Lecture, one hour; discussion, one hour. Prerequisites: course 215A, consent of instructor. Current issues in cancer epidemiology, including etiologic research, screening programs, prevention. Mr. Hale

216A. Ecology of Exotic Diseases. (Formerly numbered Public Health 216A.) Lecture, two hours; discussion, six hours. Prerequisites: course 112, Microbiology C103 or equivalent, consent of instructor. Geographic pathologic and behavioral causes of exotic diseases. Climatologic, ecological, and biological determinants of distribution, exposure to and occurrence of disease. Mr. Work

216B. Viral Diseases of Man. (Formerly numbered Public Health 216B.) Lecture, two hours; laboratory, six hours. Prerequisites: course 216A or equivalent, consent of instructor. Viral and rickettsial diseases of man. Natural history, epidemiology, diagnosis, control, and prevention of these diseases, especially in tropical situations. Mr. Work

217. Epidemiology and Health Policy (2 units). (Formerly numbered Public Health 217.) Prerequisites: courses 112 or 211A-211B, Biostatistics 100A, 100B, Health Sciences 130 or 230A-230B, or equivalent, consent of instructor. Application of epidemiologic methods and findings in health services research, population health planning, and health policy to provide a framework for investigating causal inference with decision making. Emphasis on conceptual and methodologic issues confronting researchers, clinicians, planners, administrators, and legislators. Mr. Morgenstern

218A. Protozoal Diseases of Man. (Formerly numbered Public Health 218A.) Prerequisites: Microbiology 101 or Biology 105 or equivalent, consent of instructor. May be taken concurrently with course 218B. Comprehensive review of the etiological agents and clinical manifestations of protozoal infections in man and animals. Mr. Ash (odd years)

218B. Protozoal Diseases of Man (2 units). (Formerly numbered Public Health 218B.) Prerequisites: course 218A. Laboratory methods of diagnosis and microscopic recognition of protozoal parasites in man and animals. Intestinal protozoa and organisms occurring in blood and tissues of their hosts and pathologic associations with disease conditions. Mr. Ash (odd years)

219. Arthropods of Medical Importance. (Formerly numbered Public Health 219.) Lecture, two hours; laboratory, six hours. Prerequisites: Biology 105 or 107 and 181, Microbiology 101, or equivalent. Biology and identification of mites and insects of public health importance involved in transmission and causation of human diseases. Mr. Barr

220A. Helminthic Diseases of Man. (Formerly numbered Public Health 220A.) Prerequisites: Biology 105 or 107, Biology 101 or Biology 105 or equivalent, consent of instructor. May be taken concurrently with course 220B. Comprehensive overview of systematics, morphology, biology, host-parasite relationships, public health problems, and control of nematodes, trematodes, and cestodes parasitic in man and animals. Mr. Ash (even years)

220B. Helminthic Diseases of Man (2 units). (Formerly numbered Public Health 220B.) Prerequisite or corequisite: course 220A. Laboratory diagnostic and practical microscopic recognition of nematodes, trematodes, and cestodes parasitic in man and animals. Pathology produced by these infections. Mr. Ash (even years)

221. Seminar in Epidemiology: Methodology (2 units). (Formerly numbered Public Health 221.) Prerequisites: course 211A, equivalent, consent of instructor. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

222. Seminar in Epidemiology: Infectious and Tropical Disease (2 units). (Formerly numbered Public Health 222.) Prerequisites: course 211A or equivalent, consent of instructor. Review of research on specific diseases of public health importance. May be repeated for credit.

223. Topics in Theoretical Epidemiology (2 units). (Formerly numbered Public Health 223.) Prerequisites: courses 211A, 211B, Biostatistics 100A and 100B and 100C (or Statistics M152A), consent of instructor. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic models, epidemiologic models, problems in inference, model specification problems, design issues, analysis issues, and confounding. May be repeated for credit with consent of instructor. S/U grading. Mr. Greenwood

225. Research Methods in Cancer Epidemiology (2 units). (Formerly numbered Public Health 225.) Prerequisites: courses 112, 211A, Biostatistics 100A. Biostatistics 100B or equivalent, consent of instructor. Practical approaches to epidemiologic cancer research. Hypothesis specification and choice of study design. Use of descriptive epidemiology, cohort studies, case control studies. Clustering, screening, sero-concordance methods. Means of identifying subjects and controls. Design of instruments. Sources of bias and confounding. Ms. Mack

226. Genetic Epidemiology (2 units). (Formerly numbered Public Health 226.) Prerequisites: course 112, Biostatistics 100A, one upper division biology course, or equivalent, consent of instructor. Proper design, analysis, interpretation, and application of analytical methods used by genetic epidemiologists, including studies of familial prevalence, twins, migrants, genetic marker-disease associations, and more complex analyses of genetic models. Mr. Haile

227. Public Health Research Using Available Data (2 units). (Formerly numbered Public Health 227.) Lecture, one hour; discussion, one hour. Prerequisites: courses 112, 410A, Biostatistics 100A, 403 or 405 or Community Health Sciences 277, or equivalent, consent of instructor. Presentation of discussions and critique of the use of already collected data in public health research. Major emphasis on public data such as National Center for Health Statistics surveys, vital statistics, census, etc. Ms. Coulson

228. Biology of HIV (2 units). (Same as Microbiology and Immunology M275.) Prerequisites: course 112 and Biostatistics 100A or equivalent, two biology courses, consent of instructor. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory. S/U or letter grading. Ms. Giorgi

229. Advanced Seminar in Epidemiology (2 units). (Formerly numbered Public Health 229.) Prerequisites: course 211B, consent of instructor. Current research in epidemiology. May be repeated for credit. S/U grading.

246. Epidemiology of Aging (2 units). (Formerly numbered Public Health 246.) Prerequisites: consent of instructor. Epidemiologic methods used to study aging as a disease process and to assess the population effect of aging. Emphasis on research on specific diseases and on special populations. S/U grading.

410A. Management of Epidemiologic Data (2 units). (Formerly numbered Public Health 410A.) Prerequisites: course 112, Biostatistics 100A (one course may be taken concurrently with consent of instructor). Concepts, collection, and management of data, with particular emphasis on large-scale data bases. Introduction to computerized and use of statistical packages. Ms. Coulson

410B. Management of Epidemiologic Data (2 units). (Formerly numbered Public Health 410B.) Prerequisites: course 410A or equivalent, consent of instructor. Development of special purpose programming language, or other computer languages for epidemiological problems. Data management in large-scale studies in infectious and chronic diseases. Ms. Coulson

411. Research Resources in Epidemiology (2 units). (Formerly numbered Public Health 411.) Lecture, one hour; laboratory, three hours. Prerequisites: courses 112 or 114, 211A, Biostatistics 100B, or equivalent, consent of instructor. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings. Mr. Strassburg and the Staff

415. Epidemiology for Developing Countries. (Formerly numbered Public Health 415.) Prerequisites: two biological sciences courses or equivalent, consent of instructor. Uses of epidemiology for assessing the burden of illness in the community, establishing program priorities, and developing disease interventions and prevention strategies in developing nations. Ms. Coulson

416. Epidemiologic Strategies for Evaluating Public Health Efforts (2 units). (Formerly numbered Public Health 416.) Seminar, three hours. Prerequisites: course 112, Biostatistics 100A, 403, or equivalent, Health Services M417 or Community Health Sciences M417. Methods necessary to assess effectiveness of the work of a health department. As part of a group-selected project, students conduct an actual small-scale data collection and evaluation study. S/U or letter grading. Mr. Detels

417. Injury Prevention Strategies and Countermeasures (2 units). (Formerly numbered Public Health 417.) Same as Community Health Sciences M417. Prerequisites: courses 112, Biostatistics 100A, two upper division biological or life sciences courses, or equivalent, consent of instructor. Lectures with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U grading. Mr. A. Chang, Mr. Kraus
Health Services

31-269 Center for the Health Sciences, (213) 825-2594

Professors
Robert H. Brook, M.D., Sc.D.
Jonathan E. Fielding, M.D., M.P.H.
Charles E. Lewis, M.D., Sc.D.
Marvin Marcus, D.D.S.
Stuart O. Schweitzer, Ph.D., Chair
Paul R. Torrens, M.D., M.P.H.
Lester Breslow, M.D., M.P.H., Emeritus
Carl E. Hopkins, Ph.D., M.P.H., Emeritus
Milton I. Roemer, M.D., M.P.H., Emeritus
Max H. Schoen, D.D.S., Dr.P.H., Emeritus
William Shonick, Ph.D., Emeritus

Associate Professors
E. Richard Brown, Ph.D.
Glenn A. Meinick, Ph.D.

Assistant Professors
Gerald F. Kominski, Ph.D.
Shoshanna Sofasi, Ph.D.
Robert O. Valdez, Ph.D.

Lecturers
Lois Green, M.P.H.
William Gurthner, M.H.A.
Joe Halef, M.P.A.
Arlene Liebowitz, Ph.D.
Joyce Mann, Ph.D.
Hassein Salehi, Ph.D.
Stuart Simon, M.P.H.

Adjunct Professors
Ellen Alkon, M.D., M.P.H.
Caswell A. Evans, Jr., D.D.S., M.P.H.
Arlene Fink, Ph.D.
Jacqueline B. Kosecoff, Ph.D.
Ruth J. Roemer, J.D., Researcher

Adjunct Associate Professors
Emily K. Abel, Ph.D.
Raymond D. Goodman, M.D., M.P.H.

Adjunct Assistant Professor
John Lammers, Ph.D.

Scope and Objectives

What distinguishes health services as a field of study is a shared societal perspective, rather than a shared academic discipline. Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. They are distinguished by the commitment to apply disciplinary training to the solution of problems in the delivery, financing, and evaluation of health services, focusing on a population or organization rather than an individual. Health services research and training programs aim to help us make better use of our health resources in meeting the health promotion, disease prevention, medical treatment, and rehabilitation needs of the community.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the M.P.H., includes specializations in various aspects of health administration, including management, planning, policy, and health services organization. For broader, more advanced professional training in health administration, a Ph.D. program is available. Graduates of the professional degree programs work in organizations involved in the delivery, financing, and evaluation of health services, both in the private and public sectors.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/UCLA Center for Health Care Financing Research afford opportunities for joint activities with the RAND Health Sciences Program. Graduates of the academic degree programs pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

Requirements for Graduate Degrees

Admission

Application forms may be obtained by writing to the Office of Student Affairs, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772, or to the Department of Health Services, 31-269 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the UCLA Application for Graduate Admission, Fellowships, and Financial Support must be completed. Three letters of recommendation are required, two from former professors and one from an employer (if no employer, three former professors) before an application is considered complete. It is your responsibility to ensure that the application file is complete. The preferred deadline for graduate applications is January 15, 1991, for Fall Quarter 1991 admission. Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. No screening examination is required for admission. If your undergraduate coursework has been deficient in breadth or fundamental training, you may be required to take specified undergraduate
courses after admission. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation. In addition, you must be accepted by and accommodated in the Department of Health Services.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE). The Medical College Admission Test (MCAT), Dental Admission Test (DAT), or Graduate Management Admission Test (GMAT) may be accepted in lieu of the GRE under certain circumstances. GRE scores are accepted only for applicants to the joint M.B.A.–M.P.H. program. Applicants at the master's level require a minimum combined (verbal and quantitative) score of 1,100. Applicants at the doctoral level need a minimum combined (verbal and quantitative) score of 1,200. The analytical section is not required.

Refer to the UCLA Application for Graduate Admission, Fellowships, and Financial Support for the Test of English as a Foreign Language (TOEFL) requirement for international applicants.

**Master’s Applicants**

Your prior program of study should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and others that constitute an adequate preparation for the proposed area of specialization.

If your prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for your proposed area of specialization, you must include courses in those sciences in your graduate program; these may not be applied toward the minimum requirements for the degree.

**Master of Public Health**

The M.P.H. with a specialization in health services is a professional degree in the field of public health. You are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

**Course Requirements**

You must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses, at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree. No more than 18 full courses may be required for the degree.

Required school core courses include Biostatistics 100A or 101A, Community Health Sciences 183, Environmental Health Sciences 150 or 155, Epidemiology 112, and Health Services 230A-230B. Each core course may be waived if you have taken a similar college-level course elsewhere and can pass the waiver examination.

Required department core courses include Health Services 230A-230B, 131 or 132, and 145 or 238. Only courses in which you receive a grade of C — or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

**Areas of Specialization**

Areas of specialization and typical course plans are listed below.

**Health Planning and Policy Analysis**

Within this specialization there are two tracks — planning, and policy analysis.

Planning — Required courses include Health Services 242, 243, 248, 444, one additional statistics course beyond Biostatistics 100A, one computer course, one course from any one of the fields of health financing, international health, social sciences, law, or public sector. One evaluation course, two management courses, and a summer internship are usually required.

Policy Analysis — Required courses include Health Services 233, 243, one additional statistics course beyond Biostatistics 100A, one computer course, one course from any one of the fields of health financing, international health, social sciences, law, or public sector. One evaluation course, two management courses, and a summer internship are usually required.

You are expected to meet with your adviser to select a track and to plan a program of study that meets these requirements.

**Health Services Management**

This specialization is only available to students enrolled in the three-year M.B.A.–M.P.H. concurrent degree program. For further information, refer to the listing under “Cooperative Degree Programs” later in this section. Admission to the program requires one course in accounting and one in microeconomics; prior coursework in management theory, economics, computers, and statistics is highly recommended. Required courses include Health Services 131, 400, 430, 431, 432, 433, 436, 596. In addition, one or more courses are recommended in the following areas: health law, planning, management of specific kinds of health services organizations, and issues of special importance in the management of health care organizations. You are assigned an adviser in both the Department of Health Services and the John E. Anderson Graduate School of Management who help you set up a program of study to meet the requirements for both degrees. You must also complete a minimum of 12 weeks of field study in an approved site, for which you receive four units of credit for Health Services 400.

Students are admitted only in Fall Quarter. Residencies are offered by various types of local health care facilities; students receive a stipend of $1,200 to $1,600 per month.

**Health Services Organization**

This area of specialization is limited to students with prior doctoral-level degrees (M.D., J.D., D.D.S., or equivalent). In addition to required school and department core courses, you must select with your adviser's approval at least four courses based on individual needs. Additional courses are determined on an individual basis.

**Comprehensive Examination Plan**

You must pass two comprehensive examinations, one in health services and a centrally administered written examination in the general field of public health. If you fail either examination, you may be reexamined once.

The schoolwide core course comprehensive examination is administered twice each academic year, usually the first Saturday in May and November. The examination in health services is administered by the department.

**Field Training**

Field training in an approved public health program is required of candidates who have not had prior relevant field experience. A minimum of four units, but no more than eight, is required.

**Interdepartmental International Health Studies**

The school offers several options for international or domestic students interested in international health. Faculty in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations in cross-cultural settings.

If you are interested, specify the department most relevant to your skills area on your application, clearly indicating your international interests. You will be given an appropriate adviser and directed to additional faculty members interested in internationally oriented training, service, and research.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to apply to the population and family health division of the Community Health Sciences Department.
Cooperative Degree Programs

Following are descriptions of combined programs of study leading to the M.P.H. degree. In the articulated degree programs listed below, no course may be used for credit toward more than one degree.

M.A.-African Area Studies/M.P.H.
The School of Public Health and the African Area Studies Program have an articulated degree program whereby you can work sequentially for the master's degree in African area studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Area Studies Program, UCLA African Studies Center, and/or the Office of Student Affairs, UCLA School of Public Health.

M.A.-Latin American Studies/M.P.H.
The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. degree program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

M.B.A./M.P.H.
The School of Public Health, Department of Health Services, and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Health Services Management Program, UCLA School of Public Health. GMAT scores are required for admission.

Preventive Medicine Residency Program
An accredited residency in general preventive medicine is available to physicians through the School of Public Health. The residency is designed to prepare qualified physicians for leadership roles in public health practice and preventive medicine teaching and research. Completion of the program can lead to board eligibility in public health and general preventive medicine — a specialty recognized by the American Board of Preventive Medicine.

The residency currently consists of at least two years of work but may be completed over a longer period of time. The first part is comprised of formal studies for the Master of Public Health (generally in either family health, epidemiology, or health services). Other areas (e.g., maternal and child health) may be considered on an individual basis. Application must be made simultaneously for both the residency and admission to the School of Public Health for the M.P.H.

The second part consists of supervised field training in preventive medicine and public health, which is individually organized for each resident’s particular interests and needs. A variety of opportunities is available through UCLA, including close working relationships with the Los Angeles County Department of Health Services, the Jonsson Comprehensive Cancer Center, and other city and county health departments in the state. New affiliations are developed as the need arises. Residents may also undertake studies toward qualification for a more advanced degree in public health — the Dr.P.H. or Ph.D. — or do research in collaboration with members of the faculty. Physician applicants who have completed M.P.H. studies at an accredited school of public health may be admitted directly into the field training part. Generally speaking, a license to practice medicine is a prerequisite to field training. Many residents are working members of health departments and complete the program over a period of several years. For further information, contact the Office of Student Affairs, UCLA School of Public Health.

Master of Science Degree
The Master of Science is a research-oriented degree within the general field of health services. It includes the preparation of a thesis or comprehensive examination/major written report. Teaching experience is not required.

Course Requirements
You must complete at least one year of graduate residence at the University of California and a minimum of 14 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement.
an applied, practical, problem-solving nature and must demonstrate your ability for independent investigation.

There is no foreign language requirement; teaching experience is recommended but not required.

**Admission**

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.P.H. or a master’s degree in an appropriately related field (if the master’s degree is in a field other than public health, you must have taken the equivalent of the M.P.H. mandatory core courses or include them in the course of study after admission), (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by the department to the School of Public Health, (5) approval by the admissions policy committee and the associate dean for Student Affairs. Screening or evaluation examinations may be required.

**Course Requirements**

You must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/divisions other than Health Services. The department also requires an additional area of concentration which may be either inside or outside the school (e.g., epidemiology, economics, political science, sociology, management). If the concentration is in another School of Public Health department, courses in the concentration may simultaneously fill part of the breadth requirement.

From 48 to 72 quarter units beyond the master’s degree are required. About one-third of the coursework is to be in the substantive area of structure and functioning of health services, one-third in skills and tools required for health services management and policy analysis, and one-third in elective courses to meet individual needs and interests. In addition, if the master’s degree did not include it, you must spend three to nine months in a supervised residency or practicum experience in one or more health-related organizations.

**Qualifying Examinations**

Before advancement to candidacy, you must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.

**Final Oral Examination**

A final oral examination is required of all candidates.

**Ph.D. Degree**

The Ph.D. in Health Services is an advanced research degree that emphasizes depth of knowledge and research skills. The dissertation must demonstrate your ability for independent scholarly investigation.

There is no foreign language requirement for the Ph.D.; teaching experience is recommended but not required.

**Admission**

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.S. in Health Services or an appropriately related field (students with an M.P.H. need to satisfy the course requirements of the M.S. in Health Services before or after admission), (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by the department to the School of Public Health, (5) approval by the admissions policy committee and the department chair. Screening examinations may be required.

**Course Requirements**

You must take at least 48 units of course credit beyond the master’s level in fields relevant to health services. At least 16 units in a minor field are required. The Ph.D. minor field should provide a strong theoretical foundation in one discipline, so that the research paradigms or models may be applied to health services.

**Qualifying Examinations**

Before advancement to candidacy, you must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.

**Upper Division Courses**

130. Health Services Organization. (Formerly numbered Public Health 130.) Prerequisite: four units of social sciences. Structure and function of American health care system; issues and forces shaping its future.

131. Structure and Function of Health Care Facilities. (Formerly numbered Public Health 131.) Lecture, two hours; discussion, two hours. Prerequisites or corequisites: course 130, consent of instructor. Introduction to structure, organization, and function of health care facilities.

132. Management Science for Health Planning and Administration. (Formerly numbered Public Health 132.) Lecture, three hours; laboratory, two hours. Prerequisites: Biostatistics 100A and either Biostatistics 403 or Management 404, or equivalent, consent of instructor. Introduction to the use of quantitative analyses to support managerial and operational decisions in health services organizations. Topics include mathematical models for structuring decisions, resource allocation, inventory control, task sequencing, scheduling, and forecasting. Use of microcomputers.

133. Introduction to Comprehensive Health Planning. (Formerly numbered Public Health 134.) Lecture, four hours; fieldwork, four hours. Prerequisite: one upper division microeconomics, statistics, calculus, or political science course. Concepts underlying health planning, state of the art, and some relevant literature.

Mr. Melnick

136A. Introduction to Health Services Research. (Formerly numbered Public Health 136A.) Prerequisites or corequisites: Biostatistics 100A or equivalent, consent of instructor. Review of the field of health services research. Uses of quantitative methods and applications of conceptual-theoretical constructs (as well as methodologies) from social and behavioral sciences and epidemiology to studies of workings of health services.

136B-136C. Practices of Evaluation in Health Services: Theory and Methodology (2 units each). (Formerly numbered Public Health 136B-136C.) Lecture, four hours; discussion, one hour. Prerequisites: course 136A or equivalent, consent of instructor. Introduction to health services evaluation. Examination and performance of specific evaluation procedures. Conducting of health services investigations, reporting results and methodologies. In Progress grading. Ms. Bastani

138. Politics of Health Care. (Formerly numbered Public Health 138.) Prerequisites: one social sciences course, consent of instructor. Concepts and procedures for political analysis; national, state, and local politics in health care; examination of selected case studies.

141. Financial and Managerial Accounting for Health Services Organizations. (Formerly numbered Public Health 141.) Prerequisites: course 130 or equivalent, consent of instructor. Introduction to financial and managerial accounting and its application to the health services industry.

148. Introduction to Health Economics. (Formerly numbered Public Health 148.) Prerequisites or corequisites: courses 230A-230B or equivalent, consent of instructor. Presentation of tools of economic analysis. Topics include introductory concepts of microeconomics, theory of demand for health insurance and health care, substitution of health personnel, hospital cost functions, and costs and benefits of health programs.

Mr. Salehi

199. Special Studies (2 to 4 units). (Formerly numbered Public Health 199.) Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

**Graduate Courses**

230A-230B. Health Systems Organization and Financing. (Formerly numbered Public Health 230A-230B.) Lecture, four hours; discussion, two hours. Prerequisites: health services major; four upper division courses in two of following: social science, political science, history, economics, anthropology, medicine, or health services law, management or organizational behavior, operations research, philosophy; consent of instructor. In-depth analysis of health services systems in the U.S., using relevant theories, concepts, and models.
232. Governmental Health Services and Trends. (Formerly numbered Public Health 232.) Prerequisites: course 130 or equivalent, two additional upper division social science or behavioral sciences courses, consent of instructor. Systematic analysis of interface between organized programs of personal health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health and newer medical care and quality control functions. Mr. Shonick

233. Health Policy Analysis. (Formerly numbered Public Health 233.) Lecture, two hours; discussion, two hours. Prerequisites: course 130 or equivalent, three social sciences courses, consent of instructor. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy. Mr. Valdez

235. Law, Social Change, and Health Service Policy. (Formerly numbered Public Health 235.) Prerequisites: course 130, two upper division political science or sociology courses or equivalent, consent of instructor. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs. Ms. Roemer

237A-237B. Special Topics In Health Services Res- 
seaches. (Formerly numbered Public Health 237A-237B.) Lecture, two hours; discussion, 
three hours. Prerequisites: course 130, Biostatistics 100A, 100B, 100C, or equivalent, consent of instructor. In-depth consideration of problems in application of statistical and other quantitative methods in health services research. Mr. Kuehn

238. Microeconomic Theory of the Health Sector. (Formerly numbered Public Health 238.) Prerequisites: course 232, Biostatistics 100A or equivalent, Economics 1, 2, consent of instructor. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Mr. Kominski

239. Aging and Long-Term Care. (Formerly numbered Public Health 239.) Prerequisites: courses 130, 138, Community Health Sciences 182, or equivalent, consent of instructor. Long-term care of the chronically ill elderly examined from perspective of political and sociodemographic trends, including populations at risk, health options, and alternative forms of care such as nursing homes, home care, and care by informal support systems. Ms. Abel

240. Health Care Issues in International Perspec-
view. (Formerly numbered Public Health 240.) Prerequisites: two additional upper division social science courses, or equivalent, consent of instructor. Analysis of crucial issues in health care; manpower policy, economic support, health facilities, patterns of health service delivery; regulation, planning, and other aspects of health care systems probed in settings of European welfare states, developing nations, and socialist countries. Mr. Kuehn

M241. Women, Health, and Aging: Policy Issues (2 or 4 units). (Formerly numbered Public Health M241.) (Same as Social Welfare M290D.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent, consent of instructor. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health care, roles of society and policies that respond to their health needs. Ms. Abel

242. Strategic Planning and Marketing In Health Care. (Formerly numbered Public Health 242.) Lecture, three hours; discussion, one hour. Prerequisites: courses 230A-230B, Biostatistics 100A, 100B, or equivalent, consent of instructor. Survey course covering theory and applications of strategic planning and marketing concepts as they apply to health care organizations. Lectures and discussion of case studies for which stu-
dents must prepare in advance, fieldwork, and microcomputer exercises. Mr. Mehnick

243. Issues in Health Planning. (Formerly numbered Public Health 243.) Discussion, three hours; other, three hours. Prerequisites: course 244, Community Health Sciences 181 or equivalent research course. In-depth presentation and analysis of current issues of importance to advanced students in health planning. Mr. Mehnick

244. Seminar in Health Services and Policy Evaluation. (Formerly numbered Public Health 244.) Prerequisites: Biostatistics 100A, 100B, basic courses in program evaluation and health services organization, or equivalent, doctoral standing, consent of instructor. Seminar applying alternative evaluation research the-

tories and methods to health service organizations and systems. Topics include linking evaluation criteria to policy decisions, theories, and previous research; polit-
ic and organizational intervention; evaluation of funding; and meta-evaluation. S/U or letter grading. Ms. Sosaer

245. Society's Response to Aging. (Formerly num-
bered Public Health 245.) Prerequisites: two health services courses, or equivalent, consent of instructor. Seminar in economic analysis of current health services issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health policy. Mr. Schneider

246. Research Topics in Health Economics. (For-
merly numbered Public Health 246.) Prerequisites: courses 130, 238, 446 or equivalent, consent of instructor. Seminar in economic analysis of current health ser-
vcies issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health policy. Mr. Kuehn

247. Research Topics in Health Economics. (For-
merly numbered Public Health 247.) Prerequisites: courses 130, 238, 446 or equivalent, consent of instructor. Examination of central issues of health care delivery to the elderly in the U.S. Topics include demographic trends, economic characteristics, health services: course 444, Community Health Sciences 181 or equivalent research course. In-depth presentation and analysis of current issues of importance to advanced students in health planning. Mr. Mehnick

248. Small Area Planning for Resources for Per-
sonal Health Service. (Formerly numbered Public Health 248.) Lecture, three hours; laboratory, two hours. Prerequisites: courses 130, 134, or equivalent, consent of instructor. Seminar in economic analysis of current health service issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health policy. Mr. Schneider

249A-249Z. Special Topics In Health Services (2 
and 4 units each). (Formerly numbered Public Health 249A-249Z.) Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced seminars covering current issues and special topics in health manpower, health planning theory, methods, and experience with planning for personal health care resources for small geographic areas. Determining needs and estimating resources for the use of health care resources. Survey of elements of different disciplines used in areawide health planning. Laboratory projects and exercises designed to implement studies of health planning theory and methods. Ms. Abel

249F. Quality Assessment and Assurance. (Formerly numbered Public Health 249F.) Prerequisites: courses 130, Biostatistics 100A, Epidemiology 112, one additional health services or epidemiology course, or equivalent, consent of instructor. Fundamental issues in quality assessment, quality assurance, and mea-
surement of health status. Mr. Brook

249G. Medical Technology — Development, Diffu-
sion, Assessment, and Health Services. (Formerly numbered Public Health 249G.) Prerequisites: courses 230A-230B, 238, or equivalent, one upper division policy analysis course. Doctoral-level seminar focusing on the role of professional societies in the advancement of medical science and development of new technol-
gies and promotion and regulation of their use.

400. Field Studies in Public Health (2 or 4 units). (Formerly numbered Public Health 400.) Prerequi-

ites: consent of instructor. Field observation and stud-
es in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. Ms. Sosaer

550 / Health Services / SCHOOL OF PUBLIC HEALTH

414. Injury Prevention Strategies and Counter-
measures (2 or 4 units). (Formerly numbered Public Health 414.) (Same as Biostatistics 417 and Epidemiology M417.) Prerequisites: Biostatistics 100A, Epidemiology 112, two upper division biological or life sciences courses, or equivalent, consent of instructor. Seminar in economic analysis of current health services issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health policy. Mr. Kuehn

430. Health Service Organization and Management Theory. (Formerly numbered Public Health 430.) Prerequisites: course 130, two upper division social science courses, or equivalent, consent of instructor. Ap-
pli cation of strategic and management theory to man-
agement systems. Mr. Lammers

431. Managerial Processes in Health Service Or-
ganizations. (Formerly numbered Public Health 431.) Lecture, one hour; laboratory, three hours. Prerequisites: course 430, consent of instructor. Man-
agement processes and problems in health service organizations at several levels: individual, inter-
personal, group, intergroup, system, and interorganiza-
tion. Unique features of health service organizations are stressed as applications are presented. Ms. Lammers

432. Integrative Seminar in Health Services Man-
agement. (Formerly numbered Public Health 432.) Prerequisite: course 431. Residents and preceptors are responsible for presenting cases of actual admin-
istrative problems for solution by teams of students and faculty. Ms. Sosaer

433. Health Service Organization Policy and Strate-
gy. (Formerly numbered Public Health 433.) Lecture, three hours; discussion, one hour. Prerequisites: courses 130, 238, 446, or equivalent, consent of instructor. Seminar in economic analysis of current health service issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health policy. Mr. Schneider

434. Employer/Employee Health Management. (For-
merly numbered Public Health 434.) Lecture, two 
hours; discussion, two hours. Prerequisites: course 130, a combination of three graduate courses in health planning, hospital finance, health policy, health insur-
ance, occupational health, health services research, 
and health information systems, or equivalent, consent of instructor. Fundamental issues in quality assessment, quality assurance, and mea-
surement of health status. Mr. Gurtner, Ms. Sosaer

550 / Health Services / SCHOOL OF PUBLIC HEALTH
435. History of Public Health. (Formerly numbered Public Health 435.) Discussion, three hours. Prerequisites: doctoral standing or consent of instructor. Emphasis on topics which illuminate current issues in public health policy. Discussion of historical perspectives on health care providers, health care institutions, health care reform; precedents, public health activities relating to child-birth, and AIDS. Ms. Abel

436. Financial Management of Health Service Organizations. (Formerly numbered Public Health 436.) Prerequisites: courses 131, 141, 430, or equivalent, consent of instructor. Principles of and systems relating to organization and accounting principles to health care facilities, including unique financial characteristics of health care facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and social responsibility. Ms. Valdez

437. Legal Environment of Health Services Management (2 units). (Formerly numbered Public Health 437.) Prerequisites: course 131 or equivalent, consent of instructor. General survey of legal aspects of health services management, including government, informed consent, medical malpractice, contracts, negligence, and case law relating to health facility operations. Ms. Alkon

438. Issues and Problems of Local Health Administration (2 units). (Formerly numbered Public Health 438.) Prerequisites: course 130, Epidemiology 112, one additional health services course, or equivalent, consent of instructor. Analysis of organizational, financial, and political aspects of administration of health care delivery systems and health agencies. Mr. Fielding

440A. Health Information Systems: Organization and Management. (Formerly numbered Public Health 440A.) Lecture, two hours; laboratory, three hours. Prerequisites: courses 230A-230B or equivalent, consent of instructor. Principles of and systems relating to organization and management of a health facility's health information system. Dr. LaFreniere

440B. Health Information Systems: Organization and Management (2 units). (Formerly numbered Public Health 440B.) Lecture, two hours; laboratory, three hours. Prerequisites: course 440A or equivalent, consent of instructor. In-depth examination of several specific clinical environments and management of health care delivery systems and health agencies. Dr. LaFreniere

444. Applied Methodology in Health Planning. (Formerly numbered Public Health 444.) Lecture, three hours; fieldwork, four hours. Prerequisites: courses 230A-230B, or equivalent, consent of instructor. Demonstration of methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles area. Mr. Melnick

446. Financing Health Care. (Formerly numbered Public Health 446.) Prerequisites: course 130, Economics 110, or equivalent, one hour; laboratory two hours. Prerequisites: courses 130, 141, 430, or equivalent, consent of instructor. Hospital financial management, including reimbursement management, capital financing, and capital investment analysis. Discussed and analyzed with respect to students' individual residency sites. Mr. Schweitzer

447. State Health Policy Issues. (Formerly numbered Public Health 447.) Seminar, three hours. Prerequisite: course 130. Focus on health policy development and implementation at state government level, with emphasis on financing, direct provision, and regulation of health care services, facilities, equipment technology, and manpower. Exploration of intergovernmental relationships. Mr. Marcus

447D. Management of Health Maintenance Organizations. (Formerly numbered Public Health 447D.) Lecture, three hours. Prerequisites: courses 130, 134, or equivalent, consent of instructor. Alternative approaches to fee-for-service for paying, providing, or arranging for health care services and the relationships of these approaches to national health policy. Mr. Schweitzer

447E. Health Insurance Principles and Programs. (Formerly numbered Public Health 447E.) Prerequisites: courses 130, 230, one additional health services course, or equivalent, consent of instructor. Description of social, actuarial, and commercial assumptions underlying private health insurance. Comparison with government-sponsored health insurance. Analysis of diversity of voluntary medical care insurance plans under different sponsorship and with varied scope of coverage and benefits and their implications for public and private medical care developments. Mr. Shonick

448. Special Populations: Health Service Policy Issues. (Formerly numbered Public Health 448.) Prerequisites: courses 138, 230A-230B, 232, or equivalent, consent of instructor. Limited to doctoral students or M.S. and M.P.H. students with advanced development in public health policy. Focus on special health services for selected priority population groups, integrating scientific, organizational, economic, ethical, and political evidence as a basis for public policy. Differences in populations may be selected for attention each year. Mr. Brown

549D. Case Studies in Dental Practice (2 units). (Formerly numbered Public Health M449D.) Same as Dentistry M449D.) Description and analysis of American dental care system from historical, ethical, and legal perspectives. Assessment of how dentistry fits within the general provision of health care services in America, with comparisons to dental care provisions in other countries.

549E. Introduction to Health Care Services (2 units). (Formerly numbered Public Health M449E.) Prerequisite: consent of instructor. Focus on the role of the ethics in the use of fact and evidence in health care planning. Mr. Marcus

591. Cooperative Program (2 to 8 units). (Formerly numbered Public Health 591.) Prerequisites: courses 138, 230A-230B, 232, or equivalent, consent of instructor. Examination of ethical and social issues in health care systems. Mr. Melnick

599. Doctoral Dissertation Research (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisites: consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

599. Preparatory Program (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisites: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Use of health service provision courses in students in cases where students are enrolled in UCLA graduate programs and the UCLA health service provision courses are not applicable toward degree requirements. Only the equivalent of eight quarter units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirements. Mr. Marcus

599. Thesis Research (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisites: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Use of health service provision courses in students in cases where students are enrolled in UCLA graduate programs and the UCLA health service provision courses are not applicable toward degree requirements. Only the equivalent of eight quarter units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirements. Mr. Marcus

599. Doctoral Dissertation Research (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisites: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Use of health service provision courses in students in cases where students are enrolled in UCLA graduate programs and the UCLA health service provision courses are not applicable toward degree requirements. Only the equivalent of eight quarter units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirements. Mr. Marcus

599. Doctoral Dissertation Research (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisites: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Use of health service provision courses in students in cases where students are enrolled in UCLA graduate programs and the UCLA health service provision courses are not applicable toward degree requirements. Only the equivalent of eight quarter units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirements. Mr. Marcus

599. Doctoral Dissertation Research (2 to 8 units). (Formerly numbered Public Health 599.) Prerequisites: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Use of health service provision courses in students in cases where students are enrolled in UCLA graduate programs and the UCLA health service provision courses are not applicable toward degree requirements. Only the equivalent of eight quarter units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirements. Mr. Marcus
Appendix

Nondiscrimination

The University of California, in compliance with Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, does not discriminate on the basis of race, color, national origin, religion, sex, handicap, or age in any of its policies, procedures, or practices; nor does the University discriminate on the basis of sexual orientation. This nondiscrimination policy covers admission and access to, and treatment and employment in, University programs and activities, including but not limited to academic admissions, financial aid, educational services, and student employment.

Inquiries regarding the University’s equal opportunity policies may be directed to the Campus Counsel, 3149 Murphy Hall, UCLA, Los Angeles, CA 90024-1405. Inquiries regarding Section 504 (handicap discrimination) may be directed to the 504 Compliance Officer, 2248 Murphy Hall, UCLA, Los Angeles, CA 90024-1405, (213) 825-2242 Voice/CRS or TDD (213) 206-3349.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, religion, sex, sexual orientation, or handicap and may contact the Office of the Dean of Students, 1206 Murphy Hall, for further information and procedures.

Harassment

Sexual Harassment

Every member of the campus community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy.

Definition

Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when:

1. Submission to such conduct is made either explicitly or implicitly a term or condition of instruction, employment, or participation in other University activity OR
2. Submission to or rejection of such conduct by an individual is used as a basis for evaluation in making academic or personnel decisions affecting an individual OR
3. Such conduct has the purpose or effect of unreasonably interfering with an individual’s performance or creating an intimidating, hostile, or offensive University environment.

In determining whether the alleged conduct constitutes sexual harassment, consideration will be given to the record as a whole and to the totality of the circumstances, including the nature of the sexual advances and the context in which the alleged incidents occurred (University of California Policies Applying to Campus Activities, Organizations, and Students, Part B, Section 40.21).

Complaint Resolution

Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly.

An individual who chooses not to confront the alleged offender and who wishes help, advice, or information may contact the appropriate department chair, the offender’s supervisor, the Office of the Ombudsman (274 Kinsey Hall, 825-7627), or the Women’s Resource Center (2 Dodd Hall, 825-3945). These offices provide assistance and information regarding ways to initiate informal and formal procedures for complaint resolution.

Other Forms of Harassment

The University strives to create an environment which fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, and other personal characteristics. Certainly harassment, in its many forms, works against those values and often corrodes a person’s sense of worth and interferes with one’s ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community (President Gardner, September 21, 1988). The University of California Policies Applying to

¹Source: A national survey of a representative group of colleges conducted by the College Placement Council, representing the 80 percent range of offers for January 1990 throughout the country. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.
Complaint Resolution

One of the necessary measures in our efforts to assure an atmosphere of civility and mutual respect is the establishment of procedures which provide effective informal and formal mechanisms for those who believe that they have been victims of any of the above misconduct.

Many incidents of harassment and intimidation can be effectively resolved through informal means. For example, an individual may wish to confront the alleged offender immediately and firmly. An individual who chooses not to confront the alleged offender and who wishes help, advice, or information is urged to contact any of the Harassment Information Centers listed below.

In addition to providing support for those who believe they have been victims of harassment, Harassment Information Centers offer persons the opportunity to learn about the phenomena of harassment and intimidation, to understand the formal and informal mechanisms by which misunderstandings may be corrected and, when appropriate, student perpetrators may be disciplined, and to consider which of the available options are the most useful for the particular circumstances:

(1) Office of the Ombudsman, 274 Kinsey Hall, 825-7627
(2) Women's Resource Center, 2 Dodd Hall, 825-3945
(3) Office of Residential Life, Residential Life Building, 825-3401
(4) Office of International Students and Scholars, 105 Men's Gym, 825-1681
(5) Student Psychological Services, 4223 Math Sciences, 825-4207, or A3-062 Center for the Health Sciences, 825-7985
(6) Office of Fraternity and Sorority Relations, 118 Men's Gym, 825-6322

With regard to the Universitywide Student Conduct Harassment Policy, complainants should be aware that not all conduct which is offensive may be regarded as a violation of this Policy and may, in fact, be protected expression. Thus, the application of formal institutional sanctions to such protected expression may not be legally permissible. Nevertheless, the University is committed to reviewing any complaint of harassing or intimidating conduct by a student and intervening on behalf of the complainant to the extent possible.

Faculty Code of Conduct

The entire Faculty Code of Conduct can be found in the UCLA Faculty Handbook, Supplement A, pages 32-35. Section IIA outlines faculty obligations to students and reads as follows:

Teaching and Students

Ethical Principles — “As a teacher, the professor encourages the free pursuit of learning in students: holds before them the best scholarly standards of the discipline; demonstrates respect for the student as an individual and adheres to the proper role as intellectual guide and counselor; makes every reasonable effort to foster honest academic conduct and to assure that the evaluation of students reflects their true merit; respects the confidential nature of the relationship between professor and student; avoids any exploitation of students for private advantage and acknowledges significant assistance from them; and protects their academic freedom.” (from 1966 AAUP statement)

Types of Unacceptable Conduct

(1) Failure to meet the responsibilities of instruction, including (a) arbitrary denial of access to instruction, (b) significant intrusion of material unrelated to the course, (c) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, (d) to meet class, to keep office hours, or to hold examinations as scheduled, (e) evaluation of student work by criteria not directly reflective of course performance, (e) undue and unexcused delay in evaluating student work.

(2) Discrimination against a student on political grounds, or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a Vietnam-era veteran or disabled veteran or, within the limits imposed by law or University regulations, because of age or citizenship or for other arbitrary or personal reasons.

Charges of Violation

If a student has reason to believe that a faculty member has violated the code, the student may consult one of the Harassment Information Center counselors listed above for help in deciding on appropriate action. If the student believes that formal discipline may be warranted, the alleged violator should be reported to the chair of the department and to the dean of the division or school with a request that a charge be filed with the Academic Senate Charges Committee. If the dean, in consultation with the vice chancellor for Faculty Relations, determines that there are not sufficient grounds for the administration to file a charge, the student may, after discussing the matter with a member of the Academic Senate Grievance and Disciplinary Procedures Committee (3125 Murphy Hall, 825-3852), file such a charge in person.

Residence for Tuition Purposes

If you have not been living in California with intent to make it your permanent home for more than one year immediately before the residence determination date for each term in which you propose to attend the University, you must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Law Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of The Regents of the University of California. Under these rules adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Who Is a Resident?

If you are an adult who is not an alien present in the U.S. in a nonimmigrant status which precludes you from establishing domicile in the U.S. (e.g., a B, C, D, F, H, J, or M visa) and you wish to be classified as a resident for tuition purposes, you must have established residence in California more than one year immediately preceding
the residence determination date for the term during which you propose to attend the University, and you must have given up any previous residence. You must also present objective evidence that you intend to make California your permanent home. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for one full year. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of your stay. Your residence cannot be derived from your spouse or your parents.

Establishing Intent to Become a California Resident

Indications of your intent to make California your permanent residence can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver’s license; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which you keep your personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which you claim residence can also serve as an indication of your intent. Documentary evidence is required, and all relevant indications will be considered in determining your classification. Your intent will be questioned if you return to your prior state of residence when the University is not in session.

General Rules Applying to Minors

If you are an unmarried minor (under age 18), the residence of the parent with whom you live is considered to be your residence. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of your parent’s right of control. If you live with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa which precludes you from establishing domicile in the U.S., you may establish your own residence when both your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors

(1) Divorced or Separated Parents — You may be able to derive California resident status from a California resident parent if you move to California to live with that parent on or before your 18th birthday. If you begin residing with your California parent after your 18th birthday, you will be treated like any other adult student coming to California to establish residence.

(2) Parent of Minor Moves from California — You may be entitled to resident status if you are a minor U.S. citizen or eligible alien whose parent(s) was a resident of California who left the state within one year of the residence determination date if (a) you remained in California after your parent(s) departed, (b) you enroll in a California public postsecondary institution within one year of your parent(s) departure, and (c) once enrolled, you maintain continuous attendance in that institution.

(3) Self-Support — You may be entitled to resident status if you are a U.S. citizen or eligible alien and either a minor or age 18 and can prove the following: (a) you lived in California for the entire year immediately preceding the residence determination date, (b) you have been self-supporting for that year, and (c) you intend to make California your permanent home.

(4) Two-Year Care and Control — You may be entitled to resident status if you are a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exemptions from Nonresident Tuition

(1) Member of the Military — If you are a member of the U.S. military stationed in California on active duty, unless you are assigned for educational purposes to a state-supported institution of higher education, you may be exempt from the nonresident tuition fees until you have lived in California long enough to become a resident. You must provide the on-campus residence deputy with a statement from your commanding officer or personnel officer stating that your assignment to active duty in California is not for educational purposes. The letter must include the dates of your assignment to the state.

(2) Spouse or Other Dependents of Military Personnel — You are exempt from payment of the nonresident tuition fee if you are a spouse or a natural or adopted child of a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until you have lived in California long enough to become a resident. You must petition for a waiver of the nonresident tuition fee each term you are eligible. If you are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, you may retain this exemption under conditions listed above.

(3) Child or Spouse of Faculty Member — To the extent funds are available, if you are an unmarried dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate, you may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member’s membership on the Academic Senate must be secured each term this waiver is granted.

(4) Child or Spouse of University Employee — You may be entitled to resident classification if you are an unmarried dependent child or the spouse of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory). Your parent’s or spouse’s employment status with the University must be ascertained each term.

(5) Child of Deceased Public Law Enforcement or Fire Suppression Employee — You may be entitled to a waiver of the nonresident tuition fee if you are the child of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression duties or law enforcement duties.

(6) Dependent Child of a California Resident — If you have not been an adult resident of California for more than one year and are the dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, you may be entitled to a waiver of the nonresident tuition until you have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

Maintaining Residence During a Temporary Absence

Your temporary absence from the state for business or educational purposes will not necessarily constitute loss of California residence unless you have acted inconsistently with your claim of continued California residence during your absence from the state. It is your responsibility to show retention of California residence during an absence from the state. Steps that you (or your parent if you are a minor) should take to retain California resident status for tuition purposes include:

(1) Continue to use a California permanent address in all records — educational, employment, military, etc.

(2) Satisfy California resident income tax obligations. If you are claiming California residence, you are liable for payment of income taxes on your total income from the date you establish California residence. This includes income earned in another state or country.
(3) Retain your California voter's registration and vote by absentee ballot.

(4) Maintain a California driver's license and vehicle registration. If it is necessary to change your driver's license and/or vehicle registration while you are temporarily residing in another state, you must change them back to California within the time prescribed by law.

Reclassification
You MUST PETITION IN PERSON at the Registrar's Office for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which you intend to be reclassified.

In addition to the indications listed above, California law requires that financial independence be included among the factors considered if you are seeking reclassification. If you are financially independent in the current and preceding calendar years, you will be considered a California resident for reclassification purposes only if no factors exist which give evidence of your continuing residence in another state. Financial independence will not be considered for graduate students who are graduate student instructors, teaching assistants, graduate student researchers, or teaching associates employed at 49 percent time or more.

Time Limitation on Providing Documentation
If additional documentation is required for either an initial residence classification or reclassification but is not readily accessible, you will be allowed until the end of the applicable term to provide it.

Incorrect Classification
If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all nonresident fees not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the campus residence deputy.

Inquiries and Appeals
Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 1113 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024-1405 (825-3447) or to the Legal Analyst — Residence Matters, 300 Lakeside Drive, 7th Floor, Oakland, CA 94612-3565. NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.

You are cautioned that this summary is NOT a complete explanation of the law regarding residence. A copy of the regulations adopted by The Regents of the University of California is available for inspection in the Registrar's Office, 1113 Murphy Hall. Please note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within 90 days of notification of the residence deputy's final decision.

Privacy Notice
All of the information requested on the Statement of Legal Residence form is required by the authority of Standing Order 110.2(a)-(d) of The Regents of the University of California for determining whether or not you are a legal resident for tuition purposes. Registration cannot be processed without this information. The Registrar's Office on campus maintains the requested information. You have the right to inspect University records containing the residence information requested on the form.

Grading Regulations
Assigning a Grade
The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor's evaluation of the student's achievement in the course. When on an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student's own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

Grade Complaints
A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic, the matter should first be taken up with the instructor. If the matter is not resolved, the student may go for counsel to the Office of the Ombudsman or one of the other Harassment Information Centers listed earlier under "Harassment," or may follow the procedures for the formal filing of charges (see "Faculty Code of Conduct" earlier in this section). If a charge is sustained by the Academic Senate Committees on Charges and on Privilege and Tenure, an ad hoc committee will be appointed within two weeks to review the disputed grade, and any warranted change will be made within four weeks.

Correction of Grades
All grades, except DR, I, and IP, are final when filed by the instructor in the end-of-term course report. However, the Registrar is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the division in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair.

Policy on Alternate Examination Dates
In compliance with Section 92640a of the Education Code, the University must accommodate requests for alternate examination dates at a time that activity would not violate a student's religious creed. Accommodation for alternate examination dates will be worked out directly and on an individual basis between the student and the faculty member involved: (1) in general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor; (2) students unable to reach a satisfactory arrangement with their instructor should contact the Ombudsman, 274 Kinsey Hall, or the Dean of Students, 1206 Murphy Hall, for assistance; (3) instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Ombudsman or the Dean of Students for assistance.

Undergraduate Final Examinations
The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course.
and shall be based on adequate evaluation of that achievement. The instructor’s methods of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours’ duration and will be given only at the times and places established and published by the department chair and the Registrar.

No student shall be excused from assigned final examinations except as provided above in the policy on alternate examination dates.

At the end of the term in which a student is expected to be graduated, a student’s major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term, and with the approval of the appropriate Committee on Courses, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release a credit value to such general examination. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular term of instruction, during which period students shall have access to their examinations.

**Student Conduct:**

**Violation of University Policies**

Students are subject to disciplinary action for several types of misconduct, including but not limited to dishonesty such as cheating, multiple submission (i.e., the resubmission of any work which as been previously submitted for credit in identical or similar form in one course to fulfill any of the requirements of another course without the prior consent of the current instructor), plagiarism, or knowingly furnishing false information to the University; forgery or other misuse of University documents, keys, or identifications; theft or damage to property; unauthorized entry to University properties; disruption of teaching, research, administration, disciplinary procedures, or other University activities; physical abuse or threats of violence; disorderly conduct; disturbing the peace; sexual harassment; the use of “fighting words” when they constitute harassment; the use, possession, or sale of narcotics or illegal drugs on campus or at official University functions; and violations of other University policies or campus rules and regulations. Further information on these infractions and on the procedures concerning student discipline are contained in the University of California Policies Applying to Campus Activities, Organizations, and Students, Parts A and B; University-wide Student Conduct Harassment Policy; UCLA Student Conduct Code of Procedures; and UCLA Activity Guidelines. Copies of these documents are available in the Office of the Dean of Students (1206 Murphy Hall), Center for Student Programming (161 Kerckhoff Hall), and Student Psychological Services (A3-062 CHS).

In addition, the Office of the Dean of Students publishes “Official Notices” in the Daily Bruin at various times during the year. Such notices are important, and all students are held responsible for the information in them.

**Disclosure of Student Records**

Pursuant to the Federal Family Educational Rights and Privacy Act of 1974, the California Education Code as amended in 1976, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right to inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal and State Laws and the University Policies, (2) to have withheld from disclosure personally identifiable information from their student records, except as provided by the Federal and State Laws and the University Policies, (3) to inspect records maintained by the University of disclosures of personally identifiable information from their student records, (4) to seek correction of their student records through a request to amend the records and subsequently through a hearing, and (5) to file complaints with the Department of Education regarding alleged violations of the rights accorded them by the Federal Act.

The University may release or publish, without the student’s prior consent, items in the category of “public information,” which are name, address, telephone number, major field of study, dates of attendance, and degrees and honors received. You can limit public access to this information and designate if you wish to receive mailings that the University considers optional by completing the “Privacy Release” section on the quarterly Registration Form. Official University mailings are sent to all students, while optional mailings are sent only to students with no designated limitations.

To restrict the release of the following information — the most recent previous educational institution attended, participation in officially recognized activities (including but not limited to intercollegiate athletics), and the name, weight, and height of participants on intercollegiate athletic teams — complete the Decline to Release Public Information form available in the Registrar’s Office, 1134 Murphy Hall.

Student records which are the subject of the Federal and State Laws and the University Policies may be maintained in a wide variety of offices. Students are referred to the UCLA Campus and CHS Directory which lists all the offices which may maintain student records, together with their campus address, telephone number, and unit head. Students have the right to inspect their student records in any such office subject to the terms of the appropriate Federal and State Laws and the University Policies. Inspection of records maintained by the Registrar is by appointment only, with 24-hour advance notice. Call 825-4671 or inquire at 1134 Murphy Hall.

A copy of the Federal and State Laws, the University Policies, and the UCLA Campus and CHS Directory may be inspected in the office of the Records Management Coordinator, 2330 Murphy Hall. Information concerning these matters and students’ hearing rights is also available there.

In addition to the public information described here, information relating to your Social Security number, sex and marital status, and the name(s), address(es), and telephone number(s) of your parents or next of kin will be made available to the UCLA Public Affairs and Development Department for use in alumni, development, and public relations purposes. To restrict the release of this additional information, fill out a Request for Public Affairs Information Restriction form available in the Registrar’s Office, 1134 Murphy Hall.
Endowed Chairs

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University's three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or "chairs," which support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 91 endowed chairs which have been approved by The Regents of the University of California, as follows. (* Asterisks indicate new chairs which have been approved by The Regents since publication of the 1989-90 UCLA General Catalog.)

College of Letters and Science
Maurice Amado Chair in Sephardic Studies
Armenian Educational Foundation Chair in Modern Armenian History
Arthur Andersen and Company Alumni Chair in Business Economics
*Henry J. Bruman Chair in German History
Ralph Bunche Chair in International Studies
James S. Coleman Chair in International Development Studies
*Courtauld's Chair in Chemistry
Mr. and Mrs. C.N. Flint Professorship of Philosophy
Gloria and Paul Griffin Chair in Philosophy
Armand Hammer Chair in Leonardo Studies
Marvin Hoffenberg Chair in Political Science
Endowed Chair in Modern European History
Franklin D. Murphy Chair in Italian Renaissance Studies
Narekatsi Chair in Armenian Studies
1939 Club Chair
*President's Chair in Developmental Immunology
Hans Reichenbach Chair in Philosophy of Science
David S. Saxon Presidential Chair in Physics
Charles Speroni Chair in Italian Literature and Culture
UCLA Alumni and Friends of Japanese Ancestry Chair in Japanese American Studies
UCLA Foundation Chair
Saul Winston Chair in Organic Chemistry

School of Engineering and Applied Science
L.M.K. Boelter Chair in Engineering
Norman E. Friedmann Chair in Knowledge Sciences
*Hughes Aircraft Company Chair in Electrical Engineering
Hughes Aircraft Company Chair in Manufacturing Engineering
Levi James Knight, Jr., Chair in Engineering
Nippon Sheet Glass Company Chair in Materials Science
Northrop Chair in Electrical Engineering/Electromagnetics
Ralph M. Parsons Chair in Chemical Engineering
Rockwell International Chair in Engineering
TRW Chair in Electrical Engineering

Graduate School of Architecture and Urban Planning
S. Charles Lee Chair in Architecture and Urban Planning
Harvey S. Perloff Chair

Graduate School of Education
Allan Murray Cartter Chair in Higher Education
George F. Kneller Chair in Education and Philosophy

School of Law
Harry Graham Balter Chair in Law
Connell Professorship of Law
Richard C. Maxwell Chair in Law
David G. Price and Dallas P. Price Chair in Law
Security Pacific Bank Chair

John E. Anderson Graduate School of Management
Allstate Chair in Insurance and Finance
Marion Anderson Chair in Management
California Chair in Real Estate and Land Economics
Edward W. Carter Chair in Business Administration
James A. Collins Chair in Management
Warren C. Cordner Chair in Money and Financial Markets
Ernst and Young Chair in Accounting
Henry Ford II Chair in International Management
Goldyne and Irwin Hearsh Chair in Money and Banking
IBM Chair in Computers and Information Systems

Harry and Elza Kunin Chair in Business and Society
William E. Leonhard Chair in Management
Chauncey J. Medberry Chair in Management
Paine Chair in Management
Times Mirror Chair in Management Strategy and Policy

School of Social Welfare
Marjorie Crump Chair in Social Welfare

School of Medicine
*William S. Adams, M.D., Chair in Medicine
Louis D. Beaumont Chair in Surgery
Bowyer Professorship of Medical Oncology
Judson Braun Chair in Biological Psychiatry
Joseph Campbell Chair in Child Psychiatry
Edward W. Carter Chair in Internal Medicine
Castera Chair in Cardiology
*Tony Coelho Chair in Neurology
Crump Chair in Medical Engineering
*M. Philip Davis Chair in Microbiology and Immunology
Distinguished Professor in Medicine Chair
Max Factor Family Foundation Chair in Neurology
Charles Kenneth Feldman Chair in Ophthalmology
Dolly Green Chair in Ophthalmology
Chizuko Kawata Chair in Cardiology
Eleanor I. Leslie Chair in Neuroscience
William P. Longmire, Jr., Chair in Surgery
Della Martin Chair in Psychiatry
James H. Nicholson Chair in Pediatric Cardiology
Samuel J. Pearlman, M.D., and Della Z. Pearlman Chair in Head and Neck Surgery
Thomas P. and Katherine K. Pike Chair in Alcohol Studies
Augustus S. Rose Chair in Neurology
Jennifer Jones Simon Chair in Biophysics
Norman F. Sprague Chair in Molecular Oncology
Jules Stein Chair in Ophthalmology
W. Eugene Stern Chair in Neurosurgery
Dorothy and Leonard Strauss Chair in Gastroenterology
Streisand Chair in Cardiology
Leon J. Tiber, M.D., and David S. Alpert, M.D., Chair in Medicine
Wasserman Professorship of Ophthalmology

School of Public Health
Fred H. Bixby Chair in Population Policy
Fred W. and Pamela K. Wasserman Chair in Health Services
University Administrative Officers

Regents Ex Officio

Governor of California
    George Deukmejian

Lieutenant Governor of California
    Leo T. McCarthy

Speaker of the Assembly
    Willie L. Brown, Jr.

State Superintendent of Public Instruction
    Bill Honig

President of the Alumni Association of the University of California +
    Martha Newkirk

Vice President of the Alumni Association of the University of California +
    Walter E. Hoadley

President of the University
    David Pierpont Gardner

Appointed Regents +

William T. Bagley (2002)
Roy T. Brophy (1998)
Clair W. Burgener (2000)
Yvonne Brathwaite Burke (1993)
Glenn Campbell (1996)
Frank W. Clark, Jr. (2000)
Tirso del Junco (1997)
Jeremiah F. Hallisey (1993)
Meredith J. Khachigian (2001)
Leo S. Kolligian (1997)
Howard H. Leach (2001)
S. Stephen Nakashima (1991)
William French Smith (1998)
Yori Wada (1992)
Dean A. Watkins (1996)
Harold M. Williams (1994)
Jacques S. Yeager (1994)
Jenny J. Doh (1991) +

Faculty Representatives to the Board of Regents
Carlton Bovell
Martin Trow

Officers of The Regents

President of The Regents
    George Deukmejian

Chair of The Regents
    Roy T. Brophy

Vice Chair of The Regents
    S. Stephen Nakashima

General Counsel
    James E. Holst

Secretary
    Bonnie M. Smotony

Treasurer
    Herbert M. Gordon

Office of the President

President of the University
    David Pierpont Gardner

Senior Vice President — Academic Affairs
    William R. Frazer

Senior Vice President — Administration
    Ronald W. Brady

Vice President — Agriculture and Natural Resources
    Kenneth R. Farrell

Vice President — Budget and University Relations
    William B. Baker

Vice President — Health Affairs
    Cornelius L. Hopper, M.D.

Special Assistant to the President
    Janet E. Young

Officers Emeriti

President Emeritus of the University and Professor Emeritus of Economics
    Charles J. Hitch

President Emeritus of the University and Professor Emeritus of Business Administration
    Clark Kerr

President Emeritus of the University and Professor Emeritus of Physics
    David S.axon

Vice President Emeritus of the University and Professor Emeritus of Physics
    William B. Fetter

Vice President Emeritus of the University, Professor Emeritus of Agricultural Economics, and Agricultural Economist Emeritus
    Harry R. Wellman

Vice President Emeritus — Budget Plans and Relations
    Thomas E. Jenkins

Vice President Emeritus — Financial and Business Management and Professor Emeritus of Pathology
    Baldwin G. Lamson

University Provost Emeritus, Chancellor Emeritus, and Professor Emeritus of Mathematics
    Angus E. Taylor

Assistant President Emerita
    Dorothy E. Everett

Coordinator Emerita, Administrative Policy
    Ruth E. Byrne

Executive Assistant Emerita to the President
    Gloria L. Copeland

Secretary Emerita of The Regents
    Marjorie J. Woolman

Associate Secretary Emerita of The Regents
    Elizabeth O. Hansen

Treasurer Emeritus of The Regents
    Owlsley B. Hammond

General Counsel Emeritus of The Regents
    Thomas J. Cunningham

Associate Counsel Emeritus of The Regents
    John E. Landon

Chancellors of the Campuses

Chancellor at Berkeley
    Chang-Lin Tien

Chancellor at Davis
    Theodore L. Hullar

Chancellor at Irvine
    Jack W. Peltason

Chancellor at Los Angeles
    Charles E. Young

Chancellor at Riverside
    Rosemary S.J. Schraer

Chancellor at San Diego
    Richard C. Atkinson

Chancellor at San Francisco
    Julius R. Krevans

Chancellor at Santa Barbara
    Barbara S. Uehling

Chancellor at Santa Cruz
    Robert B. Stevens

---

+ Terms of Regents appointed by the Governor expire February 28 of the year named in parentheses. The Student Regent (Jenny J. Doh) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.
University Professors
E. Margaret Burbidge, University Professor, San Diego, Department of Physics
Melvin Calvin, University Professor Emeritus, Berkeley, Department of Chemistry
Donald J. Cram, University Professor, Los Angeles, Department of Chemistry and Biochemistry
Gerard Debreu, University Professor, Berkeley, Department of Economics and Mathematics
Amos Funkenstein, University Professor, Los Angeles, Department of History
Murray Krieger, University Professor, Irvine, Department of English and Comparative Literature
Julian S. Schwinger, University Professor Emeritus, Los Angeles, Department of Physics
Glenn T. Seaborg, University Professor Emeritus, Berkeley, Lawrence Berkeley Laboratory
S. Jonathan Singer, University Professor, San Diego, Department of Biology
Neil J. Smelser, University Professor, Berkeley, Department of Sociology
Edward Teller, University Professor Emeritus, Livermore, Lawrence Livermore Laboratory
Charles H. Townes, University Professor Emeritus, Berkeley, Department of Electrical Engineering
Sherwood L. Washburn, University Professor Emeritus, Berkeley, Department of Anthropology
John R. Whinnery, University Professor Emeritus, Berkeley, Department of Electrical Engineering and Computer Sciences

UCLA Administrative Officers
Chancellor
- Charles E. Young, Ph.D.
Executive Vice Chancellor
- Murray L. Schwartz, LL.B., LL.D.
Administrative Vice Chancellor and UCLA Medical Center Director
- Raymond G. Schultz, M.D.
Vice Chancellor — Academic Administration
Andrea L. Rich, Ph.D.
Vice Chancellor — Academic Planning and Budget
- Michael E. Granfield, Ph.D.
Vice Chancellor — Capital Programs
- Peter W. Blackman, J.D.
Vice Chancellor — Faculty Relations
- Richard Sisson, Ph.D.
Vice Chancellor — Graduate Programs and Dean of Graduate Division
Claudia Mitchell-Kernan, Ph.D.
Vice Chancellor — Institutional Relations
- Elwin V. Svenson, Ed.D.
Vice Chancellor — Public Affairs and Development
- Alan F. Charles, J.D.
Vice Chancellor — Research Programs
- Albert A. Barber, Ph.D.
Vice Chancellor — Special Projects
- Adrian H. Harris, M.S.
Vice Chancellor — Student Affairs
- Winston C. Doby, Ed.D.
Assistant to the Chancellor — Chief of Staff
Gloria Kroon-Stypinski
Assistant Chancellor — Executive Assistant
- John R. Sandbrook
Director of Neuropsychiatric Hospital
- Don A. Rockwell, M.D.
Director of Neuropsychiatric Institute
- Daniel X. Freedman, M.D., Acting
Campus Counsel
- Patricia M. Jasper, J.D.
University Librarian
- Gloria S. Werner, M.L.
Dean of Continuing Education
- Robert Lapiner, Ph.D.

Deans of UCLA Colleges and Schools
Graduate School of Architecture and Urban Planning
- Richard S. Weinstein, M.A.
School of the Arts
- J. Bernard Kester, M.A., Acting
School of Dentistry
- Henry M. Cherrick, D.D.S.
Graduate School of Education
- Lewis C. Solmon, Ph.D.
School of Engineering and Applied Science
- A.R. Frank Wazzan, Ph.D.
School of Law
- Susan W. Prager, J.D.
College of Letters and Science
- Provost
- Raymond L. Orbach, Ph.D.
Division of Humanities
- Herbert Morris, LL.B., D.Phil.
Division of Life Sciences
- Frederick A. Eiserling, Ph.D.
Division of Physical Sciences
- Clarence A. Hall, Jr., Ph.D.
Division of Social Sciences
- David O. Sears, Ph.D.
Division of Honors and Undergraduate Programs
- Edward A. Alpers, Ph.D.
Graduate School of Library and Information Science
- Beverly P. Lynch, Ph.D.
John E. Anderson Graduate School of Management
- J. Clayburn La Force, Ph.D.
School of Medicine
- Kenneth I. Shine, M.D.
School of Nursing
- Ada M. Lindsey, R.N., Ph.D.
School of Public Health
- Abdelmonem A. Alifi, Ph.D.
School of Social Welfare
- Leonard Schneiderman, Ph.D.
School of Theater, Film, and Television
- Andrea L. Rich, Ph.D., Acting
