**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**403. Practical Phonetics Training (1 unit).** Extensive practice in production, perception, and transcription of sounds from a wide range of languages. Concurrently scheduled with practical sections of course 103. S/U grading. Ms. Keating

**411A-411B. Research Orientation (2 units each).** Prerequisite: graduate standing. Sequence of lectures by department faculty to acquaint new graduate students with research directions and resources of department and elsewhere on campus. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading. (F,W)

**422. Practicum: Phonetic Data Analysis (2 units).** Prerequisite: graduate standing. Workshop in examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading. Ms. Keating (F,W,Sp)

**444. M.A. Thesis Preparation Seminar.** Student presentations, two hours. Student presentations of proposed topics for M.A. theses, with discussion and criticism by other students and faculty. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading. (F)

**495. College Teaching of Linguistics (2 units).** Prerequisite: graduate standing. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading. (Sp)

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Studies (1 to 8 units).** Prerequisite: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**596B. Directed Linguistic Analysis (1 to 8 units).** Prerequisite: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

**597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations (1 to 8 units).** Prerequisite: at least six graduate courses in linguistics. May be taken *only* in terms in which students expect to take comprehensive or qualifying examinations. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**598. Research for M.A. Thesis (1 to 8 units).** Prerequisite: consent of guidance committee chair. Research and preparation of M.A. thesis. May not be applied toward M.A. course requirements. May be repeated for a maximum of eight units. S/U grading.

**599. Research for Ph.D. Dissertation (1 to 16 units).** Prerequisite: advancement to Ph.D. candidacy. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

## African Languages

### Lower Division Courses

**1A-1B-1C. Elementary Swahili.** Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of East Africa, particularly Tanzania. Mr. Hinnebusch

**2A-2B-2C. Intermediate Swahili.** Enforced requisite: course 1C. Course 2A is enforced requisite to 2B, which is enforced requisite to 2C. Mr. Hinnebusch

**7A-7B-7C. Elementary Zulu.** Lecture, five hours. Course 7A is enforced requisite to 7B, which is enforced requisite to 7C. Most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.

**8A-8B-8C. Intermediate Zulu.** Enforced requisite: course 7C. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C.

**11A-11B-11C. Elementary Yoruba.** Lecture, five hours. Course 11A is enforced requisite to 11B, which is enforced requisite to 11C. Major language of Western Nigeria.

**12A-12B-12C. Intermediate Yoruba.** Enforced requisite: course 11C. Course 12A is enforced requisite to 12B, which is enforced requisite to 12C.

**31A-31B-31C. Elementary Bambara.** Lecture, five hours. Course 31A is enforced requisite to 31B, which is enforced requisite to 31C. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects. Ms. Koopman

**32A-32B-32C. Intermediate Bambara.** Enforced requisite: course 31C. Course 32A is enforced requisite to 32B, which is enforced requisite to 32C. Ms. Koopman

**41A-41B-41C. Elementary Hausa.** Lecture, five hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Major language of Northern Nigeria and adjacent areas. Mr. Schuh

**42A-42B-42C. Intermediate Hausa.** Enforced requisite: course 41C. Course 42A is enforced requisite to 42B, which is enforced requisite to 42C. Mr. Schuh

**51A-51B-51C. Elementary Amharic.** Lecture, five hours (15 hours for intensive course). Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/N/P (undergraduates), S/U (graduates), or letter grading.

**52A-52B-52C. Intermediate Amharic.** Lecture, five hours (15 hours for intensive course). Enforced requisite: course 51C. Course 52A is enforced requisite to 52B, which is enforced requisite to 52C. P/N/P (undergraduates), S/U (graduates), or letter grading.

**61A-61B-61C. Elementary Wolof.** Lecture, five hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Major language of Senegambia. Mr. Schuh

**62A-62B-62C. Intermediate Wolof.** Enforced requisite: course 61C. Course 62A is enforced requisite to 62B, which is enforced requisite to 62C. P/N/P or letter grading. Mr. Schuh

**97. Elementary and Intermediate Studies in African Languages (1 to 6 units).** Instruction at elementary or intermediate level, based on needs of students, in any language for which appropriate facilities are available. Those taught in past included Akan, Efik, Ewe, Fula, Igbo, Lingala, Luganda, and Xhosa.

### Upper Division Courses

**103A-103B-103C. Advanced Swahili.** Prerequisite: course 2C. Course 103A is prerequisite to 103B, which is prerequisite to 103C. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili. Mr. Hinnebusch

**123A-123B-123C. Advanced Yoruba.** Prerequisite: course 12C. Course 123A is prerequisite to 123B, which is prerequisite to 123C. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba.

**133A-133B-133C. Advanced Bambara.** Prerequisite: course 32C. Course 133A is prerequisite to 133B, which is prerequisite to 133C. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara. Ms. Koopman

**143A-143B-143C. Advanced Hausa.** Prerequisite: course 42C. Course 143A is prerequisite to 143B, which is prerequisite to 143C. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa. Mr. Schuh

**153A-153B-153C. Advanced Amharic.** Lecture, five hours (15 hours for intensive course). Prerequisite: course 52C. Course 153A is prerequisite to 153B, which is prerequisite to 153C. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/N/P (undergraduates), S/U (graduates), or letter grading.

**M190. Survey of African Languages.** (Formerly numbered 190.) (Same as Linguistics M115.) Prerequisite: Linguistics 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages. Ms. Koopman, Mr. Schuh

**199. Special Studies in African Languages (1 to 6 units).** Prerequisite: consent of instructor. Instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available.

### Graduate Courses

**202A-202B-202C. Comparative Bantu.** Prerequisites: Linguistics 110, 165A, 165B. Recommended: three quarter courses in one Bantu language selected from 1A through 8C, 199. Investigation of relationships among the Bantu languages; extent and external relationships of Bantu. Mr. Hinnebusch

**596. Directed Studies (1 to 8 units).** Directed individual study or research. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

## Indigenous Languages of the Americas

### Lower Division Courses

**18A-18B-18C. Elementary Quechua.** Lecture, five hours. Course 18A is enforced requisite to 18B, which is enforced requisite to 18C. Language of the Incas and its present-day dialects, as spoken in Andean South America.

### Upper Division Courses

**119A-119B-119C. Advanced Quechua.** Prerequisite: course 18C. Course 119A is prerequisite to 119B, which is prerequisite to 119C. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua. Mr. Bedell

### Graduate Course

**596. Directed Studies in Quechua (1 to 8 units).** Prerequisites: courses 119A-119B-119C or consent of instructor. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

## Related Courses in Other Departments (Other than Language Courses)

**Anthropology 143.** Field Methods in Linguistic Anthropology

**Armenian (Near Eastern Languages) 210.** History of the Armenian Language

**English 121.** History of the English Language

122. Introduction to Structure of Present-Day English

210. History of the English Language

218. Celtic Linguistics

240. Studies in History of the English Language

241. Studies in Structure of the English Language

**Folklore and Mythology 217.** Folk Speech

**French 210A.** Phonology and Morphology from Vulgar Latin to French Classicism

210B. Syntax and Semantics from Vulgar Latin to French Classicism

**German (Germanic Languages) 129.** Language and Linguistics

217. History of the German Language

230. Survey of Germanic Philology

C238. Linguistic Theory and Grammatical Description

251. Seminar: Syntax and Phonology of German

252. Seminar: Historical and Comparative Germanic Linguistics

**Hebrew (Near Eastern Languages) 190A-190B.** Survey of Hebrew Grammar

210. History of the Hebrew Language

**Indo-European Studies 210.** Indo-European Linguistics: Advanced Course

280A-280B. Seminars: Indo-European Linguistics

**Italian 222A.** History of the Italian Language

222B. Structure of Modern Italian

222C. Italian Dialectology

**Japanese (East Asian Languages) CM122.** Structure of Japanese I

225A-225B. Seminars: Linguistic Analysis of Japanese Narratives

**Latin (Classics) 240.** History of the Latin Language

**Philosophy 127A, 127B.** Philosophy of Language

172. Philosophy of Language and Communication

287. Seminar: Philosophy of Language

**Portuguese (Spanish and Portuguese) 100A.** Phonology and Morphology

100B. Syntax

M118A. History of Portuguese and Spanish: Phonology

M118B. History of Portuguese and Spanish: Morphology and Syntax

M205A-M205B. Development of Portuguese and Spanish Languages

M251A-M251B. Studies in Galegan-Portuguese and Old Spanish

**Psychiatry 257A-257B-257C.** Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders

**Psychology 123.** Psycholinguistics

260A-260B-260C. Proseminars: Cognitive Psychology

**Russian (Slavic Languages) 123.** Historical Commentary on Modern Russian

204. Introduction to History of the Russian Language

241. Topics in Russian Phonology

242. Topics in Russian Morphology

243. Topics in Historical Russian Grammar

263. Russian Dialectology

264. History of the Russian Literary Language

265. Topics in Russian Syntax

266. Russian Lexicology

**Semitics (Near Eastern Languages) 280A-280B-280C.** Seminars: Comparative Semitics

**Slavic (Slavic Languages) 202.** Introduction to Comparative Slavic Linguistics

242. Comparative Slavic Linguistics

251. Introduction to Baltic Linguistics

262A-262B. West Slavic Linguistics

263A-263B. South Slavic Linguistics

281. Seminar: Slavic Linguistics

282. Seminar: Structural Analysis

**Slovak (Slavic Languages) 222.** Structure of Slovak

**Sociology CM124A.** Conversational Structures I

266. Selected Problems in Analysis of Conversation

267. Selected Problems in Communication

**Spanish (Spanish and Portuguese) 100A.** Introduction to Study of Spanish Grammar: Phonology and Morphology

100B. Introduction to Study of Spanish Grammar: Syntax

115. Applied Linguistics

M118A. History of Portuguese and Spanish: Phonology

M118B. History of Portuguese and Spanish: Morphology and Syntax

202A. Phonology

202B. Morphology

204A-204B. Generative Syntax and Semantics

M205A-M205B. Development of Portuguese and Spanish Languages

209. Dialectology

M251A-M251B. Studies in Galegan-Portuguese and Old Spanish

256A-256B. Studies in Spanish Linguistics

257. Studies in Dialectology

**Teaching English as a Second Language and Applied Linguistics 241.** Interlanguage Analysis

260. Psycholinguistics and Language Teaching

**Turkic Languages (Near Eastern Languages) 230A-230B-230C.** Historical and Comparative Survey of Turkic Languages

## Mathematics

6363 Math Sciences, (310) 825-4701

### Professors

Christopher R. Anderson, Ph.D.

Kirby A. Baker, Ph.D. (*Distinguished Teaching Award*),

*Program in Computing Director*

Mladen Bestvina, Ph.D.

Don M. Blasius, Ph.D.

Robert J. Blattner, Ph.D.

Robert F. Brown, Ph.D.

Russel Cafilisch, Ph.D., *Applied Mathematics Director*

Lennart Carlsson, Ph.D.

 Jun Li, Ph.D.  
 Geoffrey Mess, Ph.D.  
 Thomas Mountford, Ph.D.  
 Peter Petersen, Ph.D.

#### Lecturers

David Cohen, M.A. (*Distinguished Teaching Award*)  
 Kathleen Neumann, Ph.D. (*Program in Computing*)  
 John C. Williams, Ph.D. (*Program in Computing*)

#### Adjunct Professor

Herbert Enderton, Ph.D.

#### Adjunct Assistant Professors

Annon Besser, Ph.D. (*Hedrick*)  
 Albert Fannjiang, Ph.D. (*C.A.M.*)  
 Douglas Jungreis, Ph.D. (*Hedrick*)  
 Charles Li, Ph.D. (*Hedrick*)  
 Rachel Lunnon, Ph.D. (*Program in Computing*)  
 Atsushi Moriwaki, Ph.D. (*Hedrick*)  
 Alex Stolboushkin, Ph.D. (*Program in Computing*)  
 Tamir Tassa, Ph.D. (*C.A.M.*)

## Scope and Objectives

Gauss has called mathematics the "Queen of the Sciences." It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics provides courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

## Undergraduate Study

### Admission

Students entering UCLA directly from high school who declare one of the five mathematics majors offered by the department at the time they apply for admission are automatically admitted to that major.

UCLA students who wish to enter one of the mathematics majors must have a minimum grade of C- in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter any of the mathematics majors.

**Transfer students** must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter any of the mathematics majors.

### Preliminary Examination in Mathematics

If you wish to enroll in Mathematics 1, 3A, or 31A, you must pass the Mathematics Diagnostic Test.

This examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It will also be given on Monday, September 26, 1994, for Fall Quarter 1994; Wednesday, November 16, 1994, for Winter Quarter 1995; and Wednesday, March 1, 1995, for Spring Quarter 1995. For information, contact the Mathematics Student Services Office, 6356 Math Sciences.

### Advanced Placement in Calculus

Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 4 or 5 receive four units of credit and Mathematics 31A equivalency; those with a score of 3 receive four units of calculus and analytic geometry credit. You may petition for 31A equivalency, or you may take course 31A at UCLA. Students who take the BC Test and obtain a score of 4 or 5 receive eight units of credit and Mathematics 31A, 31B equivalency; those with a score of 3 receive eight units of calculus and analytic geometry credit. You may petition for 31A, 31B equivalency, or you may take courses 31A, 31B at UCLA.

If you received a score of 3 on the AB or BC examination, you should consult the undergraduate mathematics counselor prior to enrolling in a calculus course at UCLA. If you had calculus in high school but do not have Advanced Placement Test credit, you may take beginning calculus (Mathematics 3A or 31A), or you may seek advanced placement by passing examinations in the subject. Consult the Student Services Office for further details.

### Credit Limitations

Credit is given for at most one course in each of the following groups: (1) 3A, 31A, 31AH, 31AQ; (2) 3B, 31B, 31BH, 31BQ, 31E; (3) 3C, 32A, 32AH, 32AQ; (4) 32B, 32BH, 32BQ; (5) 110A, 117; (6) 132, 132H; (7) 140A, 141A; (8) M150A, Statistics M152A, 154A.

Mathematics 2, 38A, 38B, and Statistics 50 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 140A-140B-140C and 141A-141B are not open for credit to students with credit for Electrical Engineering 103.

Mathematics M150A and Statistics M152A are not open for credit to students with credit for Electrical Engineering 131A.

You may not take a mathematics course for credit if you have credit for a more advanced course which has the first course as a prerequisite. This applies in particular to the repetition of courses (e.g., if you wish to repeat Mathematics 31B, you must do so before completing course 32A).

### Undergraduate Majors

The Mathematics Department offers five majors: mathematics, applied mathematics, mathematics of computation, mathematics/applied science, and general mathematics.

The mathematics major is designed for students whose basic interest is mathematics; the applied mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the mathematics of computation major for individuals interested in the mathematical theory and the applications of computing; the mathematics/applied science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the general mathematics major for students planning to teach mathematics at the high school level. As part of the mathematics/applied science major, the department offers programs for students interested in the fields of actuarial science and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

If you plan to pursue graduate study in mathematics, you are strongly encouraged to take a three-term sequence of graduate-level courses during your senior year.

## Bachelor of Science in Mathematics

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and two additional courses from Biology 6, Chemistry and Biochemistry 11A, 11B, Economics 11, Philosophy 31, 32, Physics 6B, 6C, 8B, 8D, 8E. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

### The Major

*Required:* Mathematics 110A-110B, 115A, 131A-131B, 132, one course from 120A, 121, 123, and at least five additional courses from 106 through 199 and Statistics M152A through 154B. The 12 courses must be passed with a minimum overall GPA of 2.0.

## Bachelor of Science in Applied Mathematics

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry and Biochemistry 11A, 11B. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

### The Major

*Required:* Mathematics 115A, 131A, either 131B or 132, 142; two two-term sequences

from two of the following categories: *numerical analysis* — courses 140A-140B or 141A-141B, *probability and statistics* — courses M150A-150B or Statistics M152A and 152B or 154A-154B, *differential equations* — courses 135A-135B; four additional courses from 110A through 199 and Statistics M152A through 154B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall GPA of 2.0.

## Bachelor of Science in Mathematics of Computation

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C or 30, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry and Biochemistry 11A, 11B. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

### The Major

*Required:* Eleven Mathematics Department courses, including Mathematics 115A, 117, 131A, two additional courses from 110A through 199 and Statistics M152A through 154B, and six courses from *Plan A (scientific computing)* — courses 131B or 132, 140A-140B-140C, and 135A-135B or 145/146, or *Plan B (computation theory)* — courses 114A-114B-114C and 118A-118B-118C, or *Plan C (computational statistics)* — courses 140A or 141A, M150A or Statistics M152A, Statistics 152B-152C, and M153A-M153B; three upper division computer science courses (12 units).

If you plan to pursue this major, see the undergraduate adviser in 6356 Math Sciences. There is a chance that courses 114A-114B-114C and 118A-118B-118C will be offered in alternating years.

## Bachelor of Science in Mathematics/Applied Science

The major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. You may also select one of the established programs: the actuarial plan, the mathematics/economics plan, or the operations research plan. In the past, mathematics/applied science majors have combined the study of mathematics with fields such as physics, biology, chemistry, biochemistry, economics, and geography.

If you are interested in designing an individual program, you should meet with the undergraduate adviser, 6356 Math Sciences, during your

sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

### The Major

*Required:* Fourteen courses, seven in the Mathematics Department selected from Mathematics 110A through 199 and Statistics M152A through 154B and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall GPA of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. If you will have 135 or more units by the end of the term in which you plan to enter the program, you will not be admitted to the major.

### Actuarial Plan

*Preparation for the Major:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 1 and 2 (or 100), 11. Economics 100 may not be applied as one of the upper division courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses.

*The Major:* Seven Mathematics Department courses, including Mathematics 115A, 140A or 141A, 144, M150A-150B or Statistics M152A and 152B or 154A-154B, and two courses from 113, 140B or 141B, 151, Statistics 152C, M153A; six outside courses, including Economics 101, 102, 147A, 160, and two additional courses from Management 130A, 130B, 190, English 131A through 131J, Economics 145 through 199.

### Mathematics/Economics Plan

*Preparation for the Major:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, 11, Program in Computing 10A.

*The Major:* Seven Mathematics Department courses, including Mathematics 110A or 117, 115A, 131A, 144, M150A or Statistics M152A or 154A, Statistics 152B or 154B, and one additional course from 110A through 199 and Statistics M153A, M153B; six economics courses, including Economics 101, 102, and four additional upper division courses, with at least three from 105AH, 105BH, and 141 through 148.

### Operations Research Plan

*Preparation for the Major:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1 and 2

(or 100), 11, Management 1A, Program in Computing 10A, 10B, and two courses from 10C, 15, 30, 60.

*The Major:* Seven courses in the Mathematics Department and six in economics and management. Consult the department for recommended courses. Programs are designed so that students in this plan qualify for a specialization in computing.

## Bachelor of Science in General Mathematics

The major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the mathematics, applied mathematics, or mathematics of computation major.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, and three courses from the Physics 6 or 8 sequence, the Chemistry and Biochemistry 11 sequence, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

### The Major

*Required:* Mathematics 110A or 117, 115A, 123, M150A or Statistics M152A or 154A, one course from 131A through 136, one course from 140A through 147, and six additional courses from 106 through 199, 370, and Statistics M152A through 154B.

## Specialization in Computing

Majors in mathematics, applied mathematics, mathematics/applied science, or general mathematics may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, and two courses from 10C, 15, 30, 60, with a minimum grade of C- in each course and a combined GPA of at least 2.0, and (3) completing at least two courses from Mathematics 141A, 141B, 149, 149HS. You must petition for admission to this program and are advised to do so after you complete Program in Computing 10B (petitions should be filed in the Student Services Office). You graduate with a bachelor's degree in your major and a specialization in computing.

## Honors

### Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad,

comprehensive introduction to these topics. Call the department (310-206-1286) for further details.

### Honors Program

Students majoring in mathematics, applied mathematics, and mathematics of computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. You may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall GPA of 3.6 or better. The program entails taking a specified sequence of courses as part of your major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

If you complete the program, you are awarded honors at graduation; if you demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), you are awarded highest honors. Consult the department for further information.

## Graduate Study

### Admission

Prospective graduate students in mathematics need not have an undergraduate mathematics major, but they should have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics—particularly algebra, differential equations, analysis, and differential geometry or topology. For admission to a master's degree program, you must have earned in those upper division mathematics courses a cumulative grade-point average of at least 3.2; for direct admission to the doctoral program, at least 3.5.

If you have already obtained a master's degree, you must have maintained an average of better than 3.6 in graduate study.

You must take the Graduate Record Examination (GRE) General Test and Subject Test in Mathematics and must submit three letters of recommendation from mathematicians who know your recent work.

Applications are available from the Graduate Adviser, Department of Mathematics, 6356 Math Sciences, UCLA, Los Angeles, CA 90024-1555.

### Master of Arts Degree

You may earn the M.A. degree in Mathematics under the comprehensive examination plan, either in the basic (*pure mathematics*) program, in an interdisciplinary program in *applied mathematics*, or in *statistics*.

### Foreign Language Requirement

There is no foreign language requirement for master's students.

### Course Requirements

Eleven courses are required for the M.A. degree, of which at least eight must be graduate courses, while the remaining three may be approved upper division courses. Each course must be passed with a grade of B- or better. With consent of the graduate vice chair, students in the applied mathematics and statistics programs may take up to five of the required 11 courses in other departments, provided that these courses are in professional or scientific fields closely related to research in applied mathematics or statistics respectively.

You may enroll in Mathematics 596 any number of times and may apply up to two 596 courses toward the 11-course requirement for the M.A., provided you receive a B or better in these courses (not the grade S).

### Comprehensive Examination Plan

You must pass two written qualifying examinations at the M.A. level within seven terms of full-time study. By program, the following examinations are required: (1) *pure mathematics*—algebra and either real analysis or complex analysis; (2) *applied mathematics*—one in real analysis or complex analysis and one in numerical analysis or applied differential equations; (3) *statistics*—two from probability, theoretical statistics, or applied statistics.

These examinations are offered early in Fall Quarter and toward the end of Spring Quarter. You may take one or both of the examinations at one sitting and may retake them any number of times until you pass them.

### Master of Arts in Teaching

The M.A.T. program serves the needs of present and prospective mathematics teachers in high school and junior college.

### Foreign Language Requirement

There is no foreign language requirement for M.A.T. students.

### Course Requirements

Eleven courses are required, as follows.

**Core Courses**—You must take Mathematics 201A-201B-201C and 202A-202B. Normally, you also take one term of course 596 while fulfilling the essay requirement described below.

**Credential Requirements**—If you plan to teach in secondary schools and do not already have valid credentials for such teaching, you should enroll in the single subject instructional credential program in the Graduate School of Education and Information Studies. Of the courses required by this program, you may receive M.A.T. credit only for the following: Education 100A-100B, 112, 312, 330A, 330B. Actual receipt of the credential is not a degree requirement. You should check with the Graduate School of Education and Information Studies for a full and up-to-date description of credential requirements and should submit a Graduate School of Education and Information Studies application for admission to the credential program.

**Additional Courses**—Besides the six core courses described above, you must take a seventh upper division or graduate course in mathematics. Particularly recommended are Mathematics 106, 110B, 110C, 111A, 111B, 131B, 135A, and Statistics 152B. Candidates on the junior college track normally take five 100- or 200-level courses in mathematics in addition to the six core courses. However, with prior approval of the graduate vice chair, such students may present for degree credit one course of a predominantly mathematical nature taken in another department.

You may not receive degree credit for Mathematics 104 or 370. In addition, you may not receive degree credit for more than two terms of course 596 or for more than two terms of any 300-series courses.

**Essay Requirement**—You must prepare a master's essay on some subject in mathematics related to your prospective teaching. You write this under the direction of a faculty member while enrolled in Mathematics 596.

### Teaching Experience

Teaching experience is not a formal requirement for the M.A.T. degree, although students working for a secondary credential must take the supervised teaching course. M.A.T. students are eligible for teaching assistantships.

### Comprehensive Examination Plan

In the M.A.T. program, you take one examination in mathematical subject matter and one in content and philosophy of secondary school mathematics. Ordinarily, these are administered in conjunction with Mathematics 201A-201B-201C and 202A-202B. Reexamination after failure is allowed.

### Ph.D. Degree

Students may earn the Ph.D. degree in Mathematics at UCLA either in the classical (*pure mathematics*) program, in an interdisciplinary program in *applied mathematics*, or in *statistics*. There are many possible choices of fields within these programs, and you are urged to read the booklet, *Graduate Studies in Mathematics at UCLA*, where the specialties of the faculty and the active research areas in the department are described in some detail.

### Language Requirement

Prior to advancement to candidacy, you must pass a written departmental language examination in French, German, or Russian. In order to take an alternate non-English examination such as Italian, you must petition to the graduate vice chair. The examinations are offered in Fall and Spring Quarters and require the translation of material in some basic field of mathematics (a dictionary may be used). They may be retaken any number of times until passed.

### Course Requirements

In the pure mathematics and statistics programs, you must pass (with a grade of B or better) at least 12 courses from Mathematics

205A through 285L, but excluding the basic courses 210A-210B, 245A-245B, and 246A-246B. At most, three of these courses may be in the 285 series. You must also satisfy a *seminar participation requirement* by participating actively in at least two advanced seminars (normally you lecture twice for a total of 90 minutes). Credit for one seminar must be obtained within three registered terms after passing the written qualifying examinations, the other within five terms.

In the applied mathematics program, you must pass (with a grade of B or better) at least 18 approved graduate courses, including at least 12 courses from Mathematics 205A through 285L. At most, three of these may be in the 285 series.

### Qualifying Examinations

You must pass four written qualifying examinations, at least two of which must be passed at the Ph.D. level. One examination (any level) must be passed within three terms of full-time study, three examinations must be passed within six terms of full-time study, and all four examinations must be passed within seven terms of full-time study. Students in the applied mathematics program are allowed to substitute an outside examination (at the M.A. level) for one of the regular departmental examinations. By program, the following examinations are required: (1) *pure mathematics* — algebra and real analysis (either one or both may be passed at the M.A. level, subject to the above restriction on the number of M.A. passes); (2) *applied mathematics* — real analysis and either numerical analysis or applied differential equations; (3) *statistics* — real analysis and probability at the M.A. level; theoretical statistics and applied statistics at the Ph.D. level. These examinations are offered early in Fall Quarter and toward the end of Spring Quarter.

After passing the four qualifying examinations, you may set up the doctoral committee which administers the University Oral Qualifying Examination for advancement to candidacy.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

The final oral examination may be waived by the doctoral committee, with the approval of the graduate vice chair.

## Mathematics

### Lower Division Courses

**A. Intermediate Algebra (No credit).** Lecture, five hours. Mathematics A displaces four units on student's Study List but yields no credit toward degree. May not be applied toward Letters and Science general education requirements. Not open to students with credit for other mathematics courses. Designed for students requiring review of intermediate algebra. Polynomials, rational exponents, linear and quadratic equations and inequalities, coordinate geometry, systems of equations, theory of equations. (F,W,Sp)

**1. Precalculus.** Lecture, three hours; discussion, one hour. Enforced requisite: course A (C or better). Function concept. Linear and polynomial functions and their graphs, applications to optimization. Inverse, exponential, and logarithmic functions. Trigonometric functions. P/NP or letter grading.

**2. Finite Mathematics.** Lecture, three hours; discussion, one hour. Enforced requisite: course 1. Finite mathematics consisting of matrices, Gauss/Jordan method, combinatorics, probability, Bayes theorem, and Markov chains.

**3A. Calculus for Life Sciences Students.** Lecture, three hours; discussion, one hour. Requisites: three and one-half years of high school mathematics (including trigonometry) and successful completion of Mathematics Diagnostic Test, or course 1 (C – or better). Not open for credit to students with credit in another calculus sequence. Students with credit for course 5 will receive only two units of credit for this course. Techniques and applications of differential calculus. Introduction to the integral. P/NP or letter grading.

**3B. Calculus for Life Sciences Students.** Lecture, three hours; discussion, one hour. Enforced requisite: course 3A (C – or better). Techniques and applications of integral calculus, logarithmic and exponential functions, introduction to differential equations. P/NP or letter grading.

**3C. Calculus for Life Sciences Students.** Lecture, three hours; discussion, one hour. Enforced requisite: course 3B (C – or better). Functions of several variables, vectors, partial differentiation, and vector-valued functions. P/NP or letter grading.

**5. Calculus for Liberal Arts Students.** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 3A, 3B, 3C, 31A through 33B, or 110A through 199. Brief look at concepts, techniques, and applications of both differential and integral calculus. Emphasis on intuitive ideas in place of mathematical proofs.

**9. Mathematics: A First View (1 unit).** Introductory course to acquaint freshmen with nature of mathematics, its larger vistas, and its increasingly dominant role in understanding and advancing the world around us. P/NP or letter grading. (F,W,Sp)

**31A. Calculus and Analytic Geometry.** Lecture, three hours; discussion, one hour. Requisites: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry) and successful completion of Mathematics Diagnostic Test, or course 1 (C – or better). Students with credit for course 5 will receive only two units of credit for this course. Differential calculus and applications; introduction to integration.

**31AH-31BH. Calculus and Analytic Geometry (Honors).** Lecture, three hours; discussion, one hour. Preparation: successful completion of Mathematics Diagnostic Test or additional honors placement examination. Honors sequence parallel to courses 31A, 31B.

**31AQ. Calculus and Analytic Geometry with Computer Laboratory (5 units).** (Formerly numbered 31A/PC.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry) and successful completion of Mathematics Diagnostic Test, or course 1 (C – or better). Same material as course 31A with one additional computer laboratory hour. P/NP or letter grading.

**31B. Calculus and Analytic Geometry.** Lecture, three hours; discussion, one hour. Enforced requisite: course 31A (C – or better). Transcendental functions; methods and applications of integration.

**31BQ. Calculus and Analytic Geometry with Computer Laboratory (5 units).** (Formerly numbered 31B/PC.) Lecture, three hours; discussion, one hour; laboratory, one hour. Enforced requisite: course 31AQ (or 31A, C – or better). Same material as course 31B with one additional computer laboratory hour. P/NP or letter grading.

**31E. Calculus for Economics Students.** (Formerly numbered 3E.) Lecture, three hours; discussion, one hour. Enforced requisite: course 31A (C – or better). Not open for credit to students with credit for course 3B, 3C, 31B, 31BH, or 31BQ. Calculus with applications to economics. Partial differentiation, differentials, implicit functions, exponential and logarithmic functions, extrema, optimization, constrained extrema, first-order linear differential equations with constant coefficients. P/NP or letter grading.

**32A. Calculus of Several Variables.** Lecture, three hours; discussion, one hour. Enforced requisite: course 31B (C – or better). Introduction to differential calculus of several variables.

**32AH-32BH. Calculus of Several Variables (Honors).** Enforced requisite: course 31BH (or 31B, A or better). Honors sequence parallel to courses 32A, 32B.

**32AQ. Calculus of Several Variables with Computer Laboratory (5 units).** (Formerly numbered 32A/PC.) Lecture, three hours; discussion, one hour; laboratory, one hour. Enforced requisite: course 31B (or 31BQ, C – or better). Same material as course 32A with one additional computer laboratory hour. P/NP or letter grading.

**32B. Calculus of Several Variables.** Lecture, three hours; discussion, one hour. Enforced requisite: course 32A (C – or better). Introduction to integral calculus of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

**32BQ. Calculus of Several Variables with Computer Laboratory (5 units).** Lecture, three hours; discussion, one hour; laboratory, one hour. Enforced requisite: course 32A (or 32AQ, C – or better). Same material as course 32B with one additional computer laboratory hour. P/NP or letter grading.

**33A. Matrices and Differential Equations.** Lecture, three hours; discussion, one hour. Enforced requisite: course 32A or 32AH or 32AQ. Introduction to matrix theory, differential equations, and systems of differential equations.

**33AH-33BH. Matrices, Differential Equations, and Infinite Series (Honors).** Lecture, three hours; discussion, one hour. Enforced requisite: course 32AH (or 32A, A or better). Honors sequence parallel to courses 33A, 33B. P/NP or letter grading.

**33B. Infinite Series.** Lecture, three hours; discussion, one hour. Enforced requisite: course 33A. Infinite sequences and series; applications.

**38A. Fundamentals of Mathematics for Elementary Teachers.** Lecture, three hours; discussion, one hour. Not open to freshmen or for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Courses 38A, 38B, and 104 form one-year sequence for prospective elementary teachers in Diversified Liberal Arts Program. Counting numbers and other subsystems of real numbers; sets; operations, relations, algorithms; applications and problem solving. Emphasis on understanding arithmetic procedures. P/NP or letter grading.

**38B. Fundamentals of Mathematics for Elementary Teachers.** Lecture, three hours; discussion, one hour; laboratory, one hour. Enforced requisite: course 38A. Not open for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Continuation of course 38A. Elementary number theory; probability and statistics; the microcomputer and simple instructional programs; measurement and approximation; coordinate geometry. Other topics appropriate for elementary classroom. P/NP or letter grading.

**61. Introduction to Discrete Structures.** Lecture, three hours; discussion, one hour. Enforced requisites: courses 31A, 31B, and (Program in Computing 10A or 3). Not open for credit to students with credit for course 113. Discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Boolean algebras.

**70. Theory of Interest.** Lecture, three hours; discussion, one hour. Preparation: two calculus courses. Measurement of interest, annuities, amortization, sinking funds, bonds, and other securities.

**88. Lower Division Seminar.** Seminar, three hours. Limited to 15-20 freshmen. Seminar course on mathematics as a vital intellectual activity influencing all aspects of life. Substantial student participation. P/NP or letter grading.

## Upper Division Courses

Mathematics 113, 115A, 117, 131A, 132, 141A, 142, 144, 147, and Statistics 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

## General and Teacher Training

**104. Fundamental Concepts of Geometry.** Lecture, three hours; discussion, one hour. Prerequisites: courses 38A and 38B or equivalent, or consent of instructor. Designed for prospective elementary teachers. Informal geometry and topology, motion geometry, measurement of geometric figures, LOGO computer language, models and constructions appropriate for elementary classrooms.

**106. History of Mathematics.** Prerequisite: course 32A. Topics in history of mathematics, with emphasis on development of modern mathematics.

## Algebra, Number Theory, and Logic

**109. Transition to Upper Division Mathematics.** Lecture, three hours; discussion, one hour. Prerequisite: course 33B or consent of instructor. Not open for credit to students with credit for course 131A or 131AH. Introduction to mathematical proof. Principle of mathematical induction. Proof by contradiction. Developing and writing mathematical proofs. Proofs of basic theorems for limits and infinite series. Completeness property of the real number system. P/NP or letter grading.

**110A-110B-110C. Algebra.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. **110A.** Not open for credit to students with credit for course 117. Ring of integers, integral domains, fields, polynomial domains, unique factorization. **110B.** Groups, structure of finite groups. **110C.** Further topics in rings and modules; field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

**110AH-110BH-110CH. Algebra (Honors).** Prerequisite: consent of instructor. Honors sequence parallel to courses 110A-110B-110C.

**111A-111B-111C. Theory of Numbers.** Lecture, three hours; discussion, one hour. Prerequisites: courses 110A or 117, and 115A, or consent of instructor. Divisibility, congruences, Diophantine analysis, selected topics in theory of primes, algebraic number theory, Diophantine equations.

**M112A. Introduction to Set Theory.** (Formerly numbered 112A.) (Same as Philosophy M134.) Lecture, three hours; discussion, one hour. Prerequisite: course 31B or Philosophy 32 or consent of instructor. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

**112B-112C. Logic.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Predicate logic, formalized theories; Gödel completeness and incompleteness theorems. P/NP or letter grading.

**113. Combinatorics.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Permutations and combinations, counting principles, recurrence relations and generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey theorem.

**114A-114B-114C. Computation Theory and Logic.** Lecture, three hours; discussion, one hour. Prerequisite: course 61. Turing machines and other models of computation; recursive functions; thesis of Church; Gödel numbering of computations; universal machines; unsolvability results. Recursive and recursively enumerable sets; reducibilities; relative recursiveness. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; effective enumerability of valid sentences. Formal number theory; representation of recursive functions; incompleteness and undecidability; theorems of Gödel, Tarski, Church. Complexity of computations; time and space limitations; nondeterministic machines; polynomial classes P and NP; complete problems; measures of complexity; speed-up and gap theorems; lengths of proofs. P/NP or letter grading.

**115A-115B. Linear Algebra.** Lecture, three hours; discussion, one hour. P/NP or letter grading. **115A.** Prerequisite: course 33A. Abstract vector spaces, linear transformations, and matrices; determinants; inner product spaces; eigenvector theory. **115B.** Prerequisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric skew and orthogonal linear transformations, polar decomposition.

**117. Algebra for Applications.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Not open for credit to students with credit for course 110A. Integers, congruences; fields, applications of finite fields; polynomials; permutations, introduction to groups.

**118A-118B-118C. Combinatorial Algorithms.** Lecture, three hours; discussion, one hour. Prerequisites: courses 33B, 61, 115A, 117 (latter may be taken concurrently with course 118A). Introduction to discrete mathematics and algorithms as used in computer science and related fields. Topics include asymptotic analysis, arithmetic algorithms, computer-oriented algorithms, graphs and matroids, coding theory and designs.

## Geometry and Topology

**120A-120B. Differential Geometry.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A, 131A. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature. Gaussian curvature. Congruence of curves and surfaces. Intrinsic geometry of surfaces, isometrics, geodesics, Gauss/Bonnet theorem.

**121. Introduction to Topology.** Prerequisite: course 131A. Metric and topological spaces, topological properties, completeness, mappings and homeomorphisms, metrization problem.

**122. Projective Geometry.** Lecture, three hours; discussion, one hour. Prerequisites: courses 110A-110B, 115A. Projective spaces, especially lines and planes; homogeneous coordinates; principles of duality; projectivities, fundamental theorem, and theorems of Desargues, Pappus, Steiner, and Pascal.

**123. Foundations of Geometry.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Axioms and models, Euclid geometry, Hilbert axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré model, independence of parallel postulate.

## Analysis

**131A-131B. Analysis.** (Formerly numbered 131A-131B-131C.) Lecture, three hours; discussion, one hour. **131A.** Prerequisite: course 33B. Rigorous introduction to foundations of real analysis; real numbers, point set topology in euclidean space, functions, continuity. **131B.** Prerequisites: courses 33B, 115A, 131A. Derivatives, Riemann integral, sequences and series of functions, power series, Fourier series.

**131AH-131BH. Analysis (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors sequence parallel to courses 131A-131B. Courses 131AH-131BH and 132H form a full honors sequence in analysis.

**132. Complex Analysis for Applications.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Introduction to basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy/Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

**132H. Complex Analysis (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: course 131A. Honors course parallel to course 132. Courses 131AH-131BH and 132H form a full honors sequence in analysis.

**133. Integration on Manifolds.** Prerequisite: course 131B. Integration theory for functions of several variables, multilinear algebra, differential forms, Stokes theorem on manifolds.

**134. Measure and Integration.** Prerequisite: course 131B or consent of instructor. Introduction to Lebesgue measure and integration.

**135A-135B. Ordinary Differential Equations.** Lecture, three hours; discussion, one hour. Prerequisites: courses 33A, 33B, 115A. Systems of differential equations; linear systems with constant coefficients, analytic coefficients, periodic coefficients, and linear systems with regular singular points; existence and uniqueness results; linear boundary and eigenvalue problems; two-dimensional autonomous systems, phase/plane analysis; stability and asymptotic behavior of solutions.

**136. Partial Differential Equations.** Lecture, three hours; discussion, one hour. Prerequisites: courses 33A, 33B. Linear partial differential equations, particularly of the second order: wave equation, heat equation, and Laplace equation; appropriate boundary, initial value problems, and eigenvalue problems.

## Applied Mathematics

**140A-140B-140C. Numerical Analysis.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A, and Program in Computing 3 or 10A or equivalent. Not normally open for credit to students with credit for course 141A, 141B, or Electrical Engineering 103. Emphasis on both theory, with error analysis, and applications. Analysis of numerical methods for following areas: **140A.** Nonlinear equations, systems of linear equations, and eigenvalue problems. **140B.** Interpolation, approximation, fast Fourier transforms, differentiation, and integration. **140C.** Differential equations, systems of nonlinear equations, and optimization.

**141A-141B. Applied Numerical Methods.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32A, 32B, 33A, 33B, 115A, and Program in Computing 3 or 10A or equivalent. Not open for credit to students with credit for course 140A, 140B, or Electrical Engineering 103. Introduction to scientific computing, with emphasis on programming, algorithms, and applications. Case studies. Numerical methods and computer implementation for following areas: **141A.** Nonlinear equations, systems of linear equations, optimization, interpolation, differentiation, and integration. **141B.** Differential equations, least-squares approximation, and Monte Carlo methods.

**142. Mathematical Modeling.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B and 33B, or consent of instructor. Introduction to fundamental principles and spirit of applied mathematics. Emphasis on manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor (e.g., physical sciences, biology, economics, traffic dynamics, etc.).

**143. Analytic Mechanics.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange equations; calculus of variations, variable mass; related topics in applied mathematics.

**144. Linear Programming.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Not open for credit to students with credit for Electrical Engineering 136. Principles of linear programming, duality theorem, simplex methods; applications to industrial and business problems. Additional topics such as sensitivity analysis, integer programming, distribution and transportation algorithms, and applications to game theory.

**145. Fourier Methods for Differential Equations.** Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Fourier series and integral transforms, separation of variables, eigenfunction expansions. Applications from such areas as mechanical vibrations, fluid dynamics, heat conduction, and electromagnetics.

**146. Methods of Applied Mathematics.** Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

**147. Game Theory.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Games in extensive form, strategic equilibrium, matrix games and minimax theorem, cooperative and noncooperative solutions of bimatrix games and Lemke/Howson algorithm. Possible additional topics include combinatorial games, stochastic games, coalitional games and the core, marriage problem, and cost allocation. P/NP or letter grading.

**148A. Numerical Methods for Partial Differential Equations.** Lecture, three hours; discussion, one hour. Prerequisites: courses 141A-141B or equivalent. Introduction to first- and second-order linear partial differential equations. Finite difference and finite element solution of elliptic, hyperbolic, and parabolic equations. Method of lines and Rayleigh/Ritz procedures. Concepts of stability and accuracy. P/NP or letter grading.

**149. Mathematics of Computer Graphics.** Lecture, three hours; discussion, one hour. Prerequisites: course 115A, and Program in Computing 10A or equivalent knowledge of programming in either PASCAL or C language. Study of homogeneous coordinates, projective transformations, interpolating and approximating curves, representation of surfaces, and other mathematical topics useful for computer graphics.

**149HS. Honors Seminar: Mathematics of Computer Graphics.** Lecture, three hours. Prerequisites: course 149, consent of instructor. Limited enrollment (admission to be based on performance in course 149; participants need not be in an honors program). Participating seminar on topics not covered in course 149. Each student prepares substantial course project and presents it to class.

## Probability

**M150A-150B. Probability Theory.** Lecture, three hours; discussion, one hour. **M150A.** (Same as Statistics M152A.) Prerequisites: courses 32B, 33B. Not open to students with credit for Statistics M152A, 154A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation, normal approximations. P/NP or letter grading. **150B.** Prerequisite: course M150A or Statistics M152A. Convergence in distribution, laws of large numbers, Poisson processes, random walks.

**151. Stochastic Processes.** Lecture, three hours; discussion, one hour. Prerequisites: course M150A or Statistics M152A, and consent of instructor. Discrete Markov chains, continuous-time Markov chains and semi-Markov processes, renewal theory, Brownian motion.

**172A-172B. Actuarial Mathematics.** Lecture, three hours; discussion, one hour. **172A.** Prerequisite: course 70. Survival distributions and life tables, life insurance, life annuities, net premiums, net premium reserves. **172B.** Prerequisites: course 172A, Statistics 154A-154B. Multiple life functions, multiple decrement models, valuation theory for pension plans, insurance models, nonforfeiture benefits and dividends.

## Special Studies

**190. Honors Mathematics Seminar.** Lecture, three hours. Prerequisite: consent of instructor. Participating seminar on advanced topics in mathematics. Content varies from year to year. May be repeated for credit by petition.

**191. Upper Division Seminar (2 to 4 units).** Prerequisites: courses 32A, 32B, 33A, 33B, consent of instructor. Limited to 15 students. Each term department offers a limited number of seminars in various branches of mathematics. Substantial student participation. May be repeated for credit.

**199. Special Studies in Mathematics (1 to 4 units).** Prerequisite: consent of department chair and instructor. At discretion of chair and subject to availability of staff, individuals or groups may study topics suitable for undergraduate course credit but not specifically offered as separate courses. May be repeated for credit, but no more than one 199 course may be applied toward upper division courses required for a major offered by Mathematics Department.

## Graduate Courses

### Teacher Preparation

**201A-201B-201C. Topics in Algebra and Analysis.** Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in mathematics/education program. Important ideas of algebra, geometry, and calculus leading effectively from elementary to modern mathematics. Approaches to number systems, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward M.A. degree requirements.

**202A-202B. Mathematical Models and Applications.** Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in mathematics/education program. Development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

### Number Theory

**205A-205B-205C. Number Theory.** Prerequisites: courses 210A and 246A, or consent of instructor. Topics from analytic algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Selected topics from additive number theory, Diophantine approximation, partitions, class-field theory, lattice point problems, valuation theory, etc.

**206A-206B. Combinatorial Theory.** Prerequisite: consent of instructor. Generating functions. Probabilistic methods. Polya theorem. Enumerative graph theory. Partition theory. Number theoretical applications. Structure of graphs, matching theory, duality theorems. Packings, pavings, coverings, statistical designs, difference sets, triple systems, finite planes. Configurations, polyhedra. Ramsey theory, finite and transfinite, and applications.

## Algebra

**210A-210B-210C. Algebra.** Prerequisites: courses 110A-110B-110C or consent of instructor. Students with credit for courses 110B and/or 110C will not receive M.A. degree credit for courses 210B and/or 210C. Group theory, including theorems of Sylow and Jordan/Holder/Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

**211. Structure of Rings.** Prerequisite: course 210A or consent of instructor. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

**212. Homological Algebra.** Prerequisite: course 210A or consent of instructor. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

**213A-213B. Theory of Groups.** Prerequisite: course 210A or consent of instructor. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

**214A-214B. Introduction to Algebraic Geometry.** Prerequisite: course 210A or consent of instructor. Basic definitions and first properties of algebraic varieties in affine and projective space: irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

**215A-215B. Commutative Algebra.** Prerequisite: course 210A or consent of instructor. Topics from commutative ring theory, including techniques of localization, prime ideal structure in commutative Noetherian rings, principal ideal theorem, Dedekind rings, modules, projective modules, Serre conjecture, regular local rings.

**216. Further Topics in Algebraic Geometry.** Prerequisites: courses 214A-214B or consent of instructor. Closer examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

## Logic and Foundations

**220A-220B-220C. Mathematical Logic and Set Theory.** Prerequisites: courses M112A, 112B-112C, or equivalent. Model theory: compactness theorem; Lowenheim/Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory; thesis of Church; recursively enumerable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theories; quantifier elimination. Set theory: Zermelo/Fraenkel and von Neumann/Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing.

**222A-222B. Lattice Theory and Algebraic Systems.** Lecture, three hours. Prerequisite: course 210A or consent of instructor. Partially ordered sets, lattices, distributivity, modularity; completeness, interaction with combinatorics, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congruence laws, equational bases, applications to lattices.

**223A. Model Theory.** Prerequisites: courses 220A-220B-220C. Topics include ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

**223B. Set Theory.** Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

**223C. Recursion Theory.** Prerequisites: courses 220A-220B-220C. Topics include degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

**223D. Descriptive Set Theory.** Prerequisites: courses 220A-220B-220C. Classical descriptive set theory: Borel and projective sets. Effective descriptive set theory. Consequences of strong set-theoretic hypotheses.

## Geometry and Topology

**225A. Differentiable Manifolds.** Lecture, three hours. Prerequisites: courses 121 and 131A-131B, or consent of instructor. Smooth manifolds and maps, basic examples and properties, orientability, tangent and cotangent spaces, embeddings and immersions, Sard theorem and transversality, vector fields and integral curves, Lie brackets and Frobenius theorem, Lie derivative, tensors, differential forms and exterior derivative, Stokes theorem on manifolds.

**225B. Introduction to Algebraic Topology.** Lecture, three hours. Prerequisite: course 225A or consent of instructor. Elementary concepts of homotopy theory; covering spaces and fundamental group. Singular homology theory, axioms of homology, Mayer/Vietoris sequence, calculation of homology of standard spaces, applications, Betti numbers and Euler characteristic, cell complexes and cellular homology.

**225C. Further Topics in Geometry and Topology.** Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Topics may include cohomology (singular, cellular, de Rham), duality theorems, de Rham theorem, degree theory, cup products, higher homotopy groups, transversality theory, Morse theory, Riemannian metric.

**226A-226B-226C. Differential Geometry.** Lecture, three hours. Prerequisite: course 225A or consent of instructor. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness, submanifolds, constant curvature. Geodesics; conjugate points, variational methods, Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symmetric spaces.

**227A-227B. Algebraic Topology.** Lecture, three hours. Prerequisite: course 225B or consent of instructor. CW complexes, fiber bundles, homotopy theory, cohomology theory, spectral sequences.

**229A-229B-229C. Lie Groups and Lie Algebras.** Prerequisite: knowledge of basic theory of topological groups and differentiable manifolds. Lie groups, Lie algebras, subgroups, subalgebras. Exponential map. Universal enveloping algebra. Campbell/Hausdorff formula. Nilpotent and solvable Lie algebras. Cohomology of Lie algebras. Theorems of Weyl, Levi-Mal'cev. Simple Lie algebras. Classification of simple Lie algebras. Representations. Compact groups. Weyl character formula.

**233. Partial Differential Equations on Manifolds.** Lecture, three hours. Prerequisites: courses 226A and 251A, or consent of instructor. Topics may include Laplacian operator on a Riemannian manifold, eigenvalues, Atiyah/Singer index theorem, isoperimetric inequalities, elliptic estimates, harmonic functions, function theory on manifolds, Green's function, heat equation, minimal hypersurfaces, prescribed curvature equations, harmonic maps, Yang/Mills equation, Monge/Ampere equations.

**234. Topics in Differential Geometry.** Lecture, three hours. Prerequisites: courses 226A-226B or consent of instructor. Complex and Kahler geometry, Hodge theory, homogeneous manifolds and symmetric spaces, finiteness and convergence theorems for Riemannian manifolds, almost flat manifolds, closed geodesics, manifolds of positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

**235. Topics in Manifold Theory.** Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Emphasis on low-dimensional manifolds. Structure and classification of manifolds, automorphisms of manifolds, submanifolds (e.g., knots and links). Topics vary from year to year. May be repeated for credit by petition.

**236. Topics in Geometric Topology.** Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Decomposition spaces, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

**237. Topics in Algebraic Topology.** Lecture, three hours. Prerequisites: courses 227A-227B or consent of instructor. Fixed-point theory, fiber spaces and classifying spaces, characteristic classes, generalized homology and cohomology theories. Topics vary from year to year. May be repeated for credit by petition.

## Analysis and Differential Equations

**240. Methods of Set Theory.** Lecture, three hours. Prerequisites: courses 110A-110B, 121 or equivalent, 131A-131B. Naive, axiomatic set theory, axiom of choice and its equivalents, well-orderings, transfinite induction, ordinal and cardinal arithmetic. Applications to algebra: Hamel bases, Stone representation theorem. Applications to analysis and topology: Cantor/Bendixson theorem, counterexamples in measure theory, Borel and analytic sets, Choquet theorem.

**245A-245B-245C. Real Analysis.** Lecture, three hours. Prerequisites: courses 121, 131A-131B, or equivalent. Students with credit for course 134 will not receive M.A. degree credit for course 245A. Basic measure theory. Measure theory on locally compact spaces. Fubini theorem. Elementary aspects of Banach and Hilbert spaces and linear operators. Function spaces. Radon/Nikodym theorem. Fourier transform and Plancherel on  $\mathbb{R}^n$  and  $\mathbb{T}^n$ .

**246A-246B-246C. Complex Analysis.** Prerequisites: courses 131A-131B. Students with credit for course 132 will not receive M.A. degree credit for course 246A. Cauchy/Riemann equations. Cauchy theorem. Cauchy integral formula and residue calculus. Power series. Normal families. Harmonic functions. Linear fractional transformations. Conformal mappings. Analytic continuation. Examples of Riemann surfaces. Infinite products. Partial fractions. Classical transcendental functions. Elliptic functions.

**247A-247B. Classical Fourier Analysis.** Lecture, three hours. Prerequisites: courses 245A-245B, 246A. Distribution on  $\mathbb{R}^n$  and  $\mathbb{T}^n$ . Principal values; other examples. Distributions with submanifolds as supports. Kernel theorem. Convolution; examples of singular integrals. Tempered distributions and Fourier transform theory on  $\mathbb{R}^n$ . Distributions with compact or one-sided supports and their complex Fourier transforms.

**250A. Ordinary Differential Equations.** Prerequisite: course 246A or consent of instructor. Basic theory of ordinary differential equations. Existence and uniqueness of solutions. Continuity with respect to initial conditions and parameters. Linear systems and nth order equations. Analytic systems with isolated singularities. Self-adjoint boundary value problems on finite intervals.

**250B. Nonlinear Ordinary Differential Equations.** Prerequisite: course 250A. Asymptotic behavior of nonlinear systems. Stability. Existence of periodic solutions. Perturbation theory of two-dimensional real autonomous systems. Poincaré/Bendixson theory.

**250C. Advanced Topics in Ordinary Differential Equations.** Prerequisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.

**251A. Introductory Partial Differential Equations.** Prerequisite: consent of instructor. Classical theory of heat, wave, and potential equations; fundamental solutions, characteristics and Huygens principle, properties of harmonic functions. Classification of second-order differential operators. Maximum principles, energy methods, uniqueness theorems. Additional topics as time permits.

**251B-251C. Topics in Partial Differential Equations.** Prerequisite: consent of instructor. In-depth introduction to topics of current interest in partial differential equations or their applications.

**252A-252B-252C. Topics in Complex Analysis.** Lecture, three hours. Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Potential theory, subharmonic functions, harmonic measure; Hardy spaces; entire functions; univalent functions; Riemann surfaces; extremal length, variational methods, quasi-conformal mappings. Topics vary from year to year.

**253A-253B. Several Complex Variables.** Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Introduction to analytic functions of several complex variables. The  $\bar{\partial}$  problem, Cousin problems, domains of holomorphy, complex manifolds.

**254A-254B. Topics in Real Analysis.** Prerequisites: courses 245A-245B-245C, 246A-246B-246C. Selected topics in analysis and its applications to geometry and differential equations. Topics may vary from year to year. May be repeated for credit by petition.

## Functional Analysis

**255A. Functional Analysis.** Prerequisites: courses 245A-245B or 265A-265B, and 246A, or consent of instructor. Banach spaces, basic principles. Weak topologies. Compact operators. Fredholm operators. Special spaces including Hilbert spaces and  $C(X)$ .

**255B-255C. Topics in Functional Analysis.** Prerequisite: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert space, semi-groups of operators, linear topological vector spaces, and other related areas.

**256A-256B-256C. Topological Groups and Their Representations.** Lecture, three hours. Prerequisite: course 255A or consent of instructor. Topological groups and their basic properties. Haar measure. Compact groups and their representations. Duality and Fourier analysis on locally compact abelian groups. Induced representations, Frobenius reciprocity. Representations of special groups (Lorentz, Galilean, etc.). Projective representations. Representations of totally disconnected groups.

**258A-258B. Commutative Banach Algebras.** Lecture, three hours. Prerequisites: courses 246A, 255A, 255B. Gelfand theory of commutative Banach algebras. Applications to harmonic analysis on locally compact abelian groups. Algebras of holomorphic functions. Special topics.

**259A-259B. Operator Algebras in Hilbert Space.** Prerequisites: courses 255A, 255B-255C. Selected topics from theories of  $C^*$  and von Neumann algebras. Applications.

## Applied Mathematics

**260. Introduction to Applied Mathematics.** Prerequisite: course 142 or consent of instructor. Construction, analysis, and interpretation of mathematical models of problems which arise outside of mathematics.

**261. Multiperson Game Theory.** Lecture, three hours. Prerequisite: graduate standing in mathematics or consent of instructor. Nonadditive set functions; games in characteristic function form; imputations and domination; von Neumann/Morgenstern solutions; the core; totally balanced games; kernel and nucleolus; multi-linear extension and Shapley value; fixed-point theorems; Nash equilibrium; nontransferable utility; lambda-transfer method. Applications to markets, cost allocation, assignment and marriage problems, voting power.

**264. Applied Complex Analysis.** Prerequisite: course 246A or consent of instructor. Topics include contour integration conformal mapping, differential equations in complex plane, special functions, asymptotic series, Fourier and Laplace transforms, singular integral equations.

**265A-265B. Real Analysis for Applications.** Prerequisites: courses 131A-131B or consent of instructor. Not open for credit to students with credit for courses 245A-245B-245C. Lebesgue measure and integration on real line, absolutely continuous functions, functions of bounded variation,  $L^2$ - and  $L^p$ -spaces. Fourier series. General measure and integrations, Fubini and Radon/Nikodym theorems, representation of functionals, Fourier integrals.

**266A. Applied Ordinary Differential Equations.** Prerequisites: courses 131A-131B, 132, and 135A-135B or 145 and 146. Spectral theory of regular boundary value problems and examples of singular Sturm-Liouville problems, related integral equations, phase/plane analysis of nonlinear equations.

**266B-266C. Applied Partial Differential Equations.** Prerequisite: course 266A or consent of instructor. Classification of equations, classical potential theory, Dirichlet and Neumann problems. Green's functions, spectral theory of Laplace equation in bounded domains, first-order equations, wave equations, Cauchy problem, energy conservation, heat equation, fundamental solution, equations of fluid mechanics and magnetohydrodynamics.

**266D-266E. Applied Differential Equations.** Prerequisites: courses 266A, 266B-266C. Advanced topics in linear and nonlinear partial differential equations, with emphasis on energy estimates, numerical methods, and applications to fluid mechanics. Additional topics include dispersive waves, systems with multiple time scales, and applications to fluid mechanics.

**267A-267B. Applied Algebra.** Prerequisite: course 110A or equivalent. Students with credit for course 210A will not receive M.A. degree credit for course 267A. Linear algebra, eigenvalues, and quadratic forms; linear inequalities, finite fields, and combinatorial analysis. Group theory, with emphasis on representations. Application to physical problems.

**268A. Applied Functional Analysis.** Lecture, three hours. Prerequisites: courses 115A-115B, 131A-131B, and 132, or consent of instructor. Topics may include Hilbert spaces, distributions, Fourier transforms,  $L^2$ -space, the Laplacian, linear operators, spectrum and resolvent, self-adjoint and unitary operators, problems of evolution in Banach spaces, well-posed initial value problems, semigroups, applications to applied problems.

**268B-268C. Topics in Applied Functional Analysis.** Prerequisite: course 255A. Topics include spectral theory with applications to ordinary differential operators, eigenvalue problems for differential equations, generalized functions, and partial differential equations.

**269A-269B-269C. Advanced Numerical Analysis.** Prerequisites: courses 115A, 135A, and 140A-140B-140C, or consent of instructor. Numerical solution for systems of ordinary differential equations; initial and boundary value problems. Numerical solution for elliptic, parabolic, and hyperbolic partial differential equations. Topics in computational linear algebra.

**270A-270F. Mathematical Aspects of Scientific Computing.** Lecture, three hours. Prerequisites: courses 115A, 140A or 141A-141B, and Program in Computing 10A or equivalent, or consent of instructor:

**270A.** Techniques of Scientific Computing. Mathematical modeling for computer applications, scientific programming languages, software development, graphics, implementation of numerical algorithms on different architectures, case studies.

**270B-270C.** Computational Linear Algebra. Direct, fast, and iterative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, algebraic eigenvalue problem.

**270D-270E.** Computational Fluid Dynamics. Basic equations, finite difference, finite element, pseudospectral, and vortex methods; stability, accuracy, shock capturing, and boundary approximations.

**270F.** Parallel Numerical Algorithms. Prerequisites: courses 270B-270C. Recommended: courses 270A, 270D-270E. Design, analysis, and implementation of numerical algorithms on modern vector and parallel computers. Discussion of classical numerical algorithms and novel parallel algorithms. Emphasis on applications to PDEs.

**271A. Tensor Analysis.** Prerequisite: course 131A or consent of instructor. Algebra and calculus of tensors on  $n$ -dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green/Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

**271B. Analytical Mechanics.** Prerequisites: course 271A, prior knowledge of mechanics. Newtonian and Lagrangian equations. Hamilton principle. Principle of least action. Holonomic and nonholonomic systems. Hamilton canonical equations, contact transformations, applications.

**271C. Introduction to Relativity.** Prerequisites: course 271A, prior knowledge of mechanics. Restricted theory of relativity. Extensions to general theory. Relativistic theory of gravitation.

**271D. Wave Mechanics.** (Formerly numbered 273.) Prerequisite: consent of instructor. General concepts of mechanical systems (states, space-time, "logics," etc.). Classical and quantum examples. Correspondence principle. Spinors.

**272A. Foundations of Continuum Mechanics.** Lecture, three hours. Prerequisite: consent of instructor. Kinematic preliminaries, conservation laws for mass, momentum and energy, entropy production, constitutive laws. Linear elasticity, inviscid fluid, viscous fluid. Basic theorems of fluid mechanics. Simple solutions. Low Reynolds number flow, Stokes drag. High Reynolds number flow, boundary layers. Two-dimensional potential flow, simple aerofoil. Compressible flow, shocks.

**272B. Mathematical Aspects of Fluid Mechanics.** Lecture, three hours. Prerequisite: course 272A or consent of instructor. Review of basic theory of moving continua, fluid equations, integral theorems. Simple solutions, flow created by slowly moving bodies, flows where viscosity is negligible, vortices, boundary layers and their separation, water waves, ship waves, compressional waves, shock waves, turbulence theory (overview).

**272C. Magnetohydrodynamics.** Lecture, three hours. Prerequisites: course 272A, consent of instructor. Basic electromagnetism. Steady flows, Hartmann layers. Alfvén theorem and waves. Compressible media. Magnetostatic equilibria and stability.

**272D. Rotating Fluids and Geophysical Fluid Dynamics.** Lecture, three hours. Prerequisite: consent of instructor. Effects of Coriolis forces on fluid behavior. Inviscid flows, Taylor/Proudman theorem, Taylor columns, motions of bodies, inertial waves in spheres and spherical shells, Rossby waves. Ekman layers, spin-up. Shallow-water theory, wind-driven ocean circulation. Effects of stratification, Bénard convection. Baroclinic instability, Eady model. S/U or letter grading.

**273. Optimization, Calculus of Variations, and Control Theory.** Prerequisite: consent of instructor. Application of abstract mathematical theory to optimization problems of calculus of variations and control theory. Abstract nonlinear programming and applications to control systems described by ordinary differential equations, partial differential equations, and functional differential equations. Dynamic programming.

**274A. Asymptotic Methods.** (Formerly numbered M274A.) Lecture, three hours. Prerequisite: course 132 or equivalent. Fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase. Watson lemma, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems. S/U or letter grading.

**274B-274C. Perturbation Methods.** Lecture, three hours. Prerequisite: course 266A or equivalent. Boundary layer theory, matched asymptotic expansions, WKB theory. Problems with several time scales: Poincaré method, averaging techniques, multiple-scale analysis. Application to eigenvalue problems, nonlinear oscillations, wave propagation, and bifurcation problems. Examples from various fields of science and engineering.

## Probability and Statistics

**275A-275B. Probability Theory.** Prerequisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

**275C. Stochastic Processes.** Lecture, three hours. Prerequisite: course 275B or consent of instructor. Brownian motion, continuous-time martingales, Markov processes, potential theory. S/U or letter grading.

**275D. Stochastic Calculus.** Lecture, three hours. Prerequisite: course 275C or consent of instructor. Stochastic integration, stochastic differential equations, Itô formula and its applications. S/U or letter grading. (Alternates yearly with course 275E.)

**275E. Stochastic Particle Systems.** Lecture, three hours. Prerequisite: course 275C or consent of instructor. Interacting particle systems, including contact process, stochastic Ising model, and exclusion processes; percolation theory. S/U or letter grading. (Alternates yearly with course 275D.)

**276A-276B. Statistical Theory.** Lecture, three hours. Prerequisite: Statistics 152C or consent of instructor.

**276A.** Sufficiency, exponential families, least squares, maximum likelihood estimation, Fisher information, Cramér/Rao inequality, confidence intervals. **276B.** Asymptotic properties of tests and estimates, consistency and efficiency, likelihood ratio tests, chi-squared tests.

**276C. Statistical Decision Theory.** Prerequisite: course 276A. Invariant estimates and tests; best unbiased and locally best tests; multiple decision problems; application to general linear model; other topics.

**277. Data Analysis.** Lecture, three hours. Prerequisites: course 276A and Statistics M153A, or consent of instructor. Outline of principles of applied statistics, followed by survey of specific data analyses from physical, life, and social sciences. Methods include regression, analysis of variance and covariance, survival analysis, categorical data analysis, and simple time-series analysis. Illustration of transformations, plotting, model selection and evaluation, and estimation and decision procedures.

**278A. Multivariate Analysis.** Lecture, three hours. Prerequisite: course 276B or consent of instructor. Distributions in several dimensions, partial and multiple correlation. Normal distribution theory, Wishart distribution, Hotelling  $T^2$ . Principal components, canonical correlation, discriminant analysis. Introduction to linear structural relations and factor analysis.

**278B. Nonparametric and Robust Statistics.** Lecture, three hours. Prerequisite: course 276B or consent of instructor. Development of nonparametric and robust procedures for hypothesis testing, estimation in one- and two-sample problems, linear and nonlinear regression, multiple classification, density estimation.

**278C. Decision Theory.** Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes, admissible, and minimax decision rules. Invariant tests and estimates, best unbiased tests, locally best tests. Application to general linear model.

**278D. Sequential Analysis.** Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes sequential decision problems, stopping rule problems, optimality of sequential probability ratio test, Wald identity, asymptotic theory, and other topics.

**M279A-M279B. Linear Statistical Models.** (Formerly numbered M279A-M279B-M279C.) (Same as Biostatistics M250A-M250B.) Lecture, three hours; discussion, one hour. Prerequisite: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. S/U or letter grading.

**M280. Statistical Computing.** (Same as Biomathematics M280 and Biostatistics M280.) Lecture, three hours. Prerequisites: course 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods.

## Special Studies

**285A-285L. Seminars.** Prerequisite: consent of instructor. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members:

**285A.** History and Development of Mathematics.

**285B.** Number Theory.

**285C.** Algebra.

**285D.** Logic.

**285E.** Geometry.

**285F.** Topology.

**285G.** Analysis.

**285H.** Differential Equations.

**285I.** Functional Analysis.

**285J.** Applied Mathematics.

**285K.** Probability.

**285L.** Statistics.

**290. Seminar: Current Literature.** Intended for Ph.D. candidates. Readings and presentations of papers in mathematical literature under supervision of a staff member.

**296A-296M. Participating Seminars (1 to 4 units each).** (Formerly numbered 286A-286M.) Prerequisite: consent of instructor. Seminars and discussion by staff and students. S/U grading:

**296A.** History and Development of Mathematics.

**296B.** Number Theory.

**296C.** Algebra.

**296D.** Logic.

**296E.** Geometry.

**296F.** Topology.

**296G.** Analysis.

**296H.** Differential Equations.

**296I.** Functional Analysis.

**296J.** Applied Mathematics.

**296K.** Probability.

**296L.** Statistics.

**296M.** Mathematics.

**370. Teaching Mathematics.** Lecture, three hours. Prerequisites: course 3B or 31B, senior standing. Critical inquiry into present-day tendencies in teaching mathematics.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Mathematics (2 units).** Lecture/discussion (four 90-minute meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college mathematics. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Supervised individual reading and study on project approved by a faculty member, which may be preparation for M.A. examination. May be repeated for credit, but only two 596 courses (eight units) may be applied toward M.A. degree unless departmental consent is obtained.

**599. Research in Mathematics (2 to 12 units).** Prerequisite: advancement to doctoral candidacy. Study and research for Ph.D. dissertation. May be repeated for credit.

## Program in Computing

Program in Computing 1 is designed for students who wish a broad, general introduction

to the topic of computers and computation. It is strongly recommended for those who wish to take course 3 or 10A, but who have no prior experience in computing.

Students who would like one course in programming should take either course 3 (uses FORTRAN) or 10A (uses C<sup>++</sup>), depending on the advice of their major department.

The sequence (courses 10A, 10B, 10C, 15, 30, 60) provides an extensive education in basic computer science. It is intended for Letters and Science majors who are completing a specialization in computing and for those planning to take upper division coursework in computer science. These students should take all or part of the sequence, depending on the advice of their major department.

## Lower Division Courses

**1. Introduction to Computers and Computing.** Lecture, three hours; laboratory, one hour; computer assignments, five hours. Fundamentals of computers and computing; applications software, editors, spreadsheets, file manager; machine organization and computer hardware. Brief introduction to programming.

**3. Introductory FORTRAN Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Students with credit for course 10A will receive only two units of credit for this course. Basic principles of programming, using FORTRAN as example language. Terminal course intended for physical sciences and engineering majors who need to use the extensive library of existing FORTRAN programs. Students who wish to take more advanced program in computing courses should take course 10A rather than this course.

**10A. Introduction to Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Recommended requisite for students with no prior computing experience: course 1. Students with credit for course 3 will receive only two units of credit for this course. Basic principles of programming, using C<sup>++</sup> as example language: algorithmic, procedural problem solving; program design and development; control structures and data structures; human factors in programming and program design.

**10B. Intermediate Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Arrays, pointers, classes; abstract data types, object-oriented programming; text processing, recursion, linked lists, stacks, queues, trees, and applications. Example language to be C<sup>++</sup>.

**10C. Advanced Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. Sorting and searching; lexical analysis and parsing; algorithmic analysis; programming in UNIX environment.

**15. Introduction to LISP and Symbolic Computation (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 1. Introduction to symbolic computation using LISP programming language. Basics: list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

**30. Machine Organization and Assembly Language Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. Not open for credit to students with credit for former Computer Science 30. Description of machine organization and operation. Representation of information, instruction sets and formats, addressing modes, memory organization and management, I/O processing and interrupts.

**60. Data Structures and Algorithms.** Lecture, three hours; discussion, one hour; laboratory, five hours. Enforced requisites: course 10B, Mathematics 31A, 31B, 61. Review of basic data structures: arrays, stacks, queues, lists, trees. Advanced data structures: priority queues, heaps, balanced trees. Sorting, searching techniques. Corresponding algorithms.

**97. Special Topics in Programming.** Lecture, three hours; discussion, one hour. Enforced requisite: course 10A. Variable topics in programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

## Upper Division Courses

**110. Introduction to Concurrent Computation.** Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10C or equivalent familiarity with programming in C or C<sup>++</sup> language. Introduction to programming of concurrent (parallel) computers. Shared and distributed memory parallel architectures; currently available concurrent machines; parallel algorithms and development of concurrent programs; estimation of algorithmic performance; selected advanced topics.

**197. Advanced Topics in Programming.** Lecture, three hours; discussion, two hours. Prerequisite: consent of instructor. Variable topics in programming and the mathematics of programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

## Graduate Courses

**285. Seminar: Logic and Theory of Computation.** Prerequisite: consent of instructor. Topics in various aspects of logic and theory of computation. Course is considered equivalent to a Mathematics 285 course for purpose of degree requirements.

**296. Participating Seminar: Logic and Theory of Computation (1 to 4 units).** (Formerly numbered 286.) Prerequisite: consent of instructor. Seminar and discussion by staff and students. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

## Statistics

### Lower Division Course

**50. Elementary Statistics.** Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means.

### Upper Division Courses

Students planning to pursue advanced degrees in statistics should enroll in the M152A, 152B-152C sequence. The 154A-154B sequence is less comprehensive than the 152 series. In particular, probability topics do not receive the same level of coverage. Courses 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

**M152A. Probability Theory.** (Same as Mathematics M150A.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 32B, 33B. Not open to students with credit for course 154A, Mathematics M150A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation, normal approximations. P/NP or letter grading.

**152B-152C. Statistics.** Lecture, three hours; discussion, one hour. Not open to students with credit for courses 154A-154B. P/NP or letter grading. **152B.** Prerequisite: course M152A. Survey sampling, estimation, testing, data summary, one- and two-sample problems. **152C.** Prerequisite: course 152B. Analysis of variance, categorical data, linear regression, decision theory and Bayesian inference.

**M153A-M153B. Introduction to Computational Statistics.** (Same as Biomathematics M153A-M153B and Biostatistics M153A-M153B.) Lecture, three hours; discussion, one hour. Prerequisites: course 152B, Mathematics 115A. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

**154A-154B. Statistics.** Lecture, three hours; discussion, one hour. Not open to students with credit for courses M152A and 152B. P/NP or letter grading. **154A.** Prerequisites: Mathematics 32B, 33B. Not open to students with credit for Mathematics M150A or Electrical Engineering 131A. Probability, distributions, expectation, estimation, central limit theorem, confidence intervals, testing. **154B.** Prerequisite: course 154A. One- and two-sample problems, goodness of fit and contingency tables, correlation and regression, analysis of variance, nonparametrics.

## Microbiology and Molecular Genetics

1602 Molecular Sciences, (310) 825-8482

### Professors

Arnold J. Berk, M.D.  
 Frederick A. Eiserling, Ph.D.  
 C. Fred Fox, Ph.D.  
 Robert P. Gunsalus, Ph.D.  
 H. Ronald Kaback, M.D.  
 Aldons J. Lusis, Ph.D.  
 Jeffrey H. Miller, Ph.D.  
 Sherie L. Morrison, Ph.D., *Chair*  
 Donald P. Nierlich, Ph.D.  
 Eli E. Sercarz, Ph.D.  
 Jack Stevens, D.V.M., Ph.D.  
 Bernadine J. Wisnieski, Ph.D.  
 Owen N. Witte, M.D. (*President's Professor of Developmental Immunology*)  
 June Lascelles, Ph.D., *Emerita*  
 Rafael J. Martinez, Ph.D., *Emeritus*  
 M.J. Pickett, Ph.D., *Emeritus*  
 Sydney C. Rittenberg, Ph.D., *Emeritus (Distinguished Teaching Award)*  
 William R. Romig, Ph.D., *Emeritus (Distinguished Teaching Award)*

### Associate Professors

Robert W. Simons, Ph.D.  
 Fuyuhiko Tamanoi, Ph.D.

### Assistant Professors

Douglas L. Black, Ph.D.  
 Virginia L. Miller, Ph.D.

### Adjunct Assistant Professor

Ralph Robinson, Ph.D.

## Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in microbiology and molecular genetics prepare for careers in biomedical research, medicine or dentistry, biotechnology and genetic engineering, industrial microbiology, and agricultural or environmental sciences, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in chemistry, biology, physics, and mathematics. They provide preparation for careers in microbiology or for further advanced study leading to the doctorate.

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology at the undergraduate level and depth and training in independent study and research for graduate students.

Note: Several upper division and graduate courses in this department are multiple-listed with those in the Microbiology and Immunology Department in the UCLA School of Medicine. If you are interested in a doctoral program with a fundamentally disease-oriented approach to microbiology, see the Microbiology and Immunology Department description in Chapter 15.

## Bachelor of Science Degree

### Premicrobiology and Molecular Genetics Major

While you are completing the preparation courses for the major, you are considered a premicrobiology and molecular genetics major. After completing the preparation courses with a minimum grade-point average of 2.0, you should petition to enter the major in the Student Affairs Office, 1602B Molecular Sciences. All preparation courses must be taken for a letter grade. If you enter with 80 or more units of credit, in order to specify premicrobiology and molecular genetics as your major, you must have completed one year of general chemistry; Biology 5, 9, or equivalent; at least

one of the following: organic chemistry with laboratory (two courses), calculus-based physics (one year), calculus (one year).

### Preparation for the Major

*Required:* Biology 5, 9, 100A, 108, or equivalent; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL, 153A, 153L; Mathematics 3A, 3B, 3C (or 31A, 31B, 32A); Physics 6A, 6B, 6C (or 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL).

### The Major

*Required:* Microbiology and Molecular Genetics 101, 102, C106, C119, M185A; Chemistry and Biochemistry 153C; four additional upper division courses from the departmental list or from related departments selected with approval of your faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 GPA in the major. A maximum of four units of Microbiology and Molecular Genetics 199, taken for a letter grade, may be applied toward the major. Credit for 199 courses from other departments may not be applied.

### Honors Program

An overall grade-point average of 3.2 and a 3.5 in the premajor and major respectively are required to apply for departmental honors. In addition you must have junior standing and the sponsorship of a faculty adviser. The core of the program consists of three terms (minimum) of Microbiology and Molecular Genetics 199H research, culminating in a thesis. If the thesis is accepted by the honors committee, you are awarded the bachelor's degree with departmental honors. The department also offers an honors seminar course each Spring Quarter for the elective program. For further information, contact the Student Affairs Office, 1602B Molecular Sciences.

## Master of Arts Degree

### Admission

Requirements for admission are the same as for the Ph.D. degree, with the addition of a research proposal. Students who select this program must obtain sponsorship for a laboratory research problem prior to submitting an application.

The department accepts relatively few students whose objective is a master's degree; applicants must contact a potential faculty sponsor at the time of application.

## Ph.D. Degree

### Admission

Admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280.

Under special circumstances, new Ph.D. students may be admitted directly to the department, in which case the following criteria apply. You must have completed an undergraduate

major in microbiology or a related field with superior scholastic achievement. You should have preparation in calculus, physics, biology, genetics, organic and biological chemistry, and microbiology. Physical chemistry is strongly recommended. You may be admitted with background deficiencies to be remedied prior to or concurrent with graduate studies. Submit scores on the Graduate Record Examination (GRE) General Test directly to the department. The Subject Test in Biology, Biochemistry, or Chemistry is recommended. Evidence (via letters of recommendation, interviews, or direct knowledge) of superior research potential and motivation is also required. Completion of a master's degree is not normally required.

Applications, brochures, and additional information on the master's and Ph.D. programs are available from the Graduate Adviser, Student Affairs Office, Department of Microbiology and Molecular Genetics, 1602B Molecular Sciences, UCLA, Los Angeles, CA 90024-1489.

## Course Requirements

### Formal Lecture/Laboratory Courses

*Biochemistry* — Chemistry and Biochemistry CM253 (six units; offered only in Fall Quarter; to be completed during the first year) is required.

*Cell Biology* — Chemistry and Biochemistry M267 or Anatomy and Cell Biology M209A is required.

A total of eight additional units of 200-level coursework to be selected from at least two of the following four subject areas is required: (1) general microbiology, (2) host/parasite interactions and virology, (3) immunology, (4) genetics and regulation. Acceptable courses are listed in the Student Affairs Office.

You are expected to complete a course in physical chemistry (Chemistry and Biochemistry 156). This requirement can be waived on the basis of work done before entering UCLA.

### Student-Participation Seminar Courses

Each term, seminar courses in which students read and report on current scientific research literature are organized. You must enroll in five such courses (10 units) prior to completing your degree.

### Laboratories

During your first 12 months in residence, you rotate for one term each through three laboratories. You normally enroll in Microbiology and Molecular Genetics 596 for four units of credit for each laboratory rotation.

### First-Year Proposal

By August 15 of your first year of study you must submit an original research proposal of approximately five pages. The topic may be based on a subject presented in a departmental professional seminar or on material from one of the seminar courses. Suggestions and evaluations are returned to you and used by the faculty to evaluate continuation into the second year.

## Teaching Experience

The department considers teaching experience to be an integral part of the graduate program. All Ph.D. candidates are required to serve as teaching assistants or in some other formal teaching capacity for three terms. Under special circumstances, one term may be waived with consent of the graduate adviser. Prior experience at another institution is acceptable when approved by the graduate adviser.

## Qualifying Examinations

The oral examination must be taken within 24 months of entry into graduate school and must be passed, if reexamination is required, no later than 27 months from the date of entry. (These periods may be extended with the written consent of the departmental graduate adviser and your mentor.)

The examination is administered by the doctoral committee which normally serves as the thesis committee as well. As a major part of the examination, you prepare and defend a written research proposal. Before presentation to the doctoral committee, you are encouraged to present the proposal before a student seminar group.

The University Oral Qualifying Examination covers both your proposal and general scientific background. It is not restricted to the topics of the proposal. The committee may arrange alternate ways to assess your preparation and qualifications.

## Dissertation/Final Oral Examination

A dissertation on a subject of your choice selected in consultation with your major professor is required. The final oral examination, administered by the doctoral committee, is a defense of the completed dissertation, presented as a professional seminar and open in part to the public.

## Lower Division Courses

**6. Introduction to Microbiology.** Lecture, three hours. Not open for credit to students with credit for course 101, Biology 5, or equivalent courses. Designed for nontechnical students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. Mr. Robinson (F,W,Sp)

**7. Developments in Biotechnology.** Lecture, three hours; demonstration, one hour; outside study, eight hours. Recommended (but not requisite): course 6 or Biology 2 or 5. Not open for credit to students with credit for course 101. Survey of recent developments in biotechnology, with emphasis on use of single-celled organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution, cleanup, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading. Mr. Robinson (F,W)

**10. General Microbiology for Nursing Students (5 units).** Lecture, three hours; laboratory, five hours; outside study, eight hours. Enforced requisites: Biology 5, Chemistry 15. Designed for pre-nursing students. Not open for credit to students with credit for course 101; does not substitute for course 101 in the major. Introduction to biology of bacteria and their role in diseases of humans. Mr. Robinson (Sp)

## Upper Division Courses

**101. Fundamentals of Bacteriology (6 units).** Lecture, three hours; laboratory, six hours; outside study, nine hours. Prerequisites: Biology 100A, Chemistry 153A. Recommended: Biology 108. Historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology. Mr. Gunsalus (W)

**102. Introductory Virology (5 units).** Lecture, three hours; laboratory, four hours; outside study, eight hours. Prerequisites: Biology 100A, 108. Recommended: Chemistry 153A. Biological properties of bacterial and animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts. Mr. Berk, Mr. Witte (W)

**C104A. Mammalian Cell as a Microorganism (2 units).** Lecture, three hours; discussion, four hours. Prerequisites: Biology 100A, Chemistry 132A, 132B, 153A. Recommended: Chemistry 153B, 153C. Cultured mammalian cell as an experimental system for study of normal regulatory processes and disease mechanisms. Contents include regulation of cell growth in chemically defined medium; establishment, cloning, and characterization of cell lines, cultured cells as model systems in study of normal growth and development, disease mechanisms and cancer. May be concurrently scheduled with course C204A. P/NP or letter grading. Mr. Fox (F)

**C104B. Mammalian Cell Genetics (2 units).** Lecture, two hours; discussion, two hours. Prerequisites: biochemistry, introductory genetics. Topics include cytogenetics, chromosomal organization and gene mapping, somatic cell mutants and hybrid cells, oncogenes and cancer genetics, mouse genetics, targeted mutagenesis, analysis of simple and complex genetic diseases. Reading material includes reviews and recent original publications. May be concurrently scheduled with course C204B. Mr. Lulis (W)

**C104C. RNA Tumor Viruses (2 units).** Lecture, three hours. Prerequisite: consent of instructor. Interactions of RNA tumor viruses with differentiating tissues, such as immune system and erythroid development. Concurrently scheduled with course C204C. P/NP grading. Mr. Witte (Sp, five weeks)

**C106. Molecular and Genetic Basis of Bacterial Infections.** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Biology 100A. Recommended: Biology 108. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C206. Ms. Miller (W)

**C111. Biology of Prokaryotic Cell.** Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 153C, or consent of instructor. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211. Ms. Wisniewski (Sp)

**C112. Molecular Biology of Bacterial Growth.** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Biology 108, Chemistry 153A, 153L. Analysis of growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other multicomponent cellular systems from perspective of contemporary research techniques. Concurrently scheduled with course C212. Mr. Gunsalus, Mr. Nierlich, Mr. Simons (Sp)

**C119. Microbial Genetics and Molecular Biology (5 units).** Lecture, three hours; discussion, two hours. Prerequisites: Biology 108 and Chemistry 153A, or consent of instructor. Recommended: Chemistry 153B. Integrated, conceptual analysis of classical and modern molecular genetics of microbes, especially bacteria and their viruses, with emphasis on nature of the gene and control of gene expression. Concurrently scheduled with course C219. Mr. Simons (Sp)

**CM156. Human Genetics.** (Same as Biology CM156.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 100A, 108 or equivalent. Strongly recommended: Biology 100B. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256.

Mr. Lusic, Mr. Merriam (F)

**M185A. Immunology (5 units).** (Formerly numbered CM185.) (Same as Biology M185A and Microbiology and Immunology M185A.) Lecture, three hours; discussion, 90 minutes; outside study, 11½ hours. Prerequisites: Biology 9, 100A, 108 or equivalent. Recommended prerequisites or corequisites: Biology 100B, Chemistry 153A, 153L. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cellular immune reactions.

Mr. Clark, Ms. Morrison (F)

**CM185B. Intermediate Immunology.** (Same as Biology CM185B.) Lecture, three hours; discussion, one hour. Prerequisite: course M185A or equivalent. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM285.

Mr. Aguilera, Mr. Kronenberg, Mr. Sercarz (W)

**195. Proseminar (2 units).** Prerequisites: senior standing, consent of instructor. Discussion by small groups of students and instructor on current research literature. Topics vary each year. May be taken only once for credit in the major but may be repeated for University credit.

Mr. Miller (Sp)

**199. Special Studies in Microbiology and Molecular Genetics (2 to 8 units).** Prerequisites: Chemistry 153A, 153L, and junior or senior standing with minimum 3.0 GPA in the premajor and major, or consent of departmental adviser. Individual research project under direct supervision of departmental faculty member. Copy of report describing the research must be filed with Student Affairs Office by end of term. First four units must be taken P/NP; 12 additional units, four of which may be applied toward the major, may be taken for a letter grade.

(F,W,Sp)

**199H. Honors Thesis (4 or 8 units).** Prerequisite: honors program standing. Directed individual research for departmental honors; students must have a faculty sponsor. Three sequential 199H terms required. Progress report must be submitted to faculty sponsor at end of each of the first two terms, with honors thesis submitted at end of final term. Maximum of four units may be applied toward the major, with balance applied toward B.S. degree requirements.

(F,W,Sp)

## Graduate Courses

**C204A. Mammalian Cell as a Microorganism (2 units).** Lecture, three hours; discussion, four hours. Prerequisites: Biology 100A, Chemistry 132A, 132B, 153A. Recommended: Chemistry 153B, 153C. Cultured mammalian cell as an experimental system for study of normal regulatory processes and disease mechanisms. Contents include regulation of cell growth in chemically defined medium; establishment, cloning, and characterization of cell lines, cultured cells as model systems in study of normal growth and development, disease mechanisms and cancer. May be concurrently scheduled with course C104A. S/U or letter grading.

Mr. Fox (F)

**C204B. Mammalian Cell Genetics (2 units).** Lecture, two hours; discussion, two hours. Prerequisites: biochemistry, introductory genetics. Topics include cytogenetics, chromosomal organization and gene mapping, somatic cell mutants and hybrid cells, oncogenes and cancer genetics, mouse genetics, targeted mutagenesis, analysis of simple and complex genetic diseases. Reading material includes reviews and recent original publications. May be concurrently scheduled with course C104B. S/U or letter grading.

Mr. Lusic (W)

**C204C. RNA Tumor Viruses (2 units).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Interactions of RNA tumor viruses with differentiating tissues, such as immune system and erythroid development. Concurrently scheduled with course C104C. Includes additional discussion section for graduate students on research literature and methodology. S/U grading.

Mr. Witte (Sp, five weeks)

**C206. Molecular and Genetic Basis of Bacterial Infections.** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Biology 100A. Recommended: Biology 108. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C106.

Ms. Miller (W)

**C211. Biology of Prokaryotic Cell.** Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 153C, or consent of instructor. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C111. Term paper on research topic selected by each graduate student required.

Ms. Wisniewski (Sp)

**C212. Molecular Biology of Bacterial Growth.** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Biology 108, Chemistry 153A, 153L. Analysis of growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other multicomponent cellular systems from perspective of contemporary research techniques. Concurrently scheduled with course C112.

Mr. Gunsalus, Mr. Nierlich, Mr. Simons (Sp)

**213. Seminar: Unicellular Development (2 units).** Lecture, 30 minutes; discussion, 90 minutes. Prerequisites: course 101 or equivalent, graduate standing or consent of instructor. Background on each of developmental systems in bacillus, myxobacteria, dictyostelium, and streptococcus. Student analysis and discussion of recent publications in each of these areas. S/U or letter grading.

(Sp)

**C219. Microbial Genetics and Molecular Biology (5 units).** Lecture, three hours; discussion, two hours. Prerequisites: Biology 108 and Chemistry 153A, or consent of instructor. Recommended: Chemistry 153B. Integrated, conceptual analysis of classical and modern molecular genetics of microbes, especially bacteria and their viruses, with emphasis on nature of the gene and control of gene expression. Concurrently scheduled with course C119.

Mr. Simons (Sp)

**221. Seminar: Eukaryotic Transcription (2 units).** (Formerly numbered 221X.) Prerequisite: Biological Chemistry CM253 or equivalent. Reading and discussion of current literature in area of transcription regulation in eukaryotes. S/U grading.

Mr. Berk (W)

**M223. Membrane Research Seminar (2 units).** (Same as Microbiology and Immunology M223.) Prerequisite: consent of instructor. Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

Ms. Wisniewski (F,W,Sp)

**M226A-M226B. Principles of Microbial Pathogenesis.** (Same as Biology M226A-M226B and Microbiology and Immunology M226A-M226B.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections.

Mr. Ahmed (Sp, M226B), Mr. Miller (W, M226A)

**M233. Principles, Practices, and Policies in Biotechnology (2 units).** (Same as Biological Chemistry M233, Biology M233, Chemical Engineering M233, Chemistry M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

Mr. Fox, Ms. Morrison (W)

**242. Seminar: Microbial Molecular Genetics (2 units).** (Formerly numbered 256.) Prerequisite: consent of instructor. Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic molecular genetics. Emphasis on nature of the gene and control of gene expression. May be repeated for credit. S/U or letter grading.

Mr. Simons (F,W)

**M246. Computer Analysis of Genetic Organization.** (Same as Biology M246.) Lecture, two hours; laboratory, six hours. Prerequisite: course C119 or Biology 108 or equivalent. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

Mr. Nierlich, Mr. Simpson (F)

**M248. Molecular Genetics.** (Same as Biological Chemistry M248 and Biology M248.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in biochemistry and molecular biology. Topics include mutagenesis, mutant selection, recombination, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.

(Sp)

**250. Seminar: Microbial Metabolism (2 units).** Prerequisite: consent of instructor. Discussion and student presentations of recent work in areas of genetic regulation and physiology of bacterial metabolism.

Mr. Gunsalus (F,W)

**251. Seminar: Regulation and Differentiation (2 units).** S/U grading. Mr. Gunsalus, Mr. Nierlich (F)

**M252. Seminar: Microbial Pathogenesis (2 units).** (Formerly numbered 252.) (Same as Microbiology and Immunology M252.) Prerequisite: consent of instructor. Limited to 10 students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

Mr. Miller, Ms. Miller (F)

**254. Pre-mRNA Processing in Cellular Metabolism and Differentiation (2 units).** Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Reading and discussion of papers dealing with mRNA metabolism and posttranscriptional control of gene expression. From detailed RNA chemistry and autocatalytic reactions to more recently described and less understood systems, topics include RNA catalysis, general splicing and spliceosome assembly, splicing regulation, polyadenylation and three prime end formation, mRNA stability, mRNA transport, RNA editing and modification, and RNA localization. S/U or letter grading.

Mr. Black

**255. Seminar: Microbial Cell Biology (2 units).** Prerequisite: consent of instructor. Student presentations and critical discussion of current literature on various aspects of prokaryotic and eukaryotic cell biology and morphogenesis. May be repeated for credit.

(F)

**CM256. Human Genetics.** (Same as Biology CM256.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 100A, 108 or equivalent. Strongly recommended: Biology 100B. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students.  
Mr. Lusia, Mr. Merriam (F)

**M258A. Molecular Genetic Mechanisms of Immune Response (2 units).** (Same as Biology M258A and Microbiology and Immunology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of immune system, T cell antigen receptor, and loci affecting differentiation. S/U or letter grading.  
Mr. Kronenberg, Mr. Wall (W, five weeks)

**M258B. Biology of B Cells: Development, Repertoire, and Activation (2 units).** (Same as Biology M258B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on B cell development, repertoire, and growth and differentiative regulation. S/U or letter grading.  
Mr. Braun, Mr. Stevens (W, five weeks)

**M258C. T Cells (2 units).** (Same as Biology M258C and Microbiology and Immunology M258C.) Lecture, two hours; discussion, two hours. Prerequisites: course CM185B, Microbiology and Immunology 202A. Reading and discussion of current research articles on molecular and cellular aspects of T cell function, including receptors and activation pathways, memory, tolerance, and specialized subjects and their functions.  
Mr. Clark (Sp, five weeks)

**M258D. Molecular Interactions in Immune Responses (2 units).** (Same as Biology M258D and Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunochemistry of antibodies, antigens, and complement, antigenic recognition, antibody restriction. S/U or letter grading.  
Ms. Morrison (F, five weeks)

**M258E. Immunopathology: Immunology of Disease (2 units).** (Same as Biology M258E and Microbiology and Immunology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.  
Mr. Porter (Sp, five weeks, alternate years)

**M258F. Immune Regulation (2 units).** (Same as Biology M258F and Microbiology and Immunology M258F.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on idiotype networks, suppressor T cells, tolerance at T and B cell levels, and I<sub>r</sub> gene control. S/U or letter grading.  
Mr. Sercarz (F, five weeks)

**M260. Immunology Forum (2 units).** (Same as Microbiology and Immunology M260.) Prerequisite: course M185A. Broad range of current topics in immunology presented and discussed at advanced frontier level. Continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U grading.  
Mr. Braun (F,W,Sp)

**M261. Molecular and Cellular Immunology.** (Same as Biology M261 and Microbiology and Immunology M261.) Lecture, three hours; discussion, one hour. Prerequisite: Biological Chemistry CM253 or consent of instructors. Comprehensive graduate course covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. S/U or letter grading.  
Mr. Kronenberg, Ms. Miceli, Mr. Smale

**M262A. Seminar: Current Topics in Immunobiology of Cancer (2 units).** (Same as Biology M293A and Microbiology and Immunology M262A.) Prerequisite: consent of instructor. Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U grading.  
Mr. Bonavida (F,W,Sp)

**M262B. Immunology of AIDS (2 units).** (Same as Biology M293B, Epidemiology M214, and Microbiology and Immunology M262B.) Lecture, one hour; discussion, one hour. Prerequisites: courses M258B, M258C, Microbiology and Immunology 202A, 202B, 202C, 202D, or equivalent, consent of instructor. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.  
Mr. Bonavida, Ms. Giorgi (W)

**M262C. Biological Individuality and Immunity (2 units).** (Same as Biology M293C and Microbiology and Immunology M262C.) Prerequisite: course M258C. Review of current literature in the field of immunogenetics, with emphasis on fundamental studies involving genetic and immunologic principles and techniques. Selected topics discussed and results interpreted; conclusions and experimental methods evaluated.  
(Sp, alternate years)

**M262D. Selected Topics in Immunology (2 units).** (Same as Biology M293D and Microbiology and Immunology M262D.) Prerequisite: consent of instructor. Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.  
(F,W,Sp)

**M263. Molecular and Cellular Immunology Seminar (2 units).** (Same as Microbiology and Immunology M263.) Prerequisite: consent of instructor. Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.  
Mr. Kronenberg, Mr. Sercarz (F,W,Sp)

**270. Seminar: Molecular Virology (2 units).** Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U grading.  
Mr. Berk (F,W,Sp)

**280. Seminar: Molecular and Cellular Endocrinology (2 units).** Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and cellular endocrinology. S/U grading.  
Mr. Fox (Sp)

**CM285. Intermediate Immunology.** (Formerly numbered CM285B.) (Same as Biology CM285 and Microbiology and Immunology M285.) Lecture, three hours; discussion, one hour. Prerequisite: course M185A or equivalent. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.  
Mr. Aguilera, Mr. Kronenberg, Mr. Sercarz (W)

**290. Seminar: Molecular Genetics (2 units).** Lecture, one hour; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and genetic analysis of cellular gene regulation. S/U grading.  
(F,W,Sp)

**296A-296Z. Seminars: Research Topics in Microbiology and Molecular Genetics (1 to 4 units each).** Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in microbiology and molecular genetics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

**296A.** Eukaryotic Transcription Control. Mr. Berk  
**296B.** Regulation of Pre-mRNA Splicing. Mr. Black

**296D.** *E. coli* Physiological Research. Mr. Gunsalus

**296E.** Archaeobacterial Research. Mr. Gunsalus

**296F.** Molecular Biology of Microbial Diversity. Ms. Hartzell

**296G.** Structure and Function of Membrane Transport Proteins. Mr. Kaback

**296H.** Genetics of Common Diseases. Mr. Lusia

**296J.** Microbial Pathogenesis. Ms. Miller

**296K.** Advanced Topics in Immunology. Ms. Morrison

**296L.** Molecular Biology of Bacterial Growth. Mr. Nierlich

**296M.** Immune Regulation and Autoimmune Disease. Mr. Sercarz

**296N.** RNA and Protein Structure and Function. Mr. Simons

**296O.** Cell Growth and Signal Transduction. Mr. Tamanoi

**296P.** Bacterial Toxins and Human Cytokines. Ms. Wlasienski

**296Q.** Mechanisms of Hematopoietic Development. Mr. Witte

**M298. Seminar: Current Topics in Molecular Biology (2 units).** (Same as Biological Chemistry M298, Biology M298, Chemistry M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.  
(F,W,Sp)

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Microbiology in Higher Education (2 units).** Lecture/discussion/laboratory. Prerequisites: graduate standing, consent of instructor. Study of problems and methodologies in teaching microbiology, including workshops, seminars, apprentice teaching, and peer observation. S/U or letter grading.  
Mr. Nierlich (W)

**596. Directed Individual Research (2 to 12 units).**

**598. Research for M.A. Thesis (2 to 12 units).**

**599. Research for Ph.D. Dissertation (2 to 12 units).**

## Molecular Biology (Interdepartmental)

168 Molecular Biology Institute,  
(310) 825-1018

### Professors

Arnold J. Berk, M.D. (*Microbiology and Molecular Genetics*)  
Clifford F. Brunk, Ph.D. (*Biology*)  
William R. Clark, Ph.D. (*Biology/Immunology*)  
Steven G. Clarke, Ph.D. (*Biochemistry*)

Asim Dasgupta, Ph.D. (*Microbiology and Immunology*)  
 Edward M.F. De Robertis, M.D., Ph.D. (*Biological Chemistry*)  
 Richard E. Dickerson, Ph.D. (*Biochemistry, Geophysics*), Director  
 Peter A. Edwards, Ph.D. (*Biological Chemistry*)  
 David S. Eisenberg, D.Phil. (*Physical Chemistry, Molecular Biology; Distinguished Teaching Award*)  
 Frederick A. Eiserling, Ph.D. (*Microbiology and Molecular Genetics*)  
 Juli F. Feigon, Ph.D. (*Biochemistry*)  
 John H. Fessler, Ph.D. (*Biology, Molecular Biology*)  
 C. Fred Fox, Ph.D. (*Microbiology and Molecular Genetics, Molecular Biology*)  
 Armand J. Fulco, Ph.D. (*Biological Chemistry*)  
 Judith C. Gasson, Ph.D. (*Biological Chemistry, Medicine*)  
 Dohn G. Glitz, Ph.D. (*Biological Chemistry*)  
 Robert B. Goldberg, Ph.D. (*Biology; Luckman Distinguished Teaching Award*)  
 Jay D. Gralla, Ph.D. (*Biochemistry*)  
 Michael Grunstein, Ph.D. (*Biology, Molecular Biology*)  
 Robert P. Gunsalus, Ph.D. (*Microbiology and Molecular Genetics*)  
 Oliver Hankinson, Ph.D., in Residence (*Pathology and Laboratory Medicine*)  
 Harvey R. Herschman, Ph.D. (*Biological Chemistry*)  
 Ann M. Hirsch, Ph.D. (*Biology*)  
 Wayne L. Hubbell, Ph.D. (*Ophthalmology, Biochemistry*)  
 H. Ronald Kaback, M.D. (*Physiology*)  
 Harumi Kasamatsu, Ph.D. (*Biology*)  
 James A. Lake, Ph.D. (*Biology, Molecular Biology*)  
 Judith A. Lengyel, Ph.D. (*Biology*)  
 Aldons J. Lysis, Ph.D., in Residence (*Medicine, Microbiology and Molecular Genetics*)  
 Kevin McEntee, Ph.D. (*Biological Chemistry*)  
 David I. Meyer, Ph.D. (*Biological Chemistry*)  
 Jeffrey H. Miller, Ph.D. (*Microbiology and Molecular Genetics*)  
 Sherie L. Morrison, Ph.D. (*Microbiology and Molecular Genetics*)  
 Elizabeth F. Neufeld, Ph.D. (*Biological Chemistry*)  
 Donald P. Nierlich, Ph.D. (*Microbiology and Molecular Genetics*)  
 Dan S. Ray, Ph.D. (*Biology, Molecular Biology*)  
 Emil Reisler, Ph.D. (*Biochemistry, Molecular Biology*)  
 Leonard H. Rome, Ph.D. (*Biological Chemistry*)  
 Bruce N. Runnegar, Ph.D. (*Earth and Space Sciences*)  
 Winston A. Salsler, Ph.D. (*Biology, Molecular Biology*)  
 J. William Schopf, Ph.D. (*Earth and Space Sciences*)  
 Verne N. Schumaker, Ph.D. (*Biochemistry, Molecular Biology; Distinguished Teaching Award*)  
 David S. Sigman, Ph.D. (*Biological Chemistry*)  
 Larry Simpson, Ph.D. (*Biology*)  
 J. Philip Thornber, Ph.D. (*Biology, Molecular Biology*)  
 Allan J. Tobin, Ph.D. (*Biology*)  
 Elaine M. Tobin, Ph.D. (*Biology*)  
 Joan S. Valentine, Ph.D. (*Inorganic Chemistry and Biochemistry*)  
 Randolph Wall, Ph.D. (*Microbiology and Immunology*)  
 Richard L. Weiss, Ph.D. (*Biochemistry*)  
 Charles A. West, Ph.D. (*Biochemistry; Distinguished Teaching Award*)  
 Felix O. Wettstein, Ph.D. (*Microbiology and Immunology*)  
 Bernadine J. Wisnieski, Ph.D. (*Microbiology and Molecular Genetics*)  
 Owen N. Witte, M.D. (*Microbiology and Molecular Genetics*)  
 S. Larry Zipursky, Ph.D. (*Biological Chemistry*)  
 Daniel E. Atkinson, Ph.D., Emeritus (*Biochemistry*)  
 Marcel A. Baluda, Ph.D., Emeritus (*Pathology and Laboratory Medicine*)  
 Paul D. Boyer, Ph.D., Emeritus (*Biochemistry*)  
 Irving Zabin, Ph.D., Emeritus (*Biological Chemistry*)

#### Associate Professors

Jonathan Braun, M.D., Ph.D. (*Pathology and Laboratory Medicine*)  
 David A. Campbell, Ph.D. (*Microbiology and Immunology*)  
 Lawrence T. Feldman, Ph.D. (*Microbiology and Immunology*)

Reid C. Johnson, Ph.D. (*Biological Chemistry*)  
 Mitchell Kronenberg, Ph.D. (*Microbiology and Immunology*)  
 Charles R. Marshall, Ph.D. (*Earth and Space Sciences*)  
 Sabeeha Merchant, Ph.D. (*Biochemistry*)  
 Diane M. Papazian, Ph.D. (*Physiology*)  
 Gregory S. Payne, Ph.D. (*Biological Chemistry*)  
 Robert W. Simons, Ph.D. (*Microbiology and Molecular Genetics*)  
 Fuyuhiko Tamaoni, Ph.D. (*Microbiology and Molecular Genetics*)

#### Assistant Professors

Renato J. Aguilera, Ph.D. (*Biology*)  
 Utpal Banerjee, Ph.D. (*Biology*)  
 Douglas L. Black, Ph.D. (*Microbiology and Molecular Genetics*)  
 James U. Bowie, Ph.D. (*Biochemistry*)  
 Michael F. Carey, Ph.D. (*Biological Chemistry*)  
 John J. Colicelli, Ph.D., in Residence (*Biological Chemistry*)  
 Albert J. Courey, Ph.D. (*Biochemistry*)  
 Christopher T. Denny, M.D. (*Pediatrics*)  
 Robert H. Edwards, M.D. (*Neurology*)  
 Jeanne M. Erickson, Ph.D. (*Biology*)  
 James W. Goyer, Ph.D. (*Biochemistry*)  
 Patricia J. Johnson, Ph.D. (*Microbiology and Immunology*)  
 Frank A. Laski, Ph.D. (*Biology*)  
 Jorge R. Mancillas, Ph.D. (*Anatomy and Cell Biology*)  
 Jeffrey F. Miller, Ph.D. (*Microbiology and Immunology*)  
 Virginia L. Miller, Ph.D. (*Microbiology and Molecular Genetics*)  
 Charles L. Sawyers, M.D. (*Medicine/Hematology-Oncology*)  
 Olaf Schneewind, M.D. (*Microbiology and Immunology*)  
 Karambir Singh, Ph.D. (*Biology*)  
 Stephen T. Smale, Ph.D. (*Microbiology and Immunology*)  
 Alexander van der Bliek, Ph.D. (*Biological Chemistry*)  
 Geraldine A. Weinmaster, Ph.D. (*Biological Chemistry*)  
 Todd O. Yeates, Ph.D. (*Biochemistry*)

### Scope and Objectives

The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are from participating departments and from the Molecular Biology Institute. Areas for study include cell biology; developmental biology and neurobiology; DNA replication, repair, and recombination; gene regulation; immunobiology; microbiology/virology; molecular evolution and paleobiology; oncogenes and signal transduction; plant molecular biology; protein structure and function; and structural biology.

### Ph.D. Degree

#### Admission

Admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280.

Under special circumstances, new Ph.D. students may be admitted directly to the program, in which case the following criteria apply. Recommended undergraduate training for the Ph.D. program includes a major in a biological or physical science. Coursework should include mathematics through calculus, one year of gen-

eral and organic chemistry, one year of physics, two terms of physical chemistry based on the use of calculus, and one year of biology. Undergraduate requirements may be modified for qualified candidates with interests in certain areas. Candidates who enter the program with course deficiencies are expected to fulfill these early in the graduate program.

Only superior students are admitted, and in addition to the application, transcripts, and statement of purpose, three letters of recommendation are required along with Graduate Record Examination (GRE) scores.

### Course Requirements

The usual program is two regular courses per term in addition to laboratory research, or the equivalent of 12 quarter units of upper division or graduate work. Five terms of Molecular Biology M298 and one term each of Biological Chemistry M248, CM253, and CM267 are required.

### Teaching Experience

Two terms of teaching experience are required for the degree.

### Qualifying Examinations

Examinations are given in Molecular Biology M298, and four must be passed before advancement to candidacy. The first proposal should be submitted by the third week of the Summer Quarter. The University Oral Qualifying Examination on original research proposed by the candidate independently of the Ph.D. adviser and on a topic distinct and separate from the thesis research is held usually during the second year in the program. A "midstream seminar" must be presented during the third year in the program.

### Final Oral Examination

The final oral examination is required of all students for the degree.

### Graduate Course

**M298. Seminar: Current Topics in Molecular Biology (2 units).** (Same as Biological Chemistry M298, Biology M298, Chemistry M298, Microbiology M298, and Microbiology and Immunology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

### Related Courses in Other Departments

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the guidance committee or research supervisor, other related courses may be included in the program.

**Biological Chemistry** M221, M248, CM253, M255, M263, M264A-M264B-M264C, M266A-M266B-M266C, CM267, M298

**Biology** 228, M230B, M230D, 234, M248, 257A, 294, M298

**Chemistry and Biochemistry** M230B, M230D, CM253, M263, M264A-M264B-M264C, M267, M298  
**Microbiology and Immunology** 250, M256, M258A, M258B, M260, M262A, M262B, M263, 264, M298  
**Microbiology and Molecular Genetics** 242, M248, 250, 251, M260, M263, 290, M298

## Musicology

2449 Schoenberg Hall, (310) 206-5187

### Professors

Murray C. Bradshaw, Ph.D., *Chair*  
 Malcolm S. Cole, Ph.D.  
 Marie Louise Göllner, Ph.D.  
 Susan McClary, Ph.D.  
 Gilbert Reaney, M.A.  
 Robert M. Stevenson, Ph.D.  
 Frank A. D'Accone, Ph.D., *Emeritus*  
 Edwin H. Hanley, Ph.D., *Emeritus*  
 Richard A. Hudson, Ph.D., *Emeritus*  
 W. Thomas Marrocco, Ph.D., *Emeritus*  
 Robert U. Nelson, Ph.D., *Emeritus*  
 Robert L. Tusler, Ph.D., *Emeritus*

### Assistant Professors

Raymond Knapp, Ph.D.  
 Harris S. Saunders, Ph.D.  
 Robert Walser, Ph.D.

## Scope and Objectives

The Department of Musicology provides students with a broad understanding of the history and literature of the art music of Europe and the Americas and of its place in the development of Western culture. Courses cover virtually every period, style, and genre as well as particular areas of popular music and jazz which have influenced or been influenced by Western art music. Musicology will appeal to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. The graduate program provides students with a strong foundation that will enable them to pursue careers in teaching and research.

The undergraduate program prepares students for graduate programs in music and related fields and provides them with sufficient background to teach in secondary schools after obtaining the necessary credentials in education. With its focused requirement of study in an area outside music, the program also offers training within the broader context of the humanities. Depending on your particular interests and career goals, you may select courses in the arts, literature, history and society, philosophy, and religion; these may be concentrated within such fields as Afro-American, American Indian, Asian American, Chicana and Chicano, and women's studies. If you wish to participate in performance at UCLA, you are encouraged to do so.

The graduate program offers courses leading to the M.A. and Ph.D. degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department provides teaching and research assistantships each year for all qualified students.

## Bachelor of Arts Degree

### Admission

All applicants for admission and change of major must demonstrate proficiency in vocal or instrumental performance at the intermediate level. This requirement may be satisfied by completing a required prerequisite course with a grade of B or better or by passing an individual audition with a departmental faculty committee. If you are a junior transfer student, you are required to pass an audition with the departmental faculty admissions committee before you can be admitted to the program.

### Preparation for the Major

**Required:** Musicology 1A-1B, 26A-26B-26C, 28A-28B-28C, Music 4A, 20A, 20B, 20C, and six units (three terms) of performance organizations selected from Ethnomusicology and Systematic Musicology 91D, 91F, 91H, 91K, 91P or Music 90A, 90B, 90E, 90F, 90G.

### The Major

**Required:** Musicology 126A-126B-126C, four courses from 122, C127A through C127F, 130, 156, 188A through 188F; two courses (each in a different geographical or cultural area) from Ethnomusicology and Systematic Musicology 106A, 106B, 106C, 108A, 108B, M110A, M110B, 136A, 136B, 146, 147, 156A, 156B, 157, 160A, 160B; four courses in one area of concentration (arts, literature, history and society, or philosophy and religion) within which you may focus on a more specialized field such as Afro-American, American Indian, Asian American, Chicana and Chicano, and women's studies. A list of approved courses is available in the department office.

## Master of Arts Degree

### Admission

Applicants for the M.A. must have completed a Bachelor of Arts degree, or the equivalent, in Music or Music History. Other fields of study are accepted if you have the musical training and musicianship necessary to pursue graduate work. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants for the Ph.D. must have completed a Master of Arts degree (or an equivalent de-

gree) in Music. See "Admission" under the Ph.D. degree for more information.

Applicants for both degrees (M.A. and Ph.D.) are also required to (1) take a departmental assessment examination (details are automatically sent after the application has been received), (2) submit a letter describing their background of study and stating their reasons for wishing to pursue graduate studies in musicology, (3) submit three letters of recommendation from former instructors and/or professionals with whom they have worked, and (4) submit one or two papers dealing with a topic in music history. Ph.D. applicants should submit the M.A. thesis if possible.

No application can be considered until the examination has been taken and all of the above materials have been received. Letters of inquiry and applications must be submitted to Mary Crawford, Graduate Adviser, 1642B Schoenberg Hall Annex, UCLA, Los Angeles, CA 90024-1616.

### Foreign Language Requirement

Reading knowledge of German and a choice of French, Italian, Latin, or Spanish is required.

### Course Requirements

You are required to complete a minimum of nine courses (52 units), including Musicology 200A, 210, 211, three courses from 201A through 201F, two courses from 260A through 260F, and one elective from other 200-series courses within the department or, with approval of the graduate adviser, an upper division or graduate course from outside the department. No more than six units of 500-series courses may be applied toward degree requirements.

Course 598 serves to guide the preparation of the thesis and should normally be taken during your last term in residence.

### Thesis Plan

The thesis is an extended essay on a topic approved by the department.

### Final Examination

The final examination is oral and includes discussion of both the thesis and related matters.

## Ph.D. Degree

### Admission

Applicants for the Ph.D. must have completed a Master of Arts degree (or an equivalent degree) in Music, which normally will have been taken in musicology or music history. Otherwise additional coursework, as prescribed by the department, must be completed. See "Admission" under the M.A. degree for information regarding the departmental assessment examination and other admission requirements.

### Foreign Language Requirement

Reading knowledge of German and two other languages (French, Italian, Latin, Spanish, or another language approved by the department) is required. If you lack this proficiency

when you enter the program, you must begin language study during your first year in residence.

### Course Requirements

If you received an M.A. in Musicology from UCLA, you must take a minimum of six courses, including three additional terms of Musicology 201A through 201F, two courses from 250A, 250B, 256, 260A through 260F, and an elective selected with approval of the graduate adviser. If you did not receive the M.A. in Musicology from UCLA, you may be required, in consultation with the graduate adviser, to take other relevant and necessary courses beyond the six specified. Courses 495, 596, 597, and 599 may be taken for credit but may not be applied toward the degree requirements.

### Qualifying Examinations

The five departmental written examinations are spread over a two-week period and must be completed within three weeks. With your guidance committee's recommendation, you may be reexamined on any failed parts twice within a six-month period. When you successfully complete the written examinations, the two-hour departmental oral examination can be scheduled. After passing this oral examination, you may submit your dissertation prospectus and request for a doctoral committee; this committee administers the University Oral Qualifying Examination.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Dissertation/Final Oral Examination

The dissertation is an extended monograph supervised by your doctoral committee. A final oral examination, which is a defense of your dissertation, is required by the department.

### Lower Division Courses

**1A-1B. Introduction to Musicology.** Introduction to principles, problems, and methods of musical historiography through examination of selected issues and concepts. Mr. Saunders (F,W)

**2A-2B. Introduction to the Literature of Music.** Lecture, four hours; laboratory, one hour. Limited to undergraduate students. Course 2A is not requisite to 2B. Designed for nonmusic majors. **2A.** Technical and formal principles of music literature through the mid-18th century. **2B.** Music literature from the mid-18th century to the present. Mr. Cole (F,W)

**6GA-6GB. Musicianship for Musicology Graduate Students (2 units each).** (Formerly numbered Music 6GA-6GB.) Seminar/laboratory, three hours. Designed to help entering graduate students remedy entrance deficiencies. S/U grading. Mr. Bradshaw, Mr. Cole

**13. 20th-Century Music of the Western World.** Survey of main trends in 20th-century music, with emphasis on representative works from avant-garde, mainstream, and popular traditions. Mr. Saunders, Ms. McClary

**26A-26B-26C. History and Analysis of Music I.** Lecture, four hours; laboratory, one hour. Enforced requisite: Music 20C. Course 26A is enforced requisite to 26B, which is enforced requisite to 26C. History and literature of music from beginning of the Christian era to 1750, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition. Ms. Göllner, Mr. Reaney

**28A-28B-28C. Early Music Laboratory (2 units each).** Laboratory, three hours. Enforced corequisite: course 26A or 26B or 26C. Practical laboratory in which students perform music of various periods, as correlated with courses 26A-26B-26C. Mr. Bradshaw, Ms. Göllner

### Upper Division Courses

**122. Studies in History of Musical Thought.** Prerequisite: consent of instructor. Alternative conceptions of music from early 18th century to about 1800, with emphasis on its nature as a medium of expression to its nature as a primarily formal or abstract art form. Mr. Cole, Mr. Saunders (W,Sp)

**126A-126B-126C. History and Analysis of Music II.** Lecture, four hours; laboratory, one hour. Prerequisites: courses 26A-26B-26C, Music 20A, 20B, and 20C, or consent of instructor. Course 126A is prerequisite to 126B, which is prerequisite to 126C. History and literature of music from 1750 to the present, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition. Mr. Knapp, Mr. Winter

**C127A-C127F. Selected Topics in History of Music.** Discussion, three hours. Prerequisites to all courses: courses 1A-1B, 26A-26B-26C, Music 20A, 20B, 20C; in addition, 126A is prerequisite to C127D, 126B is prerequisite to C127E, and 126C is prerequisite to C127F. Designed as proseminars for undergraduates in preparation for graduate work. Special aspects of music of each period studied in depth. May be concurrently scheduled with courses C227A-C227F. **C127A.** Middle Ages; **C127B.** Renaissance; **C127C.** Baroque; **C127D.** Classic; **C127E.** Romantic; **C127F.** 20th Century. Mr. Bradshaw, Mr. Reaney

**130. Music of the U.S.** Prerequisite: consent of instructor. Survey of art music in the U.S. from Colonial times to the present. Mr. Stevenson

**133. Bach.** Lecture, two hours; laboratory, two hours. Prerequisite: undergraduate standing. Life and works of Johann Sebastian Bach. Mr. Bradshaw

**134. Beethoven.** Lecture, two hours; laboratory, two hours. Prerequisite: undergraduate standing. Life and works of Ludwig van Beethoven. Mr. Knapp

**135A-135B-135C. History of Opera.** Lecture, four hours; laboratory, one hour. Prerequisite: undergraduate standing. **135A.** Opera of Baroque and Classical Periods; **135B.** Opera of Romantic Period; **135C.** Opera of the 20th Century. Mr. Saunders

**139. History and Literature of Church Music.** Prerequisite: consent of instructor. Study of forms and liturgies of Western church music. Mr. Cole (F,Sp)

**156. Studies in Musical Genres.** Prerequisite: consent of instructor. Survey of musical genres, with emphasis on analysis of structural organization. Mr. Cole (Sp)

**188A-188F. The Master Composer.** Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Survey of works of an outstanding composer in Western art music, considered within context of his age. **188A.** Middle Ages; **188B.** Renaissance; **188C.** Baroque; **188D.** Classic; **188E.** Romantic; **188F.** 20th Century. Mr. Stevenson

**189. The Symphony.** Lecture, three hours; laboratory, one hour. Prerequisite: undergraduate standing. Survey of symphonic literature from Haydn through the 20th century. Mr. Bradshaw (W)

**199. Special Studies in Musicology (2 or 4 units).** Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in musicology resulting in a research project. May be repeated for a maximum of eight units.

### Graduate Courses

**200A. Research Methods and Bibliography (6 units).** (Formerly numbered Music 200A.) Lecture, three hours. Prerequisite: graduate standing in musicology. Survey of general bibliographic material in music. Mr. Cole, Mr. Saunders

**201A-201F. Current Research Problems in Historical Musicology (6 units each).** (Formerly numbered Music 201A-201F.) Discussion, three hours. Prerequisite: graduate standing in musicology. Investigation at graduate level of central questions and problems in history of Western music designed to give beginning graduate students a unified background for remainder of their studies and to employ their developing skills in research and bibliography. **201A.** Medieval; **201B.** Renaissance; **201C.** Baroque; **201D.** Classic; **201E.** Romantic; **201F.** 20th Century. Mr. Cole, Mr. Knapp

**202. Selected Topics in History of Western Music (4 or 6 units).** Lecture, three hours. Prerequisite: course 200A or consent of instructor. Designed for graduate students in areas other than musicology who are preparing for qualifying examinations. Systematic review of major stylistic trends in history of Western music from medieval times to the present through formal analysis and readings in contemporary and modern theoretical writings. May be repeated for a maximum of 12 units. Mr. Bradshaw, Mr. Cole

**210. Medieval Notation (6 units).** (Formerly numbered Music 210.) Lecture, three hours. Prerequisite: consent of instructor. Vocal and instrumental notation; paleography of the period. Ms. Göllner

**211. Renaissance Notation (6 units).** (Formerly numbered Music 211.) Lecture, three hours. Prerequisite: consent of instructor. Vocal and instrumental notation; paleography of the period.

**C227A-C227F. Selected Topics in History of Music.** (Formerly numbered Music C227A-C227F.) Discussion, three hours. Prerequisite: graduate standing. Special aspects of music of each period studied in depth. Each course may be repeated once for credit. May be concurrently scheduled with courses C127A-C127F. Additional assignments, as well as evidence of greater depth of study, required of graduate students. **C227A.** Middle Ages; **C227B.** Renaissance; **C227C.** Baroque; **C227D.** Classic; **C227E.** Romantic; **C227F.** 20th Century. Mr. Bradshaw, Mr. Reaney

**250A-250B. Seminars: History of Music Theory (6 units each).** (Formerly numbered Music 250A-250B.) Lecture, three hours. Prerequisite: course 200A. Course 250A is not prerequisite to 250B. **250A.** Investigation of principal theoretical writings concerning music from antiquity through Zarlino. **250B.** Investigation of principal theoretical writings concerning music from Rameau to the present. Ms. Göllner, Mr. Reaney

**256. Seminar: Musical Form (6 units).** (Formerly numbered Music 256.) Lecture, three hours. Prerequisites: courses 126A-126B-126C. Analysis of structural organizations in music. Specific topics vary from year to year. Mr. Cole

**257. Seminar: Music of the U.S. and Canada.** (Formerly numbered Music 257.) Discussion, three hours. Prerequisite: course 130. Examination of principal figures and trends in North American music since the 18th century. Topics vary from year to year. Mr. Cole, Mr. Stevenson

**260A-260F. Seminars: Historical Musicology (6 units each).** (Formerly numbered Music 260A-260F.) Lecture, three hours. Prerequisites: courses 200A, 201A-201B-201C, and 210 or 211 (either may be taken concurrently). Specific topics vary from year to year. May be repeated for credit. **260A.** Medieval; **260B.** Renaissance; **260C.** Baroque; **260D.** Classic; **260E.** Romantic; **260F.** 20th Century. Mr. Bradshaw, Mr. Reaney

**261A-261F. Problems in Performance Practices.** Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. Mr. Bradshaw, Mr. Cole

**262. Contemporary Popular Music Studies.** Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Critical exploration of methodologies of interdisciplinary field of popular music studies. Analysis of how music, lyrics, and visual images produce meanings within contexts shaped by mass mediation, capitalism, and political realities of gender, class, and race. Mr. Walsler

**269. Seminar: History of European Instruments.** (Formerly numbered Music 269.) Discussion, three hours. Investigation of origins and development of principal families of instruments used in European music since the Middle Ages. Topics vary from year to year. Ms. Göllner, Mr. Stevenson

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Introductory Practicum for Teaching Apprentices in Musicology (2 units).** Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Music or Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

**596. Directed Individual Studies in Musicology (2, 4, or 6 units).** Prerequisites: graduate standing, consent of instructor. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units).** Prerequisites: graduate standing, completion of all M.A. or Ph.D. course and language requirements. S/U grading.

**598. Guidance of M.A. Thesis (4, 8, or 12 units).** Prerequisites: graduate standing, completion of all M.A. degree requirements (except thesis). S/U grading.

**599. Guidance of Ph.D. Dissertation (4, 8, or 12 units).** Prerequisites: graduate standing, advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

## Near Eastern Languages and Cultures

376 Kinsey Hall, (310) 825-4165

### Professors

Arnold J. Band, Ph.D. (*Hebrew; Distinguished Teaching Award*)  
Andras Bodrogligeti, Ph.D. (*Turkic, Iranian*)  
Elizabeth Carter, Ph.D. (*Near Eastern Archaeology*)  
Herbert A. Davidson, Ph.D. (*Hebrew*)  
Lev Hakak, Ph.D. (*Hebrew*)  
Antonio Loprieno, Dr.phil.habil. (*Egyptology*), Chair  
Ismail Poonawala, Ph.D. (*Arabic*)  
Yona Sabar, Ph.D. (*Hebrew*)  
Hanns-Peter Schmidt, Ph.D. (*Indo-Iranian*)

### Professors Emeriti

Amin Banani, Ph.D.  
Seeger A. Bonebakker, Ph.D.  
Giorgio Buccellati, Ph.D.  
Wolf Leslau, Docteur ès Lettres  
Thomas Penchoen, Ph.D.  
Moshe Perlmann, Ph.D.  
Avedis K. Sanjian, Ph.D.  
Stanislav Segert, Ph.D.

### Assistant Professors

Daniel C. Polz, Ph.D. (*Egyptian Archaeology and History*)  
William Schneidewind, Ph.D. (*Biblical Studies and Northwest Semitics*)  
Hossein Ziai, Ph.D. (*Iranian and Islamic Studies*)

### Lecturers

Nancy Ezer, Ph.D. (*Hebrew*)  
Michael Fishbein, Ph.D. (*Arabic*)  
Latifeh Hagigi, M.A. (*Iranian*)  
Ralph Jaeckel, Ph.D. (*Turkic*)  
Thomas Ritter, Dr.phil. (*Egyptology*)

## Scope and Objectives

The mission of the department is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area which was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in ancient Near Eastern civilizations, Arabic, Hebrew, Iranian studies, and Jewish studies. Master's and Ph.D. programs are offered in ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

## Undergraduate Study

The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields you must meet the prerequisites and take the courses prescribed. Your adviser assists in selecting a plan of study developed around your interests.

You may combine your major with one in another department (double major) to enhance your educational opportunities. Due to the number of additional courses required, you are advised to consider this option early in your academic career and in consultation with program advisers in both majors.

## Bachelor of Arts in Ancient Near Eastern Civilizations

There are four options for a major in ancient Near Eastern civilizations: (1) Mesopotamia, (2) Egypt, (3) Syria/Palestine, and (4) biblical studies.

### Preparation for the Major

Prerequisites for options 1 and 2 are German 1 and 2; prerequisites for options 3 and 4 are Greek 1, 2, Hebrew 1A-1B-1C, 102A-102B-102C. Majors in all four fields are expected to continue their study of German or Greek beyond the prerequisite levels.

### The Major

Majors in all four options are required to take 14 courses selected in consultation with the program adviser.

Majors selecting options 1, 2, and 3 are required to take four language courses as follows: *option 1* — Semitics 140A-140B, 141, 142; *option 2* — Ancient Near East 120A-120B-120C, 121A; *option 3* — Semitics 130 and three terms of Hebrew 120. The remaining 10 courses for all three options are to be selected from the following: three literature courses from Ancient Near East 150A, 150B, 150C, Jewish Studies M150A; three courses in history and religion from Ancient Near East M104A, M104B, M105, 130, 170, History M191A, 193D, M203A, Iranian 169, 170; three courses in archaeology and art from Ancient Near East 160A, 160B, 161A, 161B, 161C, 162, Art History 101A, 101B; one course in research methodology (such as Anthropology C115R, M116Q, or Linguistics 120A, 120B, or English 140A) taken preferably in another department with the consent of the adviser.

Majors selecting option 4 are required to take 14 courses as follows: three terms of Hebrew 120; Ancient Near East 150C, 162, 170; English 108B or History 194A; Greek 130; Jewish Studies M150A; History M191A; Semitics 130. The remaining three courses may be selected from Ancient Near East M104A, M104B, M105, 130, 150A, 150B, 160A, 160B, Art History 101A, 101B, 105A, Classics 168, Greek 131, History 193D, 194B, Iranian 169, 170, Latin 120.

## Bachelor of Arts in Arabic

Students majoring in Arabic may combine the major with the interdepartmental specialization in business and administration to enhance their career opportunities. Due to the number of additional courses required, you are advised to consider this option early in your academic career.

### Preparation for the Major

*Required:* Arabic 1A-1B-1C, 102A-102B-102C, 150A-150B.

### The Major

*Required:* Fifteen courses, including Arabic 103A-103B-103C and History 107A or Islamics 110; five courses from Arabic 120, 130,

132, 141; three courses from Arabic 111A, 111B, 111C, 112A, 112B, 112C, 114A, 114B, 114C; three courses from Art History 104A, Geography 187, History 106A, 106B, 106C, 107B, 108A, 108B, Political Science 132A, 132B, 164.

## Bachelor of Arts in Hebrew

### Preparation for the Major

*Required:* Hebrew 1A-1B-1C, 102A-102B-102C, Jewish Studies M150A-150B, or equivalent.

### The Major

*Required:* Sixteen courses, including Hebrew 103A-103B-103C; three terms of Hebrew 120 and/or 125; two courses from Hebrew 130, 135; two courses from Hebrew 140, 160; Hebrew 190A-190B; two additional courses in Hebrew or Aramaic to be approved by the adviser; two courses from History M191A, M191B, M192A, M192B.

## Bachelor of Arts in Iranian Studies

Students majoring in Iranian studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, you are advised to consider this option early in your academic career.

### Preparation for the Major

*Required:* Iranian 1A-1B-1C or equivalent, 150A-150B.

### The Major

*Required:* Sixteen courses, including Iranian 102A-102B-102C, 103A-103B-103C, 140, 141, 142, 180A-180B; five courses from Ancient Near East 163A, 163B, Arabic 1A, 1B, 1C, Art History 104A, 104B, C104C, Ethnomusicology and Systematic Musicology 20B, History 106A, 106B, 106C, 110B, Iranian 120, 169, 170, 190A, 190B, Political Science 164.

## Bachelor of Arts in Jewish Studies

### Preparation for the Major

*Required:* Hebrew 1A-1B-1C, History M191A-M191B, or equivalent.

### The Major

*Required:* Sixteen courses, including Hebrew 102A-102B-102C, 103A-103B-103C, 120 or 125, Jewish Studies M150A-150B, 151A-151B, 199, and four other upper division courses. At least two of the four must be courses in the areas of Hebrew, Jewish history, or Yiddish. The remaining two may be selected either from those areas or from courses with Jewish content given in other departments and approved by the adviser.

## Master of Arts Degree

### Admission

In addition to the regular University requirements, a bachelor's degree or its equivalent in the language area selected for the degree, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required. The GRE must be taken within 24 months prior to receipt of your admission application by the department. As a rule, you are not admitted if your grade-point average is below 3.25 or if your GRE score is below 1,600. Prospective students may write to the Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA, Los Angeles, CA 90024-1511.

You are assigned an adviser after being admitted. Subsequently, an examining committee is established to administer the comprehensive examination.

### Major Fields or Subdisciplines

Ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

You may concentrate on either language or literature in your selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

### Foreign Language Requirement

You are required to pass an examination in one major modern European language other than English by the beginning of your fourth term in residence. The choice of the language is determined in consultation with your adviser. You may satisfy this requirement by one of the following methods: (1) Graduate School Foreign Language Test (GSFLT) with a minimum score of 550, (2) departmentally administered examination, (3) two years of language instruction at a UC campus, with grades of B or better. It is strongly recommended that if you intend to continue toward a Ph.D. degree, you acquire knowledge of a second major European language other than English while still a candidate for the M.A. degree.

### Course Requirements

A minimum of nine upper division and graduate courses is required, at least six of which must be at the graduate level. All candidates are required to take one term of Near Eastern Languages 200.

In general, if you select either the language, literature, or archaeology option, you are required to study two Near Eastern languages, one of which is considered the major language. Students in Semitics or in Old Iranian study three languages.

In ancient Near Eastern civilizations, you may select as your major language any of the following: ancient Egyptian (including Coptic), Akkadian, Aramaic (including Syriac), Hebrew (with Ugaritic and Phoenician), or Old Persian. For your second language, you may select any of the above or Hittite or Sumerian.

Students in Hebrew must select Hebrew and another Semitic language. In Turkic, you may select either two Turkic languages or Turkish and a second culturally related language. In Arabic, Armenian, and Iranian (modern), you select a major language and a second culturally related language.

Students in Semitics are required to study three Near Eastern languages, at least two of which should be Semitic (the third may be Hittite or Sumerian). In Old Iranian, you study Persian, Sanskrit, and Old and Middle Iranian.

Twelve units of course 596 may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

### Comprehensive Examination Plan

In general, you are required to take written comprehensive final examinations in your major and minor languages, as well as in the history and literature of your major field. Further details are available in the departmental *Guide to Graduate Studies*.

## Ph.D. Degree

### Admission

In addition to the regular University requirements, an M.A. or equivalent in your field, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required. The GRE must be taken within 24 months prior to receipt of your admission application by the department. As a rule, you are not admitted if your grade-point average is below 3.25 or if your GRE score is below 1,600. Prospective students may write to the Department of Near Eastern Languages and Cultures, 376 Kinsey Hall, UCLA, Los Angeles, CA 90024-1511.

The M.A. program need not have been completed at UCLA. You are assigned an adviser after being admitted. Subsequently, an examining committee is established to administer the qualifying examinations.

### Major Fields or Subdisciplines

Ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

You may concentrate on either language or literature in your selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

### Foreign Language Requirement

Two modern major European languages other than English are required. The choice of languages must be approved by the adviser, who may also require additional language skills in modern and/or ancient languages if such skills are needed for scholarly work in the area of your interests.

The requirement is fulfilled by one of the following methods: (1) Graduate School Foreign Language Test (GSFLT) with a minimum score

of 550, (2) departmentally administered examination, (3) two years of language instruction at a UC campus, with grades of B or better.

You are expected to pass one of the two required European languages at the beginning of your first term in residence and the second language no later than the beginning of your fourth term.

### Course Requirements

If you select the language emphasis for the Ph.D., you are required to add a third Near Eastern language to the two that are required for the M.A. (for language options, see course requirements for the M.A. above). You must achieve high competence in two of your languages and familiarize yourself with the cultural backgrounds of each of the languages selected. You are also expected to take the equivalent of one year of general linguistics. Students in Semitics or in Old Iranian study three languages.

If you select the literature option, you are required to achieve high competence in two Near Eastern languages and their literatures (for language options, see course requirements for the M.A. above). You are also required to familiarize yourself, through appropriate coursework, with the history of your cultural area, and the methods of literary research and the history of literary criticism.

If you select the archaeology emphasis in the ancient Near Eastern civilizations specialization, you are required to achieve high competence in two ancient Near Eastern languages (for options, see course requirements for the M.A. above) and must be well-versed both in the history of the cultural area and in archaeological methodologies.

Further details regarding the choice of languages and examination requirements are available in the departmental *Guide to Graduate Study*.

### Qualifying Examinations

You must pass the written qualifying examinations before your doctoral committee is formed.

Candidates in languages are examined in three Near Eastern languages and the literary and historical background of at least two of them. Candidates in literature are examined in the literatures written in two languages within the cultural area of concentration and the historical and cultural background of these languages, with emphasis on one of them. Candidates specializing in the archaeology of the ancient Near East are examined in two ancient languages and the history and archaeology of the ancient Near East.

When you have passed the written examinations, your doctoral committee administers the University Oral Qualifying Examination. Passing this examination allows you to advance to candidacy and begin work on your dissertation.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

The department does not require an oral defense of the dissertation except when deemed necessary by the doctoral committee.

### Ancient Near East

(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

### Upper Division Courses

**M104A-M104B. Ancient Egyptian Civilization.** (Same as History M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. Political and cultural institutions of ancient Egypt and ideas on which they were based. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C. Mr. Loprieno (alternate years)

**M105. History of Ancient Mesopotamia and Syria.** (Same as History M105.) Lecture, three hours. Political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period. Mr. Buccellati

**120A-120B-120C. Elementary Ancient Egyptian.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Grammar and texts. Mr. Loprieno

**121A-121B-121C. Intermediate Ancient Egyptian.** Lecture, three hours. Prerequisites: courses 120A-120B-120C. Readings in ancient Egyptian literature. Mr. Loprieno

**123A-123B. Coptic.** Lecture, three hours. Prerequisite: consent of instructor. Introduction to Coptic grammar and reading of Coptic texts. Mr. Loprieno

**124. Middle Egyptian Technical Literature.** Prerequisite: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included. Mr. Loprieno

**130. Ancient Egyptian Religion.** Lecture, three hours. Introductory survey of various ancient Egyptian religious beliefs and practices, their origin, and development. Discussions of religiopolitical institutions such as divine kingship and pious foundations. Mr. Loprieno

**140A-140B. Elementary Sumerian.** Lecture, three hours. Prerequisites: Semitics 140A-140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from the Ur III period.

**145. Sumerian Literary Texts.** Lecture, three hours. Prerequisites: courses 140A-140B or consent of instructor. Reading and interpretation of selected Sumerian literary texts.

**150A-150B-150C. Survey of Ancient Near Eastern Literatures in English.** Lecture, three hours. Each course may be taken independently for credit. **150A.** Mesopotamia; **150B.** Egypt; **150C.** Syria and Palestine. Mr. Buccellati, Mr. Loprieno

**160A-160B. Introduction to Near Eastern Archaeology.** Lecture, three hours. Terminology, geography, principles, strategy of research, bibliography, and general survey of Near Eastern archaeology. Ms. Carter (alternate years)

**161A-161B-161C. Archaeology of Mesopotamia.** Prerequisite: consent of instructor. Survey of main archaeological periods in Mesopotamia, with special emphasis on late prehistoric and early historical periods and with reference to neighboring cultural areas. Each course may be taken independently for credit. Ms. Carter

**162. Archaeology of Palestine.** Lecture, three hours. Survey of archaeology of Palestine and the Sinai Peninsula from the Bronze Age to destruction of Jerusalem in A.D. 70, with emphasis on geographic setting and relationships to other cultures of the Near East.

(Alternate years)

**163A-163B. Archaeology of Iran.** Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. **163A.** Prehistoric and protohistoric phases of Iranian archaeology. **163B.** Archaeology of Elam, Iron Age, and Achaemenid Empire. Ms. Carter

**164A-164B-164C. Archaeology of Historic Periods in Mesopotamia.** Prerequisites: courses M105 and 161A-161B-161C, or consent of instructor. Survey of main archaeological periods in Mesopotamia, with special emphasis on historic periods and with reference to neighboring cultural areas. Each course may be taken independently for credit. Ms. Carter

**170. Introduction to Biblical Studies.** Lecture, two hours. Knowledge of original languages not required. The Bible (Old and New Testaments) as a book. Canon, text, and versions. Linguistic, literary, historical, and religious approaches to Bible study. Survey of history of interpretation from antiquity to the present.

**M194. The Hero in the Bible and the Ancient Near East.** (Formerly numbered 98A.) (Same as Folklore M185.) Lecture, three hours. Investigation of concepts of the hero/heroine in literatures of ancient Mesopotamia, Canaan, and Israel. Texts include epics of Gilgamesh and Aghat, Hebrew Bible, and New Testament. All texts read in translation.

**199. Special Studies in the Ancient Near East (2 to 8 units).** Prerequisite: consent of instructor.

### Graduate Courses

**210. Late Egyptian.** Lecture, three hours. Prerequisites: courses 121A-121B-121C, consent of instructor. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit. Mr. Loprieno

**211A-211B. Egyptian Texts of the Greco-Roman Period.** Lecture, three hours. Prerequisite: course 121C. Introduction to grammar and orthography of hieroglyphic texts from Greco-Roman temples. Text readings and translation of various textual types. Mr. Loprieno

**220. Seminar: Ancient Egypt.** Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit. Mr. Loprieno

**221A-221B. Demotic.** Prerequisite: course 121C. Introduction to Demotic grammar and orthography. Reading of texts from various genres. Mr. Loprieno

**240A-240B-240C. Seminars: Sumerian Language and Literature.** Lecture, two hours. Prerequisite: consent of instructor. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history.

**M250. Seminar: Ancient Mesopotamia.** (Same as History M207.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit. Mr. Buccellati

**250X. Seminar: Ancient Mesopotamia (1 unit).** Prerequisite: consent of instructor. Selected topics on political, social, and intellectual history of ancient Mesopotamia. Course for students who participate regularly in class meetings but without the homework required in course M250. May be repeated for credit. S/U grading. Mr. Buccellati

**260. Seminar: Ancient Near Eastern Archaeology.** Lecture, two hours. Prerequisite: consent of instructor. May be repeated for credit.

**261. Practical Field Archaeology (2 to 8 units).** Fieldwork, two hours. Prerequisite: consent of instructor. Participation in archaeological excavations or other archaeological research in the Near East under staff supervision. May be repeated. Mr. Buccellati, Ms. Carter

**262. Seminar: Object Archaeology.** Discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Selected topics in analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in Heeramanek Collection of Los Angeles County Museum of Art. Ms. Carter

**263. Seminar: Egyptian Monuments.** Prerequisite: consent of instructor. Selected monuments and sites in area of Luxor (Ancient Thebes). Architecture and decoration of temples and tombs; structure and occupation of settlements. May be repeated. Mr. Polz

**M265. Depositional History and Stratigraphic Analysis.** (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading. Mr. Buccellati

**272. Semitic Background of the New Testament.** Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C, Semitics 130, Greek 1, and 2, or consent of instructor. Study of Semitic elements in the Greek New Testament: traditions transmitted in Aramaic, relations to the Old Testament and to post-Biblical literature, and Palestinian Judaism.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Arabic

### Lower Division Courses

**1A-1B-1C. Elementary Literary Arabic.** Lecture, six hours. Basic grammar and syntax.

### Upper Division Courses

**102A-102B-102C. Intermediate Literary Arabic.** Lecture, four hours; discussion, one hour. Prerequisites: courses 1A-1B-1C or consent of instructor. Grammar and syntax; readings of excerpts from literary texts; composition.

**103A-103B-103C. Advanced Arabic.** Prerequisites: courses 102A-102B-102C or consent of instructor. Review of grammar, composition, conversation, and readings from classical and modern literary texts. Mr. Poonawala

**111A-111B-111C. Elementary Spoken Egyptian Arabic.** Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. Basic grammar and syntax of Egyptian colloquial Arabic.

**112A-112B-112C. Advanced Spoken Egyptian Arabic.** Lecture, three hours. Prerequisites: courses 111A-111B-111C or consent of instructor. Grammar and syntax; excerpts from literary texts using colloquial Arabic.

**113A-113B-113C. Elementary Spoken Levantine Arabic.** Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. General introduction to spoken Arabic of Syria, Lebanon, and Palestine. Grammar and syntax, with emphasis on language of everyday conversation.

**114A-114B-114C. Spoken Moroccan Arabic.** Lecture, three hours; laboratory, one hour. Introduction to spoken Arabic dialect of Morocco. Phonology, morphology, and syntax. Emphasis on developing oral skills. Mr. Penchoen

**120. Islamic Texts.** Prerequisite: course 103C or consent of instructor. Readings from Qur'an, Tafsir, Hadith, Fiqh. May be repeated for credit. Mr. Poonawala

**130. Classical Arabic Texts.** Prerequisite: course 103C or consent of instructor. Readings from medieval literary texts, with grammatical and syntactical analysis. May be repeated for credit.

**132. Philosophical and Kalam Texts.** Lecture, three hours. Prerequisite: course 120 or consent of instructor. Readings in medieval and Kalam texts. May be repeated for credit. Mr. Davidson

**141. Modern Arabic Literature.** Prerequisite: course 103C or consent of instructor. Conducted in Arabic. Readings in selected texts representing important trends in Arabic literature of the 19th and 20th centuries. May be repeated for credit.

**150A-150B. Survey of Arabic Literature in English.** Lecture, three hours. Knowledge of Arabic not required. Survey of Arabic literature from its beginning to the present, with selected readings in translation. Each course may be taken independently for credit. (F,W)

**151. Survey of Modern Arabic Literature in English.** Lecture, three hours. Readings of selected texts covering basic literary trends from middle of the last century to the present.

**180. Linguistic Analysis of Arabic.** Prerequisite: course 102C or consent of instructor. Linguistic description of Arabic in both its modern standard and dialect forms. Introduction to linguistic analysis of Arabic phonology, morphology, and syntax and to linguists' approaches to specific problems posed by Arabic grammar and dialectology. Mr. Penchoen (W)

**199. Special Studies in Arabic (2 to 8 units).** Prerequisite: consent of instructor.

## Graduate Courses

**220. Seminar: Islamic Texts.** Lecture, three hours. Prerequisite: consent of instructor. Doctrines and hermeneutics of various schools of thought in Islam, with selected readings from major works. May be repeated for a maximum of 24 units.

Mr. Poonawala (F,W,Sp, alternate years)

**230. Medieval Literary Texts.** Lecture, two hours. Prerequisite: consent of instructor. Readings in Arabic prose and poetry, survey of prosody. May be repeated for a maximum of 24 units. (F,W,Sp)

**240. Seminar: Arab Historians and Geographers.** Lecture, three hours. Prerequisite: consent of instructor. Selected readings from works of major historians, geographers, and travelers. May be repeated for a maximum of 24 units.

Mr. Poonawala (F,W,Sp, alternate years)

**250. Seminar: Arabic Literature.** Lecture, two hours. Prerequisite: consent of instructor. Selected topics from Arabic literature. Readings of texts from manuscript. May be repeated for a maximum of 24 units. (F,W,Sp)

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Iranian

### Lower Division Courses

**1A-1B-1C. Elementary Persian.** Lecture, four hours; laboratory, two hours. Mr. Ziai

**10A-10B-10C. Persian Conversation (2 units each).** Lecture, three hours. Systematic and structured Persian conversation. Mr. Ziai

### Upper Division Courses

**102A-102B-102C. Intermediate Persian.** Lecture, three hours; laboratory, three hours. Prerequisites: courses 1A-1B-1C or equivalent. Mr. Ziai

**103A-103B-103C. Advanced Persian.** Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent. Mr. Ziai

**111A-111B-111C. Elementary Kurdish.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. A proficiency-based course in basic grammar of literary Kurdish (Sorani). Graded readings, translation, composition (level one), conversation (levels one and two). Mr. Bodrogligeti

**120. Comparative Study of Six Major Persian Poets.** Lecture, two hours; discussion, one hour. Prerequisite: knowledge of Persian (lectures in Persian, readings in English and Persian). Comparative study of six major Persian poets from the 10th to 14th century who shaped the sense of Persian identity and delineated chief distinguishing characteristics of Persian thought and culture. P/NP or letter grading.

**140. Contemporary Persian Belles Lettres.** Lecture, three hours. Prerequisites: courses 103A-103B-103C or equivalent, consent of instructor. Study of major Persian poets and prose writers of the 20th century: prose — Jamalzadeh, Hedayat, Chubuk, Al Ahmad, Sa'edi, Golestan; poetry — Nima, Shamlu, Farrokhzad, Akhavan. Mr. Banani

**141. Contemporary Persian Analytical Prose.** Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent, consent of instructor. Study of selected modern Persian analytical and expository prose texts, with emphasis on social sciences, literary criticism, and history. Mr. Banani

**142. Persian Popular Ethics.** Prerequisites: courses 102A-102B-102C or consent of instructor. Study of major Persian works on popular ethics which have helped shape normative social, cultural, and political values in Iranian civilization. P/NP or letter grading. Mr. Ziai (Sp)

**150A-150B. Survey of Persian Literature in English.** Lecture, three hours. Knowledge of Persian not required. Each course may be taken independently for credit. Mr. Banani

**169. Civilization of Pre-Islamic Iran.** Survey of Iranian culture from the beginning through Sasanian period. Mr. Schmidt

**170. Religion in Ancient Iran.** History of religion in Iran from the beginning to the Mohammedan conquest; Indo-Iranian background, Zoroastrianism, Manichaeism, Mazdakism. Mr. Schmidt

**180A-180B. Iranian Civilization.** Lecture, three hours; discussion, one hour. Cultural and social history of the Iranian world, with emphasis on legacy of Persian language and literature. Letter (majors) or P/NP or letter (nonmajors) grading. Mr. Banani

**190A-190B. Introduction to Modern Iranian Studies.** Lecture, three hours. Prerequisites: courses 1A-1B-1C or equivalent. Survey of Iranian languages. Comparative and historical grammar. Mr. Bodrogligeti

**199. Special Studies in Iranian (2 to 8 units).** Prerequisite: consent of instructor.

## Graduate Courses

**220A-220B. Classical Persian Texts.** Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Study of selected classical Persian texts. Each course may be taken independently for credit. Mr. Banani

**221. Rumi, Mystic Poet of Islam.** Seminar, three hours. Prerequisites: course 220A or 220B or equivalent, consent of instructor. Study of life and works of Rumi in context of interaction of Sufism and poetic creativity. May be repeated twice for credit.

Mr. Banani

**M222A-M222B. Vedic.** (Same as Indic M222A-M222B.) Lecture, three hours. Prerequisite: knowledge of Sanskrit equivalent to Indic 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

Mr. Schmidt

**230A-230B. Old Iranian.** Prerequisite: consent of instructor. Studies in grammars and texts of Old Persian and Avestan. Comparative considerations. Only course 230B may be repeated for credit.

Mr. Schmidt

**231A-231B. Middle Iranian.** Prerequisite: consent of instructor. Studies in grammars and texts of such Middle Iranian languages as best serve students' needs (e.g., Pahlavi, Sogdian, Sakan). Only course 231B may be repeated for credit.

Mr. Schmidt

**250. Seminar: Classical Persian Literature.** Seminar, three hours. Prerequisites: courses 103A-103B-103C and 199, or consent of instructor. May be repeated twice for credit.

Mr. Banani

**251. Seminar: Contemporary Persian Literature.** Seminar, three hours. Prerequisites: course 140 or equivalent, consent of instructor. Studies in specific problems and trends in Persian poetry and prose in the 20th century. May be repeated twice for credit.

Mr. Banani

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

P/NP or letter grading. **140A.** 1654 to 1914; **140B.** 1914 to the Present.

(F, 140A; W, 140B)

**141. Modern Anti-Semitism.** Lecture, three hours. Examination of modern anti-Semitism from the 18th century to the present; comparison of modern racist ideologies with premodern theories; case studies (e.g., Dreyfus affair, Beiliss Trail, Holocaust); Jewish reactions to these phenomena.

**142. History and Institutions of State of Israel.** Lecture, three hours. Study of social and cultural development of State of Israel from its pre-state institutional structures to the present, with emphasis on major trends, personalities, and ideologies, and state's position in wider framework of modern Jewish history.

**M143. Introduction to Jewish Folklore.** (Same as Folklore M142.) Nature of Jewish folklore; narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

**M150A-150B. Hebrew Literature in English.** Lecture, three hours. Each course may be taken independently for credit:

**M150A.** Literary Traditions of Ancient Israel: Bible and Apocrypha. (Same as Humanities M101.) Study of literary culture of ancient Israel through examination of principal compositional strategies of the Hebrew Bible and the Apocrypha (read in translation). P/NP or letter grading.

Mr. Band (alternate years)

**150B.** Rabbinic Judaism. Topics include emergence of rabbinic Judaism; its original literary forms; rabbinic worldview; forms of medieval rabbinic literature; modern Jewish religious movements and their attitude to rabbinic Judaism.

Mr. Davidson (alternate years)

**151A-151B. Modern Jewish Literature in English.** Lecture, three hours. Each course may be taken independently for credit:

**151A.** Diaspora Literature. Study of literary responses of Jews to modernity, its challenges and threats. Readings in texts originally written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work.

Mr. Band (alternate years)

**151B.** Israeli Literature. Study of translations from Hebrew literature written in Israel and reflecting cardinal facets of Israeli life: social issues, security problems, identity of the state, role of individual. Analysis of formal aspects of each work.

Mr. Hakak (alternate years)

**155. Literature of the Cabala.** Lecture, three hours. Cabalistic literature in the broad sense (i.e., Jewish esoteric literature from the rabbinic to modern period). Topics include precabalistic esoteric texts, the early cabala, the Zohar, Lurianic cabala, nature of mysticism, the question of whether there was a Jewish mysticism.

Mr. Davidson

**M187. The Holocaust in Literature.** (Same as Humanities M165.) Lecture, three hours. Prerequisite: History 191E, 191F, or 191G or equivalent. Investigation of how the Holocaust informs a variety of literary and cinema works and raises a wide range of aesthetic and moral questions. P/NP or letter grading.

Mr. Band

**190. Undergraduate Seminar: Jewish Studies.** Examination of a single topic in depth with object of encouraging and guiding students' research in area of Jewish studies. Literary, cultural, and historical subjects included.

(F,Sp)

**M191A-M191B. Survey of Jewish History.** (Same as History M191A-M191B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight hours. Survey of social, political, and religious developments. **M191A.** From Biblical Times to End of the Middle Ages; **M191B.** From End of the Middle Ages to the Present.

Mr. Myers

**M191C-M191D. Focal Themes in Jewish History.** (Same as History M191C-M191D.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight hours. Treatment in depth of one major theme in Jewish history (such as history of Messianic Movements, structure of the Jewish communities) through the ages.

Mr. Myers

**M192A-M192B. Jewish Intellectual History.** (Same as History M192A-M192B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight hours. Development of Jewish self-understanding in relation to intellectual climate of the environment as expressed in the halacha, in philosophy, and in cabalism. **M192A.** Medieval Period; **M192B.** Modern Period.

Mr. Friedlander

**197A-197Z. Variable Topics in Jewish Studies.** Lecture or seminar, three hours. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading. **197A.** 20th-Century Jewish Thought. May not be repeated for credit. **197B.** Jewish Feminist Theology.

**199. Special Studies in Jewish Studies (2 to 8 units).** Limited to Jewish studies majors.

## Near Eastern Languages

### Lower Division Courses

**50A-50B-50C. Introduction to Near Eastern Languages and Cultures.** Lecture, three hours. Three-term sequence designed both as an introduction for undergraduates and as a requisite to various majors within department. Art and archaeology, languages and literatures, cultural history. Each course may be taken independently for credit. **50A.** Ancient Near East; **50B.** Medieval Near East; **50C.** Modern Near East.

## Graduate Courses

**200. Bibliography and Method of Near Eastern Languages and Literatures.** Lecture, two hours. Prerequisite: consent of instructor. Required for M.A. degree. Introduction to bibliographical resources and training in methods of research in various areas of specialization offered by department. May be repeated for credit.

**210. Survey of Afro-Asiatic Languages.** Lecture, three hours. Prerequisite: consent of instructor. Survey of structures of a number of representative languages from various major branches of Hamito-Semitic (Afro-Asiatic) language family.

**M241. Folklore and Mythology of the Near East.** (Same as Folklore M241.) Prerequisite: Folklore 101 or equivalent.

**290. Seminar: Paleography.** Seminar, three hours. Provides students with ability to cope with varieties of manuscripts.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Semitics

### Upper Division Courses

**110. Neo-Aramaic.** Lecture, three hours. Grammar and reading of selected texts (folktales, homilies, songs) in modern Aramaic dialects of the Jews and Christians of Kurdistan. Mr. Sabar

**115. Syriac.** Lecture, two hours. Morphology and syntax of Syriac language, introductory reading.

**130. Biblical Aramaic.** Lecture, three hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Grammar of biblical Aramaic and reading of texts. (Alternate years)

**140A-140B. Elementary Akkadian.** Lecture, three hours. Elementary grammar and reading of texts in standard Babylonian. Mr. Buccellati

**141. Advanced Akkadian.** Lecture, three hours. Prerequisite: consent of instructor. Old Babylonian syntax; reading of basic Old Babylonian texts. Mr. Buccellati

**142. Akkadian Literary Texts.** Lecture, three hours. Prerequisite: consent of instructor. Selected readings from Akkadian myths and epics, with introduction to historical tradition of the works and their literary structure. Mr. Buccellati

**199. Special Studies in Semitics (2 to 8 units).** Prerequisite: consent of instructor. (F,W,Sp)

## Graduate Courses

**210. Ancient Aramaic.** Lecture, two hours. Prerequisite: course 130 or consent of instructor. Reading of surviving inscriptions and papyri. May be repeated for credit.

**215B. Syriac.** Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translation of the Bible and Syriac literature. May be repeated for credit. (Alternate years)

**220A-220B. Ugaritic.** Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of Ugaritic language and literature. Only course 220B may be repeated for credit.

**225. Phoenician.** Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of Phoenician language and inscriptions. May be repeated for credit.

**230. Seminar: Northwest Semitic Languages and Literatures.** Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit.

**240. Seminar: Akkadian Language.** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit. Mr. Buccellati

**240X. Seminar: Akkadian Language (1 unit).** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading. Mr. Buccellati

**241. Seminar: Akkadian Literature.** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit. Mr. Buccellati

**241X. Seminar: Akkadian Literature (1 unit).** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading. Mr. Buccellati

**280A-280B-280C. Seminars: Comparative Semitics.** Seminar, two hours.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Turkic Languages

### Upper Division Courses

**101A-101B-101C. Elementary Turkish.** Lecture, five hours. Grammar, reading, conversation, and elementary composition drills. Mr. Jaeckel (F,W,Sp)

**102A-102B-102C. Advanced Turkish.** Lecture, five hours. Prerequisites: courses 101A-101B-101C or equivalent. Continuing study of grammar, conversation, and composition. Readings in modern literature and social science texts. Mr. Jaeckel

**111A-111B-111C. Elementary Uzbek.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Elementary grammar, reading, and composition exercises; elementary conversation. Mr. Bodrogligeti

**112A-112B-112C. Advanced Uzbek.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation. Mr. Bodrogligeti

**114A-114B-114C. Bashkir.** Lecture, three hours. Prerequisite: course 102A or consent of instructor. Grammar, reading of literary and folkloric texts. Mr. Bodrogligeti

**115A-115B-115C. Elementary Azeri.** Prerequisite: consent of instructor. Knowledge of Russian, Turkish, and Iranian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading competence with help of dictionary; ability to write simple compositions; basic conversational skill. Mr. Bodrogligeti (Sum)

**116A-116B-116C. Advanced Azeri.** Prerequisite: placement test. Proficiency-based course in descriptive Azeri grammar. Reading and analysis of Azeri literary and folkloric texts in new writing system. High-style composition and conversation. Mr. Bodrogligeti (Sum)

**160. Cultural History of the Turks.** Lecture, three hours. Prerequisite: consent of instructor. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present. Mr. Bodrogligeti

**170. Turco-Mongolian Nomadic Empires.** Lecture, three hours. Prerequisite: consent of instructor. Required of students in Turkic program. Survey of history of Turkic and Mongolian dominions from the 3rd century B.C. to A.D. 19th century (Hsiung-nu, Hsien-pi, Juan-Juan, Tu-Chueh, Uyghur, Khitan, Karakhanid, Seljuq, Kara-Khitay, Khorazmian, Jengiz-Khanite). Mr. Bodrogligeti

**180. Modern Turkic Languages and Peoples.** Lecture, three hours. Prerequisite: consent of instructor. Required of students in Turkic program and recommended for students in Soviet studies. Ethnic and linguistic survey of the Turkic peoples. Mr. Bodrogligeti

**199. Special Studies in Turkic Languages (2 to 8 units).** Prerequisite: consent of instructor.

## Graduate Courses

**210A-210B-210C. Introduction to Ottoman.** Lecture, three hours. Prerequisite: consent of instructor. Introduction to literary language of Ottoman Empire from its foundation in the 14th century to its overthrow in the 20th century. For students of history, literature, and religion of the Balkans, Near East, and Central Asia. Topics include Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts. Mr. Jaeckel (F,W,Sp)

**211. Ottoman Diplomats.** Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent. Organization and contents of Ottoman archives; reading and discussion of documents and registers. Introduction to use of Ottoman archive materials as a source for historical research. Mr. Shaw

**220A-220B-220C. Classical Uzbek (Chagatay).** Lecture, three hours. Prerequisites: courses 101A-101B-101C or 111A-111B-111C or Iranian 102A-102B-102C or Arabic 102A-102B-102C or Hebrew 102A-102B-102C or consent of instructor. Language of classical Central Asian Turkic literature. Descriptive and historical grammar, text analysis, translation, and composition drills. Mr. Bodrogligeti

**225A-225B-225C. Old Turkic: Turk and Uygur.** Lecture, three hours. Prerequisites: course 180, consent of instructor. Textual and linguistic analysis of Turk and Old Uygur documents: inscriptions, Manichean and Buddhist literary works. Mr. Bodrogligeti (alternate years)

**230A-230B-230C. Historical and Comparative Survey of Turkic Languages.** Lecture, three hours. Prerequisite: course 180. Extinct and living Turkic languages. History of Turkic: developments in phonemic, grammatical, and lexical systems from the 8th to 20th century. Structural analysis of Turkic languages on comparative basis. Mr. Bodrogligeti

**235A-235B. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Kipchak, and Old Anatolian.** Lecture, three hours. Prerequisites: course 180, consent of instructor. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres. Mr. Bodrogligeti (alternate years)

**240A-240B-240C. Advanced Ottoman.** Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent or consent of instructor. Emphasis on different genres of Ottoman writing (belles lettres as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research. Mr. Bodrogligeti, Mr. Jaeckel (F,W,Sp)

**250A-250B-250C. Islamic Texts in Chagatay.** Lecture, three hours. Prerequisites: courses 220A-220B-220C or consent of instructor. Philological and linguistic survey of basic Islamic source material written in Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics.

Mr. Bodrogligeti

**280A-280B. Seminars: Modern Turkish Literature.** Seminar, two hours. Prerequisites: course 102B or equivalent, consent of instructor. Specific issues and trends in development of Turkish literature from middle of 19th century to the present.

Mr. Jaeckel

**290A-290B. Seminars: Classical Turkic Literature — Ottoman, Chagatay, and Azeri.** Lecture, two hours. Prerequisites: courses 210A-210B-210C and/or 220A-220B-220C, consent of instructor. Survey of Islamic literatures of the Turks in classical period. Readings of Ottoman, Chagatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics.

Mr. Bodrogligeti

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Related Courses in Other Departments

**Art History 104B.** Eastern Islamic Art

**History 111A-111B.** History of the Turks

209A-209B. Seminars: Ottoman and Modern Turkish History

## Near Eastern Studies (Interdepartmental)

5353 Bunche Hall, (310) 825-1374, 825-4601

### Professors

Andras Bodrogligeti, Ph.D. (*Near Eastern Languages and Cultures*)

A. Jihad Racy, Ph.D. (*Ethnomusicology and Systematic Musicology*)

Yona Sabar, Ph.D. (*Near Eastern Languages and Cultures*)

Stanford J. Shaw, Ph.D. (*History*), Chair

### Associate Professors

Irene A. Bierman, Ph.D. (*Art History*)

Michael G. Morony, Ph.D. (*History*)

### Assistant Professor

David N. Myers, Ph.D. (*History*)

## Scope and Objectives

The graduate major in this discipline is called Islamic studies. For details, see the program by that name earlier in this chapter.

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this particular area, (2) those who plan to live and work in the Near East whose careers will be aided by a

knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.

## Bachelor of Arts Degree

### Preparation for the Major

**Required:** The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. You must also obtain reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or their equivalent in the language of your choice. You may substitute for the European language requirement Program in Computing 1 and one course from Economics 40, Political Science 6, Psychology 41, Sociology 18, or Statistics 50, plus one course from Economics 141, Geography 171, Political Science 102, Psychology M142, or Sociology 112. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 8, 9, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

### The Major

**Required:** Sixteen courses as follows: (1) completion of the advanced level or equivalent in the same language taken in lower division; (2) History 106A-106B-106C and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Anthropology 110, Art History M102A, M102B, 104A, 104B, C104C, Economics 110, 111, 112, 190, Geography 187, 188, Political Science 132A, 132B, 164, Sociology 187. This program may be modified in exceptional cases with consent of the adviser.

For further information, contact Professor Stanford J. Shaw at the program address.

## Neuroscience (Interdepartmental)

73-364 Center for the Health Sciences, (310) 206-2349

### Professors

Arthur P. Arnold, Ph.D. (*Psychology*)

Jackson Beatty, Ph.D. (*Psychology*)

Larry L. Butcher, Ph.D. (*Psychology*)

Scott H. Chandler, Ph.D. (*Physiological Science*)

Michael H. Chase, Ph.D., in Residence (*Physiology*)

V. Reggie Edgerton, Ph.D. (*Physiological Science*)

Gaylord D. Ellison, Ph.D. (*Psychology*)

Gordon L. Fain, Ph.D. (*Ophthalmology, Physiological Science*)

Debora B. Farber, Ph.D., in Residence

(*Ophthalmology*)

Jack L. Feldman, Ph.D. (*Physiological Science*), Chair

Joaquin M. Fuster, M.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

C. R. Gallistel, Ph.D. (*Psychology*)

Carlos V. Grijalva, Ph.D. (*Psychology*)

Alan D. Grinnell, Ph.D. (*Physiology*)

Franklin B. Krasne, Ph.D. (*Psychology*)

Michael Steven Levine, Ph.D., in Residence

(*Psychiatry and Biobehavioral Sciences*)

John C. Liebeskind, Ph.D. (*Psychology*)

Wendy B. Macklin, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

Michael T. McGuire, M.D. (*Psychiatry and Biobehavioral Sciences*)

(*Psychiatry and Biobehavioral Sciences*)

Peter M. Narins, Ph.D. (*Biology; Distinguished Teaching Award*)

Donald Novin, Ph.D. (*Psychology*)

Edward M. Ornitz, M.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

Michael J. Raleigh, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

Arnold B. Scheibel, M.D. (*Anatomy and Cell Biology*)

John D. Schlag, M.D. (*Anatomy and Cell Biology*)

Judith L. Smith, Ph.D. (*Physiological Science; Distinguished Teaching Award*)

James P. Thomas, Ph.D. (*Psychology*)

Allan J. Tobin, Ph.D. (*Biology*)

Jaime R. Villablanca, M.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

Eran Zaidel, Ph.D. (*Psychology*)

### Associate Professors

Cameron B. Gundersen, Ph.D. (*Molecular and Medical Pharmacology*)

Diane M. Papazian, Ph.D. (*Physiology*)

Stanley J. Schein, Ph.D., M.D. (*Psychology*)

### Assistant Professors

Utpal Banerjee, Ph.D. (*Biology*)

David L. Glanzman, Ph.D. (*Physiological Science*)

Volker Hartenstein, Ph.D. (*Biology*)

Larry Hoffman, Ph.D., in Residence (*Surgery*)

Barney A. Schlinger, Ph.D. (*Physiological Science*)

Dwayne D. Simmons, Ph.D. (*Biology*)

James A. Waschek, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

Joseph B. Watson, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

Nancy L. Wayne, Ph.D. (*Physiology*)

### Adjunct Associate Professor

Charles L. Wilson, Ph.D. (*Neurology*)

### Visiting Assistant Professor

Alan Garfinkel, Ph.D. (*Medicine, Physiological Science*)

## Scope and Objectives

For details on the Ph.D. program, see Chapter 15 on the School of Medicine.

Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to expose students to this broad range of topics at many levels of analysis, including molecular, cellular, synaptic, network, and behavioral and to explore the principles and concepts of nervous system function.

## Bachelor of Science Degree

### Preparation for the Major

**Required:** Biology 5, 9; Chemistry 11A, 11B/11BL, 11CL, 132A; Mathematics 3A, 3B, 3C (or 31A, 31B, 32A); Physics 6A, 6B, 6C (or 8A, 8B, 8C); one statistics course (Psychology 41, Statistics 50, or approved equivalent).

All preparation courses must be passed with a grade of C- or better and must be completed with an overall grade-point average of 2.5 or better. You are encouraged to fulfill the preparation requirements prior to enrollment in courses for the major. Transfer students are counseled on an individual basis.

In fulfilling the college general education requirements, you are encouraged to select courses that complement the major; Psychology 10 is recommended as a social sciences elective.

Transfer students with 80 or more units should complete the following courses prior to admission: one biology course (equivalent to Biology 5), one year of general chemistry with laboratory, and one year of calculus. Two calculus-based physics courses or two organic chemistry courses are recommended.

### The Major

**Required:** (1) Neuroscience M101A-M101B-M101C, Biology 100A, Chemistry and Biochemistry 132B/132BL, 153A, 153L; (2) three four-unit area electives as follows: one *behavioral and cognitive neuroscience* course from Biology 129, 132, Computer Science 161, M196B, Neuroscience 197, Psychology 110, 111, 116, 118, 119A, 119B, 119D, 119E, 119G, 119I, M119J, M119K, 119M, 120, 186A, 186B; one *cellular, developmental, and molecular neuroscience* course from Biology 100B, 108, 138, 153, CM156, 158, C174A through C174F (two units each), M185A, CM185B, Chemistry and Biochemistry 132C, 153B, 153C, Neuroscience 197, Physiological Science 147, 148; one *systems and integrative neuroscience* course from Biology 166, 167, M173, Neuroscience 197, Physiological Science 111B, 138, 142, C143, C144, C145, Psychology 119F; (3) one four-unit research-related course from Neuroscience 191A through 191Z, 199, 199HA, 199HB; (4) three additional elective courses from the area list in item 2, Neuroscience 191A through 191Z, 197A through 197Z, 199, 199HA, 199HB.

No more than eight courses may be from any one department. A maximum of eight units of Neuroscience 191, 197, 199, or 199H (in any combination) may be applied toward the major. All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

### Honors Program

The honors program provides exceptional students with the opportunity to do research culminating in an honors thesis. Requirements for admission include a 3.2 overall grade-point average. Two upper division courses used to satisfy major requirements must be contracted for honors, and an honors thesis (Neuroscience 199HA-199HB) is required. After completion of all requirements and with the recommendation of the faculty 199H sponsor, faculty members may confer departmental honors or highest honors at graduation. Graduation with

honors requires a 3.4 grade-point average in the major and a 3.2 overall, while highest honors are awarded to majors who have a GPA of 3.5 overall and a 3.7 in the major.

### Lower Division Courses

**88A-88Z. Lower Division Seminars.** Lecture, three hours. Limited to freshmen/sophomores. Seminars on current topics in neuroscience.

Mr. Scheibel and the Staff

### Upper Division Courses

**M101A-M101B-M101C. Neuroscience: From Molecules to Mind (5 units each).** (Same as Biology M175A-M175B-M175C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour:

**M101A. Cellular Mechanisms.** Prerequisites: Biology 9, Chemistry 132A, Physics 3B or 6B or 8C. Cellular physiology, pharmacology, molecular biology, and development of nervous system.

Mr. Feldman, Mr. Scheibel, Mr. Watson (F)

**M101B. Integrative Mechanisms.** Prerequisite: course M101A (or Biology M175A or Physiological Science M180A or Psychology M117A) or Biology 171 or Physiological Science 111A or Psychology 115. Central and reflex mechanisms of homeostasis, sensory information processing, and motor control.

Mr. Feldman, Mr. Grinnell, Mr. Levine, Mr. Schein (W)

**M101C. Neural Bases of Behavior.** Prerequisite: course M101B (or Biology M175B or Physiological Science M180B or Psychology M117B) or Biology 171 or Physiological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition.

Mr. Gallistel (Sp)

**103. Neuroscience for Physicists, Mathematicians, and Engineers.** Lecture, three hours. Introduction to the brain and neural function; mathematical models and computer simulations of neural networks. Biophysics of neurons, engineering approaches to neural control systems.

Mr. Garfinkel (Sp)

**191A-191Z. Proseminars: Neuroscience.** Lecture, three hours. Prerequisites: courses M101A-M101B-M101C or consent of instructor. Advanced studies on current research issues in neuroscience; term paper and oral report required.

(W,Sp)

**197A-197Z. Special Topics in Neuroscience.** Lecture, three hours. Prerequisites: courses M101A-M101B-M101C or consent of instructor. Topics on one or more aspects of neuroscience.

(W,Sp)

**199. Independent Research in Neuroscience (4 to 8 units).** Prerequisites: courses M101A-M101B-M101C with grades of B (3.0) or better, senior standing in neuroscience. Directed independent research with a faculty member.

(F,W,Sp)

**199HA. Honors Thesis in Neuroscience (6 units).** Prerequisite: neuroscience honors program standing. Directed independent research for departmental honors with a faculty member, involving definition of research topic and extensive reading and research in the field of proposed honors thesis. In Progress grading (credit to be given only on completion of course 199HB).

(F,W,Sp)

**199HB. Honors Thesis in Neuroscience (6 units).** Prerequisite: course 199HA. Continued reading and research that culminate in final honors thesis. Maximum of eight units of course 199/199H may be applied toward elective requirements for the major.

(F,W,Sp)

## Organizational Studies (Interdepartmental)

4256 Bunche Hall, (310) 825-3862

### Scope and Objectives

Organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in organizational studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in modern organizations. The program gives students a solid grounding in the organizational perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

### Special Undergraduate Program

You may elect to combine this program with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in organizational studies is also open to qualified students. For more information on individual majors, see the beginning of Chapter 5.

If you have a departmental major, you should seek advising in your major department. If you are interested in the individual major, consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

### Preparation for the Specialization

**Required:** At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Psychology 10; Sociology 1, or 18 and 104 or equivalent.

### Upper Division

**Required:** Nine upper division courses, including (1) at least three courses outside your major department selected from Management 190, Political Science 146D, Sociology 168, 173; (2) a minimum of three courses selected from one of the following suites within your major department: Economics 147A, 147B, 170, 171; Geography 148, M149; Political Science 141C, 142A, 142B, 146E; Psychology 135; Sociology 132, 135, 156, 182; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside your major department; (4) internship experience in a governmental or service organization.

Professor Eric H. Monkkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.

## Philosophy

321 Dodd Hall, (310) 825-4641

### Professors

Tyler Burge, Ph.D., *Chair*

Kit Fine, Ph.D.

Barbara Herman, Ph.D. (*Gloria and Paul Griffin Professor of Philosophy*), *Vice Chair*

David Kaplan, Ph.D.

D. Anthony Martin

### Professors Emeriti

Marilyn McCord Adams, Ph.D.

Robert Merrihew Adams, Ph.D.

Rogers Albritton, Ph.D.

Alonzo Church, Ph.D.

Keith S. Donnellan, Ph.D.

Philippa Foot, M.A.

Donald Kalish, Ph.D.

Herbert Morris, Ph.D.

Robert M. Yost, Ph.D.

### Associate Professors

Joseph Almog, Ph.D.

John Carriero, Ph.D.

### Assistant Professors

Andrew Hsu, Ph.D.

Marc Lange, Ph.D.

Gavin Lawrence, Ph.D.

Michael Otsuka, D.Phil.

Seana Shiffrin, D.Phil.

### Adjunct Professors

Sandra G. Harding, Ph.D.

Richard Popkin, Ph.D.

### Adjunct Assistant Professor

David C. Wilson, Ph.D.

## Scope and Objectives

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Philosophy Department was judged among the five best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts and Ph.D. degrees.

Philosopher, translated from the Greek, literally means "lover of wisdom." The term has come to mean someone who seeks knowledge, enlightenment, and truth. The undergraduate program in philosophy is not directed at career objectives (although it is traditionally good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any

other subject to which they are exposed—whether history, religion, government, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

## Bachelor of Arts Degree

### Preparation for the Major

*Required:* Philosophy 7 or 21, 22, 31, and one other lower division philosophy course.

### The Major

*Required:* Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.

Courses listed under "Special Studies" may be applied toward the major but not toward a group requirement. A maximum of eight units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

### Honors Program

On recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses in the 200 series (eight units) in philosophy with an average GPA of 3.5.

## Master of Arts Degree

### Admission

It is the policy of the department to admit only those who plan to earn the Ph.D. degree. For admission requirements, see the description under "Ph.D. Degree."

### Foreign Language Requirement

You must demonstrate reading knowledge of French, German, Latin, or Greek. (When relevant to your research, another language may be substituted with consent of the department.) This requirement can be satisfied by passing, with a score of at least 500, the Graduate School Foreign Language Test (GSFLT) in an approved

language. Alternatively, it can be satisfied by either of the methods in which the Ph.D. language requirement can be satisfied.

### Course Requirements

You must complete with grades of B or better at least nine upper division or graduate courses (36 units), excluding Philosophy 199, of which five courses (20 units) must be in the 200 series, including courses 200A-200B-200C and one designated logic course. Consult the *Manual for Graduate Students in Philosophy* for the list of designated courses.

Courses in the 500 series may not be applied toward the course requirements for the M.A. in Philosophy.

### Comprehensive Examination Plan

Students seeking the M.A. must pass the master's comprehensive examination, which consists of three different examinations. All three parts must be taken by the end of your first year of study. The examinations are written, last two hours each, and are on the subject matter covered in the three first-year seminars. The comprehensive examination is passed or failed as a whole, which does not necessarily require passing of all three parts. A grade of B – is the lowest passing grade on the whole examination or any of its parts; C + is a failing grade. In case of failure, the examination may be repeated.

## Ph.D. Degree

### Admission

Admission to UCLA as a graduate student in philosophy requires approval both by the Graduate Division and by the Department of Philosophy. The University application should be sent directly to UCLA Graduate Application Processing; the departmental application, three letters of recommendation (on the official forms), one official transcript from each institution attended, a statement of purpose, a sample of your written work, official scores on the Graduate Record Examination (GRE) General Test (the Subject Test in Philosophy is not required), and official Test of English as a Foreign Language (TOEFL) scores for applicants whose native language is not English should be sent to the department graduate counselor. Departmental information and all applications can be obtained by writing to the Graduate Counselor, Department of Philosophy, 321 Dodd Hall, UCLA, Los Angeles, CA 90024-1451.

Admission to graduate study in philosophy is not probationary. At the end of your first year of study, however, the department conducts a review of your work, and results are discussed in a meeting between you and your graduate adviser.

### Foreign Language Requirement

You must demonstrate reading knowledge of French, German, Latin, or Greek. (Another language may be substituted with consent of the department, if it is used in your doctoral work.) You may satisfy this requirement by completing, with a grade of C or better, the final course in a two-year sequence of college courses in an ap-

proved language. Alternatively, you may satisfy the requirement by passing the department language examination. Completion of the foreign language requirement is not required for admission to the doctoral program but is required by the University for advancement to candidacy.

### Course Requirements

A Ph.D. candidate must complete, with a grade of B or better, the three first-year seminars, plus 11 additional upper division and graduate philosophy courses (not including individual studies courses), distributed as follows:

**Logic**—Philosophy 135A and one other designated upper division or graduate course in logic in either the Philosophy or Mathematics Department. One course must be completed by the end of your first year, unless a preparatory course is necessary. Consult the *Manual for Graduate Students in Philosophy* for the designated list.

**History of Philosophy**—One graduate course in history of philosophy, plus Philosophy 100A, 100B, 100C (or equivalent graduate or undergraduate courses taken at UCLA or elsewhere).

**Ethics and Value Theory**—One graduate-level course.

**Metaphysics and Epistemology**—One graduate-level course.

**Special Area Requirement**—In the second and third years, you must satisfy two special area requirements—one in metaphysics and epistemology and one in ethics. You must take two specially designated graduate courses in one of the two areas and write a paper prepared in accordance with a specific format called a "proposition" in the other area.

The special course requirement in either metaphysics and epistemology or in ethics should be completed in your second year, with the proposition requirement covering the remaining area to be completed in your third year. Consult the *Manual for Graduate Students in Philosophy* for further details.

**Electives**—As many courses as needed to fulfill the requirement of 11 additional upper division or graduate philosophy courses.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor on the basis of its content and the departmental guidelines. Normally, no substitutions for these courses are allowed, but if you have done graduate coursework elsewhere, you may be permitted to substitute previous graduate coursework in exceptional cases.

### Teaching Experience

Before receiving a Ph.D., you are required to spend three terms as a teaching assistant at UCLA.

### Qualifying Examinations

The department does not require you to pass any written examination as a condition of advancement to candidacy. You are, however, required to take the master's comprehensive examination (see "M.A. Degree") to give the de-

partment evidence of your proficiencies and deficiencies. All three parts of the examination must be taken by the end of your first year of study.

In the third year, you begin a new series of individual studies courses (Philosophy 596) with your dissertation supervisor to develop a well-defined dissertation project. A doctoral committee is selected and the University Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether you are able to complete the dissertation successfully. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of your preliminary investigations. In case of failure, the doctoral committee makes a recommendation for or against allowing a second oral examination.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

The final oral examination may be waived by the doctoral committee. This determination is usually made at the time of the oral qualifying examination.

### Lower Division Courses

**1. Beginnings of Western Philosophy.** Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks.

**2. Introduction to Philosophy of Religion.** Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

**4. Philosophical Analysis of Contemporary Moral Issues.** Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women.

**5A. Philosophy in Literature.** Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in the Western tradition. Mr. Morris

**6. Introduction to Political Philosophy.** Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/NP or letter grading. Mr. Otsuka

**7. Introduction to Philosophy of Mind.** Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological knowledge. Mr. Almog, Mr. Burge

**8. Introduction to Philosophy of Science.** Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at non-technical level of episodes from history of science. Mr. Lange

**9. Principles of Critical Reasoning.** Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting). Mr. Wilson

**21. Skepticism and Rationality.** Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some great philosophers of modern period, such as Descartes, Leibniz, Berkeley, or Hume. Mr. Donnellan, Mr. Hsu

**22. Introduction to Ethical Theory.** Lecture, three hours; discussion, one hour. Recommended or required for many upper division courses in Group III. Systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, meaning of ethical terms, relativism, etc. Mr. Lawrence, Ms. Shiffrin

**31. Logic, First Course.** Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational; forms of reasoning and structure of language. Mr. Burge, Mr. Fine, Mr. Kalish, Mr. Kaplan, Mr. R. Martin

**32. Logic, Second Course.** Lecture, three hours; discussion, one hour. Enforced prerequisite: course 31 (preferably in preceding term). Symbolic logic: extension of systematic development of course 31. Quantifiers, identity, definite descriptions. Mr. Fine, Mr. Kalish, Mr. D. Martin

**97. Freshman Seminar.** Variable topics; consult *Schedule of Classes* or "Department Announcements" for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

### Upper Division Courses

**100A. History of Greek Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Survey of origins of Greek metaphysics from pre-Socratics through Plato and Aristotle. Mr. Albritton

**100B. Medieval and Early Modern Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Strongly recommended: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.

**100C. History of Modern Philosophy, 1650-1800.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course. Strongly recommended: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science.

**Group I: History of Philosophy**

**101A. Plato — Earlier Dialogues.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Study of selected topics in early and middle dialogues of Plato.

**101B. Plato — Later Dialogues.** Lecture, three hours; discussion, one hour. Prerequisite: course 101A. Study of selected topics in middle and later dialogues of Plato.  
Mr. Lawrence

**102. Aristotle.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Study of selected works of Aristotle.  
Mr. Lawrence

**104. Topics in Islamic Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

**105. Medieval Philosophy from Augustine to Maimonides.** Prerequisite: one philosophy course or consent of instructor. Development of early medieval philosophy within framework of Judeo-Christian theology and its assimilation and criticism of Greek philosophical heritage. Focus on problem of universals, existence and nature of God, problem of evil, and doctrines of the Trinity and atonement. Selected writings from Augustine through Maimonides read in English translation.

**106. Later Medieval Philosophy.** Prerequisite: one philosophy course or consent of instructor. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

**107. Topics in Medieval Philosophy.** Prerequisite: one philosophy course. Recommended: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor.

**C108. Hobbes.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C208.  
Mr. Flemming

**C109. Descartes.** Prerequisites: course 21 or two philosophy courses or consent of instructor. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209.  
Mr. Almog

**C110. Spinoza.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

**C111. Leibniz.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

**C112. Locke and Berkeley.** Prerequisite: one philosophy course or consent of instructor. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.  
Mr. Donnellan

**C114. Hume.** Prerequisite: one philosophy course or consent of instructor. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.  
Mr. Donnellan

**115. Kant.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.  
Mr. Burge

**116. 19th-Century Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in 19th-century thought.  
Mr. Flemming

**117. Late 19th- and Early 20th-Century Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in work of one or more of following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.  
Mr. Almog, Mr. Burge, Mr. Hsu

**118. Kierkegaard.** Prerequisite: one philosophy course or consent of instructor. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts.

**C119. Topics in Modern Philosophy.** Prerequisite: one philosophy course or consent of instructor. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219.

**Group II: Logic, Semantics, and Philosophy of Science**

**126A. Philosophy of Science.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences.  
Mr. Lange

**126B. Philosophy of Science.** Lecture, three hours; discussion, one hour. Prerequisite: course 31 or 126A or consent of instructor. Introduction to contemporary philosophy of science, focusing on problems of central importance.  
Mr. Lange

**126C. Philosophy of Science: Social Sciences.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws).

**127A. Philosophy of Language.** Prerequisite: course 31 or consent of instructor. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.  
Mr. Burge, Mr. Kaplan, Mr. D. Martin

**127B. Philosophy of Language.** Prerequisite: course 32 or consent of instructor. Course 127A is not prerequisite to 127B. Selected topics similar to those considered in course 127A, but at more advanced and technical level.  
Mr. Kaplan

**128A. Philosophy of Mathematics.** Prerequisites: courses 31, 32, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincaré, early Weyl).  
Mr. Almog, Mr. D. Martin

**128B. Philosophy of Mathematics.** Prerequisite: course 128A or consent of instructor. Intuitionism of Brouwer, Heyting, and later Weyl; proof theory of Hilbert.  
Mr. D. Martin

**129. Philosophy of Psychology.** Lecture, three hours; discussion, one hour. Prerequisites: one four-unit psychology course, one philosophy course. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.  
Mr. Burge

**130. Philosophy of Space and Time.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or one philosophy course and one physics course, or consent of instructor. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory.  
Mr. Lange

**131. Science and Metaphysics.** Prerequisites: two philosophy courses or consent of instructor. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor.  
Mr. Lange

**132. Philosophy of Biology.** Prerequisite: one philosophy course or consent of instructor. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of a biological species, and biological explanation. P/NP or letter grading.  
Mr. Lange

**133. Topics in Logic and Semantics.** Prerequisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.  
Mr. Kalish, Mr. Kaplan, Mr. D. Martin

**M134. Introduction to Set Theory.** (Formerly numbered 134.) (Same as Mathematics M112A.) Lecture, three hours; discussion, one hour. Prerequisite: course 32 or Mathematics 31B or consent of instructor. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.  
Mr. Kalish, Mr. D. Martin

**135A. Metatheory of Sentential Logic.** Lecture, three hours; discussion, one hour. Prerequisite: course 32 or equivalent. Introduction to metatheory of classical sentential logic. Emphasis on fundamental metalogical ideas, including proof by induction, rigorous definition of syntactic and semantic concepts, and proof of completeness. Discussion of philosophical significance of these ideas.  
Mr. Almog, Mr. Fine, Mr. Hsu

**135B. Metatheory of Predicate Logic.** Lecture, three hours; discussion, one hour. Prerequisite: course 135A or equivalent. Classical first-order logic, its scope, and limits. Gödel completeness theorem as main positive result. Some consideration to classical negative results on truth, decidability, and completeness, and relationship between first- and second-order logic.  
Mr. Almog, Mr. Fine, Mr. Hsu

**136. Modal Logic.** Prerequisite: course 135A. First course in two-term sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations, Lemmon/Scott completeness, incompleteness in tense and modal logic, quantificational extensions.  
Mr. Almog, Mr. Fine, Mr. D. Martin

**Group III: Ethics and Value Theory**

**150. Society and Morals.** Lecture, three hours; discussion, one hour. Prerequisite: course 22 or consent of instructor. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.  
Ms. Shiffrin

**151A-151B-151C. History of Ethics.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Course 151A is not prerequisite to 151B, which is not prerequisite to 151C. **151A.** Selected Classics in Ancient Ethical Theories: Plato, Aristotle; **151B.** Selected Classics in Modern Ethical Theories: Hume, Kant, Mill, etc.; **151C.** Selected Classics of Medieval Ethics.  
Ms. Herman, Mr. Lawrence, Ms. Shiffrin

**153A. Topics in Ethical Theory: Normative Ethics.** Prerequisite: course 22 or consent of instructor. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor.

Ms. Herman, Mr. Lawrence, Mr. Otsuka, Ms. Shiffirin

**153B. Topics in Ethical Theory: Metaethics.** Prerequisite: course 22 or consent of instructor. Study of selected problems in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor.

Ms. Herman, Mr. Lawrence, Mr. Otsuka, Ms. Shiffirin

**154. Topics in Value Theory: Rationality and Action.** Prerequisite: course 6 or 7 or 22 or consent of instructor. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of the will, and decision theory. May be repeated for credit with consent of instructor.

Ms. Herman, Mr. Lawrence, Mr. Otsuka, Ms. Shiffirin

**155. Medical Ethics.** Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation.

Mr. Flemming, Ms. Shiffirin

**156. Topics in Political Philosophy.** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisites: two philosophy courses or consent of instructor. Recommended: course 6 or 22. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor.

Ms. Herman, Mr. Otsuka, Ms. Shiffirin

**157A-157B. History of Political Philosophy.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. May be repeated with consent of instructor. **157A.** Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. **157B.** Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

Mr. Flemming, Ms. Herman, Ms. Shiffirin

**161. Topics in Aesthetic Theory.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

Mr. R. Martin

**166. Philosophy of Law.** Prerequisite: one philosophy course or consent of instructor. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey the law.

Ms. Herman, Mr. Morris, Mr. Otsuka, Ms. Shiffirin

## Group IV: Metaphysics and Epistemology

**170. Philosophy of Mind.** Lecture, three hours; discussion, one hour. Prerequisites: two relevant philosophy courses or consent of instructor. Analysis of various problems concerning nature of mind and mental phenomena, such as relation between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

Mr. Donnellan

**172. Philosophy of Language and Communication.** Prerequisites: two relevant philosophy or linguistics courses or consent of instructor. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries.

Mr. Donnellan

**M173. Metaphor and Literal Speech.** (Same as Teaching English as a Second Language M189.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: Linguistics 1 or equivalent or consent of instructor. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphoric capacity. P/NP or letter grading.

**175. Topics in Philosophy of Religion.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

Mr. Wilson

**176. Metaphysics of Modality.** Prerequisites: courses 31, 32. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophical basis of modal theory of modal logic. What are "possible worlds"? What is the "accessibility" relation? Is modal logic a logic or a theory? Is its focus logical or metaphysical necessity? Are the two notions really distinct? How metaphysically involved is (quantified) modal logic? What is its connection to doctrines of (1) "Haecceitism" and (2) "Aristotelian Essentialism"? P/NP or letter grading.

Mr. Almog, Mr. Fine

**177A. Existentialism.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.

**177B. Historical Studies in Existentialism.** Prerequisite: one philosophy course or consent of instructor. Study of central philosophical texts of one of the following: Nietzsche, Heidegger, Jaspers, Buber, Sartre, or Camus. Emphasis on explication and interpretation of the texts. May be repeated for credit with consent of instructor.

**178. Phenomenology.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Introduction to phenomenological method of approaching philosophical problems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

**179. Oriental Philosophy: Buddhism.** Examination of central concepts and arguments in Buddhist philosophy, with emphasis on school of Mahayana Buddhism. Appropriate parallels to social concepts in the Western tradition.

**182. Elements of Metaphysics.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of basic metaphysical questions; nature of physical world, of minds, and of universals; and answers provided by alternative systems (e.g., phenomenalism, materialism, dualism).

Mr. Fine

**183. Theory of Knowledge.** Prerequisite: course 21 or consent of instructor. Analysis of concept of empirical knowledge.

Mr. Burge, Mr. Wilson

**184. Topics in Metaphysics.** Prerequisite: course 21 or consent of instructor. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor.

Mr. Almog, Mr. Donnellan, Mr. Fine

**186. Topics in Theory of Knowledge.** Prerequisite: course 182 or 183 or consent of instructor. Intensive investigation of one or two selected topics or works in theory of knowledge, such as a priori knowledge, problem of induction, memory, knowledge as justified true belief. Topics announced each term. May be repeated for credit with consent of instructor.

Mr. Burge, Mr. Lange

**187. Philosophy of Action.** Prerequisites: two philosophy courses or consent of instructor. Study of various concepts employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception.

Mr. Donnellan, Mr. Otsuka

**188. Philosophy of Perception.** Prerequisites: two philosophy courses or consent of instructor. Critical study of main philosophical theories of perception and arguments used to establish them.

**189. Major Philosophers of the 20th Century.** Prerequisites: two philosophy courses or consent of instructor. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor.

Mr. Almog, Mr. Burge, Mr. Donnellan, Mr. Hsu

## Special Studies

**M192. Philosophical Analysis of Issues in Feminist Theory.** (Same as Women's Studies M110D.) Lecture, three hours. Prerequisite for women's studies majors: Women's Studies 10; for other students: one philosophy course or consent of instructor. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor.

Ms. Harding, Ms. Shiffirin

**193. Christian Ethical Thought.** Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment of their views on morality and religious life.

**195. 19th- and 20th-Century Religious Thought.** Lecture, three hours; discussion, one hour. Philosophical approach to Western religious thought of last 200 years, through study of selected works by such authors as Kant, Schleiermacher, Kierkegaard, Buber, Camus, and Tillich.

**196. Undergraduate Seminar: Philosophy.** Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Variable topics; consult *Schedule of Classes* or "Department Announcements" for topic to be offered in a specific term. May be repeated for credit with consent of instructor.

**199. Special Studies (2 to 8 units).** Prerequisite: consent of instructor. Eight units may be applied toward degree requirements, but course cannot be substituted for a course in one of the four groups on basis of similarity of subject matter.

## Graduate Courses

**200A-200B-200C. Seminar for First-Year Graduate Students.** Limited to and required of all first-year graduate students in philosophy. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

## Group I. History of Philosophy

**201. Plato.** Prerequisite: consent of instructor. Study of later dialogues.

**202. Aristotle.** Prerequisite: consent of instructor. Analysis of major problems in Aristotle's philosophy based on reading, exposition, and critical discussion of relevant texts in English translation.

Mr. Lawrence

**203. Seminar: History of Ancient Philosophy.** Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor. Mr. Albritton

**206. Topics in Medieval Philosophy.** Prerequisite: consent of instructor. Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor.

**207. Seminar: History of Medieval and Renaissance Philosophy.** Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor.

**C208. Hobbes.** (Formerly numbered 208.) Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C108.

**C209. Descartes.** Prerequisite: consent of instructor. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C109.

Mr. Almog

**C210. Spinoza.** Prerequisite: consent of instructor. Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

**C211. Leibniz.** Prerequisite: consent of instructor. Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

**C212. Locke and Berkeley.** Prerequisite: one philosophy course or consent of instructor. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C112. S/U or letter grading. Mr. Donnellan

**C214. Hume.** Prerequisite: consent of instructor. Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114. Mr. Donnellan

**215. Kant.** Prerequisite: consent of instructor. Intensive study of selected writings of Immanuel Kant.

**216. 19th-Century Philosophy.** Prerequisite: consent of instructor. Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

**C219. Topics in Modern Philosophy.** Prerequisite: consent of instructor. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C119.

**220. Seminar: Topics in History of Philosophy.** Seminar, three hours. Prerequisite: consent of instructor. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor.

## Group II. Logic, Semantics, and Philosophy of Science

**221A. Topics in Set Theory.** Prerequisite: Mathematics M112A or consent of instructor. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, continuum hypothesis, inaccessible numbers. Formalization of set theory: Zermelo/Fraenkel; von Neumann/Gödel theory. May be repeated for credit with consent of instructor. Mr. D. Martin

**221B. History of Set Theory.** (Formerly numbered 221C.) Prerequisite: consent of instructor. Development of concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Gödel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and rank hierarchy, ramification and predicativity, proper classes and sets as small classes, and particular Zermelo/Fraenkel axiomatic theory. Emphasis on actual expressed ideas and views of various influential authors. Mr. D. Martin

### 222A-222B-222C. Gödel Theory:

**222A.** Prerequisites: several courses in logic, preferably including course 135B. First in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. Mr. D. Martin

**222B.** Prerequisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. Mr. D. Martin

**222C.** Prerequisite: course 222B. Gödel numbering and Gödel theory. Final course in Gödel theory series. Mr. D. Martin

**224. Philosophy of Physics.** Prerequisite: consent of instructor. Selected philosophical topics related to physical theory, depending on interests and background of participants, including space and time; observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor.

**225. Probability and Inductive Logic.** Prerequisites: course M134, or Mathematics M112A and 112B, or consent of instructor. Topics may include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning. Mr. Lange

**226. Topics in Mathematical Logic.** Prerequisite: consent of instructor. Content varies from term to term. May be repeated for credit with consent of instructor. Mr. Kaplan, Mr. D. Martin

**227. Philosophy of Social Science.** Prerequisite: consent of instructor. Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students with primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.

**230. Seminar: Logic.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Almog, Mr. Fine, Mr. Kaplan, Mr. D. Martin

**231. Seminar: Intensional Logic.** Prerequisite: consent of instructor. Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of *Principia Mathematica*, possible worlds semantics. May be repeated for credit with consent of instructor. Mr. Almog, Mr. Fine, Mr. Kaplan, Mr. D. Martin

**232. Philosophy of Science.** Prerequisite: consent of instructor. Selected topics in philosophy of science. May be repeated for credit with consent of instructor. Mr. Lange

**233. Seminar: Philosophy of Physics.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Lange

## Group III. Ethics and Value Theory

**241. Topics in Political Philosophy.** Prerequisites: course 150 or 156 or 157A or 157B or any two philosophy courses or consent of instructor. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor. Ms. Shiffrin

**245. Seminar: History of Ethics.** Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor. Ms. Herman, Mr. Lawrence

**246. Seminar: Ethical Theory.** Prerequisite: consent of instructor. Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor. Ms. Herman, Mr. Lawrence, Mr. Otsuka, Ms. Shiffrin

**247. Seminar: Political Theory.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Otsuka, Ms. Shiffrin

**248. Problems in Moral Philosophy.** Prerequisite: consent of instructor. Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor. Ms. Herman, Mr. Lawrence, Mr. Otsuka, Ms. Shiffrin

**255. Seminar: Aesthetic Theory.** Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor. Ms. Herman, Mr. Lawrence, Mr. Otsuka, Ms. Shiffrin

**M256. Topics in Legal Philosophy.** (Same as Law M217.) Lecture, three hours. Prerequisite: consent of instructor. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor. Mr. Dolinko, Ms. Herman, Mr. Otsuka, Ms. Shiffrin

**M257. Seminar: Philosophy of Law.** (Same as Law M524.) Lecture, three hours. Prerequisite: consent of instructor. Selected topics in philosophy of law. May be repeated for credit with consent of instructor. Ms. Herman, Mr. Morris, Mr. Otsuka, Ms. Shiffrin

## Group IV. Metaphysics and Epistemology

**271. Seminar: Topics in Metaphysics and Epistemology.** Discussion, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**275. Human Action.** Prerequisites: two upper division philosophy courses or consent of instructor. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor. Mr. Donnellan

**280. 20th-Century Continental Philosophy.** Prerequisite: consent of instructor. Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.

**281. Seminar: Philosophy of Mind.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Burge

**282. Seminar: Metaphysics.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Almog, Mr. Burge

**283. Seminar: Theory of Knowledge.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Donnellan

**284. Seminar: Philosophy of Perception.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**285. Philosophy of Psychoanalysis.** Prerequisite: consent of instructor. Examination of topics such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, meta-psychological concepts such as the unconscious, the ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature. Mr. Morris

**286. Philosophy of Psychology.** Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology. Mr. Burge

**287. Seminar: Philosophy of Language.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Burge, Mr. Donnellan, Mr. Fine

**288. Seminar: Wittgenstein.** Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor. Mr. Hsu

**289. Seminar: Philosophy of Religion.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**290. Workshop: Philosophy of Language.** Seminar, two hours. Prerequisite: consent of instructor. Ongoing discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.

Mr. Donnellan, Mr. Kaplan

**299. Seminar: Philosophical Research.** Lecture, three hours. Prerequisite: advancement to candidacy or consent of instructor. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. May be repeated for credit with consent of instructor. S/U grading. Mr. Donnellan

## Special Studies

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Philosophy (2 to 4 units).** Prerequisite: consent of instructor. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Studies (2 to 8 units).** (Formerly numbered 596A-596B.) Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U or letter grading.

**597. Directed Studies for Graduate Examinations (2 to 8 units).** Preparation for M.A. comprehensive examination or Ph.D. oral qualifying examinations. S/U grading.

**599. Research for Ph.D. Dissertation (2 to 8 units).** Prerequisite: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

John M. Dawson, Ph.D.  
Eric D'Hoker, Ph.D.  
Sergio Ferrara, Ph.D.  
Christian Fronsdal, Ph.D.  
Walter N. Gekelman, Ph.D., *in Residence*

Hidenori Sonoda, Ph.D.

## Adjunct Professors

Muzaffer Atac, Ph.D.  
Viktor Decyk, Ph.D.  
Phillip Pritchett, Ph.D.

## Scope and Objectives

Physics is a basic science with actual and potential applications in many fields. The undergraduate curriculum is broad and general with respect to physics but includes an introduction to theoretical and experimental work in specialized subfields of physics in the senior year. The Physics B.S. degree program is for students who want a comprehensive undergraduate education in physics; it provides a foundation for students who intend to go on to graduate school in physics or related fields such as engineering or other physical sciences. It is also an appropriate program for students who want to combine a rigorous background in physics with interests in other fields. In addition, this is a terminal degree for those who want to work as an engineer or technician in industry. The B.A. program in General Physics provides flexibility for students who are interested in fields outside of physics in which a strong background knowledge of physics would be helpful.

The department offers a comprehensive graduate program leading to the Master of Science degree (en route to the Ph.D.), the Master of Arts in Teaching (M.A.T.), and the Ph.D., which is offered in theoretical or experimental work in a choice of subfields. It is the policy of the department to admit only students who plan to earn the Ph.D. or M.A.T. degree.

## Undergraduate Study

The Department of Physics offers a choice of two undergraduate majors: the B.S. degree program in Physics and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for either major must be taken for a letter grade.

## Bachelor of Science in Physics

This major should be taken if you intend to continue toward the Ph.D. in Physics.

## Preparation for the Major

*Required:* Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry and Biochemistry 11A, 11B/11BL, 11C (11CL is recommended but not required); Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

## The Major

*Required:* Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 131. The remainder of your course of study consists of a plan, to be worked out by you in consultation with your designated departmental adviser, that details which courses you take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before you expect to graduate; (2) the plan must include at least two courses from the Physics 180 series; (3) there must be at least five up-

\*The faculties of the Departments of Astronomy and Physics have proposed a merger of the two units into a new Department of Physics and Astronomy. If adopted, the proposal would be effective as of July 1, 1994. All degrees associated with current programs would continue to be offered.

per division courses in the plan; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics Department. However, it is expected that the courses will fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Preapproved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

If you are preparing for graduate school, you should take additional courses in physics and mathematics. Physics M122, 123, 124, 126, 132, and 140 are recommended.

**Transfer Students** — Junior transfer students should preferably have completed (1) a two-year calculus/analytic geometry sequence or equivalent and (2) the calculus-based physics course at their previous college, but in no case should less than three semesters or four quarters of the mathematics and one year of the physics sequence be completed before transferring to UCLA. Each mathematics and physics course must be passed with a grade of C or better.

### Honors Programs

The department offers three honors programs leading to graduation with honors or highest honors in physics. You are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

## Bachelor of Arts in General Physics

The major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If you intend to continue work toward the Ph.D. in Physics, you are advised to work for the B.S. in Physics as described earlier.

### Preparation for the Major

**Required:** Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry and Biochemistry 11A, 11B/11BL, 11C (11CL is recommended but not required); Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office.

### The Major

**Required:** Physics 105A, 110A, 110B, 112, 115A, 131, one course from the 180 series, two upper division physics electives (excluding 185 and 199), and five upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

### Instructional Credentials

You may earn credentials for teaching physical sciences and other subjects in California ele-

mentary and secondary schools. Completion of the instructional credential program in the Teacher Education Laboratory is required. Consult the Graduate School of Education and Information Studies, 1009 Moore Hall, (310) 825-8328, for information.

## Graduate Study

The Department of Physics offers opportunities for graduate study leading to the M.S. (en route to the Ph.D.), M.A.T. (Master of Arts in Teaching), and Ph.D. degrees. Special emphasis is given to preparation in the following fields of physics: accelerator, acoustics/low-temperature, elementary particles, intermediate energy and nuclear physics, plasma and astrophysics, solid-state and condensed matter.

### Admission

You must have an excellent undergraduate record in addition to meeting the University minimum requirements. You are required to take the Graduate Record Examination (GRE) Subject Test in Physics and to submit three letters of recommendation. International applicants who are applying for financial support (fellowships, teaching assistantships, and graduate student researcher appointments) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English.

Application materials may be obtained by writing to the Graduate Office, Department of Physics, 3-164 Knudsen Hall, UCLA, Los Angeles, CA 90024-1547.

## Master of Arts in Teaching

### Major Fields or Subdisciplines

It is not required to designate an area of specialization for the M.A.T. degree.

### Course Requirements

This degree is a physics master's degree which also leads to qualification for instructional credentials at the secondary school or junior college level. Five graduate courses, five professional (300 series) courses, and 12½ total courses are required.

(1) The five graduate physics courses must include Physics 370 and four courses from 210A, 210B, 215A, 221A, 221B.

(2) Also required are the courses necessary for completion of the preliminary State of California Single Subject Instructional Credential, K-12: Community Health Sciences 187, Education 100A-100B, 112, 312, 315A-315B, 330B, 330C.

Courses in the 500 series may not be applied toward the M.A.T. degree.

### Teaching Experience

Teaching experience is required insofar as the required education courses are concerned (supervised teaching at the secondary or junior college level).

## Comprehensive Examination Plan

A passing grade on a written comprehensive examination is required. M.A.T. candidates who fail to qualify at the master's level of achievement may take the examination a second time. Permission to take it a third time may be granted only under exceptional circumstances.

## Master of Science Degree

Except for the Master of Arts in Teaching program, the department does not offer a terminal master's degree. The M.S. degree is awarded to students in the Ph.D. program after they satisfy the requirements described below.

### Course Requirements

The University requires a total of nine courses with an average grade of B or better for the M.S. degree. The Physics Department requires that a minimum of six of the nine be graduate courses in physics of which you must pass the five fundamental (core) courses: Physics 210A, 210B, 215A, 221A, 221B. To complete the minimum six graduate courses you are required to pass one of the following courses with a grade of B or better: 220, 221C, 231A. The remaining three courses (to complete the nine courses for the M.S. degree) may be satisfied by upper division or graduate courses, not necessarily in physics, which are acceptable to the Physics Department. No more than two of the three may be from course 596 or seminar courses. Only eight units of 500-series courses may be applied toward the total course requirement for the M.S. degree (courses 597 and 598 may not be applied).

## Comprehensive Examination Plan

A passing grade on a written comprehensive examination is required. The examination must be taken no later than your fourth term in residence. This examination is given twice a year.

Although the department operates under the comprehensive examination plan rather than the thesis plan, arrangements generally can be made to write a master's thesis, provided you have a particularly interesting research problem and a professor willing to undertake the guidance of your work. You must petition the departmental committee of graduate advisers for permission to pursue the thesis plan. The comprehensive examination requirement is waived if the petition is approved.

## Ph.D. Degree

The graduate program in physics leads to the Ph.D. degree. Although you may obtain the M.S. degree en route to the Ph.D., the department does not admit candidates for the M.S. degree only.

### Major Fields or Subdisciplines

Ph.D. degrees are granted in the following fields of specialization: accelerator physics, elementary particles, intermediate energy and nuclear physics, low-temperature/acoustics, plasma and astrophysics, and condensed matter (including solid-state).

Arrangements can be made to obtain a Ph.D. in Physics while doing research in interdisciplinary fields such as biophysics, astrophysics, geophysics, etc. The details of each program should be established in consultation with the graduate affairs officer.

### Course Requirements

By the end of your first year of graduate study you are expected to acquire a mastery of the core graduate physics material presented in Physics 210A, 210B, 215A, 221A, 221B. Since knowledge of this material is tested on the written comprehensive examination, usually all or most of the five courses constitute your main course load in your first year of graduate study. Detailed syllabi for the courses are available from the Graduate Office, 3-164 Knudsen Hall.

You must fulfill a breadth requirement by passing course 220 or 221C or 231A with a grade of B or better. In addition, if you have not taken course 132 or its equivalent as an undergraduate, you must do so at the beginning of your graduate program. The core and breadth requirements should be completed by your fifth term in residence.

### Qualifying Examinations

All departmental graduate students (master's and Ph.D.) take the same written comprehensive examination, which is graded as follows: (1) pass at the Ph.D. level of achievement, (2) pass at the master's level of achievement, or (3) fail. This examination is normally taken prior to your fourth term in residence.

All students in the Ph.D. program must pass the examination at the Ph.D. level of achievement. Permission to take it a third time may be granted only under exceptional circumstances.

No later than your fourth term in residence you are expected, in consultation with your adviser, to begin taking a series of courses, seminars, and tutorials to prepare you for original research in a given area of specialization. No later than your fifth term in residence you are expected to begin taking a sequence of Physics 596 courses with a faculty member in your chosen field of specialization. By the third term of the 596 sequence you are expected to make a substantive oral presentation describing the results of a problem in your 596 program before an audience which includes the faculty member(s) with whom you are taking course 596 and three other faculty members. No later than the end of your eighth term in residence you are expected to make a formal arrangement with a faculty member to serve as your Ph.D. research sponsor.

The doctoral committee conducts the University Oral Qualifying Examination, which may include (1) material in your field of specialization, (2) related material that members of the committee from other departments may wish to ask, and (3) discussion of the proposed dissertation problem. Committee members guide, read, approve, and certify the dissertation. A decision is also made at this time as to whether a final oral examination is required.

When a satisfactory report on the completion of the written and oral qualifying examinations has been submitted, you are eligible to be formally advanced to candidacy for the Ph.D.

### Final Oral Examination

This examination ordinarily is a discussion of your original work, including your dissertation and other related matters to be determined by the committee. It may be, if the committee so desires, a survey or comprehensive examination.

### Lower Division Courses

Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take either Physics 10 or 3A if only one course is to be taken, or 3A and 3B as a two-course sequence.

Physics 1Q is intended for entering freshman physics majors and other interested students. Although it is not a required course or a part of or requisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics on a level intended to be attractive to entering students with a good high school science and mathematics background.

Physics 3A, 3B, 3C form a one-year sequence of courses in general physics (with laboratory). In this sequence only algebra and trigonometry are used in providing a mathematical description of physical phenomena; calculus is not used.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences. However, unlike Physics 3A, 3B, 3C, calculus is used throughout, and successful completion of basic calculus courses is a requisite for admission to this sequence.

Physics 8A, 8B, 8C, 8D, 8E form a sequence of courses in general physics for majors in physics.

The department takes into account prior preparation in physics. If you feel your background would permit acceleration, you may be exempted from one or more of courses 8A through 8E by taking the final examination with a class at the end of any term. These serve as placement examinations. A satisfactory score on one or both parts of the College Entrance Examination Board Advanced Placement Physics C Test may also serve as a placement examination, but placement is not automatic. You should discuss such possibilities with your departmental adviser.

Physics 10 is a one-term, nonlaboratory course which surveys the whole field of physics. Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to six units credit.

**1Q. Contemporary Physics (2 units).** Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading. (F)

**3A. General Physics: Mechanics of Solids and Fluids.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Preparation: three years of high school mathematics including trigonometry or two years of high school mathematics and one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 8A or equivalent. Fundamentals of classical mechanics: Newton laws; conservation of momentum, angular momentum, energy; Kepler laws; dynamics of systems of particles; fluid mechanics. (F)

**3B. General Physics: Heat, Sound, Electricity and Magnetism.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 3A. Temperature, heat, and laws of thermodynamics. Introduction to wave motion, resonance. Sound and acoustics. Electric and magnetic fields. Electric power. Elements of DC and AC circuits. (W)

**3C. General Physics: Light, Relativity, and Modern Physics.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 3B. Light, optical instruments. Introduction to relativity. Electron and atom. Matter waves. Nuclear and particle physics. (Sp)

**6A. Physics for Life Sciences Majors: Mechanics.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: Mathematics 3A, 3B, 3C (may be taken concurrently). (F,W,Sp)

**6B. Physics for Life Sciences Majors: Electricity and Magnetism.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6A. (F,W,Sp)

**6C. Physics for Life Sciences Majors: Light and Modern Physics.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6B. (F,W,Sp)

**8A. Physics for Scientists and Engineers: Mechanics.** Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: course 8AL (corequisite), Mathematics 31A, 31B (corequisite). Recommended: high school physics and chemistry. Motion, Newton laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation. (F,W,Sp)

**8AH. Physics for Scientists and Engineers: Mechanics (Honors).** Lecture, four hours; discussion, one hour. Enforced requisite: Mathematics 31A. Introduction to classical mechanics for engineering and physical sciences students. (W)

**8AL. Physics Laboratory for Scientists and Engineers: Mechanics (1 unit).** Lecture, one hour; laboratory, two hours. Enforced corequisite: course 8A. (F,W,Sp)

**8B. Physics for Scientists and Engineers: Waves, Sound, Heat.** Lecture/demonstration, three hours; discussion, one hour. Enforced requisites: courses 8A, 8BL (corequisite), Mathematics 31B, 32A (corequisite). Harmonic oscillators, standing and traveling waves, fluid dynamics, sound, kinetic theory of gases, laws of thermodynamics. (F,W,Sp)

**8BH. Physics for Scientists and Engineers (Honors).** Lecture/demonstration, three hours; discussion, one hour. Enforced requisites: course 8A (A or better), Mathematics 31B, 32A (corequisite). Same material as course 8B but in greater depth. (Sp)

**8BL. Physics Laboratory for Scientists and Engineers: Waves, Sound, Heat (1 unit).** Lecture, one hour; laboratory, two hours. Enforced corequisite: course 8B. (F,W,Sp)

**8C. Physics for Scientists and Engineers: Electricity and Magnetism.** Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: courses 8B, 8CL (corequisite), Mathematics 32A, 32B (corequisite). Electrostatics: electric field and potential, capacitors and dielectrics. Currents, DC circuits, transients in RC circuits. Magnetism: magnetic fields and forces, Ampere law, Faraday law, magnetic properties of matter. Maxwell equations in integral form. Inductance and transients in RL circuits. (F,W,Sp)

**8CH. Physics for Scientists and Engineers (Honors).** Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: course 8BH (or 8B, A or better), Mathematics 32A, 32B (corequisite). Same material as course 8C but in greater depth. (F)

**8CL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism (1 unit).** Lecture, one hour; laboratory, two hours. Enforced corequisite: course 8C. (F,W,Sp)

**8D. Physics for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity.** Lecture/demonstration, three hours; discussion, one hour. Enforced requisites: courses 8C, 8DL (corequisite), Mathematics 32B, 33A (corequisite). AC circuits, resonance. Maxwell equations in differential form. Electromagnetic waves. Light: reflection, refraction, interference, diffraction, polarization. Special theory of relativity. (F,W,Sp)

**8DH. Physics for Scientists and Engineers (Honors).** Lecture/demonstration, three hours; discussion, one hour. Enforced requisites: course 8CH (or 8C, A or better), Mathematics 32B, 33A (corequisite). Same material as course 8D but in greater depth. (W)

**8DL. Physics Laboratory for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity (1 unit).** Lecture, one hour; laboratory, two hours. Enforced corequisite: course 8D. (F,W,Sp)

**8E. Physics for Scientists and Engineers: Modern Physics.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: course 8D, Mathematics 33A, 33B (corequisite). Wave-particle duality, quantum theory, Schrödinger equation, hydrogen atom, exclusion principle. (W,Sp)

**10. Physics.** Lecture/demonstration, three hours; quiz/discussion, one hour. Not open for credit to students with credit for course 3A or 6A or 8A or equivalent course in mechanics. Special mathematical preparation beyond that necessary for admission to University in freshman standing not required. Topics include planetary motion, Newton laws, gravitation, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, atoms, and subatomic particles. As time permits, development of physical ideas is placed in cultural and historical perspective. (F,W,Sp)

## Upper Division Courses

Prerequisites for all upper division courses (except Physics 105A, 116): Physics 8A through 8E, Mathematics 31A, 31B, 32A, 32B, 33A, and 33B, or consent of instructor. It is recommended that students take the 180 laboratories in their senior year.

**105A. Analytic Mechanics.** Lecture, three hours; discussion, one hour. Prerequisite: Mathematics 32A. Corequisite: Mathematics 32B. Newtonian mechanics and conservation laws, gravitational potentials, calculus of variations, Lagrangian and Hamiltonian mechanics, central force motion, linear and nonlinear oscillations. (F,Sp)

**105B. Analytic Mechanics.** Prerequisite: course 105A. Relativity with four vectors, noninertial reference frames, dynamics of rigid bodies, coupled oscillators, normal modes of oscillation, vibrating strings, and wave propagation. (F,W)

**108. Optical Physics.** Prerequisite: course 110B. Interaction of light with matter; dispersion theory, oscillator strength, line widths, molecular scattering. Coherence theory, Kirchhoff formulation of diffraction theory, crystal optics, optical rotation, electro and magneto optical effects. Additional topics of fundamental or current interest.

**110A. Electricity and Magnetism.** Lecture, three hours. Prerequisite: course 131. Electrostatics and magnetostatics. (W,Sp)

**110B. Electricity and Magnetism.** Prerequisite: course 110A. Faraday law and Maxwell equations. Propagation of electromagnetic radiation. Multipole radiation and radiation from an accelerated charge. Special theory of relativity. (F,Sp)

**112. Thermodynamics.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Fundamentals of thermodynamics, including first, second, and third laws. Statistical mechanical point of view and its relation to thermodynamics. Some simple applications. (F,Sp)

**114. Mechanics of Wave Motion and Sound.** Lecture, three hours. Prerequisites: courses 105A and 105B, or consent of instructor. Vibrating systems and wave propagation in gases, liquids, and solids, including elements of hydrodynamics and elasticity. Applications in ultrasonics, low-temperature physics, solid-state physics, architectural acoustics.

**115A. Elementary Quantum Mechanics.** Lecture, three hours; discussion, one hour. Prerequisites: courses 8E, 105B (may be taken concurrently), 131. Classical background, basic ideas, formulation of quantum mechanics, one-dimensional problems, and methods of quantum mechanics. (W,Sp)

**115B. Elementary Quantum Mechanics.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Three-dimensional problems, angular momentum, Pauli exclusion principle, variational and perturbative methods of quantum mechanics. (F,Sp)

**116. Electronics.** Lecture, three hours; laboratory, three hours. Alternating current circuits, transmission line circuits, transistor and IC circuits to generate, modify, and detect electrical signals, introduction to digital circuits, analysis of noise and methods to reduce its influence in electrical measurements.

**M122. Plasma Physics.** (Same as Electrical Engineering M185.) Lecture, four hours; outside study, eight hours. Prerequisite: course 110A or Electrical Engineering 101. Senior-level introductory course to physics of plasmas and ionized gases and fundamentals of controlled fusion. Particle motion in magnetic fields; fluid behavior, plasma waves; resistivity and transport; equilibrium and stability; kinetic effects. Discussion of illustrative laboratory experiments.

**123. Atomic Structure.** Prerequisite: course 115B. Theory of atomic structure. Interaction of radiation with matter.

**124. Nuclear Physics.** Lecture, three hours; discussion, one hour. Prerequisite: course 115B. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions.

**126. Elementary Particle Physics.** Lecture, three hours; discussion, one hour. Prerequisite: course 115B. Introduction to physics of elementary particles. The four basic interactions: strong, electromagnetic, weak, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators.

**131. Mathematical Methods of Physics.** Lecture, three hours; discussion, one hour. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals. (F,W,Sp)

**132. Mathematical Methods of Physics.** Lecture, three hours; discussion, one hour. Prerequisite: course 131. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy theorem and formula, Taylor and Laurent series, calculus of residues, and Laplace transforms.

**140. Introduction to Solid-State Physics.** Prerequisite: course 115B or equivalent. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffraction of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands.

**160. Numerical Analysis Techniques and Particle Simulations.** Lecture, three hours; computer terminals, six hours. Prerequisites: courses 105A, 105B, 110A, 110B, minimum knowledge of computer programming (FORTRAN). Introduction to the field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems.

**180A. Nuclear Physics Laboratory.**

**180B. Physical Optics and Spectroscopy Laboratory.**

**180C. Solid-State Laboratory.**

**180D. Acoustics Laboratory.**

**180E. Plasma Physics Laboratory.**

**180F. Elementary Particle Laboratory.**

**185. Foundations of Physics.** Prerequisite: senior standing in physics or consent of instructor. Historical development and philosophical sources of classical and modern physics.

**199. Special Studies in Physics (2 to 4 units).** May be repeated, but no more than 12 units may be applied toward Physics B.S. degree requirements.

## Graduate Courses

**210Q. Modern Physics Research Areas (2 units).** Review of modern physics research areas, with emphasis on those actively pursued at UCLA. S/U grading.

**210A. Electromagnetic Theory.** Boundary value problems in electrostatics and magnetostatics. Multipole expansions; dielectrics and macroscopic media. Maxwell equations and conservation laws. Wave guides and resonators; simple radiating systems. (W)

**210B. Electromagnetic Theory.** Electromagnetic potentials and Hertz vectors. Cylindrical waves. Spherical waves. Debye potentials. Multipole radiation. Classical relativistic electrodynamics. Radiation from moving charges. (Sp)

**213A. Advanced Atomic Structure.** Group representation theory. Angular momentum and coupling schemes. Interaction of radiation with matter.

**213B. Advanced Atomic Structure.** N-j symbols, continuous groups, fractional parentage coefficients, n electron systems.

**213C. Molecular Structure.** Application of group theory to vibrational and electronic states of molecules. Molecular orbital theory. Raman effect. Angular momentum and coupling in molecules.

**214A. Advanced Acoustics.** Propagation of waves in elastic and fluid media. Reflection, refraction, diffraction, and scattering of waves in fluids. Attenuation mechanisms in fluids.

**214B. Advanced Acoustics.** Propagation in nonhomogeneous fluids and in moving fluids. Radiation pressure, acoustic streaming, and attenuation in large amplitude sound fields. Propagation of sound in liquid helium. Mechanisms resulting in attenuation for elastic waves in solids.

**215A. Statistical Physics.** Thermodynamics and statistical mechanics with applications. (F)

**215B. Nonequilibrium Statistical Mechanics.** Probability theory, Markov processes, equations of change, BBGKY hierarchy and its consequences, Boltzmann equation, Chapman/Enskog method, transport coefficients, fluctuation/dissipation theorems, density matrix, H-theorems.

**215C. Quantum Statistical Mechanics and the Many Body Problem.** Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green's function approach; Coulomb gas; imperfect Bose gas; electron/phonon interaction; superconductivity; phase transitions; theory of Fermi liquid. (F,W,Sp)

**220. Classical Mechanics.** Lecture, three hours. Hamilton/Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.

- 221A-221B-221C. Quantum Mechanics.** Lecture, three hours. **221A.** Fundamentals of quantum mechanics, operators and state vectors, equations of motion. **221B.** Prerequisite: course 221A. Rotations and other symmetry operations, perturbation theory. **221C.** Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.
- 222A-222B-222C. Plasma Physics.** Properties of a Coulomb gas with and without a magnetic field: equilibrium, oscillations, instabilities, fluctuations, collective phenomena, transport properties, and radiation. Description via single-particle orbit theory, magnetohydrodynamics, and kinetic equations of various types.
- 223. Advanced Classical Mechanics.** Prerequisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media.
- 224. Introduction to the Strong Interaction.** Evidence concerning the strong interaction, particularly as exemplified in nucleon/nucleon and pion/nucleon systems. Isospin, scattering matrix, density matrix and polarization, properties of pions, one pion exchange potential, phase shift analysis.
- 225A-225B. Advanced Nuclear Physics.** Prerequisites: courses 221A-221B. Normally preceded by course 224. Advanced course in structure of complex nuclei, nuclear models, scattering and reactions.
- 226A-226B-226C. Elementary Particle Physics (6 units each).** Lecture, four hours. Prerequisites: courses 221A-221B-221C or equivalent and 230A-230B (may be taken concurrently). Modern theories of elementary particle physics beginning with symmetry principles and conserved quantities, classic V-A theory of weak interactions, gauge field theories (Abelian and non-Abelian), spontaneous symmetry breaking,  $SU(2) \times U(1)$  electroweak interactions of leptons, quarks,  $W$ s,  $Z^0$  and  $\gamma$ , quark theory of hadrons and quantum chromodynamics.
- 226D. Beyond the Standard Model.** Lecture, three hours. Prerequisites: courses 226A-226B-226C, 230A-230B-230C. Discussion of possible extensions of the current standard model of electroweak and strong interactions, including axions, technicolor, grand unified theories, supersymmetry, supergravity, and superstrings. S/U grading.
- 230A-230B-230C. Relativistic Quantum Theory (6 units each).** Lecture, four hours. Prerequisites: courses 221A-221B-221C or equivalent or consent of instructor. Modern quantum field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breakdown, monopoles and other solitons.
- 231A. Methods of Mathematical Physics.** Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.
- 231B. Methods of Mathematical Physics.** Not open for credit to students with credit for Mathematics 266B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations.
- 231C. Methods of Mathematical Physics.** Not open for credit to students with credit for Mathematics 266C. Perturbation theory. Singular integral equations. Numerical methods.
- 232A-232B. Relativity.** Special and general theories, with applications to elementary particles and astrophysics.
- 232C. Special Topics in General Relativity.**
- 233. Introduction to High-Energy Astrophysics.** Introductory lectures on modern high-energy astrophysics. High-energy radiation processes. Neutron stars. Pulsars. X-ray sources. Black holes. Supermassive rotators and quasars.
- 235. Group Theory and Quantum Mechanics.** Prerequisite: course 221A. Group representation theory and applications to quantum mechanics of atoms, molecules, and solids.
- 241A. Solid-State Physics.** Prerequisites: courses 140, 215A, 221A. Symmetry, free electrons, electrons in a periodic potential, experimental measurement of band structure and Fermi surface parameters, cohesive energy, lattice vibrations, thermal properties.
- 241B. Solid-State Physics.** Prerequisite: course 241A. Transport theory with applications, electron/electron interactions.
- 241C. Solid-State Physics.** Prerequisite: course 241B. Semiconductors, magnetism, phase transitions, superconductivity.
- 242A-242B. Advanced Solid-State Theory.** Prerequisites: courses 241A, 241B, and 241C (may be taken concurrently). Many body methods in solid-state physics.
- 243A-243K. Special Topics in Solid-State Physics.** **243A.** Disordered Systems; **243B.** Magnetic Resonance; **243C.** Phase Transitions; **243D.** Magnetism; **243E.** Superconductivity; **243F.** Macromolecules; **243G.** Semiconductors; **243H.** Optical Interactions; **243I.** Nonlinear Optics; **243J.** Hopping Transport; **243K.** Low-Temperature Physics.
- 250. Introduction to Acceleration of Charged Particles.** Lecture, three hours. Prerequisites: courses 210A, 210B, 215A. Principles of charged-particle acceleration, including principles of synchrotrons and storage rings, beam parameter determination, statistical behavior of beams and beam cooling techniques, synchrotron light sources, colliding beam storage rings, medical accelerators, and free electron lasers.
- 260. Seminar: Problems in Plasma Physics.**
- 261. Seminar: Special Problems in Theoretical Physics.**
- 262. Seminar: Physics of the Solid State.**
- 264. Seminar: Advanced Physical Acoustics.**
- 266. Seminar: Propagation of Waves in Fluids.**
- 268. Seminar: Spectroscopy.**
- 269A. Seminar: Nuclear Physics (2 to 4 units).**
- 269B. Seminar: Elementary Particle Physics (2 to 4 units).**
- 269C. Seminar: Accelerator Physics (2 to 4 units).** Physics principles governing design and performance analysis of particle accelerators, using existing accelerators as examples and emphasizing interplay among design goals, component performance, and operational experience. S/U grading.
- 280E. Advanced Plasma Laboratory.** Lecture, two hours; laboratory, four hours. Prerequisites: courses M122, 180E. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.
- 290. Research Tutorial: Plasma Physics (2 or 4 units).** Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.
- 291. Research Tutorial: Elementary Particle Theory (2 or 4 units).** Prerequisites: courses 226A, 230A-230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.
- 292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics (2 or 4 units).** Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.
- 293. Research Tutorial: Current Topics in Physics (2 units).** Lecture, one hour. Seminar and discussion by staff and students on current topics in physics, both experimental and theoretical (topics not limited to one field of physics). Strongly recommended for graduate students in physics. May be repeated for credit. S/U grading.
- 294. Research Tutorial: Accelerator Physics (2 or 4 units).** Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in accelerator physics. May be repeated for credit. S/U grading.
- 295. Research Tutorial: Solid Earth Physics (2 or 4 units).** Required (or course 292 if appropriate) of each graduate student doing research in this field, ordinarily in second or third year. Seminar and discussion on solid earth physics. May be repeated for credit. S/U grading.
- 296A-296Z. Research Topics in Physics (2 units each).** Prerequisite: consent of instructor. Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.
- 296C. Condensed Matter/Low Temperature/Acoustics.**
- 296H. High-Energy and Intermediate-Energy Physics.**
- 296P. Plasma Physics.**
- 296T. Theoretical Elementary Particle Physics.**
- M297. Research Tutorial: Astroparticle Physics (2 or 4 units).** (Same as Astronomy M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.
- 298. Research Tutorial: Experimental Elementary Particle Physics (2 or 4 units).** Limited to six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on current problems in experimental elementary particle physics. May be repeated for credit. S/U grading.
- 299. Research Tutorial: Nuclear Physics (2 or 4 units).** Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experiment and theory. May be repeated for credit. S/U grading.
- 370. Teaching Physics.** Prerequisite: consent of instructor. Study of physics laboratory experiments and demonstrations available today for secondary school and community college physics courses. Part of Master of Arts in Teaching (M.A.T.) program but open to other interested students.
- 375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
- 495. Teaching College Physics (2 units).** Lecture/discussion (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading. (F)
- 596. Directed Individual Studies (2 to 12 units).** May be repeated for credit. S/U grading.
- 597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations.** May be repeated twice for credit. S/U grading.
- 598. Master's Thesis Research and Writing.** May be repeated twice for credit.
- 599. Ph.D. Research and Writing (8 or 12 units).** May be repeated for a maximum of 18 units. S/U grading.

## Physiological Science

2121 Life Sciences, (310) 825-3891

### Professors

R. James Barnard, Ph.D. (*Diet and Degenerative Diseases*)  
 Scott H. Chandler, Ph.D. (*Neurosciences*)  
 V. Reggie Edgerton, Ph.D. (*Neuromuscular Physiology*)  
 Gordon L. Fain, Ph.D. (*Neurosciences*), *Vice Chair*  
 Jack L. Feldman, Ph.D. (*Neurosciences*), *Chair*  
 Judith L. Smith, Ph.D. (*Neuromotor Control*;  
*Distinguished Teaching Award*)  
 James G. Tidball, Ph.D. (*Muscle Cell Biology*)

### Professors Emeriti

Camille Brown, Ed.D.  
 Bryant J. Cratty, Ed.D.  
 Glen H. Egstrom, Ph.D.  
 Gerald W. Gardner, Ph.D.  
 Donald T. Handy, Ed.D.  
 Valerie V. Hunt, Ed.D.  
 Jack F. Keogh, Ed.D.  
 Wayne W. Massey, Ph.D.  
 Ben W. Miller, Ph.D.  
 Norman P. Miller, Ed.D.  
 Laurence E. Morehouse, Ph.D.

### Associate Professor

Marjorie E. Latchaw, Ph.D., *Emerita*

### Assistant Professors

David L. Glanzman, Ph.D. (*Neurosciences*)  
 Scott A. Henderson, Ph.D. (*Cardiac Physiology*)  
 Barney A. Schlinger, Ph.D. (*Neuroendocrine Physiology*)

### Adjunct and Visiting Assistant Professors

Alan Garfinkel, Ph.D., *Adjunct*  
 George J. Salem, Ph.D., *Adjunct*  
 Eric Sternlicht, Ph.D., *Adjunct*  
 Jack E. Turman, Jr., Ph.D., *Visiting*  
 William C. Whiting, Ph.D., *Adjunct*

## Scope and Objectives

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including cardiopulmonary function and adaptation, musculoskeletal physiology, cell biology, biomechanics, neural control of movement and homeostasis including neuroendocrinology, and neural integration and sensory transduction.

## Bachelor of Science Degree

### Preparation for the Major

*Required:* Physiological Science 17A, 17B, 17C; Biology 9, 100A; Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 132A, 132B/132BL; Mathematics 3A, 3B, 3C (or 31A, 31B, 32A); Physics 6A, 6B, 6C (or 8A, 8B, 8C); one introductory statistics course.

Preparation courses outside the department may be taken for a letter grade or on a P/NP basis; Physiological Science 17A, 17B, and 17C must be taken for a letter grade. All preparation courses must be passed with a grade of C – or better or a P and must be completed with an overall grade-point average of 2.0 or better. If you receive a grade of D, F, or NP in two preparation courses or in the repetition of a single preparation course, you are subject to dismissal from the major.

Transfer students with 80 or more units must complete the following courses prior to admission: one year of general chemistry with laboratory, one year of calculus, one calculus-based physics course. A second calculus-based physics course and/or one cellular biology course are strongly recommended.

Transfer students are required to take Physiological Science 17A, 17B, and 17C at UCLA because these courses emphasize the movement aspects of anatomy needed in preparation for upper division physiological science courses.

Transfer credit for UCLA Extension coursework and for any departmental courses (including courses 17A, 17B, 17C) is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

### The Major

*Required:* Physiological Science 111A (or M180A-M180B), 111B-111C, Chemistry and Biochemistry 153A, 153L.

A total of four upper division physiological science electives (16 units) is required. Four units of course 199 or 199H may be applied toward the elective requirement. Courses 193, 195, 196A-196B, and graduate courses at the 300, 400, or 500 level may not be applied toward this requirement. One graduate course at the 200 level may be applied toward the elective requirement by petition.

All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

### Honors Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in preparation for the major courses. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

## Graduate Study

The department offers Master of Science and Doctor of Philosophy degrees. Current faculty research specializations focus on mechanisms of musculoskeletal and cardiac development and adaptation, neural and endocrine control mechanisms, and neural integration and sensory transduction.

control mechanisms, and neural integration and sensory transduction.

### Admission

Applicants for graduate study are expected to have completed an undergraduate degree in the biological or physical sciences. At the time of admission, you should have completed one year of coursework in each of the following: biology, calculus, inorganic chemistry, organic chemistry/biochemistry, and physics. A grade-point average of at least 3.0 (B) in all upper division undergraduate coursework is required, as are scores on the Graduate Record Examination (GRE). A departmental faculty committee considers applicants on the following bases: (1) prior scholastic performance, (2) three letters of recommendation, and (3) applicant's statement of purpose, which should include (a) relevant background or preparation, (b) field of emphasis, specific study interests, and type of research sought, (c) expectations, goals, degree objective, (d) the names of departmental faculty members whose research area parallels the study interest.

A list of faculty names and research interests is available from the Department of Physiological Science, 2121 Life Sciences, UCLA, Los Angeles, CA 90024-1606. Applicants are encouraged to communicate directly with the faculty; personal interviews are required for Ph.D. applicants.

New Ph.D. students may also be admitted through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280.

Applications for all terms must be submitted by Fall Quarter deadlines, since applications for all terms are reviewed only in January/February each year.

## Master of Science Degree

### Course Requirements

The Master of Science in Physiological Science requires nine courses, including a second-level statistics or research design course. A minimum of six of the nine courses must be graduate-level (200) courses, toward which two 596 courses may be applied. Courses 597 and 598 may not be applied toward any of the course requirements for the degree; however, there is no limit on the number of times you may enroll in course 597 or 598.

Coursework is selected by you and your advisory committee, with approval by the graduate affairs committee. All coursework must be completed by the end of your second year.

### Thesis Plan

If you elect the thesis plan for the master's degree, you must report the results of an original research investigation. Under the guidance of the thesis committee, you must propose a problem area or outline of study, conduct original research in a specific area, and report the results. With committee approval, you may submit either a thesis manuscript or a manuscript suitable for publication.

## Comprehensive Examination Plan

Students who elect this plan must achieve a passing mark on a comprehensive examination. The general purpose of the plan is that students acquire a thorough understanding of a reasonably broad problem area, which must be specified in consultation with an adviser. The selection of courses in the department and the related field must be pertinent to the problem area, and justification is required with the petition for advancement to candidacy.

While a written examination is required, the committee may use additional means to evaluate your competency.

If you fail the comprehensive examination, you may not repeat it until the following term. Only one repetition is allowed.

## Ph.D. Degree

The goal of the department is to produce Ph.D. candidates who demonstrate academic breadth in physiological science and have the ability to design, perform, and conduct high-quality academic research that leads to the successful defense of a dissertation.

## Course Requirements

At least nine courses are required for the doctoral degree; two 596 courses may be applied toward the degree requirements. Coursework is selected by you and your advisory committee, with approval by the graduate affairs committee.

## First- and Second-Year Doctoral Review

At the end of your first and second years, you meet with your advisory committee which reviews your progress and makes recommendations to the graduate affairs committee concerning your doctoral coursework. At the end of your second year, you prepare a progress report for the same committee detailing your laboratory research experience and any abstract presentations or publications.

## Teaching Experience

You must complete two terms as a teaching assistant. All teaching evaluations become a permanent part of your departmental record.

## Qualifying Examinations

Your breadth of knowledge is demonstrated when you pass the two-day written preliminary examination at the end of your first year that tests your knowledge of and ability to interpret information on physiological systems. The examination, administered in the week preceding Fall Quarter of your second year, is scored (1) passed at the Ph.D. level of achievement, (2) passed at the master's level of achievement, requiring you to pass a second examination at the Ph.D. level within the following six months, or (3) failed, requiring you to leave the program. If you receive a master's level of achievement score, you may leave the Ph.D. program and complete the M.S. degree.

After successfully passing the departmental written qualifying examination, and before advancement to candidacy, the University Oral Qualifying Examination is conducted by your doctoral committee and must be passed by the end of your fourth year of study. You must present a written research proposal of your intended dissertation project to your advisory committee and one member of the graduate affairs committee at least two weeks prior to the examination. You are expected to have formulated a research plan, have demonstrated appropriate research capability, and be knowledgeable of the relevant research literature. If you do not pass, the examination may be rescheduled once at the discretion of your doctoral committee.

## Dissertation/Final Oral Examination

After advancement to candidacy, you must complete and submit a dissertation which meets the approval of your doctoral committee. Your committee also determines whether a final oral examination (a defense of your dissertation) is required.

## Lower Division Courses

**3. Introduction to Human Physiology.** Lecture, three hours; discussion, one hour. Not open to physiological science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Presentation of integrative approach to basic anatomy and physiology of major organs and organ systems. P/NP or letter grading.

Mr. Barnard, Mr. Sternlicht

**5. Issues in Human Physiology: Diet and Exercise.** (Formerly numbered Kinesiology 5.) Lecture, three hours; discussion, one hour. Not open to physiological science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

Mr. Barnard, Mr. Sternlicht

**6. The Human Machine: Physiological Processes.** Not open to physiological science majors. General introduction to human musculoskeletal, cardiovascular, and respiratory systems and their function, with special emphasis on mechanical and physiological aspects of homeostasis and environmental interaction. Application of physical principles in selected areas of biomechanics, hemodynamics, ergonomics, orthopedics, and robotics. P/NP or letter grading.

Mr. Salem

**13. Introduction to Human Anatomy (6 units).** (Formerly numbered Kinesiology 13.) Lecture, four hours; laboratory, four hours. Not open to physiological science majors; any combination of courses 13 and 17A or 17B or 17C is equivalent to eight units. Structural survey of human body, including skeletomuscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. (Sp)

**17A. Musculoskeletal Anatomy and Biomechanics (5 units).** (Formerly numbered Kinesiology 17A.) Lecture, three hours; laboratory, four hours. Enforced prerequisite: Physics 6A. Limited to physiological science majors. Thorough study of skeletal, articular, muscular, and connective tissue systems, including components of biomechanical function and physiological adaptation. Some emphasis on musculoskeletal structure to movement capabilities. Laboratory includes examination of prosected human cadaver specimens.

Mr. Salem (F)

**17B. Human Visceral Anatomy (2 units).** (Formerly numbered Kinesiology 17B.) Lecture, two hours; laboratory, one hour. Enforced prerequisite: course 17A. Limited to physiological science majors. Structural survey of human circulatory, respiratory, digestive, urinary, and reproductive systems. Laboratory includes examination of human cadaver specimens.

Mr. Salem (W)

**17C. Human Neuroanatomy (2 units).** (Formerly numbered 17B.) Lecture, two hours; laboratory, one hour. Enforced prerequisite: course 17A. Limited to physiological science majors. Introduction to structure of human nervous system, with emphasis on cellular neuroanatomy, chemical neuroanatomy, regional neuroanatomy, and basic neuronal circuits. Laboratory includes examination of human cadaver specimens.

Ms. Smith, Mr. Turman (W)

**90. Introduction to Physiological Science (2 units).** (Formerly numbered Kinesiology 90.) Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. P/NP grading. (W)

## Upper Division Courses

**111A-111B-111C. Foundations in Physiological Science (6 units each).** (Formerly numbered Kinesiology 111A-111B-111C.) Lecture, four hours; laboratory, two hours:

**111A.** Prerequisites: courses 17B, 17C, Biology 9, Chemistry 132A, Physics 6B. Introduction to principles of neurophysiology: cellular and systems neuroscience, including factors controlling membrane excitability, neuronal circuits, sensorimotor regulation, special senses, cortical functions, and neuronal plasticity.

Mr. Chandler, Mr. Glanzman, Ms. Smith (Sp)

**111B.** Prerequisites: course 111A or M180A, Chemistry 132B. Principles of muscular, cardiovascular, and pulmonary physiology.

Mr. Feldman, Mr. Henderson, Mr. Tidball (F)

**111C.** Prerequisites: course 111A or M180A, Chemistry 153A. Principles of gastrointestinal, renal, endocrine, and reproductive physiology.

Mr. Fain, Mr. Schlinger (W)

**133. Exercise Physiology (5 units).** (Formerly numbered Kinesiology 133.) Lecture, three hours; laboratory, two hours; outside study, 10 hours. Prerequisite: course 111C. Physiological responses and adaptations to acute and chronic exercise. Mr. Sternlicht

**C135. Dynamical Systems Modeling of Physiological Processes (5 units).** Lecture, four hours. Prerequisite: course 111B. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C235.

Mr. Garfinkel

**136. Exercise and Cardiovascular Function.** (Formerly numbered Kinesiology 136.) Prerequisite: course 133. Consideration of acute and chronic effects of exercise in diagnosis, prevention, and treatment of cardiovascular disorders. Mr. Barnard

**C137. Growth and Adaptation in Cardiovascular System.** (Formerly numbered 137.) Prerequisites: course 111B, Biology 100A. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C237. Mr. Henderson

**138. Neuromuscular Physiology and Adaptation.** (Formerly numbered Kinesiology 138.) Prerequisites: course 111B, Chemistry 153A. Cellular responses to acute and chronic exercise and environmental states of neuromuscular system. Mr. Edgerton

**142. Sensorimotor Physiology.** (Formerly numbered Kinesiology 142.) Lecture, three hours; laboratory, two hours. Prerequisite: course 111A or M180A. Not open to students with credit for former Kinesiology 126. Neurophysiological principles governing control of limb movements, including regulation by spinal cord circuits, cerebellum, basal ganglia, and sensorimotor cortices. Ms. Smith

**C143. Neuromotor Control of Posture and Movement.** (Formerly numbered Kinesiology C143.) Prerequisite: course 142 or M180B. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C243. Ms. Smith

**C144. Neural Control of Physiological Systems.** (Formerly numbered 144.) Prerequisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C244. Mr. Feldman

**C145. Neural Mechanisms Controlling Movement.** (Formerly numbered Kinesiology 145.) Prerequisite: course 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C245. Mr. Chandler

**147. Neurobiology of Learning and Memory (5 units).** (Formerly numbered Kinesiology 147.) Lecture, four hours; research demonstration, one hour; outside study, 10 hours. Prerequisite: course 111A or M180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms. Mr. Glanzman

**148. Advanced Neurophysiology.** (Formerly numbered Kinesiology 148.) Prerequisite: course 111A or M180A. Advanced treatment of selected topics in cellular and systems neurophysiology.

**150. Musculoskeletal Mechanics (5 units).** Lecture, three hours; outside study, 12 hours. Prerequisite: course 111B. Introduction to biomechanical analysis of human musculoskeletal system. Examination of cinematographic, force platform, and digital computer techniques to characterize and evaluate kinematic and kinetic components of movement. Topics include biostatistics, biodynamics, and modeling. Mr. Whiting

**151. Limb Dynamics.** (Formerly numbered Kinesiology 151.) Lecture, three hours; laboratory, two hours. Prerequisite: course 111B. Not open to students with credit for former Kinesiology 122. Kinematic and kinetic principles underlying limb movements. Mr. Whiting

**C152. Skeletal-Arthrodial Adaptation.** (Formerly numbered Kinesiology C152.) Prerequisite: course 111B. Anatomical, physiological, and mechanical characteristics of skeletal and diarthrodial joint structures in normal and abnormal loading environments. Concurrently scheduled with course C252. Mr. Salem

**153. Dissection Anatomy.** (Formerly numbered Kinesiology 153.) Lecture, two hours; laboratory, six hours. Prerequisites: course 111B, departmental application. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply. Mr. Salem

**155. Development and Structure of Musculoskeletal Soft Tissue.** (Formerly numbered Kinesiology 155.) Prerequisite: course 111B. Development, histology, cell biology, and biochemistry of musculoskeletal soft tissues. Integration of knowledge of muscle and connective tissue structure and function on each of these levels to understand organization and physiological behavior of the intact system. Mr. Tidball

**M173. Anatomy and Physiology of Sense Organs.** (Same as Biology M173.) Lecture, three hours; discussion, one hour. Prerequisites: courses 111A (or Biology 171) or M180A-M180B (or Biology M175A-M175B) or equivalent. Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates. Mr. Fain, Mr. Narins, Mr. Simmons

**M180A-M180B-M180C. Neuroscience: From Molecules to Mind (5 units each).** (Formerly numbered Kinesiology M180A-M180B-M180C.) (Same as Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour;

**M180A. Cellular Mechanisms.** Prerequisites: Biology 9, Chemistry 132A, Physics 3B or 6B or 8C; any combination of Physiological Science 111A and M180A is equivalent to eight units. Cellular physiology, pharmacology, molecular biology, and development of nervous system. Mr. Feldman, Mr. Watson (F)

**M180B. Integrative Mechanisms.** Prerequisite: course 111A (or Biology 171 or Psychology 115) or M180A (or Biology M175A or Neuroscience M101A or Psychology M117A); any combination of course M180B and former Kinesiology 126 is equivalent to 10 units. Central and reflex mechanisms of homeostasis, sensory information processing, and motor control. Mr. Levine, Mr. Schein (W)

**M180C. Neural Bases of Behavior.** Prerequisite: course 111A (or Biology 171 or Psychology 115) or M180B (or Biology M175B or Neuroscience M101B or Psychology M117B). Neural mechanisms underlying motivation, learning, and cognition. Mr. Gallistel, Mr. Glanzman (Sp)

**M181. Biological Bases of Psychiatric Disorders.** (Same as Biology M191 and Psychiatry M191.) Lecture, three hours; outside study, nine hours. Prerequisite: course 111A or M180A or Biology M175A or Neuroscience M101A or Psychology M117A or consent of instructor. Underlying brain systems involved in a number of psychiatric neurologic disorders, including schizophrenia, depression, obsessive/compulsive disorder, as well as neurologic disorders exemplified by both clinical treatment and experimental research. Mr. Levine and the Staff

**191A-191Z. Proseminars: Physiological Science.** (Formerly numbered Kinesiology 191A-191Z.) Prerequisite: upper division standing. Limited to 15 students. Advanced study of special topics. May be repeated for credit with topic change.

**193. Field Studies in Physiological Science.** (Formerly numbered Kinesiology 193.) Lecture, one hour; fieldwork, six to eight hours. Prerequisites: senior standing, departmental application. Supervised field studies in specific careers related to physiological science. May not be repeated for credit and may not be applied toward elective requirements for the major. P/NP grading.

**195. Honors Research in Physiological Science (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: physiological science honors program standing. Preparation for honors thesis (courses 199HA, 199HB). Instruction in principles of scientific method and writing; critique of current journal articles and research projects. Students present individual research proposal with background literature. P/NP grading. Mr. Tidball (W)

**196A-196B. Laboratory Practicum in Physiological Science (2 units each).** (Formerly numbered Kinesiology 196A-196B.) Laboratory, four hours; outside study, eight hours. Prerequisites or corequisites: course 153, departmental application. Supervised practicum and training for advanced students who serve as undergraduate assistants in basic anatomy course in preparation of laboratory materials and innovative projects. May be repeated for credit but may not be applied toward elective requirements for the major. Mr. Salem

**197A-197Z. Variable Topics in Physiological Science.** (Formerly numbered Kinesiology 197A-197Z.) Prerequisite: upper division standing. Variable topics courses which cover specific subjects of special interest. May be repeated for credit with topic change.

**199. Special Studies in Physiological Science.** (Formerly numbered Kinesiology 199.) Prerequisites: physiological science major with advanced junior standing and 3.0 GPA in the major, or senior standing, courses 111A-111B, consent of instructor and department chair. Directed independent research with a faculty member. Course application (available in 2834 Slichter Hall) must be submitted to the chair during first week of classes. Only four units of course 199/199H may be applied toward elective requirements for the major.

**199HA. Honors Thesis.** (Formerly numbered Kinesiology 199HA.) Prerequisites: courses 111A-111B, physiological science honors program standing. Directed independent research for departmental honors with a faculty member, involving definition of research topic and extensive reading and research in the field of proposed honors thesis. In Progress grading (credit to be given only on completion of course 199HB).

**199HB. Honors Thesis.** (Formerly numbered Kinesiology 199HB.) Prerequisite: course 199HA. Continued reading and research that culminate in final honors thesis. Only four units of course 199/199H may be applied toward elective requirements for the major.

**199HC. Advanced Studies for Honors Thesis.** Prerequisite: course 199HB. Not required for honors thesis. Additional course to provide further research opportunities for departmental honors students.

## Graduate Courses

**M202. Cellular Neurophysiology.** (Same as Neuroscience M202.) Lecture, three hours; discussion, one hour. Prerequisites: course 111A or M180A or Physics 6B or equivalent, Biology 166 or 171 or equivalent. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Mr. Fain

**M205. Behavioral and Systems Neuroscience.** (Same as Neuroscience M205 and Psychology M205Z.) Lecture, three hours. Prerequisites: Neuroscience M201, M202, M203, and M204, or consent of instructor. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions. Mr. Feldman, Mr. Gallistel

**206. Metabolism of Organ Systems Affected by Exercise.** (Formerly numbered Kinesiology 206.) Prerequisite: Chemistry 132B/132BL. Key regulatory mechanisms of metabolism involved in exercise response and adaptation.

**211. Exercise Cardiovascular Physiology.** (Formerly numbered Kinesiology 211.) Prerequisite: consent of instructor. Attention to cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training. Mr. Barnard, Mr. Henderson

**M212. Introduction to Cellular Physiology and Biophysics (6 units).** (Same as Biology M237 and Physiology M212.) Lecture, five hours. Prerequisites: course 111A or Physiology M209A or equivalent, graduate standing; for upper division undergraduates: consent of instructor. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

**M213. Principles of Integrative Physiology (6 units).** (Same as Physiology M213.) Lecture, four hours; discussion, two hours. Prerequisite: graduate standing; for upper division undergraduates: consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads. Mr. Diamond, Mr. Feldman

**M225. Comparative Endocrinology: Molecular to Behavioral.** (Same as Physiology M225.) Lecture, two hours; discussion, two hours. Limited to graduate students. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Mr. Schlinger, Ms. Wayne

**C235. Dynamical Systems Modeling of Physiological Processes (5 units).** (Formerly numbered Kinesiology 235.) Lecture, four hours. Prerequisite: consent of instructor. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C135.

Mr. Garfinkel

**C237. Growth and Adaptation in Cardiovascular System.** Prerequisites: course 111B, Biology 100A. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C137.

Mr. Henderson

**M240. Neural Systems for Motor Control.** (Formerly numbered Kinesiology M240.) (Same as Neuroscience M262.) Prerequisite: course C143 or consent of instructor. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

Ms. Smith

**C243. Neuromotor Control of Posture and Movement.** (Formerly numbered Kinesiology C243.) Prerequisite: course 142 or M180B. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C143.

Ms. Smith

**C244. Neural Control of Physiological Systems.** Prerequisite: consent of instructor. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C144.

Mr. Feldman

**C245. Neural Mechanisms Controlling Movement.** Prerequisite: course 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C145.

Mr. Chandler

**M247. Neural Control of Cardiopulmonary Function.** (Formerly numbered Kinesiology M247.) (Same as Neuroscience M247.) Lecture, two hours; discussion, two hours. Prerequisites: courses 111A, 111B or 133 or 142 or M180A, M180B or equivalent. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanism underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

Mr. Feldman

**250A. Muscle Dynamics.** (Formerly numbered Kinesiology 250A.) Prerequisite: course 151. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques.

**250B. Musculoskeletal Mechanics.** (Formerly numbered Kinesiology 250B.) Prerequisites: course 151, Mathematics 3A, 3B. Mechanical parameters of moving human musculoskeletal system, including use of cinematographic, force platform, and digital computer techniques. Topics include biostatistics, biodynamics, and empirical data modeling.

**C252. Skeletal-Arthrodiad Adaptation.** (Formerly numbered Kinesiology C252.) Prerequisite: course 111B. Anatomical, physiological, and mechanical characteristics of skeletal and diarthrodial joint structures in normal and abnormal loading environments. Concurrently scheduled with course C152.

Mr. Salem

**M255A-M255D. Seminars: Neural and Behavioral Endocrinology (3 units, 2 units, 3 units, 2 units).** (Same as Anatomy M255A-M255D and Psychology M294A-M294D.) Lecture, three hours. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function. In Progress grading.

Mr. Arnold, Mr. Schlinger

(W, M255A, M255C; Sp, M255B, M255D)

**M260. Neuromuscular Factors in Movement Regulation.** (Formerly numbered Kinesiology M260.) (Same as Neuroscience M260.) Prerequisite: course 138 or consent of instructor. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

Mr. Edgerton

**M263. Neuronal Mechanisms Controlling Rhythmic Movements.** (Formerly numbered Kinesiology M263.) (Same as Neuroscience M263.) Prerequisite: course C145 or consent of instructor. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

Mr. Chandler

**291A-291B-291C. Seminars: Cardiovascular Function and Adaptation (2 to 4 units each).** (Formerly numbered Kinesiology 291A-291B-291C.) Prerequisite: consent of instructor. Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar.

Mr. Barnard, Mr. Henderson

**293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation (2 to 4 units each).** (Formerly numbered Kinesiology 293A-293B-293C.) Prerequisites: courses 138 and M260, or consent of instructor. Selected topics on muscular determinants of movement, metabolic aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar.

Mr. Edgerton

**M294A-M294B-M294C. Seminars: Neural Control of Movement (2 to 4 units each).** (Formerly numbered Kinesiology M294A-M294B-M294C.) (Same as Neuroscience M265A-M265B-M265C.) Prerequisite: course M240 or M247 or M263 or consent of instructor. Selected topics on neural determinants of movement behavior. Students required to present two-hour seminar.

Mr. Chandler, Mr. Feldman, Ms. Smith

**M295A-M295B-M295C. Seminars: Cellular Neuroscience (2 to 4 units each).** (Same as Neuroscience M266A-M266B-M266C.) Prerequisite: course M202 or consent of instructor. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar.

Mr. Fain, Mr. Feldman, Mr. Glanzman

**296AA-296ZZ. Research Seminars: Physiological Science (2 units each).** Prerequisite: consent of instructor. Review of literature, discussion of original research, and analysis of current topics in physiological science. May not be applied toward M.S. or Ph.D. course requirements. May be repeated for credit. S/U grading.

**297A-297B-297C. Seminars: Muscle Cell Biology (2 to 4 units each).** Prerequisite: consent of instructor. Selected topics in muscle cell biology. Students required to present two-hour seminar.

Mr. Tidball

**375. Teaching Apprentice Practicum (1 to 4 units).** (Formerly numbered Kinesiology 375.) Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. In-Service Practicum for Teaching Assistants in Physiological Science (2 units).** (Formerly numbered Kinesiology 495.) Prerequisite: consent of instructor. Required of all teaching assistants. Supervised practicum in teaching laboratory courses in physiological science; material preparation and use of teaching aids. May not be applied toward degree requirements. S/U grading. (F)

**501. Cooperative Program (2 to 8 units).** (Formerly numbered Kinesiology 501.) Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Individual Studies for Graduate Students (2 to 8 units).** (Formerly numbered Kinesiology 596.) Petition signed by faculty sponsor, graduate adviser, and graduate affairs committee chair must be submitted prior to second week of class. Eight units may be taken for credit and may be applied toward minimum of six graduate courses required for M.S. Eight units may be applied toward the graduate course requirement in area of specialization for Ph.D.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 16 units).** (Formerly numbered Kinesiology 597.) To be arranged with faculty member serving as student's comprehensive examination chair or doctoral committee chair. May not be applied toward M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 16 units).** (Formerly numbered Kinesiology 598.) To be arranged with faculty member serving as student's thesis committee chair. May not be applied toward M.S. course requirements. May be repeated as necessary. S/U grading.

**599. Research for and/or Preparation of Ph.D. Dissertation (2 to 16 units).** (Formerly numbered Kinesiology 599.) May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.

## Political Science

 Michael Thies, Ph.D.

## Scope and Objectives

The undergraduate program in political science aims to provide understanding of basic political processes and institutions as these operate in different national and cultural contexts. It also covers the interaction between national states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

The graduate program leads to the Ph.D. degree in Political Science (a master's degree may be earned in the process of completing Ph.D. requirements). It is designed to give stu-

dents a strong foundation in the discipline while enabling them to acquire additional skills for advancing their professional careers.

## Bachelor of Arts Degree

Students officially admitted to the political science major for Fall Quarter 1994 and thereafter are expected to fulfill the requirements listed below. Continuing students admitted prior to Fall Quarter 1994 should consult the 1993-94 *UCLA General Catalog*.

### Prepolitical Science Major

All students intending to major in political science must enroll as prepolitical science majors. After completion of preparation for the major courses, you need to petition to enter the major in the Undergraduate Office, 4256 Bunche Hall.

### Preparation for the Major

**Required:** Four lower division courses from Political Science 10, 20, 30, 40, 50. These lower division courses are prerequisites to upper division courses and 10, 20, 40, and 50 are required in those fields designated as your concentration or distribution field. You must also take Political Science 6 or one of the following statistics courses: Anthropology 80, Economics 40, Geography 40, Psychology 41, Social Sciences 40, Sociology 18, Statistics 50.

You must complete all premajor courses with a 2.0 grade-point average by the time you attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

### The Major

**Required:** Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. You are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150, 190), psychology (except Psychology 115, 116), sociology. These courses must be taken for a letter grade. You are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are organized into four fields: (I) political theory, (II) international relations, (III) American politics, and (IV) comparative politics.

In fulfilling the requirement of 10 upper division political science courses, you must satisfy the following:

- (1) A **concentration** in one field by completing the lower division course and at least four upper division courses in that field.
- (2) A **distribution** of the lower division course and two upper division courses in each of two other fields (four upper division courses).
- (3) Two additional elective courses in political science to comprise the total of 10.

**Field Concentration Requirements** — The lower division course is prerequisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for the field concentration are as follows:

- (I) *Political Theory* — Political Science 10 and any four courses in Field I.
- (II) *International Relations* — Course 20 and any four upper division courses in Field II.
- (III) *American Politics* — Course 40 and any four courses in Field III.
- (IV) *Comparative Politics* — Courses 50, 168, and any three additional courses in Field IV. Courses 115 and 118 may also be applied toward concentration in this field.

Courses 119, 139, 149, and 169 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 195A-195B-195C and 199 may not be applied toward either the concentration or distribution requirement.

### Undergraduate Seminars

Each term the department offers a series of seminars (Political Science C197A-C197F) in each field. The prerequisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

### Honors Program

The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. You should have substantial experience in writing research papers and take at least one seminar course in the Political Science C197 series before you enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A-195B-195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, and 169) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.

### M.A. and Ph.D. Degrees

The aim of the graduate program is to train scholars in the discipline of political science. The department only accepts students seeking the Ph.D. degree (a master's degree may be earned as part of the process of completing the requirements for the Ph.D.).

## Admission

In addition to University minimum requirements, the department requires three letters of recommendation, scores on the General Test of the Graduate Record Examination (GRE), and a sample of your analytical writing skills (e.g., senior or M.A. thesis, term paper). Applicants are selected on the basis of perceived promise. Prospective students may write for departmental brochures to the Graduate Studies Office, Department of Political Science, 4289 Bunche Hall, UCLA, Los Angeles, CA 90024-1472. The department does not have an application form in addition to the one used by UCLA Graduate Application Processing. The deadline for receipt of all application materials is December 15 prior to the Fall Quarter in which you plan to register.

## Fields of Study

Five fields of study are offered to graduate students in the department: political theory, international relations, American politics, comparative politics, and formal theory and quantitative methods.

## Foreign Language or Research Methodology Requirement

There is no foreign language requirement for the M.A. degree.

Prior to advancement to candidacy for the Ph.D., you must fulfill one of the following requirements:

(1) **Foreign Language** — You may fulfill this requirement by obtaining a minimum score of 550 on a Graduate School Foreign Language Test (GSFLT). In languages for which no GSFLT is given, you may take a department examination to test your proficiency at a level comparable to a GSFLT score of 550. You may also satisfy the requirement by completing, with a grade of B or better, the final course in a two-year sequence of college courses in a foreign language.

(2) **Mathematics, Mathematical Economics, or Statistics** — You must complete either (a) a sequence of three courses in mathematics or mathematical economics at or above Mathematics 31A (Mathematics 38A, 38B may not be applied) or (b) a sequence of three courses in statistics at or above the level of Political Science 200B. Courses applied toward this requirement may not be applied toward any other course requirements.

You are required to pass the foreign language or methodology requirement before you can be advanced to candidacy for the Ph.D., but you may pass the requirement after the University Oral Qualifying Examination.

## Course Requirements

You must take Political Science 200A and 200AL, four courses in each of two major fields, one course in each of two minor fields, and four additional graded courses, including no more than two independent study courses.

Fields decide which courses meet major and minor field requirements.

Of the 16 required courses, you must take at least seven during your first year of graduate study and 12 by the end of your second year.

**Transfer Students** — With the approval of the graduate adviser and the dean of the Graduate Division, graduate courses taken elsewhere may be applied toward departmental course requirements. The maximum number of such courses is six if you transfer to UCLA with a master's degree in political science and choose to forego another master's degree from UCLA. In all other cases, the maximum is four for courses taken at another UC campus and two for courses taken outside the UC system.

## Research Paper Requirement

You must submit two research papers, one by the beginning of your seventh term of graduate study, both by the beginning of your eighth term. You may also use these papers to meet course requirements. Each is graded not qualified, qualified, or qualified with distinction by a standing committee from all five fields. This committee may solicit the opinions of nonmembers. If a paper is graded not qualified, you may submit a revised version or another paper, once only, at most six months after your first submission.

For the Ph.D., you must receive at least a grade of qualified on both papers. You receive the M.A. degree after successful completion of 12 of the 16 required courses with an average grade of 3.0 or better and a grade of qualified or qualified with distinction on one paper.

Papers are evaluated for knowledge of subject, originality of ideas, and craftsmanship of research. They are also evaluated for conciseness — good ones may vary in length but are not expected to exceed 30 pages. They need not be publishable, but in their structure and format and in their coverage of topics and tasks are expected to resemble papers published in peer-reviewed journals of their fields. The committee evaluating your papers assumes that you have not devoted all of your research time to two papers but have selected for submission, or for revision and submission, the best two from a portfolio of several seminar papers.

## Research Design and Oral Examination

By your tenth term of graduate study, you must present a research design for your dissertation in a seminar or colloquium. It need not be the version you submit for the University Oral Qualifying Examination.

You may take that examination after you have completed your course and paper requirements and written a dissertation proposal accepted by your research adviser. You must take it no later than your twelfth term of graduate study, and the examination committee

must have your proposal at least two weeks before the examination. The committee judges the feasibility and worth of your project and your ability to undertake it, and may recommend changes in your research design.

After successful completion of the University Oral Qualifying Examination and the language or methodology requirement, you are advanced to candidacy. This must take place no later than your fifteenth term of graduate study.

## Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

## Dissertation/Final Oral Examination

Approval of a written dissertation by your doctoral committee constitutes the final requirement for the Ph.D. degree in Political Science.

The doctoral committee for each candidate decides whether or not a final oral examination should be required.

## Lower Division Courses

**6. Introduction to Quantitative Research.** Lecture, three hours; discussion, one hour. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as an aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration. Mr. Petrocik, Mr. Zaller

**10. Introduction to Political Theory.** Lecture, three hours; discussion, one hour. Exposition and analysis of selected political theorists and concepts from Plato to the present.

Mr. Ashcraft, Mr. Campbell, Mr. Rapoport

**20. World Politics.** Lecture, three hours; discussion, one hour. Required of all students concentrating in Field II. Introduction to problems of world politics.

Mr. Spiegel

**30. Introduction to Political Economy.** Lecture, three hours; discussion, one hour. Introduction to political economy, especially application of economic reasoning to political and social phenomena. P/NP or letter grading. Mr. Frieden, Ms. Lohmann

**40. Introduction to American Politics.** Lecture, three hours; discussion, one hour; outside study, eight hours. Basic institutions and processes of democratic politics. Treatment of themes such as constitutionalism, representation, participation, and leadership coupled with particular emphasis on the American case. P/NP or letter grading.

Mr. Gilliam, Mr. Schwartz

**50. Introduction to Comparative Politics.** Lecture, three hours; discussion, one hour. Comparative study of constitutional principles, governmental institutions, and political processes in selected countries. P/NP or letter grading. Mr. Lofchie, Mr. Sklar

**88A-88D. Lower Division Seminars.** (Formerly numbered 88A-88F.) Seminar, three hours. Limited to freshmen/sophomores. Opportunity to enhance writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C-, D, or F. P/NP or letter grading. **88A.** Political Theory; **88B.** International Relations; **88C.** Politics; **88D.** Comparative Politics.

## Upper Division Courses

Prerequisite for all upper division courses: upper division standing or consent of instructor.

**102. Statistical Analysis of Political Data.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 6. Introduction to statistical inference. Topics include measures of central tendency, elementary probability theory, common probability distributions, least-squares and maximum likelihood estimation, confidence intervals and statistical tests, comparison of means, analysis of variance, and multiple regression and correlation. Statistical techniques and topics illustrated with applications to a variety of political data. Mr. Petrocik, Mr. Zaller

**104A-104B. Introduction to Survey Research.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 6. Courses in fundamentals of survey research as a method. **104A.** Sampling theory and methods, writing of questions, questionnaire construction, and interviewing. Attitudes, attitude measurement, and attitude change. Participation in formulation of research problem. **104B.** Prerequisite: course 104A. Conducting a survey. Development of survey questionnaire, designing a sample, collecting interviews, maintaining quality control, and coding interviews for machine tabulation. Performance of computer-aided analysis of some part of data and submission of written report of that research.

**M105. Economic Models of Public Choice.** (Same as Economics M135.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: Economics 11, any lower division political science course, and junior/senior standing, or consent of instructor. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining. Ms. Bawn, Ms. Lohmann

**M106. Economic Models of Political Conflict and Conflict Resolution.** (Same as Economics M136.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: Economics 11, any lower division political science course, and junior/senior standing, or consent of instructor. Biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Models of the onset and termination of conflict. Conduct of war: strategy and tactics.

### Field I: Political Theory

**111A-111B-111C. History of Political Thought.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Exposition and critical analysis of major political philosophers and schools:

**111A.** Ancient and Medieval Political Theory from Plato to Machiavelli. Mr. Campbell

**111B.** Early Modern Political Theory from Hobbes to Bentham. Mr. Ashcraft, Mr. Campbell

**111C.** Late Modern and Contemporary Political Theory from Hegel to the Present.

Mr. Ashcraft, Mr. Wolfenstein

**112. Nature of the State.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Systematic analysis of modern concepts and problems of political association. Ms. Golden

**113. Problems in 20th-Century Political Theory.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Study and interpretation of theorists who have focused their analyses on social and political problems of the 20th century. Mr. Rocco

**114A-114B. American Political Thought.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**114A.** Exposition and critical analysis of American political thinkers from the Puritan period to 1865.

**114B.** Prerequisite: course 114A or consent of instructor. Exposition and critical analysis of American political thinkers from 1865 to the present.

**115. Theories of Political Change.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Critical examination of theories of political change, relation of political change to changes in economic and social systems, and relevance of such theories for experience of both Western and non-Western societies. May be applied toward either Field I or IV. Mr. Lofchie

**116. Marxism.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Critical analysis of origins, nature, and development of Marxist political theory. Mr. Ashcraft, Mr. Wolfenstein

**117. Jurisprudence.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. May be applied toward either Field I or III.

**118. Political Violence.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Examination of one or several different uses of violence in the revolutionary process: demonstrations, mass uprisings, coup d'etat, assassination, and terrorism. May be applied toward either Field II or IV. Mr. Rappoport, Mr. Tong

**119A-119Z. Special Studies in Political Theory.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 10, one additional course in Field I, consent of instructor. Intensive examination of one or more special problems appropriate to political theory. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

### Field II: International Relations

**120. Foreign Relations of the U.S.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Survey of factors and forces entering into formation and implementation of American foreign policy, with special emphasis on contemporary problems. Mr. Frieden, Ms. Larson, Mr. Rosecrance

**121. Studies in Formulation of American Foreign Policy.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Study of formation of American foreign policy with respect to individual cases. Consult *Schedule of Classes* for topics to be offered in a specific term. Mr. Spiegel

**122. World Order.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Study of problems of the international system seen as a community capable of cooperation and development. Mr. Wilkinson

**123A-123B. International Law.** (Formerly numbered 175A-175B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. Study of nature and place of international law in conduct of international relations. May be offered in consecutive terms or simultaneously. If offered consecutively, course 123A is prerequisite to 123B, and students may take 123A alone for four units credit. If offered simultaneously, student must take both courses for eight units. Maximum of four units may be applied toward Field II. Mr. Wilkinson

**124. International Political Economy.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Study of political aspects of international economic issues. Mr. Frieden

**125. Arms Control and International Security.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Arms control in context of international security in the nuclear age. Nuclear arms race; relationship between deterrence doctrines and nuclear war; roles of technology and ideology; nuclear proliferation; outer space.

**126. Peace and War.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Theory and research on causes of war and conditions of peace. Ms. Larson, Mr. Wilkinson

**127A-127B. Atlantic Area in World Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**127A.** Western Europe. External relations of United Kingdom, West Germany, France, Italy, and other European members of NATO, in regard to European security in context of the Atlantic Alliance.

**127B.** U.S. and Europe. Prerequisite: course 127A or consent of instructor. Relations between the U.S. and Western European members of the Atlantic Alliance, in context of U.S./Soviet relations.

**128A-128B. Soviet Sphere in World Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Course 128A or consent of instructor is prerequisite to 128B. Contemporary survey of foreign policies and aspirations of the Soviet Union and other states in Soviet bloc; analysis of content and effects of Communist doctrine affecting relations between Soviet and democratic spheres. Mr. Anderson, Mr. Korbonksi

**129. Comparative Foreign Economic Policy.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Examination of foreign trade, monetary, and investment policies of the U.S., Japan, France, and Federal Republic of Germany since 1945.

**130. Politics of Latin American Economic Development.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Interaction of international and domestic factors in political and economic evolution of Latin America. Mr. Frieden

**131. Latin American International Relations.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Major problems of Latin American international relations and organization in recent decades. Mr. Gonzalez

**132A-132B. International Relations of the Middle East.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**132A.** Prerequisite: course 20. Contemporary regional issues and conflicts, with particular attention to inter-Arab politics, Arab-Israeli problem, and Persian Gulf area. Mr. Binder

**132B.** Role of the great powers in the Middle East, with emphasis on American, Soviet, and West European policies since 1945. Mr. Binder

**133. International Relations of Sub-Saharan Africa.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Contemporary regional issues and conflicts; foreign policies of African states; role of external powers. Mr. Keller, Mr. Lofchie, Mr. Sklar

**134. Foreign Policy Decision Making and Tools of Statecraft.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 120 or consent of instructor. Contrasts purposive and process models of individual and group decision making. Impact of strategic interaction and situational factors on foreign policy decision making. Implications for policy choice of tools of statecraft (i.e., threats/promises, military/economic/diplomacy). P/NP or letter grading. Mr. Stein

**135. International Relations of China.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Relations of China with its neighbors and the other powers, with emphasis on contemporary interests and policies of China vis-à-vis the U.S. and Soviet Union. Mr. Baum

**136. International Relations of Japan.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Foreign policies of Japan and interests and policies of other countries, particularly the U.S., as they relate to Japan.

**137A-137B. International Relations Theory.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**137A.** Examination of various theoretical approaches to international relations. P/NP or letter grading.

**137B.** Alternative approaches to analysis of international politics and their application to historical and contemporary cases. Mr. Stein

**139A-139Z. Special Studies in International Relations.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: two courses in Field II, or course 20 and one course in Field II, and consent of instructor. Intensive examination of one or more special problems appropriate to international relations. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major:

**M139A.** Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Economics M103A.) Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues. Mr. Intriligator (alternate years)

### Field III: American Politics

**140A-140B-140C. National Institutions.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40:

**140A.** Congress. (Formerly numbered 143.) Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society. Ms. Bawn, Mr. Snowiss

**140B.** The Presidency. (Formerly numbered 144.) Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making. Ms. Orren, Mr. Snowiss

**140C.** Supreme Court. (Formerly numbered 70.) Introduction to American constitutional development and role of Supreme Court as interpreter of the U.S. Constitution. Reading of Supreme Court cases as well as various historical and current commentaries.

**M141A-M141D. Electoral Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**M141A.** Political Psychology. (Formerly numbered M140.) (Same as Psychology M138.) Prerequisite: course 40. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues. Mr. Sears, Mr. Sidanius

**141B.** Public Opinion and Voting Behavior. (Formerly numbered 141.) Prerequisite: course 40. Study of character and formation of political attitudes and public opinion. Role of public opinion in elections, relationship of political attitudes to the vote decision, and influence of public opinion on public policy formulation. Mr. Petrocik, Mr. Zaller

**141C.** Political Behavior Analysis. (Formerly numbered 146.) Prerequisites: courses 6, 40, 141B. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141B and similar courses. Mr. Petrocik, Mr. Zaller

**M141D.** Mass Media and Elections. (Formerly numbered M148.) (Same as Communication Studies M161.) Prerequisite: course 40. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process. Mr. Iyengar

**142A-142B-142C. Political Parties and Interest Groups.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40:

**142A.** Political Parties. (Formerly numbered 145.) Organization and activities of political parties in the U.S. Attention to historical development of the parties, nature of party change, campaign functions and electoral role of the parties, membership problems and party activists, political finance, and policy formulation practices. Mr. Petrocik

**142B.** Politics of Interest Groups. (Formerly numbered 142.) Systematic investigation of role of political interest groups in governmental process, with attention to internal organization, leadership, and politics of such groups to goals and functions of various types of groups and to strategy and tactics of influence. Ms. Orren

**142C.** Government and Labor. (Formerly numbered 174.) Labor force and nature of trade union; regulation of labor relations; programs to encourage full employment and to mitigate unemployment; protective labor legislation. Ms. Orren

**143A-143B. Subnational Government.** (Formerly numbered 183A-183B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40:

**143A.** American State Government. Examination of governments of states of federal union as major sources of public policy in the U.S., with government of California as principal topic.

**143B.** Government of American Cities. Intensive analysis of contemporary urban governance in the U.S. Emphasis on such student participatory activities as fieldwork, research, and gaming of urban politics and policy problems.

**M144A-M144B. Ethnic Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 40, and one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor:

**M144A.** Chicano/Latino Politics. (Formerly numbered M147A.) (Same as Chicana and Chicano Studies M147A.) Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period. Mr. Rocco

**M144B.** African American Politics. (Formerly numbered M147B.) (Same as Afro-American Studies M144.) Course M144A is not prerequisite to M144B. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills. Mr. Gilliam, Mr. Keller

**145A-145D. Public Law and Judicial Process.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40:

**145A.** Anglo-American Legal System. (Formerly numbered 170.) Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in the U.S. and remain relevant today.

**145B.** Constitutional Law — Separation of Powers. (Formerly numbered 172A.) Constitutional questions concerning separation of powers, federalism, and relationship between government and property.

**145C.** Constitutional Law — Civil Liberties. (Formerly numbered 172B.) Protection of civil and political rights and liberties under the constitution.

**145D.** Judicial Oversight of the Bureaucracy. (Formerly numbered 185.) Legal controls of administrative action. Substantive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of legal powers of administrative bodies within these limits. P/NP or letter grading.

**146A-146E. Organization Theory, Public Policy, and Administration.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**146A.** Public Administration and Policy. (Formerly numbered 80.) Prerequisite: course 40. Introduction to processes of policy formation and implementation. Exploration of emergence and performance of government bureaucracies and their role in American political process. P/NP or letter grading.

**146B.** Bureaucracy and Public Management. (Formerly numbered 184.) Prerequisites: course 40, familiarity with American government. Nature of bureaucracy in modern government, with emphasis on the U.S.; explanation of why government agencies behave as they do. Focus on real and imagined problems with bureaucratic rule; evaluation of commonly proposed solutions for these problems. Examples from schools, armies, welfare bureaus, regulatory agencies, and intelligence services, among others. P/NP or letter grading. Mr. Chisholm

**146C.** Governing the Bureaucracy in the U.S. (Formerly numbered 186.) Prerequisites: course 40, and junior standing or consent of instructor. Relationship between elected officials and administrators in the U.S., especially efforts of elected and appointed officials to monitor and control behavior of those in "permanent government" (career bureaucrats). Mr. Aberbach

**146D.** Theories of Organization and Decision Making. (Formerly numbered 180.) Prerequisite: course 40. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns, and concepts of organization. P/NP or letter grading. Mr. Chisholm

**146E.** National Policy Development and Implementation. (Formerly numbered 182A-182D.) Prerequisite: course 40. Investigation of complex process of policy development and implementation in the U.S., including roles of federal, state, and local agencies as well as private organizations. Subsections offered on particular policy areas, with topics announced in preceding term.

**149. Special Topics in American Government and Politics.** (Formerly numbered 149A-149Z.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 40 and two courses in Field III, or consent of instructor. Intensive examination of one or more special problems appropriate to American politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 117

**Field IV: Comparative Politics**

**151. Comparative Urban Government.** (Formerly numbered 183C.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Cross-national exploration of urban government performance in such areas as crime control, planning, and finance. Considerable emphasis on empirical analysis of comparative performance. P/NP or letter grading.

**152. British Government.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Government and politics of the United Kingdom; British constitution, parliament, parties and elections, foreign policies, administrative problems, and local governments. Mr. Freedman

**153. Governments of Western Europe.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Constitutional and political structure and development of France and other states of continental Western Europe, with particular attention to contemporary problems. Mr. Rogowski, Mr. Tsebelis

**153A. Game-Theoretic Approach to West European Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Course 153 is not prerequisite to 153A. Uses of elementary game theory to investigate post-World War II Western European politics: social and political forces, and political institutions. Particular emphasis on study of three West European countries — United Kingdom, France, and Federal Republic of Germany (West Germany). Consideration of current developments and comparisons with the U.S. Mr. Tsebelis

**154. Governments of Central Europe.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Constitutional and political structure and development of Germany and other Central European states, with particular attention to contemporary problems. Mr. Korbonski, Mr. Rogowski

**155. Advanced Pluralist Democracies.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Main features and basic problems of economically advanced democracies, analyzed in comparative framework, topic by topic. Emphasis on cross-Atlantic comparisons, not only political but also sociological.

**156A. Government and Politics of Russia.** (Formerly numbered 156.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Intensive study of institutions and political development in Russia, with special attention to legacy of the Soviet Union and impact of this legacy on prospects for a continuing transition to democracy and to the market. P/NP or letter grading. Mr. Anderson, Mr. Korbonski

**156B. Government and Politics of Post-Soviet States.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Survey of institutions and political processes in successor states to the Soviet Union, including interactions among these states, with some discussion of Russia but particular attention to non-Russian states. P/NP or letter grading.

**157. Governments of Eastern Europe.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Study of political and governmental organization of the Communist countries of Eastern and Central Europe (exclusive of the U.S.S.R.), with special reference to institutions, practices, and ideologies including interregional relations. Mr. Korbonski

**158A-158B. Socialism in Europe.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Origins as a mass movement, split into electoral and insurrectionary wings, development into social democracy in West Europe and into state socialism in Russia and East Europe, successes and failures of the welfare state, central planning and collapse of state socialism. P/NP or letter grading:

**158A.** West European Socialism.

**158B.** East European Socialism. Mr. Anderson

**159. Chinese Government and Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Organization and structure of Chinese government, with particular attention to policies, doctrines, and institutions of Chinese Communism; political problems of contemporary China. Mr. Baum, Mr. Tong

**160. Japanese Government and Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Structure and operation of contemporary Japanese political system, with special attention to domestic political forces and problems.

**163A-163B. Government and Politics in Latin America.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Comparative study of governmental and political development, organization, and practices:

**163A.** States of Middle America. Mr. Gonzalez

**163B.** States of South America. Mr. Geddes, Mr. Gonzalez

**164. Government and Politics in the Middle East.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Comparative study of government in the Arab States, Turkey, Israel, and Iran. Mr. Binder

**166A-166B-166C. Government and Politics in Sub-Saharan Africa.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Patterns of political change in Africa south of the Sahara, with special reference to nationalism, nation building, and problems of development. **166A.** Western Africa; **166B.** Eastern Africa; **166C.** Southern Africa. Mr. Keller, Mr. Lofchie, Mr. Sklar

**166D. Special Topics in African Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading. Mr. Keller (F,W,Sp)

**167A. Ideology and Development in World Politics.** (Formerly numbered 167.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Comparative study of major modes of political and economic development in the world today. Relations between industrial and nonindustrial societies in light of current debate about imperialism. Mr. Sklar

**167B. Comparative Development and Administration.** (Formerly numbered 181.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Analysis of bureaucratic structures and function in the U.S., other industrialized, and less developed countries, primarily at national level. Special attention to methods of comparative analysis and utility of various methods. P/NP or letter grading.

**168. Comparative Political Analysis.** (Formerly numbered 168L.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: two courses in Field IV, or course 50 and one course in Field IV. Required of all students concentrating in Field IV. Major approaches to study of comparative politics. Concepts and methodology of comparative analysis.

Mr. Baum, Ms. Golden, Ms. Lohmann

**169A-169Z. Special Studies in Comparative Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: two courses in Field IV, consent of instructor. Intensive examination of one or more special problems appropriate to comparative politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 115

**Special Studies**

**195A-195B-195C. Honors Seminars and Thesis.** Prerequisites: one course in C197 series, 3.5 GPA in upper division political science courses, eligibility for Letters and Science honors. Course 195A is prerequisite to 195B, which is prerequisite to 195C. One-year honors seminar and thesis-writing sequence. Students entering course 195A are expected to have some experience in writing research papers and to have in mind a research topic suitable for treatment at length and in depth:

**195A.** Students define their research topic, select a suitable research method, determine appropriate sources of information, prepare research proposal, find a thesis director, begin their research, and submit progress reports or preliminary drafts. Class sessions emphasize critical and constructive discussions of students' topics, methods, and problems in research, as well as general consideration of political science research topics and methods of current or continuing interest. Students also meet privately with instructor to discuss progress of their research.

**195B-195C.** Writing of honors thesis under direction of a faculty member. Thesis is read by appropriate field committee and graded high honors, honors, or no honors. In Progress grading.

**C197A-C197D. Seminars for Majors.** (Formerly numbered C197A-C197F.) Seminar, three hours. Prerequisites: political science major, upper division standing, 3.25 GPA in upper division political science courses, two upper division courses in field in which seminar is offered. Consult *Schedule of Classes* for topics to be offered in a specific term. May be applied toward distribution or concentration requirement. May be concurrently scheduled with various graduate courses.

**M197G. Introduction to Development Studies: Political Economy of Development.** (Same as Development Studies M100B.) Seminar, three hours. Prerequisite: some beginning experience in social sciences at college level. Seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. Mr. Sklar (Sp)

**199. Readings in Political Science (2 to 4 units).** Prerequisites: upper division standing, 3.0 overall GPA, consent of instructor and department chair. Individual studies. May not be applied toward concentration or distribution requirement. May be repeated for a maximum of 16 units.

**Graduate Courses****Formal Theory and Quantitative Methods**

**200A. Statistical Methods I.** Lecture, three hours. Corequisite: course 200AL. Introduction to statistical analysis of political data. Methods of data analysis, estimation, and inference. Mr. DeNardo

**200AL. Statistical Methods Laboratory I.** Laboratory, three hours. Corequisite: course 200A. Mr. DeNardo

**200B. Statistical Methods II.** Lecture, three hours. Prerequisites: courses 200A/200AL. Recommended: knowledge of elementary calculus. Applications of multiple regression in political science.

**200C. Statistical Methods III.** Lecture, three hours. Prerequisites: courses 200A/200AL, 200B, knowledge of elementary calculus. Statistical modeling of political processes. Topics include simultaneous equations models, discrete choice models, time-series models.

**M200E. Advanced Regression Analysis.** (Same as Psychology M256.) Seminar, three hours. Prerequisite: consent of instructor. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful. Mr. de Leeuw, Mr. DeNardo

**201A. Introduction to Formal Political Analysis.** Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation representation, vote trading. Mr. Schwartz

**201B. Theory of Collective Choice.** Seminar, three hours. Recommended (but not prerequisite) for political science students: course 201A. Open to any student of politics, economics, philosophy, or mathematics with ability for deductive reasoning. Introduction to abstract, deductive study of voting systems and other collective-choice processes. Axiomatic method applied to politics and political economy, concept of rationality, and agenda control, choice-set or solution concepts. Mr. Schwartz

**202. Mathematics for Political Science.** Lecture, three hours. Prerequisite: working knowledge of high school algebra. Survey of mathematical methods useful in political science. Topics include differential and integral calculus, differential equations, optimization, and linear algebra. Ms. Bawn, Ms. Lohmann

**203A. Economic Theory and Methods for Political Science I.** (Formerly numbered 203.) Discussion, three hours. Prerequisite: knowledge of elementary calculus. Introduction to techniques of economic analysis and survey of major topics in formal political economy. Investigation of models of regulation, trade protection, collective bargaining, and economic growth as time permits. Ms. Bawn, Ms. Lohmann

**203B. Economic Theory and Methods for Political Science II.** Discussion, three hours. Prerequisite: course 203A. Continuing survey of microeconomic techniques used in formal political science, with focus on market failures and on modeling individual choice in nonmarket situations. Specific topics include externalities, public goods and allocation mechanisms, collective action, spatial models, structure-induced equilibrium, and information asymmetries. Ms. Bawn, Ms. Lohmann

**204. Game Theory in Politics.** Seminar, three hours. Survey of game theory, with emphasis on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition. Designed to help students become informed consumers of game-theoretical literature in political science. Ms. Lohmann, Mr. Tsebelis

**M208A. Game Theory.** (Same as Economics M214B.) Lecture, three hours. Prerequisites: Economics 213A or suitable mathematics courses. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading. Mr. Shapley

**M208B. Topics in Applied Game Theory.** (Same as Economics M215.) Lecture, three hours. Prerequisites: calculus or introductory probability, and graduate standing in economics or consent of instructor. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading. Mr. Shapley

**M208C. Large Economies.** (Same as Economics M214C.) Lecture, three hours. Prerequisites: Economics 213A or suitable mathematics courses. Consideration of economics with a continuum of consumers and with a continuum of goods. Basic model applied to perfectly competitive equilibrium, the core, location models, and other models with nonconvex preferences and/or technology. S/U or letter grading. Mr. Ellickson

**M208D. Multivariate Analysis with Latent Variables.** (Same as Psychology M257.) Lecture, three hours. Prerequisite: consent of instructor. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications. Mr. Bentler

**M208E. Bayesian Econometrics.** (Same as Economics M232A.) Lecture, three hours. Prerequisites: Economics 231A, 231B. Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism. S/U or letter grading. Mr. Leamer

**209. Special Topics in Formal Theory and Quantitative Methods.** Seminar, three hours.

## Political Theory

**210A-210B. Introduction to Political Theory.** Lecture, three hours. Exploration of major texts and issues in political theory:

**210A.** Classical and Medieval Formulations from Plato through Aquinas.

Mr. Campbell, Mr. Rapoport, Mr. Wolfenstein

**210B.** Early Modern Period from Machiavelli through the Enlightenment.

Mr. Ashcraft, Mr. Campbell, Mr. Rapoport

**M211. Morality of Capitalism.** (Same as Management M293B.) Lecture, three hours. Prerequisite: consent of instructor. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds). Mr. J. Wilson

**212. Seminar: Political Theory.** Discussion, three hours. Mr. Ashcraft, Mr. Binder

**213. The Bible as Political Theory.** Seminar, three hours. Examination of the Bible as a political document. Particular attention to concepts which have played an essential part in Western political thought (i.e., covenant, charisma, history, law, states of nature, human nature, and the state). Mr. Rapoport

**C217. Selected Texts in Political Theory.** Discussion, three hours. Critical examination of major texts in political theory, with particular attention to their philosophical system, their relations to contemporary political and intellectual currents, and importance of the system for present-day political analysis. May be concurrently scheduled with course C197A.

**C218. Selected Topics in Political Theory.** Discussion, three hours. Critical examination of a major problem in political theory. May be concurrently scheduled with course C197A.

**219. Workshop: Political Theory.** Discussion, three hours.

## International Relations

**220. International Relations Theory.** Discussion, three hours. Approaches to and central problems of international relations theory. Mr. Rosecrance, Mr. Stein

**C221. Advanced International Relations Theory.** Discussion, three hours. Introduction to contemporary problems in international relations theory. May be concurrently scheduled with course C197B. Mr. Stein, Mr. Wilkinson

**222. Seminar: Strategic Interaction.** Seminar, three hours. A strategic move influences the other person's choice by affecting his expectations of how we will behave. Discussion of theories of deterrence, coercive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psychology, bargaining theory, and game theory. Ms. Larson

**C223. Politics and Strategies of Modern War.** Seminar, three hours. Analysis of various national security problems in both their military/technical and political dimensions. Development in some depth of issues likely to be raised in course 138A (not prerequisite). May be concurrently scheduled with course C197B. Mr. Rosecrance

**225. American Foreign Policy.** Discussion, three hours. Discussion of approaches used to explain foreign policy-making at individual, small group, bureaucratic, and domestic politics levels. Application to selected cases in American foreign policy. Ms. Larson

**C226. The Making of American Foreign Policy.** Seminar, three hours. Intensive analysis of policy formulation process and substance of selected contemporary problems in foreign policy. Political and institutional factors affecting foreign policies; analysis of policy options. May be concurrently scheduled with course C197B. Mr. Spiegel

**C227. Foreign Policy Process.** Discussion, three hours. Prerequisites: courses 120 and 220, or consent of instructor. Political science and policy science approaches to national foreign policy process, with primary focus on formulation and implementation of American foreign policy. May be concurrently scheduled with course C197B.

**230. Contending Perspectives on International Political Economy.** Discussion, three hours. Survey of various theoretical approaches to international political economy. Mr. Frieden

**231. Markets, States, and International Political Economy.** Discussion, three hours. Interaction between international trade and investment and domestic political economics of both industrialized and industrializing societies. Mr. Frieden

**232. Institutions, Information, and Participation in International Political Economy.** Seminar, three hours. Designed to develop Ph.D. students' skills in setting up and solving simple institutional design, political economy macro, signaling, and participation models, as well as two-level game models of domestic politics and international conflict and cooperation, with emphasis on applications in international political economy and comparative politics. Ms. Lohmann

**233A-233B-233C. Political Economy Workshops (0 units, 0 units, 12 units).** Discussion, two hours. Open only to graduate students who have successfully completed major field examinations. Workshop for students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper of publishable length and quality required. In Progress grading. Mr. Frieden

**234A-234B-234C. Workshops: National Security, Foreign Policy, and International Relations (0 units, 0 units, 12 units).** Discussion, two hours. Course 234A is prerequisite to 234B, which is prerequisite to 234C. Courses must be taken in sequence. Open to graduate students who have successfully completed major examinations and intended for students preparing for or working on dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required. In Progress grading. Mr. Rosecrance, Mr. Stein

**C239. Selected Topics in International Relations.** Discussion, three hours. May be concurrently scheduled with course C197B.

## Comparative Politics

**240. Comparative Politics.** (Formerly numbered 240A-240B.) Discussion, three hours. Approaches to study of comparative politics and problems of comparative political analysis. Mr. Binder, Mr. Rogowski

**C241. African Studies.** Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Keller, Mr. Lofchie, Mr. Sklar

**C242. Chinese and East Asian Studies.** Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Baum, Mr. Tong

**C243. Japanese and Western Pacific Studies.** Discussion, three hours. May be concurrently scheduled with course C197D.

**C244. Latin American Studies.** Discussion, three hours. May be concurrently scheduled with course C197D. Ms. Geddes, Mr. Gonzalez

**C245. Middle Eastern Studies.** Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Binder

**C247. Russian and Slavic Studies.** Discussion, three hours. May be concurrently scheduled with course C197D. Mr. Anderson, Mr. Horelick

**247A. Evolution of Soviet Politics.** Discussion, three hours. Discussion seminar surveying principal scholarly controversies concerning transitions between various stages in political evolution of the Soviet Union. Mr. Anderson

**C247B. Domestic Context of Soviet Foreign Policy.** Discussion, three hours. Examination of domestic social, political, bureaucratic, and organizational sources of Soviet foreign and strategic policy, with emphasis on *Perestroika* and its implications. May be concurrently scheduled with course C197B.

**C248. South Asian Studies.** Discussion, three hours. May be concurrently scheduled with course C197D.

**C250A. Western European Studies.** Seminar, three hours. May be concurrently scheduled with course C197D. Ms. Golden, Mr. Rogowski, Mr. Tsebelis

**250B. Political Development of Modern Europe.** Discussion, three hours. Principal phases of political development from high feudalism to the present, together with theories of causation. Mr. Rogowski

**251. Political Economy of Structural Adjustment.** Discussion, three hours. Some familiarity with economics helpful. Principal arguments for structural adjustment (trade and economic liberalization) and consideration of political issues that arise from this process. Mr. Lotchie

**252A. Parties and Party Systems.** Discussion, three hours. Theories and practices of political parties, party systems, and elections in comparative perspective. Mr. Tsebelis

**252B. Foundations of Representative Government.** Discussion, three hours. Analysis of factors affecting development and functions of representative institutions in the U.S., Europe, and selected political systems of Africa, Asia, and Latin America. American politics or comparative politics field credit. Mr. Snowiss

**253. Political Change in Communist Systems.** Discussion, three hours. Examination of political context and consequences of structural reform in Communist systems; theories of post-Leninist political pluralization and convergence. Mr. Baum

**254. Seminar: Social Class and Political Analysis.** Discussion, three hours. Investigation of concept of social class as a tool of political analysis, with emphasis on current debates regarding definition and utility of class as an analytic category. S/U or letter grading. Mr. Ashcraft

**255. Seminar: Political Change.** Seminar, three hours. Interdisciplinary seminar directed toward comparative analysis of political development and modernization. Mr. Binder, Mr. Sklar

**256. External Sources of Domestic Politics.** Discussion, three hours. Theoretical and historical studies of impact of war and trade on domestic cleavages, policy, and institutions. Mr. Rogowski

**257. Labor and Working-Class Politics.** Discussion, three hours. Questions and topics on comparative labor and working-class politics. Ms. Golden

**258. Seminar: Political Violence.** Seminar, three hours. Empirical theory and research on causes, processes, and outcomes of violent social conflict, including mass political protest, riot, revolt, terrorism, and revolution. Mr. Tong

**259. Selected Topics in Comparative Politics.** Discussion, three hours. Critical examination of a major problem in comparative politics.

## American Politics

**260A. Survey Course in American Politics: Political Parties and the Electoral Process.** Discussion, three hours. Mr. Petrocik, Mr. Zaller

**260B. Survey Course in American Politics: American Political Institutions.** Discussion, three hours. Mr. Aberbach, Ms. Orren

**M261A. Proseminar: Political Psychology.** (Same as History M236A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making. Mr. Iyengar, Ms. Larson, Mr. Zaller

**C261B. Mass Attitudes and Political Behavior.** Discussion, three hours. Prerequisite: course 141B or 260A or consent of instructor. Analysis of development and change of political attitudes in mass publics and their relationship to voting, protest, and violence. May be concurrently scheduled with course C197C.

Mr. Petrocik, Mr. Zaller

**261C. Political Communication.** Discussion, three hours. Broad survey of research bearing on role of mass media in the American political process. Topics include theories of persuasion, evolution of "media effects" research, reporting and advertising as determinants of election outcomes, adversarial versus differential journalism, and analyses of media bias. Mr. Iyengar

**M261D. Seminar: Political Psychology.** (Same as Psychology M228B.) Discussion, three hours. Prerequisite: course M261A or Psychology 220A or consent of instructor. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion. Mr. Sears

**M261E. Critical Problems in Political Psychology.** (Same as Psychology M228C.) Discussion, three hours. Mr. Sears

**C262. Political Parties.** Discussion, three hours. Critical examination of literature on party systems and organization. Special attention to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with course C197C.

Mr. Petrocik

**C263. Political Recruitment.** Discussion, three hours. Critical evaluation of literature concerned with backgrounds of public figures and with screening and sponsoring mechanisms affecting their careers and political perspectives. May be concurrently scheduled with course C197C.

**C264. Politics and Society.** Discussion, three hours. Application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with course C197C. Mr. Gilliam

**265. Politics and Economy.** Discussion, three hours. Analysis of theoretical and practical relationships between economic organization and governmental institutions. Development and political implications of the market system, banking and finance, corporate enterprise, and organized labor. Ms. Orren

**266. Group Theories of Politics.** Discussion, three hours. Critical appraisal of "group theory" approaches to study of political decision making, with special attention to empirical research problems and findings. Ms. Orren

**268. Seminar: Political and Electoral Problems.** Seminar, three hours. Prerequisites: two graduate courses in politics.

**269. Seminar: Political Behavior.** Seminar, three hours.

**C270. Legislative Behavior.** Discussion, three hours. Analysis of major approaches to study of representative institutions, with special emphasis on assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

Ms. Bawn, Mr. Snowiss

**C271. Executive Politics and the Presidency.** Discussion, three hours. Analysis of executive organization and leadership, with emphasis on the American Presidency. Special attention to theories of organization and personality and relationship between the executive and other institutions and groups. May be concurrently scheduled with course C197C.

Mr. Aberbach, Mr. Snowiss

**272. Political Environment of the Federal Executive.** Discussion, three hours. Examination of political environment of the federal executive in the U.S. Special attention to executive/legislative relations. Mr. Aberbach

**273. American Political Development.** Discussion, three hours. National political institutions in historical perspective, theories of state building, state societal relations, political culture. Ms. Orren

**275. Seminar: American Political Institutions.** Seminar, three hours.

**C276. Public Law.** Discussion, three hours. Systematic analysis of scope and nature of public law, with particular attention to its materials and methods as illustrated in concepts and doctrines from various of its subjective fields. May be concurrently scheduled with course C197C.

**C277. Making of the Constitution.** Discussion, three hours. Examination of development of constitutional law during selected periods of American history, such as founding, Marshall and Taney eras, and New Deal. Emphasis on both judicial and nonjudicial materials. May be concurrently scheduled with course C197C.

**C278. Bill of Rights and the States.** Discussion, three hours. Examination of problems surrounding application to the states of Amendments 1 through 9. May be concurrently scheduled with course C197C.

**C279. Seminar: Public Law.** Discussion, three hours. May be concurrently scheduled with course C197C.

**C280. Organization Theory Approaches to Organizational Analysis.** Discussion, three hours. Analysis of several major conceptual alternatives for study of organizations, with emphasis on public administrative organizations. Topics include structural/functional and systemic approaches to organization, rational-choice models, and social psychological analyses. Each alternative critically evaluated for its strengths and weaknesses as guide to understanding organizational analysis. May be concurrently scheduled with course C197C. Mr. Chisholm

**C281. Public Policy Studies.** Discussion, three hours. Systematic analysis of nature and scope of public policy and its programmatic implications. Special emphasis on government organizations and process, as well as types of government intervention and stages of the policy process. Substantive focus primarily on American public policy and analysis. May be concurrently scheduled with course C197C.

**C282. Subnational Administrative Systems.** Discussion, three hours. Analysis of state administrative systems, their local subsystems, and their outputs. May be concurrently scheduled with course C197C.

**C283. Seminar: Public Organization and Policy.** Seminar, three hours. May be concurrently scheduled with course C197C. Mr. Chisholm

**284. Seminar: Bureaucracy and Organization.** Discussion, three hours. Prerequisite: consent of instructor. Exploration of topics in analysis of public and private bureaucracies and organizational theory. Topics include empirical theories of bureaucratic behavior; bureaucratic growth; bureaucratic behavior and political culture; organizational structures and strategies; and function of the executive. Mr. Chisholm

## Special Studies

With consent, credit may be applied toward any field.

**290. Modern Political Economy.** Discussion, three hours. Discussion of implications for understanding politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microfoundations for macromodels, forms of political participation, the state, government regulation, growth of government, bureaucracy elections, public policy, inflation. Mr. Stein

**M291A-M291B. Social Theory and Comparative History.** (Same as History M203A-M203B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

Mr. Ashcraft, Mr. Brenner

**292A-292B. Introduction to Political Inquiry.** Discussion, three hours. **292A.** Problems of Scientific Inquiry and Normative Discourse; **292B.** Major Conceptual Frameworks and Approaches to Political Science. Prerequisite: course 292A or equivalent.

**293. Terrorism.** Discussion, three hours. Analysis of the concept, relationship of terrorism to other forms of violence, history of the phenomena, various forms, and costs. Mr. Rapoport

**294. Religion, Revolution, and Violence.** Discussion, three hours. Critical examination of various accounts of religion as a revolutionary and conservative force. Special attention to millenarianism and revolution and to the revealed religions, Christianity, Judaism, and Islam. Mr. Rapoport

**295. Comparative Fundamentalism.** Discussion, three hours. Study of political meaning of the fundamentalist phenomena in various religions, especially Christianity, Judaism, and Islam. Mr. Rapoport

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Political Science.** Workshop in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Normally to be taken by all new teaching assistants in first term of their assistantships. May be taken only in term in which students are teaching assistants. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**590A. Directed Reading for Ph.D. Dissertation Proposal (0 units).** Required of all Ph.D. students. Must be taken under supervision of research adviser prior to term in which oral examination is taken. Research for proposed dissertation topic and submission of bibliographic essay on that topic. In Progress grading (credit to be given only on completion of course 590B).

**590B. Directed Research for Ph.D. Dissertation Proposal (8 units).** Prerequisite: course 590A. Required of all Ph.D. students. Must be taken under supervision of research adviser prior to or during term in which oral examination is taken. Development and writing of research design for Ph.D. dissertation. With consent of research adviser, courses 233A-233B-233C may, by petition, be accepted as equivalent to courses 590A and 590B.

**596. Directed Individual Study or Research (2 to 4 units).** May be applied only three times toward minimum course requirement in first two years. May be repeated.

**597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units).** May be repeated. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units).** May be repeated. S/U grading.

 Dennis McGinty, Ph.D.  
 Nancy Woolf, Ph.D.

### Adjunct Assistant Professors

William McCarthy, Ph.D.  
 Lynn A. Olzak, Ph.D.  
 Dahlia Zaidel, Ph.D.

## Scope and Objectives

Psychology is a subject of considerable interest to most people — we all tend to practice some form of intuitive psychology in an attempt to understand ourselves and the people and groups with whom we interact. The curriculum offered by the UCLA Department of Psychology presents psychology as a scientific discipline that employs systematic methods of inquiry to study and explain human and animal be-

havior — both normal and abnormal — in terms of a variety of underlying variables, including neural, physiological, and cognitive processes; developmental factors and individual differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments of its kind in the country.

The structure of the undergraduate curriculum has been designed to reflect the extensive breadth of psychology — in terms of both the range of behavioral phenomena studied and the variety of methods and theoretical approaches employed — while allowing students to pursue in greater depth those areas in which they become most interested. Beyond basic core courses, students can take many specialized courses in areas such as psychobiology, animal behavior, learning and memory, motivation, perception, cognition, measurement, personality, and clinical, social, developmental, community, and health psychology. The curriculum also provides excellent opportunities for research experience — either in the form of laboratory courses or by participation with faculty and graduate students in a wide variety of research projects.

A choice of three undergraduate majors is offered: a B.A. degree in Psychology and B.S. degrees in Cognitive Science and in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that can give them new and valuable insights into the understanding of human behavior, including their own.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in areas such as behavioral neuroscience, clinical, cognitive, developmental, learning and behavior, measurement, and social psychology. The program is designed to prepare future psychologists for careers as scientific investigators, college and university teachers, and professional psychologists.

## Bachelor of Arts in Psychology

The psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides you with a strong foundation for postgraduate education in psychology and can serve as excellent background to prepare you for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an

understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if you plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

### Preparation for the Major

You need to file a petition in the Undergraduate Advising Office to declare the prepsychology major. You are then identified as a prepsychology major until (1) you satisfy the preparation for the major requirements and (2) you file a petition to declare the psychology major. The following required courses must be taken for a letter grade (a C – or better in each course and a 2.3 overall grade-point average in the preparation courses) before you reach 110 total units (effective Fall Quarter 1990 for all entering freshmen; transfer students must complete all remaining preparation courses by the end of the first year of enrollment): Anthropology 7 or 10 or 12 or 15; Biology 2 or 5; Chemistry and Biochemistry 2 (if you have completed one year of high school chemistry with a C or better, this requirement is waived) or 11A; Mathematics 2 or two terms of calculus; Physics 10 or 3A or 6A or 8A/8AL; one course from Philosophy 1, 4, 6, 7, 8, 9, 21, 22; Psychology 10, 42; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in your career; these courses are open only to students who have declared the prepsychology major one term before the term in which they plan to enroll. You cannot take Psychology 42 until you have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major (effective Fall Quarter 1990 for all entering freshmen and transfer students).

### The Major

After satisfying the preparation for the major requirements, you need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Core courses: Psychology 110, 115, 120, 130, 135; (2) one laboratory/fieldwork course from 111, 113, 116, 121, 136A, 136B, 171A, 174, 186A, 186B; (3) four additional upper division elective courses (16 units) in psychology.

Effective Fall Quarter 1990 students who complete Psychology M117A-M117B-M117C will receive equivalent credit for course 115 and

two upper division psychology electives. If you select this option, see a counselor to file a petition.

All upper division courses must be taken for a letter grade. Effective Fall Quarter 1992 for all entering freshmen and transfer students, a C – or better is required in each core course and in at least one laboratory/fieldwork course. You must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements.

## Bachelor of Science in Cognitive Science

The cognitive science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if you plan to pursue graduate work in cognitive science or related fields; however, you may want to include additional advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

### Preparation for the Major

You need to file a petition in the Undergraduate Advising Office to declare the precognitive science major. You are then identified as a precognitive science major until (1) you satisfy the preparation for the major requirements and (2) you file a petition to declare the cognitive science major. The requirements listed below are effective Fall Quarter 1992 for all freshmen and new transfer students and for any students who did not declare the cognitive science major by Fall Quarter 1992. Questions about the major should be directed to the Undergraduate Advising Office, 1531 Franz Hall.

The following required courses must be taken for a letter grade (a C or better in each course and a 2.5 overall grade-point average in the preparation courses): Biology 2 or 5; Chemistry and Biochemistry 2 (if you have completed one year of high school chemistry with a C or better, this requirement is waived) or 11A; Mathematics 31A, 31B; Philosophy 7, 8, or 9; Physics 10 or 3A or 6A or 8A/8AL; Program in Computing 10A, 10B, 15; Psychology 10, 42, 85; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in your career; these courses are open only to students who have declared the precognitive science major one term before the

term in which they plan to enroll. You cannot take Psychology 42 until you have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major (effective Fall Quarter 1990 for all entering freshmen and transfer students).

### The Major

After satisfying the preparation for the major requirements, you need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Psychology 115, 120, and one course from 124A through 124F; (2) one course from 186A or 186B and one course from 121, 186A, 186B, or Computer Science 161; (3) three upper division elective courses (12 units) from Psychology 110, 112A through 119N, 123, 124A through 124F (if taken for the major, may not be applied as an elective), 130, 133B, 135, M142, 150, 151, 187, 189, 190B or 190C (if content is approved by the Undergraduate Advising Office and courses have not been applied toward the Psychology 188 requirement), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Computer Science 111 through M196B, Linguistics 103 through C185B, Mathematics 110A through 151, Philosophy 126A through 136, Statistics M152A through M153B; (4) two terms of Psychology 188 (may be fulfilled by taking any two courses from 188, 190C, or 199, provided content is approved by the Undergraduate Advising Office).

Effective Fall Quarter 1992 students who complete Psychology M117A-M117B-M117C will receive equivalent credit for course 115 and two upper division cognitive science electives.

You must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements. With the exception of Psychology 188, each course must be taken for a letter grade.

### Quantitative Methods Concentration

This concentration is intended to give you more extensive preparation in statistics. The following additional courses are required: Mathematics 32A, 32B, 33A, 33B, and either M150A-150B and 151, or Statistics M152A and 152B-152C. Psychology 41 is not required. To declare this concentration, see a counselor in the Undergraduate Advising Office once you have completed all required courses.

### Bachelor of Science in Psychobiology

The psychobiology major is designed for students who plan to go on to postgraduate work in physiological psychology, neuroscience, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of

brain-behavior relations and laboratory training in standard brain research techniques.

The requirements described below include sufficient preparation if you plan to pursue graduate work in any of the above fields; however, you may want to include additional advanced courses in psychology and related sciences as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

### Preparation for the Major

You need to file a petition in the Undergraduate Advising Office to declare the prepsychobiology major. You are then identified as a prepsychobiology major until (1) you satisfy the preparation for the major requirements and (2) you file a petition to declare the psychobiology major. The following required courses must be taken for a letter grade (a C – or better in each course and a 2.0 overall grade-point average in the preparation courses): Biology 5, 6, 9; Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 132A, 132B/132BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, and 8C/8CL; Psychology 10, 42; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in your career; these courses are open only to students who have declared the prepsychobiology major one term before the term in which they plan to enroll. You cannot take Psychology 42 until you have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major (effective Fall Quarter 1990 for all entering freshmen and transfer students).

### The Major

After satisfying the preparation for the major requirements, you need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Biology 100A, 108, 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115, 116, 120; (2) one course from Psychology 127, 130, 135; (3) 16 units of graded elective courses from the following list: Biology 107, 112, 113A, 114 (no more than one from this group); Psychology 119A through 119N, 190C (only if content is approved by the Undergraduate Advising Office), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Biology 102, C104, 105, 106, 110, 111, 115, 117, C119, 120, 122, 124 (only four units may be applied toward the major), 131 (only four units may be applied toward the major), 135, 138, 146, 153, CM156, 157, 158, 164, 166, 167, 168, 171, M173, 179, Chemistry and Biochemistry 153A, 153L.

Effective Fall Quarter 1990 students who complete Psychology M117A-M117B-M117C will receive equivalent credit for course 115 and 10 units of upper division psychobiology electives.

You must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements, and each must be taken for a letter grade.

### Fieldwork and Research Opportunities

Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychology. These experiences can be enriching and help bring undergraduates closer to understanding research and its applications in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychology 188, 192, 193, 194, 199, or the Student Research Program (SRP) through the College of Letters and Science. Information about these courses and programs is available from the Undergraduate Advising Office, 1531 Franz Hall.

### Developmental Disabilities Immersion Program and Concentration

The Developmental Disabilities Immersion Program (DDIP) is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Field Studies Development. Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities.

Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements (consult the Undergraduate Advising Office for details). Student individualized research projects are also part of the immersion experience.

To earn a **concentration**, majors in psychology, cognitive science, and psychobiology must be accepted into the Developmental Disabilities Immersion Program. Information and applications are available from Field Studies Development, 80 Powell Library. The following courses are required for the concentration: Psychology 127 (may also be applied as one of the three upper division electives required for the psychology major), 130 (also satisfies a core requirement for the psychology major), M180A, M180B, M181A-M181B, 193 (two terms). With the exception of course 193, each course must be taken for a letter grade. Students in the department who complete the requirements receive a depart-

mental certificate of completion at graduation; you must notify the department during the term you plan to graduate to receive your certificate. The concentration does not appear on your diploma or transcript.

If a psychology major earns the DDIP concentration, upper division elective credit for Psychology M180A, M180B, M181A-M181B does not apply.

For more information, contact the Undergraduate Advising Office (1531 Franz Hall) or Field Studies Development (80 Powell Library).

## Specialization in Computing

Majors in psychology, psychobiology, and cognitive science may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15 (recommended), 30, 60, and (3) completing Psychology 85 and at least two courses from M142, 150, 151, 186A, 186B. A grade of C or better is required in each course. You graduate with a bachelor's degree in your major and a specialization in computing. Consult the Undergraduate Advising Office if you plan to enter this specialization.

## Honors

### Honors Courses

Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. All such courses offer credit toward the departmental honors program. Consult the College of Letters and Science for information on requirements for College Honors. Enrollment priority in honors courses is given to students in the departmental honors program.

### Honors Program

Psychology, cognitive science, and psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. You work for a year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year you also participate in a weekly seminar (Psychology 190A-190B-190C) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. In addition, you must take two (or more) psychology honors courses selected from a list provided by the department, with a grade of B or better in each. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or highest honors. Consult the Undergraduate Advising Office early in your educational planning for further information and application forms.

## Infant Development Program

The Infant Development Program is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, and their parents. In addition, the program provides an opportunity for students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers through a two- or three-term sequence of Psychology 193. The program is located in Franz Hall and provides child care for about 13 infants ranging in age from four months to three years.

## Clinic for the Behavioral Treatment of Children

The Clinic for the Behavioral Treatment of Children carries out diagnosis, treatment, and research on children with severe psychological problems, such as children with autism and those with severe developmental disorders. The treatment philosophy is largely behavioral/educational, with emphasis on language acquisition, peer and school integration, and parent training. Students are taught behavioral treatment procedures and work in an apprenticeship relation to senior staff. Prior research has focused on variables controlling self-destructive behavior, perceptual deficits, language acquisition, and emotional/social attachments. The clinic serves as a teaching and research environment for both graduate and undergraduate students.

## National Research Center on Asian American Mental Health

The National Research Center on Asian American Mental Health (NRCAAMH) is one of several centers in the nation devoted to ethnic minority research, and the only one focusing on Asian Americans. NRCAAMH acts in a national multidisciplinary leadership role in the conduct and promotion of applied and basic research regarding the mental health of various Asian groups (e.g., Chinese, Japanese, Koreans, Filipinos, Southeast Asians, etc.) in the U.S. The center provides undergraduate and graduate students with opportunity to participate in research projects, publish scholarly articles, and collaborate with other researchers in the field.

## Preparation for Graduate Study

The curriculum for the undergraduate major fulfills admission requirements at most universities. However, candidates seeking graduate training in psychology should strengthen their preparation by accruing research experience through laboratory and research assistantships and through advanced undergraduate courses and seminars (especially in statistics

and research design and methods). Independent study projects, honors theses, community placements, and fieldwork positions are also strongly recommended. Consult the Undergraduate Advising Office in 1531 Franz Hall or the Graduate Admissions Office in 3453 Franz Hall for more information.

## Ph.D. Degree

The graduate program in psychology leads to the Ph.D. degree. Although you may obtain the M.A. degree en route to the Ph.D., the department does not admit candidates for the M.A. degree only. For the Ph.D. degree, a thorough background in research methodology and psychological theory is required. Major specialized training is available in the areas of psychology listed below under "Major Fields or Subdisciplines."

A departmental brochure describing the graduate program in psychology is available from the Graduate Admissions Office, 3453 Franz Hall.

### Admission

Successful applicants to the Ph.D. program usually possess an undergraduate psychology degree and extensive research experience. However, students from other disciplines (particularly the mathematical, physical, biological, and social sciences) may be admitted. Admission is for Fall Quarter only and only on a full-time basis. Applicants must mail the following documents directly to the Department of Psychology, 3453 Franz Hall, UCLA, Los Angeles, CA 90024-1563, by January 3 to be considered for admission the following Fall Quarter:

- (1) The University's *Application for Graduate Admission* and the departmental supplementary materials, available from 3453 Franz Hall.
- (2) Three letters of recommendation (preferably from research psychologists).
- (3) One official transcript from each college attended.
- (4) Official scores on the Graduate Record Examination (GRE) General Test and the Subject Test in Psychology (taken within the last three years).
- (5) The Test of English as a Foreign Language (TOEFL), required of all international applicants whose native language is not English.

Students who are being considered as finalists for the clinical program may be required to meet with the clinical faculty for an interview.

Admitted students are expected to have taken courses equivalent to the following: (1) Psychology 41; (2) two courses from Psychology 110, 115, 120; (3) two courses from the following alternatives: (a) Psychology 127, (b) 130, and (c) 135; (4) one course in biology or zoology, one course in mathematics (preferably calculus or probability), and two courses in the physical sciences (i.e., physics and/or chemistry; a course in anthropology, philosophy, or sociology may be substituted for one of the physical sciences courses). If you have com-

pleted one of the UCLA Psychology Department majors, you will have satisfied the undergraduate preparation requirements. Although it is possible to gain admission into the Ph.D. program with some deficiencies in these basic requirements, they must be remedied within your first four terms of graduate study by taking appropriate coursework or examinations.

### Major Fields or Subdisciplines

You may major in behavioral neuroscience, clinical, cognitive, developmental, learning and behavior, measurement and psychometrics, or social psychology. Training is also available in community psychology.

### Course Requirements

**General Course Requirements** — All students, regardless of area, must fulfill the requirements listed below.

The core program must be completed within your first two years in residence. The core program includes four core courses, plus Psychology 250A, 250B, 251A-251B (and 251C, if an additional term is needed to complete the course).

Nine graduate courses (36 units), including Psychology 250A, 250B, 251A-251B (research project must be complete), and at least three of the four core courses are required for the M.A. degree. One 596 course (four units) may be applied. Courses in the 400 series may not be applied. All undergraduate deficiencies must be cleared.

By the end of the second year, you must complete at least one individual research course (596) and at least three second-year graduate courses, including one quantitative course from Psychology 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258, 259, 287.

During the third year, you must enroll in a minimum of three graduate-level courses, plus one term of course 596. At least one term of course 596 or 599 should be taken during the fourth year and each remaining year in the graduate program.

**Major Area Course Requirements** — Each area has its own specific requirements. A course may not be applied toward requirements in more than one major or minor area unless no other course options are designated. Requirements are as follows: *behavioral neuroscience* — eight units from the 205 series, three terms of course 212, two approved behavioral neuroscience seminars, and Neuroscience M201 and either M202 and M204, or Psychology M117A; *clinical* — Psychology 270A-270B-270C, 271A-271B-271C, 277A, and at least four additional clinical courses, distributed among the 272 series (zero to two courses) and advanced courses beyond 272 (two to four courses); *cognitive* — courses 260A-260B, plus four additional courses, including at least two selected from 259, 261 through 266, and at least one from 268A through 268E or 269; *developmental* — courses 240A-240B, two courses from 242A through 242F or 244; *learning and behavior* — courses 200A,

200B, plus two courses from 204A through 204E, 208, 210, 281, 290, 293; *measurement and psychometrics* — five courses from 249, 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258; *social* — courses 220A, 220B, 220C, three social seminars taught by three different faculty members, course 226A in the first year of the program, and 226B-226C each year for the first three years of the program.

**Minor Area Course Requirements** — The minor area requirement is normally satisfied by taking three to four specified courses in one of the following areas: behavioral neuroscience, cognitive, developmental, experimental psychopathology, health, learning and behavior, measurement and psychometrics, political, or social psychology. You may also petition for an individualized minor. See departmental bulletins for further details.

### Qualifying Examinations

The qualifying examination generally consists of three separate sections. The first is an examination administered by the major area, which examines in breadth your knowledge of the major field. The second section is an individualized examination which examines in depth your knowledge of your area of specialization within the major field. The third section is the University Oral Qualifying Examination. All Ph.D. requirements listed above must be completed before the oral qualifying examination can be taken. After successful completion of the oral examination, you are advanced to candidacy and may begin work on the dissertation.

Contact the department for the specific examination requirements of the various areas of specialization.

### Practicum and Internship Requirements for Clinical Students

(1) At least 400 hours of approved supervised preinternship practicum (Psychology 401) are required, of which 150 hours must involve direct clinical service and 75 hours must be formal schedule supervision. These hours are usually completed during the second through fourth years.

(2) The equivalent of one year of full-time supervised internship (Psychology 451) in an acceptable setting approved by the faculty is required. This is usually taken in the fourth or fifth year. Contact the department for further information on the internship requirement and internship assignments.

If you have (1) completed all academic requirements, (2) passed the final oral examination, (3) received doctoral committee approval to file your dissertation, (4) provided evidence of satisfactory completion of at least nine months of an internship approved by the faculty, and (5) obtained approval from the clinical area chair, you may file your dissertation and be awarded the Ph.D. degree with the clear understanding that the remaining months of internship required

by the American Psychological Association will be completed as outlined in the internship contract. Documentation of subsequent internship completion will be provided by the director of clinical training.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

The final oral examination is required of all candidates for the Ph.D. degree.

### Psychology Clinic

The Psychology Clinic in the Department of Psychology is a major training center for clinical psychology students in the Ph.D. program. It provides a broad range of psychological services to clients, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and are encouraged to relate their case material to academic learning and current research. Students and faculty members are also involved in a variety of clinical research projects.

### Lower Division Courses

**10. Introductory Psychology.** Not open to students with credit for course 11. General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research.

**11. Principles of Psychology (5 units).** Lecture, three hours; discussion, one hour; laboratory, one hour. Recommended for premajors. Not open to students with credit for course 10. Introduction to psychology, with emphasis on critical analysis and research. Readings include selections from primary research literature. Discussion sections focus on writing assignments; laboratories focus on research simulation.

**15. Introductory Psychobiology.** Lecture, three hours. Designed for nonmajors. Survey of genetic, evolutionary, physiological, pharmacological, and experiential factors affecting behavior. Using comparative approach where appropriate, emphasis on relevance of biological mechanisms to understanding of humans and their interaction with their environment.

**41. Psychological Statistics.** Lecture, five hours. Enforced requisites: course 10, Mathematics 2. Limited to prepsychology majors. Basic statistical procedures and their application to research and practice in various areas of psychology.

**42. Research Methods in Psychology (6 units).** Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10 and 41 (C- or better). Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues.

**85. Introduction to Cognitive Science.** (Formerly numbered 97.) Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

**88A-88Z. Lower Division Seminars.** (Formerly numbered 88.) Seminar, three hours. Enforced requisite: course 10. Limited to freshmen/sophomores. Intensive analysis in seminar situations of selected topics of current psychological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit:

**88A. Stress, Adaptation, and Coping.** Limited to freshmen. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states. Examination of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading. Mr. Grijalva

**97. Variable Topics in Psychology.** Lecture, three hours. Enforced requisite: course 10 or 11. Study of selected topics in psychology at introductory level; lecture format designed for freshmen/sophomores.

## Upper Division Courses

**M107. Asian American Personality and Mental Health.** (Same as Asian American Studies M107.) Lecture, three hours. Prerequisite: course 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors/resources, and immigrant and minority group status.

**110. Fundamentals of Learning.** Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Experimental findings on animal and human conditioning; retention and transfer of training; relation of learning and motivation. Intended to provide empirical basis for theory and research in this area.

**111. Learning Laboratory.** Lecture, two hours; laboratory, three hours. Prerequisites: courses 41, 42, 110 (may be taken concurrently), psychology major standing. Laboratory experience with techniques in study of learning, especially with animals.

**112A. Basic Processes of Motivated Behavior.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses 10, 41, 110, junior standing. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behaviors such as feeding, drinking, and reproduction-related behavior. Discussion of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, acquired motivation, and drug addiction. Evaluation of evidence obtained in laboratory studies conducted with animals.

**112B. Psychobiology of Fear and Anxiety.** Lecture, three hours. Prerequisites: courses 10, 41, 110, junior standing. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research.

**112C. Principles of Skill Acquisition.** Lecture, three hours. Prerequisites: course 110 or 120 (recommended), and psychology major standing or consent of instructor. Investigation into principles of human skill learning, with focus on general principles of skill learning derived from laboratory settings. These principles have relevance to various industrial or occupational settings, musical performances, vehicle control, sport, and other activities in which complex perceptual-motor skills must be acquired with practice. Major topics include laboratory measurement procedures, effective structure of practice settings, feedback and knowledge of results, learning of automaticity, individual differences, and evaluation of various theories of skill learning.

**113. Behavior and Alcohol Laboratory.** Discussion, two hours; laboratory, four hours. Prerequisites: courses 10, 41, 42. Students conduct an experiment studying effects of alcohol on learning and complex processes using paid volunteers. Examination of set and setting and role of individual differences in relation to current theories of alcohol use and abuse.

**113H. Behavior and Alcohol Laboratory (Honors).** Discussion, two hours; laboratory, four hours. Prerequisites: courses 10, 41, 42. Honors course parallel to course 113.

**114. Alcoholism.** Prerequisite: upper division standing. Theories and research on impact, causes, characteristics, and treatment of alcoholism considered from a biobehavioral point of view.

**115. Principles of Behavioral Neuroscience.** Lecture, three hours; discussion, one hour. Prerequisites for majors: course 41, Biology 2, junior standing; for nonmajors: Biology 5, 9, consent of instructor. Nervous system anatomy, physiology, pharmacology, and their relationship to behavior.

**116. Behavioral Neuroscience Laboratory.** Lecture, one hour; laboratory, three hours. Prerequisites: courses 41, 42, 115 (may be taken concurrently), psychobiology or psychology major standing. Laboratory experience with various topics in behavioral neuroscience.

**M117A-M117B-M117C. Neuroscience: From Molecules to Mind (5 units each).** (Same as Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Physiological Science M180A-M180B-M180C.) Lecture, four hours; discussion, one hour:

**M117A. Cellular Mechanisms.** Prerequisites: Biology 9, Chemistry 132A, Physics 3B or 6B or 8C. Cellular physiology, pharmacology, molecular biology, and development of nervous system.

**M117B. Integrative Mechanisms.** Prerequisite: course 115 (or Biology 171 or Physiological Science 111A) or M117A (or Biology M175A or Neuroscience M101A or Physiological Science M180A). Central and reflex mechanisms of homeostasis, sensory information processing, and motor control.

**M117C. Neural Bases of Behavior.** Prerequisite: course 115 (or Biology 171 or Physiological Science 111A) or M117B (or Biology M175B or Neuroscience M101B or Physiological Science M180B). Neural mechanisms underlying motivation, learning, and cognition.

**118. Comparative Psychobiology.** Prerequisites: course 115, junior psychology major standing. Survey of determinants of species-specific behavior, including genetic influences and learning.

**119A. Neuropsychopharmacology.** Lecture, three hours. Prerequisites: course 115, junior standing. Analysis of basic pharmacologic principles to include interaction of drugs with neurochemically significant substances in the brain.

**119AH. Neuropsychopharmacology (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

**119B. Human Neurophysiology.** Lecture, three hours. Prerequisites: course 115, junior standing. Exploration of biological basis of human cognitive processing, with emphasis on function of cerebral cortex.

**119D. Behavioral Pharmacology.** Prerequisites: course 115, junior standing. Experimental and theoretical treatment of drug-behavior relationships. Particular emphasis on behavior and pharmacological mechanisms of drug action and interaction with neuronal function.

**119DH. Behavioral Pharmacology (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Experimental and theoretical treatment of drug-behavior relationships; pharmacological approaches to mood, aggression, learning, motivation; experimental studies of addiction.

**119E. Stress and Bodily Disease.** Lecture, three hours. Prerequisites: course 115, junior standing. Psychobiological processes as they pertain to development of stress responses and disease states. Consideration of stress-related topics, including behavioral and pharmacological variables in stress and stress management.

**119F. Neuron Circuitry and Behavior.** Prerequisites: course 115, Biology 171, and junior standing, or consent of instructor. Presentation of current data and theory concerning how neuron circuits produce behavior. Mechanisms of perception, response selection, motor pattern generation, learning, and motivation, with emphasis on operation of these processes in well-defined neural circuits.

**119G. Psychobiology of Pain and Pain Inhibition.** Lecture, three hours. Prerequisites: course 115 and senior standing, or consent of instructor. Lectures and discussions on neural mechanisms of pain and problem of chronic pain disease.

**119I. Psychophysiology of Motivation.** Lecture, three hours. Prerequisites: course 115, junior standing. Basic psychophysiology, including brain and endocrine mechanisms, involved in control of motivation. Discussion of homeostatic drives such as hunger and thirst and nonhomeostatic drives such as reproduction behavior.

**M119J. Ethology: Physiology of Behavior and Learning in Animals.** (Same as Psychiatry M190.) Prerequisites: course 115, junior standing. Basic course for undergraduate students which integrates systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with broad biological, evolutionary perspective.

**M119K. Evolution of Intelligence.** (Same as Psychiatry M119.) Lecture, two hours; discussion, two hours. Prerequisites: course 15 or 115, introductory statistics course, junior or senior standing, consent of instructor. Intelligence treated as neural information-processing capacity; its evolution in vertebrates correlated with evolution of enlarged brains. Quantitative approaches in evolutionary biology and neurosciences.

**119L. Human Neuropsychology.** Lecture, two hours. Prerequisites: courses 115, 120, consent of instructor. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions.

**119M. Physiological Psychology of Learning.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: course 115 and junior standing, or consent of instructor. Introduction to classical and current literature on mechanisms of learning, considering both cell-biological mechanisms and brain circuitry.

**119N. The Visual System.** Lecture, three hours. Prerequisite: junior standing. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

**120. Cognitive Psychology.** Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Survey of cognitive psychology: how people acquire, represent, transform, and use verbal and nonverbal information. Perception, attention, imagery, memory, representation of knowledge, language, action, decision making, thinking.

**121. Laboratory in Cognitive Psychology.** Prerequisites: courses 10, 41, 42, 120 (may be taken concurrently), psychology or cognitive science major standing. Laboratory experience with methods and phenomena from research on human perception, memory, and cognition.

**122. Language and Communication.** Lecture, three hours. Prerequisite: course 10. Introduction to psychology of language and communication; verbal and nonverbal channels; interlinguistic and intralinguistic variation; animal communication; biological bases of language; production and comprehension of speech and writing; relation to perception, memory, and thought; conversational interaction; language development.

**123. Psycholinguistics.** Prerequisite: junior standing. Current theory and research in psycholinguistics: survey of language acquisition, language perception, and language production; language physiology and pathology; problems of representation, sequencing, and timing in language and other cognitive skills; errors in speech production and perception.

**124A. Sensation and Perception.** Lecture, three hours. Prerequisites: courses 10, 41, 120, junior standing. Contemporary research and theory about visual and auditory perception. Topics include physiological mechanisms, psychophysical studies and models, and computational approaches.

**124B. Visual Information Processing.** Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, and 120, or consent of instructor. Exploration of issues in visual information, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects.

**124C. Human Memory.** Lecture, two hours; discussion, one hour. Prerequisites: course 120, junior standing. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony.

**124D. Principles of Human Performance.** Prerequisite: psychology major standing or consent of instructor. Investigation into laboratory-based methods and principles of human performance. Major topics include research methods for human performance, central control of movements, anticipation and timing, automaticity, sensory involvement in action such as vision and kinesthesia, role of reflexes, speed-accuracy trade-offs, and individual differences and abilities. Principles discussed should have relevance for numerous real-world situations in which complex perceptual-motor skills are required, such as in industrial or occupational settings, musical performances, vehicle control, and sport.

**124E. Language and Cognition.** Seminar, three hours. Prerequisites: courses 10, 41, 120, junior standing. Recent theories of language and cognition; nature of categories, feedback, and error detection in language and cognition; modularity; ambiguity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language and cognition.

**124F. Thinking.** Lecture, three hours. Prerequisite: course 120. Analysis of experimental studies of human categorization, reasonings, decision making, problem solving, creativity, and related topics.

**127. Abnormal Psychology.** Lecture, three hours. Prerequisite: course 10. Study of dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychosomatic reactions, and other abnormal personality patterns.

**127H. Abnormal Psychology (Honors).** Lecture, three hours. Prerequisite: consent of instructor. Overview of characteristics of major forms of psychopathology, theories and research on causes of disorder, types of treatment, social and legal issues in mental illness.

**129A. Personality Measurement.** Lecture, three hours. Prerequisites: courses 10, 41. Rationale, methods, and content of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions.

**129B. Introduction to Psychoanalysis.** Lecture, three hours. Prerequisites: courses 10, 41. Development of Freud's ideas from 1895 to 1926, with emphasis on how his theory evolved from a drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of developments beyond Freud, especially work of the British school under leadership of Klein, Winnicott, and Bim.

**129C. Culture and Mental Health.** Lecture, two hours; discussion, one hour; outside study, nine hours. Prerequisites: courses 10, 41. Introduction to study of culture and human behavior in general, and culture and mental health in particular. Emphasis on cultural groups that comprise major U.S. ethnic groups (i.e., African Americans, Latinos/Chicanos, Asian Americans, and American Indians).

**129D. Personality.** Lecture, three hours. Prerequisite: course 10. Not open to students with credit for former course 125 prior to Fall Quarter 1993. Survey of major topics in field of personality, including personality theory, personality assessment, and physiological, behavioral, and cultural role of perception, learning, and motivation in personality.

**129E. Human Sexuality.** Lecture, three hours. Prerequisite: senior psychology major standing. Overview of psychology of human sexuality. Psychological research, assessment, and therapy described in a format which highlights their significance for understanding human sexual functioning. Psychological mechanisms underlying expression of human sexuality.

**130. Developmental Psychology.** Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Elaboration of developmental aspects of physical, mental, social, and emotional growth from birth to adolescence.

**132. Learning Disabilities in Perspective.** Lecture, three hours. Prerequisite: upper division standing. Exploration of different orientations to persons with learning problems, emphasizing assessment and intervention approaches and psychological impact of such approaches. Topics include interaction of learner and environment, sociopolitical nature of classroom, psychological impact of schooling, grades, and evaluations, process vs. goal focus in learning.

**133A. Adolescent Development.** Lecture, three hours. Prerequisite: course 130. Examination of cognitive, social, physical, and physiological development of the adolescent.

**133B. Seminar: Cognitive Development.** Seminar, three hours. Prerequisite: course 10, 41, 120, or 130. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language. (Sp)

**133BH. Seminar: Cognitive Development (Honors).** Seminar, three hours. Prerequisite: consent of instructor. Honors course parallel to course 133B. (Sp)

**133C. Language Development.** Lecture, three hours. Prerequisites: courses 10, 41, 130. Application of principles of cognitive development, learning, and perception to study of language development. Topics include first and second language acquisition (sounds, meanings, grammatical structures), learning mechanisms, communication skills, and relation between language and thought in children.

**133D. Social and Personality Development.** Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, 130. Advanced course that surveys theory and research on social and personality development during childhood. Topics include parent/child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations.

**134. Psychology and Education.** Lecture, three hours. Prerequisites: courses 10, 130. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and education of the disadvantaged.

**135. Social Psychology.** Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Interrelationships between the individual and his social environment. Social influences on motivation, perception, and behavior. Development and change of attitudes and opinions. Psychological analysis of small groups, social stratification, and mass phenomena.

**136A. Social Psychology Laboratory.** Lecture, one hour; laboratory, four hours. Prerequisites: courses 41, 42, 135 (may be taken concurrently), psychology major standing. Introduction to research designs and methods used to test social psychological hypothesis, including experiments, observation, content analysis, and/or questionnaires.

**136B. Nonexperimental Methods in Social Psychology.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 41, 42, psychology major standing. Research experience with experimental methods for study of social attitudes or behavior, including fieldwork with survey research, naturalistic observation, or questionnaires.

**137A. Sport Psychology.** Lecture, three hours. Prerequisite: junior psychology major standing. Introduction to field of sport psychology. Coverage of research and applied aspects of a range of topics, including youth sport participants as well as world-class performers.

**137AH. Sport Psychology (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 137A.

**137B. Attitude Formation and Change.** Lecture, three hours. Prerequisites: courses 10, 41, 135. Structure and functions of attitudes, their measurement, how they develop, and methods for changing them.

**137C. Close Relationships.** Lecture, three hours. Prerequisite: course 10 or 41 or 135 or consent of instructor. Examination of research and theory about friendship, dating, and marriage, with emphasis on how these relationships are affected by gender and changing sex roles.

**137D. Introduction to Health Psychology.** Prerequisite: course 10. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research, psychological perspective on these problems, and how psychological perspective might be enlarged and extended in the medical area.

**M137E. Work Behavior of Women and Men.** (Same as Women's Studies M137E.) Prerequisite: course 10 or Women's Studies 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

**137I. Interpersonal Influence and Social Power.** Lecture, three hours. Prerequisite: course 135. Theory and research focusing on how people influence one another and resist such influence, and on the bases of social power. Motivations and effects of influence for the powerholder and target of influence. Applications to such problems and issues as power and leadership in organizations, interpersonal influence and health, power relationships in the family, interpersonal influence in everyday life, social power of political figures.

**M137J. Psychology of Language and Gender.** (Formerly numbered 137J.) (Same as Communication Studies M124 and Women's Studies M137J.) Lecture, three hours. Prerequisites: course 10 or equivalent, junior standing. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

**M138. Electoral Politics: Political Psychology.** (Same as Political Science M141A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 10. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

**M142. Advanced Statistical Methods in Psychology.** (Same as Psychiatry M142.) Lecture, two hours; discussion, 90 minutes. Prerequisite: course 41. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlational techniques, analysis variance, and multiple regression.

**144. Psychological Tests and Evaluation.** Prerequisite: course 41. Further study of principles of measurement, stressing basic concepts. Application to problems of test construction, administration, and interpretation.

**150. Mathematical Models in Psychology.** Lecture, two hours; discussion, two hours. Prerequisites: Mathematics 3C or 31B, Computer Science 10C or 10F, or consent of instructor. Review of theoretical models and experimental evidence for these models in various areas of psychology. Topics include mathematical computer models of learning, perception, cognition, and personality.

**151. Computer Applications in Psychology.** Lecture, two hours; discussion, two hours. Prerequisites: Computer Science 10C or 10F, consent of instructor. Topics include hardware and software computer problems in design, control, and analysis of experiments; programming problems arising in evaluation of models of psychological processes of various content areas such as learning, perception, social, personality, and clinical.

**163. Death and Suicide: Psychological and Sociological Aspects.** (Same as Sociology M138.) Lecture, three hours. Prerequisite: junior standing. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; partial death; megadeath; lethality; psychological autopsy; death of institutions and cultures. P/NP grading recommended (letter grading required if course to be applied toward psychology or sociology major).

**165. Psychology of Gender.** (Same as Women's Studies M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.

**168. Environmental Psychology.** Lecture, three hours. Prerequisites: courses 10, 41. Research-oriented course which surveys theoretical and methodological issues which comprise the area of environmental psychology. Discussion of basic dimensions of emotional response to physical and social environments, measurement of information of rate of situations, and personality variables that are relevant to environmental theory. Residential, therapeutic, work, and recreational environments within a unified framework.

**170A. Behavior Modification.** Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Applied behavior theory; study of application of principles derived from learning theory, as in classical and instrumental (operant) conditioning, to treatment of developmentally disabled, autistic, and schizophrenic children, adult schizophrenics, affective disorders, anxiety states, drug abuse, marital discord, etc. Lectures, discussions, and demonstrations.

**170B. Fieldwork in Behavior Modification.** Discussion, two hours; fieldwork, six hours. Prerequisites: course 110 with a grade of A or 170A, consent of instructor. Fieldwork in applied behavior theory, especially to problems of retarded and autistic children.

**170C. Advanced Fieldwork in Behavior Modification for Nonpsychology Majors.** Lecture, two hours; fieldwork, six hours. Prerequisites: course 170B, consent of instructor. Not open to students with credit for course 171A. Does not fulfill laboratory requirement for majors. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Review of current research in the field. May not be applied as an elective toward any Psychology Department major.

**171A. Advanced Fieldwork in Behavior Modification for Psychology Majors.** Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 170B, psychology major standing, consent of instructor. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Students design and carry out individualized experimental study to evaluate behavioral interventions with developmentally disabled clients.

**171B. Practicum: Design and Implementation of Behavioral Interventions.** Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 171A, consent of instructor. Design and implementation of behavioral interventions with developmentally disabled children. Topics include goal selection, ethical considerations, behavioral contracting, client right and human use procedures, home and community management, parent and staff training, working with schools, clinical issues.

**M172. The Afro-American Woman in the U.S.** (Same as Afro-American Studies M172 and Women's Studies M172.) Limited to juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

**173. Advanced Abnormal Psychology.** Lecture, three hours. Prerequisites: courses 10, 41, 127. Examination of research and theory concerning origins, course, and outcomes of disordered behavior. Focus on continuity and change in patterns of behavior, assessment methods, and research approaches. Concentration on one of following: childhood disorders, anxiety and stress, the schizophrenias, or mood disorders.

**174. Interpersonal Process Analysis.** Lecture, two hours; laboratory, three hours. Prerequisites: courses 41, 42, 127, psychology major standing. Introduction to conceptual tools for analyzing interpersonal structures and functions in goal-oriented human interaction such as psychotherapy, persuasion, courtship, etc. Small group exercises integrated with lecture and discussion (additional laboratory work to be arranged).

**175. Community Psychology.** Prerequisites: junior or senior psychology major standing, consent of instructor. Application of psychological principles to understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation of prisoners.

**175H. Community Psychology (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 175. (W)

**M176. Communication and Conflict in Couples and Families.** (Same as Communication Studies M116.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses 10 or 11, 41, and 127, or consent of instructor. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce).

**177. Counseling Relationships.** Prerequisites: courses 10, 41, 127, junior or senior standing, and consent of instructor, or junior or senior psychology major standing. Conceptual and empirical foundations of psychological counseling; comparison of alternative models of counseling processes. Emphasis on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention.

**178. Human Motivation.** Lecture, three hours. Prerequisite: upper division standing. Examination of theories of human motivation, experimental findings supporting the theories, and history of study of motivation. Topics include sociobiology, conflict, aspiration level, achievement strivings, and causal attributions. (W)

**178H. Human Motivation (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 178. (Sp)

**179A. Health Behavior and Health Status of Ethnic Groups: Behavioral Perspective.** (Formerly numbered 179.) Lecture, three hours. Prerequisites: course 10 or 11 or Community Health Sciences 270, junior or senior standing. Survey course of psychological aspects of health behavior and health status in major ethnic groups in the U.S. Emphasis on major diseases outlined by the U.S. Public Health Service (USPHS).

**179B. Biomedical and Psychosocial Aspects of AIDS/HIV.** Lecture, three hours. Prerequisites: course 137D or 179A or Health Services 100, junior or senior standing. Basics of epidemiology of the disease, routes of transmission, clinical characteristics of AIDS, neurological and psychological aspects of coping with HIV infection and AIDS. Presentation of biologic, behavioral, and therapeutic interventions.

**M180A. Contemporary Problems in Mental Retardation.** (Same as Psychiatry M180A.) Prerequisites: courses 10, 41, and 127 or 130. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion.

**M180B. Contemporary Issues in Mental Retardation.** (Same as Psychiatry M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers.

**M181A-M181B. Research in Contemporary Problems in Mental Retardation.** (Same as Psychiatry M181A-M181B.) Corequisites: courses M180A, M180B. Research experience. In Progress grading.

**186A. Cognitive Science Laboratory: Introduction to Theory and Simulation.** (Formerly numbered 186.) Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Prerequisites: course 85, Program in Computing 15, and junior departmental major standing or consent of instructor. Models in several psychological domains (e.g., visual perception, categorization, reasoning, and problem solving). Types of models include semantic networks, search, production systems, connectionist networks, and mathematical models. Lectures and discussions interwoven with computer simulations written in common LISP.

**186B. Cognitive Science Laboratory: Neural Networks.** (Formerly numbered 186.) Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Prerequisites: course 85, Program in Computing 10A, 10B (or PASCAL), and junior departmental major standing or consent of instructor. Recommended: knowledge of calculus. Lectures and laboratory work in neural network modeling of perception and cognition. Specific topics include essential neurophysiology, basic architectures, learning, and programming techniques. Principles illustrated and discussed in context of models of specific perceptual and cognitive processes. Simulations written in PASCAL.

**187A. Psychology and Law.** (Formerly numbered 187.) Lecture, two hours; discussion, two hours. Prerequisite: junior standing. Study of new topics on legal psychology, including suspect identification, witness reports, and police procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and/or discussions.

**187AH. Psychology and Law (Honors).** (Formerly numbered 187H.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Honors course parallel to course 187A.

**188. Fieldwork in Cognitive Science.** Lecture, two hours; fieldwork (approved community setting), six hours. Prerequisites: cognitive science major standing, department consent. Fieldwork in applications of cognitive science. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

**189. Human Factors.** Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 110, sophomore standing. Principal objective of human factors psychology is optimization of human/machine productivity and efficiency while ensuring human safety. Research from engineering, computer science, and psychology combined for design of systems for human use. Contemporary applications include health care, safety systems, pollution control, transportation, and urban design.

**190A-190B-190C. Honors Course.** Seminar, two hours. Prerequisite: psychology honors program standing. Opportunity for development and analysis of creative ideas through individual research projects with a faculty sponsor and discussion of student and faculty research presentations. Information and applications may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Office, course 190C may be applied toward elective course requirement for any Psychology Department major.

**192. Practicum in Teaching Psychology.** Prerequisites: junior or senior psychology, cognitive science, or psychobiology major standing, consent of department. Training and supervised practicum for advanced undergraduates in teaching psychology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**193. Fieldwork in Psychology.** Seminar, two hours; fieldwork (approved community setting), six hours. Prerequisites: sophomore prepsychology, precognitive science, prepsychobiology, psychology, cognitive science, or psychobiology major standing, consent of department. Fieldwork in applications of psychology. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**194. Research in Psychology.** Seminar, one hour; internship (approved research setting), seven hours. Prerequisites: sophomore prepsychology, precognitive science, prepsychobiology, psychology, cognitive science, or psychobiology major standing, consent of department. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**197. Current Issues in Psychology.** Lecture, three hours. Prerequisite: junior or senior major standing (some sections may require consent of instructor). Study of selected current topics of psychological interest. Consult *Schedule of Classes* for topics and instructors. Only one graded 197 course may be applied as an elective toward psychology major. If consent is approved in advance by Undergraduate Advising Office, psychobiology and cognitive science majors can petition to use course to satisfy an elective requirement. May be repeated for credit with consent of department.

**199. Directed Individual Research and Studies.** Prerequisites: junior or senior psychology, psychobiology, or cognitive science major standing (juniors must have at least 3.0 GPA in the major), consent of instructor and vice chair for Undergraduate Affairs (based on written proposal outlining course of study). Consult Undergraduate Advising Office, 1531 Franz Hall, for further information and approval forms. Only one four-unit 199 course may be taken per term and only one for a letter grade (additional 199 courses may be taken on a P/NP basis). If approved in advance by Undergraduate Office, four units of course 199 may be applied toward elective course requirement for psychology major and toward Psychology 188 requirement for cognitive science major.

## Graduate Courses

**200A. Animal Learning and Behavior.** Basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning, and species-specific behavior.

**200B. Human Learning and Behavior.** Topics include human learning and conditioning and application of learning principles in etiology and treatment of a variety of socially significant problems. Special emphasis on systematic desensitization of anxiety states, behavior modification programs for schizophrenic children and adults, behavioral pharmacology, control of autonomic behavior, among others.

**201. Current Issues in Learning and Behavior (1 unit).** Discussion, 90 minutes. Prerequisite: graduate standing. Required of learning and behavior students a minimum of four times (entire first year and winter of second year). Presentation of papers of current interest in learning, behavior, or applied behavioral analyses by experts in the field. Evaluation of their significance and methodology in detail. May be repeated for credit. S/U grading. Mr. Fanselow, Mr. Minor

**204A. Psychophysiology of Attention and Learning.** Lecture, three hours. Study of research and theories concerned with psychophysiology of attention and learning primarily in humans. Concepts and areas include orientating reflex, dominant focus, classical conditioning, and their implications for psychophysiology of psychopathology and psychotherapy. Mr. Maltzman

**204B. Theories of Learning.** Discussion, three hours. Prerequisite: course 200A or equivalent. Critical discussion and in-depth analysis of current major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenomena. Mr. Fanselow

**204C. Applied Learning.** Lecture, three hours. Prerequisites: graduate standing in psychology, consent of instructor. Lectures and discussion on current research in application of learning principles to clinical and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc. Mr. Lovaas

**204D. Fear and Anxiety.** Lecture, three hours. Prerequisite: graduate training. Presentation of theoretical and empirical advances, from biological and behavioral perspectives, in the area of fear and anxiety. Integration of animal and human research. Ms. Craske, Mr. Fanselow, Mr. Minor

**204E. Primitive Motivational Processes.** Lecture, three hours. Prerequisite: graduate standing. Analysis, using a behavioral systems approach, of basic motivated behavior such as feeding, drinking, foraging, and reproduction. Same approach also applied to phenomena such as acquired motivation, reinforcement, and drug addiction. Historical survey of behavioral analyses of motivation and goal-directed behavior. Mr. Fanselow

**205A. Behavioral Neuroendocrinology (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Mechanisms of hormone action on the brain that influence behavior, including permanent actions in development and transient actions in adulthood. Using a comparative approach, topics include sexual differentiation, long-term effects of stress, seasonal and other changes in adulthood, and aging. Mr. Arnold

**205B. Human Neurophysiology (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Examination of higher cognitive processes in terms of neural mechanisms that underlie them. Topics include cortical modularity and organization, coordinated sensory representation, language, regional functional specialization, attention, and regulation of cortical function by extracortical systems. Mr. Beatty

**205C. Neurotransmitters in Human Disorders of Motor and Cognitive Function (2 units).** Lecture, three hours. Prerequisite: graduate standing. Detailed analysis of molecules involved in interneuronal communication processes (i.e., neurotransmitters, neurohormones, "neuromodulators," neurotropic agents). Discussion of their roles in normal brain physiology, followed by detailed analyses of their perturbations in various disease states. Particular emphasis on current and past thinking about Alzheimer's disease, Parkinsonism, Huntington's disease, and Down's syndrome dementia. Mr. Butcher

**205D. Clinical Psychopharmacology (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. General principles of brain neurotransmitters, including synthesis, cell bodies and pathways, and receptor subtypes. General principles of drug administration and pharmacokinetics. Major classes of psychoactive drugs, animal models, and "atypical" compounds. Mr. Ellison

**205E. Psychobiology of Emotion and Stress (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Overview of literature on role of the brain and autonomic and endocrine systems in emotion and stress-related responses. Some emphasis on involvement of neurotransmitters, neuropeptides, and hormones in emotional plasticity, visceral function, and bodily diseases. Mr. Grijalva

**205F. Physiology of Learning (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Search for anatomical loci of engrams. Cell biology of plasticity, including electrophysiological and molecular approaches. Theories of how neural circuitry might be organized to make learning possible. Mr. Krasne

**205G. Pain (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Consideration of pain from both basic science and clinical perspectives. Discussion of nociceptors, spinal cord, brain mechanisms, pain inhibition, and role of endogenous opioids. Effects of pain and stress on immunity. Mr. Liebeskind

**205I. Motor Coordination (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Elementary and complex units of behavior: reflexes, servomechanisms, oscillators, and central pattern generators. Principles of coordination: efference copy, oscillator coupling, potentiation, and depotentiation. Relation between levels of integration and anatomical levels: transections, lesions, focal stimulation, and single unit recording. Mr. Gallistel

**205J. Homeostatic Drive, Hunger, and Thirst (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Homeostasis used as framework within which ingestive behavior is discussed. Analysis of thirst on basis of depletions of body fluid compartments. Consideration of hunger, focusing on two theories — "Glucostatic" and "Energostatic." Mr. Novin

**205K. Vision Neurobiology (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Exploration of anatomy, physiology, and computation in visual system, focusing on retina, visual cortex, and overall performance. Mr. Schein

**205L. Cognitive Neuroscience (2 units).** (Formerly numbered 205A-205B.) Lecture, three hours. Prerequisite: graduate standing. Overview of neural basis of higher cognitive functions, integrating anatomical, physiological, and behavioral approaches and incorporating clinical and experimental data. Systems covered include attention, perception, memory, language, and hemispheric specialization. Mr. Zaidel

**M205Z. Behavioral and Systems Neuroscience.** (Formerly numbered M209.) (Same as Neuroscience M205 and Physiological Science M205.) Lecture, three hours. Prerequisites: Neuroscience M201, M202, M203, and M204, or consent of instructor. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

**206. Psychophysiology of Brain Function.** Modern concepts of functional organization of the brain, with particular reference to psychological phenomena and behavior. Recent advances in neurophysiology and electroencephalography bearing on perception, attention, drive, sleep-wakefulness, levels of consciousness, etc. Some emphasis on pathology of behavior resulting from brain injury. Mr. Beatty

**207A-207B-207C. Seminars: Physiological Psychology.** Prerequisite: course 115 or equivalent.

Mr. Butcher, Mr. Ellison, Mr. Krasne

**208. Seminar: Comparative Psychobiology.**

Mr. Arnold

**210. Comparative Psychobiology.** Prerequisites: course 115 or equivalent, consent of instructor. Survey of determinants of species-specific behavior, including genetic influences and learning.

Mr. Arnold

**212. Evaluation of Research Literature in Physiological Psychology (1 unit).** Discussion, 90 minutes. Prerequisite: consent of instructor. Papers of current interest presented by members of seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

**220A. Social Psychology.** Lecture, three hours. Prerequisite: graduate standing in psychology. Intensive consideration of concepts, theories, and major problems in social psychology.

Ms. Peplau, Ms. Taylor

**220B. Research Methods in Social Psychology.** (Formerly numbered 224.) Lecture, three hours. Prerequisite: graduate standing in psychology or consent of instructor. Research design and methodological issues in experimental and nonexperimental social research.

Mr. Collins

**220C. Advanced Social Psychology.** (Formerly numbered 220B.) Lecture, three hours. Prerequisite: course 220A or 220D. Review of contemporary topics and issues in social psychological research and theory.

Ms. Dunkel-Schetter, Mr. Pelham

**220D. Introduction to Social Psychology.** (Formerly numbered 220C.) Lecture, three hours. Prerequisite: graduate standing. Introduction to theory and research in social psychology for students who are not psychology majors. Service course for graduate students in education, sociology, political science, management, public health, etc.

Mr. Sidanius

**221. Seminar: Attitude Formation and Change.** Discussion, three hours. Prerequisites: courses 220A and 220B, or consent of instructor. Social psychological research and theories on opinions and attitudes. Effects of mass communication, social factors in assimilation of information and influence.

Mr. Gerard

**222A. Interpersonal Relations.** Discussion, three hours. Prerequisite: course 220A or consent of instructor. Critical review of theory and research on interpersonal relations, with emphasis on friendship, dating, and marriage.

Ms. Peplau

**222B. Interpersonal Influence and Social Power.** Seminar, three hours. Prerequisite: advanced social psychology course (psychological or sociological) or consent of instructor. Review of theory and research on interpersonal influence and social power, with applications to various power relationships such as supervisor/subordinate, health care professional/patient, doctor/nurse, parent/child, wife/husband, teacher/student, political figures, etc.

**223. Seminar: Social Survey Research.** (Formerly numbered 223A, 223B.) Lecture, three hours. Prerequisite: course 220B or consent of instructor. Contemporary issues and topics in social survey research methodology.

**225. Seminar: Critical Problems in Social Psychology.** Discussion, three hours. Prerequisites: courses 220A and 220B, or consent of instructor. May be repeated for credit with consent of instructor.

**226A-226B-226C. Current Literature in Social Psychology (2 units each).** (Formerly numbered 226.) Discussion, 90 minutes. Prerequisite for courses 226B-226C: consent of instructor for nonsocial psychology students. Course 226A is limited to first-year social psychology students. Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and criticized in depth. S/U grading.

(F, 226A; W, 226B; Sp, 226C)

**227. Health Psychology.** Lecture, two hours; discussion, one hour. Prerequisite: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.

Ms. Taylor

**M228A. Proseminar: Political Psychology.** (Same as History M236A and Political Science M261A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

Mr. Sears

**M228B. Seminar: Political Psychology.** (Same as Political Science M261D.) Discussion, three hours. Prerequisite: course 220A or Political Science M261A or consent of instructor. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

Mr. Sears

**M228C. Critical Problems in Political Psychology.** (Same as Political Science M261E.) Discussion, three hours.

**229. Social Cognition.** Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social information in their environment. Seminar provides broad background in the field and also gives depth and focus on particular research topics in the field. Weekly papers, as well as a lengthy final paper, required.

Ms. Taylor

**231. Psychology of Gender.** Seminar, three hours. Prerequisite: one prior course on gender/women's studies or consent of instructor. Critical evaluation of current research and theory concerning psychology of gender, drawing on work from various areas of psychology to understand sources of gender differentiation and its consequences for human behavior and social interaction.

Ms. Henley, Ms. Peplau

**232. Human Sexuality.** Lecture, three hours. Prerequisite: graduate standing. Designed to teach students how to carry out research on human sexual behavior. Contents include theory construction, scale development, physiological and endocrinological implications, radioimmunoassay (measuring hormones in blood sample), ethical issues, methodological and statistical considerations, measurement of sexual arousal, fantasy, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning human sexual functioning.

Mr. Abramson

**233. Seminar: Environmental Psychology.** Prerequisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man/environment relationships. Use of human emotional responses to environments as intervening variables linking specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to emotional response dimensions used to explain within-individual differences in response to same environment over time or between-individual differences to same situation. Review of literature relating information rate from environments to arousal and preferences for those environments.

Mr. Mehrabian

**234. Social Psychological Aspects of Competitive Youth Sport.** (Formerly numbered M234.) Prerequisite: consent of instructor. Review of research concerning social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport.

Ms. Scanlan

**235. Personality.** Survey of cognitive, analytic, and learning theory approaches to study of personality. Emphasis on intensive exploration of selected concepts and related research.

**M239. Personality, Motivation, and Attribution.** (Same as Education M215.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

**240A-240B. Developmental Psychology.** Lecture, three hours. Prerequisites: one undergraduate developmental psychology course, graduate standing. Consideration of variables influencing cognitive social and emotional development of the human organism from conception through adolescence. Emphasis on research methodology and research base for current theories of development.

**241. Current Developments in Developmental Psychology (1 unit).** Discussion, 90 minutes. Prerequisite: graduate standing in developmental psychology. Presentation of papers on current advances in developmental psychology and closely related areas by experts in the field. Emphasis on approaches to a problem, making it suitable to interweave presentations by graduate students.

Ms. Gelman

**242A-242F. Seminars: Developmental Psychology.** Seminar, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Each course may be taken independently and may be repeated for credit:

**242A.** Perceptual Development.

**242B.** Cognitive Development.

Ms. Greenfield

**242C.** Socialization.

**M242D.** Social Development and Education. (Same as Education M217A.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.

**242E.** Cognitive Factors in Learning Disorders.

Mr. Adelman

**242F.** Development of Language and Communication.

Ms. Greenfield

**243A-243B. Seminars: Practical and Societal Issues in Developmental Psychology.** Lecture, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Socialization processes in human development and implication for social/political, educational, research issues, values, and societal change. In Progress grading.

**244. Critical Problems in Developmental Psychology.** Lecture, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.

**M245. Personality Development and Education.** (Same as Education M217C.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.

**M246. Psychological Aspects of Mental Retardation.** (Same as Psychiatry M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

Mr. Tymchuk

**249. Evaluation Research.** Prerequisites: courses 250A, 250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

Mr. Woodward

**250A. Advanced Psychological Statistics.** Review of fundamental concepts. Basic statistical techniques as applied to design and interpretation of experimental and observational research.

Mr. Wickens, Mr. Woodward

**250B. Advanced Psychological Statistics.** Advanced experimental design and planning of investigations.

Mr. Wickens, Mr. Woodward

**251A-251B-251C. Research Methods.** Limited to psychology graduate students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms (normally three terms allowed). S/U grading (course 251A only).

**252A. Multivariate Analysis.** (Formerly numbered 252.) Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Introduction to analysis of data having multiple dependent variables. Topics include continuous multivariate distributions, multiple regression, multivariate analysis of variance, discriminant analysis, canonical correlation, principal component analysis. Applications from clinical, cognitive, physiological, and social psychology. Computer methods.

Mr. Wickens, Mr. Woodward

**252B. Discrete Multivariate Analysis.** Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Introduction to analysis of frequency table data. Topics include categorical univariate and multivariate distributions, independence and conditional independence, log-linear models, multivariate categorical designs, and ordered categorical variables. Applications from various areas of psychology.

Mr. Wickens

**253. Factor Analysis.** Theory and practice of factor analysis in psychological research. Methods of factor extraction and rotation. Applications of computers to computations in factor analysis.

**254A. Psychological Scaling.** Lecture, three hours. Prerequisite: graduate standing. Theory of measurement, law of comparative judgment, methods of unidimensional scaling, multidimensional scaling, and related topics of current interest. Mr. Holman

**254B. Cluster Analysis.** Lecture, three hours. Prerequisite: graduate standing. Quantitative methods for classification. Theories and assumptions underlying major clustering methods. Use of methods in exploratory data analysis. Mr. Holman

**255. Quantitative Aspects of Assessment.** Fundamental assumptions and equations of test theory. Current problems in assessment. Mr. Woodward

**M256. Advanced Regression Analysis.** (Not the same as course 256 prior to Fall Quarter 1992.) (Same as Political Science M200E.) Seminar, three hours. Prerequisite: consent of instructor. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful. Mr. de Leeuw, Mr. DeNardo

**M257. Multivariate Analysis with Latent Variables.** (Same as Political Science M208D.) Lecture, three hours. Prerequisite: consent of instructor. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

Mr. Bentler

**258. Special Problems in Psychological Statistics.** Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Special problems in psychological statistics and data analysis.

**259. Quantitative Methods in Cognitive Psychology.** Prerequisites: courses 250A and 250B, or consent of instructor. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc. Mr. Wickens

**260A-260B-260C. Proseminars: Cognitive Psychology (1 unit each).** Presentation of research topics by students, faculty, and visiting scholars. May be repeated for credit. S/U grading.

**261. Perception.** Lecture, three hours. Prerequisite: consent of instructor. Concepts, theories, and research in study of perception. Considers the questions: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? How do these systems process information?

Mr. Thomas

**262. Human Learning and Memory.** Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in human verbal learning and memory; verbal and nonverbal learning and memory processes, structure and organization of short- and long-term memory. Mr. Bjork

**263. Psycholinguistics.** Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in psycholinguistics: coding and decoding, psycholinguistic parameters of language learning, speech recognition and perception.

Ms. French, Mr. MacKay

**264. Judgment and Decision Processes.** Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in judgment and decision processes: psychophysical scaling, contextual effects on rating scales, models for analysis of value decisions.

**265. Thinking.** Lecture, three hours. Contemporary theory and research in thinking, problem solving, inference, semantic memory, internal representation of knowledge, imagery, concepts.

**266. Cognitive Science.** Lecture, three hours. Prerequisite: consent of instructor. Major issues in cognitive science. Representation of cognitive structures and higher-level processes. Specific areas include perception, learning and memory, problem solving, and reasoning. Relationships to artificial intelligence.

Mr. Wickens

**268A-268E. Seminars: Human Information Processing.** Seminar, three hours. Prerequisite: consent of instructor. Topics vary with interests of instructor. Each course may be taken independently and may be repeated for credit.

**268A. Perception.**

Mr. Thomas

**268B. Human Learning and Memory.**

Mr. Bjork

**268C. Judgment and Decision Processes.**

**268D. Language and Thought.**

Mr. MacKay

**268E. Human Performance.**

Mr. Beatty

**269. Seminar: Cognitive Psychology.** Seminar, three hours. Prerequisite: consent of instructor. Discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.

**270A-270B-270C. Foundations of Clinical Psychology.** Corequisites: courses 271A-271B-271C. Limited to graduate students in clinical psychology:

**270A.** Analysis of phenomenological, theoretical, and research issues regarding etiology and mediating mechanisms in neurotic, affective, schizophrenic spectrum, and other personality disturbances.

**270B.** Principles and methods of psychological assessment and evaluation.

**270C.** Principles and methods of psychological intervention in individuals, families, and community settings.

**271A-271B-271C. Clinical Psychological Methods (2 units each).** Corequisites: courses 270A-270B-270C. Procedures in clinical psychology as applied in clinical and community settings. Supervised exposure to psychological attributes of psychopathology and procedures for psychological assessment, intervention, and research with clinical populations. Experience closely coordinated with content in courses 270A-270B-270C. S/U grading.

**271D. Clinical Research Laboratory (2 units).** Discussion, one hour; laboratory, one hour. Corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C. Limited to graduate students in clinical psychology. Acquaints students with faculty research interests and involves them in their course 251 research at an early stage to insure completion. S/U grading.

Mr. Christensen

**271E-271F. Clinical Research Laboratories (2 units each).** Prerequisites: course 271D, graduate standing in clinical psychology. Required of first-year clinical psychology students. S/U grading. **271E.** Brief overview of research design issued in clinical psychology and practical issues in students' own research activities. **271F.** Discussions of students' particular research activities and issues, plus laboratories in computer analysis of statistical data.

**272A-272G. Advanced Clinical Psychological Methods.** Seminar, three hours. Prerequisite or corequisite: course 401 or 451. Each course may be taken independently for credit:

**272A.** Behavior Modification with Children. Prerequisites: courses 271A-271B-271C or consent of instructor. Course in series of clinical intervention and assessment offerings for second- and third-year clinical students that covers behavior modification research and practice in clinic, school, institution, and home settings.

Mr. Baker

**272B.** Psychotherapy with Adults.

**272C.** Clinical Interventions for Psychological Problems of Children.

**272D.** Family Therapy and Family Dynamics.

**272E.** Special Problems.

**272F.** Behavior Modification with Adults. Prerequisite: second-year graduate standing in clinical psychology. Current cognitive behavior modification principles and techniques. Major conceptual issues; specific techniques demonstrated and practiced by students to cover a range of adult problems such as depression, stress and anxiety, anger management, assertion problems.

Ms. Hammen, Ms. Mays

**272G.** Marital Therapies. Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 270A-270B-270C, 271A-271B-271C. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social-learning, psychodynamic, and systems theories, with relevant research findings.

Mr. Christensen

**273. Interpersonal Communication Seminar.** Prerequisite: course 282 or consent of instructor. Development of a design for studying help-oriented inter-change in community and clinical settings. Initial focus on measuring interpersonal deficit, response styles, and training effects.

Mr. Goodman

**274A-274B. Group Therapy Dynamics.**

**275. Family Process: Psychological and Social Perspectives on the Family.** (Formerly numbered M275.) Various theoretical perspectives applicable to analysis of family structure and dynamics. Critical issues in application of family constructs to clinical problems.

Mr. Goldstein

**276. Clinical Approaches to Children with Learning and Related Behavior Problems.** Lecture, three hours; discussion, one hour. Prerequisite: doctoral standing. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Practicum experiences to illustrate course content and provide opportunities to improve research and clinical competence.

Mr. Adelman

**277A-277B. Advanced Clinical Assessment.** Laboratory, two hours; additional hours to be arranged through Psychology Clinic. Prerequisite: graduate standing in clinical psychology. Projective techniques, clinical interpretation, case studies, psychological test battery, psychopathology, and application of assessment to problems in psychotherapy.

**278. Seminar: Motivation, Conflict, and Neurosis.**

Mr. Feshbach

**279. Seminar: Research in Psychopathology.**

**M280. Affective Disorders (2 or 4 units).** (Same as Psychiatry M234.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

Mr. Gitlin, Ms. Hammen

**281. Seminar: Behavior Therapy.** Mr. Lovaas

**282. Interpersonal Forms: Analysis of Human Interaction Structures.** Lecture, two hours; laboratory, two hours. Conceptual and experimental study of six response modalities common to psychotherapy and everyday interaction: questions, silences, advisement, interpretation, self-disclosure, and reflection. Laboratory work performed in conjunction with lecture and seminar sessions. Mr. Goodman

**283. Psychopathology.** Survey of dominant psychological attributes of particular forms of psychopathology, including analysis of status of various theories concerned with etiology and mediating mechanisms of personality, neurotic, schizophrenic spectrum, and affective disturbances.

**284. Seminar: Clinical Psychology and Communication.**

**M285. Cognitive Behavior Therapy with Children: Treatment and Systems of Care (2 units).** (Same as Psychiatry M277.) Seminar, 90 minutes. Prerequisites: graduate standing, consent of instructor. Cognitive behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities. Ms. Asarnow

**286. Issues and Concepts of Clinical Psychology.** Open to graduate students in majors other than clinical psychology. Survey of major issues and alternatives in current practice. Emphasis on assessment and intervention, with consideration of historical, theoretical, and research bases for current trends.

**287. Critical Problems in Clinical Research Methodology.** Prerequisites: courses 250A, 250B. Special problems of measurement and design in clinical research. Mr. Christensen

**288. Seminar: Research in Personality (1 unit).** Prerequisite: graduate standing in personality. Required of all students majoring in personality. Current research, theory, and professional issues within area of personality. Brown-bag format utilized to foster intellectual exchange and discussion. Students make at least one presentation per term and participate in discussions with faculty and guest lecturers.

**290. History of Psychology.** Philosophical and historical context of contemporary psychology. Major trends from the 19th century to contemporary issues. Mr. Maltzman

**291. Principles of Behavioral Pharmacology.** Prerequisite: consent of instructor. Intensive analysis of drug, brain, and behavior relationships. Discussion of nature and source of drugs, general aspects of pharmacology, neurotransmitters and basic neuropharmacology, principles of behavioral pharmacology, categories of psychopharmacological agents, and pharmacological approaches to study of drug addiction, schizophrenia, and other behavioral processes, both normal and pathological. Mr. Butcher

**292. Biobehavioral Mechanisms of Stress and Disease.** Lecture, three hours. Prerequisite: graduate standing in psychology or consent of instructor. Behavior/physiology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. Usual and altered states of these systems (e.g., stress) as these can promote permanent tissue injuries, disease, or improved bodily function, health enhancement. Mr. Grijalva

**293. Behavioral and Psychophysiological Problems of Alcoholism.** Prerequisite: consent of instructor. Behavioral and psychophysiological characteristics of alcoholism, along with theories concerning their etiology and treatment. Experimental approaches. Mr. Maltzman

**M294A-M294D. Seminars: Neural and Behavioral Endocrinology (3 units, 2 units, 3 units, 2 units).** (Same as Anatomy M255A-M255D and Physiological Science M255A-M255D.) Lecture, three hours. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function. In Progress grading. Mr. Arnold  
(W, M294A, M294C; Sp, M294B, M294D)

**M295. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M236Q, Education M222A, and Psychiatry M235.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

**M296. Neurobiology of Sleep (3 units).** (Same as Neuroscience M259 and Psychiatry M249.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

**297. Issues in Social Development of the Minority Child.** Seminar, three hours. Prerequisites: graduate standing, consent of instructor. Critical evaluation and integration of existing research on social psychological development of the minority child. Emphasis on socialization of cognitive and personality style, with goal of empirically clarifying issues raised in this area of developmental study. Mr. Myers

**298. Special Problems in Psychology.** Content depends on interests of particular instructor. May be repeated for credit.

**299. Developmental Methodology.** Coverage of both theory and methods in measuring age-related changes in behavior. Experimental designs and data-analytic solutions to problems in measurement of change. Some experience in analysis of actual data sets.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**401. Fieldwork in Clinical Psychology (1 to 12 units).** Prerequisites: courses 271A-271B-271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee).

**402A-402B-402C. Clinical Research Practicum (2 units each).** Prerequisite: third-year graduate standing in clinical psychology. Required three-term practicum in clinical research methods. Alternate meetings cover research methodology and professional issues; remaining meetings center on student presentations of current and proposed research activity. S/U grading.

**410A-410B-410C. Clinical Teaching and Supervision.** Prerequisites: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively under way, consent of instructor and clinic steering committee. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology. Ms. Jacobs

**420A-420B. Health Psychology Practicum (2 units each).** Prerequisite: graduate standing. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in the medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in the field. Ms. Taylor

**423. Social Survey Research Practicum.** Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview surveys.

**425. Health Psychology Lecture Series (2 units).** Clinicians and researchers in health psychology from Los Angeles area present their research, programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading. Ms. Taylor

**451. Internship in Clinical Psychology (6 to 12 units).** Prerequisite: course 401. Limited to students who have successfully completed departmental qualifying examinations. May be repeated for credit. S/U grading.

**454. Internship in Industrial Psychology (2 to 4 units).**

**490. Scientific Writing for Psychologists (2 units).** Lecture, two hours; laboratory, two hours. Prerequisite: consent of instructor. Gives graduate students opportunity to improve their effectiveness in writing scientific papers for publication and proposals for dissertations or grants. May not be applied toward graduate degree requirements. S/U grading.

**495. Presentation of Psychological Materials.** Supervised practicum in undergraduate teaching. Students serve as discussion section leaders in selected undergraduate courses. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Research and Study in Psychology (2 to 12 units).** One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.) S/U grading.

**597. Individual Studies (2 to 12 units).** Intended primarily as preparation for Ph.D. qualifying examinations. May be required by some area committees as a prerequisite for taking examinations. S/U grading.

**599. Research for Ph.D. Dissertation (2 to 12 units).** Prerequisite: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

## Religion, Study of (Interdepartmental)

329 Dodd Hall, (310) 206-1356, 825-4641

#### Assistant Professors

William M. Bodiford, Ph.D. (*Japanese Buddhism*)  
 David N. Myers, Ph.D. (*History*)  
 Hossein Ziai, Ph.D. (*Iranian and Islamic Studies*)

#### Adjunct Associate Professor

S. Scott Barchy, Ph.D. (*History; Distinguished Teaching Award*)

## Scope and Objectives

The UCLA major in the study of religion is designed to give students a broad humanistic perspective. It introduces students to several religious traditions and thus to an appreciation of the very nucleus of civilization in various periods of history and various parts of the world, as well as to an understanding of fundamental human orientations. The program also provides opportunity to study one or more particular religious traditions in greater depth. Cohesion and integrity in the program are furthered by courses dealing with philosophical problems in religion and with general anthropological reflections.

## Bachelor of Arts Degree

### Preparation for the Major

**Required:** History 4; Philosophy 2; two courses from Anthropology 9, East Asian Languages and Cultures 60, History 1A, 1B, 1C, 9A, 9C, 9D, 10A, 10B, 11A, 11B.

## The Major

**Required:** A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 197) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to your course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Special studies courses (199) may be applied toward the major but not toward a group requirement; a maximum of 12 units, approved by the adviser, may be applied. No course for the major or preparation for the major may be taken on a P/NP grading basis.

## Honors Program

The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. If you are admitted to honors, you should take three 199 courses under the guidance of the sponsoring professor. These courses are taken in the senior year and count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.

In order to qualify for admission, you should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor David C. Rapoport at the program address.

## Upper Division Course

**100. Undergraduate Seminar: Study of Religion.** Prerequisite: consent of instructor. Limited to 20 students. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor.

## Study of Religion Upper Division Course List

### Group I — Methods

**Anthropology** 156. Comparative Religion  
**History** 193A. History of Religions: Myth  
 193E. Special Topics in History of Religions  
**Philosophy** 175. Topics in Philosophy of Religion  
**Study of Religion** 100. Undergraduate Seminar: Study of Religion

### Group II — Nonliterate and Ancient Religious Traditions

**Ancient Near East (Near Eastern Languages)** 130. Ancient Egyptian Religion  
**Anthropology** 114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)  
 114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)  
 171. Sub-Saharan Africa  
 174P. Ethnography of South American Indians  
 177. Cultures of the Pacific  
**Classics** 161. Introduction to Classical Mythology  
 166A. Greek Religion  
 166B. Roman Religion  
 168. Introduction to Comparative Mythology  
**Dance** 181B. Dance in Southeast Asia  
 181D. Dance in South Asia  
 C187. Dance in Native American Cultures  
**Folklore and Mythology** M122. Celtic Mythology  
 M126. Baltic and Slavic Folklore and Mythology  
 M128. Hungarian Folklore and Mythology  
 M129. Folklore and Mythology of the Ugric Peoples  
 130. North American Indian Folklore and Mythology Studies  
 131. Folklore of India  
 M155. Oral Traditions in Africa  
**History** 193D. Religions of the Ancient Near East  
**Iranian (Near Eastern Languages)** 170. Religion in Ancient Iran

### Group III — Western and Near Eastern Religious Traditions

#### Christianity

**Classics** M170. Power and Imagination in Byzantium  
**Greek (Classics)** \*130. Readings in the New Testament  
**History** 119. The Christian Church, 100-1517  
 120. The Christian Religion, 100-1350  
 125B. History of Modern Europe: Reformation  
 150C. History of Religion in the U.S.  
 194A. History of Early Christians  
 194B. Religious Environment of Early Christians  
 194C. Jesus of Nazareth in Historical Research  
**Philosophy** 100B. Medieval and Early Modern Philosophy  
 107. Topics in Medieval Philosophy  
 118. Kierkegaard

#### Islam

**Arabic (Near Eastern Languages)** \*120. Islamic Texts  
**History** 107A-107B. Islamic Civilization  
 109A. History of North Africa from the Moslem Conquest: To 1578  
**Islamic (Near Eastern Languages)** 110. Introduction to Islam

#### Judaism

**Ancient Near East (Near Eastern Languages)** 170. Introduction to Biblical Studies  
**Hebrew (Near Eastern Languages)** \*120. Biblical Texts  
 \*130. Rabbinic Texts  
**History** M191A-M191B. Survey of Jewish History  
 191G. European Jewry from 1881 to the Present  
 M192A-M192B. Jewish Intellectual History

\*Courses so marked have readings in foreign languages. See departmental course listings for prerequisites.

**Jewish Studies (Near Eastern Languages) 130.** Modern Jewish Religious Movements and Their Ideologies  
M150A-150B. Hebrew Literature in English

### Group IV — South Asian and East Asian Traditions

**Art History 114A.** Early Art of India

114C. Japanese Art

114D. Later Art of India

114E. Arts of Korea

114F. Arts of Southeast Asia

**Chinese (East Asian Languages) 160.** Chinese Buddhism

\*165. Introduction to Chinese Buddhist Texts

175. Introduction to Chinese Thought

**East Asian Languages and Cultures 161.** Buddhist Literature in Translation

162. Buddhist Meditation Traditions

**History 186.** Shinto, Buddhism, and Japanese Folk Religion

188A. Early History of India

193B, 193C. Religions of South and Southeast Asia

**Indic (East Asian Languages) 175.** Introduction to Indic Philosophy

**Japanese (East Asian Languages) 160.** Japanese Buddhism

161. Religious Life in Modern Japan

175. Introduction to Japanese Thought

**Korean (East Asian Languages) 160.** Korean Buddhism

\*165. Introduction to Korean Buddhist Texts

175. Introduction to Korean Thought

Giovanni Cecchetti, Dottore in Lettere (*Italian*)

E. Mayone Dias, Ph.D. (*Portuguese*)

Hassan el Nouty, Docteur ès Lettres (*French*)

Claude L. Hulet, Ph.D. (*Spanish and Portuguese*)

C. P. Otero, Ph.D. (*Spanish, Romance Linguistics*)

José Pascual-Buxó, Ph.S. (*Spanish*)

Pier-Maria Pasinetti, Ph.D., Dottore in Lettere (*Italian*)

#### Associate Professors

Jean-Claude Carron, Docteur ès Lettres (*French*)

Shuhsi Kao, Ph.D. (*French*)

Hilda J. Koopman, Ph.D. (*Linguistics, African Languages*)

Efraín Kristal, Ph.D. (*Spanish*)

Sara Melzer, Ph.D. (*French*)

José Monleón, Ph.D. (*Spanish*)

Susan Plann, Ph.D. (*Spanish*)

Lucia Re, Ph.D., Dottore in Lettere (*Italian*)

A. John Skirius, Ph.D. (*Spanish*)

Paul C. Smith, Ph.D. (*Spanish*)

Dominique L. Sportiche, Ph.D. (*Linguistics*)

Timothy A. Stowell, Ph.D. (*Linguistics*)

#### Assistant Professors

Adriana Bergero, Ph.D. (*Spanish*)

Verónica Cortínez, Ph.D. (*Spanish*)

Andrea Loselle, Ph.D. (*French*)

Claudia Parodi, Ph.D. (*Spanish*)

Malina Stefanovska, Ph.D. (*French*)

### Scope and Objectives

The Romance Linguistics and Literature Program emphasizes modern linguistic and literary theories in the study of Romance languages. Linguistic and literary theories can be pursued independently or jointly; however, the integration of linguistic and literary knowledge is taken to be one of the highest aims of this interdepartmental graduate program.

### Master of Arts Degree

#### Admission

The UCLA Bachelor of Arts degree in French, Italian, Portuguese, or Spanish, or the equivalent, is required. Applicants are expected to have a grade-point average of at least 3.4 in upper division courses, especially in those judged germane to their proposed program. Three letters of recommendation and the General Test of the Graduate Record Examination (GRE) are also required and should be submitted to the Chair, Romance Linguistics and Literature Program, 2326 Murphy Hall, UCLA, Los Angeles, CA 90024-1535. Students admitted from elsewhere whose preparation is considered deficient in view of their intended specialization are required to take specified upper division courses. Such courses may be taken concurrently with graduate courses, but they may not be applied toward the course requirements for the M.A. degree. Before enrolling for the first term in the program, new students must consult the program chair concerning the formation of their guidance committee. Students who know only the language of their major should prepare in at least one other Romance language during the first graduate year so they can take courses in their minor no later than the second year of graduate study.

### Foreign Language Requirement

In addition to the Romance language of major interest and that of minor interest, you are required to take either Latin 3 or the equivalent, or Italian 3 or the equivalent (provided Italian is not your major), whether you specialize in linguistics or in literature. The language requirement must be completed no later than the term before you expect to receive your degree.

### Course Requirements

Twelve courses are the minimum requirement, of which six courses (at least five of them graduate) must be in your major language, with specialization either in linguistics or in literature. One course in the history or development of the major language is highly recommended. At least three courses would be in the minor language, also with specialization in either linguistics or in literature. The remaining three courses should be selected in consultation with the guidance committee so as to be logically supportive of your major field of study. Linguistics 20 is required as a prerequisite for all students majoring in the linguistics field but may not be applied toward the total number of courses required for the degree. Up to eight units of Romance Linguistics and Literature 596 may be applied toward the M.A. Courses 597 and 598 may not be applied toward the degree.

### Teaching Experience

Teaching experience is not required but is desirable. Consult the chair regarding the availability of teaching assistantships.

### Thesis Plan

The program favors the comprehensive examination plan but will approve M.A. theses for exceptionally well-qualified students under special circumstances. You may petition for authorization to write an M.A. thesis only after completion of six courses applicable toward the degree. It is your responsibility to select an appropriate topic and find a professor to direct the thesis. After completion of the thesis, you must pass a two-hour oral examination testing your knowledge of the field of the thesis and your general competence. Only those students who attain a high pass on the examination are encouraged to proceed to candidacy for the Ph.D. degree.

### Comprehensive Examination Plan

The comprehensive examination is administered by three members of the guidance committee, appointed by the chair. The written examination, consisting of one four-hour examination in the major field, one two-hour examination in the minor field, and one oral examination not to exceed one hour, is given each term two weeks prior to final examinations. If you fail the examination or any part thereof, you may retake the failed portions once when the examination is next regularly offered. Only those students who attain a high pass grade on the master's examination are automatically eligible for the Ph.D. program.

## Romance Linguistics and Literature (Interdepartmental)

2326 Murphy Hall, (310) 825-0237

#### Professors

Shirley L. Arora, Ph.D. (*Spanish*)

Luigi Ballerini, Dottore in Lettere (*Italian*)

Rubén A. Benítez, Ph.D. (*Spanish*)

Franco Betti, Ph.D. (*Italian*)

Patrick Coleman, Ph.D. (*French*)

Marga Cottino-Jones, Ph.D., Dottore in Lettere (*Italian*)

Eric Gans, Ph.D. (*French*)

Joaquín Gimeno, Ph.D. (*Spanish*)

Peter Haidu, Ph.D. (*French*)

Bruce P. Hayes, Ph.D. (*Linguistics*)

Carroll B. Johnson, Ph.D. (*Spanish*)

Bengt T.M. Löfstedt, Ph.D. (*Classics*)

Gerardo Luzuriaga, Ph.D. (*Spanish*)

C. Brian Morris, Litt.D. (*Spanish*)

A. Carlos Quicoli, Ph.D. (*Portuguese, Romance Linguistics*), Chair

Enrique Rodríguez-Cepeda, Ph.D. (*Spanish*)

Donca Steriade, Ph.D. (*Linguistics*)

Edward F. Tuttle, Ph.D. (*Italian*)

Stephen D. Werner, Ph.D. (*French*)

#### Professors Emeriti

George D. Bedell, Ph.D. (*Linguistics*)

Marc Bensimon, Ph.D. (*French*)

## Ph.D. Degree

### Admission

The UCLA Master of Arts degree in Romance Linguistics and Literature or the UCLA M.A. in French, Italian, Portuguese, or Spanish, or the equivalent, is required. A strong academic record (normally a GPA of 3.4 or better), three letters of recommendation, and the Graduate Record Examination (GRE) General Test (normally with a combined verbal/quantitative score of 1,100 or better) are also required.

Formal application is required of all students. Entering students who have completed the UCLA M.A. in Romance Linguistics and Literature with a high pass grade are automatically eligible for admission to the Ph.D. program; those who received a middle pass are reviewed like candidates from other institutions; those who received a low pass grade are ineligible for admission. Students whose M.A. program registers deficiencies in scope or quality may be admitted but are required to complete three graduate courses (with grades of B or better) approved by the chair.

Following your formal admission, you select your guidance committee in consultation with the chair. You then meet as soon as possible with your committee to work out your program of courses and set a tentative date for the qualifying examinations. The guidance committee has final authority to prescribe the course of study. Until you have met with this committee and placed yourself under its direction, you are not officially in the Ph.D. program.

### Major Fields or Subdisciplines

The program recognizes two fields of specialization: linguistics and literature.

**Linguistics** — Major fields include (1) the present-day grammar of the Romance language of your major interest and its relation to the grammar of its sister languages and to language in general, (2) the development of the Romance language of your major interest in relation to its sister languages (and possibly other interrelated cultural aspects) from the perspective of historical linguistics, and (3) the genetic and typological relationships of the Romance languages to other Indo-European languages and to language in general. The two minors may be other Romance languages, or one other Romance language plus a field of Romance literature.

**Literature** — Major fields include one of the following in the literatures of at least two Romance languages: (1) early Romance literature and philology; (2) Renaissance and baroque; (3) modern literature, preferably with emphasis in one century. The first minor may be one of the preceding fields not selected for the major. The second minor may be the same field or a new field in another Romance language, or some other related field in the major language or in Romance linguistics.

### Foreign Language Requirement

In addition to the minimum of two Romance languages, Latin 3 or Italian 3 or the equivalent is required of all students in the program. Students selecting option 2 or 3 in linguistics or option 1 in literature must also take German, whereas those selecting option 1 in linguistics or option 2 or 3 in literature must take another foreign language to be determined by the guidance committee. In non-Romance languages, you must pass the Graduate School Foreign Language Test (GSFLT). In languages where there is no such test, passing a departmental examination fulfills the requirement. This requirement may also be met by completing two years of college-level courses in the language with grades of B or better or by fulfilling the foreign language requirement in connection with an M.A. obtained elsewhere. The foreign language requirement must be satisfied no later than the term before the qualifying examinations are taken.

### Course Requirements

In each of the two specializations (linguistics or literature) the Ph.D. program consists of a major and two minors. The courses (a minimum program) are distributed as follows: major — five courses, first minor — three courses, second minor — two courses. At least one seminar is required in each of the three fields. In addition to those required for the master's degree (or equivalent) at least 10 other graduate courses (of which no more than two 596 courses may be applied), as well as such courses as the guidance committee may prescribe, are required. Linguistics 20 is required as a prerequisite for all students majoring in the linguistics field but may not be applied toward the total number of courses required for the degree.

### Teaching Experience

Teaching experience is not required but is desirable. Consult the chair regarding the availability of teaching assistantships.

### Qualifying Examinations

The qualifying examinations, given by the doctoral committee during Fall, Winter, and Spring Quarters, consist of (1) a three-hour written examination in the major field, (2) a two-hour examination in the first minor, (3) a one-hour examination in the second minor, and (4) a two-hour University Oral Qualifying Examination in the three fields, at which time your prospectus for the dissertation is also discussed and approved. Failed portions of the examination may be repeated once after any remedial preparation the committee may specify.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Dissertation

The dissertation may be on any subject within the general area of Romance linguistics and literature. If more than five calendar years elapse between advancement to candidacy

and the presentation of the dissertation, the program may require revalidation of the qualifying examinations.

## Graduate Courses

**204A-204B. Romance Syntax: French (1 to 4 units each).** Lecture, three hours. Prerequisites: Linguistics 120B, 200B, consent of instructor. Course 204A is prerequisite to 204B. Structure of French from point of view of contemporary syntactic theory, with emphasis on considerations of comparative syntax with other Romance languages. Topics include verbal/auxiliary system; WH-movement and Complementizer system; clitic constructions, causatives, inversion phenomena; quantifier distribution; impersonal constructions; negation and subjunctive. S/U or letter grading.

Mr. Sportiche

**211. Comparative Romance Syntax.** Lecture, three hours. Prerequisite: French 210A or Portuguese 204A or Spanish 204A or consent of instructor. Comparative study of syntactic processes in Romance languages. Investigation of parameters underlying linguistic variation.

Mr. Otero, Mr. Quicoli

**255. Topics in Romance Syntax (1 to 4 units).** Prerequisite: consent of instructor. Topics in syntax of Romance languages, with emphasis on recent development in comparative studies; theoretical innovations based on Romance syntax.

Mr. Sportiche

**596. Directed Individual Study or Research (4 to 8 units).** Prerequisite: consent of instructor and program chair. Study or research in areas or on subjects not offered as regular courses. Eight units may be applied toward M.A. degree requirements. S/U grading.

**597. Preparation for Graduate Examinations (4 to 12 units).** Prerequisite: consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis (2 to 12 units).** Prerequisite: consent of guidance committee. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation (2 to 12 units).** Prerequisite: successful completion of Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

## Romance Linguistics and Literature Course List

In consultation with the appropriate adviser(s), courses should be selected with an eye to the organic relationship between them, preferably among those listed below and/or their prerequisites:

### Introductory Courses

**Italian 201.** Bibliography and Methods of Research  
**Spanish M200.** Research Resources

### Linguistics Courses

**Grammatical Theory: Linguistics 201.** Phonological Theory II  
206. Syntactic Theory II

### Development of the Romance Languages

**Hispano-Romance: Spanish M205A-M205B.** Development of Portuguese and Spanish Languages

**Indo-European: Indo-European Studies 210.** Indo-European Linguistics: Advanced Course

280A-280B. Seminars: Indo-European Linguistics

**Italic Dialects: Latin 242.** Italic Dialects and Latin Historical Grammar

**Italo-Romance: Italian 222A.** History of the Italian Language

**Latin History: Latin** 240. History of the Latin Language

**Medieval Latin: Latin** 231A-231B. Seminars: Medieval Latin

**Northern Gallo-Romance: French** 210A. Phonology and Morphology from Vulgar Latin to French Classicism

210B. Syntax and Semantics from Vulgar Latin to French Classicism

**Paleography: History** 219A-219B. Paleography I, II

**Romance Dialectology: Italian** 222C. Italian Dialectology

**Spanish** 209. Dialectology

**Romance Linguistics: Linguistics** 225G. Linguistic Structures

**Vulgar Latin: Latin** 232. Vulgar Latin

### Studies in the History of the Romance Languages

**Gallo-Romance: French** 214. Problematics of Medieval Language and Literature

**Hispano-Romance: Spanish** M251A-M251B. Studies in Gallegan-Portuguese and Old Spanish

**Italo-Romance: Italian** 210. Studies in Early Italian Literature

222A-222B-222C. Studies in History of Italian Language

### Synchronic Linguistics

**Advanced Grammar: French** 201. Literary Research and Composition

**Italian** 222B. Structure of Modern Italian

**Portuguese** 202. Synchronic Morphology and Phonology

204A-204B. Generative Grammar

**Spanish** 202A. Phonology

202B. Morphology

204A-204B. Generative Syntax and Semantics

**Studies in Linguistics and Dialectology: Spanish** 256A-256B. Studies in Spanish Linguistics

257. Studies in Dialectology

### Literature Courses

**History of Ideas: French** 260A-260B. Studies in History of Ideas

**Literary Criticism: French** 202. Historical and Philosophical Background to French Literary Criticism

203. Contemporary Theories

258A-258B. Studies in Literary Criticism

**Italian** 205A-205B. Studies in Criticism

**Spanish** M201A-M201B. Literary Theory and Criticism

**Literary History: History** 218. Medieval Latin Literary History

**Philosophy and Literature: French** 259A-259B. Studies in Philosophy and Literature

### Early Romance Literature

**Petrarca: Italian** 214C. Studies in Medieval Literature: Petrarca's *Canzoniere*

251. Seminar: Petrarca

**Studies in Early Romance Literature: French** 215A-215D. Medieval Literature

250A. Major Medieval Texts

250B. Structure of Medieval Literature

250C. Problems in Medieval Literature

**Italian** 210. Studies in Early Italian Literature

214A-214E. Studies in Medieval Literature

215A-215B. Studies in 15th-Century Literature

250A-250D. Seminars: Dante

252. Seminar: Boccaccio

**Portuguese** C224. Medieval Portuguese Literature

**Spanish** 222. Medieval Epic and Narrative Poetry

223. Medieval Prose

262A-262B. Studies in Medieval Spanish Literature

### Modern Romance Literature

**Genre Studies: Portuguese** 252. Studies in Early Portuguese Literature

253. Studies in Modern Portuguese Literature

254. Studies in Early Brazilian Literature

255. Studies in Modern Brazilian Literature

**Studies in the 18th Century: French** 218A-218B-218C. 18th Century

254A-254B. Studies in the 18th Century

**Italian** 218A-218D. Studies in 18th-Century Literature

256A-256B. Seminars: 18th Century

**Portuguese** C227. Romanticism and Realism in Portuguese Literature

C232. Romanticism in Brazilian Literature

**Spanish** 229. Romanticism

239. Romanticism and Realism in Spanish-American Literature

270A-270B. Studies in 18th-Century Spanish Literature

277A-277B. Studies in Colonial Spanish-American Literature

**Studies in the 19th Century: French** 219A-219D. 19th Century

255A-255B. Studies in the 19th Century

**Italian** 219A-219D. Studies in 19th-Century Literature

257A-257B. Seminars: Romanticism

**Portuguese** C228. Post-Romanticism and Naturalism in Portuguese Literature

C233. Naturalism, Realism, and Symbolism in Brazilian Literature

**Spanish** 230. Realism and Naturalism

271A-271B. Studies in 19th-Century Spanish Literature

278A-278B. Studies in 19th-Century Spanish-American Literature

**Studies in the 20th Century: French** 220A-220D. 20th Century

221A-221B-221C. French-African Literature

256A-256B. Studies in Contemporary Literature

257A-257B. Studies in French-African Literature

**Italian** 220. Studies in Turn-of-the-Century Literature

221A-221E. Studies in 20th-Century Literature

258A-258B. Seminars: Contemporary Italian Literature

**Portuguese** C229. 20th-Century Portuguese Literature

C234. 20th-Century Brazilian Literature: Poetry and Drama

C235. 20th-Century Brazilian Literature: Novel

**Spanish** 232. Spanish Prose Literature from 1898 to the Civil War

233. Spanish Prose Literature after the Civil War

234. Spanish Drama and Poetry from 1898 to the Civil War

235. Spanish Drama and Poetry after the Civil War

240. Major Currents in Modern Spanish-American Literature

243A-243B. Contemporary Spanish-American Poetry

244A-244B. Contemporary Spanish-American Novel

245. Contemporary Spanish-American Essay

272A-272B. Studies in 20th-Century Spanish Literature

280A-280B. Studies in Contemporary Spanish-American Literature

### Renaissance and Baroque Literature

**Cervantes: Spanish** 227. Cervantes

**Studies in Renaissance and Baroque Literature: French** 216A-216B-216C. Renaissance

217A-217D. 17th Century

251A-251B. Studies in the Renaissance

252A-252B. Studies in the Baroque

253A-253B. Studies in the 17th Century

**Italian** 216A-216E. Studies in the Renaissance

217. Studies in 17th-Century Literature

253A-253B-253C. Seminars: Chivalric Poetry in Italy

255A-255B. Seminars: Baroque

**Portuguese** C225. Renaissance Portuguese Literature

C226. Baroque and Neoclassical Portuguese Literature

C231. Colonial Brazilian Literature

**Spanish** 224. Poetry of the Golden Age

225. Drama of the Golden Age

226. Prose of the Golden Age

237. Literature of the Spanish Conquest

264A-264B. Studies in Golden Age Spanish Literature

## ROTC Programs

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Senior Division Reserve Officers' Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920.

This voluntary training allows you to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing your college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). They are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of your major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for students who apply early in their sophomore year. All have leadership laboratories which help to build management skills.

The majority of commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service.

## Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of \$100 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing,

specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Completed applications should be received prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Three- and two-year scholarship applications may be obtained from the appropriate UCLA department and must be submitted prior to February 1.

## Aerospace Studies

210 Men's Gym, (310) 825-1742

### Professor

William F. Porter, M.S., Colonel, *Chair*

### Adjunct Assistant Professors

Barbara L. Carpenter, M.A., Captain  
James D. Quilliam, M.B.A., Major  
Kurt S. Shigeta, M.B.A., Captain

## Air Force ROTC Scope and Objectives

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

## Four-Year Program

The four-year program is available to first-term freshmen and those full-time students with at least four years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A-1B-1C and 20A-20B-20C), followed by a two-year Professional Officer Course (POC) described under "Two-Year Program." GMC participation requires one hour of academic class and two hours of leadership laboratory each week during the academic year. Students incur no military obligation for GMC participation unless they qualify and accept an Air Force ROTC scholarship during or after their sophomore year.

Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel expenses and are paid about \$450 to cover incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

## Two-Year Program

The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A-130B-130C and 140A, 140B, 140C. POC participation requires two hours of leadership laboratory and three hours of academic class each week during the academic year.

Prerequisites for the two-year program are successful completion of the GMC and a four-week field training course (see "Four-Year Program" above), or successful completion of a six-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the six-week field training program are encouraged to apply to the department chair early during Fall Quarter of their sophomore year. The application deadline normally is February 1, but earlier submission is recommended, as the selection board considers applications monthly. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, medical examination results, performance during an officer board interview, and a physical fitness test.

Students selected for the six-week summer field training are provided meals, quarters, clothing, travel expenses, and approximately \$675 to cover incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see "Four-Year Program" above).

Students enrolled in POC incur a military obligation and are paid \$100 per month during the academic year. Graduation and successful completion of POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

## Freshman-Year Courses

**1A-1B-1C. U.S. Military Forces in the Contemporary World (2 units each).** Lecture, one hour. Air Force ROTC students should complete all three courses, preferably in sequence. Willingness to participate in class discussion required. P/NP or letter grading:

**1A.** Examination of roles and norms expected from military officers, with emphasis on characteristics of national power, U.S. national security apparatus, and key elements of current strategic doctrine. Role of U.S. Navy, Marine Corps, and Army.

Maj. Quilliam (F)

**1B.** Focus on roles, missions, and organization of the Air Force, covering basic elements of air doctrine and functions of general purpose, strategic, and aerospace support forces. Emphasis on how aerospace forces are utilized during conflict, as well as current problems in defense procurement.

Maj. Quilliam (W)

**1C.** "Threat assessment" of U.S.S.R. military and political policies and potential for military conflict in selected regions of the world. Examination of low-level conflict as represented by terrorist actions and guerrilla warfare. Analysis of basic elements of strategy which deter war.

Maj. Quilliam (Sp)

## Sophomore-Year Courses

**20A-20B-20C. Developmental Growth of Air Power (2 units each).** Lecture, one hour. Development of air power over past 80 years. Development of various concepts of employment of air power, with emphasis on factors which have prompted research and technological change. Key events and elements in history of air power, especially where these provide significant examples of impact of air power on strategic thought. P/NP or letter grading. Capt. Shigeta (F,W,Sp)

## Upper Division Courses

**130A-130B-130C. Concepts of Air Force Management and Leadership.** Lecture, three hours. Course 130A is prerequisite to 130B, which is prerequisite to 130C. Analysis of principles and functions of management, leadership, and organizational behavior, with special reference to the Air Force as a model. Problem solving, information systems and models, quantitative methods, and computer systems. Group discussions, case studies, films, and role-playing used as teaching devices. Communicative skills strengthened through preparation of written reports and oral presentations. Capt. Carpenter (F,W,Sp)

**140A. Military Judicial System.** Lecture, three hours. Introduction to military justice system, international laws of armed conflict relating to air operations, and foundations of military professionalism. Oral and written reports to strengthen communicative skills. P/NP or letter grading. Col. Porter (F)

**140B. The Military in American Society.** Lecture, three hours. Forces and issues in social context of the American military. Influence of social norms, societal pressures, and cultural factors on functions and role of the military professional in the U.S. Communicative skills strengthened through extensive classroom presentations. P/NP or letter grading. Col. Porter (W)

**140C. American Defense Policy.** Lecture, three hours. U.S. security policy with respect to factors that influence its formulation, bureaucracy that formulates and implements it, and forms it has taken and may take in the future. Communication techniques strengthened, and communication abilities oriented to Air Force requirements through preparation of papers and classroom presentation and discussion. P/NP or letter grading. Col. Porter (Sp)

**199. Special Studies in Aerospace Studies (2 or 4 units).** Prerequisite: consent of instructor. Course of study for undergraduates who wish to engage in independent research under direct supervision of a department faculty member. P/NP or letter grading. Col. Porter

## Military Science

127 Men's Gym, (310) 825-7381, 825-7384

### Professor

Michael L. Graves, M.S., Lieutenant Colonel, *Chair*

### Adjunct Assistant Professors

Edmund Davis, B.A., Major  
Rodney J. Leonard, M.A., Captain  
Laurie E. McCabe, B.A., Captain

## Army ROTC Scope and Objectives

Army ROTC prepares selected students for leadership as commissioned officers in the U.S. Army, Army Reserve, or National Guard. This training includes in-depth study of the military establishment, military history, doctrine, leadership principles, management, and many other

basic skills necessary to build motivated, effective leaders.

## Programs

The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower division study during which students must complete 12 units of coursework and (2) the Advanced Course, two years of upper division study consisting of 14 units of coursework and a six-week summer camp.

Transfer students and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see "Two-Year Program" below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance of \$100 a month for 10 months during each of the two academic years, plus military science books and uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army's 17 specialty areas in either the Army National Guard, Reserves, or Active Army. Students' desires are a major factor in determining which branch is selected.

Students selected for Advanced ROTC must attend a six-week Advanced Camp between their Military Science III and IV years. Cadets receive an allowance for travel expenses and are paid for attendance.

The active duty obligation for those students selected to enter the Reserves or National Guard is for initial training, and only for a period of several months. Students accepting ROTC scholarships and a commission in the Regular Army, or who are selected to enter the Active Army, serve longer terms. ROTC students wishing to obtain advanced degrees may be granted a delay in reporting to their initial assignment.

## Four-Year Program

Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

## Two-Year Program

This program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school Junior ROTC, attending a paid ROTC summer camp, joining the Army Reserve or National Guard (veterans may receive VA benefits concurrently with Advanced Course subsistence allowances), completing two years of college-level Air Force or Navy ROTC, completing an ROTC compression course, or previous military service.

## Commissioning

Successful completion of the Advanced Course program, one course each in computer literacy, mathematical reasoning, written communications, military history, and human behavior, and a bachelor's degree may lead to a commission as a second lieutenant in the Army Reserve, National Guard, or Active Army. Distinguished graduates may qualify for a commission in the Regular Army.

## Lower Division Courses

Army ROTC students may satisfy military history requirements by completing History 7B, 125E, 125F, 127A, 127B, 130C, 147A, 148A, 148B, 148C, 152A, or 152B in lieu of Military Science 110, with consent of the ROTC adviser.

**000. Leadership Laboratory (No credit).** Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be concurrently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in classroom and to develop their confidence as future military officers. (F,W,Sp)

**10. Introduction to Leadership (2 units).** Lecture, one hour; discussion, one hour. Introduction to leadership and motivational theory. Topics include nature of organizations, individual behavior, motivation and performance, values and organizational commitment, and influence processes. (F)

**11. U.S. Defense Establishment I (2 units).** Lecture, one hour; discussion, one hour. Study of evolution and organization of U.S. Department of Defense, including study of military services, with emphasis on the U.S. Army. P/NP or letter grading. (W)

**12. U.S. Defense Establishment II (2 units).** Lecture, one hour; discussion, one hour. Fundamentals of national security policy development. P/NP or letter grading. (Sp)

**14. Principles of Land Navigation Applicable in Maneuver (2 units).** Lecture, one hour; discussion, one hour. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS). (Sp)

**18. Modern Guerrilla Warfare (2 units).** Lecture, one hour; discussion, one hour. Limited to undergraduate students. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurgencies. Topics include nonmilitary responses, military tactics, interrelationship of military and government, psychological warfare, and civic actions. (W)

**21. Psychology of Leadership I (2 units).** Lecture, one hour; discussion, one hour. Study of relationship of individual differences, group dynamics, formal organizational constraints, and impact of society on leadership process. Introduction to external environmental pressures on a leader and psychology of the individual as a follower, examined in areas of motivation, peer pressure/conformity, and group norms. (W)

**24. Theory of Warfare (2 units).** Inquiry into theory, nature, causes, and elements of warfare, with attention also to evolution of weapons and warfare. (F)

## Upper Division Courses

**110. U.S. Military History (3 units).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Survey of American military history from 1860 to the present. Causes of war, strategy, tactics, and technological developments set against economic, political, and diplomatic concerns. Impact of warfare on society. (F)

**112. Psychology of Leadership II (3 units).** Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to various individual leadership styles and personalities to assist students in development of their own individual style. Different philosophies of leadership, along with dimensions of leader behavior. Special consideration to counseling, management, and communication techniques that must be mastered to be an effective leader. (W)

**113. Theory of Learning Applied to Teaching (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Study of instructional processes, lesson content planning procedures, techniques of applicatory education, role of testing (including evaluation and analysis). Emphasis on development of training programs to maximize organizational effectiveness. P/NP or letter grading. (F)

**123. Military Legal Systems (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to theory and application of military law and legal systems, with emphasis on Uniform Code of Military Justice and rights of the accused under the constitution. (Sp)

**125. Decision Making (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Designed to present students who will become commissioned officers with new insight into modern methods of managerial decision making and into various steps involved in the process. Introduction to various components of leadership and functions of management in order to understand where areas of problem analysis and decision making impact and how they fit into leadership and management. Various steps which comprise the problem analysis and decision-making processes. (Sp)

**126. Military Professionalism and Ethics (2 units).** Lecture, 30 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Ethical concepts held by America's military institution. Classification of the military as a profession, special social responsibilities of those in the military, values related to and accepted by military society, and an ethical reasoning/decision-making process and model. (W)

**199. Supervised Independent Studies (1 to 3 units).** Prerequisites: upper division standing, consent of instructor. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection.

## Naval Science

123 Men's Gym, (310) 825-9075

### Professor

Daniel P. McKnight, M.S., Colonel, U.S. Marine Corps, Chair

### Adjunct Assistant Professors

Paul M. Dalessandro, B.S., Lieutenant, U.S. Navy  
Cass D. Howell, M.S., Lieutenant Colonel, U.S.

Marine Corps

Barry J. Phillips, B.S., Lieutenant, U.S. Navy

Eric M. Tranter, B.A., Captain, U.S. Marine

Corps  
James D. Whitlock, B.A., Lieutenant, U.S. Navy

## Navy ROTC Scope and Objectives

Navy ROTC at UCLA offers subsidized and non-subsidized programs for college students who

wish to serve their country as commissioned officers in the U.S. Navy or Marine Corps. The primary objectives of NROTC are to provide students with understanding of the fundamental concepts and principles of naval science; basic understanding of associated professional knowledge; appreciation of the requirements for national security; and a strong sense of personal integrity, honor, and individual responsibility.

NROTC enables college graduates to use their education in such military fields as marine engineering, nuclear propulsion engineering, aviation, and Marine Corps infantry, aviation, and combat service support roles. It also provides opportunity to develop leadership and management skills in a challenging environment of high responsibility.

The Department of Naval Science offers several programs for which U.S. citizenship is required.

## College Program

This is a four-year program open to physically qualified men and women between the ages of 17 and 21. Students receive \$100 per month in their junior and senior years and complete one summer training cruise after their third year. After graduation, students are commissioned as Ensign, U.S. Naval Reserve, or Second Lieutenant, U.S. Marine Corps Reserve. A three-year active duty obligation is incurred.

## Two-Year Program

Applications are accepted from UCLA students as well as incoming junior college transfers. After a six-week summer training period, students enroll in NROTC as juniors. Applicants should contact the department no later than March 1 of their sophomore year.

## Freshman-Year Courses

**1A. Introduction to Naval Science (2 units).** Introduction to organization of the Naval Service, various components of the Navy, career opportunities, shipboard damage control, fire fighting, propulsion systems, and some customs and traditions of the Naval Service.

Lt. Phillips

**20B. Seapower and Maritime Affairs (2 units).** Conceptual study of seapower, emphasizing historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, focusing on current abilities of specific nations to use the oceans to attain national objectives.

Lt. Col. Howell

## Sophomore-Year Courses

**1B. Naval Ship Systems I.** Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy.

Lt. Whitlock

**20A. Naval Ship Systems II.** Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problem, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

Lt. Whitlock

## Junior-Year Courses

**101A. Navigation I.** Study of principles of piloting, celestial, and electronic navigation employed in determining a ship's position at sea. Celestial and electronic theory, mathematical analysis, sextant sights, and use of navigational aids. Lt. Dalessandro

**101B. Navigation II.** Prerequisite: course 101A. Study of rules of the road, shiphandling, and basic concepts of multiple ship formations and maneuvering. In-depth analysis of problems associated with operations on high seas and inland waters applying to civil and U.S. Naval craft. Lt. Dalessandro

**\*103. Evolution of Warfare.** Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare. Capt. Tranter

## Senior-Year Courses

**102B. Naval Leadership and Management I.** Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer's role as a leader/manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication. Capt. Tranter

**102C. Naval Leadership and Management II (2 units).** Prerequisite: course 102B. Current leadership and management in the U.S. Navy. Areas include human resources management, personnel management, material management, and performance and career evaluation. Lt. Phillips

**\*104. Expeditionary Military Operations.** Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

Capt. Tranter

**199. Supervised Independent Studies (1 to 4 units).** Prerequisites: upper division standing, consent of instructor. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection. P/NP or letter grading.

Roman Koropecjy, Ph.D. (*Polish and Ukrainian Literature*)

### Lecturers

Edward Denzler, M.A. (*Russian*)  
Olga Kagan, Diploma (*Russian*)

## Scope and Objectives

The Bachelor of Arts degree in Russian Language and Literature is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Within the major, students concentrate either in Russian literature or Russian linguistics. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirements by combining regular coursework with summer programs or with the University of California semester program at the Financial Academy of the Russian Federation in Moscow, which is open to students who have completed the equivalent of two years of study (American Council of Teachers of Foreign Languages — ACTFL — level 1). Students interested in this program should consult the undergraduate adviser as early as possible.

The Bachelor of Arts degree in Slavic Languages and Literatures is designed to provide students with basic mastery of two Slavic languages and familiarity with their literatures, as well as general background in the cultural, political, and social history of the Slavic peoples.

The department also offers a Bachelor of Arts degree in Russian Studies in which students achieve a basic mastery of the Russian language, as well as familiarity with Russian literature, history, and culture.

The graduate program provides advanced training in Slavic linguistics and literature leading to the M.A. and Ph.D. degrees. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include language teaching, translation, interpreting, librarianship, and government service.

## Undergraduate Study

The department offers three majors: (1) Russian language and literature, with concentrations in Russian literature or Russian linguistics, (2) Slavic languages and literatures, and (3) Russian studies. The equivalent of a major in Slavic or Russian language and literature is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Slavic or Russian language and literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

## Bachelor of Arts in Russian Language and Literature

### Preparation for the Major

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

### The Major

*Required:* Russian language skills equivalent to ACTFL level 2 (students usually take Russian 101A-101B-101C and 102A-102B-102C to attain level 2 proficiency; consult the undergraduate adviser for information on summer programs and the Moscow semester program), Russian 106, 130A, 140A.

You also must concentrate in either literature or linguistics. For the *literature* concentration, Russian 118, 119, 120 (all three may be taken in the sophomore year) and two courses from 124A through 124F, 125, 126, 130B, 130C, 134, 140B, 140C, 140D, M150 are required. For the *linguistics* concentration, two courses from Linguistics 103, 110, 120A, 120B, and two courses from Slavic 201, 202, Russian 118, 119, 120, 124A through 124F, 125, 126, 130B, 130C, 134, 140B, 140C, 140D, M150, Linguistics 103, 110, 120A, 120B, 127 are required.

## Bachelor of Arts in Slavic Languages and Literatures

### Preparation for the Major

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), Slavic 99.

### The Major

*Required:* Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+); courses 118, 119, 120 (all three may be taken in the sophomore year); one three-course se-

quence from Czech 102A-102B-102C, 102D-102E-102F, Polish 102A-102B-102C, 102D-102E-102F, Serbo-Croatian 103A-103B-103C, 103D-103E-103F (placement with consent of instructor); three courses from Czech 102D, 102E, 102F, Polish 102D, 102E, 102F, Serbo-Croatian 103D, 103E, 103F, Russian 102A, 102B, 102C, 123, 130A, 130B, 130C, 134, 140A through 140D, M150; two courses from Czech 155A, 155B, Polish 152A, 152B, Serbo-Croatian 154A, 154B, Slavic M125, M126.

## Bachelor of Arts in Russian Studies

### Preparation for the Major

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

### The Major

*Required:* Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+), three courses in Russian literature, two courses from History 131A through 131D, two courses from Economics 182, Geography 184, Political Science 128A, 128B, 156A, Russian M170, and five additional courses selected from those listed above, from Russian language, literature, or linguistics courses, or from special courses (approved by the undergraduate adviser) offered by the Departments of Art, Art History, Design, Film and Television, History, Music, Political Science, Slavic Languages and Literatures, and Theater.

## Graduate Study

The Department of Slavic Languages and Literatures at UCLA offers M.A. and Ph.D. degrees in Slavic Languages and Literatures.

### Admission

In addition to the University minimum requirements, the department requires an undergraduate major in the field or three years of Russian language and a sufficient number of Russian history, literature, and linguistics courses to document a foundation for graduate study. For application to the Ph.D. program, the department requires a UCLA M.A. in Slavic Languages and Literatures or its equivalent. If you do not hold a UCLA M.A. in Slavic Languages and Literatures, you are required to make up deficiencies as stipulated by the graduate adviser and take the M.A. examination as a screening examination within your first year.

All applicants must provide three letters of recommendation from persons capable of judging their academic potential and submit a writing sample in the field they wish to pursue. No departmental admission tests are necessary, but the Graduate Record Examination (GRE) is required.

A department brochure describing the curriculum in some detail (graduate and undergraduate) is available from the Graduate Adviser,

Department of Slavic Languages and Literatures, 115 Kinsey Hall, UCLA, Los Angeles, CA 90024-1502.

## Major Fields or Subdisciplines

Candidates for the M.A. and Ph.D. degrees select a specialization in either literature or linguistics, with Russian as the principal language and literature. On the Ph.D. level, students may specialize in a language or literature other than Russian by special arrangement.

## Master of Arts Degree

### Foreign Language Requirement

There are two foreign language requirements which must be completed before the M.A. comprehensive examination: (1) you must pass a departmental Russian language proficiency examination which tests your ability to translate from Russian to English and vice versa. This examination may be retaken each term until a pass grade is achieved; (2) you must demonstrate ability to read scholarly literature in either French or German by one of three methods: (a) passing the appropriate Graduate School Foreign Language Test (GSFLT) reading examination with a score of 500 or better, (b) passing the departmental reading examination, or (c) completing level five at UCLA in one of the languages with a grade of B or better (equivalent university-level coursework in French or German taken within two years of admittance may satisfy this requirement at the discretion of the graduate adviser).

### Course Requirements

Slavic 201, Russian 204, 212A, 220A are required of all M.A. students.

Literature students must also take Russian 211A, 211B, 212B, 213, 219.

Linguistics students must also take Slavic 202, Russian 220B, one course from 211A, 211B, 212B, 213, and three courses from the following: Russian 241, 242, 265; 243, 263, 264; 210, Slavic 241A, 241B.

Courses in the 500 series may not be applied toward the M.A. course requirements.

## Comprehensive Examination Plan

Application for advancement to candidacy must be made no later than the second week of the term in which the M.A. examinations are to be taken and is accepted only if you have satisfied the foreign language requirement in French or German and have passed the Russian Language Proficiency Examination. M.A. examinations are offered at the end of Fall, Winter, and Spring Quarters. After you have declared your intention to take the examination, a committee is appointed by the chair. The comprehensive examination has two parts — written (three hours) and oral (two hours) — and is based on coursework and the departmental reading list. The examinations include materials from both subdisciplines. If you receive a pass grade on the written examination, you are admitted to the oral examination which is designed to test

the fields of major interest and general background. It may be conducted partly in Russian.

Your combined performance in the written and oral examinations is graded high pass, pass, or fail. A grade of high pass or pass is necessary to receive the M.A. degree; the grade of high pass is necessary to enter the Ph.D. program. Examinations may be repeated once; there is a six-month limit on retaking examinations graded pass and a one-year limit on examinations graded fail.

## Ph.D. Degree

### Admission

You are formally admitted to the Ph.D. program after (1) passing the UCLA M.A. comprehensive examination with a grade of high pass, (2) passing the reading examination in both French and German (see "Foreign Language Requirement"), and (3) demonstrating proficiency in modern Slavic languages other than Russian. Literature students must complete one year of the language of their second Slavic literature; linguistics students must complete one year of one language and two years of another (one of the languages should represent the West Slavic group, the other the South Slavic group). You may demonstrate equivalent proficiency through written and oral examinations in lieu of taking the language courses.

The comprehensive examination serves as a screening examination for admission to the doctoral program if you are entering UCLA with an M.A. from another institution. You may retake the examination once in order to achieve the necessary high pass grade.

### Foreign Language Requirement

You must demonstrate ability to read scholarly literature in both French and German by completing one of the three methods listed under the master's degree. With departmental consent, students specializing in linguistics may substitute reading knowledge in another language important to the study of Slavic linguistics (Finnish, Hungarian, Lithuanian, Latvian, Romanian, or a Turkic language relevant to East or South Slavic historical linguistics) and a score of 450 on the Graduate School Foreign Language Test (GSFLT) in either French or German. Reading knowledge of two such languages may, by the same procedure, be substituted for the entire French or (more rarely) German examination.

### Course Requirements

Before the formation of a doctoral committee, you must have been officially admitted to the doctoral program and have taken the following required courses.

Linguistics students must take Slavic 221, 222, 223, and three other advanced linguistics courses or seminars (numbered above 220).

Recommended preparation for linguists includes Linguistics 103, 110, 120A, 120B, M150.

Literature students must take two courses from Slavic 230A-230B-230C and four additional advanced literature courses or seminars.

Candidates specializing in literature are advised to acquire sound general knowledge of modern Western European literature.

### Qualifying Paper

You are required to submit to the faculty a qualifying paper that demonstrates your ability to conduct serious and original research. The paper must be received and approved by your faculty adviser (usually the prospective examination and dissertation committee chair) no later than one term preceding the term in which you expect to take the qualifying examinations.

### Qualifying Examinations

All students are expected to have sound general knowledge of both Slavic philology and Russian literary history equivalent to that required for the M.A. at UCLA.

Students in linguistics must take one written examination on the structure of modern Russian and another on comparative Slavic linguistics, the history of Russian, and the history and structure of a second Slavic language. Each examination lasts three hours.

Students in literature must take a series of six examinations on Russian literature and one examination on a Slavic literature other than Russian. Each examination is one hour in length; all seven must be taken within a one-week time period.

If you receive a grade of pass on the written examination(s), you are admitted to a two-hour University Oral Qualifying Examination, which is designed to test the fields of major interest and general background, and which typically includes discussion of the dissertation topic.

After considering your overall performance in both the oral and written examinations, the committee assigns a cumulative grade. A pass grade entitles you to write a dissertation in order to receive the Ph.D. degree. At the committee's discretion, you may be required to retake any or all portions of the Ph.D. examinations within one calendar year after the first attempt.

Within two terms (or one term and a summer) after passing the qualifying examinations, you must prepare a prospectus of the dissertation.

You are required to deliver a formal lecture in the California Slavic Colloquium no later than two calendar years after advancement to candidacy.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

A final oral examination is not required.

## Slavic

### Lower Division Course

**99. Introduction to Slavic Civilization.** Lecture, three hours. Introductory survey of social and cultural institutions of the Slavic peoples and their historical background.

### Upper Division Courses

**M125. Interwar Central European Prose.** (Same as German M119G and Humanities M162.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

**M126. Postwar Central European Prose.** (Same as German M119H and Humanities M166.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. P/NP or letter grading.

**177. Baltic Languages and Cultures (2 units).** General survey of peoples speaking Old Prussian, Lithuanian, and Latvian; their linguistic, historical, and ethnic affiliations.

**M179. Baltic and Slavic Folklore and Mythology.** (Same as Folklore M126.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities.

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor.

### Graduate Courses

**200. Proseminar.** Presentation/discussion, three hours. Prerequisite: graduate standing. Introduction to research tools and techniques, as well as broad exposure to metalanguages of linguistics and literary criticism.

### Linguistics

**201. Introduction to Old Church Slavic.** Lecture, three hours. Required for M.A. (linguistics, literature). Introduction to phonology and grammar; readings.

**202. Introduction to Comparative Slavic Linguistics.** Lecture, three hours. Prerequisite: course 201. Required for M.A. (linguistics). Introduction to comparative phonology and grammar of Slavic languages.

**221. Introduction to East Slavic Languages.** Lecture, three hours. Prerequisites: Russian 102A-102B-102C or Ukrainian 101A-101B-101C. Recommended: course 202. Required for Ph.D. (linguistics). Introduction to structure and history of East Slavic languages.

**222. Introduction to West Slavic Languages.** Lecture, three hours. Prerequisite: course 202. Recommended: Czech 102A-102B-102C or Polish 102A-102B-102C. Required for Ph.D. (linguistics). Introduction to structure and history of West Slavic languages.

**223. Introduction to South Slavic Languages.** Lecture, three hours. Prerequisite: course 202. Recommended: Serbo-Croatian 103A-103B-103C or Bulgarian 103A-103B-103C. Required for Ph.D. (linguistics). Introduction to structure and history of South Slavic languages.

**224. Introduction to Ukrainian and Belorussian.** Lecture, three hours. Prerequisite: course 202. Introduction to history and structure of Ukrainian and Belorussian.

**M229. Introduction to Slavic Bibliography (2 units).** (Same as Library and Information Science M229C.) Prerequisite: consent of instructor. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

**241A-241B. Advanced Old Church Slavic.** Lecture, three hours. Prerequisite: course 201. **241A.** Advanced Readings in Canonical Texts; **241B.** East, West, and South Slavic Recensions of Church Slavic.

**242. Comparative Slavic Linguistics.** Lecture, three hours. Prerequisite: course 202. Selected topics in development of Common Slavic.

**251. Introduction to Baltic Linguistics.** Lecture, three hours. Prerequisite: course 202. Introduction to Baltic linguistics, with special attention to relationship between Baltic and Slavic.

**261. Slavic Paleography.** Lecture, three hours. Prerequisite: course 201. Introduction to Slavic paleography: inscriptions, birchbark letters, Glagolitic and Cyrillic texts.

**262A-262B. West Slavic Linguistics.** Lecture, three hours. Prerequisite: course 222. **262A.** Lekhitic; **262B.** Czechoslovak, Sorbian.

**263A-263B. South Slavic Linguistics.** Lecture, three hours. Prerequisite: course 223. **263A.** Serbo-Croatian, Slovene; **263B.** Bulgarian, Macedonian.

**281. Seminar: Slavic Linguistics.** Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

**282. Seminar: Structural Analysis.** Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

## Literature

**230A-230B-230C. Topics in Comparative Slavic Literature.** Lecture, three hours. Recommended prerequisites: upper division courses in Czech, Polish, Russian, and Yugoslav literatures. Two terms required for Ph.D. (literature). May be repeated for credit with consent of instructor and graduate adviser.

**230A.** Middle Ages through Baroque; **230B.** Classicism to Romanticism; **230C.** Realism to Modernism.

**290. Seminar: Comparative Slavic Literature.** Seminar, three hours. Prerequisites: courses 230A-230B-230C. Recommended: reading knowledge of one Slavic language in addition to Russian. Selected topics involving more than one Slavic literature or Slavic and Western literatures. May be repeated for credit with consent of instructor and graduate adviser.

**295. Seminar: Literary Analysis.** Seminar, three hours. Recommended (but not prerequisite): reading knowledge of one Slavic language in addition to Russian. Selected topics from various Slavic literatures or Slavic and Western literatures, with emphasis on analytic methods. May be repeated for credit with consent of instructor and graduate adviser.

## Special Studies

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisite: consent of instructor and graduate adviser.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).** Prerequisite: consent of instructor and graduate adviser.

**599. Research for Ph.D. Dissertation (2 to 12 units).**

## Bulgarian

### Lower Division Course

**99. Introduction to Bulgarian Civilization.** Lecture, three hours. Introductory survey of social and cultural institutions of the Bulgarian people and their historical background.

### Upper Division Courses

**103A-103B-103C. Elementary Bulgarian.** Recitation, five hours. Basic courses in the Bulgarian language.

**154. Survey of Bulgarian Literature.** Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Survey of Bulgarian literature from the Middle Ages to the present.

## Czech

### Upper Division Courses

**102A-102B-102C. Elementary Czech.** Recitation, five hours. Basic courses in the Czech language.

**102D-102E-102F. Advanced Czech.** Recitation, three hours. Prerequisite: course 102C.

**155A-155B. Czech Literature.** Lecture, three hours. Lectures and readings in English. **155A.** Survey of Czech Literature from the Middle Ages to the Present; **155B.** Selected Topics.

## Polish

### Upper Division Courses

**102A-102B-102C. Elementary Polish.** Recitation, five hours. Basic courses in the Polish language.

**102D-102E-102F. Advanced Polish.** Recitation, three hours. Prerequisite: course 102C.

**152A-152B-152C. Survey of Polish Literature.** Lecture, three hours. Lectures and readings in English. **152A.** From the Middle Ages to Neoclassicism; **152B.** Romanticism and Realism. (Formerly numbered 160.); **152C.** From Young Poland to the Present. (Formerly numbered 152B.).

### Graduate Course

**280. Seminar: Polish Literature.** Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

## Russian

### Language Courses

**1. Elementary Russian.** Recitation, five hours; laboratory, one hour.

**2. Elementary Russian.** Recitation, five hours; laboratory, one hour.

**3. Elementary Russian.** Recitation, five hours; laboratory, one hour.

**4. Intermediate Russian.** Recitation, four hours; laboratory, one hour.

**5. Intermediate Russian.** Recitation, four hours; laboratory, one hour.

**6. Intermediate Russian.** Recitation, four hours; laboratory, one hour.

**10. Intensive Course in Russian (12 units).** Intensive basic course in the Russian language equivalent to courses 1, 2, and 3.

**11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian (2 to 12 units).** Basic courses in the Russian language. Each two-unit course in sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require completion of or simultaneous enrollment in all courses lower in sequence.

**101A-101B-101C. Advanced Russian.** Lecture, five hours. Prerequisite: course 6. Advanced grammar, reading, and conversation.

**102A-102B-102C. Advanced Composition and Conversation: Reading of Contemporary Texts.** Lecture, three hours. Prerequisite: course 101C or consent of instructor. Advanced conversation and composition, using a multimedia approach (contemporary Russian prose, Soviet television and films).

**106. Reading of Advanced Literary Texts.** (Formerly numbered 106A-106B.) Lecture, three hours. Prerequisite: course 101C. Emphasis on integrating concepts about the structure of Russian into reading and analysis of difficult texts.

**107. Russian for Social Scientists (2 units).** Prerequisite: three years of Russian or consent of instructor. Reading of texts relevant to social scientists: viewing of Soviet TV. May be repeated for credit.

**108A-108B-108C. Business Russian.** Prerequisite: consent of instructor. Russian grammar, conversation, reading, general and business vocabulary, and verbal etiquette; introduction to Russian business conduct. P/NP or letter grading. Ms. Kagan

## Linguistics Course

**123. Historical Commentary on Modern Russian.** Lecture, three hours. Prerequisite: course 101C. Historical explanation of phonological and morphological anomalies of modern Russian.

## Literature and Civilization Courses

**25. The Russian Novel in Translation.** Lecture, three hours. Designed for nonmajors. Study of major works by the great 19th-century Russian novelists.

**99A. Introduction to Russian Civilization.** Lecture, three hours. Introductory survey of social and cultural institutions of the Russian people and their historical background.

**99B. Russian Civilization in the 20th Century.** Lecture, three hours. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents.

**118. Survey of Russian Literature to Pushkin.** Lecture, three hours. Prerequisite: upper division standing. Slavic majors should take this course during their sophomore year. Lectures and readings in English.

**119. Survey of 19th-Century Russian Literature.** Lecture, three hours. Prerequisite: upper division standing. Slavic majors should take this course during their sophomore year. Lectures and readings in English.

**120. Survey of 20th-Century Russian Literature.** Lecture, three hours. Prerequisite: upper division standing. Slavic majors should take this course during their sophomore year. Lectures and readings in English.

**124A-124F. Studies in Russian Literature.** Lecture, three hours. Lectures and readings in English. Following writers are alternately discussed: **124A.** Pushkin; **124B.** Gogol; **124C.** Turgenev; **124D.** Dostoevsky; **124E.** Tolstoy; **124F.** Chekhov.

**125. The Russian Novel in its European Setting.** Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Emphasis on 19th- and 20th-century novelists.

**126. Survey of Russian Drama.** Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Major Russian plays from the 18th to 20th century.

**127. Women in Russian Literature.** Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Introduction to "alternative tradition" of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers.

**128. Russian Science Fiction.** Lecture, three hours. Readings in English. Introduction to Russian science fiction in the 20th century. Emphasis on function of science fiction in development of Russian culture before and after the October Revolution. P/NP or letter grading.

**130A-130B-130C. Russian Poetry.** Lecture, three hours. Prerequisite: course 6. Lectures and readings in Russian. **130A.** Introduction to Analysis of Poetic Texts; **130B.** From Mid-18th Century through Precursors of Symbolism; **130C.** From Late-19th Century through Contemporary Soviet Verse.

**134. Pushkin.** Lecture, three hours. Prerequisite: course 6. Lectures and readings in Russian. Major poetical works.

**140A-140D. Russian Prose.** Lecture, three hours. Prerequisite: course 6. Lectures and readings in Russian. Close reading of texts representing various periods and styles. Emphasis on narrative techniques, rhetorical strategies, and literary genres. **140A.** Introduction to Analysis of Prose Texts; **140B.** Karamzin to Turgenev; **140C.** Dostoevsky to Gorky; **140D.** Soviet and Emigre Writers.

**M150. Russian Folk Literature.** (Same as Folklore M150.) Lecture, three hours. Lectures and readings in Russian.

**M170. Russian Folklore.** (Same as Folklore M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena.

**193. Seminar: Russian Literature.** Lecture, three hours. Prerequisite: course 6 or consent of instructor. Recommended: course 101C. Reading and discussion of selected authors; written seminar papers usually required.

## Graduate Courses

**201A-201B-201C. Introduction to Analysis of Russian Texts.** Lecture, three hours. Prerequisites: courses 102C and 106, or consent of instructor. Conducted in Russian. Reading, analysis of text structure and style, translation exercises, composition.

## Linguistics

**203. Practicum in Russian (2 units).** Prerequisite: course 201C. Two terms per year required of Ph.D. students. Reading of advanced texts; advanced composition, conversation; stylistics. May be repeated for credit. S/U grading.

**204. Introduction to History of the Russian Language.** Lecture, three hours. Prerequisites: course 220A, Slavic 201. Required for M.A. (linguistics, literature). Survey of history of the Russian language from its beginning to the present.

**210. Readings in Old Russian Texts.** Lecture, three hours. Prerequisite: Slavic 201 or consent of instructor. Readings in premodern Russian texts. May be repeated for credit.

**220A-220B. Structure of Modern Russian.** Lecture, three hours. **220A.** Phonology and Morphology. Required for M.A. (literature, linguistics). Advanced study and analysis of problems in Russian phonology, inflection, and derivation. **220B.** Morphosyntax. Prerequisite: course 220A. Required for M.A. (linguistics). Survey of Russian syntax and grammatical categories.

**241. Topics in Russian Phonology.** Lecture, three hours. Prerequisite: course 220A. Selected topics in Russian phonology. May be repeated for credit with consent of instructor.

**242. Topics in Russian Morphology.** Lecture, three hours. Prerequisite: course 220A. Selected topics in Russian inflection and derivation. May be repeated for credit with consent of instructor.

**243. Topics in Historical Russian Grammar.** Lecture, three hours. Prerequisites: course 204, Slavic 221. Selected topics in Russian historical phonology, morphology, and syntax. May be repeated for credit with consent of instructor.

**263. Russian Dialectology.** Lecture, three hours. Prerequisite: Slavic 221. Phonology and grammar of modern Great Russian dialects.

**264. History of the Russian Literary Language.** Lecture, three hours. Prerequisites: course 204, Slavic 201. Evolution of literary Russian from the 11th to 20th century. Lectures and analysis of texts.

**265. Topics in Russian Syntax.** Lecture, three hours. Prerequisite: course 220B. Traditional and generative approaches to Russian syntax. May be repeated for credit with consent of instructor.

**266. Russian Lexicology.** Lecture, three hours. Examination of formal and semantic structure of Russian lexicon.

## Literature and Civilization

**211A. Literature of Medieval Rus'.** Lecture, three hours. Required for M.A. (literature). Survey of the literature from its beginning through the Kievan and Muscovite periods up to end of the 17th century.

**211B. 18th-Century Russian Literature.** Lecture, three hours. Required for M.A. (literature). Lectures and readings in major and secondary writers. Analysis of related literary works.

**212A-212B. 19th-Century Russian Literature.** Lecture, three hours:

**212A.** The Golden Age. Required for M.A. (literature, linguistics). Survey of major literary movements and schools following demise of neoclassicism: sentimental school, early and late Romanticism, and beginnings of natural school. Discussion of representative works of Karamzin, Zhukovsky, Batyushkov, Pushkin, Baratynsky, Lermontov, Gogol.

**212B.** Age of Realism. Required for M.A. (literature). Survey devoted to emergence of critical and psychological realism, beginning with early works of Turgenyev, Goncharov, and Dostoevsky, moving to major novels of Tolstoy, Dostoevsky, and Saltykov-Shchedrin, and concluding with works of the presymbolist period, especially the short stories of Chekhov.

**213. 20th-Century Russian Literature.** Lecture, three hours. Required for M.A. (literature). Lectures and readings in major and secondary writers.

**215. Contemporary Russian Literature.** Discussion, three hours. Prerequisite: course 213. Close readings in selected texts of poetry and prose, metropolitan and emigre, of recent vintage. May be repeated for credit. S/U or letter grading.

**219. Movements and Genres in Russian Literature.** Lecture, three hours. Required for M.A. (literature). Introduction to most important theoretical issues of Russian literature viewed in diachronic perspective.

**227. Linguistic Approaches to Russian Poetry.** Lecture, three hours. Prerequisite: graduate standing. Introduction to use of linguistic methods in study of Russian poetic texts. May be repeated for credit.

**251. Topics in Literature of Medieval Rus'.** Lecture, three hours. Prerequisite: course 211A. Detailed discussion of particular writers, periods, or genres. May be repeated for credit with consent of instructor and graduate adviser.

**270. Russian Poetics.** Lecture, three hours. Introduction to technical study of Russian poetics and versification, with attention to metrics, stanza forms, rhyme, and development of various verse types from the 18th into the 20th century.

**290. Seminar: Russian Poetry.** Seminar, three hours. Recommended (but not prerequisite): course 270. Detailed study of a single author, period, or work. May be repeated for credit with consent of instructor and graduate adviser.

**291A. Seminar: Literature of Medieval Rus'.** Seminar, three hours. Prerequisite: course 211A. Selected topics from the 11th through the 17th century. May be repeated for credit with consent of instructor and graduate adviser.

**291B. Seminar: 18th-Century Russian Literature.** Seminar, three hours. Prerequisite: course 211B. Selected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**292. Seminar: 19th-Century Russian Literature.** Seminar, three hours. Prerequisites: courses 212A-212B. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**293. Seminar: 20th-Century Russian Literature.** Seminar, three hours. Prerequisite: course 213. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**294. Seminar: Russian Literary Criticism.** Seminar, three hours. Prerequisites: courses 211B, 212A-212B, 213. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate adviser.

**296. Seminar: History of Russian Culture.** Discussion, three hours. Reading and discussion on selected topics in history of Russian culture.

## Serbo-Croatian

### Upper Division Courses

**103A-103B-103C. Elementary Serbo-Croatian.** Recitation, five hours. Basic courses in the Serbo-Croatian language.

**103D-103E-103F. Advanced Serbo-Croatian.** Recitation, three hours. Prerequisite: course 103C.

**113A-113B-113C. Advanced Reading and Composition.** Recitation, three hours. Prerequisite: course 103F or consent of instructor. Reading and translation of difficult texts; advanced composition.

**154A-154B. Yugoslav Literature.** Lecture, three hours. Lectures and readings in English. **154A.** Survey of Yugoslav Literature from the Middle Ages to the Present; **154B.** Selected Topics.

## Slovak

### Graduate Course

**222. Structure of Slovak.** Lecture, three hours. Prerequisite: Slavic 202. Recommended: Slavic 222. Introduction to phonological and morphological structure of the Slovak language, especially as contrasted with Czech.

## Ukrainian

### Upper Division Courses

**101A-101B-101C. Elementary Ukrainian.** Recitation, five hours. Basic courses in the Ukrainian language.

**152. Ukrainian Literature.** Lecture, three hours. Lectures and readings in English. Survey of writers, literary trends, and issues in Ukrainian literature from the late 18th century to the present. Special attention to works of such major figures as I. Kotlyarevsky, T. Shevchenko, I. Franko, L. Ukrainka, and P. Tychna.

## Non-Slavic Languages of Eastern Europe

### Lithuanian

#### Upper Division Courses

**101A-101B-101C. Elementary Lithuanian.** Recitation, five hours. Basic courses in the Lithuanian language.

### Romanian

#### Lower Division Course

**99. Introduction to Romanian Civilization.** Lecture, three hours. Introductory survey of social and cultural institutions of the Romanian people and their historical background.

#### Upper Division Courses

**101A-101B-101C. Elementary Romanian.** Recitation, five hours. Basic courses in the Romanian language.

**152. Survey of Romanian Literature.** Lecture, three hours. Lectures and readings in English. Survey of Romanian literature from the Middle Ages to the present.

#### Graduate Course

**201. Romanian as a Romance Language.** Lecture, three hours. Survey of structure and development of the Romanian language, with special emphasis on relationship of Romanian to other members of the Romance group.

#### Related Courses in Other Departments

**Economics 182; Ethnomusicology and Systematic Musicology 91C, 128, 130; Geography 184; History 131A-131D, 200F, 233A-233B; Linguistics 20, 103, 110, 120A, 120B, M150, as well as several of the graduate courses in linguistics; Political Science 128A-128B, 156A, 157.**

## Social Sciences

A265 Murphy Hall, (310) 206-7575

#### Lower Division Courses

There is no major in social sciences; however, the following courses are offered for interested students.

**20. Racial Minorities in the U.S.** Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and culture of Afro-Americans, Asian Americans, Chicanos, and Native Americans in the U.S. Topics include origins and maintenance of inequality, ethnic images in literature and art, psycho-social dimensions of racism, social movements, and minorities in California.

**30. Law and Society (3 units).** Introduction to nature of legal institutions, processes, and norms.

Mr. Abel (W)

**40. Introductory Statistics.** In a series of case studies from science and decision making, use of probability and statistics to quantify uncertainty and figure out how to make sensible choices in the face of it. Topics include how to design experiments and conduct surveys to reduce uncertainty, how to analyze data, and how to validly assess causality. Discussion-style learning blended with interactive sessions on personal computers, making numerical and graphical summaries that both measure uncertainty and help figure out what to do about it. P/NP or letter grading.

**88. Introduction to Social Sciences.** Seminar, three hours. Introduction to methods, concepts, and practices of social scientific scholarship. Organized around broad, interdisciplinary themes in anthropology, economics, geography, history, political science, psychology, and sociology. Emphasis on social sciences disciplines as a whole. P/NP or letter grading.  
Ms. Appleby, Mr. Roy (F,W)

## Social Sciences Collegium

A265 Murphy Hall, (310) 825-3697

#### Professors

Jeffrey C. Alexander, Ph.D. (*Sociology*), Director  
Joyce Appleby, Ph.D. (*History*)  
Ivan T. Berend, Ph.D. (*History*)  
Edward G. Berenson, Ph.D. (*History; Distinguished Teaching Award*)  
Richard Berk, Ph.D. (*Sociology*)  
Ellen DuBois, Ph.D. (*History*)  
Bryan C. Ellickson, Ph.D. (*Economics; Distinguished Teaching Award*)  
J. Nicholas Entrikin, Ph.D. (*Geography*)  
Peter B. Hammond, Ph.D. (*Anthropology*)  
Jack Katz, Ph.D. (*Sociology*)  
William Mason, Ph.D. (*Sociology*)  
Eric H. Monkkonen, Ph.D. (*History*)  
Gary B. Nash, Ph.D. (*History; Distinguished Teaching Award*)  
Karen J. Orren, Ph.D. (*Political Science*)  
David O. Sears, Ph.D. (*Political Science, Psychology*)  
Edward W. Soja, Ph.D. (*Urban Planning*)  
Steven L. Spiegel, Ph.D. (*Political Science*)  
Ivan Szelenyi, Ph.D. (*Sociology*)  
Donald J. Treiman, Ph.D. (*Sociology*)  
Roger Waldinger, Ph.D. (*Sociology*)  
Scott L. Waugh, Ph.D. (*History; Distinguished Teaching Award*)

#### Associate Professors

Peter Baldwin, Ph.D. (*History*)  
Ruth Bloch, Ph.D. (*History*)  
Rogers Brubaker, Ph.D. (*Sociology*)  
Judith A. Carney, Ph.D. (*Geography*)  
Franklin D. Gilliam, Jr., Ph.D. (*Political Science*)  
J. Eugene Grigsby III, Ph.D. (*Urban Planning*)  
Douglas Hollan, Ph.D. (*Anthropology*)  
Ruth M. Milkman, Ph.D. (*Sociology*)  
Kathryn Norberg, Ph.D. (*History*)  
Raymond A. Rocco, Ph.D. (*Political Science*)  
William G. Roy, Ph.D. (*Sociology; Distinguished Teaching Award*)  
Miriam Silverberg, Ph.D. (*History*)  
Albion M. Urdank, Ph.D. (*History*)

#### Assistant Professors

Peter E. Kollock, Ph.D. (*Sociology; Luckman Distinguished Teaching Award*)  
Muriel McClendon, Ph.D. (*History*)  
José Moya, Ph.D. (*History*)  
David N. Myers, Ph.D. (*History*)  
Simon Potter, Ph.D. (*Economics*)  
Edward E. Telles, Ph.D. (*Sociology*)

The Social Sciences Collegium is a consortium of social sciences faculty dedicated to the enrichment of lower division education. These top faculty members have come together to develop innovative courses which are (1) sensitive to your needs, providing you with a basic introduction to social scientific research and theories and (2) geared to your interests, helping you develop sophisticated, in-depth understanding of contemporary social problems and events.

The collegium offers three different kinds of opportunities:

*Social Sciences Collegium Seminars* are excellent opportunities to explore a social issue in an intimate classroom environment. With an enrollment capacity of 20, these seminars allow you to build your writing and speaking skills while learning about the events and forces that shape headlines and lives. The seminars are taught by advanced graduate students with outstanding academic and teaching records. The graduate student instructors, selected by a competitive awards process, bring enthusiasm and fresh perspectives to the seminars.

*Social Sciences Collegium Lecture Courses* are reduced-enrollment courses taught by cutting-edge scholars. Faculty members have developed a variety of new lecture courses specifically for first- and second-year students, integrating interdisciplinary and multimedia approaches to contemporary and often controversial issues. These courses offer excellent TA-to-student ratios and opportunities to do original research on relevant topics.

*Social Sciences Collegium Omnibus Course — Los Angeles in Transition* is a unique and dynamic learning experience focused on one of the most fascinating urban environments: our own backyard. The course is team taught in Winter Quarter by 10 distinguished faculty members from the social sciences and professional schools who have research expertise in some aspect of Los Angeles, such as the city's history, ecology, government, or educational system. Each professor holds a weekly seminar meeting with 20 students, and all 200 students and 10 faculty members gather for a weekly lecture and debate session. The course relies on contemporary writings, media resources, and field trips to integrate these diverse perspectives.

For further information, contact Christopher Campbell at the program address.

 Rebecca Emigh, Ph.D.  
 Peter E. Kollock, Ph.D. (*Luckman Distinguished Teaching Award*)  
 Gi-Wook Shin, Ph.D.  
 Edward E. Telles, Ph.D.  
 Min Zhou, Ph.D.

#### Adjunct Associate Professor

Barbara Ballis Lal, Ph.D.

## Scope and Objectives

Variety is the special characteristic both of the field of sociology and of the UCLA Department of Sociology, which was judged among the 10 best in the nation in a recent survey conducted by the Conference Board of the Associated Research Councils.

Sociology will have a particular appeal to those students whose interests are broad and unspecialized. At both undergraduate and graduate levels, students study history, poli-

tics, statistics and mathematics, race relations, demography, psychology, language, and many other topics. A sociology student becomes a member of an intellectual community in which all these interests are represented.

The primary purpose of the major in sociology is to enhance the student's capacity for critical analysis and understanding of social phenomena. It is intended, at the same time, to serve as preparation for careers in high school or junior college teaching, social work, architecture and urban planning, law, public health, and government service, among others. It also provides training for advanced graduate work in sociology and social psychology.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

## Bachelor of Arts Degree

### Preparation for the Major

*Required:* One course from Sociology 1, 2, 3, 4, M5, 31; one course from Mathematics 2, 3A, 31A; Sociology 18 (or Statistics 50, Psychology 41, or Economics 40).

*All courses required for the major in sociology, including lower division and allied field courses, must be taken for a letter grade. A 2.0 grade-point average is required for the preparation and for the major.*

### The Major

*Required:* Ten upper division sociology courses (40 units), including Sociology 101, 102, and one course from 104, 105, 106, 113. These courses, devoted to the systematic exploration of sociological methods and theories, should be completed as early as possible and before taking other upper division courses. You must also take seven additional upper division sociology courses.

To complete the major, four upper division allied field courses (16 units) in other departments are required (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology), as is one course from English 100W, 129, 131A through 131J (may be taken on a P/NP grading basis).

Only eight units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

Courses 104, 210A, and 210B are recommended for students who intend to pursue graduate work in sociology.

### Specialization in Computing

Majors in sociology may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology 112, 113.

You graduate with a bachelor's degree in sociology and a specialization in computing.

## Honors Program

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member.

As preparation for the honors major, you must complete an honors section of Sociology 1 and 18, and Mathematics 2, 3A, or 31A.

Prior to taking other upper division sociology courses, you must complete an honors section of Sociology 101 and 102 (Honors Collegium 61 may be substituted for course 102) and one methods course selected from Sociology 106, CM124A, 209A.

Also required are three undergraduate seminars from the Sociology 197 series; any two additional upper division sociology courses; courses 199HA-199HB-199HC (honors thesis seminars); four upper division allied field courses (16 units) in other departments (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology); and one course from English 100W, 129, 131A through 131J (may be taken on a P/NP grading basis).

**Qualifications** — You must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the Undergraduate Counselor's Office, 254A Haines Hall. You should apply in the last term of your junior year.

## M.A. and Ph.D. Degrees

The graduate program of the department takes as its primary aim the training of scholars who will conduct original research contributing to the advancement of sociological knowledge. For this reason, the department ordinarily accepts only students who are seeking the Ph.D. degree. A master's degree may be earned as part of the process of completing the requirements for the Ph.D.

### Admission

In addition to the minimum University requirements, the department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with your written work and research experiences, (2) transcripts from all colleges where you have studied, (3) a statement of purpose outlining reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these, (4) copies of one or two term papers or research reports you have written, (5) an official statement of scores on the Graduate Record Examination (GRE), and (6) for applicants whose native language is not English, the Test of English as a Foreign Language (TOEFL).

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the department.

In addition to relatively formal criteria (such as analytic proficiency and articulateness), the department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women and minorities are therefore encouraged to apply. The deadline for receipt of applications is December 15. Application forms and more detailed information are available from the Graduate Affairs Assistant, Department of Sociology, 254C Haines Hall, UCLA, Los Angeles, CA 90024-1551.

### Major Fields or Subdisciplines

In the first two years you usually satisfy the course requirements for the M.A. degree and write a master's paper that is evaluated by the department in your sixth term of residence. During the first year of graduate study, and no later than the second week of instruction in your fourth term in residence, you are expected to form a two-person master's committee to help you prepare the master's paper.

In the term following acceptance of your master's paper, usually at the beginning of the third year, you must affiliate with one of the department's five area programs in order to pursue more specialized, advanced study and research toward the Ph.D. The area programs represent the special strengths of the department in research and graduate instruction:

(1) *Communities and Institutions* — Studies in community organization and local and institutional processes of deviance and social control, particularly as they are affected by race, ethnicity, gender, and class; social networks; ethnic conflict and cooperation; organization of immigrant and minority communities; gender relations; social organization of work and occupations; institutional processes in criminal justice and medical settings.

(2) *Ethnomethodological, Phenomenological, and Observational Sociologies* — Studies of work especially in the sciences and professions, sociology of knowledge, sociology of law, deviance, social control, conversational and other forms of ordinary interaction, and historical studies of everyday interaction and consciousness.

(3) *Macrosociology* — Political sociology, economy and society, historical and comparative sociology, macrosociological theory, and comparative stratification.

(4) *Quantitative Sociology* — Survey research methods, methods of applied and evaluation research, formal and social demography, social stratification, advanced social statistics, and mathematical sociology.

(5) *Social Psychology* — Attitudes and social structure, collective behavior, socialization, social interaction and small group behavior, and organizational social psychology.

### Foreign Language Requirement

There is no foreign language requirement for either the master's degree or the Ph.D. Students affiliated with the macrosociology area program are required to demonstrate reading knowledge of sociological texts in any foreign language.

### Course Requirements

In addition to the departmental requirements, area programs and some subareas have their own course requirements for affiliated students.

**Before the Master's Paper Review** — Nine courses (36 units) are required.

(1) Sociology 202A-202B (must be taken in the first year).

(2) A two-term graduate-level methodology sequence from Sociology 211A through 216B, 217B-217C, 218A-218B, C244A-C244B.

In choosing a methodology sequence, you should note that some of the Ph.D. area programs and subprograms require particular methodology sequences.

(3) Five 200-level courses in sociology, excluding Sociology 202A-202B, 211A through 216B, 217B-217C, 218A-218B, C244A-C244B, and the 289, 290, 292, 293, and 295 series.

Because four of the five area programs require successful completion of Sociology 209A-209B or 210A-210B, you would ordinarily take these courses in your first two years and are strongly urged to do so in your first year.

Students intending to affiliate with an area would do well to satisfy some of its requirements in the first two years. Contact the department for information about entering the area programs.

**After the Master's Paper Review** — Two courses (eight units) are required. An additional methodology sequence (from courses 211A through 216B, 217B-217C, 218A-218B) must be completed before the awarding of the Ph.D. degree.

Course requirements for the five area programs are listed below. Contact the graduate affairs assistant or area directors for more specific details.

(1) *Communities and Institutions* — Sociology 290A-290B-290C and a second methods sequence selected from courses 211A-211B, 212A-212B, 213A-213B, 215A-215B, 216A-216B, or 217B-217C; two courses from 229A, 229B, 234, 235, 241, 261; two courses from 230, 234, 236, M249A, M249B, 259, M262, 263, 265, M275, 276, 282, 291.

(2) *Ethnomethodological, Phenomenological and Observational Sociologies* — Sociology 222; at least two courses from 217A, 223, 229A, 229B, 243, 251, 258, 264, 266, 267, 271, 284; two terms of one methods sequence and at least one term of a second, selected from courses 214A-214B, 217B-217C, 218A-

218B, or C244A-C244B; courses 293A-293B-293C.

(3) *Macrosociology* — Sociology 211A-211B, 228A-228B, 294A-294B-294C, and three additional graduate courses covering theoretical, substantive, or methodological topics.

(4) *Quantitative Sociology* — Sociology 295A-295B-295C.

Advanced Social Statistics Specialty — Sociology 216A-216B, 219A-219B, and electives selected from a list of eight recommended courses.

Applied Sociology and Evaluation Research Specialty — Sociology 216A-216B, 219A-219B, 279, 280, and electives selected from a list of 14 recommended courses.

Demography Specialty — Sociology 213A-213B, 226A-226B, courses in calculus and matrices, and two electives selected from a list of 11 recommended courses.

Mathematical Sociology Specialty — Sociology 281, 596, preparation in calculus, matrices, and differential equations, two or more substantive sociology courses relevant to the areas in which mathematical modeling will be carried out, and electives selected from a list of seven recommended courses.

Quantitative Social Stratification Specialty — Sociology 216A-216B, 239A-239B, 263, and two electives selected from a list of recommended courses.

(5) *Social Psychology* — Completion of an undergraduate program equivalent to two of the department's basic undergraduate social psychology courses and at least two courses in psychology, selected from the fields of learning, language and communication, personality, social psychology, and abnormal psychology; Sociology 224A-224B, 289A-289B-289C; a second methods sequence in addition to the one required for the M.A., selected from courses 215A-215B, 216A-216B, or 217B-217C.

Courses in the 500 series (595, 596, 597, 599) are normally taken in preparation for the master's paper review, the field examinations, and for dissertation research. They may not be applied toward the course requirements for the degree.

### Master's Paper Review

During your sixth term in residence you must submit an acceptable master's paper for approval by the general faculty. The paper must demonstrate a general competence in sociological theory, methodology, and selected substantive areas and in intellectual attainment.

The paper should demonstrate that you (1) have an accurate grasp of the intellectual traditions of sociology, (2) can bring evidence to bear on theoretical problems, (3) can describe how some aspect of the social order works, and (4) can adequately handle research and methodological issues. The main concern is with your capacity to do doctoral-level work.

After review of the paper, any of the following options may be recommended:

- (1) The paper is passed. You are granted the M.A. and permitted to proceed to the Ph.D.
- (2) The paper is passed conditionally. You are granted the M.A. and permitted to proceed to the Ph.D. after completion of specified revisions of the paper.
- (3) You are granted a terminal M.A.
- (4) The paper is not acceptable (you may resubmit at a later time or may be asked to withdraw).

If you enter UCLA with an M.A. degree in Sociology from another institution, you normally come up for a master's paper review in your first term of residence at UCLA, and under no circumstances later than the third term of residence. In this review, the department determines whether you may proceed directly to preparation for the field examinations or whether additional work must be done, and if the methodology sequence requirement has been adequately satisfied. In addition to a paper, which can be an M.A. thesis written at another university, you should submit for the master's paper review a transcript from the university at which the M.A. degree was earned.

Contact the department for further details on master's paper review.

### Field and Qualifying Examinations

The department requires you to pass two field examinations before taking the University Oral Qualifying Examination for the Ph.D. The emphasis is on mastery and depth of understanding in two areas of specialized study. Field examinations are administered and evaluated under guidelines established by area programs. You may take both or just one of your field examinations in the area with which you are affiliated. Each area program also has procedures enabling unaffiliated students to take field examinations in that area. Details are available from area directors and from the graduate affairs assistant.

If your performance on the field examination is satisfactory, you may nominate a doctoral committee and take the University Oral Qualifying Examination. You must submit a two-page abstract of the dissertation proposal to the graduate affairs assistant for distribution to the entire departmental faculty within two weeks of the oral examination.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

The optional final oral examination for the Ph.D. degree is given by the doctoral committee no later than six months after the completion of the dissertation. A decision to waive the final examination is optional on the part of the Ph.D. committee.

## Lower Division Courses

**1. Introductory Sociology.** Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation.

**2. Changing Society and Making History.** Lecture, three hours; discussion, one hour. Leading question is how do politics, economics, and culture interact in changing society and making history? Answers provided by introductory level of study of contending substantive theories and contrasting methods of inquiry contained both in classic and exemplary contemporary works. Mr. Champagne, Mr. Mann, Mr. Prager

**3. Sociology of Everyday Life.** Lecture, three hours; discussion, one hour. Examination of ways in which taken-for-granted aspects of everyday life and relationships are shaped by interactional, cultural, and historical processes. Cultivation of capacity to critically observe tacit practices through which everyday life is constructed. Mr. Emerson, Mr. Katz, Mr. Pollner

**4. Jobs and Careers: Sociological Approach.** Lecture, three hours; discussion, one hour. Application of social science knowledge to common vocational problems. Description and analysis of major trends in employment, job search and hiring, career mobility patterns, forecasting, and entrepreneurship. Analysis of current thrust to worker ownership.

Mr. Light, Ms. Zucker

**M5. Social Organization of Black Communities.** (Formerly numbered 5.) (Same as Afro-American Studies M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues. Mr. Allen, Mr. Oliver

**18. Interpretation of Quantitative Data.** Enforced requisites: course 1 (may be taken concurrently) and (Mathematics 2 or 3A). Satisfies statistics requirement for sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of *American Sociological Review* or other leading sociological journals.

**31. Dilemmas of Third World Development.** Lecture, three hours; discussion, one hour. Introduction to understanding dilemmas of Third World social development and prospects for progress in the future.

Mr. López, Mr. Zeitlin

**88A-88Z. Lower Division Seminars.** Lecture, three hours. Limited to 15 freshmen/sophomores. Variable topics of current sociological interest. Consult *Schedule of Classes* or "Department Announcements" for topics and instructors.

## Upper Division Courses

**101. Development of Sociological Theory.** Comparative survey of basic concepts and theories in sociology from 1850 to 1920; codification of analytic schemes; critical analysis of trends in theory construction. Mr. López, Mr. Mann, Mr. Prager

**102. Contemporary Sociological Theory.** Prerequisite: course 101. Critical examination of significant theoretical formulations from 1920 to the present; analysis of relation between theoretical development and current research emphasis.

Mr. Champagne, Mr. Mann, Mr. Szelenyi

**103. Marxist Sociology.** Fundamentals of Marxist theory and method and their historical development. Attention to continuing debates within Marxism and to differences between Marxism and other schools of sociological thought. May not be applied toward theory requirement for the major.

**104. Introduction to Sociological Research Methods.** Systematic treatment and semiquantitative skills of use in sociological research (e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case materials). Fieldwork may be required.

Mr. Bailey, Mr. TenHouten

**105. Research Methods in Policy Analysis and Evaluation.** Prerequisite: course M144 or consent of instructor. Recommended: course 104. Approaches for identifying and analyzing social problems and for assessment of policies and interventions for their control and management. Ms. Zucker

**106. Field Research Methods (6 units).** Lecture, two hours; discussion, two hours; fieldwork, 12 hours. Prerequisites: upper division standing, consent of instructor. Fieldwork and extensive field notes required. Theory and practice of field research, with particular emphasis on interrelations between fieldwork role and substantive findings. Mr. Emerson

**M107. Urban Poverty and Public Policy in the U.S. (Field Component).** (Same as Geography M147.) Prerequisite: course M144. Corequisite: one course from Geography 150 or 159A through 159E. Supplements and enriches students' academic understanding of urban poverty and the underclass by personal exposure and direct observation in a field setting. Students required to develop a plan of service in a local social service agency and observe policy formulation and implementation. P/NP or letter grading.

Mr. Oliver, Ms. Ortiz

**109A-109B. Data Analysis for Social Scientists.** Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for undergraduate students, especially sociology honors students. P/NP or letter grading. Mr. Berk, Ms. Emigh

**112. Introduction to Mathematical Sociology.** Prerequisites: course 18, Mathematics 2, 3A (course whose content includes introductions to probability theory, matrix algebra, and differential and integral calculus), or equivalent. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics).

Mr. Bonacich, Mr. McFarland

**113. Statistical and Computer Methods for Social Research.** Lecture, three hours; laboratory, one hour. Prerequisite: course 18. Continuation of course 18, covering more advanced statistical techniques such as multiple regression, analysis of variance, or factor analysis. Content varies. Students learn how to use the computer and write papers analyzing prepared data sets.

Mr. Bonacich, Mr. TenHouten

**116. Social Demography.** Studies of past, present, and future trends in population growth. Sociological theories of causes and consequences of population growth and redistribution. Emphasis on correlates of fertility, mortality, and migration.

Mr. Bailey, Ms. Oppenheimer, Mr. Telles

**117. Sociology of Family Demographic and Economic Behavior.** Examination of demographic behavior associated with social organization of the family and its relationship to society's economic system. American and European historical studies of family socioeconomic and demographic characteristics and behavior in first half of course; U.S. experience since the 1930s in second half. Ms. Oppenheimer

**CM124A-CM124B. Conversational Structures I, II.** (Formerly numbered C124A-C124B.) (Same as Communication Studies M144A-M144B.) Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses C244A-C244B. P/NP or letter grading. **CM124A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **CM124B.** Prerequisite: course CM124A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations. Mr. Schegloff

**126. Study of Norms.** Properties of norms, of normatively governed conduct, of lay and professional methods for describing, producing, using, and validating norms in contrasting settings of socially organized activities; relevance of these properties for programmatic problems of analytic sociology. Fieldwork required. Mr. Heritage, Mr. Pollner

**127. Mind and Society.** Lecture, two and one-half hours; discussion, one hour. Prerequisite: course 1 or equivalent. Study of social production of modes of thought and forms of knowledge. Study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in everyday, organizational, and extraordinary contexts. P/NP or letter grading. Mr. Pollner, Mr. TenHouten

**128. Sociology of Emotions.** Lecture, three hours; discussion, one hour. Prerequisites: course 1 and junior standing, or consent of instructor. Sociological theories and explanations of social conditions shaping and producing emotional experiences; effects of individual expression of emotions on social conditions; relations between thought, sensations, and the emotions; the self and emotions; social construction of emotions. Mr. Katz, Mr. Rabow, Mr. TenHouten

**129. Sociology of Time.** Lecture, three hours; discussion, one hour. Conceptualizations of time seen from scientific, philosophical, historical, and sociological perspectives; "cyclical" and "linear" time in primitive, ancient, and medieval societies; ritual, the sacred, and experience of the eternal; structuring of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; time, labor, and social domination. Mr. Roy, Mr. TenHouten

**132. Social Psychology: Sociological Approaches.** Survey of contribution of sociologists to theory and research in social psychology, including theories of social control; conformity and deviation; reference groups; and interaction process. Ms. Ortiz, Mr. Rabow

**133. Collective Behavior.** Prerequisites: courses 1, 18, or equivalent, upper division standing. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization. Mr. Kollock

**134. Culture and Personality.** Prerequisites: courses 1, 18, or equivalent, upper division standing. Theories of relation of variations in personality to culture and group life, in primitive and modern societies, and influence of social role on behavior. Mr. Allen, Mr. Heritage

**135. Group Processes.** Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from a variety of theoretical viewpoints; implications of various research techniques. Mr. Bonacich, Ms. Zucker

**136. Process and Socialization in the Family.** Prerequisites: courses 1, 18, or equivalent, upper division standing. Examination of processes of interaction, decision making, role differentiation, conflict, integration, and socialization within the family and their interrelations with society. Mr. Allen

**137. Psychoanalytic Sociology.** Prerequisites: courses 1, 18. Recommended: one course in theory (course 101 or 102) and in social psychology. Fieldwork may be required. Designed to review models of integration between psychoanalysis and sociology. Application of this analytical perspective to selected substantive areas and social processes, including but not limited to group development, delinquency, deviance, socialization, identity and self formation, role taking and role making. Mr. Rabow

**M138. Death and Suicide: Psychological and Sociological Aspects.** (Same as Psychology M163.) Lecture, three hours. Prerequisite: junior standing. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; partial death; megadeath; lethality; psychological autopsy; death of institutions and cultures. P/NP grading recommended (letter grading required if course to be applied toward psychology or sociology major). Mr. Shneidman

**143. Human Health and Society.** Lecture, three hours; discussion, one hour. Prerequisite: course 1. Exploration of long-run historical trends in relationship between human health and social organization, drawing on historical, anthropological, demographic, and sociological concepts, theories, and data. Ms. Hart

**M144. Urban Poverty and Public Policy in the U.S.** (Formerly numbered 144.) (Same as Geography M145.) Historical overview of urban poverty and social welfare programs; ongoing debates about causes and consequences of poverty. Ms. Ortiz (F)

**145. Sociology of Deviant Behavior.** Examination of leading sociological approaches to study of deviation and general survey of major types of deviation in American society.

**146. Sociology of Disputes and Troubles.** (Not the same as course 146 prior to Spring Quarter 1992.) Lecture, three hours; discussion, one hour. Theoretical implications of everyday disputes and troubles in contemporary society; origins, progression, and outcomes of informal disputes; disputing in intimate family, community, public place, and workplace settings; forms dynamics and consequences of third-part intervention. Mr. Emerson, Mr. Katz

**147A. Sociology of Crime.** (Formerly numbered 146.) Lecture, three hours; discussion, one hour. Sociological theories of social origins, organization, and meanings of crime and criminal behaviors. Mr. Katz, Mr. Rabow

**147B. Sociology of Criminal Justice.** (Formerly numbered 147.) Lecture, three hours; discussion, one hour. Examination of structures and routine decision-making processes of key criminal justice institutions, including police, courts, probation and parole, jails and prisons. Mr. Emerson

**148. Sociology of Mental Illness.** Analysis of major sociological and social psychological models of madness. Study of social processes involved in production, recognition, labeling, and treatment of "mental illness." Mr. Emerson, Mr. Pollner

**149. Social Organization of Psychiatric Treatment.** Strongly recommended (but not prerequisite): course 148. Review of current research and theory on psychiatric treatment processes and treatment organizations, including mental hospitals and community mental health organizations. Mr. Emerson

**153. Chinese Immigration.** Lecture, two hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. Ms. Cheng (F)

**M155. Latinos in the U.S.** (Formerly numbered 155.) (Same as Chicana and Chicano Studies M155.) Lecture, three hours; discussion, one hour. Prerequisites: course 1 and junior standing, or consent of instructor. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading. Ms. Ortiz, Mr. Telles

**156. Ethnic and Status Groups.** Characteristics of "visible" ethnic groups (e.g., Japanese, Mexican, and black); their organization, acculturation, and differentiation. Development, operation, and effects of selective immigration and population mobility. Status of chief minorities in continental U.S., with comparative materials from Jamaica, Hawaii, and other areas. Mr. Alvarez, Mr. Kitano, Mr. Prager

**157. Social Stratification.** Analysis of American social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, composition of strata and status systems, mobility, consequences of stratification, and problems of methodology. Mr. McFarland

**158. Urban Sociology.** Lecture, three hours. Description and analysis of urbanization and urbanism in the U.S. and the world. Mr. Halle, Mr. Light, Mr. Telles

**159. Comparative Studies of Jewish Communities in the U.S. and Abroad.** Lecture, three hours; discussion, one hour. History, distribution, structure, and functioning of major Jewish communities, with particular emphasis on North America and Israel. Interrelationships and sources of conflict between Jews and Gentiles in Western countries. More generally, economic and social integration of Diaspora Jewish communities. Fieldwork may be required. P/NP or letter grading.

**160. Intergroup Conflict and Prejudice.** Study of causes and consequences of group conflict, with emphasis on majority/minority relations, prejudice, and discrimination. Special attention to alternative sociological and psychological theories of prejudice; effects of minority status on the individual; and possibilities for attitude and behavior change. Mr. Bobo, Mr. Oliver

**161. Comparative American Indian Societies.** Lecture, three hours. Prerequisite: course 1. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies. Mr. Champagne

**M162. Sociology of Gender.** (Same as Women's Studies M162.) Lecture, three hours; discussion, one hour. Prerequisite: course 1 or Women's Studies 10 or consent of instructor. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading. Ms. Hart

**M163. Gender and Work.** (Same as Women's Studies M164.) Lecture, three hours. Prerequisite: course 1 or Women's Studies 10 or consent of instructor. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. Ms. Milkman

**168. Organizations and Society.** Sociological analysis of organizations and their social environment. Introduction to basic theories, concepts, methods, and research on behavior of organizations in society. Mr. Alvarez, Mr. Grusky

**169. Law and Society.** Specific topics may include law in preindustrial and industrialized societies, legalization of contemporary social relations, participants' experiences of legal processes, lay perceptions of justice, social movements toward equal justice, roles of lawyers and judges, social impact of court decisions. Mr. Abel, Mr. Emerson, Mr. Katz

**170. Medical Sociology.** Prerequisite: course 1 or consent of instructor. Provides majors in sociology and other social sciences, as well as students preparing for health sciences careers, with understanding of health-seeking behavior and interpersonal and organizational relations that are involved in receipt and delivery of health services. Mr. Goldstein, Ms. Hart

**171. Occupations and Professions.** Description and analysis of representative occupations and professions, with emphasis on the contemporary U.S. Ms. Milkman, Mr. Waldinger

**172. Entrepreneurship.** Lecture, three hours; discussion, one hour. Prerequisite: course 1. Description and analysis of entrepreneurship, with special reference to historical origins, ideology, international comparisons, women and ethnic minority participation, legal and illegal forms, public and private auspices. Mr. Light

**173. Economy and Society.** Sociology of economic life, with emphasis on principal economic institutions of the U.S. Mr. Light

**174. Sociology of the Family.** Theory and research dealing with the modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family. Ms. Milkman

**M175. Sociology of Education.** (Same as Education M108.) Prerequisite: course 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

Mr. Rabow, Ms. Wells

**M176. Sociology of Mass Communication.** (Same as Communication Studies M147.) Prerequisite: course 1. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

Mr. Clayman

**182. Political Sociology.** Contributions of sociology to study of politics, including analysis of political aspects of social systems, social context of action, and social bases of power.

Mr. Prager, Mr. Roy, Mr. Zeitlin

**183. Comparative and Historical Sociology.** Prerequisite: course 1. Survey of central themes of comparative and historical studies in sociology. Various aspects of development of modern society, including development of nation-state, emergence of capitalism, industrialization, and population growth. Variation in contemporary society, viewed from a variety of theoretical perspectives.

Mr. Champagne, Mr. Mann, Mr. Roy

**184. Social Change.** Study of patterns of social change, resistance to change, and change-producing agencies and processes.

Mr. Alexander

**185. American Society.** Analysis of major institutions in the U.S. in historical and international perspective, with emphasis on topics such as industrialization, work, the state, politics, community, the family, religion, and American culture. Theories of social change, conflict, and order applied to the case of the U.S.

Mr. Roy, Mr. Zeitlin

**186. Latin American Societies.** Descriptive survey of major Latin American societies, emphasizing their historical backgrounds and their emergent characteristics, with special attention to relations between rural and urban life.

Mr. López, Mr. Zeitlin

**187. Population and Society in the Middle East.** Prerequisites: upper division standing, consent of instructor. Survey of Middle Eastern societies; their historic and environmental bases; contemporary demographic and cultural situation.

**188. Comparative Social Institutions of East Asia.** Analysis of selected social institutions of China, Japan, and Korea. Emphasis on continuity and change in East Asian societies.

Ms. Cheng

**189. Japanese Society.** Lecture, two and one-half hours; discussion, two hours. Prerequisite: course 1 or consent of instructor. Analysis of social-structural characteristics and functioning of contemporary Japanese society, with focus on (1) forms of social interaction and social structure, (2) work, family, and the life course, and (3) education and opportunity. Emphasis on structural perspectives, more than cultural perspectives.

**190. Capitalism, Socialism, and Alternative Social Systems.** Lecture, three hours; discussion, one hour. Prerequisite: junior or senior standing. Theories of capitalism and socialism, history of social experiments with socialism and other noncapitalist systems, and assessment of the record of these experiments.

P/NP or letter grading. Ms. Szelenyi

**195A-195Z. Special Topics in Sociology.** Prerequisite: upper division standing (some sections may require prior coursework or consent of instructor). Study of selected current topics of sociological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit and may be applied as elective units toward sociology major.

**M196A-M196B. Contemporary Issues in Urban Poverty Research.** (Formerly numbered M197A-M197B.) (Same as Geography M146A-M146B.) Prerequisite: Geography 150. Two-term research seminar designed to engage students in ongoing faculty research projects focusing on models of urban poverty and underclass behaviors.

Mr. Oliver, Ms. Ortiz

**197. Undergraduate Seminar.** Prerequisites: upper division standing, major in sociology, consent of instructor.

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, 3.0 GPA in major, courses 1 and 18 or equivalent, consent of instructor and department chair. Course of independent studies designed for graduate or senior undergraduate students who (1) desire a more advanced or specialized treatment of an area covered in regular course list and who present that course as a prerequisite or (2) desire work in an area of sociological analysis currently not covered by an upper division course. Only eight units are allowed. See undergraduate counselor for course contract.

**199HA-199HB-199HC. Special Studies for Honors.** Prerequisite: honors program standing. In Progress grading.

**199HA.** Design of research project to serve as student's honors thesis. Research proposal, detailed bibliography, and regular meetings with sponsoring faculty member required.

**199HB.** Continuation of work initiated in course 199HA. Series of progress reports are prepared in consultation with instructor.

**199HC.** Completion of written report or honors thesis.

**199I. Independent Studies for Internships (2 to 4 units).** Prerequisite: consent of instructor and department. Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be applied toward major requirements. Normally only four units of internship are allowed. P/NP grading.

## Graduate Courses

**202A-202B. Theory and Research in Sociology: Exemplary Studies, Classical and Contemporary.** Lecture, two hours; discussion, two hours. Prerequisite: graduate standing. Required of first-year sociology graduate students. Introduction to study of the discipline's formative and exemplary works to learn about theory and research by reading work done by other people. Designed to help students link their research to the great traditions of sociological enterprise. In Progress grading.

**203A. Social Survey Practicum.** Lecture, one hour; discussion, one hour; laboratory, two hours. Prerequisite: graduate standing or consent of instructor. Training through practice in basic techniques of survey research.

Mr. Oliver, Ms. Zucker

**203B. Social Survey Research Seminar.** Lecture, one hour; discussion, one hour; laboratory, two hours. Prerequisite: graduate standing or consent of instructor. Development of individual survey research projects under faculty supervision.

Mr. Oliver, Ms. Zucker

**209A-209B. Data Analysis for Social Scientists.** Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for graduate students in social sciences. In Progress grading.

Ms. Emigh

**209C. Mathematics for Social Statistics.** Lecture, three hours; computer exercises. Prerequisites: graduate standing, consent of instructor. Discussion of elementary mathematical techniques needed for more advanced statistics courses in various social sciences, psychology, and education. Calculus of sets, sets of numbers, sequences of numbers, notion of a function, polynomials, differentiation, elementary matrices, and vectors.

Mr. Berk, Mr. de Leeuw

**210A-210B. Intermediate Statistical Methods I, II.** Lecture, three hours; discussion, two hours. Prerequisite: course 18 or equivalent. Required for M.A. degree by four area programs. Intermediate statistical methods using computers: probability theory, sampling distributions, hypothesis testing, interval estimation, multiple regression and correlation, experimental design, analysis of variance and covariance, contingency tables, sampling theory. In Progress grading.

Mr. Berk, Mr. Bonacich, Mr. McFarland, Mr. TenHouten

**211A-211B. Comparative and Historical Methods:**

**211A.** Strategies of Research and Conceptualization. Prerequisite: consent of instructor. Topics include relationship of theory and fact to social sciences, logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. In Progress grading (credit to be given only on completion of course 211B).

**211B.** Research Techniques. Prerequisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript census, content analysis, collective biography, and secondary analysis.

Mr. Prager, Mr. Roy, Mr. Zeitlin

**212A-212B. Marxist Methodology.** Prerequisite: course 101 or consent of instructor. Practice in dialectical method of attaining scientific knowledge about society as a process and mode of production. Critical examination of methodological issues and techniques and practical field research.

**213A-213B. Techniques of Demographic and Ecological Analysis.** Prerequisite: course 210A or equivalent. Procedures and techniques for collection, evaluation, and analysis of demographic and ecological data; models of population and ecological structure and change; applications to study of social structure and social change.

Mr. Mason, Mr. Telles

**214A-214B. Naturalistic Methods for Recorded Data.** Prerequisite: consent of instructor. Special features of audio and video recordings as sources of data; problems of description and analysis posed by working with recorded data; practical exploration of techniques of data collection and transcription with both audio and video data; analysis of single cases and analytically defined collections; use of computer to organize research with recorded data. In Progress grading.

Mr. Schegloff

**215A-215B. Experimental Sociology.** Prerequisites: course 210A or equivalent, consent of instructor. Basic fundamentals of experimental method, particularly as it is used in social psychology. In Progress grading.

Mr. Grusky, Mr. Rabow

**216A-216B. Survey Research Methods.** Course in methodology and techniques: formulation of research problem; study design; hypotheses; sampling; measurement; questionnaire and schedule construction; interviewing and data collection; processing and tabulation; analysis and interpretation; presentation of findings; cross-national, replicative, panel, and other complex survey designs. Students participate in survey research project. In Progress grading.

Mr. TenHouten, Mr. Treiman

**217A. Analyzing Ethnographies.** Seminar, three hours. Prerequisite: consent of instructor. Analysis of ethnographic monographs.

Mr. Emerson, Mr. Katz

**217B-217C. Ethnographic Fieldwork.** (Formerly numbered 217A-217B.) Seminar, three hours. Prerequisite: consent of instructor. Recommended: course 217A. Theories and techniques of ethnographic fieldwork. Kinds of problems amenable to ethnographic approaches, methods, and techniques for doing fieldwork, and ethnical problems involved in such research. In Progress grading.

Mr. Emerson, Mr. Katz

**218A-218B. Ethnomethodological Methods.** Prerequisite: consent of instructor. Examination of techniques used in ethnomethodological research, practice in critical evaluation of research, and directed experience in conduct of an extended investigation employing ethnomethodological procedures. In Progress grading.

**219A-219B. Advanced Statistical Methods I, II.** Lecture, three hours; discussion, two hours. Prerequisites: courses 210A-210B or equivalent or consent of instructor. Not required. Advanced multivariate statistical methods: discrete variables and events, logit and log-linear regression, event-history analysis, general linear model, exploratory and confirmatory factor analysis, linear causal models, latent variables, reciprocal causation, classification and clustering, time-series analysis. Mr. Bonacich

**220. Role Theory.** Prerequisites: graduate standing, consent of instructor. Review of theories and research dealing with social roles, with special emphasis on roles in social interaction and in formation of the social self.

**221. Social Ecology.** Prerequisites: courses 18, 116, or equivalent, and graduate standing, or consent of instructor. Examination of various approaches to both microecology and macroecology, including classical and neoclassical ecology, social area analysis, socio-cultural ecology, city-size distributions, effects of population density on animals and humans, proxemics, territoriality, and effects of physical environment on humans. Mr. Bailey

**222. Foundations of Ethnomethodological, Phenomenological, and Analytic Sociologies.** Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Basic issues, methods, and topics of ethnomethodological, phenomenological, conversation-analytic, and related varieties of inquiry. Central themes such as the world of everyday life, problem of rationality, rules/norms and tacit knowledge, problem of social order, speaking and discourse, constitutive practices, and production of ordinary interaction in first part; guest presentations by affiliated faculty in second part. Mr. Pollner

**223. Phenomenological and Interactionist Perspectives on Selected Topics.** Lecture, three hours. Comparison of phenomenological and symbolic interactionist perspectives by examining a particular body of live or currently unresolved substantive issues. Topics vary; attention on development of phenomenological and interactionist thought on topic of concern, with special concern for ambiguities and divergences both within and between the two approaches. When relevant, attention to logical and historical relations of phenomenology and interactionism of pragmatist, existentialist, and ordinary language philosophies. Mr. Katz

**224A-224B. Problems in Social Psychology.** Prerequisites: course 210A, consent of instructor. Basic course for graduate students intending to specialize in social psychology. **224A.** Major theoretical contributions to the field. **224B.** Current work being done in department in several subfields. Mr. Grusky, Mr. Kollock

**225A-225B. Demographic Perspectives on Relationship of Family and Economic Systems.** Prerequisites: courses 210A-210B or consent of instructor. Examination of interrelationship of family and economic systems in societies at different levels of economic development, focusing particularly on the U.S. experience. Central to course: (1) analysis of how demographic factors affect economic and family systems; (2) how these systems, and changes in them, affect demographic variables; and (3) how this two-way process influences relationship of family and economic systems over time. **225A.** Lectures and readings. **225B.** Individual research projects involving term paper and classroom reports of results. Ms. Oppenheimer

**226A-226B. Introduction to Theory and Major Empirical Research in Social Demography.** Lecture, two hours; discussion, one hour. Prerequisites: course 210A, consent of instructor. Survey and critical examination of population theories and related major empirical research. Emphasis on interrelation of cultural, socioeconomic, and demographic factors. Introduction to elementary demographic methods utilizing microcomputers. Ms. Oppenheimer

**227. Sociology of Knowledge.** Prerequisite: graduate standing or consent of instructor. Survey of theories and research concerning social determinants of systems of knowledge and role of intellectual and artistic elites in Western societies.

**228A-228B. Critical Issues in Macrosociology.** Lecture, two hours; discussion, one hour. Prerequisite: graduate standing. Conceptual introduction to the area of macrosociology in which exemplary works are read, studied for substance and methods, and critiqued in seminar and in written papers. Usually team taught by faculty of varying orientations. In Progress grading. Mr. Mann, Mr. Szelenyi, Mr. Zeitlin

**229A. Informal Social Control.** Lecture, three hours. Development and transformation of informal disputes and troubles in communities, neighborhoods, public places, work settings, households, and families. Mr. Emerson

**229B. Social Control Institutions.** (Formerly numbered 229.) Lecture, three hours. Course 229A is not prerequisite to 229B. Current research and theory in formal social control processes and institutions, including police, courts, schools, and nonvoluntary treatment programs, among others. Mr. Emerson

**230. Nations and Nationalism.** (Not the same as course 230 prior to Fall Quarter 1993.) Lecture, three hours. Preparation for independent work in the area of nations and nationalism through close reading of key theoretical and empirical works in this or related areas. S/U or letter grading. Mr. Brubaker

**232. Survey Data Acquisition.** Lecture, three hours. Prerequisites: courses 210A-210B. Traditional topics on survey research practice in study design, instrument design, sampling, interviewing, and data management. Parallel coverage of research literature on various sources of nonsampling response bias that influence survey results. Ongoing survey that employs Computer-Assisted Telephone Interviewing is available as a resource for course.

**233. Foundations of Political Sociology.** Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Survey of the field of political sociology, oriented around critical themes in major theoretical traditions and contemporary exemplars. Special attention to competing perspectives on power, theory of the state, and relationship of class structure to politics. Mr. Prager, Mr. Roy

**234. Sociology of Community Organization.** Prerequisites: graduate standing, consent of instructor. Survey of recent and classical research and literature dealing with predominantly political institutions, problem of order, and organization of communal life in the village and metropolis.

**235. Theories of Ethnicity.** Lecture, one hour; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Examination of variety of theoretical approaches in understanding race and ethnicity in contemporary societies, with emphasis on recent debates among class analysis, pluralist, primordialist, and rational choice perspectives. Mr. López

**236. Immigration (3 units).** (Not the same as course 236 prior to Fall Quarter 1993.) Emphasis on recent immigration to the U.S. in light of historical experience. Examination of patterns of adaptation and ethnic change, with particular attention to new theoretical approaches within multidisciplinary framework. Mr. Light, Mr. Waldinger

**237. Seminar: Theory and Research in Comparative Social Analysis (2 units).** Prerequisite: graduate standing. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, North America and Western Europe, developed capitalist and socialist countries and the Third World, and implications for theory construction and social research. S/U grading. Mr. Szelenyi

**239A-239B. Quantitative Research on Social Stratification and Social Mobility.** Lecture, three hours. Prerequisites: courses 210A-210B or equivalent. Introduction to English language research literature on quantitative social stratification and social mobility in the U.S. and abroad. In Progress grading. Mr. McFarland, Mr. Treiman

**240. Mathematics of Population.** Prerequisite: prior knowledge of matrices, calculus, and probability theory. Discrete and continuous deterministic and probabilistic models of growth and composition of a one-sexed population classified by age, plus selected topics on more complicated population models. Mr. McFarland

**241. Theories of Gender in Society.** Lecture, one hour; discussion, two hours. Gender stratification in society and sociology; extent of gender diversity in human societies past and present; why gender is absent in classical macrosociology; can masculinist paradigms make space for gender or does a feminist-informed sociology necessitate a fresh approach? Ms. Hart

**242. Analysis of Categorical Data.** Lecture, three hours. Prerequisites: courses 210A-210B or Statistics M152A and 152B-152C or equivalent or consent of instructor. Log-linear and log-bilinear analysis (hierarchical log-linear models, logit models, association models, quasi-symmetry models, log-rate models, latent-structure models, and latent-trait models). Mr. Mason

**243. Interaction and Institutions.** Lecture, three hours. Examination of ethnographic and conversational analytic research on structure and processes of interaction in several institutional settings, taken from the following: medicine, criminal justice, psychiatry, social welfare, education, mass communications. Mr. Emerson, Mr. Heritage

**C244A-C244B. Conversational Structures I, II.** Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses CM124A-CM124B. Graduate students have additional assignments and/or meet as a group one additional hour each week. S/U or letter grading. **C244A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **C244B.** Prerequisite: course C244A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations. Mr. Schegloff

**245. Cultural Sociology: Classical and Contemporary Approaches.** Lecture, one hour; discussion, two hours. Exploration of classical approaches to cultural dimension of social life — Weberian, Durkheimian, Parsonian, and critical — and living traditions they have spawned. Examination of contemporary efforts at constructing a new cultural sociology. Theoretical focus, with consideration of case studies. Mr. Alexander

**246. Cultural Studies: Hermeneutic, Semiotic, and Poststructural Traditions.** Lecture, one hour; discussion, two hours. Examination of cultural analysis as it has evolved outside the discipline of sociology, on premise that these extra-sociological approaches provide critical resources in advancing the field of cultural sociology today. Theoretical and comparative emphasis, with consideration of case studies. Mr. Alexander

**247. Sociology of Emotions.** (Not the same as course 247 prior to Fall Quarter 1992.) Lecture, two hours; discussion, one hour. Prerequisite: graduate standing. Sociological theories of emotional expression; experiential approaches to emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and the emotions; creativity and expressed affect; thought, sensations, and the emotions; specific emotions; cultural differences in emotional expression; measurement of emotions. Mr. TenHouten

**M249A. Health Professions.** (Same as Community Health Sciences M274.) Lecture, three hours. Prerequisite: Community Health Sciences 210 or consent of instructor. Sociological examination of concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings. Mr. Goldstein

**M249B. Health and Illness Behavior.** (Same as Community Health Sciences M275.) Prerequisites: Community Health Sciences 210 and Epidemiology 100, or consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior. Mr. Berkanovic

**250. Methodological Problems.** Mr. Bailey, Mr. TenHouten

**251. Topics in the Problem of Social Order.**

**253. Quantitative Methods in Sociology.**

Mr. Bailey, Mr. Bonacich

**255A-255B. Selected Issues in Sociological Theory.** Seminar. Prerequisite: consent of instructor. Course 255A is not ordinarily prerequisite to 255B. Examination of selected issues and problems in classical or contemporary sociological theory and in history of development of sociological theory.

Mr. Champagne

**256. Demography.**

Mr. Bailey, Mr. Telles

**257. Demography of Marriage Formation and Dissolution.** Discussion, three hours. Prerequisites: course 210A, consent of instructor. Extensive and intensive critical examination of major approaches to analysis of marriage formation and dissolution, with focus primarily on demographic literature.

Ms. Oppenheimer

**258. Talk and Social Institutions.** Lecture, three hours. Prerequisite: consent of instructor. Introduction to methods of conversation analysis, with particular reference to interaction in institutional contexts. Examination of relations between design of specific interactional activities and larger social and institutional contexts in which those activities are embedded.

Mr. Clayman, Mr. Heritage

**259. Social Structure and Economic Change: Historical and Comparative Perspectives.**

Ms. Cheng, Mr. Zeitlin

**260. Economy and Society.** Discussion, two hours. Prerequisite: graduate standing or consent of instructor. Review and critique of major analytical traditions in economy and society.

Mr. Light, Mr. Zeitlin

**261. Ethnic Minorities.**

**M262. Selected Problems in Urban Sociology.** (Same as Afro-American Studies M200C.) Seminar. Prerequisite: consent of instructor.

Mr. Allen, Mr. Light, Mr. Oliver

**263. Social Stratification.**

Mr. Treiman

**264. Personal Identity in Historical Perspective.** Lecture, three hours. Prerequisite: graduate standing. Examination of distinctive features of personal identity in contemporary society through use of historical materials on various aspects of private life. Topics include home, food, clothing and appearance, personal odor, and cleanliness in everyday life.

Mr. Katz, Mr. Pollner

**265. Problems in Organization Theory.**

Mr. Alvarez, Mr. Grusky, Ms. Zucker

**266. Selected Problems in Analysis of Conversation.** Prerequisites: courses C244A-C244B or consent of instructor. Variable topics/formats course. Consult instructor for topics and formats to be offered in a specific term. May be repeated for credit with topic change. S/U or letter grading.

Mr. Schegloff

**267. Selected Problems in Communication.**

Mr. Pollner, Mr. Schegloff

**268. Selected Problems in Psychoanalytic Sociology.** Discussion, three hours. Recommended (but not prerequisite): at least one year of methods courses. Selected problems in interpretation of sociology and psychoanalysis, which may be substantive (group development, socialization, culture, deviance, collective behavior) or methodological; latter focuses on clinical fieldwork and experimental use of psychoanalytic and sociological techniques.

Mr. Rabow

**269. Collective Behavior.****270. Selected Problems in Socialization.**

Mr. Allen

**271. Ethnomethodology.****272. Topics in Political Sociology.**

Mr. Roy, Mr. Zeitlin

**273. Attitudes and Social Structure.**

**M275. Contemporary Issues of the American Indian.** (Same as American Indian Studies M200C and Anthropology M269.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

Mr. Champagne, Ms. Heth

**276. Selected Topics in Sociology of East Asia.**

Prerequisites: graduate standing, consent of instructor. Selected problems in China, or in China and Japan comparatively. Possible topics include (1) China's Great Proletarian Cultural Revolution, (2) internal contradictions in Chinese society: male/female relations, city and countryside, minority nationalities, class struggle under socialism, etc., (3) China and Japan: two models of development.

Ms. Cheng

**277. Japanese Society: Selected Topics.** Lecture, two and one-half hours. Prerequisite: graduate standing. Social structural characteristics and functioning of contemporary Japanese society, with focus on comparison and evaluations of functional (or rational) and cultural explanations of selected social phenomena. Topics include forms of social interaction, work organization, family, education, and equality.

Ms. Zucker

**279. Seminar: Applied Social Research.** Lecture, two hours; discussion, one hour. Opportunities for applied research, distinctive features of applied work, and procedures commonly employed in various areas of research. Examination of representative work in specific areas of applied research.

Mr. Berk

**280. Seminar: Evaluation Research.** Prerequisite: graduate standing. Technical and political aspects of implementing evaluation research studies. Role of evaluation research in social policy development, as well as procedures for undertaking process and impact evaluations. S/U or letter grading.

**281. Selected Problems in Mathematical Sociology.**

Prerequisite: consent of instructor. Exploration of some mathematical models of sociological processes. Possible topics include models of small groups, social mobility, kinship relations, organizations, social interaction.

Bonacich, Mr. McFarland

**282. Organizations and the Professions.**

Mr. Alvarez

**283. Applied Sociology.** Discussion, two hours. Prerequisite: graduate standing. Examination of roots and intellectual traditions underlying contemporary interest and work in applied sociology. Discussion of range of methodological perspectives used in applied research, utility of social research in various substantive domains and conflicts and controversies related to ideological activities, competence and performance requirements, and identification with and participation in the discipline.

Mr. Berk

**284. Topics in Mental Health and Illness.** Prerequisites: course 148 or equivalent, graduate standing.

Mr. Grusky, Mr. Pollner

**285A-285Z. Special Topics in Sociology.** Seminar, three hours. Prerequisite: graduate standing. Seminars on selected current topics of sociological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

**286. Event History Analysis.** Lecture, three hours. Prerequisites: courses 209A-209B and 209C, or 210A-210B, or equivalent, or consent of instructor. Logit models for discrete-time event history models; piecewise exponential hazards models based on use of log-linear analysis; proportional hazards, nonproportional hazards, and stratified models based on Cox partial likelihood method; and accelerated failure-time regression models. S/U or letter grading.

**288A-288B-288C. Mental Health Services for Persons with AIDS (3 units each).** Lecture, two hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Analysis of current research on mental health service systems for persons with AIDS. S/U grading.

Mr. Grusky

**289A-289B-289C. Social Psychology Seminars (2 units each).** Lecture, one hour; discussion, one hour. Prerequisite: graduate standing. Required of students in social psychology area program, but open to all graduate students in good standing. Forums for presentation of advanced work in social psychology designed to develop ability to understand, critically evaluate, and present research in fields relevant to study of social psychology. May be repeated for credit. S/U grading.

**290A-290B-290C. Communities and Institutions Seminars (2 units each).**

Lecture, one hour; discussion, one hour. Prerequisite: graduate standing. Required of students in communities and institutions area program, but open to all graduate students in good standing in department. Seminars for presentation of advanced work in communities and institutions designed to contribute to theoretical and methodological comprehension of work in this area program and to critically evaluate avenues for further research advancements. May be repeated for credit. In Progress and S/U grading.

**291. Moral Solidarity in Communities.** Comparative analysis of social solidarity and collapse of social solidarity in voluntary and traditional communities. Contrasts more and less solidarity types, with special reference to utopian communities and developmental processes.

Mr. Light

**292A-292B-292C. Research Development.**

Mr. Grusky

**293A-293B-293C. Colloquia: Ethnomethodological, Phenomenological, and Observational Sociologies (2 units each).** Prerequisites: courses CM124A-CM124B or 217B-217C or 218A-218B and 222, or consent of instructor. Participants present ongoing work and read and discuss exemplary past work of common interest. Continuing colloquia in which participation is expected of faculty and graduate students affiliated with ethnomethodological, phenomenological, and observational sociologies area program (students taking a minor field examination may be exempt on request). S/U grading.

**294A-294B-294C. Research Seminars: Macrosociology.**

Discussion, two hours. Prerequisite: consent of instructor. Required of students in macrosociology area program. Training in conduct, presentation, and critical evaluation of original research and analysis of substantive and methodological questions in macrosociology. In Progress and S/U grading.

Mr. Zeitlin

**295A-295B-295C. Seminars: Quantitative Sociology (2 units each).** Ongoing seminars in quantitative sociology area program. Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned or conducted or recently completed, including didactic presentations on important developments in the area. Students required to make a presentation each term they are enrolled for credit. S/U grading.

**M296A-M296B. Social Theory and Comparative History.** (Same as History M203A-M203B and Political Science M291A-M291B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

Mr. Ashcraft, Mr. Brenner

**M296C. Theories in Cultural History.** (Same as History M203C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material.

Mr. Ooms

**297A-297B-297C. Colloquia: Macrosociology (2 units each).** Weekly forums for presentation of advanced work in macrosociology by graduate students and faculty, as well as visitors from other campuses. Intended to contribute to theoretical and methodological understanding of work in area of macrosociology. S/U grading.

Ms. Milkman, Mr. Roy

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495A-495B. Supervised Teaching of Sociology (2 units each).** Prerequisite: appointment as teaching assistant in Sociology Department or equivalent. Special course for teaching assistants designed to deal with problems and techniques of teaching introductory sociology. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**595. Directed Research for Master's Paper (4 to 12 units).** Directed research for and writing of M.A. degree paper under guidance of student's M.A. committee chair. S/U grading.

**596. Directed Individual Study and Research in Sociology (2 to 12 units).**

**597. Individual Study for Examinations (4 to 12 units).** Preparation for Ph.D. qualifying examinations. S/U grading.

**599. Research in Sociology for Ph.D. Candidates (4 to 12 units).**

## Spanish and Portuguese

5310 Rolfe Hall, (310) 825-1036

### Professors

Shirley L. Arora, Ph.D. (*Spanish*)  
 Rubén A. Benítez, Ph.D. (*Spanish*)  
 Joaquín Gimeno, Ph.D. (*Spanish*)  
 Carroll B. Johnson, Ph.D. (*Spanish*), *Chair*  
 J. Randal Johnson, Ph.D. (*Portuguese*)  
 Gerardo Luzuriaga, Ph.D. (*Spanish*)  
 C. Brian Morris, Litt.D. (*Spanish*)  
 A. Carlos Quicoli, Ph.D. (*Portuguese, Romance Linguistics*)  
 Enrique Rodríguez-Cepeda, Ph.D. (*Spanish*)

### Professors Emeriti

José R. Barcia, Lic. F. y L.  
 John A. Crow, Ph.D.  
 E. Mayone Dias, Ph.D.  
 Claude L. Hulet, Ph.D.  
 C.P. Otero, Ph.D.  
 José Pascual-Buxó, Ph.D.  
 Stanley L. Robe, Ph.D.  
 Aníbal Sánchez-Reulet, Ph.D.  
 Marion A. Zeitlin, Ph.D.

### Associate Professors

Héctor Calderón, Ph.D. (*Spanish*)  
 Guillermo Hernández, Ph.D. (*Spanish*)  
 Efraín Kristal, Ph.D. (*Spanish*)  
 José Monleón, Ph.D. (*Spanish*)  
 Susan Plann, Ph.D. (*Spanish*)  
 A. John Skirius, Ph.D. (*Spanish*)  
 Paul C. Smith, Ph.D. (*Spanish*)

### Assistant Professors

Adriana Bergero, Ph.D. (*Spanish*)  
 Verónica Cortinez, Ph.D. (*Spanish*)  
 Claudia Parodi, Ph.D. (*Spanish*)

### Lecturers

José M. Cruz-Salvadores, M.A. (*Spanish*)  
 George L. Voyt, J.D., *Emeritus*

## Scope and Objectives

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of

original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department's courses are primarily designed to serve the four B.A. programs: B.A. in Spanish (Plan A), B.A. in Spanish and Linguistics (Plan B), B.A. in Portuguese, and B.A. in Spanish and Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the California State Instructional Credential in Spanish, B.A. and M.A. programs in Latin American Studies, M.A. program in Folklore and Mythology, and M.A. and Ph.D. programs in Comparative Literature and Romance Linguistics and Literature.

## Bachelor of Arts in Spanish and in Spanish and Linguistics

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the *Schedule of Classes* or the department office for test dates.

### Preparation for the Majors

*Required:* Spanish 25 or equivalent as determined by the placement test; courses M35, M42, M44, or equivalent.

### The Major, Plan A (Spanish Language and Literature)

*Required:* Fifteen upper division courses, including Spanish 100A-100B, 105, 119A, 119B, 119C, 120A-120B, 127, 136A-136B, and four elective courses in the department (one in Spanish literature, one in Spanish-American literature, and two others).

### The Major, Plan B (Spanish and Linguistics)

*Required:* Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Portuguese is recommended.

The major consists of 15 upper division courses, including Spanish 100A-100B, 105, 115, M118A-M118B, 127, Linguistics 100, 103, 110, 120A, 120B, and three electives in Spanish.

## Honors Program

To qualify for graduation with departmental honors, you must achieve a 3.0 overall grade-point average and a 3.5 grade-point average in the major and have completed two of the three senior honors seminars (Spanish 170A, 170B, 170C) with appropriate grades.

## Bachelor of Arts in Portuguese

### Preparation for the Major

*Required:* Portuguese 3, 25, M35, M42 or M44, 46, or equivalent.

### The Major (Portuguese Language and Literature)

*Required:* Thirteen upper division courses, including Portuguese 100A, 100B, 105, 120A-120B, 130A-130B, and six elective courses in Portuguese, or four electives in Portuguese plus two courses from areas that complement your program approved by the undergraduate adviser in Portuguese.

### Portuguese and Linguistics Concentration

*Required:* Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A-M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

### Double Majors

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

### Study in a Portuguese-Speaking Country

You are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with your individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

## Bachelor of Arts in Spanish and Portuguese

### Preparation for the Major

*Required:* Spanish 25, Portuguese 25, M35, M42 or M44, 46, or equivalent.

## The Major

**Required:** Six upper division courses in language and linguistics, including Spanish 100A-100B, Portuguese 100A, 100B, M118A or M118B, and either Spanish 105 or Portuguese 105; nine upper division courses in literature selected from one of the following groups: *group A* (peninsular literature to 1700) — Spanish 123, 124, 127, Portuguese C124, C125, C126, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group B* (peninsular literature from 1700 to the present) — Spanish 128, 130, 133, Portuguese C127, C128, C129, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group C* (Spanish-American and Brazilian literature to 1900) — Spanish 137, 139, 140, Portuguese C131, C132, C133, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group D* (Spanish-American and Brazilian literature from 1900 to the present) — Spanish 142, 143, Portuguese C134, C135, and five other literature courses, two of which must be in Spanish and two in Portuguese.

## Master of Arts in Spanish

### Admission

Admission to the M.A. program is based on careful review of your academic record by the graduate admissions committee. Minimum requirements include a B.A. in Spanish or the equivalent from UCLA or another recognized university, a satisfactory score on the Graduate Record Examination (GRE) General Test, and three letters of recommendation, preferably from professors with whom you have studied in the major field, who can comment on your potential as a graduate student. For admissions information, write to the Department of Spanish and Portuguese, 5310 Rolfe Hall, UCLA, Los Angeles, CA 90024-1532.

You may be required to take one or more complementary courses (which may not be applied toward the M.A.) if the committee determines that some area of your preparation in language or literature is deficient.

### Foreign Language Requirement

You are required to study one of the following languages: French, German, Italian, Latin, Portuguese, or another language approved by your guidance committee. The requirement may be fulfilled by (1) passing the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better, (2) passing the University reading examination in one of these languages when no GSFLT is available, or (3) passing at least a level three course at UCLA.

### Course Requirements

Eleven graduate Spanish courses are required, at least one of which must be a seminar taken only after the appropriate preseminar. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

Three plans of study for the M.A. in Spanish are offered: Plan A, Linguistics; Plan B, Literature; Plan C, Linguistics and Literature.

**Plan A (Linguistics)** — One graduate course in literature offered by the department, and eight elective graduate courses are required. You must select one major field (five courses) and one minor field (three courses) from the following areas of specialization: phonology and morphology; syntax; diachronic or synchronic language variation. Also required are Spanish M201A-M201B or two additional courses selected from an area outside your major and minor fields.

**Plan B (Literature)** — Spanish M201A-M201B, one course from 202A through 209, and eight elective graduate courses are required. You must select one major field (four courses) and one minor field (three courses) from the following areas of specialization: Spanish literature from its beginning to 1700; Spanish literature from 1700 to the present; Spanish-American literature from its beginning to 1900; Spanish-American literature from 1900 to the present. One additional course must be selected from areas outside your major and minor fields.

**Plan C (Linguistics and Literature)** — Spanish M201A-M201B and nine elective graduate courses, four in literature and five in linguistics, are required. The four literature courses are to be selected from two of the fields specified in Plan B, two courses from each of two areas. Of the five courses in linguistics, one must be in phonology and morphology, one in syntax, and one in diachronic or synchronic language variation.

### Comprehensive Examination Plan

One term before you propose to take the comprehensive examination, you must present to your guidance committee reading lists which constitute the basis for your examination. Students in Plan A receive a list of essential reading when they enter the plan and must present one reading list for the major field and one for the minor field. If you are in Plan B, you also must present for approval one reading list in your major field and one in your minor field. Plan C students must present for approval reading lists representing the literature fields (the reading list for linguistics is established by the guidance committee).

### Thesis Plan

You may petition to present a thesis in lieu of taking the comprehensive examination only after you complete five graduate courses. The graduate adviser and your committee will approve your petition only if they find evidence of exceptional ability and promise in your term papers and coursework.

## Master of Arts in Portuguese

### Admission

The UCLA Bachelor of Arts in Portuguese or the equivalent is required. Other admission requirements are the same as those for the M.A. in Spanish.

### Major Fields

You must select one major field and two minor fields from the following specialization areas: Portuguese literature; Brazilian literature; Portuguese linguistics.

### Foreign Language Requirement

You are required to study one of the following languages: French, German, Italian, Latin, Spanish, or another language approved by your guidance committee. The requirement may be fulfilled by (1) passing the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better, (2) passing the University reading examination in one of these languages when no GSFLT is available, or (3) passing at least a level three course at UCLA.

### Course Requirements

Portuguese M201A-M201B, and eight elective graduate courses in Portuguese are required, at least one of which must be a seminar. You must select four courses in your major field and two courses in each of your two minor fields. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

### Comprehensive Examination Plan

The examination consists of (1) a three-hour written test in your major field and (2) a 90-minute written test in each of your two minor fields. One term before you propose to take the comprehensive examination, you must present for approval to your guidance committee one reading list for your major field in literature (approximately 15 authors and 30 works) and one reading list for your minor field in literature (approximately six authors and 15 works). The reading lists form the basis of the literature section of the examination (the reading list for linguistics is established by the guidance committee).

### Thesis Plan

You may petition to present a thesis in lieu of taking the comprehensive examination only after you complete five graduate courses, one of which must be a seminar. The graduate adviser and your committee will approve your petition only if they find evidence of exceptional ability and promise in your term papers and coursework.

## Ph.D. in Hispanic Languages and Literatures

### Admission

The UCLA Master of Arts in Spanish or in Portuguese, or the equivalent, is required. Three letters of recommendation are also required

from professors familiar with your work as a graduate student, to be addressed to your capacity for research-oriented doctoral studies and possible entry into the profession. The Graduate Record Examination (GRE) General Test is also required. A combined score of 1,000 is preferred; the verbal score is considered more important than the quantitative.

Students who hold the M.A. in Spanish or in Portuguese from UCLA fall into one of three categories and are so notified on receipt of the degree. The categories are (1) *low pass* (terminal M.A.) — not eligible for admission into the Ph.D. program, (2) *mid pass* — may continue toward the Ph.D. on a probationary basis, and (3) *high pass* — automatically eligible to enter the Ph.D. program.

### Major Fields or Subdisciplines

The department recognizes the following areas of specialization, from which you select one major field and two minor fields, together with an optional complementary support area: (1) Spanish linguistics; (2) Portuguese linguistics; (3) diachronic Hispanic linguistics and philology; (4) medieval Spanish literature; (5) Renaissance and Golden Age Spanish literature; (6) 18th- and 19th-century Spanish literature; (7) 20th-century Spanish literature; (8) colonial and 19th-century Spanish-American literature; (9) 20th-century Spanish-American literature; (10) early Portuguese literature; (11) modern Portuguese literature; (12) Brazilian literature; (13) Spanish and Luso-Brazilian folklore.

### Foreign Language Requirement

Reading knowledge of two foreign languages in addition to both Spanish and Portuguese is required. The languages are selected in consultation with your guidance committee. The requirement may be fulfilled by (1) passing the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better, (2) passing the University reading examination in the language when no GSFLT is available, or (3) passing at least a level three course at UCLA. You must fulfill the requirement in one of the languages no later than the sixth term of graduate study.

### Course Requirements

After the B.A., a minimum of 20 graduate courses is required. Spanish or Portuguese M201A-M201B may be required if you do not have prior credit for it. You normally take a minimum of six graduate courses in your major field, of which at least two must be seminars. In each of the minor fields, you normally take a minimum of four graduate courses, of which at least one must be a seminar.

### Qualifying Examinations

The qualifying examinations, given during the fifth and sixth weeks of Fall, Winter, and Spring Quarters, consist of (1) a four-hour written examination in the major field, (2) a two-hour written examination in each minor field, and (3) a two-hour University Oral Qualifying Examination on the three fields and at which your pro-

spectus for the dissertation is discussed and approved. The written examinations are normally taken no later than nine terms after receiving the B.A. and six terms after receiving the M.A. Only students who pass the qualifying examinations are advanced to candidacy for the Ph.D.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Final Oral Examination

The final oral examination is optional at the committee's discretion.

## Spanish

### Lower Division Courses

Spanish 1 through 3 use Shumway and Forbes' *Español en español*. The method is inductive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, read, and write Spanish.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the *Schedule of Classes* or the department office for test dates.

**1. Elementary Spanish.** Discussion, five hours; laboratory, one hour.

**1G. Reading Course for Graduate Students.** Lecture, three hours. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.

**2. Elementary Spanish.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

**2G. Reading Course for Graduate Students.** Lecture, three hours. Enforced requisite: course 1G. May not be applied toward degree requirements. S/U grading.

**3. Elementary Spanish.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.

**4. Intermediate Spanish.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 3.

**5. Intermediate Spanish.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 4.

**6. Intermediate Spanish.** Discussion, five hours. Enforced requisite: course 5. Review and analysis of the more sophisticated and complex syntactic structures of Spanish, verb morphology, and lexical discrimination. Students who have completed course 5 with a grade of A – or better may enroll directly in course 25.

**6A. Intermediate Spanish for Spanish Speakers.** Preparation: proficiency as determined by placement test. Concentration on formal aspects of the language (i.e., spelling, punctuation, accentuation, composition, reading, and traditional grammar) in lieu of course 6.

**8A-8B. Spanish Conversation (2 units each).** Discussion, three hours. Course 8A is open to students with credit for course 4 or equivalent. Students who have completed course 3 with a grade of B or better may be admitted. (F,W,Sp)

**9A-9B. Advanced Conversation (2 units each).** Discussion, three hours. Enforced requisite: course 8B. (F,W,Sp)

**25. Advanced Spanish.** Enforced requisite: course 5. Concentration on building of vocabulary and attainment of a high degree of comprehension in preparation for courses in literature.

**25A. Composition for Spanish Speakers.** Lecture, three hours. Enforced requisite: course 5. Practice in reading and writing of Spanish for students with oral proficiency in Spanish (in lieu of course 25).

**M35. Spanish, Portuguese, and Nature of Language.** (Same as Portuguese M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

**M42. Civilization of Spain and Portugal.** (Same as Portuguese M42.) Required of majors. Conducted in English. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

Mr. Cruz-Salvadores, Mr. Johnson

**M44. Civilization of Spanish America and Brazil.** (Same as Portuguese M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

Mr. Skirius

**60A-60B-60C. Hispanic Literatures in Translation.** Lecture, three hours. Class readings and analysis of selected works in translation. Classroom discussion, papers, and examinations in English. **60A.** Spanish Literature; **60B.** Spanish-American Literature; **60C.** *Don Quijote*.

**61A-61B-61C. Hispanic Literatures in Spanish.** Lecture, three hours. Not open for credit to students with credit for corresponding course in 60 series. Class readings and analysis of selected works. Classroom discussion, papers, and examinations in Spanish. **61A.** Spanish Literature; **61B.** Spanish-American Literature; **61C.** *Don Quijote*.

**62A-62B-62C. Hispanic Literatures and Film.** Lecture, three hours; film screenings, two to three hours. Analysis of main aesthetic, cultural, and philosophical questions in the Hispanic world as articulated in literature and film, addressing not only principal currents affecting Hispanic artistic expression but also diverse strategies employed by two distinct modes of representation. **62A.** Spain; **62B.** Spanish America; **62C.** The Chicano Experience.

Ms. Bergero, Mr. Monleón

**88A-88Z. Lower Division Seminars.** Discussion, three hours. Knowledge of Spanish not essential. Variable topics courses designed to explore various themes and issues pertinent to Hispanic literature and culture:

**88A.** Reaching 2001 (Fantasy of Reality and Reality of Fantasy). Introduction to some specific literary strategies employed by writers of the Hispanic world and analysis of formal characteristics that define categories such as surrealism, magical realism, the fantastic, and realism.

Mr. Monleón

## Upper Division Courses

Prerequisite to all upper division courses is Spanish 25 or equivalent as determined by the placement test.

**100A-100B. Introduction to Study of Spanish Grammar.** Lecture, three hours. Prerequisite: course M35:

**100A.** Phonology and Morphology. Analysis of phonemic and morphological systems of Spanish.

Ms. Plann

**100B.** Syntax. Study of syntactical systems of Spanish.

Mr. Otero, Ms. Plann

**105. Spanish Composition.** Lecture, three hours. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns.

**107. The Spanish of Southern California.** Lecture, three hours. Prerequisites: courses M35 and 100A-100B, or consent of instructor. Analysis of pronunciation, word formation, syntax, and lexicon of the Spanish of Southern California, with attention to regional features, social and age levels of speech, and interference from English.

**115. Applied Linguistics.** Lecture, three hours. Prerequisites: courses M35, 100B. Survey of major linguistic problems faced by teachers of Spanish.

Ms. Plann

**M118A-M118B. History of Portuguese and Spanish.** (Same as Portuguese M118A-M118B.) Lecture, three hours. Prerequisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. **M118A.** Phonology; **M118B.** Morphology and Syntax. Ms. Plann, Mr. Quicoli, Mr. Smith

**119A. Introduction to Study of Literature: Prose.** Lecture, three hours. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in prose literature of Spain and Spanish America, particularly in the novel and essay.

**119B. Introduction to Study of Literature: Poetry.** Lecture, three hours. Introduction to study of literary devices, figures of speech, versification, and distinctive stylistic features in the poetry of Spain and Spanish America.

**119C: Introduction to Study of Literature: Drama.** Lecture, three hours. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in the drama of Spain and Spanish America.

**120A-120B. Survey of Spanish Literature.** Lecture, three hours. Introduction to principal periods, currents, and authors of Spanish literature.

Mr. Gimeno, Mr. Johnson, Mr. Rodríguez-Cepeda

**122. Medieval Literature: Prose.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of main genres through representative works. Mr. Gimeno

**123. Medieval Literature: Poetry.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of main genres through representative works. Mr. Gimeno

**124. Golden Age: Poetry and Drama.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Study, through representative works, of the Golden Age poetry and drama.

Mr. Johnson, Mr. Rodríguez-Cepeda

**125. Golden Age: Prose.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of 16th- and 17th-century prose writing in Spain, with particular emphasis on *Lazarillo de Tormes* and the picaresque tradition.

Mr. Johnson, Mr. Rodríguez-Cepeda

**127. Golden Age: Don Quijote.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Development of the novel in the Golden Age, with particular reference to *Don Quijote*.

Mr. Johnson, Mr. Rodríguez-Cepeda

**128. The Enlightenment and Romanticism in Spain.** Lecture, three hours. Recommended (but not prerequisite): course 120B. Study, through representative works, of main manifestations of thought and literature from 1700 to 1850.

Mr. Benítez, Mr. Rodríguez-Cepeda

**130. Post-Romanticism, Realism, and Naturalism in Spain.** Lecture, three hours. Recommended (but not prerequisite): course 120B. Development of main trends of Spanish literature from 1850 to 1898.

Mr. Benítez, Mr. Smith

**132. 20th-Century Spanish Prose.** Lecture, three hours. Recommended (but not prerequisite): course 120B. Study of several representative works of Spanish prose literature since 1898.

Mr. Monleón, Mr. Morris

**133. 20th-Century Spanish Poetry and Drama.** Lecture, three hours. Recommended (but not prerequisite): course 120B. Study of several representative works of Spanish poetry and drama since 1898. Mr. Morris

**136A-136B. Survey of Spanish-American Literature.** Lecture, three hours. Introduction to principal periods, currents, and authors of Spanish-American literature. Ms. Arora, Mr. Luzuriaga, Mr. Skirius

**137. Literature of Colonial Spanish America.** Lecture, three hours. Recommended (but not prerequisite): course 136A. Study of most important genres and authors from the Conquest to 1810. Ms. Arora

**139. Romanticism and Realism in Spanish-American Literature.** Lecture, three hours. Recommended (but not prerequisite): course 136A. Study, through representative literary works, of most important currents of thought and literary trends from 1810 to 1880. Mr. Luzuriaga, Mr. Skirius

**140. Modernismo.** Lecture, three hours. Recommended (but not prerequisite): course 136A. Study, through representative works, of principal characteristics of *modernismo* in Spanish-American literature. Mr. Luzuriaga

**142. 20th-Century Spanish-American Literature: Fiction and the Essay.** Lecture, three hours. Recommended (but not prerequisite): course 136B. Study, through representative novels, short stories, and essays, of Spanish-American prose literature since 1910. Mr. Luzuriaga, Mr. Skirius

**143. 20th-Century Spanish-American Literature: Poetry and Drama.** Lecture, three hours. Recommended (but not prerequisite): course 136B. Study of principal poets, dramatists, and dramatic movements in Spanish-American literature since 1910. Mr. Skirius

**144. Mexican Literature.** Lecture, three hours. Recommended (but not prerequisite): course 136B. Study of major movements and authors of Mexican literature. Mr. Skirius

**M145. Introduction to Chicano Literature.** (Same as Chicana and Chicano Studies M145.) Lecture, three hours. Prerequisite: course 25 or 26. Recommended: course 136B. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus. Mr. Hernández

**M149. Folk Literature of the Hispanic World.** (Same as Folklore M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries. Ms. Arora

**151A-151B. Women in Hispanic Literature.** Discussion, three hours. Study of works by and about women, with emphasis on portrayal of women, women's roles, and myths of womanhood within the Hispanic socio-ideological context. **151A.** Spain. Recommended (but not prerequisite): courses 120A-120B. **151B.** Spanish America. Recommended (but not prerequisite): courses 136A-136B.

**M161. Film and Literature of the Spanish-Speaking World.** (Formerly numbered 161.) (Same as Humanities M174.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grading. Mr. Monleón

**170A. Senior Honors Seminar: Topics in Spanish Literature.** Lecture, three hours. Prerequisite: senior Spanish major with 3.5 GPA in the major. Directed research on topics within general area of Spanish literature. Two senior seminars required for departmental honors. (F)

**170B. Senior Honors Seminar: Topics in Spanish-American Literature.** Lecture, three hours. Prerequisite: senior Spanish major with 3.5 GPA in the major. Directed research on topics within general area of Spanish-American literature. Two senior seminars required for departmental honors. (W)

**170C. Senior Honors Seminar: Topics in Hispanic Linguistics.** Lecture, three hours. Prerequisite: senior Spanish major with 3.5 GPA in the major. Directed research on topics within general area of Hispanic linguistics. Two senior seminars required for departmental honors. (Sp)

**197. Undergraduate Seminar.** Lecture, three hours. Prerequisites: upper division Spanish major, consent of instructor. Limited to 15 students. Variable topics course with readings, discussions, and papers; consult *Schedule of Classes* or department counselor for topic to be offered in a specific term.

**197A. Studies in Hispanic Culture and Civilization.** Lecture, three hours. Required of students preparing for a California State Instructional Credential in Spanish. Advanced course that studies diverse aspects of Hispanic culture, civilization, and history. Classroom discussions, papers, and examinations in Spanish.

**199. Special Studies (2 to 4 units).** Prerequisite: consent of adviser and instructor. Eight units may be applied toward the major requirements.

## Graduate Courses

**M200. Research Resources.** (Same as Portuguese M200.) Lecture, three hours. Identification and use of research resources for graduate students. Mr. Benítez, Mr. Smith

**M201A-M201B. Literary Theory and Criticism.** (Formerly numbered M201.) (Same as Portuguese M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. In Progress grading. Mr. Otero, Ms. Plann

**202A. Phonology.** (Formerly numbered 202.) Lecture, three hours. Study of the sound structure of Spanish and main phonological processes that map underlying representations into surface representations. Bearing of phonological theory on study of meter. Mr. Otero, Ms. Plann

**202B. Morphology.** (Formerly numbered 202.) Lecture, three hours. Study of derivational and inflectional word formation processes and their interaction with syntactic structure. Mr. Otero, Ms. Plann

**204A-204B. Generative Syntax and Semantics.** Lecture, three hours. Study of syntactic structure of Spanish and relation between underlying representations and logical form within a principles-and-parameters framework. Bearing of syntactic and semantic structure on study of literature. Mr. Otero

**M205A-M205B. Development of Portuguese and Spanish Languages.** (Same as Portuguese M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin. Mr. Otero, Mr. Smith

**209. Dialectology.** Lecture, three hours. Major dialect areas of peninsular and American Spanish, with distinguishing features of each. Influence and contribution of cultural and historical features, including indigenous languages, to their formation.

**221. Medieval Lyric Poetry.** Lecture, three hours. Readings of and lectures on Spanish lyric poetry from the beginning to 1500. Mr. Gimeno

**222. Medieval Epic and Narrative Poetry.** Lecture, three hours. Readings of and lectures on Spanish epic and narrative poetry from the beginning to 1500. Mr. Gimeno

**223. Medieval Prose.** Lecture, three hours. Readings of and lectures on Spanish prose from the beginning to 1500. Mr. Gimeno

**224. Poetry of the Golden Age.** Lecture, three hours. Readings of and lectures on Spanish poetry from 1500 to 1700. Mr. Morris, Mr. Rodríguez-Cepeda

**225. Drama of the Golden Age.** Lecture, three hours. Readings of and lectures on the *comedia*. Mr. Rodríguez-Cepeda

**226. Prose of the Golden Age.** Lecture, three hours. Readings of and lectures on fictional, didactic, religious, and historical writings. Mr. Johnson

**227. Cervantes.** Lecture, three hours. Readings of and lectures on works of Cervantes. Mr. Johnson

**228. The Enlightenment.** Lecture, three hours. Readings of and lectures on representative works of the period. Mr. Benitez

**229. Romanticism.** Lecture, three hours. Readings of and lectures on representative works of the period. Mr. Benitez

**230. Realism and Naturalism.** Lecture, three hours. Readings of and lectures on literary works, principally novels, from 1850 to 1898. Mr. Benitez, Mr. Smith

**231. Major Currents in Modern Spanish Literature.** Lecture, three hours. Introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898. Mr. Morris

**232. Spanish Prose Literature from 1898 to the Civil War.** Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period. Mr. Monleón, Mr. Morris

**233. Spanish Prose Literature after the Civil War.** Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period. Mr. Monleón, Mr. Morris

**234. Spanish Drama and Poetry from 1898 to the Civil War.** Lecture, three hours. Readings of and lectures on representative plays and poems. Mr. Morris

**235. Spanish Drama and Poetry after the Civil War.** Lecture, three hours. Readings of and lectures on representative plays and poems of the period. Mr. Morris

**237. Literature of the Spanish Conquest.** Lecture, three hours. Readings of and lectures on chronicles, poems, and indigenous accounts of the Spanish Conquest. Ms. Arora

**238. Baroque, Enlightenment, and Neoclassicism in Colonial Literature.** Lecture, three hours. Readings of and lectures on representative texts. Ms. Arora

**239. Romanticism and Realism in Spanish-American Literature.** Lecture, three hours. Intensive study of Romanticism and realism in Spanish-American literature. Mr. Skiriuss

**240. Major Currents in Modern Spanish-American Literature.** Lecture, three hours. Study of principal trends in modern Spanish-American literature, particularly *naturalismo* and *modernismo*. Mr. Luzuriaga

**241A-241B. Contemporary Spanish-American Short Story.** Lecture, three hours. Study of important short story writers from modernism to the present.

**243A-243B. Contemporary Spanish-American Poetry.** Lecture, three hours. Intensive study of important poets of Spanish America from modernism to the present.

**244A-244B. Contemporary Spanish-American Novel.** Lecture, three hours. Study of important novelists from modernism to the present.

**245. Contemporary Spanish-American Essay.** Lecture, three hours. Study of important Spanish-American essayists of the 20th century. Mr. Skiriuss

**246. Contemporary Spanish-American Drama.** Lecture, three hours. Study of principal Spanish-American dramatists and theater movements in the 20th century. Mr. Luzuriaga

**247. Chicano Literature.** Lecture, three hours. Study of major movements and authors of Mexican American literature. Mr. Calderón, Mr. Hernández

**M249. Folk Literature of the Spanish and Portuguese Worlds.** (Same as Folklore M249 and Portuguese M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech. Ms. Arora

Seminar courses (M251A through 290) may be taken for a maximum of eight units each with consent of the appropriate guidance committee and with topic change.

**M251A-M251B. Studies in Galegan-Portuguese and Old Spanish.** (Same as Portuguese M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish. Mr. Otero, Mr. Smith

**256A-256B. Studies in Spanish Linguistics.** Lecture, two hours. Study of problems in analysis and description of the contemporary Spanish language. Mr. Otero

**257. Studies in Dialectology.** Discussion, two hours.

**262A-262B. Studies in Medieval Spanish Literature.** Discussion, two hours. Mr. Gimeno

**264A-264B. Studies in Golden Age Spanish Literature.** Discussion, two hours. Mr. Johnson, Mr. Morris, Mr. Rodríguez-Cepeda

**265. Cervantes.** Discussion, two hours. Mr. Johnson

**270A-270B. Studies in 18th-Century Spanish Literature.** Discussion, two hours. Mr. Benitez

**271A-271B. Studies in 19th-Century Spanish Literature.** Discussion, two hours. Mr. Benitez, Mr. Smith

**272A-272B. Studies in 20th-Century Spanish Literature.** Discussion, two hours. Mr. Monleón, Mr. Morris

**277A-277B. Studies in Colonial Spanish-American Literature.** Discussion, two hours. Ms. Arora

**278A-278B. Studies in 19th-Century Spanish-American Literature.** Discussion, two hours.

**280A-280B. Studies in Contemporary Spanish-American Literature.** Discussion, two hours. Mr. Luzuriaga

**281. Studies in Chicano Literature.** Discussion, two hours. Mr. Calderón, Mr. Hernández

**M286A-M286B. Studies in Hispanic Folk Literature.** (Same as Folklore M286A-M286B.) Lecture, two hours. Ms. Arora

**290. Special Topics.** Lecture, two hours. Variable topics; consult *Schedule of Classes* or department counselor for topics to be offered in a specific term.

**310. Teaching Spanish in Elementary School.** Lecture, three hours.

**370. Teaching Spanish in Secondary School.** Lecture, three hours.

**373. Teaching Composition (2 units).** Prerequisites: graduate standing, consent of instructor. Seminar on teaching writing in Spanish language courses. Introduction to composition theory. Instruction and practice in integrating writing into curriculum, setting goals and standards, designing and sequencing course materials, evaluating and commenting on papers. May not be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Spanish at College Level.** Prerequisite: graduate standing in department. Basic concepts of modern theories of language and language acquisition which underlie modern methods of second language teaching. S/U grading.

**596. Directed Individual Study or Research (4 to 8 units).** Prerequisite: consent of graduate adviser and chair. Study or research in areas or subjects not offered as regular courses. No more than four units may be applied toward M.A. course requirements.

**597. Preparation for Graduate Examinations (4 to 12 units).** Prerequisites: official acceptance of candidacy by department, consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis (4 to 12 units).** Prerequisite: consent of guidance committee. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation (4 to 8 units).** Limited to students who have passed Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

## Portuguese

### Lower Division Courses

No credit is allowed for completing a less advanced course after completion of a more advanced course in grammar and/or composition.

**1. Elementary Portuguese.** Discussion, five hours; laboratory, one hour.

**2. Elementary Portuguese.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

**3. Intermediate Portuguese.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.

**8A-8B. Portuguese Conversation (2 units each).** Discussion, three hours. Enforced requisite: course 3 (B or better).

**25. Advanced Portuguese.** Enforced requisite: course 3.

**M35. Spanish, Portuguese, and Nature of Language.** (Same as Spanish M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

**40A-40B. Portuguese, Brazilian, and African Literature in Translation.** Lecture, three hours. Reading and discussion of selected works in translation. Papers and examinations in English. **40A.** Portuguese and Portuguese-African Literature; **40B.** Brazilian Literature.

**M42. Civilization of Spain and Portugal.** (Same as Spanish M42.) Required of majors. Conducted in English. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses. Mr. Cruz-Salvadores, Mr. Johnson

**M44. Civilization of Spanish America and Brazil.** (Same as Spanish M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses. Mr. Skiriuss

**46. Civilization of the Portuguese-Speaking World.** Lecture, three hours. Conducted in English. Topical analysis of cultural history of Brazil, Portugal, and Portuguese-speaking African countries, with emphasis on physical environment, principal historical, social, and economic development, and artistic manifestations. P/NP or letter grading.

### Upper Division Courses

Prerequisite to all upper division courses is Portuguese 25 or consent of instructor.

**100A. Phonology and Morphology.** Lecture, three hours. Analysis of phonetic, phonemic, and morphological systems of Portuguese. Mr. Quicoli

**100B. Syntax.** Lecture, three hours. Review of patterns of the Portuguese language. Mr. Quicoli

**101A. Advanced Reading and Conversation.** Lecture, three hours. Reading and discussion of writings by modern Brazilian and Portuguese authors.

**102A-102B. Intensive Portuguese.** Prerequisite: foreign language experience (other than Portuguese) or consent of instructor. Development of speaking and reading skills equivalent to those covered in three terms of the traditional pattern and to meet special needs of advanced undergraduate and graduate students.

**105. Advanced Composition and Style.** Practice in writing Portuguese with appropriate vocabulary, syntactical structures, and stylistic patterns.

**M118A-M118B. History of Portuguese and Spanish.** (Same as Spanish M118A-M118B.) Lecture, three hours. Prerequisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. **M118A.** Phonology; **M118B.** Morphology and Syntax. Ms. Plann, Mr. Quicoli, Mr. Smith

**120A-120B. Survey of Portuguese Literature.** Lecture, three hours. Introduction to principal periods, currents, and authors of Portuguese literature.

**C124. Medieval Portuguese Literature.** Lecture, three hours. Study of main genres of medieval Portuguese and Galician literature through representative works. May be concurrently scheduled with course C224.

**C125. Renaissance Portuguese Literature.** Lecture, three hours. Study of main genres of Renaissance Portuguese literature, with particular emphasis on the works of Luis de Camoens. May be concurrently scheduled with course C225.

**C126. Baroque and Neoclassical Portuguese Literature.** Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C226.

**C127. Romanticism and Realism in Portuguese Literature.** Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C227.

**128. Post-Romanticism and Naturalism in Portuguese Literature.** Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C228.

**C129. 20th-Century Portuguese Literature.** Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C229.

**130A-130B. Survey of Brazilian Literature.** Lecture, three hours. Introduction to principal periods, currents, and authors of Brazilian literature.

**C131. Colonial Brazilian Literature.** Lecture, three hours. Study of most important authors to 1830. May be concurrently scheduled with course C231.

**C132. Romanticism in Brazilian Literature.** Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C232.

**C133. Naturalism, Realism, and Symbolism in Brazilian Literature.** Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C233.

**C134. 20th-Century Brazilian Literature: Poetry and Drama.** Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C234.

**C135. 20th-Century Brazilian Literature: Novel.** Lecture, three hours. Study of most important Brazilian novelists. May be concurrently scheduled with course C235.

**141. Film and Literature of the Portuguese-Speaking World.** Lecture, three hours. Not open for credit to students with credit for course 197. Topical analysis (conducted in English) of main literary and historical themes of Brazilian culture, through films and literary texts, from colonial beginnings to the present day.

**197. Undergraduate Seminar.** Lecture, three hours. Variable topics course with readings, discussions, and papers; consult *Schedule of Classes* or department counselor for topic to be offered in a specific term.

**199. Special Studies (2 to 4 units).** Prerequisite: consent of adviser and instructor. Eight units may be applied toward the major requirements.

## Graduate Courses

**M200. Research Resources.** (Same as Spanish M200.) Lecture, three hours. Identification and use of research resources for graduate students. Mr. Benítez, Mr. Smith

**M201A-M201B. Literary Theory and Criticism.** (Formerly numbered M201.) (Same as Spanish M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. In Progress grading. Mr. Quicoli

**202. Synchronic Morphology and Phonology.** Lecture, three hours. Study of theoretical synchronic linguistics as applied to Portuguese. Mr. Quicoli

**204A-204B. Generative Grammar.** Lecture, three hours. Prerequisite: consent of instructor. Course 204A or consent of instructor is prerequisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, semiology, and phonology on style, metaphor, and meter. Mr. Quicoli

**M205A-M205B. Development of Portuguese and Spanish Languages.** (Same as Spanish M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin. Mr. Otero, Mr. Smith

**C224. Medieval Portuguese Literature.** Lecture, three hours. Study of main genres of medieval Portuguese and Galician literature through representative works. May be concurrently scheduled with course C124.

**C225. Renaissance Portuguese Literature.** Lecture, three hours. Study of main genres of Renaissance Portuguese literature, with particular emphasis on works of Luis de Camoens. May be concurrently scheduled with course C125.

**C226. Baroque and Neoclassical Portuguese Literature.** Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C126.

**C227. Romanticism and Realism in Portuguese Literature.** Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C127.

**C228. Post-Romanticism and Naturalism in Portuguese Literature.** Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C128.

**C229. 20th-Century Portuguese Literature.** Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C129.

**C231. Colonial Brazilian Literature.** Lecture, three hours. Study of most important authors to 1830. May be concurrently scheduled with course C131.

**C232. Romanticism in Brazilian Literature.** Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C132.

**C233. Naturalism, Realism, and Symbolism in Brazilian Literature.** Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C133.

**C234. 20th-Century Brazilian Literature: Poetry and Drama.** Lecture, three hours. Study of representative trends and authors. May be concurrently scheduled with course C134.

**C235. 20th-Century Brazilian Literature: Novel.** Lecture, three hours. Study of most important Brazilian novelists. May be concurrently scheduled with course C135.

**M249. Folk Literature of the Spanish and Portuguese Worlds.** (Same as Folklore M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech. Ms. Arora

**M251A-M251B. Studies in Galegan-Portuguese and Old Spanish.** (Same as Spanish M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish. Mr. Otero, Mr. Smith

**252. Studies in Early Portuguese Literature.** Discussion, two hours.

**253. Studies in Modern Portuguese Literature.** Discussion, two hours.

**254. Studies in Early Brazilian Literature.** Discussion, two hours.

**255. Studies in Modern Brazilian Literature.** Discussion, two hours.

**256A-256B. Studies in Portuguese Linguistics.** Lecture, two hours. Study of problems in analysis and description of the contemporary Portuguese language. Mr. Quicoli

**370. Teaching Portuguese in Secondary School.** For future teachers in this field.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research (4 to 8 units).** Prerequisite: consent of graduate adviser and chair. Study or research in areas or subjects not offered as regular courses. No more than eight units may be applied toward M.A. course requirements.

**597. Preparation for Graduate Examinations (4 to 12 units).** Prerequisites: official acceptance of candidacy by department, consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis (4 to 12 units).** Prerequisite: consent of guidance committee. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation (4 to 8 units).** Limited to students who have passed Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

## Speech

334 Kinsey Hall, (310) 825-3303

### Professors

Neil M. Malamuth, Ph.D. (*Communication Studies*),  
Chair  
Donald E. Hargis, Ph.D., *Emeritus*  
Charles W. Lomas, Ph.D., *Emeritus*

### Associate Professors

Paul I. Rosenthal, Ph.D. (*Communication Studies*;  
*Distinguished Teaching Award*)  
Ralph Richardson, Ph.D., *Emeritus*

### Lecturers

Dee Bridgewater, Ph.D.  
Stephen A. Doyle, M.A.  
Marde S. Gregory, M.A., *Senior (Distinguished Teaching Award)*  
Thomas E. Miller, M.A.  
Sonya H. Packer, M.A.

There is no major in speech; however, the following undergraduate courses are offered for interested students.

## Lower Division Courses

**1. Principles of Oral Communication.** Preparation: satisfaction of Subject A requirement. Theory and practice of informal public speaking, including selection of content, organization of ideas, language, and delivery; practice in extemporaneous and manuscript speaking; training in critical analysis through reading and listening to contemporary speeches.

**2. Public Speaking and Discussion.** Enforced requisite: course 1. Continuation of course 1, with special emphasis on group discussions, panels, symposia, debates, and formal public speaking. Critical analysis of speeches in both contemporary and historical settings.

## Upper Division Courses

**107. Principles of Argumentation.** Analysis of propositions, tests of evidence, briefing. Study of hindrances to clear thinking, ambiguity of terms, and prejudices. Critical analysis of selected argumentative speeches. Mr. Miller

**190A-190B. Forensics (2 units each).** Prerequisite: consent of instructor. May be repeated once for credit. Mr. Miller

**191. Analysis and Briefing (2 units).** Intensive study of selected political or social issues; preparation of bibliography; analysis and evaluation of issues and arguments. May be repeated once for credit. Mr. Miller

**197. Proseminar: Rhetoric.** Prerequisite: senior standing or consent of instructor. Variable topics course involving intensive study of discourse associated with a single major issue or personality.

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor.

## Study of Religion

## Teaching English as a Second Language and Applied Linguistics

3300A Rolfe Hall, (310) 206-1985

### Professors

Roger W. Andersen, Ph.D.  
Lyle Bachman, Ph.D.  
Marianne Celce-Murcia, Ph.D. (*Distinguished Teaching Award*)  
Elinor Ochs, Ph.D.  
John H. Schumann, Ed.D., *Chair*  
Russell N. Campbell, Ph.D., *Emeritus*

Evelyn R. Hatch, Ph.D., *Emerita*  
Earl J. Rand, Ph.D., *Emeritus*

### Assistant Professor

Asif Agha, Ph.D.

### Lecturers

Donna Brinton, M.A.  
Janet Goodwin, M.A. (*Luckman Distinguished Teaching Award*)  
Christine Holten, M.A.  
Linda Jensen, M.A. (*Luckman Distinguished Teaching Award*)

## Scope and Objectives

The Teaching English as a Second Language and Applied Linguistics (TESL) Department offers a program designed for students who wish to develop research skills related to the teaching and learning of English as an additional language. The program is a two-year course of graduate study leading to a Master of Arts degree.

The first year of the program is designed to improve teachers' performance in the ESL classroom. The second year provides opportunity to investigate in depth some particular aspect of teaching and learning English as a second language. The course of study includes a practical element: observing classes, preparing lesson plans, and actual classroom teaching. There is, however, greater emphasis on theory in the program. Students are expected to become familiar with current theories regarding the nature of language, as well as the ways in which people acquire and use language. They are also expected to be able to relate theoretical guidelines to practical procedures. The program is therefore not appropriate for the student who is interested exclusively in receiving vocational training. Admission preference is granted to applicants with strong research interests.

In addition, the Department of Teaching English as a Second Language and Applied Linguistics and the Department of Linguistics offer an interdepartmental degree program leading to a Ph.D. in Applied Linguistics. For information, write to the Applied Linguistics Program, 3300A Rolfe Hall, UCLA, Los Angeles, CA 90024-1531. (Also see the section on Applied Linguistics earlier in this chapter.)

A limited number of teaching assistantships are available to qualified M.A. and Ph.D. students. For information and applications, write to the Academic Coordinator, ESL Service Courses, 3310 Rolfe Hall, UCLA, Los Angeles, CA 90024-1531.

## Master of Arts Degree

### Admission

Students normally apply for the M.A. in TESL if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only for Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree.

After admission, you must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is required in order to continue into the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser and are due by December 15 of the year prior to admission. The program requires three letters of recommendation in support of the application. You are requested to submit the letters of recommendation directly to the Graduate Adviser, Department of Teaching English as a Second Language and Applied Linguistics, 3300A Rolfe Hall, UCLA, Los Angeles, CA 90024-1531. Since admission is limited to approximately 25 students per year, it is important that supporting papers be submitted by January 8.

The admissions committee screens all applications, using the following criteria: grade-point average (must be 3.0 or better), Graduate Record Examination (GRE) scores, letters of recommendation, statement of purpose, and relevant research paper. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study TESL at UCLA, (2) special qualifications and experience as a teacher, (3) knowledge of languages other than English, and (4) knowledge of other cultures.

All international students who are nonnative speakers of English must submit the results of the Test of English as a Foreign Language (TOEFL) as part of the application process. International students who hold a bachelor's or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from the UCLA English as a Second Language Placement Examination (ESLPE).

### Foreign Language Requirement

Students whose native language is English generally use their Fall and Winter Quarter electives to acquire or perfect knowledge of the native language or dialect of the pupils to whom they expect to teach English. This can be done by taking any one of three combinations of two courses: (1) two foreign language courses; (2) one foreign language course plus a corresponding course in the Linguistics 220 or 225 series; (3) Teaching English as a Second Language and Applied Linguistics 227 plus an unrestricted elective.

Those particularly interested in working with Mexican American, Asian American, or American Indian pupils normally choose the third of these alternatives. When there is doubt as to which language is most appropriate, a non-European language should be selected because of the greater broadening of linguistic horizons that such a selection offers. Foreign language courses that deal with linguistic structure should be selected whenever possible.

Nonnative speakers of English, depending on the results of the UCLA English as a Second Language Placement Examination (ESLPE), may be required to take a course to improve their practical command of English.

Exemption from the foreign language requirement may be granted if you can demonstrate a strong need to take other electives and have an unusually extensive background of previous foreign language study. For more information, contact the graduate adviser.

### First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Teaching English as a Second Language and Applied Linguistics 209 or 249, 370, foreign language requirement or elective (course depends on language requirement plan)

Winter Quarter: Courses C122, 241 or 261 or 269 or 271, foreign language requirement or elective (course depends on language requirement plan)

Spring Quarter: Courses 106 or 107 or 109, 380, 103 or Linguistics 103

Exceptions to the above requirements are made only after consultation with the faculty adviser.

Of the nine courses required the first year, at least seven must be in TESL and applied linguistics, linguistics, or structure of language courses in language departments.

Successful completion of the above courses qualifies students for a TESL certificate (which is not a California State Instructional Credential).

### Teaching Experience

One term of supervised teaching (Teaching English as a Second Language and Applied Linguistics 380) is required during the first year unless you have had extensive teaching experience. If this requirement is completed at UCLA in an adult education setting, you are eligible for the California Adult Education Credential in ESL (call 310-825-4581 for more information). The California Basic Educational Skills Test is required of all applicants for the credential.

### Second-Year Curriculum

A total of 14 courses is required for the M.A. degree, including a minimum of four 200-series courses. Four of the nine courses taken during the first year (usually Teaching English as a Second Language and Applied Linguistics C122, 209 or 249, 241 or 261 or 269 or 271, and 103 or Linguistics 103) and, in special cases, two of the electives (100 or 200 series only) may be applied toward the University's nine-course minimum requirement for master's degrees. This leaves five courses, at least two of which must be at the graduate level, to be

completed in consultation with the faculty adviser during the second year.

Eight units of 500-series courses may be applied toward the M.A. degree, but only four units may be applied toward the graduate course requirement. You must enroll in course 598 each term you are registered; however, only four units may be applied toward the degree (to be taken either in Spring Quarter of your first year or Fall Quarter of your second year).

Course 400 is a seminar in which TESL M.A. candidates present and defend the results of their thesis research. Enrollment is required in Spring Quarter but does not count as one of the 14 courses required for the M.A.

The electives taken during your second year should be selected, in consultation with the faculty M.A. adviser and the chair of your thesis committee, as a sequence of related courses relevant to your thesis topic. Any changes in the program must be approved by both the committee chair and the M.A. adviser.

### Thesis Plan

By the end of the fourth term, your thesis proposal, signed by two faculty members, is submitted to the faculty. At this time, plans for the thesis are approved and the thesis committee is established.

### Upper Division Courses

**101. Introduction to Language Learning and Language Teaching.** Lecture, two hours; discussion, two hours. Prerequisite: Linguistics 1 or consent of instructor. Exploration of skills and conditions involved in successful second and foreign language learning; application of this knowledge in development of framework for teaching second and foreign languages. P/NP or letter grading.

Ms. Celce-Murcia (Sp)

**103. Phonetics for Teachers of English as a Second Language.** Prerequisite: consent of instructor. Analysis of phonological structure of contemporary English, with attention to differences between British and American speech. Drill directed toward individual needs.

Ms. Brinton, Ms. Goodwin, Ms. Jensen

**106. Writing in the ESL Context.** Provides opportunities for practice and improvement in writing skills and thus fulfills composition requirement for TESL M.A. degree. Survey of important theoretical and methodological issues related to teaching writing/composition to ESL students and examination of appropriate classroom materials and authentic student compositions.

Ms. Holten (W)

**107. Reading in the ESL Context.** Provides opportunities for practice and improvement in reading and writing skills and thus fulfills composition requirement for TESL M.A. degree. Survey of important theoretical and methodological issues related to teaching reading and writing to ESL students and examination of appropriate classroom materials.

Ms. Jensen (Sp)

**109. Literature in the ESL Context.** Provides opportunities for practice and improvement in writing skills and thus fulfills composition requirement for TESL M.A. degree. Survey of important theoretical and methodological issues related to teaching literature to ESL students and examination of appropriate classroom materials. Strong emphasis on the cultural basis for literature.

Ms. Brinton (Sp)

**C122. Structure of Present-Day English.** (Formerly numbered 122.) Lecture, six hours. Prerequisite: Linguistics 20 or consent of instructor. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C216.

Ms. Celce-Murcia (W)

**M189. Metaphor and Literal Speech.** (Formerly numbered 189.) (Same as Philosophy M173.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: Linguistics 1 or equivalent or consent of instructor. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphoric capacity. P/NP or letter grading.

Mr. Agha, Ms. Celce-Murcia

### Graduate Courses

All graduate courses are open to qualified graduate students from other departments with consent of department.

**209. Current Issues in Experimental Design and Statistics for Applied Linguistics.** Specialized topics of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current theoretical methodological trends in the field.

Mr. Bachman (F,Sp)

**C216. Structure of Present-Day English.** Lecture, six hours. Prerequisite: Linguistics 20 or consent of instructor. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C122. Additional assignments required of graduate students.

Ms. Celce-Murcia (W)

**220. Materials Development for Language Teaching.** Prerequisites: course 370, at least two years of ESL/EFL teaching experience. Planning and preparation of an original set of language teaching materials geared to needs of a specified group of learners. Revision of first drafts and evaluation of one's own work and that of one's peers.

Ms. Celce-Murcia (Sp)

**221. Media for Language Teaching.** Rationale and pedagogical application for using media equipment and materials in the language classroom. Training in standard classroom media equipment operation and basic materials production techniques, focusing on application to ESL instruction.

Ms. Brinton (W)

**222. Language Testing for Teachers of English as a Second Language.** Prerequisites: course 370, Linguistics 20. Theories and techniques for language assessment across the skill areas. Emphasis on classroom testing and functions of testing within a language program. Basic statistical concepts and hands-on experience with construction of language tests.

Mr. Bachman (W or Sp)

**225. Program Evaluation in Applied Linguistics.** Evaluation of effectiveness of ESL curriculum and instruction, including assessment of teacher behavior. Prevalent evaluation theories, writing of evaluation proposals, developing program monitoring procedures, selecting appropriate evaluation design plans, framing the decision context, and reporting evaluation results.

**227. Experiential Seminar: Second Language Learning.** Lecture, one hour; laboratory, four hours. Prerequisite: graduate standing. Students learn an uncommonly taught language with use of authentic language materials (video and audio recordings and print material). Discussion of experience in terms of issues in language learning and language teaching.

Mr. Andersen (Sp)

**229. Current Issues in Language Education.** Specialized topics in language education of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical concern in the field.

Mr. Bachman, Ms. Celce-Murcia

**232. Advanced Seminar: Construction and Administration of Language Tests.** Prerequisite: course 222 or consent of instructor. Designed to explore current issues in language testing research from both theoretical and practical perspectives and to provide actual experience in addressing a current issue. Specific topics vary according to trends in the field.

Mr. Bachman (F)

**241. Interlanguage Analysis.** Lecture, three hours; discussion, one hour. Prerequisites: course 370; Linguistics 20. Hands-on project-oriented introduction to research on interlanguage, the language of second language speakers. Theoretical and methodological aspects of linguistic research on second language acquisition. Research paper combining qualitative and quantitative research techniques required.

Mr. Andersen (Sp)

**249. Current Issues in Language Analysis.** Specialized topics in language analysis of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical import in the field.

Mr. Andersen, Ms. Celce-Murcia, Mr. Schumann

**250. Advanced Seminar: Cohesion Analysis of English Structure.** Prerequisite: course C122 or consent of instructor. Investigation in depth of selected linguistic features of oral and written texts that go beyond sentence level and thus signal cohesion. Study of structures to determine their function in a variety of English texts representing several discourse types.

Ms. Celce-Murcia (F)

**251. Advanced Seminar: Interlanguage Analysis.** Prerequisite: course 241. Analysis of interlanguage from various points of view (e.g., topic-comment structure, tense, aspect, modality, thematic structure of utterances), with aim of understanding how interlanguage is organized. Original research projects.

Mr. Andersen, Mr. Schumann (W,Sp)

**252. Advanced Seminar: Contextual Analysis of English Structure.** Prerequisite: course C122 or consent of instructor. Examination of selected words and structures in oral and written English texts to determine when and why the word or structure occurs. Emphasis on factors such as meaning, discourse genre, social/pragmatic function, and relative frequency. However, starting point in analysis is syntax (i.e., what are the structural properties—form, distribution—of word(s) or structure(s) under consideration?).

Ms. Celce-Murcia (F)

**258. Laboratory: Advanced Topics in Language Assessment.** Prerequisite: consent of instructor. Collaborative coursework, with focus on specific theoretical and applied issues in development of innovative language assessment procedures for use in real-world settings. Specific projects determined by research being conducted by the working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and interpreting and reporting results. May be repeated for credit. S/U or letter grading.

Mr. Bachman

**260. Psycholinguistics and Language Teaching.** Prerequisites: course 370 and Linguistics 20, or consent of instructor. Exploration of those areas of psycholinguistics covering foreign language acquisition; types and theories of bilingualism; learning theories underlying current methods of teaching foreign languages.

Mr. Schumann

**261. Second Language Acquisition.** Prerequisite: consent of instructor. Review of literature on child and adult second language acquisition. Language variables (phonological, morphological, sentential, and discourse levels) and social and psychological variables which may account for differences in learning.

Mr. Andersen, Mr. Schumann (W)

**263. Cross-Linguistic Topics in Functional Grammar I: Typology.** Survey of a particular linguistic area from typological perspective within functional grammar framework. Topics include tense/mood/aspect, nominal reference, word order. May be repeated for credit with topic change.

Mr. Andersen

**264. Cross-Linguistic Topics in Functional Grammar II: Discourse.** Prerequisite: course 263. Cross-linguistic study of discourse function of grammatical devices. Topics include tense/mood/aspect, nominal reference, word order. May be repeated for credit with topic change.

Mr. Andersen

**266. Topics in Semantics and Pragmatics.** Detailed examination of specialized topics in semantics and pragmatics. Topics vary from year to year and may include metaphor, theories of reference and denotation, honorific speech, evidentiality, reported speech, etc. May be repeated for credit. S/U or letter grading.

Mr. Agha

**269. Current Issues in Language Acquisition.** Specialized topics in language acquisition of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of theoretical concern in the field.

Mr. Andersen, Mr. Schumann

**M270A-M270B. Ethnographic Methods in Applied Linguistics A, B.** (Same as Anthropology M249A-M249B.) Course M270A is prerequisite to M270B. Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical framework that considers language as a social and cultural practice. First term devoted to skills related to collecting socially and culturally meaningful data; second term devoted to production of ethnographic analysis, including how to present an analysis in form of a conference talk and how to develop an analysis into a grant or dissertation proposal. S/U or letter grading.

Mr. Duranti, Ms. Ochs

**271. Cross-Linguistic Topics in Language Acquisition.** Lecture, one hour; discussion, three hours. Prerequisite: Linguistics 20. Advanced seminar on language acquisition in which a particular linguistics topic (e.g., development of tense/aspect, reference, subordination, agreement) is pursued from cross-linguistic and cross-disciplinary perspectives. Focus on language-specific vs. universal (i.e., cross-linguistically valid) mechanisms of language development.

Mr. Andersen (Sp)

**272. Grammar and Discourse I: Theoretical Foundations.** Survey of grammar- and discourse-based approaches to study of language as meaningful form. Topics include grammatical and indexical categories, referential and social indexicality, relation of syntax to semantics and pragmatics, markedness, universals, cultural and cognitive implications of language structure and use. S/U or letter grading.

Mr. Agha

**273. Grammar and Discourse II: Special Topics.** Prerequisite: course 272 or consent of instructor. Survey of advanced topics in grammar and discourse, including predicates, arguments and grammatical relations, noun phrase categories, case marking, verbal categories, topic marking devices, registers and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from range of languages. S/U or letter grading.

Mr. Agha

**283. Discourse Analysis.** Survey course covering language teaching and discourse analysis; discourse analysis and syntax; planned and unplanned discourse; conversational analysis; analysis of speech events; unequal power discourse; and analysis of classroom discourse.

Ms. Ochs (F)

**284. English for Specific Purposes.** Study of methodologies for needs analysis, curriculum development, and testing for specific academic, professional, and vocational groups who require English as a foreign or second language.

**285. Language Socialization.** Prerequisite: course 283. Exploration of process of socialization through language and socialization to use language across the life span, across communities of practice within a single society, and across different ethnic and socioeconomic groups. Ways in which verbal interaction between novices and experts is structured linguistically and culturally.

Ms. Ochs

**288. Discourse Laboratory.** Laboratory, three hours; fieldwork/research, 10 hours. Prerequisites: courses 249, 283, two other discourse analysis courses, and doctoral standing in applied linguistics, or consent of instructor. Advanced procedures in data analysis in the field of discourse analysis, including development of a large-scale research project and critical review of current research. S/U or letter grading.

Mr. Agha, Ms. Celce-Murcia, Ms. Ochs

**289. Current Issues in Language Use.** Specialized topics in language use and related areas of interest to graduate students in TESL and applied linguistics. Emphasis varies according to current topics of concern in the field.

Ms. Ochs

**370. Teaching English as a Second Language.** Lecture, six hours. Prerequisite: consent of instructor. Bibliography, survey, and evaluation of methods and materials. Nature of language learning. Analysis of differences between two languages as a basis of instruction. (F)

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Ms. Goodwin, Ms. Holten, Ms. Jensen (F,W,Sp)

**380. Supervised Teaching: English as a Second Language or Dialect.** Prerequisite: course 370. Team teaching at elementary, secondary, or adult level under supervision of a senior staff member. S/U grading.

Ms. Brinton, Ms. Goodwin,

Ms. Holten, Ms. Jensen (Sp)

**400. TESL Colloquium.** Prerequisite: consent of TESL M.A. adviser. M.A. candidates present and defend results of their thesis research. Required of all candidates but may not be applied toward M.A. degree requirements. Candidates for Ph.D. in Applied Linguistics may also use this course to report on their dissertations. S/U grading. (Sp)

**495. Training and Supervision of Teaching Assistants (2 units).** Lecture, two or more hours. Corequisite: appointment as a teaching assistant. Orientation, preparation, and supervision of graduate students who have responsibility for teaching ESL courses at UCLA. Syllabus revision and materials preparation. May not be applied toward degree requirements for M.A. or certificate in TESL or Ph.D. in Applied Linguistics. S/U grading.

Ms. Brinton (F)

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study.** Prerequisite: graduate standing. Independent study in an area related to English as a second language. May not be repeated for credit.

**598. M.A. Research and Thesis Preparation (4 to 8 units).** Prerequisite: graduate standing. Survey of research needs and thesis preparation. Includes optional section on experimental design and statistical methods in Fall Quarter. Credit (four units) toward degree is allowed only once, but all M.A. candidates must enroll in course each term they are registered and engaged in thesis preparation. S/U grading.

(F,W,Sp)

## English as a Second Language (ESL) Service Courses

3308 Rolfe Hall, (310) 825-4378

The following courses are only for students whose native language is not English. Placement in these courses is established on the ba-

sis of the UCLA English as a Second Language Placement Examination (ESLPE), which students whose native language is not English must take in addition to the Subject A Examination (see "Subject A" in Chapter 2).

Depending on the results of this examination, you may either be exempt from any special ESL requirement or may be required to take one or more courses. You are placed into the ESL track at a particular level and must enroll in one ESL course each term, beginning in your first term in residence at UCLA, until the sequence is completed. The required sequence for undergraduates is English as a Second Language 33A, 33B, 33C, and 35; each course must be passed with a grade of C or better (C – or a Passed grade is not acceptable). The required sequence for graduate students is English as a Second Language 33A, 33B, and 33C; each course must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. If you do not achieve a minimum score on the placement examination, you may be required to spend a term studying elementary English exclusively, through UCLA Extension, before retaking the ESLPE and continuing through the appropriate sequence of courses at UCLA.

Undergraduates may satisfy the English Composition requirement by completing course 36 with a grade of C or better (C – or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or consent of the department.

## Lower Division Courses

**32. Oral Communication Skills for ESL Students.** Requisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Course 33C may be taken concurrently. Develops oral skills that prepare nonnative speakers of English to participate in class discussion, make oral presentations before an audience, ask and answer questions, participate appropriately in conversations with members of the academic community, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

**33A. Low Intermediate English as a Second Language.** Recitation, eight hours; laboratory, two hours. Requisite: Extension course XL832 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Displaces eight units on student's Study List but yields only four units of credit toward a degree. Intensive instruction in structure of English, with focus on vocabulary building, listening and speaking skills, and basic composition techniques.

**33B. High Intermediate English as a Second Language.** Recitation, five hours. Requisite: course 33A (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills.

**33C. Advanced English as a Second Language.** Recitation, five hours. Requisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on academic reading, writing, study skills, and lecture comprehension.

**34. Advanced Oral Communication Skills for ESL Students.** Requisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Develops oral skills that prepare nonnative speakers of English to present ideas extemporaneously, lead class discussions, give lectures or speeches before an audience, respond to questions posed by the audience, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

**35. Developmental Composition for ESL Students.** Requisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Developmental composition skills for ESL students, with focus on the writing process, grammatical structures, mechanics of writing, and practice with major forms of academic writing. Additional emphasis on academic reading skills.

**36. Intermediate Composition for ESL Students.** Requisites: course 35 (C or better; 33C for graduate students) or proficiency demonstrated on English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Focus on major rhetorical techniques found in academic writing. Special attention to individual research, grammatical structures, and style.

**37. Structure of Present-Day English for ESL Students.** Lecture, four hours; outside study, eight hours. Requisite: course 33C (C or better) or equivalent proficiency demonstrated on English as a Second Language Placement Examination. Course 35 may be taken concurrently. Analysis and practice of those grammatical structures of English most important to learners of English as a second or foreign language, with focus on incorporating knowledge of structures studied into communicative and interpretive activities.

## Upper Division Courses

**103. Pronunciation for ESL Students.** Prerequisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Detailed and systematic study of the sounds of American English and way in which they are put together in connected speech, applied to improvement of student's own accent.

Ms. Brinton, Ms. Goodwin

**106. Advanced Composition for ESL Students.** Prerequisites: course 36 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Focus on production of fully developed, stylistically sophisticated expository and argumentative essays based on complex academic readings. Additional emphasis on grammatical structure and style.

Ms. Holten

**107. Advanced Reading and Vocabulary for ESL Students.** Prerequisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Instruction in and practice of academic reading skills using authentic university texts. Focus on improving reading rate and comprehension, expanding academic vocabulary, and developing critical reading skills.

Ms. Jensen

**109. Introduction to Literature for ESL Students.** Prerequisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Selections from English and American literature presented so as to make full allowance for students' linguistic and cultural problems and to contribute to increasing command of the English language.

Ms. Brinton

## Urban Studies (Interdepartmental)

4256 Bunche Hall, (310) 825-3862

### Scope and Objectives

Cities are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in urban studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in the modern city. The program gives students a solid grounding in the urban perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

### Special Undergraduate Program

You may elect to combine this program with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in urban studies is also open to qualified students. For more information on individual majors, see the beginning of Chapter 5.

If you have a departmental major, you should seek advising in your major department. If you are interested in the individual major, consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

### Preparation for the Specialization

*Required:* At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Political Science 40; Psychology 10; Sociology 1, 18, 104 or equivalent.

### Upper Division

*Required:* Nine upper division courses, including (1) at least three courses outside your major department selected from Anthropology 167, Economics 120, Geography 150, Psychology 168, Sociology 158; (2) a minimum of three courses selected from one of the following suites within your major department: Economics 121, 130, 133; Geography 150, 151, 156; History 154A through 154D; Political Science 143A, 143B, 167B; Psychology 127, 135; Sociology 132, 156, 160; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside your major department; (4) internship experience in an urban governmental or community service organization.

Professor Eric Monkkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.

## Women's Studies (Interdepartmental)

Brenda Stevenson, Ph.D. (*History*)  
Mariko Tamanoi, Ph.D. (*Anthropology*)  
Dawn M. Upchurch, Ph.D. (*Community Health Sciences*)

### Lecturers

Sue Levi Elwell, Ph.D. (*Near Eastern Languages and Cultures*)  
Linda Garnets, Ph.D. (*Psychology*)  
Sylvia Sherno, Ph.D. (*Spanish and Portuguese*)

### Adjunct Professor

Sandra G. Harding, Ph.D. (*Philosophy*)

### Adjunct Associate Professors

Jacqueline D. Goodchilds, Ph.D. (*Psychology*)  
Sondra Hale, Ph.D. (*Anthropology; Luckman Distinguished Teaching Award*)

## Scope and Objectives

The Women's Studies Program, established in 1975, is an interdisciplinary academic program spanning departments, disciplines, and ideologies and offering two options for study: an undergraduate major and a specialization. Students wishing to focus their studies on multidisciplinary perspectives in order to create a coherent and comprehensive analysis of women and gender may elect the major. Those wishing to enhance study in a traditional discipline may elect the women's studies specialization in addition to a major in their chosen discipline.

The program offers the singular opportunity to study the full range of human experience and arrangements of social organization from the perspectives of those whose participation has been traditionally distorted, omitted, neglected, or denied—women in their racial, class, and sexual diversity. Students develop critical reasoning and analytical skills, research and communication skills, a deep appreciation for complexities of power, asymmetries in gender relations across time, class, and cultures, and conceptual tools for social change. Strong emphasis on multidisciplinary and multiethnic approaches assures a broader exposure to the humanities and social sciences than is commonly available within disciplinary confines. A background in women's studies offers unique contextual validation for today's woman and prepares students for a wide range of career and life choices, as well as for advanced study in traditional disciplines and the professions.

The field of women's studies has exploded over the past 25 years. It has developed a theoretical base, body of knowledge, and perspective which cannot be attained as a by-product of studying other fields. Where the study of women has been neglected or omitted, the field develops new knowledge through research and fills in gaps in the existing curriculum. Further, women's studies generates new perspectives on existing knowledge of women and gender, offers a critique of accepted beliefs and ideas, intellectually challenges existing structures of knowledge, and introduces new conceptual paradigms.

The core faculty members who teach women's studies courses come from various UCLA departments and professional schools. Many professionals within and outside the University contribute their time, expertise, and enthusiasm. A women's studies committee composed of the director, faculty members, and a student representative sets program policies and curricula.

The program sponsors a Student Association and assists other student groups with extra-curricular programming on feminist issues. Research in women's studies is promoted in cooperation with the Center for the Study of Women. A library of information related to women's studies is housed in the program office.

While no formal graduate program exists at UCLA at this time, graduate students are invited to use the program's resources, attend lectures and events, and participate in the feminist research seminar sponsored by the center.

## Requirements for the Undergraduate Programs

### Admission

To be admitted to either the major or specialization, you must have completed Women's Studies 10, be in good standing, and formally register with the program. You are encouraged to declare your major or specialization as early as possible and to discuss your proposed course of study with the director or undergraduate adviser.

You are encouraged to draw on the University's diverse resources in creating your major or specialization program. You may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women's studies approved list, you may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

## Bachelor of Arts Degree

The interdisciplinary major in women's studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

All courses applied toward the major must be taken for a letter grade, and you must have a GPA of 2.0 or better in women's studies courses to receive credit for completing the program. Courses in which you receive a grade below C may not be applied toward the major.

### Preparation for the Major

**Required:** Women's Studies 10. You must also complete departmental lower division prerequisites, as applicable, for upper division women's studies courses in the disciplines.

### The Major

The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods, (2) provide exposure to a range of feminist scholarship across disciplines, and (3) enable you to acquire a depth of knowledge within one or two disciplinary or topical fields of inquiry. To achieve this goal, the major is divided into three categories.

**Required:** At least 13 upper division courses as follows:

(1) Three *core* courses, including one course from Women's Studies 110A through M110D, one course on the study of American ethnic minority women from the approved list of women's studies credit courses issued each term by the program, and course 197 (departmental 197 courses may not be applied).

(2) At least four *distribution* courses, each from different departments or disciplines, selected from the approved list of women's studies courses.

(3) Six additional *concentration* courses from one or two of the disciplines in which your core and distribution courses have been taken. You may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, women's health, or lesbian studies.

For the purpose of the ethnic studies requirement and the distribution requirement, appropriate Council on Educational Development (CED), field studies, and Women's Studies courses may be applied. Four units of Women's Studies 199 may be applied toward either the distribution or concentration requirement for the major (departmental 199 courses are not affected by this limit).

### Honors Program

The honors program is open to senior women's studies majors with a 3.0 grade-point average in women's studies courses and a minimum 3.0 overall GPA who have no outstanding incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the program director for approval.

To be eligible for honors at graduation, you must successfully complete Women's Studies 197 and two successive terms of independent studies (courses 199HA-199HB) with your faculty sponsor and receive a grade of B or better on your research paper/project. Course 199HA may be applied toward the concentration requirement; course 199HB is in addition to the minimum required courses. Further information is available from the undergraduate counselor in the program office.

### Women's Studies Specialization

The specialization augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the women's studies specialization.

You must take three core courses (Women's Studies 10, one course from 110A through M110D, and 197), plus five upper division elective courses from the approved list of women's studies credit courses issued each term by the program. One course on American ethnic minority women is strongly recommended. At least one of the five courses must be taken in a department other than the major department. Up to two may be experimental courses offered by the Council on Educational Development (CED). No more than four units of course 199 may be applied.

All courses applied toward the specialization must be taken for a letter grade, and you must have a GPA of 2.0 or better in women's studies courses to receive credit for completing the program. Courses in which you receive a grade below C may not be applied toward the specialization.

### Lower Division Course

**10. Introduction to Women's Studies: Feminist Perspectives on Women and Society.** Lecture, two and one-half hours; discussion, one hour. Introduction to study of women and men in society, covering comparative issues of social, political, and economic position in the workplace, family, cultural institutions; historical basis of women's subordination; the female experience; the male experience; relations between women and men; intersections of ethnicity, class, and gender; violence against women; cultural images of women and men; social roles of women and men and movements for social change. (F,W,Sp)

### Upper Division Core Courses

**110A. Feminist Theories: Social and Political.** Lecture/discussion, three hours. Prerequisite: course 10. Examination in depth of differing feminist theorists' attempts to describe, explain, critique, and reconstruct social and political institutions from perspectives of women. Emphasis on whether and how feminist theory is related to change in structure, operation, or understanding of such institutions as law, politics, the state, education, work, family, religion, sexuality.

**110B. Feminist Theories: Criticism.** Lecture/discussion, three hours. Prerequisite: course 10. Examination in depth of differing feminist theorists' interpretations of language, literature, and the arts from a critical perspective. Emphasis on ways in which women and sexuality have been represented in cultural texts.

**110C. Feminist Theories: Perspectives on Gender and Science.** Lecture/discussion, three hours. Prerequisite: course 10. Examination in depth of different theoretical positions on gender and women as they have been applied to study of sciences. Emphasis on theoretical contributions made by the new scholarship on women as it applies to shaping of scientific enterprise.

**M110D. Philosophical Analysis of Issues in Feminist Theory.** (Same as Philosophy M192.) Lecture, three hours. Prerequisite for women's studies majors: course 10; for other students: one philosophy course or consent of instructor. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor.

**130. Women of Color in the U.S.** Lecture/discussion, three hours. Prerequisite: course 10. Exploration of experiences of African American, Asian American, Chicana, and Native American women in order to assess intersections of race, ethnicity, class, and gender. Contemporary and/or historical and/or theoretical perspectives on racism and its relation to feminism as defined by women of color.

**197. Senior Seminar: Women's Studies.** Discussion, three hours. Prerequisites: course 10, one course from 110A through M110D, two other women's studies courses; for seniors and juniors: consent of instructor. Designed for students completing work in women's studies. Each student pursues research on specific topic concerning women, explores frameworks for understanding female experience (biological, economic, historical, and psychological), and refines methods for research. (W,Sp)

### Upper Division Supporting Courses

**105. Topics in Women and Medicine.** Lecture/discussion, three hours. Examination of medical conditions of women in context of issues that impact women's health, health care, and health care providers. Discussion of basic health concepts and self-care; consideration of a woman's health speciality and ways to deliver health care to women. Exploration of roles and lifestyles of female physicians. P/NP or letter grading. Ms. Friedman, Ms. Krockover

**M106. Imaginary Women.** (Same as Honors Collegium M106.) Prerequisite: upper division standing. Study of four female cultural archetypes — absconding wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

Ms. King (W)

**M107A. American Women Writers.** (Same as English M107A.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

Ms. Rowe, Ms. Smith

**M107B. British Women Writers.** (Same as English M107B.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

Ms. Lewis, Ms. Mellor

**M107C. Special Topics in Women and Literature.** (Same as English M107C.) Prerequisite: satisfaction of Subject A requirement. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping. Ms. Allen, Ms. Cheung, Ms. Smith

**M112. Special Topics in Women and the Arts.** (Same as World Arts and Cultures M112.) Lecture, three hours; outside study, nine hours. Prerequisite: course 10. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representation, and access. May be repeated twice, except for credit toward women's studies major. P/NP or letter grading.

**120. Internship in Women's Studies.** Seminar, three hours. Prerequisites: course 10 and at least one course from 110A through M110D. Field studies course combining seminar with field placement. Practical experience in working on women's issues and connecting these experiences to methodological and theoretical themes explored in courses 110A through M110D.

**125. Women and Health Care in the U.S.** Lecture/discussion, three hours. Prerequisite: course 10. Examination in depth of various ways women provide health care in both paid and unpaid capacities and of political, economic, and social factors affecting women as recipients of health care. P/NP or letter grading.

**M132A. Chicana Feminism.** (Same as Chicana and Chicano Studies M110.) Lecture, three hours. Prerequisite: course 10 or consent of instructor. Examination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women. Ms. Saldivar-Hull

**M132B. Contemporary Issues among Chicanas.** (Same as Chicana and Chicano Studies M154.) Prerequisite: course 10 or consent of instructor. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas. Ms. Ortiz

**M137E. Work Behavior of Women and Men.** (Same as Psychology M137E.) Prerequisite: course 10 or Psychology 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles. Ms. Goodchilds

**M137J. Psychology of Language and Gender.** (Same as Communication Studies M124 and Psychology M137J.) Lecture, three hours. Prerequisites: Psychology 10 or equivalent, junior standing. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction. Ms. Henley

**139. Women and Art in Contemporary U.S.** (Formerly numbered CED 139.) Lecture/discussion, three hours. Prerequisite: course 10. Exploration of some significant cultural issues of contemporary American women's art movement. Representation, resistance, and critical intervention in relation to gender, race, and class. Emphasis on visual and performance arts as these reflect various perspectives of feminism. Ms. Hale

**M148. Women in Higher Education.** (Same as Education M148.) Limited to juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation. Ms. Astin

**M154. Women in Culture and Society.** (Formerly numbered M163.) (Same as Anthropology M154.) Lecture, three hours. Open to upper division social sciences majors. Comparative study of women's lives globally and locally from an anthropological perspective. Critical review of relevant theoretical and practical issues using ethnography, case studies, and student research and presentation. P/NP or letter grading. Ms. Hale, Ms. Sacks

**M158. Women in Italian Culture.** (Same as Italian M158.) Lecture, three hours. Designed with intent of examining role that women have played in Italian society. Concentration alternatively on the world of medieval and Renaissance "matriarch" and on "liberated" women of our times. Historical and political documents and social and religious taboos presented and discussed, together with other data derived from literature and art. Italian majors required to read texts in Italian and to prepare papers written in Italian. Mrs. Cottino-Jones

**M160. Women and Social Movements.** (Formerly numbered 160.) (Same as Anthropology M155Q.) Lecture/discussion, three hours. Recommended (but not prerequisite): prior women's studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

**M162. Sociology of Gender.** (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Prerequisite: course 10 or Sociology 1 or consent of instructor. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

**M164. Gender and Work.** (Same as Sociology M163.) Lecture, three hours. Prerequisite: course 10 or Sociology 1 or consent of instructor. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality. Ms. Milkman

**M165. Psychology of Gender.** (Same as Psychology M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction. Ms. Peplau

**170. Jurisprudence of Sexual Equality.** Prerequisites: course 10 and one course from 110A through M110D or Political Science 10 or Philosophy 6 or 9 or consent of instructor. Exploration of models of equality described and/or advocated by legal theorists — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment or pregnancy leave policy) for purposes of comparison and critique. Ms. Littleton

**M172. The Afro-American Woman in the U.S.** (Same as Afro-American Studies M172 and Psychology M172.) Limited to juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group. Ms. Mays

**M173. Interracial Work, Friendship, and Love Relationships of African American Men and Women.** (Formerly numbered M103.) (Same as Afro-American Studies M175.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships. P/NP or letter grading. Ms. Mays (Sp)

**185. Special Topics in Women's Studies.** Prerequisites: upper division standing, one prior course in women's studies. Specialized or advanced study in an area within women's studies.

**199. Special Studies in Women's Studies.** Prerequisites: at least two upper division women's studies courses, minimum 3.0 GPA, consent of instructor and program director. Directed program of independent readings and/or research on a specific topic within women's studies. No more than four units may be applied toward women's studies specialization or major.

**199HA-199HB. Directed Studies for Honors.** Prerequisites: course 197, 3.0 GPA overall, 3.0 GPA in major. Limited to women's studies honors majors. Two-term sequence to research and write honors thesis under direction of faculty sponsor.

## Supporting Courses in Other Departments

Check with the program office for additional course listings.

**Anthropology 151.** Marriage, Family, and Kinship  
155. Women's Voices: Their Critique of Anthropology of Japan  
263P. Gender Systems

**Asian American Studies 105.** Asian American Women

**Classics 150A.** Origins of the Western View of Women: The Female in Greek Thought

150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought

**Communication Studies 153.** The Media and Aggression Against Women

**Community Health Sciences 230.** Family and Sexual Violence

431. Research in Women's Health: Theories and Methods

**English 180X.** Specialized Studies in Literature

**French 140.** Women's Studies in French Literature

165. Topics in French Literature in Translation: From Nature (Female?) to Culture (Male?)

**Health Services M241.** Women, Health, and Aging: Policy Issues

**History 137A-137B-137C.** History of Women in Europe  
156C-156D-156E. Social History of American Women  
156F-156G. History of the American Family

197. Undergraduate Seminars

**Humanities C170.** Alternate Traditions: In Search of Female Voices in Contemporary Literature

**Political Science 149.** Special Topics in American Government and Politics: Women and the Political Process

**Psychology 197A.** Current Issues in Psychology: Social Psychology of the Lesbian Experience

231. Psychology of Gender

## World Arts and Cultures (Interdepartmental)

An intercollege, interdepartmental major in world arts and cultures is open to students in both the College of Letters and Science and the School of the Arts. You enroll in the college or school of your choice and fulfill the general education requirements of that college or school. For details on this undergraduate major, see Chapter 6 on the School of the Arts.

---

# School of the Arts

Robert Blocker, Dean

# 6

The School of the Arts is a stimulating academic center dedicated to the education of socially aware and technically skilled artists. It serves as a vital component of the Los Angeles arts community and a resource for the entertainment industry and related fields. While the school offers a broad intellectual and cultural exchange for students, it also provides a learning environment where they can pursue and develop academic and creative excellence.

In addition to a quality education in the arts and liberal studies, students may contribute to the UCLA/Los Angeles community through direct participation in over 35 dance productions, four art and design exhibitions, and 200 music concerts.

The school has five departments — Art, Dance, Design, Ethnomusicology and Systematic Musicology, and Music — and one intercollege, interdepartmental program — World Arts and Cultures.

# School of the Arts\*

1100 Dickson Art Center, (310) 206-3564

The departments of the School of the Arts both borrow from and add to the rich and varied cultural life of the campus. Students in the Departments of Art and Design are taught to understand the broad panorama of the visual arts, while those in the Dance Department have opportunity to study ballet, modern, and ethnic dance forms. Students in the Department of Ethnomusicology and Systematic Musicology study all styles of music in the world from an ethnographic perspective. And the Music Department offers specializations in composition, theory, and performance.

World arts and cultures is an undergraduate major which integrates art history, dance, music, theater, anthropology, and folklore and mythology into one unique program. This interdisciplinary major is offered jointly by the School of the Arts and the College of Letters and Science.

Informative brochures on the school are available from the Office of Recruitment, 1100 Dickson Art Center, UCLA, Los Angeles, CA 90024-1620 (310-825-9708).

If you are interested in obtaining instructional credentials for California elementary and secondary schools, consult the Graduate School of Education and Information Studies, 1009 Moore Hall (310-825-8328).

## Undergraduate Study

### Admission

In addition to the University of California Undergraduate Application, departments in the School of the Arts require auditions, portfolios, or evidence of creativity. Detailed information on departmental requirements is mailed to you on receipt of your application. Deadline date for applications is November 30, 1994, for admission in Fall Quarter 1995.

### The Study List

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After your first term, you may petition to carry more than 17

\*In response to budget constraints, Chancellor Young has proposed a restructuring of several of UCLA's professional schools. The current proposal calls for the Architecture and Urban Design Department to be transferred into a newly formed School of the Arts and Architecture. If adopted, this proposal would be effective as of July 1, 1994. All degrees associated with current programs would continue to be offered.

### Majors and Degrees Offered

Art .....	B.A., M.A., M.F.A.
Dance .....	B.A., M.A., M.F.A.
Dance/Movement Therapy .....	M.A.
Design .....	B.A., M.A., M.F.A.
Ethnomusicology .....	B.A., M.A., C.Phil., Ph.D.
Music .....	B.A., M.A., M.F.A., C.Phil., Ph.D.
World Arts and Cultures .....	B.A.

units (up to 20 units maximum) if you have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If you have not filed your Study List by the end of the second week of classes, you must obtain the consent of the Student Services Office to continue for that term.

### Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

### Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

## Requirements for Bachelor of Arts Degrees

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

### University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see "Undergraduate Degree Requirements" in Chapter 2 of this catalog.

School of the Arts students enrolled in English as a Second Language 33A, 33B, 33C, 35 must take the courses for a letter grade.

## School Requirements

The general requirements of the School of the Arts must be completed with a grade-point average of 2.0 or better.

### General Education (GE) Course Requirements

#### Reciprocity with Other UC Campuses —

Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the School of the Arts general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to the Student Services Office, School of the Arts, 1100 Dickson Art Center, UCLA, Los Angeles, CA 90024-1620.

#### Intersegmental General Education Transfer Curriculum (IGETC) —

Transfer students from California community colleges have the option to fulfill UCLA's lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all of UCLA's general education requirements are fulfilled when you complete it. If you select the IGETC, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the School of the Arts general education requirements.

#### English Composition and Rhetoric

English 3 with a minimum grade of C should be completed by the end of your freshman year and may not be taken on a Passed/Not Passed basis.

### Critical Reading and Writing

One course from English 4, \*Humanities 2A, 2B, or 2C with a minimum grade of C should be completed by the end of your sophomore year and may not be taken on a Passed/Not Passed basis.

### Foreign Language

You may meet this requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language examination in French, German, or Spanish, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA's level three or above with an average grade of C or better.

International students may petition to use an advanced course in their native language for this requirement. Students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

### Mathematics

One course (four units) in mathematics or statistics or an introductory course in computers selected from Mathematics 1, 2, 3A, 3B, 3C, 5, 31A, 31B, Program in Computing 1, 10A, 10B, 10C, Statistics 50.

### Science

Two courses (eight units) from different departments in physical or biological sciences selected from Anthropology 7, 10, 12, 15, Astronomy 2A, 2B, 3, 4, 5, 6, 81, 82, Atmospheric Sciences 2, 3, 4, 5, 6, Biology 2, 5, 5L, 6, 9, 10, 13, 21, 25, 30, 40, 50, 70, 80, Chemistry and Biochemistry 2, 11A, 11B, 15, Earth and Space Sciences 1, 2, 5, 8, 9, 15, 16, 17, Geography 1, 2, 5, Microbiology and Molecular Genetics 6, 7, Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A, 8B, 8C, 10, Physiological Science 3, 5, 6, 13, Psychology 15.

### Social Sciences

Three courses (12 units), with at least one from each group:

**Group A** — Economics 1, 2, 5, History 1A, 1B, 1C, 3A through 3D, 4, 5A, 5B, 6A, 6B, 6C, 7A, 7B, 8A, 8B, 8C, 9A through 9D, 10A, 10B, 11A, 11B, Political Science 10, 20, 30, 40, 50.

**Group B** — Afro-American Studies M5, Anthropology 8, 9, 33, Chicana and Chicano Studies 10B, Geography 3, 4, Psychology 10, 11, Social Sciences 20, Sociology 1, 2, 3, 4, M5, 31, Women's Studies 10.

### Humanities

Three courses (12 units), with at least one course in three of the four groups:

**Group A — Arts** — Art History 50, 51, 54, 55A, 55B, 56A, 56B, 57 (except art and design majors), Classics 51, Dance 128, 132A, C133, 134A, 134B, 144, 181A through 181D, 182, 183, CM184, C187 (except dance majors), Design 161A through 161J (except art and design majors), Ethnomusicology and Systematic Musicology 20A, 20B, 20C, 106A, 106B, 106C, 108A, 108B, M110A, M110B, M111, 113, 115, 117, 118, 120A, 120B, 121, 123, M124, M126, 128, 130, CM132, 136A, 136B, 146, 147, 156A, 156B, 157, 158A, 158B, 158C, 160A, 174 (except music and ethnomusicology majors), Film and Television 106A, 106B, 106C, 107, 108, 110A, 110B, 110C, 112, 113, 114, 116, Music 15, 136A, 136B, 136C, 158 (except music and ethnomusicology majors), Musicology 2A, 2B, 13, 122, 133, 134, 135A, 135B, 135C (except music and ethnomusicology majors), Theater 101A, 101B, 101C, 102A through 102E, M103A through 103F, 104A, 104B, 104C, 105, 106, 107, 111A, 111B, 111C.

**Group B — Culture and Civilization** — Bulgarian 99, Chicana and Chicano Studies 10A, Chinese 50, Classics 10, 20, Folklore and Mythology 15, German 100A, 100B, 100C, Italian 42A, 42B, Japanese 50, Jewish Studies 10, Korean 50, Portuguese M42, M44, Romanian 99, Russian 99A, 99B, Slavic 99, Spanish M42, M44.

**Group C — Literature** — Classics 40, 41, English 10A, 10B, 10C, 70, 75, 80, 85, 90, 95A, 95B, 95C, 96, French 12, German 50A, 50B, Humanities 1A, 1B, 1C, 1D, 2A\*, 2B\*, 2C\*, Italian 50A, 50B, Portuguese 40A, 40B, Russian 25, Scandinavian 50, Spanish 60A, 60B, 60C, 61A, 61B, 61C, and selected upper division courses in English and in other language and literature departments.

**Group D — Philosophy/Religion** — Ancient Near East 130, Anthropology 156, Chinese 160, 175, Classics 88A, 145A, 145B, 166A, 166B, East Asian Languages and Cultures 60, Indic 175, Iranian 170, Islamics 110, Japanese 160, 161, 175, Jewish Studies 130, Korean 160, 175, Philosophy 1, 2, 4, 5A, 6, 7, 8, 9, 21, 22, 31, 32.

### Additional Upper Division Nonfield Requirements

In addition to the general education requirements, you are required to take a minimum of 12 upper division units unrelated to your major department/field. Courses that do not apply on this requirement are studio, performance, activity, independent study, debate, children's theater, creative dramatics, internships, production, workshop, and field studies courses. Consult your school counselor prior to enrollment.

### Unit Requirements

You must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Entrance Examination Board (CEEB) Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If you take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

You may petition to be reviewed for a double major on an individual basis. Contact the Student Services Office for an outline of criteria required.

### Residence Requirements

You are "in residence" while enrolled and attending classes at UCLA as a major in the School of the Arts. Of the last 45 units completed for the bachelor's degree, 35 must be earned in residence in the School of the Arts. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

### Major Requirements

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). All majors include both lower and upper division courses. Those listed under "Preparation for the Major" (lower division) must be completed before upper division major work is undertaken.

You must complete your major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major and must be recommended by the chair of your major department. All courses in your major department must be taken for a letter grade.

As changes in major requirements occur, you are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of the Arts may require a general final examination.

\*If Humanities 2A, 2B, or 2C is taken to meet the critical reading and writing requirement, it may not also be applied toward the humanities/literature requirement.

## Scholarship and Minimum Progress

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

**Minimum Progress** — You are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; you are placed on probation if you fail to pass these units. You are subject to dismissal if you fail to pass at least 32 units in three consecutive regular terms in residence.

## World Arts and Cultures

The interdepartmental major in world arts and cultures is open to students in both the School of the Arts and the College of Letters and Science. You enroll in the college or school of your choice and fulfill the general education requirements of that college or school. Counseling is available — consult Silvily Kessler Thomas in the World Arts and Cultures Office, 124 Dance Building. For details on the major, see the section later in this chapter.

## Honors

To receive **Dean's Honors** in the School of the Arts, you must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on your transcript for the appropriate term. You are not eligible for Dean's Honors in any given term if you receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

**Honors at graduation** are awarded to students with superior grade-point averages. To be eligible, you must have completed 90 or more units for a letter grade at the University of California. The current levels of honors and the requirements for each level are *cum laude*, an overall average of 3.604; *magna cum laude*, 3.693; *summa cum laude*, 3.809. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in your graduating year determine your eligibility.

## Counseling and Program Planning

The School of the Arts offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check sent to each student. Prior to registration and enrollment in classes, each new student is assigned to a counselor in

the major department. For further counseling information, contact the Student Services Office, School of the Arts, 1100 Dickson Art Center (310-206-3564).

## Graduate Study

The advanced degree programs offered in the School of the Arts provide graduate students with unique research opportunities when combined with special resources, such as the University Research Library, the special collections of the Arts and Music Libraries, and the University's exhibition and performance halls.

The School of the Arts cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Entertainment Management. Participating students serve term-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of the arts areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division. The Graduate Affirmative Affairs Office provides counseling, academic support, and financial assistance to ethnic minority students.

## Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. In general, samples of your work (dance or music audition, art portfolio, etc.) are required. Detailed information can be found in the departmental listings which follow.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

## Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings which follow for specific requirements and procedures.

## Art

1300 Dickson Art Center, (310) 825-3281

### Professors

Chris Burden, M.F.A.  
Henry T. Hopkins, M.A., *Chair*  
Adrian Saxe, B.F.A.  
Samuel Amato, B.F.A., *Emeritus*  
William J. Brice, *Emeritus*  
Raymond B. Brown, M.A., *Emeritus*  
Elliot J. Elgart, M.F.A., *Emeritus*  
Robert F. Heinecken, M.A., *Emeritus*  
Lee Mullican, *Emeritus*

### Associate Professors

Barbara Drucker, M.F.A.  
Roger Herman, M.F.A.  
Lari Pittman, M.F.A.  
Charles Ray, M.F.A.

### Assistant Professors

Paul McCarthy, M.F.A.  
Nancy Rubins, M.F.A.  
Patricia Wickman, M.F.A.

### Lecturers

Mark Durant, M.F.A.  
Anne Marie Karlsen, M.F.A.  
Don Suggs, M.F.A.

### Adjunct Assistant Professor

Luis Bermudez, M.F.A.

## Scope and Objectives

Art courses include painting and drawing, sculpture, printmaking, photography, new alternative media (which include performance, installation, video, and other nontraditional media), and ceramics. Students are introduced to diverse media and ideas in lower division courses and have the opportunity to specialize in upper division. Individual expression is encouraged in a general way for those who wish careers requiring art-related knowledge and in a specific sense for those who go on to careers as professional artists.

The Department of Art curricula lead to the Bachelor of Arts, Master of Arts, and Master of Fine Arts degrees. All programs benefit from the rich and varied art resources at UCLA and in the Los Angeles community.

## Bachelor of Arts Degree

### Preparation for the Major

*Required:* Art 1A, 1B, 11A through 11D, 31, 32, and one course from Art History 50, 51, 55A, 55B, 56A, 56B, 57.

### The Major

*Required:* A minimum of 13 upper division courses, including Art 100, 150, six courses from at least four of the following: 130, 133, 137, 140, 145, 147, one course from Art History 101A through C119B, and four art electives.

## Master of Arts Degree

### Admission

Students are admitted for Fall Quarter only. Regular admission requires a B.A. or equivalent and faculty consent following the annual review of creative work. Applicants must submit slides (maximum 20) or videotape (if applying to the video field) to the Counselor, Department of Art, 1300 Dickson, UCLA, Los Angeles, CA 90024-1615.

Provisional admission may be granted for work with faculty sponsors for three terms, pending reconsideration of regular admission.

### Major Fields or Subdisciplines

Drawing, painting, sculpture, photography, and alternative media. No limit to the variations, extent, or value of these designations is intended.

### Course Requirements

A minimum of 36 quarter units of art courses numbered 130 through 280 (or courses from other departments that may be recommended by your adviser or committee chair) is required, with a B average or better.

Within those 36 units, a minimum of 20 quarter units in the 200 series must be taken in your field of specialization, including four units of Art 276. In addition, four units of course 280 are required as part of the 36 units.

A minimum of 36 quarter units of art history, theory, and criticism in undergraduate and/or graduate study is required (including Art 280). Art history courses completed at the undergraduate level may be applied toward the 36-unit art history requirement but may not be applied toward the 36 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be applied toward the 36-unit art history requirement and toward the total units required for the degree. Subjects related to your special interest may be substituted by petition.

A total of eight units of Art 596 may be applied toward the 36 units required for the degree; four units may be applied toward the graduate course requirement.

### Comprehensive Examination Plan

Each degree is granted on the basis of the quality of work as demonstrated in the exhibition which accompanies the final comprehensive examination. The number of units of credit attained is irrelevant to this judgment.

A precluding review of work precedes the final comprehensive examination. The examination, usually oral, includes a formal exhibition of work and a document of vita, photo records of works, and a statement of the artist. The document is retained as property of the University.

## Master of Fine Arts Degree

### Admission

Students are admitted for Fall Quarter only. See "Admission" under the Master of Arts degree above.

The M.A. is not prerequisite to the M.F.A. but may be elected as your stated degree objective. Usually, however, students proceed directly to the M.F.A. as a terminal degree. The unit requirements applied to the M.A. do not apply to the M.F.A., with the exception of the accumulative art history units.

### Major Fields or Subdisciplines

Drawing, painting, sculpture, photography, and alternative media. No limit to the variations, extent, or value of these designations is intended.

### Course Requirements

A minimum of 72 quarter units of art courses numbered 130 through 280 is required, with a B average or better.

Within those 72 units, a minimum of 40 quarter units in the 200 series must be taken in your field of specialization, including four units of Art 276. In addition, eight units of course 280 are required as part of the 72 units.

A minimum of 40 quarter units of art history in undergraduate and/or graduate study is required (including Art 280). Art history courses completed at the undergraduate level may be applied toward the 40-unit art history requirement but may not be applied toward the 72 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be applied toward the 40-unit art history requirement and toward the total units required for the degree. Subjects related to your special interest may be substituted by petition.

A total of 12 units of Art 596 may be applied toward the 72 units required for the degree; four units may be applied toward the graduate course requirement.

### Comprehensive Examination Plan

Same as the plan offered for the Master of Arts degree, as noted above.

## Lower Division Courses

**1A. Drawing.** Studio, eight hours; five hours arranged. Course in basic drawing skills intended as preparation for work in a variety of media.

**1B. Sculpture.** Studio, eight hours; five hours arranged. Introduction to concepts and forms of contemporary sculpture to become familiar with tools and material to enable students to visually manifest their individual ideas. Presentation of work of contemporary artists.

**11A. Painting.** Studio, eight hours; five hours arranged. Enforced requisites: courses 1A, 1B. Basics of painting: introduction to technical procedures, tools, and materials. Discussion of fundamental conceptual and formal concerns.

**11B. Photography.** Studio, eight hours; five hours arranged. Enforced requisites: courses 1A, 1B. Fundamentals in technique, with emphasis on individual projects. Varied approaches, processes, and applications of the photographic medium within the context of art, supported by studies in theory, aesthetics, and history of photography.

**11C. Printmaking.** Studio, eight hours; five hours arranged. Enforced requisites: courses 1A, 1B. Introductory survey of various technical and conceptual concerns in a variety of printmaking media as preparation for more focused study in particular media at upper division level.

**11D. New Genres.** Studio, eight hours; five hours arranged. Enforced requisites: courses 1A, 1B. Introduction to projects in installation, performance, video, film, intermedia, and other nontraditional media and processes.

**11E. Ceramics.** Studio, eight hours; five hours arranged. Enforced requisites: courses 1A, 1B. Introduction to ceramic materials and processes, with emphasis on personal and cultural expression in ceramic media. Discussion of ceramics in contemporary artistic practice and social history of ceramic art.

Mr. Saxe

**31. Modernism.** Discussion, three hours. Survey of 20th-century European/American art, its antecedents, and its social and political context.

Mr. Hopkins

**32. Survey of Critical Thought.** Discussion, three hours. Overview of premodern, modern, and post-modern theory as reflected in critical writing and artistic practice, with emphasis on the 1940s to the present.

Mr. Hopkins

## Upper Division Courses

**100. Issues in Contemporary Art.** Discussion, three hours. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Selected topics in theoretical, critical, aesthetic, and historical studies and their relevance to practicing artists. May be repeated for a maximum of 16 units.

**130. Advanced Drawing.** Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Drawing as both an independent expressive medium and as a means of visualization. May be repeated for a maximum of 16 units.

**133. Advanced Painting.** Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Varied media and subjects to further develop students' technical and expressive means to implement their ideas. May be repeated for a maximum of 16 units.

Ms. Drucker, Mr. Herman

**137. Advanced New Genres.** Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Emphasis to be selected by faculty from one or more of the following media: installation, performance, video, film, other nontraditional media and processes. May be repeated for a maximum of 16 units.

Mr. Burden, Mr. McCarthy

**140. Advanced Printmaking.** Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Selected studies in fine printmaking, historical and contemporary: woodcut, etching and engraving, lithography, silk screen, mixed media. May be repeated for a maximum of 16 units.

Ms. Karlson

**145. Advanced Sculpture.** Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Selected studies in sculpture, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units.

Mr. Ray, Ms. Rubins

**147. Advanced Photography.** Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Selected projects in photography and related media, concentrating on development of individual students' artwork. Studio emphasis with special topics in theory and critical analysis. May be repeated for a maximum of 16 units. Mr. Durant

**148. Advanced Ceramics.** Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11E, 31, and 32, or consent of instructor. Selected studies in ceramics, with emphasis on individualized creative experimentation with materials and techniques introduced in course. Methods and processes to be selected from a range of possibilities, including handforming and modeling, preparation and use of molds, slipcasting, and use of potter's wheel. May be repeated for a maximum of 16 units. Mr. Saxe

**150. Senior Studio.** Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor, senior standing. Advanced studio projects, with emphasis on analysis and criticism of individual creative work and ideas. May be repeated once for credit.

**197. Honors Course.** Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 GPA in major, consent of instructor, junior or senior standing. Individual studies for majors. May be repeated once for credit.

**199. Special Studies in Art (2 to 8 units).** Hours to be arranged. Prerequisites: 3.0 GPA in major, consent of instructor, senior standing. Individual studies for majors. May be taken for a maximum of eight units.

## Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

**271. Painting (2 to 8 units).** Studio, eight hours. Study in painting and associated media. Ms. Drucker, Mr. Herman

**272. Graduate Printmaking (2 to 8 units).** Studio, eight hours. Studies in traditional and experimental printmaking. Selected studies in intaglio, lithograph, woodcut, silk screen, photo printmaking, and mixed media. Ms. Karlson

**273. Graduate Sculpture (2 to 8 units).** Studio, eight hours. Studies in sculpture with specific attention to ongoing nature, specificity, and approach to each student's particular discipline. Individual studio visits and consultation. Mr. Ray, Ms. Rubins

**274. Photography (2 to 8 units).** Studio, eight hours. Studies concentrating on development of individual students' artwork. Studio emphasis with adjacent studies in theoretical and critical analysis. Specific attention to original, expressive, social, and humanistic values of art. Mr. Durant

**275. New Genre (2 to 8 units).** Studio, eight hours. Prerequisite: consent of instructor. Studies in alternative media, including installation, performance, video, film, and other nontraditional media and processes. Mr. Burden, Mr. McCarthy

**276. Graduate Group Critique.** Discussion, four hours; tutorial, to be arranged. Group critique/discussion of students' research. Additional tutorial meetings by arrangement with instructor. May be repeated for credit.

**277. Graduate Ceramics (2 to 8 units).** Studio, eight hours. Prerequisite: consent of instructor. Studies in ceramics and art with investigation of traditional and experimental processes and intellectual approaches to art practice utilizing ceramic media. Emphasis on development of a significant body of original work reflecting student's expressive and theoretical concerns. May be repeated for credit. Mr. Saxe

**280. Graduate Seminar: Art.** Discussion, three hours. Advanced topics in critical theory and study of contemporary art, with emphasis on individuals, issues, and methodologies. Possible areas of study from structuralism, deconstruction, feminist and psychoanalytic theory, commodification, and censorship. May be repeated for credit.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisite: consent of instructor.

The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

## Dance\*

124 Dance Building, (310) 825-3951

### Professors

Irma Dosamantes Beaudry, Ph.D.  
Elsie Dunin, M.A.  
Judy Mitoma, M.A., *Chair*  
Emma Lewis Thomas, Ph.D.  
Pia Gilbert, *Emerita*  
Alma M. Hawkins, Ed.D., *Emerita (Distinguished Teaching Award)*  
Carol Scothorn, M.A., *Emerita*  
Marion Scott, *Emerita*  
Doris Siegel, *Emerita*  
Allegra Fuller Snyder, M.A., *Emerita*

### Associate Professor

Angelia Leung, M.A., C.M.A.

### Assistant Professors

Pat Catterson  
Colin Quigley, Ph.D.

### Lecturer

Kevin Ritter, M.F.A.

### Visiting Professors

Dan Wagoner  
Rebecca Wright

### Visiting Associate Professor

Maria-Isabel H. Miranda, M.A.

\*The faculties of the Department of Dance and the Interdepartmental Program in World Arts and Cultures have proposed a merger of the two units into a new department. If adopted, the proposal might be in effect as early as January 1, 1995. Degrees associated with current programs would continue to be offered; however, some revisions to several current degree programs are pending approval. Call (310) 825-9708 for further information.

## Adjunct and Visiting Assistant Professors

Stephen Bennett, *Visiting*  
Janis Brenner, *Visiting*  
Ronald Brown, *Adjunct*  
Pamela Fairweather, M.A., *Visiting*  
Judith Gantz-Siegel, M.A., C.M.A., *Visiting*  
David Gere, *Visiting*  
Deidre Sklar, Ph.D., *Visiting*  
Linda Yudin, M.A., *Visiting*

## Scope and Objectives

The UCLA Department of Dance, the oldest public university dance program in the country, has earned an international reputation for its commitment to an integration of theory and practice from a global perspective. Independence, artistic freedom, and intellectual rigor are developed through the body of knowledge in dance.

The exploration of dance in all its manifestations forms the basis of the innovative UCLA dance curriculum. Through this broad-based approach, students can select studio classes from a variety of forms, including modern dance, ballet, tap, jazz, choreography, improvisation, and selected idioms from other cultural traditions such as West African, Spanish/flamenco, Indian/Bharata Natyam, Indonesian/Javanese and Balinese, and Polynesian/ancient Hawaiian hula, as well as historical forms such as baroque and Renaissance dance. Theoretical courses in dance history, ethnology, movement therapy, aesthetics, and education provide a conceptual framework in which to understand dance in this country and the world. In addition, notation, Laban movement analysis, anatomy, and kinesiology provide tools for the analysis of dance. The interdisciplinary nature of dance is encouraged through courses in music, video, lighting/scenic design, and costuming and is further complemented by innovative courses in multimedia performance art workshops and collaborative interdepartmental projects.

Students are encouraged to participate in the design of their programs and draw on the rich resources of the University. There are numerous departmental performance activities, such as the UCLA Dance Company, Repertory Touring Group, Pau Hana, UC Dance Theater, and senior, M.A., and M.F.A. concerts. The department also sponsors symposia, forums, and guest lectures.

Guest artists are a key feature of the department, allowing students to study with practicing professionals. Renowned dancers, choreographers, and companies such as the Alvin Ailey American Dance Theater, Paul Taylor Dance Company, Meredith Monk, David Gordon, and Urban Bush Women frequently offer special workshops, lectures, open rehearsals, and extended artists-in-residencies.

UCLA offers the Bachelor of Arts degree in Dance, with options for technical training and theoretical studies. The graduate program awards a Master of Arts in Dance, a Master of Arts in Dance/Movement Therapy, and a Master of Fine Arts in Dance.

## Bachelor of Arts Degree

The dance major offered through the School of the Arts leads to the Bachelor of Arts degree. Students who wish to confer with the departmental counselor regarding program planning and major requirements should contact Wendy Temple, Student Affairs Officer, in the department office.

### Preparation for the Major

*Required:* Twenty-four units of lower division coursework, including Dance 6, 7A-7B-7C, 11A through 11F, 20, 25, 48 (must be taken twice), 70 (or departmentally approved alternative).

### The Major

*Required:* A total of 66 units of upper division coursework, including Dance 100A-100B-100C, C120, 123A, 123B, 132A, 134A-134B, 141, 144, 148, 149, 196, and 12 units selected from one of the following clusters: (1) choreography/performance (courses 113A, 113B, 142, 145, six units of advanced studio); (2) analysis, documentation, and media (courses 125, 126, C180A, C180B); (3) critical studies (courses C132B, C133, C180A, C180B, 181A through 181D, 182, 183, CM184, C187); (4) applied studies (courses 123C, 151, 152, 153, C160A, C160B, C160C).

Admission to the upper division major is determined by a screening and evaluation conducted during Spring Quarter of your sophomore year. All entering students audition for placement in technique and choreography classes.

## Master of Arts in Dance

### Admission

A bachelor's degree with an undergraduate major in dance or equivalent experience is required. Some of this experience may have been gained outside the academic setting through intensive workshops, summer sessions, and performance and professional work. In addition to that used by UCLA Graduate Application Processing, the department has its own application process which requires three letters of recommendation, an interview, and an audition.

In the audition faculty members look at your technical proficiency and creative potential. Special attention is given to the creative aspects of dance. Because the department recognizes the importance of diversity and specialization at the graduate level, you are evaluated according to your primary focus (education, therapy, ethnology, or history).

Prospective students may write to the Department of Dance, 124 Dance Building, UCLA, Los Angeles, CA 90024-1608, for departmental brochures which give additional information on the graduate program.

### Foreign Language Requirement

There is no foreign language requirement. However, fieldwork in dance ethnology and dance history may require working knowledge of the language of your research area.

## Course Requirements

A minimum of 36 units is required, including nine courses (or more depending on your specialty), distributed as follows: (1) Dance 230; (2) four courses (16 units) in the department at the graduate level (200 series); (3) four courses (16 units) in or outside the department at the upper division or graduate level. Studio courses (techniques in modern dance, ballet, or world dance) and courses taken to fulfill prerequisites may not be applied toward degree requirements.

Eight units of 500-series courses (596A, 596R, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement.

Depending on your area of focus, certain sequences of study, developed with the guidance and advice of the graduate adviser, lead to knowledge and depth in that area and produce a viable program to meet your objectives and goals.

While fieldwork is not a requirement for those specializing in the area of dance ethnology, it is strongly suggested as part of that program.

### Teaching Experience

Teaching experience is not a requirement for the degree. It is highly recommended, however, for those who intend to teach in their area of specialization. A number of teaching assistantships are available through the department.

### Thesis Plan

If you select the thesis plan, you must obtain approval of the subject from a graduate faculty panel by your fifth term. Your written proposal is presented and defended before the faculty panel. After the thesis plan is accepted, a thesis committee is formed. The thesis is the result of your original research or creative work.

### Comprehensive Examination Plan

If you select this plan, you must obtain approval from a graduate faculty panel by your sixth term. Your written proposal is presented and defended before the faculty panel. After the plan is accepted, a comprehensive examination faculty committee is formed. The examination, administered by this committee, consists of three written questions and an oral section. Each committee member grades all questions. In order to pass, each question must be graded pass or better. If any questions are failed, you may retake the failed portion(s) once only.

## Master of Arts in Dance/Movement Therapy

An M.A. in Dance/Movement Therapy is required for registry as a therapist with the American Dance Therapy Association (ADTA).

### Admission

In addition to the requirements listed above under the M.A. in Dance, an undergraduate course in abnormal psychology is required. Other courses in psychology (developmental, person-

ality, and group dynamics) are highly recommended.

### Course Requirements

A total of 70 units is required, distributed as follows: (1) Dance 230; (2) 50 units in the department at the graduate level; (3) 16 units in or outside the department at the upper division or graduate level. Studio courses (techniques in modern dance, ballet, or world dance) and courses taken to fulfill prerequisites may not be applied toward degree requirements.

These course requirements are to be partially fulfilled by Dance 225A-225B, C260A-C260B-C260C, 261A-261B-261C, 262A-262B-262C, 460A-460B-460C, 596A, 596R.

During your second year, you are required to serve an internship within a clinical facility, which provides an opportunity to work with one of a variety of clinical populations.

### Thesis Plan

If you select the thesis plan, you must obtain approval of the subject from a graduate faculty panel by your fifth term. Your written proposal is presented and defended before the faculty panel. After the thesis plan is accepted, a thesis committee is formed. The thesis is the result of your theoretical, clinical, or empirical work.

### Comprehensive Examination Plan

If you select this plan, you must obtain approval from a graduate faculty panel by your sixth term. Your written proposal is presented and defended before the faculty panel. After the plan is accepted, a comprehensive examination faculty committee is formed. The examination, administered by this committee, consists of three written questions and an oral section. Each committee member grades all questions. In order to pass, each question must be graded pass or better. If any questions are failed, you may retake the failed portion(s) once only.

## Master of Fine Arts in Dance

### Admission

In addition to that used by UCLA Graduate Application Processing, the department has its own screening procedure which requires three letters of recommendation, an audition, and a personal interview. M.F.A. applicants must demonstrate exceptional promise in either choreography (modern) or performance (modern, world, or historical). Auditioners in choreography show three original works; auditioners in performance present three selections already in their repertory. You are required to prepare a statement (no more than one page) describing the works shown.

### Foreign Language Requirement

There is no foreign language requirement. However, if you are a performer, it is recommended that you have working knowledge of the language of the culture in which you are specializing.

## Course Requirements

A total of 96 units is required as follows: at least 24 units at the 400 level, including Dance 441 and 490, and at least 32 units at the 200 level, including 221, 230, and 240A through 240D (with approval of your adviser, you may substitute a course from ethnomusicology in the music of your cultural area for course 221). Only four units of 500-level courses may be applied toward the degree. You must enroll in a studio class (performance, technique, repertory) every term except while in an internship or during your final term.

## Comprehensive Examination

You prepare a major concert in your third year, or a series of concerts in your second and third years. A series of presentations and evaluations serve as the process for advancement toward degree completion. An oral defense of the concert material is held with the comprehensive examination committee and production staff. A written production book with visual materials and a concept paper are turned in after the performance.

## Lower Division Courses

**1A-1B-1C. Fundamentals of Modern Dance (2 units each).** (Formerly numbered 1A-1F.) Laboratory, four hours. Designed for nondance majors. Courses should be taken in sequence. Study of dance technique, improvisation, and choreography. Critical viewing, reading, and discussion of modern dance artists' works. Each course may be repeated once. P/NP or letter grading. (F,W)

**6. Fundamentals of Ballet (2 units).** (Formerly numbered 6F-6W-6S.) Laboratory, four hours. Study of ballet techniques and principles, including dance terminology. May be repeated twice; only two units may be applied toward the major. P/NP or letter grading. Ms. Wright (F,W,Sp)

**7A-7B-7C. Beginning Ballet (2 units each).** (Formerly numbered 7F-7W-7S.) Laboratory, four hours. Limited to dance majors. Study of beginning ballet techniques and principles, including dance terminology. Only two units may be applied toward the major. P/NP or letter grading. Ms. Wright (F,W,Sp)

**10. Introduction to Dance (2 units).** Introduction to the many and varied theoretical aspects of dance as a discipline.

**11A-11F. Modern Dance Technique and Choreography (2 units each).** Lecture, one hour; studio, three hours. Limited to dance majors. Experiences designed to achieve beginning to intermediate levels of kinesthetic awareness and technical and improvisational skills, as well as understanding of the creative process of structure and form in dance compositions. Ms. Catterson, Ms. Leung (F,W,Sp)

**20. Music Analysis for Dance (2 units).** Lecture, two hours; laboratory, one hour. Study of elements of music, music structures, and their relationship to dance, with emphasis on rhythmic analysis, dance accompaniment, and teacher/accompanist roles. (F)

**23L. Laboratory in Conditioning for Dancers (2 units).** Laboratory, four hours. Specific conditioning principles applied to strengthening, stretching, and endurance training. Personalized attention enables students to increase their ability to dance more efficiently and to prevent dance injuries. P/NP grading. (F,W,Sp)

**25. Introduction to Dance/Movement Notation (2 units).** (Formerly numbered 25A.) Lecture, two hours; laboratory, one hour. Beginning skills in observing, analyzing, reconstructing, and recording dance/movement based on principles of the labanotation and labananalysis systems.

**40. Introduction to Dance Theater (2 units).** Lecture, two hours; laboratory, two hours. Introduction to practical and aesthetic perspectives on theater space, as well as basic aspects of scene, lighting, costume, and sound design technology for dance production.

**48. Laboratory in Dance Production (1 unit).** Laboratory, two hours. Realization of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. Must be repeated once in another year. P/NP grading. Mr. Pressner (Sp)

**70. Survey of Dancing in Selected Cultures (2 units).** Studio, three hours. Introduction to dances and their movement characteristics in Western and non-Western cultures. Mrs. Dunin, Mr. Quigley (F)

**71B. Dance of Indonesia (2 units).** Studio, three hours. Dance experience not required. Introduction to technique and repertory of dance traditions (e.g., Java, Bali, Sunda). Ms. Mitoma (W)

**71C. Dance of Japan (2 units).** Studio, three hours. Dance experience not required. Technique and repertory from the court dance tradition (e.g., Gagaku).

**71D. Dance of India (2 units).** Studio, three hours. Dance experience not required. Introduction to dance in India, with emphasis on a particular tradition (e.g., Bharata Natyam). (F)

**71E. Dance of Korea (2 units).** Studio, three hours. Dance experience not required. Technique and repertory of a selected dance tradition (e.g., Korean classical and folk).

**72B. Dance of West Africa (2 units).** Studio, three hours. Dance experience not required. Introduction to technique and repertory of a selected region (e.g., Ghana, Guinea, Nigeria).

**73B. Dance of Mexico (2 units).** Studio, three hours. Dance experience not required. Introduction to forms and styles in dances of several ethnographic regions. Emphasis on identifying dance characteristics through actual dancing. Ms. Miranda (F)

**74C. Dance of Spain (2 units).** Studio, three hours. Dance experience not required. Technique and repertory of dances from selected ethnographic regions. (F)

**74D. Dance of Anglo- and Celtic-American Tradition (2 units).** Laboratory, four hours. Introduction to technique and repertory of vernacular dance traditions of the British Isles and their derivatives in North America. P/NP or letter grading. Mr. Quigley

**76B. Dance of Israel (2 units).** Studio, three hours. Dance experience not required. Technique and repertory from selected ethnographic regions.

**79A-79Z. Dance of a Selected Culture (2 units each).** Laboratory, four hours. Introduction to selected dance forms from a culture area or historical period or of a particular dance genre. P/NP or letter grading.

**80A-80B. Movement as Cultural Behavior (2 units each).** Studio, three hours. Limited to world arts and cultures majors. Studio/laboratory examination of individual and cultural factors which affect expressive movement in cultures. Experimental classes which enhance kinesthetic and movement awareness of self and others through cultural perspective. Ms. Mitoma, Mr. Quigley (W,Sp)

## Upper Division Courses

**100A-100B-100C. Modern Dance: Intermediate Technique and Choreography.** Lecture, three hours; laboratory, four hours. Prerequisite: course 11F. Limited to dance majors. Intermediate to advanced levels of technical skill emphasizing musicality, spatial awareness, and movement complexity. Choreographic assignments include use of composed music, group forms, and stage space. (F,W,Sp)

**101A-101B-101C. Intermediate Modern Dance Technique (2 units each).** Lecture, two hours; laboratory, two hours. Technique levels II and III. Emphasis on increasing technical skill. Each course may be repeated once. Mr. Brown, Ms. Catterson (F,W,Sp)

**C102A-C102B-C102C. Advanced Modern Dance Technique (2 units each).** Laboratory, four and one-half hours. Prerequisite: course 101C or consent of instructor. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. Each course may be repeated for a maximum of six units. Concurrently scheduled with courses C402A-C402B-C402C. P/NP or letter grading. Mr. Brown, Ms. Catterson (F,W,Sp)

**103. Improvisation in Dance (2 units).** Studio, four hours. Prerequisite: dance major or consent of instructor. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and projection. May be repeated twice. Ms. Leung (W)

**106A-106B-106C. Intermediate Ballet (2 units each).** Laboratory, four hours. Prerequisites: courses 7A-7B-7C or consent of instructor. Study of techniques and principles of ballet, including phrasing, combinations, and repertory. Each course may be repeated once. P/NP or letter grading. Ms. Wright (F,W,Sp)

**C107A-C107B-C107C. Advanced Ballet (2 units each).** Laboratory, four and one-half hours. Prerequisite: course 106C or consent of instructor. Advanced technique in ballet, with emphasis on performing skills. Each course may be repeated for a maximum of six units. Concurrently scheduled with courses C407A-C407B-C407C. P/NP or letter grading. Ms. Wright (F,W,Sp)

**113A-113B-113C. Advanced Modern Dance: Performance and Choreography (2 units each).** Studio, two hours; rehearsal, two hours. Prerequisite: course 100C. Improvisation and choreographic study leading to independent work in solo and group forms. Development of performance, direction, and production skills culminating in a presentation. Ms. Leung (F,W,Sp)

**114. Form and Structure in Choreography.** Lecture, one hour; laboratory, three hours. Prerequisite: dance major or consent of instructor. Study of craft of choreography. Emphasis on breath movement, phrasing, ABA, theme and variations, rondo. Learning to discipline and shape creative impulse into specific forms, with emphasis on staging.

**C120. Music as Dance Accompaniment.** Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation for dance. Choreographer/composer relationships. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C220. (W)

**122. Movement Theories: Variable Topics (2 units).** Lecture, two hours; laboratory, two hours. Study of motor coordination patterns as related to expressive movement features for dance performance. Personalized attention and use of video to increase students' stylistic diversity. Development of movement efficiency for prevention of dance injuries. May be repeated twice. P/NP or letter grading. Ms. Gantz-Siegel (W)

**123A. Anatomy for the Dancer.** Prerequisite: course 11F or consent of instructor. Study of human muscular-skeletal system as related to dance. Ms. Gantz-Siegel (F)

**123B. Principles of Conditioning and Correctives for Dance.** Prerequisite: course 123A. Study of biological and physical principles of human movement as related to dance. Prevention and care of dance injuries. Ms. Gantz-Siegel (Sp)

**123C. Projects in Dance Kinesiology.** Prerequisite: course 123B. In-depth study of selected topics introduced in courses 123A and 123B. Ms. Gantz-Siegel

**125. Principles of Movement Analysis: Laban-analysis.** Lecture, two hours; laboratory, two hours. Prerequisite: course 25. Basic principles of laban-analysis. Emphasis on experiential understanding of movement through study of motion factors and elementary concepts of spatial dynamics. Focus on qualitative area of movement to further comprehension of dance as a creative art form. Ms. Gantz-Siegel (W)

**126. Principles of Movement Analysis: Labanotation.** Lecture, two hours; laboratory, two hours. Prerequisite: course 25. Developing skills in reading, writing, reconstructing, and score preparation of complex movement. Mrs. Dunin, Ms. Leung

**C127. Production Techniques for Dance/Video.** Lecture, one hour; laboratory, three hours. Experiential dance/video workshop concentrating on effective techniques of shooting, as well as choreographing movement especially for the camera. Choreographers/dancers and camerapeople/technicians with dance experience collaborate to establish a common vocabulary, set of values, and sensitivity to each other's concerns. Concurrently scheduled with course C227. Undergraduates required to complete short self-designed, edited video work as final project. Ms. Kaplan (W,Sp)

**128. Dance and the Visual Media.** (Formerly numbered 249.) Examination of aesthetic differences between dance, film, and video and exploration of the new aesthetic when they are combined. Analysis of the record and documentary dance film, choreo-cinema, and impact of MTV, as well as integration of media with performance. Ms. Kaplan (F)

**132A-C132B. Philosophical Bases and Trends in Dance (4 units, 2 units).** Course 132A is prerequisite to C132B. Critical analysis of dance as a creative experience and role of professional and educational dance in our society. Study of present-day concepts and their relationships to other art forms and cultures. Course C132B is concurrently scheduled with C231B. (F,W)

**C133. Baroque Dance: Analysis and Re-creation.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 134A-134B or equivalent experience, consent of instructor. Analysis and re-creation of 17th- and 18th-century dance as recorded in dance notation of the era. Study of cultural context, aesthetics, style, music. Social and theatrical dance forms. Concurrently scheduled with course C233.

**134A-134B. History of Dance in Culture and Performance.** Lecture, two hours; discussion, one hour; laboratory, one hour. P/NP or letter grading:

**134A.** Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics from traditional and recent research in world dance. (F)

**134B.** Prerequisite: course 134A or consent of instructor. Development of dance in Western culture as point of departure for study of world dance. Focus on contemporary expression in Europe and the U.S., tracing roots in mythological, religious, courtly, and popular dance. Topics from world dance traditions. (W)

**141. Lighting Design for Dance Theater.** Lecture, four hours; laboratory, two hours. Prerequisite: course 11F or consent of instructor. Lighting for dance: examination of aesthetics, principles, and technical elements. Application to selected choreographies to be publicly performed. Mr. Pressner (W,Sp)

**142. Advanced Studies in Dance Theater Lighting (2 or 4 units).** Lecture, four hours; laboratory, four or more hours. Prerequisite: course 141 or consent of instructor. Analysis of diverse dance theater lighting problems at advanced level and individual development of creative solutions. May be taken for a maximum of four units. Mr. Pressner (Sp)

**144. Costume and Scenic Design Concepts for Dance Theater.** Prerequisite: course 11F or consent of instructor. Study of theory for conceptualizing dance performance environments, communication through visual elements, artistic properties of costume and sets media, and procedures for producing dance costumes and sets in order to facilitate choreographer/designer communication. Mr. Ritter (F)

**145. Advanced Dance Costuming.** Lecture, three hours; laboratory, six hours. Prerequisite: course 144 or consent of instructor. Theory of dance costume construction as it relates to design intent; enhancement, accommodation, and impact on movement. Choice of textiles, construction methodology, fabric modification, and accessories. Laboratories include dance design projects currently in production. Mr. Ritter

**148. Advanced Laboratory in Dance Production (1 unit).** Laboratory, two hours. Prerequisites or corequisites: courses 141 and 144, or consent of instructor. Further development and application of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. May be repeated once. P/NP grading. Mr. Pressner (Sp)

**149. Dance Performance Practicum (1 unit).** Laboratory, four hours. Dancing in selected choreography or repertory in performance. May be repeated for credit. P/NP grading. (F,W,Sp)

**151. Foundations of Dance Education.** Lecture, two hours; laboratory, three hours. Prerequisite: dance major or consent of instructor. Introduction to movement concepts, skills, and teaching principles for modern dance instruction. Supervised teaching practicum included. Ms. Gantz-Siegel, Ms. Leung (F)

**152. Dance as Culture in Education.** Lecture, two hours; laboratory, two hours. Prerequisite: course 70 or consent of instructor. Theoretical and practical aspects of teaching ethnic dance, especially in higher education. Mrs. Dunin (F)

**153. Creative Dance for Children.** Lecture, three hours; laboratory, one hour. Prerequisite: dance major or consent of instructor. Introduction to movement concepts, skills, and principles for teaching children's dance; emphasis on dance as a creative medium of expression. Ms. Leung (Sp)

**C160A-C160B-C160C. Group Dynamics and Process (2 units each).** (Formerly numbered 160.) Lecture, one hour; laboratory, three hours. Prerequisite: consent of instructor. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Courses must be taken in sequence. Concurrently scheduled with courses C260A-C260B-C260C. P/NP or letter grading. Ms. Dosamantes Beaudry (F,W,Sp)

**C171B. Dance of Indonesia (2 units).** Studio, three hours. Prerequisite: course 71B or consent of instructor. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sunda). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471B. Ms. Mitoma (Sp)

**C171C. Dance of Japan (2 units).** Studio, three hours. Prerequisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471C.

**C171D. Dance of India (2 units).** Studio, three hours. Prerequisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471D.

**C171E. Dance of Korea (2 units).** Studio, three hours. Prerequisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471E.

**C172B. Dance of West Africa (2 units).** Studio, three hours. Prerequisite: course 72B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C472B.

**C173B. Dance of Mexico (2 units).** Studio, three hours. Prerequisite: course 73B. Dance techniques of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C473B. Ms. Miranda (W,Sp)

**C174C. Dance of Spain (2 units).** Studio, three hours. Prerequisite: course 74C. Techniques and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C474C.

**174D. Dance of Anglo- and Celtic-American Tradition (2 units).** Laboratory, four hours. Prerequisite: course 74D or consent of instructor. Technique and repertoire of vernacular dance traditions of the British Isles and their derivatives in North America. May be repeated for credit. P/NP or letter grading. Mr. Quigley

**C176B. Dance of Israel (2 units).** Studio, three hours. Prerequisite: course 76B. Technique and repertory from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C476B.

**C179A-C179Z. Dance of a Selected Culture (2 units each).** Laboratory, four hours. Prerequisite: consent of instructor. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with courses C479A-C479Z. P/NP or letter grading.

**C180A-C180B. Studies in Dance Ethnography.** Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and development of skills. Concurrently scheduled with courses C279A-C279B. **C180A.** Labanotation and Labananalysis. Lecture, two hours; discussion, two hours; laboratory, two hours. **C180B.** Notation. Prerequisite: course C180A or consent of instructor. Mrs. Dunin, Mr. Quigley (F,W)

**181A. Dance Cultures of Asia.** Introduction to dance cultures of Asia. How theories and practices of dance are influenced by historical and social factors and by ideological and aesthetic systems. Lectures illustrated with demonstrations, films, and slides.

**181B. Dance in Southeast Asia.** Prerequisite: course 181A or consent of instructor. Survey of selected ritual, social, and court dances of Indonesia, Cambodia, Thailand, and the Philippines. Social, historical, and aesthetic factors. Lectures illustrated with demonstrations, films, and slides.

**181C. Dance in East Asia.** Prerequisite: course 181A or consent of instructor. Survey of dances of Japan, China, and Korea and factors which have influenced their development and social function. Consideration of relationship of dance to other art forms. Lectures illustrated with demonstrations, films, and slides.

**181D. Dance in South Asia.** Prerequisite: course 181A or consent of instructor. Survey of dance forms in India and Sri Lanka. Factors influencing development of dance, its social function, and its relationship to other art forms. Lectures illustrated with demonstrations, films, and slides.

**182. Dance in Africa and the African Diaspora.** (Formerly numbered 182A.) Survey of dance in sub-Saharan cultures and their new world transformations, with consideration of role of dance in society, its cultural significance, and historical background. Emphasis on various African and African American cultures and genres.

**183. Dance in Latino American Cultures.** (Formerly numbered 183A.) Survey of dance in Latin America, with consideration of role of dance in society, its cultural significance, historical background, and relationship to other art forms. Emphasis on various Latino American cultures and dance genres. Ms. Miranda (F)

**CM184. Dance in European and Euro-American Cultures.** (Formerly numbered CM184D.) (Same as Folklore CM184.) Survey of social, ceremonial, and ritual European-based dance; consideration of role of dance in society, its cultural significance, and historical background. Emphasis on various European and European-American regional and national dance traditions. Concurrently scheduled with course CM284. Mrs. Dunin, Mr. Quigley (W)

**C187. Dance in Native American Cultures.** (Formerly numbered C187A.) Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C287.

**190. Projects in Dance (2 to 4 units).** Laboratory, four to six hours (one or two hours may be individualized consultation). Individualized major projects in choreography, performance, production, media. May be repeated for credit. P/NP or letter grading. (F,W,Sp)

**191. Repertory Dance Tour (2 or 4 units).** Lecture, two hours; rehearsal or performance, four to six hours. Prerequisite: dance major or consent of instructor. Creation and performance of dance concerts in the community, with special emphasis on problems of touring dance company with a variable repertory. Ms. Leung

**196. Senior Project (2 or 4 units).** Seminar, two hours; discussion, two hours, or laboratory, to be arranged. Prerequisites: course 100C, senior standing. Advanced project reflecting student's area of concentration. May be taken for a maximum of four units.

(W,Sp)

**C197A-C197Z. Selected Topics in Dance (2 to 4 units each).** (Formerly numbered 197A-197B.) Lecture, discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. Concurrently scheduled with courses C297A-C297Z.

**199. Special Studies in Dance (2 to 8 units).** Prerequisites: senior standing, consent of instructor.

## Graduate Courses

**211A-211F. Advanced Choreography.** Lecture, two hours; laboratory, two hours. Prerequisite: course 113C or equivalent. Theoretical aspects of advanced choreography for students who have reached the level of self-initiation of substantial creative works. Refinement and realistic self-evaluation; critical counsel by acknowledged choreographers.

Ms. Catterson, Ms. Leung (F,W,Sp)

**C220. Music as Dance Accompaniment.** Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation for dance. Choreographer/composer relationships. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C120. Graduate students must complete two additional assignments. May not be applied toward M.A. degree requirements.

(W)

**221. Music for Dance.** Prerequisite: course C120. Theory of aesthetic and functional relationship of music to dance.

(Sp)

**223. Principles of Dance Kinesiology.** Prerequisite: consent of instructor. Scientific basis for movement for dance. Study of anatomical, kinesiological, and physical principles and demands of dance.

Ms. Gantz-Siegel

**225A-225B. Theories of Movement: Labananalysis.** Lecture, two hours; laboratory, two hours. Theories of Laban movement analysis as means for analyzing and describing human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing.

Ms. Gantz-Siegel (W, 225A; Sp, 225B)

**226. Advanced Studies in Notation (2 units).** Prerequisite: course 126. Selected problems in directing from notated repertoire; principles of teaching, comparative notation systems, writing projects.

**C227. Production Techniques for Dance/Video.** (Formerly numbered 248.) Lecture, one hour; laboratory, three hours. Experiential dance/video workshop concentrating on effective techniques of shooting, as well as choreographing movement especially for the camera. Choreographers/dancers and camerapeople/technicians with dance experience collaborate to establish a common vocabulary, set of values, and sensitivity to each other's concerns. Concurrently scheduled with course C127. Graduate students expected to complete written papers related to reading and viewing assignments and final video project.

Ms. Kaplan (W,Sp)

**230. Research Methods and Bibliography in Dance.** Survey of methods for scholarly analysis of dance materials using systems from social sciences, physical sciences, and humanities.

**231A. Basic Issues in Dance and Dance Theory.** Prerequisite: course 100C. Issues common to specialization areas in the field of dance: movement, presentation and transformation, composition, contexts (such as historical, ritual, social, educational, therapeutic), documentation (notation, film, video), production, etc.

**C231B. Philosophical Bases and Trends in Dance (2 units).** Prerequisite: course 231A. Study of present-day concepts and their relationship to other art forms and cultures. Concurrently scheduled with course C132B. Evaluations of graduate students based on extended reading list and term papers.

**232. Aesthetics of Dance.** Analysis of aesthetic concepts and critical methods used in writing about dance.

**C233. Baroque Dance: Analysis and Re-creation.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 134A-134B or equivalent experience, consent of instructor. Analysis and re-creation of 17th- and 18th-century dance as recorded in Feuillet notation. Study of cultural context, aesthetics, style, music. Social and theatrical dance forms. Concurrently scheduled with course C133.

**234. Renaissance Dance: Analysis and Re-creation.** Lecture, two hours; studio, two hours. Prerequisites: courses 134A-134B or consent of instructor. Analysis and re-creation of study of 15th- and 16th-century dance styles from Domenico da Piacenza through Cesare Negri.

Mrs. Thomas

**235. History of Ballet.** Prerequisites: courses 134A-134B or consent of instructor. Development of ballet from 19th-century Romanticism to the present. Stylistic differences in Italy, France, England, Denmark, and Russia.

Mrs. Thomas

**236. Dance in the 20th Century.** Prerequisites: courses 134A-134B or consent of instructor. Seminar in historical development of 20th-century dance.

Mrs. Thomas

**240A. Production Arts Seminar.** Lecture, two hours; discussion, two hours; laboratory, two hours. Prerequisite: consent of instructor. Examination and research of dance and performer/audience relationships in various historic periods and cultural settings. Impact of different aesthetic/directorial approaches to theatrical production of dance. Exploration of selection of locale, style, aural and visual enhancements.

(F)

**240B. Production Arts Seminar.** Lecture, four hours; laboratory, to be arranged. Prerequisite: consent of instructor. Study of elements of design. Development of a vocabulary for analysis of dance movement and choreography. Communication among collaborating artists. Conceptualizing and producing the design and sound score for a dance production.

Mr. Pressner, Mr. Ritter (W)

**240C. Production Arts Seminar.** Lecture, four hours; laboratory, to be arranged. Prerequisite: consent of instructor. Examination of contemporary art world, including arts organizations, funding sources, legal aspects of arts production, support groups, public relations and publicity. Relationship of film and video to choreographer and dancer. Choreographing for film/video. Adapting stage works to film/video.

Ms. Leung (Sp)

**240D. Production Arts Seminar (2 units).** Lecture, three hours. Prerequisite: consent of instructor. Co-requisites: courses 441, 490. Topics from current problems of students preparing M.F.A. concert productions.

Ms. Leung (F)

**251A-251D. Advanced Studies in Dance Education.** Lecture, two hours; discussion, two hours. Prerequisite: course 151 or consent of instructor.

**251A.** Historical and Theoretical Framework for Dance Education. Development of a framework for teaching/learning process in dance and application to varied settings and populations.

**251B.** Theories and Methods. Examination of current theories of artistic intelligence, body education systems, motor learning, and creativity and how they are related to teaching dance, including analysis of traditional models for developing alternative methodologies.

**251C.** Curriculum Development in Varied Dance Settings. Issues include course/program/materials planning, development, implementation, and evaluation, with emphasis on analyzing underlying educational values affecting decision-making process.

**251D.** Dance Administration. Relation of theories and practice to dance settings, clarifying issues of hierarchical structures, chains of command, staffing, facilities, and budget and why and how dance courses/programs succeed or fail.

**C260A-C260B-C260C. Group Dynamics and Process (2 units each).** (Formerly numbered 260A-260B-260C.) Lecture, one hour; laboratory, three hours. Prerequisite: consent of instructor. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Concurrently scheduled with courses C160A-C160B-C160C. S/U grading.

Ms. Dosamantes Beaudry (F,W,Sp)

**261A-261B-261C. Dance/Movement Therapy: Theory and Practice.** Lecture, two hours; laboratory, two hours. Prerequisite: consent of instructor. Year-long sequence encompassing basic theoretical and practice concepts of field of dance/movement therapy.

Ms. Dosamantes Beaudry (F,W,Sp)

**262A-262B-262C. Seminars: Dance/Movement Therapy.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 261A-261B-261C. Year-long sequential dance/movement therapy seminars adopting a psychodynamic life-span developmental approach to clinical community work with ethnically diverse populations.

Ms. Fairweather (F,W,Sp)

**C279A-C279B. Studies in Dance Ethnography.** Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and development of skills. Concurrently scheduled with courses C180A-C180B. **C279A.** Labanotation and Laban-analysis. Lecture, two hours; discussion, two hours; laboratory, two hours. **C279B.** Notation. Prerequisite: course C279A.

Mrs. Dunin, Mr. Quigley (F,W)

**280A-280B. Advanced Studies in Dance Ethnology.** (Formerly numbered 280A-280D.) Corequisites: courses C279A-C279B or consent of instructor. Dance viewed as an aspect of culture and human behavior.

**280A.** Survey of literature of the field of dance ethnology and in related fields of anthropology, folklore, and performance studies. **280B.** Advanced studies in methodologies and training in fieldwork to develop dance-focused ethnographies with emphasis on ethnographic interview.

Mrs. Dunin, Mr. Quigley (F,W)

**CM284. Dance in European and Euro-American Cultures.** (Formerly numbered CM284D.) (Same as Folklore CM284.) Survey of social, ceremonial, and ritual European-based dance; consideration of role of dance in society, its cultural significance, and historical background. Emphasis on various European and Euro-American regional and national dance traditions. Concurrently scheduled with course CM184.

Mrs. Dunin, Mr. Quigley (W)

**C287. Dance in Native American Cultures.** (Formerly numbered C287A.) Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C187.

**C297A-C297Z. Selected Topics in Dance.** Lecture, discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. Concurrently scheduled with courses C197A-C197Z. S/U or letter grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

(F,W,Sp)

**400. Directed Professional Activities (2 to 8 units).** (Formerly numbered 400A-400B.) Prerequisite: consent of graduate adviser. Directed projects in professional editing, bibliography, filmography, videography, conference and festival direction, and other professional activities. May not be applied toward M.A. degree requirements. May be repeated. S/U grading.

(F,W,Sp)

**C402A-C402B-C402C. Advanced Modern Dance Technique (2 units each).** Laboratory, four and one-half hours. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. May be repeated for credit. Concurrently scheduled with courses C102A-C102B-C102C. S/U or letter grading.

Mr. Brown, Ms. Catterson (F,W,Sp)

**C407A-C407B-C407C. Advanced Ballet (2 units each).** Laboratory, four and one-half hours. Prerequisite: course 106C or consent of instructor. Advanced technique in ballet, with emphasis on performing skills. May be repeated for credit. Concurrently scheduled with courses C107A-C107B-C107C. S/U or letter grading.

Ms. Wright (F,W,Sp)

**441. Dance Production Practicum (2 to 4 units).** Laboratory, four to eight hours (one or two hours may be individualized consultation). Prerequisite: consent of instructor. Skills and understanding of production components in roles of stage manager, production assistants, and producer. May be repeated for a maximum of eight units. S/U grading.

Ms. Leung, Mr. Pressner, Mr. Ritter

**451. Teaching Assistant Seminar (2 units).** Lecture, one hour; laboratory, three hours. Required of all Dance Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

Ms. Gantz-Siegel (F,W)

**452. Directed Field Study in Dance Education (2 to 8 units).** Seminar, one hour; field study, two hours minimum. Prerequisite: consent of instructor. Directed field study to provide teaching experience in the community school or other approved site. No more than four units may be applied toward M.A. degree requirements. S/U grading.

(F,W,Sp)

**460A-460B-460C. Clinical Internship Supervision.** Lecture, two hours; discussion, two hours. Corequisites: courses 262A-262B-262C, 596R. Practicum dealing with student internship: movement/observation, therapeutic goals, therapeutic process, and other clinical uses. S/U grading.

Ms. Fairweather (F,W,Sp)

**C471B. Dance of Indonesia (2 units).** Studio, three hours. Prerequisite: course 71B or consent of instructor. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sunda). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171B.

Ms. Mitoma (Sp)

**C471C. Dance of Japan (2 units).** Studio, three hours. Prerequisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171C.

**C471D. Dance of India (2 units).** Studio, three hours. Prerequisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171D.

**C471E. Dance of Korea (2 units).** Studio, three hours. Prerequisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171E.

**C472B. Dance of West Africa (2 units).** Studio, three hours. Prerequisite: course 72B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C172B.

**C473B. Dance of Mexico (2 units).** Studio, three hours. Prerequisite: course 73B. Dance techniques of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C173B.

Ms. Miranda (W,Sp)

**C474C. Dance of Spain (2 units).** Studio, three hours. Prerequisite: course 74C. Techniques and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C174C.

**C476B. Dance of Israel (2 units).** Studio, three hours. Prerequisite: course 76B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C176B.

**C479A-C479Z. Dance of a Selected Culture (2 units each).** Laboratory, four hours. Prerequisite: consent of instructor. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with courses C179A-C179Z. S/U or letter grading.

**480. Seminar: Research Topics (2 units).** Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students required to make a presentation each term they are enrolled for credit. May be repeated for a maximum of eight units. S/U grading.

**490. Projects in Choreography and Performance (2 to 8 units).** Tutorial, one three-hour rehearsal per unit per week minimum. Prerequisite: course 240C or consent of instructor. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography or performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student leading to fully staged performance. May be repeated for a maximum of 16 units.

(F,W,Sp)

**498. Professional Internship in Dance (4, 8, or 12 units).** Full- or part-time supervised fieldwork. Prerequisites: advanced standing in M.F.A. program, consent of instructor. Internship in dance, theater, film, or television organization. Participation in creative, administrative, or technical work of professionals in their specialties.

(F,W,Sp)

**556A. Directed Individual Study or Research (2 to 8 units).**

**596R. Directed Study or Research in a Hospital or Clinic (2 to 8 units).** S/U grading.

**597. Preparation for Master's Comprehensive Examination (2 to 8 units).** Preparation for M.A. or M.F.A. comprehensive examination. S/U grading.

**598. Research for and Preparation of Master's Thesis (2 to 8 units).** Research for and preparation of M.A. or M.F.A. thesis. S/U grading.

## Design

1200 Dickson Art Center, (310) 825-9007

### Professors

James W. Bassler, M.A.  
Charles M. Eastman, M.Arch.  
Lionel March, Sc.D.  
Vasa Mihich  
George Stiny, Ph.D.

### Professors Emeriti

Laura F. Andreson, M.A.  
William C. Brown, M.A.  
Jack B. Carter, M.A.  
Thomas Jennings, M.A.  
J. Bernard Kester, M.A.  
John A. Neuhart  
Nathan Shapira, Dottore in Architettura

### Associate Professor

Mitsuru Kataoka, M.A.

### Assistant Professors

Terry Knight, Ph.D.  
Alice E. McCloskey, M.A., *Emerita*  
Madeleine Sunkees, B.Ed., *Emerita*

### Visiting Assistant Professor

Thomas M. Hartman, M.A.

## Scope and Objectives

Note: The Department of Design is examining the undergraduate and graduate curricula with a view to their revision. Admission to the department is closed for 1994-95. For further details, contact the Counselor, Department of Design, 1300 Dickson, UCLA, Los Angeles, CA 90024-1456.

The department offers a foundation of core courses, including color theory, perceptual drawing, three-dimensional design, computer, photography, and history, followed by a comprehensive group of integrated upper division courses in ceramics, fiber/textile, graphics, video, computer imagery, and environmental design which includes interior space planning and industrial design.

Design students are encouraged to work in experimental modes where materials and processes give new information and in the best of circumstances allow familiar visual and spatial relationships to be seen in new and diverse ways. The tools of design students range from highly technical electronic video and computer to the loom, potters wheel, camera, drafting table, pen, brush, and sometimes solely the hand and word. Through a balance of courses in theory, criticism, and practice, students develop in both vision and competence to realize new methods and new forms, both functional and expressive.

The Department of Design curricula lead to the Bachelor of Arts, Master of Arts, and Master of Fine Arts degrees. All programs benefit from the rich and varied art resources at UCLA and in the Los Angeles community.

## Bachelor of Arts Degree

### Preparation for the Major

*Required:* Design 31A, 31B, 32A, 32B, 32C, 35A, 35B, 35C, and one course from Art History 50 through 57.

### The Major

*Required:* Twelve upper division courses, selected in consultation with the adviser, including Design 161E, 162A, 165A, 167A, 171A, three courses from 161A, 161C, 161G, 161H, 161J, and History 154C or 154D, and four upper division design electives.

It is recommended that you have each term's program approved by the departmental adviser.

Note: Consult the *Schedule of Classes* for courses restricted to majors only.

## Master of Arts Degree

### Admission

Students are admitted for Fall Quarter only. An acceptable portfolio is required, in the form of slides (maximum 20) or videotape (if applying to the electronic imagery field). Acceptance is by a majority vote of the design faculty.

Applicants are expected to have a bachelor's degree from an accredited institution; it need not be in art or design. A minimum grade-point average of 3.0 overall in undergraduate upper division work is required. Your initial advisory committee is formed immediately after you are accepted.

Prospective students may contact the Counselor, Department of Design, 1300 Dickson, UCLA, Los Angeles, CA 90024-1456, for brochures and information.

### Fields of Concentration

Communication imagery, image transfer, electronic imagery, computer imagery, ceramics, fiber structures, textiles, industrial design, exhibition design.

### Course Requirements

A minimum of 36 quarter units in the department (or nondepartmental courses with the graduate adviser's consent) selected from courses numbered 161A through 295 (and possibly 596) is required, with a B average or better. These must include a minimum of 20 quarter units of design courses numbered above 200, of which at least four units must be from Design 290 and of which at least eight units must be devoted to a comprehensive project in your area of study. In addition, eight quarter units of art history are required (if you have a B.A. or B.F.A. in Art which includes a background in the history of art, you may substitute eight units in other courses that are germane to your graduate pursuit).

A total of eight units of course 596 may be applied toward the 36 units required for the degree; four units may be applied toward the graduate course requirement.

### Comprehensive Examination Plan

The M.A. program focuses on a scholarly project associated with a field of study and mastery of the technology. You meet with your committee to assess your progress on the comprehensive examination project throughout your two years in the program. Objectives of the design program are presented to students via faculty interaction, committee process, the graduate design curriculum, individual design practice, oral examination, and a master's statement exhibition of work accomplished.

## Master of Fine Arts Degree

### Admission

Admission requirements and procedures are essentially the same as for the M.A., except that the M.F.A. degree is the highest academic degree awarded in the studio disciplines of art and is conferred on the basis of outstanding achievement and consistent demonstration of quality throughout an original body of creative work. A higher standard of demonstrated ability and preparation in the area of intended study is usually applied in the portfolio review.

### Fields of Concentration

Communication imagery, image transfer, electronic imagery, computer imagery, ceramics, fiber structures, textiles, industrial design, exhibition design.

### Course Requirements

A minimum of 72 quarter units of upper division and graduate design courses is required, of which at least four units must be from Design 290 and of which at least 12 units must be devoted to a comprehensive project in your area of study.

Within those 72 units, a minimum of 52 quarter units in the 200 and 500 series must be taken in the field of specialization.

A minimum of 40 quarter units of art history in undergraduate or graduate study is required. Art history courses completed at the undergraduate level can be applied toward the 40-unit art history requirement but cannot be applied toward the 72 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be applied toward the 40-unit art history requirement and toward the total units required for the degree. You may substitute a maximum of 12 units in other courses that are germane to your graduate pursuit, with the faculty adviser's consent.

A total of 12 units of course 596 may be applied toward the graduate and elective course requirements for the degree.

### Comprehensive Examination Plan

The M.F.A. program focuses on the fostering of mature, professional-quality work with emphasis on experimentation and mastery of the technology associated with the field of study. You meet with your committee to assess your progress on the comprehensive examination project throughout your three years in the program. Objectives of the design program are presented to students via faculty interaction, committee process, the graduate design curriculum, design practice, oral examination, and a thesis exhibition of work accomplished.

## Lower Division Courses

**30A. Nature of Design.** Lecture, three hours; discussion, one hour. Open to nonmajors. Understanding the design process, with emphasis on development of a visual language; study of historic, scientific, technological, economic, and cultural factors influencing design in our physical environment.

**31A. Fundamentals of Design: Color.** Lecture, two hours; laboratory, four hours. Course 32A may be taken concurrently. Exploration of color in theory and practice. Development and articulation of sensory concepts. Mr. Vasa in charge

**31B. Fundamentals of Design: Form.** Lecture, two hours; laboratory, four hours. Course 32B may be taken concurrently. Interrelation of three-dimensional form concepts as foundation for creativity; origination and solution of problems. Mr. Vasa in charge

**32A. Perceptual Drawing.** Demonstration/discussion/laboratory, eight hours. Course 31A may be taken concurrently. Translation of perception through delineation, drawing, and other descriptive media.

Mr. Vasa in charge

**32B. Visual Presentation.** Studio, six hours. Enforced requisite: course 32A. Course 31A or 31B may be taken concurrently. Translation of idea through delineation, drawing, and other descriptive media.

Mr. Vasa in charge

**32C. Drawing Methodologies.** Studio, eight hours. Fundamentals of graphic representation, including orthographic and isometric projection methods, mechanical drawing and drafting, layout techniques, and introductory computer-aided drafting.

Mr. Vasa in charge

**35A. Introduction to Photography.** Lecture, two hours; studio, four hours. Introduction to camera operation, photo processing, laboratory and lighting procedures.

Mr. Vasa in charge

**35B. Introduction to Tools and Processes.** Lecture, two hours; studio, four hours. Introductory design shop course to develop necessary skills with traditional tools and power equipment, including fundamentals of joining, fastening, and finishing both natural and industrial materials, and their appropriate application in fabrication of design prototypes.

**35C. Introduction to Computer.** Lecture, two hours; studio, four hours. Introduction to the computer as a design tool and image development medium; overview of hardware and software, including microcomputers, disk operating systems (DOS), image processing systems, desktop publishing, computer loom, three-dimensional modeling, and word processing systems.

Mr. Brown, Mr. Kataoka

## Upper Division Courses

### (I) Historical and Comparative Studies in Design

**161A. Ceramics.** Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. Evolution of ceramic form through geographic, social, and technological influences.

**161C. Communication Design.** Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. Study of symbols, signs, and images within social, cultural, and historical context; analysis of print and electronic forms. Mr. Brown, Mr. Kataoka

**161E. Modern Design History.** Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. Historical survey of development of Western industrial culture. Studies of major factors influencing transition from industrial societies to postindustrial information societies.

**161G. Shelter.** Lecture, three hours. Prerequisite: upper division standing. Open to nonmajors. Survey of physical determinants of shelter forms within social, cultural, and historical contexts. Analysis of impact of environment, sociocultural factors, and technology on contemporary private and public buildings.

**161H. Textiles.** Lecture, three hours. Development of textile forms through geographic, cultural, stylistic, and technological influences. Mr. Bassler

**161J. Video Imagery.** Lecture, three hours; laboratory, to be arranged. Analysis of videographic form. Mr. Kataoka

### (II) Concept and Form in Design

**162A. Ceramics.** Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to ceramic materials and processes as a medium of cultural and individual expression. Investigation of handforming methods.

**162B. Ceramics.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Introduction to use of potter's wheel. May be repeated after completion of courses 162B through 162F. Mr. Saxe

**162C. Ceramics.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Creative development of ceramic materials and processes, with emphasis on indirect methods of forming such as use of molds and mechanically produced ceramic elements. May be repeated after completion of courses 162B through 162F.

**162D. Ceramics.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Investigation of ceramic surface treatments and their relation to ceramic form; study of traditional and experimental materials and processes to achieve appropriate fired surfaces required for function and as means of creating decorative and expressive imagery. May be repeated after completion of courses 162B through 162F.

**162E. Primitive Ceramics.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Investigation of materials and methods of Neolithic and other early ceramic traditions. Emphasis on creative use of primitive ceramic technology to better understand the nature of clay and effects of firing. Firing in the field without a kiln. May be repeated after completion of courses 162B through 162F.

**162F. Advanced Ceramics.** Studio, six hours. Prerequisites: courses 162A, 162B, 165A, 167A, 171A. Introduction of advanced technique in use of potter's wheel. Emphasis on individual creative experimentation with materials and methods introduced in courses 162A through 162E, in conjunction with advanced projects incorporating wheelformed elements. May be repeated after completion of courses 162B through 162F.

**165A. Fundamentals of Communication Design.** Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to basic elements of graphic design and development of visual communication concepts. Exploration of letterforms, typography, symbols, and imagery through graphic and electronic media.

Mr. Brown, Mr. Kataoka

**165B. Communication Design: Printed Image.** Studio, six hours. Prerequisite: course 165A. Development of concepts exploring visual potential of the graphic image. Technologies include screen printing, xerography, laser printing, ink jet, thermo dye — sublimated printing, offset lithography, video printing, and other reproduction processes. May be repeated after completion of courses 165B through 165E.

Mr. Brown, Mr. Kataoka

**165C. Communication Design: Video Image.** Studio, six hours. Prerequisite: course 165A. Use of video technology (video systems, cameras, displays, editing, storage, and reproduction devices) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication. May be repeated after completion of courses 165B through 165E.

Mr. Kataoka

**165D. Communication Design: Computer Image.** Studio, six hours. Prerequisite: course 165A. Exploration of the computer as an image-generating tool. Development of visual ideas for print, television, and film applications using original images, videography, typography, and photography. May be repeated after completion of courses 165B through 165E.

Mr. Brown, Mr. Kataoka

**165E. Advanced Communication Design: Special Studies I.** Studio, six hours. Prerequisites: three courses from 165A through 165D. Synthesis of studies and media presented in courses 165A through 165D. Student initiative encouraged, with emphasis on use of two or more media. May be repeated after completion of courses 165B through 165E.

Mr. Brown, Mr. Kataoka

**165F. Advanced Communication Design: Special Studies II.** Studio, six hours. Prerequisites: minimum of three courses from 165A through 165E, consent of instructor. Emphasis on conceptual versatility based on experience in prior communication design courses. Students should be well-versed in all technologies available in program. May be repeated once.

Mr. Brown, Mr. Kataoka

**167A. Form in Industrialized Materials.** Studio, six hours. Prerequisites: courses 31A through 35B. Exploration of form in relation to industrialized materials and manufacturing processes. Application of wood, metal, plastic, paper/cardboard, and ceramic materials. Use of industrial processes and fabricating methods. Development and design of products

Mr. Hartman

**167B. Fundamentals of Industrial Design.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Interrelation of function, form, materials, and technology. Fundamentals of industrial design. Studies of creative problem solving and methodology in design. Systems development of mass-produced products from concept to model. Introduction to computer-aided design. May be repeated after completion of courses 167B through 167F.

Mr. Hartman

**167C. Human Factors in Product and Space Planning.** Studio, six hours. Prerequisites: courses 167A, 167B. Studies in psychological and physical requirements for designing products and spaces. Interpretation of anthropometric ergonomic information. Development of design concepts related to needs and use of objects and spaces. Computer applications included. May be repeated after completion of courses 167B through 167F.

Mr. Hartman

**167D. Industrial Design: Product Development I.** Studio, six hours. Prerequisites: courses 167A, 167B. Intermediate-level product planning, research, and development as a design tool. Studies in relation of design methodology to social and economic constraints. Development of design concepts and their realization at model and prototype stage. May be repeated after completion of courses 167B through 167F.

Mr. Hartman

**167E. Industrial Design: Product Development II.** Studio, six hours. Prerequisites: courses 167A, 167B. Product planning, research, and development of design problems and information systems of higher complexity. Application of computer-aided design. Exploration of relation of design-concepts to social, economic, and environmental impacts. May be repeated after completion of courses 167B through 167F.

**167F. Advanced Industrial Design: Product Design, Research, and Innovation.** Studio, six hours. Prerequisites: courses 167A, 167B. Further studies in computer applications in industrial design, from ideation, conceptualization, and programming to model building and manufacturing.

**170A-170B. Space Planning.** Lecture, two hours; studio, four hours. Prerequisites: courses 31A through 35B. Human factors and functional requirements in determining spatial configurations and relationships.

**170A.** Emphasis on interior requirements in generating a building envelope. **170B.** Emphasis on environmental factors in creating exterior private and urban scale public spaces. May be repeated once for credit.

Mr. Hartman

**171A. Textiles: Fundamentals of Fiber, Form, and Structure.** Studio, six hours. Prerequisites: courses 31A through 35B. Introduction to terminology and scope of the field; orientation to materials and equipment; expansion of design concepts and theories toward making of fabrics; fundamental experiments in fabric making, dyeing, and patterning.

Mr. Bassler

**171B. Fabric Surface.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Patterning through use of linoprint and silk screen processes, including experiments in traditional and random patterning systems; experiments utilizing single and multiple lino and screen printings. May be repeated after completion of courses 171B through 171F.

Mr. Bassler

**171C. Fabric Dye Processes.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Experimentation with essential dye systems and procedures, including immersion, direct application, and resist. May be repeated after completion of courses 171B through 171F.

Mr. Bassler

**171D. On-Loom Textile Construction.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Experimentation utilizing loom for structural patterning, including two- to eight-harness weaves; float and supplementary elements; introduction to computer-generated patterning. May be repeated after completion of courses 171B through 171F.

Mr. Bassler

**171E. Non-Loom Fabric Making.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Introduction to terminology of the field, orientation to material and equipment, expansion of design concepts to construct fabrics without the loom as a tool, utilizing fiber and related pliable materials. May be repeated after completion of courses 171B through 171F.

Mr. Bassler

**171F. Textile Construction.** Studio, six hours. Prerequisites: courses 162A, 165A, 167A, 171A. Development of two- and three-dimensional structures utilizing the loom, including experiments in construction of multiple-layer weaves, experiments in manipulation of woven surface, experiments in architecturally scaled fabrics. May be repeated after completion of courses 171B through 171F.

Mr. Bassler

### (III) Proseminars in Design

**189. Topics in Design.** Lecture/discussion, three hours; laboratory, to be arranged. Prerequisite: consent of adviser and instructor. Examination by faculty members of specific problems relevant to design theory and performance. Topics announced in advance. May be repeated for a maximum of 16 units.

**193. Proseminar: Design — Senior Studies.** Proseminar, three hours. Prerequisite: consent of adviser. Open to senior and advanced students through design faculty advisers. Examination by faculty members of specific problems relevant to design theory and performance. Topics announced in advance. May be repeated twice.

**197. Honors Course.** Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 GPA in major, consent of instructor, junior or senior standing. Individual studies for majors. May be repeated once for credit.

**199. Special Studies in Art (2 to 8 units).** Hours to be arranged. Prerequisites: 3.0 GPA in major, consent of instructor, senior standing. Individual studies for majors. May be taken for a maximum of eight units.

## Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

**280. Communication Design: Graphics/Video/Computer (2 to 8 units).** Studio, two to four hours. Advanced exploration of graphic and electronic imaging processes. Emphasis on research and individual creative manipulation of graphic media and electronic technologies. Development of original concepts and expressive applications.

Mr. Brown, Mr. Kataoka

**284. Ceramics (2 to 8 units).** Studio or studio/seminar, to be arranged. Prerequisite: consent of instructor. Advanced creative research utilizing ceramic media. Emphasis on development of original, expressive, individually produced ceramic art.

**287. Form and Structure (2 to 8 units).** Studio or studio/seminar, to be arranged. Prerequisite: consent of instructor. Exploration of form, with emphasis on expressive experimentation in materials and processes.

Mr. Vasa

**288. Fiber Structures (2 to 8 units).** Laboratory, two to four hours. Advanced formative work in traditional and experimental processes of fabric construction utilizing fiber media.

Mr. Bassler

**290. Design Seminar: Collaborative View.** Seminar, three hours. Critical and theoretical examination of concepts underlying the creative process, including initiation of an idea, its development, and its social and historical context.

**292. Shelter (2 to 8 units).** Development of individual projects to investigate concepts of shelter. Exploration of traditional and contemporary forms, methods, and materials.

**293. Interior Space Design (2 to 8 units).** Concept and practice of designing interior spaces. Evaluation of visual and functional needs for interior spaces (ranging from personal to social spaces) in two- and three-dimensional projects involving color, light, surface, materials, equipment, furniture, etc.

**294. Industrial Design (2 to 8 units).** Laboratory, two to four hours. In-depth studies in topics such as design and management, person/object compatibility, visual identity programs, containing systems, transportation, design for developing countries, ergonomics, urban components, area studies, materials, and processes.

**295. Exhibition Design (2 to 8 units).** Laboratory, two to four hours. Interpretation and presentation of materials for exhibition. Students may elect to work with instructor and gallery staff on regularly scheduled productions or they may outline their own project and proceed by producing studies, renderings, or schematics or by fabricating models.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisite: consent of instructor.

The Department of Design reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

## Ethnomusicology and Systematic Musicology

2539 Schoenberg Hall Annex,  
(310) 206-3033

### Professors

Jacqueline C. DjeDje, Ph.D.  
Nazir A. Jairazbhoy, Ph.D.  
James W. Porter, M.A., *Chair*

William R. Hutchinson, Ph.D., *Emeritus*  
J.H.K. Nketia, B.A., *Emeritus*

### Associate Professors

Roger Kendall, Ph.D.  
Steven J. Loza, Ph.D.

### Assistant Professor

Cheryl Keyes, Ph.D.

### Lecturers

Ikuko Yuge, B.A.  
Tsun Y. Lui, *Emeritus*  
Suenobu Togi, *Senior Emeritus*

### Adjunct Professor

Benjamin Suchoff, Ed.D.

### Visiting Assistant Professors

Kobla Ladzekpo, M.A.  
Danny Lee  
Roger Savage, Ph.D.  
Ernest Siva, M.M.

## Scope and Objectives

Ethnomusicology is a research field that combines the various techniques of musical analysis with the methods of the social sciences and humanities (i.e., the study of cultural systems including music). Although originally focused on folk, tribal, and Asian classical music traditions, ethnomusicology at UCLA includes the study of all styles of music in the world, including popular music, jazz, and even Western classical music when approached from a cultural analysis perspective. The undergraduate and graduate programs in ethnomusicology provide students with broad knowledge of world musics and methods currently used in their study.

The object of systematic musicology, a multidisciplinary field, is to answer fundamental questions on the nature and properties of music, not only as art but as empirical phenomena. At UCLA, this research orientation integrates the perspectives of aesthetics and philosophy, music theory, acoustics, sociology, psychology, organology, and semiotics, any of which can be cross-cultural, focusing on the systems or models discernible through these disciplines.

## Bachelor of Arts in Ethnomusicology

### Admission

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an interview/audition. Applicants who are unable to travel to UCLA have the option of submitting a videotape of musical performance, following departmental guidelines.

### Preparation for the Major

*Required:* Ethnomusicology and Systematic Musicology 10A-10B-10C, 20A-20B-20C, and 16 units of performance organizations (courses 91A-91Z).

### The Major

*Required:* Ethnomusicology and Systematic Musicology M180, 181, C190A, six elective courses selected from 106A, 106B, 106C, 108A, 108B, M110A, M110B, 113 through 121, M126, 128, 130, 136A through 172B, 174, 176, C179, 199E, 199S, and four upper division courses from other departments related to your area of concentration and selected in consultation with a faculty adviser.

## Master of Arts in Ethnomusicology

### Admission

Applicants for the M.A. must have completed a bachelor's degree in music or related fields of

study. If your degree is not in music, you must provide evidence of your musical ability. You are required to submit (1) official transcripts of record, (2) a clear statement of purpose, (3) three letters of recommendation, (4) a research or term paper, and (5) proof of musical background or performance ability interpreted on a worldwide scale. For students with a bachelor's degree in music, the degree itself satisfies the musical background requirement. For students in other fields, the requirement is satisfied by official transcripts showing at least two years of music coursework, including music history and theory, or by an audition or monitored recording of any musical tradition. Applications must be submitted to Mary Crawford, Graduate Adviser, 1642B Schoenberg Hall Annex, UCLA, Los Angeles, CA 90024-1616.

### Foreign Language Requirement

Reading knowledge of English and one other language relevant to your research and approved by the faculty is required. The requirement may be fulfilled by (1) passing the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better, (2) passing an examination administered by the department or another University department if no GSFLT is available in your selected language, or (3) completing the fifth term in the language with a grade of B or better, or (4) demonstrating literacy through submission of transcripts or other documents.

### Course Requirements

A minimum of nine upper division and graduate courses is required, at least five of which must be at the graduate level. No more than four units of 500-series courses may be applied toward the M.A. requirements.

Students in ethnomusicology (without a specialization) must take Ethnomusicology and Systematic Musicology 200, C201A-C201B, 281A, 282, two courses in one or more music culture areas (i.e., music of Japan, China, etc.), one anthropology course, and two electives from departmental graduate or upper division offerings, selected courses in Western music, a related discipline, or a particular area outside the department approved by your mentor. If you have not taken courses 20A-20B-20C or the equivalent before entering, you must audit them. Course 290 may be taken but may not be applied toward M.A. course requirements. You may apply one term of course 292F toward your elective requirements and must enroll in a minimum of two terms of ethnomusicology performance organizations (courses 91A-91Z), which may not be applied toward your degree.

If you are in the systematic musicology specialization, you must take Ethnomusicology and Systematic Musicology 200, C201A, C203, one course from 271, 273, 275, 283, or Musicology 269, two terms of course 279, one course in a music culture area, and two electives from departmental graduate or upper division offerings, selected courses in Western

music, a related discipline, or a particular area outside the department approved by your mentor.

### Thesis Plan

The thesis is an extended essay or other equivalent presentation involving the original investigation of a problem or subject of limited scope. The thesis topic and your thesis committee must be approved by the program committee in your area before the thesis committee can be appointed. Your presentation must demonstrate significant style, organization, creativity, and depth of understanding of the subject. You must complete the thesis within three years after you begin your M.A. coursework. If you do not, you must take the comprehensive examination (not applicable to the systematic musicology specialization) at the end of your third year in order to be considered for the Ph.D. program.

### Comprehensive Examination Plan

This plan is not available to students in the systematic musicology specialization.

Students in ethnomusicology must first submit a research paper written during their master's studies to demonstrate their writing and scholarly abilities. You must then take two written examinations, one in theory and method in ethnomusicology and one in a world music culture area or other approved topic reflecting your course of study. Failed examinations may be retaken only once during the next two terms. You must complete the comprehensive examination plan within three years after you begin your M.A. coursework.

### Final Examination

The final examination is oral and includes discussion of both the thesis and related matters.

A final oral examination is required under both plans, providing opportunity for you to defend your thesis or research paper and written examination responses, and for your committee to explore further your suitability for admission to the doctoral program.

## Ph.D. in Ethnomusicology

### Admission

Applicants for the Ph.D. program in either area must normally have completed an M.A. or equivalent degree in one of the following: ethnomusicology, Western music, a non-Western music tradition, a related discipline, or area studies with a music specialization. If your qualifications do not meet the requirements for the department's M.A. degree, you must complete remedial coursework, as recommended by the department, before beginning the Ph.D. program.

### Foreign Language Requirement

Reading knowledge of English and two other languages relevant to your research and approved by the faculty is required. Normally one of the two other languages should be either French or German. See "Foreign Language

Requirement" under the Master of Arts degree for testing procedures.

### Course Requirements

You may petition, on the advice of your faculty adviser, for exemption from specific requirements on the basis of equivalent work done at the M.A. level. If you have an M.A. in Ethnomusicology from UCLA, you may have already fulfilled some of these requirements.

All students are required to take Ethnomusicology and Systematic Musicology 200, C201A, and one music culture seminar.

Students in ethnomusicology (without a specialization) must also take courses C201B, 281A, 282, and 10 additional courses, at least six of which must be at the 200 level, including one course from 271, 273, 275, or 283, three terms of course 290, and three terms of ethnomusicology performance organizations (courses 91A-91Z), which may not be applied toward your degree. You may apply one term of course 292F toward your elective requirements.

If you are in the systematic musicology specialization, you must also take course C203, five terms of course 279, one course from 271, 273, 275, 283, or Musicology 269, and five additional electives, at least three of which must be at the 200 level.

You may select your electives from all other graduate courses in the department, as well as from selected courses in Western music, a related discipline, or a particular area outside the department approved by your mentor.

If you do not have an M.A. in Ethnomusicology from UCLA, you may be required, in consultation with your mentor, to take other relevant and necessary courses beyond those specified.

No more than two 500-series courses and two courses outside the department may be applied toward the Ph.D. degree requirements.

### Qualifying Examinations

When you and your guidance committee believe you are ready to take the qualifying examinations, you should take a schedule to the Student Services Office listing the order in which the examinations are to be taken. The Student Services Office staff acts as proctor for the tests. The written examinations should be completed within a three-week period. Repeat examinations, if necessary, must be scheduled in consultation with your guidance committee. A departmental oral examination may be scheduled at the discretion of your guidance committee.

After passing the departmental examinations, you may submit your dissertation proposal and request for a doctoral committee. This committee administers the University Oral Qualifying Examination.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Dissertation/Final Oral Examination

The dissertation is an extended monograph; a final oral examination is required by the department.

## Lower Division Courses

**1A-1B. Fundamentals of Sound and Music of the World (2 units, 4 units).** Lecture, two hours; laboratory, one hour. Acoustical makeup of sound (pitch, tone quality); tuning systems; modes and scales; harmony and polyphony; rhythm and meter; notational systems; relationships of music to culture. Laboratory includes ear training and instrumental techniques. (F,W)

**10A-10B-10C. World Music Theory and Musicianship.** Lecture, two hours; discussion, four hours; laboratory, two hours. Limited to ethnomusicology and world arts and cultures majors. Course 10A is enforced requisite to 10B, which is enforced requisite to 10C. Introduction to and participation in musical systems of selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition. (F,W,Sp)

**20A-20B-20C. Musical Cultures of the World.** Survey of musical cultures of the world (excluding Western art music), role of music in society and its relationship to other arts; consideration also to scale structure, instruments, musical forms, and performance standards. **20A.** Europe and the Americas; **20B.** Near East and Africa; **20C.** South Asia, Southeast Asia, and the Far East. Mr. Racy, Mr. Rice (F,W,Sp)

**91A-91Z. World Music Performance Organizations (2 units each).** Activity, three hours. Group performance of traditional vocal and instrumental music of world cultures. May be repeated for credit without limitation. P/NP or letter grading. **91A.** Music and Dance of the American Indians; **91B.** Music of Bali; **91C.** Music and Dance of the Balkans; **91D.** Music of China; **91E.** Music and Dance of Ghana; **91F.** Music of India; **91G.** Music of Japan; **91H.** Music of Java; **91J.** Music of Korea; **91K.** Music of Mexico; **91L.** Music of Persia; **91M.** Music of Thailand; **91N.** Music of the Near East; **91P.** Music of Afro-Americans; **91Z.** Open Ensemble. (F,W,Sp)

## Upper Division Courses

**106A-106B-106C. Music of the American Indians.** American Indian music studied within broader context of styles, cultural values, and sources, including films, recordings, lectures, and limited group singing and dancing. **106A.** Eastern California-Yuman, Great Basin, and Northwest Coast Areas; **106B.** Athabascan, Pueblo, Plains, and Modern Pan-Indian Trends; **106C.** Sociology of American Indian Music. (Sp)

**108A-108B. Music of Latin America.** Prerequisite: consent of instructor. Course 108A is not prerequisite to 108B. Survey of traditional and contemporary musical culture. **108A.** Mexico, Central America, and the Caribbean Isles; **108B.** Latin South America.

Mr. Loza

**M110A-M110B. The Afro-American Musical Heritage.** (Same as Folklore M154A-M154B.) Lecture, three hours. Prerequisite: consent of instructor. Study of African music and its impact on the Americas; survey of development of various Afro-American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

Ms. DjeDje

**M111. Ellingtonia.** (Same as Afro-American Studies M145.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington. Mr. Burrell (W)

**113. Music of Brazil.** Lecture, three hours. Prerequisite: consent of instructor. History of ethnic and art music in Brazil, with some reference to Portuguese antecedents. Mr. Loza

**115. Musical Aesthetics in Los Angeles.** Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and the commercial music industry. Mr. Loza (W)

**117. American Popular Music.** Survey of history and characteristics of American popular music and its relationship to American culture, with emphasis on 20th-century popular music and its major composers, including comparison between traditional pre-1950 popular music and trends in post-1950 popular music.

**118. Development of Rock.** Prerequisite: consent of instructor. History of rock from the 1950s to the 1970s. In-depth survey of stylistic trends illustrated by pertinent examples and accompanied by extensive musical analysis.

**120A-120B. Development of Jazz.** Introduction to jazz; its historical background and its development in the U.S. (F,W)

**121. Cross-Cultural Perspectives in Jazz.** Prerequisite: consent of instructor. Exploration of assimilation and retention of jazz from the U.S. in various countries, with particular emphasis on cultural and social features which form the basis for new jazz-ethnic music blends.

**123. Music of Bebop.** Lecture, three hours. Study of jazz bebop tradition, including analysis of compositions and song forms, styles of improvisation, and developments from 1940 to the present. (Sp)

**M124. Anglo-American Folk Song.** (Same as English M111B and Folklore CM106.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. Mr. Porter

**M126. Folk Music of Western Europe.** (Same as Folklore M181.) Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with numerous recorded examples from major cultural subdivisions of the region. Mr. Porter

**128. Folk Music of Eastern Europe.** Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in Eastern Europe (including the Balkans). Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area. Mr. Porter

**130. Folk Music of the Mediterranean.** Lecture, three hours. Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in the Mediterranean basin, particularly features of contrast, similarity, and cross-cultural interaction. Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area. Mr. Racy

**CM132. Celtic Folk Music.** (Same as Folklore CM132.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM232. P/NP or letter grading. Mr. Porter

**136A-136B. Music of Africa.** Prerequisite: consent of instructor. Investigation of historical aspects, social functions, musical instruments, and relationships of music to other art forms in selected areas of Africa. Ms. DjéDjé

**146. Folk Music of South Asia.** Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence. Mr. Jairazbhoy

**147. Survey of Classical Music in India.** Examination of melodic, metric, and formal structures of Indian classical music in context of religious, sociocultural, and historical background of the country. Mr. Jairazbhoy

**156A-156B. Music of China.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. **156A.** History and theory of music of China, including survey of various provinces and their instrumental techniques. **156B.** Prerequisite: course 156A. Introduction to various notational systems. Analysis of representative styles. Mr. Jairazbhoy

**157. History of Chinese Opera.** Prerequisite: consent of instructor. Survey of dramatic elements in Chinese operas, incorporating singing, dance, and acrobatics. Emphasis on traditional and modern Peking opera and its relation to Cantonese and other genres.

**158A-158B-158C. Studies in Chinese Instrumental Music.** Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. **158A.** Study of literature, major sources, paleography, theory, and philosophy of the Ch'in, including transcription and analysis. **158B.** Study of literature, major sources, paleography, theory, and philosophy of the Pi P'a, including transcription and analysis. **158C.** Comprehensive study of Chinese musical instruments, classification system, specific musical notation, and use in context of Chinese society. (F,W,Sp)

**160A. Survey of Music in Japan.** Lecture, three hours. Survey of main genres of Japanese traditional music, including Gagaku, Buddhist chant, Biwa music, Koto music, Shamisen music, and music used in various theatrical forms.

**160B. Studies in Japanese Court Music.** Lecture, two hours; laboratory, one hour. Prerequisite: minimal musical ability. In-depth study of Japanese court music, including historical background, with emphasis on understanding the instrumental techniques and notation of various instruments of the court orchestra. Mr. Togi, Ms. Yuge

**170. Acoustics.** Lecture, three hours. Prerequisite: consent of instructor. Interrelationship of acoustical and musical phenomena. Tuning systems, consonance and dissonance, tone quality. Lecture, demonstration, and discussion; tours of instrumental collections and acoustical research facilities. Mr. Kendall

**172A-172B. Psychology of Music.** **172A.** Designed for nonmajors. Introduction to psychology of music; historical background and the broad field of study, including use of music as a stimulus, tests and measurements, and related modes of musical behavior. **172B.** Prerequisite: course 172A or consent of instructor. Study of psychological factors and problems in music from points of view of listener, performer, and composer. Mr. Kendall

**173. Experimental Research in Music.** Prerequisite: consent of instructor. Recommended for music majors in all specializations. Theories and processes in various modes of musical experimentation: physical, perceptual, psychological, pedagogical, quantitative, statistical procedures. Mr. Kendall

**174. Aesthetics of Music.** Lecture, three hours. Designed for nonmajors. Historical survey of musical aesthetic thought and practice. Selected readings and musical examples.

**176. Problems in Musical Aesthetics.** Prerequisite: course 174 or consent of instructor. Critical approach to musical problems of aesthetic analysis, description, values, theories, including both Western and non-Western considerations. Mr. Kendall

**C179. Proseminar: Systematic Musicology.** Lecture, three hours. Prerequisite: consent of instructor. Introduction to systematic musicology, including basic readings in aesthetics/philosophy; anthropology, sociology, and ethnomusicology; psychology and acoustics. May be concurrently scheduled with course C203. Mr. Kendall

**M180. Analysis of Traditional Music.** (Same as Folklore M180.) Prerequisite: consent of instructor. Intensive study of methods and techniques necessary to understand traditional music. Mr. Porter

**181. Anthropology of Music.** Prerequisite: consent of instructor. Cross-cultural examination of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure. Mr. Rice

**C190A-C190B. Proseminars: Ethnomusicology.** Lecture, three hours. Prerequisites: courses 10A-10B-10C and 20A-20B-20C, or consent of instructor. May be concurrently scheduled with courses C201A-C201B. Mr. Loza, Mr. Racy

**199E. Special Studies in Ethnomusicology (2 to 4 units).** Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in ethnomusicology resulting in research project. May be repeated for a maximum of eight units.

**199S. Special Studies in Systematic Musicology (2 to 4 units).** Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in systematic musicology resulting in research project. May be repeated for a maximum of eight units. Mr. Kendall and the Staff

## Graduate Courses

**200. Research Methods and Bibliography (6 units).** (Formerly numbered Music 200B.) Lecture, three hours. Prerequisite: graduate standing. Not open to students with credit for former Music 200B. Guided writing, utilizing specific bibliography, in ethnomusicology and systematic musicology. Mr. Kendall, Mr. Loza (W)

**C201A-C201B. Proseminars: Ethnomusicology.** (Formerly numbered Music C290A-C290B.) Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Not open to students with credit for former Music C290A-C290B. Basic literature and schools of thought in the field of ethnomusicology from the late 19th century to the present. May be concurrently scheduled with courses C190A-C190B. Additional assignments, as well as evidence of greater depth of study, required of graduate students. Mr. Loza, Mr. Racy

**C203. Proseminar: Systematic Musicology.** (Formerly numbered Music C291.) Lecture, three hours. Prerequisite: consent of instructor. Not open to students with credit for former Music C291. Introduction to systematic musicology, including basic readings in aesthetics/philosophy; anthropology, sociology, and ethnomusicology; psychology and acoustics. May be concurrently scheduled with course C179. Mr. Kendall

**207. Seminar: North American Indian Music.** (Formerly numbered Music 288.) Seminar, three hours. Prerequisite: course 106A or 106B or 106C or consent of instructor. Not open to students with credit for former Music 288. Survey of representative musical styles of Native North American Indians, including problems of transcription, methods of analysis, symbolic implications of song texts. Emphasis on interrelationship between music and cultural context. Influence of Western music in acculturative contexts.

**208. Seminar: Latin American Music.** Seminar, three hours. Prerequisite: consent of instructor. Review of bibliographic, methodological, and philosophical bases of musical research in Latin America, working from both general and specific perspectives. Exploration of research problems and investigations on specific musical cultures and distinct genres of musical expression. Mr. Loza (Sp)

**211. Seminar: Afro-American Music.** (Formerly numbered Music 289.) Seminar, three hours. Prerequisites: courses M110A-M110B or consent of instructor, graduate standing. Not open to students with credit for former Music 289. Intensive investigation of problems, theories, and methods of research related to study of Afro-American music. Emphasis on relationship of problems to representative styles of Afro-American music. Ms. DjéDjé

**226. Seminar: Balkan Music.** (Formerly numbered Music 279.) Seminar, three hours. Prerequisite: course 128 or consent of instructor. Major issues in study of Balkan music, including song text analysis, music instruments, dance music, rituals and customs, minorities, and ideology. Mr. Rice

**CM232. Celtic Folk Music.** (Same as Folklore CM232.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM132. S/U or letter grading. Mr. Porter

**237. Seminar: African Music.** (Formerly numbered Music 287.) Seminar, three hours. Prerequisite: course 136A or 136B or consent of instructor. Not open to students with credit for former Music 287. Intensive investigation of musical style; historical, social, and cultural aspects of indigenous musical traditions and related art forms. Ms. DjeDje

**240. Music of Arabic-Speaking Near East.** (Formerly numbered Music 284.) Lecture, three hours. Prerequisite: course 282 or course in ear training, analysis, and theory or consent of instructor. Not open to students with credit for former Music 284. Investigation of historical and cultural backgrounds, main musical styles, relationship between theory and practice and emphasis on mode and improvisation, and 20th-century trends. Concurrent participation in Near East performance ensemble (course 91N) required. Mr. Racy

**241. Music of Iran and Other Non-Arabic-Speaking Communities.** (Formerly numbered Music 282.) Lecture, three hours. Prerequisite: course 282 or course in ear training, analysis, and theory or consent of instructor. Not open to students with credit for former Music 282. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N) required. Mr. Racy

**248A-248B. Classical Music of India.** (Formerly numbered Music 286A-286B.) Lecture, three hours. Prerequisite: course 146 or 147 or consent of instructor. Not open to students with credit for former Music 286A-286B. Study of history, theory, and practice of north and south Indian classical music. During first term, emphasis on music history and traditional theory; second term, analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in Indian performance group (course 91F) required. Mr. Jairazbhoy

**250A-250B. Music of Indonesia.** (Formerly numbered Music 281A-281B.) Lecture, three hours. Prerequisite: course 20C or consent of instructor. Not open to students with credit for former Music 281A-281B. During first term, emphasis on music and related performing arts of Java. Focus on music and performing arts of Bali and other Indonesian islands during second term. Concurrent participation in one Indonesian performance group (course 91B or 91H) required. Mr. Jairazbhoy

**252. Seminar: Music of Mainland Southeast Asia.** (Formerly numbered Music 278.) Seminar, three hours. Prerequisite: course 20C or consent of instructor. Presentation of materials concerning musical performance traditions of Laos, Cambodia, Vietnam, Thailand, and Burma, both in mainland Southeast Asia and in the American context, with perspectives from archaeology, history, performance theory, applied anthropology, and ethnomusicology. Mr. Jairazbhoy

**271. Seminar: Acoustics of Music (6 units).** (Formerly numbered Music 273.) Seminar, three hours. Prerequisite: course 170 or consent of instructor. Selected topics in acoustics, including laboratory methodologies and practical applications. Topics include Western and non-Western instruments, tuning systems, psychoacoustics, and methods of spectral analysis. May be repeated once for credit. Mr. Kendall

**273. Seminar: Psychology of Music (6 units).** (Formerly numbered Music 276.) Seminar, three hours. Prerequisite: course 173 or consent of instructor. Selected topics in psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated once for credit. Mr. Kendall

**275. Seminar: Aesthetics of Music (6 units).** (Formerly numbered Music 275.) Seminar, three hours. Prerequisite: course 176 or consent of instructor. Specific topics in Western and non-Western aesthetic thought, including value, meaning (semiotics), historical development of theoretical perspectives and critical theory, and interpretation. May be repeated once for credit. Mr. Kendall

**279. Seminar: Systematic Musicology.** (Formerly numbered Music 272.) Seminar, three hours. Prerequisites: course 170, consent of instructor. Exploration of specific topics in general field of systematic musicology covering disciplines such as anthropology, acoustics, aesthetics, music perception, philosophy, organology, sociology, and experimental approaches. May be repeated for credit. Mr. Kendall

**281A-281B. Seminars: Field and Laboratory Methods in Ethnomusicology (6 units each).** (Formerly numbered Music 254A-254B.) Seminar, three hours. Prerequisites: courses C201A-C201B. Fieldwork concepts and methods using technical equipment, conducting interviews, dealing with ethical issues, and designing research projects. Mr. Jairazbhoy

**282. Seminar: Analysis (6 units).** (Formerly numbered Music 253.) Seminar, three hours. Prerequisites: graduate standing in ethnomusicology, or course M180 and consent of instructor. Intensive discussion of techniques used in ethnomusicological analysis, including transcription and notation, with emphasis on analysis of musical performance and music events. Mr. Porter

**283. Seminar: Study of Musical Instruments (Organology) (6 units).** (Formerly numbered Music 255.) Seminar, three hours. Prerequisites: courses C201A-C201B or consent of instructor. Musical instruments studied in terms of their structures, performance contexts, cultural significance, and patterns of change. Mr. Racy

**284. Seminar: Anthropology of Music.** (Formerly numbered Music 277.) Prerequisites: courses C201A-C201B. Analysis of current anthropological paradigms and issues that have major impact on ethnomusicology. Mr. Rice

**285. Seminar: Comparative Music Theory (6 units).** (Formerly numbered Music 248.) Seminar, three hours. Prerequisite: consent of instructor. Not open to students with credit for former Music 248. Comparative study of codified music theories of select cultures — Western and non-Western — considered in themselves and as expressions of their societies. Theory considered as a science of music; its place between cultural values and artistic practice in different civilizations. Mr. Jairazbhoy

**M287. Seminar: Folk Music.** (Formerly numbered Music M258.) (Same as Folklore M258.) Seminar, three hours. Prerequisite: consent of instructor. Not open to students with credit for former Music M258. Mr. Porter

**290. Seminar: Ethnomusicology (6 units).** (Formerly numbered Music 280.) Seminar, three hours. Prerequisites: courses 20A-20B-20C, 200, and C201A-C201B, or consent of instructor. May be repeated for credit. Mr. Racy, Mr. Rice

**292A-292Z. Seminars: Special Topics in Ethnomusicology.** (Formerly numbered 292.) Prerequisites: graduate standing, consent of instructor. Designed to utilize special interests and expertise of regular and visiting faculty; topics of current interest presently offered in ethnomusicology program.

**375. Teaching Apprenticeship Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Introductory Practicum for Teaching Apprentices in Ethnomusicology and Systematic Musicology (2 units).** Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Ethnomusicology and Systematic Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching ethnomusicology and systematic musicology at college level. May not be applied toward degree requirements. S/U grading.

**596. Directed Individual Studies (2, 4, or 6 units).** (Formerly numbered Music 596B.) Only four units may be applied toward M.A. minimum course requirements.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units).** May be repeated for credit. S/U grading.

**598. Guidance of M.A. Thesis (4, 8, or 12 units).** May be repeated for credit. S/U grading.

**599. Guidance of Ph.D. Dissertation (4, 8, or 12 units).** May be repeated for credit. S/U grading.

## History/Art History (Interdepartmental)

For details on this undergraduate major, see Chapter 5 on the College of Letters and Science.

## Music

 Richard Todd, *B.M., Adjunct*  
 Evan Wilson, *Adjunct*  
 Kari Windingstad, *B.A., Adjunct*  
 Peter Yates, *M.F.A., Adjunct*

## Scope and Objectives

Students interested in a concentration in music history and literature should consider the major in musicology offered through the College of Letters and Science; those interested in a concentration in world music should consider the major in ethnomusicology offered through the School of the Arts.

The four-year Bachelor of Arts curriculum in Music is a classically oriented, balanced program of practical, theoretical, and historical studies, with related performance and academic studies in non-Western music. The major, designed for students who want to combine fine musicianship with academic excellence, is based on a core curriculum of theory, history, analysis, and individual and group performance. Given in the context of a liberal education, this provides a foundation for an academic or professional career and affords valuable cultural background.

At the graduate level, specialized studies leading to the degrees of Master of Arts and Doctor of Philosophy are offered in composition; specialized studies leading to the degree of Master of Fine Arts (performance practices) are offered in all classical solo instruments, voice, opera, and conducting.

## Bachelor of Arts Degree

### Admission

All applicants for admission and change of major are required to pass an audition in their principal performing medium.

### Preparation for the Major

*Required:* Music 20A, 20B, 20C; 12 units from 60A through 65; two years (12 units) of perfor-

mance organizations (courses 90A through 90N) for a letter grade; and Musicology 26A-26B-26C. Students taking string, woodwind, brass, or percussion lessons must select from Music 90E, 90F, 90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from 90A, 90D, 90J, 90K, or 90L; students taking keyboard or guitar lessons may choose from 90A through 90N. You must participate in a minimum of two different organizations over the course of your stay at UCLA. In addition, you are required to take one college year — or at least one course at level three — of French, German, Italian, or Spanish, which may be used to fulfill the school language requirement.

### The Major

*Required:* A minimum of 48 units in upper division, including Music 120A, 120B, 120C, Musicology 126A-126B-126C, and six courses selected from one of the specializations listed below.

*Composition* — Music 106A, 106B, 123A-123B-123C, and at least one course from 101, 109A, 109B, 109C, 116, 117, 118A, 118B, 121, C122, additional terms of 123A-123B-123C, 156, C176, 199, Ethnomusicology and Systematic Musicology 117, 128, 130, 136A, 136B, 146, 156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 181. In addition, you must have an original work completed and ready for rehearsal and performance on campus during your senior year.

*Music Education* — Music 100A-100B-100C, 116, 117, eight units from 115A through 115E. You are encouraged to take additional coursework from 112A, 112B, 118A, 118B, 199, Ethnomusicology and Systematic Musicology 170, 172B, 174 as your schedule allows. You are required to enroll in the type of performance organizations (courses 90A through 90N; 90M may be used in Fall Quarter only) that you plan to teach. In addition, if you intend to teach instrumental music, you are encouraged to select three terms of choral organizations (courses 90A, 90B, 90C, 90J, or 90K); if you intend to teach general music, you are encouraged to elect three terms of ethnomusicology performance organizations (Ethnomusicology and Systematic Musicology 91A-91Z).

*Performance* — Twelve units in performance instruction courses 160A through 165 (including junior and senior recital requirements), four units of chamber ensembles (Music 175), four units of elective courses from 101, 106B, 112A, 112B, 116, 117, 118A, 118B, 151A, 151B, 199, Musicology C127A through C127F, 130, 133, 134, 135A, 135B, 135C, 139, Ethnomusicology and Systematic Musicology 108A, 108B, 120A, 120B, 121, 170, 176, and one upper division elective course in music. During each term in which you take private lessons, you must participate in a performance organization for a letter grade. Students taking string, woodwind, brass, or percussion lessons must select from Music 90E, 90F, 90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from 90A, 90D, 90J, 90K,

or 90L; students taking keyboard or guitar lessons may choose from 90A through 90N.

*Theory* — Music 120C and six courses selected in consultation with a faculty adviser.

## Graduate Study

Graduate study in historical musicology is offered by the Musicology Department (see Chapter 5); study in ethnomusicology and/or systematic musicology is offered by the Department of Ethnomusicology and Systematic Musicology (see the listing earlier in this chapter).

### Admission

Application for admission/fellowship due . . . . . December 30

Supplementary application materials due . . . . . January 15

Assessment examination/audition . . . . . end of January

Notice of acceptance or denial sent . . . . . by March 15

Late applicants, accepted only in composition, must meet the following deadlines:

Late applications for admission only (from addresses in the U.S. only) accepted until . . . . . March 1

Supplementary application materials due . . . . . April 1

Assessment examination/audition . . . . . early April

Notice of acceptance or denial sent . . . . . by May 15

Failure to meet any deadline may result in a delay in action on an application for admission, as well as that for a fellowship or assistantship.

The application form must be filed according to instructions in the application booklet and the accompanying departmental information; all supplementary materials described below must be submitted to Mary Crawford, Department of Music, 1642B Schoenberg Hall Annex, UCLA, Los Angeles, CA 90024-1616.

Applicants for the M.A. and M.F.A. must have completed a Bachelor of Arts degree, or the equivalent, in Music or other fields of study, provided they have the musical training and musicianship necessary to pursue graduate work. Transcripts should show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants for the Ph.D. must have completed a Master of Arts degree in Music (or an equivalent degree). The degree normally will have been taken in the same field as the proposed doctorate. If you wish to obtain a doctorate in a

field other than that of the M.A., additional coursework, as prescribed by the department, must be completed.

Applicants for all degrees (M.A., M.F.A., and Ph.D.) are also required to (1) take a departmental assessment examination (details are automatically sent after the application has been received), (2) submit a letter describing their background of study and stating their reasons for wishing to pursue graduate studies in music, (3) submit three letters of recommendation from former instructors and/or professionals with whom they have worked, and (4) submit written examples of their work — for composition, musical scores; for M.F.A. applicants, a repertoire list and sample concert or recital programs; for Ph.D. applicants, the M.A. thesis or composition, if possible. In addition, applicants for the Ph.D. in composition with a cognate in ethnomusicology should submit a written sample of their work, as well as musical scores. M.F.A. applicants also are required to demonstrate by audition their proficiency in their major instrument, voice, or conducting medium. No application can be considered until the examination has been taken and all of the above materials have been received.

### Major Fields

The Music Department offers the degrees of Master of Arts and Doctor of Philosophy in the field of composition and Master of Fine Arts (performance practices) in all classical solo instruments, voice, opera, and conducting.

### Instructional Credential in Music

You may earn credentials for teaching music and other subjects in California elementary and secondary schools through the Graduate School of Education and Information Studies; completion of the instructional credential program in the Teacher Education Laboratory is required. Interested applicants should consult the Graduate School of Education and Information Studies, 1009 Moore Hall (310-825-8328), and the faculty adviser in music for information.

## Master of Arts Degree

### Foreign Language Requirement

Reading knowledge of French, German, Italian, Spanish, or English (for students whose native language is not English) is required.

### Course Requirements

You are required to complete a minimum of nine courses, five of which must be at the 200 level. Only four units of Music 596A or 596D and four units of course 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. Upper division courses that may be applied toward the minimum of nine courses include 109A, 109B, 109C, 112A, 112B, 116, 117, 118A, 118B, 151A, 151B, 156, 175 (four units only), Ethnomusicology and Systematic Musicology 106A, 106B, 106C, 113, M126, 128, 130, 136A, 136B, 146, 147, 156A,

156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 173, 176, M180, 181. Course 598 serves to guide the preparation of the thesis and should normally be taken during your last term in residence.

You must complete Music 251A, 266A-266B, one course from 251B or 251C or 251D, 252A, 252B, and 252C in sequence (with the option of substituting course 596A for 252C), and two electives on the recommendation of your graduate adviser. In addition to the thesis, you are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. You are also responsible for the campus presentation of one original work during each year of residency.

### Thesis Plan

The thesis is a work proposed by the student and approved by the composition and theory faculty. The topic and composition of the master's committee are approved by the faculty before submission to the Graduate Division.

### Final Examination

The final examination is oral and includes discussion of both the thesis and related matters.

## Master of Fine Arts Degree

### Foreign Language Requirement

Reading knowledge of French, German, or Italian is required. International students may petition to substitute English. Candidates in the opera speciality must also be fluent in speaking one of these languages. The language requirement should be satisfied by the end of your first year in residence.

### Course Requirements

You are required to complete a minimum of 18 courses, including at least six at the 200 level and six or more in the 400 series. Only four units of Music 596A, 596C, or 596D and eight units of course 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. The minimum residence requirement for the M.F.A. is two years.

Course requirements are as follows: two terms of Music 261A through 261F, six terms of 400-level performance instruction, two terms (eight units) of 598, seven elective courses, and Musicology 200A. Conducting students declare either a choral or instrumental specialization. Six terms of course 475 are required in the area of specialization (i.e., choral or instrumental) and at least two terms in the other area. (On a two-year program, the ratio would be four to one.) Recommended electives include courses 175, 596A, 596C, 596D, Ethnomusicology and Systematic Musicology 170, 176, and additional courses from the 200 and 400 series. A maximum of four units of chamber ensembles (course 175) may be applied toward the minimum 18 courses. Course 598 serves to guide the preparation of the final

project and should normally be taken during your last two terms in residence.

Each year you must complete a solo recital on campus (preferably a noon concert) with a faculty committee in attendance to evaluate the performance. Conducting students present a program, or a substantial portion thereof, approved by the conducting faculty, either on or off campus.

The final project is to be completed during your last year in residence. A solo recital and appropriate scholarly paper are required in all areas. In addition, a major operatic performance is required in the area of opera. Conducting students present an on-campus program, or a substantial portion thereof, with one of the department's performance organizations. The scholarly paper should be equivalent to a graduate seminar paper (15 to 25 pages in length) and should be concerned with performance problems which can be elucidated through research and analysis. The final version of the scholarly paper, with the accompanying recital program, must be submitted to the department in the format of a thesis.

The language requirement and a majority of the coursework must be completed before you submit the final project proposal and request for an M.F.A. committee. The proposal, which is to include the complete recital program and an abstract of the scholarly paper, should be submitted by Fall Quarter of your last year in residence.

## Ph.D. Degree

### Admission

See "Admission" under Graduate Study above.

### Foreign Language Requirement

Reading knowledge of two languages selected from German, French, Latin, Italian, Russian, Spanish, or English (for students whose native language is not English; you may not use both English and the native language) is required.

### Course Requirements

You may petition, on the advice of your faculty adviser, for exemption from specific requirements on the basis of equivalent work done at the M.A. level. You may complete the residence requirement by electing courses (with consent of your faculty adviser) from the 200 series or the list of 100-level courses under "Course Requirements" for the M.A.

You must complete Music 251A, 266A-266B, one course from 251B or 251C or 251D, six terms of 252A, 252B, 252C in sequence (with the option of substituting course 596A for 252C), and Musicology 200A. If you received the M.A. in composition from UCLA, you normally take a minimum of three terms of courses 252A, 252B, 252C in sequence in the Ph.D. program. If you received the M.A. in composition elsewhere, you normally take six terms of courses 252A, 252B, 252C in sequence, with the option of substituting course 596A for ei-

ther or both 252Cs. In addition to the dissertation, you are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. You are also responsible for the campus presentation of one original work during each year of residency.

You may elect to complete the optional cognate in ethnomusicology, in which you may substitute Ethnomusicology and Systematic Musicology C201A for Musicology 200A and Ethnomusicology and Systematic Musicology 282 or 283 for Music 251B or 251C or 251D. You are required to take two courses from Ethnomusicology and Systematic Musicology 207, 211, 237, 240, 241, 248A, 248B, 250A, 250B.

### Qualifying Examinations

When you and your guidance committee believe you are ready to take the qualifying examinations, you should take a schedule to the Student Services Office listing the order in which the examinations are to be taken. The Student Services Office staff acts as proctor for the tests. Normally the written examinations are spread over a two-week period but should be completed within three weeks. Repeat examinations may be scheduled in consultation with your guidance committee and after a stipulated period of time. Contact the Student Services Office for details on the written examinations.

When you successfully complete the written examinations, the departmental oral qualifying examination can be scheduled. After passing this oral examination, you may submit your dissertation proposal and request for a doctoral committee; this committee administers the University Oral Qualifying Examination.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Dissertation/Final Oral Examination

The dissertation consists of (1) an extended composition accompanied by a short description of the style and techniques of the work and (2) an analytical monograph dealing with some aspect of 20th-century music.

A final oral examination is required by the department.

### Lower Division Courses

**1A-1B. Fundamentals of Music.** Lecture, three hours; discussion, two hours. Designed for nonmusic majors. **1A.** Introduction to elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. **1B.** Enforced requisite: course 1A. Diatonic harmony; four-part writing, including inversions, sevenths, secondary dominants, and modulation; organization of melody and accompaniment; simple analysis; sight-singing and ear training.

**3A-3B. Preparatory Theory for Music Majors (2 units each).** Lecture, two hours; discussion, one hour. Limited to music majors. Course 3A is not open for credit to students with credit for course 1A; course 3B is not open for credit to students with credit for course 1B. Course for music majors in music fundamentals, including musicianship, theory, and terminology.

**4A-4B-4C. Basic Musicianship (2 units each).** Laboratory, three hours. Class instruction in elementary ear training and keyboard skills.

**8G. Graduate Piano Sight-Reading (2 units).** Limited to graduate students. Designed to help entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated. S/U grading.

**10. Computer-Assisted Sight-Singing Laboratory (2 units).** Lecture, two hours; laboratory, one hour. Enforced requisite: course 1A. Individualized, self-instructional approach for development of sight-singing skills through use of a music computer, keyboard instrument, and linear program learning.

**12A-12B. Counterpoint (2 units each).** Lecture, four hours. **12A.** Preparation: music theory placement examinations. 16th-century modal counterpoint in two parts, including writing of motets. **12B.** Enforced requisites: courses 20A, 20B, 20C. 18th-century tonal counterpoint in two parts, including writing of inventions. Mr. Reale and the Staff

**15. Art of Listening.** Lecture, three hours; laboratory, one hour. Acquisition of listening skills through direct interaction with live performance, performers, and composers. Relationship of listening to theoretical, analytical, historical, and cultural frameworks. Music as aesthetic experience and cultural practice. Mr. Winter

**20A. Music Theory I.** Lecture, two hours; discussion, six hours. Preparation: passing score on departmental examination. Theory: species counterpoint through fifth species; description of triads and inversions. Musicianship: interval recognition; fixed-do solfège of diatonic melodies; one-part dictation of diatonic melodies; two-part dictation of small-compass, note-against-note melodies; simple rhythmic dictation; use of treble, alto, and bass clefs.

**20B. Music Theory II.** Lecture, four hours; discussion, four hours. Enforced requisite: course 20A (C or better). Theory: diatonic harmony through secondary dominants and diminished sevenths; modulations to dominant and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass notation. Musicianship: harmonic dictation, including secondary dominants and diminished sevenths, but not modulations; more advanced two-part dictation; chromatic one-part dictation; more advanced sight-singing; keyboard (three-part open score in homophonic textures, introduction to tenor clef).

**20C. Music Theory III.** Lecture, four hours; discussion, four hours. Enforced requisite: course 20B (C or better). Theory: chromatic harmony including development of tonality, 1800 to 1850; appropriate analysis and style composition. Musicianship: advanced sight-singing; two-part contrapuntal dictation; keyboard harmony (harmonic sequences in major and minor keys); reading in open score of four homophonic parts in four clefs.

**23. Composition Workshop (2 units).** Enforced requisites: courses 20A, 20B, 20C. Introductory composition course which provides compositional experiences at a basic level. May be repeated once for credit. Mrs. Barkin, Mr. Bourland

**60A-65. Undergraduate Instruction in Performance (2 units each).** Limited to music majors (all lower division majors, and upper division majors not in performance specialization). Individual instruction of one hour per week. Students must perform in a practicum once during academic year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit.

**60A.** Violin. Ms. Kamei, Mr. Treger

**60B.** Viola. Mr. Wilson

**60C.** Cello. Mr. Leonard

**60D.** String Bass. Mr. Zibits

**60E.** Harp. Ms. Neill

**60F.** Classical Guitar. Mr. Norman, Mr. Yates

**60G.** Viola da gamba.

**60K.** Lute.

**61A.** Flute. Mr. Stokes

**61B.** Oboe. Ms. Northcutt

**61C.** Clarinet. Mr. Gray

**61D.** Bassoon. Mr. Steinmetz

**61E.** Saxophone. Mr. Gray

**62A.** Trumpet. Mr. Guarneri

**62B.** French Horn. Mr. Todd

**62C.** Trombone. Mr. Booth

**62D.** Tuba. Mr. Johnson

**63.** Percussion. Mr. Peters

**64A.** Piano. Mrs. Harris-Heggie, Mr. Tzerko, and the Staff

**64B.** Organ. Mr. Harmon

**64C.** Harpsichord. Ms. Karp

**65.** Voice. Mr. Mussard and the Staff

**90A. Concert Choir (2 units).** Activity, four hours. Preparation: audition. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. P/NP or letter grading. Mr. Neuen

**90B. Collegiate Chorus (2 units).** Nonaudition mixed chorus of 50 to 150 voices performing medium- and concert-length choral works from baroque to the present. Collegiate Chorus performs only as part of "Choral Union," a large chorus made up of all of the choral ensembles. May be repeated for credit without limitation. P/NP or letter grading.

**90C. Chamber Singers (2 units).** Activity, three hours. Preparation: audition. Select mixed ensemble of 16 to 20 voices performing chamber choral music of all periods, with emphasis on Renaissance and baroque music. May be repeated for credit without limitation. P/NP or letter grading.

**90D. Opera Workshop (2 units).** Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading.

**90E. Symphony Orchestra (2 units).** Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. P/NP or letter grading. Mr. Robertson

**90F. Symphonic Band (2 units).** Preparation: audition. Group performance of instrumental music scored for band. May be repeated for credit without limitation. P/NP or letter grading. Mr. Henderson

**90G. Wind Ensemble (2 units).** Activity, four hours. Preparation: audition. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. P/NP or letter grading. Mr. Lee

**90H. Collegium Musicum (2 units).** Activity, three hours. Preparation: audition. Group performance of vocal and instrumental music of medieval, Renaissance, and baroque eras on period instruments. May be repeated for credit without limitation. P/NP or letter grading.

**90J. Men's Glee Club (2 units).** Activity, three hours. Preparation: audition. Select male chorus of 40 to 45 voices performing male choral music of all periods, with emphasis on popular and folk arrangements. May be repeated for credit without limitation. P/NP or letter grading.

**90K. Women's Chorus (2 units).** Activity, three hours. Preparation: audition. Select female chorus of 45 to 55 voices performing treble choral music of all periods, with emphasis on music after 1750. May be repeated for credit without limitation. P/NP or letter grading.

**90L. Musical Comedy Workshop (2 units).** Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete musical theater productions, including repertoire and stage movement coaching. May be repeated for credit without limitation. P/NP or letter grading. Mr. Hall

**90M. Marching and Varsity Bands (2 units).** Activity, four hours. Preparation: audition. Group performance of special band arrangements for football and basketball games as well as special events. May be repeated for credit without limitation. P/NP or letter grading. Mr. Henderson

**90N. Jazz Ensemble (2 units).** Activity, three hours. Preparation: audition. Group performance of jazz and popular music in ensembles of 20 to 30 instruments. May be repeated for credit without limitation. P/NP or letter grading. Mr. Henderson

## Upper Division Courses

**100A-100B-100C. Music in American Education.** Lecture, four hours; laboratory, one hour. Prerequisites: courses 20A, 20B, 20C, 116, 120A, 120B, 120C, Musicology 26A-26B-26C. Critical study and analysis of philosophy, history, organization, curriculum, and literature of music programs for elementary and secondary schools in American education. Each course may be taken independently for credit. **100A.** General Music; **100B.** Choral Music; **100C.** Instrumental Music. Mr. Anderson and the Staff

**101. Advanced Keyboard Harmony and Score Reading.** Prerequisite: course 120B or consent of instructor. Intensive individual work in keyboard harmony and reading of chamber and orchestral scores. May be repeated once for credit.

**102. Instrumentation.** Lecture, three hours. Prerequisite: course 120B with a grade of C (2.0) or better. Not open for credit to students with credit for course 106A. Intended for music majors in specializations other than composition. Ranges and characteristics of instruments, exercises in scoring.

**105. Introduction to Composition.** Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Intended for music majors in specializations other than composition. Nature of compositional process, with selected exercises in specific techniques and styles.

**106A. Orchestration I.** Discussion, three hours. Prerequisites: courses 20A, 20B, 20C. May be taken concurrently with courses 120A, 120B, 120C. Ranges and characteristics of instruments, with exercises in scoring. Mrs. Barkin

**106B. Orchestration II.** (Formerly numbered 106B-106C.) Discussion, three hours. Prerequisite: course 106A. Scoring and analysis for ensembles and full orchestra. Mrs. Barkin

**109A-109B-109C. Composition for Motion Pictures and Television (2 units each).** Prerequisites: courses 20A, 20B, 20C, 120A, 120B, and 120C, or consent of instructor. Course 109A is prerequisite to 109B, which is prerequisite to 109C. Composition of music for dramatic and documentary film in cinema and television. Techniques used in recording and editing.

**112A-112B. Practical Scoring.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C, and Musicology 26A-26B-26C, or consent of instructor. Emphasis on practical problems in scoring for small and large ensembles at various educational levels. **112A.** Band Scoring; **112B.** Choral Scoring. Mr. Henderson

**113A-113B. Music Literature for Children.** Lecture, three hours; laboratory, one hour. Prerequisites: course 1A and Musicology 2A, or consent of instructor. Course 113A is not prerequisite to 113B. Designed for nonmusic majors, particularly elementary education students. Study of music literature applicable to elementary school programs. **113A.** Emphasis on listening analysis, movement, and improvisation. **113B.** Emphasis on class performance — music reading, singing, and folk instruments.

**115A-115E. Study of Instrumental and Vocal Techniques (1 unit each).** (Formerly numbered 115A-115F.) Laboratory, three hours. Prerequisite or corequisite: course 20A. Applied studies in basic performance techniques and tutorial materials. Each of courses 115A-115D may be repeated once for credit. **115A.** Strings; **115B.** Woodwinds; **115C.** Brass; **115D.** Percussion; **115E.** Voice.

Mr. Anderson and the Staff  
**116. Introduction to Conducting (2 units).** Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A. Fundamentals of conducting, including basic skills, techniques, analysis, and repertoire.

**117. Study and Conducting of Instrumental and Choral Literature (2 units).** (Formerly numbered 117A-117B.) Lecture, three hours. Prerequisite: course 116 or consent of instructor. Study and practice of conducting both instrumental and choral repertoire. In addition to further development of conducting gestures, focus on score study techniques, rehearsal techniques, style, and interpretation as applied to choral and instrumental repertoire.

**118A-118B. Advanced Study and Conducting of Choral and Instrumental Literature (2 units each).** Lecture, one hour; laboratory, two hours. Prerequisites: courses 116 and 117, or consent of instructor. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each course may be repeated once for credit. **118A.** Choral; **118B.** Instrumental. Mr. Lee, Mr. Neuen, Mr. Robertson

**119. Creative Process: Developing Imagination and Craft.** Lecture, three hours. Prerequisites: courses 106A and 106B, or consent of instructor. In-depth philosophical and technical discussions as to nature of creativity, as well as compositional exercises intended to develop technique and imagination and to enrich musical vocabulary of students.

Mrs. Barkin

**120A. Music Theory IV.** Lecture, four hours; discussion, four hours. Prerequisites: course 20C with a grade of C (2.0) or better, passing score on departmental first-year examination. Theory: baroque counterpoint including chorale prelude; two-part invention; exposition and first modulation of a three-part invention; canonic principles; analysis of inventions, canons, and fugues. Musicianship: sight-singing of extended chromatic melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading.

**120B. Music Theory V.** Lecture, four hours; discussion, four hours. Prerequisites: course 120A with a grade of C (2.0) or better, consent of instructor. Theory: advanced chromatic harmony including development of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation; preparation for departmental examination.

**120C. Music Theory VI.** Lecture, four hours; discussion, two hours; listening, two hours. Prerequisites: course 120B with a grade of C (2.0) or better, consent of instructor. 20th-century harmonic language, including nonfunctional harmony, polytonality, free atonality, serialism, and minimalism.

**121. Special Topics in 20th-Century Music.** Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, and 120C, or consent of instructor. In-depth study of certain aspects of 20th-century music ranging from individual composers and schools to ideological or stylistic concerns. May be repeated once for credit.

**C122. Speculative Music Theory.** (Formerly numbered 103A-103B.) Discussion, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, and 120C, or consent of instructor. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C222. Mrs. Barkin

**123A-123B-123C. Composition.** (Formerly numbered 107A-107B-107C.) Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 123A is prerequisite to 123B, which is prerequisite to 123C. Designed for students specializing in composition. Vocal and instrumental composition in the smaller forms, including style composition and 20th-century techniques. Each course may be repeated once for credit, but first year must be taken in sequence. Mr. Reale and the Staff

**136A-136B-136C. Historical Survey of Music Theater.** Lecture, four hours; discussion, one hour. Historical survey of major works from music theater, tracing development of the art form from its European beginning to the American music theater of today. P/NP or letter grading. **136A.** Music Theater, Early Forms to 1900; **136B.** Music Theater, 1900-1945; **136C.** Music Theater, 1945-1975. Mr. Hall

**150. Introduction to Music Criticism.** Lecture, three hours. Prerequisite: music major or consent of instructor. Readings and discussion of music criticism past and current, and exercise in the writing of criticism of live concert events and recordings. Designed to aid students (performers, critics, or listeners) in verbalizing the experience of listening to music.

**151A-151B. History of Musical Performance Practices.** Prerequisites: courses 20A, 20B, 20C, 120A, 120B, Musicology 26A-26B-26C. General survey of musical interpretation and re-creation from viewpoint of stylistic authenticity. **151A.** Medieval through Baroque; **151B.** Classic through 20th Century.

**155. Audio Technology for Musicians.** Lecture, two hours; laboratory, three hours. Prerequisites: courses 20A, 20B, 20C, consent of instructor. Theory and practice of sound engineering in relation to concert and studio recording techniques. Mr. Cloud

**156. Electronic Music: Theory and Techniques.** Lecture, three hours; laboratory, three hours. Prerequisites: courses 123A-123B-123C. Designed for students specializing in composition. Applicable acoustical and electronic theory, history of technological and compositional development of classical electronic music. Analysis, manipulation of analog and digital synthesizers and ancillary equipment, invention and realization of materials. Mr. Bourland

**158. New Orleans Jazz.** Lecture, three hours; discussion, two hours. Major black and Creole figures in origin and development of jazz in New Orleans from turn of the 20th century through the 1960s, with emphasis on polycultural roots, local municipal traditions, and stylistic analysis.

**160A-165. Undergraduate Instruction in Performance for the Performance Specialist (2 units each).** Limited to upper division music majors who have been accepted by audition into performance specialization. Individual instruction of one hour per week. Students must perform in a noon concert once during their junior year and must present a full recital in their senior year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit:

<b>160A.</b> Violin.	Mr. Buranov, Mr. Treger
<b>160B.</b> Viola.	Mr. Wilson
<b>160C.</b> Cello.	Mr. Leonard
<b>160D.</b> String Bass.	Mr. Zibits
<b>160E.</b> Harp.	Ms. Neill
<b>160F.</b> Classical Guitar.	Mr. Norman, Mr. Yates
<b>160G.</b> Viola da gamba.	
<b>160K.</b> Lute.	
<b>161A.</b> Flute.	Mr. Stokes
<b>161B.</b> Oboe.	Ms. Northcutt
<b>161C.</b> Clarinet.	Mr. Gray
<b>161D.</b> Saxophone.	Mr. Steinmetz
<b>161E.</b> Saxophone.	Mr. Gray
<b>162A.</b> Trumpet.	Mr. Guarneri
<b>162B.</b> French Horn.	Mr. Todd
<b>162C.</b> Trombone.	Mr. Booth
<b>162D.</b> Tuba.	Mr. Johnson
<b>163.</b> Percussion.	Mr. Peters

- 164A. Piano.** Mrs. Harris-Heggie, Mr. Tzerko, and the Staff
- 164B. Organ.** Mr. Harmon
- 164C. Harpsichord.** Ms. Karp
- 165. Voice.** Mr. Mussard and the Staff
- C167. Selected Topics in Keyboard Literature.** Lecture, three hours. Corequisite: course 164A or 164B or 164C or consent of instructor. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C267.
- 174A-174B-174C. The Language of Song (2 units each).** Prerequisite: music major. Sounds of the language as applied to singing, including use of International Phonetic Alphabet, translation of art song texts, and application to student's current vocal repertoire. Background in the language is encouraged. **174A.** German; **174B.** French; **174C.** Italian. Mrs. Hast
- 175. Chamber Ensembles (2 units).** Prerequisite: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be repeated for credit.
- C176. Electronic Music Composition.** Lecture, three hours; studio, three hours. Prerequisites: course 156, advanced experience and accomplishment in serious composition (art music), consent of instructor. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition at least five minutes in duration. May be concurrently scheduled with course C226. Mr. Bourland
- C185. Historical and Philosophical Foundations of Music Education.** Lecture, three hours. Prerequisite: completion of undergraduate music education specialization or consent of instructor. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C225.
- 199. Special Studies in Music (2 or 4 units).** Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in music resulting in research project. May be repeated for a maximum of eight units. Mr. Harmon and the Staff

## Graduate Courses

- 202. Analysis for Performers.** Lecture, three hours. Prerequisite: graduate standing. Survey of analytical techniques and approaches required for professional performers, including phrase structure, harmonic rhythm and prolongation, small and large forms, theories of musical coherence, and understanding of styles. Mr. Harmon, Mr. Winter
- 203. Musical Terminology.** Lecture, three hours. Prerequisite: graduate standing in music. Survey of musical terminology designed to clarify the performance and interpretation of vocal and instrumental music in the European tradition. Coverage of terms in Italian, French, and German. Mr. Harmon, Mr. Winter
- 204. Music Bibliography for Performers.** Lecture, three hours. Prerequisite: graduate standing in music performance. Survey of general bibliographic techniques in music, with emphasis on materials for the performing musician. Mr. Winter
- C222. Speculative Music Theory.** Discussion, three hours. Prerequisite: graduate standing in music. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C122. Mrs. Barkin

**C225. Historical and Philosophical Foundations of Music Education.** Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C185. Additional assignments, as well as evidence of greater depth of study, required of graduate students.

**C226. Electronic Music Composition.** Lecture, three hours; studio, three hours. Prerequisites: course 156, graduate standing, advanced experience and accomplishment in serious composition (art music), consent of instructor. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition of major proportions at least seven minutes in duration. May be concurrently scheduled with course C176. Mr. Bourland

**251A-251D. Seminars: Special Topics in Composition and Theory.** Seminar, three hours. Intensive exploration of specialized aspects of composition. May be repeated for credit. **251A.** Orchestration; **251B.** Specific Media; **251C.** Specific Styles; **251D.** Compositional Analysis.

**252A-252B-252C. Seminars: Composition (6 units each).** Seminar, three hours. Prerequisites: courses 106B, 123C. Course 252A is prerequisite to 252B, which is prerequisite to 252C. Courses may be taken out of sequence only with consent of instructor. May be repeated for credit. Mr. Bourland and the Staff

**261A-261F. Problems in Performance Practices.** Seminar, three hours. Prerequisites: courses 151A-151B or consent of instructor. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. **261A.** Medieval; **261B.** Renaissance; **261C.** Baroque; **261D.** Classical; **261E.** Romantic; **261F.** Contemporary.

**266A-266B. Seminars: Music of the 20th Century.** Seminar, three hours. Prerequisite: graduate standing in music or consent of instructor. Discussion and analysis of major works of the 20th century, with emphasis on study of groups of works written at the same time in history. **266A.** 1900 to 1949; **266B.** 1950 to the Present. Mr. Ashforth, Mr. Reale

**C267. Selected Topics in Keyboard Literature.** Lecture, three hours. Corequisite: course 464A or 464B or 464C or consent of instructor. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C167.

**270A-270G. Seminars: Music Education (6 units each).** Lecture, three hours. Prerequisite: consent of instructor. May be repeated for credit. **270A.** History; **270B.** Non-Western Musics; **270C.** Curriculum Innovations; **270D.** Tests and Measurements; **270E.** Choral Literature; **270F.** Instrumental Literature; **270G.** General Topics.

**370. Music in General Education (2 units).** Prerequisite: graduate standing in Graduate School of Education and Information Studies teacher training program (all music students must take course 370 concurrently with Education 100A, 100B, 112, 312, 315A, 315B, and supervised teaching). Critical discussions related to supervised teaching in progress. May be repeated twice for credit. Mr. Anderson

**371. The Marching Band in Secondary Education (2 units).** Prerequisite: course 193 or consent of instructor. Study of contemporary marching band as a component of the music curriculum in secondary education, including current approaches, practices, and problems associated with the marching band, as well as historical perspective. Mr. Henderson

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**460A-465. Graduate Instruction in Performance (6 units each).** Limited to M.F.A. students. Individual instruction of one hour per week, with performance laboratory at discretion of instructor. Intensive study and preparation of musical literature in area of specialization. May be repeated for credit. **460A.** Violin; **460B.** Viola; **460C.** Cello; **460D.** String Bass; **460E.** Harp; **460F.** Classical Guitar; **460G.** Viola da gamba; **460K.** Lute; **461A.** Flute; **461B.** Oboe; **461C.** Clarinet; **461D.** Bassoon; **461E.** Saxophone; **462A.** Trumpet; **462B.** French Horn; **462C.** Trombone; **462D.** Tuba; **463.** Percussion; **464A.** Piano; **464B.** Organ; **464C.** Harpsichord; **465.** Voice.

**470. Opera Studio for Graduate Students.** Laboratory, six hours. Prerequisites: graduate standing, consent of instructor. Performance techniques and repertoire for graduate students in opera.

**472. Master Class in Opera (6 units).** Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of opera literature. May be repeated for credit.

**475. Master Class in Conducting (6 units).** Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of musical literature in specialized field of conducting. May be repeated for credit.

**495. Introductory Practicum for Teaching Apprentices in Music (2 units).** Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Music Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

**596A. Directed Individual Studies in Orchestration and Composition (2, 4, or 6 units).** Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit.

**596C. Directed Individual Studies in Music Education (2, 4, or 6 units).** Only four units may be applied toward M.A. or M.F.A. course requirements.

**596D. Directed Individual Studies in Performance Practices (2 to 12 units).** Prerequisite: graduate standing. Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units).** S/U grading.

**598. Guidance of M.A. Thesis or M.F.A. Final Project (4, 8, or 12 units).** M.A. candidates may apply four units toward degree requirements; M.F.A. candidates may apply eight units toward degree requirements. May be repeated for credit. S/U grading.

**599. Guidance of Ph.D. Dissertation (4, 8, or 12 units).** May be repeated for credit. S/U grading.

## Scope and Objectives

The interdisciplinary major in world arts and cultures is available to students in both the School of the Arts and the College of Letters and Science. The course of study is designed to provide students with the conceptual tools with which to examine and extract meaning from the arts — regardless of language, culture, or geographical location. Students view

the arts not as isolated phenomena, but as dynamic aesthetic forms which embody culture, history, and belief systems. The program is unique in that it places emphasis on cross-cultural study rather than the conventional focus on Western "high art" traditions. Techniques of inquiry and analysis are taken from both the arts and letters and science frameworks and therefore require investigative research as well as aesthetic sensibility. The program encourages that both approaches be given equal consideration. In addition, the program offers opportunities for participation in dance, music, and theater performance classes. Integrated activities with the Dance Department also allow for a range of new opportunities in performance.

Students are encouraged to consider the Education Abroad Program during their junior year. Individuals interested in careers in elementary and secondary education should consult the program's student affairs officer.

## Bachelor of Arts Degree

### Admission

New students are admitted to the major only for Fall Quarter. Procedures and guidelines for the selection of freshman and transfer students are approximately the same. Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, and a personal essay. For freshman applicants, college placement test scores are also considered.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. An interview with the program chair may also be required. You are advised to take world arts and cultures courses during the term in which you apply to the program. You must have a minimum 3.0 overall grade-point average and no more than 120 quarter units. Change of major petitions are accepted in October for Winter Quarter and in April for Fall Quarter.

### Concentrations

The *anthropology* concentration stresses both the empirical and theoretical foundations of cultural anthropology.

The *art history* concentration has particularly strong offerings for students interested in Asia, Africa, and the Americas.

The *dance* concentration includes studio opportunities, theory and research techniques, and history courses in both Western and non-Western dance.

The *folklore and mythology* concentration exposes students to a wide range of folklore forms derived from a diversity of cultures. (UCLA offers no undergraduate degree in folklore.)

The *music* concentration focuses on basic theory and skill in both Western and non-Western music. The theory option requires skill levels

equivalent to lower division music majors, while the world musicianship option emphasizes ethnomusicology.

The *theater* concentration explores three fundamental aspects of Western and non-Western theater: (1) history and literature, (2) visual design, and (3) production and performance techniques.

Majors should be aware that the upper division course requirements in the major and in their college or school may not meet the upper division requirement for graduation (72 units for Letters and Science, 64 for the Arts). Additional upper division units may need to be taken to reach the unit total.

### General College/School Requirements

You must satisfy the general education requirements of your school or college (Arts or Letters and Science). You may select either regardless of your concentration.

If you wish to confer with the student affairs officer regarding planning and major requirements, contact Silvily Kessler Thomas in the program office (310-206-3696).

### The Major

The major includes a core of 32 units from anthropology, art history, dance, folklore and mythology, music, and theater; a concentration consisting of 36 units in one of these six disciplines; an eight-unit senior colloquium; and 12 units of upper division elective coursework.

The following courses are required:

(1) A core of 10 interdepartmental courses (32 units): Anthropology 9, Art History 55A or 55B or 56A or 56B, Dance 70, 80A-80B, Ethnomusicology and Systematic Musicology 1A-1B, Folklore and Mythology 101, Theater 102E, World Arts and Cultures 100.

(2) A concentration of nine courses (36 units) in one of the following areas:

*Anthropology* — Courses 60, 133R, M154; group A: course 130 or 150; group B: any five courses from 110, 111, 112, 113P, 113Q, 113R, 114P, 114Q, 114R, 118A, 118B, 132, 133Q, 133R, 135A, 135B, 135C, 135S, M136Q, 139, 139L, M140, 141, 143, 144, M145, 146, 151, 152, 153, 156, 161, 162, M162P, M164, 165, 167, M168, including one course from 171, 172R, M172T, 173Q, 174P, 174Q, 175R through 175U, 177.

*Art History* — Group A: one course from 50, 51, 54, 55A, 55B, 56A, 56B, 57; group B: eight courses from M102A, M102B, 104A, 104B, 114A, 114C through 114F, C115A through C115F, C117A, C117B, C117C, 118A, 118C, 118D, C119A, C119B.

*Dance* — Courses 134A-134B, C180A-C180B; group A: four courses from 181A, 181B, 181C, 181D, 182, 183, C187; group B: two-unit courses from C171B through C179Z (note that courses 71B through 79Z are prerequisites for C171B through C179Z).

\*The faculties of the Department of Dance and the Interdepartmental Program in World Arts and Cultures have proposed a merger of the two units into a new department. If adopted, the proposal might be in effect as early as January 1, 1995. Degrees associated with current programs would continue to be offered; however, some revisions to several current degree programs are pending approval. Call (310) 825-9708 for further information.

**Folklore and Mythology** — Group A: five courses from CM106, M111, 118, M122, 124, M140, M154A, M154B, 163, C165, C175, M180, M181, CM184, 190, Classics 161, 168; group B: four courses from C105, C107, 108, M112, 113, M121, M126, M127, M128, M129, 130, 131, M142, M149, M150, M155, M170, 172, M182, 183, 190, German 134.

**Music** — Courses 20A, 20B, 20C (Western theory option) or Ethnomusicology and Systematic Musicology 10A-10B-10C; group A: two two-unit performance courses from Ethnomusicology and Systematic Musicology 91A-91Z; group B: one course with Western emphasis from Ethnomusicology and Systematic Musicology 117, 118, 120A, 120B, M126, 128, 174, Musicology 130, 135A, 135B, 135C, 139, Music 151A, 151B, 158; group C: four courses with non-Western emphasis from Ethnomusicology and Systematic Musicology 106A, 106B, 106C, 108A, 108B, M110A, M110B, 113, 121, 130, 136A, 136B, 146, 147, 156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, M180, 181, C190A, C190B.

**Theater** — Courses 50 and/or 150 (four units minimum), 101A-101B-101C; group A: one course (four units) from 11, 12, 13, 15, 130A, 138, 174A; group B: four courses (16 units) from 102A, 102B, 102C, M103A through 103F, 104A, 104B, 104C, 106, 107, 111A, 111B, 111C, Film and Television 106C, 128.

(3) World Arts and Cultures 190A-190B. These courses are the culmination of the major and focus on the culturally diverse communities of Los Angeles for field research. You select research topics on individual artists, community arts groups, or a genre of the arts.

(4) Three elective courses (12 units) which may be considered from the list below (or which may be petitioned in from a wide range of departments). In order to meet degree requirements, all electives must be related to the major and approved by the concentration adviser. The three courses selected to meet this requirement must be upper division courses from three different areas outside the area of concentration.

## Honors Program

Majors enrolled in the College of Letters and Science who have a cumulative GPA of 3.0 overall and a cumulative GPA in major coursework of 3.5 or better are eligible to participate in the College Honors program. Interested students should consult the student affairs officer and the Honors Programs Office.

## Upper Division Courses

**100. Introduction to World Arts and Cultures.** Lecture, three hours. Limited to world arts and cultures majors. Introduction to concepts and theories which integrate and underlie the multidisciplinary world arts and cultures major.

Mr. Messner (F,W)

**M112. Special Topics in Women and the Arts.** (Same as Women's Studies M112.) Lecture, three hours; outside study, nine hours. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representation, and access. May be repeated twice, except for credit toward women's studies major. P/NP or letter grading.

Ms. Sklar (W)

**120. Field Studies in World Arts and Cultures.** Seminar, two to four hours; fieldwork in community settings, eight to 12 hours. Field studies in the arts. Seminars, guest speakers, and field trips provide theory and methodology related to ethnographic research and/or internship placements. Projects emphasize ethnic communities or international arts organizations. May be repeated once for credit.

Ms. Mitoma (F,W,Sp)

**130. Selected Topics in World Arts and Cultures.** Lecture, three hours. Prerequisite: junior standing. Selected topics dealing with arts and cultures through disciplines of anthropology, art history, dance, folklore and mythology, music, and theater, and additional multidisciplinary cross-cultural areas. Consult *Schedule of Classes* for topics to be offered in a specific term. May be repeated twice for credit. P/NP or letter grading.

**140A. Art and Social Responsibility.** Prerequisite: junior standing. Discussion of what constitutes an artist's social responsibility and in what ways art is qualified to engage in direct political action. Study of tension between the powers of this world and the powers of art. P/NP or letter grading.

Mr. Sellars (W)

**140B. Art as Moral Action.** Prerequisite: junior standing. One's ability to distinguish between right and wrong action is culturally intuited, nurtured, and developed. Study of cultural strategies of moral engagement, persuasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

Mr. Sellars (Sp)

**140C. Seminar: Intercultural and Interdisciplinary Performance.** Prerequisite: junior standing. Recent discussions of multiculturalism have demanded a broader base of cultural literacy for society in general and from artists in particular. Moving beyond stereotyping and formalism, focus on areas of overlap and exchange, collaborations, collective creation, hybridization, and evolving possibilities of video and extended media. P/NP or letter grading.

Mr. Sellars

**150. Viewing Native American Culture.** Lecture, three hours; outside study, nine hours. Exploration of artistic, political, folk, and religious images of American Indians as demonstrated in literature, art, anthropology, film, and folklore and contrasted with historic and contemporary views held by Native Americans and others. P/NP or letter grading.

Mr. Apodaca (F)

**M152. Asian American Aesthetics.** (Same as Asian American Studies M119.) Lecture, four hours; outside study, eight hours. Limited to juniors/seniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lecture, readings, and field study. Formal and informal expressions of the culture, with focus on origins, artists, arts activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

**M162P. Destruction and Survival of Indigenous Societies.** (Same as Anthropology M162P.) Lecture, three hours. Prerequisite: Anthropology 9 or upper division standing or consent of instructor. Clarification of concepts and forms of destruction and survival; analysis directed to different processes threatening the institutions of a group and its survival. Exploration of current theories of ethnocide and genocide for their relevance and validity. P/NP or letter grading.

**190A-190B. World Arts and Cultures Senior Colloquium.** Limited to senior world arts and cultures majors. Comparative and integrative studies in world arts and cultures, with application of concepts and content from the six disciplines of the major. Lecture/seminar format with World Arts and Cultures faculty during first term; topics include arts in a societal context, ethnicity and the individual, and problems and approaches to fieldwork. Faculty-directed individual projects during second term. Fieldwork on some aspect of various arts/expressive behaviors found in ethnic communities of Los Angeles. In Progress grading.

Mr. Messner (W,Sp)

**199. Special Studies in World Arts and Cultures (2 to 8 units).** Prerequisites: junior standing, 3.0 GPA in major, consent of instructor. Individual studies for world arts and cultures majors. May be taken twice for a maximum of eight units.

(F,W,Sp)

## Upper Division Electives

This is a sample list only; while all electives must be petitioned, many other options exist besides those listed.

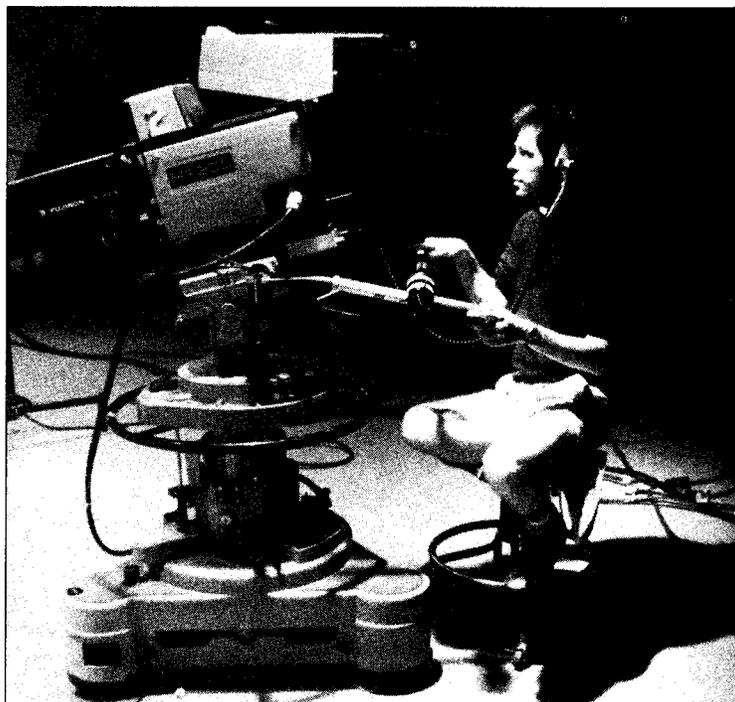

### Anthropology 110. World Archaeology

- 113P. Archaeology of North America
- 113Q. Prehistory and Ethnography of California
- 113R. Southwestern Archaeology
- 114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)
- 114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)
- 114R. Ancient Civilizations of Andean South America

# School of Theater, Film, and Television

Gilbert Cates, Dean

# 7

The School of Theater, Film, and Television consists of the Department of Theater and the Department of Film and Television, recognized national centers for higher education in production and performance as well as history, theory, and criticism. Whether exploring the ancient and sacred roots of theater or the latest secular rituals enacted by popular film, creating a dramatic character on a bare stage or a dramatic narrative on screen, or writing scripts and scholarly articles, all students study and practice both the aesthetic forms and cultural significance of theater, film, and television. Offering an intensive, discipline-based curriculum, the school recognizes the inherent differences of theater, film, and television, affirms their similarities, and encourages their interaction. As art forms and cultural interventions, theater, film, and television have in common the ability and power to reflect and shape our perception of a complex, diverse, and ever-changing world. We believe — as artists and scholars — that we have an obligation to reflect on this power and to use it responsibly.

Situated in the diverse and culturally rich environment of Los Angeles and drawing on the many resources of the campus at large, including the UCLA Center for the Performing Arts, Westwood Playhouse, and UCLA Film and Television Archive, the school provides the ideal setting for students to engage in the study and practice of these art forms so integral to a healthy and dynamic society.

# School of Theater, Film, and Television

103 East Melnitz Building, (310) 825-5761

The Department of Theater and the Department of Film and Television are essential components of the rich intellectual, cultural, and professional life of UCLA. Depending on the degree involved, the school's programs are either strongly professional in nature or oriented toward advanced scholarly study and research in an atmosphere that recognizes and often draws on studio practice. Students in undergraduate courses receive a broadly based, liberal education within the context of either theater or film and television. The various specializations of the Master of Fine Arts degree are professional programs geared to preparing talented and highly motivated students for careers in the worlds of theater, film, and television. The M.A. and Ph.D. programs engage students in the critical study and research of each medium, including its history, aesthetics, and theory, and prepare students for advanced research within the context of college and university teaching, as well as for writing and research in a variety of media-related professions.

In the Department of Theater, approximately 275 undergraduate and 125 graduate students interact with over 40 faculty members, outstanding guests of national and international standing, and a professional staff of 35 in an exciting artistic community of theater production and study. Resources include the three theaters of the Macgowan Hall complex. Specializations in the Master of Fine Arts program include acting, directing, playwriting, design, technology and production management, and the producers program. Most specializations include an internship.

The Department of Film and Television includes both production and critical studies programs, with approximately 265 graduate and 60 undergraduate students. The 50 faculty members include leading scholars as well as members of the Los Angeles and international film and television professional communities. In production, graduate specializations are of-

fered in the areas of film and television production, screenwriting, animation, and the producers program. The critical studies program offers M.A. and Ph.D. degrees for the advanced scholarly study of film and television. The department's resources in Melnitz Hall include three sound stages, three television studios, extensive editing, scoring, and viewing facilities, and a complete animation laboratory for both traditional and computer-generated animation. The M.A. and Ph.D. programs are supported by the collections of the University's libraries and the UCLA Film and Television Archive, the largest in the U.S. outside the Library of Congress. This archive forms a unique and priceless resource for research and class use.

Additionally the school participates in the undergraduate interdisciplinary world arts and cultures major which integrates art, dance, music, theater, anthropology, and folklore and mythology within one unique program. M.A. and Ph.D. faculty members and students also participate in various campus organized research units.

Informative brochures on the school are available from the Student Services Office, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622.

If you are interested in obtaining instructional credentials for California elementary and secondary schools, consult the Graduate School of Education and Information Studies, 1009 Moore Hall (310-825-8328).

## Undergraduate Study

### Admission

In addition to the University of California Undergraduate Application, departments in the School of Theater, Film, and Television require supplementary material. Detailed information on departmental requirements is mailed to you on receipt of your application. Deadline date for applications is November 30, 1994, for admission in Fall Quarter 1995.

### The Study List

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After your first term, you may petition to carry more than 17 units (up to 20 units maximum) if you have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If you have not filed your Study List by the end of the second week of classes, you must obtain the consent of the dean of the school to continue for that term.

### Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

### Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

## Requirements for Bachelor of Arts Degrees

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

### University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see "Undergraduate Degree Requirements" in Chapter 2 of this catalog.

School of Theater, Film, and Television students enrolled in English as a Second Language 33A, 33B, 33C must take the courses for a letter grade.

### School Requirements

The general requirements of the School of Theater, Film, and Television must be completed with a grade-point average of 2.0 or better.

### Majors and Degrees Offered

Film and Television .....	M.A., M.F.A., C.Phil., Ph.D.
Motion Picture/Television .....	B.A.
Theater .....	B.A., M.A., M.F.A., C.Phil., Ph.D.

## Literature

\*Three courses (12 units) in literature are required, at least one of which must be upper division. Any literature course taken in the original language can fulfill this requirement.

## Foreign Language

You may meet this requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language examination in French, German, or Spanish, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA's level three or above with an average grade of C or better.

International students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

## General Education (GE) Course Requirements

Listed below is the set of general education (GE) requirements that were effective Fall Quarter 1992. Students admitted prior to Fall Quarter 1992 are required to fulfill the previous GE requirements as listed in the catalog of their entrance year. For assistance in determining the set of requirements for which you will be held responsible, contact a school counselor.

For specific courses that fulfill the general education requirements, consult the Student Services Office before enrolling. Courses listed below are used only as a guideline. Note: Courses that include the review of film or television may not be applied toward any general education requirements.

**Reciprocity with Other UC Campuses** — Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the School of Theater, Film, and Television general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to Director of Student Services, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622.

**Intersegmental General Education Transfer Curriculum (IGETC)** — Transfer students from California community colleges have the option to fulfill UCLA's lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the

transfer process, as all of UCLA's general education requirements are fulfilled when you complete it. If you select the IGETC, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the School of Theater, Film, and Television general education requirements.

## English Composition and Rhetoric

English 3 with a minimum grade of C or an AP score of 4 should be completed by the end of your freshman year and may not be taken on a Passed/Not Passed basis.

## Critical Reading and Writing

One course from English 4, \*Humanities 2A, 2B, or 2C with a minimum grade of C or an AP score of 5 should be completed by the end of your sophomore year and may not be taken on a Passed/Not Passed basis.

## Art and Philosophy

Five courses (20 units), with no more than two courses from any single group:

**Group A** — Art History 50, 51, 54, 55A, 55B, 56A, 56B, 57, Classics 51, Design 30A.

**Group B** — Dance 134A, 134B, 181A, 182, C187.

**Group C** — Ethnomusicology and Systematic Musicology 20A, 20B, 20C, 108A, 108B, M110A, M110B, 113, 136A, 136B, 147, 174, Music 15, Musicology 2A, 2B, 13, 133, 134, 135A, 135B, 135C.

**Group D** — Philosophy 1, 2, 4, 5A, 6, 7, 8, 21, 22.

## Social Sciences

Three courses (12 units), with no more than two courses from any single group. Whenever possible, two courses from a single sequence are recommended:

**Group A** — Chinese 50, Classics 10, 20, East Asian Languages and Cultures 60, Folklore and Mythology 15, German 100A, 100B, 100C, Italian 42A, 42B, Japanese 50, Jewish Studies 10, Korean 50, Portuguese M42, M44, Russian 99A, 99B, Spanish M42, M44, Women's Studies 10.

**Group B** — History 1A, 1B, 1C, 3A through 3D, 4, 5A, 5B, 6A, 6B, 6C, 7A, 7B, 8B, 8C, 9A, 9C, 9D, 10A, 10B, 11A, 11B, Political Science 10, 20, 40, 50.

**Group C** — Anthropology 8, 9, 33, Psychology 10, 11, Sociology 1, 2, 3, 4, 31.

## Science

One course (four units) in physical sciences and one course (four units) in biological sciences:

**Group A — Physical Sciences** — Astronomy 2A, 2B, 3, 4, 5, 6, Atmospheric Sciences 2, 3, 4, 5, 6, Chemistry and Biochemistry 2, 11A, 11B, 15, Earth and Space Sciences 1, 2, 5, 8, 9, 15, Geography 1, Mathematics 2, 3A, 3B, 5,

31A, 31B, 31E, Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A, 8B, 8C, 10.

**Group B — Biological Sciences** — Anthropology 7, 10, 12, 15, Biology 2, 5, 6, 10, 13, 21, 25, 40, 70, Earth and Space Sciences 16, Geography 2, 5, Microbiology and Molecular Genetics 6, 7, Psychology 15.

## Unit Requirements

Double majors in the school, or between the school and other academic units, are not permitted.

You must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Entrance Examination Board (CEEB) Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If you take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

## Residence Requirements

You are "in residence" while enrolled and attending classes at UCLA as a major in the School of Theater, Film, and Television. Of the last 45 units completed for the bachelor's degree, 35 must be earned in residence in the School of Theater, Film, and Television. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

## Major Requirements

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). The theater major includes both lower and upper division courses. Those listed under "Preparation for the Major" (lower division) must be completed before upper division major work is undertaken. The motion picture/television major requires upper division work only.

You must complete your major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major and must be recommended by the chair of your major department. All courses in the school must be taken for a letter grade.

\*If Humanities 2A, 2B, or 2C is taken to meet the critical reading and writing requirement, it may not also be applied toward the literature requirement; English 4 may never be applied toward the literature requirement.

As changes in major requirements occur, you are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of Theater, Film, and Television may require a general final examination.

### Scholarship and Minimum Progress

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

**Minimum Progress** — You are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; you are placed on probation if you fail to pass these units. You are subject to dismissal if you fail to pass at least 32 units in three consecutive regular terms in residence.

### Honors

To receive **Dean's Honors** in the School of Theater, Film, and Television, you must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on your transcript for the appropriate term. You are not eligible for Dean's Honors in any given term if you receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

**Honors at graduation** are awarded to students with superior grade-point averages. To be eligible, you must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are *cum laude*, an overall average of 3.658; *magna cum laude*, 3.749; *summa cum laude*, 3.824.

### Counseling and Program Planning

The School of Theater, Film, and Television offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check sent to each student. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building (310-825-5761).

## Graduate Study

The advanced degree programs offered in the School of Theater, Film, and Television provide graduate students with unique research opportunities when combined with special resources, such as the University Research Library, UCLA Film and Television Archive, special collections of the Arts Library, and the University's exhibition and performance halls.

The School of Theater, Film, and Television cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Entertainment Management. Participating students serve term-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

The producers program is an M.F.A. management program in the Departments of Theater and Film and Television, with options in either theater or film and television.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of these areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division. The Graduate Affirmative Affairs Office provides counseling, academic support, and financial assistance to ethnic minority students.

### Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings which follow.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

### Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings which follow for specific requirements and procedures.

Herb Stein, B.A., *Visiting*

**Scope and Objectives**

The purpose of the Film and Television Department is to develop in its students a scholarly, creative, and professional approach to the film and television arts. The aim of the department is to train graduates who will eventually make original contributions in their chosen field.

The department offers graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Film and Television.

**Bachelor of Arts in Motion Picture/Television****Preparation for the Major**

Students are admitted for Fall Quarter only. Admission is competitive, and only a limited number of students can be accepted each year. Prior to entry, you must complete at least 84 quarter units (56 semester units) with a 3.0 GPA or better and the general education requirements of the School of Theater, Film, and Television. You are also required to submit a portfolio of original written work consisting of (1) a personal essay, (2) a critical essay on a film, and (3) a creative writing sample. For further information on admission, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622.

**The Major**

**Required:** Film and Television 130A, 130B, 175A-175B, 185, two film/television history courses from 106A, 106B, 106C, 108, 110A, two film/television theory and criticism courses from 107, 110B, 110C, 112, 113, 114, 116, and 18 to 24 units of film and television elective courses for a minimum total of 68 upper division units in the major. It is recommended that the majority of the required courses be completed during the junior year.

You should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Students are required to perform assignments on each other's projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Consult the *Schedule of Classes* for courses limited to majors only.

**Graduate Study**

The department offers the Master of Arts (M.A.), Master of Fine Arts (M.F.A.), and Doctor of Philosophy (Ph.D.) degrees in Film and Television.

**Admission**

Students are admitted for Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year in each program. The department does not have an application in addition to the one used by UCLA Graduate Application Processing, and no screening examination prior to admission is required. For further information, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622.

Additional admission requirements are noted under each specific program.

**Master of Arts Degree****Admission**

For the critical studies specialization, in addition to the UCLA graduate application, you must submit a sample of scholarly or critical writing, a statement of purpose, three letters of recommendation, Graduate Record Examination (GRE) scores, and proof of competence in English for international students whose native language is not English (e.g., TOEFL scores). Consult the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622, for further information.

**Major Fields or Subdisciplines**

The program requires that you be conversant in both film and television, as you are tested on each in the comprehensive examination.

**Research Tool Requirement**

You may be required to demonstrate competence in a foreign language if necessary to support the research in your area of study. The language requirement may be met by (1) passing the Graduate School Foreign Language Test (GSFLT) in French, Spanish, German, or Russian with a score of 500 or better, (2) completing a level five foreign language course or equivalent with a grade of C or better, or (3) passing a UCLA language examination given in any foreign language department.

In certain cases, with committee approval, courses in statistics or computer science may fulfill the research tool requirement.

**Course Requirements**

A minimum of nine courses is required, five of which must be 200-level courses in film and/or television history, theory, or criticism. Of the five courses, Film and Television 200, 206C, 208B, and 217 are required core courses. The remaining seminar must be selected from course 203, 206A, 208A, 208C, 209A, 209B, 209D, 210, 211A, 211B, 219, 220, 221, 222, 223, 270, 271, 276, 277, or 298A-298B (only as approved by the chair). All five graduate-level courses must be completed with a grade of B or better. You select electives to complete the minimum requirement of nine courses with the advice and approval of the film and television studies committee.

Eight units of courses 596A, 596B, 596C, and 598 may be applied toward the total course requirement for the degree; however, none of these courses may be applied toward the minimum graduate course requirement.

**Comprehensive Examination Plan**

The written examination consists of two days of testing, four hours each day, and examines a broad range of knowledge in film and television. After completion, your committee grades you either pass or fail. You may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the term in which it was first taken. The examination is required of all M.A. students applying to the Ph.D. program.

**Thesis Plan**

Under special circumstances and with the approval of the critical studies committee, you may propose a thesis in lieu of taking the comprehensive examination. Guidelines may be obtained from the chair of the critical studies program.

**Master of Fine Arts Degree****Admission**

Applicants with diverse backgrounds and undergraduate majors in areas other than theater, film, or television arts are encouraged. You must state clearly your degree objective (M.F.A.) and the area of specialization desired within the program: animation, film/television production, screenwriting, or producers program. All areas of specialization require three letters of recommendation.

If you intend to concentrate in film/television production, you must submit a description of the film or television project you may possibly undertake in graduate study. The description should be in proposal or treatment form, two to three pages in length.

If you intend to concentrate in writing, you must submit samples of creative writing such as screenplays, short stories, plays, poems, etc.

If you intend to concentrate in animation, you must submit a description of an animation

project you may possibly undertake during graduate study, preferably in a small storyboard form. Other creative work may be submitted.

If you intend to concentrate in the producers program, you may submit a portfolio of supporting material which shows evidence of creative background, or a substantial statement of purpose and résumé.

Consult the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622, for further information.

### Foreign Language Requirement

There is no foreign language requirement for the M.F.A. degree.

### Course Requirements

A total of 18 courses (72 units) is required, five of which must be at the graduate level. At least three courses must be in the 200 series in film history, aesthetics, or structure. Course requirements for each specialization are available from the Student Services Office.

Only 16 units of Film and Television 596 may be applied toward the total course requirement, and only eight of these units may be applied toward the minimum graduate course requirement. Only four units of course 596A and four units of course 596B may be taken prior to advancement to candidacy. Courses 596C through 596F may be taken only after advancement to candidacy.

Fieldwork and internships are not required but may be taken as courses which may be applied toward the degree.

### Comprehensive Examination Plan

The comprehensive plan is satisfied by fulfilling projects appropriate to your specialization. No later than the beginning of your final term in residence, you must submit for approval to the M.F.A. committee the appropriate documents for advancement to candidacy and a list of at least three faculty members who will serve on your committee. Consult the Student Services Office for further information.

### M.A.-African Area Studies/M.F.A.-Film and Television

The Department of Film and Television and the African Area Studies Program have an articulated degree program which allows students to combine study for the M.A. in African Area Studies and the M.F.A. in Film and Television. You must be accepted by both areas to pursue this degree program. Articulated programs do not allow course credit to be applied toward more than one degree. Interested students should write to the Graduate Adviser, Student Services Office, UCLA School of Theater, Film, and Television.

## Ph.D. Degree

### Admission

Completion of an M.A. or M.F.A. degree equivalent to that offered by the UCLA Department of Film and Television is required. In exceptional cases, students with an M.A. outside the field are considered for direct admission to the program. The dossier submitted for admission must contain a letter describing your reasons for wishing to earn the Ph.D., the master's thesis or writing samples that demonstrate a high level of ability to write criticism or historical narrative, three letters of recommendation, GRE scores, and proof of competence in English for international students whose native language is not English (e.g., TOEFL scores).

Further information is available from the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622.

### Major Fields or Subdisciplines

You are expected to understand film and television within their social contexts as significant forms of art and communication, and to achieve by disciplined study a mastery of their history, theory, and criticism.

### Foreign Language Requirement

Mastery of one foreign language is required and must be demonstrated by one of the following methods: (1) passing the Graduate School Foreign Language Test (GSFLT) in French, Spanish, German, or Russian with a score of 500 or better, (2) completing a level five foreign language course or equivalent with a grade of C or better, or (3) passing a UCLA language examination given in any foreign language department. When mastery of more than one foreign language is necessary for your dissertation study, you are required to take courses or pass examinations in the additional language(s). Normally, the required foreign language examinations must be passed by the end of your first year in residence.

### Course Requirements

During your first six terms in the Ph.D. program, you must take 13½ courses. During your first year in residence, Film and Television 211B, 215, and 273 must be completed, while course 274 is required in your sixth term. In addition to this core sequence, course 496 is also required. Further, you must select nine graduate elective courses, at least six of which must be from film and television.

You must select courses from three areas of concentration, chosen to broaden your familiarity and competence in related subject areas. A suggested list of concentrations is as follows: film theory, criticism, narrative studies, film and the other arts, authors, genres, documentary, film history, American film, European film, non-Western film and television, television studies, media and society, film and television as a business enterprise, and film and television production. It is expected that the

dissertation topic will emerge from one of the concentrations.

### Teaching Experience

Every student must complete Film and Television 496.

### Qualifying Examinations

At the end of your second term in residence, you must take a preliminary oral examination conducted by the critical studies committee. The committee tests your progress to date and determines your general fitness to continue in the doctoral program. You present a plan of study at this time; guidelines are available from the Student Services Office.

After completion of all language and course requirements, you are eligible to take and required to pass the Ph.D. written qualifying examination, which is given in Spring Quarter only and is administered in two four-hour segments on alternate days in the same week. You may be reexamined on any failed portions of the examination or the entire examination once only, when it is next regularly scheduled, or within the year following the term in which it was first taken. Information regarding the examination is available from the Student Services Office.

Following successful completion of the Ph.D. written qualifying examination, approval of a dissertation prospectus, and formation of a doctoral committee, you may take the University Oral Qualifying Examination which is devoted to the merits and feasibility of your dissertation prospectus. You are advanced to candidacy on successful completion of this examination.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Dissertation/Final Oral Examination

A dissertation demonstrating your ability to carry out independent and significant inquiry in a historical, theoretical, or critical field of film and/or television is required. Final award of the Ph.D. depends on successful completion of the dissertation.

A final oral examination, held after completion of the dissertation, may be required at the option of the dissertation committee.

### Upper Division Courses

**106A. History of the American Motion Picture (6 units).** Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the American motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

**106B. History of the European Motion Picture (6 units).** Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the European motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

- 106C. History of African, Asian, and Latin American Film (6 units).** Lecture/screenings, eight hours; discussion, one hour. Critical, historical, aesthetic, and social study — together with exploration of the ethnic significance — of Asian, African, Latin American, and Mexican films.
- 107. Experimental Film (6 units).** Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in the motion picture.
- 108. History of Documentary Film (6 units).** Lecture/screenings, eight hours; discussion, one hour. Philosophy of documentary approach in the motion picture. Development of critical standards and examination of techniques of teaching and persuasion used in selected documentary, educational, and propaganda films.
- 110A. History of Broadcasting.** Lecture/viewing, six hours; discussion, one hour. Critical survey of broadcasting here and abroad. Consideration of social responsibilities and educational implications of broadcasting.
- 110B. Problems and Issues in Broadcast Media.** Lecture, four hours; discussion, two hours; laboratory, to be arranged. Prerequisite: consent of instructor. Study of current issues and problems related to public and commercial broadcast programming and management, including analysis of contemporary criticism of broadcast media.
- 110C. World Media Systems.** Lecture/viewing, four hours; discussion, one hour. Prerequisites: course 110A or equivalent, upper division standing, consent of instructor. Global analysis of internal and external broadcasting services, with emphasis on their motives, origins, technologies, and programming. Special attention to political, economic, and regulatory constraints and common world media issues.
- 112. Film and Social Change (6 units).** Lecture/screenings, eight hours; discussion, one hour. Development of documentary and dramatic films in relation to and as a force in social development.
- 113. Film Authors (6 units).** Lecture/screenings, eight hours; discussion, one hour. In-depth study of a specific film author (director or writer). May be repeated once for credit with consent of department and topic change.
- 114. Film Genres (6 units).** Lecture/screenings, eight hours; discussion, one hour. Study of a specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social drama). May be repeated once for credit with consent of department and topic change.
- 115. Stylistic Studies for the Moving Image: Theory and Practice (6 units).** Lecture, four hours; screenings, four to eight hours. Drawing heavily on a wide array of historical examples and using laser disc technologies, examination of many expressive strategies potentially usable in creation of moving image art forms: iconography, editing, composition, kinesthetics, sound, narrative, discourse, and performance.
- 116. Film Criticism.** Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism.
- 126. Acting for Film and Television.** Laboratory, six hours. Prerequisite: consent of instructor. Projects in acting for television, video, and film. May be repeated twice for credit.
- 128. Media and Ethnicity.** Prerequisite: consent of instructor. Utilizing the Asian American experience, exploration of impact and uses of media on contemporary American ethnic communities. Role and techniques of media influence besides community utilization and production.
- CM129. Contemporary Topics in Theater, Film, and Television (2 units).** (Same as Theater CM129.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM229.
- 130A. Screenwriting Fundamentals (2 units).** Lecture, one hour. Corequisite for graduate students enrolled in course 431. Examination of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle, Egri.
- 130B. Screenwriting Fundamentals Workshop.** Discussion, three hours. Prerequisite: consent of instructor. Problems in film and television writing.
- 131. Nontheatrical Screenwriting for Film and Television (4 or 8 units).** Discussion, three hours. Prerequisite: consent of instructor. Research and writing of documentary, technical, educational, industrial, and propaganda scripts. May be repeated for a maximum of 12 units.
- 135. Advanced Screenwriting Workshop (8 units).** Workshop, three hours. Prerequisites: course 130B and/or consent of instructor. Course in film and television writing. Original screenplays to be developed. May be repeated twice for credit.
- 150. Basic Cinematography: Film and Electronic.** Lecture, three hours; laboratory, three hours. Prerequisite: consent of instructor. Limited to film and television majors. Introduction to image control in motion picture photography through exposure, lighting, and selection of film, camera, and lens. Supervised projects in photography to complement material covered in lecture.
- 151. Film and Television Image Laboratory.** Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Techniques of image manipulation, design, and art direction. May be repeated twice for credit (if repeated, students required to design and complete a short film).
- 152. Film and Television Sound Recording.** Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises.
- 153. Color Cinematography.** Lecture, three hours. Prerequisite: consent of instructor. History and theories of color photography, with emphasis on present-day methods in film and television production. Comparative study of additive and subtractive systems as employed by Technicolor, Ansco, Kodak, and others.
- 154. Film Editing.** Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Introduction to artistic and technical problems of film editing, with practical experience in editing of image and synchronous sound.
- 164. Film Directing.** Laboratory, to be arranged. Prerequisite: consent of instructor. Study of problems faced by a film director and various approaches to their solution. May be repeated twice for credit.
- 165. Television Directing.** Laboratory, six hours. Prerequisites: courses 130B, 185, consent of instructor. Introduction to and supervised exercises in television multicamera direction, with emphasis on creative use of cameras, sound, composition, and communication with those in front of and behind the camera. May be repeated twice for credit.
- 175A-175B. Undergraduate Film Production (8 units, 4 to 8 units).** Prerequisite: consent of instructor. Limited to film and television majors. Not open to students with credit for former course 166. **175A.** Lecture, four hours; laboratory, eight hours. Writing, preproduction, and production for a short 16mm nonsynch film. **175B.** Lecture, three hours; laboratory, eight hours. Completion of postproduction (editing, creation of nonsynch sound tracks) for short film begun in course 175A.
- 176A-176B. Undergraduate Production II (8 units each).** Lecture, three hours; laboratory, to be arranged. Prerequisites: courses 175A-175B, 185, consent of production faculty. Limited to film and television majors. Completion of a video production (no more than 20 minutes), including its writing, production, and editing.
- 177. Film and Television Acting Workshop (2 units).** Laboratory, four hours. Prerequisite: consent of instructor. Workshop providing opportunities for students to rehearse, perform, and evaluate their scenes under supervision and criticism of instructor. Three different production styles to which performers may need to adjust are (1) preproduction rehearsals with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit (to accommodate performer's circumstance).
- 178. Technical Film and Television Laboratory (2 or 4 units).** Laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Laboratory on various aspects of film and television production. May be repeated for a maximum of 12 units, but only eight units may be applied toward film and television major.
- 181A. Animation Design in Film and Television.** Lecture, three hours; laboratory, three hours. Prerequisite: consent of instructor. History and use of creative arts used in animation to form effective communication on film.
- 181B. Writing for Animation (4 to 8 units).** Lecture, six hours; laboratory, to be arranged. Prerequisites: course 181A, consent of instructor. Research and practice in creative writing and planning for animated film. May be repeated for a maximum of 16 units.
- 181C. Animation Workshop (4 or 8 units).** Lecture, six hours; laboratory, to be arranged. Prerequisites: course 181A, consent of instructor, storyboard at first class meeting. Organization and integration of various creative arts used in animation to form a complete study of a selected topic. May be repeated for a maximum of 16 units.
- 185. Undergraduate Television and Video Production (8 units).** Laboratory, six hours (additional hours to be arranged). Prerequisite: consent of instructor. Limited to film and television majors. Instruction and exercises in basic techniques of television and video production.
- 187A-187B-187C. Producing and Directing Field Television Programming (4 units, 6 units, 6 units).** Laboratory, three hours (additional hours to be arranged). Prerequisites: course 185, consent of instructor. **187A.** Introduction to field or remote broadcasting utilizing multiple- and single-camera video. Educational goals in student productions to be clarity of concept, simplicity in production, and meeting deadlines. **187B-187C.** Instruction and supervised productions of the remote experience, with focus on development and execution of concept. Experience closely patterned after professional experiences in working with talent, production venues, and production logistics of remote on-location video programs.
- 189. Overview of Motion Picture Industry.** Discussion, three hours. Prerequisite: consent of instructor. Evolution of economic and business structure of motion pictures from early beginnings to present, stressing methods of operation and influence of social and economic pressures that contributed to changing financial, distribution, and exhibition practices.
- 192. Film and Television Internship (4 to 8 units).** Field experience, to be arranged. Prerequisite: consent of instructor. Limited to senior film and television majors. Internship at film and television industry organizations. May be taken for a maximum of eight units.
- 193A. Film Curatorship.** Lecture, two hours; discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Study of principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to film archival-library design for research and teaching.

**193B. Television Curatorship.** Lecture, two hours; discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Study of principles and techniques of television curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to television archival-library design for research and teaching.

**199. Special Studies in Film and Television (2 to 8 units).** Prerequisites: senior standing, 3.0 GPA in major, consent of instructor. May be taken for a maximum of eight units.

## Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate adviser. Graduate courses are not open to undergraduate students.

**200. Bibliography and Methods of Research in Film and Television (6 units).** Discussion, three hours; laboratory, four to six hours (additional screenings and/or video laboratory work as required). Prerequisites: graduate standing, consent of instructor. Examination and study of research methods, techniques, and resources related to film and television research, including development of computer skills for preparation of bibliographies, on-line database searching and retrieval and, when appropriate, use of computer/video disc technology for research.

**203. Seminar: Film and Other Arts (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies in interrelationships between film and fine arts, or performing arts, or literature, with emphasis on ways these other arts have influenced film. May be repeated twice for credit.

**206A. Seminar: European Film History (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106B, graduate standing, consent of instructor. Studies in selected historical movements such as expressionism, socialist realism, surrealism, neorealism, New Wave, etc. May be repeated twice for credit.

**206C. Seminar: American Film History (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106A, graduate standing, consent of instructor. Study of central topics in American film history. May be repeated twice for credit.

**207. Seminar: Experimental Film (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies of form, style, politics, and history of experimental, innovative, avant-garde, and minority film and video.

**208A. Seminar: Film Structure (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Examination of various film conventions, both fictional and nonfictional, and of role of structure in motion picture.

**208B. Seminar: Classical Film Theory (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of principal topics and lines of inquiry that characterize theoretical writings of Arnheim, Eisenstein, Bazin, Mitry, etc.

**208C. Seminar: Contemporary Film Theory (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: course 208B, graduate standing, consent of instructor. Study of redefinition of aims and methods of film theory through contemporary writings.

**209A. Seminar: Documentary Film (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Nonfictional film and its relation to contemporary culture.

**209B. Seminar: Fictional Film (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Film as fiction and its relation to contemporary culture. May be repeated once for credit.

**209D. Seminar: Animated Film.** Discussion, three hours; laboratory, three hours. Prerequisites: graduate standing, consent of instructor. Critical study of animated film: its historical development, structure, style, use, and relation to contemporary culture.

**210. Seminar: Contemporary Broadcast Media.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Consideration of issues raised by recent developments in television and radio, commercial and public, associated with innovations in satellite, cable, and cartridge systems.

**211A. Seminar: Historiography.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to film and television M.A. candidates. Beginning examination of function and methods of writing film and television history as seen in works of key historians in the U.S. and Europe.

**211B. Seminar: Historiography.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to film and television Ph.D. candidates. Examination of function and methods of writing film and television history as exemplified by key works in this tradition, with attention to central issues of historical thought on the media.

**215. Seminar: Theory and Method.** Discussion, three hours. Limited to film and television Ph.D. candidates. Examination of major modes of theoretical reflection that bear on film and television through study of central texts of such traditions as phenomenology, auteurism, semiology, psychoanalysis, sociology, etc.

**217. Seminar: Television History.** Discussion, four hours; viewing, to be arranged. Prerequisite: course 110A or equivalent. Examination of origins and development of American television. Topics include industry structure, economics, policy and regulation, and programming.

**218. Culture, Media, and Society.** Lecture, four hours; screenings, to be arranged. Prerequisite: consent of instructor. Emphasis on "discourse of the other(s)." Thematization of the other is concerned with theories of "difference" rather than similarity or identity — with how other cultures enter into politics of representation and representation of politics through metaphors of (1) difference without opposition, (2) heterogeneity without hierarchy, and/or (3) otherness without ethnocentrism. Examination of how women, national minorities, and Third World peoples have been rendered others; place of the cinematic apparatus in this process and how academization of others is positioned vis-à-vis mainstream critical discourse.

**219. Seminar: Film and Society (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of ways film affects and is affected by social behavior, belief, and value systems; considered in relation to role of media in society. May be repeated once for credit.

**220. Seminar: Television and Society.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of ways television forms affect and are affected by social behavior, belief, and value systems; study of technological and economic aspects of the medium. May be repeated once for credit.

**221. Seminar: Film Authors (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Intensive examination of works of outstanding creators of films. May be repeated twice for credit.

**222. Seminar: Film Genres (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.

**223. Seminar: Visual Perception.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Aesthetic, psychological, and physiological principles of vision as they relate to ways in which man "sees" film and television, with emphasis on ways in which these are different from other visual experiences.

**224. Computer Applications for Film Study.** Survey of computer applications relevant to film study, principally computer-video disc systems and image capture technology.

**CM229. Contemporary Topics in Theater, Film, and Television (2 units).** (Same as Theater CM229.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM129.

**247. Production Planning in Film and Television.** Discussion, three hours. Prerequisite: consent of instructor. Analysis of procedures and problems in preparing a script for film or television production, with emphasis on role of production manager in breaking down scripts, setting up shooting schedule, planning postproduction, and preparing budgets.

**268. Seminar: Short Film.** Lecture, two hours; discussion, two hours. Prerequisites: graduate standing, consent of instructor. Study of problems presented by conceptualization of form and structure of the short film, with classical and student examples.

**270. Seminar: Film Criticism (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of key aesthetic questions of analysis and evaluation in relation to central works of motion picture criticism. May be repeated once for credit.

**271. Seminar: Television Criticism.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Analysis of major forms of television production and criticism it has elicited. May be repeated once for credit.

**273. Seminar: Contemporary Film and Television Criticism (6 units).** Discussion, three hours; film and television screenings, four to six hours. Limited to film and television Ph.D. candidates. Study and practice of analytic and critical response, with emphasis on contemporary film and television.

**274. Seminar: Research Design.** Discussion, three hours. Prerequisite: second-year standing in film and television Ph.D. program. Examination of general principles that govern formulation of major research projects and preparation of a prospectus for Ph.D. dissertation.

**276. Seminar: Non-Western Films.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of aesthetic and ideological impulses of selected films from Asia, Africa, and Latin America.

**277. Seminar: Narrative Studies.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of writings on theory of narrative structure and their significance for analysis of film forms.

**289A-289B-289C. Current Business Practices in Film and Television.** Prerequisites: course 247, graduate standing, consent of instructor. Examination of current status of financing/production/distribution agreements, union agreements, music, copyright, etc., necessary to understand the film and television industry. May be taken in any sequence.

**291A-291B-291C. Role of Management in Entertainment Industry.** Prerequisites: course 247, graduate standing, consent of instructor. Study of artistic, social, and economic criteria for decision making in production and distribution of motion pictures and entertainment programs. May be taken in any sequence.

**292A-292B-292C. Network Television Management and Decision Making.** Lecture, two hours; discussion, two hours. Prerequisites: course 247, graduate standing, consent of instructor. Study of business structure and economic, social, and artistic criteria currently utilized by network television management. Only eight units may be taken for credit.

**293. Seminar: Film and Television Curatorship.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study and practice of issues in archival research and administration.

**298A-298B. Special Studies in Film and Television (2 to 4 units each).** Lecture/discussion. Prerequisites: graduate standing, consent of instructor. Seminar study of problems in film and television, organized on topic basis. May be repeated once for credit.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Film Image Design Laboratory.** Lecture, two hours; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Conception and design of nonnarrative film imagery. One-minute experiments in the relation of meaning to technique, including manipulation of optics, photochemistry, elements of electronic processes, and display of time and motion. May be repeated once for credit.

**402A-402B. Advanced Fiction Workshops (8 units each).** Laboratory, 12 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to 10 film and television graduate students per section. Production of a 10-minute fictional film or video project. Students budget, preplan, and complete photography on location and/or in studio by end of first term. In second term students must complete postproduction of their projects.

**403A-403B-403C. Advanced Documentary Workshops (4 to 8 units each).** Lecture/discussion/laboratory, 16 to 24 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to film and television graduate students. Production of advanced individual documentary film or video projects. Students conceptualize, research, write, shoot (on location), and edit projects to completion. May be repeated once for credit.

**404A-404B. Advanced Abstract/Experimental Media Workshops (8 units each).** Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to 10 students per section. Production of a 20-minute abstract or experimental film, video, or multimedia project. Students plan, design, and shoot their projects in first term and work as crew for each other in rotating assignments. In second term students must complete postproduction of their projects.

**405. Television Production Workshop (8 units).** Laboratory, eight hours; other, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Basics of television production and direction, focusing on studio multiple camera with minimal use of remote camera. Use of various formats of video production, including scripted and nonscripted projects, culminating in a narrative three-camera project.

**406. Experimental Video Workshop.** Laboratory, six hours; other, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Introduction to independent and experimental video with examination of impact of new video technologies in television, covering concepts of video art, new television, digital video, high-definition TV, and film and tape postproduction.

**407. Video Documentary Workshop (8 units).** Laboratory, 12 hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Exploration of documentary video, including screening a variety of international works and producing a short documentary project using single-camera field production techniques.

**408A-408B. Video Editing.** Discussion, four hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Individual instruction in electronic editing. **408A.** On-Line Editing; **408B.** Off-Line Editing.

**409. Directing the Actor for the Camera Workshop.** Workshop, six hours; laboratory, to be arranged; laboratory preparation, two to four hours. Prerequisite: consent of instructor. Limited to film and television M.F.A. production program graduate students. Team-taught with five weeks designed to give the director actor/camera techniques, and five weeks to offer basic strategies to elicit good performances from actors. Emphasis on problems faced when directing actors for film.

**410A-410B-410C. Film Production Workshops (8 units, 12 units, 8 units).** (Formerly numbered 401A-401D.) Lecture/discussion/laboratory, 24 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, consent of instructor. Limited to film and television graduate students. Production workshop spanning three terms, designed to give hands-on experience in all aspects of film production (the tools and a practicum of the medium) as each student writes/directs/edits a 10-minute film.

**417. Lighting for Film and Television (6 units).** Lecture, three hours; discussion, one hour; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Lectures, supervised exercises on a stage or in an exterior, screenings of scenes, and discussions aimed at learning to master the lighting to create an appropriate mood or atmosphere of a premeditated scene recorded on a film or through an electronic system. May be repeated twice for credit.

**418. Cinematography and Directing (12 units).** Lecture, six hours; discussion, two hours; laboratory, 16 hours. Prerequisites: course 417, consent of instructor. Limited to film and television graduate students. Supervised filming of short dramatic projects on the sound stage and at exterior locations that explore the complexity of the process, emphasizing balance and collaboration essential to both directing and photography in its varied technical, production, and creative aspects.

**419. Advanced Cinematography.** Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 417, 418, consent of instructor. Limited to film and television graduate students. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses.

**423A. Direction of Actors for Film and Television.** Lecture, four hours; workshop. Prerequisites: first film project, consent of instructor. Limited to film and television graduate students. Required of all production majors shooting a fiction thesis. Exercises in analysis of script and character for purpose of directing actors in film and television productions. Emphasis on eliciting best possible performance from the actor. May be repeated twice for credit.

**423B. Advanced Direction of Actors for Film and Television.** Studio workshop, six hours. Prerequisites: course 423A, consent of instructor. Limited to film and television graduate students. Advanced study and practice of directing actors before a camera. Emphasis on developing techniques to immediately enhance communication between director and actor on the set in order to maintain continuity from shot to shot.

**431. Introduction to Film and Television Screenwriting.** Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Introductory course in problems of film and television screenwriting.

**433. Writing the Short Screenplay.** Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Conception, development, and writing of a 20-minute film or video script in either fiction, documentary, or experimental medium, to be produced in one of the advanced workshops.

**434. Advanced Screenwriting (8 units).** Discussion, three hours. Prerequisites: course 135, consent of instructor. Advanced problems in writing of original film and television screenplays. May be repeated twice for credit.

**435. Advanced Writing for Short Film and Television Screenplays.** Discussion, three hours. Prerequisites: courses 402A-402B or 403A-403B or 404A-404B, consent of instructor. Limited to film and television graduate students. Required of students planning fiction projects. Final screenwriting course in which students write their thesis project (no longer than 30 minutes in length).

**437. Nontheatrical Writing for Film and Television.** Discussion, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Advanced problems in the field of documentary and special feature programs, with emphasis on research and preproduction. May be repeated for a maximum of 16 units.

**451. Advanced Design for Film and Television.** Laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Advanced study and practice of techniques and methods of design for motion pictures. Art direction for advanced workshop productions. May be repeated for a maximum of 12 units.

**452A. Film and Television Sound Recording.** Lecture, three hours; laboratory, four hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Principles and practices of film and television sound recording, including supervised exercises.

**452B. Music Recording Workshop.** Lecture, four hours; laboratory, eight hours. Prerequisite: consent of instructor. Supervised exercises in studio music recording techniques, with emphasis on special requirements for motion pictures and television.

**452C. Film and Television Sound Rerecording.** Lecture, three hours; laboratory, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Recording of sprocketed media: basics of mixing 16mm and 35mm film soundtracks to single stripe or three stripe magnetic film. Overview of prepping tracks for final mix. Fundamentals of Automatic Dialogue Replacement and Foley. Rerecording and video/audio postproduction of unsprocketed media: emphasis on multitrack tape and nonlinear disk-based recording and editing systems. Includes all track building approaches, from production sound electronic editing, Automatic Dialogue Replacement, Foley, backgrounds, hard FX and MX through final mix. Techniques of combining sprocketed and unsprocketed media in postproduction.

**454A-454B. Advanced Film Editing.** Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor based on submission of a rough cut and/or copy of screenplay. Limited to film and television thesis and advanced project students in postproduction phase of thesis or advanced project. Organization and operation of postproduction process.

**459A-459B. Directing for Film and Television.** Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in theater, film, and television.

**464A-464B. Advanced Film Directing (8 units each).** Hours to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Special problems in direction of fictional and documentary films.

**466A-466B. Advanced Professional Video Workshops (8 units each).** Lecture, three hours; laboratory, to be arranged. Prerequisites: courses 405, 410A-410B-410C, 423A, consent of instructor. Limited to film and television graduate students. Hands-on problems in working with various interrelated disciplines in a professional production experience, including interaction with students of design and acting from Department of Theater.

**475. Film I (8 units).** Discussion, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of basic techniques of film production, including preproduction planning and production of a group short film.

**476. Video I (8 units).** Discussion, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of basic techniques of television and video production, including completion of one or more projects.

**478. Video II (8 units).** Discussion, three hours; laboratory, to be arranged. Prerequisites: courses 185, 405 or 476, graduate standing, consent of instructor. Group experience in video production with each member rotating on crew work in production of individual or collective projects.

**482A-482B. Advanced Animation Workshops (4 or 8 units each).** Lecture, three hours; laboratory, to be arranged. Prerequisites: courses 181A, 181B, 181C, consent of instructor. Advanced organization and integration of various creative arts used in animation, resulting in production of a complete animated film. May be repeated for a maximum of 16 units.

**486. Directed Individual Study: Preparation to Advance to Candidacy for M.F.A. in Production (2 to 4 units).** Preparation for thesis production, four to eight hours. Prerequisites: graduate standing in M.F.A. production program, consent of instructor. Specialized development and organization of proposed thesis project prior to advancement to candidacy. Should be taken term before student plans to advance to candidacy.

**487. Directed Individual Study: Postproduction Laboratory.** Laboratory, eight hours. Prerequisites: graduate standing in M.F.A. production program, consent of instructor. Completion of projects in final stages of postproduction. May not be repeated.

**489A. Computer Animation in Film and Video (4 to 8 units).** Lecture, three hours; laboratory, four to eight hours; other, to be arranged. Prerequisites: courses 181A, 181C, a completed animated film, consent of instructor. Instruction in and supervised production of computer animation. May be repeated for a maximum of 16 units.

**489B. Production in Computer Animation (4 or 8 units).** Lecture, three hours. Prerequisite: course 489A. Instruction in creation, preparation, and production of a complete and original computer animation film or tape. May be repeated for a maximum of 16 units.

**496. Practice of Teaching Film and Television (2 units).** Discussion. Required once of all teaching assistants or associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to the teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated. S/U grading.

**498. Professional Internship in Film and Television (4, 8, or 12 units).** Full- or part-time at a studio or on a professional project. Prerequisites: graduate standing, advanced standing in M.F.A. program, consent of instructor. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Individual Studies: Research (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596B. Directed Individual Studies: Writing (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596C. Directed Individual Studies: Directing (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596D. Directed Individual Studies: Design (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596E. Directed Individual Studies: Acting (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596F. Directed Individual Studies: Production (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**597. Preparation for Ph.D. Qualifying Examinations in Film and Television (2 to 12 units).** Hours to be arranged. May be taken for a maximum of 12 units. S/U grading.

**598. M.A. Thesis in Film and Television (2 to 12 units).** Hours to be arranged. Prerequisite: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be taken for a maximum of 12 units. S/U grading.

**599. Ph.D. Dissertation in Film and Television (2 to 12 units).** Hours to be arranged. Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated. S/U grading.

## Theater

103 East Melnitz Building, (310) 825-5761

### Professors

Gilbert Cates, M.A., *Dean*  
Michael J. Hackett, Ph.D.  
Robert Israel, M.F.A., *Cochair*  
Neil Jampolis, B.F.A.  
Dunya Ramicova, M.F.A.  
Mel Shapiro, M.F.A.  
William D. Ward, M.F.A.

### Professors Emeriti

Walden P. Boyle, Ph.D.  
John R. Cauble, M.A.  
Donald B. Crabs, M.A.  
Burdette Fitzgerald  
Henry Goodman, Ph.D.  
Robert H. Hethmon, Ph.D.  
John H. Jones, M.A.  
Joanne T. McMaster, M.F.A.  
Sylvia E. Moss, B.A.  
Carl R. Mueller, Ph.D.  
George L. Schaefer, B.A.  
Norman F. Welsh, B.A.  
William T. Wheatley, Ph.D.

### Associate Professors

Alan M. Armstrong, M.F.A.  
Gary A. Gardner, Ph.D.  
Patricia M. Harter, Ph.D.  
Michael S. McLain, Ph.D.  
Thomas J. Orth, M.F.A.  
Beverly J. Robinson, Ph.D.  
Rich Rose, M.F.A., *Cochair*  
Carol J. Sorgenfrei, Ph.D.  
Margaret L. Wilbur, M.F.A.

### Assistant Professor

Edit Villarreal, M.F.A.

### Lecturers

John Brandt, A.A.  
Ed DeShae  
Jacques Heim  
Gordon Hunt, B.A.  
Daniel A. Ionazzi, M.B.A.

### Visiting Professors

Michael Bloom, Ph.D.  
David Craig  
Gordon Davidson, M.A.  
Katherine Helmond  
Leon Katz, Ph.D.  
David Schweizer, B.A.  
Peter Sellars, B.A.

### Visiting Associate Professors

Ellen Geer  
Hanay Geigomah, B.F.A.  
Salome Jens  
Jose Luis Valensuela

### Adjunct Assistant Professors

Oskar Eustis  
Madeline Kozlowski, M.F.A.  
Anna Krajewska-Wieczorek, Ph.D.  
Roberta Levitow, B.A.  
Corey Beth Madden, B.A.  
Tim Miller  
Bill Reichblum, M.F.A.

## Scope and Objectives

UCLA's theater program offers comprehensive training for the profession, as well as serious study of theater's 2,000-year history and rich literature. Drawing on this vibrant heritage, the curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores theater as a forum for reflecting the human experience as revealed through the dynamics of theater production. With this in mind, students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater.

Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

At the undergraduate level, students receive education in acting, design, or the comprehensive study of theater, all within the rigorous liberal arts framework of the B.A. degree. At the graduate level, students in the M.F.A. program develop as artists and are given preprofessional training in the skills of theater, while Ph.D. students engage in critical investiga-

tions of the art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

## Bachelor of Arts Degree

The Bachelor of Arts degree provides a liberal education and preprofessional training in a program that combines the study of the arts, humanities, and sciences with exploration of the principal areas of theater practice — performance, playwriting, directing, design, technical theater, and the history and criticism of theater and drama. The program is designed to ensure that students will graduate with a sound humanistic and experiential base for further pursuits in education and in life beyond the University.

The *comprehensive program* provides a liberal education by combining critical study of theater with experiential practice in one or more of its component parts. Students explore each of the principal areas of theater practice — acting, directing, design, playwriting, and production — to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study. At the upper division level, students choose from an array of advanced courses in playwriting, directing, and theater history and drama, leading to a culminating research or creative experience in the senior project.

The *acting program* includes specialized and advanced courses that prepare students for careers in performance. Lower division courses introduce improvisation, sense memory, actions, objectives, and character work. There is some performance in projects, but emphasis is on class and studio work. Upper division advanced courses explore verse, scene study, comedy, cabaret, and performance for film and video. Performance is accentuated in the senior year which culminates in a senior production project combining research of character and play with performance.

The *design and production program* introduces design principles and investigates the design of scenery, lighting, costumes, and sound for theater, film, and television in lower division courses. Three design concentrations are available at the upper division level — scenic and lighting design, scenic and costume design, and lighting and sound design. Students select from an array of design skills courses to develop proficiency in essential areas of rendering, drafting, painting, and technology. Courses in art, history, and philosophy build an understanding of the social history of visual ideas. A sequence of courses in each concentration examines design principles and practice specific to each field, leading to assignment as a member of a production design team and the preparation and realization of designs for a production. The senior project includes a design portfolio project which culminates in the preparation of complete designs

and drawings for a production and the assembly of a design portfolio and résumé.

## Admission

All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following Fall Quarter. There are no mid-year admissions. On receipt of your application the department notifies you of the screening process, which includes submission of a written personal essay, letters of recommendation, and an interview and/or audition. Information on the scheduling of the audition/interview is sent to each applicant with the departmental request for supplemental materials. Every applicant must complete the interview portion of the application process. The audition is optional for all students except those wishing to qualify for admission on the basis of their ability in performance. Applicants may submit materials for consideration in one or more of the following areas: acting, directing, design and technical theater, playwriting, and history and criticism.

Students admitted to the theater major for Fall Quarter 1993 and thereafter are expected to fulfill the requirements listed below. Continuing students admitted prior to Fall Quarter 1993 should consult the 1992-93 *UCLA General Catalog*.

## Preparation for the Major

*Required:* Theater 11, 13, 14A-14B-14C, 15, 50. Students in the comprehensive and design programs must also take course 12; those in the acting program must also take 21A-21B.

## The Major

*Required:* A total of 58 upper division units, including Theater 101A-101B-101C and 150, and a specialization (42 units) from one of the following: (1) *acting program* — courses 115, 116A-116B-116C, 124A, 124B, 125A, 125B, 126A, 126B-126C, 127A-127B-127C, 180; (2) *comprehensive program* — courses 106, 180, and 34 elective units; (3) *design and production program* — course 159, six units of design skills courses, and one of the following emphasis sequences: (a) 151A-151B, C151C, 152A-152B, C152C, (b) 151A-151B, C151C, 153A-153B, C153C, (c) 152A-152B, C152C, 154A-154B, C154C.

Through certain of these required courses, you are responsible for completing specific production assignments related to production activity of the theater curriculum.

## Graduate Study

The department offers three-year professional training programs leading to the Master of Fine Arts (M.F.A.) in Theater, with specializations in acting, directing, and design and production (scenic design, costume design, lighting design, sound design, or production management/technology). The producers program and playwriting are two-year specializations that also lead to the M.F.A. in Theater.

The department also offers the Doctor of Philosophy (Ph.D.) in Theater, with a history/criticism emphasis, and the Master of Arts (M.A.) degree which may be obtained only en route to the Ph.D.

## Admission

Students are admitted for Fall Quarter only. Admission is competitive, and only a limited number of students are accepted in each program. The department does not have an application in addition to the one used by UCLA Graduate Application Processing. No screening examination prior to admission is required; however, the screening process may involve letters of recommendation, an audition, portfolio review, or interview. For further information, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622. Applicants are advised that all records submitted in support of an application, including creative work, are not returnable, and the department is not responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, you must (1) have completed an undergraduate major in any area comparable to that offered at UCLA and (2) provide the department with at least three letters of reference and a statement of purpose.

Additional admission requirements are noted under each specific program.

## Master of Arts Degree

### Admission

*Note: Effective Fall Quarter 1993 the department has announced it will not accept applications to the M.A. program for Fall Quarter 1994. Interested students should contact the Student Services Office for further information.*

The M.A. degree is awarded only in conjunction with study in the Ph.D. degree program to students who have successfully completed one year of graduate work and all requirements for the M.A. degree, and who either do not wish to continue or are not passed by the Ph.D. committee to continue in the doctoral program. Requirements include scores on the Graduate Record Examination (GRE), a sample of scholarly or critical writing, a statement of purpose, and other information (résumé, portfolio, script, production book, interview, etc.) that may be required to establish the quality of your work in the program. Consult the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622, for further information.

### Major Fields

The program leads to a general graduate degree, though there are opportunities, through your electives and thesis or research paper topics, to stress a particular interest such as acting,

design, directing, dramatic writing, and theater history and criticism.

### Foreign Language Requirement

The program does not require a foreign language, but you are urged to develop proficiency in either French, German, Spanish, or Italian.

### Course Requirements

You are required to complete a minimum of 10½ courses (42 units), five of which must be at the graduate level, in at least one year of intensive study, laboratory exercises, and research leading to the successful completion of either the thesis or comprehensive examination plan. You are required to take an active part in the production program of the department as partial fulfillment of the degree requirements.

The required courses are Theater 245B and C272 (a two-unit course to be taken three times). After consultation with your adviser, you select eight other courses, including one graduate course in theater history (205A, 205B, or 205C), one graduate course in theater production theory (241, 290A, or 290B), and six other courses which emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs are required to take courses 205A-205B-205C.

Only eight units from the 596 series may be applied toward the total course requirement, and only four of these units may be applied toward the minimum graduate course requirement. No 598 courses may be applied toward the total course requirement.

### Thesis Plan

Before beginning work on the thesis, you must obtain approval of a subject dealing with the history, aesthetics, criticism, or techniques of the theater and a general plan of investigation from the Ph.D. critical studies committee. A thesis committee is formed when you are within one term of completing the coursework, at which time you are eligible to advance to candidacy. You must present the adviser and the committee with a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If your thesis fails to pass the committee, you may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.

### Comprehensive Examination Plan

If you elect this plan, you must complete an examination consisting of a research paper which may be associated with four units of Theater 596A, a one-hour oral defense of the paper, and a two-part, six-hour written examination covering theater history and production practice. The examination normally occurs during your final term in residence, at which time you should have advanced to candidacy.

## Master of Fine Arts Degree

### Admission

Students are selected on the basis of ability to work on an advanced level and professional promise. At the time of application to the Graduate Division, you must indicate the M.F.A. degree objective and satisfy the specific admission requirements of one of the following areas of specialization within the M.F.A. program.

*Acting* — Submit a complete résumé and audition for the M.F.A. committee or its representative.

*Design and Production (scenic, costume, lighting, production management/technology, or sound)* — Submit a résumé and related coursework; provide evidence of ability appropriate to each emphasis as demonstrated by sketches, renderings, photographs, production books, plots, technical papers, reviews, or other appropriate exhibits. In addition to presentation of the portfolio, an interview may be required by the department.

*Directing* — Submit a résumé and evidence of production work, including prompt books, photographs, reviews, critical commentaries; provide an essay outlining a directorial approach to a selected play. An interview may be required by the department.

*Playwriting* — Submit a résumé and examples of creative writing which may include dramatic writing or narrative fiction such as full-length plays, one-act plays, and screenplays. At least one stage play must be included. An interview may be required by the department.

*Producers Program* — Submit a résumé, examples of related coursework, and a statement outlining your areas of specific interest and intent. An interview may be required by the department following initial application review by the faculty committee. *Note: Effective Fall Quarter 1993 the department has announced it will not accept applications to the M.F.A. producers program for Fall Quarter 1994. Interested students should contact the Student Services Office for further information.*

In addition, all applicants must submit three letters of recommendation. Graduate Record Examination (GRE) General Test scores are optional. Consult the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622, for further information.

### Major Fields or Subdisciplines

The areas of specialization for the M.F.A. program are as specified above.

### Foreign Language Requirement

There is no foreign language requirement for the M.F.A. degree.

### Course Requirements

In acting, a total of 23½ courses (94 units) is required; in directing, a total of 26½ courses (106 units); and in design and production (sce-

nic design, lighting design, costume design, sound design, and production management/technology), a total of 24 courses (104 units). Only 12 units of course 596 may be applied toward the total course requirement. You must take 20½ graduate-level courses for the acting specialization and 23½ for the directing and design and production specializations.

Specific course requirements for each specialization are available in the Student Services Office.

**Fieldwork and Internships** — Students in several of the specializations may fulfill some course requirements in the field through internships with professional theaters and other organizations.

### Comprehensive Examination Plan

The comprehensive plan is satisfied by fulfilling a series of creative projects appropriate to your specialization. On completion of the final creative project or in the last term in residence, whichever is last, you must file for advancement to candidacy. The committee then reviews and evaluates your record. Your participation in the final review is at the discretion of the committee.

## Ph.D. Degree

### Admission

*Note: Effective Fall Quarter 1993 the department has announced it will not accept applications to the Ph.D. program for Fall Quarter 1994. Interested students should contact the Student Services Office for further information.*

You must submit evidence of potential as a practicing scholar as indicated by (1) breadth and depth of advanced coursework in history, theory, and criticism, (2) imagination and quality of scholarly writing, and (3) academic achievements and potential as indicated by grade-point average, Graduate Record Examination (GRE) scores, awards, scholarships, fellowships, etc. Additionally, you should demonstrate awareness and experience in one of the major fields of the theater, such as directing, dramaturgy, or design.

Students may be admitted with an M.F.A., M.A., or B.A. degree. The dossier submitted for admission must contain a statement of purpose indicating areas of interest appropriate to the doctoral degree, as well as a thesis or other writing samples.

Further information is available from the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90024-1622.

### Major Fields or Subdisciplines

The Ph.D. student in theater is expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production, and dramatic literature.

## Foreign Language Requirement

Mastery of one foreign language approved by the Ph.D. committee is required and must be demonstrated by one of the following methods: (1) passing the Graduate School Foreign Language Test (GSFLT) in French, Spanish, German, or Russian with a score of 500 or better, (2) completing a level five foreign language course or equivalent with a grade of C or better, or (3) passing a UCLA language examination given in any foreign language department. The foreign language requirement may be completed after admission to the Ph.D. program; however, you are encouraged to complete five quarters or three semesters of a foreign language appropriate to Ph.D. research objectives prior to admission. Language courses taken toward fulfillment of the language requirement cannot be applied toward the degree.

## Course Requirements

During the first six terms (two academic years), you must complete a minimum of 12 graduate courses (200 or 500 level) and two professional courses (Theater 495A and 495B). Courses 216A, 216B, 216C are required. The remaining nine courses are elective graduate courses, seminars, or tutorials. Of these electives, no more than four may be taken outside the department and no more than two may be tutorials. In addition, the distribution of electives must include at least one each in the areas of Western or non-Western theater study. These electives must augment the required courses so as to constitute a definable area of study associated with the dissertation topic. The dissertation is a historical, critical, analytical, or experimental study of a theater topic.

## Teaching Experience

Every student must complete Theater 495A and 495B.

## Qualifying Examinations

At the end of your second term in residence, you must take a preliminary oral examination administered by a representative committee of the faculty. The committee specifies the area of review, tests your background preparation and progress to date, and determines your general fitness to continue in the doctoral program.

After completion of all language and course requirements, approval of a dissertation prospectus, and appointment of a dissertation committee, you are required to pass a written qualifying examination administered during four successive days. Information regarding the examination is available from the Ph.D. committee. With approval of the department chair, you may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the term in which it was first taken.

After you pass the written examination, a doctoral committee is formed to administer the

University Oral Qualifying Examination. You are advanced to candidacy only on successful completion of this examination.

## Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

## Dissertation/Final Oral Examination

A dissertation demonstrating your ability to carry out independent and significant inquiry in a historical, theoretical, or critical field of theater is required. Final award of the Ph.D. depends on successful completion of the dissertation.

A final oral examination, held after completion of the dissertation, may be required at the option of the dissertation committee.

## Lower Division Courses

**11. Contemporary Theater Issues.** Lecture, three hours. Investigation of theater in contemporary American culture and society. Topics illustrated by faculty and guest speakers, visits to off-campus theaters, and reading from contemporary plays.

**12. Introduction to Performance.** Lecture, two hours; studio, four hours. Investigation of phenomenon of performance and role of the performer in the theatrical event, including interpretation of drama through performance. Examination of various forms of theatrical performance and styles of expression, and development of acting, voice, and movement skills.

**13. Play Reading and Analysis.** Lecture, three hours. Provides a base for subsequent study in theater. Development of techniques of play reading and habits of scholarship useful to further study in each of the theater's subdisciplines, including acting, directing, design, playwriting, and critical study.

**14A-14B-14C. Introduction to Design.** Lecture, three hours; studio, six hours. Exploration of visual interpretation of drama. Study of styles and techniques of design, collaborative role of the designer, principles of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundwork for further study.

**15. Introduction to Directing.** Lecture, two hours; studio, four hours. Enforced requisite: course 11. Investigation of role of the director in theatrical production and theories of play direction, with emphasis on analysis and interpretation of dramatic work and its realization in production.

**20. Acting Fundamentals.** Lecture/laboratory. Required of theater majors. Introduction to interpretation of drama through art of the actor. Development of individual insights, skills, and disciplines in presentation of dramatic material to an audience.

**21A-21B. Introduction to Acting, Voice, and Movement (2 units each).** Studio, six hours. Study of beginning acting technique: improvisation, games, and sense memory with examination of action and objective exercises, outline of Stanislavsky system, and development of voice and movement skills.

**28A-28F. Acting, Voice, and Movement Workshops I (2 units each).** Studio, three to six hours. Study of beginning acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units.

**50. Theater Production and Performance (2 units).** Studio, six hours. Laboratory experience in various aspects of theater production, including performance in a project or production, stage management, or member of a crew. May be repeated for a maximum of eight units.

## Upper Division Courses

**101A-101B-101C. History of World Theater and Drama.** Lecture, three hours; discussion, one hour. Survey of history of influence of different cultures, traditions, and technologies on development of theater as a social institution. **101A.** Ritual and Religious Drama. Study of origins of theater and drama from oral tradition, myth, storytelling, Shamanism, collective ritual, Greek festival drama, and cloister drama of different cultures. **101B.** Rise of Secular Drama. Study of Renaissance secular theater and drama in Europe, Asia, Africa, and the New World. **101C.** Emergence of Realism and 20th-Century Responses. Study of realism and subsequent departures from realism in theater and drama.

**102A. Theater of Japan.** Lecture, three hours. Exploration of major theater traditions of Japan from emergence of earliest theatrical activity to the present, including investigation of Noh, Bunraku, and Kabuki performance traditions.

**102B. Theater of Southeast Asia.** Lecture, three hours. Examination of representative theatrical genre from various geographical areas in Southeast Asia to illustrate importance and contribution that theater plays in society.

**102C. Cross-Cultural Currents in Theater.** Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to naturalism. Analysis of historical materials and dramatic texts to investigate cultural, aesthetic, ethical, and social implications of borrowing from other cultures.

**102E. Theater of Non-European World.** Lecture, three hours; discussion, one hour. Survey of theater forms of non-European world in which primary attention is concentrated on examination and analysis of traditional dance-drama and puppet theaters of East Asia, Southeast Asia, South Asia, the Middle East, and Africa. Analogous forms from European theater included for comparative purposes.

**M103A. African American Theater History: Slavery to Mid-1800s.** (Formerly numbered 103A.) (Same as Afro-American Studies M103A.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s. (F)

**M103B. African American Theater History: Minstrel Stage to Rise of the American Musical.** (Formerly numbered 103B.) (Same as Afro-American Studies M103B.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical. (W)

**M103C. Origins and Evolution of Chicano Theater.** (Same as Chicana and Chicano Studies M103C.) Lecture, three hours. Prerequisite: upper division standing. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

**M103D. Contemporary Chicano Theater.** (Same as Chicana and Chicano Studies M103D.) Lecture, three hours. Prerequisite: upper division standing. Study of recent trends in Chicano theater as reflected in works of contemporary Chicano dramatists and theater artists.

**M103E. African American Theater History: The Depression to the Present.** (Formerly numbered 103E.) (Same as Afro-American Studies M103E.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present. (Sp)

**103F. Native American Theater.** Prerequisite: consent of instructor. Study of American Indian theater as an evolving art form. (Sp)

**104A-104B-104C. History of American Theater.** (Formerly numbered 104D-104E-104F.) Lecture, three hours. Study of history of influence of different cultures, traditions, and technologies on development of theater as a social institution in America. **104A.** Revolutionary War to the Civil War; **104B.** Civil War to WWI; **104C.** WWI to the Present.

**105. Main Currents in Theater.** Lecture, three hours. Critical examination of leading theories of theater from 1887 to the present. Study and discussion of modern styles of production.

**106. History of American Theater and Drama.** Lecture, three hours. Survey of key works of American dramatic literature and landmarks of American theater history.

**107. Drama of Diversity.** Lecture, three hours. Investigation of diversity in American society as manifested in dramatic works and theatrical presentations.

**111A. Selected Topics on History of European Theater from Primitive Times to 1640.** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Greeks to 1640. May be repeated twice for credit.

**111B. Selected Topics on History of European Theater from 1640 to 1900.** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Renaissance through 1900. May be repeated twice for credit.

**111C. Selected Topics on History of European Theater from 1900 to the Present.** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the baroque to the present. May be repeated twice for credit.

**115. Acting, Voice, Movement I.** Studio, 12 hours. Prerequisites: courses 21A-21B. Further study of beginning acting technique and development of acting, voice, and movement skills culminating in a recital project.

**116A-116B-116C. Acting, Voice, Movement II (2 units each).** Studio, six hours. Prerequisites: courses 21A-21B. Development of acting skills through scene study, use of self, and personalization. Examination of characterization. Exercises and their application to contemporary American scenes. Development of speech, voice, and movement skills.

**118A. Creative Dramatics.** Lecture/laboratory. Studies of principles and procedures of improvisational approach to drama as done with children from nursery school to junior high.

**118B. Advanced Creative Dramatics (2 to 4 units).** Lecture, four hours; other, to be arranged. Prerequisite: consent of instructor. Practical application of creative drama process. Exploration of interrelationships of the arts to traditional disciplines of learning. May be repeated once for credit.

**119A. Theater for the Child Audience: Theory and Criticism.** Lecture/laboratory. Principles of production and performance for the child audience.

**119B. Theater for the Child Audience: Performance.** Lecture, two hours; laboratory, four hours. Prerequisites: audition and consent of instructor prior to first class meeting. Designed to provide opportunity for students to work together as an ensemble, creating through improvisation a theater presentation for a young audience. Emphasis on testing theoretical concepts through ensemble work, rehearsal, pretesting, and evaluation of an original production for possible presentation outside the classroom.

**121. Acting Workshop (2 units).** Laboratory, to be arranged. Prerequisites: course 20, consent of instructor. Courses 160, 163A, 163B, and 163C may be taken concurrently. Workshop which provides students with opportunity to rehearse, perform, and criticize scenes. May be repeated once for credit.

**122. Makeup for the Stage (2 units).** Prerequisite: consent of instructor. Art of makeup and its relation to the production as a whole. History, aesthetics, materials, and procedures of makeup.

**123. Intermediate Acting for the Stage.** Lecture/laboratory. Prerequisites: course 20, consent of instructor. Study and practice of art of acting through perfecting of techniques and application of those techniques to acting problems.

**124A. Advanced Voice (2 units).** Studio/laboratory, three to four hours. Prerequisites: courses 126A-126B-126C. Development of voice techniques for the stage, including work in relaxation, limbering, breathing, articulators, and resonators.

**124B. Advanced Speech (2 units).** Studio/laboratory, three to four hours. Prerequisite: course 124A. Designed to acquaint students with International Phonetic Alphabet and its uses and to exercise students' skills in pronunciation, enunciation, and development of diction versatility.

**125A. Advanced Movement (2 units).** Studio/laboratory, three hours. Physical awareness for the actor, concentrating on warming up the body, relaxation, control, stunts, and gymnastics.

**125B. Advanced Movement and Combat (2 units).** Studio/laboratory, three to four hours. Prerequisite: course 125A. Advanced and contemporary approach to classical and modern movement for the stage actor.

**126A-126B-126C. Acting, Voice, Movement III.** Studio, nine hours. Prerequisites: courses 21A-21B. Study of characterization, including introduction to Shakespeare. Approach to verse, scansion, use of emblems in classic texts. Personalization within heightened reality. Further work in voice, speech, and movement.

**127A-127B-127C. Advanced Acting (2 units each).** Studio, six hours. Prerequisites: courses 126A-126B-126C. Comedy workshop, stand-up comedy, performance art pieces. Audition and cold reading workshop. Solving individual acting projects.

**128A-128F. Acting, Voice, and Movement Workshops II (2 units each).** Studio, four to six hours. Prerequisite: consent of instructor. Study of advanced acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units.

**CM129. Contemporary Topics in Theater, Film, and Television (2 units).** (Same as Film and Television CM129.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM229.

**130A. Beginning Playwriting.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Required of theater majors. Designed to stimulate students' creative faculties through preparation and completion of a one-act play. Students' critical faculties stimulated by play analysis and scene exercises in discussion section.

**130B. Fundamentals of Playwriting II.** Lecture, three hours plus conference. Prerequisites: course 130A, consent of instructor. Study in original material for the theater, its preparation and development. Designed to give further insight into critical and creating aspects of short and full-length plays and guidance in completion of one-act and full-length plays. May be repeated twice for credit.

**130C. Writing for American Musical Theater.** Lecture/laboratory, three hours. Prerequisite: consent of instructor. Study of practice and techniques used in writing a libretto for musical theater: opening numbers, romance, subplots, and comedy. May be repeated once for credit.

**132. Manuscript Evaluation for Theater.** Lecture, three hours. Prerequisites: course 130A, consent of instructor. Principles and practices in evaluation of manuscripts for theater. May be repeated once for credit.

**C133A-C133B-C133C. Script Development Workshops.** Laboratory, three hours. Prerequisite for playwrights and directors: consent of instructor. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Course C133A may be repeated once for credit. Concurrently scheduled with courses C433A-C433B-C433C.

**136. Advanced Acting for the Stage.** Lecture/laboratory. Prerequisites: course 123, consent of instructor. Study and practice of art of acting through a progression to more advanced acting problems. May be repeated twice for credit. Consecutive enrollment with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units.

**137A-137B-137C. Continuum Study in Acting for the Stage.** Studio, six hours. Prerequisite: course 123. Technique of characterization and performance in advanced and complex acting styles. May be repeated once for credit.

**138. Special Problems in Performance Techniques.** Lecture/laboratory. Prerequisite: consent of instructor. Study of complex problems in voice, movement, and acting. May be repeated twice for credit.

**140A. Scenic Techniques for the Stage.** Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Intensive study of stage scenery techniques; tools, hardware, and materials; and their relationship to the art of theatrical scenic design through analysis of scenic design history, overall production concepts, and design styles.

**141A. Lighting Techniques for the Stage.** Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Required of theater majors. Intensive study of theater lighting, with emphasis on relationship of lighting instruments and control equipment to lighting design. Courses 141A, 140A, and 142A may be taken in any sequence, but not concurrently.

**142B. Advanced Costuming for the Stage.** Lecture, three hours; laboratory, four hours. Prerequisites: course 142A, consent of instructor. Special problems in procuring, designing, construction, and management of costumes used in theatrical productions.

**144. Theater Sound Techniques (2 units).** (Formerly numbered 144A.) Lecture, two hours; laboratory, two hours. Prerequisites: courses 14A-14B-14C or consent of instructor. Study of equipment and techniques utilized in recording and reproduction of sound for the theater.

**145. Costume Design for the Theater.** Lecture/laboratory. Prerequisite: consent of instructor. Design of costumes for theatrical presentations. Study of use of silhouette, fabrics, color, and decoration as related to theatrical characterizations. May be repeated once for credit.

**147A. Drafting (2 units).** (Formerly numbered 149A.) Studio, four hours. Development of visual communication skills through drafting. Exploration of drafting for scenic and lighting designs. May be repeated once for credit.

**147B. Rendering (2 units).** Studio, four hours. Introductory course in basic skills necessary for drawing and rendering for scenic, costume, and lighting design for theater, film, and television. May be repeated once for credit.

**148. Special Courses in Design and Technical Theater.** Lecture, three hours. Prerequisite: consent of instructor. Group study of selected subjects in design and technical theater. May be repeated twice for credit.

**150. Theater Production and Performance (2 units).** Studio, six hours. Prerequisite: course 50. Laboratory experience in various aspects of theater production, including performance in a project or production, stage management, member of a crew, or assignment as a designer or assistant on a production. May be repeated for a maximum of eight units.

**151A-151B. Scenic Design.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Introduction to principles of study and practice of the design of scenery for theater, film, and television. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design.

**C151C. Production Design for Film and Television.** Lecture/studio. Prerequisite: consent of instructor. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C451C.

**152A-152B. Lighting Design.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of principles and techniques of lighting design for theater and television. Study of lighting, with emphasis on imagination, text analysis, metaphor, and conceptualization. Investigation of composition and control of light and color in relation to the actor.

**C152C. Lighting Design for Television.** Lecture/studio. Prerequisite: consent of instructor. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C452C.

**153A-153B. Costume Design.** Lecture/studio. Prerequisites: courses 14A-14B-14C. **153A.** (Formerly numbered 142A.) Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process and character analysis leading to visual presentation of the design. **153B.** Study of costume design for period productions; development of conceptual designs, and costume design for music theater.

**C153C. Costume Design for Film and Television.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. Concurrently scheduled with course C453C.

**154A-154B. Sound Design.** Lecture/studio. Prerequisites: courses 14A-14B-14C. **154A.** Study of recording, mixing, editing, and playback of sound effects, voice, and music in the theater. **154B.** Introduction to use of delay, equalization, and microphone placement for theater sound reinforcement. Study of creation of sound effects, control of MIDI data, and design techniques for musical theater.

**C154C. Sound for Film and Television.** Lecture/studio. Prerequisite: consent of instructor. Study of current professional sound recording, rerecording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C454C.

**C155A-C155G. Graphic Representation of Design (2 units each).** Studio, four hours. Prerequisite: course 147A or 147B. Concurrently scheduled with courses C455A-C455G.

**C155A.** Perspective Drawing. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures.

**C155B.** Watercolor Rendering. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces.

**C155C.** Marker Rendering. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers.

**C155D.** Model Making. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model.

**C155E.** Life Drawing. Study and practice in drawing of human form.

**C155F.** Costume Rendering. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics.

**C155G.** Scene Painting Techniques. (Formerly numbered C146.) Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit.

**C156A. Introduction to Computer-Assisted Drafting (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C456A.

**C156B. Introduction to Computer-Assisted Design (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C456B.

**C156C. Introduction to Computer-Assisted Rendering (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C456C.

**C157A-C157B-C157C. Costume Construction Techniques (2 units each).** Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve an authentic-looking costume using contemporary methods. Concurrently scheduled with courses C457A-C457B-C457C. **C157A.** Prerequisites: courses 14A-14B-14C, consent of instructor. Introduction to draping, pattern grading fitting, and slash and spread adaptation. **C157B.** Prerequisite: course C157A. Introduction to costume drafting, construction of period undergarments. **C157C.** Prerequisites: courses C157A-C157B. Draping, patterning, and fitting techniques for period garments.

**C158A. Scenic Design Technology.** (Formerly numbered 140B.) Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C458A.

**C158B. Lighting Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C458B.

**C158C. Sound Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of sound designs for theater, film, and television. Study of operation and performance of equipment for recording, mixing, and reproduction of theater sound. Concurrently scheduled with course C458C.

**159. Design Portfolio Project.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Preparation of complete designs and drawings for a production and assembly of a design portfolio and résumé. Projects prepared under guidance of a faculty adviser.

**160. Fundamentals of Play Direction (5 units).** Lecture, two hours; laboratory, four hours. Prerequisite: consent of instructor. Required of theater majors. Course 121 may be taken concurrently. Basic theories of play direction and their application through preparation of scenes under rehearsal conditions.

**163A-163B-163C. Directing for the Stage.** (Formerly numbered 161A, 161B, 161C.) Lecture/studio. Prerequisites: course 15, consent of instructor.

**163A.** Intensive development of primary directing skills and process, including text analysis and exploration of craft fundamentals as a basis for director/actor communication and effective staging. Students direct scenes from plays under laboratory conditions.

**163B.** Further development of craft elements of directorial method, with additional emphasis on psychological aspects of director/actor communication. Students direct scenes under laboratory conditions in alternative stage configurations.

**163C.** Culminating development of directorial methods, with particular emphasis on challenges of style in text and production. Students direct scenes under laboratory conditions in alternative stage configurations.

**C163D. Directing Project for the Stage.** (Formerly numbered C162B.) Lecture, four hours; studio, six hours. Prerequisites: courses 163A-163B-163C, consent of instructor. Completion of course C163D satisfies course 180 requirement. Application of stage directing techniques in production of a short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C263D.

**171A. Advanced Theater Laboratory (1 to 4 units).** Hours to be arranged. Prerequisite: consent of instructor. Creative participation as actor or stage manager in public presentation of departmental productions. May be taken for a maximum of four units.

**171B. Advanced Theater Laboratory (1 to 4 units).** Hours to be arranged. Prerequisite: consent of instructor. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

**C172. Technical Theater Laboratory (2 units).** Hours to be arranged. Prerequisite: consent of instructor. Required of theater majors. Laboratory in various aspects of theater production. Must be repeated for a maximum of eight units, but no assignment may be repeated more than once. Concurrently scheduled with courses C272 and C472.

**173A. Design Assignment: Assistant Designer (2 units).** Studio, six hours. Prerequisites: courses 14A-14B-14C. Laboratory experience as an assistant designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

**173B. Production Design Assignment: Designer (2 units).** Studio, six hours. Prerequisites: courses 14A-14B-14C. Laboratory experience as a designer, including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

**174A. Stage Managing Techniques (2 units).** Studio, six hours. Prerequisites: courses 14A-14B-14C. Professional duties of stage manager. Problems of unions, professional auditions, organization, scheduling, out-of-town openings, Broadway openings, and responsibilities of a lengthy run.

**174B. Project in Stage Management (3 units).** Studio, nine hours. Prerequisite: course 174A. Laboratory experience in the professional duties of assistant stage manager, including participation as an assistant stage manager in preproduction, rehearsal, and performance phases of a production. May be repeated once for credit.

**174C. Project in Stage Management.** Studio, 12 hours. Prerequisite: course 174A. Laboratory experience in the professional duties of stage manager, including participation as a stage manager in preproduction, rehearsal, and performance phases of a production. Problems of unions, auditions, organization, scheduling, and responsibilities of a lengthy run. May be repeated once for credit.

**180. Senior Project.** Lecture/studio, three hours. Prerequisites: courses 101A-101B-101C. Preparation of a conceptual or creative project to provide a culminating experience in the production of a creative or research work.

**C190A. Role of Producer in Professional Theater (2 units).** Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C294A.

**C190B. Role of Management in Educational and Community Theater (2 units).** Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C294B.

**191. The Touring Company (2 to 12 units).** Lecture, 20 hours; laboratory, 22 hours. Prerequisite: consent of instructor. Rehearsal and technical preparation of a theatrical work for touring and performance of that work on tour.

**192. Motion Picture, Television, and Theater Internship (2, 4, or 8 units).** Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Prerequisite: consent of instructor. Limited to senior Department of Theater majors. Internship at various studios or theaters accentuating creative contribution, organization, and work of professionals in their various specialties. May be taken for a maximum of eight units.

**199. Special Studies in Theater Arts (2 to 8 units).** Hours to be arranged. Prerequisite: senior standing, 3.0 GPA in major, consent of instructor. May be taken for a maximum of eight units.

## Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate adviser. Graduate courses are not open to undergraduate students.

**202A. Seminar: Western Classical Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Examination of theatrical production and dramatic form in the Greek and Roman periods. May be repeated twice for credit.

**202B. Seminar: Medieval Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.

**202C. Seminar: Renaissance and Baroque Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

**202D. Seminar: Bourgeois and Romantic Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

**202E. Seminar: Modern Consciousness in Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of prototype types of modern experience as encountered in work of Ibsen and Strindberg. May be repeated twice for credit.

**202F. Seminar: Modern Realism.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theater's response to science and technology, politics, and revolution. May be repeated twice for credit.

**202G. Seminar: Modern Theatricalism.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in symbolism and avant-garde theater. Exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit.

**202M. Seminar: American Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in development of theatrical production and dramatic writing in American theater. May be repeated twice for credit.

**202P. Seminar: Traditions of African Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean) through examination of character, structure, performance modes, and archetypes. May be repeated twice for credit.

**202R. Seminar: East Asian Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**202S. Seminar: South Asian Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of South Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**202T. Seminar: Southeast Asian Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of Southeast Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**203. Theater Ethics and Issues (5 units).** Seminar, four hours. Prerequisites: graduate standing, consent of instructor. Investigation of a selected area of theater and drama study that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

**204. Theater Genres (5 units).** Seminar, four hours. Prerequisites: graduate standing, consent of instructor. Investigation of history and literature of the theater as manifested in one or more of its major forms or genres. May be repeated four times for credit.

**205A-205B-205C. Background of Theatrical Art.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Analysis of major plays, commentaries, and historical materials. **205A.** Classical and Medieval Periods; **205B.** Renaissance, Baroque, and Rococo Periods; **205C.** Romantic, Naturalistic, and Symbolist Periods.

**206. Themes in World Theater and Drama (5 units).** Seminar, four hours. Prerequisites: graduate standing, consent of instructor. Selected topics in world theater history, drama, production, and/or architecture organized on a thematic basis. May be repeated four times for credit.

**207A-207B. Theater Aesthetics.** Prerequisites: graduate standing, consent of instructor. Discussion of essential issues in aesthetics of theater and drama based on philosophy of art and theories of the theater. **207A.** Classical and Medieval Theories of Art and Theater; **207B.** Renaissance Theories of Art and Theater to the Present.

**208. Dramaturgy.** Discussion/laboratory, three hours. Prerequisites: graduate standing, consent of instructor. Theoretical and practical aspects of the dramaturge's work in contemporary theater.

**209. Theater Authors (5 units).** Prerequisites: graduate standing, consent of instructor. Investigation of work of a theater artist from history of world theater, with special emphasis on relationship to time in which the work was generated. May be repeated four times for credit.

**210. Topics in World Theater and Drama (5 units).** Prerequisites: graduate standing, consent of instructor. Investigation of selected topics in world theater, drama, production, and architecture. May be repeated four times for credit.

**216A. Critical and Historical Methods.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in theater historiography and sociological criticism.

**216B. Critical Methods.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in critical theories of theatrical form and structure.

**216C. Critical Methods.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in contemporary modes of psychoanalytic and archetypal criticism for theater.

**220. Graduate Forum (1 unit).** (Formerly numbered 220F-220W-220S.) Seminar, two hours bimonthly or five times per term. Prerequisite: graduate standing in theater. Presentation and discussion of issues informing and affecting contemporary theater. May be repeated four times for credit. S/U grading.

**CM229. Contemporary Topics in Theater, Film, and Television (2 units).** (Same as Film and Television CM229.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM129.

**230A-230B-230C. Writing for the Contemporary Theater (4 to 8 units each).** Lecture, three hours; studio, two hours. Prerequisites: graduate standing, consent of instructor. **230A.** One-Act Play Analysis of strategy and dramatic structure of selected contemporary short plays leading to the guided completion and critique of student-written one-act plays. **230B.** Full-Length Play. Analysis of strategy and dramatic structure of selected contemporary full-length plays leading to the guided completion and critique of a student-written full-length play. **230C.** Performance and Text. Exploration of structural strategies, political implications, and technical demands of selected contemporary American plays leading to the guided completion and critique of student work.

**232. Manuscript Analysis.** Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit.

**241. Research in Technical Theater.** Prerequisites: graduate standing, consent of instructor. Research in technical processes and equipment in theater.

**242A-242B-242C. History of Style and Ornamentation.** Prerequisites: graduate standing, consent of instructor. In-depth study of history of costume, architecture, interiors, furnishings, and their interrelationships from early Western culture through the late Gothic period. Emphasis on those periods most prolific in dramatic literature and on resources and research techniques for visual artists.

**243A-243B-243C. Scenic Design.** Prerequisite: consent of instructor. Advanced study and practice in scenic design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design. May be repeated once for credit.

**244A. Advanced Theater Laboratory (2 or 4 units).** Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Creative participation as assistant director, stage manager, or performer in public presentation of departmental productions. May be taken for a maximum of four units.

**244B. Advanced Theater Laboratory (2 or 4 units).** Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

**245A. Production Management.** Lecture, three hours. Prerequisite: consent of instructor. Study in production management for the theater. Examination of professional duties of production manager, including preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting while maintaining a creative and collaborative environment.

**245B. Production Management.** (Formerly numbered 245.) Lecture, three hours. Prerequisite: course 245A. Advanced study in production management for the theater, with focus on planning process of professional production manager in a seasonal and repertory environment. Problems of resource allocation, unions, organizational structure, scheduling, and budgeting to establish a creative and collaborative environment.

**245C. Projects in Production Management.** Studio/laboratory. Prerequisite: course 245B. Laboratory experience in professional duties of production manager, including participation as a production manager in preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting.

**246A-246B-246C. History of Costume.** Lecture/studio. Prerequisite: graduate standing. Study of history of costume as a manifestation of cultural, social, economic, and political influences to provide a historical framework for design of costumes for theater, film, and television. Historic survey and in-depth exploration of a selected period, with study of influences of diverse cultures.

**247. Collaborative Project in Design and Production (3 to 4 units).** Studio, four hours. Prerequisites: graduate standing, consent of instructor. Collaborative project in design, including analysis, conceptual development, and preparation of scenic, lighting, costume, or sound designs. May be repeated once for credit.

**260. Directing I.** Lecture, four hours; studio, 24 hours. Prerequisites: graduate standing, consent of instructor. Development of directorial skills of analysis, planning, staging, and criticism through medium of written preparations and directing of scenes.

**261. Directing II.** Lecture, four hours; studio, 30 hours. Prerequisites: graduate standing, consent of instructor. Problems in direction of post-realist plays through medium of interpretation and laboratory scene work.

**263. Production Project in Direction for the Stage (2 to 6 units).** Discussion, one hour; studio, 12 to 24 hours. Prerequisites: graduate standing, consent of instructor. Direction of a dramatic work for public performance. Discussion and critique of work in progress. May be repeated for a total of no more than 12 units.

**C263D. Directing Project for the Stage.** (Formerly numbered C262.) Lecture, four hours; studio, six hours. Prerequisites: courses 163A-163B-163C, consent of instructor. Application of stage directing techniques in production of short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C163D.

**264. Directing Classical and Historical Drama.** Lecture, four hours; studio, 30 hours. Prerequisites: graduate standing, consent of instructor. Problems in interpretation and direction of historical or classical drama through medium of laboratory scene work.

**265. Modern Theories of Production.** Examination of modern theories of production from emergence of the director in the 19th century to the present. Investigation of different responses to problems of creating a vital theatrical event in context of ongoing evolution of theater as an art form. Examination of contribution of significant directors and movements; relation between theater and other forms of representation.

**266. Theatrical Conceptualization.** Examination of process of conceptualization in dramatic production; centrality of theater conceptualization in interpretation of dramatic text; exploration of range of possibilities inherent in different theatrical spaces and options in design components. Consideration of visual arts and music as sources of stimulus for theatrical conceptualization, with focus on collaborative aspect of theatrical production.

**C272. Production and Performance Laboratory (2 units).** Lecture, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Credit for creative production assignments required of all M.A. students during first three terms in residence. May be repeated twice for credit. Concurrently scheduled with courses C172 and C472.

**290A. Role of Management in Artistic Decision Making in the Theater.** Prerequisite: consent of instructor. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

**290B. Programming and Planning Policies in the Theater.** Prerequisite: consent of instructor. Analysis of social, artistic, and economic roles of the arts as reflected in programming policy. Examination of social goals pursued in establishing relationships between the arts and their environment.

**C294A. Artistic Control of Theatrical Production by Professional Producer (2 units).** Prerequisites: graduate standing, consent of instructor. Study of structure governing economic and artistic decision-making processes in professional theater of America and historical development of involvement of producer in artistic process. Concurrently scheduled with course C190A. Additional research and writing required of graduate students.

**C294B. Organization and Operation of Community Theater (2 units).** Prerequisites: graduate standing, consent of instructor. Study of artistic, social, and economic criteria in administration of educational and community theater, with research in history of current practices in operations, administration, and organization. Concurrently scheduled with course C190B.

**298A-298B. Special Studies in Theater Arts (2 to 4 units each).** Lecture/discussion. Prerequisites: graduate standing, consent of instructor. Seminar study of problems in theater arts, organized on topic basis. May be repeated once for credit.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**420A-420B-420C. Advanced Acting I (4 to 8 units, 4 units, 4 units).** Studio, six to 18 hours:

**420A.** Development of an internal technique, beginning with an autodrama which is a dramatization of one's personal history. Scene work follows, with emphasis on off-stage preparations, improvisations capturing the circumstances, life of the character, and intentions of the scene.

**420B.** Scene work, usually from 20 to 30 minutes in length. Continuation of work on off-stage preparation, with further development of how the actor goes about doing research and fieldwork on the character being played.

**420C.** Development of an external technique through comedy and of skits, improvisation, physical humor, delivery of a line, rhythm, timing, and public cabaret. Fusion of the internal; use of action and objective with the external.

**421A-421B-421C. Advanced Acting II (4 or 8 units each).** Studio/laboratory, six to 18 hours. **421A.** Extending the idea of autobiography and using it as art. The actor as performance artist. Playing characters quite removed from oneself. Using language. Using Shakespeare and oneself to play him. **421B.** Continued character behavior study through language and movement. Further work on actions, objectives, and researching the role. **421C.** Comedy workshop. Exploration of craft of comedy and development of cabaret pieces.

**422. Advanced Acting for Theater, Film, and Television (8 to 12 units).** Studio/laboratory. Intensive performance experience. May be repeated for a maximum of 24 units. S/U grading.

**424A-424B-424C. Advanced Voice and Speech I (2 or 4 units each).** Studio/laboratory, three to six hours. Development of voice and speech techniques for the stage, including those of relaxation, breathing, resonance, and development of speaking voice. Speech training uses International Phonetic Alphabet to train students in standard American speech. Text work in poetry and prose.

**424D-424E-424F. Advanced Voice and Speech II (2 or 4 units each).** Studio/laboratory, three to six hours. Advanced voice problems. Extension of first-year work, with increased demands on voice. Range, resonance, and breathing capacity extension. Articulation and phonetic alphabet. Text work in classical verse.

**425A-425B-425C. Advanced Movement I (2 or 4 units each).** Studio/laboratory, three to six hours. Discovery of body's unique language through exercises designed to explore and free the total instrument. Development of a flexible actor with range, expression, and confidence physically. Awakening of the imagination while exploring the worlds of ritual, animal, conceptual, and modern dance movements.

**425D-425E-425F. Advanced Movement II (2 or 4 units each).** Studio/laboratory, three to six hours. Presentation of a more complete picture of stage movement and its relationship to theater, music, and dance. Advancement of physical training of individual actors to their maximum potential. Experience in techniques and discovery of origins of a variety of acrobatic and dance disciplines, including ballet, ballroom, period dance, and circus techniques.

**429. Performance Workshop (2 units).** Studio, four hours. Prerequisites: graduate standing, consent of instructor. Limited to graduate students not enrolled in M.F.A. acting program. Exercises in performance techniques, including autodrama and scene study. Development of performance skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to scenes.

**430A-430B-430C. Advanced Studies in Playwriting (4 to 8 units each).** Lecture, three hours. Prerequisite: graduate standing in M.F.A. playwriting program. Guided completion of full-length scripts for the stage.

**431. Special Topics in Playwriting.** Discussion, three hours. Prerequisites: graduate standing in M.F.A. playwriting program and/or consent of instructor. Analysis and practice of varied aspects of playwright's art. Variable content selected from topics such as comedy writing, docudrama, writing for alternative audiences, adaptation from stage to screen, children's theater, or improvisational techniques. May be repeated twice for credit.

**432. Manuscript Evaluation.** Lecture, four hours; laboratory, to be arranged. Prerequisites: course 132 and consent of instructor, or candidate in M.F.A. writing program and consent of instructor. Evaluation of manuscripts of beginning writers, including but not limited to those produced in Film and Television 130B. May be taken twice for credit (once each year of M.F.A. residence).

**C433A-C433B-C433C. Script Development Workshops.** Laboratory, three hours. Prerequisites for playwrights and directors: graduate standing, consent of instructor. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Course C433A may be repeated once for credit. Concurrently scheduled with courses C133A-C133B-C133C.

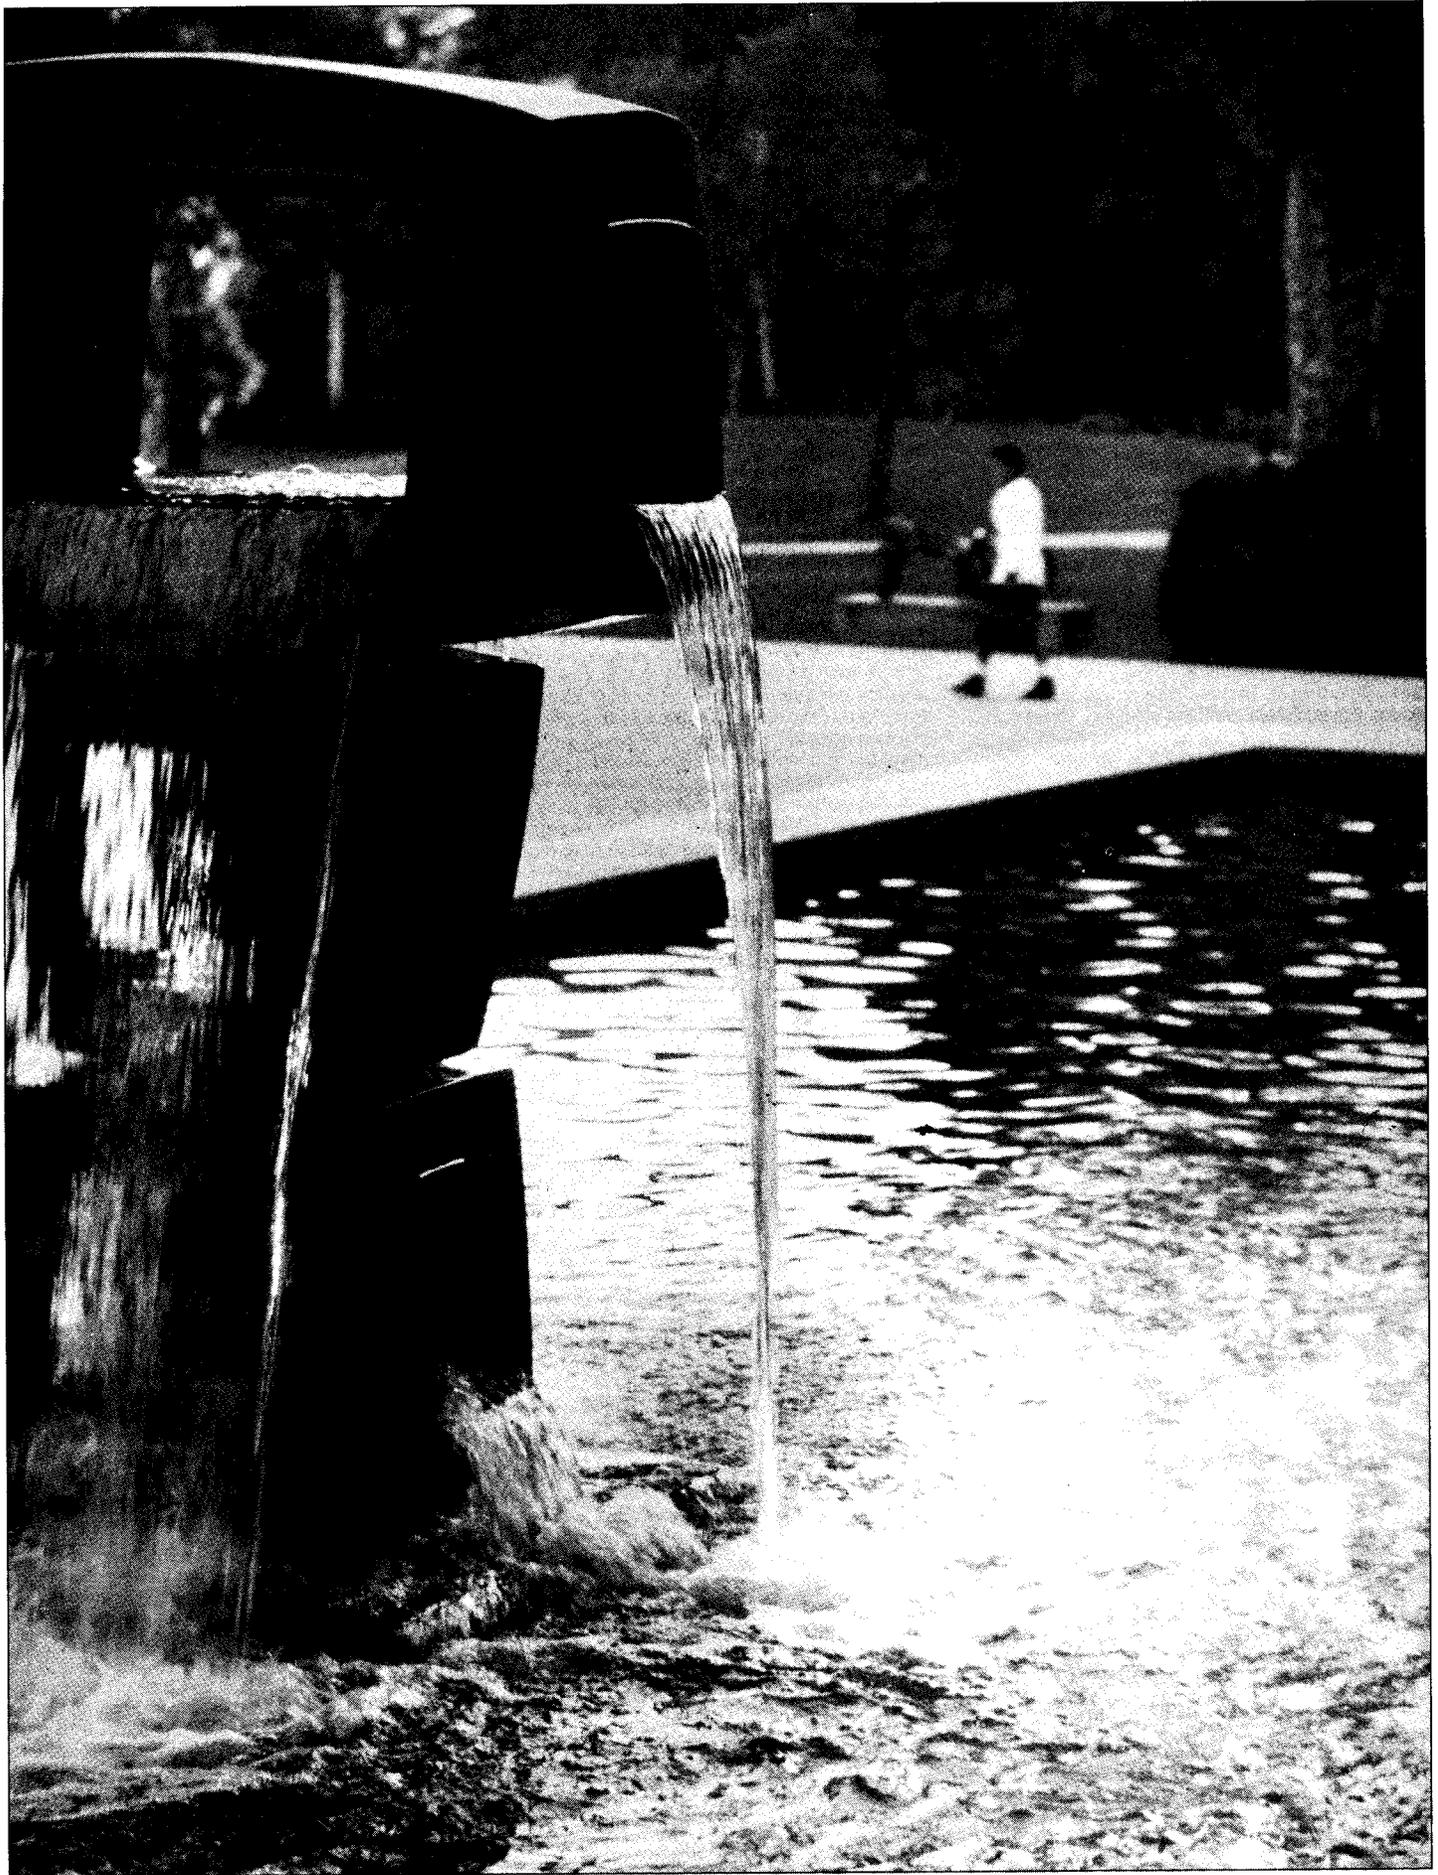

**435AF-435AW-435AS. Problems in Advanced Writing for the Stage (0 units, 0 units, 2 units).** Prerequisite: consent of instructor. Limited to M.F.A. candidates. Review discussion and critique of playwriting projects. May be repeated for a maximum of six units. In Progress and S/U grading.

**441A-441B-441C. Lighting Design.** Lecture/studio. Prerequisite: consent of instructor:

**441A.** Study and practice in lighting the actor, emphasizing textual and character analysis from lighting designer's perspective, conceptual development with the director, effect of light on dynamics of staging, use of color in light, and relationship of lighting designer to the actor. May be repeated once for credit.

**441B.** Study of use of light and color to define space, effect of light on scenery and costumes, lighting for arena/thrust theaters, multisensory productions, lighting patterns, and moving scenery. May be repeated once for credit.

**441C.** Investigation of lighting design in production, musical theater, opera, touring, and repertory situations. Study of analysis of script and score for lighting designer. May be repeated once for credit.

- 441D. Scenic Projection and Media Techniques.** Lecture/laboratory. Prerequisites: graduate standing, consent of instructor. Advanced study and practice in scenic projection and media techniques, with emphasis on analysis, design, and execution of theatrical projection and photographic technique for the stage.
- 442A-442B-442C. Costume Design.** Lecture/studio. Prerequisite: consent of instructor. Advanced study and practice in costume design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, period style, and character analysis leading to visual presentation of the design. Study of costume design for theatrical productions, ballet, opera, and musical theater. May be repeated once for credit.
- 443. Problems in Design (2 or 4 units).** Lecture/laboratory, four hours (additional hours as required). Prerequisite: consent of instructor. Study and practice in design techniques for theater. May be repeated for a maximum of 12 units.
- 444A-444B-444C. Sound Design.** Lecture/studio. Prerequisite: consent of instructor.
- 444A.** Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, processing, automation, and reproduction of dialogue, effects, and music tracks for theater sound design. May be repeated once for credit.
- 444B.** Advanced study and practice in preparation and recording of theater sound designs, with emphasis on analysis of script and score, conceptual development of the design, and multitrack recording techniques to realize the design. May be repeated once for credit.
- 444C.** Study and practice in processing and mixing of live and recorded sound; mix-down of multitrack recordings; preparation of sound tracks and sound reinforcement in the theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit.
- C451C. Production Design for Film and Television.** Lecture/studio. Prerequisite: consent of instructor. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C151C.
- C452C. Lighting Design for Television.** Lecture/studio. Prerequisite: consent of instructor. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C152C.
- C453C. Costume Design for Film and Television.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. Concurrently scheduled with course C153C.
- C454C. Sound for Film and Television.** Lecture/studio. Prerequisite: consent of instructor. Study of current professional sound recording, rerecording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating a higher level of proficiency and skill.
- C455A-C455G. Graphic Representation of Design (2 units each).** Studio, four hours. Prerequisite: course 147A or 147B. Concurrently scheduled with courses C155A-C155G:
- C455A.** Perspective Drawing. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill.
- C455B.** Watercolor Rendering. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill.
- C455C.** Marker Rendering. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers.
- C455D.** Model Making. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Graduate students expected to produce models demonstrating a higher level of proficiency and skill.
- C455E.** Life Drawing. Study and practice in drawing of human form.
- C455F.** Costume Rendering. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics.
- C455G.** Scene Painting Techniques. (Formerly numbered C446.) Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit.
- C456A. Introduction to Computer-Assisted Drafting (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C156A.
- C456B. Introduction to Computer-Assisted Design (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C156B.
- C456C. Introduction to Computer-Assisted Rendering (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C156C.
- C457A-C457B-C457C. Costume Construction Techniques (2 units each).** Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve an authentic-looking costume using contemporary methods. Concurrently scheduled with courses C157A-C157B-C157C. **C457A.** Prerequisites: courses 14A-14B-14C, consent of instructor. Introduction to draping, pattern grading fitting, and slash and spread adaptation. **C457B.** Prerequisite: course C457A. Introduction to costume drafting, construction of period undergarments. **C457C.** Prerequisites: courses C457A-C457B. Draping, patterning, and fitting techniques for period garments.
- C458A. Scenic Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C158A.
- C458B. Lighting Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C158B.
- C458C. Sound Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of sound designs for theater, film, and television. Study of operation and performance of equipment for recording, mixing, and reproduction of theater sound. Concurrently scheduled with course C158C.
- 459A-459B. Directing for Theater, Film, and Television.** Lecture, three hours. Prerequisite: consent of instructor. Limited to graduate students in Department of Theater. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in three media.
- 460AF-460AW-460AS. Contemporary Issues in Direction (1 unit each).** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Discussion of role of director in contemporary professional practice. Review discussion and critique of directing projects. May be repeated for a maximum of four units.
- 460B-460C. Problems in Advanced Direction for the Stage.** Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Discussion and critique of work in progress. **460B.** Preparation and presentation of a published play under rehearsal conditions. **460C.** Preparation and presentation of a full-length original play under rehearsal conditions.
- 462. Production Project in Direction for the Stage (4 or 8 units).** Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of an original play under minimal production conditions. Discussion and critique of work in progress.
- 463. Production Project in Direction for the Stage (8 or 12 units).** Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of a play under fully produced theater conditions.
- C472. Production and Performance Laboratory (2 to 8 units).** Laboratory, to be arranged. Prerequisites: M.F.A. candidate, consent of instructor. Credit for creative production projects required of all M.F.A. students. May be repeated three times for a maximum of 16 units. Concurrently scheduled with courses C172 and C272.
- 474. Projects in Theater Design (2 or 4 units).** Discussion, three hours; laboratory, 12 hours to be arranged. Prerequisites: graduate standing, consent of instructor. Study and practice in preparation and performance of dramatic works for public performances as a contributing artistic member of a departmental production. Creative responsibilities include designer, technical supervisor, production manager, choreographer, or dramaturge. May be repeated for a maximum of 16 units.
- 495A. Practicum in Teaching Theater.** Lecture/laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of and practice in teaching theater at college and university level.
- 495B. Practicum in Theater Production (2 or 4 units).** Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Demonstration of competence in theater production through successful completion of a major teaching production assignment. May be repeated for a maximum of 12 units.
- 496. Practice of Teaching Theater (2 units).** Discussion. Required once of all teaching assistants or associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to the teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated. S/U grading.
- 498. Professional Internship in Theater, Film, and Television (4, 8, or 12 units).** Full- or part-time at a studio or on a professional project. Prerequisites: graduate standing, advanced standing in M.F.A. program, consent of instructor. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Individual Studies: Research (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596B. Directed Individual Studies: Writing (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596C. Directed Individual Studies: Directing (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596D. Directed Individual Studies: Design (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596E. Directed Individual Studies: Acting (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596F. Directed Individual Studies: Production (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**597. Preparation for Ph.D. Qualifying Examinations in Theater Arts (2 to 8 units).** May be repeated for a maximum of 12 units.

**598. M.A. Thesis in Theater Arts (2 to 8 units).** Prerequisite: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units.

**599. Ph.D. Dissertation in Theater Arts (2 to 8 units).** Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units.

## Related Courses in Other Departments

**Classics** 143. Ancient Drama

**Dance** 141. Lighting Design for Dance Theater  
144. Costume and Scenic Design Concepts for Dance Theater

**English** 10A, 10B, 10C. English Literature

90. Shakespeare

112. Children's Literature

135A-135B-135C. Creative Writing: Drama

167. Drama, 1842-1945

**Film and Television** 126. Acting for Film and Television

177. Film and Television Acting Workshop

**Humanities** 1A, 1B, 1C. World Literature

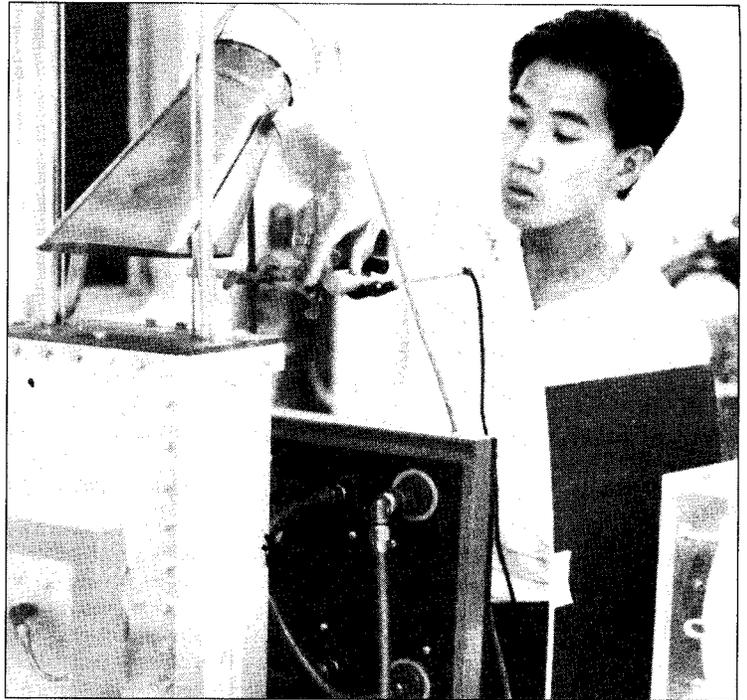

**Italian** 122. Italian Theater

**Musicology** 135A-135B-135C. History of Opera

---

# School of Engineering and Applied Science

A.R. Frank Wazzan, Dean

# 8

For 50 years, the UCLA School of Engineering and Applied Science has enjoyed a respected reputation for technological innovation and pursuit of fundamental scientific knowledge. The school has always attracted top faculty, celebrated for distinguished teaching and research, to train and mentor students and enjoys strengths in traditional disciplines, including computer science, electrical engineering, manufacturing, and mechanical engineering. Growing programs exist in evolving fields such as optoelectronics, microsensors, industrial ecology, environmental cleanup and pollution prevention, water reclamation, composites, and new materials development.

As the twenty-first century approaches, the pace of technological development quickens, and engineers need to adapt faster to help meet societal needs and maintain U.S. leadership in the marketplace. Engineers must greatly expand their knowledge in their own disciplines and must be able to work as team members across disciplines to solve increasingly complex problems.

UCLA meets the needs of the marketplace by seeing that laboratory breakthroughs translate into technologies and products. Faculty members engage in mutual collaborations with industry, from applied research to technology goal setting. The school's educational mission nurtures innovation and provides a balanced approach to teaching and research, which are viewed as independent intellectual endeavors as well as support for business, industry, and the community.

Students receive their professional education through classroom investigation and real-world applications. The curriculum includes exposure to the humanities, social sciences, and fine arts and addresses the need to educate men and women about their responsibility to create, protect, and manage technology with due regard for ethics and human values. The challenges and rewards of a career in engineering have never been greater. If you can commit to a high standard of achievement, we invite you not only to join but also to contribute to the great success story of UCLA.

# School of Engineering and Applied Science

Office of Academic and Student Affairs: 6426 Boelter Hall

Graduate: (310) 825-1704  
Undergraduate: (310) 825-2826

## Bachelor of Science Degrees

Students in the School of Engineering and Applied Science (SEAS) may elect one of the nine four-year curricula listed below.

- (1) Bachelor of Science in Aerospace Engineering
- (2) Bachelor of Science in Chemical Engineering
- (3) Bachelor of Science in Civil Engineering
- (4) Bachelor of Science in Computer Science
- (5) Bachelor of Science in Computer Science and Engineering
- (6) Bachelor of Science in Electrical Engineering
- (7) Bachelor of Science in Engineering with a specialization in bioengineering\*
- (8) Bachelor of Science in Materials Engineering
- (9) Bachelor of Science in Mechanical Engineering

\*Bioengineering is an interdepartmental program listed under Schoolwide Fields, Programs, Courses, and Faculty at the end of the departmental listings.

For the departmental areas of instruction, consult the listings of the individual departments on the following pages or refer to the *Announcement of the UCLA School of Engineering and Applied Science*, available from the Office of Academic and Student Affairs, 6426 Boelter Hall.

## Admission

Applicants for admission to the school must satisfy the general admission requirements of the University as outlined in the section entitled "Undergraduate Admission" in Chapter 2. You must select a specific major within the school when applying for admission. In the selection process many elements are considered, including grades, test scores, and academic preparation.

Freshman applicants are strongly advised to take the tests required by the University for admission on or before December 2. Reports of test scores are needed to give full consideration to admission requests; ask the testing agencies to send your results directly to the UCLA Undergraduate Admissions Office.

Applicants are encouraged to apply either at the freshman or junior level. Students who begin their college work at a California community college are expected to remain at the community college to complete the lower division requirements in chemistry, mathematics, physics, and the recommended engineering courses before transferring to the University. Experience indicates that transfer students who have completed the recommended lower division program in en-

gineering at California community colleges are able to complete the remaining requirements for one of the B.S. degrees in six terms (two academic years) of normal full-time study. Some students who select certain majors, such as computer science and engineering or chemical engineering, may be required to complete additional lower division courses as prerequisites for the major sequence.

## Admission as a Freshman

While many students take their first two years in engineering at a community college, an applicant may qualify for admission to the school in freshman standing. It is anticipated that admission will require that the following subjects be taken when satisfying the University admission requirements:

Algebra	2 years
Plane geometry	1 year
Trigonometry	½ year
Chemistry and physics with laboratory	2 years

Freshman applicants whose entire secondary schooling was outside the U.S. must pass, with satisfactory scores, the Scholastic Assessment Test I: Reasoning Tests (verbal and mathematics sections) and Scholastic Assessment Test II: Subject Tests in Writing, Mathematics, and Physics before a letter of admission to engineering can be issued. Arrangements to take the tests in another country should be made directly with the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Test scores should be forwarded to UCLA.

## Credit for Advanced Placement Tests

You may fulfill part of the school requirements with credit allowed at the time of admission for College Entrance Examination Board (CEEB) Advanced Placement Tests with scores of 5, 4, or 3. Students with Advanced Placement Test credit may exceed the 213-unit maximum by the amount of this credit. Advanced Placement Test credit for freshmen entering in Fall Quarter 1994 fulfills requirements in the School of Engineering and Applied Science as follows:

TEST	CREDIT ALLOWED ON SCHOOL REQUIREMENTS
Art History	8 lower division units toward humanities
Biology	Biology 2 (4 units) plus 4 lower division units free electives
Chemistry	8 lower division units toward general chemistry

## Degrees Offered

Aerospace Engineering	B.S., M.S., Ph.D.
Chemical Engineering	B.S., M.S., Ph.D.
Civil Engineering	B.S., M.S.; Ph.D.
Computer Science	B.S., M.S., Ph.D.
Computer Science and Engineering	B.S.
Electrical Engineering	B.S., M.S., Ph.D.
Engineering	B.S., M.S., M.Engr., Engr., Ph.D.
Engineering and Applied Science	Graduate Certificate of Specialization
Manufacturing Engineering	M.S.
Materials Engineering	B.S.
Materials Science and Engineering	M.S., Ph.D.
Mechanical Engineering	B.S., M.S., Ph.D.
Nuclear Engineering	M.S., Ph.D.

### Lower Division Preparation for the Majors

#### Mathematics

Analytic geometry and calculus, 8 units; calculus of several variables, 8 units; matrices and differential equations, 4 units; infinite series, 4 units (total of 24 quarter units minimum)

#### Physics

Calculus-based courses in mechanics of solids, vibration, wave motion, sound, fluids, heat, kinetic theory, electricity, magnetism, electromagnetic waves, light and relativity, with laboratory (total of 16 quarter units minimum)

#### Chemistry\*\*

Two quarters or two semesters of general chemistry with laboratory (total of 10 quarter units minimum)

#### Engineering

Digital computer programming, using a higher-level language such as FORTRAN, PASCAL, or C (4 units); other courses: statics, dynamics, graphics and descriptive geometry, surveying, circuit analysis, properties of materials, strength of materials, additional chemistry, additional computer science (total of 24 quarter units minimum)

#### Additional Courses

Life sciences (4 units), English composition (4 units), humanities/social sciences (total of 16 quarter units minimum)

#### UCLA Equivalent Courses

Mathematics 31A, 31B  
Mathematics 32A, 32B  
Mathematics 33A, 33B

Physics 8A/8AL\*, 8B/8BL\*,  
8C/8CL\*, 8D/8DL\*

Chemistry and Biochemistry  
11A, 11B/11BL†

Computer Science 11; Civil and Environmental Engineering 15A and 15B; Electrical Engineering 5C; Mechanical, Aerospace, and Nuclear Engineering 20; engineering core†† courses; free electives††

SEAS general education (GE) courses

\*Depending on curriculum selected; Physics 8D/8DL are not required for the civil engineering, computer science, or computer science and engineering degree.  
\*\*Only Chemistry and Biochemistry 11A is required for the computer science and engineering degree; chemistry is not required for the computer science degree.  
†Chemical engineering curriculum also requires Chemistry and Biochemistry 11C/11CL, 132A, 132B/132BL.  
††See specific undergraduate curricula for core courses, SEAS general education (GE) courses, and free electives, depending on curriculum followed.

Physics (B Test)††	Physics General B — 8 lower division units toward physical sciences (free elective units only)
Physics (C — Mechanics)††	Physics General C — 4 lower division units (credit determined on an individual basis)
Physics (C — Electricity and Magnetism)††	Physics General C — 4 lower division units (credit determined on an individual basis)
Spanish, Language or Literature	Score 3 — Spanish 4 (8 units free electives) Score 4 or 5 — Spanish 5 (8 units free electives)

Some portions of Advanced Placement Test credit are evaluated by corresponding UCLA course number. If you take the equivalent UCLA course, a deduction of UCLA unit credit is made prior to graduation.

††If students have credit for Physics B and C — Mechanics or Physics B and C — Electricity and Magnetism or Physics B, C — Mechanics, and C — Electricity and Magnetism, maximum credit is four lower division units for Physics B and four lower division units for Physics C. If students have credit for Physics C — Mechanics and C — Electricity and Magnetism, maximum credit is eight lower division units for Physics C.

If you have completed 36 quarter units at the time of the examination, you will receive no Advanced Placement Test credit.

#### Admission as a Junior

Applicants for admission to the school in junior standing should have completed 21 to 23 courses (84 to 92 quarter units) in good standing, including the following minimum subject requirements:

- (1) Two and one-half courses in chemistry, equivalent to UCLA's Chemistry and Biochemistry 11A, 11B/11BL (only Chemistry and Biochemistry 11A is required for the computer science and engineering degree; the computer science degree does not require chemistry; the chemical engineering curriculum also requires Chemistry and Biochemistry 11C/11CL, 132A, 132B/132BL, which do not need to be taken prior to admission to UCLA);
- (2) six courses in mathematics, equivalent to UCLA's Mathematics 31A, 31B, 32A, 32B, 33A, 33B;
- (3) four courses

† Four units maximum for both tests.  
\* Eight units maximum for Composition and Literature and for Language and Composition.  
\*\* Students who take both examinations receive a maximum of eight units credit. Students who pass the Mathematics AB examination with a score of 3 may still take Mathematics 31A for credit. Students who pass the Mathematics BC examination with a score of 3 may still take Mathematics 31A, 31B for credit.  
\*\*\* If students have credit for both Music Theory and Music Literature, maximum credit is four lower division units for Music Theory and four lower division units for Survey of Music.

in physics, equivalent to UCLA's Physics 8A, 8B, 8C, 8D (Physics 8D/8DL are not required for the civil engineering, computer science, or computer science and engineering degree), and physics laboratory courses (8AL, 8BL, 8CL, 8DL), depending on curriculum selected.

It is strongly recommended that transfer students complete a course equivalent to UCLA's English 3 in addition to the minimum admissions requirements.

Students transferring to the school from institutions which offer instruction in engineering subjects in the first two years, particularly California community colleges, are given credit for certain engineering core requirements.

Students who have been admitted to senior standing in the school on the basis of credit from another institution, from UCLA Extension, or from another college or school of the University must complete, after admission, eight upper division courses which satisfy part of their approved major field sequence.

## Degree Requirements

The requirements for the Bachelor of Science degrees in Aerospace Engineering, Chemical Engineering, Civil Engineering, Computer Science, Computer Science and Engineering, Electrical Engineering, Engineering, Materials Engineering, and Mechanical Engineering consist of completing the minimum number of required units (from 180 to 200 units, depending on the curriculum selected), the general University requirements, and the school requirements for scholarship and senior residence. You must also satisfy the curricular requirements for the curriculum you choose to follow.

## University Requirements

University requirements in scholarship, Subject A or English as a Second Language (ESL), and American History and Institutions are discussed in detail in the "Undergraduate Degree Requirements" section in Chapter 2.

## Scholarship and Minimum Progress Requirements

In addition to the University requirement that you must earn at least a C (2.0) average in all courses taken at any University of California campus, at least a 2.0 grade-point average must be achieved in all upper division University courses offered in satisfaction of the subject and elective requirements of the curriculum. A 2.0 minimum grade-point average in upper division mathematics, upper division core courses, and the major field is also required for graduation.

Full-time undergraduate students in the School of Engineering and Applied Science must complete a minimum of 36 units in three consecutive terms in which they are registered.

## Senior Residence Requirement

Of the last 48 units completed for the bachelor's degree, 36 must be earned in residence in

the School of Engineering and Applied Science on this campus. No more than 16 of the 36 units may be completed in Summer Sessions at UCLA.

## Study Lists and Credit Limitations

Study Lists require approval of the dean of the school or a designated representative. It is your responsibility to present Study Lists which reflect satisfactory progress toward the Bachelor of Science degree, according to standards set by the faculty; academic counselors in the Office of Academic and Student Affairs are available to help you. Study Lists or programs of study which do not comply with these standards may result in enforced withdrawal from the University or other academic action. You are expected to enroll in at least 12 units each term. If you enroll in less than 12 units, you must obtain approval by petition to the dean prior to enrollment in courses. The normal program is 16 units per term. You may not enroll in more than 18 units per term unless an Excess Unit Petition is approved in advance by the dean.

You must attain a minimum grade of C to satisfy the English 3 requirement, which must be met before you have completed 90 quarter units (a grade of C - does not satisfy this requirement).

After 213 quarter units, enrollment may not normally be continued in the school. You may petition the dean for special permission to continue work required to complete the degree. This regulation does not apply to Departmental Scholars.

After you have completed 105 quarter units (regardless of where these units have been completed), you will not receive unit credit for subject credit for courses completed at a community college.

Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor's degree.

No credit is granted toward the bachelor's degree for college foreign language courses equivalent to quarter levels one and two if the equivalent of level two of the same language was completed with satisfactory grades in high school.

## Credit for Transfer Students

A course in digital computer programming, using a higher-level language such as FORTRAN, PASCAL, or C, satisfies the computer programming requirement. Many sophomore courses in circuit analysis, strength of materials, and properties of materials may satisfy Electrical Engineering 100, Civil and Environmental Engineering 108, and Materials Science and Engineering 14 requirements respectively. Check with the Office of Academic and Student Affairs.

## Curricular Requirements

The curricula for the bachelor's degrees include the following categories, depending on curriculum selected:

(1) Twelve to 16 engineering major field courses (48 to 64 units), depending on curriculum followed.

(2) Three to 10 engineering core courses (12 to 40 units), depending on curriculum selected.

(3) Mathematics courses, ranging from four to 12 upper division units; see curricula in individual departments.

(4) SEAS general education (GE) course requirements: (a) English 3, which must be completed with a minimum grade of C within your first 90 units; (b) six courses from the humanities and social sciences, with at least two courses from each category; (c) one life sciences course (this requirement is automatically satisfied for chemical engineering majors).

All lower division courses taken to satisfy items b and c must be selected from the College of Letters and Science GE requirements list (see Chapter 5). Students interested in taking a foreign language to satisfy this requirement must first consult with an academic counselor in the Office of Academic and Student Affairs.

For item b, at least three courses must be in the same academic department or must otherwise reflect coherence in subject matter. Of the three, at least two must be upper division courses selected from an approved list available in the Office of Academic and Student Affairs.

(5) Free elective courses (four to eight units) may be selected in some programs (see curriculum requirements in individual departments). The free electives may be selected from any courses yielding credit acceptable to the University of California except CLEP and certain remedial courses. However, in programs which include free elective units, it is strongly recommended that you select additional technical courses for some of these units.

(6) The engineering design content of your program must total at least one half-year of design experience.

(7) The engineering science content of your program must include a minimum of one year of engineering science units.

Lists of courses approved to satisfy specific curricular requirements, as well as specifying design and engineering science credit in engineering courses, are available from the Office of Academic and Student Affairs.

The aerospace engineering, chemical engineering, civil engineering, computer science and engineering, electrical engineering, materials engineering, and mechanical engineering curricula are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), the nationally recognized accrediting body for engineering programs.

## Advising and Program Planning

As a new undergraduate, you must have your course of study approved by an academic counselor. After the first term, curricular and career advising is accomplished on a formal basis. You are assigned a faculty adviser in your particular specialization in your sophomore year or earlier.

In addition you are assigned, by major, to an academic counselor in the Office of Academic and Student Affairs who provides you with advice regarding general requirements for the degrees and University and school regulations and procedures. It is your responsibility to periodically meet with your academic counselor in the Office of Academic and Student Affairs, as well as with your faculty adviser, to discuss curriculum requirements, programs of study, and any other academic matters of concern.

You normally follow the curriculum in effect when you enter the school. California community college transfers may also select the curriculum in the catalog in effect at the time they began their community college work in an engineering program, providing attendance has been continuous since that time.

All SEAS undergraduate students may use the computerized SEAS Academic Program Planner, an interactive self-advising system which informs users immediately if their programs meet the requirements for graduation. Students beginning upper division coursework in the major are required to submit an Academic Program Proposal to the Office of Academic and Student Affairs for approval by the associate dean.

Academic counselors in the Office of Academic and Student Affairs are available to assist you with University procedures and to answer any questions you may have in regard to general requirements. Pay them a visit.

## Passed/Not Passed Grading

You may take one course per term on a Passed/Not Passed basis if you are in good academic standing and are enrolled in at least three and one-half courses (14 units) for the term. Only SEAS general education courses (with the exception of English 3) and free electives may be taken on a Passed/Not Passed basis. For more details on P/NP grading, see "Units and Grading Policy" in Chapter 4 or consult the Office of Academic and Student Affairs.

## Honors

### Departmental Scholars

If you are an exceptionally promising junior or senior, you may be nominated as a Departmental Scholar to pursue bachelor's and master's degree programs simultaneously. See "Academic Excellence" in Chapter 2 and the *Announcement of the UCLA School of Engineering and Applied Science* for details.

## Dean's Honors List

Students following the engineering curricula are eligible to be named to the Dean's Honors List each term. Minimum requirements are a course load of 16 units (12 units of letter grade) with a grade-point average equal to or greater than 3.7.

## Honors at Graduation

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. To be eligible, you must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation which places you in the top five percent of the school (GPA of 3.804 or better) for *summa cum laude*, the next five percent (GPA of 3.678 or better) for *magna cum laude*, and the next 10 percent (GPA of 3.497 or better) for *cum laude*.

Based on grades achieved in upper division courses, engineering students must have a 3.804 grade-point average for *summa cum laude*, a 3.678 for *magna cum laude*, and a 3.497 for *cum laude*. For all designations of honors, you must have a minimum 3.25 grade-point average in your major field courses. To be eligible for an award, you should have completed at least 80 upper division units at the University of California.

## Tau Beta Pi

The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs "to foster a spirit of liberal culture in engineering colleges."

## Special Programs and Activities

### Extracurricular Activities

The faculty strongly encourages students to participate in the many extracurricular activities available on campus, especially those of most relevance to engineering. Among these are the student engineering society (the Engineering Society, University of California), student publications, and programs of the many technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school's Executive Committee.

## Women in Engineering

Women make up approximately 20 percent of the undergraduate and 13 percent of the graduate enrollment in the School of Engineering and Applied Science. Today's opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a "males only" field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE), recognizing that women in engineering are still a minority, has established a UCLA student chapter which sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers. The UCLA chapter of SWE, in conjunction with other Los Angeles schools, also publishes an annual résumé book to aid women students in finding jobs and presents a career day for women high school students.

## Continuing Education

Continuing education in engineering is developed and administered by the UCLA Extension (UNEX) Department of Engineering, Information Systems, and Technical Management in close cooperation with the School of Engineering and Applied Science. The department offers evening classes, short courses, certificate programs, special events, and education and training at the workplace. The office (515 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. Call (310) 825-4100 for engineering and information systems class programs, (310) 825-3344 for short course programs, (310) 825-0328 for environmental sciences, and (310) 825-3858 for technical management programs. The fax number is (310) 206-2815.

## Graduate Study

### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the graduate engineering programs are required to take the General Test of the Graduate Record Examination (GRE). In some cases applicants are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area. Applicants for the graduate computer science programs are required to take the GRE General Test and Subject Test in Mathematics or Computer Science. Specific information about the GRE may be obtained from the department of interest.

Students entering the Engineer/Ph.D. program normally are expected to have completed the requirements for the master's degree with at least a 3.25 grade-point average and to have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having an M.S. degree.

Graduate students without adequate preparation may be admitted provisionally and may be required to take additional coursework which may not be applied toward the degree. After you arrive at UCLA, the adviser will help you plan a program which will remedy any such deficiencies.

For information on the proficiency in English requirements for international graduate stu-

dents, refer to "Graduate Admission" in Chapter 3.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the department in which you are interested, School of Engineering and Applied Science, UCLA, Los Angeles, CA 90024.

### Undergraduate Courses

No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199, Civil and Environmental Engineering 106A, 108, 199, Computer Science 152A, 152B, 168L, 171L, 199, Electrical Engineering 100, 101, 102, 103, 110L, 199, Materials Science and Engineering 199, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A, 105D, 199.

Individual departments within the school may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Consult with your graduate adviser on departmental requirements and restrictions.

## Master of Science Degrees

### Major Fields or Subdisciplines

The M.S. program is centered around one major field. The major fields and subdisciplines offered at the M.S. level in most cases parallel those listed below for the Ph.D. program. There are some differences (e.g., manufacturing engineering in the Department of Mechanical, Aerospace, and Nuclear Engineering is offered only at the M.S. level). Contact the department concerned regarding possible differences between the M.S. and Ph.D. fields and subdisciplines. You are free to propose to the school any other field of study, with the support of your adviser.

### Course Requirements

A total of nine courses is required for the M.S. degrees, including a minimum of five graduate courses. (Some fields require more than five; obtain specific information from your department of interest.) A majority of the total formal course requirement and of the graduate course requirement must consist of courses in the School of Engineering and Applied Science. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis. In the comprehensive examination plan, at least five of the nine courses must be in the 200 series; the remaining four courses may be either 200-series graduate or upper division undergraduate courses. No 500-series courses may be applied toward the comprehensive examination plan requirements.

### Thesis Plan

The thesis must either describe some original piece of research that you have done, usually

but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic in your major field of study. You would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

### Comprehensive Examination Plan

The comprehensive examination, which is offered every term, is required in written form only. Your comprehensive examining committee may conduct an oral query after review of the written examination. In case of failure, you may be reexamined once with the consent of your departmental graduate adviser.

## Cooperative Degree Programs

The School of Engineering and Applied Science has established two joint degree programs with other schools and departments on campus which allow you to earn two master's degrees simultaneously: the M.B.A./M.S.-Computer Science and the M.A.-Latin American Studies/M.S.-Engineering. Contact the Office of Academic and Student Affairs for details.

## Master of Engineering Degree

The Master of Engineering (M.Engr.) degree is granted to graduates of the Engineering Executive Program, a two-year work-study program consisting of graduate-level professional courses in the management of technological enterprises. For full details, write to the Office of Academic and Student Affairs, School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Los Angeles, CA 90024-1601, (310) 825-1704.

## Engineer Degree

The School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably in the sense that a student in the Ph.D. program may exit with an

Engineer degree or even pick up the Engineer degree enroute to the Ph.D. degree; similarly, a student in the Engineer degree program may continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs may also be applied toward the minimum residence requirement and time limitation for the other program.

## Ph.D. Degrees

### Major Fields or Subdisciplines\*

**Chemical Engineering Department** — Chemical engineering.

**Civil and Environmental Engineering Department** — Environmental engineering, geotechnical engineering, structures (structural mechanics and earthquake engineering), water resources engineering.

**Computer Science Department** — Artificial intelligence, computer network modeling and analysis, computer science theory, computer system architecture, programming languages and systems (software systems), scientific computing (biomedical systems, physical systems).

**Electrical Engineering Department** — Applied mathematics (established minor field only), applied plasma physics and fusion engineering, communications and telecommunications engineering, control systems, electromagnetics, integrated circuits and systems, operations research, quantum electronics, signal processing, solid-state electronics.

**Materials Science and Engineering Department** — Ceramics and ceramics processing, materials science, mechanical metallurgy, metallurgy and metals processing.

**Mechanical, Aerospace, and Nuclear Engineering Department** — Applied dynamic systems control, applied mathematics (established minor field only), applied plasma physics and fusion engineering, dynamics, fluid mechanics, heat and mass transfer, nuclear science and engineering, structural and solid mechanics.

**Schoolwide Fields and Programs** — For information regarding biocybernetics and man/machine/environment systems, contact the Office of Academic and Student Affairs, School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Los Angeles, CA 90024-1601, (310) 825-1704.

### Requirements

All candidates must fulfill the minimum requirements of the Graduate Division (see "Requirements for Graduate Degrees" in Chapter 3). Major and minor fields may have additional course and examination requirements. For further information, contact the individual departments.

\*You may propose to the school any other field of study with the support of your adviser. Instructions on the definition of acceptable ad hoc fields and procedures for their approval are available in each department office.

## Graduate Certificate of Specialization

A certificate of specialization is available in all areas, except computer science, offered by the School of Engineering and Applied Science. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100- or 200-series courses, at least two of which must be at the graduate level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three terms of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed for a Certificate of Specialization in the School of Engineering and Applied Science may subsequently be applied toward master's and/or doctoral degrees.

## Chemical Engineering

### Professors

David T. Allen, Ph.D., *Chair*  
Yoram Cohen, Ph.D.  
Traugott H.K. Frederking, Ph.D.  
Sheldon K. Friedlander, Ph.D. (*Ralph M. Parsons Professor of Chemical Engineering*)  
Ken Nobe, Ph.D. (*Distinguished Teaching Award*)  
Selim M. Senkan, Ph.D.  
Owen I. Smith, Ph.D.  
Vincent L. Vilker, Ph.D.  
A.R. Frank Wazzan, Ph.D., *Dean*  
Eldon L. Knuth, Ph.D., *Emeritus*  
Lawrence B. Robinson, Ph.D., *Emeritus*  
William D. Van Vorst, Ph.D., *Emeritus*

### Associate Professors

Robert F. Hicks, Ph.D., *Vice Chair*  
Vasilios Manousiouthakis, Ph.D.  
Harold G. Monbouquette, Ph.D.

## Scope and Objectives

The Department of Chemical Engineering conducts undergraduate and graduate programs of teaching and research in the areas of thermodynamics, mass transfer, catalysis, semiconductor materials processing, electrochemis-

try and corrosion, high-temperature chemical kinetics and reaction engineering, combustion science, environmental reaction engineering, cryogenics and low-temperature processes, biochemical engineering, computer-aided process design and control, particle technology, pollution control, and polymer engineering. Students are trained in the fundamental principles of these fields while learning a sensitivity to society's needs — a crucial combination in addressing the question of how industry can grow and innovate in an era of economic, environmental, and energy constraints.

The undergraduate curriculum leads to a B.S. in Chemical Engineering, is accredited by ABET and AIChE, and includes bioengineering and environmental options. The department also offers graduate courses and research leading to M.S. and Ph.D. degrees. Both graduate and undergraduate programs closely relate teaching and research to important industrial problems.

## Bachelor of Science Degree

The goal of the ABET-accredited chemical engineering curriculum is to provide a high quality, professionally oriented education in modern chemical engineering. The bioengineering and environmental options exist as subsets of courses within the accredited curriculum. Balance is sought between science and engineering practice.

### The Major

Course requirements are as follows (193 minimum units required):

- (1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.
- (2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 113A, 132A, 132B/132BL.
- (3) Two elective courses from Chemical Engineering 110, C111, 112, 113, C115, C116, C118, 119, C125, C140 and three upper division chemistry elective courses (except Chemistry and Biochemistry 110A). An upper division life or physical sciences course may be substituted for one chemistry elective with the approval of your faculty adviser.
- (4) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Civil and Environmental Engineering 15A and 15B or Mechanical, Aerospace, and Nuclear Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL.
- (5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

### Bioengineering Option

Course requirements are as follows (200 minimum units required):

- (1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.
- (2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Biology 100A or 108 or Microbiology and Molecular Genetics 101; Chemistry and Biochemistry 132A, 132B/132BL, 153A, 153L, 156.
- (3) Two elective courses (Chemical Engineering C115 and C125; another chemical engineering elective may be substituted for one of these with approval of your faculty adviser); one upper division biology elective selected from Biology C141, 157, C174A through C174F (any two), M185A or one upper division microbiology elective selected from Microbiology and Molecular Genetics 102, C104A/C104B, C111, C112, C119.
- (4) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Biology 5, 9; Civil and Environmental Engineering 15A and 15B or Mechanical, Aerospace, and Nuclear Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B, 8C, 8D.
- (5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

### Environmental Option

Course requirements are as follows (198 minimum units required):

- (1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.
- (2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 113A, 132A, 132B/132BL.
- (3) Two elective courses from Chemical Engineering 113, C118, 119, C140 (another chemical engineering elective may be substituted for one of these with approval of your faculty adviser) and three advanced chemistry electives in the environmental field from Atmospheric Sciences M203A, Biology M127, Chemistry and Biochemistry 103, Environmental Health Sciences 240, 241, 261 (other advanced chemistry courses may be selected in consultation with your faculty adviser).
- (4) Atmospheric Sciences 2A; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Civil and Environmental Engineering 15A and 15B or Mechanical, Aerospace, and Nuclear Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL.
- (5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

## Graduate Study

For information on graduate admission to the chemical engineering program and require-

ments for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

## Lower Division Course

**2. Technology and the Environment.** Lecture, four hours; outside study, eight hours. Natural and anthropogenic flows of materials at global and regional scales. Case studies of natural cycles include global warming (CO<sub>2</sub> cycles), stratospheric ozone depletion (chlorine and ozone cycles), and global nitrogen cycles. Flow of materials in industrial economies compared and contrasted with natural flows; presentation of life-cycle methods for evaluating environmental impact of processes and products. Mr. Allen (Sp)

## Upper Division Courses

**100. Introduction to Chemical Engineering.** Prerequisites: Mathematics 32B (may be taken concurrently), Chemistry 11C/11CL, Physics 8B. Introduction to analysis and design of industrial chemical processes. Material and energy balances. Mr. Monbouquette (F)

**101A. Momentum Transfer.** Prerequisites: course M105A, Mathematics 33A, 33B. Introduction to analysis of fluid flow in systems of interest to chemical engineering practice. Fundamentals of momentum transport, Newton law of viscosity, Navier/Stokes equations, interphase momentum transport and friction factors, flows in conduits and around submerged objects. Mr. Cohen (F)

**101B. Heat Transfer.** Lecture, four hours; discussion, one hour. Prerequisite: course 101A. Introduction to analysis of heat transfer in systems of interest to chemical engineering practice. Fundamentals of thermal energy transport, Fourier law of heat conduction, forced and free convection, radiation, interphase heat transfer, heat exchanger analysis. Mr. Smith (W)

**101C. Mass Transfer.** Lecture, four hours; discussion, one hour. Prerequisites: courses 100, 101B, 102. Introduction to analysis of mass transfer in systems of interest to chemical engineering practice. Fundamentals of mass species transport, Fick law of diffusion, diffusion in chemically reacting flows, interphase mass transfer, multicomponent systems. Mr. Hicks (Sp)

**102. Chemical Engineering Thermodynamics.** Prerequisites: courses 100, M105A. Thermodynamic properties of pure substances and solutions. Phase equilibrium. Chemical reaction equilibrium. Mr. Cohen (W)

**103. Separation Processes.** Prerequisites: courses 100, 101B, 102. Application of principles of heat, mass, and momentum transport to design and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis. Mr. Vilker (Sp)

**104A. Chemical Engineering Laboratory I (6 units).** Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Prerequisites: courses 100, 101B, 102. Measurements of temperature, pressure, flow rate, viscosity, and fluid composition in chemical processes. Methods of data acquisition, equipment selection and fabrication, and laboratory safety. Development of written and oral communication skills. Mr. Hicks (W,Sp)

**104B. Chemical Engineering Laboratory II (6 units).** Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Prerequisites: courses 101C, 103, 104A. Course consists of four experiments in chemical engineering unit operations, each of two weeks duration. Students present their results both written and orally. Written report includes sections on theory, experimental procedures, scaleup and process design, and error analysis. Mr. Senkan (F,W)

**M105A. Introduction to Engineering Thermodynamics.** (Same as Mechanical, Aerospace, and Nuclear Engineering M105A.) Lecture, four hours; recitation, one hour. Prerequisites: Mathematics 32B, Physics 8B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Mr. Frederking (F,W,Sp)

**106. Chemical Reaction Engineering.** Prerequisites: courses 100, 101C, 102. Fundamentals of chemical kinetics and catalysis. Introduction to analysis and design of homogeneous and heterogeneous chemical reactors. Mr. Allen (F)

**107. Process Dynamics and Control.** Prerequisites: courses 101C, 103, 106. Principles of dynamics modeling and start-up behavior of chemical engineering processes. Chemical process control elements. Design and applications of chemical process computer control. Mr. Manousiouthakis (W)

**108A. Process Economics and Analysis.** Prerequisites: courses 103, 104B, 106. Integration of chemical engineering fundamentals such as transport phenomena, thermodynamics, separation operations, and reaction engineering and simple economic principles for purpose of designing chemical processes and evaluating alternatives. Mr. Manousiouthakis (W)

**108B. Chemical Process Computer-Aided Design and Analysis.** Prerequisites: courses 103, 106, 108A, Computer Science 10F. Introduction to application of some mathematical and computing methods to chemical engineering design problems; use of simulation programs as an automated method of performing steady state material and energy balance calculations. Mr. Allen, Mr. Manousiouthakis (Sp)

**109. Mathematical Methods in Chemical Engineering.** Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisite: working knowledge of FORTRAN programming. Discussion of theory and applications of mathematics to chemical engineering problems, with focus on numerical and analytical techniques encompassing linear and nonlinear algebraic equations, finite difference methods, and ordinary and partial differential equations. Mr. Smith (F)

**110. Intermediate Engineering Thermodynamics.** Lecture, four hours; outside study, eight hours. Prerequisite: course 102. Principles and engineering applications of statistical and phenomenological thermodynamics. Determination of partition function in terms of simple molecular models and spectroscopic data; nonideal gases; phase transitions and adsorption; nonequilibrium thermodynamics and coupled transport processes. Mr. Nobe (Sp)

**C111. Cryogenics and Low-Temperature Processes.** (Formerly numbered 111.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenics and cryoengineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C211. Mr. Frederking (W)

**112. Polymer Processes.** Prerequisites: course 101A, Chemistry 132A. Formation of polymers, criteria for selecting a reaction scheme, polymerization techniques. Polymer characterization. Mechanical properties. Rheology of macromolecules, modeling and experimental methods to characterize non-Newtonian fluids. Polymer process engineering. Mr. Cohen (Sp)

**113. Air Pollution Engineering.** Lecture, four hours; preparation, two hours; outside study, six hours. Prerequisites: courses 101C and 102, or consent of instructor. Integrated approach to air pollution, including concentrations of atmospheric pollutants, air pollution standards, air pollution sources and control technology, and relationship of air quality to emission sources. Links air pollution to multimedia environmental assessment. Mr. Friedlander (F)

**C114. Electrochemical Processes and Corrosion.** Lecture, four hours; other, eight hours. Prerequisites: courses M105A, and 102 or Materials Science 130. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electroless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C214. Mr. Nobe (F)

**C115. Biochemical Reaction Engineering.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 101C and 106, or Chemistry 156, or consent of instructor. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C215. Mr. Monbouquette, Mr. Vilker (W)

**C116. Surface and Interface Engineering.** Prerequisites: courses 101C, 102, 106. Description of thermodynamics and kinetics of surface phenomena: nucleation, growth, and coalescence of films; adsorption, desorption, diffusion, and reaction of gases on surfaces. Application of these concepts to electronic materials processing and catalyst design. May be concurrently scheduled with course C216. Mr. Hicks (F)

**C116. Multimedia Environmental Assessment.** Lecture, four hours; preparation, two hours; outside study, six hours. Prerequisites: courses 101C and 102, or consent of instructor. Pollutant sources, estimation of source releases, waste minimization, transport and fate of chemical pollutants in environment, intermedia transfers of pollutants, multimedia modeling of chemical partitioning in environment, exposure assessment and fundamentals of risk assessment, risk reduction strategies. Concurrently scheduled with course C218. Mr. Cohen (W)

**119. Pollution Prevention for Chemical Processes.** Lecture, four hours; recitation, one hour; preparation/outside study, seven hours. Prerequisite: course 108A or consent of instructor. Waste audits and emission inventories, process design and process flowsheeting for waste minimization, economic analysis of environmental projects, life-cycle analyses. Mr. Allen (Sp)

**C125. Bioprocesses and Bioprocess Engineering.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 101C and 103, or Chemistry 156, or consent of instructor. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Concurrently scheduled with course C225. Mr. Monbouquette, Mr. Vilker (Sp)

**C140. Fundamentals of Aerosol Technology.** Lecture, four hours; outside study, eight hours. Prerequisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Concurrently scheduled with course C240. Mr. Friedlander (F)

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. (F,W,Sp)

## Graduate Courses

**200. Advanced Engineering Thermodynamics.** Prerequisite: course 102 or equivalent. Phenomenological and statistical thermodynamics of chemical and physical systems with engineering applications. Presentation of role of atomic and molecular spectra and intermolecular forces in interpretation of thermodynamic properties of gases, liquids, solids, and plasmas.

Mr. Nobe (F)

**210. Advanced Chemical Reaction Engineering.** Prerequisites: courses 101C, 106, or equivalent. Principles of chemical reactor analysis and design. Particular emphasis on simultaneous effects of chemical reaction and mass transfer on noncatalytic and catalytic reactions in fixed and fluidized beds.

Mr. Senkan (W)

**C211. Cryogenics and Low-Temperature Processes.** (Formerly numbered 211.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenics and cryoengineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C111.

Mr. Frederking (W)

**C214. Electrochemical Processes and Corrosion.** Lecture, four hours; other, eight hours. Prerequisites: courses M105A, and 102 or Materials Science 130. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electroless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C114.

Mr. Nobe (F)

**C215. Biochemical Reaction Engineering.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 101C and 106, or Chemistry 156, or consent of instructor. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C115.

Mr. Monbouquette, Mr. Vilker (W)

**C216. Surface and Interface Engineering.** Prerequisites: courses 101C, 102, 106. Description of thermodynamics and kinetics of surface phenomena: nucleation, growth, and coalescence of films; adsorption, desorption, diffusion, and reaction of gases on surfaces. Application of these concepts to electronic materials processing and catalyst design. May be concurrently scheduled with course C116.

Mr. Hicks (F)

**217. Electrochemical Engineering.** Prerequisite: course C114. Transport phenomena in electrochemical systems; relationships between molecular transport, convection, and electrode kinetics, along with applications to industrial electrochemistry, fuel cell design, and modern battery technology.

Mr. Nobe (F)

**C218. Multimedia Environmental Assessment.** Lecture, four hours; preparation, two hours; outside study, six hours. Prerequisites: courses 101C and 102, or consent of instructor. Pollutant sources, estimation of source releases, waste minimization, transport and fate of chemical pollutants in environment, intermedia transfers of pollutants, multimedia modeling of chemical partitioning in environment, exposure assessment and fundamentals of risk assessment, risk reduction strategies. Concurrently scheduled with course C118.

Mr. Cohen (W)

**220. Advanced Mass Transfer.** Prerequisite: course 101C or equivalent. Advanced treatment of mass transfer, with applications to industrial separation processes, gas cleaning, pulmonary bioengineering, controlled release systems, and reactor design; molecular and constitutive theories of diffusion, interfacial transport, membrane transport, convective mass transfer, concentration boundary layers, turbulent transport.

Mr. Friedlander (F)

**C225. Bioprocesses and Bioprocess Engineering.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 101C and 103, or Chemistry 156, or consent of instructor. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Concurrently scheduled with course C125.

Mr. Monbouquette, Mr. Vilker (Sp)

**230. Reaction Kinetics.** Prerequisites: courses 106, 200, or equivalent. Macroscopic descriptions: reaction rates, relaxation times, thermodynamic correlations of reaction rate constants. Molecular descriptions: kinetic theory of gases, models of elementary processes. Applications: absorption and dispersion measurements, unimolecular reactions, photochemical reactions, hydrocarbon pyrolysis and oxidation, explosions, polymerization.

Mr. Senkan, Mr. Smith (Sp)

**231. Molecular Dynamics.** Prerequisite: course 106 or 110. Analysis and design of molecular-beam systems. Molecular-beam sampling of reactive mixtures in combustion chambers or gas jets. Molecular-beam studies of gas-surface interactions, including energy accommodations and heterogeneous reactions. Applications to air pollution control and to catalysis.

Mr. Allen (W)

**232. Combustion Processes.** Prerequisite: course 106, 200, or Mechanical, Aerospace, and Nuclear Engineering 132A. Fundamentals: change equations for multicomponent reactive mixtures, rate laws. Applications: combustion, including burning of (1) premixed gases or (2) condensed fuels. Detonation. Sound absorption and dispersion.

Mr. Senkan, Mr. Smith (Sp)

**M233. Principles, Practices, and Policies in Biotechnology (2 units).** (Same as Biological Chemistry M233, Biology M233, Chemistry M233, Microbiology M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

Mr. Fox, Ms. Morrison

**C240. Fundamentals of Aerosol Technology.** (Formerly numbered 240.) Lecture, four hours; outside study, eight hours. Prerequisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Concurrently scheduled with course C140.

Mr. Friedlander (F)

**250. Computer-Aided Chemical Process Design.** Prerequisite: course 108B. Application of optimization methods in chemical process design; computer aids in process engineering; process modeling; systematic flowsheet invention; process synthesis; optimal design and operation of large-scale chemical processing systems.

Mr. Manousiouthakis (F)

**260. Non-Newtonian Fluid Mechanics.** Prerequisite: course M105A. Principles of non-Newtonian fluid mechanics. Stress constitutive equations. Rheology of polymeric liquids and dispersed systems. Applications in viscometry, polymer processing, biorheology, oil recovery, and drag reduction.

Mr. Cohen (Sp)

**290A-290Z. Special Topics (2 to 4 units each).** Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced and current study of one or more aspects of chemical engineering, such as chemical process dynamics and control, fuel cells and batteries, membrane transport, advanced chemical engineering analysis, polymers, optimization in chemical process design. May be repeated for credit with topic change. S/U or letter grading:

**M290U. Toxics Reduction: Science, Engineering, and Policy Issues.** (Same as Urban Planning M262A and Environmental Health Sciences M249.) Lecture, three hours. Prerequisites: Urban Planning 260A and 260B, or consent of instructor. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area.

Mr. Allen

**298A-298Z. Research Seminars (2 to 4 units each).** Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Lectures, discussions, student presentations, and projects in areas of current interest. May be repeated for credit. S/U grading.

(F,W,Sp)

**299. Departmental Seminar (2 units).** Prerequisite: graduate standing in chemical engineering. Seminars by leading academic and industrial chemical engineers on development or application of recent technological advances in the discipline. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Mr. Friedlander (F,W,Sp)

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisites: graduate standing in chemical engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Prerequisites: graduate standing in chemical engineering, consent of instructor. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Prerequisites: graduate standing in chemical engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Prerequisites: graduate standing in chemical engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Prerequisites: graduate standing in chemical engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

## Chemistry/Materials Science (Interdepartmental)

For details on this undergraduate program, see Chapter 5 on the College of Letters and Science.

## Civil and Environmental Engineering

3173 Engineering I, (310) 825-2471

### Professors

Stanley B. Dong, Ph.D.  
John A. Dracup, Ph.D.  
Gary C. Hart, Ph.D.  
Richard B. Nelson, Sc.D.  
Moshe F. Rubinstein, Ph.D. (*Distinguished Teaching Award*)  
Lawrence G. Selna, Ph.D.  
Michael K. Stenstrom, Ph.D., *Chair*  
William W-G. Yeh, Ph.D.

### Professors Emeriti

Michael E. Fourny, Ph.D.  
Poul V. Lade, Ph.D.  
Tung Hua Lin, D.Sc.  
Chung Yen Liu, Ph.D.  
Rokuro Muki, Ph.D.  
Richard L. Perrine, Ph.D.  
Sanford B. Roberts, Ph.D.  
Lucien A. Schmit, Jr., M.S.

### Associate Professors

Menachem Elimelech, Ph.D.  
Lewis P. Felton, Ph.D., *Vice Chair*  
Jiann-Wen Ju, Ph.D.  
Mladen Vucetic, Ph.D.

### Assistant Professors

Thomas C. Harmon, Ph.D.  
Janet G. Hering, Ph.D.

### Senior Lecturer

George J. Tauxe, M.S., *Emeritus*

### Adjunct Professors

Y. Marvin Ito, Ph.D.  
Keith D. Stolzenbach, Ph.D.

## Scope and Objectives

The civil and environmental engineering programs at UCLA include structural engineering, structural mechanics, geotechnical engineering, earthquake engineering, water resources engineering, environmental engineering, and system analysis.

The ABET-accredited civil engineering curriculum leads to a B.S. in Civil Engineering, a broad-based education in structural engineering, geotechnical engineering, water resources

engineering, and environmental engineering. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study.

At the graduate level, M.S. and Ph.D. degree programs are offered in the areas of structures (including structural/earthquake engineering and structural mechanics), geotechnical engineering, water resources engineering, and environmental engineering. In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to critical problems in earthquake engineering and in the development of new technologies for pollution control and water distribution and treatment.

## Bachelor of Science in Civil Engineering

The objective of the civil engineering curriculum is to give graduating seniors an academically sound and practical background in civil engineering. A balanced program, including engineering science, design, and laboratory courses in civil engineering, is stressed. The ongoing goal of the program is to produce well-qualified graduates for the engineering profession or for graduate civil engineering schools in the U.S.

### The Major

Course requirements are as follows (180 minimum units required):

(1) Eight core courses: Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A, Civil and Environmental Engineering 11, 108, Electrical Engineering 100, 103, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103.

(2) Civil and Environmental Engineering 120, 121, 130, 135A, 151, 153; one mathematics course from Mechanical, Aerospace, and Nuclear Engineering 174, 191A, 192A, 192B, 192C, 192D.

(3) Thirty-two elective units, to be selected from the courses listed below, which must include eight units of laboratory:

*Engineering Mechanics* — Civil and Environmental Engineering 130F, 130L, Mechanical, Aerospace, and Nuclear Engineering 166C, 168.

*Geotechnical Engineering* — Civil and Environmental Engineering 128L, Earth and Space Sciences 100, 139.

*Structures* — Civil and Environmental Engineering 135B, 135C, 135L, 137, 137L, 141, 142, 142L, 142X (two units), 143, 144, 147.

*Systems Analysis* — Civil and Environmental Engineering 106A, M140, 175.

*Water Resources and Environmental Engineering* — Civil and Environmental Engineering 150, 155, 156A, 156B, 157A, 157B, 157C, 163, 164.

(4) Chemistry and Biochemistry 11A, 11B/11BL; Civil and Environmental Engineering 15A, 15B; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C.

(5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

(6) One free elective course.

## Graduate Study

For information on graduate admission to the civil engineering program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

## Lower Division Courses

**3. Fundamentals of Environmental Engineering Science.** Lecture, four hours; outside study, eight hours. Quantitative analysis of sources, transformations, and effects of pollutants in water, air, and soil. Topics include drinking water, wastewater, hazardous wastes, radioactive wastes, and atmospheric emissions. Ms. Hering, Mr. Stolzenbach (Sp)

**11. Patterns of Problem Solving.** (Formerly numbered Engineering 11.) Introduction to creative patterns of problem solving and decision making. Discussion of attitudes and techniques productive in problem solving. Heuristic guides for knowledge acquisition, problem presentation, and problem solution. Tools and concepts for decision making that include technology and human values. Mr. Rubinstein (F)

**12. Applied Patterns of Problem Solving.** (Formerly numbered Engineering 12.) Enforced requisite: course 11. Application of tools and methods discussed in course 11 to a major problem of a social and technical nature. Experience in team problem solving and decision making. Mr. Rubinstein (Sp)

**15A. Introduction to Computing in Civil Engineering (2 units).** Lecture, two hours; laboratory, two hours. Overview of operating systems for microcomputers, file editors, spreadsheets, database programs, SEASnet facilities. Introduction to programming. Civil engineering applications. Mr. Stenstrom (F,W)

**15B. Introduction to FORTRAN Programming (2 units).** Lecture, two hours; laboratory, two hours. Enforced requisite: course 15A. Introduction to programming using structured FORTRAN. Selected topics in programming, with emphasis on numerical techniques as applied to engineering problems. Mr. Stenstrom (F,W)

## Upper Division Courses

**106A. Problem Solving in Engineering Economy.** Lecture, four hours; outside study, eight hours. Prerequisite: upper division standing. Problem-solving and decision-making framework for economic analysis of engineering projects. Foundation for understanding corporate financial practices and accounting. Decisions on capital investments and choice of alternatives for engineering applications in all fields. Introduction to use of engineering economics in analysis of inflation and public investments. Mr. Dracup (W)

**108. Introduction to Mechanics of Deformable Solids.** Lecture, three hours; recitation, two hours; outside study, seven hours. Prerequisite: Mathematics 33A. Review of equilibrium principles; forces and moments transmitted by slender members. Concepts of stress and strain. Material constitution (stress-strain relations). Yield criteria. Structural applications to trusses, beams, shafts, columns, and pressure vessels. Mr. Felton (F,W,Sp)

**120. Principles of Soil Mechanics.** Lecture, four hours; outside study, eight hours. Prerequisite: course 108. Soil as a foundation for structures and as a material of construction. Soil formation, classification, physical and mechanical properties, compaction, bearing capacity, earth pressures, consolidation, and shear strength. Mr. Vucetic (F)

**121. Design of Foundations and Earth Structures.** Prerequisite: course 120. Design methods for foundations and earth structures. Site investigation, including determination of soil properties for design. Design of footings and piles, including stability and settlement calculations. Design of slopes and earth retaining structures. Mr. Vucetic (W)

**128L. Soil Mechanics Laboratory.** Lecture, one hour; laboratory, eight hours; outside study, three hours. Prerequisite: course 120. Laboratory experiments to be performed by students to obtain soil parameters required for assigned design problems. Soil classification, grain size distribution, Atterberg limits, specific gravity, compaction, expansion index, consolidation, shear strength determination. Design problems, report writing. Mr. Vucetic (Sp)

**130. Elementary Structural Mechanics.** Lecture, four hours; outside study, eight hours. Prerequisite: course 108. Analysis of stress, strain; phenomenological material behavior, fatigue, cumulative damage; bending, extension of beams, unsymmetrical sections, stiffened shell structures; torsion of beams, stress function, warping, thin-walled cross-sections; shear stresses; plate analysis; instability, failure of columns; plates, approximate methods, empirical formulas. Mr. Nelson (W)

**130F. Experimental Fracture Mechanics.** Lecture, two hours; laboratory, six hours; outside study, four hours. Prerequisite: course 108 or equivalent. Elementary introduction to fracture mechanics and experimental techniques used in fracture, crack tip stress fields, strain energy release rate, fracture characterization, compliance calibration, surface flaws, fatigue crack growth and fatigue life of structural components, mixed mode fracture, and individual projects. Mr. Felton

**130L. Experimental Structural Mechanics.** Lecture, two hours; laboratory, six hours; outside study, four hours. Prerequisite or corequisite: course 130 or equivalent. Lecture and experiments in limit analysis of various aspects of structures. Elastic and plastic analysis of structural elements in multiaxial stress states. Buckling of columns, plates, and shells. Effects of actual boundary conditions on structural performance. Evaluation of structural fasteners. Mr. Felton (Sp)

**135A. Elementary Structural Analysis.** Lecture, four hours; outside study, eight hours. Prerequisite: course 108 or consent of instructor. Introduction to structural analysis, classification of structural elements; analysis of statically determinate trusses, cables, beams, and frames; deflections in elementary structures; introduction to virtual work; analysis of indeterminate structures; introduction to force method of analysis. Mr. Felton (F)

**135B. Intermediate Structural Analysis.** Lecture, four hours; outside study, eight hours. Prerequisite: course 135A or consent of instructor. Analysis of truss and frame structures using matrix methods; matrix force methods; matrix displacement method; analysis concepts based on theorem of virtual work; moment distribution. Mr. Nelson (W)

**135C. Computer Analysis of Structures.** Lecture, four hours; outside study, eight hours. Prerequisite: course 135A. Recommended: course 135B. Matrix displacement and force methods of structural analysis, with emphasis on their application in computer analysis. Development of approximate analysis techniques for estimation/verification of computer results. Discussion of structural principles, including symmetry/antisymmetry, superposition, and Mueller/Breslau principle for influence lines. Mr. Ju (Sp)

**135L. Structural Design and Testing Laboratory.** Lecture, two hours; laboratory, eight hours. Prerequisites: courses 15A, 15B, 135A, or equivalent, senior standing, consent of instructor. Limited enrollment. Computer-aided optimum design, construction, instrumentation, and test of a small-scale model structure. Use of computer-based data acquisition and interpretation systems for comparison of experimental and theoretically predicted behavior. Mr. Felton (Sp)

**137. Elementary Structural Dynamics.** (Formerly numbered M137.) Lecture, four hours; outside study, eight hours. Prerequisite: course 135B or consent of instructor. Basic structural dynamics course for civil engineering students. Elastic free, forced vibration, and earthquake response spectra analysis for single and multidegree of freedom systems. Axial, bending, and torsional vibration of beams. Mr. Hart

**137L. Mechanical Vibrations Laboratory.** Lecture, two hours; laboratory, six hours; outside study, four hours. Prerequisite or corequisite: course 137 or Mechanical, Aerospace, and Nuclear Engineering 169A. Calibration of instrumentation for dynamic measurements. Determination of natural frequencies and damping factors from free vibrations. Determination of natural frequencies, mode shapes, and damping factors from forced vibrations. Dynamic similitude. Mr. Felton (F)

**M140. Numerical Optimization Methods for Engineering Design.** (Same as Mechanical, Aerospace, and Nuclear Engineering M192F.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 15A and 15B or Mechanical, Aerospace, and Nuclear Engineering 20, Mathematics 32A, 33A. Recommended: Mathematics 115A. Systematic presentation of numerical optimization methods for engineering design; one-dimensional minimization, unconstrained minimization, linearly constrained minimization, general nonlinear problems, approximation concepts, duality. Optimization problem statements. Advantages and limitations of numerical optimization. Applications. Mr. Felton (F)

**141. Steel Structures.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 135A, 135B. Introduction to building codes. Fundamentals of modeling of steel frame components and systems. Load resistance factor design of tension members and compression members. Mr. Hart (F)

**142. Design of Reinforced Concrete Structures.** Lecture, three hours; recitation, three hours; outside study, six hours. Prerequisite: course 135A. Beams, columns, and slabs in reinforced concrete structures. Properties of reinforced concrete materials. Design of beams and slabs for flexure, shear, anchorage of reinforcement, and deflection. Design of columns for axial force, bending, and shear. Ultimate strength design methods. Mr. Selna (W)

**142L. Reinforced Concrete Structural Laboratory.** Lecture, two hours; laboratory, six hours; outside study, four hours. Prerequisite: course 142 or consent of instructor. Limited enrollment. Design considerations used for reinforced concrete beams, columns, slabs, and joints evaluated using analysis and experiments. Links between technical theory, building codes, and experimental results. Mr. Selna (Sp)

**142X. Reinforced Concrete Construction Laboratory (2 units).** Laboratory, four hours; outside study, two hours. Prerequisite: junior standing. Design and fabrication methods used for reinforced concrete structures. Preparation of engineering drawings. Fabrication of near full-scale reinforced concrete elements in the laboratory. Mr. Selna (F)

**143. Design of Prestressed Concrete Structures.** Prerequisite: course 135A. Prestressing and post-tensioning techniques. Properties of concrete and prestressing steels. Loss of prestress. Analysis of sections for flexural stresses and ultimate strength. Design of beams by allowable stress and strength methods. Load balancing design of continuous beams and slabs. Mr. Selna (Sp)

**144. Structural Systems Design.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 137, 141, 142, consent of instructor. Limited enrollment. Design course for civil engineering students, with focus on aspects of complete structural systems. Introduction to construction concepts. Design of concrete, steel, and masonry gravity and lateral load systems. System selection using realistic criteria. Project involving design of a building. Mr. Hart (Sp)

**147. Design and Construction of Tall Buildings.** Lecture, four hours; outside study, eight hours. Prerequisites: course 141, consent of instructor. Limited enrollment. Introduction to total design process and professional participants. Systematic presentation of advantages and limitations of different structural forms and systems. Identification of critical design factors influenced by tallness. Foundation systems. Construction site visits, costing, and scheduling. Mr. Hart (W)

**150. Engineering Hydrology.** Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 103 or consent of instructor. Recommended: elementary probability. Precipitation, climatology, stream flow analysis, flood frequency analysis, groundwater, snow hydrology, hydrologic simulation. Possible field trips. Mr. Dracup (W)

**151. Introduction to Water Resources Engineering.** Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 103 or consent of instructor. Principles of hydraulics, flow of water in open channels and pressure conduits, reservoirs and dams, hydraulic machinery, hydroelectric power. Introduction to system analysis and design applied to water resources engineering. Mr. Dracup (F)

**153. Introduction to Environmental Engineering Science.** Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 103. Water, air, and soil pollution: sources, transformations, effects, and processes for removal of contaminants. Water quality, water and wastewater treatment, waste disposal, air pollution, global environmental problems. Field trip. Ms. Hering (F)

**155. Unit Operations and Processes for Water and Wastewater Treatment.** Lecture, four hours; outside study, eight hours. Prerequisite: course 153 or consent of instructor. Biological, chemical, and physical methods used to modify water quality. Fundamentals of phenomena governing design of engineered systems for water and wastewater treatment systems. Field trip. Mr. Harmon (F)

**156A. Environmental Chemistry Laboratory.** (Formerly numbered 156.) Lecture, four hours; laboratory, four hours; outside study, four hours. Prerequisites: course 153 (may be taken concurrently), Chemistry 11A, 11B, or equivalent. Basic laboratory techniques in analytical chemistry related to water and wastewater analysis. Selected experiments include gravimetric analysis, titrimetry spectrophotometry, redox systems, pH and electrical conductivity. Concepts to be applied to analysis of "real" water samples in course 156B. Ms. Hering (F,Sp)

**156B. Water Quality Control Laboratory.** Lecture, four hours; laboratory, four hours; outside study, four hours. Prerequisites: Chemistry 11A, 11B, or equivalent. Characterization and analysis of typical natural waters and wastewaters for inorganic and organic constituents. Selected experiments include solids, nitrogen species, oxygen demand, chlorine, alkalinity, hardness, and trace analysis. Discussion of relevance of these measurements to water resource engineering. Mr. Stenstrom (W)

**157A. Design of Water Resource Structures.** Lecture, four hours; outside study, eight hours. Prerequisites: course 151, Mechanical, Aerospace, and Nuclear Engineering 103. Review design of hydraulic structures, pertinent fluid mechanics, and hydraulic theory and applications. Examples of failures and successes of hydraulic structures. Class project and field trip required. Mr. Dracup (F)

**157B. Design of Water Treatment Plants.** (Formerly numbered 157.) Lecture, two hours; discussion, two hours; laboratory, four hours; other, four hours. Prerequisite: course 155. Water quality standards and regulations, overview of water treatment plants, design of unit operations, predesign of water treatment plants, hydraulics of plants, process control, and cost estimation. Mr. Elimelech (Sp)

**157C. Design of Wastewater Treatment Plants.** Lecture, four hours; outside study, eight hours. Prerequisite: course 155. Process design of wastewater treatment plants, including primary and secondary treatment, detailed design review of existing plants, process control, and economics. Mr. Stenstrom (W)

**163. Air Pollution Control.** Lecture, four hours; outside study, eight hours. Prerequisite: senior standing or consent of instructor. Sources of air pollutants, their atmospheric transport, dispersion, and photochemical reaction. Design and operational basis for stationary and mobile source control systems. Overview of current regulatory trends. Mr. Stenstrom (Sp)

**164. Waste and Hazardous Waste Management.** Lecture, four hours; outside study, eight hours. Prerequisites: course 153 and Mechanical, Aerospace, and Nuclear Engineering 103, or consent of instructor. Waste sources and handling. Resource recovery processes and system design. Site selection, design and operation for landfill disposal. Leachate transport, monitoring, and design for groundwater protection. Mr. Harmon (W)

**175. Introduction to Elements of Decision Making.** Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 192D or equivalent mathematics course. Elements of decision making and decision process. Decision and utility theory. Formulation of utility functions and objective functions. Subjective probabilities. Bayesian approach to value of information. Risk sharing and group decisions. Methods of eliciting judgments; bias and scoring rules. Individual and team decision making. Mr. Rubinstein (F)

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. (F,W,Sp)

## Graduate Courses

**220. Shear Strength of Soil and Stability of Slopes.** Prerequisite: course 120. Detailed study of fundamental concepts of shear strength of soils, strength determining factors, methods of strength measurement. Slope stability and stability analysis techniques using circular and noncircular failure surfaces, effect of side forces, total and effective stress analyses. Mr. Vucetic (F)

**221. Foundation Engineering.** Prerequisites: courses 120, 220. Principles of foundation design, including theory of consolidation, impeded drainage, stress distribution, settlement analysis, allowable bearing capacity for shallow foundations, piles, and piers; laterally loaded piles. Mr. Vucetic (W)

**222. Soil Dynamics.** Lecture, four hours; outside study, eight hours. Prerequisite: course 120. Stress-strain behavior of soils under cyclic loads. Behavior of soil deposits and earth structures during earthquakes. Liquefaction of saturated cohesionless deposits. Fundamentals of vibrations of machine foundations. Mr. Vucetic (W)

**223. Earth Pressures and Earth Retaining Structures.** Lecture, four hours; outside study, eight hours. Prerequisite: course 120. Basic concepts of theory of earth pressures behind retaining structures, with special application to design of retaining walls, bulkheads, and excavation bracing; effects of flexibility of bulkheads, creep in soils, and construction techniques. Mr. Vucetic (F)

**228L. Advanced Soil Mechanics Laboratory.** Prerequisites: courses 120, 121, 220, 221. Lectures and laboratory studies of advanced aspects of soil properties and their application to design. Permeability, consolidation, strength testing, pore water pressure measurements, advanced instrumentation and measurement techniques. Preparation of engineering reports. Mr. Vucetic (Sp)

**229. Seminar: Advanced Topics in Soil Mechanics.** Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Topics may vary each term to cover subjects such as earth dam design, seepage through soils, consolidation, constitutive laws, finite difference and finite element methods with special application in soil mechanics, theories of elasticity and plasticity, and case histories. Mr. Vucetic (W)

**M230. Elasticity.** (Same as Mechanical, Aerospace, and Nuclear Engineering M256B.) Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 256A or consent of instructor. Equations of linear elasticity; uniqueness of solution; Betti/Rayleigh reciprocity; Saint-Venant's principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations. Mr. Dong, Mr. Mal (W)

**231. Inelastic Effects in Structures and Materials.** Prerequisite: course 130 or equivalent or consent of instructor. Analogy between inelastic strain and applied force in stress analysis. Mathematical and physical theories of plasticity and creep and their basic assumptions. Static and dynamic analysis of inelastic beams, columns, frames, and plates. Localized plastic deformation in materials. Mr. Lin (W, even years)

**232. Theory of Plates and Shells.** Prerequisite: course 130 or Mechanical, Aerospace, and Nuclear Engineering 156B. Small and large deformation theories of thin plates; energy methods; free vibrations; membrane theory of shells; axisymmetric deformations of cylindrical and spherical shells, including bending. Mr. Nelson (W)

**233. Mechanics of Composite Material Structures.** Lecture, four hours; outside study, eight hours. Prerequisites: courses M230 and 232, or consent of instructor. Elastic, anisotropic stress-strain-temperature relations. Analysis of prismatic beams by three-dimensional elasticity. Analysis of laminated anisotropic plates and shells based on classical and first-order shear deformation theories. Elastodynamic behavior of laminated plates and cylinders. Mr. Nelson (Sp)

**234. Advanced Topics in Structural Mechanics.** Prerequisites: graduate standing in engineering, consent of instructor. Current topics in composite materials, computational methods, finite element analysis, structural synthesis, nonlinear mechanics, and structural mechanics in general. Topics may vary from term to term. Mr. Muki (Sp)

**235A. Advanced Structural Analysis.** Lecture, four hours; outside study, eight hours. Prerequisite: course 135A. Recommended: course 135B. Review of matrix force and displacement methods of structural analysis; virtual work theorem, virtual forces, and displacements; theorems on stationary value of total and complementary potential energy, minimum total potential energy, Maxwell/Betti theorems, effects of approximations, introduction to finite element analysis. Mr. Felton, Mr. Nelson (F)

**235B. Finite Element Analysis of Structures.** Prerequisites: courses 130 and 235A, or consent of instructor. Direct energy formulations for deformable systems; solution methods for linear equations; analysis of structural systems with one-dimensional elements; introduction to variational calculus; discrete element displacement, force, and mixed methods for membrane, plate, shell structures; instability effects. Mr. Nelson (W)

**235C. Nonlinear Structural Analysis.** Prerequisite: course 235B or consent of instructor. Classification of nonlinear effects; material nonlinearities; conservative, nonconservative material behavior; geometric nonlinearities, Lagrangian, Eulerian description of motion; finite element methods in geometrically nonlinear problems; postbuckling behavior of structures; solution of nonlinear equations; incremental, iterative, programming methods. Mr. Nelson (Sp)

**236. Stability of Structures I.** Prerequisite: course 130 or 135B or equivalent. Elastic buckling of bars. Different approaches to stability problems. Inelastic buckling of columns and beam columns. Columns and beam columns with linear, nonlinear creep. Combined torsional and flexural buckling of columns. Buckling of plates. Mr. Nelson (Sp)

**M237A. Dynamics of Structures.** (Same as Mechanical, Aerospace, and Nuclear Engineering M269A.) Prerequisite: course 137. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation. Mr. Bendiksen, Mr. Dong, Mr. Friedmann (W)

**M237C. Introduction to Probabilistic Dynamics.** (Same as Mechanical, Aerospace, and Nuclear Engineering M269C.) Prerequisite: course 137. Response of structural and mechanical systems to random vibrations. Stationary and nonstationary excitations. Response of systems with random parameters. Discrete and continuous linear systems. Applications to earthquakes, wind sway of buildings, gust response, vibrations due to gearing inaccuracies, train vibrations. Mr. Hart (Sp, even years)

**M240. Optimum Structural Design.** (Same as Mechanical, Aerospace, and Nuclear Engineering M267A.) Prerequisite: course 235A or Mechanical, Aerospace, and Nuclear Engineering 261A or consent of instructor. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures. Mr. Felton (W)

**241. Advanced Steel Structures.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 137, 141, 235A. Performance characterization of steel structures for static and dynamic loads. Analysis and load resistance factor design of beams, columns, and plates for biaxial loads. Composite steel-concrete members. Mr. Hart (W)

**242. Advanced Reinforced Concrete Design.** Lecture, four hours; outside study, eight hours. Prerequisite: course 142. Design of building and other structural systems for vertical and lateral loads. Earthquake forces. Ductility in elements and systems. Columns: secondary effects and biaxial bending. Slabs: code and analysis methods. Footings, shear walls, diaphragms, chords, and collectors. Detailing for ductile behavior. Retrofitting. Mr. Selna (Sp)

**244. Structural Loads and Safety for Civil Structures.** Prerequisite: course 141 or 142 or 143 or 144. Modeling of uncertainties in structural loads and structural mechanics; structural safety analysis; and calculation of capacity reduction factors. Mr. Hart (F)

**245. Earthquake Ground Motion.** Lecture, four hours; outside study, eight hours. Prerequisite: course 137. Methods for determination of site ground motion. Seismology and seismicity. Plate tectonics. Source, path, and site effects, waveforms associated with earthquakes. Use of Fourier and response spectra. Attenuation methods for prediction of site response. Typical strong ground motion records. Mr. Selna (W)

**246. Structural Response to Ground Motions.** Prerequisite: course 137. Spectral analysis of ground motions: response, time, and Fourier spectra. Response of structures to ground motions due to earthquakes and nuclear explosions. Computational methods to evaluate structural response. Response analysis, including evaluation of contemporary design standards. Limitations due to idealizations. Mr. Hart, Mr. Selna (Sp)

**250A. Surface Water Hydrology.** Lecture, four hours; outside study, eight hours. Prerequisite: course 150 or consent of instructor. In-depth study of surface water components of hydrologic cycle. Hydrologic mass balance analysis, hydrologic error analysis using systems investigation and physical hydrology. Stochastic hydrology: time-series analysis, Markovian streamflow generating models, and generation of multivariate synthetic streamflows. Applications. Mr. Dracup (W)

**250B. Groundwater Hydrology.** Lecture, four hours; outside study, eight hours. Prerequisite: course 150 or consent of instructor. Theory of movement and occurrence of water in subterranean aquifers. Steady flow in confined and unconfined aquifers. Mechanics of wells; steady and unsteady radial flows in confined and unconfined aquifers. Theory of leaky aquifers. Parameter estimation. Seawater intrusion. Numerical methods. Applications. Mr. Yeh (W)

**250C. Mathematical Modeling of Contaminant Transport in Groundwater.** Lecture, four hours; laboratory, eight hours. Prerequisites: courses 250B and 253, or consent of instructor. Phenomena and mechanisms of hydrodynamic dispersion, governing equations of mass transport in porous media, various analytical and numerical solutions, determination of dispersion parameters by laboratory and field experiments, coupled and multiphase pollution problems, computer programs and applications. Mr. Yeh (Sp)

**251. Water Resources Systems Engineering.** Lecture, four hours; outside study, eight hours. Prerequisite: course 151. Application of mathematical programming techniques to water resources systems. Topics include reservoir management and operation; optimal timing, sequencing and sizing of water resources projects; and multiobjective planning and conjunctive use of surface water and groundwater. Emphasis on management of water quantity. Mr. Yeh (Sp)

**252. Engineering Economic Analysis of Water and Environmental Planning.** Lecture, four hours; outside study, eight hours. Prerequisites: course 106A, one or more courses from Economics 1, 2, 11, 100, and 101, or consent of instructor. Economic theory and applications in analysis and management of water and environmental problems; application of price theory to water resource management and renewable resources; benefit-cost analysis with applications to water resources and environmental planning. Mr. Dracup (Sp)

**253. Mathematical Models for Water Quality Management.** Lecture, four hours; outside study, eight hours. Prerequisite: course 153. Development of mathematical models for simulating environmental engineering problems. Emphasis on numerical techniques to solve nonlinear partial differential equations and their application to environmental engineering problems. Mr. Stenstrom (F)

**254A. Aquatic Chemistry.** (Formerly numbered 254.) Lecture, four hours; outside study, eight hours. Prerequisites: course 155 or consent of instructor, Chemistry 11B, Mathematics 33B. Chemistry of natural waters and wastewaters, including acid/base, complexation, precipitation/dissolution, oxidation/reduction, and adsorption reactions. Emphasis on prediction of equilibrium concentrations of dissolved constituents of natural waters. Introduction to kinetics of chemical reactions in aqueous solutions. Ms. Hering (F)

**254B. Chemical Kinetics and Process Dynamics in Aquatic Systems.** Lecture, four hours; outside study, eight hours. Prerequisite: course 254A. Principles of chemical kinetics with specific applications to air/water/soil environments. Topics include fundamentals, data analysis, reaction mechanisms, transport considerations, estimation of reaction rates under environmental conditions, current research on chemical kinetics in natural and engineered systems. Ms. Hering (W)

**254C. Aquatic Surface Chemistry.** Lecture, four hours; outside study, eight hours. Prerequisite: course 254A. Principles of surface chemistry as applied to geochemistry of natural waters, soils, and sediments and to water and wastewater technology; adsorption and desorption; precipitation and dissolution; surface catalysis. Ms. Hering (W)

**255A. Physical and Chemical Processes for Water and Wastewater Treatment.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 155 and 254A, or consent of instructor. Review of momentum and mass transfer, chemical reaction engineering, coagulation and flocculation, granular filtrations, sedimentation, carbon adsorption, gas transfer, disinfection, oxidation, and membrane processes. Mr. Elimelech (W)

**255B. Biological Processes for Water and Wastewater Treatment.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 254A and 255A, or consent of instructor. Fundamentals of environmental engineering microbiology; kinetics of microbial growth and biological oxidation; applications for activated sludge, gas transfer, fixed-film processes, aerobic and anaerobic digestion, sludge disposal, and biological nutrient removal. Mr. Stenstrom (Sp)

**258A. Membrane Separations in Aquatic Systems.** Prerequisite: course 254A. Applications of membrane separations to desalination, water reclamation, brine disposal, and ultrapure water systems. Discussion of reverse osmosis, ultrafiltration, electrodialysis, and ion exchange technologies from both practical and theoretical standpoints. Mr. Elimelech (Sp)

**259A. Selected Topics in Environmental Engineering (2 to 4 units).** (Formerly numbered 259.) Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Review of recent research and developments in environmental engineering. Water and wastewater treatment systems, non-point pollution, multimedia impacts. May be taken for a maximum of four units. S/U or letter grading. Mr. Stenstrom (F)

**259B. Selected Topics in Water Resources (2 to 4 units).** Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Review of recent research and developments in water resources. Water supply and hydrology, global climate change, economic planning, optimization of water resources development. May be taken for a maximum of four units. S/U or letter grading. Mr. Stenstrom (F,W,Sp)

**260. Advanced Topics in Hydrology and Water Resources.** Lecture, four hours; other, eight hours. Prerequisites: courses 250A, 250B, and 251, or consent of instructor. Current research topics in inverse problem of parameter estimation, experimental design, conjunctive use of surface and groundwater, multiobjective water resources planning, and optimization of water resource systems. Topic may vary from term to term. Mr. Yeh (F)

**261. Colloidal Phenomena in Aquatic Systems.** (Formerly numbered 255C.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 254A and 255A, or consent of instructor. Colloidal interactions, colloidal stability, colloidal hydrodynamics, surface chemistry, adsorption of pollutants on colloidal surfaces, transport of colloids in porous media, coagulation, and particle deposition. Consideration of applications to colloidal processes in aquatic environments. Mr. Elimelech (Sp)

**M262A. Introduction to Atmospheric Chemistry.** (Same as Atmospheric Sciences M203A.) Lecture, three hours. Prerequisite for undergraduates: Chemistry 11C. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate. (F)

**M262B. Atmospheric Diffusion and Air Pollution.** (Same as Atmospheric Sciences M224B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

**265A. Mass Transfer in Environmental Systems.** (Formerly numbered 265.) Lecture, four hours; computer applications, two hours; outside study, eight hours. Prerequisite: graduate standing in civil engineering or consent of instructor. Phase equilibrium concepts; mass transfer in laminar and turbulent flow; mass transfer to particles and at air/water interface; molecular diffusion and diffusion in porous solids; transport in porous media. Mr. Harmon (F)

**265B. Contaminant Transport in Soils and Groundwater.** Lecture, four hours; computer applications, two hours; outside study, six hours. Prerequisites: courses 250B, and 265A or consent of instructor. Principles of mass transfer as they apply in soil and groundwater, independent estimation of transport model parameters; remediating hazardous waste sites. Mr. Harmon (Sp)

**275. Multiattribute Decision Making with Conflicting Objectives.** Lecture, four hours; outside study, eight hours. Prerequisite: course 175. Structuring of models for multiattribute decision problems. Theory of quantifying preferences over multiple objectives. Multiattribute utility theory. Analytic hierarchy process. Structuring of models for conditional strategies under conflict situations. Theory of meta-games and metarationality. Mr. Rubinstein (W)

**276. Perspectives of Systems Representation.** Prerequisite: course 275 or consent of instructor. Mathematical and conceptual models used in analysis and synthesis of engineering. Sociotechnical systems. Mathematical representations of interpretative models. Decomposition using tools of graph theory and information theory. Guides to choice of models. Interaction of human and computer in the modeling process. Mr. Rubinstein (Sp)

**296A-296Z. Advanced Topics in Civil Engineering (2 to 4 units each).** Prerequisite: consent of instructor. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading. (F,W,Sp)

**297AA-297ZZ. Seminars: Current Topics in Civil Engineering (2 to 4 units each).** (Formerly numbered 296AA-296ZZ.) Prerequisite: consent of instructor. Lectures, discussions, and student presentations and projects in areas of current interest in civil engineering. May be repeated for credit. S/U grading. (F,W,Sp)

**298. Seminar: Engineering (2 to 4 units).** Prerequisites: graduate standing in civil engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. (F,W,Sp)

**495. Teaching Assistant Training Seminar (2 units).** Prerequisite: appointment as teaching assistant in Civil and Environmental Engineering Department. Seminar on communication of civil engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading. (F)

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisites: graduate standing in civil engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination (2 to 12 units).** Prerequisites: graduate standing in civil engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Prerequisites: graduate standing in civil engineering, consent of instructor. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Prerequisites: graduate standing in civil engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Prerequisites: graduate standing in civil engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Prerequisites: graduate standing in civil engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

 Yuval Tamir, Ph.D.

### Assistant Professor

Elias Koutsoupias, Ph.D.

### Senior Lecturer

Leon Levine, M.S., *Emeritus*

### Adjunct Professors

Alfred Inselberg, Ph.D.  
 Boris Kogan, Ph.D.  
 Gerald J. Popek, Ph.D.

## Scope and Objectives

Computer science is concerned with the modeling, analysis, design, and applications of com-

puter-related systems. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of digital computers and digital systems. The programs provide comprehensive and strongly related studies of subjects in artificial intelligence, computer science theory, computer system architecture, computer network modeling and analysis, distributed computer systems, programming languages and systems, and scientific computing.

The undergraduate and graduate studies and research projects in computer science are supported by extensive computing resources. In addition to the departmental computing facility, there are nearly a dozen laboratories specializing in areas such as computer communications, VLSI systems, VLSI CAD, and artificial intelligence. The Cognitive Systems Laboratory is engaged in studying computer systems which emulate or support human reasoning. The Biocybernetics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

The Bachelor of Science degree may be attained either through the computer science and engineering major or through the computer science major described below.

The School of Engineering and Applied Science offers M.S. and Ph.D. degrees in Computer Science, as well as minor fields for graduate students seeking engineering degrees. In cooperation with the John E. Anderson Graduate School of Management, the Computer Science Department offers a concurrent degree program which enables students to obtain the M.S. in Computer Science and the M.B.A. (Master of Business Administration).

## Bachelor of Science in Computer Science and Engineering

The ABET-accredited computer science and engineering curriculum at UCLA provides the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. This curriculum has major components from the Computer Science and Electrical Engineering Departments. Within the curriculum students study all aspects of computer systems from electronic design, based on solid-state physics concepts, through logic design, integrated circuit selection and design, MSI, LSI, and VLSI concepts and device utilization, machine language design, implementation and programming, operating system concepts, system programming, networking fundamentals, higher-level language skills, and application of these systems. Students are prepared for employment in the high-technology industries which interface with information and digital systems.

## The Major

Course requirements are as follows (180 minimum units required):

- (1) Five core courses: Computer Science 21, 22, 23, 24, 51A.
- (2) Computer Science 111, 112, 118, 131, 151B, 180, 181, Electrical Engineering 10, 102, 110, Statistics 154A; four laboratory units (Computer Science 152A, 152B); one course from Computer Science 161, 163, 168; two computer science/electrical engineering electives (excluding Electrical Engineering 100) and two computer science/electrical engineering laboratories; Computer Science M196B or Electrical Engineering 103.
- (3) Two upper division elective courses from the Computer Science Department, one of which must be from 132, 171, 172, 173, 174, M196B. Course 199 may normally be taken only as a free elective; however, you may petition for exceptions in extraordinary situations.
- (4) Chemistry and Biochemistry 11A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 8A/8AL, 8B/8BL, 8C/8CL.
- (5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.
- (6) One free elective course.

## Bachelor of Science in Computer Science

The computer science curriculum is designed to accommodate students who want full professional preparation in computer science but do not necessarily have a strong interest in computer systems hardware. The curriculum consists of major components in computer science, a minor or technical support area, and a core of courses from the social sciences, life sciences, and humanities. Within the curriculum, you study subject matter in software engineering, principles of programming languages, data structures, computer architecture, theory of computation and formal languages, operating systems, distributed systems, computer modeling, computer networks, compiler construction, and artificial intelligence. Majors are prepared for employment in a wide range of industrial and business environments.

## The Major

Course requirements are as follows (180 minimum units required):

- (1) Five core courses: Computer Science 21, 22, 23, 24, 51A.
- (2) Computer Science 111, 112, 118, 131, 132, 151B, 180, 181, Statistics 154A; one course from Computer Science 161, 163, 168; course M196B or Mathematics 141A or Electrical Engineering 103; four laboratory units (Computer Science 152A, 152B).
- (3) One elective upper division computer science course.

(4) A minor or technical support area composed of a coherent group of three upper division courses selected from astronomy, atmospheric sciences, biology, chemical engineering, chemistry and biochemistry, civil and environmental engineering, Earth and space sciences, economics, electrical engineering, library and information science, linguistics, management, materials science and engineering, mathematics, mechanical, aerospace, and nuclear engineering, molecular biology, physics.

(5) Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 8A/8AL, 8B/8BL, 8C/8CL.

(6) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details. Computer science students must also select two additional humanities/social sciences courses and one additional life sciences course. Chemistry 11A may be substituted for one of the life sciences courses.

(7) Two free elective courses.

## Graduate Study

For information on graduate admission to the computer science program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

## Computer Science Breadth Requirement

Candidates for the M.S. or Ph.D. degree in Computer Science must satisfy the computer science breadth requirement by the end of the fourth term in graduate residence at UCLA. This requirement is satisfied by mastering the contents of six undergraduate courses in computer science selected from the following two groups:

Group 1 (four required courses or equivalent) — Computer Science 23 or 143 or 180, 51A, 151B, 181.

Group 2 (two required courses or equivalent) — Computer Science 111, 112 or 118, 131 or 132, 161 or 163 or 168, 171 or 174, 172 or 173 or 270A.

Competence in any or all courses may be demonstrated by one of three methods:

(1) Satisfactory completion of the course at UCLA with a grade of B – or better.

(2) Satisfactory completion of an equivalent course at another university with a grade of B – or better.

(3) Satisfactory completion of a final examination in the courses at UCLA.

In addition, for each degree students must complete at least three consecutive terms of Computer Science 201 with grades of Satisfactory.

## M.B.A./M.S.-Computer Science

The Department of Computer Science and the John E. Anderson Graduate School of Management offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. (Master of Business Administration) in three academic years. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Department of Computer Science, School of Engineering and Applied Science.

## Lower Division Courses

**1. Principles of Computer Science.** Lecture, four hours; laboratory, two hours; other, six hours. Not open for credit to computer science majors. Introduction to fundamental scientific principles of computation. Programming in LISP. Systems software, including interpreters, and operating systems. Computer hardware design and implementation. Theory of computation, including computability and complexity. Applications, including artificial intelligence and scientific computing.

Mr. Korf

**2. Great Ideas in Computer Science.** (Formerly numbered 98.) Lecture, four hours; outside study, eight hours. Broad coverage for liberal arts and social sciences students of computer science theory, technology, and implications, including artificial and neural machine intelligence, computability limits, virtual reality, cellular automata, artificial life, programming languages survey, and philosophical and societal implications.

Mr. Dyer, Mr. Jefferson

**10C. Introduction to Programming/PASCAL.** Lecture, four hours; discussion, two hours. Exposure to computer organization and capabilities. Basic principles of programming (using PASCAL as example language): algorithmic, procedural problem solving. Program design and development. Control structures and data structures. Character strings and word processing.

Mr. Gerla (W)

**10F. Introduction to Programming/FORTRAN.** Lecture, four hours; discussion, two hours. Open to mathematics and computer science majors; open to graduate students on S/U grading basis only. Description and use of FORTRAN programming language. Selected topics in programming techniques. Programming and running of several programs.

Mr. Gerla (F)

**11. Introduction to PASCAL.** Lecture, four hours; discussion, two hours; other, six hours. Limited to majors in computer science and engineering and computer science majors. Open to graduate students on S/U grading basis only. Not open to students with credit for course 10C, 10F, or Program in Computing 10A. Human factors in programming and program design. Exposure to computer organization and capabilities, data representation, professional ethics. Principles of programming (using PASCAL as example language): algorithm design and procedural abstraction. Program design and development. Control structures and data structures.

Mr. Martin (F)

**21. Introduction to Computer Science I.** Lecture, four hours; discussion, two hours; outside study, six hours. Enforced requisite: course 11. Importance of specification. Turing machines as formal specifications of procedures. Formal systems. Propositional and predicate logic and Horn logic. Set theory, relations, functions, and sequences. Practical examples of specification.

Mr. Gafni, Mr. Parker (F,W)

**22. Introduction to Computer Science II.** (Formerly numbered 12.) Lecture, four hours; recitation, two hours. Enforced requisite: course 21. Limited to students in computer science and engineering major. Open to graduate students on S/U grading basis only. Higher-level programming objects, control flow, streams, object-oriented programming (using SCHEME programming language), coroutines, syntactic abstraction.

Mr. Dyer, Mr. Korf (W,Sp)

**23. Introduction to Computer Science III.** (Formerly numbered 13.) Lecture, four hours; recitation, two hours. Enforced requisites: courses 21, 22. Design and specification of algorithmic solutions. Design and specification of data structures, complexity analysis of algorithms and data structures. Implementation of algorithms and data structures in C programming language. Performance analysis of computer programs.

Ms. Greibach, Mr. Kahng (F,Sp)

**24. Systems Programming (5 units).** Enforced requisite: course 23. Introductory course on assembly language and operation systems fundamentals. Number systems, machine language, and assembly language. Procedure calls, stacks, interrupts, and traps. Assemblers, linkers, and loaders. Operating systems concepts: processes and process management, I/O programming, memory management, file systems.

Mr. Muntz, Mr. Rennels (F,W)

**51A. Logic Design of Digital Systems.** (Formerly numbered 151A.) Lecture, four hours; recitation, two hours; outside study, six hours. Enforced requisite: Physics 8C. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections. Number systems and arithmetic algorithms. Error control codes for digital information.

Mr. Avizienis, Mr. Ercegovic (F,W,Sp)

## Upper Division Courses

**111. Operating Systems Principles.** Lecture, four hours; laboratory, two hours. Prerequisites: courses 23 or equivalent, 24. Introduction to design and performance evaluations of modern operating systems. Mapping and binding of addresses. Organization of multiprogramming and multiprocessing systems; interrupts, process model, and interlocks. Resource allocation models and problem of deadlocks. Scheduling, synchronization. Memory management, virtual memory. I/O control, file systems.

Mr. Jefferson, Mr. Muntz (W,Sp)

**112. Computer System Modeling Fundamentals.** Lecture, four hours; outside study, eight hours. Prerequisites: upper division standing or Statistics 154A, consent of instructor. Basic tools necessary for performance evaluation and design of distributed computer systems, including such topics as combinatorics, generating functions, probability theory, transforms, Markov chains, baby queueing theory. Presentation of this set of tools in a fashion that is rich with examples from computer systems field.

Mr. Kleinrock (F,Sp)

**118. Computer Network Fundamentals.** Lecture, four hours; discussion, two hours. Prerequisite: upper division standing. Investigation of functions required to operate computer communications networks. Development of methodology for implementing these functions in procedures called protocols. Organization around ISO-OSI seven-layer architecture, with review of each layer. Specific functions defined and available alternatives studied. Presentation of several applications and case studies based on existing public and private networks.

Mr. Gerla, Mr. Kleinrock (F,Sp)

**130. Software Engineering.** Lecture, four hours; laboratory, two hours. Prerequisites: courses 22, 23. Structured programming, program specification, program proving, modularity, abstract data types, composite design, software tools, software control systems, program testing, team programming.

Mr. Cardenas (W)

**131. Programming Languages.** Lecture, four hours; laboratory, two hours. Prerequisites: courses 23, 24. Study, comparison, and evaluation of alternative strategies for language specification, data description, data control, program modularity, instruction sequencing, and language implementations. Use of a few languages selected from FORTRAN 77, ADA, SNOBOL 14, LISP, MODULA 2, and PROLOG to illustrate particular implementations of some of above features.

Mr. Bagrodia, Mr. Jefferson (F,W)

**132. Compiler Construction.** Lecture, four hours; discussion, two hours. Prerequisites: courses 23 or equivalent, 131, 181. Compiler structure; lexical and syntactic analysis; semantic analysis and code generation; theory of parsing.

Mr. Bagrodia, Mr. Martin (W)

**141. Basic Methods of Data Organization.** Lecture, four hours; laboratory, two hours. Prerequisites: courses 22 and 23, or consent of instructor. Fundamental techniques for organizing and manipulating data, stressing relationships to performance, time/storage trade-offs. Sequential and linked storage allocation for linear lists, multilinked structures. Trees: implementation, traversals, mathematical properties. Graphs and networks: memory representation, algorithms. Dynamic storage allocation. External storage devices. Database concepts and architectures. Topics include sorting-searching, algorithmic analysis, graph theory, concepts underlying file management.

Mr. Cardenas, Mr. Gerla

**143. Introduction to Database Systems.** Lecture, four hours; discussion, two hours; laboratory, two hours; outside study, four hours. Prerequisites: courses 22 and 23, or consent of instructor. Information systems and database systems in enterprises. File organization and secondary storage structures. Relational model and relational database systems. CODASYL and other data management approaches. Database design principles. Transactions, concurrency, and recovery. Integrity and authorization.

Mr. Cardenas, Mr. Zaniolo (F,Sp)

**151B. Computer Systems Architecture.** Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course 51A. Recommended: courses 24, 152A. Machine organization and design, formal descriptions, comparative study of machine instruction sets and formats, data representation and floating point, addressing structures, mechanization of procedure calls, memory organization and management, microprogramming, I/O processing and interrupts, and reliability aspects.

Mr. Cong, Mr. Rennels, Mr. Tamir (F,W,Sp)

**151C. Design of Digital Systems.** Lecture, four hours; discussion, two hours. Prerequisites: courses 51A, 151B, 152A. Design of complex digital systems using hierarchical approaches and regular structures. Combinational, sequential, and algorithmic systems. Microprogramming and firmware engineering. Cost/performance measures and technology constraints. Use of design tools. Design project.

Mr. Ercegovic (W, odd years)

**152A. Introductory Digital Design Laboratory (2 units).** Laboratory, four hours. Prerequisite: course 51A. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects.

Mr. Rennels (F,W,Sp)

**152B. Computer Design and Interfacing Laboratory (2 units).** Laboratory, four hours. Prerequisite: course 151B. Design and implementation of computer I/O interfaces and device controllers, implementation of microprogrammed machines.

Mr. Rennels, Mr. Tamir (F,W,Sp)

**161. Fundamentals of Artificial Intelligence.** Lecture, four hours; laboratory, two hours. Prerequisite: course 23 or equivalent. Introduction to fundamental problem solving and knowledge representation paradigms of artificial intelligence. Introduction to LISP with regular programming assignments. State-space and problem reduction methods, brute-force and heuristic search, planning techniques, two-player games. Knowledge structures including predicate logic, production systems, semantic nets and primitives, frames, scripts. Special topics in natural language processing, expert systems, vision, and parallel architectures.

Mr. Dyer, Mr. Korf (F,Sp)

**163. Introduction to Natural Language Processing.** Lecture, four hours; laboratory, two hours. Prerequisite: course 130 or 131 or consent of instructor. Role of syntax, semantics, and pragmatics in human language processing by computers. Natural language generators and parsers, inference, and conceptual analysis. Modeling conceptual processes and representing semantic knowledge by means of computer problems.

Mr. Dyer (W)

**168. Vision in Man and Machine.** Lecture, four hours; discussion, two hours; other, six hours. Prerequisite: course 161 or consent of instructor. Use of computational aspects of processing visual information to present a unified treatment of early vision, allowing transfer of concepts from analysis of natural vision to synthesis of machine vision. Extraction, processing the manipulation of image attributes. Their organization into data structures and processing by dedicated computing architectures. Issues in image segmentation based on aggregation of feature descriptions.

Mr. Carlyle, Mr. Skrzypek (W)

**168L. Computer Vision Laboratory (2 to 4 units).** Laboratory, eight hours. Prerequisites: course 168, senior standing, consent of instructor. Image acquisition, storage, processing, and analysis. Design and implementation of algorithms for low-level vision. Experiments in motion, texture, color, edge detection, binary and gray-level images. Scheme-based personal computer vision station.

Mr. Carlyle, Mr. Skrzypek

**170A. Introduction to Scientific Computing.** Lecture, four hours; laboratory, two hours; outside study, six hours. Prerequisite: senior standing in computer science or consent of instructor. Introduction to scientific modeling and simulation, using the very high-level computer languages MATHEMATICA and MAPLE. Extensive coverage of programming in MATHEMATICA, with applications involving engineering modeling; simulation term project required.

Mr. Vidal (Sp)

**171. Real-Time Computer Systems.** Prerequisite: senior standing or consent of instructor. Survey of fundamentals, with emphasis on hardware and systems concepts. Adapting digital computers to interfaces, including multiprogramming, bus structure, interrupt, and time-sharing considerations. Digital communication, remote consoles, sampling, quantizing, multiplexing, analog-digital conversion, and data reconstruction.

Mr. Carlyle, Mr. Karplus (F)

**171L. Real-Time Systems Laboratory (2 to 4 units).** Laboratory, four to eight hours. Prerequisites: senior standing, consent of instructor. Recommended: courses 152A, 171 (may be taken concurrently). Tests and measurements of digital and analog signals and systems as encountered in data acquisition, on-line computing, telecommunication facilities, terminals, modems, interfaces, and standards (e.g., RS 232, IEEE488). May be repeated for credit with consent of instructor.

Mr. Carlyle, Mr. Karplus (F,W,Sp)

**172. Simulation and Models.** Lecture, four hours; other, eight hours. Prerequisite: course 23. Recommended: one statistics course. Model formulation and programming for discrete event systems in the simulation language GPSS. Statistical considerations: design of experiments, random number generation, analysis of model results. Computer exercises.

Mr. Karplus, Mr. McNamee (W)

**173. Random Data Analysis and Measurement Procedures.** Prerequisite: Electrical Engineering 102 or equivalent. Practical aspects of random data analysis and measurement procedures. Statistical properties of random data, correlation, spectral density, input/output relationships, statistical errors, coherence functions, data acquisition, and processing techniques.

Mr. McNamee

**174. Elements of Computer Graphics.** Lecture, two hours; laboratory, two hours; outside study, eight hours. Prerequisite: course 23 or equivalent. Hardware and software elements of computer graphics systems. Graphics languages. Graphic workstations and specialized I/O devices. Design and development of interactive graphics programs.

Mr. Vidal (W,Sp)

**180. Introduction to Algorithms and Complexity.** Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisites: course 23, Mathematics 61, junior standing in computer science. Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy method, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds, asymptotic complexity; NP-completeness.

Ms. Greibach, Mr. Kahng, Mr. Parker (F,W,Sp)

**181. Introduction to Formal Languages and Automata Theory.** Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisites: course 21, Mathematics 61, and senior standing in computer science or consent of instructor. Grammars, automata, and languages. Finite-state languages and finite-state automata. Context-free languages and pushdown story automata. Unrestricted rewriting systems, recursively enumerable and recursive languages, and Turing machines. Closure properties, pumping lemmas, and decision algorithms. Introduction to computability.

Mr. Carlyle, Ms. Greibach (F,W,Sp)

**190. Computer Science Design Project.** Lecture, four hours; outside study, eight hours. Prerequisite: senior standing with adequate background in hardware, software, and computer applications. Limited to majors in computer science and engineering and computer science majors. Basic concepts of design of projects in computer science, including interpretation of specifications, subtasking, design of experiments, data analysis and performance evaluation, cost engineering, reliability, and societal and safety considerations.

Mr. McNamee (Sp)

**196A. Introduction to Bioengineering and Cybernetics (2 units).** Prerequisite: calculus. Strongly recommended for students with potential interest in bioengineering or cybernetics as a major. Introductory survey of topics in bioengineering and cybernetics disciplines. Lectures presented by faculty currently performing research in one of the areas; some sessions include laboratory tours. P/NP grading.

Mr. DiStefano (F)

**M196B. Modeling and Simulation of Biological Systems.** (Same as Medicine M196B) Lecture, four hours; laboratory, two hours. Prerequisite: calculus. Introduction to classical and modern systems and modeling and simulation methods for studying biological systems. Multicompartmental modeling, multi-exponential curve fitting, and simulation laboratory projects. Applications in physiology and medicine. Life sciences and medical students encouraged to enroll.

Mr. DiStefano (Sp)

**C196L. Biomedical Systems/Biocybernetics Research Laboratory.** Lecture, one hour; laboratory, three hours; outside study, eight hours. Prerequisite: course M196B or consent of instructor. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course C296L.

Mr. DiStefano

**199. Special Studies (2 to 8 units).** Prerequisites: upper division standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit.

(F,W,Sp)

## Graduate Courses

**201A-201B-201C. Computer Science Seminars (2 units each).** Prerequisite: graduate standing in computer science. Lectures on current research topics in computer science. May be repeated for credit. In Progress and S/U grading. (F,W,Sp)

**202. Advanced Computer Science Seminar.** Prerequisite: completion of major field examination in computer science or consent of instructor. Current computer science research into theory of, analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original pieces of work in the specialized area. May be repeated for credit.

Mr. Estrin, Mr. Kleinrock (F,W,Sp)

**209AA-209ZZ. Research Seminars: Computer Science (2 to 4 units each).** Prerequisite: consent of instructor. Discussion of advanced topics and current research in algorithmic processes that describe and transform information: theory, analysis, design, efficiency, implementation, and application. May be repeated for credit. S/U grading. (F,W,Sp)

**212A. Queueing Systems Theory.** Prerequisites: course 112 and Electrical Engineering 131A, or consent of instructor. Resource sharing issues and theory of queueing (waiting-line) systems. Review of Markov chains and baby queueing theory. Method of stages. M/E, /1. E<sub>1</sub>/M/1. Bulk arrival and bulk service systems. Series-parallel stages. Fundamentals of open and closed queueing networks. Intermediate queueing theory: M/G/1; G/M/m. Collective marks. Advanced queueing theory: G/G/1; Lindley integral equation; spectral solution. Inequalities, bounds, approximations. Mr. Kleinrock (W)

**212B. Queueing Applications: Scheduling Algorithms and Queueing Networks.** Prerequisite: course 212A. Priority queueing. Applications to time-sharing scheduling algorithms: FB, Round Robin, Conservation Law, Bounds. Queueing networks: definitions; job flow balance; product form solutions — local balance, M→M; computational algorithms for performance measures; asymptotic behavior and bounds; approximation techniques — diffusion — iterative techniques; applications.

Mr. Kleinrock, Mr. Muntz

**214. Data Transmission in Computer Communications.** Prerequisites: course 112, graduate standing in computer science. Discrete data streams, formats, rates, transductions; digital data transmissions via analog signaling in computer communication; media characteristics, systems methodologies, performance analysis; modern designs; physical interfaces in computer communication links; national/international standards; tests and measurements. Mr. Carlyle

**215. Computer Communications and Networks.** Prerequisite: course 112. Resource sharing; computer traffic characterizations; multiplexing; network structure; packet switching and other switching techniques; ARPANET and other computer network examples; network delay and analysis; network design and optimization; network protocols; routing and flow control; satellite and ground radio packet switching; local networks; commercial network services and architectures. Optional topics include extended error control techniques; modems; SDLC, HDLC, X.25, etc.; protocol verification; network simulation and measurement; integrated networks; communication processors.

Mr. Chu, Mr. Kleinrock (F)

**216. Distributed Multiaccess Control in Networks.** Prerequisites: courses 212A, 215. Topics from the field of distributed control and access in computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and control. Mr. Kleinrock (Sp)

**218. Advanced Computer Networks.** (Formerly numbered 218A.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 112 and 118, or consent of instructor. Review of seven-layer ISO-OSI model. High-speed networks: LANs, MANs, ATM. Flow and congestion control; bandwidth allocation. Internetworking. Mr. Gerla (W)

**219. Current Topics in Computer System Modeling Analysis (2 to 12 units).** Prerequisite: consent of instructor. Review of current literature in an area of computer system modeling analysis in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor.

**221. Economics of Computers.** Prerequisite: consent of instructor. Basic economic factors in data processing. Buyers and sellers; products; applications; major cost factors. Selection and operation of a data processing system.

**M222. Control and Coordination in Economics.** (Same as Economics M222A.) Lecture, three hours. Prerequisite: graduate standing in economics or engineering or consent of instructor. Recommended: appropriate mathematics course. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading.

**231A. Advanced Topics in Programming Languages.** Prerequisite: course 131. Presentation, analysis, and discussion of specialized programming languages, new higher-level languages, and new and/or advanced features of programming languages.

**232A. Operational Semantics of Programming Languages.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 131, 181, or equivalent. Introduction to formal semantics. Interpreter-based operational definitions. Induction and structural operational semantics. Proving equivalence between structural and interpreter-based operational definitions. Static and dynamic semantics. Example operational definitions of functional, imperative, concurrent, logic, and object-oriented programming languages. Mr. Martin (F)

**232B. Semantics of Programming Languages.** Prerequisites: courses 131 and 181, or consent of instructor. Denotational semantics of programming languages. Notation and foundations. Expressions, commands, declarations, and other constructs. Environments, stores, and continuations. Examples. Relations between semantic definitions of programming languages. Applications of current research interest. Mr. Martin

**233A. Parallel Programming.** Lecture, four hours; other, eight hours. Prerequisites: courses 111, 131. Mutual exclusion and resource allocation in distributed systems; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization, atomic actions, binary and multiway rendezvous; synchronous and asynchronous languages: CSP, ADA, LINDA, MAISIE, UC, and others; introduction to parallel program verification. Mr. Bagrodia

**233B. Verification of Concurrent Programs.** Lecture, four hours; other, eight hours. Prerequisite: course 233A. Formal techniques for verification of concurrent programs. Topics include safety, liveness, program and state assertion-based techniques, weakest precondition semantics, Hoare logic, temporal logic, UNITY, and axiomatic semantics for selected parallel languages. Mr. Bagrodia

**234A. Correctness Proofs.** Prerequisite: consent of instructor. Theoretical and practical aspects of correctness proofs. Partial correctness, total correctness, and termination. Axiomatic semantics and proof systems. Abstraction and correctness of implementations. Formulation, execution, and assessment of correctness proofs. Topics of current research interest. Mr. Martin

**235A. Logic Programming and PROLOG.** Lecture, four hours; outside study, eight hours. Prerequisite: graduate standing in computer science. Logic programming; PROLOG as an approximation thereof; PROLOG programming techniques; translation and definite clause grammars; rewriting and interpreters; implementation of PROLOG; constraint logic programming and other proposed extensions to PROLOG; parallel logic programming systems. Mr. Parker (Sp)

**239. Current Topics in Computer Science: Programming Languages and Systems (2 to 12 units).** Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer science programming languages and systems in which instructor has developed special proficiency as a consequence of research interests. May be repeated for credit with topic change.

**240A. Databases and Knowledge Bases.** Lecture, four hours; outside study, eight hours. Prerequisite: course 143. Theoretical and technological foundation of Intelligent Database Systems, which merge database technology, knowledge-based systems, and advanced programming environments. Rule-based knowledge representation, spatio-temporal reasoning, and logic-based declarative querying/programming are salient features of this technology. Mr. Zaniolo (F)

**241A. Object-Oriented and Semantic Database Systems.** (Formerly numbered 241AL.) Lecture, three and one-half hours; recitation, 30 minutes; laboratory, one hour; outside study, eight hours. Prerequisite: course 143 or equivalent. Object and database principles. Data models and accessing. Database systems architecture and functional components. Extended relational systems. Object and semantic systems. Systems comparison. Database design, organization, indexing, and performance. Other topics at discretion of instructor. Mr. Cardenas

**241B. Pictorial and Multimedia Database Systems.** Lecture, three and one-half hours; recitation, 30 minutes; outside study, nine hours. Prerequisites: courses 143, 241A. Pictorial and multimedia information system requirements. Data models and accessing; alternatives. Database systems. Visual languages and communication. Hypertext. Database design and organization, logical and physical. Database heterogeneity and distribution. Other topics at discretion of instructor. Mr. Cardenas

**243B. Abstract Data Types and Program Specification.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 23 or equivalent, 181. Notions of abstract data type and abstract program specification permit one to understand how programs manipulate data, independently of their implementations. These notions also give powerful techniques for program structuring and verification. Programming exercises.

**244A. Distributed Database Systems.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 215 and/or 241A. File allocation, intelligent directory design, transaction management, deadlock, strong and weak concurrency control, commit protocols, semantic query answering, multidatabase systems, fault recovery techniques, network partitioning, examples, trade-offs, and design experiences. Mr. Chu (Sp)

**245A. Intelligent Information Systems.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 241A and 255A, or consent of instructor. Knowledge discovery in database, knowledge-base maintenance, knowledge-base and database integration architectures, and scale-up issues and applications to cooperative database systems, intelligent decision support systems, and intelligent planning and scheduling systems; computer architecture for processing large-scale knowledge-base/database systems. Mr. Chu (F)

**249. Current Topics in Data Structures (2 to 12 units).** Prerequisite: consent of instructor. Review of current literature in an area of data structures in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor.

**251A. Advanced Computer Architecture.** Lecture, four hours; other, eight hours. Prerequisites: courses 51A, 111, and 151B, or consent of instructor. Functional and structural models of computer systems. Architecture and organization at microprogramming, machine language, and operating system level. Processor organization and system control. Arithmetic processors: algorithms and implementation. Storage system organization: hierarchy and management. Communication organization and control. Mr. Rennels, Mr. Tamir (F)

**251B. Parallel Computer Architectures.** Prerequisite: course 251A. Parallel algorithmic structures and computer organizations. Effect of sequencing mechanisms, granularity, coupling, and locality. Organizations of control, memory, interconnection, and processing elements. Performance evaluation measures. Detailed discussion of system organization and performance of vector computers, array computers, loop-level multiprocessors, process-level multiprocessors, and data-flow computers. Mr. Ercegovac, Mr. Tamir (W)

**252A. Arithmetic Algorithms and Processors.** Lecture, four hours; outside study, eight hours. Prerequisite: course 251A or consent of instructor. Number systems: conventional, redundant, signed-digit, and residue. Types of algorithms and implementations. Complexity measures. Fast algorithms and implementations for two-operand addition, multi-operand addition, multiplication, division, and square root. On-line arithmetic. Evaluation of transcendental functions. Floating-point arithmetic and numerical error control. Arithmetic error codes. Residue arithmetic. Examples of contemporary arithmetic ICs and processors. Mr. Avizienis, Mr. Ercegovac (F)

**253A. Design of Fault-Tolerant Systems.** Lecture, four hours; outside study, eight hours. Prerequisite or corequisite: course 251A or consent of instructor. Fundamental concepts of dependable computing. Design methodology for fault-tolerant systems. Analytic models and measures, modeling tools. Design for critical applications: long-life, real-time, and high-availability systems. Tolerance of design faults: design diversity and fault-tolerant software. Mr. Avizienis, Mr. Rennels (W)

**253B. Advanced Topics in Fault-Tolerant Computing.** Lecture, four hours; outside study, eight hours. Prerequisite: course 253A. Fault tolerance in distributed systems: protocols and network redundancy. Design of fault-tolerant software: N-version programming and recovery blocks. Relationship between fault tolerance and system security. Case studies of contemporary fault-tolerant systems. Review of recent research results. Mr. Avizienis, Mr. Rennels (Sp)

**253C. Testing and Testable Design of VLSI Systems.** Lecture, four hours; outside study, eight hours. Prerequisite: course 51A or consent of instructor. Detailed study of various problems in testing and testable designs of VLSI systems, including fault modeling, fault simulation, testing for single stuck faults and multiple stuck faults, functional testing, design for testability, compression techniques, and built-in self-test. Mr. Cong

**254A. Computer Memories and Memory Systems.** Prerequisite: course 251A or consent of instructor. Generic types of memory systems; control, access modes, hierarchies, and allocation algorithms. Characteristics, system organization, and device considerations of ferrite memories, thin film memories, and semiconductor memories. Mr. Chu, Mr. Rennels (Sp)

**255A. Distributed Processing Systems.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 215 and/or 251A. Task partitioning and allocation, interprocess communications, task response time model, process scheduling, message passing protocols, replicated file systems, interface, cache memory, actor model, fine grain multicomputers, distributed operating system kernel, error recovery strategy, performance monitoring and measurement, scalability and maintainability, prototypes and commercial distributed systems. Mr. Chu (W)

**256A. Principles and Examples of Architectures for VLSI Implementation.** Prerequisites: courses 111, 251A, consent of instructor. Capabilities and implementations of VLSI technology. Architectures that exploit these capabilities and overcome the limitations. Interdependency of system and chip architectures. General-purpose and special-purpose VLSI systems. Wafer-scale integration. Current research areas. Examples of chips and systems. Mr. Tamir (Sp)

**M258A. LSI in Computer System Design.** (Same as Electrical Engineering M216A.) Lecture, four hours; laboratory, four hours. Prerequisites: graduate standing in computer science or electrical engineering, consent of instructor. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. Mr. Rennels

**M258B-M258C. LSI in Computer System Design.** (Same as Electrical Engineering M216B-M216C.) Lecture, four hours; laboratory, four hours. Prerequisite: course M258A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress grading. Mr. Rennels

**258D. VLSI CAD Techniques.** Prerequisite: graduate standing in computer science or electrical engineering or consent of instructor. In-depth study of latest advances in computer-aided VLSI design techniques, including building block layout, placement and routing algorithms, simulation, design verification and timing, analog/digital synthesis techniques, testing, silicon compilation, expert system applications, and automatic performance optimization. Mr. McNamee

**258E. Foundations of VLSI CAD Algorithms.** Lecture, four hours; other, eight hours. Prerequisites: one course in analysis and design of algorithms, consent of instructor. Basic theory of combinatorial optimization for VLSI physical layout, including mathematical programming, network flows, matching, greedy and heuristic algorithms, and stochastic methods. Emphasis on practical application to the computer-aided physical design of VLSI circuits at the high-level phases of layout: partitioning, placement, graph folding, floorplanning, and global routing. Mr. Kahng

**258F. Physical Design Automation of VLSI Systems.** Lecture, four hours; other, eight hours. Prerequisite: consent of instructor. Detailed study of various physical design automation problems of VLSI circuits, including logic partitioning, floorplanning, placement, global routing, channel and switchbox routing, planar routing and via minimization, compaction and performance-driven layout. Discussions of applications of a number of important optimization techniques, such as network flows, Steiner trees, simulated annealing, and generic algorithms. Mr. Cong (W)

**259. Current Topics in Computer Science: System Design/Architecture (2 to 12 units).** Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer science system design in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

**261A. Problem Solving and Search.** Lecture, four hours; outside study, eight hours. Prerequisite: course 23 or equivalent. Examination in depth of that part of artificial intelligence concerned with problem-solving behavior, including problem spaces, brute-force search, heuristic search, two-player game searches, planning, subgoaling, GPS, macro-operators, and abstraction. Emphasis on mathematical rigor and complexity analyses of search algorithms. Mr. Korf (W)

**262A. Reasoning with Partial Beliefs.** Prerequisite: course 112 or Electrical Engineering 131A or equivalent. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesian inference using belief networks representation. Mr. Pearl (Sp)

**262B. Knowledge-Based Systems.** Prerequisite: course 262A. Machine representation of judgmental knowledge and uncertain relationships. Inference on inexact knowledge bases. Rule-based systems — principles, advantages, and limitations. Signal understanding. Automated planning systems. Knowledge acquisition and explanation producing techniques. Mr. Pearl

**262C. Computer Methods of Data Analysis and Model Formation.** Prerequisite: course 112 or equivalent or consent of instructor. Techniques of using computers to interpret, summarize, and form theories of empirical observations. Mathematical analysis of trade-offs between computational complexity, storage requirements, and precision of computerized models. Mr. Pearl

**262Z. Current Topics in Cognitive Systems.** Prerequisites: course 262A, consent of instructor, additional prerequisites for each offering as announced in advance by department. Theory and implementation of systems which emulate or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, decision support systems, computational psychology, and heuristic programming theory. May be repeated for credit with topic change. Mr. Pearl (W)

**263A. Language and Thought.** Prerequisite: consent of instructor. Recommended: understanding of LISP. Introduction to natural language processing. Representation and manipulation of conceptualizations underlying processes of thought for natural language comprehension and generation. Process models of story comprehension, question answering, paraphrasing, machine translation. Conceptual dependency theory, scripts, plans, goals, expectation-based parsing. Mr. Dyer

**263B. Language and Memory.** Prerequisites: course 263A, knowledge of LISP or PROLOG. Recommended: course 264A. Advanced natural language processing. Emphasis on organization of human memory for language comprehension. Episodic and semantic memory. Subjective understanding and modeling ideologies. Language acquisition, processes of generalization during comprehension. Cross-contextual reminders and thematic abstraction. Mr. Dyer (Sp)

**264A. Artificial Intelligence Programming I.** Prerequisite: consent of instructor. Recommended: knowledge of LISP or PROLOG. Introduction to tools, techniques, and issues in artificial intelligence programming. Functional programming for artificial intelligence applications. Review of LISP and introduction to lexically scoped LISPs (e.g., T, SCHEME). Lambda calculus, closures, data-driven and object-oriented programming, flavors, d-nets, resolution-based deductive systems. Mr. Dyer

**264B. Artificial Intelligence Programming II.** Prerequisite: course 264A or consent of instructor. Techniques of logic programming. Artificial intelligence programming languages (e.g., PROLOG, AMORD, DUCK, CONNIVER, PLANNER, QA4, KRL, ACTORS, etc.) and artificial intelligence features (e.g., nonmonotonic logics, data-dependencies for truth maintenance, meta-rules, semantic networks, frame-based systems). Mr. Dyer

**265A. Machine Learning.** Prerequisites: courses 263A, 264A, consent of instructor. Introduction to machine learning. Learning by analogy, inductive learning, modeling creativity, learning by experience, role of episodic memory organization in learning. Examination of BACON, AM, EURISKO, HACKER, teachable production systems. Failure-driven learning. Mr. Dyer

**267A. Neural Models.** Prerequisites: graduate standing, consent of instructor. Review of major neurophysiological milestones in understanding brain architecture and processes. Focus on brain theories that are important for modern computer science and, in particular, on models of sensory perception, sensory-motor coordination, and cerebellar and cerebral structure and function. Students required to prepare a paper analyzing research in one area of interest. Mr. Vidal (Sp)

**267B. Artificial Neural Systems and Connectionist Computing.** Prerequisites: graduate standing, consent of instructor. Analysis of major connectionist computing paradigms and underlying models of biological and physical processes. Examination of past and current implementations of artificial neural networks along with their applications to associative knowledge processing, general multisensor pattern recognition including speed and vision, and adaptive robot control. Students required to prepare a paper analyzing research in one area of interest. Mr. Vidal (W)

**268. Machine Perception.** Prerequisites: graduate standing, consent of instructor. Course 168 may be taken concurrently. Computational aspects of processing visual and other sensory information. Unified treatment of early vision in man and machine. Integration of symbolic and iconic representations in process of image segmentation. Computing multimodal sensory information by "neural-net" architectures.

Mr. Skrzypek

**268CN. Computational Neuroscience.** Lecture, four hours; discussion, two hours; outside study, eight hours. Prerequisite: consent of instructor. Computational neuroscience as a paradigm of formal analysis and demonstrations of how to correctly interpret sensory data by discovering constraints from the natural world. Neural networks and connectionist models as a paradigm for parallel and concurrent computation and application to problem of vision, multimodal sensory interpretation, and learning.

Mr. Skrzypek (W)

**268S. Seminar: Computational Neuroscience (2 units).** Prerequisite: consent of instructor. Intended for students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as a paradigm for parallel and concurrent computation in application to problems of perception, vision, multimodal sensory integration, and robotics. May be repeated for credit. S/U grading.

Mr. Skrzypek

**269. Seminar: Current Topics in Artificial Intelligence (2 to 4 units).** Prerequisite: consent of instructor. Review of current literature and research practicum in an area of artificial intelligence in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

**270A. Computer Methodology: Advanced Numerical Methods.** Prerequisites: graduate standing in computer science or engineering, Electrical Engineering 103 or Mathematics 141B or comparable experience with numerical computing. Principles of computer treatment of selected numerical problems in algebraic and differential systems, transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to modeling and simulation and the applicability of contemporary developments in numerical software. Computer exercises.

Mr. Carlyle, Mr. Karplus (F)

**271A. Modeling and Simulation of Lumped Parameter Systems.** Lecture, eight hours. Recommended (but not prerequisite): course 270A or equivalent. Characterization of electrical, electromechanical, and other engineering problems by systems of nonlinear ordinary differential equations. Survey of integration algorithms. Digital simulation languages for continuous systems. Real-time simulation using array processor and multi-processor computer systems.

Mr. Karplus (W)

**271B. Modeling and Simulation of Distributed Parameter Systems.** Lecture, eight hours. Recommended (but not prerequisite): course 270A or equivalent. Mathematical formulation of engineering field problems governed by partial differential equations. Finite difference and finite element approximations. Principal algorithms for solving elliptic, parabolic, and hyperbolic partial differential equations. Supercomputers, vector processors, multiprocessors, and array processors.

Mr. Karplus (Sp)

**271C. Seminar: Advanced Simulation Methods (2 units).** Prerequisite: course 271A or equivalent. Discussion of advanced topics in simulation of systems characterized by ordinary and partial differential equations. Topics include (among others) simulation languages, dataflow machines, array processors, and advanced mathematical modeling techniques. Topics vary each term. May be repeated for credit. S/U grading.

Mr. Karplus

**272. Advanced Discrete Event Simulation and Modeling Techniques.** Lecture, four hours; outside study, eight hours. Prerequisite: course 172 or consent of instructor. In-depth study in discrete event simulation and modeling techniques, including building valid and credible simulation models, output analysis of systems, comparisons of alternative system configurations. Variance reduction techniques, simulation models of computer systems and manufacturing systems.

Mr. McNamee (Sp)

**273A. Digital Processing of Engineering and Statistical Data.** Prerequisite: course 173. Computer methods for processing engineering and statistical data. Algorithms to evaluate recursive filter functions, Fourier series, power spectral, analysis correlation computations, and statistical testing.

Mr. McNamee

**276A. Pattern Analysis and Machine Intelligence.** Prerequisites: graduate standing, consent of instructor. Fundamentals of pattern recognition, feature extraction and selection, autonomous learning, clustering, and machine intelligence.

Mr. Klinger

**276B. Structured Computer Vision.** Prerequisites: graduate standing, consent of instructor. Methods for computer processing of image data. Systems, concepts, and algorithms for image analysis, radiologic and robotic applications.

Mr. Klinger

**276C. Speech and Language Communication in Artificial Intelligence.** Prerequisite: course 276A or 276B or consent of instructor. Topics in human-computer communication: interaction with pictorial information systems, sound and symbol generation by humans and machines, semantics of data, systems for speech recognition and understanding. Use of speech and text for computer input and output in applications.

Mr. Klinger

**279. Current Topics in Computer Science: Methodology (2 to 12 units).** Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer science methodology in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

(F,W,Sp)

**280A-280ZZ. Algorithms.** Lecture, four hours; outside study, eight hours. Prerequisites: course 180 or equivalent, consent of instructor, additional prerequisites for each offering as announced in advance by department. Selections from design, analysis, optimization, and implementation of algorithms; computational complexity and general theory of algorithms; algorithms for particular application areas. Subtitles of some current sections: Principles of Design and Analysis (280A); Distributed Algorithms (280D); Graphs and Networks (280G). May be repeated for credit with consent of instructor and with topic change.

Ms. Greibach (F,W,Sp)

**281A. Computability and Complexity.** Prerequisite: course 181 or compatible background. Concepts fundamental to study of discrete information systems and theory of computing, with emphasis on regular sets of strings, Turing-recognizable (recursively enumerable) sets, closure properties, machine characterizations, nondeterminisms, decidability, unsolvable problems, "easy" and "hard" problems. PTIME/NPTIME.

Ms. Greibach, Mr. Parker

**281D. Discrete State Systems.** Prerequisite: consent of instructor. Recommended: course 181. Finite-state machines, transducers, and their generalizations; regular expressions, transduction expressions, realizability; decomposition, synthesis, and design considerations; topics in state and system identification and fault diagnosis, linear machines, probabilistic machines, applications in coding, communication, computing, system modeling, and simulation.

Mr. Carlyle

**284A-284ZZ. Topics in Automata and Languages.** Prerequisites: course 181, additional prerequisites for each offering as announced in advance by department. Selections from families of formal languages, grammars, machines, operators; pushdown automata, context-free languages and their generalizations, parsing; multidimensional grammars, developmental systems; machine-based complexity. Subtitles of some current and planned sections: Context-Free Languages (284A), Parsing Algorithms (284P). May be repeated for credit with consent of instructor and with topic change.

Ms. Greibach

**287A. Theory of Program Structure.** Prerequisite: course 181. Models of computer programs and their syntax and semantics; emphasis on programs and recursion schemes; equivalence, optimization, correctness, and translatability of programs; expressive power of program constructs and data structures; selected current topics.

Ms. Greibach

**288S. Seminar: Theoretical Computer Science (2 units).** Prerequisites: courses 280A, 281A, consent of instructor. Intended for students undertaking thesis research. Discussion of advanced topics and current research in such areas as algorithms and complexity models for parallel and concurrent computation, and formal language and automata theory. May be repeated for credit. S/U grading.

Ms. Greibach (F,W,Sp)

**289A-289ZZ. Current Topics in Computer Theory (2 to 12 units each).** Prerequisite: consent of instructor. Review of current literature in an area of computer theory in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics.

**M296A. Modeling Methodology for Biomedical Systems.** (Same as Medicine M270C.) Lecture, four hours; outside study, eight hours. Recommended (but not prerequisite): course M196B, some intermediate knowledge of linear systems analysis or linear algebra (e.g., Mathematics 115A, Electrical Engineering 141, 142, Mechanical, Aerospace, and Nuclear Engineering 171A, 171C, or equivalent). Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems, including dynamic system experiment/model development, multicompartmental, non-compartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory.

Mr. DiStefano (F)

**M296B. Optimal Parameter Estimation and Experiment Design for Biomedical Systems.** (Same as Biomathematics M270 and Medicine M270D.) Lecture, four hours; outside study, eight hours. Prerequisite: course M296A or consent of instructor. Estimation methodology and model parameter estimation algorithms for quantifying (fitting) dynamic system models to real-world data. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on data sampling schedule design. Exploration in PC laboratory of applications software for model building and optimal experiment design.

Mr. DiStefano

**M296C. Advanced Topics and Research in Biomedical Systems Modeling and Computing.** (Same as Medicine M270E.) Lecture, four hours; outside study, eight hours. Prerequisite: course M296A or consent of instructor. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of the literature. Research problem searching and formulation. Approaches to solutions. Individual M.S.- and Ph.D.-level project training.

Mr. DiStefano

**C296L. Biomedical Systems/Biocybernetics Research Laboratory.** Lecture, one hour; laboratory, three hours; outside study, eight hours. Prerequisite: course M196B or consent of instructor. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course C196L.

Mr. DiStefano

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Mr. Karplus (F,W,Sp)

**495. Teaching Assistant Training Seminar (2 units).** Prerequisite: graduate standing in Computer Science Department. Seminar on communication of computer science materials in classroom: preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

**497D-497E. Field Projects in Computer Science.** Prerequisite: consent of instructor. Students are divided into teams led by instructor; each team is assigned an external company or organization which they investigate as a candidate for possible computerization, submitting a team report of their findings and recommendations. In Progress grading.

Mr. Cardenas, Mr. Melkanoff

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisites: graduate standing in computer science, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination (2 to 12 units).** Prerequisites: graduate standing in computer science, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Prerequisites: graduate standing in computer science, consent of instructor. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Prerequisites: graduate standing in computer science, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Prerequisites: graduate standing in computer science, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Prerequisites: graduate standing in computer science, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. S/U grading.

## Economics/System Science (Interdepartmental)

For details on this undergraduate program, see Chapter 5 on the College of Letters and Science.

## Electrical Engineering

58-121 Engineering IV, (310) 825-2647

### Professors

Asad A. Abidi, Ph.D.  
 Nicolaos G. Alexopoulos, Ph.D.  
 A.V. Balakrishnan, Ph.D.  
 Harold R. Fetterman, Ph.D.  
 Tatsuo Itoh, Ph.D. (*TRW Professor of Electrical Engineering*)  
 Stephen E. Jacobsen, Ph.D., *Associate Dean*  
 Chandrashekhar J. Joshi, Ph.D.  
 William J. Kaiser, Ph.D.  
 Nhan Levan, Ph.D. (*Distinguished Teaching Award*)  
 Jia-Ming Liu, Ph.D.  
 C. Kumar N. Patel, Ph.D.  
 Yahya Rahmat-Samii, Ph.D.

Izhak Rubin, Ph.D.  
 Oscar M. Stafsudd, Ph.D., *Vice Chair*  
 Chand R. Viswanathan, Ph.D. (*Distinguished Teaching Award*)  
 Kang L. Wang, Ph.D., *Chair*  
 Paul K.C. Wang, Ph.D.  
 Alan N. Willson, Jr., Ph.D., *Associate Dean*  
 Eli Yablonovitch, Ph.D.  
 Kung Yao, Ph.D.

### Professors Emeriti

Frederick G. Allen, Ph.D.  
 Francis F. Chen, Ph.D.  
 Robert S. Elliott, Ph.D. (*Distinguished Teaching Award*)  
 Ellis F. King, M.S.  
 Richard E. Mortensen, Ph.D.  
 H.J. Orchard, M.Sc.  
 Frederick W. Schott, Ph.D.  
 Gabor C. Temes, Ph.D.  
 Donald M. Wiberg, Ph.D.  
 Jack Willis, B.Sc.

### Associate Professors

Klaas Bult, Ph.D.  
 Rajeev Jain, Ph.D.  
 Brian H. Kolner, Ph.D., *Vice Chair*  
 Dee-Son Pan, Ph.D.  
 Henry Samuelli, Ph.D., *Vice Chair*  
 Jason C.S. Woo, Ph.D.  
 Ming-Chiang Wu, Ph.D.

### Assistant Professors

Abeer A.H. Alwan, Ph.D.  
 Nicholas Bambos, Ph.D.  
 Bahram Jalali, Ph.D.  
 Ioannis Kanellakopoulos, Ph.D.  
 Kristopher S.J. Pister, Ph.D.  
 Gregory J. Pottie, Ph.D.  
 John D. Villasenor, Ph.D.

### Adjunct Professors

Donald Amush, Ph.D.  
 Neville C. Luhmann, Jr., Ph.D.  
 Joel Schulman, Ph.D.  
 Pyotr Y. Ufimtsev, Ph.D.

### Adjunct Associate Professors

Siegfried G. Knorr, Ph.D.  
 Warren B. Mori, Ph.D.

## Scope and Objectives

The Electrical Engineering Department emphasizes teaching and research in the fields of integrated circuits and systems, communications and telecommunications, signal processing, solid-state electronics, quantum electronics, electromagnetics, microwave and millimeter wave electronics, control systems, operations research, and applied plasma physics and fusion engineering. In each of these fields, the department has state-of-the-art research programs exploring exciting new concepts and developments. Undergraduate students receive a B.S. degree in Electrical Engineering. Graduate research and training programs leading to the M.S. and Ph.D. degrees are also offered.

Laboratories are available for research in the following areas: analog and digital electronics, hybrid integrated circuits, integrated semiconductor devices, microwave and millimeter wave electronics, solid-state electronics, fiber optics, lasers and quantum electronics, and applied plasma physics. The department is associated with the Center for High-Frequency Electronics and the Institute of Plasma and Fusion Research, two research centers at UCLA.

## Bachelor of Science Degree

The ABET-accredited electrical engineering curriculum gives an excellent background for either graduate study or employment. The two main objectives are to provide (1) a deep and fundamental education in electrical engineering as well as in basic sciences and mathematics and (2) specialized education in one branch of electrical engineering so that the student develops expertise in it.

### The Major

Course requirements are as follows (186 minimum units required):

- (1) Five core courses: Electrical Engineering 101, 102, 103, and two courses from Civil and Environmental Engineering 108, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A (or Chemical Engineering M105A), 105D.
- (2) Electrical Engineering 10, 110, 115A, 121A, 121B, 132A, 141, 161, Computer Science 51A, Mathematics 132; four two-unit courses selected from the laboratory courses offered by the Electrical Engineering Department, Computer Science 152A, 152B and, by petition only, Electrical Engineering 199; Mechanical, Aerospace, and Nuclear Engineering 192A and either Electrical Engineering 131A or a course in statistical mechanics.
- (3) Any five major field elective courses (20 units) selected from those offered by the Electrical Engineering Department. With approval of the adviser, two may be selected from courses related to electrical engineering in other departments.
- (4) Chemistry and Biochemistry 11A; 11B/11BL; Electrical Engineering 5C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.
- (5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

## Graduate Study

For information on graduate admission to the electrical engineering program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

## Lower Division Courses

**2. Principles and Advances in Electrical Engineering.** Lecture, three hours; outside study, nine hours. Open to freshmen and sophomores outside the School of Engineering and Applied Science. Particularly intended for students in humanities and arts. Topics include elementary treatment of fundamental concepts and advances in electrical engineering. P/NP grading. Mr. Viswanathan (W)

**5C. Introduction to UNIX and C.** (Formerly numbered 5.) Lecture, three hours; recitation, one hour; laboratory, five hours; outside study, three hours. Introduction to UNIX environment and C programming language. UNIX basics: file structure and manipulation. Technical document preparation. C-shell programming. Elementary C language concepts: input-output, variable types, operators, statements, arrays, and functions. Mr. Pister, Mr. Villasenor (F,W)

**6C. Problem Solving with C.** Lecture, three hours; recitation, one hour; laboratory, five hours; outside study, three hours. Enforced requisite: course 5C. C language constructs: pointers, multidimensional arrays, structures, macros, and advanced functions. Data structures: linked lists, trees, and hash tables. Algorithmic, procedural problem solving. C/UNIX interaction. Mr. Pister, Mr. Villasenor (W,Sp)

**10. Circuit Analysis I.** Lecture, three hours; recitation, one hour; outside study, eight hours. Enforced requisites: Mathematics 33A (corequisite), Physics 8C. Introduction to linear circuit analysis. Resistive circuits, Kirchhoff laws, operational amplifiers, node and loop analysis, Thevenin and Norton theorem, capacitors and inductors, duality, first-order circuits, step response, second-order circuits, natural response, forced response. Mr. Samueli (F,Sp)

## Upper Division Courses

**100. Electrical and Electronic Circuits.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Mathematics 33A, 33B, Physics 8C. Electrical quantities, linear circuit elements, circuit principles, signal waveforms, transient and steady state circuit behavior, semiconductor diodes and transistors, small signal models, and operational amplifiers. Mr. Samueli (F,W,Sp)

**101. Engineering Electromagnetics.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Physics 8C, Mathematics 32A and 32B, or 33A and 33B. Electromagnetic field concepts, Maxwell equations, static and quasi-static electric and magnetic fields, energy flow and Poynting vector, waves in unbounded media, reflection and transmission of plane waves, radiation and antennas. Mr. Alexopoulos, Mr. Rahmat-Samii (F,W)

**102. Systems and Signals.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Mathematics 33A, 33B, Physics 8C. Systems: input-output description, linearity, time-invariance, and causality. Impulse response functions, superposition and convolution integrals. Laplace transforms and system functions. Periodic signals. Fourier series and transforms. Frequency responses, responses of systems to periodic signals. Sampling theorem. Discrete-time systems and elements of z-transforms. Mr. Levan (F,W,Sp)

**103. Applied Numerical Computing.** Lecture, three hours; recitation, one hour; outside study, 11 hours. Prerequisites: course 5C or Computer Science 10C or 10F, Mathematics 33A, 33B. Introduction to numerical analysis and computing techniques: root finding, matrix computations for systems of linear equations, systems of nonlinear equations, numerical methods for ordinary differential equations, least squares, eigenvalue/eigenvector problem, applications to engineering problems. Mr. Jacobsen (F,W,Sp)

**110. Circuit Analysis II.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 10. Corequisite: course 102. Sinusoidal excitation and phasors, AC steady state analysis, AC steady state power, network functions, poles and zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis. Mr. Samueli (F,W)

**110L. Circuit Measurements Laboratory (2 units).** Laboratory, four hours; outside study, two hours. Prerequisite: course 10 or 100. Experiments with basic circuits containing resistors, capacitors, inductors, and op-amps. Ohm's law, voltage and current division, Thevenin and Norton equivalent circuits, superposition, transient and steady state analysis, and frequency response principles. Mr. Samueli (F,W,Sp)

**113. Digital Signal Processing.** Lecture, three hours; recitation, one hour; outside study, nine hours. Prerequisites: courses 102, 110. Relationship between continuous-time and discrete-time signals. Z-transform. Discrete Fourier transform. Fast Fourier transform. Structures for digital filtering. Introduction to digital filter design techniques. Ms. Alwan, Mr. Villasenor (F,Sp)

**113L. Digital Signal Processing Laboratory (2 units).** Laboratory, four hours; outside study, two hours. Prerequisite: course 113. Recommended: Computer Science 151B. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite wordlength effects. Ms. Alwan, Mr. Villasenor (F,Sp)

**114. Introduction to Speech and Image Processing.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 113. Basic principles of data acquisition, filtering, feature extraction, transforms. Acoustic theory of speech production, speech analysis techniques, and modeling perceptual mechanisms in first half of course; image representation and basic image processing techniques in second half. Lecture supplemented by computer laboratory assignments. Ms. Alwan, Mr. Villasenor (W)

**115A. Analog Electronic Circuits I.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 110. Equivalent circuit modeling of electron devices. Device/circuit/environment interactions. Design of single-stage amplifiers. Introduction to cascaded stages, coupling problems, and frequency responses. Mr. Abidi (W,Sp)

**115AL. Analog Electronics Laboratory I (2 units).** Laboratory, four hours; outside study, two hours. Prerequisite: course 110L. Recommended: course 115A. Experimental determination of device characteristics, resistive diode circuits, single-stage amplifiers, compound transistor stages, effect of feedback on single-stage amplifiers. Mr. Abidi (F,W,Sp)

**115B. Analog Electronic Circuits II.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 115A. Electron device/circuit/environment interactions, with emphasis on multistage amplifiers. Tuned amplifier considerations. Nonlinear situations requiring graphical method of solution. Emphasis on design techniques, including economic, reliability, and realization of performance specifications. Mr. Abidi (F,Sp)

**115BL. Analog Electronics Laboratory II.** Laboratory, four hours; outside study, eight hours. Prerequisite: course 115AL. Recommended: course 115B. Experimental and computer studies of multistage, wideband, tuned, and power amplifiers, and multiloop feedback amplifiers. Introduction to thick film hybrid techniques. Construction of amplifier using hybrid thick film techniques. Mr. Abidi (F,W,Sp)

**115C. Digital Electronic Circuits.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: courses 115A, 115B, Computer Science 51A. Bipolar and CMOS device characteristics, circuit analysis and design techniques, modern logic families (TTL,  $I^2L$ , ECL, NMOS, CMOS), IC layout, MSI digital circuits (flipflops, registers, counters, PLAs, etc.), computer-aided simulation. Mr. Abidi (F,W)

**115D. Applied Electronic Circuits (3 units).** Lecture, three hours; outside study, six hours. Prerequisites: courses 115B, 115C, 118. Applications of distributed circuits. Operational amplifier applications and limitations. Power amplifiers. Feedback and stability. Precision and analog circuits. Mr. Abidi (W)

**116. Communication Circuits (3 units).** Lecture, three hours; outside study, six hours. Prerequisites: courses 113, 115B, 132A. Review of analog and digital radio communication techniques. Noise, nonlinear distortion, automatic gain control, data transmission filters. Analog and digital oscillators and phase-locked loops. Basic modulation and demodulation techniques. Mr. Samueli (Sp)

**118. Integrated Circuit Components.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: courses 115B, 121B. Realization of active and passive components in integrated circuit design. Passive components: resistors, capacitors, metal interconnections. Active devices: NPN and PNP BJTs, design rules; FET devices. Device interactions and layout rules. Mr. Abidi (F)

**121A. Physical Principles of Semiconductor Devices.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Materials Science 14, and Chemistry 11B or Physics 8E. Introduction to physics of semiconductors; survey of equilibrium and nonequilibrium electronic processes in semiconductors; principles of operation and design of p-n junction devices. Fabrication of semiconductor devices. Mr. Viswanathan (F,W)

**121B. Principles of Semiconductor Device Design.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 121A. Introduction to principles of operation of bipolar and MOS transistors, equivalent circuits, high-frequency behavior, voltage limitations. Mr. Viswanathan (W,Sp)

**122AL. Semiconductor Devices Laboratory.** Lecture, one hour; laboratory, six hours; outside study, five hours. Prerequisites: courses 121A, 121B (may be taken concurrently). Design fabrication and characterization of p-n junction and transistors. Students perform various processing tasks such as wafer preparation, oxidation, diffusion, metallization, and photolithography. Mr. Woo (F,Sp)

**123A. Fundamentals of Solid-State I.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: junior standing in engineering, Physics 8E. Fundamentals of solid-state, introduction to quantum mechanics and quantum statistics applied to solid-state. Crystal structure, energy levels in solids, and band theory and semiconductor properties. Mr. Fetterman (F)

**123B. Fundamentals of Solid-State II.** Lecture, three hours; outside study, nine hours. Prerequisite: course 123A. Discussion of solid-state properties, lattice vibrations, thermal properties, dielectric, magnetic, and superconducting properties. Mr. Stafsudd (W)

**124. Semiconductor Physical Electronics.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 123A. Band structure of semiconductors, experimental probes of basic band structure parameters, statistics of carriers, carrier transport properties at low fields, excess carrier transport properties, carrier recombination mechanisms, heterojunction properties. Mr. Pan (Sp)

**131A. Probability.** Lecture, four hours; recitation, one hour; outside study, 10 hours. Prerequisites: course 102, Mathematics 32B, 33B. Introduction to basic concepts of probability, including random variables and vectors, distributions and densities, moments, characteristic functions, and limit theorems. Applications to communication, control, and signal processing. Introduction to computer simulation and generation of random events. Mr. Rubin (F,W)

**131B. Introduction to Stochastic Processes (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 131A. Introduction to concepts of stochastic processes, emphasizing continuous- and discrete-time stationary processes, correlation function and spectral density, linear transformation, and mean-square estimation. Applications to communication, control, and signal processing. Introduction to computer simulation and analysis of stochastic processes. Mr. Yao (Sp)

**132A. Introduction to Communication Systems (5 units).** Lecture, four hours; recitation, one hour; outside study, 10 hours. Prerequisites: courses 102, 131A. Properties of signals and noise. Baseband pulse and digital signaling. Bandpass signaling techniques. Communication systems: digital transmission, frequency-division multiplexing and telephone systems, satellite communication systems. Performance of communication systems in presence of noise. Mr. Bambos (W,Sp)

**132B. Data Communications and Telecommunication Networks (5 units).** Lecture, four hours; recitation, one hour; outside study, 10 hours. Prerequisite: course 131A. Layered communications architectures. Queuing system modeling and analysis. Error control, flow and congestion control. Packet switching, circuit switching, and routing. Network performance analysis and design. Multiple-access communications: TDMA, FDMA, polling, random access. Local, metropolitan, wide area, integrated services networks.

Mr. Rubin (W)

**136. Introduction to Engineering Optimization Techniques.** Lecture, four hours; recitation, one hour; outside study, seven hours. Prerequisites: course 103, Mathematics 32A, and 33A, or consent of instructor. Introduction to optimization techniques for engineering and science students. Minimization of unconstrained functions of several variables: steepest descent, Newton/Raphson, conjugate gradient, and quasi-Newton methods. Rates of convergence. Methods for constrained minimization: introduction to linear programming and gradient projection methods. Lagrangian methods. Students expected to use SEASnet computers.

Mr. Jacobsen (W)

**141. Principles of Feedback Control.** Lecture, three hours; recitation, one hour; laboratory, one hour; outside study, seven hours. Prerequisite: course 102 or consent of instructor. Classical methods of analysis and design of feedback control systems as applied to problems selected from engineering, biology, and related areas. (F,Sp)

**142. Linear Systems: State-Space Approach.** Lecture, four hours; laboratory, one hour; outside study, 10 hours. Prerequisite: course 102. State-space methods of linear system analysis and design, with application to problems in networks, control, and system modeling. (W)

**161. Electromagnetic Waves.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 101. Transmission line theory, guided waves in enclosed waveguides, Smith chart, phase and group velocity, cavity resonators, waves in complex media. Mr. Rahmat-Samii (F,Sp)

**162A. Antenna Design I.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 161. Radiation properties of basic antenna elements. Reciprocity, directivity, beamwidth polarization, and sidelobe level of antenna patterns. Design of linear arrays. Design of antenna excitation networks. Array design including mutual coupling. Mr. Alexopoulos (Sp)

**162B. Antenna Design II.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 162A. Radiation patterns of horns, slots, and microstrip antennas. Equivalent source representations. Synthesis of sum and difference patterns. Dolph/Chebyshev excitation. Design of slot arrays with mutual coupling. Design of traveling wave antennas, reflectors, and lenses. Mr. Alexopoulos (F)

**163A. Introductory Microwave Circuits.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 161. Transmission lines description of waveguides, impedance transformers, power dividers, directional couplers, filters, hybrid junctions, nonreciprocal devices. Mr. Itoh (W)

**163B. Microwave and Millimeter Wave Active Circuits.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 161. Oscillator theory, transistor, FET, IMPATT, Gunn, oscillators, microwave tubes. Mr. Itoh, Mr. Jalali (W)

**163C. Microwave Amplifiers.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 115A, 161. Theory and design of FET and bipolar transistor amplifiers; stability, noise, distortion. Broadband and MMIC amplifiers. Mr. Itoh (Sp)

**164AL. Microwave Measurements Laboratory.** Lecture, two hours; laboratory, four hours; outside study, six hours. Prerequisite or corequisite: course 163A. Measurement techniques and instrumentation for active and passive microwave components; cavity resonators, waveguides, wavemeters, slotted lines, directional couplers. Design, fabrication, and characterization of microwave circuits in microstrip and coaxial systems. Mr. Itoh, Mr. Kolner (W)

**164BL. Active Microwave Circuit Design Laboratory.** Lecture, two hours; laboratory, four hours; outside study, six hours. Prerequisite: course 164AL. Application of contemporary analytic design techniques to development of microwave amplifiers and oscillators incorporating state-of-the-art commercially available microwave transistors (silicon bipolar and GaAs MESFET). Mr. Itoh, Mr. Kolner (Sp)

**172. Introduction to Lasers and Quantum Electronics.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 101 or equivalent or consent of instructor. Physical applications and principles of lasers, Gaussian optics, resonant cavities, atomic radiation, laser oscillation and amplification, cw and pulsed lasers. Mr. Joshi, Mr. Stafsudd (F)

**172L. Laser Laboratory.** Laboratory, four hours; outside study, eight hours. Prerequisite or corequisite: course 172 or consent of instructor. Properties of lasers, including saturation, mode-locking, and relaxation effects. Laser applications, including optics, modulation, communication, holography, interferometry, and nonlinear effects. Mr. Joshi, Mr. Stafsudd (F)

**173. Photonic Devices.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 101 or consent of instructor. Introduction to basic principles of photonic devices. Topics include crystal optics, dielectric optical waveguides, waveguide couplers, electro-optic devices, magneto-optic devices, acousto-optic devices, second-harmonic generation, optical Kerr effect, optical switching devices. Mr. Joshi, Mr. Liu (W)

**173L. Photonics Laboratory.** Laboratory, four hours; outside study, eight hours. Prerequisite or corequisite: course 173 or consent of instructor. Introduction to measurement of basic photonic devices, including LEDs, lasers, detectors, and amplifiers; fiber-optic fundamentals and measurement of fiber systems. Optical modulation via Pockels, Kerr magnetic optic, and acousto-optic effect. Mr. Stafsudd (W)

**174. Semiconductor Optoelectronics (3 units).** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 172 or consent of instructor. Introduction to semiconductor optoelectronic devices for optical communications, interconnects, and signal processing. Basic optical properties of semiconductors, pin photodiodes, avalanche photodiode detectors (APD), light-emitting diodes (LED), semiconductor lasers, optical modulators and amplifiers, and typical photonic systems. Mr. Fetterman, Mr. Wu (Sp)

**175. Fourier Optics.** (Formerly numbered 165.) Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: courses 102, 161. Two-dimensional linear systems and Fourier transforms. Foundation of diffraction theory. Analysis of optical imaging systems. Spatial filtering and optical information processing. Wavefront reconstruction and holography. Mr. Kolner (Sp)

**M185. Plasma Physics.** (Same as Physics M122.) Lecture, four hours; outside study, eight hours. Prerequisite: course 101 or Physics 110A. Senior-level introductory course to physics of plasmas and ionized gases and fundamentals of controlled fusion. Particle motion in magnetic fields; fluid behavior, plasma waves; resistivity and transport; equilibrium and stability; kinetic effects. Discussion of illustrative laboratory experiments. (F, even years)

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Only two units may be applied toward degree; the two units must be approved by petition and can be used only as a replacement for a regular electrical engineering laboratory course. Students may take additional 199 courses, but they may not be applied toward degree. (F,W,Sp)

## Graduate Courses

**M208A. Analytical Methods of Engineering I.** (Same as Mechanical, Aerospace, and Nuclear Engineering M291A.) Prerequisites: Mathematics 131A, 132. Application of abstract mathematical methods to engineering problems. Review of elements of measure and integration,  $L^2$  theory — linear spaces and operators. Eigenvalue problems. Introduction to spectral theory — elementary distribution theory. Applications to problems in engineering. Mr. Gibson (F,W)

**M208B. Analytical Methods of Engineering II.** (Same as Mechanical, Aerospace, and Nuclear Engineering M291B.) Prerequisite: course M208A or Mechanical, Aerospace, and Nuclear Engineering M291A or consent of instructor. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and their adjoints. Discrete and continuous spectra for ordinary and partial differential equations. Initial and boundary value problems. Mr. Gibson, Mr. Levan (W,Sp)

**208C. Semigroups of Linear Operators and Applications.** Lecture, four hours; other, eight hours. Prerequisite: course M208B or equivalent. Semigroups of linear operators over Hilbert spaces. Generator and resolvent, generation theorems, Laplace inversion formula. Dissipative operators and contraction semigroups. Analytic semigroups and spectral representation. Semigroups with compact resolvents. Parabolic and hyperbolic systems. Controllability and stabilizability. Applications. Mr. Balakrishnan, Mr. Levan (Sp)

**211A. Digital Image Processing I.** Lecture, three hours; laboratory, four hours; outside study, five hours. Prerequisites: course 113, computer programming experience. Fundamentals of digital image processing theory and techniques. Topics include two-dimensional linear system theory, image transforms, and enhancement. Concepts covered in lecture applied in computer laboratory assignments. Mr. Villasenor (F)

**211B. Digital Image Processing II.** Lecture, three hours; laboratory, four hours; outside study, five hours. Prerequisite: course 211A. Advanced digital image processing theory and techniques. Topics include modeling, restoration, still-frame and video image compression, tomographic imaging, and multiresolution analysis using wavelet transforms. Mr. Villasenor (F)

**212A. Theory and Design of Digital Filters.** (Formerly numbered 212.) Lecture, three hours; outside study, nine hours. Prerequisite: course 113. Approximation of filter specifications. Use of design charts. Structures for recursive digital filters. FIR filter design techniques. Comparison of IIR and FIR structures. Implementation of digital filters. Limit cycles. Overflow oscillations. Discrete random signals. Wave digital filters. Mr. Samuelli (F)

**212B. Multirate Systems and Filter Banks.** Lecture, three hours; outside study, nine hours. Prerequisite: course 212A. Fundamentals of multirate systems; polyphase representation; multistage implementations; applications of multirate systems; maximally decimated filter banks; perfect reconstruction systems; paraunitary filter banks; wavelet transform and its relation to multirate filter banks. Mr. Willson (W)

**213A. Advanced Digital Signal Processing Circuit Design.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 212A, M216A. Digital filter design and optimization tools, architectures for digital signal processing circuits; integrated circuit modules for digital signal processing; programmable signal processors; CAD tools and cell libraries for application-specific IC design; case studies of speech and image processing circuits. Mr. Jain (Sp)

**214A. Digital Speech Processing.** (Formerly numbered 214.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Prerequisite: course 113 or equivalent. Theory and applications of digital processing of speech signals. Mathematical models of human speech production and perception mechanisms, speech analysis/synthesis. Techniques include linear prediction, filter bank models, and homomorphic filtering. Applications to speech synthesis, automatic recognition, and hearing aids.

Ms. Alwan (W)

**215A. Analog Integrated Circuit Design.** Lecture, three hours; outside study, nine hours. Prerequisite: course 115B. Bipolar and CMOS operational amplifier design; gain stages, frequency compensation, output stages; voltage references; analysis of noise and distortion; wideband amplifiers.

Mr. Abidi (W)

**215B. Advanced Digital Integrated Circuits.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 115C, M216A. Analysis and comparison of modern logic families (CMOS, bipolar, BiCMOS, GaAs). MSI digital circuits (flipflops, registers, counters, PLAs). VLSI memories (ROM, RAM, CCD, bubble memories, EPROM, EEPROM) and VLSI systems.

Mr. Abidi (Sp)

**215D. Analog Microsystem Design.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 113, 215A. Analog signal processing families. Discrete-time switched-capacitor circuits. Continuous-time filters. A/D and D/A converters. Samplers, modulators, oscillators. System-level circuit design.

Mr. Abidi (Sp)

**M216A. LSI in Computer System Design.** (Same as Computer Science M258A.) Lecture, four hours; laboratory, four hours. Prerequisites: graduate standing in computer science or electrical engineering, consent of instructor. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip.

Mr. Jain (F)

**M216B-M216C. LSI in Computer System Design.** (Same as Computer Science M258B-M258C.) Lecture, four hours; laboratory, four hours. Prerequisite: course M216A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress grading.

Mr. Jain

**219A. Special Topics in Circuits and Signal Processing.** Lecture, three hours; outside study, nine hours. Prerequisite: consent of instructor. Advanced treatment of topics selected from research areas in circuit theory, integrated circuits, or signal processing.

**221A. Physics of Semiconductor Devices I.** Prerequisite: course 121A. Physical principles and design considerations of junction devices.

Mr. K. Wang, Mr. Woo (F)

**221B. Physics of Semiconductor Devices II.** Prerequisite: course 121A. Principles and design considerations of field effect devices and charge-coupled devices.

Mr. Viswanathan (Sp)

**221C. Microwave Semiconductor Devices.** Prerequisite: course 121A. Physical principles and design considerations of microwave solid-state devices: Schottky barrier mixer diodes, IMPATT diodes, transferred electron devices, tunnel diodes, microwave transistors.

Mr. Pan, Mr. K. Wang (W)

**222. Integrated Circuits Fabrication Processes.** Prerequisites: courses 118, 121A. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion-implantation, chemical vapor deposition, dry etching, lithography, and metalization. Introduction of advanced process simulation tools.

Mr. Woo (Sp, odd years)

**223. Solid-State Electronics I.** Prerequisites: courses 124 and 270, or consent of instructor. Energy band theory, electronic band structure of various elementary, compound, and alloy semiconductors, defects in semiconductors. Recombination mechanisms, transport properties.

Mr. Fetterman, Mr. Pan (F)

**224. Solid-State Electronics II.** Prerequisite: course 223. Techniques to solve Boltzmann transport equation, various scattering mechanisms in semiconductors, high field transport properties in semiconductors, Monte Carlo method in transport. Optical properties.

Mr. Pan (Sp, even years)

**225. Superlattices and Quantum Wells.** Prerequisite: course 223. Theoretical methods for circulating electronics and optical properties of semiconductor quantum wells, superlattices, and tunnel structures. Quantum size effects and low-dimensional systems. Application to semiconductor devices, including negative resistance diodes, transistors, and detectors.

Mr. K. Wang (W, even years)

**229. Seminars: Advanced Topics in Solid-State Electronics.** Prerequisites: courses 223, 224. Current research areas, such as radiation effects in semiconductor devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electron emission.

**229S. Advanced Electrical Engineering Seminar (2 units).** Prerequisite: successful completion of Ph.D. major field examination or consent of instructor. Seminar on current research topics in solid-state and quantum electronics (Section 1) or in electronic circuit theory and applications (Section 2). Students report on a tutorial topic and on a research topic in their dissertation area. May be repeated for credit. S/U grading.

(F,W,Sp)

**230A. Estimation and Detection in Communication and Radar Engineering.** Prerequisite: course 137A or equivalent. Applications of estimation and detection concepts in communication and radar engineering; random signal and noise characterizations by analytical and simulation methods; mean square (MS) and maximum likelihood (ML) estimations and algorithms; detection under ML, Bayes, and Neyman/Pearson (NP) criteria; signal-to-noise ratio (SNR) and error probability evaluations.

Mr. Rubin (F)

**230B. Digital Communication Systems.** Prerequisite: course 230A. Basic concepts of digital communication systems and applications; representation of bandpass waveforms; geometry and optimum receivers in white Gaussian noise; comparisons of digital modulation schemes; transmission over real channels; applications to satellite systems.

Mr. Rubin (Sp)

**230C. Algorithms and Processing in Communication and Radar.** Prerequisite: course 230A. Concepts and implementations of digital signal processing algorithms in communication and radar systems. Optimum dynamic range scaling for random data. Algorithms for fast convolution and transform. Spectral estimation algorithms. Parallel processing, VLSI algorithms, and systolic arrays.

Mr. Yao (W)

**230D. Signal Processing in Communications.** Lecture, four hours; other, eight hours. Prerequisite: course 230C. Basic digital signal processing techniques for estimation and detection of signals in communication and radar systems. Optimization of dynamic range, quantization, and state constraints; DFT, convolution, FFT, NTT, Winograd DFT, systolic array; spectral analysis-windowing, AR, and ARMA; system applications.

Mr. Yao

**231A. Information Theory: Channel and Source Coding.** Prerequisite: course 230A. Fundamental concepts of information theory with applications to digital communications. Block and convolutional codes analyzed from both theoretical and practical implementation viewpoints. Channel coding and theory of data compression (rate distortion theory).

Mr. Rubin (W)

**231B. Error Control Codes and Cryptography.** Prerequisite: course 231A. Introduction to Galois fields with applications to error control codes and cryptography. Linear block codes, cyclic codes, BCH codes, Reed/Solomon codes, and Goppa codes. Digital circuit implementation of encoders, decoders, and cryptographic systems. Conventional and public key cryptosystems and key management.

Mr. Yao (Sp)

**231C. Rate Distortion Theory and Source Coding Techniques.** Prerequisites: courses 230A and 231A, or consent of instructor. Sources and distortion measures, rate distortion function and its evaluation for discrete and continuous sources, source coding theorems, comparisons of practical coding systems to theoretical bounds, speech and image quantization.

Mr. Yao (Sp)

**231D. Spread Spectrum Communications.** Prerequisite: course 231A. Spread spectrum digital communication systems for anti-jam and multiple-access applications. Basic design approach, models, and general analysis for spread spectrum systems. Direct sequence spread binary-phase-shift keying (BPSK) and frequency-hopped multiple-frequency-shift keying (MFSK) signals. Multiple access in spread spectrum digital radio networks.

Mr. Bambos (Sp)

**231E. Algebraic Coding Theory.** Prerequisite: course 231A. Fundamentals of linear or parity-check codes and decoding algorithms based on algebraic theory of finite groups and fields; cyclic codes; Hamming; Reed/Muller, Bose/Chaudhuri/Hocquenghem, and Reed/Solomon codes, and corresponding decoding algorithms.

Mr. Yao

**232A. Stochastic Modeling with Applications to Telecommunication Systems.** Prerequisite: course 131A or equivalent. Introduction to stochastic processes as applied to study of telecommunication systems and traffic engineering. Renewal theory; discrete-time Markov chains; continuous-time Markov jump processes. Applications to traffic and queueing analysis of basic telecommunication system models.

Mr. Rubin (F)

**232B. Telecommunication Switching and Queueing Systems.** Prerequisite: course 232A. Queue modeling and analysis with applications to space-time digital switching systems and to integrated-service telecommunication systems. Fundamentals of traffic engineering and queueing theory. Queue size, waiting time, busy period, blocking, and stochastic process analysis for Markovian and non-Markovian models.

Mr. Rubin (W)

**232C. Telecommunication Architecture and Networks.** Prerequisite: course 232B. Analysis and design of integrated-service telecommunication networks and multiple-access procedures. Stochastic analysis of priority-based queueing system models. Queueing networks; network protocol architectures; error control; routing, flow, and access control. Applications to local-area, packet-radio, satellite, and computer communication networks.

Mr. Rubin (Sp)

**232D. Telecommunication Networks and Multiple-Access Communications.** Prerequisite: course 232B. Performance analysis and design of telecommunication networks and multiple-access communication systems. Topics include architectures, multiplexing and multiple-access, message delays, error/flow control, switching, routing, protocols. Applications to local-area, packet-radio, local-distribution, computer and satellite communication networks.

Mr. Rubin

**232E. Graphs and Network Flows.** Prerequisite: course 136 or consent of instructor. Solution to analysis and synthesis problems which may be formulated as flow problems in capacity constrained (or cost constrained) networks. Development of tools of network flow theory using graph theoretic methods; application to communication, transportation, and transmission problems.

Mr. Jacobsen (W,Sp)

**236A. Linear Programming.** Prerequisite: Mathematics 115A or equivalent knowledge of linear algebra. Basic graduate course in linear and combinatorial programming. Simplex method, duality, geometry, decomposition, complementary pivot theory, and quadratic programming; introduction to computational complexity theory.

Mr. Jacobsen (F)

**236B. Nonlinear Programming.** Prerequisite: course 236A or equivalent. Basic graduate course in nonlinear programming. Convex sets and functions and their basic properties. Kuhn/Tucker points, saddle points, and nonlinear or conjugate duality theory. Development of algorithms and convergence theory.

Mr. Jacobsen (W)

**236C. Optimization Methods for Large-Scale Systems.** Prerequisite: course 236B. Theory and computational procedures for decomposing large-scale mathematical programming problems. Generalized linear programming, decomposition algorithms, column generation, economic implications. Application to stochastic programming and optimal control. Topics in nonconvex programming; minimizing concave functions on convex polyhedra, reverse convex programming.

Mr. Jacobsen (Sp)

**237. Dynamic Programming.** Prerequisite: course 232A. Introduction to mathematical analysis of sequential decision processes. Finite horizon model in both deterministic and stochastic cases. Finite-state infinite horizon model. Methods of solution. Detailed examples from inventory theory, finance, and transportation systems.

Mr. Jacobsen (W)

**238. Reliability Theory with Applications.** Prerequisite: course 131A or equivalent. Basic graduate course in reliability theory. Reliability models for complex systems, coherent structures, modular decomposition, reliability bounds. Constant, monotone hazard functions. Optimization problems in reliability: redundancy allocations, maintenance policies, stress-strength and safety considerations in engineering design. Statistical problems, current topics.

Mr. Jacobsen (Sp)

**239AS. Topics in Communication.** Prerequisite: consent of instructor. Topics in one or more special aspects of communication systems, such as phase-coherent communication systems, optical channels, time-varying channels, feedback channels, broadcast channels, networks, coding and decoding techniques. May be repeated for credit with topic change.

**239BS. Topics in Operations Research.** Prerequisite: consent of instructor. Treatment of one or more selected topics from areas such as integer programming; combinatorial optimization; network synthesis; scheduling, routing, location, and design problems; implementation considerations for mathematical programming algorithms; stochastic programming; applications in engineering, computer science, economics. May be repeated for credit with topic change.

**240A. Linear Dynamic Systems.** Prerequisite: course 142 or equivalent. State-space description of dynamic systems. Deduction of state spaces from input-output data. State controllability and observability. Stability and state feedback stabilizability; state observer.

Mr. Balakrishnan (F)

**240B. Linear Optimal Control.** Prerequisites: courses 141 or equivalent and 240A, or consent of instructor. Introduction to optimal control, with emphasis on detailed study of LQR, or linear regulators with quadratic cost criteria. Relationships to classical control system design.

Mr. Levan (W)

**240C. Optimal Control.** Prerequisite: course 240B. Applications of variational methods. Pontryagin maximum principle, dynamic programming and nonlinear programming to problems of optimal control theory and practical systems.

Mr. P.K.C. Wang (Sp)

**241A. Stochastic Processes.** Prerequisite: course 131B or equivalent. Fundamentals and applications of second-order theory stochastic processes. Correlation and spectral density. Gaussian process, processing by dynamic systems, Bayes rule and conditional expectation; mean-square estimation and Kalman filtering.

Mr. Yao (F)

**241B. Kalman Filtering.** Prerequisites: courses 240A, 241A. Statistical estimation theory, estimation of signal parameters in additive noise. Kalman filter theory: basic theory, steady state and frequency domain analyses, on-line estimation and colored noise. Likelihood ratios, Gaussian signals in Gaussian noise.

Mr. Balakrishnan (W)

**241C. Stochastic Control.** Prerequisites: courses 240B, 241B. Estimation and control of linear discrete-time and continuous-time stochastic systems; separation theorem and applications; Kalman filtering.

Mr. Balakrishnan (Sp)

**242. Nonlinear Control.** Prerequisite: course 240B. Techniques for studying nonlinear control systems, with emphasis on their stability; Liapunov direct method; input-output stability; Popov method; linearization.

Mr. P.K.C. Wang (W)

**M243. Biological Control Systems.** (Same as Anesthesiology M222.) Prerequisite: course 141 or equivalent. Introduction to application of control theory to modeling and analysis of biological control systems, such as respiratory system, cardiovascular system, and neuromuscular system. Emphasis on solving problems of current interest in biomedicine.

**249S. Topics in Control.** Prerequisite: consent of instructor. Thorough treatment of one or more aspects of control theory and applications, such as computational methods for optimal control; stability of distributed systems; identification; adaptive control; nonlinear filtering; differential games; applications to flight control, nuclear reactors, process control, biomedical problems. May be repeated for credit with topic change.

**260A-260B. Advanced Engineering Electrodynamics.** Prerequisites: courses 161, 162A. Advanced treatment of concepts in electrodynamics and their applications to modern engineering problems. Waves in anisotropic, inhomogeneous, and dispersive media. Guided waves in bounded and unbounded regions. Radiation and diffraction, including optical phenomena. Partially coherent waves, statistical media.

Mr. Alexopoulos, Mr. Rahmat-Samii (F, 260A; W, 260B)

**261. Microwave and Millimeter Wave Circuits.** Prerequisite: course 163A or consent of instructor. Rectangular and circular waveguides, microstrip, stripline, finline, and dielectric waveguide distributed circuits, with applications in microwave and millimeter wave integrated circuits. Substrate materials, surface wave phenomena. Analytical methods for discontinuity effects. Design of passive microwave and millimeter wave circuits.

Mr. Alexopoulos, Mr. Itoh (Sp)

**262. Antenna Theory and Design.** Prerequisites: courses 162A, 162B. Antenna patterns. Sum and difference patterns. Optimum designs for rectangular and circular apertures. Arbitrary side lobe topography. Discrete arrays. Mutual coupling. Design of feeding networks.

Mr. Alexopoulos, Mr. Rahmat-Samii (W, even years)

**263. Reflector Antennas Synthesis, Analysis, and Measurement.** Lecture, four hours; other, eight hours. Prerequisites: courses 260A-260B or equivalent. Reflector pattern analysis techniques. Single and multireflector antenna configurations. Reflector synthesis techniques. Reflector feeds. Reflector tolerance studies, including systematic and random errors. Array-fed reflector antennas. Near-field measurement techniques. Compact range concepts. Microwave diagnostic techniques. Modern satellite and ground antenna applications.

Mr. Rahmat-Samii

**266. Computational Methods for Electromagnetics.** Prerequisites: courses 162A, 163A. Computational techniques for partial differential and integral equations: finite-difference, finite-element, method of moments. Applications include transmission lines, resonators, integrated circuits, solid-state device modeling, electromagnetic scattering, and antennas.

Mr. Itoh (W)

**267. Nonlinear Microwave Circuits.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 161, 163A, 163B. Nonlinear device modeling, harmonic balance and Volterra series analysis, application to mixers, frequency multipliers, and amplifiers.

Mr. Itoh (W)

**270. Applied Quantum Mechanics.** Lecture, four hours; outside study, eight hours. Prerequisites: modern physics (or course 123A), linear algebra, and ordinary differential equations courses. Principles of quantum mechanics for applications in lasers, solid-state physics, and nonlinear optics. Topics include eigenfunction expansions, observables, Schrödinger equation, uncertainty principle, central force problems, Hilbert spaces, WKB approximation, matrix mechanics, density matrix formalism, and radiation theory.

Mr. Liu, Mr. Stafsudd (F)

**271. Classical Laser Theory.** Lecture, four hours; outside study, eight hours. Prerequisite: course 172 or equivalent. Microscopic and macroscopic laser phenomena and propagation of optical pulses using classical formalism.

Mr. Joshi (W)

**272. Dynamics of Lasers.** Lecture, four hours; outside study, eight hours. Prerequisite: course 271 or consent of instructor. Ultrashort laser pulse characteristics, generation, and measurement. Gain switching, Q switching, cavity dumping, active and passive mode locking. Pulse compression and soliton pulse formation. Nonlinear pulse generation: soliton laser, additive-pulse mode locking, and parametric oscillators. Pulse measurement techniques.

Mr. Liu (Sp)

**273. Nonlinear Optics.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 172 and 270, or consent of instructor. Nonlinear optical susceptibilities. Coupled-wave formulation. Crystal optics, electro-optics, and magneto-optics. Sum- and difference-frequency generation. Harmonic and parametric generation. Stimulated Raman and Brillouin scattering. Four-wave mixing and phase conjugation. Field-induced index changes and self-phase modulation.

Mr. Liu (W)

**279S. Special Topics in Quantum Electronics.** Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Current research topics in quantum electronics, lasers, nonlinear optics, optoelectronics, ultrafast phenomena, fiber optics, and lightwave technology. May be repeated for credit. S/U or letter grading.

Mr. Liu (F,W,Sp)

**285A. Plasma Waves and Instabilities.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 101, and M185 or Physics M122. Wave phenomena in plasmas described by macroscopic fluid equations. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydro-magnetic waves, drift waves. Rayleigh/Taylor, Kelvin/Helmholtz, universal, and streaming instabilities. Application to experiments in fully and partially ionized gases.

Mr. Luhmann (W)

**285B. Advanced Plasma Waves and Instabilities.** Prerequisites: courses M185, and 285A or Physics 222A. Interaction of intense electromagnetic waves with plasmas: waves in inhomogeneous and bounded plasmas, nonlinear wave coupling and damping, parametric instabilities, anomalous resistivity, shock waves, echoes, laser heating. Emphasis on experimental considerations and techniques.

Mr. Luhmann (Sp)

**M286. Principles of Magnetic Confinement Fusion.** (Same as Mechanical, Aerospace, and Nuclear Engineering M237A.) Prerequisites: courses M185, and 285A and 285B or Physics 222A-222B, or consent of instructor. Plasma requirements for controlled fusion. Structure of magnetic fields. Theory of MHD equilibrium and stability. Shear and minimum-B stabilization. Resistive and microinstabilities. Neoclassical diffusion physics of tokamak and tandem-mirror plasmas. Neutral beams and auxiliary heating. Alternate concepts.

(W, odd years)

**M287. Fusion Plasma Physics and Analysis.** (Same as Mechanical, Aerospace, and Nuclear Engineering M237B.) Prerequisite: course M185. Fundamentals of plasmas at thermonuclear burning conditions. Fokker-Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts.

(W)

**296AA-296ZZ. Seminars: Research Topics in Electrical Engineering (2 units each).** Lecture, two hours; outside study, four hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in electrical engineering. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**298. Seminar: Engineering (2 to 4 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. (F,W,Sp)

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination (2 to 12 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

Kanji Ono, Ph.D., *Chair*  
Aly H. Shabaik, Ph.D.  
King-Ning Tu, Ph.D.

#### Professors Emeriti

Rointan F. Bunshah, D.Sc.

Marek A. Przystupa, Ph.D.  
Arnab Sarkar, Ph.D.

## Scope and Objectives

At the heart of materials science is an understanding of the microstructure of solids. "Microstructure" is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about.

Materials engineering, on the other hand, is concerned with the design, fabrication, and nondestructive testing of engineering materials. Such materials must fulfill simultaneously dimensional, property, quality control, and economic requirements. Several manufacturing steps may be involved: (1) primary fabrication, such as solidification or vapor deposition of homogeneous or composite materials; (2) secondary fabrication, including shaping and microstructural control by operations such as mechanical working, machining, sintering, joining, and heat treatments; and (3) nondestructive testing, which measures the degree of reliability of a processed part.

The department also has a program in electronic materials which provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

The undergraduate program leads to the Bachelor of Science degree in Materials Engineering. Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the department's materials engineering major. A joint major field,

chemistry/materials science, is offered to students enrolled in the Department of Chemistry and Biochemistry (College of Letters and Science). Several courses in the undergraduate curriculum also play an important role in one of the options of the manufacturing engineering program.

The graduate program allows for specialization in one of the following fields: materials science, metallurgy and metals processing, mechanical metallurgy, and ceramics and ceramics processing.

## Bachelor of Science in Materials Engineering

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

### The Major

Course requirements are as follows (180 minimum units required):

(1) Six core courses: Chemical Engineering M105A (or Mechanical, Aerospace, and Nuclear Engineering M105A), Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 105D.

(2) Materials Science and Engineering 110, 120, 130, 131, 132, 150, 160, 190; 131L and 161L, plus two additional laboratory units from 111 (one unit of lab credit), 143L, 191L; Mechanical, Aerospace, and Nuclear Engineering 191A or 192A (satisfies the mathematics requirement); Civil and Environmental Engineering 106A (satisfies the engineering economics requirement).

(3) Four elective courses from Chemical Engineering C114, Civil and Environmental Engineering 135A, Electrical Engineering 121A, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 143A, 143B, 147B, 151, 161, 162, Mechanical, Aerospace, and Nuclear Engineering 156B (the design content of the elective courses and the elective laboratory must total eight units).

(4) Chemistry and Biochemistry 11A, 11B/11BL; Civil and Environmental Engineering 15A and 15B or Electrical Engineering 5C or Mechanical, Aerospace, and Nuclear Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

(6) One free elective course.

## Environmental Science and Engineering (Interdepartmental)

This interdisciplinary graduate program, which leads to the Doctor of Environmental Science and Engineering (D.Env.) degree, provides scientific training in the enlightened management of the environment through a broad range of environmental disciplines. For details on this program, see Chapter 17 on the School of Public Health.

## Materials Science and Engineering

5731 Boelter Hall (6532 Boelter Hall in early 1995), (310) 825-5534

### Professors

Alan J. Ardell, Ph.D.  
Bruce S. Dunn, Ph.D.  
John D. Mackenzie, Ph.D. (*Nippon Sheet Glass Company Professor of Materials Science*),  
*Associate Dean*

**190. Materials Selection and Engineering Design.** Prerequisites: courses 132, 150, 160. Explicit guidance among the myriad materials available for design in engineering. Properties and applications of steels, nonferrous alloys, polymeric, ceramic, and composite materials, coatings. Materials selection, treatment, and serviceability emphasized as part of successful design. Design projects. Mr. Yang (Sp)

**191L. Computer Methods and Instrumentation in Materials Science (2 units).** Prerequisites: upper division standing in materials science and engineering, knowledge of BASIC or C or assembly language. Interface and control techniques, real-time data acquisition and processing, computer-aided testing. Mr. Yang (W)

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. (F,W,Sp)

## Graduate Courses

**221. Science of Electronic Materials.** Lecture, four hours; outside study, eight hours. Prerequisite: course 120 or equivalent. Study of major physical and chemical principles affecting properties and performance of semiconductor materials. Topics include bonding, carrier statistics, band-gap engineering, optical and transport properties, novel materials systems, and characterization. Mr. Goorsky (Sp)

**222. Growth and Processing of Electronic Materials.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 120, 130, 131, or equivalent. Thermodynamics and kinetics that affect semiconductor growth and device processing. Particular emphasis on fundamentals of growth (bulk and epitaxial), heteroepitaxy, implantation, oxidation. Mr. Goorsky (W)

**240A. Principles of Materials Science A (Microstructural Thermodynamics).** Prerequisites: course 130, Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A or equivalent. Thermodynamical equilibrium criteria for multi-component systems of materials. Phase transformations and chemical reactions. Properties of solutions; quasicompositional approach. Free energy of binary systems and construction of phase diagrams. Constitution of melts. Thermodynamics of interfaces and defects. Mr. Kikuchi (W)

**240B. Principles of Materials Science B (Structure of Materials).** Prerequisite: course 120 or equivalent. Atomic, electronic, and crystalline structure of materials; particles and waves, free electron model, binding in solids; crystal structure, real and reciprocal lattices; amorphous solids, kinematical theory of scattering, electrons in a periodic potential, pseudopotentials, conduction of electrons in solids. Mr. Dunn (F)

**241. Oxidation of Metals.** Prerequisite: course 130 or equivalent or consent of instructor. Kinetics and mechanism of gas-solid reactions. Absorption and phase-boundary reactions. Nucleation of reaction products, defect structure of oxides, crystal structure and morphology of oxide films, factors influencing adherence of surface films. Mr. Douglass (W)

**242A. Plasticity Theory Applied to Metalworking I.** Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 156B. Fundamental concepts describing mechanics of plastic deformation of homogeneous solids. Yield criteria. Methods of solution, including slip line field, of problems involving plastic deformation, with examples involving plane strain and axisymmetric deformation. Extrusion problem. Application of methods of solution. Mr. Shabaik (F, odd years)

**242B. Material Removal Processes.** Prerequisite: course 147B. Classification of material removal processes; single-point, multipoint, and abrasive material removal operations; mechanics of orthogonal and oblique machining; stress, strain, strain rate, and temperature analyses; tool wear, tool life, and tool materials; optimization; automation; and NC machining. Mr. Shabaik (F, even years)

**243A. Fracture of Structural Materials.** Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 156B or equivalent. Engineering and scientific aspects of crack nucleation, slow crack growth, and unstable fracture. Fracture mechanics, dislocation models, fatigue, fracture in reactive environments, alloy development, fracture-safe design. Mr. Ono (W, even years)

**243B. Design for Fatigue Reliability.** Prerequisites: one or more courses from 143A, Mechanical, Aerospace, and Nuclear Engineering 156A, and 156B, or equivalent. Prediction of fatigue life of machines, structures, and vehicles with statistical confidence. Design concepts and fabrication, techniques to prevent premature failure. Low-cycle, long-life, and crack growth. Effects of environment, residual stress, over-stressing, and surface treatments. Air Force specifications. Mr. Sines (F, even years)

**243C. Dislocations and Strengthening Mechanisms in Solids.** Prerequisite: course 143A or Mechanical, Aerospace, and Nuclear Engineering 156B. Elastic and plastic behavior of crystals, geometry, mechanics, and interaction of dislocations, mechanisms of yielding, work hardening, and other strengthening. Mr. Ardell (F, odd years)

**244. Electron Microscopy.** Prerequisite: course 111 or equivalent. Essential features of electron microscopy, geometry of electron diffraction, kinematical and dynamical theories of electron diffraction, including anomalous absorption, applications of theory to defects in crystals. Moiré fringes, direct lattice resolutions, Lorentz microscopy, laboratory applications of contrast theory. Mr. Ardell (Sp, even years)

**245C. Diffraction Methods in Science of Materials.** Prerequisite: course 110 or equivalent. Theory of diffraction of waves (X rays, electrons, and neutrons) in crystalline and noncrystalline materials. Long- and short-range order in crystals, structural effects of plastic deformation, solid-state transformations, arrangements of atoms in liquids and amorphous solids. Mr. Goorsky (Sp, odd years)

**246A. Mechanical Properties of Nonmetallic Crystalline Solids.** Prerequisite: course 160. Material and environmental factors affecting mechanical properties of nonmetallic crystalline solids, including atomic bonding and structure, atomic-scale defects, microstructural features, residual stresses, temperature, stress state, strain rate, size, and surface conditions. Methods for evaluating mechanical properties. Mr. Dunn (W, odd years)

**246B. Structure and Properties of Glass.** Prerequisite: course 160. Structure of amorphous solids and glasses. Conditions of glass formation and theories of glass structure. Mechanical, electrical, and optical properties of glass and relationship to structure. Mr. Dunn (W, even years)

**246D. Electronic and Optical Properties of Ceramics.** Prerequisite: course 160. Principles governing electronic properties of ceramic single crystals and glasses and effects of processing and microstructure on these properties. Electronic conduction, ferroelectricity, and photochromism. Magnetic ceramics. Infrared, visible, and ultraviolet transmission. Unique application of ceramics. Mr. Dunn (Sp, even years)

**247A. Solid-State Reactions.** Prerequisite: course 131. Phenomenology and atomistic mechanisms of solid-state diffusion. Nucleation theory. Theory of diffusional growth processes, kinetics of diffusional transformations in solids. Precipitation in solids. Spinodal decomposition. Mr. Ardell (Sp, odd years)

**248A. Experimental Methods in Materials Synthesis.** Prerequisite: bachelor's degree in chemistry, physics, or engineering. Techniques used in materials synthesis temperature measurement, vacuum techniques, methods of heating and quenching, consolidation and refining of metals, crystal growth, thin film deposition and thick film deposition. Laboratory experiments and demonstrations. Mr. Bunshah (F)

**249AA-249AZ. Seminars: Materials Science and Engineering (2 units each).** Lectures on current research topics in materials science and engineering. May be repeated for credit. S/U grading. (F,W,Sp)

**250A. Analysis and Design of Composite Materials.** Prerequisites: course 151 and one course from 143A, Electrical Engineering 175, Mechanical, Aerospace, and Nuclear Engineering 156A, or 156B. Mechanics of laminated composites, textile structural composites, strength and failure theory, fracture, fatigue and damage tolerance, environmental effects, microcomputer software for composite analysis and design. Mr. Yang (W, even years)

**250B. Advanced Composite Materials.** Prerequisites: course 151, B.S. in Materials Science and Engineering or equivalent. Fabrication methods, structure and properties of advanced composite materials. Fibers; resin-, metal-, and ceramic-matrix composites. Physical, mechanical, and nondestructive characterization techniques. Mr. Ono (W, odd years)

**298. Seminar: Engineering (2 to 4 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. (F,W,Sp)

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination (2 to 12 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

# Mechanical, Aerospace, and Nuclear Engineering

48-121 Engineering IV, (310) 825-2281

## Professors

Mohamed A. Abdou, Ph.D.  
George E. Apostolakis, Ph.D.  
Ivan Catton, Ph.D.  
Robert W. Conn, Ph.D.

## Electronic Materials Option

Course requirements are as follows (190 minimum units required):

- (1) Six core courses: Chemical Engineering M105A (or Mechanical, Aerospace, and Nuclear Engineering M105A), Electrical Engineering 10, 101, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, and Civil and Environmental Engineering 108 or Mechanical, Aerospace, and Nuclear Engineering 105D.
- (2) Materials Science and Engineering 110, 121, 122, 130, 131, 131L, 190; Electrical Engineering 121A, 121B, 122BL, 123A, 123B, and two courses from Materials Science and Engineering 132, 150, 160; Mechanical, Aerospace, and Nuclear Engineering 191A or 192A.
- (3) Four elective courses from Materials Science and Engineering 111, 143A, 162, Electrical Engineering 110, 124, 172; two laboratory courses from Materials Science and Engineering 161L, 191L, 199, Electrical Engineering 122AL, 172L.
- (4) Chemistry and Biochemistry 11A, 11B/11BL; Civil and Environmental Engineering 15A and 15B or Electrical Engineering 5C or Mechanical, Aerospace, and Nuclear Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.
- (5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

## Graduate Study

For information on graduate admission to the materials science and engineering program and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

## Lower Division Courses

- 14. Science of Engineering Materials.** Lecture, three hours; demonstration, one hour; recitation, one hour. Enforced requisites: Chemistry 11A, 11B/11BL, Physics 8A, 8B. Physics 8C may be taken concurrently. General introduction to different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between structure (crystals and microstructure) and properties of technological materials. Illustration of their fundamental differences and their applications in engineering.  
Mr. Dunn (F,W,Sp)
- 88. Freshman Seminar: New Materials.** Lecture, two hours; recitation, one hour; laboratory, one hour; outside study, nine hours. Preparation: high school chemistry and physics. Not open to students with credit for course 14. Engineering or chemistry/materials science majors expected to use course only as free elective. Introduction to basic concepts of materials science and new materials vital to advanced technology. Microstructural analysis and various material properties discussed in conjunction with such applications as biomedical sensors, pollution control, and microelectronics.  
Mr. Ono (F)

## Upper Division Courses

- 110. Introduction to Materials Characterization A (Crystal Structure and X-Ray Diffraction of Material).** Lecture, three hours; laboratory, two hours. Prerequisite: course 14. Modern methods of materials characterization; fundamentals of crystallography, properties of X rays, X-ray diffraction; powder method, Laue method; determination of crystal structures; phase diagram determination; X-ray stress measurements; X-ray spectroscopy; design of materials characterization procedures.  
Mr. Goorsky (F)
- 111. Introduction to Materials Characterization B (Electron Microscopy).** Lecture, three hours; laboratory, two hours. Prerequisites: courses 14, 110. Characterization of microstructure and microchemistry of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals, replicas; scanning electron microscopy: emissive and reflective modes; chemical analysis; electron optics of both instruments.  
Mr. Ardell (W)
- 120. Electronic Properties of Materials.** Prerequisites: courses 14, 110. Introduction to electrical, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schrödinger wave equation. Crystal bonding and lattice vibrations. Mechanisms and characterization of electrical conductivity, optical absorption, magnetic behavior, and dielectrical properties.  
Mr. Dunn (W)
- 121. Materials Science of Semiconductors.** Prerequisite: course 120. Structure and properties of elemental and compound semiconductors. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications.  
Mr. Dunn (Sp)
- 122. Principles of Electronic Materials Processing.** Prerequisite: course 14 or equivalent. Description of basic semiconductor materials for device processing; preparation and characterization of silicon, III-V compounds, and films. Discussion of principles of CVD, MOCVD, LPE, and MBE; metals and dielectrics.  
Mr. Goorsky (W)
- 130. Phase Relations in Solids.** Prerequisites: course 14, Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A. Summary of thermodynamic laws, equilibrium criteria, solution thermodynamics, mass-action law, binary and ternary phase diagrams, glass transitions.  
Mr. Goorsky (Sp)
- 131. Diffusion and Diffusion-Controlled Reactions.** Prerequisite: course 130. Diffusion in metals and ionic solids, nucleation and growth theory; precipitation from solid solution, eutectoid decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth.  
Mr. Tu (W)
- 131L. Diffusion and Diffusion-Controlled Reactions Laboratory (2 units).** Corequisite: course 131. Design of heat-treating cycles and performing experiments to study interdiffusion, growth of intermediate phases, recrystallization, and grain growth in metals. Analysis of data. Comparison of results with theory.  
Mr. Tu (W)
- 132. Structure and Properties of Metallic Alloys.** Prerequisite: course 131. Physical metallurgy of steels, lightweight alloys (Al and Ti), and superalloys. Strengthening mechanisms, microstructural control methods for strength and toughness improvement. Grain boundary segregation.  
Mr. Ono (Sp)
- 143A. Mechanical Behavior of Materials.** Prerequisite: course 14 or equivalent. Recommended: Civil Engineering 108. Plastic flow of metals under simple and combined loading, strain rate and temperature effects, dislocations, fracture, microstructural effects, mechanical and thermal treatment of steel for engineering applications.  
Mr. Ardell (W)

**143B. Failure Analysis of Metals.** Prerequisite: course 131. Analysis and prevention of failure based on design deficiencies, material selection, metallurgical defects, processing and fabrication errors, improper service conditions. Relationship to heat treatment, corrosion, joining technology, and mechanical behavior. Engineering and legal aspects. Case histories.  
Mr. Ono (Sp, even years)

**143L. Mechanical Testing Laboratory (2 units).** Laboratory, four hours. Prerequisite or corequisite: course 143A. Experimental techniques for measurements of mechanical properties of engineering materials. Elastic constants, tensile, compression and bend testing, fracture toughness, fatigue and creep testing.  
Mr. Ono (W,Sp)

**147B. Manufacturing Processes.** Prerequisite: course 14. Theoretical basis for cold forming and hot forming processes; rolling, extrusion, and forging. Conventional metal removal. Solidification processes and casting. Powder metallurgy.  
Mr. Shabaik (F)

**147L. Manufacturing Processes Laboratory.** Laboratory, eight hours. Prerequisite: course 147B. Experimental investigation, analysis, and design of metal forming processes (forging, extrusion, drawing, and rolling). Force measurements and energy calculations in metal cutting. Experimental investigation of hot and isostatic pressing of powder.  
Mr. Shabaik (Sp)

**150. Introduction to Polymers.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, springy polymers, elastomers, adhesives. Fiber forming polymers, polymer processing technology, plastication.  
Mr. Yang (W)

**151. Structure and Properties of Composite Materials.** Prerequisites: course 14, at least two courses from 132, 143A, 150, 160. Relationship between structure and mechanical properties of composite materials with fiber and particulate reinforcement. Properties of fiber, matrix, and interfaces. Selection of macrostructures and material systems.  
Mr. Ono (Sp)

**160. Introduction to Ceramics and Glasses.** Prerequisite: course 14 or equivalent. Introduction to ceramics and glasses being used as important materials of engineering, processing techniques, and unique properties. Examples of design and control of properties for certain specific applications in engineering.  
Mr. Dunn (F)

**161. Processing of Ceramics and Glasses.** Lecture, four hours; discussion, one hour. Prerequisite: course 160. Study of processes used in fabrication of ceramics and glasses for structural applications, optics, and electronics. Processing operations, including modern techniques of powder synthesis, greenware forming, sintering, glass melting. Microstructure properties relations in ceramics. Fracture analysis and design with ceramics.  
Mr. Dunn (W, even years)

**161L. Laboratory in Ceramics (2 units).** Laboratory, four hours. Prerequisite: course 160 or equivalent. Recommended corequisite: course 161. Processing of common ceramics and glasses. Attainment of specific properties through process control for engineering applications. Quantitative characterization and selection of raw materials. Slip casting and extrusion of clay bodies. Sintering of powders. Glass melting and fabrication. Determination of chemical and physical properties.  
Mr. Dunn (Sp)

**162. Electronic Ceramics.** Prerequisites: course 14, Electrical Engineering 100, or equivalent. Utilization of ceramics in microelectronics; thick film and thin film resistors, capacitors, and substrates; design and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optic devices; optical wave guide applications and designs.  
Mr. Dunn (W, odd years)

Vijay K. Dhir, Ph.D., *Chair*  
 Peretz P. Friedmann, Sc.D.  
 Nasr M. Ghoniem, Ph.D.  
 James S. Gibson, Ph.D.  
 H. Thomas Hahn, Ph.D. (*Hughes Aircraft Company*  
*Professor of Manufacturing Engineering*)  
 Chih-Ming Ho, Ph.D.  
 Ann R. Karagozian, Ph.D.  
 William E. Kastenberg, Ph.D.  
 Robert E. Kelly, Sc.D., *Vice Chair*  
 J. John Kim, Ph.D.  
 Ajit K. Mal, Ph.D.  
 William C. Meecham, Ph.D.  
 Anthony F. Mills, Ph.D.  
 D. Lewis Mingori, Ph.D.  
 Peter A. Monkewitz, Ph.D.  
 Gerald C. Pomraning, Ph.D.  
 Jason Speyer, Ph.D.  
 Daniel C.H. Yang, Ph.D.

#### Professors Emeriti

Harry Buchberg, M.S.  
 Andrew F. Charwat, Ph.D.  
 Kurt Forster, Ph.D.  
 Walter C. Hurty, M.S.  
 Cornelius T. Leondes, Ph.D.  
 Michel A. Melkanoff, Ph.D.  
 Philip F. O'Brien, M.S.  
 David Okrent, Ph.D.  
 Russell R. O'Neill, Ph.D., *Dean Emeritus*  
 Lucien A. Schmit, Jr., M.S.  
 Chauncey Starr, Ph.D., *Dean Emeritus*  
 Richard Stern, Ph.D.  
 William T. Thomson, Ph.D.  
 Russell A. Westmann, Ph.D.

#### Associate Professors

Oddvar O. Bendiksen, Ph.D., *Vice Chair*  
 Adrienne G. Lavine, Ph.D.

#### Assistant Professors

Gregory Carman, Ph.D.  
 Chang J. Kim, Ph.D.  
 Denny K. Miu, Ph.D.  
 Abdon E. Sepulveda, Ph.D.  
 Zvi Shiller, Ph.D.  
 Xiaolin Zhong, Ph.D.

#### Senior Lecturers

C.H. Chang, M.S.  
 Alexander Samson, Ph.D., *Emeritus*

#### Adjunct Professors

Yoseph Bar-Cohen, Ph.D.  
 Frank E. Marble, Ph.D.  
 Rudolph X. Meyer, Ph.D.

#### Adjunct Associate Professor

Sukumar Chakravarthy, Ph.D.

## Scope and Objectives

The Mechanical, Aerospace, and Nuclear Engineering Department encompasses professional disciplines that are often divided into separate departments at other engineering schools. Curricula in aerospace engineering and mechanical engineering are offered on the undergraduate and graduate levels, while nuclear engineering is a graduate program. The Gorman Report ranked UCLA's mechanical engineering program tenth in the nation for undergraduate programs.

Because of the scope of the department, faculty research and teaching cover a wide range of technical disciplines. Research in thermal engineering emphasizes basic heat and mass transfer processes as well as thermal hydro-

lics. Topics in the area of design, dynamics, and control include robotics, mechanism design, control and guidance of aircraft and spacecraft, helicopter dynamics and aeromechanics, and dynamics and control of large space structures. Studies in structural mechanics range from fracture mechanics and wave propagation, structural dynamics and aeroelasticity of helicopters and jet engine blades, computational transonic aeroelasticity to structural optimization and synthesis, and mechanics of composite structures. In the area of fluid mechanics and acoustics, investigations are under way on combustion, flow instabilities, turbulence and thermal convection, aeroacoustics, and unsteady aerodynamics of turbomachines, helicopter rotors, and fixed-wing aircraft. Other areas of research include applied plasma physics, surface modification by plasma, fusion reactor design, experimental tokamak confinement physics; light water reactor safety; reliability and risk assessment methodology; societal risk management; and nuclear materials. The department also has research activity in computer-aided design and manufacturing.

At the undergraduate level, the department offers accredited programs leading to Bachelor of Science degrees in Aerospace Engineering and in Mechanical Engineering. The former includes opportunity to emphasize propulsion, aerodynamics, preliminary design, dynamics and control, or structures and space technology, while the latter includes opportunity to emphasize mechanical systems — design and control; power systems and thermal design; manufacturing processes; or fluids engineering.

At the graduate level, the department offers programs leading to M.S. and Ph.D. degrees in Mechanical Engineering, Aerospace Engineering, and Nuclear Engineering. An M.S. in Manufacturing Engineering is also offered.

## Bachelor of Science in Aerospace Engineering

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeroelasticity, dynamics, control and guidance, propulsion, and energy conversion.

## The Major

Course requirements are as follows (190 minimum units required):

(1) Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 20, 102, 103, M105A, 105D, 157, 192A.

(2) Twelve aerospace engineering core courses: Electrical Engineering 102; Mechanical, Aerospace, and Nuclear Engineering 150A, 150B, 150P, 154A, 154B, 154S, 157A, 161A or 169A, 166A, 171A; one mathematics elective from Mechanical, Aerospace, and Nuclear Engineering 191A, 192B, 192C, 192D, Electrical Engineering 103, 131A.

(3) Sixteen technical elective units (which should contain enough design units to satisfy the overall program requirement of at least 24 design units) selected from Mechanical, Aerospace, and Nuclear Engineering 131A/131AL, 132A, 133A (thermodynamics, heat, and mass transfer); 153A (acoustics); 155, 163A, 164, 169A\*, Civil and Environmental Engineering 137L, Electrical Engineering 142 (dynamics and control); Mechanical, Aerospace, and Nuclear Engineering 161A\*, 161B, 161C, 161D (space technology); 156B, 166C, 168, Civil and Environmental Engineering 130F (structural and solid mechanics); Mechanical, Aerospace, and Nuclear Engineering 162A, 162C, M192F (design and mechanisms); Materials Science and Engineering 143A, 143L, 147B.

(4) Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

## Bachelor of Science in Mechanical Engineering

The ABET-accredited mechanical engineering program is designed to provide a basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers, with an option in mechanical systems — design and control; power systems and thermal design; manufacturing processes; or fluids engineering.

## The Major

Course requirements are as follows (192 minimum units required):

(1) Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100 (also 110L — see item 2 below), Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 20, 102, 103, M105A, 105D, 157, 192A.

(2) Ten mechanical engineering core courses: Electrical Engineering 110L (may be taken concurrently with 100), Materials Science and Engineering 147B, Mechanical, Aerospace, and Nuclear Engineering 131A, 133A, 156A, 162A, 162B, 162M, 169A, 171A.

(3) Twenty technical elective units, of which at least four should be laboratory units, to be selected from one of the subject areas listed below; no more than eight units may be taken from any one of subgroups a, b, c:

*Fluids Engineering —*

(a) Mechanical, Aerospace, and Nuclear Engineering 157A.

(b) Electrical Engineering 103, Mechanical, Aerospace, and Nuclear Engineering 150A, 150B, 153A, 192B, 192C.

(c) Mechanical, Aerospace, and Nuclear Engineering 136, 150P, 151, 161A, 161B.

*Manufacturing Processes —*

(a) Materials Science and Engineering 143L, 161L, Mechanical, Aerospace, and Nuclear Engineering 163B, 163C, 194, 195.

(b) Materials Science and Engineering 143A, Mechanical, Aerospace, and Nuclear Engineering 163A, 164.

(c) Civil and Environmental Engineering 175, Mechanical, Aerospace, and Nuclear Engineering 155, 174, 194.

*Mechanical Systems — Design and Control —*

(a) Civil and Environmental Engineering 130F, 137L, Materials Science and Engineering 143L, Mechanical, Aerospace, and Nuclear Engineering 162C, 163B, 163C, 194.

(b) Electrical Engineering 103, 131A, 131B, Mathematics 115A, 115B, 131A, 131B, Mechanical, Aerospace, and Nuclear Engineering 155, 156B, 164, 174, 191A.

(c) Materials Science and Engineering 143A, Mechanical, Aerospace, and Nuclear Engineering 163A, 168.

*Power Systems and Thermal Design —*

(a) Mechanical, Aerospace, and Nuclear Engineering 131AL.

(b) Electrical Engineering 103, Mechanical, Aerospace, and Nuclear Engineering 132A, 135, 150A, 192B, 192C.

(c) Mechanical, Aerospace, and Nuclear Engineering 134B, 136, 150P, 151, 161B, 174.

(4) Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Mechanical, Aerospace, and Nuclear Engineering 94; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements — see "Curricular Requirements" (item 4) earlier in this chapter for details.

(6) Four free technical elective units selected from upper division courses offered by the department; you are strongly encouraged to consult your adviser.

## Graduate Study

For information on graduate admission to the mechanical, aerospace, and nuclear engineering programs and requirements for the M.S. and Ph.D. degrees, see "Graduate Study" at the beginning of this chapter.

## Lower Division Courses

**1. Energy: Resources, Conversion, Utilization, and the Environment.** Lecture, three hours; laboratory, one hour; outside study, eight hours. Intended for students interested in energy. Topics include resources, conversion and utilization using fossil and nuclear fuels, solar, geothermal, and biomass. Conservation, sociopolitical aspects, and the environment. Mr. Kastenber (Sp)

**2. Toxic Waste Control.** Lecture, three hours; discussion, one hour. Intended for students interested in toxic wastes. Topics include sources of toxic substances, effects on public health and environment, technological solutions, public policy, and risk assessment. Mr. Kastenber (W)

**20. FORTRAN Programming with Numerical Methods Applications.** Lecture, three hours; laboratory, two hours; outside study, seven hours. Enforced requisites: Mathematics 31A, 31B. Introduction to programming with FORTRAN. Applications to numerical methods used in engineering. Ms. Lavine (F,W,Sp)

**94. Introduction to Computer-Aided Design and Drafting.** Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems. Students use one or more on-line computer systems to design and display various objects. Mr. Yang (F,W)

## Upper Division Courses

**102. Mechanics of Particles and Rigid Bodies.** Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 33A, Physics 8A. Newtonian mechanics (statics and dynamics) of particles and rigid bodies. Fundamental concepts of mechanics. Statics, kinematics, and kinetics of particles and rigid bodies. Impulse/momentum and work/energy relationships. Applications. Mr. Mingori (F,W,Sp)

**103. Elementary Fluid Mechanics.** Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 32B, 33A, Physics 8B. Introductory course dealing with application of principles of mechanics to flow of compressible and incompressible fluids. Mr. Kelly (F,W,Sp)

**M105A. Introduction to Engineering Thermodynamics.** (Same as Chemical Engineering M105A.) Lecture, four hours; recitation, one hour. Prerequisites: Mathematics 32B, Physics 8B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Mr. Dhir (F,W,Sp)

**105D. Transport Phenomena.** Lecture, four hours; recitation, one hour. Prerequisites: Mathematics 32B, 33A, Physics 8B. Transport phenomena; heat conduction, mass species diffusion, convective heat and mass transfer, and radiation. Engineering applications in thermal and environmental control. Ms. Lavine (F,W,Sp)

**131A. Intermediate Heat Transfer.** Lecture, four hours; other, eight hours. Prerequisite: course 105D. Steady conduction: two-sided, two-ended, tapered, and circular fins; buried cylinders, thick fins. Transient conduction: slabs, cylinders, products. Convection: transpiration, laminar pipe flow, film condensation, boundary layers, dimensional analysis, working correlations. Surface radiation. Two-stream heat exchangers. Elements of thermal design. Mr. Catton (F,Sp)

**131AL. Thermodynamics and Heat Transfer Laboratory.** Laboratory, eight hours; other, four hours. Prerequisites: courses 131A, 157. Experimental study of physical phenomenon and engineering systems using modern data acquisition and processing techniques. Experiments include studies of heat transfer phenomena and testing of a cooling tower, heat exchanger, and internal combustion engine. Students take and analyze data and discuss physical phenomena. Mr. Mills (Sp)

**132A. Mass Transfer.** Lecture, four hours; other, eight hours. Prerequisites: courses 105D, 131A. Principles of mass transfer by diffusion. Mass transfer by convection in laminar and turbulent flows. Simultaneous heat and mass transfer. Applications including combustion of solids and volatile fuels, evaporation and condensation, ablation and transpiration cooling, gas absorption and catalysis. Mr. Mills (W)

**133A. Engineering Thermodynamics.** Lecture, four hours; other, eight hours. Prerequisites: courses 103, M105A, 105D. Applications of thermodynamic principles to engineering processes. Energy conversion systems. Rankine cycle and other cycles, refrigeration, psychrometry, reactive and nonreactive fluid flow systems. Mr. Dhir (F,Sp)

**134B. Solar Energy Use and Control.** Lecture, four hours; other, eight hours. Prerequisite: course 105D or equivalent or consent of instructor. Nature and availability of solar radiation; review of selected heat transfer topics pertinent to solar energy collection and use; design analysis of nonfocusing solar energy collector-converters and methods of energy storage; selected applications. Mr. Mills

**135. Fundamentals of Nuclear Power.** Prerequisite: junior standing. Introduction to nuclear engineering; nuclear physics, neutron cross sections, nuclear fission and fusion; elementary analysis and design of reactors. Criticality, one-group neutron diffusion theory, heat removal, and heterogeneous effects. Mr. Kastenber (F)

**136. Thermal Hydraulic Design of Nuclear and Other Power Systems.** Prerequisite: senior standing. Thermal hydraulic design of nuclear and other power systems, power generation and heat removal, power cycle, thermal hydraulic component design, overall plant design, steady state and transient operation. Mr. Dhir (W)

**137. Introduction to Fusion Engineering and Reactor Design.** Prerequisite: course 135 or consent of instructor. Fusion reactions, fuel cycle, and operating conditions. Magnetic and inertial confinement, including tokamaks, magnetic mirrors, laser fusion, and selected others. Concepts for and subsystems of fusion reactors. Design of reactors and key subsystems. Application of fusion reactors for electricity, fissionable fuel, and/or chemical fuel production. Mr. Conn

**150A. Intermediate Fluid Mechanics.** Prerequisite: course 103 or equivalent or consent of instructor. Basic equations governing fluid motion. Fundamental solutions of Navier/Stokes equations. Lubrication theory. Elementary potential flow theory. Boundary layers. Turbulent flow in pipes and boundary layers. Compressible flow: normal shocks, channel flow with friction or heat addition. Mr. Kelly (F,W)

**150B. Aerodynamics.** Prerequisites: courses 103, 150A, or equivalent. Advanced aspects of potential flow theory. Incompressible flow around thin airfoils ( $C_p$ ,  $C_m$ ) and wings (lift, induced drag). Gas dynamics: oblique shocks, Prandtl/Meyer expansion. Linearized subsonic and supersonic flow around thin airfoils and wings. Wave drag. Transonic flow. Mr. Kelly (Sp)

\*Unless taken as part of the core.

**150P. Jet Propulsion Systems.** Lecture, four hours; laboratory, two hours. Prerequisites: courses M105A, 150A, or equivalent. Thermodynamic properties of gases, aircraft jet engine components and cycle analysis, combustion systems, performance of rocket vehicles. Ms. Karagozian (F)

**151. Performance of Vehicles.** Lecture, four hours; other, eight hours. Prerequisites: courses 103, M105A. Transportation systems and their characteristics in terms of speed, range, payload, efficiency, etc. Engines: power available. Vehicles, including automobiles, trains, aircraft, and boats: power required. Engine-vehicle mission matching. Mr. Kelly

**153A. Engineering Acoustics.** Prerequisite: upper division standing in engineering or consent of instructor. Fundamental course in acoustics; propagation of sound; sources of sound. Design of field measurements. Estimation of jet and blade noise with design aspects. Mr. Meecham (W)

**154A. Preliminary Design of Aircraft.** Prerequisite: course 154S. Classical preliminary design of an aircraft, including weight estimation, performance and stability, and control consideration. Term assignment consists of preliminary design of a low-speed aircraft. Mr. Bendiksen, Mr. Friedmann (W)

**154B. Design of Aerospace Structures.** Prerequisites: courses 154A, 166A. Design of aircraft, helicopter, spacecraft, and related structures. External loads, internal stresses. Applied theory of thin-walled structures. Material selection, design using composite materials. Design for fatigue prevention and structural optimization. Field trips to aerospace companies. Mr. Bendiksen, Mr. Friedmann (Sp)

**154S. Flight Mechanics, Stability, and Control of Aircraft.** Prerequisites: courses 150A, 150B. Aircraft performance, flight mechanics, stability, and control; some basic ingredients needed for design of an aircraft. Effects of airplane flexibility on stability derivatives. Mr. Friedmann (F)

**155. Intermediate Dynamics.** Lecture, four hours; other, eight hours. Prerequisite: course 102 or equivalent. Axioms of Newtonian mechanics, generalized coordinates, Lagrange equation, variational principles; central force motion; kinematics and dynamics of a rigid body. Euler equations, motion of rotating bodies, oscillatory motion, normal coordinates, orthonormality relations. Mr. Gibson (Sp)

**156A. Strength of Materials.** Lecture, four hours; outside study, eight hours. Prerequisite: Civil Engineering 108 or equivalent. Concepts of stress and material behavior. Stresses in loaded beams with symmetric and asymmetric cross sections. Torsion of cylinders and thin-walled structures, shear flow. Stresses in pressure vessels, press-fit and shrink-fit problems, rotating shafts. Curved beams. Contact stresses. Strength and failure, plastic deformation, fatigue, elastic instability. Mr. Mal (F,Sp)

**156B. Introduction to Elasticity.** (Formerly numbered 158A.) Lecture, four hours; outside study, eight hours. Prerequisite: course 156A or equivalent. Kinematics of deformation, strain displacement relations. Balance laws, stress tensor, principal stresses, equilibrium equations. Conservation of energy, strain energy function. Generalized Hooke's law, thermoelasticity and viscoelasticity. Stress calculation in cylinders and spheres. Plane elasticity, Airy stress function. Stress concentration problems at holes, corners, and crack tips. Mr. Mal

**157. Basic Mechanical Engineering Laboratory.** Laboratory, eight hours; other, four hours. Prerequisites: courses 103, M105A, 105D, Civil Engineering 108. Methods of measurement of basic quantities and performance of basic experiments in heat transfer, fluid mechanics, structures, and thermodynamics. Primary sensors, transducers, recording equipment, signal processing, and data analysis. Mr. Mills (F,W,Sp)

**157A. Fluid Mechanics/Aerodynamics Laboratory.** Laboratory, eight hours. Prerequisites: courses 103, 150A, 150B, and 157, or consent of instructor. Experimental illustration of important physical phenomena in area of fluid mechanics/aerodynamics, as well as hands-on experience with design of experimental programs and use of modern experimental tools and techniques in the field. Mr. Monkewitz (Sp)

**161A. Introduction to Astronautics.** Prerequisite: course 102. Space-environment of Earth, trajectories and orbits, step rockets and staging, two-body problem, orbital transfer and rendezvous, problem of three-bodies, elementary perturbation theory, influence of Earth's oblateness. Mr. Gibson (F)

**161B. Introduction to Space Technology.** Lecture, four hours; other, eight hours. Recommended (but not prerequisite): courses 102, 105D, 150P, 161A. Propulsion requirements for typical space missions, thermochemistry of propellants, internal ballistics, regenerative cooling, liquid propellant feed systems, POGO instability. Electric propulsion. Multistage rockets, separation dynamics. Satellite structures and materials, loads and vibrations. Thermal control of spacecraft. Mr. Mingori (W)

**161C. Spacecraft Design.** Lecture, four hours; other, eight hours. Prerequisite: course 161B. Coverage of preliminary design, by students, of a small spacecraft carrying a lightweight scientific payload with modest requirements for electric power, lifetime, and attitude stability. Students work in groups of three or four, with each student responsible primarily for a subsystem and for integration with the whole. Mr. Bendiksen, Mr. Meyer (Sp)

**161D. Space Technology Hardware Design (2 units).** Lecture, one hour; laboratory, two hours; outside study, three hours. Prerequisite or corequisite: course 161B. Design, by students, of hardware with applications to space technology. Best designs are then built by professional machine shop and tested by the students. May be taken in Winter or Spring Quarter, or twice with different projects in each term. Mr. Meyer (W,Sp)

**162A. Introduction to Mechanisms and Mechanical Systems.** Lecture, four hours; other, eight hours. Prerequisite: course 102. Analysis and synthesis of mechanisms and mechanical systems. Kinematics, dynamics, and mechanical advantages of machinery. Displacement, velocity, and acceleration analyses of linkages. Fundamental law of gearing and various gear trains. Computer-aided mechanism design and analysis. Mr. Yang (F,Sp)

**162B. Mechanical Product Design.** Lecture, three hours; discussion, one hour; laboratory, two hours; outside study, six hours. Prerequisites: courses 156A, 162A. Lecture and laboratory (design) course involving modern design theory and methodology for development of mechanical products. Economics, marketing, manufacturability, quality, and patentability. Design considerations taught and applied to hands-on design project. Mr. Yang (F,W)

**162C. Electromechanical System Design Laboratory.** Lecture, one hour; laboratory, eight hours; other, three hours. Prerequisite: course 162B. Laboratory and design course consisting of design, development, construction, and testing of complex mechanical and electromechanical systems. The assembled machine is instrumented and monitored for operational characteristics. Mr. Yang (Sp)

**162M. Senior Mechanical Engineering Design.** Lecture, one hour; laboratory, six hours; other, five hours. Prerequisites: course 162B, Civil Engineering 106A. Must be taken in last two academic terms of students' programs. Analytical design course of a large engineering system culminating in its computer simulation. Design factors include efficiency, economy, safety, reliability, and social impact. Final report of engineering specifications and drawings to be presented by design teams. Mr. Yang (W,Sp)

**163A. Introduction to Computer-Controlled Machines.** Prerequisite: course 171A (may be taken concurrently). Modeling of computer-controlled machines, including electrical and electronic elements, mechanical elements, actuators, sensors, and overall electromechanical systems. Motion and command generation, servo-controller design, and computer/machine interfacing. Mr. Yang (F)

**163B. Interfacing of Computer-Controlled Machines.** Laboratory, eight hours. Prerequisite: course 171A. Recommended: courses 162B, 163A, 163C. Hands-on experience with computer-controlled electromechanical systems, with special emphasis on real-time programming and interfacing techniques of microprocessors and their integration with sensors and actuators. Final design project required. Mr. Miu

**163C. Robotics and Motion Control Laboratory.** Laboratory, eight hours; outside study, four hours. Prerequisite: course 171A or consent of instructor. Hands-on experience with robotic devices and articulated machines, with emphasis on motion planning and control. Design and implementation of servo control of DC motors, gear trains, multi-axis coordination, programming of industrial robots. Final project required. Mr. Shiller (W)

**164. Digital Control of Physical Systems.** Prerequisite: course 171A or Electrical Engineering 141. Analysis and design of digital control systems. Discrete-time transfer functions for physical systems. Design using classical methods: performance specifications, frequency response, root locus; compensation. Design using state-space methods: control laws, estimators. Practical considerations: roundoff, sample rate selection, computer implementation. Mr. Mingori (Sp)

**166A. Analysis of Flight Structures.** Prerequisite: Civil Engineering 108. Introduction to two-dimensional elasticity, stress-strain laws, yield and fatigue; bending of beams; torsion of beams; warping; torsion of thin-walled cross sections: shear flow, shear-lag; combined bending torsion of thin-walled, stiffened structures used in aerospace vehicles; elements of plate theory; buckling of columns. Mr. Friedmann (F)

**166C. Design of Composite Structures.** Prerequisite: course 156A or 166A. History of composites, stress-strain relations for composite materials, bending and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, nonsymmetric laminates, micromechanics of composites. Mr. Friedmann (W)

**168. Introduction to Finite Element Technology.** Lecture, four hours; laboratory, four hours; other, four hours. Prerequisites: Civil Engineering 108, Computer Science 94 or 194, 166A. Introduction to finite element method (FEM) and its matrix formulation; computer implementation of FEM concepts; practical use of FEM codes. Preprocessing and postprocessing techniques; graphics display capabilities; geometric and analysis modeling; interactive engineering systems; links with computer-aided design. Recent trends in FEM technology; design optimization. Term projects using FEM computer codes. Mr. Yang (Sp)

**169A. Introduction to Mechanical Vibrations.** (Formerly numbered M169A.) Lecture, four hours; other, eight hours. Prerequisites: course 102, Civil Engineering 108. Fundamentals of vibration theory and applications. Free, forced, and transient vibration of one and two degrees of freedom systems, including damping. Normal modes, coupling, and normal coordinates. Vibration isolation devices, vibrations of continuous systems. Mr. Bendiksen (F,W)

**171A. Introduction to Feedback and Control Systems: Dynamic Systems Control I.** Prerequisite: course 191A or 192A or Electrical Engineering 102 or equivalent. Introduction to feedback principles, control systems design, and system stability. Modeling of physical systems in engineering and other fields; transform methods; controller design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design. Mr. Mingori (F,W)

**171C. Dynamic Systems Control II.** Recommended (but not prerequisite): course 171A or Electrical Engineering 141. State-space models of continuous and discrete-time dynamic systems. Linear algebra of systems; vector spaces; geometric concepts; transformations and matrices; canonical forms. Stability. Controllability and observability. State representation of nonlinear systems; linearization. Emphasis on modeling concepts, applications, and computer-aided problem solving. Mr. Speyer

**174. Probability and Its Applications to Risk, Reliability, and Quality Control.** Lecture, four hours; outside study, eight hours. Introduction to probability theory; random variables, distributions, functions of random variables, models of failure of components, reliability, redundancy, complex systems, stress-strength models, fault tree analysis, statistical quality control by variables and by attributes, acceptance sampling. Mr. Apostolakis (F)

**175. Applications of Probabilistic Risk Analysis.** Prerequisite: consent of instructor. Applications of probabilistic models for failure of components, subsystems, and systems. Derivation and application of models for source terms, dispersion, dose-response relationships, and cost/benefit relationships. Emphasis on several case studies (e.g., hazardous waste control, energy systems, and high-level radioactive waste). Mr. Kastenber

**180A. Environmental Biotechnology.** Prerequisite: consent of instructor. Physical, physiological, and psychological aspects of interaction between man and thermal, atmospheric, radiant, and mechanical agents and energies in the environment. Biological and physical requirements for engineering control of the environment; applications to complex systems. Mr. Meecham

**191A. Laplace Transforms and Applied Complex Variables.** Lecture, four hours; discussion, two hours. Prerequisites: Mathematics 32A, 32B, 33A, 33B. Introduction to Laplace transformation: application to electrical and mechanical problems, convolution-type integral equations, difference equations, and simple boundary value problems in partial differential equations. Complex variable theory, contour integrals, residues; application to transform inversion and partial differential equations. Mr. Ghoniem (W)

**192A. Mathematics of Engineering.** (Formerly numbered M192A.) Prerequisites: Mathematics 33A, 33B. Methods of solving ordinary differential equations in engineering. Review of matrix algebra. Solutions of systems of first- and second-order ordinary differential equations. Introduction to Laplace transforms and their application to ordinary differential equations. Introduction to boundary value problems. Mr. Kastenber (F,W,Sp)

**192B. Mathematics of Engineering.** Prerequisite: course 192A or equivalent. Analytical methods for solving partial differential equations arising in engineering. Separation of variables, eigenvalue problems, Sturm-Liouville theory. Development and use of special functions. Representation by means of orthonormal functions; Galerkin method. Use of Green's function and transform methods. Mr. Kelly (Sp)

**192C. Numerical Methods for Engineering Applications.** Recommended (but not prerequisite): Electrical Engineering 103. Basic topics from numerical analysis having wide application in solution of practical engineering problems. Solution of linear and nonlinear systems. Algebraic eigenvalue problem. Least-square methods, numerical quadrature, and finite difference approximations. Numerical solution of initial and boundary value problems for ordinary and partial differential equations. Mr. Zhong (F)

**192D. Introduction to Random Processes.** (Formerly numbered 193A.) Lecture, four hours; outside study, eight hours. Recommended (but not prerequisite): course 174 or equivalent. Elements of probability, time series, probability density function (PDF), averages, characteristics function; joint PDF, correlation function, and energy density function; Gaussian distributions, white noise process; random walk, least-square linear smoothing. Mr. Meecham (W, alternate years)

**M192F. Numerical Optimization Methods for Engineering Design.** (Same as Civil Engineering M140.) Lecture, four hours; outside study, eight hours. Prerequisites: course 20 or Civil Engineering 15A and 15B, Mathematics 32A, 33A. Recommended: Mathematics 115A. Systematic presentation of numerical optimization methods for engineering design; one-dimensional minimization, unconstrained minimization, linearly constrained minimization, general nonlinear problems, approximation concepts, duality. Optimization problem statements. Advantages and limitations of numerical optimization. Applications. Mr. Felton, Mr. Friedmann (F)

**194. Introduction to CAD/CAM Systems: Design and Implementation.** (Formerly numbered 194A, 194B.) Laboratory, eight hours; outside study, four hours. Prerequisites: course 94 or consent of instructor, FORTRAN programming language. Hands-on experience with CAD/CAM systems design and implementation, with special emphasis on theory of parametric curves and surfaces for design and manufacturing and their computer interactive graphics implementation. Mr. Yang (Sp)

**195. Computer Numerical Control and Applications.** (Formerly numbered 195A.) Laboratory, eight hours; outside study, four hours. Prerequisite: upper division standing. Fundamentals of numerical control (NC) technology. Programming of computer numerical control (CNC) machines in NC codes and APT language and with CAD/CAM systems. NC postprocessors and distributed numerical control. Operation of CNC lathe and milling machines. Programming and machining of complex engineering parts. Mr. Chang (Sp)

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. (F,W,Sp)

## Graduate Courses

**201. Mechanical, Aerospace, and Nuclear Engineering Seminar (2 units).** Prerequisite: graduate standing in engineering. Lectures on current research topics in mechanics and structures. May be repeated for credit. S/U grading. Mr. Speyer

**202. Manufacturing Engineering Seminar (2 units).** Prerequisite: graduate standing in engineering. Lectures on current research and development in manufacturing engineering. S/U grading. Mr. Yang

**231A. Convective Heat Transfer Theory.** Prerequisite: course 131A. Conservation equations for flow of real fluids. Analysis of heat transfer in laminar and turbulent, incompressible and compressible flows. Internal and external flows; free convection. Variable wall temperature; effects of variable fluid properties. Analogies among convective transfer processes. Ms. Lavine (W)

**231B. Radiation Heat Transfer.** Prerequisite: course 131A. Radiant intensity and flux. Radiation properties of walls, gases, and particulates. Heat transfer by combined conduction, convection, and radiation in nonabsorbing and absorbing media. Applications to industrial, aerospace, energy conversion, and environmental problems. Mr. Pomraning (Sp)

**231C. Boiling and Condensation.** Prerequisites: courses 131A, 150A, or equivalent. Phenomenological theories of boiling. Hydrodynamic instability of liquid-vapor interfaces and their application to predict maximum and minimum heat fluxes. Forced flow boiling and boiling crisis in pipes. Pool and forced flow boiling of liquid metals. Film and dropwise condensation. Mr. Dhir (W)

**231D. Application of Numerical Methods to Transport Phenomena.** Prerequisite: course 132A or consent of instructor. Numerical techniques for solving selected problems in heat and mass transfer. Applications include free convection, boundary layer flow, two-phase flow, separated flow, flow in porous media. Effects of concentration and temperature gradients, chemical reactions, radiation, electric and magnetic fields. Mr. Catton (Sp)

**231E. Two-Phase Flow Heat Transfer.** Prerequisites: courses 131A, 150A. Generalized constitutive equations for various two-phase flow regimes. Interfacial heat and mass transfer. Equilibrium and nonequilibrium flow models. Two-phase flow instability. One-dimensional wave propagation. Two-phase heat transfer applications: convective boiling, pressure drop, critical and oscillatory flows. Mr. Dhir (Sp)

**231F. Advanced Heat Transfer.** Prerequisite: course 231A. Advanced topics in heat transfer from current literature. Linear and nonlinear theories of thermal and hydrodynamic instability; variational methods in transport phenomena; phenomenological theories of turbulent heat and mass transfer. Mr. Catton (Sp)

**232B. Advanced Mass Transfer.** Prerequisites: courses 131A, 132A. Formulation of general convective heat and mass transfer problem, including equilibrium and nonequilibrium chemistry. Similar and nonsimilar solutions for laminar flows; solution procedures for turbulent flows. Multicomponent diffusion. Application to hypersonic boundary layer, ablation and transpiration, cooling combustion. Mr. Mills (W)

**233A. Advanced Power Production and Propulsion.** Prerequisite: course 133A or equivalent. Thermodynamic cycle analysis. Fluid mechanics and thermodynamics of compressors and turbines. Component matching. Atomization and vaporization. Flow and mixing in combustion chambers. Flame stabilization and combustion instabilities. Turbojet and ramjet engines and gas turbines. Rocket propulsion and stability of combustion processes. Mr. Dhir

**234A. Topics in Thermal Design.** Prerequisites: courses 131A, 132A. Consideration of thermal design problems selected from applications such as heat exchangers, heat shields, heat pipes, thermal environment control, spacecraft temperature control, and solar thermal conversion. Presentations made by the staff and occasionally by invited off-campus specialists. Mr. Mills

**235A. Nuclear Reactor Theory.** Prerequisites: courses 135, 192A. Underlying physics and mathematics of nuclear reactor (fission) core design. Diffusion theory, reactor kinetics, slowing down and thermalization, multigroup methods, introduction to transport theory. Mr. Pomraning

**235B. Kinetic Theory of Plasmas and Particle Transport.** Prerequisites: course 135 or 137 or Electrical Engineering M185, or consent of instructor. Unified kinetic theory treatment of plasma, neutron, and radiation transport phenomena. Liouville equation, Boltzmann collision integral and H-theorem. Derivation of Fokker-Planck, neutron, and radiation transport equations. Fluid moment equations, dispersion relations, space and time relaxation phenomena. Applications from neutron transport, plasma physics, and radiative transfer. Mr. Conn, Mr. Pomraning

**236A. Nuclear Materials Engineering.** Prerequisites: course 135 and Materials Science 143A, or consent of instructor. Materials requirements for nuclear technologies; radiation effects on mechanical properties, void swelling and creep, fuel and solid breeder swelling and restructuring, gas release, computer codes for swelling and gas release, structural analysis of fission and fusion materials including radiation effects. Mr. Ghoniem (F, alternate years)

**236B. Radiation Effects and Applications in Advanced Technologies.** Prerequisites: courses 135 and 192A, or consent of instructor. Fundamentals of radiation damage; atomic collision theory, energy loss of energetic ions, atom displacement, collision cascade. Bulk and surface effects of radiation; applications of radiation effects to fusion materials, microelectronic materials, and thin films; accelerator technologies. Mr. Ghoniem

**236C. Nuclear Reactor Safety.** Prerequisites: courses 135, 136, and 235A, or consent of instructor. Safety-related characteristics of thermal and fast nuclear power reactors; design criteria and siting considerations; methods of accident analysis; general risk considerations. Analysis of specific accidents; anticipated transients without scram, loss-of-coolant accidents, and reactivity transients. Mr. Kastenber (Sp, alternate years)

**236E. Advanced Problems in Reactor Design.** Prerequisites: at least four courses from 235A, 235B, 236A, 236B, 236C, 274, 275. Methods of attack and solution for advanced problems in reactor design, including fuel elements, power reactor cores, pulsed reactors, fuel cycle and fuel management, thermal hydraulics, shielding, and safety. Mr. Kastenber

**M237A. Principles of Magnetic Confinement Fusion.** (Same as Electrical Engineering M286.) Prerequisites: Electrical Engineering M185, and 285A and 285B or Physics 222A-222B, or consent of instructor. Plasma requirements for controlled fusion. Structure of magnetic fields. Theory of MHD equilibrium and stability. Shear and minimum-B stabilization. Resistive and microinstabilities. Neoclassical diffusion physics of tokamak and tandem-mirror plasmas. Neutral beams and auxiliary heating. Alternate concepts. Mr. Conn (F, odd years)

**M237B. Fusion Plasma Physics and Analysis.** (Same as Electrical Engineering M287.) Prerequisite: Electrical Engineering M185. Fundamentals of plasmas at thermonuclear burning conditions. Fokker-Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts. Mr. Conn (Sp)

**237C. Fusion Reactor Technology and Design.** (Formerly numbered M237C.) Prerequisites: courses 135, 137. Magnetic fusion reactor concepts and technological components, solid and liquid breeder blankets, neutronics, fuel cycles, in-vessel components, radiation shielding, magnets, system design and optimization. Mr. Abdou (W)

**239BA-239BZ. Seminars: Current Topics in Transport Phenomena (2 to 4 units each).** Prerequisite: consent of instructor. Lectures, discussions, student presentations, and projects in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

**239DA-239DZ. Seminars: Current Topics in Nuclear Engineering (2 to 4 units each).** Prerequisite: consent of instructor. Lectures, discussions, student presentations, and projects in areas of current interest in nuclear engineering. May be repeated for credit. S/U grading.

**239FA-239FZ. Special Topics in Transport Phenomena (2 to 4 units each).** Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced and current study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurement techniques. May be repeated for credit with topic change.

**239GA-239GZ. Special Topics in Nuclear Engineering (2 to 4 units each).** Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change.

**239HA-239HZ. Special Topics in Fusion Physics, Engineering, and Technology (2 to 4 units each).** Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced treatment of subjects selected from research areas in fusion science and engineering, such as instabilities in burning plasmas, alternate fusion confinement concepts, inertial confinement fusion, fission-fusion hybrid systems, and fusion reactor safety. May be repeated for credit with topic change.

**250A. Foundations of Fluid Dynamics.** Lecture, four hours; outside study, eight hours. Prerequisite: course 150A or consent of instructor. Development and application of fundamental principles of fluid mechanics at graduate level, with emphasis on incompressible flow. Flow kinematics, basic equations, constitutive relations, exact solutions on the Navier/Stokes equations, vorticity dynamics, decomposition of flow fields, potential flow. Mr. Kelly (F)

**250B. Viscous and Turbulent Flows.** Prerequisite: course 150A or consent of instructor. Fundamental principles of fluid dynamics applied to study of fluid resistance. States of fluid motion discussed in order of advancing Reynolds number; wakes, boundary layers, instability, transition, and turbulent shear flows. Mr. Meecham, Mr. Monkewitz (W)

**250C. Compressible Flows.** Prerequisites: courses 150A, 150B, or equivalent. Effects of compressibility in viscous and inviscid flows. Steady and unsteady inviscid subsonic and supersonic flows; method of characteristics; small disturbance theories (linearized and hypersonic); shock dynamics. Ms. Karagozian (Sp)

**250D. Computational Aerodynamics.** Lecture, eight hours. Prerequisites: courses 150A, 150B or equivalent, 192C. Introduction to useful methods for computation of aerodynamic flow fields. Coverage of potential, Euler, and Navier/Stokes equations for subsonic to hypersonic speeds. Mr. Zhong (W)

**251A. Stratified and Rotating Fluids.** Prerequisite: course 150A or equivalent or consent of instructor. Fundamentals of fluid flows with density variations or rotation, illustrated by examples with environmental, geophysical, or technical importance. Linear and finite amplitude wave motion. Flow past bodies; turbulent phenomena. Viscous effects. Instabilities. Turbulent shear flows, wakes, plumes, and gravity currents. Mr. Kelly (F, even years)

**251B. Marine Hydrodynamics.** Prerequisite: course 250A or equivalent or consent of instructor. Application of advanced aspects of potential flow theory to calculate forces and moments on bodies: added mass, force on two-dimensional hydrofoils, drag due to ship waves, response of a body to wave excitation. Mr. Kelly

**252A. Stability of Fluid Motion.** Prerequisite: course 150A or equivalent or consent of instructor. Mechanisms by which laminar flows can become unstable and lead to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence. Mr. Kelly (W, odd years)

**252B. Statistical Theory of Turbulence.** Prerequisite: course 150A or consent of instructor. Development of statistical methods of wide utility in engineering applied to turbulent flows. Topics include stochastic processes, kinematics of turbulence, energy decay. Kolmogorov similarity, analytical theories, and origins of Reynolds stress. Mr. Meecham (Sp)

**252C. Fluid Mechanics of Combustion Systems.** Prerequisites: courses 150A, 150B. Recommended: course 250C. Review of fluid mechanics and chemical thermodynamics applied to reactive systems, laminar diffusion flames, premixed laminar flames, stability, ignition, turbulent combustion, supersonic combustion. Ms. Karagozian (W)

**253A. Advanced Engineering Acoustics.** Advanced studies in engineering acoustics, including three-dimensional wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids. Mr. Meecham

**253B. Fundamentals of Aeroacoustics.** Prerequisite: course 150A or consent of instructor. Detailed discussion of plane waves, point sources. Nonlinearity, layered and moving media, multiple reflections. Inhomogeneous wave equation. Monopole, dipole, quadrupole source fields from scattering inhomogeneities and turbulence; Lighthill theory; moving sources. Similarity methods. Selected detailed applications. Mr. Meecham

**254A. Special Topics in Aerodynamics.** Prerequisites: courses 150A, 150B, 192A, 192B, and 192C, or equivalent, or consent of instructor. Special topics of current interest in advanced aerodynamics. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics. Mr. Zhong

**254B. Helicopter Engineering.** Prerequisites: course 150A, Civil Engineering 108. Recommended: courses 166A, 169A. Introduction to helicopter engineering covering basic areas of helicopter design, aerodynamics, performance, stability and control, fatigue, and elements of rotor dynamic analysis. Class problem covering preliminary design of a helicopter is central part of course. Mr. Friedmann

**255A. Advanced Dynamics.** Prerequisites: courses 155 and 169A, or consent of instructor. Variational principles and Lagrange equations. Kinematics and dynamics of rigid bodies; precession and nutation of spinning bodies. Mr. Mingori (F)

**255B. Mathematical Methods in Dynamics.** Prerequisite: course 255A. Concepts of stability; state-space interpretation; stability determination by simulation, linearization, and Liapunov direct method; the Hamiltonian as a Liapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear analysis; parametric excitation and nonlinear resonance. Application to mechanical systems. Mr. Gibson (W, odd years)

**256A. Mechanics of Deformable Solids.** Prerequisites: courses 156B and 166A, or consent of instructor. Kinematics of deformation, strain, tensors, invariance, compatibility; conservation laws; stress tensors; equations of motion; boundary conditions; constitutive equations: general theory, linearization, anisotropy; reciprocity linear isotropic elastic problems, plane and generalized plane problems; dynamic problems. Mr. Mai (F)

**M256B. Elasticity.** (Same as Civil Engineering M230.) Lecture, four hours; outside study, eight hours. Prerequisite: course 256A or consent of instructor. Equations of linear elasticity; uniqueness of solution; Betti-Rayleigh reciprocity; Saint-Venant's principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations. Mr. Dong, Mr. Mai (W)

**256C. Plasticity, Creep, and Thermal Stresses.** Prerequisite: course 156A or 156B or consent of instructor. Incremental plastic stress-strain relations. Stress-strain-time relations commonly used in structural analysis. Unified treatment of plastic strain, creep strain, and thermal strain. Elastic-plastic, and creep analyses of beams, columns, shafts, frames, and plates. Mr. Mai

**256F. Analytical Fracture Mechanics.** Prerequisites: course 156A, 156B, or 166A, and Materials Science 243A. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells. Mr. Mai (Sp)

**M257A. Elastodynamics.** (Same as Earth and Space Sciences M224A.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 256A and M256B, or consent of instructor. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, nondestructive evaluation (NDE), and mechanics of earthquakes. Mr. Mai

**M257B. Elastic Wave Propagation II.** (Same as Earth and Space Sciences M224B.) Prerequisite: course M257A. Diffraction and scattering of elastic waves by isolated cracks and inclusions; normal mode theories for vibration of finite elastic bodies; dynamic theories of fracture; representative applications in engineering and seismology. Mr. Mai

**258. Experimental Techniques in Fluid Mechanics and Thermal Science.** Prerequisite: consent of instructor. Survey of wind tunnels and other facilities for research in fluid mechanics, aerodynamics, and heat transfer; analysis of their critical design features. Modern sensors, instruments, and measurement techniques. Signal processing and storage by analog and digital methods.  
Mr. Monkewitz

**259A. Seminar: Advanced Topics in Fluid Mechanics.** Prerequisite: consent of instructor. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to term paper or oral presentation (possible help from guest lecturers).  
Mr. Kelly (Sp)

**259B. Seminar: Advanced Topics in Solid Mechanics.** Prerequisite: consent of instructor. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids.  
Mr. Mal

**260AA-260ZZ. Seminars: Current Topics in Mechanical Engineering (2 to 4 units each).** Prerequisite: consent of instructor. Lectures, discussions, and student presentations and projects in areas of current interest in mechanical engineering. May be repeated for credit. S/U or letter grading.

**261A. Energy and Variational Principles in Structural Mechanics.** Prerequisite: course 156A or 156B or 166A. Theory of linear elasticity. Calculus of variations. Principles of minimum potential energy and complementary energy. Stationary variational principles. Energy theorems. Matrix methods of structural analysis, with application to truss and frame problems. Variational principles as basis of finite element methods.  
Mr. Bendiksen (F)

**262. Mechanics of Intelligent Material Systems.** Lecture, four hours; outside study, eight hours. Prerequisite: course 156B or equivalent. Recommended: course 166C. Constitutive relations for electro-magneto-mechanical materials. Fiber-optic sensor technology. Micro/macro analysis, including classical lamination theory, shear lag theory, concentric cylinder analysis, hexagonal models, and homogenization techniques as they apply to active materials. Active systems design, inch-worm, and bimorph.  
Mr. Carman

**263A. Electromechanics of Computer-Controlled Machines.** Lecture, four hours; other, eight hours. Prerequisite: course 171A. Recommended: courses 163A, 163B, 163C. Mechanics and control problems of computer-controlled electromechanical systems, with special emphasis on analysis of energy flow between mechanical, electrical, and control components when applied to electromagnetic and piezoelectric actuators and control systems with mechanical flexibilities.  
Mr. Yang (W)

**263B. Topics in Modeling and Dynamics of Aerospace Vehicles.** Prerequisites: courses 171A, 255A. Recommended: courses 154A, 255B, M269A. Modeling, dynamics, and stability of aerospace vehicles; improvement of performance using active control; applications to spinning and dual-spin spacecraft, space structures, rotordynamics and coupled rotor/fuselage dynamics of helicopters, active control of aircraft modes.  
Mr. Friedmann, Mr. Mingori (Sp, even years)

**263C. Mechanics and Trajectory Planning of Industrial Robots.** Lecture, four hours; other, eight hours. Prerequisite: course 163A or consent of instructor. Theory and implementation of industrial robots. Design considerations. Kinematic structure modeling, trajectory planning, and system dynamics. Differential motion and static forces. Individual student study projects.  
Mr. Yang (W)

**263D. Advanced Robotics.** Lecture, four hours; outside study, eight hours. Recommended (but not prerequisite): courses 155, 163C, 171A, 263C. Motion planning and control of articulated dynamic systems: nonlinear joint control, experiments in joint control and multi-axes coordination, multibody dynamics, trajectory planning, motion optimization, dynamic performance and manipulator design, kinematic redundancies, motion planning of manipulators in space, obstacle avoidance.  
Mr. Shiller (Sp)

**M267A. Optimum Structural Design.** (Same as Civil Engineering M240.) Prerequisite: course 261A or Civil Engineering 235A or consent of instructor. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures.  
Mr. Felton, Mr. Friedmann (W)

**268B. Failure of Structural Systems.** Lecture, four hours; other, eight hours. Prerequisite: Civil Engineering 135B. Exploration of a current area of research in depth.  
Mr. Friedmann

**M269A. Dynamics of Structures.** (Same as Civil Engineering M237A.) Prerequisite: course 169A. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation.  
Mr. Bendiksen, Mr. Friedmann (W)

**269B. Advanced Dynamics of Structures.** Prerequisite: course M269A. Analysis of linear and nonlinear response of structures to dynamic loadings. Stresses and deflections in structures. Structural damping and self-induced vibrations.  
Mr. Friedmann (Sp)

**M269C. Introduction to Probabilistic Dynamics.** (Same as Civil Engineering M237C.) Prerequisite: course 169A. Response of structural and mechanical systems to random vibrations. Stationary and nonstationary excitations. Response of systems with random parameters. Discrete and continuous linear systems. Applications to earthquakes, wind sway of buildings, gust response, vibrations due to gearing inaccuracies, train vibrations.  
Mr. Friedmann (Sp, even years)

**269D. Aeroelastic Effects in Structures.** Prerequisite: course M269A. Presentation of field of aeroelasticity from unified viewpoint applicable to flight structures, suspension bridges, buildings, and other structures. Derivation of aeroelastic operators and unsteady airloads from governing variational principles. Flow induced instability and response of structural systems.  
Mr. Bendiksen, Mr. Friedmann (F, odd years)

**271A. Dynamic Systems Optimal Control.** Prerequisite: course 171C or consent of instructor. Optimal control problem formulation. Performance criteria for deterministic dynamic systems. Variational methods and Pontryagin maximum principle for continuous and discrete-time models. Inequality constraints. Sensitivity analysis. Numerical computation methods for solving boundary value problems of optimal control. Applications in various fields.  
Mr. Gibson, Mr. Mingori (F)

**271B. Dynamic Systems Stochastic Estimation and Control.** Prerequisites: courses 171C, 192D, and 271A, or consent of instructor. Applied treatment of optimal state estimation and stochastic control problems for continuous and discrete-time dynamic models with state-space descriptions. Kalman filtering, smoothing, and prediction algorithms. Stochastic optimal controllers; separation principle. Emphasis on efficient numerical computations. Applications in various fields.  
Mr. Speyer (W)

**271C. Dynamic Systems Identification, Stability, and Adaptive Control.** Prerequisite: course 271A or consent of instructor. Recommended: course 271B. Nonlinear system stability. Dynamic systems modeling, identification, and parameter estimation techniques. Combined identification and control and self-adaptive control.  
Mr. Speyer (Sp)

**271D. Seminar: Special Topics in Dynamic Systems Control.** Prerequisite: consent of instructor. Seminar on current research topics in dynamic systems modeling, control, and applications. Topics selected from process control, differential games, nonlinear estimation, adaptive filtering, industrial and aerospace applications, etc.  
Mr. Speyer

**274. Methods of Probabilistic Safety Assessment.** (Formerly numbered 236D.) Lecture, four hours; outside study, eight hours. Prerequisite: course 174 or consent of instructor. Methods for evaluation of risk from large technological systems; advanced statistical methods for data analysis; models of dependent failures; elicitation and use of expert opinions; human reliability models; propagation of uncertainties in physical models; applications to nuclear power plants, waste repositories, and space systems.  
Mr. Apostolakis (W, odd years)

**275. Principles and Methods of Risk Management.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 174 and 274, or consent of instructor. Considerations regarding balancing of society's resources: risk/benefit, value/impact, and risk management. Methodological problems and approaches. Risk-based decision theory, aspects of risk management: criteria and standards, uncertainty, perception, value of life, and judicial review. Case studies.  
Mr. Kastenber (Sp, odd years)

**280. Introduction to Micromachining.** Lecture, four hours; outside study, eight hours. Prerequisite: Materials Science 14 or equivalent. Introduction to microscopic world and MEMS; basics of IC manufacturing; bulk micromachining; directional etching and etch-stops; surface micromachining: deposition, selective wet etching, and dry etching; mechanical behavior of thin film-based structures; applied micromachining: polymer film, electroplating, and nonlithography machining; transducing fundamentals.  
Mr. Kim

**M291A. Analytical Methods of Engineering I.** (Same as Electrical Engineering M208A.) Prerequisites: Mathematics 131A, 132. Application of abstract mathematical methods to engineering problems. Review of elements of measure and integration,  $L^2$  theory — linear spaces and operators. Eigenvalue problems. Introduction to spectral theory — elementary distribution theory. Applications to problems in engineering.  
Mr. Gibson (W)

**M291B. Analytical Methods of Engineering II.** (Same as Electrical Engineering M208B.) Prerequisite: course M291A or Electrical Engineering M208A or consent of instructor. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and their adjoints. Discrete and continuous spectra for ordinary and partial differential equations. Initial and boundary value problems.  
Mr. Gibson

**291C. Integral Equations in Engineering.** Prerequisite: Mathematics 250B. Introduction to generalized function theory and Green's functions. Conversion of partial equations to integral equations and classification of integral equations. Solution to integral equations with degenerate kernels; discussions of successive approximations and Fredholm and Hilbert/Schmidt theory.  
Mr. Mal

**293. Quality Engineering in Design and Manufacturing.** Lecture, four hours; outside study, eight hours. Prerequisite: course 174 or consent of instructor. Quality engineering concepts and approaches. Taguchi methods of robust technology development and off-line control. Quality loss function, signal-to-noise ratio, and orthogonal arrays. Parametric design of products and production processes. Tolerance design. On-line quality control systems. Decision making in quality engineering.  
Mr. Chang

**294. Advanced CAD/CAM Systems.** Lecture, four hours; outside study, eight hours. Prerequisite: course 194 or consent of instructor. CAD/CAM systems design, with special emphasis on computational geometry, path to trajectory conversion, command generation, controller and interpolator design, and current research topics in CAD/CAM systems.  
Mr. Yang (W)

**295A. Computer-Aided Manufacturing.** Prerequisites: courses 94, 163A, 163C. Analysis of usage of computer in manufacturing. Manufacturing information systems; group technology; computer-aided manufacturing process planning; flexible manufacturing systems. Mr. Yang (F)

**295B. Computer-Integrated Manufacturing.** Prerequisite: course 295A. Systems analysis and design of computer-integrated manufacturing, including automated factories and flexible manufacturing systems. Mr. Yang (W)

**297. Composites Manufacturing.** Lecture, four hours; outside study, eight hours. Prerequisites: course 166C and Materials Science 151, or consent of instructor. Matrix materials, fibers, fiber preforms, elements of processing, autoclave/compression molding, filament winding, pultrusion, resin transfer molding, automation, material removal and assembly, metal and ceramic matrix composites, quality assurance. Mr. Hahn (Sp)

**298. Seminar: Engineering (2 to 4 units).** Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Speyer (F,W,Sp)

**497A-497B. Field Project in Manufacturing Engineering.** Lecture, two hours. Prerequisite: consent of instructor. Teams of students perform detailed system analysis and plan design of manufacturing engineering systems at various manufacturing plants. In Progress grading. Mr. Yang (W, 497A; Sp, 497B)

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination (2 to 12 units).** Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Prerequisites: graduate standing in mechanical, aerospace, and nuclear engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

## Schoolwide Fields, Programs, Courses, and Faculty

6426 Boelter Hall, (310) 825-2826

### Bachelor of Science in Engineering

#### Bioengineering Major Field

The bioengineering major field is an interdepartmental program leading to a Bachelor of Science degree in Engineering that may soon be replaced by several new programs in this area. Therefore, applicants may not be admitted to this major but may have an opportunity to pursue one of the new alternatives. For further information, contact the Associate Dean, Academic and Student Affairs, 6426 Boelter Hall.

### Graduate Study

For information on graduate admission to the schoolwide engineering programs and requirements for the M.S., Engineer, and Ph.D. degrees and certificate of specialization, see "Graduate Study" at the beginning of this chapter.

#### M.S. and Ph.D. in Engineering

Schoolwide programs, which may admit a limited number of applicants, are available in biocybernetics and man/machine/environment systems.

#### M.A.-Latin American Studies/ M.S.-Engineering

The school and the Latin American Studies Program have established an articulated degree program through which students may complete requirements for the M.S. in Engineering and the interdepartmental M.A. in Latin American Studies. After successful completion of the program, students are awarded both degrees simultaneously. Articulated programs do not allow course credit to be applied toward more than one degree.

### Lower Division Course

**97. Introduction to Engineering Disciplines.** (Formerly numbered 98.) Lecture, four hours; discussion, four hours; outside study, four hours. Introduction to engineering as a professional opportunity for freshman students by exploring difference between engineering disciplines and functions engineers perform. Development skills and techniques for academic excellence through the team process. Investigation of national need underlying current effort to increase participation of historically underrepresented groups in the U.S. technological work force. P/NP grading.

Mr. Jacobsen (F)

### Graduate Courses

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. (F,W,Sp)

**470A-470D. The Engineer in the Technical Environment (3 units each).** Limited to students in Engineering Executive Program. Theory and application of quantitative methods in analysis and synthesis of engineering systems for purpose of making management decisions. Optimization of outputs with respect to dollar costs, time, material, energy, information, and manpower. Case studies and individual projects.

**471A-471B-471C. The Engineer in the General Environment (3 units, 3 units, 1½ units).** Limited to students in Engineering Executive Program. Influences of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. In Progress grading for courses 471B-471C only.

**472A-472D. The Engineer in the Business Environment (3 units, 3 units, 3 units, 1½ units).** Limited to students in Engineering Executive Program. Language of business for the engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through cooperation and participation with California business corporations and government agencies. In Progress grading (credit to be given on completion of courses 472B and 472D).

**473A-473B. Analysis and Synthesis of a Large-Scale System (3 units each).** Recitation, two and one-half hours. Limited to students in Engineering Executive Program. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for a goal-oriented technical group. In Progress and S/U grading.

**495. Teaching Assistant Training Seminar.** Prerequisites: graduate standing in engineering, appointment as a teaching assistant. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading. (F)

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

### Schoolwide Engineering Faculty

Edward P. Coleman, Ph.D.  
J. Morley English, Ph.D.  
Alfred C. Ingersoll, Ph.D.  
Herbert B. Nottage, Ph.D.  
Allen B. Rosenstein, Ph.D.  
Bonham Spence-Campbell, E.E.

# Graduate School of Architecture and Urban Planning

Richard S. Weinstein, Dean

# 9

In recent years Los Angeles has emerged as a dominant and growing center of finance and trade, reflecting the continued shift of the national agenda west to the Pacific Rim and south toward Mexico and Latin America. This growth of intense commercial activity has been linked to important developments in the arts, sciences, and communications, producing a regional culture of great ethnic diversity, energy, and momentum. The UCLA Graduate School of Architecture and Urban Planning (GSAUP) draws from the many resources of this diverse environment.

Professional education and research are the central concerns of GSAUP within a context of rapid professional change and experimentation. Developed as a small school with an enrollment of 350, GSAUP encourages close interaction between faculty and students to maximize the educational experience. Our belief is that a curriculum in architecture and urban planning responsive to the emerging needs of this important region can make a significant contribution to professional development. GSAUP's Lewis Center for Regional Policy Studies and the recently established Institute of Transportation Studies provide students with academic and policy-oriented research opportunities. A noted regular faculty is supplemented by distinguished visitors. Public lectures, conferences, and various exhibits are scheduled throughout the year, facilitating an active relationship between the public and professional communities and the school.

# Graduate School of Architecture and Urban Planning\*

1317 Perloff Hall, (310) 825-3791

The Graduate School of Architecture and Urban Planning (GSAUP) at UCLA offers programs of study leading to the degrees of Master of Architecture (M.Arch.), M.A. in Architecture, M.A. in Urban Planning, Ph.D. in Architecture, and Ph.D. in Urban Planning. Currently, the school offers educational opportunities for a broad spectrum of careers, including a number that are not yet common in practice, but which reflect emerging social needs. It offers a choice of two major programs: Architecture and Urban Design, and Urban Planning.

## Architecture and Urban Design

B315 Perloff Hall, (310) 825-0525,  
825-7857

### Professors

Marvin Adelson, Ph.D.  
Charles M. Eastman, M.Arch.  
Baruch Givoni, Ph.D.  
Thomas S. Hines, Ph.D.  
Daniel Libeskind, M.A.  
Robin Liggett, Ph.D. (*Distinguished Teaching Award*)  
Mark Mack, M.Arch.  
Murray A. Milne, M.Arch.  
Barton Myers, M.Arch.  
Richard Schoen, M.Arch.  
Thomas R. Vreeland, Jr., M.Arch.  
Richard S. Weinstein, M.A., *Dean*  
Samuel Aroni, Ph.D., *Emeritus*  
F. Eugene Kupper, M.Arch., *Emeritus*

### Associate Professors

Dana Cuff, Ph.D.  
Diane Favro, Ph.D.  
Franklin Israel, M.Arch.  
Jurg Lang, Dipl.Arch., *Acting Chair*  
George Rand, Ph.D.  
Ben Refuerzo, M.Arch.

### Assistant Professors

Sylvia Lavin, Ph.D.  
Dagmar Richter, M.A. (Diplom.)

\*In response to budget constraints, Chancellor Young has proposed a restructuring of several of UCLA's professional schools. The current proposal calls for the Urban Planning Department to be transferred into a new school with focus on public policy, planning, and social welfare and for the Architecture and Urban Design Department to be transferred into a newly formed School of the Arts and Architecture. If adopted, this proposal would be effective as of July 1, 1994. All degrees associated with current programs would continue to be offered. New students can continue to look forward to studying with the same excellent faculty and participating in the life of one of the most exciting planning or architecture programs in the country.

### Degrees Offered

Architecture . . . . .	M.Arch. I, M.Arch. II, M.A., Ph.D.
Urban Planning . . . . .	M.A., Ph.D.

### Lecturers

Berge Aran, Ph.D.  
Thom Magne, M.Arch.

### Adjunct Professors

Charles Jencks, Ph.D.  
Barton Phelps, M.Arch.  
Robert J. Yudell, M.Arch.

### Adjunct Assistant Professors

Judith Sheine, M.Arch.  
Roger Sherman, M.Arch.

## Scope and Objectives

The Department of Architecture and Urban Design at UCLA offers four degree programs tailored to the needs of different groups of students: M.Arch. I, M.Arch. II, M.A., and Ph.D.

M.Arch. I is a three-year first professional degree program which is accredited by the National Architectural Accrediting Board (NAAB). It does not assume any prior background in architecture. Students who do have some prior architectural background (e.g., a four-year undergraduate degree) may also enter the program and may petition to waive certain required courses and substitute more advanced electives in their place. M.Arch. I graduates normally pursue professional careers in architectural practice.

M.Arch. II is an advanced professional degree program for students who already hold a first professional degree in architecture. It provides opportunities for intensive concentration in a variety of areas of professional specialization.

The M.A. and Ph.D. degree programs provide opportunities to pursue research and scholarship in the field of architecture. Graduates typically pursue academic or applied research and consulting careers.

## Master of Architecture I

### Admission

The M.Arch. I program is open to students holding a bachelor's degree (or its equivalent) comparable in standards and content to a bachelor's degree from the University of California. Applications are accepted from students with a variety of backgrounds. No academic or experiential training in architecture is required, although some students have had experience in the field prior to admission.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a "creative" portfolio. No admission tests are required. In addition to the application for graduate admission, applicants should submit the "Departmental Supplement," available from the Admissions Office, Graduate School of Architecture and Urban Planning, B102 Perloff Hall, UCLA, Los Angeles, CA 90024-1467.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

### Major Fields or Subdisciplines

No in-depth specialization is required within the context of the M.Arch. I program. However, you are required to concentrate several elective courses within a single curricular area. A minimum of three elective courses must be taken within this curricular area, including two courses in theory and one studio application, during the second year of study.

Specializations are currently available in the following areas: (1) urban policy and design, (2) architectural technology, (3) design and computation, (4) history and theories of architecture, and (5) policy, programming, and evaluation.

### Course Requirements

You must complete a minimum of 29 courses, at least 26 of which must be four-unit courses at the graduate level (200 and 400 series). The total number of units required is 116. The required courses, listed below, must be taken in the sequence indicated. Some of the studios are taken in conjunction with associated two-unit support courses.

#### First Year

Fall: Courses 411, 421, 200, 201A, 201B  
Winter: Courses 412, 422, 431, 436  
Spring: Courses 413, 423, 432, 442

#### Second Year

Fall: Courses 414, 424, 433, elective (in sequence)  
Winter: Courses 415 or 401 or 402, 425, 441, elective (in sequence)  
Spring: Courses 401 or 402 or 403 or M404, professional practice, elective

**Third Year**

Fall: Courses 416, 426, 291, elective

Winter: Courses 415 or 401 or 402, elective, 498

Spring: Elective, course 597A or 598A

You are required to take at least 20 units of elective coursework, including the history and theory courses in the elective sequence. In some areas of concentration an additional eight units of elective coursework may be necessary to fulfill the total unit requirement of 116. At least 16 units must be taken within the Graduate School of Architecture and Urban Planning.

You are encouraged to complete an elective sequence consisting of at least three related courses, terminating in a 402 or 403 advanced studio (normally in Spring Quarter of your second year). The elective sequence is intended to allow you to gain in-depth knowledge of a chosen area of specialization and to apply that knowledge in a design studio. Elective sequences are offered in the following areas: (1) urban policy and design, (2) architectural technology, (3) design and computation, (4) history and theories of architecture, (5) policy, programming, and evaluation. Details of currently available and approved elective sequences may be obtained from the graduate adviser.

In addition to completing an elective sequence, you are expected to explore a variety of topics by taking additional elective courses in the five areas listed above, in the Urban Planning Department, or outside GSAUP.

You must enroll in eight units of Architecture and Urban Design 597A, which may not be taken until all other required courses have been successfully completed. Students who opt to take the comprehensive examination in architectural design must enroll in four units of course 498, in addition to the eight units of course 597A.

You may also apply eight units of course 596A toward the elective course requirements for graduation. Eight of the 16 units may be applied toward the graduate course requirement. All independent 500-series work must be undertaken with the guidance and approval of a departmental faculty member.

If you can demonstrate that you already have adequate background in topics covered by specific required courses, you may petition to waive those courses and replace them with electives. This enables you to enroll in a larger number of electives and take part in the courses in the Advanced Graduate Studies Program. However, permission to waive required courses does not reduce the minimum number of 116 units required for the M.Arch. I degree nor does it reduce the nine-term residence requirement. The petition should be addressed to the faculty member responsible for that course and may be granted at the faculty member's discretion, possibly by means of a special examination. The petition should present evidence of adequate background in the

specific topic of the course, preferably with a transcript and syllabus of the course taken.

**Comprehensive Examination Plan**

You are required to successfully complete a comprehensive examination in any one of the following areas: (1) architectural design, (2) urban policy and design, (3) architectural technology, (4) design and computation, (5) history and theories of architecture, (6) policy, programming, and evaluation. The examinations are administered by the appropriate curriculum area committees. Details of the comprehensive examination policies, established by each curriculum area committee, are available from the graduate adviser.

**Master of Architecture II****Admission**

The M.Arch. II program emphasizes advanced studies in architecture and requires that applicants hold a five-year B.Arch. degree or equivalent.

You must state your major area of specialization on the departmental application, as you are admitted to a specific concentration area and may change only by petition to the advanced graduate studies curriculum committee. A minimum of four academic terms in residence is required. This is a full-time program, and you are expected to remain continuously in residence until all academic work is completed, unless a leave of absence is granted.

If your native language is not English, you are required to score at least 580 on the Test of English as a Foreign Language (TOEFL). In addition, you must take the English as a Second Language Placement Examination (ESLPE) on arrival at UCLA and, beginning in your first term in residence, take any required English as a Second Language courses. Because such courses may not be applied toward the minimum course requirement, you should expect to spend additional time in residence. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

**Major Fields**

You are required to select your major area at the time of application to the program and must take a minimum of 24 units of coursework in that area. The six major areas are (1) architectural design, (2) urban policy and design, (3) architectural technology, (4) design and computation, (5) history and theories of architecture, and (6) policy, programming, and evaluation.

**Course Requirements**

A minimum of 44 units of coursework (normally 11 four-unit courses) is required. At least 32 units must be at the graduate level; eight units of Architecture and Urban Design 597A or eight units of course 598A are to be included in the 32 units. The remaining 12 units may be either upper division or graduate courses. No more than eight units of 596 courses may be applied toward the requirements for graduation.

Students in architectural design are required to complete at least 12 units of advanced design studio work plus 12 units of approved seminar courses.

Students in urban policy and design must complete at least 12 units of advanced design studio work plus 12 units of approved seminar courses.

Students in the other four major areas (architectural technology; design and computation; history and theories of architecture; and policy, programming, and evaluation) are required to complete an approved sequence of three core courses consisting of two lecture/seminar courses which establish substantive foundations and a project course (Architecture and Urban Design 403) which explores applications, plus 12 units of elective courses in the major area.

There may be more than one approved core sequence in each of the areas. The curriculum committee establishes and publishes a list of approved core sequences, which is reviewed and revised as necessary on a yearly basis. In special cases you may propose core sequences not on the list for approval by the committee.

**Thesis Plan**

Under this plan you may submit either a research project or a design project. A thesis committee must be established at least one term before presentation of the thesis, and you must take at least eight units of Architecture and Urban Design 598A. The thesis must be submitted within two years after entry into the program.

**Comprehensive Examination Plan**

Under this plan you are required to establish a comprehensive examination committee at least one term before taking the examination and to receive approval of an examination topic from that committee. You are then required to take at least eight units of Architecture and Urban Design 597A. The examination consists of a research project or design project on the approved topic. The examination must be submitted within two years after entry into the program.

**Master of Arts in Architecture****Admission**

This program offers an academic degree and prepares students to do specialized research or teaching in fields related to the architecture and urban design professions. Applicants are required to hold a bachelor's degree (or its equivalent) comparable in standards and content to a bachelor's degree from the University of California. They should possess the experience and knowledge that would allow them to do advanced research in whatever aspect of architecture they plan to explore within the context of the master's program.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a "creative" portfolio. No admission tests are required. In addition to the application for graduate admission, applicants should submit the "Departmental Supplement," available from the Admissions Office, Graduate School of Architecture and Urban Planning.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

### Major Fields or Subdisciplines

There are four major areas of concentration: architectural technology; design and computation; history and theories of architecture; and policy, programming, and evaluation. In addition, you have the option of the open M.A. wherein you structure your own area of interest from the courses offered by the school.

### Degree Requirements

- (1) Candidates for the M.A. are expected to be in residence at UCLA for at least two years and undertake six terms of study.
- (2) You must select and pursue one area of specialization.
- (3) A thesis or a comprehensive project is required. When the committee members have signed the thesis proposal, you may take at least four and no more than eight units of Architecture and Urban Design 598A and begin work on the thesis itself. The course should be taken at some point during your last year of study.
- (4) You are required to complete a minimum of 16 courses (64 units) of graduate or upper division work, at least five (20 units) of which must be 200-series courses and at least two (eight units) of which must be 500-series courses. No more than 20 units of 500-series courses may be applied toward the total unit requirement for the degree.
- (5) Up to seven courses may be taken from upper division or graduate courses offered campuswide.
- (6) The University of California minimum requirements for the Master of Arts degree must be completed.
- (7) You must enroll in at least four and no more than eight units of course 598A. You may also apply 12 units of course 596A toward the unit requirements for graduation.
- (8) Courses in the 400 series may not be applied toward the graduate course requirement for the M.A. degree, but a limited number may be applied toward the elective course requirements.

### Thesis or Comprehensive Examination Plan

M.A. students can choose to present a design project as a comprehensive examination (see

M.Arch. I) or to do a research thesis. They should make this determination at least three months prior to the anticipated date of graduation.

## Ph.D. in Architecture

### Admission

Applicants must hold a bachelor's degree from an accredited college or university. It is anticipated that most applicants will have completed a first professional degree in architecture (a five-year B.Arch. or a professional M.Arch. degree). Students with degrees in other fields are also encouraged to apply but may, at the discretion of the Ph.D. program committee, be required to complete specific coursework as a condition of admission.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, a proposed program of studies, a short biographical résumé, and examples of research and/or creative work. An interview may also be required.

Applicants whose native language is other than English are required to pass the Test of English as a Foreign Language (TOEFL) before entering. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

Criteria considered for admission include (1) evidence of capacity for original scholarship and research in architecture, and ability to achieve eminence in the field, (2) an outstanding academic record, including grades (3.5 minimum GPA), Graduate Record Examination (GRE) scores, and references, (3) demonstration in the work submitted of adequate communication skills, particularly writing skills, and (4) presentation of a clear and realistic statement of purpose.

### Preliminary Evaluation of Research Skills

— Students who have any background deficiencies in research skills essential for work in their chosen areas of Ph.D. specialization (e.g., mathematics, statistics, or computing) are required to round out their knowledge early in their residence. The Ph.D. program committee conducts a formal evaluation of each student before the end of the first year in residence to assure adequacy of research skills. In order to undergo the evaluation you must have made up any background deficiencies and present a research paper or other evidence of capacity for original work.

If you are unable to satisfy the committee of the adequacy of your research skills, you will either be given specific advice on how to make up remaining deficiencies and be reevaluated at a later date, or else be advised to leave the program. If you do not satisfy the committee by the end of the sixth term, you are subject to termination from the program.

### Major Fields

Students are required to undertake programs of study that include one major area selected from the following: architectural technology; design and computation; history and theories of architecture; and policy, programming, and evaluation.

Majors outside these areas, or combinations of some of them, may be undertaken, subject to the approval of the Ph.D. program committee if supported by qualified faculty members willing to provide the necessary instruction and guidance.

### Minor Field Requirement

You are required to include in your program of study at least one minor field, which must be from outside the Architecture and Urban Design Department (i.e., outside the school or within the Urban Planning Department). The objectives of the minor field requirement are to assure adequate academic breadth in your preparation and to encourage participation in the general intellectual life of the University. Students planning their minor field courses are advised accordingly.

The normal method of demonstrating competence in the minor field is to complete at least 16 units of coursework, which represents a unified course of study in that field, with grades of B or better. If a qualified departmental faculty member is willing to provide the necessary supervision, the Ph.D. program committee may accept an alternative method of completing this requirement (e.g., a substantial research project).

### Mathematics, Computing, or Foreign Language Requirement

You are expected to develop adequate skills in mathematics, computing, or foreign languages, as appropriate to your field of specialization, and are strongly advised to complete this requirement as early as possible. One of the following is required.

**Foreign Language Requirement** — You must fulfill one of the following, as approved by your adviser or advisory committee:

- (1) Satisfactory reading knowledge of two foreign languages relevant to your field of specialization as demonstrated by one of the following methods: (a) a Graduate School Foreign Language Test (GSFLT) score of 500 or better, (b) a passing grade on the examination given by the departmental language examination committee, or (c) taking and completing with grades of B or better two courses from French 3, German 3, Italian 3, Spanish 5.
- (2) Superior knowledge of one foreign language relevant to your field of specialization as demonstrated by one of the following methods: (a) a GSFLT score of 600 or better, (b) distinction on the examination given by the departmental language examination committee, or (c) taking and completing with a grade of B or better one course from French 5, German 6, Italian 5, Spanish 25.

**Mathematics or Computing Requirement —**

Proficiency in mathematics and computing as demonstrated by passing an approved group of four graduate or upper division courses in mathematics, statistics, and/or computing with grades of B or better. The courses must not overlap in content and normally require prerequisites which may not be applied toward the four-course requirement.

Courses applied toward this requirement may not also be applied toward a major or minor field requirement.

**Course Requirements**

Generally you are required to take sufficient coursework to provide adequate preparation for the qualifying examination and the dissertation.

Each student is required to take a proseminar in architectural theory, normally in Fall Quarter of the first year. The proseminar is intended to establish a general orientation to the field of architecture that will ensure that you have an appropriate foundation for the acquisition of competence in the theory, methods, and history of architecture. In consultation with your adviser, you are expected to take whatever additional coursework is necessary to reach the required level.

Holders of a professional degree in architecture before admission to the program must complete four terms in residence and 48 units of coursework in order to become eligible to take the qualifying examination. If you have an M.Arch. I, M.Arch. II, or M.A. degree in Architecture from UCLA, the Ph.D. program committee may, at its discretion, reduce these requirements to three terms in residence and 36 units of coursework. All other candidates are required to complete six terms in residence and 72 units of coursework.

Half of the units must be graduate courses in architecture and urban design, and an overall GPA of 3.0 or better must be maintained. In exceptional cases, and with prior approval of the Ph.D. program committee, upper division courses may be applied toward these requirements. At least 32 units must be in 200-series courses.

Each of the major field core sequences of three to five courses includes one project course (Architecture and Urban Design 403), which focuses on the practical application of research results to architectural problems and provides opportunity to explore interrelations between the research and professional concerns of the field.

Students who are admitted to the Ph.D. program without having the background of a professional degree in architecture are required to take, in addition to the other course requirements, at least 24 units of graduate-level courses in architecture as recommended by their adviser and approved by the Ph.D. program committee.

No more than eight units of course 596A may be applied toward degree requirements, but eight units of course 597A and as many units of course 599A as necessary may be applied.

**Qualifying Examinations**

After successful completion of (1) the preliminary evaluation of research skills, (2) the mathematics, computing, or foreign language requirements, and (3) the coursework requirements, you may apply to take the qualifying examinations. They consist of a comprehensive written examination in the major field, a written examination in the minor field (this may be waived under certain circumstances), and an oral examination focusing primarily on your proposed dissertation. The qualifying examinations should be completed in one term and must not extend over more than two terms.

The major and minor field examinations are conducted by a four-member examination committee. The written examination in the major field is a substantial exercise followed by an oral presentation to the committee. The work must demonstrate your ability to teach an introductory course in the field and contribute to the progress of the field through scholarship and research. The written examination in the minor field is a short exercise and may be waived for candidates who hold a recognized master's degree in the field in which the minor is located, or at the discretion of the examination committee on the basis of outstanding grades (at least two A grades out of the four minor field courses).

The University Oral Qualifying Examination, conducted by the doctoral committee, takes place after successful completion of the two written qualifying examinations. It explores your proposed dissertation topic and your ability to undertake the proposed work successfully. After passing the oral examination, you are advanced to candidacy (the C.Phil. degree is not awarded) and may begin work on your dissertation.

**Final Oral Examination**

The examination involves a verbal defense of the completed dissertation before the doctoral committee.

**Upper Division Courses**

**M190. Human Environment: Introduction to Architecture and Urban Planning.** (Formerly numbered Architecture and Urban Planning 190.) (Same as Urban Planning M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts. Mr. Rand

**C191. Introduction to Sustainable Architecture and Community Planning.** (Formerly numbered Architecture and Urban Planning C191.) Lecture, three hours. Energy and alternative resource-conscious design integration into architectural and urban design: passive, active, and photovoltaic solar systems and recycling of water, waste, and building materials at scale of buildings and communities. Concurrently scheduled with course C247A. Mr. Schoen

**C192. Modern and Postmodern Architecture.** (Formerly numbered Architecture and Urban Planning C192.) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C282B. Mr. Jencks

**C193. City Studies.** (Formerly numbered Architecture and Urban Planning C193.) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C280. Mr. Vreeland

**199. Special Studies (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 199.) Prerequisite: consent of instructor. Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

**Graduate Courses**

**200. History of Architecture.** (Formerly numbered Architecture and Urban Planning 200.) Lecture, three hours. Introduction to history of Western architecture and the urban environment from antiquity to the modern era. Lectures and readings on major architectural monuments and urban issues in relation to their theoretical, philosophical, and sociopolitical contexts. Ms. Favro, Ms. Lavin

**201A. Theory of Architecture (2 to 4 units).** (Formerly numbered Architecture and Urban Planning 201A.) Lecture, 90 minutes; discussion, 90 minutes. Exploration of conceptual and historical structures that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding the nature of speculative inquiry in an architectural context. Ms. Lavin (F)

**201B. Theory of Form (2 units).** (Formerly numbered Architecture and Urban Planning 201B.) Lecture/studio, 90 minutes. Exploration of theories of form and composition through lectures and exercises.

**203. Decision Making in Planning and Design.** (Formerly numbered Architecture and Urban Planning 203.) Lecture, three hours. Exploration of challenges of decision making in general and in the design professions, which have far-reaching effects not only on clients but also on professionals' own prospects. Psychological and mathematical approaches for improving decision quality. Mr. Adelson

**204. Imaging the Future.** (Formerly numbered Architecture and Urban Planning 204.) Seminar, three hours. Introduction to social and technological forecasting, including nature and limitations of forecasting, ideology and values in forecasting, review of integrative forecasting techniques, and role of forecasting in environmental planning, design, and management processes. Mr. Adelson

**224A-224B. Formal Theory of Composition.** (Formerly numbered Architecture and Urban Planning 224A-224B.) Lecture, three hours. Examination of design as a formal enterprise in which rules are adopted and then followed to compose, describe, and evaluate designs. Development in detail of historical, contemporary, and new examples in architecture, painting, sculpture, and other fine and applied arts. Ms. Knight (F,W)

**225A-225B-225C. Fundamentals of Architectonics.** (Formerly numbered Architecture and Urban Planning 225A-225B-225C.) Lecture, three hours. Prerequisite: consent of instructor. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. **225A.** Principles of Proportion; **225B.** Symmetry; **225C.** Compartmentation. Mr. March

**226A. Introduction to Computer-Aided Design.** (Formerly numbered Architecture and Urban Planning 226A.) Lecture, three hours; laboratory, one hour. Introduction to various electronic graphic representations used in design; functionality and structure of modern CAD systems.

**226B. Computer-Aided Design and Visualization.** (Formerly numbered Architecture and Urban Planning 226B.) Lecture, three hours; laboratory, one hour. Prerequisite: course 226A or equivalent. Intermediate course on use of CAD tools in design, concepts of project organization, design development, with emphasis on three-dimensional representations; introduction to computer-based visualization techniques. Mr. Eastman

**226C. Computer Visualization.** (Formerly numbered Architecture and Urban Planning 226C.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Concept and techniques of computer visualization of artifacts, including realistic rendering and animation.

**227A. Programming Computer Applications in Architecture and Urban Planning.** (Formerly numbered Architecture and Urban Planning 227A.) Lecture, three hours. Introductory course in logic of computing, with emphasis on building tools for computer-aided problem solving in architecture and planning. Ms. Liggett (F)

**227B. Geometric Modeling.** (Formerly numbered Architecture and Urban Planning 227B.) Lecture, three hours. Prerequisite: course 227A or equivalent. Theory and implementation for computer modeling of three-dimensional shapes and volumes; various representations; transformations, surface modeling. Mr. Eastman

**227C. User Interaction Techniques in Design.** (Formerly numbered Architecture and Urban Planning 227C.) Lecture, three hours. Prerequisite: course 227A or equivalent. Software algorithms and techniques for implementing modern computer-user interfaces; raster operations; cognitive models; window management systems. Mr. Eastman

**227D. Design and Building Models.** (Formerly numbered Architecture and Urban Planning 227D.) Lecture, three hours. Review of range of information and knowledge potentially used in design. Knowledge representation, abstractions, and constructs. Logical structure of design information. Development of knowledge used in areas of design, how it can be identified, analyzed, and structured. Mr. Eastman

**228A-228B-228C. Computational Foundations of Architectural Design.** (Formerly numbered Architecture and Urban Planning 228A-228B-228C.) Lecture, three hours. Prerequisite: consent of instructor. Introduction to composition and description of architectural designs in algorithmic processes; alternative representations of shapes and their corresponding algebras; shape grammars and languages of designs/description schemes. Mr. Stiny (F,W,Sp)

**242. Climate Responsive Design.** (Formerly numbered Architecture and Urban Planning 242.) Prerequisite: professional degree in architecture or consent of instructor. Theory and method of design of buildings which specifically respond to local climate; intensive course in building climatology for advanced graduate studies students. Mr. Milne

**243. Energy Modeling.** (Formerly numbered Architecture and Urban Planning 243.) Prerequisites: one course in building climatology and one course in environmental controls. Geometric description of a building and computerized modeling of its instantaneous energy flows, using one of the large energy analysis computer programs such as DOE 2.1B. Mr. Milne

**C247A. Introduction to Sustainable Architecture and Community Planning.** (Formerly numbered Architecture and Urban Planning C247A.) Lecture, three hours. Energy and alternative resource-conscious design integration into architectural and urban design: passive, active, and photovoltaic solar systems and recycling of water, waste, and building materials at scale of buildings and communities. Concurrently scheduled with course C191. Mr. Schoen

**247B. Energy/Resource-Conserving Solar Design and Practice.** (Formerly numbered Architecture and Urban Planning 247B.) Lecture, three hours. Prerequisites: course 247A and one climatology course, or consent of instructor. Extension of concepts and sizing of integrated systems introduced in course 247A; stand-alone approaches particularly in developing countries; impacts of global warming, deforestation on architecture; recycling; programming for project studio 403B. Mr. Schoen

**248A-248B. Passively Integrated Solar Systems.** (Formerly numbered Architecture and Urban Planning 248A-248B.) Prerequisites: courses 242 and 442, or consent of instructor. Analysis of different passively integrated solar systems for heating and cooling buildings, considering their anticipated performance and suitability for different climates and building types. Focus on quantitative aspects, including calculations of performance in terms of energy saving and expected indoor comfort conditions. **248A.** Heating; **248B.** Cooling. Mr. Givoni (W,Sp)

**255A-255B. Climatic Issues in Urban Design.** (Formerly numbered Architecture and Urban Planning 255A-255B.) Seminar, three hours. In-depth examination of impact of urban design (e.g., urban density, urban profile, public parks) on some aspect of urban climate, such as urban temperature, wind field, solar radiation availability, etc. Mr. Givoni

**258. Urban Morphology.** (Formerly numbered Architecture and Urban Planning 258.) Lecture, three hours. Exploration of urban space from structuralist perspective. Primary emphasis on relationships between socioeconomic, experiential, and formal structures of the urban environment. Mr. Aran

**271. Elements of Urban Design.** (Formerly numbered Architecture and Urban Planning 271.) Lecture, three hours. Introduction of basic knowledge of elements and methods of urban design. Multidisciplinary approach leading to understanding of political, socioeconomic, and technological framework of urban systems and its dynamic interrelations. Mr. Lang (F)

**M272. Real Estate Development for Planners and Architects.** (Formerly numbered Architecture and Urban Planning 272.) (Same as Urban Planning M272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are interactively modified to meet economic feasibility tests. Mr. Richman (W)

**279. Housing for Developing Countries.** (Formerly numbered Architecture and Urban Planning 279.) Discussion, three hours. Considerations of sociocultural, economic, and political factors, materials, structural systems, shelter accessories, and manufacturing technologies related to priorities of developing countries in housing policies and planning and design of shelter.

**C280. City Studies.** (Formerly numbered Architecture and Urban Planning C280.) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C193. Mr. Vreeland

**282A. Roots of Modernism.** (Formerly numbered Architecture and Urban Planning 282A.) Lecture, three hours. Overview of developments in Western architecture during the 18th and 19th centuries, covering Romantic and historicist trends of the 1700s, eclectic preferences of the 1800s, and turn-of-the-century pre-modern developments including art nouveau. Mr. Jencks

**C282B. Modern and Postmodern Architecture.** (Formerly numbered Architecture and Urban Planning C282B.) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C192. Mr. Jencks

**286A-286B. Ancient Architecture.** (Formerly numbered Architecture and Urban Planning 286A-286B.) Lecture, three hours. Study of architectural developments from archaic Greece to the late Roman Empire. Examination of ancient buildings as functional constructs whose appearance was determined by aesthetic, religious, social, political, urban, and technological factors. Ms. Favro

**287. Architecture in Europe and the Middle East, 400-1500.** (Formerly numbered Architecture and Urban Planning 287.) Lecture, three hours. Prerequisite: consent of instructor. Study of East/West relationships, cultural concerns, and social interactions as seen through some major urban and architectural developments in Europe and the Middle East. Mr. Aran

**288A-288B. Renaissance and Baroque Architecture.** (Formerly numbered Architecture and Urban Planning 288A-288B.) Lecture, three hours. Examination of European architecture from the 15th to 17th century, with primary focus on developments in the Italian peninsula. Examination of Renaissance and baroque structures contextually, exploring changing cultural and theoretical values as well as aesthetic characteristics. Ms. Favro

**289. Special Topics in Architecture and Urban Design (2 to 4 units).** (Formerly numbered Architecture and Urban Planning 289.) Prerequisite: consent of instructor. Selected academic topics initiated by students, student teams, or faculty and directed by a faculty member. May be repeated for credit.

**290. History and Theory of Landscape.** (Formerly numbered Architecture and Urban Planning 290.) Lecture, three hours. Historical introduction to principles of garden and landscape design. Exploration of key issues through case studies of gardens, landscape architecture, and vernacular landscape. Mr. Phelps

**291. Theory of Architectural Programming.** (Formerly numbered Architecture and Urban Planning 291.) Lecture, three hours. Exploration of concepts and methods of architectural programming and its interrelation to design process; planning of design process; various techniques for determination of program contents, basic conditions, resources, and constraints; identification of solution types for given situations. Mr. Rand (F)

**292. Social Meaning of Space.** (Formerly numbered Architecture and Urban Planning 292.) Discussion, three hours. Evolution of concept of space from its origins in ritual and primitive social organizations, concentrating on the child's evolving conception of space, literature on perceptual development, and studies of adaptation to spatial order of the human-made environment. Mr. Rand

**294A-294B. Environmental Psychology.** (Formerly numbered Architecture and Urban Planning 294A-294B.) Lecture, three hours. Introduction to models, concepts, and theories concerning impact of the environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, preferences and attitudes toward the environment, effects of crowding and stress, personal space and territoriality. Mr. Rand

**296. Proseminar: Architectural Theory.** (Formerly numbered Architecture and Urban Planning 296.) Seminar, three hours. Orientation for Ph.D. students to tradition of architectural theory, scholarship, and research and to current research directions and questions, through intensive reading and critical discussion.

**297. Group Process in Design.** (Formerly numbered Architecture and Urban Planning 297.) Lecture, two hours; discussion, two hours; laboratory, two hours. Prerequisite: consent of instructor. Designed to equip students with knowledge and skills needed to work effectively in design processes with other professionals and with client and user groups in organizational and other settings where interaction is important in determining design outcomes. Mr. Adelson

**298A-298D. Research Practicum in Architecture (2 to 4 units each).** (Formerly numbered Architecture and Urban Planning 298A-298D.) Prerequisite: consent of instructor. In-depth examination of research methods in the various major fields. May be repeated for credit:

**298A.** Research Practicum in Policy, Programming, and Evaluation.

**298B.** Research Practicum in Technology.

**298C.** Research Practicum in Design Theory and Methods.

**298D.** Research Practicum in History, Analysis, and Criticism of Architecture.

**375. Teaching Apprentice Practicum (1 to 4 units).** (Formerly numbered Architecture and Urban Planning 375.) Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**401. Projects in Architecture.** (Formerly numbered Architecture and Urban Planning 401.) Studio, eight hours. Prerequisite: consent of instructor. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit. (F,W,Sp)

**402. Projects in Urban Design.** (Formerly numbered Architecture and Urban Planning 402.) Studio, eight hours. Prerequisite: consent of instructor. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit. (F,W,Sp)

**403A-403D. Projects with Specific Topics (2 to 4 units each).** (Formerly numbered Architecture and Urban Planning 403A-403D.) Studio, eight hours. Prerequisites: prior courses of particular sequence or consent of instructor:

**403A.** Projects in Policy, Programming, and Evaluation.

**403B.** Projects in Architectural Technology.

**403C.** Projects in Design and Computation.

**403D.** Projects in History and Theories of Architecture. (F,W,Sp)

**M404. Joint Planning/Architecture Studio.** (Formerly numbered Architecture and Urban Planning 404.) (Same as Urban Planning M404.) Lecture, one hour; discussion, one hour; studio, four hours. Prerequisite: consent of instructor. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments. Ms. Leavitt, Ms. Sheine (Sp)

**411. Introductory Design Studio.** (Formerly numbered Architecture and Urban Planning 411.) Studio, 12 hours. Prerequisite: consent of instructor. Architectural composition is initially studied in terms of its separate elements. After each is studied by means of a manipulative exercise which allows for experimentation of its intrinsic possibilities, students then undertake a series of closely controlled exercises dealing with combining the elements. Design of a small building in which previously acquired knowledge is synthesized into a single design in latter part of course. (F)

**412. Building Design Studio.** (Formerly numbered Architecture and Urban Planning 412.) Studio, 12 hours. Prerequisite: course 411. Design of project starts with exploration of architectural program in relation to design process and, particularly, implications of program on architectural forms and concepts. In second phase, structural elements are introduced to fulfill program requirements and to support and further develop intended forms and concepts. (W)

**413. Building Design with Landscape Studio.** (Formerly numbered Architecture and Urban Planning 413.) Studio, 12 hours. Prerequisite: course 412. Building design and site planning in relation to water, landforms, and plants in natural landscape, with special attention to natural light, heat, and ventilation. (Sp)

**414. Major Building Design.** (Formerly numbered Architecture and Urban Planning 414.) Studio, 12 hours. Prerequisite: second-year standing. Design projects which enable students to concentrate specifically on architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, environmental control, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form. (F)

**415. Major Building Design II.** (Formerly numbered Architecture and Urban Planning 415.) Studio, 12 hours. Prerequisite: course 414. Design projects which enable students to concentrate on specific architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, mechanical systems, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form. Special emphasis on integration of environmental control systems.

**416. Comprehensive Design Studio.** (Formerly numbered Architecture and Urban Planning 416.) Studio, 12 hours. Prerequisites: completion of required coursework up to first term of third year, consent of instructor. Course completes regular required sequence of design work, preparing students for third-year thesis preparation. Comprehensive design projects are structured to test students on integration of structural aspects, mechanical systems, site planning, and climatic considerations within their design solutions. (F)

**421. Studio Support (2 units).** (Formerly numbered Architecture and Urban Planning 421.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 411, which introduces sketching, drawing, drafting, perspectives, model building, and computer-aided design through lectures, seminars, and independent or studio-related exercises.

**422. Studio Support (2 units).** (Formerly numbered Architecture and Urban Planning 422.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 412, which introduces sketching, drawing, drafting, perspectives, model building, and computer-aided design through lectures, seminars, and independent or studio-related exercises.

**423. Studio Support (2 units).** (Formerly numbered Architecture and Urban Planning 423.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 413, which introduces theoretical and technical issues such as site planning, urban design, landscape design, design with climate, and building typology, etc., through lectures, seminars, and independent or studio-related exercises.

**424. Studio Support (2 units).** (Formerly numbered Architecture and Urban Planning 424.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 414, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

**425. Studio Support (2 units).** (Formerly numbered Architecture and Urban Planning 425.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Design development of project initiated in preceding studio (usually course 414). One room or part of building is developed in detail, with integration of a range of technical systems such as structures, mechanical systems, etc.

**426. Studio Support (2 units).** (Formerly numbered Architecture and Urban Planning 426.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 416, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

**428. Advanced Architectural Drawing.** (Formerly numbered Architecture and Urban Planning 428.) Discussion, three hours; studio, three hours. Prerequisite: consent of instructor. Emphasis on exploration of interrelationship between drawing and design. Development of more advanced design strategies and modes of graphic exploration and presentation. (W)

**431. Structures I.** (Formerly numbered Architecture and Urban Planning 431.) Lecture, three hours. Prerequisites: basic algebra, geometry, trigonometry, consent of instructor. Introduction to structural behavior and structural statics. Operations with forces and factors, both algebraically and graphically. Equilibrium of force systems; polygon of forces and funicular polygon. Internal actions; axial force and bending moment. Reactions, stability, and statical determinacy. Determinate frames. Plane trusses; analysis and design. (W)

**432. Structures II.** (Formerly numbered Architecture and Urban Planning 432.) Lecture, three hours. Prerequisites: course 431, consent of instructor. Mechanics of structures and structural elements. Elastic materials: stress, strain, and stress-strain relations. Theory of bending: curvature, stress and strain distributions, centroid, moments of inertia, resisting and plastic moments. Design of beams for bending, shear, and deflections. Torsion members. Instability and design of columns. Design for combined bending and compression. Tensile structures; cables, pneumatic structures. Slabs and plates; shells and folded plates. (Sp)

**433. Structures III.** (Formerly numbered Architecture and Urban Planning 433.) Lecture, three hours. Prerequisites: course 432, consent of instructor. Introduction to statically indeterminate analysis. Structural materials and loads. Wind loads: distribution with height, design for comfort, structure behavior under lateral loads. Steel construction and concepts for high-rise structures. Structural case studies in timber and steel. Introduction to earthquakes: seismology, magnitude, intensity, history. Seismic instrumentation. Case studies of recent earthquakes and damage. Earthquake design concepts and seismic code requirements. (F)

**434. Structures IV.** (Formerly numbered Architecture and Urban Planning 434.) Lecture, three hours. Prerequisites: course 433, consent of instructor. Considerations of concrete structures. Materials of construction: cement aggregates, concrete mix design. Construction methods and structural systems. Reinforced concrete theory: elastic and ultimate strength analysis and design of beams, columns, and slabs. Case studies of concrete structures. Economics of high-rise concrete apartment buildings.

**436. Building Construction.** (Formerly numbered Architecture and Urban Planning 436.) Limited to M.Arch. I students. Principles of structure and enclosure; basic nature, production, classification of primary building materials. Building elements explored for formal and functional properties; production and assembly possibilities in factory and field, application and role within building. Hands-on project.

Mr. Schoen (W)

**437. Construction Documents.** (Formerly numbered Architecture and Urban Planning 437.) Studio, eight hours. Prerequisite: one course in basic building construction (such as 436) or consent of instructor. Office/field communications explored through design of simple structure and creation of key working drawings and outline specifications. Introduction to CADD (computer-aided design and drafting) systems.

Mr. Schoen (Sp)

**438. Systems Building.** (Formerly numbered Architecture and Urban Planning 438.) Prerequisite: consent of instructor. Discussion and survey of past and present developments in Europe, the U.S.S.R., and the U.S. Impacts, demands, socioeconomic and legal constraints, user needs, performance specifications. Systems engineering and design. Measurement regulation, modular coordination, closed systems, open systems, design of systems, subsystems, components, elements, and materials. (W)

**441. Environmental Control Systems.** (Formerly numbered Architecture and Urban Planning 441.) Prerequisite: consent of instructor. Design of mechanical systems necessary for functioning of large buildings: air handling, fire and life safety, plumbing, vertical and horizontal circulation, communication and electrical power distribution, analysis of interaction of these systems and their integrated effects on architectural form of a building. (W)

**442. Building Climatology.** (Formerly numbered Architecture and Urban Planning 442.) Prerequisite: basic physics. Design of buildings which specifically respond to local climate; utilization of natural energies, human thermal comfort; sun motion and sun control devices; use of plant materials and landform to modify microclimate.

Mr. Milne (Sp)

**444. Light and the Visual Environment.** (Formerly numbered Architecture and Urban Planning 444.) Prerequisite: one course in building climatology or consent of instructor. Exploration of extent to which physical form of a building controls the luminous environment of its occupants; design of naturally and artificially illuminated interior spaces; parameters of human visual comfort.

Mr. Milne

**445. Architectural Acoustics (2 to 4 units).** (Formerly numbered Architecture and Urban Planning 445.) Lecture, three hours. Prerequisite: consent of instructor. Applied course in acoustical designing in architecture, including design of partitions to provide good sound insulation. Acoustical materials. Acoustical design of auditoriums. Control of noise in HVAC systems.

**448. Communication and Diffusion of Innovation.** (Formerly numbered Architecture and Urban Planning 448.) Seminar, three hours. Innovation in the building industry and design professions. Successful creation and introduction of innovative products, processes, and technologies. Students expected to contribute to the meager literature of the field through case studies and projects. Visitors and field trips. Mr. Schoen

**461. Architectural Practice.** (Formerly numbered Architecture and Urban Planning 461.) Seminar, three hours. Historical development of the profession; role of architect in contemporary society, current forms of practice and emerging trends. Contractual relationships, ethical responsibility, office management and promotion. Case studies of practical process.

**496. Special Projects in Architecture (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 496.) Prerequisite: consent of instructor. Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

**497. Special Projects in Urban Design (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 497.) Prerequisite: consent of instructor. Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

**498. Program Development (4 to 8 units).** (Formerly numbered Architecture and Urban Planning 498.) Studio, six to 10 hours. Prerequisite: consent of instructor. Structural investigation of relationship between verbal description and architectural design. S/U grading.

**596A. Directed Individual Research and Study in Architecture and Urban Design (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 596A.) May be repeated for credit. S/U grading.

**597A. Preparation for Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 6 units).** (Formerly numbered Architecture and Urban Planning 597A.) Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

**598A. Preparation in Architecture/Urban Design for Master's Thesis (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 598A.) Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

**599A. Ph.D. Dissertation Research in Architecture (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 599A.) Prerequisite: doctoral standing. May be repeated for credit. S/U grading.

## Urban Planning

1118A Perloff Hall, (310) 825-8957,  
825-7331

### Professors

Leland S. Burns, Ph.D.  
John Friedmann, Ph.D.  
Allan D. Heskin, Ph.D., LL.B.  
Jacqueline Leavitt, Ph.D.  
Robin Liggett, Ph.D. (*Distinguished Teaching Award*)  
Donald Shoup, B.E.  
Edward W. Soja, Ph.D.  
Michael Storper, Ph.D.  
Martin Wachs, Ph.D. (*Distinguished Teaching Award*)  
Peter Kaminitzer, M.Pl., M.Arch., *Emeritus*

### Associate Professors

Dana Cuff, Ph.D.  
Leobardo Estrada, Ph.D.  
J. Eugene Grigsby III, Ph.D.  
Susanna B. Hecht, Ph.D.  
Shirley Hune, Ph.D.  
Paul Ong, Ph.D.

### Assistant Professors

Raul Hinojosa-Ojeda, Ph.D.  
Anastasia Loukaitou-Sideris, Ph.D.  
Julie Roque, Ph.D.

## Scope and Objectives

The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic

communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Department of Urban Planning. Graduates have taken positions in local, state, and national governments, and increasingly with private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers a two-year Master of Arts degree and a Ph.D. Concurrent degree programs allow students to combine study for an M.A. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, a J.D. in the School of Law, or an M.A. in Latin American Studies.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. A number of student organizations provide an interesting program of extracurricular activities.

## Requirements for Graduate Degrees

### Admission

The department admits students for Fall Quarter only, and you should begin the application process a year in advance.

Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to Admissions Office, Graduate School of Architecture and Urban Planning, B102 Perloff Hall, UCLA, Los Angeles, CA 90024-1467.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college or university attended and are encouraged to submit Graduate Record Examination (GRE) scores. The Test of English as a Foreign Language (TOEFL) is required of applicants whose native language is not English, unless they have completed at least two years of university-level coursework at an English-language institution. A score of 600 on the TOEFL is expected; applicants with a score below 550 are not considered for admission. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

Work samples (research papers and/or copy of the master's thesis) are required of doctoral applicants. Work samples (reports, research papers, slides, etc.) for master's applicants are optional. A maximum of two work samples may

be submitted and will be returned only to applicants who enclose a self-addressed, stamped envelope.

### Areas of Concentration

You should select an area of concentration by the end of your first term in the program. The areas of concentration distinguish between different kinds of issues and contexts in which planners characteristically become engaged as a professional career or a field of research. They are not meant to be mutually exclusive. The four areas of concentration are

**Regional and International Development** — This area of concentration concerns the inter-related problems of territorial or area development in highly industrialized and developing countries. Perspectives on area development include political economy, locational analysis and regional economics, and analysis of institutions. Industrialization, urbanization, rural development, patterns of regional growth and decline, and problems of marginalized populations are major focal points of interest. Within this area, you are expected to select an emphasis on either developing or advanced industrial economies.

**Social Policy and Analysis** — The analysis of social services includes questions of production and distribution — how efficiently are services provided, who pays, and who benefits? These questions lead to more fundamental ones about the functions of planning and social policy. Social policy comprises the whole context of social actions which together determine the distribution of goods, services, and opportunities between rich and poor, men and women, young and old, and people of different ethnic and social origins. You may specialize in transportation, housing and real estate development, social services and social policy, or information decision systems. Work in transportation planning can be taken in conjunction with any of the four areas of concentration.

**Environmental Analysis and Policy** — The natural environment is both the context within which all human activities take place and a social product of those activities. Environmental planning begins as an attempt to mitigate often unforeseen consequences of economic growth and expansion where these seem to threaten social well-being and continuing political consensus. A special feature of this area of concentration is its emphasis on problems arising from the intensive use of environmental resources, viewed from the perspective of political economy.

**The Built Environment** — This area of concentration represents a blending of urban planning, architecture, and the social sciences. It deals with the social and economic forces affecting the three-dimensional built environment on a neighborhood, urban, and regional scale. Within this area, you may select a specialization in community planning and development or physical development and public policy.

**Additional Areas of Concentration** — In special circumstances, you may devise your own area in consultation with appropriate faculty members. Final approval of the proposed additional area of concentration must be obtained from the department chair.

### Master of Arts Degree

The M.A. degree is fully accredited by the Planning Accreditation Board, a joint undertaking of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

#### Course Requirements

You must complete a minimum of 72 units. Students generally take 12 units per term, completing the program in two years.

**Core Course Requirement** — The core areas comprise knowledge common to all areas of planning, regardless of your specific focus. Six core courses (24 units) are required, including Urban Planning 207, 220A, 220B (waivers by examination), two core courses in theory and context, and one additional course selected from those remaining on the core course list in methods, theory and context, and/or practice. Substitutions must be approved by the department chair.

On entering the program, you must pass examinations indicating competence in basic mathematics and microeconomics before enrolling in courses 207 and 220A. Copies of sample examinations are mailed to applicants accepted into the program. An undergraduate course in college algebra or precalculus should provide suitable background to pass the basic mathematics examination. An undergraduate course in microeconomics should be sufficient preparation for the microeconomics examination.

You are strongly encouraged to prepare for the examinations before enrolling so you can take courses 207 and 220A (offered only once per year in Fall Quarter) during your first term of studies.

**Area Course Requirement** — You must select an area of concentration and are required to take at least six courses (24 units) from the approved list of courses within the area; two of the six are generally specified.

**Fieldwork Requirement** — Master's students who come to the program without substantial prior experience in planning or closely related activity are required to complete eight units (300 total hours) of fieldwork. Fieldwork is defined as an internship or "real world" experience with a planning office, a private organization involved in planning, a community development agency, or applied research within a practical or policy context (excluding conventional university-based research projects). Details on fulfilling this requirement are available from the graduate adviser.

You are encouraged to seek waivers for requirements which have been met in your previous education.

### Thesis or Comprehensive Examination Plan

In partial fulfillment of the requirements for the M.A. degree, you are required to complete either a thesis or one of two comprehensive examination plans (Plan A or Plan B) during your second year of study. Each option has its own deadline for selection, and once a deadline has passed, you are limited to options with subsequent deadlines.

**Thesis Plan** — The master's thesis is intended to provide the opportunity for independent scholarly research and should be the length and quality of a publishable journal article. If you select this option, in order to meet established deadlines, you must begin thesis work no later than Fall Quarter of your second year. Academic credit for thesis preparation is given through Urban Planning 205 (four units required in Fall Quarter) and 598P (eight units over two terms).

**Comprehensive Examination Plan A (Client-Oriented Project)** — A client-oriented project is recommended for students who are more interested in practical application of what they have learned in their coursework than in scholarly research. The time span and magnitude of the final project approximates that of the thesis. Academic credit for project involvement is given through Urban Planning 597P (four units each in Winter and Spring Quarters of your second year of studies).

As an alternative under Plan A, you may take courses 217A-217B (group comprehensive project sequence), offered Winter and Spring Quarters, to fulfill the comprehensive examination requirement.

**Comprehensive Examination Plan B (Two-Week Examination)** — Examinations for all areas of concentration are normally offered during the break between Winter and Spring Quarters. A committee of faculty members (appointed by the area of concentration coordinator) offers, reads, and grades the examination. No course credit is received.

### Concurrent Degree Programs

#### J.D./M.A.-Urban Planning

The Department of Urban Planning and the School of Law offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

Students interested in the program must apply and be admitted to the School of Law, the Urban Planning Department, and the Graduate Divi-

sion. For additional information, contact the graduate adviser in the Urban Planning Department.

### **M.A.-Latin American Studies/M.A.-Urban Planning**

The Department of Urban Planning and the Latin American Studies Program offer a 2½- to 3-year concurrent plan of study leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The degree program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Students must apply to both programs. Further details may be obtained from the graduate adviser in the Urban Planning Department.

### **M.B.A./M.A.-Urban Planning**

The Department of Urban Planning and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service.

Students must contact both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Department of Urban Planning. Further details may be obtained from the graduate adviser in the Urban Planning Department.

### **Ph.D. Degree**

A more detailed description of the program is available from the graduate adviser.

### **Admission**

Students admitted to the Ph.D. program must have a master's degree in planning or a closely related field and a minimum 3.5 grade-point average in all graduate work completed. Employment experience in planning or a closely related field is strongly recommended.

In your statement of purpose, you should address the following questions: (1) career plans and how a Ph.D. in planning will contribute to those plans, (2) your intended area of concentration, and (3) specific research interests and dissertation plans. Before you can be accepted into the program, two faculty members must agree to assume responsibility for guiding you in your studies.

### **Foreign Language Requirement**

A foreign language is not required either for admission to or completion of the doctoral program. However, students who are expecting to

do dissertation research abroad are strongly advised to acquire the necessary language skills prior to beginning such research.

### **Course Requirements and Qualifying Examinations**

You must demonstrate a high level of competence in an area of concentration or major field and in planning theory and history as measured by coursework and doctoral examinations. In addition, you must satisfy certain requirements in research methods and studies outside of urban planning and are required to take Urban Planning 208 to aid in preparation of dissertation research and writing.

### **Planning Theory and History Requirement**

Planning theory is concerned with the ways that philosophers and social scientists have examined the question of how scientific and technical knowledge is to be joined to practice and action, with particular emphasis on the field of urban and regional planning. Planning history looks at how planning has evolved in the U.S., Western Europe, and elsewhere in the world as a form of institutionalized practice.

Two advanced courses, Urban Planning 210B and 210C, are required during the first year and must be passed with grades of A – or better. You may waive the two courses by satisfactorily completing a six-hour comprehensive written examination.

### **Area of Concentration Requirements/Examination**

The area of concentration is defined as a subject in which you are prepared to teach a sequence of courses and to conduct advanced research. The area should be generally recognized by academics in other planning schools and should be substantially broader than a dissertation topic.

You must prepare for an area of concentration examination by submitting for approval a plan of study to your advisory committee and to the coordinator of doctoral studies, preferably no later than the beginning of Winter Quarter of your first year. The plan must include (1) a short description of the area selected for study, (2) an indication of your major focus of research, (3) a short bibliography, (4) a list of courses and research papers through which you propose to prepare for the area examination, and (5) a timetable that indicates your expected completion of examinations and other requirements for the degree. The list of courses must include a minimum of three from *outside* the department and three methods courses (see below). Once approved, the plan is filed with the graduate adviser. The normal time for completion of the area of concentration requirement is two academic years.

The examination has two parts — written and oral. Both examinations must be taken in the same term. You may receive academic credit to prepare for the examination by enrolling in Urban Planning 597P.

### **Research Methods Requirement**

You must first demonstrate competence in statistical methods at the master's level (Urban Planning 220B or equivalent) either by completing course 220B with a grade of B + or better or by submitting a waiver petition with appropriate documentation.

Additionally, as part of your plan of study, you must take a preapproved set of three advanced courses in research methods. These courses must be closely related to your area of concentration and must be completed with grades of B + or better. You may petition to waive this requirement on the basis of prior coursework.

### **Oral Qualifying Examination**

After successful completion of all requirements in planning theory and history, the area of concentration, research methods, and outside coursework, you are required to take the University Oral Qualifying Examination at which you defend your dissertation proposal. The examination is administered by your doctoral committee and should be taken no later than the end of your third year of doctoral study. To assist in the development of the proposal, you are required to complete Urban Planning 208, preferably by the end of your first year.

### **Dissertation/Final Oral Examination**

The doctoral committee guides you in preparing the dissertation, which is to be a monograph representing an original contribution to planning knowledge.

The final oral examination, taken only at the discretion of the doctoral committee, involves a defense of the completed dissertation.

### **Upper Division Courses**

**CM128. Global Environment: Problems and Issues.** (Formerly numbered Architecture and Urban Planning CM128.) (Same as Geography M128.) Lecture, three hours. Prerequisite: consent of instructor. Analysis of selected environmental problems and issues associated with human-induced ecological disturbances. In-depth evaluation of key problem factors and processes using a multidisciplinary approach. Concurrently scheduled with course C252. P/NP or letter grading. Ms. Hecht

**M149. Transportation Geography.** (Formerly numbered Architecture and Urban Planning M149.) (Same as Geography M149.) Prerequisite: consent of instructor. Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

**179. Variable Topics in Urban Planning (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 179.) Lecture, three hours. Variable topics course in selected subjects in social policy and public services, urban and regional development, natural environment and resources, and the built environment. May be repeated for credit.

**187. Planning and Designing Our Cities.** (Formerly numbered Architecture and Urban Planning 187.) Introduction to urban planning and urban design, with emphasis on methods and tools used in practice. Overview of planning field; physical planning for redevelopment, for projects in expanding areas, and for new towns. Lectures (with illustrated examples), field visits, and presentation of students' own projects create framework for expanding understanding of urban planning and design process.

Mr. Kamnitzer

**CM189. Environmentalism: Past, Present, and Future (4 to 6 units).** (Formerly numbered Architecture and Urban Planning CM189.) (Same as Geography M115.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course C265. P/NP or letter grading.

Mr. Gottlieb (W)

**M190. Human Environment: Introduction to Architecture and Urban Planning.** (Formerly numbered Architecture and Urban Planning 190.) (Same as Architecture and Urban Design M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts.

Mr. Rand

**197. Planning for Minority Communities.** (Formerly numbered Architecture and Urban Planning 197.) Lecture, three hours. Introduction to inner-city policy issues on three separate levels: (1) each student develops a comprehensive inner-city urban program using materials from Alternatives Inner-City Future Exercise, (2) each student is expected to identify value assumptions and theories of social justice implicit or explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions that emphasize minority issues which affect implementation.

**199. Special Studies (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 199.) Prerequisite: consent of instructor. Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

## Graduate Courses

**M202A. Public Control of Land Development (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M202A.) (Same as Law M286.) Lecture, three hours. Analysis of legal and constitutional constraints on land-use planning and development; administrative and environmental regulatory processes, including relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required.

Mr. McGee (Sp)

**M202B. Governance: State, Regional, and Local (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M202B.) (Same as Law M285.) Lecture, three hours. Analysis of structure and function of local, regional, and state government in historical and institutional context: organization, finance, inter-governmental relations, role of judiciary, public services, lawmaking, citizen participation through initiatives and referenda, and government tort liability.

**M202C. Seminar: Urban Affairs (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M202C.) (Same as Law M526.) Seminar, two hours; two field trips. Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as antispeculation and rent control legislation. Catalytic role of economic and community development in expansion of housing supply also considered.

**205. Research Seminar for Master's Thesis.** (Formerly numbered Architecture and Urban Planning 205.) Discussion, three hours. Prerequisite: second-year standing in M.A. program. Required course for all second-year M.A. students who select thesis option rather than one of comprehensive examination options, aimed at aiding students in preparation of their theses. Organized as workshop with periodic reports and discussions of proposed research. S/U grading.

Mr. Burns (F)

**206A. Urban Data Analysis: Demographic Applications.** (Formerly numbered Architecture and Urban Planning 206A.) Lecture, three hours; laboratory, one hour. Prerequisites: one graduate-level statistics course, familiarity with one of the packaged statistics programs. Development of basic demographic methods of analysis in a policy context, providing parallel development of content, data sources, and applications. Topics include data sources and errors, mortality, fertility, age structure, and their effects on planning policy.

Mr. Valenzuela (W)

**206B. Urban Data Analysis: Planning Models.** (Formerly numbered Architecture and Urban Planning 206B.) Lecture, three hours; laboratory, one hour. Prerequisite: course 206A or equivalent. Advanced course in urban data analysis which builds on course 206A. Examination of relationship between demographic and other socioeconomic processes, with emphasis on planning models. Topics include internal and international migration, crime analysis, transportation demand, and economic activity forecasting.

**207. Public Resource Allocation.** (Formerly numbered Architecture and Urban Planning 207.) Lecture, three hours. Prerequisite: passing score on microeconomics examination given first day of class. Practical use of economics in analyzing public resource allocation problems. Topics include review of marginal analysis, difference between equity and efficiency, public goods and free rider problem, environmental pricing, public service pricing, and conflicts between individual and collective rationality.

Mr. Shoup (F)

**208. Seminar: Advanced Research Methods.** (Formerly numbered Architecture and Urban Planning 208.) Lecture, three hours. Prerequisites: doctoral standing, consent of instructor. Required of Ph.D. students in or following second year. Process of developing dissertation proposal; introduction to alternative conceptions of science (or rigorous scholarship) now apparent in various social science paradigms. S/U grading.

(Sp)

**209. Special Topics in Planning Theory (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 209.) Lecture, three hours. Seminar on topics in planning theory selected by faculty. May be repeated for credit.

**210A. Introduction to Planning Theory.** (Formerly numbered Architecture and Urban Planning 210A.) Lecture, three hours. Historical introduction to major ideas and theories of planning which have influenced its development from the early 19th century to the present.

Ms. Sandercock (F)

**210B. Comparative History of Planning Practice.** (Formerly numbered Architecture and Urban Planning 210B.) Lecture, three hours. Limited to Ph.D. and advanced M.A. students. History of city planning, its critics, and profession of planning through the 19th and 20th centuries. Comparison of evolution of the field in several countries, especially English-speaking countries.

Ms. Sandercock (W)

**210C. Colloquium in Planning Theory.** (Formerly numbered Architecture and Urban Planning 210C.) Lecture, one hour; discussion, two hours. Prerequisite: course 210A. Limited to Ph.D. students. Introduction to some central theoretical issues of contemporary planning.

Mr. Friedmann (Sp)

**211. Law and the Quality of Urban Life.** (Formerly numbered Architecture and Urban Planning 211.) Lecture, three hours. Introduction to law as an urban system, directed primarily toward those interested in intersection of law and policy; broad array of urban issues examined, as is law's role as a partial cause and cure of urban problems. Examination of law as a changing process rather than a collection of principles, so that students develop facility to interact with law and lawyers in a positive and forceful manner.

Mr. Heskin (W)

**214. Ethics in Planning.** (Formerly numbered Architecture and Urban Planning 214.) Examination of ethical dimensions of planning at many levels, including issues of bribery and corruption, aspects of client/sponsor and employer/employee relationships, collection, use, and release of information, and ethical aspects of administrative discretion. Ethical aspects of planning methods, concept of environmental ethics, and evolution of code of ethics in planning profession.

**M215. Spatial Statistics.** (Formerly numbered Architecture and Urban Planning M215.) (Same as Geography M272.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: consent of instructor. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

**216. Introduction to Nonprofit Development.** (Formerly numbered Architecture and Urban Planning 219.) Discussion, three hours. Overview of basic concepts and skills utilized in nonprofit development initiatives, especially by community-based organizations. Focus on nonprofit provision of subsidized housing, emphasizing way professionals "broker" debt and equity funding from private, governmental, and philanthropic sources. Use of client projects and negotiation exercises.

**217A-217B. Comprehensive Planning Project.** (Formerly numbered Architecture and Urban Planning 217A-217B.) Prerequisite: second-year standing. Comprehensive project brings together students of varying backgrounds and interests in joint solution of an urban planning problem. Each project spans two terms. Successful completion of project meets requirements of Comprehensive Examination Plan A of master's program.

(W,Sp)

**218. Graphics and Urban Information.** (Formerly numbered Architecture and Urban Planning 218.) Lecture, two hours; studio, one hour. Presentation of basic graphic methods and tools for conceptualization, analysis, and documentation of the built environment. Development of fundamental skills of graphic ideation and communication.

Ms. Loukaitou-Sideris (F)

**219. Special Topics in the Built Environment (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 219.) Lecture, three hours. Seminar on topics in the built environment selected by the faculty. May be repeated for credit.

**220A. Quantitative Analysis in Urban Planning I.** (Formerly numbered Architecture and Urban Planning 220A.) Lecture, three hours. Prerequisite: passing score on basic mathematics proficiency examination given first day of class. Introduction to mathematical and statistical concepts and methods with applications in urban planning. Review of basic mathematical concepts fundamental to planning methods; linear and nonlinear functions focusing on growth curves and mathematics of finance; data measurement and display; descriptive statistics and probability. Introduction to use of computer as a tool in analysis of planning-related data.

Ms. Liggett (F)

**220B. Quantitative Analysis in Urban Planning II.** (Formerly numbered Architecture and Urban Planning 220B.) Lecture, three hours. Prerequisite: course 220A or equivalent (demonstrated by passing score on mathematics proficiency examination given first day of course 220A). Introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include sampling, hypothesis testing, analysis of variance, correlation, and simple and multiple regression. Use of computer as a tool in statistical analysis and modeling.

Ms. Liggett (W)

**221. Evaluation Methods.** (Formerly numbered Architecture and Urban Planning 221.) Lecture, three hours. Prerequisites: courses 207, 220A. Examination of methods used to evaluate efficiency and effectiveness of government programs and investment projects. Theory and practice of evaluation, with emphasis on techniques of cost-effectiveness analysis, cost-benefit analysis, discounting, sensitivity analysis, target efficiency, fiscal audits, and evaluation design. (Sp)

**222. Introduction to the Planning Profession.** (Formerly numbered Architecture and Urban Planning 222.) Lecture, three hours. Lecture/project course offering introduction to the planning profession and to Urban Planning Department at UCLA. Overview of forces that shaped its practice over time and exploration of various professional roles for planners. Planning education viewed as response to changing needs and as catalyst for emerging roles for professional planners. Generally taken Fall Quarter of first year of M.A. program. (F)

**223. Professional Development Seminar.** (Formerly numbered Architecture and Urban Planning 223.) Lecture, 90 minutes; discussion, 90 minutes. Recommended (but not prerequisite): course 222. Problems of professional practice. Development of methods which integrate theory and practice through readings and individual and collective analyses of each student's fieldwork experience. Students must be working in a field setting to enroll. Job fair is held at end of Fall Quarter to place students in field settings. Students combine course 223 with one term of course 490 or 496F to meet fieldwork requirement. (W)

**229. Special Topics in Planning Methods (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 229.) Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

**M231. Urban Housing and Community Development (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M231.) (Same as Law M287.) Lecture, three hours; discussion, one hour. Examination of past 40 years of federal and state programs to stem urban decline and improve housing in the U.S.; comparison and contrast of legal and policy initiatives in areas of public housing, housing segregation, mortgage subsidies, landlord/tenant law, urban renewal, and community organizing. Research paper required.

**232A. Introduction to Regional Planning: Evolution of Regional Planning Doctrines.** (Formerly numbered Architecture and Urban Planning 232A.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space. Mr. Soja (F)

**232B. Spatial Planning: Regional and International Development.** (Formerly numbered Architecture and Urban Planning 232B.) Examination of theory and practice of spatial planning at regional, national, and international scales, including evaluation of regional growth strategies, national settlement policy, growth center concepts, and normative-ideological issues involved in international development planning. Generally taken in first year. (W)

**233. Political Economy of Urbanization.** (Formerly numbered Architecture and Urban Planning 233.) Introduction to basic concepts and analytical approaches of urban political economy, with major emphasis on American urban problems. Topics include historical geography of urbanization, development and transformation of urban spatial structure, suburbanization and metropolitan political fragmentation, urban fiscal crisis, and role of urban social movements.

Mr. Soja (Sp)

**235A-235B. Urbanization and Rural Development in Third World Countries.** (Formerly numbered Architecture and Urban Planning 235A-235B.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisite for course 235A: course 266 or consent of instructor; for course 235B: course 235A or consent of instructor. Questions of urbanization and planning in first term; rural development in second term. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates.

Mr. Friedmann (W,Sp)

**235C. Research Seminar: Alternative Development.** (Formerly numbered Architecture and Urban Planning 235C.) Discussion, three hours. Prerequisites: courses 235A-235B or 267A and 267B. Thesis and dissertation research seminar, consisting of review of major issues in an alternative development, specifically in poor countries, addressing issues in urban and rural development, with focus on one or more of following: inclusive democracy, appropriate economic growth, gender equality, and environmental sustainability; guest lectures and student presentations. S/U grading.

Mr. Friedmann

**236A. Urban and Regional Economic Development I.** (Formerly numbered Architecture and Urban Planning 236A.) Lecture, three hours. Introduction to industrial change and effect on urban and regional development theory and policy. Major topics include role of industrialization in economic development, explanations of regional industrial growth and decline, rise and fall of Fordism and its regional patterns, new forms of industrialization with particular emphasis on flexible production, and debates regarding political economy of industrialization.

Mr. Storper (W)

**236B. Urban and Regional Economic Development II.** (Formerly numbered Architecture and Urban Planning 236B.) Lecture, three hours. Prerequisite: course 236A. Examination of local economic development theory and history and issues associated with different public policies. Topics include changing patterns of employment, job creation, job retention, and forms of income redistribution aimed at stabilizing a community's economy, with particular concern for women, minorities, and the poor. (Sp)

**236C. Urban and Regional Economic Development III.** (Formerly numbered Architecture and Urban Planning 236C.) Discussion, three hours. Prerequisite: course 236B. Advanced seminar in community economic development, involving case study analysis, fieldwork, and individual student projects.

Ms. Haas (F)

**238. Advanced Seminar: Urban and Regional Development.** (Formerly numbered Architecture and Urban Planning 238.) Lecture, two hours; discussion, two hours. Prerequisite: doctoral standing or consent of instructor. Advanced research seminar on major issues in urban and regional development theory and/or policy. Topics usually reflect faculty research projects and change from year to year. May be repeated for credit.

Mr. Soja

**239. Special Topics in Urban and Regional Development Policy (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 239.) Lecture, three hours. Seminar on topics in urban and regional development policy selected by faculty. May be repeated for credit.

**241A. Urban Transportation Planning I.** (Formerly numbered Architecture and Urban Planning 241A.) Lecture, three hours. Historical development of urban transportation planning and current political and administrative frameworks for planning; relationship between transportation systems and urban form, historical review of automobile and public transit systems; urban highway and transit planning programs; financing of urban transportation; environmental and social impacts of transportation systems; current policy dilemmas; controlling the automobile, promoting mass transit, energy issues. Mr. Wachs (F)

**241B. Urban Transportation Planning II.** (Formerly numbered Architecture and Urban Planning 241B.) Prerequisites: courses 207, 220B, and 241A, or consent of instructor. Economic and social basis for travel; basic data sources for examining urban travel and transportation; techniques of forecasting and analyzing travel; mathematical models of travel; trip generation, trip distribution, modal split, traffic assignment, and route choice; uses of forecasts and approaches to transportation system and project evaluation. (W)

**241C. Urban Transportation Planning III.** (Formerly numbered Architecture and Urban Planning 241C.) Lecture, three hours. Prerequisites: courses 207 and 220B, or consent of instructor. Financing street and highway systems; public transit finance, including fare and subsidy policy; transportation system management and transportation demand management; ridesharing; transportation programs to meet needs of elderly and disabled. (Sp)

**M242A. Topics in Asian American Studies: Asian Migration to the U.S.** (Formerly numbered Architecture and Urban Planning M242A.) (Same as Asian American Studies M297B.) Prerequisite: graduate standing or consent of instructor. Emphasis on Asia as main regional source for international migrants. Topics include patterns and theories of international migration and their relevance to the Asian experience, sending and receiving country perspectives, research and policy issues. S/U or letter grading.

**M242B. Topics in Asian American Studies: Urbanization in Asia — Policy Issues and Problems.** (Formerly numbered Architecture and Urban Planning M242B.) (Same as Asian American Studies M297C.) Prerequisite: graduate standing or consent of instructor. Urbanization in less-developed countries in Asia with specific reference to its peculiar features and characteristics, and relationship of urbanization to the development process. Topics include urbanization development, structural and policy determinants of urbanization, urban policy and strategies, and country case studies. S/U or letter grading.

**244. Housing Markets.** (Formerly numbered Architecture and Urban Planning 244.) Lecture, three hours. Ways that housing markets should but sometimes do not work in developed economies. Interaction of demand factors such as population distribution, household formation, income, and credit, as well as their particular impacts on groups of the population. Topics include filtering, housing search, segregation, pricing, production efficiency, organization of construction industry, market failure, and appropriate policy responses. Mr. Burns

**245. Urban Public Finance.** (Formerly numbered Architecture and Urban Planning 245.) Lecture, three hours. Prerequisites: courses 207 and 220A, or consent of instructor. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefit assessments to finance neighborhood public investment, private and intergovernmental contracting as method of supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market.

Mr. Shoup

**246. Housing in Social and Economic Development Policy.** (Formerly numbered Architecture and Urban Planning 246.) Lecture, three hours. Seminar on position of housing in national and regional development strategies, with focus on policies for Third World nations. Topics include nature of housing "need," market responses, evolution of housing policy, theory of intervention, alternative policies for increasing housing supply. Numerous case studies.

Mr. Burns

**247. Race, Gender, Culture, and Cities.** (Formerly numbered Architecture and Urban Planning 249.) Discussion, three hours. Exploration of multicultural context of contemporary U.S. cities, with focus on changing social and spatial relations of ethnic communities and their policy implications. Topics relate the new diversity and gender with global restructuring, new urban economy, and policies of workplace, housing, schools, and governance.

Ms. Hune

**249. Special Topics in Social Policy and Analysis (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 249.) Lecture, three hours. Seminar on topics in social policy and analysis selected by faculty. May be repeated for credit.

**250. Introduction to Social Policy.** (Formerly numbered Architecture and Urban Planning 250.) Lecture, three hours. Analysis of demographic changes, history, needs, and ideological debates which affect development of social policy in the U.S., compared with Western Europe.

Mr. Grigsby (Sp)

**251. Planning for Multiple Publics.** (Formerly numbered Architecture and Urban Planning 251.) Lecture, three hours. Exploration of planning needs of various social groups in urban settings, using existing literature and research studies to determine appropriate mechanisms of planning for multiple publics. Analysis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and methodological problems of planning for multiple publics. Generally taken in first year.

Mr. Grigsby

**C252. Global Environment: Problems and Issues.** (Formerly numbered Architecture and Urban Planning C252.) Lecture, three hours. Prerequisite: consent of instructor. Analysis of selected environmental problems and issues associated with human-induced ecological disturbances. In-depth evaluation of key problem factors and processes using a multidisciplinary approach. Concurrently scheduled with course CM128. S/U or letter grading.

Ms. Hecht

**254. Survey Methods in Planning.** (Formerly numbered Architecture and Urban Planning 254.) Lecture, three hours. Prerequisite: course 220B or equivalent. Use of surveys in planning. Conducting of a small area survey, with emphasis on methods to obtain quality data appropriate for planning: questionnaire development, sample design, interviewing, data processing, and analysis. Presentation of survey to planners or public agencies.

**256. Social Impact Analysis.** (Formerly numbered Architecture and Urban Planning 256.) Lecture, three hours. Exploration of ways of assessing and determining social impacts on communities resulting from large-scale planning projects. Students develop mitigation measures to address identified adverse consequences.

Mr. Grigsby (W)

**260A. Political Economy and the Environment.** (Formerly numbered Architecture and Urban Planning 260A.) Lecture, three hours. Debate about environmental policy is increasingly couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on functioning of market system. Examination of assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy.

(W)

**260B. Politics, Institutions, and the Environment.** (Formerly numbered Architecture and Urban Planning 260B.) Lecture, three hours. Planners face some important dilemmas in designing institutions and policies intended to correct or prevent disruptions of the environment. Introduction to these problems, focusing on essential theoretical questions that must be addressed in attempts to control environmental problems in our society. Review of recent developments in environmental policy in light of growing environmental movements; evaluation of current approaches to environmental problems, considering their institutional forms and epistemological foundations.

Ms. Roque (Sp)

**261. Land-Use Control: Economic and Structural Perspectives.** (Formerly numbered Architecture and Urban Planning 261.) Lecture, two hours; discussion, one hour. Prerequisites: courses 260A and 260B, or consent of instructor. Comparison of regulatory methods of land-use control to command or planning methods. Basics of land use as a commodity in first part: land economics, land markets. Development, historically, of a structuralist perspective on use of land in cities and regions in second part. Land-use regulation (in third part) in light of first two, to see how effective it is in steering course of land development. Regulatory approach compared with real planning.

**M262A. Toxics Reduction: Science, Engineering, and Policy Issues.** (Formerly numbered Architecture and Urban Planning M262A.) (Same as Chemical Engineering M290U and Environmental Health Sciences M249.) Lecture, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area.

Mr. Froines, Ms. Roque

**262B. Urban Environmental Problems: Water Resources.** (Formerly numbered Architecture and Urban Planning 262B.) Lecture, three hours. Water is life and wealth in California, which has world's most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments have basically precluded further extension of this system, despite growing pressures to increase supplies. Examination of environmental impacts, geography, use of water, and consideration of resource planning.

Mr. Gottlieb

**M262C. Pollution Prevention Forum Series (2 units).** (Formerly numbered Architecture and Urban Planning M262C.) (Same as Environmental Health Sciences M239.) Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area.

Mr. Froines, Mr. Gottlieb

**263. Natural Resource Conservation.** (Formerly numbered Architecture and Urban Planning 263.) Discussion, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Exploration, through reading, discussion, and student presentations, of meaning of resource conservation, its desirability, and ways of achieving it. Emphasis on integrated management of public lands, though students may attend particularly to a specific resource (minerals, water, timber, wilderness).

**M264. Environmental Law (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M264.) (Same as Law M290.) Lecture, three to three and one-half hours. Examination of the field of environmental law through analysis of various legal issues and public policy: legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as a means of illustrating policy issues underlying the field.

Mr. Araiza (Sp)

**C265. Environmentalism: Past, Present, and Future (4 to 6 units).** (Formerly numbered Architecture and Urban Planning C265.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course CM189. S/U or letter grading.

Mr. Gottlieb (W)

**266. City and Countryside in the Third World.** (Formerly numbered Architecture and Urban Planning 266.) Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of impact of mercantilism, colonialism, capitalism, and socialism on various urban and rural social and economic structures in the Third World. Presentation, through evaluation of theoretical writings and case studies, of complexity and diversity of developing countries. Emphasis on linkages between policy and rural and urban impacts. Gives students important background for courses 267A, 267B, and many of the other planning courses addressing Third World issues.

Ms. Hecht (F)

**267A. Resource-Based Development Planning.** (Formerly numbered Architecture and Urban Planning 267A.) Discussion, three hours. Recommended (but not prerequisite): course 266. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development.

Ms. Hecht (W)

**267B. Rural Development Issues.** (Formerly numbered Architecture and Urban Planning 267B.) Lecture, three hours. Recommended (but not prerequisite): course 266. Development more thoroughly of themes raised in earlier courses. Topics may include peasantry, development and rural women, agricultural ecology, comparative land reform, agrarian revolution, and special problems of tropical development. May be repeated for credit with consent of instructor.

Ms. Hecht (W)

**268. Advanced Seminar: Environmental Analysis and Policy.** (Formerly numbered Architecture and Urban Planning 268.) Discussion, three hours. Prerequisite: consent of instructor. Exploration of broad issues related to environmental and resource planning. Generally intended for second-year M.A. and Ph.D. students. May be repeated for credit.

Mr. Gottlieb (F)

**269. Special Topics in Environmental Analysis and Policy (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 269.) Lecture, three hours. Seminar on topics in environmental analysis and policy selected by faculty. May be repeated for credit.

**270. Homelessness: Housing and Social Service Issues.** (Formerly numbered Architecture and Urban Planning 270.) Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless.

Ms. Leavitt

**M272. Real Estate Development for Planners and Architects.** (Formerly numbered Architecture and Urban Planning 272.) (Same as Architecture and Urban Design M272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are interactively modified to meet economic feasibility tests.

Mr. Richman (W)

**273. Site Planning.** (Formerly numbered Architecture and Urban Planning 273.) Lecture, 90 minutes; laboratory, 90 minutes. Introduction to principles of site planning for urban areas. Mr. Karnitzer

**274. Introduction to Physical Planning.** (Formerly numbered Architecture and Urban Planning 274.) Lecture, 90 minutes; discussion, 90 minutes. Overview of physical planning, land use, site analysis, and surveys; general plans and community plans; environmental review; zoning and ordinances; social impacts. Ms. Goldstein (W)

**275. Inner-City Housing Policies: Old and New Approaches.** (Formerly numbered Architecture and Urban Planning 275.) Lecture, 90 minutes; discussion, 90 minutes. Study of federal and local housing policy as it affects inner cities, with emphasis on New York and Los Angeles. Examination of research on housing conditions and community development policies, with particular emphasis on alternatives such as resident-controlled housing; analysis of rehabilitation policies; review of new concepts and current legislative proposals. Mr. Heskin, Ms. Leavitt (F)

**276. Planning Workshop (4 to 8 units).** (Formerly numbered Architecture and Urban Planning 276.) Lecture, one hour; discussion, one hour; laboratory, four hours. Prerequisite: consent of instructor. Planning projects with focus on physical planning.

**277. Historic Preservation: Principles and Practices.** (Formerly numbered Architecture and Urban Planning 277.) Lecture, 90 minutes; discussion, 90 minutes. Overview of preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, and social issues. Ms. Goldstein

**278. Qualitative Research Methods for Planners and Designers.** (Formerly numbered Architecture and Urban Planning 278.) Lecture, 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, user needs analysis, participant observation, questionnaire construction, interview techniques. Projects include students' own research.

**281A. Introduction to History of the Built Environment in the U.S.** (Formerly numbered Architecture and Urban Planning 281A.) Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. Introduction to history of physical forms of urbanization in America; survey of economic, political, social, and aesthetic forces behind creation of built environments.

Ms. Loukaitou-Sidaris (W)

**281B. Advanced Seminar: History of the Built Environment.** (Formerly numbered Architecture and Urban Planning 281B.) Discussion, three hours. Prerequisite: course 281A. Extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on history of the built environment in the U.S.

**283. History of the American Household and American Home.** (Formerly numbered Architecture and Urban Planning 283.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: course 281A or consent of instructor. Introduction to history of housing design in the U.S., emphasizing changing roles of women and men from Colonial times to the present and effects of these social changes on physical form of the dwelling and settlement. Discussion of concerns of professional architects and planners, as well as activity of bankers, builders, and homemakers.

**284. Looking at Los Angeles.** (Formerly numbered Architecture and Urban Planning 284.) Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city.

**285. Great Planning Debates: Gender.** (Formerly numbered Architecture and Urban Planning 285.) Lecture, 90 minutes; discussion, 90 minutes. Seminar on substantial literature on complex relationships between gender, race, and class in urban planning. Alternative theories describe an inadequate fit between American households, housing, and services and document environmental inequities women and children face in contemporary cities. Students prepare oral seminar reports on topics such as social service provision, housing, transportation planning, economic development, and safe public spaces.

Ms. Sandercock

**375. Teaching Apprentice Practicum (1 to 4 units).** (Formerly numbered Architecture and Urban Planning 375.) Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**M404. Joint Planning/Architecture Studio.** (Formerly numbered Architecture and Urban Planning 404.) (Same as Architecture and Urban Design M404.) Lecture, one hour; discussion, one hour; studio, four hours. Prerequisite: consent of instructor. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

Ms. Leavitt, Ms. Sheine (Sp)

**494. Supervised Independent Teaching (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 494.) Supervised individual teaching experience. May be repeated for credit. S/U grading.

**496F. Field Projects (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 496F.) May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 501.) Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596P. Research in Planning (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 596P.) May be repeated for credit.

**597P. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 597P.) May be repeated for credit. S/U grading.

**598P. Preparation for M.A. Thesis in Urban Planning (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 598P.) May be repeated for credit. S/U grading.

**599P. Ph.D. Dissertation Research in Planning (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 599P.) May be repeated for credit. S/U grading.

# Graduate School of Education and Information Studies

Theodore R. Mitchell, Dean

# 10

The UCLA Graduate School of Education and Information Studies (GSEIS) includes two departments — the Department of Education and the Department of Library and Information Science. Together, the two departments embody the school's commitment to understand and improve educational practice, information policy, and information systems in a diverse society. Research and doctoral training programs bring together faculties committed to expanding the range of knowledge in education, information science, and associated disciplines. The professional training programs seek to develop librarians, teachers, and administrators within the enriched context of a research university.

GSEIS is committed to developing expertise in both old and new methods of information storage and retrieval and to bringing innovative approaches in educational technology and information access to the schools and classrooms of the state and nation. In addition, GSEIS faculty members are engaged in research, teaching, and program development in the areas of management and leadership of schools and libraries, information policy formation, and information systems designs in organizations of all kinds.

Through its scholarship, its graduate training programs, and its partnerships with schools and educational professionals, GSEIS honors its commitment to improve practice in schools, universities, and libraries, enhance theoretical and applied research, expand the role of the university in policy creation, and advance the careers of professional leaders and specialists.

Together our commitment is to the highest quality professional education and to the application of research to the challenges facing a diverse and increasingly urbanized world.

# Graduate School of Education and Information Studies

2320 Moore Hall, (310) 206-9260

The Graduate School of Education and Information Studies (GSEIS) at UCLA offers programs of study leading to the degrees of M.A. in Education, Master of Education (M.Ed.), Master of Library and Information Science (M.L.I.S.), Doctor of Education (Ed.D.), Ph.D. in Education, Ph.D. in Library and Information Science, and joint Ph.D. in Special Education with California State University, Los Angeles. Several credential programs are available through the Department of Education, and a post-M.L.S. certificate program is offered by the Department of Library and Information Science.

## Education

Office of Student Services:  
1009 Moore Hall, (310) 825-8327

### Professors

Marvin C. Alkin, Ed.D., *Chair*  
Alexander W. Astin, Ph.D.  
Helen S. Astin, Ph.D.  
Eva L. Baker, Ed.D.  
Gordon L. Berry, Ed.D.  
Nicholas Blurton Jones, Ph.D.  
James E. Bruno, Ph.D.  
Arthur M. Cohen, Ph.D.  
Sol Cohen, Ph.D.  
Aimée Dorr, Ph.D.  
Norma D. Feshbach, Ph.D.  
Ronald Gallimore, Ph.D., *in Residence*  
Sandra Graham, Ph.D.  
John N. Hawkins, Ph.D.  
Charles C. Healy, Ph.D.  
Carolee Howes, Ph.D.  
Dean T. Jamison, Ph.D.  
Marilyn L. Kourilsky, Ph.D. (*Distinguished Teaching Award*)  
Bengt Muthén, Ph.D.  
Jeannie Oakes, Ph.D., *Vice Chair*  
Val D. Rust, Ph.D.  
Geoffrey B. Saxe, Ph.D.  
Rodney W. Skager, Ph.D.  
Deborah J. Stipek, Ph.D.  
Romeria Tidwell, Ph.D.  
Carlos A. Torres, Ph.D., *Assistant Dean*  
Noreen M. Webb, Ph.D.  
Carl Weinberg, Ed.D.  
Merlin C. Wittrock, Ph.D. (*Distinguished Teaching Award*)

### Professors Emeriti

Charlotte A. Crabtree, Ph.D.  
Burton R. Clark, Ph.D.  
Wilbur H. Dutton, Ed.D.  
Donald A. Erickson, Ph.D.  
Lawrence W. Erickson, Ed.D.  
Claude W. Fawcett, Ph.D.

## Degrees Offered

Education . . . . .	M.A., M.Ed., Ed.D., Ph.D.
Library and Information Science . . . . .	M.L.I.S., Ph.D.
Special Education . . . . .	Joint Ph.D. with California State University, Los Angeles

Clarence Fielstra, Ph.D.  
Simon González, Ed.D.  
John I. Goodlad, Ph.D., L.H.D., LL.D.  
C. Wayne Gordon, Ph.D.  
Frank M. Hewett, Ph.D.  
B. Lamar Johnson, Ph.D. (*Distinguished Teaching Award*)  
Wendell P. Jones, Ph.D. (*Distinguished Teaching Award*)  
Evan R. Keislar, Ph.D.  
Barbara K. Keogh, Ph.D. (*Distinguished Teaching Award*)  
Frederick C. Kintzer, Ed.D.  
George F. Kneller, Ph.D., Litt.D., LL.D., D.Sc., L.H.D.  
John D. McNeil, Ed.D.  
David O'Shea, Ph.D.  
C. Robert Pace, Ph.D.  
Rosemary Park, Ph.D., LL.D., Litt.D., L.H.D.  
W. James Popham, Ed.D. (*Distinguished Teaching Award*)  
Harry F. Silberman, Ed.D.  
Lewis C. Solmon, Ph.D.  
A. Garth Sorenson, Ph.D.  
Louise L. Tyler, Ph.D.  
Samuel J. Wanous, Ph.D.  
Richard Williams, Ph.D.  
Charles Z. Wilson, Ph.D.

### Associate Professors

James S. Catterall, Ph.D., *Assistant Dean*  
Robert M. Hodapp, Ph.D.  
Harold G. Levine, Ph.D.  
Peter L. McLaren, Ph.D.  
Theodore R. Mitchell, Ph.D., *Dean*  
Don T. Nakanishi, Ph.D.  
James W. Trent, Ph.D.  
Concepción Valadez, Ph.D.  
Wellford Wilms, Ph.D.

### Assistant Professors

Alfredo J. Artiles, Ph.D.  
Lynn G. Beck, Ph.D.  
Megan L. Franke, Ph.D.  
Christine D. Gutierrez, Ph.D.  
Yasmin B. Kafai, Ed.D.  
Connie L. Kasari, Ph.D.  
Patricia M. McDonough, Ph.D.  
Michael H. Seltzer, Ph.D.  
Renee Smith Maddox, Ph.D.  
Daniel G. Solorzano, Ph.D.  
Zhixin (Justine) Su, Ph.D.  
Amy S. Wells, Ph.D.

### Adjunct Professors

Howard Gadlin, Ph.D.  
Harry Handler, Ph.D.  
Leslie Koltai, Ed.D.  
Harold L. Pruett, Ph.D.

### Adjunct Associate Professor

Philip Ender, Ph.D.

## Scope and Objectives

As the top-ranked public graduate program in education in the nation, the Department of Education is guided by a commitment to integrate theory and practice and to improve educational practice and policy. The department attracts prominent scholars and is internationally recognized for its research centers in evaluation, higher education, child development, and urban education. Whether students choose to pursue a Ph.D., an Ed.D., a master's degree, or a services or instructional credential, they will graduate with a broad understanding of educational theory and tested practice.

## Requirements for Graduate Degrees

### Admission

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are

(1) Scores on the quantitative and verbal sections of the Graduate Record Examination (GRE). (Note: The Miller Analogies and Doppel Mathematical Reasoning Test may be substituted for the GRE.)

(2) At least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience.

Admission to a degree program occurs simultaneously with admission to graduate standing and to the Department of Education. No screening examination (other than described above) and no specific coursework are required for admission to a degree program.

The department has an application form for teaching credential, master's, and doctoral degree programs which must be completed in addition to the one used by UCLA Graduate Application Processing.

Application forms and departmental brochures are available from the Office of Student Services, Department of Education, 1009 Moore Hall, UCLA, Los Angeles, CA 90024-1521.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

## Curricular Divisions

### Administration, Curriculum, and Teaching Studies

M102, C191A, 206A, C206D, 220A, 220B, 223, 224, 229, 240, 241, 242, 246A, 246B, 251D, 260, 262A, 262B, 262F, 262J, 272, 273A, 400, 401, 402, 403, 420A, 422, 423, 424A, 424B, 424C, 424G, 437A, 440C, 441A, 441B, 442B, 443, 444A, 444B, 447, 448A, 448B, 470A, 470B, 490A

### Educational Psychology

125A, 125B, 197F, 197G, 205, 212A, 212B, 212C, 213A, 213B, 213C, 214A, 214B, 214D, 214E, 214F, M215, 216, M217A through 217D, 217F, M217G-M217H-M217I, 225A, 225B, 227A, 227B, 227C, 232, 236, 256A, 256B, 257, 258A, 258B, 267, 271A, 280A, 280B, M281A, M281B, M281C, 415A, 415B, 421A, 421C, 421D, 421F, 433A, 433B, 501

### Higher Education and Organizational Change

M148, 180, 181, 192, 209A, 209C, 209D, 214C, 234, 235, 238, 239, 248, 249A, 249B, 259A, 261E, 261F, 262I, 263, 410A-410B, 431A, 431B, 431C, 432, 437B, 461A, 462

### Social Research Methodology

200B, 200C, 202, 206C, 210A through 210E, 211A, 211B, 211C, 218A through 218D, 219, 221, M222A, 222B, 222C, 228, 245, 251A, 251C, 251E, 255A-255B-255C, 411A, 411B, 412A, 412B, 460

### Social Sciences and Comparative Education

M108, 200A, M201C, C203, 204A through 204F, C207, 208A, 208C, C244, 252A, 252B, M252C, 253A through 253I, 254, 300

### Teacher Education

100A-100B, 112, 264, 309A, 309B, 311, 312, 315A-315B, 316A-316B, 318A-318B, 320A-320B, 324A through 324D, 330A through 330D, 360, 409A, 409B, 413A-413B, 481, 489, 491A, 492

### Academic Interinstitutional Programs

313A-313B, 313C-313D, 314A-314B, 317A, 317B, 317C, 319, 321A through 321D, 322A, 322B, 323, 326, 327, 328, 329, 331, 332

### Special Studies

296A-296F, 299A-299B-299C, 310, 375, 498A-498B-498C, 499A-499B-499C, 596, 597, 598, 599

### Undergraduate Specialization in Education Program

91A through 91E, 191B through 191F, 197A-197Z, 199

Specific degree programs and participating divisions or emphases are indicated below. Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each program.

**Master of Education** — Administrative and policy studies in education; bilingual/cross-cultural education; curriculum and the study of schooling; teacher education.

**Master of Arts in Education** — All divisions, except administration, curriculum, and teaching studies.

**Doctor of Education** — All divisions, except social sciences and comparative education.

**Doctor of Philosophy in Education** — All divisions.

## Master of Education

The Master of Education (M.Ed.) *professional* degree program is designed for individuals preparing for mid-level professional positions in schooling or for advanced professional study; it is the appropriate degree to provide professional foundation study in preparation for the Ed.D. program.

### Admission

Requirements are applicable in accordance with the selected field of emphasis:

(1) *Administrative and Policy Studies in Education* — Possession of a valid instructional credential is preferred. Students with a demonstrated commitment to improving American schooling are sought for admission.

(2) *Bilingual/Cross-Cultural Education* — Completion of an approved program of professional preparation leading to a preliminary instructional credential is required, as is classroom experience — as a teacher or aide — for at least two years, at any level of schooling. Evidence of professional competence and conscientiousness, as well as the necessary second-language proficiency, are also required.

(3) *Curriculum and the Study of Schooling* — Persons with above-average capabilities and interest in curriculum and instruction are sought. Experience as a practitioner in the emphasis field is advantageous.

(4) *Teacher Education* — This is a four-term program leading to qualification for a Multiple or Single Subject Instructional Credential and a Master of Education degree. Experience in working with children is advantageous.

### Course Requirements

A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing. Check with your respective division to determine specific course requirements. At least five courses (20 units) must be in the professional education (400) series. No 500-series courses may be applied toward the degree. A directed field experience (Education

498A or 498B or 498C) is required of all M.Ed. students. Courses must be completed with grades of C or better and with a cumulative grade-point average of at least 3.0.

Information regarding specific course requirements in a selected M.Ed. program may be obtained from the Office of Student Services.

## Comprehensive Examination Plan

There is no thesis plan offered in this program. Comprehensive examinations for M.Ed. degrees are offered three times a year, once in Fall, Spring, and Summer Quarters, with the exception of the curriculum and the study of schooling examination which is offered only in Fall and Spring Quarters. They consist of

(1) A written examination designed to assess (a) comprehension of the professional knowledge basic to the selected field of emphasis, including key concepts and principles, major theoretical positions, and fundamental issues and (b) understanding of the broad educational context in which the selected professional field resides.

(2) For curriculum and the study of schooling students, a performance component designed to assess competency in the solution of problems in the selected professional field; a test of whether knowledge can be applied in a real or simulated professional setting.

Information regarding examination foci for any selected M.Ed. program is available from the assigned faculty adviser. The comprehensive examination may be repeated a second time with your adviser's consent if failed the first time. If you fail the examination twice, you must obtain approval of your academic adviser and division to take the examination a third time. No fourth sitting is allowed.

## Master of Arts in Education

The Master of Arts (M.A.) *academic* degree program in Education is designed to meet the needs of individuals preparing for careers in basic research or for advanced graduate study.

### Course Requirements

A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing. Check with your respective division to determine specific course requirements. Six courses (24 units) must be taken in the Education 200 and 500 series. No more than two 500-series courses (eight units) may be applied toward the divisional course minimum and toward the graduate course minimum.

Two research methods courses approved by your faculty adviser are required. Additional courses to complete the 36-unit requirement may be selected from offerings in Education and/or other departments with consent of the assigned faculty adviser and division head. Courses must be completed with grades of C or better and with a cumulative grade-point average of at least 3.0.

## Thesis Plan

Under this plan, you prepare a thesis which is a report of the results of original investigation. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the department and your thesis committee chair.

The theses and dissertations adviser and the Graduate Division publication, *Regulations for Thesis and Dissertation Preparation*, provide guidance in the final preparation of the manuscript. The department does not require a formal examination in connection with the thesis plan.

## Comprehensive Examination Plan

The comprehensive examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as ability to focus that knowledge on specific problems. The examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter, and may be repeated a second time with your adviser's consent if failed the first time. If you fail the examination twice, you must obtain approval of your academic adviser and division to take the examination a third time. No fourth sitting is allowed.

## Doctor of Education

The Doctor of Education (Ed.D.) *professional* degree program is designed to meet the needs of individuals preparing for careers of leadership and applied research in the schools and community educational programs. Major foci include practice, applied studies, and knowledge related to professional skills.

### Admission

To be admitted, you must have a bachelor's degree, at least two years of successful professional experience in education or equivalent (may be completed prior to advancement to candidacy for all divisions except the administration, curriculum, and teaching studies division which requires the experience as a prerequisite to admission), and demonstrated evidence of potential for professional leadership. You are admitted by a division and must formally apply for a change of division.

### Course Requirements

A minimum of 18 courses is required, as follows:

- (1) Three research methods courses, with no more than two introductory (first tier) courses and at least one intermediate/advanced (second tier) course, selected from the departmental list approved for the Ed.D.
- (2) Nine education courses, of which at least six must be from the Education 400 series; all courses must be approved by the faculty adviser.
- (3) Three supplemental courses selected from offerings in the department (outside your

field of emphasis) or in another UCLA professional school or academic department.

(4) A sequential three-term field practicum (Education 499A-499B-499C) in which you engage in field research activities and submit a field research paper or similar product by the end of the sequence.

You may select the remainder of the courses (to complete the required total), which must be in compliance with your division's guidelines and must be approved by your faculty adviser.

Whenever additional academic background is needed, a faculty adviser may require other coursework. Courses must be completed with grades of B – or better and with a cumulative grade-point average of at least 3.0.

### Screening and Qualifying Examinations

The written doctoral screening examination, taken after you complete appropriate coursework determined by your division, is concerned with central topics in your division and field of emphasis. Questions are comprehensive in nature and are designed to measure your breadth and depth of knowledge, as well as to focus that knowledge on specific problems. All students admitted to a doctoral program without a master's degree are required to take the doctoral screening examination. If you are required to take this examination, you are ordinarily not allowed to complete more than nine courses prior to taking the examination (to ensure that you demonstrate basic competencies as early as possible in your doctoral training).

After satisfying the above requirements, you are eligible to take the following qualifying examinations:

- (1) A written examination which tests the core knowledge of the division and emphasis you have selected. The questions reflect a professional orientation. The examination may be repeated a second time with your adviser's consent if failed the first time. If you fail the examination twice, you must obtain approval of your academic adviser and division to take the examination a third time. No fourth sitting is allowed.
- (2) The University Oral Qualifying Examination, conducted by the doctoral committee, which employs topics from education that are related to your written research proposal.

At the present time both written examinations are offered twice yearly, once in Fall Quarter and once in Spring Quarter.

For further information on the screening and qualifying examinations, contact the Office of Student Services.

### Dissertation/Final Oral Examination

The dissertation, required of every candidate for the Ed.D. degree, must embody the results of your independent investigation and must con-

tribute to professional knowledge in education and the improvement of school practice.

The decision as to whether a final oral examination is required is at the discretion of the doctoral committee. The final oral examination may be open to faculty, students, and other interested professionals at the discretion of the dissertation chair and the student.

## Ph.D. in Education

The Doctor of Philosophy (Ph.D.) in Education is a strongly research-oriented *academic* degree designed for individuals preparing for careers in basic research or college-level instruction. Major foci include theory, research methodology, basic studies, and in-depth knowledge in education and an approved cognate field.

### Admission

To be admitted, you must have a bachelor's degree and must demonstrate academic excellence and the potential for scholarly research. You are admitted by a division and must formally apply for a change of division.

### Foreign Language Requirement

The department does not have a foreign language requirement for the Ph.D.; however, the social sciences and comparative education division requires that, once admitted, you must demonstrate reading competence in a language other than English.

### Course Requirements

The program of study is determined by you and the faculty adviser and must conform to division and department requirements. A minimum of 18 courses is required as indicated below; at least 10 must be in the 200 series:

- (1) A sequential three-term research practicum (Education 299A-299B-299C) designed to provide an overview of research in the field of study. You complete a research paper by the end of the sequence.
- (2) Five courses from offerings in your selected division.
- (3) Three upper division or graduate courses from other academic departments of the University related to your proposed area of research (the cognate).
- (4) Three research methods courses, with no more than two introductory (first tier) courses and at least one intermediate/advanced (second tier) course, selected from the departmental list approved for the Ph.D.

You may select the remainder of the courses (to complete the required total), which must be in compliance with your division's guidelines and must be approved by your faculty adviser.

Whenever additional academic background is needed, a faculty adviser may require other coursework. Courses must be completed with grades of B – or better and a cumulative grade-point average of at least 3.0.

## Screening and Qualifying Examinations

The written doctoral screening examination, taken after you complete appropriate coursework determined by your division, is concerned with central topics in your division and field of emphasis. Questions are comprehensive in nature and are designed to measure your breadth and depth of knowledge, as well as to focus that knowledge on specific problems. All students admitted to a doctoral program without a master's degree are required to take the doctoral screening examination. If you are required to take this examination, you are ordinarily not allowed to complete more than nine courses prior to taking the examination (to ensure that you demonstrate basic competencies as early as possible in your doctoral training).

After satisfying the above requirements, you are eligible to take the following qualifying examinations:

(1) A written examination which tests the core knowledge of the division and emphasis you have selected. The questions reflect a research and theoretical orientation. The examination may be repeated a second time with your adviser's consent if failed the first time. If you fail the examination twice, you must obtain approval of your academic adviser and division to take the examination a third time. No fourth sitting is allowed.

(2) The University Oral Qualifying Examination, conducted by the doctoral committee, which employs topics from both education and the cognate discipline(s) that are related to your written research proposal.

At the present time both written examinations are offered twice yearly, once in Fall Quarter and once in Spring Quarter.

For further information on the screening and qualifying examinations, contact the Office of Student Services and the respective divisions.

## Dissertation/Final Oral Examination

The dissertation, required of every candidate for the Ph.D. degree, must embody the results of your independent investigation, must contribute to the body of theoretical knowledge in education, and must draw on interrelations of education and the cognate discipline(s).

The decision as to whether a final oral examination is required is at the discretion of the doctoral committee. The final oral examination may be open to faculty, students, and other interested professionals at the discretion of the dissertation chair and the student.

## Cooperative Degree Programs

General information regarding the following cooperative degree programs is available from the Office of Student Services, 1009 Moore Hall.

## J.D./Education Program

The Department of Education and the School of Law offer a concurrent plan which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both areas, students are awarded both degrees on its completion.

## M.A.-Latin American Studies/M.Ed.

The Department of Education and the Latin American Studies Program offer an articulated degree program which allows students to combine study for the M.A. in Latin American Studies and the M.Ed., with an emphasis in curriculum. Articulated programs do not allow course credit to be applied toward more than one degree.

## UCLA/CSULA Joint Ph.D. in Special Education

A joint Ph.D. program in Special Education is offered by UCLA and California State University-Los Angeles. The goal of the joint program is to prepare teachers and college instructors of high competence in the various fields of special education. Specific information regarding emphases and requirements is available from the joint doctoral adviser at UCLA or the chair of the Department of Special Education at CSULA.

## Certificate (Credential) Programs

The California Commission on Teacher Credentialing has authorized the Department of Education to offer professional programs that lead to (1) the Multiple Subject Instructional Credential with the CLAD (Cross-Cultural Language and Academic Development)/BCLAD (Bilingual Cross-Cultural Language and Academic Development) emphasis, (2) the Single Subject Instructional Credential with the CLAD/BCLAD emphasis, and (3) the Administrative Services Credential.

## Lower Division Courses

**91A. Infant Care and Development.** Using scientific methods to answer questions about how to raise children, educational researchers, psychologists, and anthropologists try to replace myths and anecdotes with a verifiable understanding of children's development and problems and choices that parents face in raising children.  
Mr. Blurton Jones

**91B. Child Care: Research, Practice, and Policy.** Examination of psychological research on influences of early child care on children's concurrent and subsequent development, with this research linked to basic research in developmental psychology and education. Discussion of influence of research on the policy process.  
Ms. Howes

**91C. Elementary and Secondary Education.** Upper division standing preferred. Social sciences overview of major policy issues in American public education. General introduction to social sciences research in analysis of educational policy issues and to methods for exploring major policy issues. Topics include school finance, equal educational opportunity, testing and evaluation, teacher compensation, and school law.  
Mr. Bruno

**91D. The Teaching Profession.** Upper division standing preferred. Introduction to the field of education. Experts within Department of Education and experienced school personnel present a variety of topics in education and provide opportunity to visit diverse educational settings.

**91E. Perspectives of the American College.** Examination of historical conditions that have shaped American higher education and consequent differential characteristics, trends, and practices that bear on dynamics and impacts of contemporary colleges. Emphasis on interrelated research, academic, social, and policy issues underlying the diverse system of American higher education.  
Mr. Trent

## Upper Division Courses

**100A-100B. Social Foundations and Cultural Diversity in American Education (2 units each).** (Formerly numbered 100.) Lecture, one hour; discussion, one hour. Prerequisite: credential program standing:

**100A.** Intensive consideration of American society, particularly its cultural diversity. Topics include historical development of American society, manifestations of cultures, and ways to learn about students' cultures. Examination of issues of racism, ethnic and gender differences, and students' personal attitudes toward people of different cultural, linguistic, and racial backgrounds.  
Mr. Rust and the Staff

**100B.** Intensive consideration of American society and perspectives of cultural diversity in the U.S. and California, and its impact on education and classroom instruction, with focus on cultural contact, dynamics of prejudice, clashes between values, and strategies for conflict resolution. Use of historical, philosophical, and sociological perspectives.  
Mr. Rust and the Staff

**M102. The Mexican American and the Schools.** (Same as Chicana and Chicano Studies M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.  
Mr. Solorzano (W)

**M108. Sociology of Education.** (Same as Sociology M175.) Prerequisite: Sociology 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

**112. Psychological Foundations of Education.** Prerequisite: consent of instructor. Analysis of learning processes in school situations. Processes of human motivation, affective, cognitive, social, and personal development of children and adolescents, evaluation of learning, individual differences, and implications of relevant theory and research for instructional practices.  
(F)

**125A. Education of Exceptional Individuals.** Prerequisite: Psychology 10 or equivalent. Introduction to the field of special education, with emphasis on psychology of individual differences, learning characteristics of exceptional individuals, and application of research and theory to special education problems.  
Mr. Ariles (F,W,Sp)

**125B. Principles for Teaching Exceptional Individuals.** Prerequisite: consent of instructor. Approaches for teaching exceptional individuals in special and regular education programs. Principles and assumptions underlying alternative approaches. Emphasis on individualizing curriculum and classroom management.  
(W)

**M148. Women in Higher Education.** (Same as Women's Studies M148.) Limited to juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.  
Ms. Astin (W)

**180. Social Psychology of Higher Education.** Overview of significant studies in social psychology of higher education. Focus on institutional characteristics and students' interpersonal and intrapersonal processes, with special emphasis on identifying and explaining effects of college experience on student development and achievement. Mr. Trent and the Staff (F)

**181. Advanced Topics in Social Psychology of Higher Education.** Lecture, three hours; discussion, one hour. Prerequisites: course 180, consent of instructor. Critical analysis of social psychological inquiry into college attendance, preparation, persistence, and outcomes. Examination of intellectual and personal development of individuals vis-à-vis differential college environments and instructional experiences with respect to students' gender, culture, motivation, involvement, and expectations. Mr. Anderson, Mr. Trent (F)

**C191A. Philosophy of Education: Ethics and Values.** Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C206D.

**191B. Issues in Education: Historical Perspective.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Exploration of such controversial issues in American education as access, diversity, parental choice, cultural literacy, teacher empowerment, and role of popular media in historical perspective. Mr. S. Cohen

**C191C. Economics of Education.** Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C244. Mr. Bruno, Mr. Jamison (W)

**C191D. Politics of Education.** Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C207. Mr. Hawkins, Mr. Torres (Sp)

**C191E. Educational Anthropology.** Recommended (but not prerequisite): Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C203. (Sp)

**191F. Educational Psychology.** Broad overview of educational psychology, with examination of relationship of teaching and learning; various perspectives as to how children learn; issues of teaching and learning that arise based on child's social class, ethnic background, gender, age, and level of ability. Mr. Hodapp (Sp)

**192. Theory and Practice of the Teaching and Learning Function.** Lecture, three hours; practicum placement. Prerequisite: consent of instructor. Analysis of learning theory and teaching practice in light of research on student characteristics, learning environments, student/instructor interaction, and outcomes of instruction. Application of theory and research to practice. Mr. Barbee, Mr. Trent (Sp)

**197A-197Z. Current Issues in Education.** (Formerly numbered 197.) Lecture, three to four hours. Prerequisite: upper division standing. Variable topics course organized on selected current issues basis, integrating field observations and readings through seminar discussions. Consult *Schedule of Classes* for topics and instructors:

**197F. Laboratory in Education of Exceptional Children.** (Formerly numbered 325A.) Lecture, one hour; laboratory, six to eight hours. Prerequisite: course 125A or consent of instructor. Six to eight hours per week of observation, research, and teaching of children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

**197G. Advanced Laboratory in Education of Exceptional Children.** (Formerly numbered 325B.) Lecture, one hour; laboratory, six to eight hours. Prerequisite: course 197F. Six to eight hours per week of research, teaching, and multidisciplinary team participation with children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

**199. Special Studies.** Prerequisites: senior standing, consent of instructor. To be arranged with faculty member who will direct the study.

## Graduate Courses

**200A. Historical Research and Writing.** Methods of historical research and writing for students who are or who will be engaged in research and in report or paper or thesis writing, regardless of their field of interest. Mr. S. Cohen

**200B. Survey Research Methods in Education.** Prerequisite: course 210A or equivalent. Problems of conceptualization, organization, and gathering non-experimental and quasi-experimental quantitative and qualitative data. Mr. O'Shea

**200C. Analysis of Survey Data in Education.** Lecture, three hours; laboratory, two hours. Prerequisite: course 200B. Introduction to techniques of processing and analyzing nonexperimental and quasi-experimental quantitative data. Mr. O'Shea

**M201C. History of American Education.** (Same as History M264.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today. Mr. S. Cohen (Sp)

**202. Evaluation Theory.** Prevalent evaluation theories, systems for categorizing these theories, and process of theory development in educational evaluation. Mr. Alkin

**C203. Educational Anthropology.** Recommended (but not prerequisite): Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C191E. (Sp)

**204A. Introduction to Education and the Social Sciences.** Prerequisite: consent of division. Interdisciplinary course intended to introduce students to study of educational issues, texts, and movements of thought through social sciences and comparative perspectives. Mr. S. Cohen, Mr. Jamison, Mr. O'Shea, Mr. Solorzano (F)

**204B. Introduction to Comparative Education.** Examination of conceptual and methodological questions underlying comparative education. Particular attention to development of the field and to styles of social analysis which may be applied to comparative and cross-national studies in education. Mr. Rust, Mr. Torres

**204C. Education and National Development.** Prerequisite: graduate standing or consent of instructor. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of the world. Mr. Hawkins (W)

**204D. Minority Education in Cross-Cultural Perspective.** Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems. Mr. Nakanishi, Mr. Solorzano

**204E. International Efforts in Education.** Prerequisite: graduate standing or consent of instructor. Critical analysis of complex world of "development cooperation," with particular reference to bilateral and multilateral efforts in education.

**204F. Nonformal Education in Comparative Perspective.** Comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. Types of programs include, among others, consciousness raising, community action, skills training, literacy, and extension programs. Mr. Torres (F)

**205. Computers in the Educational Process.** Introduction to theory, experimentation, evaluation, and future of computer systems in education, with emphasis on computer-assisted instruction (CAI), and use of computers to teach programming and to foster development of writing, computational, and filing skills. Ms. Dorr (F)

**206A. Philosophy of Education: Introduction.** Systematic introduction to the field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values.

**206C. Introduction to Conceptual Analysis.** Conceptual analysis of recurrent and contemporary themes in the field. Emphasis on development of logical and linguistic skills used in analysis of educational problems and issues.

**C206D. Philosophy of Education: Ethics and Values.** Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C191A.

**C207. Politics of Education.** Prerequisite: one approved research methods course required for master's or doctoral degree. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C191D. Mr. Hawkins, Mr. Torres (Sp)

**208A. Perspectives on the Sociology of Education.** Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher/student relationships, reform in education at elementary, secondary, postsecondary levels. Mr. O'Shea (F)

**208C. Explanation in the Social Sciences and Educational Research.** Lecture, two hours; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Overview of basic strategies and forms of explanation relevant to inquiry in education from vantage point of various social and behavioral sciences disciplines. Mr. Blurton Jones

**209A. History of Higher Education.** Examination of development of postsecondary education in the U.S., with attention to social context and to scope and variety of institutions. Mr. A. Cohen

**209C. Problems in Research and Evaluation in Higher Education.** Critical review of research and evaluation studies of higher education, with special attention to need for studies of new programs and problems, and to design and methodology of evaluative research. Mr. Astin and the Staff

**209D. System of Higher Education.** Analysis of structure and function of American postsecondary education from systems perspective. Emphasis on structure of system and comparative characteristics (faculties, student bodies, finances, outputs) of different types of institutions. Mr. Astin and the Staff

**210A. Introduction to Research Design and Statistics.** Fundamentals of research design. Language of research. Planning and conduct of research. Interpretation and reporting of research outcomes. Introduction to descriptive statistics: mean, median, mode, variance. Introduction to normal curve. Mr. Seltzer (F,W)

**210B. Statistical Inference.** Prerequisite: knowledge of research designs and univariate descriptive statistics. Regression, correlation, inference, normal curve tests, t-tests, simple and factorial analysis of variance, and selected nonparametric tests. Mr. Seltzer, Ms. Webb (F,W,Sp)

**210C. Analysis of Variance.** Prerequisite: course 210B or equivalent. Completely randomized designs, randomized block designs, nested designs, and their combinations into advanced factorial designs using fixed, random, and mixed models. Analysis of covariance, introduction to multiple regression and quasi-experimental designs.  
Mr. Ender (W,Sp)

**210D. Multivariate Analysis.** Prerequisite: course 210C or equivalent. Review of multiple regression analysis, analysis of covariance. Introduction to matrix algebra. Introduction to multivariate normal distribution. Multivariate analysis of variance. Linear discriminant function. Analysis of repeated measurements. Canonical correlation. Principal components.

**210E. Factor Analysis.** Prerequisites: courses 210D, 211B. Exploratory factor analysis, rotations, confirmatory factor analysis, multiple-group analysis.  
Mr. Muthén

**211A. Measurement of Educational Achievement and Aptitude.** Prerequisite: course 210A. Critical study of tests of achievement and aptitude, with emphasis on group tests; relation of achievement to aptitude; social implications of measurement of intelligence; elements of validity and reliability.  
Mr. Alkin (F)

**211B. Measurement in Education: Underlying Theory.** Prerequisite: course 211A. Measurement theory as applied to testing, focusing primarily on classical test theory; implications of theories for test construction and selection; current status of validity and reliability theory.  
Ms. Webb (W)

**211C. Item Response Theory.** Prerequisites: courses 210C, 211B, or equivalent. Item response theory, applications to educational achievement tests, item bias, test information, test equating, computerized adaptive testing.  
Mr. Muthén (Sum)

**212A. Learning and Education.** Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction.  
(F)

**212B. Motivation and Affect in Educative Processes.** Prerequisites: courses 210A, 212A. Review of theoretical and empirical literature on motivational factors in school settings and conditions for acquisition of affective outcomes.  
Ms. Graham (W)

**212C. Cognition and Creativity in Education.** Prerequisite: course 212A. Review of theoretical and empirical literature on cognitive processes in school learning, including knowledge acquisition, comprehension, metacognition, and creativity.  
Mr. Wittrock (Sp)

**213A. Counseling Psychology in School and Community.** Analysis and in-class application of student personnel service theory and methods, with emphasis on student assessment and development, task groups, and evaluation.  
Mr. Healy (F)

**213B. Legal and Ethical Issues in Counseling Psychology.** Prerequisite: course 213A. Ethical and legal codes relevant to psychological services in schools and community; relation of value systems and personality; case studies in implications of personal values in counseling situations.  
Mr. Berry (Sp)

**213C. Group Counseling Theory and Process.** Lecture, three hours; discussion, one hour. Prerequisites: courses 213A, 214A, and 214B, or consent of instructor. Group productivity, leadership in groups, social perception, attitude formation, and effect of behavior changes in individuals and groups. Evaluation of social, psychological, and educational principles related to therapeutic experiences of individuals in small groups.  
Mr. Berry, Ms. Tidwell (W)

**214A. Counseling Theory and Practice.** Alternatives in counseling practice in relation to theories of personality development and functioning, research on effectiveness of counseling, professional issues in counseling, educational aspects of counseling.  
Mr. Healy, Mr. Skager (F)

**214B. Advanced Counseling Theory and Practice.** Limited to advanced degree candidates whose major interest is counseling and to selected high school and college counselors. Counseling procedures, educational planning, and methods for helping students handle personal problems that interfere with school progress; critical evaluation of procedures.  
Mr. Healy (W)

**214C. Principles of Career Planning.** Examination of nature of careers across ages and ethnic and sexual groups in order to determine implications for career planning in postindustrial society.  
Mr. Healy (Sp)

**214D. Career Counseling.** Depth study of current theories, principles, problems, and practices of career counseling.  
Mr. Berry, Mr. Healy (Sp)

**214E. Substance Abuse and Addiction.** Theory and practice of prevention and intervention in substance abuse and addiction from perspective of counseling and educational practice.  
Mr. Skager (W)

**214F. Student Problems: Social Context.** Designed to assist students in understanding the configuration of social forces that lead to student dysfunctions. Consideration of a number of contemporary social problems that are of concern to school counselors, educators in general, and behavioral scientists.  
Mr. Skager, Mr. Weinberg (Sp)

**M215. Personality, Motivation, and Attribution.** (Same as Psychology M239.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

**216. Counseling Models from a Cross-Cultural Perspective.** Prerequisite: course 213A or consent of instructor. Research related to psychological, educational, and sociological characteristics of counseling clients within a cross-cultural perspective and implications for counseling models. Evaluation of counseling practices through analysis of school, community, and mental health settings.  
Mr. Berry, Ms. Tidwell (F)

**M217A. Social Development and Education.** (Same as Psychology M242D.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.  
Ms. Howes (W)

**217B. Cognitive Development and Education.** Prerequisite: graduate standing. Critical review of theories and research in cognitive development, focusing on work of Piaget and Vygotsky, and relation of this work to issues in educational practice.  
Mr. Saxe (F)

**M217C. Personality Development and Education.** (Same as Psychology M245.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.  
Ms. Dorr (Sp)

**217D. Language Development and Education.** Research and theory on how children develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectical issues.  
Ms. Valadez

**217F. Human Development and the Educational Process.** Cognitive and social development; cultural, family, peer, and schooling influences on human development; application of developmental theory and research to educational practice.  
Ms. Howes, Mr. Saxe, Ms. Stipek (W)

**M217G-M217H-M217I. Child Abuse and Neglect (2 units, 2 units, 1 unit).** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Course M217G is prerequisite to M217H, which is prerequisite to M217I. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies.

**218A. Multiple Regression Analysis.** Prerequisite: course 210B. Regression-based techniques for analyzing quantitative data; multiple regression methods, multiple correlation, partial correlation; introduction to general linear model, with direct application to educational inquiry.  
Ms. Webb and the Staff (F,W,Sp)

**218B. Advanced Quantitative Models in Non-experimental Research: Multilevel Analysis.** Prerequisites: course 218A or equivalent, consent of instructor. Examination of conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities); consideration of alternative analytical models.  
Mr. Seltzer (W)

**218C. Structural Equation Modeling.** Prerequisites: courses 210D, 210E, 218B, or equivalent. Extends path analysis (causal modeling) by considering models with measurement errors and multiple indicators of latent variables. Confirmatory factor analysis, covariance structure modeling, and multiple-group analysis. Identification, estimation, testing, and model building considerations.  
Mr. Muthén (W)

**218D. Analysis of Categorical and Other Nonnormal Data.** Prerequisites: courses 210D, 210E. Regression analysis with dichotomous and polytomous dependent variables, log-linear modeling, coefficients of association for categorical variables, factor analysis, and structural equation modeling.  
Mr. Muthén (Sp)

**219. Laboratory: Advanced Topics in Research Methodology.** Provides assistance in design of research and interpretation of data to advanced students from other divisions. Coverage of special topics not included in other courses on research methods.  
(F,W,Sp)

**220A. Inquiry into Schooling: Organization and Change.** Critical analysis of issues in reconstruction of schooling; concepts of function and structure of schooling; organization theory; systems approaches in analysis of organization development and change.  
Ms. Oakes

**220B. Inquiry into Schooling: Curricular Problems and Policy Issues.** Inquiry into curriculum of schooling. Critical analysis of relationship of curricular decision making to social system and contextual variables.  
Ms. Oakes

**221. Computer Analyses of Empirical Data in Education.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 209C (section 1), 210A, or equivalent. Designed to develop conceptual and technical skills needed for designing and executing empirical research utilizing statistical packages. Each student conducts two original studies. Equal emphasis on techniques of data analysis and interpretation of results.  
Mr. Astin (W)

**M222A. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M236Q, Psychiatry M235, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.  
Mr. Levine, Ms. McDonough

**222B. Design Issues in Naturalistic Research.** Lecture, three hours; discussion, one hour. Prerequisite: course M222A or consent of instructor. Issues in conceptualization and design of naturalistic research studies, particularly within educational settings. Specific topics include problem definition and focus, units of observation, sampling, controlled comparisons and meaningful variation, and reliability/validity concerns in observational research. Special attention to ethnographic studies. Mr. Levine

**222C. Qualitative Data Reduction and Analysis.** Lecture, two hours; discussion, two hours. Prerequisite: course M222A or 222B or consent of instructor. Theory of and practice in qualitative data reduction and analysis. Discussion of data storage and retrieval systems, data manipulation techniques such as typologies and attribute spaces, and specific analytic perspectives. Interfacing qualitative and quantitative data. Mr. Levine (Sp)

**223. Aesthetics and the Curriculum.** Lecture, two hours; discussion, two hours. Examination of various ideas and theories in aesthetics and application of these in schooling contexts. Mr. Weinberg

**224. Problems and Issues in Bilingual and Multicultural Education.** Introduction to development and implementation of bilingual and multicultural programs in the U.S. Analysis of program goals, models, typologies, and effectiveness. Ms. Valadez

**225A. Issues in Education of Exceptional Individuals.** Prerequisite: graduate standing. Analysis of major research regarding contemporary trends, issues, and programs for the exceptional; consideration of commonalities and differences among exceptional individuals. Ms. Kasari (F)

**225B. Advanced Issues in Education of Exceptional Individuals.** Prerequisite: consent of instructor. Synthesis of developmental and educational theory relevant to study of exceptional individuals, including consideration of historical context of current research and applied issues in special education. Mr. Hodapp (F)

**227A. Research on Learning Characteristics of Exceptional Individuals.** Prerequisite: course 225B. Overview of research and theory regarding learning characteristics of exceptional individuals and discussion of application of this work to educational practice. Mr. Artiles, Ms. Kasari (Sp)

**227B. Research on Cognitive and Language Characteristics of Exceptional Individuals.** Prerequisite: course 227A. Review of empirical and theoretical literature regarding language and cognitive development of exceptional individuals; focus on intervention programs developing language and cognition. Mr. Hodapp (W)

**227C. Research on Behavioral and Social Characteristics of Exceptional Individuals.** Prerequisite: course 227B. Analysis of social and emotional development of exceptional individuals and development of social competence in special education programs. Ms. Kasari (W)

**228. Observation Methods and Longitudinal Studies.** Lecture, two hours; discussion, two hours. Prerequisites: course 210A or equivalent, consent of instructor. Design of observational and longitudinal studies. Formulation of study conclusions concerning influences on children's development. Conduct of observations; processing and analysis of data. Use of portable computers for recording observations. Mr. Blurton Jones (Sp)

**229. Special Studies on Educational Policy and Planning.** Research on selected topics in fields of administration, policy, curriculum, and teaching studies and on conceptualization of hypotheses and research programs on division topics and issues. Mr. Bruno, Ms. Oakes, Ms. Wells

**232. Instructional Analysis.** Prerequisite: consent of instructor. Theoretical and empirical analysis of instructional variables as they relate to diverse types of instructional strategies. Development of skill in techniques of conducting instructional research. Ms. Baker (W)

**234. Education and Social Stratification.** Relationship between education and components of social stratification, including occupations and earnings. Competing theories used in studying education and social stratification; relevant research. Conclusions regarding individual career decisions, social policies, and theories of society.

**235. Education and Work.** Review of theoretical and empirical literature on issues concerning interface of education and work. Review of alternatives in school-to-work transition of youth and appraisal of present vocational training and manpower development programs.

**236. Human Abilities.** Prerequisite: course 210B or equivalent. Nature, development, and measurement of intellectual abilities and their relations to learning and instruction. Review of research and theory of models of ability and test development. Ms. Webb

**238. Cross-National Analysis of Higher Education.** Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change. (Sp)

**239. Organization and Governance of Educational Systems.** Academic organizations, precollegiate and postsecondary, are most appropriately studied as complex, professionalized organizations. Emphasis on characteristics of educational institutions and systems as organizations: environmental relations, governance structures, processes, and patterns of decision making and policy-making. Mr. Koltai, Ms. McDonough (Sp)

**240. Cultural Foundations of U.S. Education: Policy and Practice.** Prerequisite: graduate standing or consent of instructor. Cultural foundations of persistent and troubling issues and tensions in American educational policy-making and practice. Ms. Oakes

**241. Research Methodology in School Administration.** Prerequisite: consent of instructor. Examination of research problems and strategies in school administration. Mr. Catterall

**242. Economic Analysis for Educational Policy and Planning.** Prerequisite: graduate standing. Introductory course focusing on concepts and quantitative methods from economics, statistics, and operations research applied to educational policy and planning issues. Instruction in programming microcomputers for instruction (BASIC) and management information systems (dBASE). Mr. Bruno

**C244. Economics of Education.** Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C191C.

Mr. Bruno, Mr. Jamison (W)

**245. Seminar: Cost-Benefit Analysis in Education.** Conceptual and theoretical underpinnings of cost-benefit analysis, critical analysis of current cost-benefit studies, and procedures for conduct of cost-benefit studies. Mr. Jamison (Sp)

**246A. Seminar: Mathematical Modeling in Educational Policy Analysis.** Prerequisite: course 242 or consent of instructor. Stochastic and deterministic modeling techniques as applied to educational policy and planning issues. Mathematics review and instruction in use of MPS (Mathematical Programming System) and development of software for Monte Carlo computer simulation studies in education. Mr. Bruno

**246B. Seminar: Operations Research — Systems Analysis in Education.** Prerequisite: course 242 or consent of instructor. Application of advanced mathematical modeling techniques of operations research to educational policy and planning. Design of computer-based management information systems in education using dBASE. Mr. Bruno

**248. Seminar: Perspectives on Lifelong Learning.** From interdisciplinary perspective, lifelong learning is studied theoretically and as an area of educational research, policy, and practice. Conceptual distinctions among major proponents of lifelong learning and implications for schooling.

**249A. Seminar: National Evaluations of Postsecondary Education.** Critical review of national evaluation studies of higher education, including programs of general education and professional and graduate school programs; emphasis on design, methodology, and interpretation of large-scale evaluation studies. Mr. Astin

**249B. Seminar: Institutional Research and Program Evaluation.** Critical review of institutional evaluation studies, with consideration of scope of information needed for various purposes and problems of interrelating this information to appraise overall institutional functioning and effectiveness. Mr. Trent

**251A. Seminar: Philosophy of Education, Epistemology.** Prerequisite: consent of instructor.

**251C. Seminar: Philosophy of Education, Social Science Problems — Methodological Perspectives.** Prerequisite: course 206C or consent of instructor.

**251D. Seminar: Philosophy of Education, Problems in Ethics and Values.** Prerequisite: course C206D or consent of instructor.

**251E. Seminar: Philosophy of Education, Selected Issues.**

**252A. Seminar: Educational Organizations.** Prerequisite: course 208A or consent of instructor.

**252B. Seminar: Education and Social Change.** Prerequisite: course 208A or consent of instructor. (Sp)

**M252C. Human Resources and Economic Development.** (Same as Community Health Sciences M236.) Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments. Mr. Jamison (Sp)

**253A. Seminar: Current Problems in Comparative Education.** (Sp)

**253B. Seminar: African Education.** Prerequisite: graduate standing or consent of instructor. Contemporary issues in African educational systems, including questions of access and equity, quality and efficiency, relevance and responsiveness, links between schools and communities, and policy and practice in education.

**253C. Seminar: Asian Education.**

Mr. Hawkins (Sp)

**253D. Seminar: Latin American Education.**

Mr. Torres (W)

**253E. Seminar: European Education.** Mr. Rust

**253F. Seminar: Education in Revolutionary Societies.** Multidisciplinary and comparative study of socialist educational theory examined through writings of Marx, Lenin, Mao, and others. Implementation of this theory in specific case studies, along with comparative assessments of nonsocialist nations. Mr. Hawkins, Mr. Rust

**253G. Seminar: The Asian American and Education.** Basic issues and topics related to Asian Americans in the field of education. Examples of issues and topics include Asian Americans and the community, socioeconomic status, education-to-work transition, language and culture question. Mr. Nakanishi (F)

**253H. Seminar: The Chicano/Hispanic and Education.** Basic issues and topics related to the Chicano and other Hispanic groups in education. Review of literature on specific educational levels and Chicano/Hispanic student progress (e.g., early childhood, elementary, higher education); specific topics: assessment, access, tracking, segregation; implications for schooling. Mr. Solorzano (Sp)

**253I. Education and Social Change in the Middle East and Islamic World.** Critical and analytic examination of historical and current role of traditional and modern (Western) education in affecting social, political, and economic changes in countries of the Middle East and Islamic world (including Pacific Rim, South and Central Asia). Mr. Rust and the Staff (W,Sp)

**254. Seminar: History of Education.** Prerequisite: course M201C. Study of current movements in historiography of education and critical reading of texts in history of education. Mr. S. Cohen

**255A-255B-255C. Seminars: Special Topics.** Prerequisite: consent of instructor. May be repeated for credit. **255A.** Measurement; **255B.** Design; **255C.** Data Analysis.

**256A. Seminar: Special Topics in School Learning.** Prerequisite: consent of instructor.

Ms. Graham, Mr. Wittrock (F)

**256B. Seminar: Special Topics in Development.** Prerequisite: consent of instructor.

Ms. Feshbach, Ms. Howes, Mr. Saxe, Ms. Stipek

**257. Seminar: Research in Counseling Psychology.** Prerequisite: consent of instructor. In-depth analysis of selected research approaches/areas in counseling psychology.

Mr. Skager and the Staff

**258A. Seminar: Problems in Instructional Research.**

Mr. Levine, Mr. Wittrock (Sp)

**258B. Seminar: Problems in Instructional Development.**

(Sp)

**259A. Seminar: Research on Characteristics of Students.** Analysis of concepts, methodology, and conclusions or implications underlying and resulting from major research on student characteristics. Emphasis on differential impact of higher education on student and faculty development.

Mr. Trent (F)

**260. Seminar: Principles of Curriculum and Instruction.**

**261E. Seminar: Education and Work.**

Mr. Wilms (Sp)

**261F. Seminar: Cognitive and Personal Development of College Students.** Examination of cognitive development of college students; issues of personal and social development, including leadership, and interpersonal relations and skills.

Ms. Astin

**262A. Seminar: The Social Studies.**

Ms. Gutierrez

**262B. Seminar: Reading.**

Ms. Gutierrez

**262F. Seminar: Research Topics in Bilingual/Multicultural Education.** Prerequisite: consent of instructor.

Ms. Valadez

**262I. Seminar: Contemporary Issues in Education and Work.**

Mr. Wilms

**262J. Seminar: Economic Education.**

**263. Seminar: Higher Education.**

**264. Seminar: Teacher Education.** Prerequisite: consent of instructor. Research, issues, and practices in preservice and in-service teacher preparation, evaluation, and certification. Social, philosophical, and methodological issues and current trends in America and abroad. Opportunities to observe, participate in, and discuss teacher education programs.

(W)

**267. Seminar: Educational Technology.**

Ms. Baker, Ms. Dorr (F)

**271A. Proseminar: Educational Psychology (2 units).** Introduction to a variety of research issues in the field of educational psychology, including topics related to human development, learning and instruction, counseling, and special education, and to different methodological approaches used to study them.

Ms. Stipek

**272. Case-Study Research in Education Policy and Practice.** Use of case-study methods in education research, providing opportunities for applying methodological skills to actual case-study research projects. Focus on single and multiple case studies that investigate issues in education policy and practice.

Ms. Oakes, Ms. Wells

**273A. Structure and Dynamics of Educational System.** Lecture, two hours; discussion, two hours. Overview of school administration, teaching, curriculum, and policy studies. Focus on American education as an institutional system wherein federal, state, and local policy, school administration, curriculum theory and design, and teaching are inextricably connected in the delivery of education.

Mr. Bruno, Ms. Oakes, Mr. Weinberg

**280A. Seminar: Selected Topics in Special Education (2 to 6 units).** Prerequisite: consent of instructor. Focus on research and clinical problems in special education. Introduction to a range of clinical services and research strategies. Exploration of current topics in the field.

Mr. Ariles, Mr. Hodapp, Ms. Kasari (Sp)

**280B. Seminar: Exceptional Individuals.** Prerequisite: doctoral standing.

Ms. Kasari (F,W,Sp)

**M281A. Seminar: Human Behavioral Ecology.** (Same as Anthropology M229A and Psychiatry M279A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology.

Mr. Blurton Jones

**M281B. Seminar: Reproduction, Families, and Parenting.** (Same as Anthropology M229B and Psychiatry M279B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences.

Mr. Blurton Jones

**M281C. Seminar: Selected Topics in Human Ethology.** (Same as Anthropology M229C and Psychiatry M279C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins.

Mr. Blurton Jones

**296A-296F. Seminars: Research Topics in Education (2 units each).** Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in education. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**299A-299B-299C. Research Practicum: Education (4 to 8 units each).** May be repeated for credit.

(F,W,Sp)

**300. Dissertation Writing Workshop: Interdivisional Seminar.** Lecture, one hour; discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Limited enrollment. Introduction for doctoral candidates to dissertation writing as a genre that can be analyzed or broken down with its constituent parts and, vice versa, which is constructed out of materials that can be identified and analyzed. S/U grading.

Mr. S. Cohen (W)

**309A. Methodologies in Teaching Bilingual and English Language Development (3 units).** Lecture, two hours; discussion, one hour. Prerequisite: credential program standing. Pedagogy for bilingual and English development instruction. Topics include legal foundations of bilingual programs, educational issues, organizational approaches, and communicative approach; discussion of instructional strategies and activities.

(F,W)

**309B. Language Development in Content (3 units).** Lecture, two hours; discussion, one hour. Prerequisite: credential program standing. Discussion of competencies needed by all content area teachers of limited English-proficient students, including strategies for teaching in and through English. Designed to assist classroom teachers in developing their knowledge and necessary skills to assure English language learners access to core curriculum.

**310. Professional Communication for Graduate Students in Education (2 units).** Prerequisite: consent of instructor. Writing workshop on students' papers in progress to ensure professional standards. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

**311. Principles and Methods of Computer Literacy and Classroom Application — K-12 (2 units).** Lecture, one hour; laboratory, 30 minutes. Prerequisite: consent of department. Introduction to use of computers in educational environment. Discussion of issues on why and how to integrate computers into curriculum and hands-on practice which allows students to demonstrate skills discussed. S/U grading.

(W,Sp)

**312. Basic Principles of Curriculum and Instruction.** Prerequisite: consent of instructor. Analysis and practice of basic principles and concepts for planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of a variety of instructional strategies and their application in elementary and secondary schools. (F)

**313A-313B. Principles and Methods for Teaching Elementary Mathematics (6 to 12 units each).** Prerequisite: consent of instructor. Course 313A is prerequisite to 313B. Problem-solving strategies and geometry for elementary teachers. Use of concrete materials, computers, calculators, cooperative learning, and content for elementary teachers. S/U grading.

Ms. Hakansson (Sum)

**313C-313D. Principles and Methods for Teaching Secondary Mathematics (6 to 12 units each).** Prerequisite: consent of instructor. Course 313C is prerequisite to 313D. Problem-solving strategies in algebra, geometry, and trigonometry for secondary mathematics teachers. Use of concrete materials, computers, calculators, cooperative learning, and content for secondary teachers. S/U grading.

Ms. Hakansson (Sum)

**314A-314B. Principles and Methods for Curriculum, Instruction, and Leadership in Mathematics (6 to 12 units each).** Prerequisite: consent of instructor. Course 314A is prerequisite to 314B. Problem solving, curriculum development, implementation of California Mathematics Framework, strategies for encouraging women and minorities into mathematics, and leadership development. S/U grading.

Mr. Baker, Ms. Priselac (Sum)

**315A-315B. Principles and Methods for Teaching Reading for Multiple Subject Instruction (2 units each).** Prerequisite: consent of instructor. Course 315A is prerequisite to 315B. Reading instruction in elementary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading. (F,W)

**316A-316B. Principles and Methods for Teaching Reading for Single Subject Instruction (2 units each).** Prerequisite: consent of instructor. Course 316A is prerequisite to 316B. Reading instruction in secondary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading. (F)

**317A. Principles and Methods for Teaching Elementary Science — K-2 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades K-2. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**317B. Principles and Methods for Teaching Elementary Science — 3-4 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 3-4. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**317C. Principles and Methods for Teaching Elementary Science — 5-6 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 5-6. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**318A-318B. Principles and Methods for Multiple Subject Instruction (2 units each).** Prerequisite: consent of instructor. Course 318A is prerequisite to 318B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in elementary schools. Observation and participation in schools. S/U grading. (F,W)

**319. Principles and Methods for Teaching Composition — 1-12 (6 to 12 units).** Prerequisite: consent of instructor. Drawing from current research and theory, participating teachers expand their repertoire of techniques for teaching writing and literature. Focus on drawing on expertise of classroom teachers and becoming teacher-writers in addition to writing teachers. S/U grading. Ms. Peitzman, Ms. Williams (Sum)

**320A-320B. Principles and Methods for Single Subject Instruction (2 units each).** Prerequisite: consent of instructor. Course 320A is prerequisite to 320B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in secondary schools. Observation and participation in schools. S/U grading. Ms. Peitzman (F,W)

**321A. Principles and Methods for Teaching Physics — 7-12 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of physics and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**321B. Principles and Methods for Teaching Chemistry — 7-12 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of chemistry and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**321C. Principles and Methods for Teaching Earth and Space Sciences — 7-12 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of Earth and space sciences and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**321D. Principles and Methods for Teaching Life Sciences — 7-12 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of life sciences and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**322A. Principles and Methods for Using Computers in Science Instruction — K-12 (6 to 12 units).** Prerequisites: courses 317A, 317B, and 317C, or 321A, 321B, 321C, and 321D, consent of instructor. Use of computers and current proven computer software to teach science content and process conceptually at all grade levels. Development of teaching units. S/U grading.

**322B. Principles and Methods for Peer Leaders in Science Classrooms — K-12 (6 to 12 units).** Prerequisites: courses 317A, 317B, and 317C, or 321A, 321B, 321C, and 321D, consent of instructor. Develops qualities in teachers necessary for leadership positions in science education at all grade levels. Exploration of leadership roles; leadership behavior practice. S/U grading.

**323. Teacher-Researcher: Principles of Classroom Research (6 to 12 units).** Prerequisite: consent of instructor. Guidance of teachers conducting research in their language arts classroom, K through community college, with emphasis on naturalistic research techniques, research relevant to proposed studies, research conducted by other teacher-researchers, publication of findings. S/U grading. Ms. Peitzman

**324A. Observation and Participation: Multiple Subject Instruction (2 to 6 units).** Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which multiple subjects are taught, normally in elementary schools. Preparation for supervised teaching. S/U grading. (F)

**324B. Supervised Teaching: Multiple Subject Instruction (2 to 10 units).** Prerequisites: course 324A, consent of instructor. Practice teaching under daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading. (W)

**324C. Supervised Teaching: Multiple Subject Instruction (2 to 10 units).** Prerequisites: course 324B, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading. (Sp)

**324D. Supervised Teaching: Multiple Subject Instruction (2 to 10 units).** Prerequisites: course 324C, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading.

**326. Principles and Methods for Teaching English/Language Arts — K-12 (6 to 12 units).** Prerequisite: consent of instructor. Emphasis on teaching a literature-based language arts program incorporating process skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

**327. Principles and Methods for Teaching Spanish Effectively (6 to 12 units).** Prerequisite: consent of instructor. Emphasis on proficiency-based foreign language teaching methods incorporating language assessment skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

**328. Principles and Methods for Integrating Content and Language Instruction (6 to 12 units).** Prerequisite: consent of instructor. Theoretical rationale for integrating language teaching and content instruction for ESL students at intermediate or advanced level in English. Various Sheltered English techniques described, modeled, and used in hands-on workshops involving peer and expert coaching. S/U grading.

**329. Integrating the Elementary School Curriculum — K-6 (6 to 12 units).** Prerequisite: consent of instructor. Open to credentialed teachers. Interdisciplinary strategies emphasizing reading and writing in the content areas, relating science and mathematics, and promoting enrichment follow-up activities in other disciplines such as social studies and art. S/U grading.

**330A. Observation and Participation: Single Subject Instruction (2 to 6 units).** Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which single subjects are taught, normally in secondary schools. Preparation for supervised teaching. S/U grading. (F)

**330B. Supervised Teaching: Single Subject Instruction (2 to 10 units).** Prerequisites: course 330A, consent of instructor. Practice teaching under daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading. (W)

**330C. Supervised Teaching: Single Subject Instruction (2 to 10 units).** Prerequisites: course 330B, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading. (Sp)

**330D. Supervised Teaching: Single Subject Instruction (2 to 10 units).** Prerequisites: course 330C, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading.

**331. History and Geography Themes in U.S. History and World History Courses (6 to 12 units).** Prerequisite: consent of instructor. Emphasis on new curricular reform elements written into the 1987 California Framework. Lectures, seminars, and demonstrations on fundamental issues in history, with examples derived from the History/Social Science Framework. S/U grading.

**332. The Immigrant Experience (6 to 12 units).** Prerequisite: consent of instructor. Readings, films, interviews, and field trips to foster understanding of composition, origins, landscape expression, and ambitions of Los Angeles' new populations, since this city is the destination of many immigrant groups entering the U.S. S/U grading.

**360. Teaching Clinical Practicum.** Discussion, two hours; fieldwork, two hours. Prerequisite: consent of instructor and director of Teacher Education Laboratory. Seminar and directed field experience. Examination and analysis of different methods of subject matter instruction. (F,W,Sp)

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Foundations of Education Policy Analysis.** Prerequisite: consent of instructor. Principles of decision making and policy formation, implementation, and analysis in context of the educational system. Critical perspectives include effectiveness and equity of educational delivery systems and programs, and complex nature of educational governance in contemporary America. Mr. Bruno, Ms. Wells

**401. Structure and Functions of Schools as Complex Organizations.** Prerequisite: consent of instructor. Critical analysis of alternative assumptions about organizations, how they function, and why people in organizations behave as they do. Application to special circumstances of schools and to contemporary issues and problems in school leadership, improvement, and reform. Ms. Beck, Mr. Erickson

**402. Curriculum Principles and Practices.** Prerequisite: consent of instructor. Critical analysis of major concepts, underlying assumptions, policy issues, and processes in development and implementation of curriculum in the educational setting. Problems in formulation of purposes, selection of learning experiences, organization of curriculum, and curriculum evaluation. Ms. Beck, Ms. Oakes, Mr. Weinberg

**403. Teaching: Principles and Problems.** Prerequisite: consent of instructor. Current knowledge concerning good teaching and theoretical/conceptual, empirical, and/or ideological bases for these assertions. Alternative models of classroom teaching, their assumptions, and evidence of worth. Current policy issues and problems in generating and sustaining effective teaching.

**409A. Language Structure, Acquisition, and Development (3 units).** Lecture, two hours; discussion, one hour; ethnographic study. Prerequisite: credential program standing. Theoretical foundations of language structure and first and second language acquisition, with focus on major themes of current research that provide a framework for schooling of limited English-proficient students. Mr. Ariles, Ms. Gutierrez, Ms. Valadez

**409B. Language Structure and Acquisition (3 units).** Lecture, two hours; discussion, one hour; ethnographic study. Prerequisite: credential program standing. Rationale for bilingual/English language acquisition and development programs. Topics include historical and current theories and models of language programs that have implications for second language development and pedagogy. Consideration of psychological factors affecting first and second language development. Mr. Ariles, Ms. Gutierrez, Ms. Valadez

**410A-410B. Fundamental Issues in Higher Education, Work, and Adult Development.** Course 410A is prerequisite to 410B. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute the division. Emphasis on underlying social and political issues that shape higher education, work, and adult development. Ms. McDonough (W,Sp, 410B)

**411A. Introduction to Educational Evaluation.** Introduction to systematic evaluation as it applies to appraising educational programs. Consideration of program evaluation as means of improving quality of educationally relevant decisions. Mr. Alkin

**411B. Procedural Problems in Evaluation.** Assessment methodologies appropriate for evaluation problems. Writing evaluation proposals, developing program monitoring procedures, selecting appropriate evaluation design strategies, coping with ethical considerations in evaluation, framing the decision context, and reporting evaluation results.

Mr. Alkin (Sp)

**412A. Criterion-Referenced and Norm-Referenced Test Construction.** Prerequisite: course 211A. Construction of criterion- and norm-referenced assessment instruments. Appropriateness of different assessment devices considered in relation to research, development, and evaluation.

**412B. Intersecting Dimensions of Teaching and Testing.** Prerequisite: consent of instructor. Designed to develop acquisition of insights and skills based on symbiotic relationship between assessment and instruction when high-stakes educational achievement tests are used.

**413A-413B. Methodology for Primary Language Instruction (3 units each).** Lecture, two hours; discussion, one hour. Prerequisite: credential program standing. Conducted in Spanish. **413A.** Required for BCLAD. Characteristics of bilingual programs, instructional delivery in bilingual classrooms, and factors to consider in selection and use of primary language materials. **413B.** Cultural similarities and differences among Spanish speakers in California. Causes for patterns of immigration into the U.S., manifestations of culture, and contributions of Spanish speakers to the U.S. and California.

Mr. Artilles, Ms. Gutierrez, Ms. Valadez

**415A. Assessment in Counseling Psychology.** Prerequisites: courses 210A, 211A. Overview of rationale for and procedures used by counseling psychologists for assessing individuals in a multicultural society. Emphasis on standardized cognitive assessment instruments and specialized techniques for diagnosis, evaluation, and development of counseling strategies for at-risk populations.

Ms. Tidwell

**415B. Advanced Assessment in Counseling Psychology.** Prerequisites: course 415A, consent of instructor. Advanced course in assessment for counseling psychologists. Survey and demonstration of instruments of achievement, affective, and personality appraisal, with emphasis on testing and interplay between assessment and psychological functioning for reducing risks of failure in academic, personal, and social areas.

Ms. Tidwell

**420A. Principles of Curriculum.** Critical examination of basic concepts underlying determination of objectives, selection and organization of learning experiences, and evaluation process.

**421A. Programs and Research in Early Childhood Education.** Prerequisite: one course from development series. Examination of child care programs and research in early childhood education, including review of relation of research in developmental psychology and education to goals of early childhood education and day care.

Ms. Howes

**421C. Research and Evaluation of Early Childhood Programs.** Prerequisite: course 421A or equivalent or consent of instructor. Critical review of evaluation models (e.g., summative, formative, implementation) and their utility for improving and evaluating quality of child-related programs.

**421D. Parents and Community Agents in Child Development.** Prerequisite: one course from development series. Critical review of theoretical basis and effectiveness of training programs for parents of young and elementary school-aged children; relation of preschool parent programs to family development and role of programs in the community.

Ms. Feshbach

**421F. Issues in Application of Child Development and Educational Research to Social Policy.** Relationships among policymakers and social scientists in development, implementation, and evaluation of policies affecting children and their families. Students learn to design and conduct interviews, analyze legislative documents, and present analyses to policymakers.

Ms. Dorr, Ms. Feshbach, Ms. Stipek

**422. Inquiry into Schooling: Basic Issues.** Critical examination of basic issues and problems in organization and reconstruction of precollegiate schooling. Consideration of historical development and changing functions of schooling in American society; school organization; schooling alternatives; problems in management of educational change.

Ms. Oakes

**423. The Humanistic Curriculum.** Consideration of philosophical and cultural foundations of humanistic curricular strategies. Review of techniques and procedures of affective education with a view to their place in overall theory of teaching and learning.

Mr. Weinberg

**424A. Social Studies in the Curriculum.** Advanced study in social studies curriculum development; problems in defining objectives and organizing single and multidisciplinary programs; critical review of literature on cognitive and affective learning in social science, with emphasis on experimental study of instructional programs.

**424B. Reading in the Curriculum.** Prerequisite: course 210A. Study of reading curricula and instructional procedures, with emphasis on rationale and research underlying their development and research comparing their effectiveness.

Ms. Gutierrez

**424C. Language in the Curriculum.** Advanced study in school language curriculum; application to improvement of curriculum in the field.

Ms. Gutierrez

**424G. Curriculum Design for Bilingual Education.** Prerequisite: consent of instructor. Advanced study of curriculum design for bilingual educational programs. Philosophical basis for bilingual programs; theories of learning and instruction applied to bilingual learner; language assessment; development of instructional component; program evaluation.

Ms. Valadez

**431A. Administration in Higher Education.** Overview of college and university administration and introduction to policy research and analysis in postsecondary institutions. Case studies of administrative problems, policies, and practices. Management information systems, resource allocation, and issues related to responsibility, authority, and participation in administrative decisions.

Mr. Koltai and the Staff

**431B. Curriculum and Instruction in Higher Education.** Principles of curriculum and instruction in postsecondary programs. Theory and practices in goal setting, testing, media selection, and related instructional responsibilities. Preparing to teach college-level students.

Mr. A. Cohen

**431C. Innovative Forms and Practices in Higher and Continuing Education.** New institutional forms (e.g., external degree programs and other nontraditional approaches to higher education, neighborhood learning centers, and peoples' colleges). Methodological innovations such as computer-assisted instruction, credit by examination, and independent study.

Mr. A. Cohen, Mr. Wilms (W)

**432. Seminar: Professional Topics in Higher Education.**

Ms. Astin and the Staff

**433A. Instructional Product Development.** Prerequisite: consent of instructor. Examination of procedures employed in systematic development of instructional products. Students acquire competencies associated with those procedures.

Ms. Baker, Ms. Dorr (W)

**433B. Technological Development in Educational Media.** Prerequisite: course 433A. Theory, current problems, and anticipated trends in instrumentation and systems development for instructional applications and research, including computer-aided instruction, communication satellites, and other advanced systems; theory and laboratory practice with instrumentation in educational research.

Ms. Baker, Ms. Dorr (Sp)

**437A. Principles of Curriculum in Economic Education.** Theories, principles, and concepts related to understanding the business and economic system; their application to teaching in secondary school.

**437B. Corporate Educational Programs.** History and scope of corporate training programs; current educational problems in training programs within industry as they are affected by automation and technological change.

**440C. Administration of the Instructional Program.** Examination of current educational problems in society and strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs.

Mr. Erickson

**441A. Instructional Supervision A.** Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rate and degree of learning, retention and transfer, monitoring and adjusting instruction to meet needs and capacities of learners.

**441B. Instructional Supervision B.** Prerequisite: course 441A or equivalent. Basic techniques of script-taping instructional episodes, planning teacher conferences through analysis of script-tapes, conducting and analyzing growth-evoking teacher conferences. Conducting mini-lessons to demonstrate elements of good instruction.

**442B. Legal Aspects of Educational Management and Practice.** Examination of structures and kinds of law governing educational systems in the U.S.; constitutional dimensions of church/state relations; employees' civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights.

Mr. Biegel

**443. Policy Analysis in Education.** Prerequisite: consent of instructor. Overview of political, economic, and legal context of educational policy formation. Included in examination are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, role of subdominants in policy-making process).

**444A. Legal Aspects of Access to Public Education.** Prerequisite: course 442B or consent of instructor. Study of access to public education focused on issues of affirmative action, testing, tracking, bilingual/bicultural education, special education, correctional education, and malpractice suits.

**444B. Equality of Educational Opportunity through Desegregation and Finance Case Law.** Prerequisite: course 442B or consent of instructor. Concentrated review of definition of equality of educational opportunity as it is being developed by the courts in cases concerning desegregation and educational finance.

**447. Seminar: Educational Policy and Planning, Special Studies (1 to 4 units).** Prerequisite: consent of instructor.

**448A. Urban School Leadership.** Prerequisite: consent of instructor. Analysis of problems of urban school leadership. Emphasis on changing nature of the urban principalship, with considerable attention to role of other school and community agencies that interact with the urban school leader.

Mr. Knox

**448B. Urban Leadership Laboratory.** Prerequisite: consent of instructor. Analysis of and opportunity to practice human and technical skills requisite for success as an urban school leader. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics.

Mr. Caldwell, Mr. Erickson

**460. Seminar: Special Issues in Evaluation.** Topics and instructors vary each term. Recent emphases included evaluation utilization and cost-effectiveness evaluation.

Mr. Alkin

**461A. Seminar: Adult and Continuing Education.** Broad-ranging review of theory and practice in the field, with particular attention to college and university continuing education, but also to programs provided by industry, the professions, public schools, and other institutions.

Mr. Freedman (Sum)

**462. Seminar: Community College.** Topics include problems and practices in community college formation, instruction, student flow, administration, and/or evaluation.

Mr. A. Cohen, Mr. Koltai

**470A. Seminar: Large Systems and Individual Schools.** Prerequisite: consent of instructor.

Mr. Handler

**470B. Seminar: Educational Government.** Prerequisite: consent of instructor.

Mr. Handler

**481. Knowledge and Inquiry in the Classroom.** Prerequisite: consent of instructor. Logical features of instruction and their application to inquiry techniques in teaching and learning. Various conceptions of truth, belief, and fact and opinion, and their application to classroom learning situations. Mr. Weinberg (W)

**489. Instructional Strategies in Education.** Prerequisite: consent of instructor. Methods for academic instruction, including research and active participation in the adversary approach, forms of debate, role playing, interaction process analysis, and feedback instruments. Practical emphasis on social sciences and humanities instruction, K-12.

**490A. Instructional Decision Making.** Prerequisite: consent of instructor. Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences in classroom settings permit students systematically to apply and evaluate alternative instructional strategies. Mr. Weinberg

**491A. Curricular Decision Making.** Prerequisite: consent of instructor. Examination of alternative solutions for practical problems that classroom teachers face in making curricular decisions. Analysis of the influence of psychological, societal, and institutional factors in curricular decisions.

**492. Evaluation of Teaching and Learning.** Prerequisite: consent of instructor. Relationship between appraisal instruments and information required for making decisions about teachers, pupils, and materials. Recent developments in evaluation of teaching and learning; use of modern appraisal techniques in classroom settings.

**498A-498B-498C. Directed Field Experience (4 to 8 units each).** May be repeated for credit. (F,Sp)

**499A-499B-499C. Advanced Directed Field Experience (4 to 8 units each).** May be repeated for credit.

**501. Cooperative Program in Special Education (2 to 8 units).** Prerequisite: consent of UCLA academic adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Independent Study (6 to 12 units).** Individual study or research for graduate students. May be repeated for credit.

**597. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations (6 to 12 units).** Individual study for master's comprehensive examinations or for Ph.D. or Ed.D. qualifying examinations. May be repeated for credit. S/U grading.

**598. Thesis Research (6 to 12 units).** Research for and preparation of master's thesis. May be taken for a maximum of 12 units. S/U grading.

**599. Dissertation Research (6 to 12 units).** Research for and preparation of doctoral dissertation. May be repeated for credit. S/U grading.

Robert M. Hayes, Ph.D.  
Seymour Lubetzky, M.A., LL.D.  
Lawrence Clark Powell, Ph.D., Litt.D., L.H.D., H.H.D.  
Russell Shank, D.L.S.  
Elaine Svenonius, Ph.D.  
Diana M. Thomas, Ph.D.  
Raymund F. Wood, Ph.D.

#### Associate Professors

Mary Niles Maack, D.L.S.  
John V. Richardson, Ph.D.

#### Assistant Professors

Clara Chu, Ph.D.  
Michele Cloonan, Ph.D.  
Efthimis N. Efthimiadis, Ph.D.  
Gregory H. Leazer, D.L.S.  
Virginia A. Walter, Ph.D.

#### Lecturers

Dorothy J. Anderson, Ph.D.  
Sidney Berger, Ph.D.  
Barbara Booth, M.L.S.  
Keri Botello, M.L.S.  
David Deckelbaum, M.L.S.  
Leon Ferder, Ph.D.  
Vivian Hay, Ph.D.  
Bethany Johnson, M.L.S.  
William Joyce, Ph.D.  
Joan Kaplowitz, Ph.D.  
Donald Kraft, Ph.D.  
Penny Markey, M.S.L.S.  
Susan McGlamery, J.D.  
Nancy O'Neill, M.L.S.  
Mary I. Purucker, M.L.S.  
Marcia Reed, M.L.S.  
Rita Scherrei, Ph.D.  
Martha Yee, M.L.S., Ph.D.  
Elizabeth R. Baughman, M.L.S., M.A., *Senior Emerita*  
Elizabeth R. Eisenbach, M.L.S., *Senior Emerita*  
Larry Lauerhass, Ph.D., *Emeritus*

#### Adjunct and Visiting Professors

Nicolas Barker, M.A., *Visiting*  
Zorana Ercegovac, Ph.D., *Adjunct*

## Scope and Objectives

The Department of Library and Information Science has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, and cataloging. Whether students choose to pursue a master's degree or a Ph.D., they will graduate with a broad understanding of both theory and practice.

Applicants may write to the Department of Library and Information Science, 1009 Moore Hall, UCLA, Los Angeles, CA 90024-1520, for the department's announcement and application materials.

## Master of Library and Information Science

### Admission

Students are admitted for Fall Quarter only. In addition to Graduate Division requirements and application procedures (see Chapter 3), the department requires

- (1) A statement of purpose.
- (2) Application materials provided in the department's announcement.

(3) An official report of the General Test of the Graduate Record Examination (GRE) taken within the past five years (may be waived for holders of a master's or doctoral degree from an accredited U.S. institution).

(4) For international students whose native language is not English, an official report of scores received on the Test of English as a Foreign Language (TOEFL), including the Test of Written English (TWE).

(5) Three letters of recommendation.

(6) Satisfaction of the following entrance requirements: (a) a college-level course in statistics (three semester units or four quarter units) within the past five years with a minimum grade of C. The course must have covered descriptive and inferential statistics. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in statistics administered by the department; (b) a college-level course in computer programming (three semester units or four quarter units) within the past five years with a minimum grade of C. Most standard languages such as BASIC, C, COBOL, FORTRAN, or PASCAL are acceptable, as is a college-level course in the use of data management systems such as INMAGIC, PARADOX, or dBASE. At least one third of the course grade should be based on programming assignments. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in computer programming administered by the department.

Entrance requirements should be completed before you begin the M.L.I.S. program. However, one requirement may be satisfied in Fall Quarter of your first year.

Applicants not meeting the required grade-point average of 3.0 may be admitted in exceptional cases if GRE scores, letters of recommendation, or other factors indicate unusual promise. While work experience is not a requirement for admission, consideration is given to such experience in reviewing the total application.

The committee on M.L.I.S. and certificate admissions may request a report of an interview conducted by a person designated by the chair as qualified to conduct an interview.

For further information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

### Course Requirements

As a full-time student, you are normally required to enroll in three courses (12 quarter units) per term in order to complete the program in six terms. Part-time enrollment may be permitted, but you must complete the program in 10 terms.

Eighteen courses (72 quarter units) are required for graduation from the M.L.I.S. program. You take 20 units of core courses, four research methods units, and 48 elective units. Course-

## Library and Information Science

Office of Student Services:  
1009 Moore Hall, (310) 825-5269

### Professors

Marcia J. Bates, Ph.D., *Chair*  
Christine L. Borgman, Ph.D.  
Beverly P. Lynch, Ph.D.

### Professors Emeriti

Page Ackerman, B.A., B.S.L.S.  
Harold Borko, Ph.D.

work must provide evidence both of basic professional competencies and of knowledge in a field of specialized competence.

**Basic Professional Competence** — The requirement is met by completing five core courses (Library and Information Science 200, 201, 203, 220, 441) and at least one graduate-level research methodology course such as 205, 240, 241, 260, 261, or 290. In certain cases, prior coursework or work experience may justify replacing a course by a validation examination administered by the department, but this is not encouraged and should be used only for the purpose of increasing the extent to which you pursue a specialization.

Only in unusual cases will librarianship coursework taken elsewhere satisfy the basic competency requirements.

**Specialized Competence** — Completion of a course of study is required as evidence of knowledge of a field of specialization in information policy and management, information access, information systems, or information organization. The field of specialization and the specialized course program must be approved by a faculty adviser. The requirement ordinarily is met by the completion of 12 additional courses, which may include internships. Relevant coursework in other departments or schools is encouraged. You may petition to have prior graduate-level coursework applied to your specialization.

During the second year, you may apply for an internship of one to three terms either on campus or off campus at a library or information center. The internship is a regularly scheduled course and may be applied toward the 18 required courses.

No more than eight units of course 596 may be applied toward the total course requirement; only four units may be applied toward the minimum requirements of the Graduate Division. In order to enroll in any S/U graded course, including 500-series courses, you must be in good academic standing.

### Comprehensive Examination Plan

A comprehensive examination consisting of two components is required. The written test breadth component is offered in Fall, Winter, and Spring Quarters and is designed to demonstrate your understanding of library and information science services as a totality. It does not cover the basic professional competencies individually but deals with the field in a unified form. To be eligible to take the written test component, you must complete one year of academic residency, satisfy all outstanding entrance requirements, complete (or be in the process of completing) all five core courses and the research methods course, and be in good academic standing.

The specialization component of the comprehensive examination requires you to complete an elective course in which a major paper (normally in the area of your specialization) is pro-

duced. A grade of B or better must be earned in the course; you may not use the same course to satisfy both the paper and the research methods requirements.

## Cooperative Degree Programs

To participate in a cooperative program, you must make application to and be admitted by both this department and the other UCLA school or department. Fulfilling the combined set of program requirements normally takes three years.

### M.A.-History/M.L.I.S.

This concurrent degree program of the Department of Library and Information Science and the Department of History allows you to combine historical study with the tools of the information professional and to obtain two degrees — the M.L.I.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from this department and the History Department.

### M.A.-Latin American Studies/M.L.I.S.

This specialization is an articulated degree program of the Department of Library and Information Science and the Latin American Studies Program. You can obtain two degrees — the M.L.I.S. and the M.A. in Latin American Studies. However, no course may be used for credit toward more than one degree. The program provides broad training in library and information science, as well as the opportunity to explore and analyze on an advanced level the social, political, and cultural issues characteristic of Latin American societies.

### M.B.A./M.L.I.S.

A concurrent degree program jointly sponsored by the Department of Library and Information Science and the John E. Anderson Graduate School of Management, this specialization is designed to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in the two professional fields. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Department of Library and Information Science.

## Post-M.L.S. Certificate of Specialization

The Post-M.L.S. Certificate of Specialization Program meets the need for specialized training in various areas of information policy and management, information access, information systems, and information organization, as well as research competence. The certificate is designed for holders of the M.L.S. degree who either (1) want to redirect their careers and need the structure of a nine-course program and specialization paper to accomplish this, (2) want to update knowledge and skills across

the discipline and require the structure of a nine-course program and specialization paper to accomplish those goals, or (3) recently graduated from a less comprehensive M.L.S. or M.L.I.S. degree program than that offered by UCLA and did not have the opportunity to specialize.

Admission requirements vary slightly for each field of specialization, but the basic requirements are a bachelor's (or higher) degree in letters and science, an M.L.S. degree from an American Library Association-accredited school, and unconditional admission to graduate standing by the UCLA Graduate Division.

Your course program may begin in any term of the academic year. If you are admitted for a preliminary term to complete prerequisite courses, that term is not counted toward the minimum residence requirements.

Part-time enrollment is encouraged to provide flexibility for the working librarian. Opportunities for relevant coursework outside the department and internships, both on and off campus, are available.

Four general areas of specialization have been authorized: information policy and management, information access, information systems, and information organization. Further specialization within these fields is possible. A minimum of nine courses (100-, 200-, 400-, and 500-series) must be completed in the Department of Library and Information Science and other departments of the University.

In addition to taking coursework in your area of specialization, you must complete a paper or project in that area, which demonstrates a considerable amount of work and thought and is of publishable quality. The specialization paper or project is required even if you have an advanced academic degree in which a thesis or dissertation was a requirement and must be approved by your faculty adviser.

## Ph.D. Degree

### Admission

Students are admitted for Fall Quarter only. In addition to Graduate Division requirements and application procedures, the department requires

(1) Satisfaction of the following two entrance requirements: (a) a statistics requirement, satisfied by completing a college-level course with a minimum grade of C within the past five years and (b) a computer programming requirement, met either by completing a college-level course with a minimum grade of C within the past five years or by passing a proficiency examination administered by the department (most standard languages such as BASIC, C, COBOL, FORTRAN, and PASCAL are acceptable, as is a college-level course in the use of data management systems such as INMAGIC, PARADOX, or dBASE).

(2) A statement of purpose which identifies your proposed area of research.

(3) Appropriate evidence of qualifications for pursuing a doctoral program in the form of a master's thesis or two publications or research papers, written in English. Research papers or publications must be authored solely by the applicant.

(4) An official report of the General Test of the Graduate Record Examination (GRE) taken within the past five years. There is no minimum score, but admitted applicants typically score over 1,100.

(5) For international students, the same scores of tests listed in item 4 under the M.L.I.S. degree.

(6) Three letters of recommendation.

(7) Application materials provided in the department's announcement.

Favorable consideration may be given to students who have made distinguished contributions to the profession while working as a practicing professional (e.g., in publications and/or work experience).

### Major Fields or Subdisciplines

You are expected to specialize in a subfield in one of three major fields:

- (1) Information storage and retrieval systems.
- (2) Policies and issues in library and information science.
- (3) Information seeking and use.

The department strictly limits the specific subfields which, at any time, are accepted for doctoral work.

### Course Requirements

Courses normally taken in your first year include a doctoral seminar in each area of the written qualifying examinations (Library and Information Science 273, 274, 275) and a three-course research sequence selected from a list of research methodology courses. In addition, you may take a variety of other courses, both inside and outside the department, relevant to your individual program.

### Qualifying Examinations

You are required to pass written qualifying examinations in each of the three areas of study listed above, including coverage of historical aspects in at least one of the areas as well as technical aspects. These are scheduled during one week in a term. If you fail one of the sections of the three-part examination, it may be repeated. Should you fail two sections, all three must be repeated.

After passing the written examinations, you are required to pass the University Oral Qualifying Examination, which is based on your dissertation proposal.

You are encouraged to start work on your proposal while taking courses in preparation for the written qualifying examinations. The proposal should, in most cases, be completed within one year after passing the written examinations.

The oral examination covers the significance of your selected research topic, the methodology and feasibility of your research, and the depth of your knowledge in the specific field of your proposed dissertation research.

Your doctoral committee decides, after the oral examination, whether the examination has been passed. If the proposal is not accepted, you do not pass the examination.

### Dissertation/Final Oral Examination

The third formal requirement of the program is that you research, write, and defend a dissertation. The final oral examination, required of all Ph.D. students in the department, is administered by members of the doctoral committee, who also evaluate the dissertation.

### Upper Division Courses

Courses 110 and 140 may not be applied toward the M.L.I.S. degree; courses in the 111 series may be applied toward the M.L.I.S. degree with approval of faculty advisers.

**100. Perspectives on Literacy.** Lecture, two hours; discussion, two hours. Prerequisite: sophomore standing. Open to M.L.I.S. students and to graduate students from other schools/departments. Interdisciplinary introduction to literacy as a historical, social, and political issue. Topics include culture and literacy, historical development of literate societies, social definitions of illiteracy, literacy campaigns, literacy as a national and local policy issue.

**110. Information Resources and Libraries.** Prerequisite: sophomore standing or consent of instructor. Not open for credit to M.L.I.S. students. Introduction to bibliographic and information resources and relevant research methodology, covering both general and specialized materials. Designed to facilitate knowledgeable use of libraries and efficient retrieval of information. Some sections focus on specific subject areas (such as science and technology).

**111A-M111E. Ethnic Groups and Their Bibliographies.** Introduction to bibliographical and research tools and methods for students with interests in ethnic groups. **111A.** American Indian History and Culture; **111B.** African American History and Culture; **111C.** Latino History and Culture; **111D.** Asian American History and Culture; **M111E.** Jewish History and Culture. (Same as Jewish Studies M111E.) Sections on other ethnic groups may be added. Offered in collaboration with the several centers for ethnic studies. May not be repeated for credit.

### Graduate Courses

Upper division undergraduate students must obtain consent of the instructor to enroll in 200-series courses and consent of the chair to enroll in 400-series courses.

Graduate students from other schools or departments who wish to take courses in the Department of Library and Information Science also must obtain consent of the instructor prior to enrolling.

The following courses are offered infrequently: 230, 241, 246, 284, 287, 466, 486.

**200. Information in Society.** Lecture, two hours; discussion, two hours. Examination of processes by which information and knowledge are created, integrated, disseminated, organized, used, and preserved. Topics include history of communication technologies, evolution of literacy, development of information professions, and social issues related to information access. S/U grading.

**201. Information Structures.** Required core course. Introduction to various systems and tools used to organize materials and provide access to them, with emphasis on generic concepts of organization, classification, hierarchy, arrangement, and display of records. Provides background for further studies in cataloging, reference, information retrieval, and database management.

**M202. Folklore Archiving.** (Same as Folklore M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing databases, utilizing both manual and computerized techniques.

**203. Design of Library and Information Services.** Lecture, two hours; discussion, two hours. Principles and methods for planning and designing user-driven library and information services. Principles and methods for assessing information needs of designated populations and for designing services that meet those needs.

**205. Historical Methodology of Library and Information Science.** Prerequisite: course 200. Introduction to historical research as it relates to library and information science. Identification of key primary and secondary source material for writing history in the field. Critical analysis of selected histories of various areas in the profession. Problem-oriented approach.

**207. International Issues and Comparative Research in Library and Information Science.** History and development of international organizations and programs in library and information science. Identification of key issues in international exchange of information. Introduction to comparative method as procedure for study and research.

**210. Seminar: Descriptive and Bibliographical Cataloging.** Prerequisites: courses 410, 411, or equivalent. Specialized studies in selected areas of descriptive and bibliographical cataloging (e.g., purposes, principles, instructional development, potentialities of automation). May be repeated once.

**211. Seminar: Subject Control of Library Materials.** Prerequisites: courses 410, 411, or equivalent. Study of selected problems in design and use of verbal subject headings and classification systems. Manual and mechanized systems. May be repeated once.

**220. Information Access.** Prerequisites: courses 200, 201. Provides fundamental knowledge and skills enabling information professionals to link users with information. Overview of structure of literature in different fields; information-seeking behavior of user groups; communication with users; development of search strategies using print and electronic sources.

**221. Bibliography of Science and Engineering.** Prerequisite: course 220. Patterns of communication and flow of information among scientists and engineers. Scientific and technical literature, with emphasis on on-line sources, special types of publications, research material, reference and bibliographical aids to the natural sciences and engineering.

**222. Bibliography of the Health and Life Sciences.** Prerequisite: course 220. Literature of the medical and life sciences. Information needs of health professionals. Emphasis on on-line sources, special types of publications, reference and bibliographic aids to the health sciences.

**223. Literature of the Social Sciences.** Prerequisite: course 220. Seminar on literature of the social sciences, including review of classics in the various fields, monumental source collections, periodicals, bibliographies, catalogs, indexes, abstracts, bibliographic and nonbibliographic databases, etc. Trends in scholarly and popular writing. Interdisciplinary nature of the literature.

**224. Literature of the Humanities and Fine Arts.** Prerequisite: course 220. Seminar on literature of the humanities and fine arts, including review of classics in the various fields, comparisons of editions, periodicals, bibliographical apparatus, and reviewing media. Trends in scholarly and popular writing.

**M225. Latin American Research Resources.** (Same as History M265 and Latin American Studies M200.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

**226. General Reference Work.** Prerequisite: course 220. General reference materials (not specific to subject access), with advanced work in reference process and in cognitive and behavioral aspects of inquirers and expert reference librarians.

**M229B. Africana Bibliography and Research Methods.** (Same as African Area Studies M229B.) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases.

**M229C. Introduction to Slavic Bibliography (2 units).** (Same as Slavic M229.) Prerequisite: consent of instructor. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

**230. History of Publishing and the Book Trade.** Prerequisite: course 200. Publishing and book trade history, with particular reference to libraries and book collecting, changing aspects of book production and distribution within the setting of cultural history.

**240. Principles of Information Systems Analysis and Design.** Theories and principles of special systems development, including determination of requirements, technical design and evaluation, and internal organization.

**241. Measurement and Evaluation of Information Systems and Services.** Prerequisite: one research methods course. Recommended: one library automation course. Information systems and services from points of view of their cost and effectiveness in meeting desired objectives. Review of principles of costing. Study of literature in which measures have been developed to evaluate effectiveness of document collections, reference and information retrieval services, document delivery systems, networking, and technical services, including circulation, acquisitions, and document description.

**242. Information Retrieval Systems.** Prerequisites: courses 201, 220. Survey of methods of file organization, retrieval techniques, and search strategies in control of information in computerized form.

**243. Human/Computer Interaction.** Prerequisites: one programming course and one inferential statistics course. Survey of social, behavioral, design, and evaluation issues in human/computer interaction, with readings from several disciplines. Extensive use of technology demonstrations and class discussions. Recommended for students in any discipline involved in design or implementation of information technologies.

**245. Database Management Systems.** Theories, principles, and practicalities of database systems, including data models, retrieval mechanisms, evaluation methods, and storage, efficiency, and security considerations.

**246. Social Aspects of Information-Oriented Society.** Analysis of social evolution of information-oriented societies. Historical factors and current trends explored through discussion of selected international and domestic issues. Implications for information policy.

**247. User-Centered Design of Information Retrieval Systems.** Lecture, two hours; discussion, two hours. Prerequisites: courses 201 and 220, or consent of instructor. Design implications of interaction between users and the features of automated information systems and interfaces that are specific to the information-seeking process. Emphasis on search strategy and subject access through use of thesauri and other vocabularies.

**249. Seminar: Special Topics in Information Science.** Prerequisites: courses 200, 201, and at least one from 242, 243, 247, 280, or 405, or consent of instructor. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services.

**253. Contemporary Children's Literature.** Reading interests and correlative types of literature surveyed with reference to growth and development of children. Emphasis on role of the librarian in responding to needs and abilities of children through individualized reading guidance.

**260. Historical Bibliography.** Prerequisites: courses 200 and 402, or consent of instructor. History of letterpress formats (books, broadsides, magazines, newspapers, some music, etc.) as well as materials and methods of production, distribution, and readership in their social, political, and economic context. Emphasis varies but is usually on developments prior to 1800. Attention to historiography of the field, including antiquarian, Anglo-American, and *histoire du livre* approaches.

**261. Analytical Bibliography.** The book as a physical object and its relationship to transmission of the text. History and methods of analytical bibliography, with particular emphasis on handpress books.

**271. Seminar: Intellectual Freedom and Information Policy Issues.** Investigation of concept of intellectual freedom, information policy issues, civil liberties and civil rights, censorship, and other restraints on access to information. S/U grading.

**272. Research Seminar: Library and Information Science.** Prerequisite: doctoral standing or consent of instructor. Emphasis on recent contributions to theory, research, and methodology. May be repeated for credit. S/U grading.

**273. Doctoral Seminar: Information Storage and Retrieval Systems.** Prerequisite: doctoral standing or consent of instructor. Intellectual principles for organization of information, including principles for design of systems for acquiring, organizing, and retrieving information. Also includes system-specific user studies to extent that design of information systems is predicated on their evaluation and use.

**274. Doctoral Seminar: Policies and Issues in Library and Information Science.** Prerequisite: doctoral standing or consent of instructor. Examination of social, political, and economic influences in development of library and information science and management of information organizations and resources.

**275. Doctoral Seminar: Information Seeking and Use.** Prerequisite: doctoral standing or consent of instructor. Examination of behavioral and cognitive aspects of inquirer's information needs and uses, including inquirer's characteristics, information problems, psychological needs, and uses of information and information technologies, and aspects of question negotiation.

**280. Information-Seeking Behavior.** Study of factors and influences, both individual and social, associated with human beings needing, using, and acting on information. Topics include information theory, human information processing, information flow among social and occupational groups, and research on information needs and uses.

**281. Information Resources for Business.** Prerequisite: course 220 or consent of instructor. Introduction to information needs of the business world. Business guides, encyclopedias, directories, yearbooks, indexes, loose-leaf services, government publications, databases, and other sources of business literature.

**283. Legal Research and Bibliography.** (Formerly numbered 228.) Introduction to source materials of the law, with emphasis on primary authority, but covering as well secondary authority, and indexes and finding aids used to gain access to legal information.

**284. Seminar: Legal Informatics.** (Formerly numbered 487C.) Information problems of legal profession, including history of legal information systems, relationship between cognitive authority and legal authority, bibliometrics of law, value-added processes for legal information, and techniques and impact of new legal research technology.

**285. Scholarly Communication and Bibliometrics.** (Formerly numbered 487A.) Prerequisite: one inferential statistics course. Survey of current theory, method, and empirical studies at intersection of scholarly communication and bibliometrics, seeking to understand flow of ideas through published record, whether in print, electronic form, or other media.

**286. Seminar: Information Access.** Prerequisites: course 220, one from 221, 223, 224, 226, 281, 283, 425, 473. Discussion of policies and issues related to basic and advanced reference materials, reference process, and psychological aspects of inquirers and expert reference librarians.

**287. Seminar: Special Issues in Library and Information Science (2 to 4 units).** (Formerly numbered 487D.) Identification, analysis, and discussion of critical intellectual, social, and technological issues facing the profession. Topics may include (but not limited to) expert systems, literacy, electronic networks, youth at risk, information literacy, historical bibliography, preservation of electronic media, etc. May be repeated with topic change.

**289. Information Services in Culturally Diverse Communities.** Issues in provision of information services in a multiethnic and multilingual society. Understanding role of information institutions in promoting cultural diversity and preserving ethnic heritage.

**290. Research Methodology.** Prerequisite: consent of instructor. Role of research in bibliography, librarianship, and information science. Identification and design of research problems. Historical, statistical, analytical, and descriptive techniques.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**402. Fundamentals of Bibliography.** Prerequisite: course 200. Organization, control, and elements of bibliographical apparatus, new techniques and tools, theory, methods, and trends in bibliographical research in relationship to librarianship. Development and fundamentals of several branches of bibliography: enumerative (or systematic), physical (analytical or critical, descriptive).

**405. Automation of Library Processes.** Overview of major components of library automation: circulation control, acquisitions and serials, public access information systems, and data conversion. Relationships among various automation entities, including internal library automation, networks and vendors (such as bibliographic utilities, regional networks, and on-line services), and automation of parent organizations (universities, municipalities, corporations, and government agencies). Developments in standards for information processing and new information technologies.

**410. Descriptive Cataloging.** Entry and description of library materials. Constitution, structure, and form of the library catalog. Cataloging services, tools, and procedures. Cataloging rules and their application.

**411. Introduction to Subject Access: Alphabetic-Subject and Systematic Indexing.** Lecture/discussion. Prerequisite: course 410. Overview of major alphabetic-subject and systematic indexing languages and their use in manual and on-line environments, including theory and application of Library of Congress subject headings and of Dewey decimal and Library of Congress classifications.

**412. Cataloging and Classification of Nonbook Materials.** Prerequisites: courses 410, 411. Problems in cataloging and classification of selected non-book materials (e.g., films, maps, pictorial works, sound recordings) as separate collections and integrated collections.

**414. Indexing and Thesaurus Construction.** (Formerly numbered 413, 414.) Principles of design and methods of construction of thesauri. Evaluation and overview of thesauri used in manual and on-line environments. Basic professional techniques for indexing a variety of types of materials and for preparing informative and indicative abstracts.

**425. Computer-Based Information Resources (On-Line Searching).** Prerequisite: course 220 or consent of instructor. Emphasis on use of reference and resource databases and different vendor systems. File structure and hardware requirements. Analyses of information needs and investigation of databases addressing those needs.

**426. User Education/Bibliographic Instruction: Theory and Technique.** History, theory, methods, and materials of user education/bibliographic instruction in libraries and other information retrieval environments. Examination of a variety of user education/bibliographic instruction theories and methodologies, including overview of planning and administration. Identification of problems in user education/bibliographic instruction. Applications of methods of teaching use of libraries and information resources.

**429. Printing for Bibliographers.** Prerequisites: course 260 or 261, consent of instructor. Printing processes as related to bibliography and librarianship. Discussions, demonstrations, and experiments in design, composition, and presswork, with special emphasis on the 19th-century handpress. S/U grading.

**430. Collection Development and Acquisition of Library Materials.** Background of publishing and the book trade (new and antiquarian) pertinent to collection development in public, school, academic, and special libraries. Theory and practice of collection development and management. Organization and administration of acquisitions departments.

**441. Management Theory and Practice for Information Professionals.** Lecture, two hours; discussion, two hours. Principles and practice of management in all types of organizations where information professionals work.

**442. Library Personnel Administration.** Basic principles of personnel management. Survey of current personnel practices in libraries; how basic principles apply or need to be modified to fit the library setting.

**446. Library Services and Literature for Youth.** Overview of literature and programs which are of interest to young adults (seventh grade and above). Discussion of special problems in working with young people and psychology of the teenager.

**461. College, University, and Research Libraries.** Organization, administration, collections, facilities, finances, and problems of college and university libraries and their relationships within institutions of which they are a part. Functions of research libraries and work of their staffs in serving scholars.

**463. Public Libraries.** Government, organization, and administration of municipal, county, and regional public libraries; developments in changing patterns of public library service.

**465. Library Services and Programs for Children.** Lecture, two hours; discussion, two hours. Theory and practice of service to children in public libraries. Overview of professional library service to children aged 14 and under; provides opportunities for students to gain experience in particular skills needed to provide that service.

**466. Storytelling.** Lecture, two hours; demonstration, two hours. Theory and practice of telling stories to children and adults in public and school libraries. S/U grading.

**470. Special Libraries and Information Centers.** Organization, administration, collections, facilities, finances, and problems of special libraries and of special collections within general libraries. Methods of handling nonbook materials. Current trends in documentation and mechanization.

**471. Health and Life Sciences Libraries.** Prerequisite or corequisite: course 441. Organization, administration, services, and problems of health and life sciences libraries; relationships with institutions of which they are a part and with the community.

**473. Government Information.** Introduction to nature and scope of government information promulgated by the federal government, as well as by state, municipal, international, and foreign governments. Problem-oriented approach.

**485. American Archives and Manuscripts.** Prerequisite: consent of instructor. Identification, description, subject analysis, and organization of records contained in archives and manuscript collections. Administration. User requirements. Problems of acquisition, legal title, literary property, preservation, accessibility, and use.

**486. Issues and Problems in Preservation of Library Materials.** Introduction to fields of library conservation and preservation, with emphasis on preservation administration.

**487A-487Z. Special Studies in Library and Information Science (2 to 4 units each).** Examination of specialized topics of professional interest. Topics and units vary according to subject and may include conservation of materials, business information sources, problems in library management, current issues in cataloging, etc.

**491. Interpersonal Communication Issues in Library Systems.** Examination of interpersonal communication patterns in library management and staff relations, in resource sharing, and in providing information services. Emphasis on relationships within an organizational environment and on effective communication styles in decision making, managing conflict, and implementing change. S/U grading.

**497. Fieldwork in Libraries or Information Organizations (4 or 8 units).** Supervised field experience in approved library or information organization. Concentration must be on managerial or other professional problems of the site. Students spend full time in the field for most of the period. S/U grading.

**498. Internship.** Prerequisite: consent of internship coordinator. Supervised professional training in a library or information center approved by internship coordinator. Minimum of 120 hours per term. May be repeated twice. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisite: consent of instructor. Directed special studies in fields of bibliography, librarianship, and information science. Variable conference time depending on nature of study or complexity of research. S/U grading.

**597. Directed Studies for Ph.D. Qualifying Examinations (2 to 12 units).** S/U grading.

**599. Ph.D. Research and Writing (2 to 12 units).** S/U grading.

---

# School of Law

Susan Westerberg Prager, Dean

# 11

By any standard, the UCLA School of Law is recognized as one of the nation's great law schools. This reputation is based on excellence in scholarship, a rigorous educational program, and the quality of the faculty which includes eminent authorities in all major fields of law.

The educational program at the UCLA School of Law is rigorous and competitive, but it takes place in a humane environment where there is a genuine spirit of community. The student body of the school is intellectually distinguished, interesting, and culturally diverse.

The school's strong clinical program offers courses in lawyering skills such as interviewing, counseling, negotiation, and trial advocacy. UCLA students, alumni, and faculty have collaborated to pioneer clinical legal education. Students see more focus on the attorney/client relationship; they see more of what will ultimately face them as lawyers and policymakers.

An extensive and diversified student extern program, one of the most highly regarded moot court programs in the nation, and a basic philosophy that teaches law students to think clearly and analytically, but with compassion, all contribute to the distinction of the school.

## Visiting Professors

Paul Hayden, J.D.  
Mary Beth Kors, M.A., J.D.  
Dennis Perluss, J.D.  
Robert Peroni, J.D., LL.M.

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles which are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

## Degrees Offered

Juris Doctor (J.D.)  
Master of Laws (LL.M.)

## Juris Doctor Degree

### Admission

Students beginning their professional work are admitted only for the Fall Semester. You must have received a bachelor's degree from a university or college of approved standing before beginning work in the school. You are also required to take the Law School Admission Test (LSAT). The admissions committee considers grades and test scores and, in appropriate cases, such additional factors as ability in languages other than English, work experience or career achievement, previous positions of leadership or other special achievements, ethnic background, prior community or public service, unusual life experiences, overcoming a physical disability or other disadvantage, career goals, economic disadvantages, and any other characteristic which may indicate that you will contribute to the educational and other benefits of a diversified student body.

For detailed information about the academic programs offered by the School of Law, the fees, and the semester-system calendar by which it operates, obtain the *Announcement of the UCLA School of Law* by contacting the Admissions Office, School of Law, 71 Dodd Hall, UCLA, Los Angeles, CA 90024-1445.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

## Residence and Unit Requirements

Candidates for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 16 hours each semester. The second- and third-year curriculum is elective, except for a required course in professional responsibility. In addition to the courses in the regular law school curriculum, students may take two courses for credit in other disciplines within the University. Graduate students may enroll in upper division law courses on a limited basis. Law courses are not open to non-UCLA students.

**Attendance and Grades** — The right to take examinations and the privilege of continuing as a student in the school are conditioned on regular classroom attendance. Information on the grading system, which is based on a numerical scale of 50 to 100, may be obtained from the Office of the Assistant Dean for Students. Standards for satisfactory performance and for graduation are prescribed by the faculty and are published separately. They may also be obtained from the above office.

## Curriculum

The school offers courses of instruction within the school and supervised educational experiences outside it in an effort to enable its students to think intelligently and to prepare them for careers of practice and public service. To this end the school employs several instructional techniques in a variety of subject areas.

In the first year of their legal education students are exposed to an intensive study of legal reasoning in a series of fields which have historically dominated legal thought. In conjunction with these courses students also receive training in the use of legal bibliography and in effective legal writing and oral advocacy.

In the second and third years students have an opportunity to engage in a number of different fields of law and law-related study.

## Concurrent Degree Programs

The School of Law offers three concurrent degree programs which allow you to fulfill the requirements of the J.D. and another graduate degree simultaneously.

### Education Program/J.D.

The School of Law and the Department of Education offer a concurrent plan which allows stu-

dents to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both areas, students are awarded both degrees on its completion.

### M.A.-Urban Planning/J.D.

The School of Law and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

Students interested in the program must apply and be admitted to the School of Law, the Urban Planning Department, and the Graduate Division.

### M.B.A./J.D.

The School of Law and the John E. Anderson Graduate School of Management offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Students interested in such a program should apply to both schools simultaneously.

## Master of Laws Degree

The school offers a graduate law program leading to the Master of Laws (LL.M.) degree to outstanding international students interested in pursuing graduate studies. Law school graduates with outstanding records who may be interested in this program should contact the Admissions Office for further information.

## Other Programs

### Clinical Program

The school permits students to participate in clinical training. These activities consist of fieldwork in a variety of federal and state agencies accompanied by seminars in the school which seek to analyze and expand the agency experience.

### Extern Program

The school offers an extern program which gives students the opportunity to work for judges or in legal agencies away from the school for as long as six months (including the summer), for which they receive academic credit. Extern programs have been offered in Washington, DC, San Francisco, and New York.

## First-Year Courses

The first year of law school is designed to introduce students to legal analysis using a variety of substantive fields. Each of the following courses is required of all first-year students.

**100. Contracts (5 units).** Law governing private agreements. Analysis of criteria for determining whether or not a particular promise or voluntary agreement is legally enforceable and survey of major legal issues affecting enforceable agreements, including when a contract becomes binding, what persons acquire rights under a contract, conditions under which performance is required or excused, what constitutes breach of contract, remedies available for breach of contract. Problems of interpreting contract language, role of contract in a market society, conflict between commercial need for certainty and demands of individual fairness, and relationship between contract law and other areas of law.

**108. Lawyering Skills: Theory and Practice (5 units).** Assignment of students to work in "law firms" where they learn legal principles and lawyering skills while working on various aspects of clients' problems. During the year students interview and counsel clients, and draft legal memoranda, contracts, and "advice letters," while learning to develop legal research strategy. In second semester students prepare a case for trial by developing a discovery plan, interviewing and deposing witnesses, and arguing a motion before a judge. Focus on principles of legal analysis and argumentation as well as lawyering techniques throughout entire year.

**120. Criminal Law I (4 units).** Selected topics in substantive criminal law. Consideration of principles underlying definition of crime such as requirements of *actus reus* and *mens rea* and general doctrines such as ignorance of fact and ignorance of law, causation, attempt, complicity, and conspiracy. Inquiry into principles of justification and excuse, with particular attention to doctrines of necessity, intoxication, insanity, diminished capacity, and automatism. Emphasis on basic theory of criminal law and relationship between doctrines and various justifications for imposition of punishment.

**130. Property (5 units).** Analysis of property as a social institution and particularly of dynamics of the system for recognizing and protecting competing claims to resources. Historical development of various kinds of interests in property, housing, landlord and tenant, public and private land-use planning and development, and sale and financing of real estate.

**140. Torts (5 units).** Personal injury law as it has developed within the Anglo-American legal tradition. Concept of negligence, refinements of negligence law, and doctrine of intentional torts. Contemporary rules of strict liability. Alternatives to the tort system in treating need for victim compensation as a societal problem. Effort to identify basic purposes which tort law system achieves or should achieve.

**145. Civil Procedure (5 units).** Processes that courts follow in deciding disputes in noncriminal cases. Way in which conflicts are framed for courts, stages through which litigation goes, division of power among various decision makers in the legal system and between state and federal courts, territorial limitations on exercise of judicial power, principles that define consequences of a decision once a court has finished with a case, and special opportunities and problems of litigations involving multiple disputants. Ways in which our beliefs about fairness (in particular those embodied in U.S. Constitution) and pressure for efficiency shape design of the process.

**148. Constitutional Law I (4 units).** Ways in which U.S. Constitution distributes power among various units of government in the American political system and limits exercise of those powers. Structural limitations on government: division of powers between the nation and states in the federal system, and separation of powers among the three branches (legislative, executive, and judicial) of national government. Civil War Amendments (13th, 14th, 15th) as limits on states and as sources of congressional power. Proper role of judiciary in limiting action of other branches of government.

## Second- and Third-Year Courses\*

All of the courses in the second- and third-year curriculum are elective with the exception of the legal profession requirement, which is a requisite for graduation. Students may fulfill the requirement either by preparing a paper in consultation with a faculty member or by completing one of the sections of Law 312. The different sections vary in emphasis.

**312. The Legal Profession (2 to 3 units).** Course has two central themes. One is distribution of legal services, including topics such as social structure of the profession, different roles and specialties of law practice, and how the profession is regulated. Second theme is the lawyer's representation of clients, including legal, professional, ethical, moral, and political problems arising out of the lawyer's various roles — representative of client, officer of the court, member of a profession. Various sections may offer different emphases with respect to rules regulating the profession (ABA Model Code of Professional Responsibility and ABA Model Rules of Professional Conduct) and in course requirements. Some sections require a paper in lieu of or in addition to an examination.

## Elective Courses

**200A. Constitutional Political Economy.** Course 148 is a "zoo" class, with separate cages for each of the different animals (types of cases) where doors of the cages are never open so that the animals can mingle with each other. An attempt to open the cages to see if there is a unified and principled way of thinking about constitutional law and a look at many cases already considered in course 148. Use of some economics (mostly public choice theory), history, rational choice theory, and common sense.

**201. Constitutional Law II.** First Amendment's guarantees of freedoms of speech, press, and assembly, and First Amendment's prohibition of establishment of religion and its guarantee of free exercise of religion. Proper role of judiciary in American system of government.

**202. Constitutional Criminal Procedure.** Study of Fourth-, Fifth-, and Sixth-Amendment constitutional restraints on activities of law enforcement officers during investigatory stage of the criminal process. How Supreme Court has attempted to resolve tension between individual rights and crime control needs in its decisions regulating the following law enforcement practices: investigative detention, arrest, police interrogation, searches and seizure, and eyewitness identification. Possible coverage of rights to counsel and to a jury. A four-unit version of course covers other issues, including entrapment and inquisitorial powers of the grand jury.

**205. Wills and Trusts.** Law of intestate succession, wills, will substitutes, trusts, class gifts, powers of appointment, Rule Against Perpetuities, and introduction to estate and gift taxation and law of trust and estate administration.

**207. Community Property.** Detailed examination of California community property system which regulates property relations between husband and wife during marriage and at its termination by divorce or death. Community property raises many questions about nature of marriage and various forms of gainful human activity.

**208. Real Property Secured Transactions.** Examination of operation of California's land security system, tracing the security device from common law mortgage to modern deed of trust and land sale contract. Fundamental problems of land security in realistic context of case and statutory law of a single jurisdiction, with emphasis on planning aspects.

**209. Real Estate Finance.** Law governing financing of land transactions from both a national and California perspective, including real estate mortgage, California Deed of Trust, installment land contracts, other mortgage substitutes, receivers, foreclosure, priorities in California antideficiency legislation, secondary mortgage market, construction financing, leasehold mortgages, shopping center developments, and condominiums.

**211. Evidence.** Focus on usual range of evidentiary topics — relevance, hearsay, character evidence, testimonial privileges, documentary evidence, and problems in examination of witnesses. Exploration of various ways of treating these issues, with emphasis on approaches of Federal Rules of Evidence and California Evidence Code.

**212. Federal Courts.** Selected problems in jurisdiction of federal courts, including justiciability and federal judicial function; federal habeas corpus; federal-question jurisdiction of federal district courts; intervention by federal courts in state proceedings.

**214. Civil Rights Litigation.** Exploration of issues arising in civil rights litigation across a range of substantive areas, including police brutality, race and sex discrimination, and free speech. Focus on Reconstruction-era civil rights acts, in particular on 42 U.S.C. section 1983 and analysis of recurring legal problems arising in suits against state and local governments and their officers for violation of federal constitutional and statutory rights. Topics include relationship between state and federal courts, state action requirement, 11th Amendment, municipal liability, official immunities, damages and injunctive relief, and attorney fees.

**214. Civil Rights.** Survey course intended to review both the causal and remedial relationship of law to racial discrimination. Brief review of historic development of race as a legal issue; past and current developments in housing, voting, and education. Identification of various competing visions of racial equality reflected in civil rights legislation, in case law, and in the very definition of discrimination. Review of several critiques of antidiscrimination law, with special attention to those questioning effectiveness of seeking racial reforms through law.

**215. Law and the Poor.** Major income-maintenance programs in the U.S.: Aid to Families with Dependent Children, Disability, Food Stamps, Supplemental Security Income, Social Security, and General Relief. Emphasis on interactions of moral attitudes toward the poor and structure and implementation of law, policy, and administration. The deserving and underserving poor, moral behavior, race, gender, work, and welfare. Current welfare reform consensus, including California GAIN program and recently enacted Family Support Act. Students required to spend one day working with the public counsel advocating for general relief recipients.

**216. Administrative Law.** Much of modern government is administered by agencies of government other than legislatures or courts. Substantive sources of (and limits on) administrative authority. Procedural norms with which agencies must comply in the course of adjudication or rule-making. Judicial review as a technique for correcting administrative error or abuse. Individual's right to procedural due process in individual's interactions with public agencies.

**M217. Topics in Legal Philosophy.** (Same as Philosophy M256.) Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

**220. Federal Taxation I.** Fundamentals of federal income taxation, particularly as they apply to individuals. Gross income, deductions, year in which income is properly reported and deductions properly taken, and various other topics.

**221. Federal Taxation II.** Prerequisite: course 220. Course 230 may be taken concurrently. Application and extension of principles in course 220 to shareholder/corporation relationships. Federal income tax consequences of formation, reorganization, and liquidation of corporations, distributions to shareholders, and sales of shareholder interests.

**222. Federal Taxation III.** Federal taxation of gifts and decedents' estates; federal income taxation of trusts and estates. Emphasis on tax planning techniques. Of considerable importance to anyone who expects to practice in areas of tax planning, estate planning, family law, and probate, among others.

**224. U.S. Taxation of International Transactions.** U.S. taxation of (1) international activities of U.S. citizens and corporations and (2) U.S. activities of foreign citizens and corporations. Particular emphasis on impact of federal income taxation on cross-border acquisitions.

**227. Taxation of Partnerships and S Corporations.** Federal income tax treatment of pass-through entities — partnership, S corporations, and limited liability companies — and their owners. Organization, operation, and liquidation, with particular attention to comparison of how results may differ depending on entity employed.

**230. Business Associations.** Focus on how problems of joint economic ventures are resolved in the law of agency, partnership, and corporation. Federal securities laws and their impact on planning business ventures.

**234. Law and Accounting.** Prerequisite: consent of instructor (for students with more than two undergraduate or any graduate accounting courses). Recommended for students with no prior accounting training. Basic principles of financial reporting and analysis applied by business enterprises. Examination of how firms record transactions and summarize their economic activities in the form of financial statements. Consideration of various financial concepts of relevance to attorneys, including income measurement, liability determination, and enterprise valuation. Accounting and financial aspects of capital structure decisions involving bonds, equity securities, and leases.

**236. Securities Regulations I.** Prerequisite: course 230. Basic approach of federal securities law, including disclosure-oriented provisions of Securities Act of 1933 and Securities Exchange Act of 1934, and fraud and civil liability provisions of both acts. Impact of federal securities law on merger and acquisition process, including tender offers and leveraged buyouts.

**239. Elements of Economic Organization.** Examination of structure of business transactions and allocation of control, risk, and return. Topics include venture capital investments, debt and loan agreements, employment agreements, distribution and marketing agreements (including franchising), motion picture production/finance/distribution agreements, and joint ventures. Guest lecturers from law firms and business world. Offered jointly by School of Law and Anderson Graduate School of Management.

**240. Antitrust I.** Economic analysis related to price fixing, market division, joint ventures, tying arrangements, reciprocity, requirements contracts, mergers, and monopolization.

**247. Law and Economics.** Economics background not required. Basic theory of voluntary exchange and conditions necessary for a voluntary exchange system to maximize community welfare, applied to various types of legal problems in attempt to gauge extent to which legal rules contribute to (or hinder) maximization of such welfare.

\*The School of Law maintains its own course numbering system; course numbers as shown here do not correspond to Graduate Division course numbering definitions.

**248. Bankruptcy.** Examination of Bankruptcy Code and related statutes from viewpoint of what commercial lawyer should know about the field in order to advise clients in planning and carrying out business transactions. Emphasis on liquidation of debtors' estates in bankruptcy, reorganization of business debtors in Chapter 11, rehabilitation of individual debtors in Chapter 13, planning business transactions to withstand trustee's avoiding powers — voidable preferences, fraudulent transfers (including leveraged buy-outs and intercorporate guarantees), and equitable subordination of claims.

**250. Commercial Law.** Detailed examination of Uniform Commercial Code. Study of Article 9 of the Code, law governing security interests in personal property. Business collateral such as equipment, inventory, accounts receivable, and chattel paper, as well as financing of purchases by nonbusiness consumers. Treatment of secured transactions in bankruptcy and use of letters of credit in commercial transactions, law of negotiable instruments (Article 3 of the Code), bank collection process (Article 4), and wire transfers (Article 4A).

**252. Unfair Competition and Business Torts.** Survey of five ways in which law regulates the competitive process, encourages innovation, and governs rights of creators and consumers: patent, copyright, trademark, false advertising, and business tort law. Patent law covered very briefly, primarily for comparative purposes rather than as a complete introduction to that area. "Business torts" includes interference with contracts and business advantage, trade secret theft, right of publicity, and RICO — popular federal racketeering statute.

**255. Tort Law: Tort Crisis, Tort Theory, and Tort Reform.** Modern tort law — recent developments in tort doctrine and tort practice that may have led to a crisis in the 1980s; academic scholarship that has endeavored to explain, at the theoretical level, what happened in the 1980s; and range of reforms that have been enacted by state legislatures or proposed for tort scholars.

**259. Labor Arbitration.** Practice, procedures, and substantive law of labor arbitration, with emphasis on what labor arbitrators actually do in their interpretation of collective bargaining agreements. Procedural content of labor arbitration: Who are the labor arbitrators? How are they mutually selected by unions and employers? How might the fact that the arbitrator is mutually selected and mutually paid by the union and employer bear on arbitrator's decision-making process? Utility of using the labor arbitration model as a dispute resolution mechanism outside the labor environment: domestic disputes, landlord/tenant disputes, etc.

**260. Labor Law I.** Fundamental law governing unions and other collective activity among workers in the private sector — the National Labor Relations Act (NLRA). How principles developed under NLRA have been applied in the public sector. Analysis of a series of topics, including organizing, union elections, collective bargaining, picketing, strikes, lockouts, and arbitration. Development of the law and how the law has structured relations between labor and management and contributed to current state of unions in the U.S.

**261. Employment Law.** Prerequisite: course 260 or consent of instructor. Collective bargaining in the public sector (government employment at federal, state, and local levels). Differences and similarities in private and public sectors, and responses of federal and state legislatures and of courts to special problems of collective bargaining in the public sector.

**261. Employment Law.** Exploration of legal regulation of wage work, with topics from both private and public sector. How law has defined relationship between employee and employer and intervened into that relationship. Topics include constitutional rights of public employees, employment discrimination, unjust discharge, and other statutory regulation of employment.

**263. Employment Discrimination.** Title VII of 1964 Civil Rights Act and similar statutes prohibit discrimination based on race, sex, national origin, religion, age, and disability. Examination of substantive and procedural law that has developed under these statutes; consideration of social policy goals and assumptions underlying that development. Specific topics include disparate treatment and disparate impact theories of discrimination, employment testing and test validation, statistical proof, equal pay and comparable worth, affirmative defenses (business necessity, bona fide occupational qualifications, bona fide seniority systems), affirmative action and reverse discrimination, obligations of government contractors, class actions, and administrative and judicial remedies.

**264. Workers' Compensation and Workers' Injuries.** Study of ways in which law responds to phenomenon of workers' injuries and occupational disease. Labor market and unionization, workers' compensation, federal OSHA job-safety regulation program, and limited but significant number of tort issues that workers' injuries provoke. Workers' compensation considered both as a compensation program and as a tort-like rule of strict liability.

**267. Indian Law.** Special legal status of American Indians and Indian tribes and tension between moral/legal claims and political forces. Sources and scope of federal, state, and tribal power on Indian reservations; property law concepts unique to Indian tribes and Indians; rights of American Indians in relation to federal, state, and tribal governments and federal trust relationship to Indians.

**270. International Law.** Role of law and legal institutions in international relations and in government foreign affairs decision making, particularly on the part of the U.S. Effect of public international law on domestic law and private activity. How international law is applied in the world. Essentials of treaty law and customary international law. U.S. Constitutional structures affecting foreign relations and allocation of responsibility for decision making within the international system, and how conflicts in assertion of jurisdiction are resolved. Review of substantive rules of the law of sea and legal regime governing use of airspace. Major limitations on exercise of authority by states (doctrines of sovereign immunity, acts of state and diplomatic immunity) and responsibility of states for fair treatment of aliens, international human rights law, and role of individual in the system. Particular problems of terrorism, international environmental law, international organizations, and rules related to use of force.

**271. International Business Transactions.** Legal framework of international trade, investment, and distribution of goods and services. How legal activities, such as negotiation of a contract, litigation or arbitration of a claim, distribution of goods through agents, distributors, and licensees, or pursuit of a law practice are affected by international dimensions of the work.

**273. Human Rights.** International human rights law from jurisprudential and practical perspectives. Introduction to history and normative content of international human rights law, law-making process, how abuses are spotlighted, and extent to which meaningful sanctions exist. Human rights as an element of U.S. foreign policy and remedies available to victims in U.S. courts. Use of contemporary world events to explore questions such as whether human rights norms are universally applicable, whether certain rights trump other rights, and extent to which conflicting rights can be harmonized.

**274. Trademark and Unfair Competition Law.** Basic principles of trademark and unfair competition law. Topics include philosophical and public policy considerations underlying trademark and unfair competition law; how trademark rights are acquired, maintained, and lost; process for registering trademarks; infringement of trademark rights; dilution of trademarks; false advertising; right of publicity; remedies for violation of trademark rights; and gray market and other international aspects of trademark rights.

**278. Comparative Law: Japanese Law and Society.** Selected topics in Japanese law and society. Introduction to Japanese legal and social context, legal profession, and judicial system. Exploration of four or five case studies of groups in Japan which have sought to improve their situation through use of legal and extralegal avenues, including victims of environmental pollution, Koreans in Japan, Burakumin (minority group subordinated on basis of ancestors' occupation and residence).

**280. Aviation Law.** Examination of international and domestic laws applicable to aviation and air transport. Analysis of nature and sources of aviation law, legal regime of airspace and aircraft, and regulation of users of airspace. International and U.S. law related to increasing phenomenon of hijacking, offenses on board aircraft, and acts of terrorism and sabotage committed against aircraft, air carriers, and other entities involved in civil aviation. Economic regulation of air carriers in the U.S. in context of Airline Deregulation Act of 1978. Economic regulation in international sphere examined through traffic conferences of International Air Transport Association and bilateral air transport agreements executed between various states. Liability of aircraft operators, with special emphasis on regime of liability for international air carriers established by Warsaw Convention of 1929 and subsequent instruments. Introduction to field of aircraft leasing and financing.

**M281A-M281B. Child Abuse and Neglect (2 units each).** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Course M281A is prerequisite to M281B. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies.

**282. Education and the Law.** Exploration of recent controversies on student rights at K-12 and college levels. Topics include education malpractice, student drug testing, discriminatory harassment, and parameters of right to receive information and ideas. Examination of efforts to maximize equal educational opportunity by analyzing such volatile areas as standardized testing, bilingual education, rights of disabled (including rights of AIDS-infected students), school choice, homogeneous ability grouping, and interscholastic athletics.

**M285. Governance: State, Regional, and Local (2 to 4 units).** (Same as Urban Planning M202B.) Analysis of structure and function of local, regional, and state government in historical and institutional context: organization, finance, intergovernmental relations, role of judiciary, public services, lawmaking, citizen participation through initiatives and referenda, and government tort liability.

**M286. Public Control of Land Development (2 to 4 units).** (Same as Urban Planning M202A.) Analysis of legal and constitutional constraints on land-use planning and development; administrative and environmental regulatory processes, including relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required.

**M287. Urban Housing and Community Development (2 to 4 units).** (Same as Urban Planning M231.) Examination of past 40 years of federal and state programs to stem urban decline and improve housing in the U.S.; comparison and contrast of legal and policy initiatives in areas of public housing, housing segregation, mortgage subsidies, landlord/tenant law, urban renewal, and community organizing. Research paper required.

**M290. Environmental Law (2 to 4 units).** (Same as Urban Planning M264.) Examination of the field of environmental law through analysis of various legal issues and public policy; legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as a means of illustrating policy issues underlying the field.

**290A. International Environmental Law.** Role that international law currently plays, or might play, in determining answers to questions about humankind's impact on the global environment. Skills of interpretation, drafting, negotiation, and transactional design relevant to attorneys practicing law of any sort.

**292. Water Law.** How society allocates and protects a crucial natural resource — water. Law treats water differently from land and other natural resources, permitting reexamination and critique of many commonly held assumptions about property (such as asserted advantages of exclusive property rights). How law allocates water among competing consumptive and in-stream uses (including recreational use and preservation) and protects water quality under state and federal law. History and politics of water development in U.S.; relevant role of market in reallocating water; constitutional protection of water rights; environmental limits on water development (including Endangered Species Act); Native American water rights; interstate and international disputes over water; institutional influences on water use; and public rights of access to water resources.

**299. Federal Criminal Law Enforcement.** Federal criminal enforcement against white collar crime, organized crime, and political corruption. Emphasis on federal crimes such as RICO (civil RICO also), money laundering, mail fraud, Hobbs Act, and Travel Act. Federal system of penalties, including criminal forfeiture and federal sentencing guidelines. It is essential for lawyers representing business persons to be familiar with federal criminal laws. Gives students a basic understanding of federal criminal system, ways in which federal criminal law differs from its state counterparts, and how federal and state criminal enforcement systems relate to each other.

**300. Remedies.** Kinds and nature of relief afforded by courts to litigants in civil litigation. Theory and general principles governing award of compensatory damages, equitable remedies, and restitution. Substantive law of restitution and history of equity jurisdiction.

**M301. Art Law.** (Same as Art History M270.) Prerequisite: consent of instructor. Knowledge of fine arts, arts management, or international law desirable. Limited enrollment; management and art history students may cross-register with consent of instructors. Legal issues related to the fine arts. Consideration of U.S. domestic law as well as international treaties and foreign law in addressing such controversial issues as the international trade in art, art in public places, and moral rights. Distinguished guest speakers and one field trip.

**302. Intellectual Property Law.** Introduction to law of patents, copyrights, and trademarks. Doctrines of patentable subject matter, nonobviousness, and patent infringement. Basic legal concepts, such as copyright distinction between idea and expression, and trademark distinction between valid marks and unprotectable generic words. Readings on theory and history of intellectual property protection, with some readings from law and economics literature.

**305. Entertainment Law.** Analysis of a variety of legal problems encountered in representing performers, writers, producers, and directors, and companies with which they deal. Ways in which rights are acquired and exploited, as well as ways in which proceeds of such exploitation are allocated. Rights of privacy and publicity. Roles of attorneys, agents, managers, and promoters in representation of creative talents.

**306. Patent Law.** Basic principles of patent law. Topics include philosophical and public policy considerations underlying patent law; what is patentable; requirements for patentability; operation of U.S. Patent Office, including procedures for applying for patents; patent applicants' duties of candor and disclosure to Patent Office and consequences for failing to discharge that duty; infringements of patents, including analytical framework for determining whether a patent is infringed; and remedies for patent infringement.

**309. Law and Biology.** Exploration of application of recent research in biology, anthropology, evolutionary theory, neurophysiology, and ethology to legal problems, with specific topics in property, criminal, family, and tort law.

**313. Conflict of Laws.** Problems arising in multistate transactions in the federal system, including choice law, recognition and enforcement of judgments, and bases of jurisdiction of state courts.

**M315. Asian Americans and Legal Ideology (3 units).** (Formerly numbered 315.) (Same as Asian American Studies M297D.) Exploration of Asian American experience as it relates to American legal system, considering both dominant and oppositional concepts of law. Consideration of primary historical documents to examine ways Asian Americans have been victims of the legal system, as well as astute manipulators of the legal system.

**317. Family Law.** Conjugal relationships (i.e., marriage and cohabitation). Legal principles and social policies governing creation, maintenance, and dissolution of conjugal relationships. Consideration of parent/child relationship limited to divorce-related child custody and support and legal status of children born out of wedlock.

**319. Election Law.** Ways in which laws governing the political process affect and reflect political power relationships. Right to vote, reapportionment, political parties, bribery; campaign finance, incumbency, and ballot propositions.

**321. Legislation.** Despite law school emphasis, especially in first year, on case law and judicial process, the "law" most lawyers work with is statutory. Consideration of various aspects of legislation in theory and practice, with emphasis on processes by which statutes are adopted and implemented and principles by which they are interpreted.

**325. Law and Psychiatry.** Law affecting the many persons identified as seriously mentally ill has rapidly changed in past 30 years, especially with respect to standards for involuntary civil commitment: rights of those committed, including right to treatment and to decline treatment; guardianship; doctor/patient confidentiality; discrimination against the mentally disabled; insanity and related defenses; competence to stand trial; and criminal dispositions. Attitudes concerning psychiatrists, psychotherapy, and mental illness have also changed. Exploration of these changes, with emphasis on impact of constitutional adjudication on the law of civil commitment; different world views of psychiatrists and lawyers regarding dependence and paternalism, and liberty and constraint; whether imposition of legal rules on medical practices has diminished human suffering.

**326. Health Law and Administration.** Major programs in health care financing (Medicare, Medicaid, private insurance, medically indigent) and health care organization (private practice, HMOs, preferred providers, etc.). Effects of cost containment and administration's pro-competitive strategy. Topics include the professions, hospitals, quality control (including malpractice), antitrust, alternative approaches to health care, medical experimentation, special health problems of the poor, the elderly, women, minorities, and the defective newborn, and current reforms.

**327. Communications Law.** Survey course on laws related to major industries regulated by the Federal Communications Commission (broadcasting, cable, and television). Content and structural regulation of mass media, including fairness doctrine, political speech, and ownership restrictions. Review of policy basis for regulation and proposals for change. Regulation of nonbroadcast video technologies, including cable and satellites. Review of common carrier regulation as applied to examination of telecommunications industry and role of competition.

**328. Sports Law.** Legal issues pertaining to both professional and amateur sports, including labor, antitrust (those raised by collective bargaining process, player drafts, and other player restraints, and attempts to control franchise movement), individual player/club contract, constitutional, gender equity, and player/agent issues.

**329. Women and the Law.** Ways in which court decisions, statutes, and operation of legal system reflect ideas about what women are like and what their roles in life should be; relationships between law and women's equality. "Protective" labor legislation, voting rights, equal protection of the laws, Equal Rights Amendment, control of childbearing, employment discrimination, and either topics in criminal law (rape, prostitution) or topics in family law (custody, parental rights).

**329. Women and the Law: Feminist Jurisprudence.** Critical examination of laws affecting women, including laws related to employment discrimination, sexual harassment, divorce, child custody, incest, abortion, surrogacy, domestic violence, pornography, prostitution, and rape. Challenge to conventional understandings of role of law; how race and class differences influence way law intervenes in lives of women; role of legal discourse in constructing and maintaining gender differences; significance of feminist theory to legal theory.

**331. Immigration Law.** Overview of immigration and naturalization process from practitioner's point of view. Nonimmigrant and immigrant visas, consular practice, deportation/exclusion proceedings, naturalization and citizenship, constitutional issues related thereto, and specific remedies available.

**332. Children and the Law.** Judicial and legislative allocation of power and responsibility between parents and the state, child's economic situation within the family, child custody, adoption, medical treatment of minors, status of the fetus, parental right to discipline children, neglect and abuse, state-enforced limitations on the liberty of minors and juvenile delinquency.

**333. Community Associations and the Law.** Legal nature of mandatory membership community (homeowner) associations and the developing body of law governing their operation. Topics include powers of homeowner associations to levy assessments, to enforce covenants, and to make rules and regulations governing conduct of residents and others within area covered by the homeowner association. Covenants and rules infringing on free speech, personal autonomy, and privacy of the residents, as well as architectural control covenants. Duties of the association and board of directors to owners and residents and various standards applied to determine liability of individual directors.

**335. Religious Legal Systems.** Literature and institutions of a religious legal system. Offered from time to time by different instructors in Canon law, Islamic law, and rabbinic legal tradition. Content varies depending on particular tradition under study; emphasis on concerns common to a legal system based on divine authority. Extent of human authority to interpret and modify the received law to meet new circumstances, relation between law and morality, and interaction between religious and secular law.

**337. American Legal History.** Examination of significant episodes and developments in American legal and constitutional history, with emphasis on interplay between legal change and contemporaneous developments in American politics, society, and culture. Topics include constitution-making and creation of judicial review; law and economy in the 19th century; slavery and constitutional crisis; freedom, equality, and Reconstruction Amendments; American legal ideology and rise of industrial capitalism; women, law, and labor in Progressive era; development of an American legal profession; Supreme Court in age of Holmes and Brandeis; legal academy from Langdell to legal realism to legal process.

**348. European Union Law.** For more than thirty years a unique set of legal institutions has been developing to support economic and political integration of Western Europe. In recent years the process has been accelerated with the aim of achieving greater political and monetary union. Examination of structures and institutions of the communities, lawmaking processes they use, and their approach to several salient substantive economic problems.

**400. Pretrial Lawyering Process: Civil (Clinical).** Training and practical experience in the full range of skills used by lawyers during pretrial phases of civil litigation process. Interviewing, case planning, investigation, counseling, pleading, formal discovery, negotiation, and lawyer decision-making skills. Subjects presented through demonstration, simulated problems, and videotaped role-play sessions conducted in connection with interviewing, counseling, and depositions. Fieldwork offers opportunity to employ lawyering skills in a law office setting under supervision of experienced legal services attorneys.

**400. Pretrial Lawyering Process: Housing Discrimination (Clinical).** Prerequisite: consent of instructor. Limited to 12 students. Use of federal fair housing litigation as vehicle to give students hands-on training in civil lawyering skills, including client interviewing and counseling, case planning, fact investigation, pleading, discovery, motions practice, and structuring of complex remedies. Practice of these skills through lecture/discussion, simulated videotaped exercises, written problems, and group projects. Introduction to federal and California fair housing laws and underlying policy issues that those laws address. Ethical dimensions of adversarial lawyering; uses of litigation to address broad social justice issues; challenges of lawyering across differences of gender, ethnicity, and class.

**402. Fact Investigation and Discovery in Complex Litigation (Clinical).** Theoretical and practical aspects of discovery in both civil and criminal cases. Rational and nonrational processes involved in proving facts. Relationship between proof at trial and investigation of a case. Development of proficiency in interviewing witnesses, drafting interrogatories and other discovery requests, and taking depositions in simulated cases.

**403. Interviewing, Counseling, and Negotiation (Clinical).** Basic interviewing, counseling, and negotiation concepts in litigation context. Exploration of these concepts through role-plays and analysis of readings that attempt to offer models of what lawyers do or should do. Interviewing, counseling, and negotiation taught by in-depth class critique of videotaped demonstrations of lawyers performing legal skills and tasks. Simulated out-of-class exercises critiqued by instructor. Field experience (eight hours per week) at UCLA Student Legal Services and other legal service organizations. Students interview and counsel clients about landlord/tenant disputes, debt collection matters, general consumer problems, some criminal law issues, and family law matters.

**404. Clinical Semester (Clinical).** Students spend one term working full time in a small law firm housed in the Law School Clinic. Under faculty supervision, each student appears in court to argue motions and try cases. Students interview and counsel clients, write and argue motions, prepare written discovery, take depositions, and try at least one case in court. Substantive law areas include housing discrimination, denial of unemployment benefits, and consumer fraud. Students also participate in class sessions and simulated videotaped exercises designed to develop lawyering skills. Subjects include interviewing, counseling, motion practice, civil discovery including depositions, negotiation, trial preparation, and trial advocacy.

**405. Trial Advocacy (Clinical).** Designed to provide training in the full range of skills needed by a trial advocate. Year-long series of classes emphasizing development of courtroom advocacy and other lawyering skills: case planning, direct and cross-examination of witnesses, opening statement and closing argument, client and witness interviewing, case investigation, negotiation, and examination of expert witnesses. In Fall Semester role-play exercises are legal or nonlegal in nature, capped off with a mock trial. During Spring Semester students actually appear in court and represent indigent clients under direct supervision of instructors.

**405. Simulated Trial Advocacy (Clinical).** Prerequisite or corequisite: course 211. Enrollment priority to third-year students. First half of year-long course 405. Theoretical and practical aspects of trial process; training in skills needed to represent clients in pretrial and trial litigation. Principal function of trials — resolution of disputed questions of fact — and trial lawyer's role in presenting persuasive evidence to judges and jurors who perform that function. Development of specific skills in such tasks as interviewing, fact investigation and analysis, conducting direct and cross-examinations, making opening statements and closing arguments, using exhibits, and making and responding to evidentiary objections, presented through combination of lecture, discussion, demonstration, and simulated role-play exercises. Presentation of a videotaped mock trial at end of semester (no fieldwork component).

**406. Public Policy Advocacy (Clinical).** Role of lawyers in public policy advocacy in context of developing and implementing a strategy for dealing with an actual public policy issue representing real clients or client groups. Students work jointly on at least one public policy issue. Examination of public policy litigation and nonlitigation approaches to achieving client goals; organizational, political, cultural, and public relations contexts in which such advocacy is carried out. Attention to ethical and professional issues unique to such representation. Use of simulated and actual videotaped exercises to teach lawyering skills applicable to advocacy, including working with clients and client groups to develop effective strategies utilizing all available resources and methods, interviewing clients and witnesses, conducting fact investigation and organizing factual information, developing and utilizing experts and expert witnesses, and evaluating merits of both litigation and nonlitigation approaches.

**407. Mediation and Alternative Dispute Resolution (Clinical).** Issues, principles, and skills implicated in use of nonadversarial methods of dispute resolution. Theories and various approaches to conflict resolution, including comparisons among and between adjudication, arbitration, mediation, med-arb, mini-trials, and community dispute centers. Some of the difficulties with alternative dispute resolution, including role of law, inequality among the parties, consent, motivation, enforcement, and effects of alternative dispute resolution. Comparative study of dispute institutions in other political and legal systems. Through skills training and role-play exercises students learn and practice skills necessary to conduct mediation and arbitration sessions.

**408. Legal Negotiation (Clinical).** Theoretical and practical aspects of process of negotiating transactions and disputes in our legal system. Negotiation theory, using both legal and behavioral sciences materials; differences between litigation and transactional negotiations; context in which particular negotiation strategies and tactics are successfully employed; ethical and normative implications of negotiating; role negotiation plays in our legal system, both in dispute resolution and in legal planning; negotiating, both from planning and behavioral perspectives.

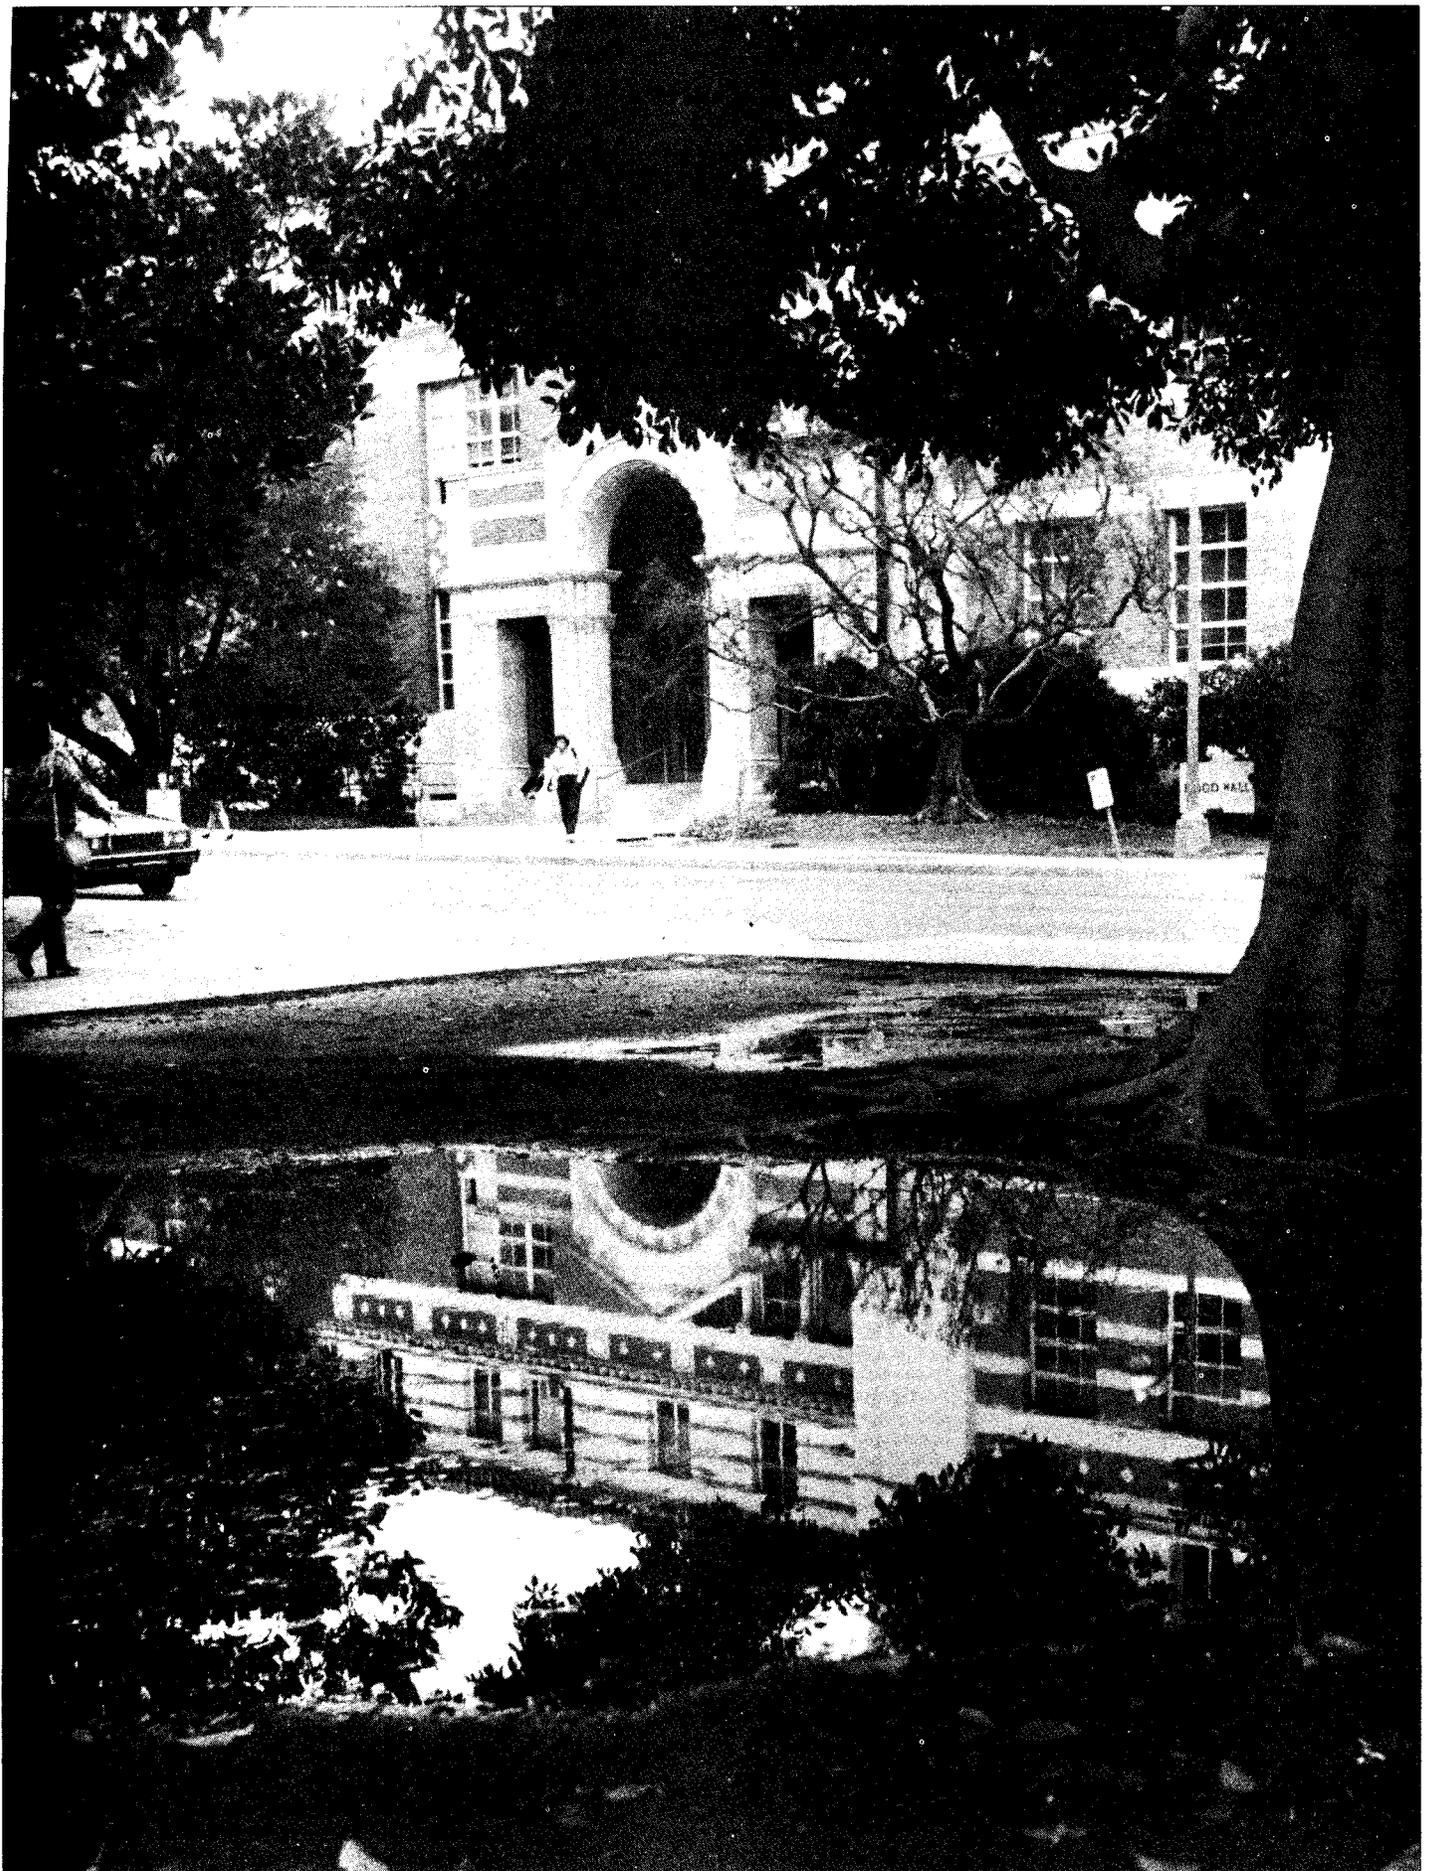

**409. Negotiation and Mediation (Clinical).** Theoretical and practical aspects of negotiating and mediating transactions and disputes in our legal system. Negotiation and mediation theory, using both legal and behavioral sciences materials; differences between litigation and transactional matters; context in which particular negotiation and mediation strategies and tactics are successfully employed; ethical and normative implications of negotiations and mediations; role negotiation and mediation plays in our legal system, both in dispute resolution and in legal planning; development of proficiency in negotiation and mediation, both from planning and behavioral perspectives.

**412. Street Law: American Legal Education (Clinical).** Students teach law in school classrooms under supervision of a high school teacher and develop own individual curriculum. Students do practice teaching, receive instruction in a variety of teaching methods, and use these methods with their high school classes. Seminar discussion focuses on extent to which teaching is similar to practicing law, and students analogize situations that arise in the teaching of law to its practice. Communication difficulties that frequently arise among lawyers, clients, and laypeople.

**424. Civil Rights and Police Reform (Clinical).** Exploration of problems and causes of police abuse and various avenues for achieving police reform. Topics include excessive force, racial bias, illegal searches and seizures, control of police under U.S. Constitution, civil rights litigation, criminal prosecutions of "bad cops," police rule making, community policing, community review of police behavior, so-called street gangs, the riots and rebellion following the acquittals in Rodney King police brutality trial in state court, efforts to rebuild Los Angeles, Kolts Report on Los Angeles Sheriff's Department, and Christopher Commission Report on Los Angeles Police Department. Students work with civil rights lawyers on police misconduct litigation in drafting memos, conducting depositions, and managing discovery. Guest speakers include civil rights lawyers and law enforcement officials.

**436. Community-Based Advocacy with Poor Women (Clinical).** Prerequisite: consent of instructor. Limited to eight students. Weekly seminar and supervised fieldwork with a community group in south-central Los Angeles. Recent scholarship environments poverty lawyering as a multidimensional "collaboration" between professional advocates and community groups. These and other recent theories about race, poverty, and advocacy brought into the real world through work with a group of African American and Latina Head Start parents in south-central Los Angeles. Discussion of readings on such topics as life experiences of poor women of color, social welfare law and its impacts on poor women, and potential of law and lawyering to support processes of community building among poor women in south-central Los Angeles. Students work with Head Start group to provide basic legal education, advocacy, and lay advocacy training to women on such issues as housing, welfare, and educational rights and to seek pro-active responses to long-term community needs.

**445. Planning and Drafting Small Estates (Clinical).** Substantive law of estates, wills, trusts, and tax as those laws relate to testamentary disposition of small estates. Interviewing, drafting, and counseling techniques. Students are assigned clients and interview them to determine their estate planning needs. Students discuss with a supervising probate attorney the kind of estate plan needed and then draft an appropriate plan and review it with the attorney.

**500. Seminar: Constitutional Law.** Selected topics in constitutional law.

**501. Seminar: Tax Systems in Transition.** Prerequisite: course 220. Tax policy issues in context of designing tax systems for countries making transition from a planned to market economy. Review of major tax issues facing government officials in countries in Central and Eastern Europe and former Soviet republics.

**503. Seminar: Criminal Law — Moral Culpability Jurisprudence.** Readings from moral philosophy, moral psychology, and criminal law excuse theory. Examination of competing accounts of when it is appropriate to impose moral blame on individuals for breaching norms governing their behavior. Special attention to two constitutive elements of moral culpability analysis: attributes people must possess to qualify as appropriate addressees of moral norms (moral agency) and conditions under which it is fair to attribute their actions to them (moral responsibility for action). Specific criminal law issues that implicate moral culpability analysis, including execution of adolescents and mentally retarded offenders, criminal responsibility of moral psychopaths, and defenses of duress and provocation.

**503. Seminar: Criminal Law — Rape.** Legal definition of rape, procedural rules applied in administration of rape statutes, and sentences provided for rape offenses. In order to determine and critically evaluate empirical and moral responsibilities of prosecutors and defense attorneys, rape cases are also examined, as are civil alternatives to rape prosecutions.

**504. Seminar: Property — Human Embodiment and Property Rights in Body Parts.** Examination of such issues as nature of human embodiment and parts; identity and individuation of transplanted organs across time; intelligibility of the idea of property rights in the body; whether body parts should be allowed to either be given away or sold, whether during life or at death, and relatedly, whether there should be a "market" for body parts; and roles of consent and government regulation.

**507. Seminar: Workplace Sexual Harassment.** Examination of a range of legal problems flowing from charges of on-the-job sexual harassment, including distinctive problems of proof in arbitration and judicial proceedings, conflicts between judicial remedies for alleged harassment victims and labor arbitration remedies for accused harassers, and standards of judicial review of labor arbitration awards in sexual harassment disputes.

**512. Seminar: Selected Problems in Social Welfare and Health Law.** Prerequisite: consent of instructor. Limited enrollment. Year-long research seminar on topics selected by students with consent of instructor, with emphasis on empirical-policy research outside the School of Law and preferably in the community. Joint class meetings to discuss topics, methods of approach, and preliminary findings, but most of work to be independent research.

**513. Seminar: Environmental Law — Regulation of Land Use/Environment of Mexico-U.S. Border Zone.** Consideration of institutions of governance in Mexico and the U.S. which control environmental pollution and which shape land use and urbanization in the border area. Attention to asymmetry in role of state and federal government in formulation of policy in both nations, as well as decline in living conditions and social indicators on U.S. side of the border.

**514. Seminar: Comparative Family Law.** Prerequisite: consent of instructor. Focus on Japanese family law, with emphasis on problems of comparative legal analysis; interplay between legal norms and historical, religious, sociocultural, and economic factors. Topics include family registration, adoption, selection of marital partner, breach of contract to marry, divorce, abortion, and juvenile delinquency.

**516. Seminar: International Law — Trade Law.** Public international law affecting private economic activity in areas of trade, investment, and monetary affairs. Roles of several international organizations, such as GATT, IMF, World Bank, UNCTAD, and United Nations Center on Transnational Corporations. U.S. law governing negotiation and implementation of international agreements. Trade law; rules and procedures of GATT and U.S. implementation of GATT obligations through its domestic legislation, including Trade Act of 1974. Functions of International Monetary Fund and World Bank in international trade and investment; problems involving the developing world, including GSP (tariff preferences for developing countries), commodity problems, and access to supplies of important products. Proposals to regulate international investment, including work of UNCTAD and the United Nations Center on TNC, and proposed "Codes of Conduct" designed to govern activities of multinational corporations.

**M519. Seminar: Comparative Japanese Law — Selected Readings.** (Same as Japanese M196.) Prerequisite: reading knowledge of Japanese at third-year level. Designed to introduce students to a variety of Japanese-language legal materials. Reading of law review articles and other sources as time permits (e.g., selections from contracts, cases, or treatises); titles vary from term to term. Classroom work may be coordinated with outside research projects with consent of instructor.

**522. Seminar: Private Land-Use Planning.** Constitutional, statutory, and public policy limits on private ordering in the land-use arena. Limits on racial and religious discrimination, gender and lifestyle discrimination, restraints on trade and competition, restraints on alienation, and limits on interferences with privacy and personal autonomy examined primarily in context of subdivision covenants and homeowner associations.

**M524. Seminar: Philosophy of Law.** (Same as Philosophy M257.) Prerequisite: consent of instructor. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

**M526. Seminar: Urban Affairs (2 to 4 units).** (Same as Urban Planning M202C.) Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as antispeculation and rent control legislation. Catalytic role of economic and community development in expansion of housing supply also considered.

**528. Seminar: Indian Law — Tribal Legal Systems.** Historical and contemporary study of tribal legal systems. Examination of classic studies by anthropologists and legal historians of traditional tribal governing structures and dispute-settling mechanisms. Comparison with contemporary tribal constitutions, codes, and practices. Consideration of methodological questions posed by comparative legal study.

**531. Seminar: Law and Development in Latin America.** Role of law in economic, political, and social change in the developing countries of Latin America, compared to function of law and policy in the U.S. in allocation of wealth and natural resources. Consideration of the civil law tradition in Latin America. Examination of nexus between existing socioeconomic relationships and legal institutions; exploration of role of law as an instrument of both reform and counter-revolution.

**533. Seminar: Law, Medicine, and Human Values.** Exploration of abortion from legal as well as philosophical, psychological, and sociological perspectives. Readings include basic legal cases, and books and articles from various disciplines.

**535. Seminar: Arbitrated Alcohol and Drug Workplace Disputes.** Study of evolving arbitral and judicial standards in drug and alcohol workplace disputes. Topics include sufficiency of just-cause to test employees for drugs; disputes over accuracy of urine and blood analysis tests for drugs; role of rehabilitation as a factor in the decision to discipline for drug or alcohol abuse; differing (and possibly discriminatory) treatment of drug-abuse offenders vis-à-vis alcohol abuse offenders; appropriate linkage of off-duty ingestion with on-duty impairment; appropriate impact on the arbitrator of drug and alcohol criminal law procedural and proof standards; judicial review standards for drug- and alcohol-abuse arbitral awards, including effect of the public-policy exception to usual insulation of arbitration awards from review on the merits.

**536. Seminar: Appellate Advocacy.** Study of appellate advocacy before state and federal courts, including writs and appeals in civil and criminal matters. Role, structure, and practices of appellate courts. Students participate in written and oral advocacy.

**538. Seminar: Estate Planning.** Designed to supplement wills and trusts course with necessary background in taxes and fiduciary administration for estate planning.

**540. Seminar: Legislative Advocacy.** Designed to acquaint students with theoretical and empirical aspects of legislative process, how that process works and how it might be improved, and roles played and techniques used by legislative advocates. Structured around a semester-long simulation in which students are assigned roles as either legislators or lobbyists. Different and timely topic selected for simulation each time seminar is offered. Readings of academic writings on legislative process and substantive materials related to the simulation.

**545. Seminar: Civil Rights — Voting Rights.** Exploration of tension between antidiscrimination law and principles of democratic majoritarianism. Examination of voting rights; ways in which judges and legislators have attempted to provide remedies for racially based exclusions from political and social institutions while upholding American concepts of democracy.

**552. Seminar: Bankruptcy.** Prerequisite: course 248 or 250. Examination of business reorganization provisions of Chapter 11 of U.S. Bankruptcy Code, requiring students to become intimately familiar with Chapter 11 business reorganization law in a practical problem-solving format. Review of complex issues of reorganization law. Students prepare briefs in response to problems and advocate their positions.

**553. Seminar: Race, Gender, and the Law.** Interdisciplinary seminar on legal, social, and political implications of intersection of race and gender, focusing on intersectional dilemmas as manifested in case materials on black women. Use of intersection of race and gender as a means for thinking about approaches to other intersections. Discussion of historical and sociological studies and some literary works.

**555. Seminar: Critical Legal Theory.** Selected topics of interest to students from the wide diverse literature that has emerged in last two decades, including legal reasoning, critical legal history, gender and sexual orientation, critical race theory, class, ideology, and praxis. Students write term papers on any related subject and present them orally during last five weeks.

**555. Seminar: Feminist Legal Theory.** Assumes familiarity with basic concepts of sex discrimination law, gender, and feminism. Current scholarship on law and feminism.

**555. Seminar: Feminist Legal Theory — Toward Feminist Jurisprudence.** Focus on impact that feminist legal theory has on legal philosophy. Reading of works in feminist legal theory and discussion of effects these theoretical formulations have on legal issues of importance to men and women.

**555. Seminar: Legal Theory — Economic Democracy.** Over the past decade, economic democracy has enjoyed a renaissance. One often hears that U.S. economy needs more democracy — for practical as well as principled reasons. What kinds of economic gains — in terms of efficiency and competitiveness — may result from less hierarchical, more flexible, and participatory ways of allocating power in various sectors? What kinds of human/political/existential gains? What risks and losses? And what part have, and what part might, lawyers, legal doctrine, and law reform play in these endeavors? Examination of a number of areas of past and present experimentation: industrial, housing, and agricultural cooperatives — their champions and critics; workers' control in large enterprises via pension finance, directorships, worker ownership, and public development authorities — and champions and critics of these ideas.

**559. Seminar: Sports Law.** Legal issues pertaining to both professional and amateur sports, including labor, antitrust (those raised by collective bargaining process, player drafts, and other player restraints, and attempts to control franchise movement), individual player/club contract, constitutional, gender equity, and player/agent issues.

**565. Seminar: American Legal History, 1776-1986.** Recommended (but not prerequisite): course 337. Designed for students interested in doing original historical research. Reading of historians whose work illuminates important interpretive or methodological problems. Progress reports and presentations.

**570. Seminar: Graduate Students — Legal Process and Philosophy.** Prerequisite: LL.M. candidate. In Fall Semester, overview of legal system in the U.S. and comparison with other legal traditions, particularly that of civil law. Emphasis on role of lawyer and operation of procedural law in resolution of disputes by the courts. In Spring Semester, presentation of research projects which form basis for thesis.

**571. Seminar: National Security and the Law.** National and international legal considerations and restraints affecting formulation of foreign policy and protection of national security. Decision-making process, including constitutional balance between executive and legislative branches, foreign power of the president, War Powers Resolution and Treaty Power. Role of bureaucratic politics. Congressional regulation of foreign policy and its attempts to subject intelligence activities to the rule of law. Problem of protecting national security information in a free society and other rights issues. Role of international law affecting national security, including United Nations Charter, and multilateral and bilateral arms control obligations.

**572. Seminar: Teaching Assistants.** Limited to and required of all teaching assistants for course 110. Helps TAs carry out their work as student editors, counselors, and teachers. Teaching techniques and problems of student/teacher relationship, particularly as they relate to evaluating student writing. Focus on writing and critique of writing. Assignments on prose style, organization, and structure of legal analysis.

**576. Seminar: Arms Control and Legal Process.** Examination of role of law, lawyers, and legal process in arms control. Topics include nuclear test ban, non-proliferation, SALT/START/Euromissiles, chemical warfare, and space weapons in order to understand policies and assumptions underlying existing and proposed arms control treaties. Explains how U.S. government decision making works and dynamics of an international negotiation. Verification and compliance issues.

**581A-581B. Seminar: Child Abuse and Neglect.** Prerequisite: consent of instructor. Limited to Fellows of the Interdisciplinary Training Program in Child Abuse. Augments lectures offered in courses M281A-M281B with discussions of lectures, additional readings, presentation of research and field placement experiences, field trips, and interdisciplinary practice.

**582. Seminar: Theories of Process.** Exploration of goals of a procedural system. Is litigation about resolving disputes and keeping the peace? About preserving a delicate political compromise? About furthering substantive goals? About finding the truth? Or about the authoritative promulgation of norms? Each has been proposed as a central goal of civil procedure, and the choice among them has consequences for general design of procedure and procedural details. Writers on this topic include Blackstone, Bentham's attack on Blackstone, modern proponents of alternative dispute resolution, economic analysts of litigation, those who argue that civil litigation has replaced religion as a moral oracle, and those who use comparative law as a way of analyzing American procedure. Using both classical and modern writings on procedure, seminar aims to develop a framework for discussing and criticizing existing procedural system and proposed changes in it.

**587. Seminar: Asian Americans and Legal Ideology.** Prerequisite: some background in Asian American studies; technical knowledge of law not required. Advanced undergraduates with credit in Asian American studies may enroll. Asian American experience as it relates to American legal system, considering dominant and oppositional concepts of law. Consideration of primary historical documents to examine ways Asian Americans have been victims of the legal system, as well as astute manipulators of the legal system. Liberal legal concepts of property, rights, equality, and due process have held promise for Asian Americans, but some observers argue that recourse to law is ultimately harmful to goal of genuine community empowerment. Power-sharing notions of justice that move beyond liberal concepts of rights suggested as more progressive alternatives. History of Asian American participation in civil rights movement and current debate over affirmative action and multiculturalism.

**588. Seminar: International Law after the Cold War.** For roughly 40 years, rivalry between the U.S. and Soviet Union dominated international events and marginalized international law. Does end of Cold War herald a new era for international relations and international law? Can we see outlines of a new international order in events of the Persian Gulf, Somalia, and the former Yugoslavia? Does international law have a new vibrant role to play in this new order? Discussion of both theoretical and practical issues, so students grapple with both the abstract and the actual.

**589. Seminar: Securities Litigation.** Prerequisite: course 230 or consent of instructor. Recommended: course 236. Civil and criminal enforcement of federal securities law. Liability under Securities Act of 1933 and Securities Exchange Act of 1934, including civil and criminal penalties for insider trading, SEC enforcement actions, and liability arising out of tender offers. Tactical considerations for class-action shareholders, issuer and director defendants, and settlement strategies.

# John E. Anderson Graduate School of Management

William P. Pierskalla, Dean

# 12

Because the world is changing rapidly and unpredictably, today's professional manager must learn the concepts and principles of management that make adjustments to new conditions possible. At UCLA's John E. Anderson Graduate School of Management (AGSM), which is consistently ranked among the best such schools in the nation, students prepare to become first-rate managers with both specialized skills and a broad understanding of the general economic, business, and managerial environment. This background enables them to become effective and efficient directors of organizations and people whether they are in the private, public, or not-for-profit sector.

Specifically, AGSM offers the business community a wide range of continuing education programs that provide state-of-the-art information in a variety of fields. Through its faculty, the school advances the art and science of management by engaging in basic research in all fields of management and by educating scholars who can continue to create this new knowledge.

AGSM students come from diverse professional and educational backgrounds and seek equally diverse personal and professional goals. Whether they choose to pursue the professional M.B.A., the academic M.S., or a Ph.D. in Management, they graduate with a broad understanding of people and organizations and with a sound technical background in the economic and mathematical concepts of management planning and decision making.

## Professors

Robert B. Andrews, Ph.D. (*Operations and Technology Management*)  
 Michael J. Brennan, Ph.D. (*Finance; Goldyne and Irwin Hersh Professor of Money and Banking*)  
 John W. Buckley, Ph.D. (*Ernst and Young Professor of Accounting*)  
 Lee G. Cooper, Ph.D. (*Marketing*)  
 Bradford Cornell, Ph.D. (*Finance*)  
 Samuel A. Culbert, Ph.D. (*Human Resources/Human Systems Development*)  
 Michael R. Darby, Ph.D. (*Business Economics*)  
 José de la Torre, D.B.A. (*Policy and Organization*)  
 Sebastian Edwards, Ph.D. (*Business Economics; Henry Ford II Professor of International Management*)  
 Donald Erlenkotter, Ph.D. (*Management Science, Operations and Technology Management*)  
 Eric G. Flamholtz, Ph.D. (*Accounting, Human Resources/Human Systems Development*)  
 Arthur M. Geoffrion, Ph.D. (*Management Science*)  
 Glenn W. Graves, Ph.D. (*Management Science*)  
 Martin Greenberger, Ph.D. (*IBM Professor of Computers and Information Systems*)  
 Dominique M. Hanssens, Ph.D. (*Marketing*)  
 Sanford M. Jacoby, Ph.D. (*Human Resources/Human Systems Development*)  
 Uday S. Karmarkar, Ph.D. (*Operations and Technology Management; Times Mirror Professor of Management Strategy and Policy*)  
 Larry J. Kimbell, Ph.D. (*Business Economics*)  
 Archie Kleingartner, Ph.D. (*Human Resources/Human Systems Development*)  
 Edward E. Leamer, Ph.D. (*Business Economics; Chauncey J. Medberry Professor of Management*)  
 David Lewin, Ph.D. (*Human Resources/Human Systems Development*), Associate Dean  
 Bennet P. Lientz, Ph.D. (*Information Systems*)  
 Steven A. Lippman, Ph.D. (*Management Science*)  
 James B. MacQueen, Ph.D. (*Management Science*)  
 John W. Mamer, Ph.D. (*Management Science*), Associate Dean and Chair  
 Fred Massarik, Ph.D. (*Human Resources/Human Systems Development*)  
 John J. McDonough, D.B.A. (*Human Resources/Human Systems Development, Accounting*), Vice Chair  
 Bill McKelvey, Ph.D. (*Policy and Organization*)  
 Bruce L. Miller, Ph.D. (*Accounting*)  
 Daniel J.B. Mitchell, Ph.D. (*Human Resources/Human Systems Development*)  
 Donald G. Morrison, Ph.D. (*Marketing; William E. Leonhard Professor of Management*), Assistant Dean  
 William G. Ouchi, D.Litt., Ph.D. (*Policy and Organization; Luckman Distinguished Teaching Award*)  
 William P. Pierskalla, Ph.D. (*John E. Anderson Professor of Management*), Dean  
 Anthony P. Raia, Ph.D. (*Human Resources/Human Systems Development*)  
 Richard W. Roll, Ph.D. (*Finance; Allstate Professor of Insurance and Finance*)  
 Richard P. Rumelt, D.B.A. (*Policy and Organization; Harry and Elsa Kunin Professor of Business and Society*)  
 Rakesh K. Sarin, Ph.D. (*Operations and Technology Management; Paine Professor of Management*)

Hans Schöllhammer, D.B.A. (*Policy and Organization*)  
 Eduardo S. Schwartz, Ph.D. (*Finance; California Professor of Real Estate and Land Economics*)  
 Carol A. Scott, Ph.D. (*Marketing*)  
 E. Burton Swanson, Ph.D. (*Information Systems*)  
 Sheridan D. Titman, Ph.D. (*Finance*)  
 J. Fred Weston, Ph.D. (*Business Economics, Finance; Warren C. Corder Professor of Money and Financial Markets; Distinguished Teaching Award*)  
 Harold M. Williams, J.D.  
 James Q. Wilson, Ph.D. (*Policy and Organization; James A. Collins Professor of Management*)

## Professors Emeriti

William F. Brown, Ph.D.  
 Elwood S. Buffa, Ph.D.  
 Joseph D. Carrabino, Ph.D., P.E.  
 Fred E. Case, D.B.A.  
 Louis E. Davis, M.S.  
 David K. Eiteman, Ph.D.  
 Walter A. Fogel, Ph.D.  
 Alfred E. Hofflander, Ph.D.  
 James R. Jackson, Ph.D.  
 Raymond J. Jessen, Ph.D.  
 Harold H. Kassarian, Ph.D.  
 Paul Kircher, Ph.D., C.P.A.  
 J. Clayburn La Force, Ph.D., Dean Emeritus  
 Robert Hal Mason, Ph.D.  
 Frederic Meyers, Ph.D.  
 Frank G. Mittelbach, M.A.  
 Rosser T. Nelson, Ph.D.  
 Alfred Nicols, Ph.D.  
 Frank E. Norton, Ph.D.  
 George W. Robbins, M.B.A., Dean Emeritus  
 John P. Shelton, Ph.D.  
 Harry Simons, M.A., C.P.A.  
 R. Clay Sprows, Ph.D.  
 George A. Steiner, Ph.D., Litt.D.  
 Robert Tannenbaum, Ph.D.  
 Robert M. Williams, Ph.D.

## Associate Professors

Theodore A. Andersen, Ph.D. (*Finance*)  
 Sushil Bikhchandani, Ph.D. (*Management Science*)  
 Connie J.G. Gersick, Ph.D. (*Human Resources/Human Systems Development*)  
 Robert L. Geske, Ph.D. (*Finance*)  
 Richard A. Goodman, D.B.A. (*Policy and Organization*)  
 Mark S. Grinblatt, Ph.D. (*Finance*)  
 David A. Hirshleifer, Ph.D. (*Finance*)  
 Barbara S. Lawrence, Ph.D. (*Human Resources/Human Systems Development, Policy and Organization*)  
 Marvin B. Lieberman, Ph.D. (*Policy and Organization*)  
 Francis A. Longstaff, Ph.D. (*Finance*)  
 Alfred E. Osborne, Jr., Ph.D. (*Business Economics*)  
 I.P.L. P'ng, Ph.D. (*Business Economics*)  
 Ayanidhar Subrahmanyam, Ph.D., Acting (*Finance*)  
 Siu S. Tang, Ph.D. (*Management Science, Operations and Technology Management*)  
 Walter N. Torous, Ph.D. (*Finance*)

## Assistant Professors

Reza H. Ahmadi, Ph.D. (*Operations and Technology Management*)  
 Antonio E. Bernardo, Acting (*Finance*)  
 Randolph E. Bucklin, Ph.D. (*Marketing*)  
 Margaret C. Campbell, Ph.D. (*Marketing*)  
 Bhagwan Chowdhry, Ph.D. (*Finance*)  
 Eric D. Darr, Ph.D. (*Policy and Organization*)  
 Sirram Dasu, Ph.D. (*Operations and Technology Management*)

Christopher Erickson, Ph.D. (*Human Resources/Human Systems Development*)  
 Ronald C. Goodstein, Ph.D. (*Marketing*)  
 Stephen C. Hansen, Ph.D. (*Accounting*)  
 Deborah D. Heisley, Ph.D. (*Marketing*)  
 Teck Hua Ho, Ph.D. (*Operations and Technology Management*)  
 Oliver Kim, Ph.D. (*Accounting*)  
 Elaine Mosakowski, Ph.D. (*Policy and Organization*)  
 Brian T. Pentland, Ph.D. (*Information Systems*)  
 Atanu R. Sinha, Ph.D. (*Marketing*)  
 Karen A. Stephenson, Ph.D. (*Human Resources/Human Systems Development*)  
 Siew Hong Teoh, Ph.D. (*Accounting*)  
 Ivo I. Welch, Ph.D. (*Finance*)

## Lecturers

Gordon L. Klein, J.D.  
 Andrea C. McAleenan, Ph.D.  
 Eric Mokover, M.B.A.  
 Linda F. Newton, M.B.A.  
 David S. Ravetch, M.A.  
 Richard B. Stern, Ph.D.

## Adjunct Professors

William M. Cockrum, M.B.A. (*Finance*)  
 John B. Farrell, M.B.A., C.P.A. (*Accounting*)  
 George T. Geis, Ph.D. (*Accounting*)  
 Sanford C. Sigoloff, B.S. (*Policy and Organization*)  
 Victor C. Tabbush, Ph.D. (*Business Economics*)  
 S. William Yost, Ph.D. (*Operations and Technology Management*)

## Adjunct Associate Professors

Ichak Adizes, Ph.D. (*Policy and Organization*)  
 Janis S. Forman, Ph.D. (*Communications Program*)  
 Marvin M. May, Ph.D. (*Finance*)  
 George S. Yip, D.B.A. (*Policy and Organization*)

## Adjunct Assistant Professors

Robert F. Foster, M.B.A. (*Operations and Technology Management, Field Studies*)  
 Jason L. Frand, Ph.D. (*Information Systems*)  
 Leonard Weil, B.A. (*Finance*)

The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. A Ph.D. in management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school does not offer an undergraduate major in management; however, several undergraduate courses in management are offered. Enrollment in Management 120A, 120B, 122, 124, 130A, 130B, 133, and 140 is open only to students in the business economics program (see Chapter 5 for details on this pro-

gram). Enrollment in other courses, although open to all University students who have completed the prerequisites, is limited, and non-AGSM students are advised not to count on gaining admission to them in order to meet the requirements of other departments or programs.

### Degrees Offered

Master of Business Administration  
(M.B.A.)  
Master of Science (M.S.) in  
Management  
Doctor of Philosophy (Ph.D.) in  
Management

## Master of Business Administration

The two-year, full-time program leading to the Master of Business Administration (M.B.A.) degree is designed to prepare managers for business enterprises and for public/not-for-profit organizations.

The program aims to develop general management perspectives and knowledge while imparting expertise in student-selected fields of specialization. Along with mastery of subject matter, the M.B.A. program stresses integrating the lessons of various academic disciplines and functional fields, translating theory into practice, questioning the past and planning for the future, and self-guided learning as a continuing basis for effective managerial work.

### Admission

Although no specific undergraduate major is required for entrance, you must complete matrix algebra and differential calculus before entering the M.B.A. program and be familiar with the basic operations of a Macintosh or MS/DOS-based microcomputer. You are required to take the Graduate Management Admission Test (GMAT). Any questions about the GMAT should be addressed to Educational Testing Service, Box 966, Princeton, NJ 08541, (609) 771-7590. The local phone number in Los Angeles is (818) 578-1971.

International applicants who hold degrees from universities or colleges where English is not the primary language are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

You must complete the M.B.A. Application and all accompanying documents and requests for information. Admission is for Fall Quarter only; completed applications, with full documentation, must be filed with AGSM by April 1.

Consideration is given to your academic record; score on the GMAT and, for applicants whose native language is not English, score on the TOEFL; potential for management as

evidenced by work experience and community, extracurricular, or other experience; and letters of recommendation. Preference is given to applicants who have had full-time management-related work experience since completing their bachelors' degrees. Those few students admitted directly from baccalaureate programs who choose to work before entering graduate school will have their admission honored for three years.

Small group information sessions are offered by the M.B.A. Admissions Office several days a week throughout most of the year on an appointment basis. Call (310) 825-6944 to arrange attendance.

Applications and information about the M.B.A. program are available from the M.B.A. Program Office, 3371 Anderson Graduate School of Management, UCLA, Los Angeles, CA 90024-1448.

### Areas of Study

Accounting; business economics; finance; human resources/human systems development; information systems; management science; marketing; operations and technology management; policy and organization. Interdisciplinary studies are offered in arts management, entertainment management, entrepreneurial studies, finance and real estate, international business and comparative management, and public/not-for-profit management.

### Course Requirements

The three required elements of the M.B.A. program are the management core, advanced (area and free) electives, and the management field study, totaling 24 courses (96 units). Management core subjects cover the fundamentals of disciplines which underlie the practice of management. Advanced electives provide specialized knowledge and skills for a particular field of management work.

**Management Core** — The management core consists of 11 courses on subjects basic to the practice of management, including Management 402, 403, 405, 408, 409, 410, 411, 412, 420, and two courses from 404, 406, 407.

**Advanced Electives** — These focus on one or more fields of specialization within the broad realm of management. Students design programs of study to meet their specific academic needs and professional goals. Eight electives must be selected from regular AGSM courses, and you are encouraged to emphasize two or more areas of study.

You must also select at least three additional free electives, subject only to general University regulations. These electives normally must be taken while enrolled in the program. They may support or complement the remainder of your program of study.

A maximum of two four-unit 596 courses and one 454 course may be applied toward the 96-unit requirement. These are considered free electives.

**Management Field Study** — The two-term management field study project (courses 444A-444B) consists of teams of three to five students who serve as management consultants to business firms or other organizations. Conclusions are summarized in a report which serves in lieu of a comprehensive final examination for members of the team. The field study is judged by standards applicable to professional management consulting.

### Extracurricular Activities

A variety of student organizations promotes both professional competence in many areas and the development of contacts among students, alumni, faculty, and business executives. Many opportunities are presented for students to become involved in planning events with executives in both the public and private sectors, to participate in day-long programs at various organizations, and to meet with company representatives and alumni. Extracurricular activities are an integral part of life at AGSM, and all students are encouraged to participate.

## Concurrent Degree Programs

### J.D./M.B.A.

The John E. Anderson Graduate School of Management and the School of Law offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Students interested in such a program should apply to both schools simultaneously.

### M.A.-Latin American Studies/M.B.A.

The John E. Anderson Graduate School of Management and the Latin American Studies Program jointly sponsor a three-year concurrent degree program designed for individuals preparing for careers in international management with a special focus on the Latin American region. Establishment of the program was predicated on the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies. Students should request application materials from the M.B.A. Admissions Office and the Latin American Studies Program.

### M.A.-Urban Planning/M.B.A.

The John E. Anderson Graduate School of Management and the Department of Urban Planning offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in

urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service. Students must contact both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Department of Urban Planning.

### **M.L.I.S./M.B.A.**

A concurrent degree program jointly sponsored by the John E. Anderson Graduate School of Management and the Department of Library and Information Science, this specialization is designed to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in the two professional fields. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Department of Library and Information Science.

### **M.N./M.B.A.**

The John E. Anderson Graduate School of Management and the School of Nursing offer a concurrent degree program designed for students interested in employment in all sectors of the health care delivery system, including hospitals, corporate health care headquarters, home health care agencies, and long-term care facilities, as well as policy-making bodies and consulting firms. Students must request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the School of Nursing Student Affairs Office.

### **M.P.H./M.B.A.**

The John E. Anderson Graduate School of Management and the Department of Health Services offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Health Services Management Program, UCLA School of Public Health. GMAT scores are required for admission.

### **M.S.-Computer Science/M.B.A.**

The John E. Anderson Graduate School of Management and the Department of Computer Science offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Department of Computer Science, School of Engineering and Applied Science.

## **Executive M.B.A. Program**

Designed for mid-career managers with strong records of achievement, the Executive M.B.A. Program enables executives to obtain high quality advanced management education while continuing in their full professional roles. The program has a class size of approximately 60 participants with superior academic records and a minimum of eight years of work experience and five years of managerial experience.

The intensive two-year course of study leads to a regular M.B.A. degree. The emphasis is on general management training, increased competence in management specialties, organizational and interpersonal skills, and sophisticated understanding of the integration of businesses and their environments.

Classes are held at AGSM on Fridays and Saturdays every other week, with three- to five-day residential sessions held at conference sites at the beginning and end of the program. Further information and application materials may be obtained by writing to Executive M.B.A. Program, 4383 Anderson Graduate School of Management, UCLA, Los Angeles, CA 90024-1481.

## **Fully Employed M.B.A. Program**

Designed for the emerging manager, this three-year part-time program offers students the opportunity to focus on finance, marketing, or general management. A typical student has four to seven years of work experience and is either in a managerial position or shows strong potential for assuming a position in management.

The curriculum has three main components — management core, elective tracks, and management field study — all designed to equip the emerging manager with the skills and knowledge necessary to accept the challenges of today's complex and dynamic business world. The management core focuses on functional skills as well as the organization's internal and external environments. Three broad elective tracks are offered in finance, marketing, and general management; you can tailor elective courses to meet your personal career needs. A management field study takes place during your third year, providing you with the opportunity to put concepts and skills to work through a consulting study of an actual client organization.

The program has a class size of approximately 125 students in two sections. Classes meet weekly one weekday afternoon and Saturday mornings. Courses available through the regular M.B.A. program during the elective track phase meet at various times. Classes are scheduled to begin in September and end three years later in June. Two weekend residencies are held, one at the beginning of the first year and one at the beginning of the third year. Further information and application materials may be obtained by writing to Fully

Employed M.B.A. Program, 4274 Anderson Graduate School of Management, UCLA, Los Angeles, CA 90024-1481.

## **M.S./Ph.D. Programs**

### **Admission**

All applicants are required to take the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants who hold a degree from a non-English-speaking university are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information. Three letters of recommendation must be submitted with the completed application. All application materials, including transcripts, should be sent directly to the M.S./Ph.D. Programs Office, 3379 Anderson Graduate School of Management, UCLA, Los Angeles, CA 90024-1481.

Applications are accepted for Fall Quarter admission only; the deadline for submission of applications and complete documentation is January 10.

Program information and application materials may be obtained from the M.S./Ph.D. Programs Office.

All applicants to the M.S. or Ph.D. program are strongly urged to arrange an interview with at least one faculty member in their proposed area of concentration or major field area. The interview should take place before December 1. Interviews are informational only and have no bearing on admissions decisions.

## **Master of Science Degree**

The academic master's program is a full-time program which leads to the Master of Science degree in Management. Some students enter the program with the goal of eventual acceptance into the doctoral program; for others, the M.S. is a terminal degree. In either case, the program's emphasis is on advanced specialized training and the development of research capability.

### **Major Field**

Management science.

### **Course Requirements**

A maximum of 16 courses may be required. The four prerequisite courses and three managerial core course requirements may be waived on the basis of prior coursework. Nine graduate courses (methodological core, depth field, and four units of Management 598) are required and cannot be waived.

(1) Prerequisites (four courses): Mathematics 32B, Statistics M152A, 152B, and two terms of computer programming.

(2) Managerial Core (three courses): Management 403, 405, 408.

(3) Methodological Core (five courses; deviations may be approved by the chair of the management science academic unit): Management 203A, 210A, 210B, 210C, 216A.

(4) Depth Field: Three courses which support your thesis research.

(5) Master's Thesis (one course): Four units of Management 598.

Four units of course 596 may be applied toward the minimum graduate course requirement.

### Thesis Plan

A thesis is required for the Master of Science degree. Students generally establish a thesis committee during their fifth term. Plans for the thesis should be presented to the committee for approval at the beginning of the sixth term.

### Ph.D. Degree

The doctoral program is a research- and teaching-oriented degree program which leads to the Ph.D. in Management. The program includes intensive training in research methods applicable to problems of organizations in the public and private sectors. It aspires to produce leaders in the professorial and emphasizes the production and dissemination of knowledge in areas related to organization and management. The program offers students substantial opportunities to discover their own, unique scholarly focus and competence.

### Major Fields

Accounting; business economics; finance; human resources/human systems development; information systems; international business and comparative management; management science; marketing; operations and technology management; policy and organization.

### Course Requirements

The research preparation requirement consists of two parts: (1) a course requirement and (2) a research paper. You are required to take five research courses which are not part of the major field area. These courses must be completed before taking the oral qualifying examination and may not be waived by prior graduate work. The research paper must be submitted to and accepted by the research paper committee no later than Spring Quarter of your third year of study.

The breadth requirement consists of eight courses which are clearly outside your major field area. You should use these courses to become more knowledgeable about the basic elements of several other management disciplines and functional areas or to define a minor field or research and teaching proficiency. Three of these courses may be waived by prior coursework. They must be completed before you take the oral qualifying examination.

Students, in consultation with a major field adviser, design a course of study which prepares them to pass the major field examination.

### Qualifying Examinations

Proficiency in the major field area is determined by a written examination, supplemented in some areas by an oral examination. The major field examination must be passed by the end of Spring Quarter of your third year of study.

You are required to present the substance of your dissertation proposal in a formal seminar to which all Ph.D. students and faculty are invited.

When all the preliminary requirements have been fulfilled (coursework, research paper, major field examination, seminar), the University Oral Qualifying Examination can be held; if passed, you are advanced to candidacy. The oral qualifying examination must be passed within four and one-half years of the date of entrance into the program.

### Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

### Doctoral Dissertation/Final Oral Examination

You are expected to present a dissertation of substantial magnitude which makes a significant contribution to the advancement of knowledge in your selected field of study. The dissertation must be completed and accepted within seven and one-half years from your date of entry into the program.

The school requires that you defend your dissertation at a final oral examination.

### Lower Division Courses

**1A-1B. Elementary Accounting.** Not open to freshmen. Course 1A is enforced requisite to 1B. Introduction to accounting theory and practice. Recording, analyzing, and summarizing procedures used in preparing balance sheets and income statements in first term. Payroll and tax accounting, partnership and corporation accounts, manufacturing and cost accounting, and supplementary statements in second term.

### Upper Division Courses

**108. Business Law.** Essentials of contracts. Examination of legal forms of business organizations, especially partnerships and corporations. Introduction to federal securities law and antitrust. (F,W,Sp)

**120A. Intermediate Financial Accounting I.** Prerequisite: course 1B. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of asset valuation and income measurement. Measurement and reporting of current and long-term assets, including cash and marketable securities, inventories, plant assets and depreciation, and intangibles. (F,W,Sp)

**120B. Intermediate Financial Accounting II.** Prerequisite: course 120A. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of liability recognition and expense, including leases, bonds, and pensions. Shareholder's equity, including earnings per share. Accounting for changing prices. (F,W,Sp)

**122. Cost Accounting.** Prerequisites: course 1B, Economics 40, or equivalent. Nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis. (F,W,Sp)

**123. Auditing.** Prerequisite: course 120B. Concepts and problems in verification of financial and related information, including ethical, legal, and other professional issues. Historical developments and current concerns. (F,W,Sp)

**124. Advanced Accounting.** Prerequisites: courses 120A, 120B. Partnerships and joint ventures; installment sales and consignment sales; home office and branch relationships; corporate combinations; preparation of consolidated statements; foreign branches and subsidiaries; receiverships; estates and trusts; governmental units; actuarial science.

**127. Federal Income Taxation.** Prerequisite: course 1B. Recommended: course 120A. Basic concepts of federal income taxation pertaining to individuals; income and deductions, areas of special tax procedures pertaining to gains and losses from sales and exchanges. Tax considerations in business and investment decisions. (F,W,Sp)

**128. Special Topics in Accounting.** Lecture, three hours. Prerequisite: consent of instructor. Selected topics in public accounting, including mergers and acquisitions, public-company status and the going-public process, role of the partner, serving an entrepreneurial client, fund accounting, and filing and accounting of payroll and quarterly tax returns. Discussion of a case study of current interest in the accounting profession. (F)

**130A. Basic Managerial Finance.** Lecture, three hours. Prerequisites: course 120A or 120B, Economics 40 or equivalent. Study of financial decision making by business firms, with emphasis on applications of economic and accounting principles in financial analysis, planning, and control. Extensive use of problems and cases to illustrate varied analytical techniques employed in decision making. (F,W,Sp)

**130B. Advanced Managerial Finance.** Lecture, three hours. Prerequisite: course 130A. Analysis of capital budgeting and working capital management. Review of long-term financing through security markets and lease contracts. Management of financial risk using options, futures, and forward contracts. Study of merger and acquisition processes and reorganization under bankruptcy laws.

**133. Investment Principles and Policies.** Lecture, three hours. Prerequisite: course 130A. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

**140. Elements of Production and Operations Research.** Prerequisites: Mathematics 3A, 3B, 3C, 31E, Economics 40, or equivalent. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities. Analytical models and methods for allocation, transportation, inventories, replacement, scheduling, and facilities design.

**150. Elements of Industrial Relations.** Principles and methods of effectively utilizing human resources in organizations. Relationship between social, economic, and other environmental factors and current problems in industrial relations.

**175. Elements of Real Estate and Urban Land Economics.** Examination of business decision making as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, building, financing, managing, marketing, and using urban property.

**182. Leadership Principles and Practice.** Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratory.

**190. Management Theory and Policy.** Lecture, three hours. Prerequisite: course 130A. Study of basic concepts and theory of management. Emphasis on operational analysis of manager's role in all types of organizations. Management issues in areas of planning, organizing, staffing, directing, and controlling.

**197. Special Topics in Management.** Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit.

## Graduate Courses

Graduate courses are ordinarily open to students admitted in graduate standing. As a condition for enrollment, you must submit to the instructor in charge of the course evidence of satisfactory preparation for the work proposed.

**200. Advanced Microeconomics.** Seminar, three hours. Prerequisite: course 405 or consent of instructor. Economist's approach to organization and competitive interaction. Topics include game theory, threat credibility, incentive contracts, information advantages, and entry deterrence.

**201A. Business Forecasting.** Seminar, three hours. Prerequisites: courses 402, 406. Role of business forecasting in managerial planning. Principles and methods of forecasting. Evaluation of reliability of existing forecasting techniques. Coverage of both short- and long-term forecasting of industry, regional, and national business trends.

**201B. Econometrics and Business Forecasting.** Lecture, three hours. Prerequisite: consent of instructor. Development of standard topics in applied econometric modeling. Emphasis on assumptions underlying classical normal linear regression model, special problems in application, and interpretation of results. Practical applications extensively developed in student projects.

**202A. Regulation.** Lecture, three hours. Prerequisite: course 405 or consent of instructor. Reasons for government intervention in theory and practice. Effect of regulation on business. How regulation and deregulation occur. Areas include public utilities, banking, pollution, and the political process.

**202B. Analytics of Competitive Strategy.** Discussion, three hours. Prerequisites: courses 402 and 405, or consent of instructor. Development and analysis of strategies to maximize value in competitive and cooperative situations. Problems include competitive bidding, tacit collusion, and strategies in repeated settings.

**202C. Empirical Studies in Industrial Organization.** Prerequisite: course 202B. Investigation of factors influencing size of industries, their size distribution, and conditions of entry and exit. Implications of such industry characteristics, derived for decisions having to do with firm output, prices, advertising, and research/development.

**203A. Economics of Decision.** Prerequisites: rudiments of economic theory, calculus, probability, and statistics. Basics of single-person decision theory from a normative viewpoint. Expected utility theory with objective and subjective probability. Departures from expected utility behavior. Introduction to multi-person decision theory.

**203B. Economics of Information.** Discussion, three hours. Prerequisites: rudiments of economic theory of the firm, calculus, probability, and statistics; course 203A or consent of instructor. Optimal decision and information rules. Amount, cost, and value of information. Risk aversion, stochastic dominance, and their impact on economic decisions in a stochastic environment.

**205A. International Business Economics.** Prerequisites: courses 405 and 406, or consent of instructor. International business environment, international economic institutions, national and regional trade policies and developments, trends in foreign markets, and international monetary problems, studied for their influence on organization and operation of the international corporation.

**205B. Comparative Market Structure and Competition.** Prerequisite: course 205A or consent of instructor. Comparative study of public policies toward competition, market structures, and competitive practices in key industries in selected countries.

**205C. Business Forecasting for Foreign Economies.** Prerequisite: course 201A or consent of instructor. Forecasting changes in business activity, population, industrial structure, productivity, Gross Domestic Product and its components for selected countries. S/U or letter grading.

**207. Resource Administration of Nonmarket Activities.** Seminar, three hours. Prerequisite: course 405 or consent of instructor. Examination of behavior of managers in profit vs. not-for-profit sectors to determine critical variables that explain observed differences in behavior. Use of methodology of microeconomics, particularly utility maximization.

**208. Public Services and Private Functions.** Prerequisites: courses 405 and 406, or consent of instructor. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of proper roles of government and private sector in financing and provision of public goods and services.

**209. Selected Topics in Business Economics.** Prerequisite: consent of instructor. Special topics in business economics. Current developments in theory or practice in business economics. May be repeated for credit.

**210A. Mathematical Programming.** Discussion, three hours. Prerequisite: linear algebra. Comprehensive development of theory and computational methods of linear programming, with applications to a variety of areas.

**210B. Applied Stochastic Processes.** Discussion, three hours. Prerequisite: Mathematics M150A or Electrical Engineering 131A. Fundamentals of stochastic processes, including Poisson processes, renewal theory, and Markov chains. Sequential stochastic (usually Markovian) decision processes in discrete and continuous time. Emphasis on problem formulation and characterization and computations of optimal policies, often via dynamic programming; applications to inventory, queuing, maintenance, reliability, and replacement problems.

**210C. Network Flows and Integer Programming.** Prerequisite: linear programming. Theory and techniques of discrete and network-related mathematical programming models in management science. Applications to various allocation, coordination, operating, and planning problems. Emphasis on fundamentals, efficient computational methods, and keys to successful practical applications.

**211A. Nonlinear Mathematical Programming.** Prerequisites: course 210A, Mathematics 32A, or equivalent. Theory, methods, and application of optimization of nonlinear systems. Review of classical optimization methods; optimality and duality theory for convex programs; main computational approaches to convex programming; survey of current computer codes and computational experience.

**211B. Large-Scale Mathematical Programming.** Prerequisite: course 210A or equivalent. Theory and computational methods for optimizing large-scale linear and nonlinear programs. Exploitation of special structures with combinatorial, dynamic, multidimensional, and stochastic aspects to obtain practical solution procedures in spite of large numbers of variables and/or constraints.

**212A. Management Science Models I.** Prerequisites: course 407, Mathematics 31B. Broad survey of deterministic models of management science, including solution methods and applications management. Solution methods include linear programming, network optimization, integer programming, nonlinear programming, and dynamic programming. Application areas include corporate planning, finance, marketing, production and operations management, distribution, and project management.

**212B. Management Science Models II.** Prerequisites: course 212A, Mathematics 32A, or equivalent. Broad survey of nonlinear, time-staged, and probabilistic models for managerial decision making. Application areas include finance, marketing, production, facilities design, and energy systems.

**212C. Management Science Models III.** Prerequisites: courses 212A, 212B. In-depth reviews of actual management science applications. Emphasis on professional skills needed for successful practical applications.

**213A. Intermediate Probability and Statistics.** Prerequisite: course 402 or equivalent. Introduction to probability theory and hypothesis testing as applied to management. SAS programs used in this course and its sequels.

**213B. Statistical Methods in Management.** Prerequisite: course 213A or consent of instructor. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to management studies.

**213C. Introduction to Multivariate Analysis.** Prerequisite: course 213B or consent of instructor. Introduction to use of multivariate models in management research to organize and represent information; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminant analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models).

**214B. Behavioral Science Models.** Prerequisite: consent of instructor. Formulation, analysis, and interpretation of mathematical models in behavioral sciences. Emphasis on stochastic process models for aspects of individual and group behavior such as learning, problem solving, classification, communication, bargaining, and social exchange systems.

**215D. Time-Series Analysis.** Prerequisite: course 213B or consent of instructor. Univariate Box/Jenkins analysis, transfer functions, and intervention analysis. Relationship between econometric and time-series models, Granger causality, multiple time-series analysis. Numerous computer applications in modeling and forecasting.

**216A. Simulation of Operational Systems.** Discussion, three hours. Prerequisite: background in FORTRAN, PL/1, PL/C, or other batch computing language available on campus and in basic statistics (course 402 or equivalent) and modeling (course 407 or equivalent). Computer simulation methodology, including design, validation, operating procedures, and analysis of results of simulation experiments. Applications of simulation to management problems.

**217A. Decision Analysis.** Lecture, three hours. Prerequisite: course 402 or equivalent. Framework provided for structuring and analyzing decision making under uncertainty. Topics include decision trees, value of information, subjective probability, attitude toward risk, sensitivity analysis, and multicriteria decision making. Applications to a number of business problems, including new product development, litigation, treasure hunting, and bidding. S/U or letter grading.

**217B. Game Theory.** Prerequisite: course 213A or equivalent. Nature of models for rational behavior in presence of conflicts of interests, zero-sum and non-zero-sum games, two-person and many-person games, state of the art, philosophical and computational limitations, relations with individual and group decision making.

**218A. Selected Topics in Management Science (1 to 4 units).** Prerequisite: consent of instructor. Newly developing topics and viewpoints. Topics have included reliability and optimal maintenance theory, large-scale distribution/inventory systems, and Markovian decision processes under uncertainty. May be repeated for credit.

**218C. Selected Topics in Business Statistics (1 to 4 units).** Prerequisite: consent of instructor. Special topics in statistical methods. Current developments in statistical theory and practice. Analysis of recent literature. Topics and instructors announced in advance. May be repeated for credit.

**218X-218Y-218Z. Current Issues in Management Science (1 to 4 units each).** Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Current issues and research on a variety of topics in general area of management science. May be repeated for credit. S/U grading.

**220A. Intermediate Financial Accounting I.** Prerequisite: course 403 or consent of instructor. Concepts and principles of financial accounting. Intended to enhance students' understanding of published corporate financial statements. Emphasis on assets and revenue recognition.

**220B. Intermediate Financial Accounting II.** Prerequisite: course 220A or consent of instructor. Concepts and principles of financial accounting. Intended to enhance students' understanding of published corporate financial statements. Emphasis on liabilities and owners' equity.

**220C. Advanced Financial Accounting.** Prerequisites: courses 220A and 220B, or consent of instructor. Continuation of courses 220A and 220B, with emphasis on a range of topics, including accounting for partnerships, mergers, combinations, and parent/subsidiary relationships. Review of litigation procedures, including reorganizations, receiverships, and bankruptcy.

**221. Current Issues in Accounting.** Prerequisite: consent of instructor. Forum for discussion of contemporary issues in accounting and information systems, in colloquium format. Drawing on prominent speakers in the field, course requires students to formulate a position paper on each topic presented.

**222. Cost Accounting.** Prerequisite: course 403. Nature, objectives, and procedure of cost accounting and control; job costing and process costing; joint product costing, standard costs; theories of cost allocation and absorption; uses of cost accounting data for management decision making.

**223. Auditing.** Prerequisite: course 403. Theory and practice underlying auditors' examination and reporting on financial statements, including professional ethics, internal control, and selection and application of auditing procedures, with emphasis on generally accepted auditing standards.

**226. International Accounting.** Prerequisite: course 403. Comparative analysis of accounting concepts and practices in other countries; study of contrasts between various systems; problems of accounting for international corporations, including transfers of funds and income measurement; accounting influences on economic development.

**227A. Taxation Principles and Policy.** Discussion, three hours. Prerequisite: course 403. Study of fundamental income tax problems encountered in business, investment, employment, and personal decisions. Special emphasis on structuring real estate and securities transactions. Current trends in law and policy.

**227B. Taxation and Business Planning.** Discussion, three hours. Prerequisite: course 403. Study of tax issues arising in formation, operation, and termination of a corporation. Specific emphasis on structuring shareholders' transactions involving dividends, redemptions, liquidations, acquisitions, and capital structure.

**228. Evaluating Financial Statement Information.** Lecture, three hours. Prerequisites: courses 220A or 220B, 230, 402. Issues of accounting information evaluation, with special emphasis on uses of financial statements by decision makers external to the firm (e.g., investors, creditors). Topics include load decisions, bankruptcy prediction, and interpreting earnings.

**229A. Special Topics in Accounting.** Lecture, three hours. Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in accounting, such as application of information economics and principal-agent model to accounting.

**229B. Empirical Research in Accounting.** Lecture, three hours. Prerequisites: training in econometrics and doctoral standing, or consent of instructor. Introduction to empirical accounting literature, focusing on role that accounting information plays in formation of capital market prices.

**229X-229Y-229Z. Accounting Workshops (1 unit, 1 unit, 2 units).** Discussion, two hours. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate research in fields relevant to study of accounting. Papers presented in colloquium format by leading scholars in accounting. Active participation and intellectual interchange encouraged through discussion of papers during colloquium. May be repeated for credit. S/U grading.

**230. Theory of Finance.** Lecture, three hours. Prerequisite: course 408. Primary focus on valuation of corporate liabilities and other securities under uncertainty. Capital asset pricing model presented rigorously and compared with more recent theories of asset pricing such as arbitrage pricing theory and option pricing model, using empirical evidence. Secondary focus on analysis of problems in corporate finance such as optimal financing of the corporation and the market for corporate control. S/U or letter grading.

**231A. Profit Sector Financial Policy.** Prerequisite: course 230. Identifying and solving financial problems through use of cases. Application of financial theory and financial techniques to business problems, using written reports and classroom discussion.

**231B. Nonprofit Sector Financial Policy.** Discussion, three hours. Prerequisite: course 408. Identifying and solving financial problems for all types of nonprofit organizations, with attention to funds accounting, budgeting and control, investment decision making when market valuation cannot be used as a criterion, and sources of funds for nonprofit organizations. Use of cases.

**231C. Working Capital Management.** Lecture, three hours. Prerequisite: course 230. More detailed advanced coverage of short-range problems of financial management. Coverage of current assets, current liabilities, and their interrelationships.

**231E. Managing Finance and Financing the Emerging Enterprise.** Prerequisites: courses 230, 403, 408, second-year standing. Emphasis on financial, control, and investment issues confronting rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles which may be appropriate to securing organizations' money requirements.

**232A. Security Analysis and Investment Management.** Lecture, three hours. Prerequisite: course 230. Topics include security valuation, application of portfolio theory to investment decisions, performance evaluation, and basics of fixed income portfolio management strategies. S/U or letter grading.

**232D. Option Markets.** Prerequisite: course 230. Organization and role of organized derivative markets, including listed and OTC options and futures; arbitrage and hedging relationships, valuation of derivative trading strategies, and innovations in derivative markets. Students learn fundamentals of hedging and spreading by playing an option trading game and writing a term paper analyzing their strategies. S/U or letter grading.

**233A. Money and Capital Markets.** Prerequisite: course 230. Application of interest theory and flow funds analysis to price determination process in markets for bonds, mortgages, stocks, and other financial instruments. Study of funds flow from credit markets. Analysis of costs of capital in individual industries.

**233B. Financial Institutions.** Lecture, three hours. Prerequisite: course 230. Theory and practice of financial institutions and stock exchanges. Main topics include deposit insurance and regulation, international banking, market microstructure, and investment banking. S/U or letter grading.

**233C. Speculative Markets.** Prerequisite: course 230. Study of theory and evidence of capital market efficiency, including stock market, bond market, commodity future markets, options market, money markets, and foreign exchange markets.

**234A. International Financial Markets.** Lecture, three hours. Prerequisites: courses 205A, 230. Conceptual understanding of foreign exchange market, Eurocurrency market, international bond market, and equity markets in various countries. Emphasis on underlying economic principles, although where relevant, institutional features helpful in understanding structure and operations of the markets to be dealt with in detail. S/U or letter grading.

**234B. Financial Management of Multinational Corporations.** Lecture, three hours. Prerequisite: course 230. Financial management of multinational firms from perspective of a financial vice president or other financial officer within the company. Topics include measuring foreign exchange risk, managing that risk with both contractual and operating strategies, foreign investment decisions, capital budgeting and cost of capital in an international perspective, political risk, working capital management, and performance evaluation and control.

**235A. Problems in Insurance Management.** Discussion, three hours. Prerequisite: consent of instructor. Advanced consideration of problems of insurance management. Actuarial, underwriting, investment, marketing, and regulatory problems related to insurance activities.

**238. Special Topics in Finance.** Prerequisites: course 230, consent of instructor. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. S/U or letter grading.

**239A. Theory of Exchanges under Uncertainty.** Prerequisites: course 230, consent of instructor. Foundations of theory of exchange developed as introduction to theoretical literature on pricing of capital assets. Primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation.

**239B. Theory of Investment under Uncertainty.** Prerequisites: courses 230 and 239A, or consent of instructor. Foundations of theory of firm capitalization and investment decisions, with special attention to questions of exchange and allocative efficiency. Primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation.

**239C. Empirical Research in Finance.** Discussion, three hours. Prerequisites: course 230, training in econometrics, consent of instructor. In-depth study of empirical research in the field of finance, statistical methodologies applied to test market efficiency, and asset pricing theory. Primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. S/U or letter grading.

**239D. Ph.D. Seminar: Corporate Finance.** Prerequisites: course 230, courses in 239 series. Intended for Ph.D. students. Advanced topics in corporate finance theory and empirical research. May be repeated for credit with instructor change. S/U or letter grading.

**239X-239Y-239Z. Finance Workshops (1 unit, 1 unit, 2 units).** Discussion, 90 minutes. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate finance research. Papers presented in colloquium format by leading scholars in finance. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

**240A. The Operating Manager.** Definition and analysis of problems of production planning, inventory management, quality control, system design, and implementation from operating manager's perspective, primarily through case studies. Course is integrative in nature, rather than one of developing new methodologies and techniques.

**240B. Operations Planning, Scheduling, and Control.** Prerequisite: course 407 or consent of instructor. Forecasting, inventory planning, aggregate planning, job-shop scheduling models, and automated manufacturing systems, with emphasis on managerial relevance and usefulness of models in solving or providing insights into real-world problems.

**240C. Design of Operational Systems.** Prerequisite: course 407. Issues, concepts, objectives, and criteria in determination of capabilities, characteristics, and configurations of manufacturing and service systems. Examination of analytic and synthesizing methodologies for selection of capacity, location, technology, processes, material movement and storage systems, facilities, work group structures, and jobs.

**240D. Operations Strategy and Policy.** Discussion, three hours. Definition and scope of operations strategy and its relation to corporate strategy, importance of productivity and its amplification in global competition, positioning the system to match market requirements, capacity decisions, product and process technology, work force and job design, strategic implications of operating decisions, suppliers and vertical integration. Case analyses involving strategic issues in manufacturing and nonmanufacturing situations.

**240E. Managing Entrepreneurial Operations.** (Formerly numbered 245.) Lecture, three hours. Prerequisite: second-year standing or consent of instructor. Exploration of operating issues involved in managing entrepreneurial enterprises. Integrative course, building on methodologies, principles, and concepts provided in prerequisite functional and strategic core courses. Use of extensive readings and case studies to develop skills and philosophical basis for applying managerial concepts to entrepreneurial operations.

**241A. Managing Technology for Competitive Advantage.** Advanced technologies such as robotics, computer-integrated manufacturing, computer-aided design and manufacturing (CAD/CAM), and flexible manufacturing systems. Effects of technological innovation on operations managers at both strategic and operational levels. Course is integrative in nature.

**241B. Project Management.** Prerequisite: course 407 or equivalent. Management of development projects. Decision-making environment, economic analysis, network analysis, scheduling, and control of development projects. Sequential and aggregate development decisions.

**242A. Models for Operations Planning, Scheduling, and Control.** Prerequisite: doctoral standing or consent of instructor. Survey of research studies and recent literature in operations planning, scheduling, and control. Emphasis throughout on formal models and their applications. Aggregate planning, work force scheduling, inventory management, and detailed operations scheduling and control.

**242B. Models for Operations Systems Design.** Prerequisite: doctoral standing. Survey of research literature on models for design of manufacturing and service systems, including long-range forecasting, operational economies, capacity, location, facilities, processes/technology, work, and work structures.

**243A. Planning for Facilities Systems.** Prerequisite: course 212A or equivalent. Planning of location, expansion, and replacement for interdependent systems of facilities. Examination of spatial and dynamic economic considerations. Applications in selected industries and public systems.

**243B. Inventory Theory.** Prerequisite: course 210B or consent of instructor. General discussion of inventory models, with emphasis on characterizing the form of optimal policies and efficient computational methods. Consideration of deterministic, stochastic, discrete-time, and continuous-time models.

**243C. Scheduling Models for Intermittent Systems.** Prerequisite: course 407. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent heuristic approaches, current research in coordinated interaction of computer models, and man/machine interaction.

**243X-243Y-243Z. Operations and Technology Management Seminars (1 unit, 1 unit, 2 units).** Discussion, 90 minutes to three hours. Prerequisite: doctoral standing. Required of all students in operations and technology management concentration during first two years of their Ph.D. work. Student and faculty presentations of ongoing research. May be repeated for credit.

**244X-244Y-244Z. Research in Operations and Technology Management (1 unit, 1 unit, 2 units).** Prerequisite: doctoral standing. Normally taken in first and second years of doctoral study. Survey of research literature in operations and technology management. Seminar reports dealing with special topics. May be repeated for credit with topic change.

**245. Special Topics in Operations and Technology Management.** Lecture, three hours. Studies of advanced subjects of current interest in operational management. Emphasis on recent developments and application of specialized knowledge to operational problems. Topics vary each term. May be repeated for credit with topic change.

**246A. Strategy/Policy Analysis and Formulation in Public and Private Nonprofit Sectors.** Prerequisite: completion of management analysis requirement for M.B.A. program. Application of several techniques for strategy/policy analysis and formulation. Specific topics include forecasting/scenario writing, multiple objective decision making, cost analysis, risk/benefit analysis, and social experimentation. Limitations of methodologies examined and concepts illustrated through current applications and case studies.

**246B. Budgeting and Resource Allocations in Public Sector.** Prerequisites: courses 403 and 408, or consent of instructor. Resource allocation objectives/techniques used in federal, state, and local government. Budget analyzed as a planning device, vehicle for allocational decision making, financial control mechanism, crucible for political choice. Provides some insight into staff functions performed by those responsible for resource allocation.

**246C. Management in Public and Private Nonprofit Sectors.** Prerequisite: graduate standing. Examination of roles and management systems of the three sectors of U.S. society; unique aspects and managerial issues of public and private nonprofit organizations and of their political, social, and technical environments. Financial, marketing, and operational considerations and evaluation, control, and ethical issues of service delivery systems.

**247A. Environment of the Art World.** Prerequisite: consent of instructor. Consideration and analysis of political, social, economic, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Exploration of present policies and trends and potential future developments.

**247B. Role of Management in Artistic Decision Making.** Prerequisite: consent of instructor. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

**247C. Legal Environment of Arts Management.** Prerequisite: consent of instructor. Exploration of way in which law and the arts relate, role of the lawyer vis-à-vis artist and arts manager, policy underpinnings of the law and effect on the arts, and unsolved problems and issues in areas of interaction.

**248A. Strategic Management in the Entertainment Industry.** Discussion, three hours. Prerequisites: courses 403, 405, 406, 408, and 420, or consent of instructor. Examination of financial and strategic aspects of transactions and company management in the entertainment industry. Cases and topics include organizational behavior and decision making in creative companies; trends in industry structure and competitive economics; accounting issues; institutional and private investment in motion pictures; theatrical distribution, international and ancillary markets (pay TV, videocassettes, syndication).

**249A. Special Topics in Public and Private Nonprofit Management.** Prerequisite: consent of instructor. Studies of advanced subjects of current interest in public/not-for-profit management. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit problems. Topics vary each term. May be repeated for credit with topic change.

**249B. Special Topics in Arts Management.** Prerequisite: consent of instructor. Examination of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

**250A. Labor Relations: Process and Law.** Prerequisite: graduate standing. Consideration, at advanced level, of collective bargaining process, labor/management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations.

**250B. Human Resource Management: Process and Law.** Prerequisite: course 250A. Systematic exposure to theoretical and empirical literature concerning administrative and legal aspects of human resource management. Topics include processes of managing human resources and impact of governmental policies on employer/employee relations.

**250C. Behavioral Foundations of Human Resource Management.** Prerequisite: course 250B or consent of instructor. Topics include development and training; human resource accounting; behavioral foundations of participating management; motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

**251. Managing Human Resources.** Management of people in organizations, intended for managers as well as personnel specialists. Organized at three related but distinct levels of analysis: (1) day-to-day utilization of people as organizational resources to achieve optimal productivity, satisfaction, retention, and development; (2) personnel management function or system that performs specialized human resource functions; and (3) issues facing top management which involve management of human resources, including strategic planning for human resources, union/management relations, and design of corporate culture.

**252. Systems of Employee/Management Participation.** Prerequisite: consent of instructor. Designed to provide understanding of systems of employee/management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing.

**253. Employee Discipline, Discharge, and Grievance/Appeal Settlement.** Prerequisite: graduate standing. Analysis of conflict in the employment relationship; theoretical and empirical findings. Principles and philosophies that underlie resolution of labor/management impasses, with emphasis on grievance procedures, arbitration, mediation, and fact-finding.

**255. Comparative Industrial Relations.** Prerequisite: course 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of industrial relations systems within their political, social, and economic environments. Institutions, philosophies, and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts.

**256. Seminar: Human Resource Management and Industrial Relations.** Discussion, three hours. Prerequisites: courses 250A, 250B, 250C. Capstone seminar for students interested in human resource management and industrial relations. Visiting lecturers emphasize recent developments in the field; students prepare seminar papers.

**257. Human Resource Management in Creative and Nonprofit Sectors.** Prerequisite: graduate standing. Analysis of human resource management theory and practices in industries where primary product is creative or intellectual (e.g., arts, entertainment, education, high technology, and journalism). Consideration of incorporation of work design, employee influences, systems, and business strategies in human resource management. Interpersonal and group process for managing human behavior. S/U or letter grading.

**258. Selected Topics in Industrial Relations (1 to 4 units).** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in industrial relations. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**259A. Individuals and Groups in Human Systems.** Lecture, three hours. Prerequisite: graduate standing. Doctoral-level survey of research literature dealing with interpersonal dynamics, groups, and aspects of culture in work organizations, with emphasis on theory and research. Current research in psychology, anthropology, and small group studies. Variety of methods represented, including clinical and cross-cultural approaches. S/U or letter grading.

**259B. Advanced Studies in Human Resource Management.** Lecture, three hours. Prerequisite: graduate standing. Doctoral-level survey of research literature assessing how organizations utilize human resources to enhance individual, group, and organizational effectiveness. Current theory and research in psychology, anthropology, organization behavior, and economics, including topics such as careers, participation, negotiations, and technology/work systems. S/U or letter grading.

**259C. Labor Markets and Public Policy.** (Formerly numbered 254.) Lecture, three hours. Prerequisite: graduate standing. Doctoral-level survey of research literature on environmental institutions that impinge on work organizations — chiefly labor markets, labor unions, and public policy. Current research in economics, industrial relations, political science, and sociology, with emphasis on international and comparative dimensions of topics covered. S/U or letter grading.

**260A. Advanced Marketing Management.** Prerequisite: course 411 or consent of instructor. Decision-oriented course concerned with solution of product, price, promotion, and distribution channel problems. Extensive use of case studies.

**260B. Marketing Strategy and Planning.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Development of a framework for strategic marketing planning based on customer behavior, market segmentation, product positioning, product life cycle, market responsiveness, and competitive reaction. Within this framework, development of key elements in annual marketing process.

**261A. Management in the Distribution Channel.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Examination of decisions in the distribution channel. Issues of power in the distribution channel and trade-offs between alternative channel systems.

**261B. Global Marketing Management.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

**262. Price Policies.** Lecture, three hours. Prerequisites: courses 405, 411. Consideration of environment of pricing decision — costs, customer, channels, competition, and regulation. Analysis of when and how to apply specific pricing strategies, including two-part tariffs, quantity discounts, product differentiation, bundling, and auctions.

**263A. Consumer Behavior.** Prerequisite: course 411 or consent of instructor. Study of nature and determinants of consumer behavior. Emphasis on influence of sociopsychological factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers' attitudes, consumption, and purchasing behavior.

**264A. Marketing Research: Design and Evaluation.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Intended for prospective users of research results rather than for specialists in research. Marketing research is an aid to management decision making. Development of problem-analysis skills, providing knowledge of concepts and methods of marketing research, with increased sensitivity to limitations of marketing data.

**264B. Advanced Marketing Research.** Discussion, three hours. Prerequisite: course 264A or consent of instructor. Advanced topics in marketing research, with emphasis on quantitative tools to aid marketing decision making. Topics include demand and market share forecasting, conjoint analysis, market segmentation and cluster analysis, brand positioning and competitive market structures, and assessing market response to price, advertising, promotion, distribution, and sales force.

**264C. Seminar: Multidimensional Scaling.** Prerequisite: consent of instructor. Seminar providing for study of recent developments in metric and nonmetric multidimensional scaling.

**265A. Marketing and the Law.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Detailed study of legislative enactments (federal, state, or local) which influence operation of institutions engaged in marketing activities, together with analysis of judicial decisions which have interpreted these laws.

**265B. Social Issues in Marketing.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Environmental impact of marketing in society; study of theories, methods, and relationships for evaluating transaction behavior in a scientific and humanistic context; macroanalytic perspectives in marketing.

**266A. Product Management.** Lecture, three hours. Prerequisite: course 411. Investigation of process of developing new products and management of mature brands in existing markets. Regarding new product development, focus on concept screening, designing new products, and test marketing. Tactical management of marketing mix with currently available data emphasized in managing mature brands.

**266B. Advertising and Marketing Communications.** Lecture, three hours. Prerequisite: course 411. Detailed review of use of communication tools in marketing. Critical review of advertising and promotional policies from developmental and executional perspectives. Discussion of other forms of marketing communications, with goal of helping students develop integrated communication strategies.

**268. Selected Topics in Marketing.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit.

**269A. Theory in Marketing.** Prerequisite: consent of instructor. Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general topic of theory development and testing. Prepares students for conducting theoretically grounded research in marketing.

**269B. Research in Marketing Management.** Discussion, three hours. Prerequisite: consent of instructor. Intended for Ph.D. students. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, market segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues.

**269C. Quantitative Research in Marketing.** Prerequisite: consent of instructor. Intended for Ph.D. students in management and related fields. Students are assumed to have good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. Review of a range of quantitative models as applied in marketing research.

**269D. Behavioral Research in Marketing.** Prerequisite: consent of instructor. Empirical research in consumer behavior surveyed and critically evaluated from theoretical as well as practical perspectives. Intended for Ph.D. students who will be conducting research in consumer behavior or related areas.

**269E. Special Research Topics in Marketing.** Prerequisite: doctoral standing. Advanced selected topics in marketing, with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit.

**269X-269Y-269Z. Workshops: Marketing (1 unit, 1 unit, 2 units).** Prerequisite: doctoral standing. Required of all students during first two years of their Ph.D. work. Series consists of a number of leading scholars in marketing and related disciplines who make presentations to marketing faculty and Ph.D. students. Active participation and intellectual interchange, which helps students gain a richer perspective on the field of marketing. In Progress grading.

**270A. Information Systems Applications.** Prerequisite: course 404. Basic concepts and uses of information systems in organizations. Use of information technology in support of individual and organizational information processing. Description of types of applications (e.g., functional, strategic). Evaluation of systems. Analysis of their impacts.

**270B. Information Systems for Planning and Control.** Prerequisite: course 404 or consent of instructor. Decision support systems and model-based planning systems, addressing both user and builder perspectives. Emphasis on managerial and behavioral issues and on technological and design concerns. S/U or letter grading.

**270C. Measurement in Information Systems.** Prerequisite: course 404. Role of measurement in management information and decision support systems. Logic and technique of measurement. Applications in individual, organizational, and societal performance.

**270D. Simulation for Management.** Discussion, three hours. Prerequisites: knowledge of computer programming and basic statistics, consent of instructor. Design, implementation, and use of discrete-event simulation models using a general purpose simulation language (e.g., SIMSCRIPT). Emphasis on managerial use of simulation and presentation of results (e.g., statistical analysis, graphics, animation). Extensive programming assignments.

**270E. Expert Systems for Management.** Prerequisite: second-year M.B.A. or doctoral standing or consent of instructor. Examination of expert systems for management, including rule and frame-based systems, certain and uncertain inference, expert system feasibility and development, available commercial systems, and current applications. Project that develops an expert system required.

**271A. Information Systems Technology.** Discussion, three hours. Prerequisite: course 404. Survey of computer hardware, software, telecommunications, and database technology. Specification and configuration of computer-based systems for management applications. Methods for costing system hardware and software and for assessing computer performance. Trade-off analysis of comparative computer configurations.

**271B. On-Line and Network-Based Systems.** Prerequisites: courses 271A and 272A, or consent of instructor. Distributed processing. Networked mini-computer systems. Data communication technology. Data security in computer networks. Cost/benefit analysis for design, configuration, and implementation of on-line and computer networks. Applications to computer utilities; command and control systems; and commercial, medical, and government networks.

**271C. Database Management Systems.** Discussion, three hours. Prerequisites: courses 271A and 272A, or consent of instructor. Features and capabilities of generalized database management systems, including system classification, comparison of software features, and evaluation of specific systems. Emphasis on management uses of such systems. Field study project may be required.

**272A. Information Systems Development.** Discussion, three hours. Prerequisite: course 404. Concepts and methodologies of systems analysis to determine user requirements. Overview of database management systems, with emphasis on the relational model. Project required, using a microcomputer-based CASE tool and relational dbms.

**273A. Information Systems Management.** Discussion, three hours. Prerequisite: course 404. Managing information systems within organizations. Role of chief information officer. Frameworks for understanding information systems function. Issues of planning, project management, computer operations, security, end-user computing, distributed and departmental computing, managing information systems professionals, costing of services, organizational structures.

**274A. Special Topics in Information Systems.** Prerequisite: consent of instructor. Examination in depth of issues or problems concerned with theory and practice of computing and management and use of information systems. Course may have a single theme or may deal with a number of topics. May be repeated for credit.

**274B. Frontiers in Information Systems.** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in information systems. Emphasis on recent contributions to theory, research, and methodology. May be repeated for credit.

**274X-274Y-274Z. Current Research in Information Systems (1 unit, 1 unit, 2 units).** Discussion, two hours. Prerequisite: doctoral standing. Year-long sequence associated with Information Systems Colloquium Series. Regularly scheduled presentations of current research and state-of-the-art developments in information systems field. Study and discussion of research presented. May be repeated for credit. S/U grading.

**278A. Urban Real Estate Financing and Investing.** Discussion, three hours. Prerequisite: consent of instructor. Investor-oriented course in which real estate and business trends are evaluated to determine alternative real estate investment opportunities. Use of current financial, economic, and investment theories and techniques to real estate investment opportunities in case studies and short case problems to illustrate development of investment strategies.

**278B. Sources, Uses, and Flows of Real Estate Capital.** Discussion, three hours. Analysis of money, capital, and mortgage markets to determine potential availability and costs of mortgage money from alternative sources. Evaluation of various sources of funds to determine factors influencing decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions.

**279A. Special Studies in Urban Land Economics.** Limited to master's or Ph.D. candidates working on thesis- or dissertation-related research. May be repeated for credit.

**279B. Selected Topics in Urban Land Economics.** Discussion, laboratory, and fieldwork. Prerequisite: second-year graduate standing or consent of instructor. Designed for students who wish to pursue a particular topic in housing, real estate, or urban land economics in depth on individual or cooperative basis. All work is computer-based; however, students are provided introduction to use of computers (preferably PCs) in various kinds of real estate analysis. May be repeated for credit.

**279X-279Y-279Z. Urban Research and Development (2 to 4 units each).** Prerequisite: graduate standing or consent of instructor. Exploration of urbania and its problems; prospects and prescriptions for delivery of a quality life. Macroscopic and microscopic exploration as related to problems of a selected urban area.

**280A. Studies, Research Philosophies, and Methodology in Human Systems.** Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Survey of seminal studies of human systems, including individual, group, and intergroup behavior, and organization behavior. Consideration of objectivist and subjectivist philosophies of science and their implications for related methodologies, including experimentation, field studies, case approaches, and a range of analytic and descriptive procedures in data collection. Emphasis on existing literature, philosophy of science, and concepts. May be repeated for credit. S/U or letter grading.

**280B. Personal and Professional Development.** (Formerly numbered 280C.) Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Provides setting where students may explore their own professional values and approaches in process of testing and learning values and standards in applied behavioral sciences and human systems development. S/U or letter grading.

**280C. Research Design in Human Systems Studies.** (Formerly numbered 280D.) Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Process of designing studies of human systems, including choice of research topics. Actively involves students in preparation of research proposals for research papers and doctoral dissertations. May be repeated for credit. S/U or letter grading.

**281A. Sociotechnical Systems.** Prerequisite: graduate standing. Introduction to systems concepts and view of work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus on developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations.

**281B. People in Organizations.** Prerequisite: graduate standing. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior in organizations, as well as managerial implications of individual, group, and social behavior. Special attention to knowledge about satisfaction motivation and productivity in organizations.

**282. Task Group Processes.** Lecture, three hours. Prerequisite: course 281A or 281B or consent of instructor. Structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on understanding how group activities interrelate with physical/technical environment. Imparts practical knowledge of task group functioning through class exercises and field observations. Consideration of team concepts and project group design. S/U or letter grading.

**284A. Organization Design.** Lecture, three hours. Prerequisite: course 281A or 281B or consent of instructor. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Development of specific methods ranging from microdesign of jobs to macrodesign of total organizational systems. Special emphasis on sociotechnical and differentiation/integration models. S/U or letter grading.

**284B. Organization Development.** Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Analysis of effects of organizational and managerial practices on individual self-fulfillment and systems effectiveness. Theories of organization change and action/research methods in organization development. Theory merged with practice through seminar discussions of field observations. S/U or letter grading.

**285A. Leadership, Motivation, and Power.** Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Theoretical and practical approaches to influencing and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from managerial point of view. Use of experience-based learning methods to aid diagnosis and understanding of one's own influence styles. S/U or letter grading.

**285B. Managerial Interpersonal Communication.** Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Interpersonal and personality factors affecting managerial communications. Styles and modes of communication in one-to-one, group, and large-systems settings. Opportunities offered to deepen understanding of one's own communication styles and skills, considering verbal, non-verbal perceptual, and cross-cultural aspects. S/U or letter grading.

**287. Groups and Their Facilitation.** Discussion, three hours. Prerequisite: consent of instructor. Development of cognitive and experiential understanding of dynamics of small group training and its facilitation, including "sensitivity/basic groups, group counseling, self-help groups, small groups, and committees in managerial decision making. Analysis of relevant theory, research findings, and case studies. S/U or letter grading.

**288A. Selected Topics in Behavioral Science.** (Formerly numbered 288B.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Theories of human behavior fundamental to study of individual, group, organizational, and cultural behavior. Exploration in depth of selected theoretic positions, extending and consolidating behavioral science knowledge and application. May be repeated for credit. S/U or letter grading.

**288B. Current Issues in Sociotechnical Systems and Organization Design.** (Formerly numbered 288C.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Current topics in analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe, the Orient, and the U.S. In-depth comparisons of selected job and organizational design cases. May be repeated for credit. S/U or letter grading.

**288C. Selected Topics in Human Systems Studies and Organizational Behavior.** (Formerly numbered 288F.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Psychological and social psychological aspects of human behavior and performance in organizations. Theoretical models, empirical findings, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

**288D. Current Issues in Human Systems Change and Development through Consulting.** Discussion, three hours. Prerequisite: consent of instructor. Current topics in philosophy, art, and technology of improving organizations and increasing managerial effectiveness through consulting interventions. In-depth treatment of consultant entry and exit, diagnosing, process consultation, consciousness raising, team building, and values. Relevant to development of effective M.B.A. field-study teams. S/U or letter grading.

**288E. Behavioral and Organizational Sciences Colloquium (Proseminar).** (Formerly numbered 288X-288Y-288Z.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Series of presentations by scholars and practitioners in behavioral and organizational sciences, with focus on integrative themes or major issues in the field, designed to provide dialogue among students and faculty on significant topics, controversies, and leading-edge ideas. May be offered in one or successive terms and may be repeated for credit. S/U or letter grading.

**290. Organization Theory.** Prerequisite: course 423 or consent of instructor. Analysis of theory and practice of managerial function of organizing through study of the literature, case analyses, and seminar discussion. Individual projects and reports.

**291. Planning and Control.** Prerequisite: course 423 or consent of instructor. Analysis of theory and practice of managerial function of planning and control. Implementation of objectives through policy formulation, decision making, and control. Individual projects and reports.

**292A. Research and Development Policy.** Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of forecasting technological futures.

**292B. Models of Organization Behavior.** Prerequisite: consent of instructor. Theoretical frameworks for developing explanatory and predictive models of complex organizations. Exercises in constructing formal models, usually in mathematical or stochastic form and, where appropriate, using materials from field studies to develop empirical tests. These models may be used to discover implications for systems changes recommended in sociotechnical field study.

**292C. Comprehensive Planning in Public Sector.** Prerequisite: consent of instructor. Evolving modes of planning under complexity, with particular emphasis on public sector. Development of policy through standard setting, bargaining, and regulating governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technological forecasting.

**293A. Political Environment of American Business.** Lecture, three hours. Prerequisite: consent of instructor. Evaluation of certain criticisms made by business of the American political system. Designed to provide clearer understanding of principal features of American politics, especially as they influence business enterprise.

**M293B. Morality of Capitalism.** (Formerly numbered 293B.) (Same as Political Science M211.) Lecture, three hours. Prerequisite: consent of instructor. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

**293C. Ethical Considerations in Business.** (Formerly numbered 298D.) Lecture, three hours. Prerequisite: consent of instructor. Examination of a range of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion.

**294A. Strategy Formulation and Implementation.** Prerequisite: consent of instructor. Case course dealing with strategy decisions and their implementation, executive action, and administrative behavior involved in managing total enterprises. Students are confronted with complex company situations to develop ideas essential to overall managerial direction.

**294B. Environmental Impacts on Management.** Prerequisite: consent of instructor. Examination of ways in which business, government, labor, and consumer organizational managers might respond to external environmental problems. Methods studied for developing and evaluating alternative managerial solutions which permit organizations to assist in improving current and future environmental quality.

**295A. Entrepreneurship and Venture Initiation.** Prerequisite: consent of instructor. Exploration in entrepreneurship particularly concerned with formation and operation of new business ventures. Significant and crucial aspects of exploring new business opportunities and starting a business.

**295B. Small Business Management.** Prerequisite: consent of instructor. Exploration of crucial aspects in managing small business enterprises. Emphasis on identification and analysis of characteristic operating problems of small firms and application of appropriate methods or techniques for their solution.

**295C. Corporate Entrepreneurship.** Prerequisite: consent of instructor. Inquiry into nature of entrepreneurship and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identification, development, and exploitation of technical and organizational innovations, management of new product or process developments, and effective new venture management in a corporate context.

**296A. International Business Management.** Discussion, three hours. Prerequisite: course 205A or equivalent or consent of instructor. Identification, analysis, and resolution of managerial issues of policy and action within context of a multinational corporation, with emphasis on problems of adaptation to different sociological, cultural, legal, political, and economic environmental characteristics on planning, structuring of organizational relationships, and coordination and control in multinational firms. S/U or letter grading.

**296B. International Comparative Management Research.** Prerequisite: doctoral standing or consent of instructor. In-depth study of theory and research pertaining to international business and comparative management. Emphasis on recent research developments and methodological issues. Imparts knowledge on design and conduct of international comparative management research.

**297A. Comparative and International Management.** Prerequisite: course 412 or consent of instructor. Comparative study of practice of management in selected foreign countries, as affected by their social environments and development of management theory.

**297B. International Business Policy.** Prerequisites: course 205A, consent of instructor. Analysis of key managerial problems encountered in a multinational corporation. Concepts and theories acquired in other courses in international business and comparative management, applied to a series of complex cases and simulations of international business operation.

**297C. International Business Law.** Prerequisites: courses 205A, 296A. Legal environments in which international business operates; overseas business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; patent, trademark, and copyright safeguards; arbitration of international business disputes; expropriation of foreign investments; international business and government relations.

**297D. International Business Negotiations.** Prerequisite: course 296A. Exploration of international business negotiations of multinational enterprises with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/dissolution of joint ventures, extent of foreign ownership/management control, terms/conditions for technology transfer, investment incentives.

**298A. Special Topics in Management Theory.** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in management theory. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298B. Special Topics in International and Comparative Management.** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in international and comparative management. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298C. Special Topics in Sociotechnical Systems.** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in sociotechnical systems. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298D. Special Topics in Management (1 to 4 units).** Lecture, three hours. Prerequisite: graduate standing. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U or letter grading.

**298X-298Y-298Z. Management Strategy and Policy Workshops (1 unit, 1 unit, 2 units).** Discussion, three hours. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

**299M. Ph.D. Seminar: Research Methodology.** Discussion, three hours. Prerequisite: doctoral standing. Methodological issues in management research. Emphasis on identification of research opportunities and formulation and evaluation of a research proposal. Alternative goals, settings, and designs. Hypothesis development and testing. Measurement. Implementation considerations.

**299R. Research Methods in Management.** Prerequisite: doctoral standing. Provides feedback and evaluation of papers prepared for research requirement. Quarterly meetings to discuss expectations of research committee and Doctoral Office. Students must enroll the term in which they are submitting their research paper. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses are acceptable toward the M.B.A., M.S., and Ph.D. degrees within the limitations and conditions prescribed by the curricula of the John E. Anderson Graduate School of Management.

**400. Mathematics for Management.** Prerequisite: graduate standing. Fundamental mathematics for business, including topics from matrix algebra, probability, and calculus, with applications to model building and decision making in business firms. S/U grading.

**402. Data Analysis, Statistics, and Decision Making.** Prerequisite: graduate standing. In-depth introduction to probability, decision theory, and statistical inference, with emphasis on solution to actual business problems. (F)

**403. Financial Accounting.** Lecture, three hours. Prerequisite: graduate standing. Introduction to fundamental financial accounting methods and procedures, with emphasis on financial statements. Provides basis for firm understanding of "the language of business" — accounting. (F)

**404. Information Systems.** Lecture, three hours. Prerequisites: courses 402, 403, 405. Introduction to information systems in organizations from perspective of general manager. Managerial and strategic uses of information systems, information technology that underlies these systems, and ways such systems are developed and managed. (W)

**405. Managerial Economics.** Lecture, three hours. Prerequisite: graduate standing. Analysis of consumer, producer, and market behavior. Market structure, pricing, and resource allocation. Applications to managerial strategy and public policy, with emphasis on competition, market power, and externalities. (F)

**406. Global Economy.** Prerequisites: courses 402, 403, 405. Provides analytical framework required for understanding the way changing macroeconomic conditions in world economy affect economic growth, inflation, interest rates behavior, exchange rate determination, global competitiveness, unemployment, and the trade account. Provides skills to enable students to assess critically how developments in world economy affect particular industry environments. (W)

**407. Managerial Model Building.** Lecture, three hours. Prerequisites: courses 402, 403, 405. Survey of uses of formal modeling approaches in managerial decision making. Emphasis on model types and formulations, and use of solutions obtained from computer routines. Application areas include finance, marketing, production, and public systems. (W)

**408. Managerial Finance.** Lecture, three hours. Prerequisites: courses 402, 403, 405. Analysis of main decision areas of managerial financial management, aimed at principles generally applicable to all types of organizations. Emphasis on financial planning and control, sources of funds, developing objectives and standards which lead to effective allocation and use of organization's resources. (W)

**409. Managing Human Resources in Organizations.** Lecture, three hours. Introduction to human resource management function and management of human behavior in organizations. Emphasis on relationships among individuals, groups, and organizational units as they influence the managerial process and development of prospective general managers. (F)

**410. Operations and Technology Management.** Lecture, three hours. Prerequisites: courses 402, 403, 405, 408, 411. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. (Sp)

**411. Elements of Marketing.** Principles of market-driven managerial decision making: consumer, competitor, and company analysis, market segmentation, definition of target markets, and product positioning. Management of marketing function: product and pricing decisions, channels of distribution, marketing communications. (W)

**412. Management of Organizations.** Lecture, three hours. Prerequisite: completion of first-year core program. Integrative approach to theory and practice of management in complex organizations, emphasizing managerial roles in designing organizational structures, creating/maintaining planning, control, information, incentive systems, different patterns of human interaction such structures and systems tend to produce. (F)

**413A. Programming for Management Applications.** Lecture, three hours. Prerequisite: graduate standing. Building management application systems. Programming in a high-level procedural language. Software specification, design, coding, testing, implementation, and maintenance. Extensive programming assignments.

**413B. System Building with Advanced Tools.** Prerequisite: graduate standing. Building management application systems with advanced software tools. Very high-level languages. Report writers. Query and graphics languages. Application generators. Extensive hands-on assignments.

**420. Management Policy.** Lecture, three hours. Prerequisites: courses 402, 403, 405, 408, 411. Evaluation and formulation of organization's overall policies and strategies. Economic, heuristic, and social process approaches to policy formulation, environmental analysis, and organizational appraisal. Senior management's role in managing the policy process. (Sp)

**421A. Management Communications I (1 unit).** Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective individually written managerial communications such as memos, reports, decision recommendations, etc. Emphasis on analytically based persuasive writing. S/U grading.

**421B. Management Communications II (1 unit).** Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective preparation of group writing assignments in managerial contexts where multiple audiences are important. Issues include achieving a single voice, establishing appropriate tone, incorporation of multiple points of view, etc. S/U grading.

**422. Analysis and Communications.** Discussion, three hours. Prerequisite: graduate standing. Study and practice of oral and written management communications, including audience analysis, persuasion, revising and editing, presentation of technical information, and uses of computer technology. Organized around writing and speaking exercises. Personal attention to students' written communications and oral presentations.

**423. Advanced Management Theory.** Advanced study of management theory in formally organized enterprise through significant readings; discussion of advanced approaches and techniques developed from applying theory; use of theory to integrate methods and findings of quantitative and behavioral sciences; lectures on sophisticated application of management theory in practice.

**444A-444B. Management Field Study.** Must be taken in two consecutive terms in second year (or its equivalent for part-time students). Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. In Progress grading. (F,W)

**450. Fieldwork in Behavioral Science Management Development (4 or 8 units).** Prerequisites: course 287, consent of instructor. Supervised practical fieldwork in all phases of laboratory education for management development, such as sensitivity training laboratories, creativity and personal growth laboratories, simulated managerial behavior laboratories, etc.

**451. Fieldwork in Organizational Development (2 to 12 units).** Prerequisite: course 284B or 450 or consent of instructor. Supervised practical fieldwork in organizational development consultation in interpersonal, group, intergroup, total organization, and interorganizational settings.

**452. Fieldwork in Technical Assistance for Minority Business Enterprise (1 to 4 units).** Prerequisite: completion of first year of master's program or consent of instructor. Supervised field experience in business consulting and other forms of technical assistance for business firms and management in ethnic communities; seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.

**453. Fieldwork in Arts Management (4 to 12 units).** Prerequisite: consent of instructor. Supervised field experience and practical work in all phases of an arts organization (pictorial, performing, or community), concentrating on its managerial problems and its relationship to the community and society in general.

**454. Fieldwork in Organizations.** Prerequisites: completion of two terms of M.B.A. program, consent of supervising faculty and director of M.B.A. program. Supervised, nonpaid practical experience or fieldwork in an organization as an intern or fellow. Execution of predetermined assignment(s) pursuant to a defined program of study which may include formal classwork. May not be repeated for credit.

**457. Fieldwork in Investment Management.** Discussion, three hours. Prerequisite: consent of instructor. Use of academic theories learned in a practical experience by managing a portfolio started with donated funds. Mirrors situations experienced by typical money management firms and includes investment strategy, asset allocation, security analysis, and organizational issues. S/U or letter grading.

The following individual study or research courses (501 through 599) may be used, within limitations and conditions prescribed by the school, to satisfy minimum higher degree requirements.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA AGSM graduate adviser and assistant dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A-596N. Research in Management (1 to 8 units each).** Prerequisite: consent of master's program director or Ph.D. program director by special petition. Directed individual study or research. May be repeated.

**597. Preparation for Qualifying Examinations (4 or 12 units).** Prerequisite: consent of master's program director or Ph.D. program director by special petition. Preparation for master's comprehensive examination or Ph.D. qualifying examinations.

**598. Thesis Research in Management (4 or 12 units).** Prerequisite: consent of master's program director by special petition. Research for and preparation of master's thesis. May be repeated. S/U grading.

**599. Ph.D. Dissertation Research in Management (4 or 12 units).** Prerequisite: consent of Ph.D. program director by special petition. Research for and preparation of Ph.D. dissertation.

## Executive M.B.A. Program

Admission to the Executive M.B.A. Program is prerequisite for enrollment in the following courses:

**461. Managerial Problem Solving (2 units).** Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting individual's diagnostic and decision-making skills. Use of readings, cases, decision simulations, and discussions to explore areas of charting job and career progress, working with others, and shaping the work culture.

**462. Economic Analysis for Managers.** Policy-oriented problems in antitrust, tax securities, and environmental regulation. Concepts of microeconomic theory illustrated. Topics include traditional antitrust regulations, new trends in antitrust, private versus government antitrust, securities regulation, environmental regulations, and a business firm's optimal response to regulation.

**463. Data Analysis and Management Decisions under Uncertainty.** Survey of statistical model building, with emphasis on managerial interpretation of statistical summary of data. Classical statistics covered through multiple regression to support courses in finance and marketing that follow. Fundamental approaches to decision making under uncertainty.

**464. Managerial Accounting.** Familiarizes the manager with functions of accounting by focusing on use of external financial reports for evaluating corporate performance and use of accounting information for internal planning and control.

**465. Quantitative Methods for Managers.** Survey of modeling approaches to managerial planning and decisions. Emphasis on ability to recognize situations where models can be used advantageously, to work effectively with model building specialists, and to make good use of models once they have been developed.

**466A-466B. Financial Policy for Managers (4 units, 2 units).** Modern financial management deals with decision making under uncertainty for corporate financial management, for portfolio investment decisions, for financial institutions, and for international financial management. Focus on learning sound theoretical tools and applying them in casework.

**467. Management Issues in Information Systems (2 units).** Growing role of information systems in the corporation and how they change ways of doing business. Examples from airlines, health, computer, communications, distribution, and publishing industries. Strategic, organizational, and societal implications.

**468. Economic Forecasting (2 units).** Macroeconomic theory and its application to business forecasting. Major economic indicators and their historical description of the U.S. economy; theoretical tools that business economists use to analyze impacts of monetary and fiscal policy; macroeconomic techniques applicable to business decisions.

**469. Management of Human Resources.** Introduction to major areas of human resource management — personnel management, labor economics, labor law, and labor relations — accomplished by examining some major concepts, theories, and research related to each of these topic areas, as well as some practical problems for managers posed by each.

**470A. Introduction to Action Research and Policy Analysis (2 units).** Provides methods of organizational and strategic analysis to determine relationship of the organization with its environment.

**470B. Strategic Overview (2 units).** Preparation of a strategic overview of a selected international company entailing collection and analysis of primary and secondary data, including (but not limited to) interviews of corporate executives, corporate financial and marketing data, industry reports, and customer and competitor interviews and/or surveys.

**470C. Action Research Project (2 units).** Further research and analysis of one of the strategic issues facing the selected company and identified in the strategic overview (course 470B).

**470D. Seminar: Policy Analysis (2 units).** Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate personnel.

**472. Marketing Strategy and Policy.** Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions.

**473. Managerial and Organizational Processes.** Development of an understanding of workings of large, complex organizations, with emphasis on macroanalytic, rather than on microanalytic, approach.

**474. Operations and Technology Management: Systems, Strategies, and Policies.** Lecture, three hours. Analysis of strategic and operating policies and decisions for systems that produce goods and services. Examination of role of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems.

**475. International Managerial Policies and Strategies.** Study of economic and business decisions in an international context, with emphasis on formulation and implementation of management strategies in multinational enterprises. Application of concepts of international economic analysis and exploration of international corporate strategies.

**476. Competitive Strategy and Business Policy.** Study of general management task of forging a corporate competitive strategy. Emphasis on economics of business rivalry within a variety of industrial settings and implications of changing environments on business strategy.

**477. The Manager and Business/Society Relationships.** While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, basic economic structure, and social responsibility.

**478. Selected Topics in Management (2 units).** Examination of selected problems and issues in an area of current concern in management.

# School of Social Welfare

Rosina M. Becerra, Dean

# 13

The UCLA School of Social Welfare is one of the nation's great professional schools of social work. Its mission is to contribute to the understanding of the social, economic, and political forces which are shaping our individual and communal lives and to use that knowledge to help in developing appropriate social policy and social work practice responses — whether under public, voluntary, occupational, or proprietary auspices.

Social workers are employed as planners, policy analysts, administrators, and direct service providers in all of the human services, including health, family and child welfare, mental health, services to the aged, manpower development and training, etc. Social workers are concerned with the causes, treatment, and prevention of personal and social ills and with the broader trends in the society which impact on the well-being of individuals, families, and communities. The school's objective is to prepare its graduates not only for practice as it is but for imaginative leadership in creating the social work practice of the future.

# School of Social Welfare\*

Jane E. Kurohara, M.S.W., *Emerita*  
Winifred E. Smith, M.S.W., *Emerita*

The UCLA School of Social Welfare offers an M.S.W. program in Social Welfare and a doctoral program of study leading to the Ph.D. The pro-

grams are designed to prepare candidates who wish to train for careers in teaching, research, administration, and high-level practice positions. Courses are scheduled in the School of Social Welfare and in schools and departments of related disciplines and professions.

## Degrees Offered

Master of Social Welfare (M.S.W.)  
Doctor of Philosophy (Ph.D.) in  
Social Welfare

## Master of Social Welfare

### Admission

In addition to University minimum graduate admission requirements, the master's program requires a minimum of five courses in social sciences or a combination of social science and social welfare subjects as prerequisite undergraduate preparation for graduate study in the field of social work. Completion of courses in psychology and sociology is expected, but an elementary statistics course with a grade of B or better is required.

A grade-point average of 3.0 or better is required in all courses taken during the junior and senior years. However, applicants with a GPA below 3.0 may be considered when there is clear evidence of capacity for academic achievement and professional development. In addition, the school applies the following criteria in the selection of candidates: personal suitability for professional education and potential for successful social work practice, a satisfactory state of health, and an adequate financial and personal plan to permit completion of degree requirements.

The General Test of the Graduate Record Examination (GRE) is required, as are official transcripts from every school attended since high school. GRE results must be submitted prior to any evaluation of the application for admission. GRE scores must be less than five years old and may be repeated to achieve a higher score, if desired. The highest GRE General Test score achieved is evaluated for admission. In addition, international students whose native language is other than English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information. The school may request that you take specified additional

examinations to assist in the assessment of candidacy for admission.

Three letters of recommendation are required. In addition, an autobiographical statement and a professional concepts and goals statement must accompany the application.

Prospective students must apply simultaneously to (1) the School of Social Welfare and (2) UCLA Graduate Application Processing. Both applications and the school brochure can be obtained by writing to School of Social Welfare Admissions, 247 Dodd Hall, UCLA, Los Angeles, CA 90024-1452, or by calling (310) 825-7737.

### Major Fields or Subdisciplines

Direct social work practice and community administration, policy, and planning are offered as social work methods. Specializations are available in child and family welfare, health and aging, and mental health.

### Course Requirements

A total of 76 units in courses in the School of Social Welfare is required, including three courses in social welfare policy and services, three courses in the human behavior and social environment sequences, six courses in methods of social work practice, four courses in social welfare research, plus five terms of field instruction. Appropriate substitutions or waivers may be made by the dean. You may, with consent of the dean, take courses in other graduate schools of the University in fulfillment of the degree requirements.

With consent of the instructor and dean, you may substitute tutorial studies of comparable material in the 500 series for either required or elective courses. Only Social Welfare 596A and 597A may be taken. A maximum of nine units of 500-series courses may be applied toward the entire graduate course requirement for the degree.

### Practicum Requirements

There is a concurrent field placement in each of the two years. Time spent in placement may vary according to guidelines established by the school, but approximately 1,300 hours are required.

### Thesis Plan

While no University-approved master's thesis is required for the M.S.W. degree, the curriculum requires theoretical courses in research methodology. As a component of the second-year research course, the satisfactory comple-

\*In response to budget constraints, Chancellor Young has proposed a restructuring of several of UCLA's professional schools. The current proposal calls for the School of Social Welfare to be transferred into a new school with focus on public policy, planning, and social welfare. If adopted, this proposal would be effective as of July 1, 1994. All degrees associated with current programs would continue to be offered.

tion of an individual research project, or participation in a group research project concerned with a social welfare problem, is required.

### Comprehensive Examination Plan

All M.S.W. candidates must pass an oral comprehensive examination in Spring Quarter of the second year of study. The examination may cover the entire range of the program.

## Ph.D. Degree

### Admission

In addition to the University minimum requirements, the school requires completion of an M.S.W. degree program with a superior record from an accredited school of social work. This requirement may be waived if an applicant possesses a postgraduate degree and professional experience in a related field. Such candidates, however, may be required to fulfill specified requirements in the M.S.W. program in addition to the normal doctoral requirements.

Admission criteria include the quality of your performance in previous undergraduate and graduate study, capacity for doctoral-level scholarship, ability to express yourself clearly in writing, success in professional employment and other pertinent experience, scores on the Graduate Record Examination (GRE), and personal qualifications indicating suitability for advanced study and research.

The General Test of the GRE is required, as are official transcripts from every school attended since high school. In addition, international students whose native language is other than English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information. The school may request that you take specified additional examinations to assist in the assessment of candidacy for admission.

Three letters of recommendation and a type-written statement of professional and educational objectives are required. To exemplify your communication skills, you may submit any of the following: published articles, master's thesis, or other theoretical/research-oriented unpublished papers.

Although a personal interview is not required as part of the application procedure, whenever possible a conference is arranged with a member of the doctoral faculty.

Prospective students must apply separately to the School of Social Welfare and to UCLA Graduate Application Processing. Both applications and the school brochure are available by writing to the School of Social Welfare Ph.D. Program, 247 Dodd Hall, UCLA, Los Angeles, CA 90024-1452.

### Major Fields or Subdisciplines

The program trains research-oriented scholars to advance the field of social welfare and social work through research and knowledge development, and to assume leadership roles in academic, policy, and practice settings. The curriculum is organized into three major areas — specialization in a substantive area of social welfare, integration of social and behavioral science knowledge into social welfare, and research methods. Programs of study are planned in relation to the special and individual needs and interests of the students.

### Course Requirements

There is a minimum core of required courses which includes two seminars on practice theory and research, two seminars on social welfare policy, and two graduate-level courses in statistics. In addition, you are required to take (1) at least three graduate-level courses in the social and behavioral sciences outside the school related to your specialization in social welfare, (2) three courses in advanced research methods, and (3) three terms of research internship.

Every effort is made to individualize the curriculum around your area of interest and plans for dissertation. In order to achieve this goal, a variety of patterns is used, including tutorials, small seminar groups, special courses in the M.S.W. program, and courses in other departments and schools of the University. You must complete course requirements and your dissertation within a maximum of 20 terms of full-time enrollment.

### Qualifying Examinations

The qualifying examinations consist of two parts — (1) an examination in social welfare policy and practice, reviewing current theory and research, that is given at the end of the third term of your first year and (2) a series of two major papers demonstrating your knowledge and analytical skills in (a) application of social and behavioral science knowledge to social work and (b) utilization of research methods to a problem area. Each paper must be evaluated by a two-member committee.

The qualifying examinations are graded on a pass/fail basis, and passing them is prerequisite to pursuing the dissertation. If you fail one or more components, you may be permitted to retake the examination(s) only with the recommendation of the school's doctoral program committee.

Advancement to doctoral candidacy follows successful completion of the written qualifying examinations and the University Oral Qualifying Examination which covers the dissertation proposal and related areas and is administered by the doctoral committee.

### Dissertation/Final Oral Examination

The dissertation must be an independent and original investigation which contributes to the existing body of knowledge in social welfare. The choice of topic and methodological development of your proposal must be approved by your dissertation committee, according to the regulations of the Graduate Division.

After acceptance of the dissertation in its final form, you may be required to take a final oral examination which covers the field within which your dissertation falls.

### Upper Division Course

**105. Social Welfare in a Multicultural Community.** Lecture, three hours; discussion, one hour; outside study, eight to 10 hours. Examination of social welfare practice and policy and its interface with multicultural issues, including language, communication, values, and help-seeking behaviors. Survey of ethnic groups' perceptions and effect of institutional racism and discrimination.

### Graduate Courses

Consult the school for curriculum updates.

**201A-201B. Dynamics of Human Behavior (3 units each).** Biopsychosocial factors associated with individual and group behavior and development as applicable in social functioning of individuals and groups. Emphasis on theoretical issues and research evidence which contribute to a unified theory of human development.

**202A-202B. Dynamics of Human Behavior (2 units each).** Prerequisites: courses 201A-201B. Deviations and pathologies or stresses in physical, emotional, and social areas of human functioning as those problems relate to role and function of the social worker.

**203A-203B-203C. Integrative Seminars (2 units each).** (Formerly numbered 203.) Prerequisite: consent of instructor. Integrative courses which bring together theory and practice of social work in a variety of topic areas relevant to the profession. Includes identification of problem areas and populations-at-risk requiring further examination. S/U or letter grading.

**205A. Cross-Cultural Awareness (2 units).** Designed to aid students in development of professional perspectives that will allow them to work effectively with members of myriad cultural groups, to discuss with clarity alternative concepts of culture in determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U grading.

**205B. Group Conflict and Change (2 units).** Study of phenomena of group conflict and change as they appear in the social welfare matrix of groups, communities, and social institutions; relationship between conflict and social and cultural change; major research contributions in understanding of these phenomena.

**220. History and Philosophy of Social Welfare (2 units).** History of social work as a field: body of knowledge, method and process, and point of view analyzed within context of economic, political, social, philosophical, and scientific climate of the period.

**221A. Social Welfare Policy and Services I.** Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory with special reference to values as seen by different components of the welfare system; theory and research about needs met and not met, about various welfare policies and organizational forms, and about social change to prevent needs. S/U or letter grading.

**221B. Social Welfare Policy and Services II (2 units).** Understanding of significant theoretical constructs and relevant empirical evidence dealing with how organizations develop and maintain their internal functions. Development of beginning skill in organizational analysis. Special attention to organizational analysis of social welfare services.

**223. Seminar: Social Work Profession (2 units).** Nature and role of social work in contemporary society; relationships with other professions; probable future trends in the profession; social work ethics, professional organizations, certification licensing; professional responsibility for continued self-criticism and improvement of the profession. S/U grading.

**225A-225B. Social Welfare Policy.** Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor.

**225A.** Formulation and Analysis. Examination of principal issues in development, formulation, and adoption of U.S. social welfare policies, with particular focus on income distribution and redistribution. Emphasis on analysis of social policy issues and conceptual frameworks for analysis.

**225B.** Implementation and Evaluation. Examination of issues in implementation and evaluation of social welfare policies, particularly those pertaining to provision, organization, and delivery of social services, including auspices funding, distribution, criteria for effectiveness, and use of quantitative methods in policy analysis.

**230A-230B-230C. Theory of Direct Social Work Practice I, II, III (2 units each).** Corequisite: required social work practicum. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. S/U or letter grading.

**231A-231B-231C. Advanced Theory of Direct Social Work Practice IV, V, VI (2 units each).** Corequisite: required social work practicum. Advanced level, critical analysis of theories, concepts, and principles underlying social casework practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups, and to diagnostic knowledge and competence required in rehabilitation and prevention.

**240A-240B-240C. Community Administration, Policy, and Planning I, II, III (2 units each).** Corequisite: required social work practicum. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system, administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention. S/U or letter grading.

**241A-241B-241C. Advanced Theory of Social Work Method (Administration, Planning, and Community Organization) IV, V, VI (2 units each).** Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory.

**245A-245B. Development of Social Work Practice Theory.** Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor.

**245A.** Epistemology of Practice. Guiding scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals learn, apply, accumulate, and modify their practice knowledge; science and practice interplay.

**245B.** Models of Social Work Practice Research. Research for practice, with major emphasis on methods of intervention research which seek to design, test, evaluate, and disseminate innovative intervention technologies.

**258. Critical Problems in Social Welfare (2 units).** Prerequisites: doctoral standing and/or consent of instructor. Current problems in the field of social welfare. Specific topics vary depending on research and educational interests and needs of class. May be repeated for credit. S/U grading.

**280. Social Welfare Research (2 units).** Sources, nature, and uses of social work theory and research-based knowledge and of broader social data relevant to social welfare activities. Critical analysis of major methods of developing scientific knowledge.

**281A-281B-281C. Advanced Social Welfare Research (2 units each).** Individual or group research projects requiring intensive examination and analysis of a social problem area, directed toward development of research knowledge and techniques for social work practice. In Progress grading.

**285A-285B-285C. Research in Social Welfare.** Prerequisite: doctoral standing or consent of instructor. Review of areas of research of concern to social workers, with special attention to design, instrument construction, data collection, data processing, data reduction, analysis, and interpretation. Designs studied include survey, panel, experimental observation, and theory development research. S/U or letter grading.

**286A-286B-286C. Survey of Research Methods.** Prerequisites: doctoral standing and/or consent of instructor. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis.

**290A-290B-290C. Seminars: Social Work (2 units each).** Series of seminars dealing with trends in social work and social welfare, with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research.

**M290D. Women, Health, and Aging: Policy Issues (2 or 4 units).** (Same as Health Services M241.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent, consent of instructor. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs.

**M290E-M290F-M290G. Child Abuse and Neglect (2 units, 2 units, 1 unit).** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Nursing M290A-M290B-M290C.) Course M290E is prerequisite to M290F, which is prerequisite to M290G. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies.

**401A-401B-401C. Practicum: Social Work (2 units, 4 units, 4 units).** Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire a disciplined practice foundation in the profession. In Progress and S/U grading.

**402A-402B-402C. Advanced Practicum: Social Work (6 units, 4 units, 2 units).** Laboratory, 24 hours. Prerequisites: courses 401A-401B-401C. Practicum in social work, arranged for students in keeping with their major field of study. In Progress and S/U grading.

**490. Professional Communication for Social Welfare (2 units).** Writing workshop on students' papers in progress, with an eye toward scholarly publication. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Special Study and Research for M.S.W. Candidates (2 to 8 units).** Individual programming for selected students to permit pursuit of a subject in greater depth.

**596B. Special Study and Research for Ph.D. Candidates (2 to 8 units).** Prerequisites: doctoral standing and/or consent of instructor. S/U grading.

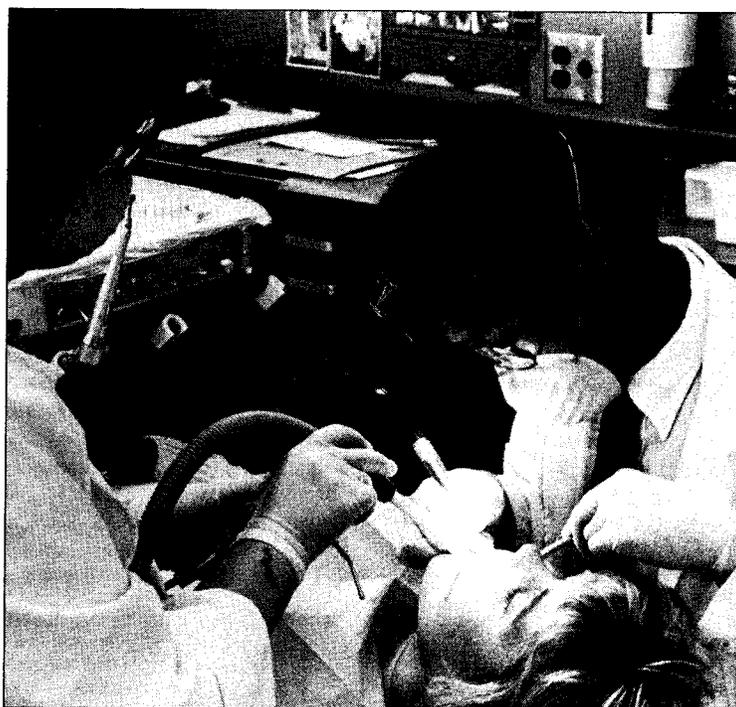

**597A. Preparation for M.S.W. Comprehensive Examination (2 to 8 units).** Prerequisite: consent of instructor.

**597B. Preparation for Ph.D. Qualifying Examinations (2 to 8 units).** Prerequisites: doctoral standing and/or consent of instructor. S/U grading.

**599. Ph.D. Dissertation Research in Social Welfare (2 to 8 units).** Prerequisites: doctoral standing and/or consent of instructor. S/U grading.

# School of Dentistry

Henry M. Cherrick, Dean

# 14

The UCLA School of Dentistry has developed a national and international reputation for its teaching and research activities. Challenging educational, training, and research programs prepare the dental student for a professional career dedicated to patient treatment and service. The curriculum is carefully designed to prepare students for changes in treatment modalities and health care delivery systems. Students become actively involved in preventive and clinical dental care immediately in their training and soon make valuable contributions to the clinical health team. The clinical instruction system emphasizes a patient care approach in which each patient is treated comprehensively. Students interact with their colleagues, faculty, and dental auxiliary personnel in much the same way as they later will interact in a private or group practice.

Opportunity exists for dental students to undertake programs designed to meet their special needs; mandatory fourth-year selectives encourage more advanced training in an area of particular interest. In addition to basic and applied research programs within the school, students participate in community service programs such as the Wilson-Jennings-Bloomfield UCLA Venice Dental Center, the Roybal Children's Dental Center, and the Mobile Dental Clinic, the latter in conjunction with the University of Southern California. A graduate program and a number of postdoctoral specialty programs foster new lines of research which lead to better treatment options. An active continuing education program directed by UCLA faculty members provides a variety of short courses for members of the dental profession and their auxiliaries.

# School of Dentistry

A3-042 Dentistry, (310) 206-1718

The UCLA School of Dentistry, which occupies facilities in the Center for the Health Sciences, offers a D.D.S. (Doctor of Dental Surgery) degree program, a number of postdoctoral programs, and Oral Biology M.S. and Ph.D. degree programs. Articulated D.D.S. and M.S. or certificate programs are also available. This catalog provides detailed information only on the M.S. and Ph.D. programs in Oral Biology, for which admission to the School of Dentistry is not required.

## Degrees Offered

Doctor of Dental Surgery (D.D.S.)  
 Master of Science (M.S.) in  
 Oral Biology  
 Doctor of Philosophy (Ph.D.) in  
 Oral Biology

## Predental Program

The UCLA School of Dentistry offers two upper division courses for predental students. Dentistry 199 and 199H are individual special studies courses for UCLA undergraduates with definitive research interests and abilities applicable to dentistry. The subject areas include oral biology, clinical research, and dental health policy. Interested students should contact the associate dean of research at (310) 825-6401 to obtain the names and areas of interest of participating School of Dentistry faculty.

Also refer to Chapter 5 for details on the three-year predental curriculum offered by the College of Letters and Science.

## Upper Division Courses

**199. Individual Special Studies (2 to 8 units).** Prerequisite: consent of department. Studies in dentistry and related subject areas appropriate for the training of particular students, with required reading assignments or laboratory work leading to a final oral or written examination. P/NP or letter grading.

Mr. Clark

**199H. Individual Special Studies (Honors) (2 to 8 units).** Prerequisite: consent of department. Studies in dentistry and related subject areas appropriate for the training of particular students, with required paper submitted at end of course in addition to final examination (paper to be of publication quality as judged by course mentor). P/NP or letter grading. Mr. Clark

## D.D.S. Degree Program

The UCLA dental curriculum leading to the degree of Doctor of Dental Surgery (D.D.S.) is based on the quarter system. The course of study usually takes four academic years of approximately nine months each, with three required Summer Quarters between the first/second, second/third, and third/fourth years. The curriculum is designed to provide students with clinical competence and broad experience in all phases of clinical dentistry within the four years.

The dental curriculum consists of three principal areas: basic health sciences courses, didactic dental courses, and clinical experience. The first two years of the curriculum are chiefly devoted to didactic, laboratory, and general clinical coursework. The final two years emphasize training and instruction in the clinical fields, including endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, oral radiology, oral and maxillofacial surgery, anesthesiology, orthodontics, pediatric dentistry, periodontics, and removable prosthodontics.

For further details on the D.D.S. program and a listing of the courses offered, see the *Announcement of the UCLA School of Dentistry*, available from the Office of Student Affairs and Admissions, School of Dentistry, A3-042 Dentistry, UCLA, Los Angeles, CA 90024-1762.

## Postdoctoral Programs

The School of Dentistry offers the following opportunities for postdoctoral study: a one-year general practice residency program; a one-year advanced education in general dentistry program; a one-year residency in maxillofacial prosthodontics; a four- or six-year oral and maxillofacial surgery residency training program; a three-year periodontics and combined orthodontic/pediatric dentistry program; two-year programs in the specialties of pediatric dentistry, prosthodontics, endodontics, and orofacial pain and dysfunction; and a 27-month program in orthodontics.

Information on these postdoctoral programs can be obtained by writing directly to Postdoctoral Programs, School of Dentistry, A3-042 Dentistry, UCLA, Los Angeles, CA 90024-1762.

## Oral Biology

63-050 Dentistry, (310) 825-1955

### Professors

George W. Bernard, D.D.S., Ph.D., *Chair*  
 Charles N. Bertolami, D.D.S., D.Med.Sc.  
 Douglas Junge, Ph.D.  
 No-Hee Park, D.M.D., Ph.D.  
 John A. Yagiela, D.D.S., Ph.D.  
 Colin K. Franker, Ph.D., *Emeritus*  
 Louis J. Goldberg, D.D.S., Ph.D., *Emeritus*

### Associate Professors

Robert A. Lindemann, D.D.S., M.A.Ed., M.S.  
 Lawrence E. Wolinsky, D.D.S., Ph.D.

### Assistant Professors

Susan A. Kinder, D.M.D., M.D.S., Ph.D.  
 Kenneth T. Miyasaki, D.D.S., M.S., Ph.D.  
 Igor Spigelman, Ph.D.

### Adjunct Professor

Bernard G. Sarnat, M.D., M.S., D.D.S.

### Adjunct Associate Professor

Carol A. Bibb, Ph.D., D.D.S.

### Adjunct Assistant Professors

Jaime Bulkacz, D.D.S., Dr.Odont., Ph.D.  
 Christine L. Quinn, D.D.S., M.S.

## Scope and Objectives

Oral biology is that area of knowledge which deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

## Requirements for Graduate Degrees

### Admission

Applicants must have a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics. The Graduate Record Examination

(GRE) and the Dental Aptitude Test (DAT) are not required but may be submitted. Three letters of recommendation and a statement of purpose describing your background, work experience, interests, and career goals are required as part of the admissions packet. There is no separate application form other than that required by UCLA Graduate Application Processing. International students are considered individually after evaluation of their curriculum and training and must take an English language proficiency examination. Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information. Contact the Graduate Adviser, Oral Biology Section, School of Dentistry, 63-050 Dentistry, UCLA, Los Angeles, CA 90024-1668, for more information and program brochures.

### Major Fields and Subdisciplines

Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and developmental biology, immunology, neuroscience, pharmacology and therapeutics, and virology.

### Course Requirements

All graduate students must take the five core courses — Oral Biology 201A-201B-201C, Biology 100A, and Biomathematics 170A. Additional course requirements are listed under each program.

### Master of Science Degree

#### Course Requirements

In addition to the five required core courses listed above for all students, you must complete Oral Biology 202, 260, and several elective courses.

Courses 596 and 598 are required 500-series courses. You are eligible to take two to eight units at a time on an S/U grading basis as many times as needed. A maximum of eight units of 500-series courses may be applied toward the total course requirement, of which four units may be applied toward the minimum graduate course requirement.

#### Thesis Plan

The master's thesis is intended to demonstrate your ability to design and carry out a research project and then to analyze and present the resulting data. The thesis must be prepared according to high standards of experimental design and data analysis. The subject of the thesis must be approved by the faculty adviser, who will direct the work of the thesis, and the thesis committee. At the end of your first year of study, you should prepare and send to the graduate adviser a brief description of the proposed research project.

The thesis should be prepared mainly in consultation with your faculty adviser, although other committee members are available for assistance.

#### Final Oral Examination

The final oral examination, administered by the thesis committee, is required of all candidates and is a defense of the thesis.

### Ph.D. Degree

#### Course Requirements

In addition to the five required core courses listed above for all students, you must complete additional required and elective courses (minimum of four to five courses) in your area of emphasis in your second year. Laboratory rotations and seminars are also required.

#### Teaching Experience

All doctoral students are expected to participate in teaching activities by assisting the faculty in a one-term oral biology course offered to dental students. You must participate fully in the planning and delivery of the course.

#### Qualifying Examinations

After completing the required core courses, you take a broad essay-type written examination in the major areas of oral biology and cell biology administered by the graduate training committee. After passing the written qualifying examination, you are expected to select an area of emphasis for further study.

At the end of your second year of study, you submit a proposal for the University Oral Quali-

ying Examination that outlines your dissertation research and provides a review of the literature, a statement of aims of the research, and a description of your planned research activities. The examination is administered by your doctoral committee. After passing the oral examination, you are advanced to candidacy and may begin work on your dissertation.

### Dissertation/Final Oral Examination

You must submit a report of an original research study which meets the approval of your doctoral committee.

The final oral examination, administered by the doctoral committee, is required of all candidates and is a defense of the dissertation.

### Articulated Degree Programs

You may apply for a combined D.D.S./M.S., advanced certificate training/M.S., or advanced certificate training/Ph.D. by making simultaneous application for graduate standing in Oral Biology and for admission to the D.D.S. program or the certificate program. To participate you must be accepted by both of the concerned units.

### Graduate Courses

**201A-201B-201C. Advanced Oral Biology (3 units each).** Prerequisite: consent of instructor:

**201A.** Ontogenesis. Evolutionary perspective of cellular development from simple molecules that were formed during the first billion years of the Earth to development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from a comparative anatomical and physiological point of view, followed by embryogenesis of orofacial and dental structures of humans.

Mr. Bernard and the Staff (F)

**201B.** Homeostasis in Oral Systems. Normal regulatory functions of various oral systems. Topics include immune systems, mechanisms of salivary secretion and nonspecific salivary protective mechanisms, integrated behavior of sensory and motor systems, mechanisms of deposition and resorption of bone, dentin, and enamel, ionic and hormonal influences on bone regulation.

Mr. Junge and the Staff (W)

**201C.** Pathobiology. Molecular basis for pathogenic processes in tissues of the oral cavity. Topics include microbially mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc.

Mr. Park and the Staff (Sp)

**202. Principles and Methods of Research.** Discussion, two hours. Prerequisite: consent of instructor. Examination and discussion of various approaches to research methodology, from formation of hypotheses to experimental testing and analysis and interpretation of data. Library work to be studied from standpoint of obtaining background information and writing a paper. Hypotheses based on class members' interests to be critiqued and elaborated into research proposals. Research faculty to speak informally on their individual approaches to scientific investigation.

Mr. Junge and the Staff (Sp)

**M203. Oral Embryology and Histology.** (Same as Anatomy M229.) Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.

Mr. Bernard and the Staff (Sp)

**204. Mechanisms and Relief of Pain (2 units).** (Not the same as course 204 prior to Winter Quarter 1993.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders. Lecture series followed by student presentations of relevant literature and discussion of current advances in pain research.

Mr. Spigelman (W)

**211. Biology of the Temporomandibular Joint (2 units).** Anatomy, histology, physiology, and biomechanics of the temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging.

Ms. Bibb, Mr. Clark, and the Staff (W)

**226A-226B. Craniofacial Growth and Development (2 units each).** Prerequisite: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region. Students required to present seminars on assigned topics which aid their understanding and analysis of course content that has application to their specific and professional fields. In Progress grading.

Mr. Rudolph and the Staff (F,W)

**227. Dental Embryology and Histology (2 units).** Description and interpretation of important stages in development of the orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of the orofacial apparatus which are of significance to clinical dental specialists.

Ms. Bibb (F)

**228. Dental Pharmacology and Therapeutics (2 units).** Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on autonomic and central nervous systems.

Mr. Yagiela (F)

**260. Oral Biology Seminar (2 units).** Seminar, one hour; outside research, one hour. Research seminar to discuss faculty and student research of oral biology and related disciplines. Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

Mr. Woiinsky and the Staff (F,W,Sp)

**M293. Major Concepts in Oncology.** (Same as Microbiology and Immunology M293 and Pathology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

Mr. Hankinson (W)

**596. Directed Individual Study or Research (2 to 8 units).** S/U grading.

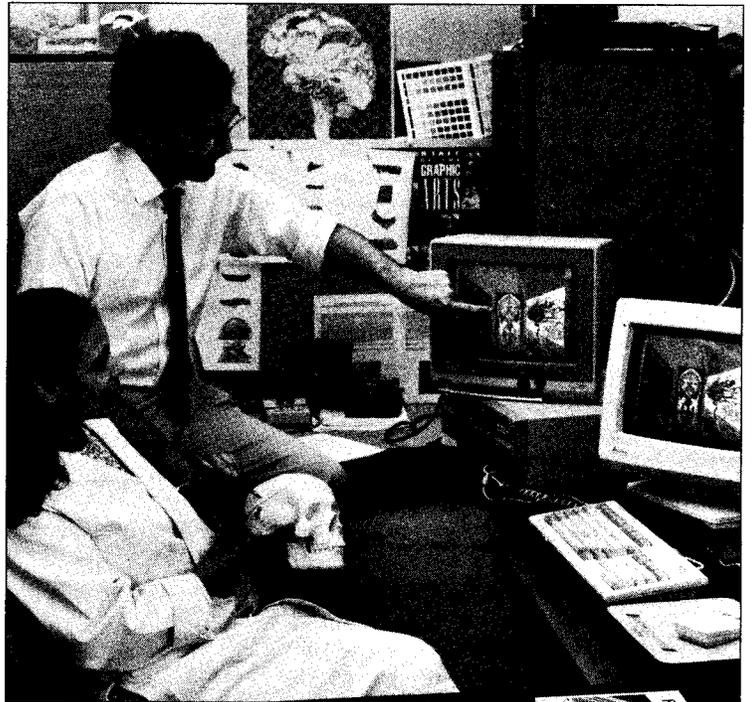

**597. Preparation for Ph.D. Qualifying Examinations (4 to 8 units).** S/U grading.

**598. Thesis Research and Preparation (2 to 8 units).** S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (4 to 8 units).** S/U grading.

# School of Medicine

Gerald S. Levey, Dean and Provost

# 15

A modern school of medicine exists in many minds and in many places. It includes many more disciplines than all those available to such physicians as Copernicus and John Locke, famous for discoveries well beyond medicine then or now. UCLA School of Medicine faculty and students may be found in the Molecular Biology Institute and in the Department of Physiology, in the clinics, wards, and operating rooms of the UCLA Medical Center and Los Angeles County Harbor-UCLA Medical Center, in the Health Sciences Computer Center, in the Louise Darling Biomedical Library, and in dozens of other clinical and scientific facilities.

Regarded by many physicians and medical faculty to be among the best in the nation, UCLA's School of Medicine encompasses a wide range of clinical specialties, including neurology, obstetrics and gynecology, ophthalmology, orthopedic surgery, pediatrics, radiation oncology, and surgery. Graduate work leading to the M.S. and/or Ph.D. degrees is offered through the Graduate Division, either separately or in conjunction with the M.D. program, in 10 different disciplines.

Each department of the school is staffed by a distinguished faculty of respected researchers and practitioners. They have at their disposal some of the most technologically advanced equipment and facilities, including two of the nation's 56 hospital-based biomedical cyclotrons producing short-lived radioisotopes for biological research and diagnostic nuclear medicine procedures.

# School of Medicine

12-109 Center for the Health Sciences, (310) 825-6081

The UCLA School of Medicine offers an M.D. degree program, several allied health programs in affiliation with other hospitals and universities, and a number of postgraduate medical training programs. In addition to specialties in medicine, neurology, obstetrics and gynecology, ophthalmology, orthopedic surgery, pediatrics, radiation oncology, and surgery, which lead to the M.D. degree, a range of master's and doctoral degrees is offered through the Graduate Division.

## M.D. Degree Program

The four-year curriculum leading to the degree of Doctor of Medicine (M.D.) at UCLA is designed to develop a comprehensive scientific and humane approach to patient care that includes basic sciences, preventive medicine, diagnosis, and therapeutics. Clinical skills are taught in the context of anatomical, molecular, pathophysiological, and psychosocial factors in health, disease, and treatment.

During the first two years, which are devoted mainly to the basic sciences with only periodic, brief clinical exposure, instruction is primarily in the form of lectures, laboratory sessions, small-group problem-oriented instruction, demonstrations, and tutorials. In the last two years, instruction in patient care is given in the form of required and elective clinical rotations at the UCLA Medical Center and at the many affiliated hospitals.

All of the medical school departments participate in the medical curriculum leading to the M.D. degree. If you are interested in details on the M.D. curriculum and a listing of courses offered in each department, or if you wish to make application to the M.D. program, you should obtain a copy of the *Announcement of the UCLA School of Medicine* from the Office of Student Affairs, School of Medicine, 12-109 CHS, UCLA, Los Angeles, CA 90024-1720. You are also referred to Chapter 5 of this catalog for details on the four-year premedical studies program offered by the College of Letters and Science.

## Graduate Programs

Master's and/or doctoral degrees are offered through the UCLA Graduate Division in the following fields: anatomy, biological chemistry, biomathematics, biomedical physics (Department

### Graduate Degrees Offered

Anatomy and Cell Biology	M.S.*, C.Phil., Ph.D.
Anesthesiology (Nurse Anesthesia)	M.S.
Biological Chemistry	M.S., Ph.D.
Biomathematics	M.S., Ph.D.
Microbiology and Immunology	M.S.*, Ph.D.
Neuroscience	Ph.D.
Pathology (Experimental Pathology)	M.S., Ph.D.
Pharmacology	M.S.*, Ph.D.
Physiology	M.S.*, Ph.D.
Psychiatry and Bibehavioral Sciences	
Clinical Psychology Internship	Certificate
Radiological Sciences (Biomedical Physics)	M.S., Ph.D.

\*The department only admits applicants whose objective is the Ph.D.

of Radiological Sciences), experimental pathology, microbiology and immunology, neuroscience, nurse anesthesia, pharmacology, and physiology. Detailed information on these programs, for which admission to the School of Medicine is not required, is provided in the departmental listings which follow.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

## Additional Programs

### Articulated Degree Programs

The School of Medicine offers an articulated degree program in conjunction with the Graduate Division which allows you to earn both the M.D. and Ph.D. in seven years, depending on your course of study and research. The Ph.D. may be awarded in one of several medical science fields. For more information, contact the Medical Scientist Training Program at (310) 794-1817.

In addition, an arrangement with the School of Public Health enables you to pursue the M.P.H. degree while attending medical school. Interested students should consult the Student Affairs Office in the School of Public Health.

### Allied Health Programs

Programs in allied health include animal care technician, dental assistant, dental hygienist, dietetics technician, emergency medical technician, social work, pharmacy, respiratory thera-

pist, vocational nurse, nurse anesthetist, operating room nurse, physician's assistant, physical therapist, radiologic technologist, radiation therapy technologist, and ultrasound technologist.

Information regarding these programs may be obtained from the Office of Allied Health Programs in the UCLA Center for the Health Sciences (310-794-8352).

### Postgraduate Medical Training Programs

Postgraduate training programs, including residencies, are available at several off-campus sites in addition to those offered at the UCLA Medical Center. Programs at the allied institutions broaden the scope of the teaching programs by providing extensive clinical facilities, special population settings, and diverse practice modes. Information about these programs is available from the Office of Student Affairs, UCLA School of Medicine.

# Anatomy and Cell Biology

73-235 Center for the Health Sciences, (310) 825-9555

## Professors

George W. Bernard, D.D.S., Ph.D.  
Dean Bok, Ph.D. (*Dolly Green Professor of Ophthalmology; Distinguished Teaching Award*),  
Vice Chair

Nicholas C. Brecha, Ph.D., *in Residence*  
Nathaniel A. Buchwald, Ph.D., *in Residence*  
Carmine D. Clemente, Ph.D.  
Edwin L. Cooper, Ph.D.  
Jean S. de Vellis, Ph.D., *in Residence*  
Ellen R. Dirksen, Ph.D.  
Jerome Engel, M.D., Ph.D.  
Robin S. Fisher, Ph.D., *in Residence*  
Roger A. Gorski, Ph.D. (*Distinguished Teaching Award*)  
Ronald M. Harper, Ph.D.  
Lawrence Kruger, Ph.D.  
John K. Lu, Ph.D.  
Paul E Micevych, Ph.D., *Interim Chair*  
Arnold B. Scheibel, M.D.  
John D. Schlag, M.D.  
M.B. Serman, Ph.D., *in Residence*  
Anna N. Taylor, Ph.D., *in Residence*  
Jaime R. Villablanca, M.D., *in Residence*  
Charles D. Woody, M.D., *in Residence*  
Guido A. Zampighi, D.D.S., Ph.D.

## Professors Emeriti

Emilio E. Decima, M.D.  
Earl Eldred, M.D.  
Daniel C. Pease, Ph.D.  
Charles H. Sawyer, Ph.D.  
José P. Segundo, M.D.  
Bernard Towers, M.D.  
Richard W. Young, Ph.D. (*Distinguished Teaching Award*)  
Emery G. Zimmermann, M.D., Ph.D.

## Associate Professors

Anthony M. Adinolfi, Ph.D.  
John H. Campbell, Ph.D.  
Carolyn R. Houser, Ph.D., *in Residence*

## Assistant Professors

Philip S. LaPolt, Ph.D.  
Jorge R. Mancillas, Ph.D.  
Erik S. Schweitzer, M.D., Ph.D.

## Adjunct Professors

James F. McGinnis, Ph.D.  
Margaret N. Shouse, Ph.D.

## Adjunct and Clinical Associate Professors

Earle E. Crandall, M.D., Ph.D., F.A.C.S., *Clinical*  
M. Cristina Kenney, M.D., Ph.D., *Adjunct*  
Carlos A.E. Lemmi, Ph.D., *Adjunct*  
Anselmo R. Pineda, M.D., *Clinical*

## Adjunct Assistant Professor

Robert B. Trelease, Ph.D.

## Scope and Objectives

The Department of Anatomy and Cell Biology offers advanced training leading to the Ph.D. degree. The great majority of students graduating with a doctoral degree in anatomy and cell biology can look forward to an academic career in medical and dental schools or re-

search institutes and, in accord with this, the department strives to produce graduates soundly qualified both for teaching of anatomical subjects at this level and for the conduct of productive research in cell biology and neurobiology. An informational brochure may be obtained by writing to the Vice Chair, Department of Anatomy and Cell Biology, 73-235 CHS, UCLA, Los Angeles, CA 90024-1763.

## Requirements for Graduate Degrees

### Admission

Applicants must have a bachelor's degree in a physical or biological science or in a premedical curriculum. Introductory courses in zoology, one year of general and organic chemistry, and one year of college physics are required. Courses in comparative anatomy, embryology, cell biology, genetics, and elementary statistics are highly recommended.

Ph.D. admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280. Master's degree applicants will not be admitted a priori, as the M.S. degree is awarded only under exceptional circumstances.

### Major Fields or Subdisciplines

The major fields in which graduate research may be undertaken include (1) cell biology, (2) molecular biology, and (3) neuroscience.

## Master of Science Degree

The Anatomy and Cell Biology Department offers the Ph.D. degree, and students may obtain the M.S. degree; however, the department normally does not admit candidates for the M.S. degree only.

## Ph.D. Degree

### Course Requirements

- (1) Completion of the following required courses: Anatomy and Cell Biology M202, M209A (or Biological Chemistry M267), 209B, Biological Chemistry CM253.
- (2) Participation in at least three seminar courses, one of which should be in the Department of Anatomy and Cell Biology.
- (3) Completion of such elective courses as are essential for your research interest.
- (4) Rotation through three research laboratories in your first year, one term each, with course 596 credit (six units).

### Teaching Experience

Since the anatomy and cell biology profession generally imposes relatively heavy teaching obligations, you are required to gain teaching experience in two courses in your second year, one in a major departmental course and the second in a course offered by the College of Letters and Science.

## Qualifying Examinations

You must submit a research proposal in the format of an individual National Institutes of Health (NIH) grant application by the end of Spring Quarter of your second year. The proposal should reflect, as closely as possible, the plan for your dissertation research. An appointed committee reviews and grades your proposal. When your research proposal is approved, all requirements of the written qualifying examination, which is intended to evaluate your knowledge of the research field and ability to formulate a practicable and significant research program, are satisfied.

After satisfying the requirements of the written qualifying examination, you take the University Oral Qualifying Examination, which is a defense of your proposal accompanied by a 30- to 60-minute presentation with appropriately prepared visual aids and is graded by your doctoral committee.

The Anatomy and Cell Biology Department may decline to admit any student to the qualifying examination if, in its judgment, the student is inadequately prepared, is not sufficiently interested in those fields of research in which the department can offer sufficient guidance, or is for other reasons not adaptable to the program.

## Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D. and are encouraged to do so.

## Final Oral Examination

After you complete the research and writing of the dissertation, you are required to give a final public seminar on your findings. You must also defend your dissertation in a final oral examination before your doctoral committee in closed session.

## Upper Division Courses

**102. Gross Anatomy of the Human Body (8 units).** Lecture, three hours; laboratory, nine hours. Prerequisites: dental or graduate student standing, consent of instructor. Systemic and topographical human anatomy, with dissection of human cadaver. Emphasis on head and neck. P/NP grading.

Mr. Zampighi and the Staff (W)

**104. Histology and Cell Biology (6 units).** Lecture, four hours; laboratory, six hours. Prerequisite: dental student standing or consent of course chair. Required of freshman dental students. Lectures, demonstrations, and laboratories dealing with structural organization of cells, tissues, and organs at microscopic level. Nervous system included.

Mr. Campbell and the Staff (F)

**106. Functional Neuroanatomy.** Lecture/laboratory, three two-hour sessions. Prerequisite: dental student standing or consent of instructor. Lectures, demonstrations, and laboratories dealing with structure and functional organization of nervous system.

Mr. Harper and the Staff (Sp)

**199. Individual Special Studies (2 to 8 units).** Prerequisite: consent of instructor. Studies in anatomy and related subject areas appropriate for training of particular students, which may include reading assignments or laboratory work leading to a final oral or written report. S/U or letter grading.

## Graduate Courses

**201. Microscopic Anatomy and Cell Biology (7 units).** Lecture/laboratory, two to three three-hour sessions (16-week semester). Prerequisite: medical student standing or consent of instructor. Microscopic study of structure and function of tissues and cells, with special reference to the human body.

Mr. Gorski and the Staff (F)

**M202. Neuroanatomy: Structure and Function of Nervous System.** (Same as Neuroscience M201.) Lecture, three hours; laboratory, three hours. Prerequisites: Biology 166 or 171 or equivalent, consent of instructor. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

Mr. Scheibel (F)

**M203A-M203B. Basic Neurology.** (Same as Physiology M203A-M203B.) Prerequisites: medical student standing or enrollment in qualified graduate program, consent of instructor. Runs throughout School of Medicine's second semester. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system. To receive credit, both courses must be taken together in same academic year. In Progress grading.

Mr. Schlag and the Staff (W,Sp)

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Biology M280, Neuroscience M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

Mr. de Vellis and the Staff (W)

**205A-205B. Gross and Developmental Anatomy for Medical Students (5 units each).** Lecture/laboratory, three four-hour sessions (16 weeks beginning in August). Prerequisites: medical student standing, consent of department for nonanatomy majors. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissection. Graduate students may take each course independently. **205A.** Limbs, Thorax, and Abdomen (first eight weeks); **205B.** Pelvis, Head, and Neck.

Mr. Adinolfi and the Staff (F)

**207. Gross and Developmental Anatomy for Graduate Students (12 units).** Lecture/laboratory, three four-hour sessions (16-week semester). Prerequisite: consent of instructor. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissection. Trunk and extremities; head and neck.

Mr. Adinolfi and the Staff (F)

**M209A. Molecular Cell Biology (6 units).** (Formerly numbered 209A.) (Same as Biology CM220 and Physiology M209A.) Prerequisite: consent of instructor; for undergraduates: Biology 100A, Chemistry 153A, consent of instructor. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication.

Mr. Bok, Mr. Homsher (W)

**209B. Cellular and Molecular Neurobiology (6 units).** Lecture, four hours; discussion, one hour; laboratory, one hour. Prerequisite: graduate standing. Introductory course for students planning to conduct cell biology or neurobiology research, with focus on cell biology and tissue organization of central and peripheral nervous system. Emphasis on normal structure of neurons, glia, and meninges.

Mr. Brecha, Mr. Fisher

**211. Cellular Basis of Learned Behavior (2 units).** Lecture/discussion, one two-hour session; laboratory, to be arranged. Prerequisites: microscopic anatomy, mammalian physiology. Anatomy and physiology of cerebral processes in alerting, learning, focusing attention, and memory.

Mr. Woody (F)

**M221. Cellular and Molecular Neurochemistry.** (Formerly numbered M240.) (Same as Biological Chemistry M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

Mr. de Vellis, Mr. Olsen (W)

**227. Cellular, Molecular, and Functional Aspects of Reproductive System.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis.

Mr. Gorski, Mr. Lu (Sp)

**M229. Oral Embryology and Histology.** (Same as Oral Biology M203.) Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.

Mr. Bernard and the Staff (Sp)

**234. Seminar: Developmental Neuroendocrinology (2 units).** Prerequisite: graduate standing or consent of instructor. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

Ms. Taylor (F)

**M235. Neuroactive Peptides: Molecular Biology to Function (2 units).** (Formerly numbered M246.) (Same as Medicine M235 and Neuroscience M246.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

Mr. Brecha, Ms. Sternini (Sp, odd years)

**251. Problems in Developmental and Comparative Immunology (2 units).** Prerequisite: consent of instructor. Review of current literature emphasizing early development and evolution of immune competence.

Mr. Cooper (W)

**254. Structure and Function of Cells and Tissues (2 units).** Lecture, one hour; discussion, one hour. Prerequisites or corequisites: course 104, consent of instructor. Current topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

Mr. Campbell and the Staff (F)

**M255A-M255D. Seminars: Neural and Behavioral Endocrinology (3 units, 2 units, 3 units, 2 units).** (Same as Physiological Science M255A-M255D and Psychology M294A-M294D.) Lecture, three hours. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function. In Progress grading.

Mr. Arnold (Sp, M255B, M255D),

Mr. Micevych (W, M255A, M255C)

**258. Seminar: Neuroscience (2 units).** Prerequisite: basic neurology. Topics of current interest or ongoing research projects; examination of both content and method of presentation. May be repeated for credit. Mr. Scheibel (F, odd years; W, even years)

**M261. Neuronal Circuit Analysis (2 units).** (Same as Neuroscience M261.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

Mr. Schlag (W)

**265. Evolution of Cancer (2 units).** Prerequisite: consent of instructor. Review of current literature emphasizing appearance of tumors and neoplasms in representative invertebrates, fishes, amphibians, and reptiles. Theories of cancer development from the evolutionary viewpoint.

Mr. Cooper (W)

**M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars (2 units each).** (Formerly numbered 270.) (Same as Physiology M270A-M270B-M270C.) Lecture, one hour; discussion, one hour. Prerequisite: graduate standing or consent of instructor(s). Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty members from Anatomy and Cell Biology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

(F,W,Sp)

**290. Tutorials in Anatomy (2 units).** Tutorial, one hour. Prerequisite: consent of instructor. Individual study with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to instructor and student. S/U grading.

(F,W,Sp)

**390A-390B. Peer Review System (2 units each).** Prerequisite: advancement to candidacy in integrative or systems biology or consent of instructor. Introduction to peer review system for evaluation of research proposals. After consideration of grant review process, each student prepares abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

Mr. Gorski (W,Sp, odd years)

**495A-495F. Preparation for Teaching in Anatomical Sciences (2 to 4 units each).** Prerequisites: graduate standing, consent of vice chair and instructor. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. Maximum of three 495 courses may be taken; none may be repeated. May not be applied toward degree requirements. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research (2 to 12 units).**

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units).**

598. Thesis Research for M.S. Candidates (2 to 12 units).

599. Dissertation Research for Ph.D. Candidates (2 to 12 units).

## Medical History Division

### Professors

Ynez V. O'Neill, Ph.D., *in Residence*  
Mary A.B. Brazier, Sc.D., *Emerita, in Residence*

### Associate Professor

Robert G. Frank, Jr., Ph.D., *Division Chief*

### Lecturer

Elizabeth R. Lomax, M.D., Ph.D.

## Upper Division Courses

**107A-107B. Historical Development of Medical Sciences.** Lecture, three hours. Major contributions of medicine and medical personalities from earliest times. **107A.** Contributions of medicine and medical personalities from earliest times through 1650. **107B.** Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

Mr. Frank (Sp), Ms. O'Neill (W)

**M108A-M108B. History of Biological Sciences.** (Same as History M195F-M195G.) Lecture, three hours. **M108A.** Biological Sciences from Ancient Times to the Early 19th Century; **M108B.** Biological Sciences from the Early 19th Century to the Mid-20th Century.

Mr. Frank (F,W)

**120. Health Care in Los Angeles: Introduction to Cultural Medical Traditions.** Lecture, one hour; discussion, three hours. Exploration of health beliefs, traditions, and practices of major ethnic groups in Los Angeles area. Scholarly perspective on uses of alternative medicine to prepare students interested in health care to assist patients in clinical settings. P/NP or letter grading.

Ms. O'Neill (F)

**135. Popular Beliefs and Medicine.** Lecture, three hours. Investigation of some basic health beliefs and traditions that can potentially conflict with biomedicine and exploration of educational resources necessary to prepare health care students for the clinical situation. P/NP or letter grading.

Ms. O'Neill (W)

## Graduate Courses

**240A-240B. History of Medical Sciences (2 units each).** Lecture, one hour. Survey of development of scientific and medical thought from ancient times to the present.

(F,W)

**246. History of Neurophysiology: Its Impact on Psychology and Medicine (2 to 4 units).** Lecture, one hour; seminar, two hours. Development of experimental neurophysiology from its scientific roots in the 17th century through recognition of the excitability of nervous system, to use of this characteristic in revealing functions of central nervous system. Discussion of interaction of neurophysiological ideas with contemporaneous philosophy and medicine. Lectures may be taken independently.

Ms. Lomax, Ms. O'Neill (Sp)

**250. History of Medical Psychology (2 units).** Lecture, one hour. Examination of themes underlying modern mental health theories. Beginning with review of contemporary thinking, lectures focus on various factors shaping present concepts of mental disorders and provide a framework for understanding current issues.

Ms. Lomax, Ms. O'Neill (W)

**596. Directed Individual Studies in Medical History (2 to 12 units).** Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences.

(F,W,Sp)

# Anesthesiology

### Department:

BH-518 Center for the Health Sciences, (310) 206-8890

### Nurse Anesthesia Program:

14445 Olive View Drive, Sylmar, (818) 364-3277

### Professors

Atsuo F. Fukunaga, M.D., *in Residence*  
Joseph C. Gabel, M.D., *Executive Chair*  
Lawrence Kruger, Ph.D.  
Chingmuh Lee, M.D.  
John C. Liebeskind, Ph.D.  
Eduardo H. Rubinstein, M.D., Ph.D.  
Leonard F. Walts, M.D.  
Wynne R. Waugaman, CRNA, Ph.D.  
John A. Yagiela, D.D.S.

### Professors Emeriti

Gerald D. Allen, M.D.  
Verne L. Brechner, M.D.  
Mary E. Carsten, Ph.D.  
John B. Dillon, M.D.  
Joan W. Flacke, M.D.  
Werner E. Flacke, M.D.  
Ronald L. Katz, M.D.  
Richard W. Patterson, M.D.  
Stuart F. Sullivan, M.D.  
Donald M. Wiberg, Ph.D.

### Associate Professors

Kenneth A. Conklin, M.D.  
Marie E. Csete, M.D., *in Residence*  
Patricia A. Kapur, M.D.  
Jordan D. Miller, M.D.  
Stanley W. Stead, M.D.

### Assistant Professors

Victor C. Baum, M.D.  
Nicholas A. Deutsch, M.D., *in Residence*  
Erin A. Sullivan, M.D., *in Residence*

### Associate Professor of Clinical Anesthesiology

Judith E. Brill, M.D.

### Adjunct and Visiting Professors

Maurice Lippman, M.D., *Adjunct*  
Wilson C. Wilhite, Jr., M.D., *Visiting, Executive Vice Chair*

### Adjunct and Clinical Associate Professors

Richard Y. Chen, M.D., *Clinical*  
Carroll Dolan, M.D., *Clinical*  
Thomas M. Grove, M.D., *Clinical*  
Robert D. Kaufman, M.D., *Adjunct*  
George F. Khoury, M.D., *Clinical*  
Donald A. Kroll, M.D., Ph.D., *Clinical*  
Marie G. Kuffner, M.D., *Clinical*  
Jill L'Armand, M.D., *Clinical*  
Tai Shion Lee, M.D., *Adjunct*  
Anthony M. Nyerges, M.D., *Clinical*  
David F. O'Donnell, M.D., *Clinical*  
John W. Ritter, M.D., *Clinical*  
Harvey K. Rosenbaum, M.D., *Clinical*  
Naomi Saucier, M.D., *Clinical*  
Stanley S. Schneider, M.D., *Clinical*  
Young Zin Sohn, M.D., *Adjunct*  
Elaine C. Yang, M.D., *Adjunct*  
Fahimeh Ziadourad, M.D., *Clinical*

### Clinical Assistant Professors

Elizabeth Andersen, CRNA  
Corrie T.M. Anderson, M.D.  
Michelle Y.C. Braunfeld, M.D.  
Joseph L. Cadranet, M.D.  
Howard I. Chait, M.D.  
Linda S. Finander, CRNA, M.S.  
Peter J. Gesund, M.D.  
Gail S. Goldstein, M.D.  
Charles A. Griffis, CRNA, M.S.  
Dana L. Grogan, R.N., CRNA, M.S.  
Johnny R. Harrison, M.D.  
Richard B. Hoberman, M.D.  
Marshall B. Kaplan, M.D.  
Mary A. Keyes, M.D.  
Carol L. Mann, CRNA, M.S.  
Robert T. Naruse, M.D.  
Jeanette F. Peter, CRNA, M.Ed.  
Susheela Sangwan, M.D.  
Michael J. Sopher, M.D.  
Lynne G. Swain, CRNA, M.S.  
Barbara M. Van de Wiele, M.D.  
Ceil E. Vercellino, CRNA, M.S.  
Laura Wong, CRNA

## Scope and Objectives

The Department of Anesthesiology in the School of Medicine, in conjunction with the Los Angeles County Olive View-UCLA Medical Center, offers a program leading to the M.S. degree in Nurse Anesthesia. Administratively housed at the Olive View-UCLA Medical Center, the program trains qualified registered nurses in the specialty of anesthesiology and prepares graduates for the national certification examination for nurse anesthetists. Graduates attain a high level of clinical competence combined with an extensive body of didactic knowledge relevant to the specialty. The program is designed to lead to careers in the clinical practice of nurse anesthesiology, with the opportunity to participate in research in the area.

## Master of Science in Nurse Anesthesia

### Admission

The following admission requirements must be met:

- (1) A Bachelor of Science degree in Nursing or other appropriate undergraduate degree.
- (2) Graduation from an accredited nursing program satisfactory to the program and to the UCLA Graduate Division. You may be required to enroll in certain additional undergraduate courses prior to final consideration by the program.
- (3) Mandatory evidence of status as a registered nurse in the State of California.
- (4) Completion of a minimum of two years of experience as a graduate nurse in an acute care area of nursing, preferably an intensive care unit.
- (5) Professional and academic competence attested through three letters of recommendation.
- (6) Graduate Record Examination (GRE) General Test scores submitted to the program.

(7) Successful completion of the following undergraduate-level courses: (a) inorganic chemistry, organic chemistry, and biochemistry, (b) introductory physics, (c) biology, (d) anatomy, (e) physiology, (f) English, (g) psychology, (h) statistics, (i) a course in methods of research (highly recommended), and (j) conversational Spanish (highly recommended).

(8) Scholarship records satisfactory to the Graduate Division and the Nurse Anesthesia Program. Regular admission requires a 3.0 grade-point average; official transcripts must be sent directly to the program.

(9) Personal interview with the program admissions committee (by invitation only). It is recommended that you spend time observing students or practicing certified registered nurse anesthetists (CRNA) in the operating room prior to meeting formally with the committee. You should have an acceptable level of understanding of the roles and responsibilities of a CRNA at the time of interview.

(10) Proficiency in WordPerfect 5.1 or 6.0 and access to an IBM or compatible computer (with modem) for purposes of interdepartmental communication and academic assignments.

Separate applications must be filed with UCLA Graduate Application Processing and the Nurse Anesthesia Program. Applications are available from the Nurse Anesthesia Program, Olive View-UCLA Medical Center, P.O. Box 921750, Sylmar, CA 91392-1750, and are due by December 30 of the year prior to admission. Interviews are conducted and selections made in early spring.

### Foreign Language Requirement

There is no foreign language requirement for the M.S. degree.

### Course Requirements

A total of 36 units of coursework is required, 20 of which must be in graduate-level courses. Required courses include Anesthesiology 215A, 215B, 220, 221, 223, 225, 290, 597 or 598A, 598B, Education 210B, Physiology 100, and four units from the Anesthesiology 210A, 210B, 210C sequence.

Course 598B may be repeated twice, but only four units of 500-series courses may be applied toward the graduate course requirement. Letter grading may be used in 500-series courses.

Professional courses (22 units) are required for certification eligibility and graduation: Anesthesiology 400A through 400G, 401, 402A, 402B.

### Thesis Plan

If you elect this option, your thesis committee is established during the second year of the program. The thesis proposal is written and approved during Winter or Spring Quarter of your second year. You must complete a successful public oral defense of your thesis for graduation.

### Comprehensive Examination Plan

Students electing this option must demonstrate theoretic and clinical competence in the field. This option is generally recommended for students continuing to doctoral degree study. The oral examination is general in scope and may include information from all aspects of the curriculum. A written comprehensive examination is also required for course completion. Examinations are offered quarterly.

### Other Requirements

(1) You must complete all requirements for the Master of Science degree in a minimum of 10 terms, but no more than 12 terms, of consecutive full-time enrollment.

(2) The program does not discriminate on any basis unless a disability is determined by the admissions committee to preclude the safe clinical practice of anesthesia.

(3) You must complete a minimum of 550 cases as the primary anesthetist.

(4) You must meet all program requirements for graduation to qualify for the certification examination of the Council on Certification of Nurse Anesthetists.

### Graduate Courses

**210A. Chemistry and Physics of Nurse Anesthesia I (2 units).** Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Study of principles of chemistry and physics as applied specifically to practice of anesthesia. Mr. Griffis (F)

**210B. Chemistry and Physics of Nurse Anesthesia II (2 units).** Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of study of principles of chemistry and physics as applied specifically to practice of anesthesia. Mr. Griffis (F)

**210C. Chemistry and Physics of Nurse Anesthesia III (2 units).** Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of study of chemistry and physics as related to anesthesia management, with specific emphasis on biochemistry as related to acid-base balance and theories of narcosis. Mr. Griffis (F)

**215A. Pharmacology of Nurse Anesthesia I.** Lecture, four hours; discussion, one to two hours. Introduction to basic pharmacological principles as applied to administration of anesthesia. Study of uptake and distribution, mechanism of action, fate, and toxicology as related to anesthetic agents. Ms. Gold and the Staff (F)

**215B. Pharmacology of Nurse Anesthesia II.** Lecture/discussion. Study of pharmacology of adjunct drugs influencing anesthesia administration, including their uptake and distribution, mechanism of action, fate, biotransformation, and toxicology. Ms. Gold and the Staff (W)

**220. Respiratory Anatomy and Physiology for Nurse Anesthetists (2 units).** Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Study of structure and function of respiratory system, with emphasis on anatomy and physiology at cellular level. Ms. Mann (W)

**221. Cardiovascular Anatomy and Physiology for Nurse Anesthetists (2 units).** Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Integrated study of anatomy and physiology of cardiovascular system as related to management of anesthesia administration. Ms. Grogan (W)

**M222. Biological Control Systems.** (Same as Electrical Engineering M243.) Prerequisite: Electrical Engineering 141 or equivalent. Introduction to application of control theory to modeling and analysis of biological control systems, such as respiratory system, cardiovascular system, and neuromuscular system. Emphasis on solving problems of current interest in biomedicine.

**223. Anatomy and Physiology of Endocrine and Excretory Systems for Nurse Anesthetists (2 units).** Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Integrated study of endocrine and excretory systems as related to management of anesthesia administration. (Sp) Ms. Waugaman (W)

**225. Anatomy and Physiology of Nervous System for Nurse Anesthetists (2 units).** Lecture, two hours; discussion, one to two hours. Prerequisite: consent of instructor. Integrated study of anatomy and physiology of nervous system as related to management of anesthesia administration. Ms. Waugaman (W)

**290. Anesthesia Seminar for Nurse Anesthetists (2 units).** Discussion, two to three hours. Discussion of research methods, basic statistics, and critical scientific paper analyses in relation to anesthesia research and practice. Ms. Waugaman (F)

**400A. Basic Clinical Anesthesia for Nurse Anesthetists I (2 units).** Lecture, three hours; laboratory, 30 hours. Prerequisites: courses 402A, 402B. Correlation of techniques of anesthesia administration with basic science knowledge as applied in the clinical area with supervised practice. S/U grading. Ms. Vercellino (Sp)

**400B. Basic Clinical Anesthesia for Nurse Anesthetists II (2 units).** Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400A. Continuation of practice of techniques of anesthesia administration as applied in the clinical area with supervised practice. S/U grading. Ms. Vercellino (F)

**400C. Basic Clinical Anesthesia for Nurse Anesthetists III (2 units).** Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400B. Continuation of techniques of anesthesia administration as applied in the clinical area with supervised practice. S/U grading. Ms. Vercellino (W)

**400D. Clinical Anesthesia for Nurse Anesthetists IV (2 units).** Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400C. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading. Ms. Vercellino (W)

**400E. Clinical Anesthesia for Nurse Anesthetists V (2 units).** Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400D. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading. Ms. Vercellino (Sp)

**400F. Clinical Anesthesia for Nurse Anesthetists VI (2 units).** Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400E. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading. Ms. Vercellino (Sp)

**400G. Clinical Anesthesia for Nurse Anesthetists VII (2 units).** Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400F. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading. Ms. Vercellino (F)

**401. Legal Aspects and Bioethics (2 units).** Lecture, two hours; discussion, 30 minutes to one hour. Prerequisite: consent of department. Introduction to history, bioethics, and legal aspects of nurse anesthesia. Exploration of psychology related to the patient undergoing surgery and anesthesia. Ms. Waugaman (W)

**402A. Fundamentals of Anesthesia Practice for Nurse Anesthetists.** Lecture, four hours; discussion, one to two hours. Prerequisite: consent of instructor. Introduction to basic principles of anesthesia administration, including preanesthetic assessment, physical examination, techniques and procedures, and anesthesia for specialized techniques and surgery. (F)

**402B. Fundamentals of Anesthesia Practice for Nurse Anesthetists (2 units).** Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of techniques and procedures, and anesthesia for specialized techniques and surgery. (W)

**597. Preparation for M.S. Comprehensive Examination (2 units).** Prerequisite: consent of instructor. Opportunity to pursue comprehensive study in anesthesiology and related areas on individual basis, with opportunity for discussion of material with instructor. S/U grading. Ms. Waugaman (Sp)

**598A. Research in Anesthesia I (2 units).** Prerequisite: consent of instructor. Opportunity to pursue anesthesia research outlets for thesis preparation. Independent research of quality suitable for publication required. May be selected instead of oral comprehensive examination for completion of M.S. program. S/U grading. Ms. Waugaman (Sp)

**598B. Research in Anesthesia II (2 units).** Prerequisite: consent of instructor. Opportunity to pursue anesthesia research outlets for thesis preparation. Independent research of quality suitable for publication required. May be selected instead of oral comprehensive examination for completion of M.S. program. May be repeated twice for credit. S/U grading. Ms. Waugaman (F,W)

John J. Colicelli, Ph.D., *in Residence*  
Alexander van der Blik, Ph.D.  
Geraldine A. Weinmaster, Ph.D.

### Adjunct Professor

William T. Wickner, M.D.

### Instructor

Felice D. Kurtzman, M.P.H.

## Scope and Objectives

The biological chemistry graduate program prepares students for careers as independent research scientists and scholars. Laboratory research is the central element. Biological chemistry has grown to include studies of cellular, molecular, and developmental biology, molecular genetics and genetic engineering, and many aspects of the health sciences. The research activities of the department include these areas as well as the "classic" topics of metabolism, enzymology, and biomolecular structure. Courses and seminar programs are designed to provide students with the necessary background and approach to encourage their continuing growth in these rapidly changing areas of science.

Interaction with other graduate programs provides access to scientists in a variety of related disciplines. Through its primary affiliation with the School of Medicine, the department is also involved in the basic education of students who will be physicians, dentists, and other health professionals. Many of these students become involved in laboratory research in the department. In part because of this breadth of experience students find careers in many aspects of basic and applied scientific research and education. The department emphasizes study for the Ph.D., but candidates for the M.S. degree may be accepted under special circumstances.

## Requirements for Graduate Degrees

### Admission

Admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280.

Under special circumstances, new Ph.D. students may be admitted directly to the department, in which case the following criteria apply. In addition to the University's minimum requirements, which include a bachelor's degree (preferably in chemistry or a biological science), students should normally have completed the following: general chemistry, quantitative chemistry, organic chemistry (with laboratory), general physics, mathematics through calculus, and general biology (or bacteriology, botany, zoology, biochemistry, or molecular biology). More advanced courses in these areas are also recommended where possible.

You are expected to take the Graduate Record Examination (GRE) General Test, preferably in October or before, but no later than December of the year prior to expected admission. It is strongly recommended that you also take the

GRE Subject Test in either Biology, Chemistry, or Biochemistry. In exceptional circumstances, the GRE test requirements may be waived by the departmental graduate admissions committee. If your native language is other than English, you are expected to take an appropriate examination which tests proficiency in English (e.g., TOEFL) prior to the time of application to this department.

There is no separate application form required for admission to the department, but at least three letters of recommendation are required. Have them sent directly to the Graduate Information Office at the address below.

Departmental brochures and information may be obtained by writing to the Graduate Information Office, Department of Biological Chemistry, 33-257 CHS, UCLA, Los Angeles, CA 90024-1737.

### Course Requirements

All graduate students must take the three core courses (Biological Chemistry M248 or M255, CM253, and CM267) unless excused by the graduate adviser. (See additional course requirements under each degree program.)

## Master of Science Degree

### Course Requirements

In addition to the core course requirements described above for all students, elective courses must be taken to complete the total of nine courses (36 units) required for the degree.

No more than two courses (eight units) in the 500 series may be applied toward the total course requirement, and only one (four units) of the two courses may be applied toward the minimum graduate course requirement (20 units) for the degree.

With consent of the graduate adviser, Biological Chemistry 596, 597, and 598 may be taken if they are appropriate to your program. Course 596 is graded on an S/U or letter basis; 597 and 598 are graded S/U only.

### Comprehensive Examination Plan

In general, the department prefers students to enter directly into the Ph.D. program, but if you enter the master's program, the comprehensive examination plan is preferred. Only in exceptional situations is a student approved for the thesis plan. In either plan you must pass the departmental written examination after completing the course requirements. This examination is formulated by the departmental graduate student guidance committee from questions submitted by the various faculty members, who also evaluate your answers to the questions. The committee evaluates your overall performance on the examination. Only course requirements and the written examination are needed to complete the comprehensive examination plan.

## Thesis Plan

In addition to coursework, a written thesis is required. A thesis committee helps you plan the thesis research, determines the acceptability of the thesis, administers a final examination (if deemed appropriate), and recommends appropriate action on the granting of the degree. In the event of an unacceptable thesis or performance on the final examination (if one is given), the thesis committee determines if it is appropriate for additional time to be granted to rewrite the thesis or to be reexamined.

## Ph.D. Degree

### Admission

Admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences. Under special circumstances, students may be admitted directly to the department.

### Course Requirements

In addition to the general course requirements listed above, students in the Ph.D. program are expected to complete

(1) Research in a laboratory of your choice through UCLA ACCESS each term during your first year.

(2) A total of six units of elective courses in addition to the core courses described above. One of the courses must be a scientific language/instrumentation course (e.g., computer language, statistics, electron microscopy). Elective courses may be selected from those offered by any department.

(3) Courses 596, 597, and/or 599 during terms in which research (596, 599) or study for written or oral examinations (597) is part of your program. Course 599 is for students who have passed their oral examinations; course 596 is for those who have not.

### Teaching Experience

All students in the doctoral program are expected to participate in teaching activities by assisting the faculty in a laboratory for medical students (usually one day a week for one term during the second year) and in one undergraduate course offered by the College of Letters and Science in the third year.

### Qualifying Examinations

The departmental written examination consists of writing two research proposals, one covering your thesis project and one covering a hypothetical proposal unrelated to your thesis project. The University Oral Qualifying Examination, which must be passed before you can be advanced to candidacy, consists of the presentation and defense of the two written proposals. The doctoral committee determines whether you pass both examinations and whether reexamination is allowed in case of failure. The examinations may be repeated only once. It is expected that both examinations will be completed by the beginning of your third year of graduate work.

## Final Oral Examination

The doctoral committee may elect to waive the final oral examination.

## Articulated Degree Program

Students may apply for the M.D./Ph.D. program by making simultaneous application for graduate standing in this department and for admission to the School of Medicine. Acceptance by both of the concerned units is necessary. Certain changes in the requirements (e.g., fewer required courses) allow some savings in time compared to separate M.D. and Ph.D. degrees.

## Upper Division Courses

**CM153G. Macromolecular Structure (6 units).** (Same as Chemistry CM153G.) Lecture, five hours. Prerequisites: Chemistry 110A, 153A, 153B, 153C, 156, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253. Mr. Eisenberg, Mr. Glitz (F)

**CM159A. Mechanisms in Regulation of Transcription I (2 units).** (Same as Chemistry CM159A.) Lecture, four hours; outside study, two hours. Prerequisites: Chemistry 153B and 154, or consent of instructor. Not open to graduate students. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM259A. P/NP or letter grading. Mr. Gralla (Sp, first five weeks)

**CM159B. Mechanisms in Regulation of Transcription II (2 units).** (Same as Chemistry CM159B.) Lecture, four hours; outside study, two hours. Prerequisite: course CM159A. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading. Mr. Courey (Sp, second five weeks)

**CM169. Macromolecular Metabolism and Subcellular Organization (6 units).** (Same as Biology CM169.) Lecture, five hours. Prerequisites: Chemistry 153A, 153B, 153C, consent of instructor. Recommended: course CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM267. Mr. McEntee and the Staff (W)

**195. Current Research in Biological Chemistry (2 units).** Prerequisites: upper division standing, consent of instructor (based on personal interview). Readings, discussion of current research results, and presentation of recent literature on topics under investigation within a research group in biological chemistry. P/NP or letter grading. (F,W,Sp)

**199. Directed Individual Research Studies in Biological Chemistry (2 to 8 units).** Laboratory, four to 20 hours. Prerequisites: upper division standing, consent of instructor (based on written research proposal and consultation with instructor). Individual research projects carried out under direction of a faculty member. P/NP or letter grading. (F,W,Sp)

## Graduate Courses

**201A-201B. Biological Chemistry (5 units each).** Prerequisites: organic chemistry; consent of instructor required for nonmedical students. Primarily for first-year medical students and runs throughout School of Medicine's second semester. General biochemistry with emphasis on mammalian systems. Structure, function, and metabolism of major cellular components. To receive credit, both courses must be taken together in same academic year. In Progress and S/U grading. (W,Sp)

**204. Biological Chemistry Laboratory (3 units).** Discussion, one hour; laboratory, six hours. Prerequisite: consent of instructor required for nonmedical students. Experiments illustrating techniques and procedures in medically related biochemistry; analysis of experimental results. S/U or letter grading. Mr. Edmond, Mr. Rome, and the Staff (Sp, eight weeks)

**205. Biological Chemistry and Nutrition Lecture (Dental Students) (6 units).** Lecture, six hours; computer laboratory. Prerequisite: dental student standing. Biochemical and genetic factors influencing normal and disease states: structure and metabolism of cellular constituents, intermediary metabolism and its regulation, endocrine and neurobiochemical mechanisms, connective tissue/mineralization. Includes computer laboratory and self-instruction on dietary assessment in dentistry. Ms. Zamenhof and the Staff (F)

**220A-220B-220C. Research Laboratory Rotations (2 to 8 units each).** Prerequisite: consent of instructor. Students arrange apprenticeships in laboratories of one or more departmental faculty members and engage in a research project under close faculty direction. Allows students to acquire in-depth laboratory experience in specific research areas and facilitates an informed decision on their part in selection of thesis/research adviser. S/U or letter grading. Mr. Edwards, Mr. Payne, and the Staff (F, 220A; W, 220B; Sp, 220C)

**M221. Cellular and Molecular Neurochemistry.** (Formerly numbered M221A.) (Same as Anatomy M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effecter coupling. S/U or letter grading. Mr. de Vellis, Mr. Olsen (W)

**M223. Membrane Molecular Biology (6 units).** (Same as Physiology M223.) Lecture, five hours. Prerequisites: course CM253 or consent of instructor, graduate or selected upper division undergraduate standing. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling.

**M233. Principles, Practices, and Policies in Biotechnology (2 units).** (Same as Biology M233, Chemical Engineering M233, Chemistry M233, Microbiology M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading. Mr. Fox, Ms. Morrison

**M248. Molecular Genetics.** (Same as Biology M248 and Microbiology M248.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in biochemistry and molecular biology. Topics include mutagenesis, mutant selection, recombination, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.

Mr. Johnson and the Staff (Sp)

**251A-251B-251C. Seminars: Transcriptional Regulation (2 units each).** Prerequisite: consent of instructor. Advanced courses on mechanics of gene transcription in both eukaryotes and prokaryotes intended for students actively working or highly interested in transcription. S/U or letter grading.

Mr. Carey

**CM253. Macromolecular Structure (6 units).** (Formerly numbered M253.) (Same as Chemistry CM253.) Lecture, five hours. Prerequisites: Chemistry 110A, 153A, 153B, 153C, 156, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G.

Mr. Eisenberg, Mr. Glitz, and the Staff (F)

**M255. Biological Catalysis.** (Same as Biology CM252, Chemistry CM255, and Pharmacology M255.) Prerequisites: Biology 100A, 100B, Chemistry 110A, 153A, 153B, or equivalent, consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Mr. Cho, Mr. Fukuto, Mr. Sigman (W)

**M257. Physical Chemistry of Biological Macromolecules (2 units).** (Same as Chemistry M257.) Prerequisites: Chemistry 110A and 153A, or consent of instructor. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.

Mr. Eisenberg and the Staff

**CM259A. Mechanisms in Regulation of Transcription I (2 units).** (Same as Chemistry CM259A.) Lecture, four hours; outside study, two hours. Prerequisite: course CM253 or CM267 or consent of instructor. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM159A. In Progress grading (credit to be given only on completion of course CM259B).

Mr. Gralla (Sp, first five weeks)

**CM259B. Mechanisms in Regulation of Transcription II (2 units).** (Same as Chemistry CM259B.) Lecture, four hours; outside study, two hours. Prerequisite: course CM259A. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM159B.

Mr. Courey (Sp, second five weeks)

**M263. Metabolism and Its Regulation.** (Same as Chemistry M263.) Lecture, three hours. Prerequisites: courses 201A-201B, or Chemistry 153B, 153C, or 156, and 110A, or equivalent, or consent of instructor. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

**M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics (2 units each).** (Same as Chemistry M264A-M264B-M264C.) Prerequisite: consent of instructor. Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

Mr. Schumaker (F, M264A; W, M264B; Sp, M264C)

**M266A-M266B-M266C. Seminars: Molecular Embryology (2 units each).** (Same as Biology M266A-M266B-M266C.) Prerequisite: consent of instructor. Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

Mr. De Robertis, Mr. Zipursky

**CM267. Macromolecular Metabolism and Subcellular Organization (6 units).** (Formerly numbered M267.) (Same as Biology CM223 and Chemistry M267.) Lecture, five hours. Prerequisites: Chemistry 153A, 153B, 153C, consent of instructor. Recommended: course CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM169.

Mr. McEntee and the Staff (W)

**M298. Seminar: Current Topics in Molecular Biology (2 units).** (Same as Biology M298, Chemistry M298, Microbiology M298, and Immunology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

**596. Directed Individual Study and Research (2 to 12 units).** Hours to be arranged. Prerequisite: consent of instructor. S/U or letter grading.

**597. Preparation for Examinations (2 to 4 units).** Prerequisite: consent of graduate adviser. Individual study for Ph.D. qualifying examinations or M.S. comprehensive examination. S/U grading.

**598. Preparation of M.S. Thesis.** Prerequisite: consent of graduate adviser. Preparation of research data and writing of M.S. thesis. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units).** Prerequisite: consent of graduate adviser. Preparation of research data and writing of Ph.D. dissertation. S/U grading.

## Biomathematics

AV-617 Center for the Health Sciences, (310) 825-5018

### Professors

Abdelmonem A. Afifi, Ph.D.  
Robert M. Elashoff, Ph.D., *Interim Chair*  
H.K. Huang, D.Sc.  
Robert I. Jennrich, Ph.D.  
Kenneth L. Lange, Ph.D.  
Carol M. Newton, M.D., Ph.D.  
Michael E. Phelps, Ph.D.  
Wilfrid J. Dixon, Ph.D., *Emeritus*

### Associate Professors

Karim F. Hirji, Ph.D., *in Residence*  
Elliot M. Landaw, M.D., Ph.D., *Vice Chair*  
Nathaniel Schenker, Ph.D.

### Assistant Professor

A. James Sneyd, Ph.D.

### Lecturer

Jeffrey Gornbein, Ph.D.

### Adjunct Professors

Janet D. Elashoff, Ph.D.  
Alan B. Forsythe, Ph.D.  
Arthur Peskoff, Ph.D.

### Adjunct Assistant Professors

Eli Engel, M.D., Ph.D.  
Janet S. Sinsheimer, Ph.D.

## Scope and Objectives

As biology advances rapidly in quantitative research methods, both the need for and possibility of closely associated theoretical research increases. On numerous medical and medical science frontiers — such as genetics, molecular biology, oncology, pharmacology, neurosciences, and physiology — biomathematics is contributing both in its basic research and the development of specialized computer software to support investigation and health care. UCLA has one of the few departments in this relatively new, rapidly evolving field.

The Department of Biomathematics welcomes both undergraduate and graduate students in other majors to its courses in biomedical computing, modeling, and statistics. Premedical majors with mathematical/computer interests can receive early guidance toward an M.D./Ph.D. program in Biomathematics. The department is responsible for statistical and biomathematical training in the medical curriculum.

The department's orientation is away from abstract modeling and toward theoretical research vital to the advancement of current biomedical research frontiers. The doctoral program reflects this in requirements for advanced training in a biomedical research specialty and for the mathematical and computing skills required to contend realistically with complex phenomena encountered in biology and medicine. The art of biomathematical research is developed individually from the first year on. The master's program adapts to the various needs of researchers desiring supplemental biomathematical training, people preparing to provide methodological support to researchers in biology or medicine, or students pursuing a stepwise approach to graduate training in biomathematics.

## Requirements for Graduate Degrees

### Admission

High academic achievement in one scientific or mathematical field is required. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) should be taken. At least three letters of recommendation are required from faculty competent to evaluate your qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the UCLA Graduate Application Processing forms, you are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to the Chair, Graduate Admissions Committee, Department of Biomathematics, AV-617 CHS, UCLA, Los Angeles, CA 90024-1766.

You are admitted to either the M.S. or Ph.D. program after you have achieved admission to the Graduate Division and have been approved by the departmental graduate admissions committee.

## Master of Science Degree

### Course Requirements

You must complete five graduate-level courses in biomathematics, three of which must be selected from Biomathematics 201, 202, 203, 204. If you successfully completed any of the five courses as an undergraduate, you may petition the department to apply them toward this requirement of specific background in biomathematics, but in accord with Academic Senate regulations they cannot be applied toward the minimum requirements stated below for the master's degree.

A minimum of nine upper division and graduate courses (36 units) taken in graduate standing is required for the degree, at least five (20 units) of which must be at the graduate level. No more than two 596 courses may be applied toward the required nine courses, and none may be applied toward the graduate course requirement.

### Thesis Plan

You generally are required to follow the comprehensive examination plan. Permission to undertake a thesis plan must be given by the departmental advisory committee, which must approve the thesis committee, as well as your plans for the thesis.

### Comprehensive Examination Plan

A written comprehensive examination administered by a faculty committee appointed by the chair, with approval of the advisory committee, covers material presented in your coursework. This is usually the written comprehensive examination for the doctoral program given during the summer, but in exceptional cases a special committee and written examination are provided.

## Ph.D. Degree

### Major Fields or Subdisciplines

Each student completes the requirements for a field of special emphasis in biology. Presently approved fields of special emphasis for which courses of study have been developed include genetics, immunology, molecular biology, neurosciences, pharmacology, and physiology. Others may be added in response to students' requests.

## Course Requirements

The following courses are required:

*Biomathematics* — 201, 202, 203, 204, and eight units from 205, 206, 207, 208A.

*Mathematics* — Five graduate courses with a grade-point average of 3.6 or better from an approved list, with two substitutions possible if especially appropriate to your research field. (Consent may be given by the advising committee to count prior graduate courses for full or partial completion of this requirement.)

*Biology* — Courses required for the field of major biological emphasis.

*Independent Research* — Each student is encouraged to take at least four units of Biomathematics 596 with a member of the Biomathematics Department each year prior to taking the written comprehensive examination. As you progress, there is increasing emphasis on research and encouragement to publish. Failure to advance in capacity for independent, creative research is a primary indication for recommended withdrawal from the program.

The following courses are recommended:

*Mathematics* — By individual study or coursework, you should have strength in differential equations, probability and statistics, and real and complex analysis. Offerings in the Department of Mathematics are especially recommended.

*Statistics* — Additional training in biostatistics is highly recommended (see offerings in the School of Public Health).

*Computer Methods* — You must be a facile programmer and acquainted with numerical methods needed for your area of research. The numerical analysis sequence in the Department of Mathematics and computing courses in biomathematics are suggested.

*Biology and Biological Chemistry* — A broad background is expected, from molecular to organ-system levels. This probably will be provided in requirements for the field of major biological emphasis; supplemental coursework will be advised, if needed.

### Teaching Experience

One teaching preceptorship (Biomathematics 596) is required. You participate fully in the planning and delivery of one course in the Biomathematics Department. The emphasis is on your training in all aspects of preparing for and offering a course; this is not a service-oriented teaching assistantship.

### Qualifying Examinations

In the summer, the department offers a written comprehensive examination to test your competence in biomathematics. Full-time students must take this by the end of two academic years of study and part-time students by the end of three.

The qualifying examination in the field of major biological emphasis usually is the regular comprehensive examination for doctoral students in that field and is taken prior to the examination that advances them to candidacy. Students entering with a Ph.D. in a biological field are exempt from the above requirements. Students with an M.D. are exempt from the required coursework; exemption from the examination may be granted by the advising committee in consultation with advisers from the specialty area.

The University Oral Qualifying Examination, administered by the doctoral committee appointed by the dean of the Graduate Division, critically probes the quality, scope, and feasibility of your proposed dissertation work. It explores the integration and strength of biomathematical, mathematical, and biological expertise in your intended area of research. You advance to candidacy after passing this examination.

### Final Oral Examination

A final oral examination is required of all candidates and is a defense of the dissertation, administered by the doctoral committee.

## Upper Division Courses

**106. Introduction to Cellular Modeling.** Lecture, four hours; computer laboratory, two hours. Prerequisites: Mathematics 32A, some computer programming, consent of instructor (undergraduates). Designed for upper division science majors and biomedical graduate students. Introduction to modeling cells and cell systems, including intracellular biochemical networks, applications to cancer research. How to develop one's own computer models using IMSL mathematics subroutines. Ms. Newton (W)

**108. Introduction to Modeling in Neurobiology.** Lecture, four hours; computer laboratory, two hours. Prerequisites: Mathematics 32A, some computer programming, consent of instructor (undergraduates). Designed for upper division science majors and biomedical graduate students. Survey of wide variety of topics in neurobiological modeling, current neuronal modeling systems. Development of skills to formulate and program one's own studies using IMSL mathematics subroutines. P/NP or letter grading. Ms. Newton (Sp)

**110. Elements of Biomathematics.** Lecture, three hours; laboratory, three hours. Prerequisite: calculus. Analysis of deterministic models. Conditions under which deterministic and probabilistic descriptions of biological phenomena are appropriate. Both approaches are applied to selected examples in physiology and biology. Mr. Engel (F)

**M153A-M153B. Introduction to Computational Statistics.** (Same as Biostatistics M153A-M153B and Statistics M153A-M153B.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

Mr. Jennrich (F, M153A; W, M153B)

**160. Introductory Biomathematics for Medical and Biological Research.** Lecture, four hours; discussion, 90 minutes. Elementary statistics course that focuses on statistical concepts and critiques the literature, with emphasis on clinical research. Output from statistical computer packages discussed in class, but students do not use the computer themselves. Topics include descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination, article interpretation. (W)

**170A. Computer-Based Introductory Biomathematics for Medical and Biological Experimenters.** Lecture, four hours; discussion, 90 minutes. Intensive elementary statistics course emphasizing design of experiments and analysis of data using statistical packages. Statistical topics similar to course 160 — descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination — but students also shown how to use the computer and run statistical software packages. Practical aspects of data collection and cleaning. (F)

**170B. Statistical and Mathematical Modeling in Medical and Biological Research.** Lecture, four hours; discussion, 90 minutes. Second course in biomathematical methods. Topics include randomization methods, intermediate experimental design, contingency table analysis, analysis of variance, multiple linear regression, nonlinear regression, methods of classification, model checking, basic mathematical models including compartment models, and statistical computer software. Students have opportunity to design their own experiments and analyze them on the computer, and to analyze previously collected data. (Sp)

**172. Clinical Trials.** Lecture, three hours; discussion, two hours. Prerequisite: Biostatistics 100C or 100D or Statistics 152B or equivalent. Topics include steps in bringing a possible therapy to clinical use; design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, stratification, and points; ethics of human experimentation; informed consent; three phases of human studies; indications for various types of controls, prognostic factors, survivorship studies, design of prognostic studies; organization of a clinical trial — administration, comparability, protocols, nursing and clinical standards, data collection and management. Mr. Elashoff (W)

**190HA-190HB. Honors Research in Biomathematics.** Prerequisites: upper division standing, consent of instructor and department chair. Individual research in some aspect of biomathematics designed to acquaint students in depth with mathematical models and computer applications in biology. Must be taken for at least two terms and for a total of at least eight units. Thesis required. (F,W,Sp)

**199. Special Studies in Biomathematics (2 to 8 units).** Prerequisites: upper division standing, consent of instructor. Special studies in biomathematics, including either reading assignments or laboratory work or both, designed for proper training of students. (F,W,Sp)

## Graduate Courses

**200. Research Frontiers in Biomathematics (2 units).** Prerequisite: consent of instructor. Series of presentations by faculty members on research frontiers in biomathematics. S/U grading. (F, even years)

**201. Deterministic Models in Biology.** Prerequisite: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physiological control systems, and cellular/animal population models. Ms. Newton (F)

**202. Fourier Analysis in Biology.** Prerequisite: knowledge of calculus, linear algebra, and probability. Introduction to theory of Fourier transforms and Fourier series from point of view of generalized functions. Elementary applications to differential equations, quantum mechanics, image reconstruction, X-ray crystallography, branching processes, and time series. Brief review of computational techniques based on fast Fourier transform. Mr. Lange (W)

**203. Stochastic Models in Biology.** Prerequisite: Mathematics M150A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and a variety of other biological and medical disciplines. Mr. Lange (Sp)

**204. Biomedical Data Analysis.** Prerequisite: consent of instructor. Quantity and quality of observations have been greatly affected by present-day extensive use of computers. Problem-oriented study of latest methods in statistical data analysis and use of such arising in laboratory and clinical research. Ms. Sinsheimer (W)

**205. Electric Potential Problems in Membranes, Cells, and Tissues.** Prerequisite: knowledge of differential equations and electrostatics, or consent of instructor. Review of electrostatics; potential problems in rectangular, spherical, and cylindrical coordinates; modeling subthreshold electrical properties of cells; microelectrode measurements of intracellular potentials; boundary conditions for current flow across membranes; eigenfunction expansions and singular perturbation analysis of intracellular and extracellular potential distribution in spherical and cylindrical cells and syncytia; computation of potential barriers for ions traversing a membrane pore. Mr. Peskoff (Sp)

**206. Introduction to Mathematical Oncology.** Lecture, four hours; computer laboratory, two hours. Prerequisites: ordinary, partial differential equations, and one computer programming course or consent of instructor. Deterministic and stochastic modeling of cell metabolism, colony growth, and responses to radio-, chemo-, and immuno-therapeutic agents applied to carcinogenesis, therapy, emergence of resistance to therapy. Simulation, optimization methods introduced. Current literature review. S/U or letter grading. Ms. Newton (W)

**207. Models in Genetics.** (Formerly numbered 207A, 207B.) Lecture, three hours; discussion, one hour. Prerequisite: upper division probability and statistics; knowledge of basic genetics principles helpful. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. Content varies from year to year. (F, odd years)

**208A. Modeling in Neurobiology for Mathematicians.** (Formerly numbered 208.) Lecture, four hours; laboratory, two hours. Prerequisites: introductory ordinary, partial differential equations, programming experience. Introduction to electrochemical bases for nerve function and mathematical and computational methods for studying this, appropriate for physicists, engineers, and mathematicians. Survey of current leading research areas and software systems. S/U or letter grading. Ms. Newton

**208B. Modeling in Neurobiology for Biologists.** (Formerly numbered 208.) Lecture, four hours; laboratory, two hours. Prerequisites: lower division calculus, some elementary programming experience. Introduction to neuronal modeling, including how to formulate models and study them with existing computer software (e.g., NODUS) or one's own simple programs that use IMSL subroutines. Survey of current leading research areas. S/U or letter grading. Ms. Newton

**211. Advanced Topics in Differential Equation Modeling in Biology.** Prerequisite: course 201 or consent of instructor. Advanced topics in mathematical physiology, population biology, pattern formation, and biological excitable systems. Analytical and numerical approaches. Taught from research papers. S/U or letter grading. Mr. Sneyd (Sp)

**220. Kinetic and Steady State Models in Pharmacology and Physiology.** Recommended: knowledge of linear algebra, differential equations, and statistics. Designed for biologists and theoreticians. Modeling and data analysis in pharmacokinetics, enzyme kinetics, and endocrinology. Topics include compartmental and noncompartmental approaches, steady state analysis of transport and binding processes, and optimal experiment design. Mr. Landaw (Sp)

**M230. Computed Tomography: Theory and Applications.** (Same as Radiological Sciences M230.) Prerequisite: consent of instructor. Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications. Mr. S.C. Huang (W)

**M231. Statistical Methods for Categorical Data.** (Same as Biostatistics M210.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 100B or 110B, Statistics 152C or equivalent. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations. Mr. Hirji (Sp)

**M232. Statistical Analysis of Incomplete Data.** (Same as Biostatistics M232.) Lecture, three hours; discussion, one hour. Prerequisite: Statistics 152C or equivalent. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading. (Sp, odd years)

**M234. Applied Bayesian Inference.** (Same as Biostatistics M234.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 200C, Statistics 152C. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

**M270. Optimal Parameter Estimation and Experimental Design for Biomedical Systems.** (Same as Computer Science M296B and Medicine M270D.) Lecture, four hours; outside study, eight hours. Prerequisite: Computer Science M296A or consent of instructor. Estimation methodology and model parameter estimation algorithms for quantifying (fitting) dynamic system models to real-world data. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on data sampling schedule design. Exploration in PC laboratory of applications software for model building and optimal experiment design. Mr. Landaw

**M280. Statistical Computing.** (Same as Biostatistics M280 and Mathematics M280.) Lecture, three hours. Prerequisites: Mathematics 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Mr. Jennrich (F)

**M281. Survival Analysis.** (Same as Biostatistics M215.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 110B, Statistics 152C. Statistical methods for analysis of survival data. S/U or letter grading. Mr. Elashoff (F)

**M282. Analysis of Repeated Measures Designs (5 units).** (Same as Biostatistics M236.) Lecture, four hours; discussion, two hours. Prerequisites: Biostatistics 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading. Mr. Elashoff (Sp)

**596. Directed Individual Study or Research in Biomathematics (2 to 12 units).** Individual study on topics not yet covered by offerings of department. May be repeated for credit with topic change. (F,W,Sp)

**597. Preparation for M.S. or Ph.D. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).** Prerequisite: consent of graduate adviser. Individual study. S/U grading. (F,W,Sp)

**599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units).** Prerequisite: consent of instructor. S/U grading.

## Medicine

37-120 Center for the Health Sciences, (310) 825-6275

### Chairs

Alan M. Fogelman, M.D. (*William S. Adams, M.D., Professor of Medicine, Senior Chair*)  
Robert K. Oye, M.D., *Vice Chair, Clinical Affairs*  
Dennis J. Slamon, M.D., *Vice Chair, Finance*  
Mary C. Territo, M.D., *Vice Chair, Academic Affairs*  
Jan H. Tillisch, M.D., *Vice Chair, Education and Administration*

### Scope and Objectives

The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught *information acquisition* through history taking, physical examination, and laboratory evaluation; *information synthesis* through achieving a differential diagnosis and evaluative plan; and *medical decision making* for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

Instruction in the department is provided in the second, third, and fourth years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based internal medicine at all the major affiliated centers.

For further details on the Department of Medicine and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

### Upper Division Course

**199. Special Studies (2 to 8 units).** Prerequisite: consent of instructor. Individual projects carried out under direction of a faculty member. Special studies in medicine with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

## Microbiology and Immunology

43-118 Center for the Health Sciences, (310) 206-5148

### Professors

Rafi Ahmed, Ph.D. (*Virology*)  
Benjamin Bonavida, Ph.D. (*Immunology*)  
Irvin S.Y. Chen, Ph.D. (*Virology*)  
Asim Dasgupta, Ph.D. (*Virology*), *Vice Chair for Academic Affairs and Graduate Adviser*  
John L. Fahey, M.D. (*Immunology*)  
Sydney M. Finegold, M.D., *in Residence* (*Bacteriology*)  
Sidney H. Golub, Ph.D. (*Immunology*)  
Marcus A. Horwitz, M.D. (*Bacteriology*)  
Dexter H. Howard, Ph.D. (*Mycology*)  
Michael Lovett, M.D., Ph.D. (*Bacteriology*)  
Robert L. Modlin, M.D. (*Immunology*)  
Debi P. Nayak, B.V.Sc., Ph.D. (*Virology*)  
Larry Simpson, Ph.D. (*Parasitology*)  
Jack G. Stevens, D.V.M., Ph.D. (*Virology*; *M. Philip Davis Professor of Microbiology and Immunology*), *Chair*  
Ronald H. Stevens, Ph.D. (*Immunology*)  
Jerrold A. Turner, M.D. (*Parasitology*)  
Randolph Wall, Ph.D. (*Immunology*)  
Felix O. Wettstein, Ph.D. (*Virology*), *Vice Chair for Administration*  
Ruth A. Boak, M.D., Ph.D., *Emerita*  
James N. Miller, Ph.D., *Emeritus* (*Distinguished Teaching Award*)  
Margret I. Sellers, Ph.D., *Emerita* (*Distinguished Teaching Award*)  
Henry E. Weimer, Ph.D., *Emeritus*  
Telford H. Work, M.D., M.P.H., D.T.M.&H., *Emeritus*  
Stephen Zamenhof, Ph.D., *Emeritus*

### Associate Professors

David A. Campbell, Ph.D. (*Parasitology*)  
Lawrence T. Feldman, Ph.D. (*Virology*)  
Mitchell Kronenberg, Ph.D. (*Immunology*)  
Otoniel Martinez-Maza, Ph.D. (*Immunology*)

### Assistant Professors

Patricia J. Johnson, Ph.D. (*Parasitology*)  
Andrew H. Kaplan, M.D. (*Virology*)  
M. Carrie Miceli, Ph.D. (*Immunology*)  
Jeffery F. Miller, Ph.D. (*Bacteriology*)  
Olaf Schneewind, M.D. (*Bacteriology*)  
Stephen T. Smale, Ph.D. (*Immunology*)

### Lecturers

Margery L. Cook, Ph.D. (*Virology*)  
Maurice L. White, Ph.D. (*Bacteriology*)

### Adjunct Professor

Lawrence M. Souza, Ph.D. (*Biotechnology*)

### Adjunct Assistant Professor

Betty Wu-Hsieh, Ph.D. (*Immunology/Mycology*)

### Scope and Objectives

The desire to explain natural phenomena, including disease, is the basis for most students' interest in biological sciences. The Microbiology and Immunology Department in the UCLA School of Medicine is disease oriented. The emphasis is on pathogenesis of infection, malignancy, and immunological response of the host to these changes of immunological dysfunction. All tools available from molecular biology to morphological methods are applied to these problems.

Microbiology and immunology are interwoven disciplines. Microbiology has played a central role in all aspects of biological sciences, including morphogenesis, genetics, developmental biology, physiology, biochemistry, and cell biology. An understanding of microbiology is thus fundamental to biological research. Immunology, once a branch of microbiology, is now a major biological discipline and a basic component of disease-oriented microbiology.

The graduate program in microbiology and immunology is closely associated with advanced (postdoctoral) training in research, clinical and public health diagnostic work, and industrial applications. Careers in microbiology and immunology include industrial appointments and clinical laboratory supervision in both government agencies and private enterprises, and academic positions.

### Master of Science Degree

The department does not accept students whose sole objective is a master's degree.

### Ph.D. Degree

#### Admission

In addition to the University minimum requirements, the following items are required:

- (1) A bachelor's degree with a major in either the biological or physical sciences.
- (2) At least a B+ in chemistry, physics, and mathematics; at least a B average in biology (upper division and prior graduate study).
- (3) Three favorable letters of recommendation.
- (4) Graduate Record Examination (GRE) General Test and Subject Test in Biology.
- (5) Acceptable statement of purpose.
- (6) An interview with members of the department graduate student committee when indicated.

For departmental brochures and/or application forms, write to the Graduate Student Office, Department of Microbiology and Immunology, 43-239 CHS, UCLA, Los Angeles, CA 90024-1747.

New Ph.D. students may also be admitted through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280.

### Major Fields or Subdisciplines

You are expected to be competent in both microbiology and immunology. However, you must do your thesis work in one of the following divisions: immunology, medical microbiology, or virology.

### Foreign Language Requirement

There is no foreign language requirement for the degree.

### Course Requirements

(1) Microbiology and Immunology 208, M226A-M226B, M285 are required and must be completed during your first year of study.

(2) Course 596 is required. You complete at least two laboratory rotations during your first year of study.

(3) Chemistry and Biochemistry CM253 and two courses in molecular biology (Microbiology and Immunology 250, 264) are required.

(4) Additional course requirements are determined by your major field and your preceptor.

### Teaching Experience

Teaching experience in one laboratory section of Microbiology and Immunology 201 and in one undergraduate course offered by the College of Letters and Science is required unless the requirement is waived by the graduate adviser.

### Qualifying Examinations

The departmental written qualifying examination may be taken at the end of your first year, but no later than Winter Quarter of your second year, of graduate study. The examination consists of written tests in all three areas of study (immunology, microbiology, and virology). You select one area as your major and the other two as your minor areas. The examination in microbiology (major or minor) covers the fields of bacteriology, and either mycology or parasitology. The examinations require factual knowledge, the ability to analyze experimental work, and the capacity to design problem-solving experiments and are graded on a pass/fail basis. Each examination may be repeated once if not passed. The makeup examination is administered no earlier than three months and no later than six months after the failure, unless specified remedial work requires a longer period for proper preparation.

You must complete the University Oral Qualifying Examination within three years (nine terms) after entering the program. Advancement to candidacy is awarded after successful completion of this examination. If inadequacies are encountered, you may be required to repeat the examination.

The topic of your research proposal must be in a different area and use a different approach from that of your thesis project and research, but within the fields of interest in the department. You must be able to explain the research and results and demonstrate general knowledge of microbiology and immunology.

### Dissertation/Final Oral Examination

The details of the dissertation requirement are supervised by your professor and doctoral committee. The dissertation must demonstrate an original and independent contribution to scientific knowledge acceptable for publication in a major scientific journal and be presented in the University-required format.

The final oral examination is optional with the doctoral committee. However, you are required to present a special seminar based on your dissertation.

### Upper Division Courses

**M185A. Immunology (5 units).** (Formerly numbered CM185.) (Same as Biology M185A and Microbiology M185A.) Lecture, three hours; discussion, 90 minutes; outside study, 1½ hours. Prerequisites: Biology 9, 100A, 108 or equivalent. Recommended prerequisites or corequisites: Biology 100B, Chemistry 153A, 153L. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cellular immune reactions. Mr. Clark, Mr. Sercarz (F)

**199. Directed Individual Research Studies in Microbiology and Immunology (2 to 8 units).** Prerequisites: senior standing, consent of instructor (based on written research proposal). Individual research projects carried out under direction of a professor. (F,W,Sp)

### Graduate Courses

Undergraduates may enroll in some graduate courses with consent of instructor.

**201. Microbiology and Immunology (8 units).** Lecture/laboratory. Limited to medical students. Study of infectious agents of human disease, with emphasis on host/parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites, and viruses, and principles of prevention, treatment, and laboratory diagnosis. (F)

**202A. Fundamentals of Immunology (2 units).** Prerequisite: consent of instructor. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cell-mediated immune functions. (F)

**202B. Medical Bacteriology (2 units).** Prerequisite: consent of instructor. Characteristics of bacteria rickettsiae and chlamydiae associated with diseases of humans; host/parasite interactions and immunity; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics as it pertains to pathogenicity. (F)

**202C. Medical Virology (2 units).** Prerequisite: consent of instructor. Biological properties of animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts, introduction to tumor viruses. (F)

**202D. Medical Mycology and Parasitology (2 units).** Prerequisite: consent of instructor. Morphology, physiology, and pathogenicity of fungi which cause human and animal diseases. Study of morphology, biology, host/parasite relationship, public health problems, and control of protozoa, helminths, and arthropods parasitic in and on humans and animals. (F)

**208. Molecular Biology of Animal Viruses.** Lecture, three hours. Prerequisites: courses in general biochemistry and general microbiology, including virology (consent of instructor may be obtained in special cases). Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Mr. Dasgupta (Sp)

**210. Medical Mycology (3 units).** Lecture, four hours. Prerequisite: consent of instructor. Study of morphology, physiology, and pathogenicity of fungi causing human and animal diseases. Mr. Howard (Sp)

**210L. Medical Mycology (2 units).** Laboratory, four hours. Prerequisite: consent of instructor. Required of undergraduate students. Laboratory application of principles discussed in course 210. Mr. Howard (Sp)

**M215. Interdepartmental Course: Tropical Medicine (2 units).** (Same as Medicine M215, Pathology M215, and Pediatrics M215.) Lecture, two and one-half hours. Prerequisites: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading. Mr. Turner (Sp, alternate years)

**M223. Membrane Research Seminar (2 units).** (Same as Microbiology M223.) Prerequisite: consent of instructor. Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit. Ms. Wisniewski (F,W,Sp)

**M226A-M226B. Principles of Microbial Pathogenesis.** (Same as Biology M226A-M226B and Microbiology M226A-M226B.) Lecture, one hour; discussion, three hours. Prerequisites: courses 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections. Mr. Ahmed (Sp, M226B), Mr. Miller (W, M226A)

**M233. Principles, Practices, and Policies in Biotechnology (2 units).** (Same as Biological Chemistry M233, Biology M233, Chemical Engineering M233, Chemistry M233, Microbiology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading. Mr. Fox, Ms. Morrison

**250. Cell and Molecular Biology.** Lectures and student seminar presentations. Review of selected current topics in molecular and cellular biology. Topics include recent experimental results on organization, expression, and regulation of genes in eukaryotic cells. S/U or letter grading. Mr. Wall (F)

**251. Selected Topics on History of Microbiology (2 units).** Lecture, one hour; discussion, one hour. Consideration of history of infectious diseases, their host/parasite relationships, etiology, pathogenesis, epidemiology, diagnosis, and immunity. S/U or letter grading. Mr. Howard (W)

**M252. Seminar: Microbial Pathogenesis (2 units).** (Same as Microbiology M252.) Prerequisite: consent of instructor. Limited to 10 students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

Mr. Miller, Ms. Miller

**M256. Seminar: Viral Oncology (2 units).** (Same as Pathology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

Mr. Baluda

**M258A. Molecular Genetic Mechanisms of Immune Response (2 units).** (Same as Biology M258A and Microbiology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course 202A or M285 or Biology CM185B or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of immune system, T cell antigen receptor, and loci affecting differentiation. S/U or letter grading. Mr. Kronenberg, Mr. Wall (W, five weeks)

**M258B. Biology of B Cells: Development, Repertoire, and Activation (2 units).** (Same as Biology M258B and Microbiology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course 202A or M285 or Biology CM185B or consent of instructor. Reading and discussion of current research articles on B cell development, repertoire, and growth and differentiative regulation. S/U or letter grading.

Mr. Braun, Mr. Stevens (W, five weeks)

**M258C. T Cells (2 units).** (Same as Biology M258C and Microbiology M258C.) Lecture, two hours; discussion, two hours. Prerequisites: course 202A, Biology CM185B. Reading and discussion of current research articles on molecular and cellular aspects of T cell function, including receptors and activation pathways, memory, tolerance, and specialized subjects and their functions.

Mr. Clark (Sp, five weeks)

**M258D. Molecular Interactions in Immune Responses (2 units).** (Same as Biology M258D and Microbiology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course 202A or M285 or Biology CM185B or consent of instructor. Reading and discussion of current research articles on immunochemistry of antibodies, antigens, and complement, antigenic recognition, antibody restriction. S/U or letter grading.

Ms. Morrison (F, five weeks)

**M258E. Immunopathology: Immunology of Disease (2 units).** (Same as Biology M258E and Microbiology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course 202A or M285 or Biology CM185B or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.

Mr. Porter (Sp, five weeks, alternate years)

**M258F. Immune Regulation (2 units).** (Same as Biology M258F and Microbiology M258F.) Lecture, two hours; discussion, two hours. Prerequisite: course 202A or M285 or Biology CM185B or consent of instructor. Reading and discussion of current research articles on idiotype networks, suppressor T cells, tolerance at T and B cell levels, and Ir gene control. S/U or letter grading.

Mr. Sercarz (F, five weeks)

**M260. Immunology Forum (2 units).** (Same as Microbiology M260.) Prerequisite: course M185A. Broad range of current topics in immunology presented and discussed at advanced frontier level. Continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U grading.

Mr. Kronenberg (F,W,Sp)

**M261. Molecular and Cellular Immunology.** (Same as Biology M261 and Microbiology M261.) Lecture, three hours; discussion, one hour. Prerequisite: Biological Chemistry CM253 or consent of instructors. Comprehensive graduate course covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. S/U or letter grading.

Mr. Kronenberg, Ms. Miceli, Mr. Smale

**M262A. Seminar: Current Topics in Immunobiology of Cancer (2 units).** (Same as Biology M293A and Microbiology M262A.) Prerequisite: consent of instructor. Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U grading.

Mr. Bonavida (F,W,Sp)

**M262B. Immunology of AIDS (2 units).** (Same as Biology M293B, Epidemiology M214, and Microbiology M262B.) Lecture, one hour; discussion, one hour. Prerequisites: courses 202A, 202B, 202C, 202D, M258B, M258C, or equivalent, consent of instructor. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.

Mr. Bonavida, Ms. Giorgi (W)

**M262C. Biological Individuality and Immunity (2 units).** (Same as Biology M293C and Microbiology M262C.) Prerequisite: course M258C. Review of current literature in the field of immunogenetics, with emphasis on fundamental studies involving genetic and immunologic principles and techniques. Selected topics discussed and results interpreted; conclusions and experimental methods evaluated.

(Sp, alternate years)

**M262D. Selected Topics in Immunology (2 units).** (Same as Biology M293D and Microbiology M262D.) Prerequisite: consent of instructor. Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

(F,W,Sp)

**M263. Molecular and Cellular Immunology Seminar (2 units).** (Same as Microbiology M263.) Prerequisite: consent of instructor. Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.

Mr. Kronenberg, Mr. Sercarz (F,W,Sp)

**264. Molecular Microbiology and Cell Biology (2 units).** Prerequisite: consent of instructor. Discussion of selected current topics related to microbiology and cell biology, with special emphasis on understanding of basic phenomena at the molecular level. S/U grading.

Mr. Smale (F)

**270. Immunology in Disease (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: basic immunology. Introduction to role of immune processes in disease for students with prior knowledge of basic immunology. Topics include immunodeficiency, immediate hypersensitivity reactions, autoimmune disease, and immune complex-mediated diseases, together with transplantation immunology, tumor immunology (re role of immunity in infection). Students prepare a 20- to 30-minute presentation on a selected topic.

Mr. Fahey (W, alternate years)

**274. Interactions of Immune System and Nervous System (2 units).** Lecture, one hour; discussion, one hour. Prerequisites: graduate or postdoctoral standing in immunology, behavioral sciences, or neurosciences, consent of instructor. Limited to 10 students. Study of existing knowledge of interrelationships between central and peripheral nervous system and immune system. Review of research on central nervous system effects on immune function and vice versa, as well as human and animal studies linking stress to immune changes.

Mr. Fahey, Ms. Kemeny

**M275. Biology of HIV.** (Same as Epidemiology M228.) Lecture, three hours. Prerequisites: Biostatistics 100A and Epidemiology 100 or equivalent, two biology courses, consent of instructor. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory.

Ms. Giorgi (Sp)

**M285. Intermediate Immunology.** (Formerly numbered M285B.) (Same as Biology CM285 and Microbiology CM285.) Lecture, three hours; discussion, one hour. Prerequisite: course M185A or equivalent. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A.

Mr. Aguilera, Mr. Kronenberg, Mr. Sercarz (W)

**M293. Major Concepts in Oncology.** (Same as Oral Biology M293 and Pathology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

Mr. Hankinson (W)

**M298. Seminar: Current Topics in Molecular Biology (2 units).** (Same as Biological Chemistry M298, Biology M298, Chemistry M298, Microbiology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

(F,W,Sp)

**596. Directed Individual Study or Research (2 to 8 units).** Laboratory, to be arranged. Prerequisite: consent of graduate adviser. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations (2 to 6 units).**

**599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units).** Research on an original problem in the field of microbiology and immunology to be selected by graduate student with advice of adviser. Fields of study may be in bacteriology, immunology, mycology, parasitology, virology, tumor biology, or cell biology.

## Molecular and Medical Pharmacology

23-145 Center for the Health Sciences, (310) 825-5294

### Professors

Jorge R. Barrio, Ph.D.  
Gautam Chaudhuri, M.D., Ph.D.  
Arthur K. Cho, Ph.D., *Vice Chair*  
Bernard K-K. Fung, Ph.D.  
Mark A. Goldberg, M.D., Ph.D.  
Edward J. Hoffman, Ph.D.  
Sung-Cheng (Henry) Huang, D.Sc.  
Louis J. Ignarro, Ph.D.  
John C. Mazziotta, M.D., Ph.D.  
Richard W. Olsen, Ph.D.  
Michael E. Phelps, Ph.D. (*Jennifer Jones Simon Professor of Biophysics*), *Chair*  
Heinrich R. Schelbert, M.D., Ph.D., *Vice Chair*  
Werner E. Flacke, M.D., *Emeritus*  
Robert George, Ph.D., *Emeritus*

William L. Hewitt, M.D., *Emeritus*  
 Donald J. Jenden, Ph.D. (h.c.), B.Sc., M.B., B.S.,  
*Emeritus*  
 Peter Lomax, M.D., D.Sc., *Emeritus*  
 Dermot B. Taylor, M.D., *Emeritus*

#### Associate Professors

Denis B. Buxton, Ph.D.  
 Don H. Catlin, M.D.  
 Cameron B. Gundersen, Ph.D.  
 Sherrel G. Howard, Ph.D.  
 Nagichettiar Satyamurthy, Ph.D.

#### Assistant Professors

Simon R. Cherry, Ph.D.  
 Samson Chow, Ph.D.  
 Johannes Czernin, M.D.  
 Magnus Dahlbom, Ph.D.  
 Jon M. Fukuto, Ph.D.  
 Sanjiv Gambhir, M.D., Ph.D.  
 Carl Hoh, M.D.  
 Daniel L. Kaufman, Ph.D.  
 Harley I. Komblum, M.D., Ph.D.  
 William Melega, Ph.D.  
 Phoebe L. Stewart, Ph.D.

#### Adjunct and Clinical Professors

Yi-Han Chang, Ph.D., *Adjunct*  
 Jamshid Maddahi, M.D., *Clinical*

#### Adjunct Assistant Professor

Joy A. Umbach, Ph.D.

## Scope and Objectives

The Department of Molecular and Medical Pharmacology is a newly reorganized department with basic and clinical components. Students have opportunities to develop intellectually and experimentally in the interface between these two levels of biomedical science. The department conducts teaching and research programs that begin with molecular interactions and extend to studies of diseases and their treatment in humans. Starting with the biochemistry of drugs, departmental investigators study gene expression and its regulation, signal transduction processes, cell-to-cell communication, and integrated organ functions using techniques of structural chemistry and biology, molecular and cell biology, and cellular and organ imaging. Organic synthesis, genetic engineering, and imaging techniques such as confocal and cryoelectron microscopy, autoradiography, and positron emission tomography are extensively employed. The latter techniques are available in the Crump Institute for Biological Imaging and the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, which are closely affiliated with the department. The goal of the education program is to provide faculty members and students the opportunity to examine diseases and the basic mechanisms of drugs used in their treatment, and to visualize the changes in the disease state with procedures that monitor cellular and organ function.

The graduate program seeks to prepare students for these interdisciplinary activities with a basic foundation in pharmacology during their first year in residence. The second year is spent in the laboratory and in elective courses selected to reflect each student's interest, back-

ground, and requirements for the research undertaken. Numerous opportunities for interaction with other departments and programs are provided formally through available coursework and informally through many collaborative research activities.

Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

## Master of Science in Pharmacology

The department offers the Ph.D. degree, and students may obtain the M.S. degree; however, the department normally does not admit candidates for the M.S. degree only.

## Ph.D. in Pharmacology

### Admission

In addition to meeting University requirements for graduate admission, you must have received a bachelor's degree in a chemical, biological, or physical science or in the premedical curriculum. Graduate Record Examination (GRE) scores, Test of English as a Foreign Language (TOEFL) scores for international students, and three letters of recommendation are also required.

In suitable cases, students who have course deficiencies may be admitted to graduate standing, but any deficiencies must be removed within a specified time.

Prospective students may write for a departmental brochure to the Graduate Student Office, Department of Molecular and Medical Pharmacology, 23-145 CHS, UCLA, Los Angeles, CA 90024-1735.

New Ph.D. students may also be admitted through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280.

### Major Fields or Subdisciplines

Cardiovascular pharmacology, chemical pharmacology, medical pharmacology, immunopharmacology, neuroendocrine pharmacology, neuropharmacology, nuclear medicine (positron emission tomography), pharmacokinetics, biological imaging, psychopharmacology.

### Course Requirements

*Required:* Molecular and Medical Pharmacology 200 (three terms), 211A-211B, 212A-212B, 234A-234B, 237A-237B, 241, 251 (must be taken every term), and two electives from M255, Biological Chemistry CM253, CM267 or Anatomy and Cell Biology M209A, Physiology 201A-201B/M203A-M203B, or one biostatistics course. These requirements will be waived if you have passed equivalent courses with grades of B or better within the past 36 months. All required coursework should be completed by the end of your sixth term.

The department provides a system of laboratory rotations (course 200) in order to familiarize students with a variety of pharmacological research areas and techniques. During your first six terms in the department, you participate in projects of your choosing. If possible, two of these are during the regular academic year and the third during the summer. You also become familiar with the literature relevant to the various research projects and thus establish a basis for the selection of your own research area. If you have already chosen a research area at the time you enter the department, you may benefit by working in the related laboratory during the previous summer. This would provide an uninterrupted period of over two months to work on a research project.

As part of course 200 you must submit a report of your activities in the various research groups by the end of the term. The report should include the nature of the project, how you participated, the results obtained, and a critical evaluation of the project.

For students entering through UCLA ACCESS, required courses include Molecular and Medical Pharmacology 237A, 241, 251 (each term after entering a pharmacology laboratory for dissertation research), Biological Chemistry CM253, and CM267 or Anatomy and Cell Biology M209A. Recommended electives include 211A, 211B, 212A, 212B, 234A, 234B, 237B, M255, Physiology 201A-201B/M203A-M203B, and one biostatistics course. You may use course 200 or courses in other departments for the three required laboratory research rotations.

Examinations are given in all courses except seminars and research. These are in the form of written examinations, oral examinations, term papers, and/or laboratory practicals.

### Teaching Experience

Seminar presentations are required of all students in the graduate program. Students entering through UCLA ACCESS are required to serve as teaching assistants for two terms, either in the department or in other departments on campus.

### Qualifying Examinations

After completing 18 months of study, you are required to take a departmental comprehensive examination consisting of a written part and an oral part. You are then recommended for continuation toward the Ph.D. degree, for further remedial study, or for termination. Questions are intended to test for a rational, analytical approach to problem solving and for ability to integrate material learned in different courses. You are expected to know basic principles of pharmacology and the status of topics of current interest in pharmacology and other biological sciences.

After passing the departmental comprehensive examination, you must take the University Oral Qualifying Examination within 24 months. This examination is administered by the doc-

toral guidance committee. Most questions concentrate on the background literature, experimental methods, and implications of your field of interest and dissertation project. When you pass this examination, you are eligible to petition the Graduate Division for advancement to Ph.D. candidacy.

If you fail any one of the above required examinations, you may be reexamined at a later date determined by the guidance committee.

### Final Oral Examination

A final oral examination may be administered after submission of the dissertation.

### Articulated Degree Program

The department offers an articulated M.D./Ph.D. program with the UCLA School of Medicine. Candidates must be accepted by the School of Medicine Admissions Office in order to qualify.

### Upper Division Courses

**110. Drugs: Mechanisms, Uses, and Misuse.** Lecture, four hours (seven weeks); discussion, four hours (three weeks). Prerequisites: Biology 5, 6, 9 or equivalent, Chemistry 15 or equivalent. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse. Mr. Cho (W)

**M115. Introduction to Pharmacology and Therapeutics (2 units).** (Same as Nursing M115.) Prerequisite for non-nursing students: consent of instructor. Systematic review of major drug groups used therapeutically, the most commonly used members in each group, differences among them, and their mechanisms of action. (W)

**199. Special Studies (2 to 8 units).** Prerequisite: consent of instructor and department chair. Special studies in pharmacology, including either reading assignments or laboratory work or both, designed for proper training of students. (F,W,Sp)

### Graduate Courses

**200. Introduction to Laboratory Research (2 to 4 units).** Prerequisite: consent of instructor. Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor a report covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. (F,W,Sp)

**203. Clinical Pharmacology (2 units).** Lecture, zero to two hours; discussion, zero to two hours. Prerequisites: courses 211A-211B. Series of lectures and case presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutics by reference to pharmacokinetics, mechanisms of action, and disposition of drugs. (Sp)

**211A-211B. Principles of Pharmacology (4 units, 2 units).** Lecture, three to eight hours; discussion, zero to nine hours. Prerequisites: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapeutics. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine. Mr. Ignarro in charge (F,W)

**212A-212B. Graduate Commentary: Clinical Pharmacology (2 units each).** Prerequisites: mammalian physiology, biochemistry. Systematic consideration of topics covered in course 203. Primarily for graduate students.

**M221. Cellular and Molecular Neurochemistry.** (Formerly numbered M221A.) (Same as Anatomy M221, Biological Chemistry M221, Neuroscience M240, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading. Mr. de Vellis, Mr. Olsen (W)

**234A-234B-234C. Experimental Methods in Pharmacology (2 units each).** Prerequisite: consent of instructor. Survey of experimental methods and instrumentation used in analysis, identification, and study of mechanisms of action of pharmacologically active compounds. Mr. Fukuto, Mr. Melega (F,W,Sp)

**236. Neuropharmacology.** Prerequisite: neurophysiology. Advanced neuropharmacology, including actions and modes of action of drugs acting on central nervous system, interactions between drugs and nervous tissue, movements of drugs through blood brain barrier, and distribution to central nervous system; problems of central transmission. (W)

**237A-237B-237C. Research Frontiers in Cellular and Molecular Pharmacology.** Prerequisites: course 241, consent of instructor. Detailed examination of mechanisms of drug action at organismal, tissue, cellular, and molecular levels, emphasizing receptors, receptor/effector coupling, neurotransmitters, autonomic and central nervous system pharmacology. Mr. Barrio, Ms. Howard, Mr. Olsen (F,W,Sp)

**238. Behavioral Toxicology.** Prerequisite: consent of instructor. Lectures and discussions designed to examine effects of exposures to a wide variety of chemical and physical agents on behavior of total organism as it adjusts to changes in its physical and social environments. Such effects may be reflected as subtle disturbances of behavior before classic symptoms of toxic states become apparent. Consideration to methodologies by which such disturbances may be measured, to state of present knowledge, and to application of knowledge in regulating risks of both prenatal and postnatal exposure. Particular emphasis on relevance of this knowledge to human behavior. (Sp)

**241. Introduction to Chemical Pharmacology.** Prerequisite: organic and biological chemistry. Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, and excretion. Mr. Cho (W)

**251. Seminar: Pharmacology (2 units).** Seminars presented by students, faculty, and guest lecturers on a variety of topics. S/U grading. (F,W,Sp)

**253. Seminar: Environmental Toxicology (2 units).** Prerequisite: consent of instructor. Oral reports and discussions of current research on chemical pollutants in environment, their effects on biological systems, and mechanism of these effects. Mr. Cho (F,W,Sp)

**M255. Biological Catalysis.** (Same as Biological Chemistry M255, Biology CM252, and Chemistry CM255.) Prerequisites: Biology 100A, 100B, Chemistry 110A, 153A, 153B, or equivalent, consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level.

Mr. Cho, Mr. Fukuto, Mr. Sigman (W)

**M257. Introduction to Toxicology.** (Same as Pathology M257.) Prerequisite: course 241 or consent of instructor. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

Mr. Collins (Sp)

**M258. Pathologic Changes in Toxicology.** (Same as Pathology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

Mr. Van Lancker (W)

**261. Introduction to Clinical Pharmacology (2 units).** Prerequisite: consent of instructor. Lectures, case presentations, and discussions designed to acquaint graduate students with special problems and effects encountered in clinical use of drugs, including absorption, metabolism and excretion, drug interactions and interference with clinical laboratory analysis. (W)

**291. Special Topics in Pharmacology (2 to 4 units).** Prerequisite: consent of instructor. Examination in depth of topics of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced Ph.D. candidates, academic staff, or visiting faculty. May be taken twice for credit. (F,W,Sp)

**596. Directed Individual Research in Pharmacology (4 to 12 units).**

**599. Research for and Preparation of Ph.D. Dissertation (4 to 12 units).**

## Molecular Biology (Interdepartmental)

The Ph.D. degree program in Molecular Biology draws its staff members from participating departments in the health and life sciences and from the Molecular Biology Institute. For details on this interdisciplinary program, see Chapter 5 on the College of Letters and Science.

## Neurology

C-128 Reed Neurological Research Center, (310) 206-6584

### Chair

Robert C. Collins, M.D. (*Frances Stark Professor of Neurology*)

### Vice Chairs

John C. Mazziotto, M.D., Ph.D.  
Mark A. Goldberg, M.D., Ph.D., *in Residence (Harbor-UCLA)*  
Wallace W. Tourtelotte, M.D., Ph.D., *in Residence (Wadsworth VA)*  
Claude G. Wasterlain, M.D., *in Residence (Sepulveda VA)*

### Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with

greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

For further details on the Department of Neurology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Upper Division Course

**199. Special Studies (2 to 8 units).** Discussion, one to two hours; laboratory, four to six hours. Prerequisite: consent of instructor. Individual projects carried out under direction of a faculty member. Special studies in neurology, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. Mr. Collins

## Neuroscience (Interdepartmental)

73-360 Center for the Health  
Sciences, (310) 825-8153

### Professors

Rafi Ahmed, Ph.D. (*Microbiology and Immunology*)  
Arthur P. Arnold, Ph.D. (*Psychology*)  
Thomas L. Babb, Ph.D., in Residence (*Neurology*)  
Donald P. Becker, M.D. (*Surgery*)  
Francisco J. Bezanilla, Ph.D. (*Physiology*)  
Dean Bok, Ph.D. (*Anatomy and Cell Biology*)  
Nicholas C. Brecha, Ph.D., in Residence (*Anatomy and Cell Biology*)  
Larry L. Butcher, Ph.D. (*Psychology*)  
Anthony T. Campagnoni, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Scott H. Chandler, Ph.D. (*Physiological Science*)  
Michael H. Chase, Ph.D., in Residence (*Physiology*)  
Carmine D. Clemente, Ph.D. (*Anatomy and Cell Biology*)  
Robert C. Collins, M.D. (*Neurology*)  
Jean S. de Vellis, Ph.D., in Residence (*Anatomy and Cell Biology*)  
V. Reggie Edgerton, Ph.D. (*Physiological Science*)  
Jerome Engel, M.D., Ph.D. (*Neurology*)  
Gordon L. Fain, Ph.D. (*Ophthalmology, Physiological Science*)  
Debora B. Farber, Ph.D., in Residence (*Ophthalmology*)  
Jack L. Feldman, Ph.D. (*Physiological Science*)  
Robin S. Fisher, Ph.D., in Residence (*Anatomy and Cell Biology*)  
Joaquin M. Fuster, M.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

C.R. Gallistel, Ph.D. (*Psychology*)  
Louis J. Goldberg, D.D.S., Ph.D. (*Oral Biology*)  
Ronald M. Harper, Ph.D. (*Anatomy and Cell Biology*)  
Vicente Honrubia, M.D. (*Surgery*)  
Bruce D. Howard, M.D. (*Biological Chemistry*)  
Franklin B. Krasne, Ph.D. (*Psychology*)  
Lawrence Kruger, Ph.D. (*Anatomy and Cell Biology*)  
Michael S. Letinsky, Ph.D. (*Physiology*)  
Michael Steven Levine, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
John C. Liebeskind, Ph.D. (*Psychology*)  
Wendy B. Macklin, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Michael T. McGuire, M.D. (*Psychiatry and Biobehavioral Sciences*)  
Paul E. Micevych, Ph.D. (*Anatomy and Cell Biology*)  
Peter M. Narins, Ph.D. (*Biology; Distinguished Teaching Award*)  
Elizabeth F. Neufeld, Ph.D. (*Biological Chemistry*)  
Donald Novin, Ph.D. (*Psychology*)  
Richard W. Olsen, Ph.D. (*Molecular and Medical Pharmacology*)  
William M. Partridge, M.D. (*Medicine*)  
Michael J. Raleigh, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Leonard H. Rome, Ph.D. (*Biological Chemistry*)  
Arnold B. Scheibel, M.D. (*Anatomy and Cell Biology, Brain Research Institute*)  
John D. Schiag, M.D. (*Anatomy and Cell Biology*)  
W. Donald Shields, M.D. (*Neurology, Pediatrics*)  
Jerome M. Siegel, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Judith L. Smith, Ph.D. (*Physiological Science; Distinguished Teaching Award*)  
Allan J. Tobin, Ph.D. (*Biology*)  
Arthur W. Toga, Ph.D. (*Neurology*)  
John H. Walsh, M.D. (*Medicine*)  
Claude G. Wasterlain, M.D., in Residence (*Neurology*)  
Charles D. Woody, M.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Eran Zaidel, Ph.D. (*Psychology*)  
S. Larry Zipursky, Ph.D. (*Biological Chemistry*)  
Edward C. Carterette, Ph.D., Emeritus (*Psychology*)  
George Eisenman, M.D., Emeritus (*Physiology*)  
Donald J. Jenden, Ph.D., Emeritus (*Molecular and Medical Pharmacology*)  
José P. Segundo, M.D., Emeritus (*Anatomy and Cell Biology*)  
Bernice M. Wenzel, Ph.D., Emerita (*Physiology*)

### Associate Professors

Keith L. Black, M.D., in Residence (*Surgery*)  
Eric Halgren, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Carolyn R. Houser, Ph.D., in Residence (*Anatomy and Cell Biology*)  
Sherrel G. Howard, Ph.D. (*Molecular and Medical Pharmacology, Psychiatry and Biobehavioral Sciences*)  
Anne M. Morin, Ph.D., in Residence (*Neurology*)  
Diane M. Papazian, Ph.D. (*Physiology*)

### Assistant Professors

Utpal Banerjee, Ph.D. (*Biology*)  
Christopher Evans, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Kym Faull, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
David L. Glanzman, Ph.D. (*Physiological Science*)  
Nigel Maidment, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Jorge R. Mancillas, Ph.D. (*Anatomy and Cell Biology*)  
Erik S. Schweitzer, M.D., Ph.D. (*Anatomy and Cell Biology*)  
Dwayne D. Simmons, Ph.D. (*Biology*)  
Joseph B. Watson, Ph.D. (*Psychiatry and Biobehavioral Sciences*)

### Adjunct Professor

James F. McGinnis, Ph.D. (*Anatomy and Cell Biology*)

### Adjunct Associate Professors

Robert F. Ackermann, Ph.D. (*Neurology*)  
Catia Sternini, M.D. (*Medicine*)

### Associate Researcher

Dennis J. McGinty, Ph.D. (*Anatomy and Cell Biology*)

## Scope and Objectives

For details on the B.S. program, see Chapter 5 on the College of Letters and Science.

The goal of the interdepartmental program is to educate students for careers in neuroscience research and teaching. Students completing this program should be able to address both traditional and novel problems in neuroscience, armed with contemporary concepts and techniques. The program recognizes that neuroscience studies the structure and organization of nervous systems; intercellular and intracellular communication, including the cellular and molecular basis of neurotransmitter production and reception; development, including the molecular and cellular basis of trophic interactions; behavior; cognition; and the neurobiological and molecular bases of neurological and neuropsychiatric disorders.

## Ph.D. Degree

### Admission

All applicants must satisfy the University minimum requirements. In addition, Graduate Record Examination (GRE) scores are required. Recommended preparation includes mathematics through calculus and courses in general chemistry, organic chemistry, biochemistry, physics, basic biology, and physiology. Three letters of recommendation are required.

Information regarding the program may be obtained by writing to the Neuroscience Office, 73-360 CHS, UCLA, Los Angeles, CA 90024-1761.

### Major Fields or Subdisciplines

Molecular neuroscience, cellular neuroscience, systems neuroscience, behavioral neuroscience, clinical neuroscience.

### Course Requirements

Basic course requirements include Neuroscience M201, M202, M203, M204, M205, 210A-210B-210C, 211A-211B-211C, one biostatistics course, and three additional advanced neuroscience courses. Each first-year student must also obtain research experience in the laboratories of at least two Neuroscience faculty members.

### Teaching Experience

Teaching experience is required for the degree and is available through teaching assistantships or other means.

## Qualifying Examinations

A written qualifying examination is required following completion of the core requirements. The objective of this examination is to test your basic knowledge and ability to relate knowledge in different neuroscience areas. After passing the written qualifying examination, you and your adviser select your doctoral committee to administer the University Oral Qualifying Examination.

When you have passed the oral examination, you are advanced to candidacy and may begin work on the dissertation.

## Final Oral Examination

The final oral examination is required.

## Graduate Courses

**M201. Neuroanatomy: Structure and Function of Nervous System.** (Same as Anatomy M202.) Lecture, three hours; laboratory, three hours. Prerequisites: Biology 166 or 171 or equivalent, consent of instructor. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems. Mr. Scheibel (F)

**M202. Cellular Neurophysiology.** (Formerly numbered 202.) (Same as Physiological Science M202.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 166 or 171 or equivalent, Physiological Science 111A or M180A or Physics 6B or equivalent. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Mr. Fain (F)

**M203. Molecular Neurobiology.** (Same as Psychiatry M203.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 201A-201B or equivalent, basic biochemistry, consent of instructor. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology. Mr. Campagnoni, Mr. Walsh

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Anatomy M204, Biology M280, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: courses M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

Mr. de Vellis, Mr. Grinnell, Ms. Macklin (W)

**M205. Behavioral and Systems Neuroscience.** (Same as Physiological Science M205 and Psychology M205Z.) Lecture, three hours. Prerequisites: courses M201, M202, M203, and M204, or consent of instructor. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

Mr. Gallistel

**210A-210B-210C. Introduction to Current Literature in Neuroscience (2 units each).** Critical discussion of current research literature related to topics of the five core courses in neuroscience graduate curriculum. S/U grading. **210A.** Corequisites: courses M201, M202, M203. **210B.** Corequisite: course M204. **210C.** Corequisite: course M205.

**211A-211B-211C. Evaluation of Research Literature in Neuroscience (2 units each).** Prerequisites: courses M201, M202, M203, M204, and M205, or consent of instructor. Advanced critical analysis of current research in neuroscience. S/U grading.

**215. Seminar: Neuroscience (2 units).** Topics of current importance presented for discussion. S/U grading.

**M240. Cellular and Molecular Neurochemistry.** (Same as Anatomy M221, Biological Chemistry M221, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading. Mr. de Vellis, Mr. Olsen (W)

**M246. Neuroactive Peptides: Molecular Biology to Function (2 units).** (Same as Anatomy M235 and Medicine M235.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

Mr. Brecha, Ms. Sternini

**M247. Neural Control of Cardiopulmonary Function.** (Same as Physiological Science M247.) Lecture, two hours; discussion, two hours. Prerequisites: Physiological Science 111A, 111B or 133 or 142 or M180A, M180B or equivalent. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanisms underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

Mr. Feldman

**254. Interdisciplinary Research Seminar (2 units).** Lectures and discussions on many different disciplinary approaches to knowledge of brain function in order to broaden experience of students studying in fields other than that of lecturer; new information in depth from students in fields closely related to subject discussed. S/U grading.

**M255. Functional Organization of Behavior (2 units).** (Same as Psychiatry M255.) Prerequisite: consent of instructor. Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

Mr. Woody

**257. Structure and Function of Limbic System (2 units).** Prerequisite: consent of instructor. Current knowledge of mammalian limbic system presented by surveying studies of its developmental anatomy, intrinsic synaptic organization, synaptic chemistry, afferent and efferent circuits, and dysfunctions in memory and cognition association with limbic system function. S/U or letter grading.

Mr. Babb

**M258. Functional Neuropsychology (2 units).** (Same as Psychiatry M258.) Lecture, two hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Interdisciplinary course integrating current research publications in neuroanatomy, molecular neurobiology, synaptic neurophysiology, event-related potentials, neuropsychology of amnesia, and cognitive psychology of normal memory into a realistic model. S/U or letter grading.

Mr. Scheibel

**M259. Neurobiology of Sleep (3 units).** (Same as Psychiatry M249 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading. Mr. McGinty, Mr. Siegel

**M260. Neuromuscular Factors in Movement Regulation.** (Same as Physiological Science M260.) Prerequisite: Physiological Science 138 or consent of instructor. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

Mr. Edgerton

**M261. Neuronal Circuit Analysis (2 units).** (Same as Anatomy M261.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

Mr. Schlag (W)

**M262. Neural Systems for Motor Control.** (Same as Physiological Science M240.) Prerequisite: Physiological Science C143 or consent of instructor. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

Ms. Smith

**M263. Neuronal Mechanisms Controlling Rhythmic Movements.** (Same as Physiological Science M263.) Prerequisite: Physiological Science C145 or consent of instructor. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

Mr. Chandler

**M265A-M265B-M265C. Seminars: Neural Control of Movement (2 to 4 units each).** (Same as Physiological Science M294A-M294B-M294C.) Prerequisite: course M247 or M262 or M263 or consent of instructor. Selected topics on neural determinants of movement behavior. Students required to present two-hour seminar.

**M266A-M266B-M266C. Seminars: Cellular Neuroscience (2 to 4 units each).** (Same as Physiological Science M295A-M295B-M295C.) Prerequisite: course M202 or consent of instructor. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar.

Mr. Fain, Mr. Feldman, Mr. Glanzman

**271. Neurobiology of Disease (2 units).** Analysis of clinical neurobiological and psychiatric disorders from perspective of basic neuroscience.

Mr. Collins

**M273. Neural Basis of Memory.** (Same as Psychiatry M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

Mr. Woody

**274. Computational Neuroscience.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses M201, M202. Systematic introduction to computational neuroscience and hands-on experience in neural simulations. Computational models at synaptic, neuronal, and network levels. Sensory, motor, memory, and attentional systems and some higher cognitive functions, including language and consciousness. S/U or letter grading.

Mr. Nenov

**275. Advanced Techniques in Neurobiology (2 units).** Lecture, one hour; laboratory, one hour. Prerequisites: basic biology and chemistry. Designed to provide introduction and, when possible, practical demonstration of a number of techniques used in neurochemical research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

Mr. Evans, Mr. Faull, Mr. Maidment

**596. Directed Individual Study or Research (2 to 12 units).** Prerequisite: consent of instructor.

Mr. Tobin

**597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units).** Prerequisite: consent of instructor.

Mr. Tobin

**599. Dissertation Research for Ph.D. Candidates (4 to 12 units).** Designed for students requiring special instruction or time to work on dissertation.

Mr. Tobin

## Obstetrics and Gynecology

27-117A Center for the Health Sciences, (310) 206-2056

### Chairs

Roy M. Pitkin, M.D., *Executive Chair*

Jonathan S. Berek, M.D., *Vice Chair, UCLA Medical Center*

Charles R. Brinkman III, M.D., *Chair, Harbor-UCLA*

Ezra C. Davidson, M.D., *Chair, King/Drew*

Larry R. Everson, M.D., *Acting Chair, Olive View-UCLA*

Lawrence Platt, M.D., *Chair, Cedars-Sinai*

### Scope and Objectives

The medical student program in obstetrics and gynecology is designed to provide firm background in the essentials of women's health. Through a combination of didactic instruction and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Third-year students work in ambulatory clinics and on inpatient services during a six-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year which emphasize subspecialties such as maternal/fetal medicine, reproductive endocrinology, gynecologic oncology, and family planning.

For further details on the Department of Obstetrics and Gynecology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Ophthalmology

2-142 Stein Eye Institute, (310) 825-5053

### Chair

Bartly J. Mondino, M.D. (*Wasserman Professor of Ophthalmology*)

### Vice Chairs

Sherwin J. Isenberg, M.D. (*Harbor-UCLA*)

Arthur L. Rosenbaum, M.D.

### Scope and Objectives

Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Jules Stein Eye Institute (including the Doris Stein Eye Research Center) are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Orthopaedic Surgery

76-134 Center for the Health Sciences, (310) 825-2744

### Chair

Joseph M. Lane, M.D.

### Scope and Objectives

The medical student program in orthopedic surgery is designed to provide experience in understanding the diagnosis and management of disorders of the musculoskeletal system. Through a combination of didactic in-

struction and supervised clinical experience, students acquire the clinical skills of history taking and physical examination of the musculoskeletal system. Diagnosis and orthopedic management of bone and soft tissue trauma, skeletal development defects, tumor, spinal disorders, hand and foot disorders, and arthritis are primary objectives. Third-year students work in ambulatory clinics and on inpatient services during their core surgical clerkship. Fourth-year electives provide the opportunity for in-depth experience on rotations at the UCLA Medical Center and affiliated institutions and emphasize subspecialties such as joint replacement, sports medicine, orthopedic oncology, hand and foot surgery, and spinal surgery.

For further details on the Department of Orthopaedic Surgery and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Pathology and Laboratory Medicine

1P-109D Center for the Health Sciences, (310) 825-5719

### Professors

Judith A. Berliner, Ph.D., *in Residence*

Alistair J. Cochran, M.D., *in Residence*

Rita B. Effros, Ph.D., *in Residence*

Richard A. Gatti, M.D., *in Residence*

Oliver Hankinson, Ph.D., *in Residence*

Faramarz Naeim, M.D., *in Residence*

Donald E. Paglia, M.D.

Lawrence D. Petz, M.D., *in Residence*

David D. Porter, M.D., *Vice Chair*

Denis O. Rodgerson, Ph.D., *in Residence*

Dorothy L. Rosenthal, M.D., *in Residence*

George S. Smith, M.D., *Interim Chair*

Harry V. Vinters, M.D.

Marcel A. Baluda, Ph.D., *Emeritus*

Pasquale A. Cancilla, M.D., *Emeritus*

Julien L. Van Lancker, M.D., *Emeritus*

M. Anthony Verity, M.D., *Emeritus*

Roy L. Walford, M.D., *Emeritus*

### Associate Professors

Sanford H. Barsky, M.D.

Jonathan Braun, M.D., Ph.D.

Thomas A. Drake, M.D., *in Residence*

Nir Kossovsky, M.D.

James H. McBride, Ph.D., *in Residence*

### Assistant Professors

Linda G. Baum, M.D., Ph.D.

Wayne W. Grody, M.D., Ph.D., *in Residence*

Elizabeth A. Wagar, M.D.

### Adjunct Associate Professor

Neil Sidell, Ph.D.

### Scope and Objectives

Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in preven-

tion, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years.

Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope.

A combined education in breadth and depth is indispensable; it is this education, as it is applied to injuries and reaction to injuries, that is the goal of the Ph.D. program in Experimental Pathology.

## Master of Science Degree

Students are only accepted into the program for the purpose of obtaining a Ph.D. in Experimental Pathology. However, the department also awards an M.S. degree in Experimental Pathology in cases where a student is unable to finish the full Ph.D. program but whose completed work is adequate to the standards and minimum requirements set for a master's degree.

The general requirements for the M.S. degree include completion of the core courses (Pathology and Laboratory Medicine 231A, 233, 234A-234F, 250A-250B-250C) and six elective units required of all experimental pathology graduate students. A total of eight units of 500-series courses may be applied toward the 36 units required for the degree; four units may be applied toward the 35-unit graduate course requirement.

You must pass the written qualifying examination at the master's level. A thesis is also required, which encompasses individual research.

## Ph.D. in Experimental Pathology

### Admission

Admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280. Applications are accepted for Fall Quarter only; the deadline is January 5. Completed applications consist of the application form, official transcripts, three letters of recommendation, Graduate Record Examination (GRE) General Test scores and the Subject Test in either Biology, Chemistry, Biochemistry, or Cell and Molecular Biology, and a statement of purpose. The Test of English as a Foreign Language (TOEFL) is required for international students whose native language is not English.

You should have undergraduate preparation in physics, biology, and chemistry and have experience through coursework in specific areas that may include cell biology, neurobiology, physiology, immunology, structural or computational biology, microbiology, virology, integrative biology, plant molecular biology, developmental biology, genetics, biochemistry, or molecular biology.

### Course Requirements

The course of study for the first six terms is as follows:

#### First Year

- Fall: Biological Chemistry CM253, one seminar course, one laboratory rotation
- Winter: Anatomy and Cell Biology M209A or Biological Chemistry CM267, one seminar course, one laboratory rotation
- Spring: One foundations of human disease course, one seminar course, one laboratory rotation

#### Second Year

- Fall: Pathology and Laboratory Medicine 250A
- Winter: Courses 234A through 234D, 250B
- Spring: Course 250C

### Teaching Experience

You are required to serve as a teaching assistant for two terms, normally during your second and third years.

### Qualifying Examinations

The written qualifying examination must be completed by the end of your second year (after the core course requirements are satisfied) and consists of the submission of a written grant proposal related to the general areas of your dissertation, yet different from the dissertation. The proposal format is based on the first award application from the Public Health Service Grant application, with minor modifications; the proposal must be submitted by the middle of September of your second year. By the end of September of that year, you must take the University Oral Qualifying Examination, which is administered by your doctoral committee and is a defense of your proposal.

After successful completion of the oral examination, you are advanced to candidacy. Within four months, you must make an oral presentation to your doctoral committee on your proposed doctoral thesis and any progress you have made. Another progress presentation may be required after an additional year, as determined by your doctoral committee.

### Final Oral Examination

All candidates are required to defend their dissertation at an oral examination open to the public. The purpose of the dissertation is to demonstrate ability for independent investigation and proficiency in the field.

## Upper Division Course

**199. Special Studies (2 to 6 units).** Supervised laboratory research, 10 hours minimum. Prerequisite: consent of instructor. Students select instructor among eligible research faculty and carry out independent laboratory research project under instructor supervision. P/NP or letter grading.

## Graduate Courses

**200A. Dental Pathology (3 units).** Lecture, 90 minutes; laboratory, three hours. Prerequisite: consent of instructor. Fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems. Ms. Bhuta and the Staff (F)

**M215. Interdepartmental Course: Tropical Medicine (2 units).** (Same as Medicine M215, Microbiology and Immunology M215, and Pediatrics M215.) Lecture, two and one-half hours. Prerequisites: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading. Mr. Turner (Sp, alternate years)

**231A. Pathological Anatomy and Physiology (6 units).** Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Prerequisites: graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. Mr. Drake and the Staff (F)

**231B-231C. Pathophysiology of Disease (6 units each).** Prerequisites: course 200A, graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. In Progress grading. Mr. Naeim and the Staff (W,Sp)

**232. Topics in Vertebrate Neurobiology (2 units).** Introduction to cell biology of vertebrate central nervous system, with special reference to its development, structure, and potential disease processes.

**233. General Pathology Seminar (3 units).** Lecture, two hours; discussion, one hour. Corequisite: course 231A. Designed to provide students with in-depth understanding of topics in course 231A. Reading and discussion of current publications pertaining to general pathology, with emphasis on cell injury/cell death and inflammation/fibrosis. Ms. Berliner (F)

**234A-234F. Molecular and Cellular Foundations of Disease (2 units each).** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: graduate standing, background in biochemistry, molecular biology, and genetics. Investigation of the disease process. Two topics (four weeks each) offered per term; topics include genetic and metabolic disorders, infectious diseases, oncology, immunology, and nutritional diseases. Mr. McBride and the Staff (W,Sp)

**245. Environmental Pathology.** Prerequisites: graduate standing, consent of instructor. Designed to explore interrelationships of man with his total environment. Presentation of series of special topics to discuss effect on man of changes in compositions of air, water, soil, and other materials. S/U grading.

**250A-250B-250C. Pathology Graduate Student Seminars (2 units each).** Limited to and required of all students in experimental pathology. Review and discussion of current literature and research in special topics of experimental pathology. Ms. Berliner and the Staff (W,Sp)

**254. Seminar: Experimental Neuropathology (1 unit).** Prerequisite: consent of instructor. Weekly seminar series presented by experts working at forefront of research on diseases of nervous system. New experimental approaches and laboratory model systems for studying diseases such as Alzheimer's and Huntington's diseases, epilepsy, neuroblastoma, and multiple sclerosis. S/U grading. Mr. Sidell, Mr. Verity

**255. Mapping the Human Genome (3 units).** Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of disease genes. S/U or letter grading. Mr. Gatti (Sp)

**M256. Seminar: Viral Oncology (2 units).** (Same as Microbiology and Immunology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation. Mr. Baluda

**M257. Introduction to Toxicology.** (Same as Pharmacology M257.) Prerequisite: Pharmacology 241 or consent of instructor. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems. (Sp)

**M258. Pathologic Changes in Toxicology.** (Same as Pharmacology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system). Mr. Van Lancker (W)

**262. Biology of Aging (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: graduate standing. Introduction to biology of aging, with emphasis on mammalian and cellular aging — survival curves, biochemical, immunological, immunogenetic, and neuroendocrine alterations over the life cycle, accelerated aging, life-extension strategies; major theories of aging. S/U or letter grading.

Ms. Effros, Mr. Walford (W)

**M293. Major Concepts in Oncology.** (Same as Microbiology and Immunology M293 and Oral Biology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

Mr. Barsky, Mr. Hankinson (W)

**596. Directed Individual Study or Research (4 to 12 units).** Individual research with members of the staff or of other departments, the latter for purpose of supplementing programs available in department. S/U grading.

**597. Preparation for Qualifying Examinations (2 to 8 units).** Prerequisite: one year of pathology coursework. Individual study for qualifying examinations. S/U grading.

**599. Preparation of Ph.D. Dissertation (2 to 8 units).** Prerequisite: completion of qualifying examinations and majority of Ph.D. research. Writing and completion of dissertation. S/U grading.

## Pediatrics

12-335 Davies Children's Center,  
(310) 825-4128

### Chairs

Barbara M. Lippe, M.D., *Interim Executive Chair*  
Robert B. Ettenger, M.D., *Vice Chair, Clinical Affairs,*  
*UCLA Medical Center*

E. Richard Stiehm, M.D., *Vice Chair, Academic*  
*Affairs, UCLA Medical Center*

S. Douglas Frasier, M.D., *Chair, Olive View-UCLA*  
Rosemary D. Leake, M.D., *Chair, Harbor-UCLA*  
David L. Raimoin, M.D., Ph.D., *Chair, Cedars-Sinai*  
Betty Jo Warren, M.D., *Interim Chair, King/Drew*

## Scope and Objectives

The Department of Pediatrics encompasses four teaching hospitals: UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The clinical program and teaching activities of the UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of clinical medicine course, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics can be taken at any of the four medical centers. In-depth electives in the Department of Pediatrics are listed in the *School of Medicine Handbook of Clinical Courses*, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Physiology

53-237 Center for the Health  
Sciences, (310) 825-6717

### Professors

Francisco J. Bezanilla, Ph.D.

Michael H. Chase, Ph.D., *in Residence*

Jared M. Diamond, Ph.D.

Alan D. Grinnell, Ph.D.

Earl Homsher, Ph.D., *Executive Vice Chair*

H. Ronald Kaback, M.D.

Glenn A. Langer, M.D. (*Castera Professor of*  
*Cardiology*)

Michael S. Letinsky, Ph.D.

Kenneth D. Philipson, Ph.D., *in Residence*

Eduardo H. Rubinstein, M.D., Ph.D.

George Sachs, M.D., D.Sc. (*Leon J. Tiber, M.D., and*  
*David S. Alpert, M.D., Professor of Medicine*)

Oscar U. Scremin, M.D., *in Residence*

John McD. Tormey, M.D., *Vice Chair for Instruction*

Julio Vergara, Ph.D.

Ernest M. Wright, D.Sc., *Chair*

### Professors Emeriti

Allan J. Brady, Ph.D.

Jennifer S. Buchwald, Ph.D.

Sergio Ciani, Ph.D.

George Eisenman, M.D.

Joy S. Frank, Ph.D.

Donald B. Lindsley, Ph.D.

Gordon Ross, M.D.

Ralph R. Sonnenschein, M.D.

Bernice M. Wenzel, Ph.D.

Brian J. Whipp, Ph.D.

### Associate Professors

Linda Demer, M.D., Ph.D.

Sally J. Krasne, Ph.D.

Emeran A. Mayer, M.D.

Diane M. Papazian, Ph.D.

### Assistant Professors

Thomas J. O'Dell, Ph.D.

Nancy L. Wayne, Ph.D.

Hong Zhu, Ph.D., *in Residence*

### Adjunct Professor

Arthur Peskoff, Ph.D.

### Adjunct Associate Professors

Christopher Cooper, M.D.

Kenneth P. Roos, Ph.D.

### Adjunct Assistant Professors

Kent K.C. Lloyd, D.V.M., Ph.D.

Helen Raybould, Ph.D.

## Scope and Objectives

Physiology is the science of the functional activities of the human body. This covers a wide range, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, neurobiology, communication and information, organ systems and integrative phenomena, and behavioral physiology.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Physiology Department was judged fifth best in the nation in terms of the quality of its faculty. In addition to the Ph.D. program, the department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.

## Ph.D. Degree

### Admission

Admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 168 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-5280.

Under special circumstances, new Ph.D. students may be admitted directly to the department, in which case the following criteria apply. You are expected to pursue the Ph.D. degree and must conform to the general admission requirements set by the Graduate Division. In general, you should have received a bachelor's degree in a biological or physical science or in the premedical curriculum and should have completed courses in mathematics through calculus and differential equations, physics, chemistry (including quantitative analysis, physical and organic chemistry, biochemistry), and biology or zoology. A master's degree is not required for admission.

Successful completion of the first-year curriculum requires knowledge of physical chemistry (at least equivalent to Chemistry and Biochemistry 110A and 156) and differential equations (equivalent to Mathematics 33A). It is strongly recommended that these or equivalent courses be taken prior to admission. If not, these deficiencies must be removed within a specified time after admission.

The Graduate Record Examination (GRE) General Test is required as well as the Subject Test in Biology or in your major field. Three letters of recommendation are required and should be sent to UCLA ACCESS at the above address.

Departmental information may be obtained from the Graduate Student Office, Department of Physiology, 53-237 CHS, UCLA, Los Angeles, CA 90024-1751.

### Major Fields or Subdisciplines

Major fields include cellular physiology and biophysics, molecular physiology, and integrative physiology. Subdisciplines include cellular and molecular electrophysiology, membrane transport, cellular signal transduction, channel and transporter structure and function, muscle physiology, fundamental neurophysiology, neuromuscular physiology, and cardiovascular, gastrointestinal, respiratory, and reproductive physiology.

### Course Requirements

During your first year you must take Physiology M204 (or Neuroscience M205), M209A (or Biological Chemistry CM267 if approved by the graduate adviser), M212, M213, and Biological Chemistry CM253. Three laboratory rotations are also required. In your second year you complete 12 units of special topics courses (Physiology 220 through 250C or comparable courses in other departments) pertaining to your research interest(s). Additionally you must take courses M270A-M270B-M270C or equivalent courses in other departments during your graduate career.

### Teaching Experience

You are required to serve as a teaching assistant for two terms.

### Qualifying Examinations

The written comprehensive examination is given during the summer following completion of your second year, by which time you will have nominated your doctoral committee. The purpose of the examination is to assess your ability to read and critically evaluate research papers in your area of interest. The examination is number coded and read by selected faculty members; a pass/fail grade is assigned by the graduate program committee.

The University Oral Qualifying Examination takes place by the end of the Fall Quarter of your third year and is designed to establish that you can independently identify significant research questions, put them in context of existing knowledge in physiology, and design appropriate and realistic protocols for testing hypotheses, and to assure that your dissertation project is appropriate and feasible. You must present an original proposal which is outside your immediate research interest and provide a brief summary of your proposed dissertation project.

Eight to 12 months after the oral qualifying examination, you make a midstream oral presentation at which you apprise your doctoral committee of your research progress, gain approval of any significant changes in research direction, and receive additional help or guidance from your committee to assure your dissertation is completed in a timely fashion.

### Final Oral Examination

Although a dissertation defense is optional at the discretion of your doctoral committee, a public oral presentation of your dissertation research is required.

## Upper Division Courses

**100. Elements of Human Physiology (6 units).** Prerequisite: dental student standing or consent of instructor. Primarily for first-year dental students. Major organic body functions. With special supplementation, a suitable introduction to the field for graduate students for whom the 201A-201B course sequence is too extensive. (F)

**199. Special Studies (1 to 8 units).** Prerequisite: consent of instructor. Special studies in physiology, including either reading assignments or laboratory work or both, designed for proper training of students.

## Graduate Courses

**201A-201B. Organ System Physiology (6 units each).** Lecture, six hours; laboratory, three and one-half hours. Prerequisite: medical student standing or enrollment in qualified graduate program, consent of instructor. Recommended corequisites: courses M203A-M203B. Runs throughout School of Medicine's second semester. Lectures, laboratories, and conferences. Properties of biological membranes. Contractility of muscle. Epithelial transport. Cardiovascular, renal, respiratory, and gastrointestinal systems. Fluid and electrolyte balance. To receive credit, both courses must be taken together in same academic year. In Progress grading. Mr. Tormey and the Staff (W,Sp)

**M203A-M203B. Basic Neurology.** (Same as Anatomy M203A-M203B.) Prerequisites: medical student standing or enrollment in qualified graduate program, consent of instructor. Runs throughout School of Medicine's second semester. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system. To receive credit, both courses must be taken together in same academic year. In Progress grading.

Mr. Letinsky, Mr. Schlag, and the Staff (W,Sp)

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Anatomy M204, Biology M280, Neuroscience M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

Mr. de Vellis (W)

**M209A. Molecular Cell Biology (6 units).** (Same as Anatomy M209A and Biology CM220.) Prerequisite: consent of instructor; for undergraduates: Biology 100A, Chemistry 153A, consent of instructor. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication.

Mr. Bok, Mr. Homsher (F)

**M212. Introduction to Cellular Physiology and Biophysics (6 units).** (Same as Biology M237 and Physiological Science M212.) Lecture, five hours. Prerequisites: course M209A or Physiological Science 111A or equivalent, graduate standing; for upper division undergraduates: consent of instructor. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes. (W)

**M213. Principles of Integrative Physiology (6 units).** (Same as Physiological Science M213.) Lecture, four hours; discussion, two hours. Prerequisite: graduate standing; for upper division undergraduates: consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads.

Mr. Diamond, Mr. Feldman (Sp)

**220. Methods in Cell Physiology (6 units).** Prerequisite: consent of instructor. Linear circuit analysis, including admittance, transfer admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in lectures and laboratory, with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and patch clamp techniques, with circuit analysis and noise considerations. Digital electronics cover logic gates, sequential circuits, and A/D and D/A conversion, with introduction to sampling theory.

Mr. Bezanilla, Mr. Vergara (F)

**221. Cell Physiology: Excitability (6 units).** Prerequisite: course 220 or consent of instructor. In-depth coverage of general properties of excitable cells, linear cable properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and gating currents, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

Mr. Bezanilla, Mr. Vergara (W)

**222. Cell Physiology: Cellular Interaction.** Prerequisite: consent of instructor. Simple and complex cellular interactions in nervous system. Study of synaptic transmission to higher-level cell-cell interactions, culminating in examination of mechanisms of central nervous system functions.

Mr. Letinsky (Sp)

**M223. Membrane Molecular Biology (6 units).** (Same as Biological Chemistry M223.) Lecture, five hours. Prerequisites: Biological Chemistry CM253 or consent of instructor, graduate or selected upper division undergraduate standing. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. Mr. Kaback, Ms. Papazian, and the Staff (W)

**224. Transport Systems in Cell Membranes.** Prerequisite: consent of instructor. Properties of pumps and carriers in cell membranes and ion (Na, K, H, and Ca) transport across plasma membranes of single cells and epithelia.

Mr. Sachs, Mr. Wright

**M225: Comparative Endocrinology: Molecular to Behavioral.** (Same as Physiological Science M225.) Lecture, two hours; discussion, two hours. Limited to graduate students. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis.

Mr. Schlinger, Ms. Wayne (F)

**226. Excitation-Contraction Coupling in Muscle (2 to 6 units).** Prerequisite: consent of instructor. Detailed study of relationship between membrane excitation and contractile activation in muscle.

Mr. Vergara (Sp)

**227. Biochemistry and Mechanics of Muscle (2 to 6 units).** Prerequisite: consent of instructor. Detailed study of biochemistry, energetics, and contractile mechanisms in muscle.

Mr. Homsher

**228. Epithelia: Structure and Function (2 units).** Prerequisite: consent of instructor. Lectures and seminars on physiology of epithelia cells, with particular emphasis on membrane transport. S/U grading.

Mr. Wright (W)

**229. Ion Permeation and Gating Kinetics of Channels and Carriers in Biological Membranes.** Lecture, three hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Theoretical methods for modeling ion permeability and gating kinetics of membrane channels and carriers. For description of fluxes, analysis of approaches based on electrodiffusion and statistical mechanics. For study of gating, analysis in depth of current transients, current fluctuations, and single-channel currents. S/U grading. (W)

**250A-250B-250C. Critical Topics in Physiology (2 to 8 units each).** Prerequisite: consent of instructor. Advanced treatment of critical topics in physiology by staff for graduate and postdoctoral students in biomedical sciences.

**260. Use of Laboratory Animals in Research.** Prerequisite: consent of instructor. Introductory course for graduate students in medical and biological sciences, covering principles and practical problems in handling and use of common laboratory animal species.

**M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars (2 units each).** (Same as Anatomy M270A-M270B-M270C.) Lecture, one hour; discussion, one hour. Prerequisite: graduate standing or consent of instructor(s). Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty members from Anatomy and Cell Biology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

(F,W,Sp)

**596. Directed Individual Study or Research (2 to 12 units).** Prerequisite: consent of instructor.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units).** Prerequisite: consent of instructor.

**598. Thesis Research for M.S. Candidates (2 to 12 units).** Prerequisite: consent of instructor.

**599. Dissertation Research for Ph.D. Candidates (2 to 12 units).** Prerequisite: consent of instructor.

 Esther Sinclair, Ph.D., *in Residence (Medical Psychology)*  
 Gary W. Small, M.D., *in Residence*  
 M. Belinda Tucker, Ph.D., *in Residence (Biobehavioral Sciences)*

#### Assistant Professors

Kyle B. Boone, Ph.D., *in Residence (Neuropsychology)*  
 Joel T. Braslow, M.D., *in Residence*  
 Christopher Evans, Ph.D., *in Residence (Biobehavioral Sciences)*  
 Kym Faull, Ph.D., *in Residence (Biobehavioral Sciences)*  
 Itzhak Fried, M.D., Ph.D., *in Residence*  
 Melissa Hines, Ph.D., *in Residence (Biobehavioral Sciences)*  
 Charles H. Hinkin, Ph.D., *in Residence (Neuropsychology)*  
 Margaret Kemeny, Ph.D., *in Residence (Biobehavioral Sciences)*  
 Gregory B. Leong, M.D., *in Residence*  
 Andrew F. Leuchter, M.D., *in Residence*  
 Nigel Maidment, Ph.D., *in Residence (Biobehavioral Sciences)*  
 Karen J. Saywitz, Ph.D., *in Residence (Biobehavioral Sciences)*  
 Barbara Silver, M.D., *in Residence*  
 Tony L. Strickland, Ph.D., *in Residence (Biobehavioral Sciences)*  
 Margaret L. Stuber, M.D., *in Residence*  
 Jerome Vaccaro, M.D., *in Residence*

Wilfred G. Van Gorp, Ph.D., *in Residence (Biobehavioral Sciences)*  
 James A. Waschek, Ph.D., *in Residence (Biobehavioral Sciences)*  
 Joseph B. Watson, Ph.D., *in Residence (Biobehavioral Sciences)*

#### Lecturers

Veronica Abney, M.S.W. *(Social Work)*  
 James C. Allen, M.A. *(Mental Health Administration)*  
 Linda A. Andron, M.S.W. *(Social Work)*  
 Barbara A. Bass, M.S.W. *(Social Work)*  
 Diane J. Bass, M.S.W. *(Social Work)*  
 Angela Farrell, M.S.W. *(Social Work)*  
 David J. Fisher, Ph.D. *(Biobehavioral Sciences)*  
 Florence Frisch, M.S.W. *(Social Work)*  
 Mary Lou Gottlieb, M.S.W. *(Social Work)*  
 Joan E. Johnson, M.S.W. *(Social Work)*  
 Martha B. Jura, Ph.D. *(Biobehavioral Sciences)*  
 David T.A. Kaplan, M.S.W. *(Social Work)*  
 Barbara Korne, M.S.W., L.C.S.W. *(Social Work)*  
 Myrtle Mandiberg, M.A. *(Biobehavioral Sciences)*  
 Miriam A. Meyer, M.S.W. *(Social Work)*  
 Natalie R. Newman, M.A. *(Biobehavioral Sciences)*  
 Janice Roper, R.N., Ph.D. *(Nursing)*  
 Naomi Siegel, L.C.S.W. *(Social Work)*  
 Cheryl Spurlock, L.C.S.W. *(Social Work)*  
 Alice Sutton, M.S.W. *(Social Work)*  
 Donna Warren, R.N., M.N., C.S. *(Nursing)*

#### Associate Professor of Clinical Psychiatry

Spencer Eth, M.D., *in Residence*

#### Assistant Professor of Clinical Psychiatry

Vivien K. Burt, M.D., Ph.D.

#### Adjunct, Visiting, and Clinical Professors

Jambur V. Ananth, M.D., *Adjunct*  
 Christiane A.M. Baltaxe, Ph.D., *Adjunct (Biobehavioral Sciences)*  
 James Birren, Ph.D., *Adjunct (Biobehavioral Sciences)*  
 Annette M. Brodsky, Ph.D., *Adjunct (Medical Psychology)*  
 Warren S. Brown, Ph.D., *Adjunct (Biobehavioral Sciences)*  
 John P. Docherty, M.D., *Visiting*  
 John R. Elpers, M.D., *Adjunct*  
 Calvin J. Frederick, Ph.D., *Adjunct (Medical Psychology)*  
 Irene T. Goldenberg, Ed.D., *Adjunct (Medical Psychology)*  
 Roderic Gomey, M.D., Ph.D., *Adjunct*  
 Christoph M. Heinicke, Ph.D., *Adjunct (Medical Psychology)*  
 Jean C. Holroyd, Ph.D., *Adjunct (Medical Psychology)*  
 Melvin R. Lansky, M.D., *Adjunct*  
 Walter Ling, M.D., *Visiting*  
 Charles P. McCreary, Ph.D., *Clinical (Medical Psychology)*  
 James F. McGinnis, Ph.D., *Adjunct (Biobehavioral Sciences)*  
 James G. Miller, M.D., Ph.D., *Adjunct*  
 Armando Morales, D.S.W., *Adjunct (Social Work)*  
 Michel Philippart, M.D., *Adjunct*  
 H. Rebecca Rausch, Ph.D., *Adjunct (Neuropsychology)*  
 Kiki V. Roe, Ph.D., *Adjunct (Medical Psychology)*  
 Abraham Rosenberg, Ph.D., *Adjunct (Biobehavioral Sciences)*  
 Iradj Siassi, M.D., *Adjunct*

#### Adjunct, Visiting, and Clinical Associate Professors

Lori L. Aitshuler, M.D., *Clinical*  
 Alexander Bystritsky, M.D., Ph.D., *Clinical*  
 V. Charles Charuvastra, M.D., *Adjunct*  
 Milton S. Davis, Ph.D., M.D., *Adjunct*  
 Armen Djenderedjian, M.D., *Clinical*  
 L. Jaime Fitten, M.D., *Adjunct*  
 Michael Gitlin, M.D., *Visiting*  
 Victor Haddox, M.D., J.D., *Adjunct*  
 Jeffrey S. Hammer, M.D., *Clinical*

Yih-Ing Hser, Ph.D., *Adjunct (Biobehavioral Sciences)*

Behnaz Jalali, M.D., *Clinical*  
 David J. Martin, Ph.D., *Clinical*  
 Ricardo P. Mendoza, M.D., *Clinical*  
 Bruce Naliboff, Ph.D., *Clinical*  
 Mary J. O'Connor, Ph.D., *Adjunct (Medical Psychology)*  
 James J. Preis, J.D., *Adjunct (Law)*  
 Warren R. Procci, M.D., *Adjunct*  
 Rochelle Reno, Ph.D., *Clinical*  
 Albert Sattin, M.D., *Clinical*  
 James E. Spar, M.D., *Clinical*  
 Jeffery N. Wilkins, M.D., *Adjunct*  
 Boghos Yeravanian, M.D., *Clinical*

#### Adjunct, Visiting, and Clinical Assistant Professors

Mahmoud Ajang, M.D., *Clinical*  
 JoAnn D. Als, M.D., *Clinical*  
 Sylvia Askin-Edgar, M.D., *Clinical*  
 Beth Bernstein, Ph.D., *Clinical*  
 Sylvia Boris, Ph.D., *Clinical*  
 Leslie A. Brothers, M.D., *Clinical*  
 Karl S. Burgoyne, M.D., *Clinical*  
 Christopher K. Chung, M.D., *Clinical*  
 Steven Clark, Ph.D., *Clinical (Biobehavioral Sciences)*  
 Kathleen A. Daly, M.D., *Clinical*  
 Mark De Antonio, M.D., *Visiting*  
 Pamela Diefenbach, M.D., *Visiting*  
 Steven Ganzell, Ph.D., *Clinical (Medical Psychology)*  
 Buford Gibson, M.D., *Clinical*  
 Charles S. Grob, M.D., *Visiting*  
 Enid L. Gruber, Ph.D., *Adjunct (Biobehavioral Sciences)*  
 Barry Guze, M.D., *Clinical*  
 Neil Hartman, M.D., Ph.D., *Clinical*  
 Maga E. Jackson-Triche, M.D., *Clinical*  
 Sandra A. Jacobson, M.D., *Clinical*  
 Christopher Kessler, M.D., *Clinical*  
 Albert-Jan Kettenis, M.D., *Clinical*  
 Bryan King, M.D., *Clinical*  
 Ralph Jan Koek, M.D., *Clinical*  
 Ramu Komanduri, M.D., *Clinical*  
 Paul G. Longobardi, Ph.D., *Clinical (Biobehavioral Sciences)*  
 Christine M. Lo Presti, Ph.D., *Clinical (Neuropsychology)*  
 Susan E. McPherson, Ph.D., *Clinical (Biobehavioral Sciences)*  
 James R. Mervis, M.D., *Clinical*  
 Maura N. Mitrushina, Ph.D., *Clinical (Neuropsychology)*  
 Martin E. Mueller, M.D., *Clinical*  
 Robert J. Myatt, Ph.D., *Clinical (Medical Psychology)*  
 Samuel Nathan, M.D., Ph.D., *Clinical*  
 Robert E. Neshkes, M.D., *Clinical*  
 Thomas F. Newton, M.D., *Clinical*  
 Vijay M. Ranganath, M.D., *Clinical*  
 Mark A. Ritchie, M.D., *Clinical*  
 Robert P. Rose, M.D., Ph.D., *Clinical*  
 Todd F. Sadow, M.D., *Clinical*  
 Jacob Samler, M.D., *Clinical*  
 Joan F. Scheibel, M.D., Ph.D., *Clinical*  
 J. Christine Schneider, M.D., *Clinical*  
 Stephen B. Seager, M.D., *Clinical*  
 Pranav Shah, M.D., *Clinical*  
 Andrew Shaner, M.D., *Clinical*  
 Daniel Siegel, M.D., *Visiting*  
 Christine Skotzko, M.D., *Clinical*  
 Susan L. Smalley, Ph.D., *Adjunct (Biobehavioral Sciences)*  
 Paula Stoessel, Ph.D., *Visiting*  
 B. Thomas Strouse, M.D., *Clinical*  
 David L. Sultzer, M.D., *Clinical*  
 David T. Takeuchi, Ph.D., *Visiting*  
 Douglas Tucker, M.D., *Clinical*  
 Walter B. Van Vort, M.D., *Clinical*  
 Bradley Warren, M.D., *Visiting*  
 William C. Wirshing, M.D., *Adjunct*  
 Frnsca L. Yan-Go, M.D., *Clinical*  
 Bonnie Zima, M.D., *Clinical*

## Scope and Objectives

The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its programs for psychiatry interns and residents and for medical students (courses for medical students are listed in the *Announcement of the UCLA School of Medicine* and the *School of Medicine Handbook of Clinical Courses*).

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a department training program, must also meet required course prerequisites determined by specific educational programs. Additional information is available from the department office.

## Programs

The **Developmental Disabilities Immersion Program (DDIP)** is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development—Field Studies Development. Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities. Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements. Student individualized research projects are also part of the immersion experience. Students interested in the program should contact the Office of Instructional Development—Field Studies Development (80 Powell Library) or the Psychology Undergraduate Advising Office (1531 Franz Hall).

The department offers a 12-month **Clinical Psychology Internship**, which is a Graduate Division certificate program. Students enrolled in clinical psychology programs at APA-approved universities are eligible to apply. Applications are accepted through December 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact the Psychology Internship Training Office, 68-251 NP1&H (310-825-0122).

Information on clinical practicums which are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

## Upper Division Courses

**M112. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M136Q.) Prerequisite: consent of instructor. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences. (W)

**M119. Evolution of Intelligence.** (Same as Psychology M119K.) Lecture, two hours; discussion, two hours. Prerequisites: Psychology 15 or 115, introductory statistics course, junior or senior standing, consent of instructor. Intelligence treated as neural information-processing capacity; its evolution in vertebrates correlated with evolution of enlarged brains. Quantitative approaches in evolutionary biology and neurosciences. Mr. Jerison (W)

**M142. Advanced Statistical Methods in Psychology.** (Same as Psychology M142.) Lecture, two hours; discussion, 90 minutes. Prerequisite: Psychology 41. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlational techniques, analysis variance, and multiple regression. Mr. Nihira (W)

**M180A. Contemporary Problems in Mental Retardation.** (Same as Psychology M180A.) Prerequisites: Psychology 10, 41, and 127 or 130. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion. Mr. Galbraith (W)

**M180B. Contemporary Issues in Mental Retardation.** (Same as Psychology M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers. Mr. Fluharty (Sp)

**M181A-M181B. Research in Contemporary Problems in Mental Retardation.** (Same as Psychology M181A-M181B.) Corequisites: courses M180A, M180B. Research experience. In Progress grading. Mr. Fluharty and the Staff (W,Sp)

**M190. Ethology: Physiology of Behavior and Learning in Animals.** (Same as Psychology M119L.) Prerequisites: Psychology 115, junior standing. Basic course for undergraduate students which integrates systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with broad biological, evolutionary perspective. Mr. Soltysik (W)

**M191. Biological Bases of Psychiatric Disorders.** (Formerly numbered 191.) (Same as Biology M191 and Physiological Science M181.) Lecture, three hours; outside study, nine hours. Prerequisite: Biology M175A or Neuroscience M101A or Physiological Science 111A or M180A or Psychology M117A or consent of instructor. Underlying brain systems involved in a number of psychiatric neurologic disorders, including schizophrenia, depression, obsessive/compulsive disorder, as well as neurologic disorders exemplified by both clinical treatment and experimental research. Mr. Levine and the Staff

**199. Special Studies in Psychiatry (2 to 4 units).** Prerequisite: consent of instructor and department chair, based on written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms are available in Office of Education, C8-202 NP1&H. Mr. Yager

## Graduate Courses

**M203. Molecular Neurobiology.** (Same as Neuroscience M203.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 201A-201B or equivalent, basic biochemistry, consent of instructor. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology. Mr. Campagnoni (F)

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Anatomy M204, Biology M280, Neuroscience M204, and Physiology M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging. Mr. de Vellis, Ms. Macklin (W)

**205. Madness in the Enlightenment: Care and Cure of Mental Illness in the Age of Reason.** Prerequisites: graduate standing, consent of instructor. Exploration of writings of physicians and reformers of the Enlightenment who studied the mentally ill, treated them, and recorded their theories, findings, and recommendations between ca. 1750 and 1850. Ms. Weiner

**207A-207B-207C. Hypnosis Seminars (2 units each).** Prerequisite: psychology intern, psychiatry resident, member of (or trainee in) one of the licensed mental health professions, or consent of instructor. Experiential seminar intended to prepare mental health professionals for clinical applications, involving didactics, demonstration, practice, and feedback. Following training in inductions and development of classic hypnotic phenomena (e.g., age regression, hypnoanesthesia), focus on psychotherapeutic applications, including direct symptom removal, behavioral methods, and hypnoanalysis. Emphasis on developing skill for application in clinical practice. S/U grading. Ms. Holroyd (F,W,Sp)

**208A-208B-208C. Clinical Neuropsychology (2 units each).** Lecture, 90 minutes. Prerequisites: graduate or postgraduate standing, consent of instructor. Introduction and review of neuropsychological concepts, including functional neuroanatomical systems of the brain, analytic and synthetic activities of the brain, effects of generalized and focal brain impairment on behavior, and introduction to use of neuropsychological test instruments. Mr. Asarnow (W), Mr. Green (F)

**M210. Seminar: Psychocultural Studies.** (Same as Anthropology M234.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. Mr. Kernan (W)

**M213A-M213B. The Individual in Culture.** (Same as Anthropology M235A-M235B.) Lecture, three hours. Course M213A is prerequisite to M213B. In Progress grading. Mr. Edgerton

**M214. Cross-Cultural Studies of Socialization and Children.** (Same as Anthropology M236P.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research. Mr. Weisner (F)

**M215. Culture, Adaptation, and Intervention.** (Same as Anthropology M235S.) Prerequisite: consent of instructors. Role of ecological, social, and cultural influences on family adaptation, child competence, and interventions, including theory, empirical research, and applied/policy topics. Review and critique of current research in this field. Mr. Gallimore, Mr. Weisner (W)

**M221. Cellular and Molecular Neurochemistry.** (Formerly numbered M221A.) (Same as Anatomy M221, Biological Chemistry M221, Neuroscience M240, and Pharmacology M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

Mr. de Vellis, Mr. Olsen (W)

**M222. Transcultural Psychiatry.** (Same as Anthropology M234P.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit.

Mr. Edgerton (Sp)

**223A-223B-223C. MMPI Seminars and Case Conferences (2 units each).** Prerequisite: psychology intern, psychiatry resident, or consent of instructor. Seminar and case conference on interpretation of Minnesota Multiphasic Personality Inventory (MMPI) — theory, principles, and research into personality types.

Mr. Caldwell (F,W,Sp)

**226A-226B. Childhood Psychopathology Research Seminars (2 units each).** Seminar, 90 minutes. Current research in causes and behavioral manifestations of childhood psychopathology. Discussion on diagnosis and etiology of childhood disturbances.

Ms. Sigman, Mr. Tanguay (F,W)

**231. Hispanic Mental Health Issues and Treatment (2 units).** Prerequisite: consent of instructor. Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparison of psychiatry in Mexico and the U.S., analysis of various theoretical perspectives regarding biopsychosocial behavior; distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clientele.

Mr. Morales (W)

**M234. Affective Disorders (2 or 4 units).** (Same as Psychology M280.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

Mr. Gitlen, Ms. Hammen

**M235. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M236Q, Education M222A, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

(W)

**236A-236B-236C. Psychology Interns Seminars (1 unit each).** Seminar, 90 minutes. Current topics in clinical psychology. Group-selected topics for discussion pertaining to psychopathology, diagnostic evaluation, and modalities of treatment. S/U grading.

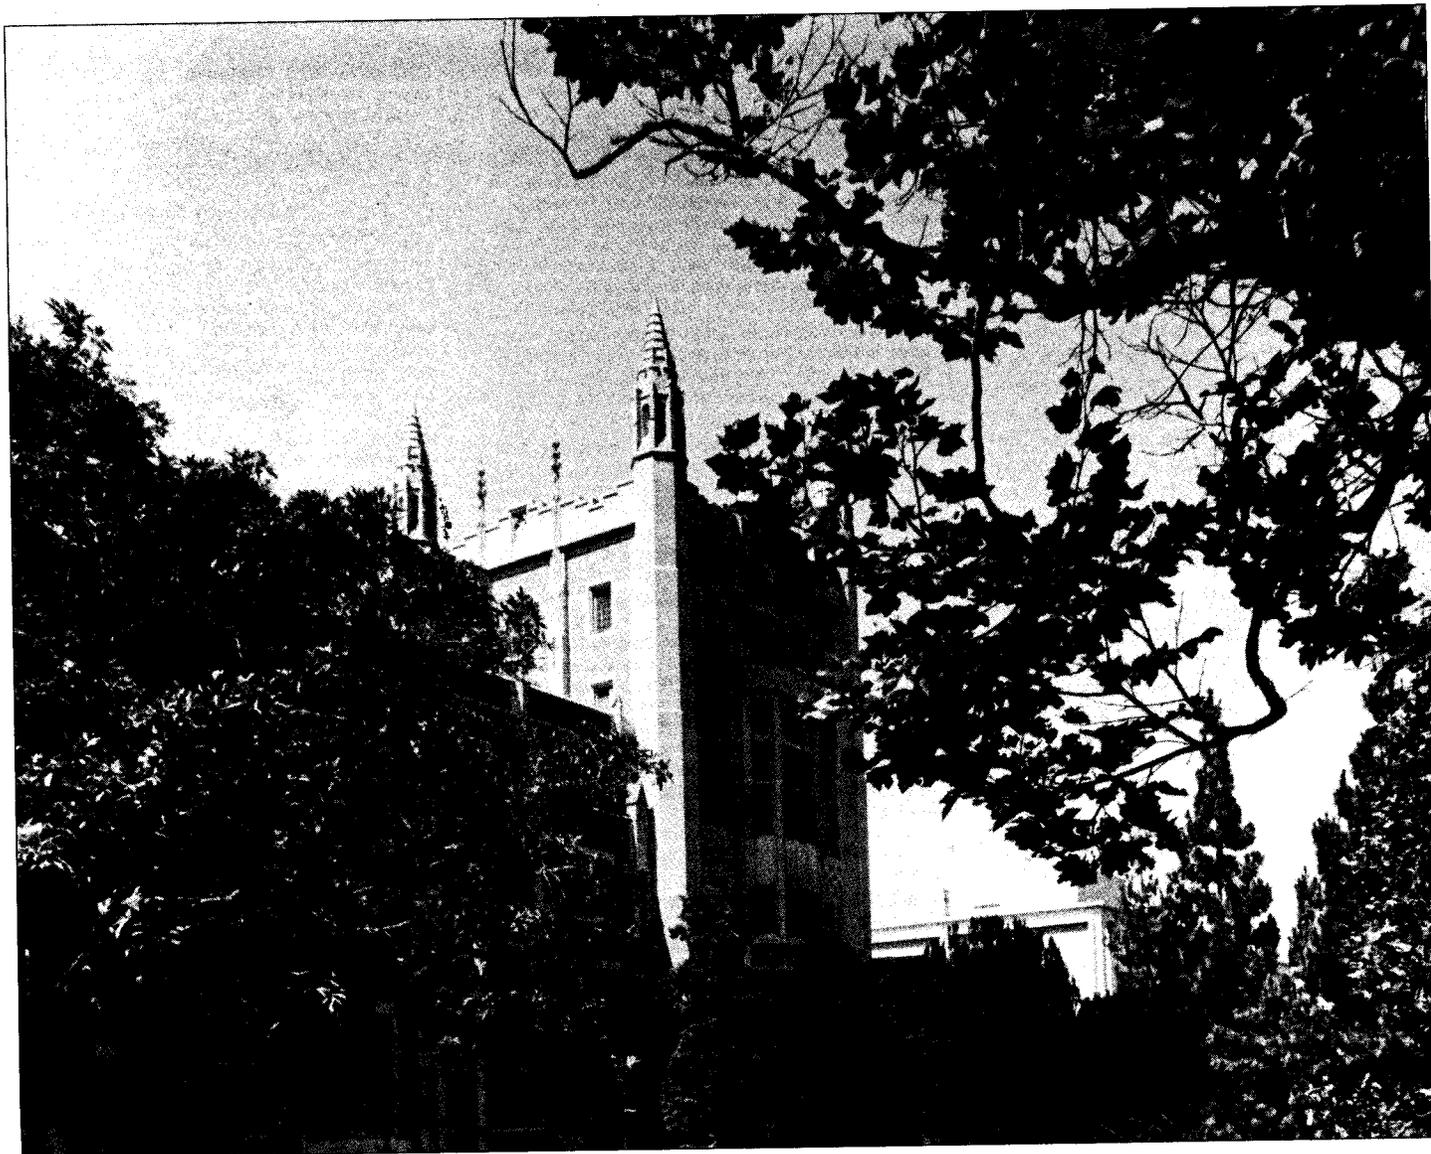

Ms. Holroyd (F,W,Sp)

**237. Seminar: Behavioral Neuroimmunology (1 unit).** (Formerly numbered M237.) Lecture, one hour per month; discussion, 30 minutes per month. Series of lectures presented the second Wednesday of each month throughout academic year by invited speakers. S/U grading.

Ms. Kemeny

**238. Survey Research Techniques in Psychocultural Studies.** Lecture, 90 minutes; seminar, 90 minutes. Prerequisites: graduate standing, consent of instructor. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

Ms. Tucker (W)

**M240. Assessment and Treatment of Afro-American Families.** (Formerly numbered 240.) (Same as Afro-American Studies M240.) Seminar, three hours. Designed for both mental health trainees and graduate students interested in developing and refining skills in assessment and treatment of African American families within a sociocultural context.

Ms. Tucker, Ms. Wyatt (Sp)

**242. Parent and Child Psychotherapy Seminar (1 unit).** Prerequisites: current experience in psychoanalytically oriented child psychotherapy, consent of instructor. Seminar meets throughout year. During Summer Quarter emphasis on initial clinical and research evaluation as well as early treatment of the child and family. During Fall, Winter, and Spring Quarters instructors use videotaped sessions and notes from their own clinical work to discuss such topics as diagnostic criteria, family system treatment formulations stressing work with parents and children, and such theoretical and technical issues as transference, resistance, overdetermined nature of symptoms, and termination. Student presentations encouraged in order to amplify clinical and theoretical issues and to become familiar with ongoing cases which are part of a systematic outcome study.

Ms. McDowell

**243A-243B-243C. Mental Retardation and Chronic Medical Illness Interdisciplinary Core Curriculum (1 unit each).** Lecture, 90 minutes. Prerequisite: consent of instructor. Survey series on major topic areas of mental retardation and chronic medical illness, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special deficits. Presented in interdisciplinary framework as generic information independent of discipline. S/U grading.

Ms. Sena (F,W,Sp)

**M246. Psychological Aspects of Mental Retardation.** (Same as Psychology M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

Mr. Tymchuk

**247A-247B-247C. Neurological and Psychological Bases of Behavior (1 unit each).** Discussion, two hours. Prerequisites: graduate standing, consent of instructor. Discussion of advances in neurophysiology and neuropsychology, with particular reference to modern developmental studies. Faculty members or advanced students present results of their research work in context of available literature; intense discussion during and after presentation. S/U grading.

Mr. Levine (F,W,Sp)

**M249. Neurobiology of Sleep (3 units).** (Same as Neuroscience M259 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

Mr. Siegel (F)

**M250. Medical Anthropology in Public Health.** (Same as Anthropology M266, Community Health Sciences M232, and Nursing M250.) Seminar, three hours. Cross-cultural aspects of human behavior as they relate to perception, treatment, incidence, and prevalence of disease and illness.

Ms. Browner, Ms. Scrimshaw

**253. Seminar: Child Development (1 unit).** Prerequisite: consent of instructor. Theories of development, systems of child development, and chronological aspects of child development. Presentation of assigned readings by students plays major role in each session.

Mr. Siegel

**254. Supporting Families of Children with Special Needs (2 units).** (Formerly numbered M254.) Lecture, one hour; discussion, 30 minutes. Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

Ms. Sammons (F)

**M255. Functional Organization of Behavior (2 units).** (Same as Neuroscience M255.) Prerequisite: consent of instructor. Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

Mr. McGuire, Mr. Woody (F)

**256. Basic Clinical Child Psychopathology (1 unit).** Prerequisite: consent of instructor. Weekly seminar covering basic clinical aspects of child psychopathology. Readings provided for basis of discussion on topics including interviewing of parents and children, diagnosis, and related syndromes. S/U grading.

Mr. Cantwell

**257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders (3 units each).** Laboratory, 90 minutes; didactic, 90 minutes. Didactic and practical training in communication and its dysfunction as these relate to language disabilities seen in interdisciplinary medical setting. Provides background for graduate and postdoctoral students who plan to engage in clinical work and/or clinical research in which language disturbances of childhood and adulthood are relevant.

Ms. Baltaxe (F,W,Sp)

**M258. Functional Neuropsychology (2 units).** (Same as Neuroscience M258.) Lecture, two hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Interdisciplinary course integrating current research publications in neuroanatomy, molecular neurobiology, synaptic neurophysiology, event-related potentials, neuropsychology of amnesia, and cognitive psychology of normal memory into a realistic model. S/U or letter grading.

Mr. Halgren (F)

**259. Legal and Ethical Issues with Vulnerable Populations (3 units).** Lecture, 90 minutes; laboratory, three and one-half hours. Discussion of current laws dealing with vulnerable populations (e.g., children, developmentally disabled people, elderly people); philosophies, ethics, ethical codes, issues, and how to resolve them. Use of videotapes and discussion of cases.

Mr. Tymchuk

**260. The Chronically Medically Ill Child and Family.** Lecture, three hours; seminar, one hour. Examination from a biopsychological perspective of ramifications of chronic illness affecting lifestyle and development of the child and family, including examination of relevant theoretical models and research. Clinical application to assessment and intervention strategies.

Ms. Betz (F,Sp)

**262A-262B-262C. Clinical Fieldwork in Developmental Disabilities and Chronic Illness (1 to 4 units each).** Prerequisites or corequisites: courses 243A-243B-243C, consent of instructor. Placement and supervision of clinical and consultation activities of interdisciplinary trainees in various community agencies, hospitals, or other related settings serving developmentally disabled or chronically medically ill children, youth, or adults. Supervision done jointly by community personnel on site, in collaboration with interdisciplinary faculty. S/U grading.

Mr. Forness

**264. Biofeedback: Theory, Research, and Clinical Application.** Seminar, two hours; laboratory, one hour. Introduction to concepts and techniques of biofeedback, including review of experimental literature and applications to various clinical problems (hypertension, headache, pain and anxiety, sexual dysfunction, cardiac arrhythmias, neuromuscular disorders, etc.). Training in use of portable biofeedback devices. Consideration of research and clinical issues.

Mr. Shapiro (Sp)

**265. Mind and Brain in Evolution (2 units).** Prerequisite: consent of instructor. Review of fossil evidence on organic evolution of the brain and implications of that evidence for evolution of mind and intelligence, with emphasis on quantitative approaches. Although some implications for cognitive psychology and individual differences are considered, the evolutionary analysis is "above the species level."

Mr. Jerison (Sp)

**266A-266B-266C. Psychophysiological Research (1 unit each).** Seminar, 90 minutes. Prerequisite: consent of instructor. Advanced seminar and discussion of ongoing laboratory research, involving concepts, experimental design, measurement, and data analysis. Current topics include regulation of physiological and subjective reactions to stress, psychophysiological research on diabetes, discrimination and control of blood pressure, and behavioral regulation of postural hypotension.

Mr. Shapiro (F,W,Sp)

**M270. Neural Basis of Memory.** (Same as Neuroscience M273.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

Mr. Woody

**M272. Psychological Anthropology.** (Same as Anthropology M234Q.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

Mr. Edgerton (W)

**M273. Advanced Seminar: Medical Anthropology.** (Same as Anthropology M263Q, Community Health Sciences M244, and Nursing M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

Ms. Browner (W)

**274. Neurophysiology and Behavior (3 units).** Prerequisites: graduate standing, consent of instructor. Analysis of strategies and approaches used to study behavior of mammalian organisms. Special emphasis on recent developments in electrophysiological recording techniques in behaving animals and how such developments relate to classical concepts of brain function.

Mr. Levine (Sp)

**275A-275B. Sociobiology Seminar (2 units each).** Prerequisite: consent of instructor. Review of sociological theory as it applies to adult bonding behavior: kin-selection theory, reciprocal altruism theory, mate selection theory, and bond strategy theory. Bonds viewed primarily from biological rather than psychological perspective. In Progress grading.

Mr. McGuire (F,W)

**276. Neurocognitive Plasticity in Adults (3 units).** Critical examination at multiple levels of brain function changes with aging — from structural changes at cellular, neurochemical, neuroanatomical, and neurophysiological levels on one hand to functional changes in sensory, motor, mnemonic, and intellectual abilities at other. Evaluation of behavioral, pharmacological, and transplantation techniques to enhance or restore function.

Mr. Halgren, Mr. Syndulko (Sp)

**M277. Cognitive Behavior Therapy with Children: Treatment and Systems of Care (2 units).** (Same as Psychology M285.) Seminar, 90 minutes. Prerequisites: graduate standing, consent of instructor. Cognitive behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

Ms. Asarnow (Sp)

**M279A. Seminar: Human Behavioral Ecology.** (Same as Anthropology M229A and Education M281A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology.

Mr. Blurton Jones

**M279B. Seminar: Reproduction, Families, and Parenting.** (Same as Anthropology M229B and Education M281B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences.

Mr. Blurton Jones

**M279C. Seminar: Selected Topics in Human Ethology.** (Same as Anthropology M229C and Education M281C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins.

Mr. Blurton Jones

**M280. Feminist Perspectives on Women, Reproduction, and Health.** (Same as Anthropology M269P and Nursing M280.) Seminar, three hours. Analysis of sociocultural and political economic factors that affect reproduction and women's health. Topics include relationships between women's domestic and extra-domestic roles and their health, policies of reproduction, and impact of new reproductive technologies. May be repeated for credit.

Ms. Browner (F)

**281. Behavioral Therapy in an Educational Setting.** Lecture, one hour; laboratory, six to 10 hours. Prerequisite: consent of instructor. Supervised experience in classroom working with exceptional children. Theoretical background furnished through one-hour weekly lecture.

Mr. Forness

**M282. Anthropology of Human Body.** (Same as Anthropology M234T.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

Ms. Browner (F)

**298. Current Topics in Biobehavioral Sciences (1 to 4 units).** Prerequisite: consent of instructor. Current issues in biobehavioral sciences offered on selective basis depending on instructor interest and topical relevancy of problems. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

**403. Individual Case Supervision (1 to 4 units).** Prerequisite: consent of instructor and department chair (based on written proposal to be structured by instructor and student prior to enrollment; additional information and proposal forms available in Office of Education, C8-202 NPI&H). One-to-one supervision of individual therapy cases, including analyses of patient data, supervision of ongoing treatment, informal didactic sessions on personality theory, and applications to patient management.

**414. Emergency Treatment Attending Rounds (1 unit).** Prerequisites: assignment to Emergency Treatment Unit, consent of instructor. Cases seen in emergency room during preceding night, reviewed by a consultant and emergency treatment staff. Exploration of assessment techniques, methods of intervention, and alternate modes of treatment.

**416. Treatment Planning Meetings (1 unit).** Prerequisite: consent of instructor. Treatment and management problems posed by inpatient psychiatry. Discussion of clinical psychopathology, treatment plans, and interdisciplinary skills. Emphasis on formulating accurate diagnostic assessments and planning effective treatment programs utilizing therapeutic methods of the milieu (somatic therapies, behavioral techniques, family therapy, group process, individual and dyadic treatment, etc.).

**424. Ward Milieu Meeting (1 unit).** Prerequisite: consent of instructor. Milieu course meetings designed to explore experientially and didactically multiple aspects of group process on a psychiatric inpatient unit.

**425. Teaching Case Conference (1 unit).** Prerequisite: consent of instructor. Review of diagnosis and treatment of full spectrum of disorders, with expert off-unit consultants.

**429. Child Outpatient Team (1 unit).** Prerequisite: consent of instructor. Weekly team meetings to coordinate clinical activities of trainees in Child Outpatient Department. Discussion of literature and theories related to selected cases. S/U grading.

**449. Parent Training Intervention Workshop (2 units).** Lecture, 90 minutes; discussion, one hour. Prerequisite: consent of instructor. Advanced clinical trainees learn behavioral techniques of assessment and treatment of parent/child problems. Lectures, case presentations, and workshops on various skills necessary.

Mr. Frankel

**462. School Intervention by Child Psychiatrists.** Seminar, two hours. Prerequisite: consent of instructor. Knowledge of children in schools through (1) field experience, (2) a didactic program, (3) group supervision. Each trainee selects a local elementary or junior high school as site of field experience in consultation. Supervision focuses on assessing needs of the school and initiating the consultation. Seminars consider theories of consultation, systems theory as applied to schools, organization of school systems, professional roles represented in the school (e.g., teachers, counselors, principals, etc.), and their special problems. In Progress grading.

**465. Pediatric Psychopharmacology (1 unit).** Prerequisite: child psychiatry fellow or consent of instructor. Designed for all fellows in child psychiatry. Background of childhood psychopharmacology; clinical evaluation of psychotropic drugs with children; clinical indications for various psychotropic drugs. Clinical supervision of individual cases provided along with seminars and discussions of various articles.

Mr. Shekim

**471. Grand Rounds (No credit).** Prerequisite: second-year resident in Child Service, child psychiatry fellow, or consent of instructor. Each month one second-year child psychiatry fellow presents a major clinical problem. Senior faculty discussants preside. The presenting trainees expected to cover pertinent literature and to assemble critical elements of information on case or problem at hand. Most sessions eligible for Continuing Medical Education credit.

**M472A. Nursing Care of Children with Developmental Disabilities.** (Same as Nursing M410A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: consent of instructor. Study of disability conditions of childhood and their effects on the child and family. Content based on normative developmental models with consideration for sociocultural diversity. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience.

Ms. Betz (F)

**M472B. Nursing Care of Children with Developmental Disabilities.** (Same as Nursing M410B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M472A and/or consent of instructor. Study of philosophical and conceptual models affecting care delivery for persons with developmental disabilities. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention.

Ms. Betz (W)

**M472C. Nursing Care of Children with Developmental Disabilities.** (Same as Nursing M410C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M472B and/or consent of instructor. Exploration and participation in assessment, planning, and delivery of health care to children with developmental disabilities in a variety of settings. Emphasis on expanded role of the nurse.

Ms. Betz (Sp)

**478. Clinical Genetics Rounds (No credit).** Prerequisites: medical graduate, consent of instructor. Weekly clinical rounds on patients seen in the wards during preceding week. House staff and others involved in clinical work may attend. Usually in-depth discussion of medical and genetic aspects of one or more disorders presented.

Ms. Crandall

**479. Genetics Clinic Presentation (No credit).** Prerequisite: consent of instructor. Weekly clinical teaching session on patients seen in preceding genetics clinic. In-depth discussion on genetics of each disorder.

Ms. Crandall and the Staff

**480. Analysis of Human Chromosome Studies (1 unit).** Prerequisite: consent of instructor. Chromosome karyotypes prepared in cytogenetics laboratory during preceding week presented and discussed with reference to clinical findings. Teaching includes interpretation of abnormal karyotypes and technical aspects of routine and special chromosome stains.

Mr. Sparkes

**481. Chromatography Review (No credit).** Prerequisites: premedical course or biochemistry, consent of instructor. Weekly session with presentation of amino acid chromatography carried out during preceding week. Interpretation of abnormal chromatograms together with technical aspects of tests used.

Mr. Cederbaum

**485. Medical Genetics Seminar (No credit).** Prerequisites: introductory course, consent of instructor. Weekly lecture series intended for those interested in genetics or in specific topic to be presented. Speakers are invited for their expertise or research in some special area related to genetics and may be from UCLA or elsewhere. Discussion and questions from audience encouraged.

Ms. Crandall and the Staff

**596P. Individual Studies in Psychiatry (2 to 12 units).** Prerequisite: consent of instructor and department chair, based on written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms available in Office of Education, C8-202 NPI&H. Directed individual research and study in psychiatry at graduate level.

Mr. Yager

## Radiation Oncology

B265 UCLA Medical Plaza 200,  
(310) 825-9304

### Chairs

H. Rodney Withers, M.D., D.Sc., *Chair*  
Guy J.F. Juillard, M.D., *Vice Chair, Clinical Affairs*

## Scope and Objectives

The Department of Radiation Oncology includes clinical divisions at the UCLA Medical Plaza and Medical Center, Wadsworth VA Medical Center, and divisions of experimental radiation biology and medical radiation physics. Research and teaching facilities are available at the UCLA Medical Plaza, UCLA Medical Center, and Wadsworth VA. The primary clinical mission of the department is the management of patients who have cancer and benign intracranial lesions, although ionizing radiations also are used for preparing patients for bone marrow transplantations and for altering the immune systems of patients with a range of illnesses. Knowledge of the disease in question, the comparative efficacy of radiation therapy and other methods, radiation biology and pathophysiology, and the physical characteristics of varying radiations is essential.

Research interests range from clinical problems through cellular kinetics, radiation modifiers, radiation chemistry, molecular biology, immunology, and basic and applied physics. The educational programs serve medical, dental, nursing, and radiation therapy students, and community and postgraduate physicians who are qualifying for certification in radiation oncology by the American Board of Radiology.

For further details on the Department of Radiation Oncology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Radiological Sciences

1V-365 Center for the Health Sciences, (310) 825-7811

### Professors

Zoran L. Barbaric, M.D.  
 Jorge R. Barrio, Ph.D.  
 Edward J. Hoffman, Ph.D.  
 Sung-Cheng (Henry) Huang, D.Sc.  
 Hooshang Kangarloo, M.D. (*Distinguished Teaching Award*), Chair  
 John C. Mazzotta, M.D., Ph.D.  
 William H. McBride, D.Sc.  
 Michael E. Phelps, Ph.D. (*Jennifer Jones Simon Professor of Biophysics*)  
 Heinrich R. Schelbert, M.D., Ph.D.  
 James B. Smathers, Ph.D.  
 Richard J. Steckel, M.D., *Acting Chair*  
 Milo M. Webber, M.D., LL.B.  
 H. Rodney Withers, M.D., D.Sc.  
 Leslie R. Bennett, M.D., *Emeritus*  
 Moses A. Greenfield, Ph.D., *FACR, Emeritus, Biomedical Physics Program Acting Director*  
 F. Eugene Holly, Ph.D., *Emeritus*  
 Norman S. MacDonald, Ph.D., *Emeritus*  
 Amos Norman, Ph.D., *Emeritus*

### Associate Professors

Denis B. Buxton, Ph.D., *in Residence*  
 James D. Collins, M.D.  
 Carolyn Kimme-Smith, Ph.D., *in Residence*  
 Robert B. Lufkin, M.D.  
 Nagichettiar Satyamurthy, Ph.D., *in Residence*

### Assistant Professors

Simon R. Cherry, Ph.D.  
 Magnus Dahlbom, Ph.D., *in Residence*  
 Kuo Ting (Bruce) Ho, Ph.D., *in Residence*  
 Carl K. Hoh, M.D., *in Residence*  
 Robert S. Lavey, M.D., M.P.H.  
 Michael McNitt-Gray, Ph.D., *in Residence*  
 William P. Melega, Ph.D., *in Residence*  
 Maribeth A. Raines, Ph.D., *in Residence*  
 Shantanu Sinha, Ph.D., *in Residence*  
 Ricky Taira, Ph.D., *in Residence*  
 M. Albert Thomas, Ph.D., *in Residence*

### Lecturers

Lan H. Kobe, M.S.  
 Nancy M. McCreary, M.S.  
 Marilyn C. Wexler, M.S.

### Adjunct Professors

L. Stephen Graham, Ph.D.  
 Lawrence E. Williams, Ph.D.

### Adjunct and Visiting Associate Professors

Robert F. Ackermann, Ph.D., *Adjunct*  
 Jeffrey R. Alger, Ph.D., *Visiting*  
 Martin W. Herman, Ph.D., *Adjunct*  
 Nicholas J. Mankovich, Ph.D., *Adjunct*  
 James W. Sayre, Dr.P.H., *Adjunct*  
 Usha Sinha, Ph.D., *Adjunct*  
 James S. Whiting, Ph.D., *Adjunct*

### Adjunct Assistant Professors

Guido Germano, Ph.D.  
 Hazel L. Lewis, Ph.D.  
 James C. Liu, Ph.D.  
 David Metcalf, Ph.D.  
 Peter J. Rosemark, Ph.D.  
 Daniel J. Valentino, Ph.D.  
 Robert E. Wallace, Ph.D.

## Scope and Objectives

The biomedical physics graduate program in the Department of Radiological Sciences offers training in four specialties: biophysics, medical imaging, therapeutic medical physics, and radiation biology and experimental radiation therapy. Specialized facilities for training and research are available in the departmental clinical laboratories, the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, the Image Processing Laboratory, and a number of associated hospitals. Highly specialized equipment includes the biomedical cyclotron, the radiation oncology cyclotron, the picture archiving and communication system (PACS), the positron emission tomography (PET) scanners, the stereotactic gamma irradiator, and many VAX and SUN computers with image processor systems. Students are trained to work as independent investigators. The program also prepares students for careers as professional medical physicists, and graduates are qualified to work in a clinical environment under the supervision of a board certified medical physicist or are prepared for a clinical medical physics residency.

Graduates in biomedical physics can expect to engage in any combination of clinical service, consultation, research, and teaching. Biomedical physicists are usually employed in hospitals frequently associated with a medical school, where they are members of the academic staff. They are also in demand in high-technology private industry engaging in research and development of diagnostic equipment. In government agencies, biomedical physicists are involved in the formulation and enforcement of regulations applied to the use of radiation in health care delivery.

## Requirements for Graduate Degrees

### Admission

In addition to the University's minimum requirements, candidates for admission are required to have a bachelor's degree with a major in a science. Also, it is expected that all applicants will have had (1) one year of college physics (calculus-based), (2) two years of college mathematics (through differential equations), equivalent to Mathematics 31A, 31B, 32A, 32B, 33A, 33B, (3) one year of college chemistry, and (4) at least one computer science course. Deficiencies in the above courses must be removed prior to advancement to candidacy.

In addition, applicants to the specialty fields of biophysics, medical imaging, and therapeutic medical physics must have acquired a strong foundation in basic physics or a degree in engineering, mathematics, or other sciences with physics training equivalent to a minor in physics (upper division courses in electricity and magnetism, quantum mechanics, atomic structure, statistical mechanics, and mechanics). Students may be accepted with some deficiencies in entrance requirements which must be removed prior to advancement to candidacy.

Scores on the Graduate Record Examination (GRE) General Test, taken in the last three years, should be sent to the department. Three letters of recommendation are required. If you already have a master's degree, one of the letters should be from your adviser.

A brochure describing the program in biomedical physics may be obtained from the Department of Radiological Sciences, Biomedical Physics Graduate Program, 1V-365 CHS, UCLA, Los Angeles, CA 90024-1721.

## Master of Science in Biomedical Physics

### Course Requirements

A minimum of 17 courses, including eight core courses (Radiological Sciences 200A, 204, 205, 216, 217, 218, 260A, 260B) and nine additional noncore courses (200B, 202A-202B-202C, 203, 208A, 208B, 209, 221), are required for the M.S. degree.

*UCLA's inverted fountain near Franz Hall.*

For students with a medical physics background or a career objective other than a practicing medical physicist, a more sharply focused curriculum may be advised.

Courses 596 and 598 may be applied toward the degree. Eight units of 500-series courses may be applied toward the total course requirement, four units toward the minimum graduate course requirement.

### Thesis or Comprehensive Examination Plan

You are required to write a thesis (Plan I) based on a research project or to pass a comprehensive examination (Plan II) consisting of material selected from the core courses. The examination is offered at least once a year and may be repeated once.

## Ph.D. in Biomedical Physics

### Admission

Admission to the doctoral program requires (1) selecting a specialty, (2) passing either all of the core courses with grades of B or better or the M.S. comprehensive examination, and (3) passing a written specialty qualifying examination which may be repeated once. Radiological Sciences 221 is required of all students. Completion of a master's program is not required.

### Qualifying Examinations

The qualifying examination for admission to the Ph.D. program should be taken by the end of your sixth term in residence. Once the qualifying examination is passed and you have selected a research topic in your specialty for the dissertation, you should, within a reasonable time frame agreed on with the dissertation adviser, form a doctoral committee and schedule the University Oral Qualifying Examination. This examination covers your mastery of the biomedical physics curriculum, particularly the areas of the proposed dissertation topic.

If you do not complete the dissertation within four years after taking the written qualifying examination, you may be required to take it again.

### Final Oral Examination

The final oral examination, or dissertation defense, is required.

## Upper Division Course

**199. Directed Individual Studies or Research for Undergraduate Students (2 to 4 units).** Prerequisite: consent of graduate adviser (based on written proposal outlining course of study or research). Directed individual studies in biomedical physics for undergraduate students to be structured by faculty member and student at time of initial enrollment.

Mr. Norman (F,W,Sp)

## Graduate Courses

**200A. Physics and Chemistry of Nuclear Medicine.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Nuclear structure, statistics of radioactive decay, nuclear radiations and their interaction with matter, nuclear decay processes, nuclear reactions, and compartment models. Physical and chemical properties of radioactive preparations used in nuclear medicine. Basic principles of nuclear medicine imaging, SPECT, and PET.

Mr. Hoffman (F)

**200B. Nuclear Medicine Instrumentation.** Lecture, one hour; laboratory, three hours. Prerequisite: course 200A or equivalent. Introduction to nuclear medicine instrumentation, including well ionization chambers, probe and well scintillation detectors, scintillation cameras, and single photon and positron emission computed tomography.

Mr. Dahlbom, Mr. Graham (Sp)

**201. Medical Radiation Accelerator Design.** Lecture, three hours. Prerequisite: course 216 or consent of instructor. Overview of physical principles involved in design of current particle accelerators (electron, proton, heavy particle) and analysis of characteristics of current accelerators and facility design.

Mr. Wallace (Sp)

**202A-202B-202C. Applications of Medical Physics to Clinical Problems.** Selected studies in clinical use of radioisotopes:

**202A. Nuclear Medicine.** Prerequisite: course 200B or consent of instructor. (F,W,Sp)

**202B. Diagnostic Radiology.** Prerequisites: courses 200A and 205, or consent of instructor. (F,W,Sp)

**202C. Radiation Therapy.** Prerequisites: courses 203, 204, 208B, 221. (F,W,Sp)

**203. Physics of Radiation Therapy.** Lecture, three hours; discussion, one hour. Prerequisites: courses 216, 221. Radiation quantities and units. Radiation dosimetry, clinical applications in treatment planning. Methods of measuring radiation quantities. Calibration of radiation therapy equipment.

Mr. Smathers (Sp)

**204. Introductory Radiation Biology.** Effect of ionizing radiation on chemical and biological systems.

Mr. McBride (W)

**205. Physics of Diagnostic Radiology.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Production of X rays, basic interactions between X rays and matter, X-ray system components, physics principles of medical radiography, radiographic image quality, fluoroscopy, image intensifiers, special procedures, X-ray protection. Laboratory experiments illustrate basic theory.

Mr. Sinha, Mr. Taira (F)

**206. Advanced Instrumentation.** Lecture, three hours; discussion, one hour. Prerequisite: course 205. Introduction to recent advances in digital diagnostic imaging systems, with topics centered on instrumentation including film digitizers, image equipment interfaces, computed radiography (CR), digital subtraction angiography (DSA), and picture archiving and communication systems (PACS).

Mr. Ho, Mr. Sinha (Sp)

**207. Dosimetry and Health Physics.** Lecture, three hours. Prerequisite: consent of instructor. Dosimetry of ionizing radiation, concepts in radiation protection, recommendation of national council on radiation protection and measurements, maximum permissible dose levels. Shielding calculations. Layout and design of radiographic installation. (F)

**208A. Medical Physics Laboratory: Medical Imaging.** Discussion, two hours; laboratory, four hours. Prerequisite: course 205. Hands-on experience performing acceptance testing and quality control checks of imaging equipment such as fluoroscopy, digital subtraction angiography, mammography, ultrasound, magnetic resonance imaging, computed tomography, and film processors.

Ms. Sinha

**208B. Medical Physics Laboratory: Radiation Therapy.** Discussion, two hours; laboratory, four hours. Prerequisite: course 203. Hands-on experience calibrating treatment planning and radiation therapy equipment.

Mr. Herman

**209. Digital Techniques in Radiological Sciences.** Lecture, three hours; discussion, one hour. Prerequisites: one course in C or another computer language, consent of instructor. Basic principles of digital technology used in radiological sciences. Concepts and experience necessary to undertake radiological research in a diverse computing environment. Discussion of relationship between computers and diagnostic equipment with regard to data acquisition, equipment interfacing, and data analysis.

Mr. McNitt-Gray (W)

**210. Principles of Medical Imaging.** Lecture, three hours; discussion, one hour. Prerequisite: course 209 or equivalent. Study of image representation, computational structures for imaging, linear systems theory, image enhancement and restoration, image compression, segmentation, and morphology. Special topics include visualization techniques, three-dimensional modeling, computer graphics, and neural net applications. Laboratory projects apply concepts developed in class. (Sp)

**211. Medical Ultrasound.** Lecture, 90 minutes; laboratory, two hours. Prerequisite: one calculus course; for nonbiomedical physics graduate students: consent of instructor. Production of real-time ultrasound images, transducer modeling and design, Doppler and color flow instrumentation, biohazards of ultrasound, ultrasound phantom design, and ultrasound tissue characterization techniques. Laboratory included.

Ms. Kimme-Smith (Sp)

**212. Biochemical Basis of Positron Emission Tomography (PET).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Introduction to biochemical processes and application of radioisotopes to study metabolism noninvasively by positron emission tomography (PET). Validation of kinetic models to derive quantitative information from PET. Introduction to clinical and experimental application of PET. (F)

Mr. Buxton (F)

**213. Quantitative Autoradiography.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Application of quantitative autoradiography for estimating brain and heart functions. Topics include 2-deoxyglucose method for metabolic rate; iodoantipyrine method for blood flow; amino acid method for protein synthesis; quantitative receptor autoradiography; neuroanatomy and neurophysiology of autoradiogram and PET scan interpretation.

Mr. Ackermann (Sp)

**214. Medical Image Processing Systems.** Lecture, three hours; discussion, one hour. Prerequisites: courses 209, 210, consent of instructor. Architecture, design, and programming of medical image processing systems and algorithms. Use and development of benchmark programs to evaluate performance of image processing systems. Provides experience with at least five different image processing systems.

Mr. McNitt-Gray (Sp)

**215. Breast Imaging Physics and Instrumentation.** Lecture, three hours; laboratory, two hours. Prerequisites: course 205, consent of instructor. Special requirements of mammography, design of dedicated mammography X-ray units from generators and tubes through screen/film cassettes. Stereotactic biopsy units, cost/benefit controversy of screening mammography, digital mammography, computer-aided diagnosis, telemammography, and breast ultrasound.

Ms. Kimme-Smith (F)

**216. Fundamentals of Dosimetry.** Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Review of fundamental interactions of radiation and matter and introduction to fundamentals of radiation dosimetry. Overview of dosimetry instrumentation as well as radiation sources.

Mr. Smathers (W)

**217. Statistics and Data Analysis in Biomedical Physics.** Lecture, three hours; laboratory, two hours. Prerequisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Introduction to computer-based statistical concepts, data analysis, and experimental design within biomedical physics research. Standard statistical packages and various statistical computing algorithms on relevant data sets within the radiological sciences.

Mr. Sayre (W)

**218. Radiologic Functional Anatomy.** Lecture, three hours; discussion, two hours. Prerequisite: consent of instructor. Introduction to human anatomy as visualized through radiological and nuclear medicine imaging modalities such as X ray, CT, MRI, sonogram, PET, and SPECT.

Ms. Kimme-Smith, Mr. McBride

**219. Principles and Applications of Magnetic Resonance Imaging.** Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Basic principles of magnetic resonance (MR), imaging physics, and contrast mechanisms. Emphasis on hardware, Fourier transform imaging methods, structure of pulse sequences, various scanning parameters and reduction of artifacts. Introduction to MR spectroscopy, MR angiography, and fast imaging techniques.

Mr. Sinha (Sp)

**220A-220D. Laboratory Rotations in Biomedical Physics (2 units each).** Prerequisite: consent of instructor. Laboratory projects to provide students with introduction to the field. One oral and one written presentation required. S/U grading. **220A.** Biophysics; **220B.** Medical Imaging; **220C.** Therapeutic Medical Physics; **220D.** Radiation Biology and Experimental Radiation Therapy.

**221. Applied Health Physics.** Lecture, three hours; discussion, one hour. Prerequisites: course 216, consent of instructor. Basics of radiation safety as applied to medical applications. Introduction to all regulatory issues pertaining to medical uses of radioactivity.

Mr. Smathers (F)

**M230. Computed Tomography: Theory and Applications.** (Same as Biomathematics M230.) Prerequisite: consent of instructor. Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications.

Mr. Huang (W)

**M233. Principles, Practices, and Policies in Biotechnology (2 units).** (Same as Biological Chemistry M233, Biology M233, Chemical Engineering M233, Chemistry M233, Microbiology M233, and Microbiology and Immunology M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

Mr. Fox, Ms. Morrison (W)

**260A-260B-260C. Seminars: Medical Physics (2 units each).** Seminar, one hour. Courses 260A-260B must be taken prior to first Ph.D. oral qualifying examination. Joint critical study by students and instructors of fields of knowledge pertaining to medical physics. Periodic contributions made by visiting scientists. Discussion of research in progress. May be repeated. S/U (course 260A) or letter (courses 260B-260C) grading.

(W,Sp)

**266A-266B-266C. Seminars: Nuclear Medicine (2 units each).** Topics of current interest in nuclear medicine. Intended for physicians, radiation physicists, and graduate students. S/U grading.

(F,W,Sp)

**268. Radiopharmaceutical Chemistry.** Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Current concepts in radioactive pharmaceutical agents in clinical use, including promising investigational agents. Utilization of short-lived, cyclotron-produced isotopes in radiopharmaceuticals. Rational design of radiodiagnostic agents.

Mr. Barrio (Sp)

**269. Seminar: Medical Imaging (1 unit).** Prerequisite: consent of instructor. Continuous registration required of students in medical imaging specialty. Topics of current interest in medical imaging, with lecturers from the department, other universities, and private industry.

(F,W,Sp)

**495. Special Studies in Biomedical Physics.** Discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Teaching assistance in graduate laboratory courses under supervision of a faculty member. S/U grading.

**596. Research in Biomedical Physics (4 to 12 units).** Directed individual study or research. Only one 596 course may be applied toward M.S. degree requirements. May be repeated for credit.

**597. Preparation for Ph.D. Qualifying Examinations.** May not be applied toward M.S. degree requirements. May not be repeated. S/U grading.

**598. Research for and Preparation of M.S. Thesis (4 to 12 units).** Two 598 courses (or 598 and 596 combined) may be applied toward M.S. degree requirements. May be repeated. S/U grading.

**599. Research for Ph.D. Dissertation (4 to 12 units).** Prerequisite: successful completion of screening examinations. Research for and preparation of Ph.D. dissertation. May be repeated. S/U grading.

## Surgery

72-131 Center for the Health Sciences, (310) 825-7017

### Executive Chair

Michael J. Zinner, M.D. (*William P. Longmire, Jr., Distinguished Professor of Surgery*)

### Executive Vice Chair

J. Thomas Rosenthal, M.D.

### Vice Chairs

Leonard Makowka, M.D. (*Cedars-Sinai*)  
Edward P. Passaro, Jr., M.D. (*Wadsworth VA*)  
Howard A. Reber, M.D., (*Sepulveda VA*)  
Bruce E. Stabile, M.D., (*Harbor-UCLA*)  
Jesse E. Thompson, Jr., M.D. (*Olive View-UCLA*)

## Scope and Objectives

The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain broad knowledge of diseases treated by surgical means and to understand the pathology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the impact of surgical illness on the patient and the patient's family and environment.

Third-year students participate in a 12-week core clerkship in clinical surgery, assigned to either Harbor-UCLA Medical Center or a combination of UCLA, Wadsworth VA, and Olive View-UCLA Medical Centers. Each facility has a special orientation depending on the patient population and the individual staff. During the fourth year students may elect to take additional clinical rotations with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For further details on the Department of Surgery and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Upper Division Course

**199. Special Studies (2 to 8 units).** Prerequisite: consent of instructor. Individual projects carried out under direction of a faculty member. Special studies in surgery, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

---

# School of Nursing

Ada M. Lindsey, Dean

# 16

The excellent reputation of the UCLA School of Nursing has been achieved by the faculty, students, and graduates. The school is recognized nationally and internationally for the quality of the undergraduate and graduate programs.

Faculty members are selected for their expertise, both in clinical areas of specialization and in research, and for their ability to transmit knowledge. In addition, highly skilled nurses practicing in many clinical settings are affiliated with the school and participate in the educational process.

In the curriculum, strong emphasis is placed on clinical competency and research. Faculty members are particularly cognizant of the needs of patients who represent a broad ethnic, racial, and cultural spectrum and have provided an emphasis on cultural diversity within the curricula. The School of Nursing has especially good technological support established to enhance learning; for example, computer and media resources are available for student use and are integral to the environment. The school offers outstanding educational opportunities.

Students are selected for their capabilities, background, and potential for contributions to the profession and are prepared as highly competent professional nurses. Alumni are employed successfully at all levels in many settings and in different geographical areas.

Faculty, staff, and administration are proud of the accomplishments and recognition of the school and its graduates. The school continues to be in the forefront in preparing the future leaders in nursing.

## Adjunct Professor

Frances M. Wiley, R.N., M.N.

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. If you are interested in the academic programs offered, you are urged to attend a counseling session or request a copy of the *Announcement of the UCLA School of Nursing* by writing to the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702 (310-825-7181).

## History and Accreditation

In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1965 the Master of Nursing degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted.

The baccalaureate program has been continuously approved by the California Board of Registered Nursing since 1949. The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The Accrediting Service of the National League for Nursing has granted full accreditation to the programs since 1954.

## Degrees Offered

Bachelor of Science (B.S.)  
 Master of Nursing (M.N.)  
 Doctor of Nursing Science (D.N.Sc.)

## Bachelor of Science Degree

*Note: Course offerings are under revision.*

The baccalaureate program leading to the Bachelor of Science degree provides for a close interweaving of general and professional education. The physical, social, and emotional health aspects of nursing are emphasized

throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers.

Credit by examination is available to qualified students on review of previous education.

## Admission

The School of Nursing strives to attain a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on scholarship, diverse life experiences, and disadvantage. You must have completed a minimum of 84 quarter units, with grades of C or better in prerequisite courses and an overall grade-point average of 2.8 or better. Three letters of recommendation are also required. Diverse life experiences, including previous employment, volunteer work, and community service which reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantage such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical disabilities. Completed applications should reflect clearly identified career goals and documentation of your potential in nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits 45 students each Fall Quarter. In addition to the regular *UC Application for Undergraduate Admission and Scholarships* which must be returned in the self-addressed envelope included in the packet, an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702.

You can find a discussion of the pre-nursing curriculum and prehealth advising in "Preparing for a Professional School" in Chapter 5.

## Degree Requirements

The Bachelor of Science degree is granted on fulfillment of the following requirements:

- (1) You must complete 44 required courses (191 quarter units; unit value of courses ranges from two to eight units) of college work and satisfy the general University requirements.

(2) Of the required 44 courses, at least 20 courses must be in general education, including the courses listed under the "Prenursing Curriculum" in Chapter 5 on the College of Letters and Science.

(3) You must complete at least 24 courses (107 quarter units) of upper division coursework toward the degree, including Nursing 101, 104A, 104B, 105, 109, M115, 120A through 120E, 120G, 184, 190C, 190F, 192, 193, 195, four electives, Biostatistics 100A, Epidemiology 100.

(4) You must maintain an overall grade-point average of C (2.0) or better in all courses taken while a student in the School of Nursing.

(5) You must complete all required nursing courses in the school and receive grades of C or better in the following courses: Nursing 101, 105, 109, 120A through 120E, 120G, 190C, 190F.

(6) You must be enrolled in the School of Nursing during your final three terms in residence; the last nine courses must be completed while so enrolled.

**Study Lists** — You may not enroll in more than four courses per term unless a petition is approved in advance by the assistant dean.

## Honors

### Dean's Honors

Dean's Honors are awarded annually to undergraduate students completing the academic year with distinction. To be eligible you must achieve an overall grade-point average of 3.75 on a minimum of 36 graded units of work completed during the academic year.

### Honors at Graduation

Honors are awarded at graduation to students with a superior overall grade-point average. The levels of honors and the requirements for each level are: *summa cum laude*, an overall average of 3.771; *magna cum laude*, 3.662; *cum laude*, 3.504. To be eligible you must have completed at least 98 University of California units for a letter grade.

### School of Nursing Faculty Award

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor's and the master's program with the highest grade-point average in all nursing courses.

## Master of Nursing Degree

*Note: Course offerings and clinical specialties are under revision.*

In the Master of Nursing (M.N.) degree program, students contribute to improving nursing care through the application of advanced knowledge in nursing research, theory, and clinical practice. Throughout the program, the structure for nurse/client relationships and research is provided by the nursing process. This is a deliberative problem-solving activity which includes assessment,

diagnosis, intervention, and evaluation. In addition to their clinical specialization sequence, students may elect courses in teaching, consultation, and/or administration as preparation to meet their specific career goals.

## Admission

You must provide evidence of the following:

(1) Graduation from a recognized college or university having a National League for Nursing-accredited baccalaureate nursing program satisfactory to the School of Nursing and to the Graduate Division OR

Graduation with a baccalaureate degree in nursing from an international institution with a nursing program satisfactory to the School of Nursing and to the Graduate Division. You may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees.

(2) Status as a licensed registered nurse in the State of California.

(3) An upper division statistics course or a lower division statistics course with content equivalent to Biostatistics 100A, to be completed before entering the school.

(4) An upper division nursing research course taken at an NLN-accredited institution and equivalent to Nursing 193, to be completed before entering the school.

(5) An upper division physical assessment course equivalent to Nursing 192, to be completed before entering the school (not required of students selecting the nursing administration specialty).

(6) Professional and/or academic competence in nursing attested through three letters of recommendation.

(7) A scholarship record satisfactory to the Graduate Division and to the School of Nursing.

(8) A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) for applicants from foreign countries in which English is not the primary language and medium of instruction, whether licensed registered nurses in the U.S. or not (scores must be submitted prior to consideration for admission). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

(9) A passing score on the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination for international applicants who are not licensed registered nurses in the U.S., prior to consideration for admission.

In addition to the Graduate Division application, you must file the *Application for Admission to the School of Nursing*, available through the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702. The application deadline for Fall Quarter is March 15. For informa-

tion on admission to graduate standing, see Chapter 3.

## Major Fields or Subdisciplines

The School of Nursing offers graduate studies in the following areas:

Maternity Clinical Nursing Specialty  
 Medical-Surgical Nursing Specialty  
     Cardiopulmonary  
     Chronic Care  
     Critical Care  
     Oncology  
 Neonatal Critical Care Nurse Practitioner  
 Nurse Practitioner Specialty  
     Family  
     Gerontology  
     Occupational Health  
 Nursing Administration Specialty  
 Pediatrics Clinical Nursing Specialty  
 Psychiatric-Mental Health Nursing Specialty

## Degree Requirements

(1) A minimum of six core courses (18 units; unit value of courses ranges from two to four units) and additional coursework in the 100, 200, and 400 series is required for each area of clinical specialization. A total of eight units of 500-series courses may be applied toward the total course requirement for the degree.

(2) A minimum grade-point average of 3.0 is required. Grades of B are required in graduate clinical nursing courses in order to advance to the next clinical course in a series.

(3) A minimum of three terms of full-time enrollment (eight units per term) is required for academic residence.

(4) Successful completion of a comprehensive examination is required.

## Course Requirements

You must successfully complete the following:

(1) Core courses: (a) research in nursing (Nursing 204); (b) nursing theory, cultural diversity, and physiology (Nursing 203, 209A, 209B); (c) ethical and legal issues, management, education, and consultation (Nursing 220A, 220B and/or 220C and/or 220D).

(2) Clinical practice (Nursing 401, 402, 403, 405, 416, 417, 420A through 429C). Clinical course requirements vary for each specialty area; not all courses are required in each specialty.

(3) Clinical specialization.

Additional course requirements vary according to specialty area listed below.

### Maternity Clinical Nursing Specialty

The goal of this specialty is to develop clinical specialists who take a leadership role in the nursing management of the childbearing family in all phases of the reproductive cycle. Students develop individualized plans of study to meet their personal and professional goals. Guided options include management of low-risk pregnancy, alternative birthing options,

perinatal nursing, and basic neonatal intensive care. Required courses include Nursing 203, 204, 209A, 209B, 212, 220A, 220B or 220C or 220D, 223, 422A, 422B, 422C.

#### **Medical-Surgical Nursing Specialty**

The graduate of the medical-surgical nursing program is a specialist who takes leadership in the care of one or more specific groups of clientele whose health problems may be classified according to biological systems, pathology, acuity levels, medical treatment modalities, physical functions, or psychophysiological functions. Graduate students choose from existing clinical options (i.e., cardiopulmonary, chronic care, critical care, and oncology), and within each option they develop individualized plans of study to meet personal and career objectives.

*Cardiopulmonary*—This option is designed to prepare clinical nurse specialists to meet an increasing demand for improved health services for patients with cardiopulmonary diseases. Several years of experience in acute coronary/pulmonary care settings (medical and/or surgical) and/or in cardiac/pulmonary rehabilitation are highly recommended before entering this option. Graduates are expected to function as cardiopulmonary nurse clinicians, teachers, consultants, or research associates. Required courses include Nursing 203, 204, 209A, 209B, 210, 211, 214, 215, 220A, 220B or 220C or 220D, 423A, 423B, 423C.

*Chronic Care*—This option enables clinical nurse specialists to gain advanced skills in the assessment and interpretation of patient data and in the care of clients and families during various points in the chronic illness trajectory. The role of clinical nurse specialists in leadership positions, case management, and on interdisciplinary teams is an integral part of the option. Graduates are expected to function as expert clinicians, teachers, consultants, or research associates in a variety of health care settings. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220B or 220C or 220D, 232, 233, 423A, 423B, 423C.

*Critical Care*—The goal of this option is to prepare clinical nurse specialists in general critical care nursing. Students are encouraged to develop clinical focus in critical care. At least two years of prior experience in critical care nursing are highly recommended. Graduates are expected to function as critical care clinicians, educators, consultants, or researchers and to become leaders in a variety of health care settings. Required courses include Nursing 203, 204, 209A, 209B, 216, 217, 220A, 220B or 220C or 220D, 423A, 423B, 423C.

*Oncology*—This option prepares oncology clinical nurse specialists to provide and direct nursing care for critically and chronically ill cancer patients and their families in a variety of settings and in all phases of the health/illness continuum (prevention, treatment, rehabilitation). Graduates are expected to function as educators and consultants in all aspects of nurs-

ing care to patients with cancer and their families, nurses, and others in the broad field of oncology. Critique and application of research findings to clinical cancer nursing care are integrated throughout the program. Individualized plans for clinical practicums are available. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220B or 220C or 220D, 416, 417, 423A, 423B, 423C.

#### **Neonatal Critical Care Nurse Practitioner**

The primary goal of this option is the expansion of knowledge and clinical expertise necessary for neonatal critical care nurse practitioners. By combining newly learned physiological, developmental, and psychosocial knowledge, nurses can become highly skilled and caring practitioners for newborns. Two or more years of experience in a Level III nursery are highly recommended. Required courses include Nursing 203, 204, 209A, 209B, 212, 220A, 220B or 220C or 220D, 223, 264, 403, 420A, 420B, 420C.

#### **Nurse Practitioner Specialty**

*Family Nurse Practitioner Specialty*—This specialty prepares family nurse practitioners to take a leadership role in the care of individuals throughout the life span. The focus is on collaborative practice to assure comprehensive quality health care and health maintenance in outpatient, work site, nursing home, or home health settings. Emphasis is on the assessment, treatment, and evaluation of the client's responses to actual or potential health problems which may be chronic or acute and include primary prevention. Special options are available in occupational health or gerontology, with additional coursework. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220B or 220C or 220D, 264, 402, 429A-429B, 429C.

*Gerontology Nurse Practitioner*—Courses in the gerontology nurse practitioner option focus on the knowledge and skills needed for leadership roles in primary health care for older adults in ambulatory and long-term care facilities, at home, and in alternative settings. Required courses include those listed under the family nurse practitioner specialty above, Nursing 221, 425A.

*Occupational Health Nurse Practitioner*—This option integrates principles of occupational health assessment and care with primary ambulatory care of the adult. Practitioners evaluate the individual as seen within the work setting as well as within the family group. Primary focus and emphasis are on health status assessment, health promotion, illness/accident prevention, hazard control, screening, surveillance, and rehabilitation of adult workers.

Requirements are met through a combination of courses and experiences specific to the delivery of occupational health care services. Required courses include those listed under the family nurse practitioner specialty above, Nursing 412, Environmental Health Sciences 250, 251, Epidemiology 100.

#### **Nursing Administration Specialty**

This option focuses on organizational theory, health services and financial management, and the practice of nursing administration. Students gain the basic knowledge and skills required of nursing administrators in a volatile health care environment. Nursing content develops the knowledge of advanced management practice needed to plan and evaluate nursing services. Health services and financial management content provides a framework for organizing, directing, and coordinating health care resources. The program requires six terms of full-time study, and a 10-week spring administrative residency. Stipends for the residency program are provided by the institutions in which the residency is completed.

In addition to the required courses in the School of Nursing, students in this program take courses in the School of Public Health, Department of Health Services, and the John E. Anderson Graduate School of Management. Required courses include Nursing 203, 204, 209A, 209B, 219, 220A, 220C-220D, 428A, 428B, 428C, and three health services management/financial management courses (Management 409, Health Services 436, and one organizational theory course).

#### **Pediatrics Clinical Nursing Specialty**

The goal of this specialty is to develop clinical specialists who take a leadership role in the nursing management of a selected group of neonates, children, and families. Guided options include neonates, children, and families experiencing acute/critical illness, chronic illness, developmental disabilities, or oncology. Required courses include Nursing 203, 204, 209A, 209B, 212, 220A, 220B or 220C or 220D, 223, 421A, 421B, 421C.

#### **Psychiatric-Mental Health Nursing Specialty**

The primary intent of this specialization is to prepare clinicians who can function in leadership, educational, research, practice, and consultative roles in mental health settings serving individuals, groups, and families from diverse cultural backgrounds. The specific bases for practice are theories and research on personality development, function and dysfunction, biopsychosocial theories of mental illness, and psychotherapeutic approaches to nursing assessment, diagnosis, and treatment of clients' responses to mental health problems.

This specialty prepares graduates for practice as mental health nurse counselors serving individuals, groups, and families with acute or chronic mental health problems. Students, in consultation with faculty members, select an area of focus among the following settings and/or populations: psychiatric or community mental health settings with adults or children, consultation liaison, or ethnic mental health. Required courses include Nursing 203, 204, 209A, 209B, 220A, 220C-220D, 405, 424A, 424B, 424C.

## Comprehensive Examination Plan

The comprehensive examination is given in written form and is scheduled each term. You are eligible to take the examination during the term in which you are advanced to candidacy and may repeat the examination, in its entirety or in part, twice. You must complete all requirements for the degree within one calendar year after advancement to candidacy.

## Concurrent Degree Program

### M.B.A./M.N.

The School of Nursing and the John E. Anderson Graduate School of Management offer a concurrent degree program designed for students interested in employment in all sectors of the health care delivery system, including hospitals, corporate health care headquarters, home health care agencies, and long-term care facilities, as well as policy-making bodies and consulting firms. Students must request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the School of Nursing Student Affairs Office.

## Doctor of Nursing Science Degree

*Note: Course offerings are under revision.*

The Doctor of Nursing Science (D.N.Sc.) degree program is research oriented with a focus on clinical nursing research. The goal is the development of scholars who, through the conduct of original research and the generation of theory, will build the knowledge base for professional practice. The curriculum allows students to obtain the theoretical and scientific knowledge necessary for scholarly pursuit in nursing.

### Admission

Priority is given to graduates of accredited master's degree programs in nursing. Individuals admitted to doctoral study with a bachelor's degree in nursing and a master's degree in a non-nursing field are required to make up clinical specialty deficiencies by taking clinical courses in one of the current master's clinical specialty programs. Such courses may be taken concurrently with doctoral courses. Individuals admitted to doctoral study with a bachelor's degree in nursing are required to complete a program of master's courses in nursing at UCLA as a prerequisite to entry into doctoral courses.

Applications are reviewed on an individual basis by the doctoral program committee. Applicants whose application materials indicate a high potential for success in the doctoral program are interviewed. Preference is given to applicants who demonstrate (1) capacity for original scholarship and nursing research as evidenced by prior publications, (2) consistent

research objectives and career goals, (3) research objectives congruent with those of the faculty in the School of Nursing, and (4) scholarly verbal and written communication skills.

You must provide evidence of the following:

(1) A master's degree in nursing; a Bachelor of Science degree in Nursing and a master's degree in a non-nursing\* field; or a Bachelor of Science degree in Nursing\*. Degrees must be from a National League for Nursing-accredited program satisfactory to the School of Nursing and to the Graduate Division.

(2) A scholarship record satisfactory to the Graduate Division and to the School of Nursing, with a minimum grade-point average of 3.5.

(3) A combined verbal, quantitative, and analytic score of 1,500 on the Graduate Record Examination (GRE), taken within the past five years. Exceptions to this score may be considered when there is compelling evidence in other areas.

(4) An upper division statistics course with content equivalent to Biostatistics 100A, 100D, or Biostatistics 170A.

(5) A graduate nursing research course with content equivalent to Nursing 204.

(6) A graduate nursing theory course with content equivalent to Nursing 203.

(7) A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) for applicants from foreign countries in which English is not the primary language and medium of instruction (scores must be submitted prior to consideration for admission). Refer to "Proficiency in English" under "Graduate Admission" in Chapter 3 for further information.

(8) A passing score on the nursing and English portions of the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination for international applicants who are not licensed as registered nurses in the U.S., prior to consideration for admission.

(9) Status as a licensed registered nurse; prior to entry into any clinical practicum, evidence of current licensure as a registered nurse in the State of California is mandatory.

(10) Four letters of reference affirming your potential for scholarly, investigative, and creative endeavors in nursing.

(11) Examples of scholarly papers and/or creative works.

(12) A statement of educational objectives, specific focus of research, and program and career goals.

(13) Curriculum vitae.

In addition to the Graduate Division application, you must file the *Application for Admission to the School of Nursing*, available through the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90024-1702. Application deadlines for Fall Quarter are December 15 (priority) and February 1 (final). For information on admission to graduate standing, see Chapter 3.

### Areas of Study

Students in the doctoral program focus their study in one of three areas: (1) *sociocultural diversity*—formulation, investigation, and evaluation of social and cultural similarities and differences that influence the perceptions of health and illness, the treatment of illness, and the utilization of health services; (2) *psychophysical environment*—formulation, analysis, and investigation of the effects of the psychological and physical environments (both internal and external) on health/illness states, on cooperation with treatment regimens, and on preventing hospitalization and rehospitalization; (3) *health/illness continuum*—formulation, analysis, and evaluation of measures to enhance the patient's ability to promote, maintain, or regain health states and to combat illness states.

### Degree Requirements

You must meet the University minimum standards for doctoral degrees. School of Nursing requirements are as follows:

(1) Completion of core and cognate courses required for your area of focus.

(2) Successful completion of a written qualifying examination and the University Oral Qualifying Examination.

(3) Completion of a dissertation.

(4) Successful oral dissertation defense.

### Course Requirements

#### Core Courses

The following core courses are required of all students in the program:

(1) Nursing science (Nursing 202, 206A-206B).

(2) Nursing research (Nursing 207, 208, 299A, 299B-299D).

(3) One statistics sequence (Biostatistics 251, or Psychology 252A and 253, or Sociology 210A-210B, or equivalent, subject to approval of your faculty adviser and the doctoral program committee chair).

(4) One major area of study course (Nursing 226 or 227 or 228).

#### Cognate Courses

A minimum of 24 units of cognate courses relevant to your major area of study (*sociocultural diversity, psychophysical environment, or health/illness continuum*) is required and must be approved by your adviser and the doctoral program committee.

\*Students who are accepted with deficiencies are required to complete appropriate master's courses.

## Qualifying Examinations

The written qualifying examination must be passed after completion of the basic core courses. The examination evaluates three areas of knowledge: the basic concepts of nursing science, nursing research methods and analysis, and the basic concepts of your selected area of study. Normally no more than one reexamination is permitted.

The University Oral Qualifying Examination, taken after completing the course requirements, evaluates your dissertation proposal. You are responsible for obtaining the consent of faculty members to serve on your doctoral committee.

After passing the University Oral Qualifying Examination, you may apply for advancement to candidacy. Formal notice is contingent on approval by the chair of the doctoral committee and the dean of the Graduate Division.

## Final Oral Examination

When the dissertation is completed and approved by all committee members, a meeting for oral defense, which may be open to the public, is scheduled. All members of the committee, both certifying and noncertifying, must be present. You are expected to respond to any substantive and/or methodological questions raised during the meeting.

## Upper Division Courses

**101. Introduction to Art and Science of Nursing (8 units).** Lecture, four hours; laboratory, 12 hours; autotutorial laboratory, variable. Introduction to nursing theory and practice. Content includes the following modules: nursing process, pharmacology, interpersonal and technical skills. Methodology includes laboratory, lectures, autotutorial laboratory, and clinical application. Ms. Currier and the Staff

**104A. Behavior of Man in Health and Illness (2 units).** Prerequisite: consent of instructor. Limited to nursing students. Examination of health/illness continuum from framework of social and biological sciences. Content includes role theory, developmental theory, transcultural communication theory, and other theories relevant to nursing practice. Ms. Mintz-Binder (F)

**104B. Behavior of Man in Health and Illness.** Lecture, two hours; discussion, two hours. Prerequisite: course 104A. Examination of health/illness continuum from framework of illness as a stressor and possible responses to such stress. Content includes anxiety, pain, cognitive disturbances, loss, and other responses relevant to nursing practice. Ms. Mintz-Binder (W)

**105. Human Physiology.** (Formerly numbered M105.) Lecture, four hours; discussion, one hour. Prerequisite: nursing student standing or consent of instructor. Required of third-year nursing students. Lecture and discussion, with emphasis on a correlative approach to anatomy and physiology of human body. Ms. Kasper

**109. Communication in Health Care (3 units).** Lecture, two hours; laboratory, three hours. Prerequisite for non-nursing students: consent of instructor. Study of basic communication and group process theory and its application to practice. Laboratory experience, with emphasis on development of each individual's ability to communicate effectively in a dyad and in a small group. Ms. van Servellen

**M115. Introduction to Pharmacology and Therapeutics (2 units).** (Same as Pharmacology M115.) Prerequisite for non-nursing students: consent of instructor. Systematic review of major drug groups used therapeutically, the most commonly used members in each group, differences among them, and their mechanisms of action. Ms. Gold, Ms. Gyls

**120A. Child and Family Nursing (5 units).** Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109, 120C-120D, 120G. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical concepts of growth and development related to nursing care of the child and its family. Ms. Opas

**120B. Maternity Nursing (5 units).** Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109, 120C-120D, 120G. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical concepts of reproduction to nursing care of the family. Ms. Koniak-Griffin, Ms. Ludington

**120C-120D. Medical-Surgical Nursing of Adults and Older Adults (6 units each).** Lecture, three hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical content, including aging process, related to medical-surgical nursing care of the adult/older adult patient. Ms. Currier, Ms. Wilson (W)

**120E. Psychiatric/Mental Health Nursing (5 units).** Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109, 120C-120D. Corequisite: course 120G. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of mental health content related to nursing care of individuals, groups, or communities. Ms. Mintz-Binder, Ms. Wuerker

**120G. Medical-Surgical Nursing of Adults and Older Adults (5 units).** Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical content, including aging process, related to medical-surgical nursing care of the adult/older adult patient. Ms. Currier, Ms. Wilson (Sp)

**M158. Health in Culture and Society.** (Same as Anthropology M168.) Prerequisite: upper division standing. Examination of theories and methods of medical anthropology in relation to cross-cultural health systems, role networks, attitude and belief systems of the participants. Emphasis on interaction networks in health care systems.

**184. Evolution and Dynamics of the Nursing Profession (3 units).** Study of evolution of nursing, focusing on historical, ethical, moral, legal, and institutional ramifications of nursing practice. In addition, rights, obligations, and societal and institutional expectations of the professional nurse. Ms. Faherty

**189. Human Sexuality.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Lectures, discussions, and case presentations considering human sexuality, its joys and pleasures, pitfalls and problems. Interdisciplinary approach encompassing anatomic, physiologic, psychologic, and social aspects of heterosexual and homosexual relationships, including development of gender identity, intercourse, pregnancy, abortion, contraception, and venereal disease. Ms. Ludington and the Staff

**190A. Advanced Child and Family Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in nursing care of the child and its family. Theoretical content integrates concepts related to management of pediatric client care in acute and ambulatory settings. Application of theoretical concepts of growth and development of the child and family.

**190B. Advanced Maternity Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in nursing care of the childbearing family. Theoretical content further refines theories, concepts, and nursing practice related to the childbearing family. Application of theoretical concepts of reproduction to nursing care of the family.

**190C. Critical Care Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration related to nursing in the critical care setting. Theoretical content includes pathophysiology, pharmacology, advanced nursing skills, and treatment modalities in selected clinical situations. Application of theoretical content related to nursing care of the acutely ill medical and surgical adult patient in emergent and critical phases of illness. Ms. Woo

**190D. Perioperative Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration related to nursing in the operating room setting. Theoretical content further refines theories, concepts, and practice of perioperative nursing. Application of theoretical content related to nursing care of the patient undergoing surgical intervention.

**190E. Advanced Psychiatric/Mental Health Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in area of mental health nursing. Theoretical concepts and application related to mental health of the adult, geriatric, child, or adolescent client. Experiences include those in inpatient psychiatric nursing, outpatient day treatment programs, individual and child therapy, hospice programs, and crisis intervention units.

**190F. Community Health Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in community health nursing settings: home health, public health, occupational health, and schools. Theoretical content focuses on the community as a context for understanding the relationship between health status of individuals and groups with the psychophysical environment. Ms. Faherty and the Staff

**192. Physical Assessment.** Lecture, three hours; laboratory, three hours. Prerequisites: courses 101, 105, 109. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering the life span. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and the required text are mandatory. Ms. Fredrickson and the Staff

**193. Introduction to Research.** Introduction to planning a research project based on a simple question. Rules for definition of terms, alternative methods of writing purposes, selecting a sample, choosing a data collection instrument, planning for data analysis, protection of human rights, reading research reports, and writing a research proposal. Ms. Vredevoe and the Staff

**194. Computer Systems in Health Care.** Lecture, three hours; laboratory, three hours; field trips. Introductory course in review and evaluation of computer systems in nursing administration, education, and practice. Ms. Chang

**195. Nursing Management (3 units).** Lecture, two hours; field study, three hours. Corequisite: one course in 190 series. Management theory applied to nursing practice. Acquisition of basic knowledge of management concepts and skills as practiced in a health care setting.

**196. Issues in Providing Health Care to Culturally Diverse Populations.** Lecture, three hours; discussion, one hour. Prerequisite for non-nursing students: consent of instructor. Theoretical and experiential course designed to provide a base for understanding issues of providing health care to culturally diverse populations, with emphasis on strategies to facilitate intercultural/intracultural communication and intergroup/intragroup dynamics in health care settings.

**199. Special Studies in Nursing (2 to 16 units).** Prerequisites: senior standing and/or consent of instructor. Individual study of a problem in the field of nursing. May be repeated for credit, but only four units may be applied toward degree requirements. P/NP or letter grading.

## Graduate Courses

### Research in Nursing, Nursing Theory, and Cultural Diversity

**202. Philosophical Foundations of Science of Nursing.** Prerequisite: doctoral standing or consent of instructor. Designed to explore major schools of thought in contemporary Western philosophy of science, with emphasis on ways in which these schools may and do influence nursing science and practice. Ms. Chang

**203. Theoretical Frameworks for Nursing Practice.** Lecture, three hours. Focus on application and evaluation of nursing knowledge for advanced practice, including introduction to theory development.

**204. Research in Nursing: Advanced Course.** Prerequisite: course 193 or equivalent upper division basic research methodology course. Complex research designs and analysis of multiple variables, with emphasis on techniques for control of variables, data analysis, and interpretation of results. Analysis in depth of interrelationship of theoretical frameworks, design, sample selection, data collection instruments, and data analysis techniques. Content discussed in terms of clinical nursing research problems. Ms. Vredevoe and the Staff

**205A. Qualitative Research Methods in Nursing.** Prerequisite: course 204. Emphasis on nursing research designs utilizing field method approach, ethnomethodology, and/or inductive methods.

**205B. Quantitative Research Methods in Nursing.** Prerequisite: course 204. Emphasis on nursing research designs requiring statistical analysis of data. Ms. Vredevoe

**206A-206B. Nursing Theory Development.** Lecture/seminar, three hours. Prerequisites: course 202 or philosophy of science course (may be taken concurrently), 203 or equivalent. Focus on major issues involved in development of nursing knowledge, including content and methods of developing nursing theory. In Progress grading. Ms. Flakerud

**207. Research in Nursing: Measurement of Clinical Variables.** Lecture, two hours; discussion, two hours. Prerequisites: courses 204, and 205A or 205B or equivalent. Analysis of methods of measurement of physiological and psychosocial variables relevant to clinical nursing research, with emphasis on purposes, underlying assumptions, strengths, and limitations of measurement techniques. Analysis of techniques to develop reliability, validity, sensitivity of measurement instruments. Ms. Vredevoe

**208. Research in Nursing: Measurement of Outcomes.** Discussion, three hours; field application, six to eight hours. Prerequisites: courses 206A, 207. Measurement theories, including topics related to scaling and tool development as they apply to outcomes. Emphasis on opportunity to develop knowledge and skills through course content and individualized direct involvement in a clinical research project. Ms. Padilla

**209A. Human Responses to Illness.** Lecture, three hours; discussion, one hour. Introductory graduate-level nursing theory course, with emphasis on human responses to illness that nurses diagnose and treat. Primary content on cultural diversity. Integration of psychosocial and role-based responses with study of culturally based responses. Designed to provide conceptual base that nurses can use in assessing, diagnosing, planning, and intervening in these responses to illness. Ms. Anderson

**209B. Human Responses to Illness (2 to 4 units).** Prerequisite: course 105 or equivalent. Current concepts and research on human physiological responses to illness in critical, long-term, and ambulatory settings. Physiological responses involve protective, regulatory, and sensory/arousal mechanisms. Ms. Kasper

**210. Respiratory Physiology as It Relates to Nursing.** Lecture, three hours; discussion, one hour; seminars. Prerequisite: upper division human physiology course. Advanced treatment of topic presented in lectures and seminars, with emphasis on current research. Application of knowledge to nursing problems.

**211. Cardiovascular Physiology as It Relates to Nursing.** Lecture, three hours; discussion, one hour; seminars. Prerequisite: upper division human physiology course. Advanced treatment of topic presented in lectures and seminars, with emphasis on current research. Application of knowledge to nursing problems.

**212. Discontinuities in Family Health during Reproductive Years.** Lecture, two hours; discussion, one hour. Overview of selected problems with health connotations that are potentially disruptive to the family during childbearing years. Selected problems examined in depth. Pertinent variables affecting family's definition of situation, resources, strategies for coping, and utilization of professional services; their relevance for nursing practice. Ms. Wuerker

**214. Human Responses to Cardiovascular Illness.** Corequisite: course 211. Introduction to basic methods of assessing cardiovascular function in health and illness, with emphasis on their application in clinical nursing practice. Ms. Dracup, Ms. Nyamathi

**215. Human Responses to Respiratory Illness.** Corequisite: course 210. Exploration of selected problems, trends, and issues in respiratory care designed for the clinical nurse specialist. Basic methods of assessing respiratory function in health and disease, with emphasis on commonly seen respiratory diseases. Acute, chronic, and rehabilitative focus.

**216. Human Responses to Critical Care I.** Lecture, three hours; discussion, one hour. Prerequisites: courses 203, 204, 209A. Pathophysiological concepts and nursing management of critically ill adults. Nursing aspects of selected dysfunctions and implications for critical care clinical nurse specialists.

**217. Human Responses to Critical Care II.** Lecture, three hours; discussion, one hour. Prerequisites: courses 209B, 216. Builds on pathophysiological concepts and nursing management of critically ill adults presented in course 216. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care clinical nurse specialists.

**219. Essentials of Accounting and Budgeting in Health Care Organizations.** Prerequisite: graduate standing in nursing administration or consent of instructor. Introduction to concepts, issues, and techniques of accounting and budgeting with which a nurse administrator must be familiar. Major topics include cost behavior and analysis, cost accounting, forecasting, capital, operating and cash budgets, and budgetary control systems.

**220A. Ethical and Legal Issues in Advanced Nursing Practice (2 units).** Recommended (but not prerequisite): minimum of one graduate-level clinical practice course. Focus on ethical and legal issues which have impact on advanced nursing practice and on theories and strategies requisite to addressing those issues. Ms. Padilla

**220B-220C-220D. Advanced Practice Roles (2 units each).** (Formerly numbered 220B.) Recommended (but not prerequisite): minimum of one graduate-level clinical practice course. Focus on management, education, and consultation related to professional role development and serving as a foundation for advanced nursing practice. **220B.** Management; **220C.** Education; **220D.** Consultation.

Ms. van Servellen and the Staff

**221. Theoretical Frameworks for Developmental Problems, Middle and Later Years.** Aspects of life span development relevant to understanding health needs in middle and later years. Changes in biological, cognitive, and psychosocial processes; implications for prevention and rehabilitative care.

**223. Management of Developmental Problems, Early Years.** Lecture, two hours; discussion, two hours. Study of selected human developmental theories, hypotheses, and concepts as they relate to children. Problems relevant to nursing examined through critique of pertinent literature. Ms. Gottesman, Ms. Zahr

**225. Pharmacology for Advanced Practice Nurses.** (Not the same as course 225 prior to Fall Quarter 1994.) Knowledge of and skills in pharmacology necessary for advanced practice nurses who have clients/patients with stable acute or chronic conditions.

**226. Psychophysical Environmental Influences on Health/Illness Behaviors and Health Outcomes.** Lecture, two hours; discussion, two hours. Prerequisites: courses 206A-206B. Study of theory and research on stress and coping, adverse physical aspects of the environment, personal space and privacy, territoriality and crowding, and perception and cognition, with emphasis on health outcomes of nursing interventions. Ms. Nyamathi

**227. Nursing's Role in Health/Illness Continuum.** Lecture, three hours; discussion, one hour. Prerequisites: courses 206A-206B. Application of theory/research to health/illness-related phenomena of behaviors occurring as health status changes, self-definition as healthy or ill, regimen compliance, sick-role, and societal influences on sick-role.

**228. Sociocultural Variations in Health and Illness.** Lecture, two hours; discussion, two hours. Prerequisites: courses 206A-206B. Relationship of sociocultural factors to health systems and diagnosis and treatment of illness, ethnomedical systems, and integration of sociocultural variables into clinical nursing research.

**232. Human Responses to Chronic Illness I.** Lecture, three hours; discussion, one hour. Prerequisites: courses 204, 209A, 209B. Focus on pathophysiological concepts and nursing management of chronically ill adults, addressing nursing aspects of selected dysfunctions and implications for chronic care clinical nurse specialists. Ms. Cadogan, Ms. Lee

**233. Human Responses to Chronic Illness II.** Lecture, three hours; discussion, one hour. Prerequisite: course 232. Continuation of critical examination of pathophysiological concepts and nursing management of chronically ill adults presented in course 232. Focus on synthesis of research, theory, and experiential knowledge and skills, providing advanced preparation for chronic care clinical nurse specialists.

**M250. Medical Anthropology in Public Health.** (Same as Anthropology M266, Community Health Sciences M232, and Psychiatry M250.) Seminar, three hours. Cross-cultural aspects of human behavior as they relate to perception, treatment, incidence, and prevalence of disease and illness. Ms. Browner, Ms. Scrimshaw

**264. Issues in Primary Ambulatory Care (2 units).** Corequisite: course 402 or consent of instructor. Discussion of concepts of team practice, interprofessional and intraprofessional relationships, legal issues, and socioeconomic aspects of primary care.

**M273. Advanced Seminar: Medical Anthropology.** (Same as Anthropology M263Q, Community Health Sciences M244, and Psychiatry M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. Ms. Browner (Sp)

**M280. Feminist Perspectives on Women, Reproduction, and Health.** (Same as Anthropology M269P and Psychiatry M280.) Seminar, three hours. Analysis of sociocultural and political economic factors that affect reproduction and women's health. Topics include relationships between women's domestic and extradomestic roles and their health, policies of reproduction, and impact of new reproductive technologies. May be repeated for credit. Ms. Browner

**M290A-M290B-M290C. Child Abuse and Neglect (2 units, 2 units, 1 unit).** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Social Welfare M290E-M290F-M290G.) Course M290A is prerequisite to M290B, which is prerequisite to M290C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies.

**299A. Nursing Research Seminar.** Seminar, three hours. Prerequisites: courses 206A-206B, 207, 208, one cognate area course. Seminar to assist students who are beginning careers in scientific research to understand issues of misconduct and scientific integrity. Highlights faculty expertise in research, culminating in communication and dissemination of their research. S/U grading.

**299B-299C-299D. Nursing Research Seminars (1 to 4 units each).** Lecture, one hour; discussion, one to four hours. Prerequisites: courses 206A-206B, 207, 208, statistics sequence in cognate area. Seminars to assist students throughout execution of their dissertations, beginning with selection of a researchable problem and culminating in communication and dissemination of their research. S/U grading.

## Functional Preparation

**375. Teaching Apprentice Practicum (1 to 4 units).** Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

## Clinical Practice

**401. Nursing Assessment and Intervention.** Lecture, two hours; laboratory, four to eight hours. Prerequisite or corequisite: course 203. Instruction and experience in systematic assessment of patients for identification of nursing problems. Discussion and evaluation of major modes of interventional practice.

**402. Primary Diagnosis for Nurse Practitioners.** Lecture, three hours; laboratory, three hours. Prerequisites: course 192 or equivalent, admission to nurse practitioner specialty area of primary ambulatory care section, consent of instructor. Collection, analysis, and reporting of data used by the nurse practitioner in identification of patient problems. Principles and practice in history taking, physical examination, laboratory, and other diagnostic methodology. Pathology and pathophysiology integrated in a systems approach. Ms. Keenan and the Staff

**403. Assessment and Care of High-Risk Neonates.** Lecture, two hours; laboratory, six hours. Prerequisite: consent of instructor. Overview of concepts and techniques of nursing assessment of the at-risk fetus/neonate and related clinical implications for nurse practitioners. Ms. Gottesman and the Staff

**405. Assessment in Psychiatric Nursing.** Lecture, two hours; laboratory, six hours. Preparatory course for advanced clinical practice. Critical examination of concepts and strategies which affect assessment of psychological behavior. Ms. Wuerker

**M410A. Nursing Care of Children with Developmental Disabilities.** (Same as Psychiatry M472A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: consent of instructor. Study of disability conditions of childhood and their effects on the child and family. Content based on normative developmental models with consideration for sociocultural diversity. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience. Ms. Betz (F)

**M410B. Nursing Care of Children with Developmental Disabilities.** (Same as Psychiatry M472B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M410A and/or consent of instructor. Study of philosophical and conceptual models affecting care delivery for persons with developmental disabilities. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention. Ms. Betz (W)

**M410C. Nursing Care of Children with Developmental Disabilities.** (Same as Psychiatry M472C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M410B and/or consent of instructor. Exploration and participation in assessment, planning, and delivery of health care to children with developmental disabilities in a variety of settings. Emphasis on expanded role of the nurse. Ms. Betz (Sp)

**412. Perspectives of Occupational Health Nursing Practice (3 units).** Lecture, three hours; two half-day field experiences per term. Prerequisite: consent of instructor. Presentation of current concepts in occupational health within a nursing framework. Analysis of elements of worksite health programs; discussion of nursing's leadership role in ensuring a safe and healthful workplace. Ms. Glazner

**416. Concepts in Cancer Nursing.** Lecture, three hours; clinical observation and field trips, three hours. Exploration and clinical application of concepts in oncology — biology, epidemiology, prevention, diagnosis, psychosocial impact, and treatment of cancer — to nursing care. Integration of concepts into theoretical frameworks for cancer nursing assessment. Individualized clinical observations and field trips. Ms. Sarna

**417. Advanced Concepts in Cancer Nursing.** Lecture, three hours; clinical observation and field trips, three hours. Prerequisite: course 416 or consent of instructor. Clinical application of advanced concepts in oncology — pathophysiology, epidemiology, prevention, diagnosis, psychosocial impact, treatment, symptom distress, and rehabilitation — to nursing care of patients with specific malignancies. Conceptual and scientific exploration of nursing care problems. Individualized clinical observations and field trips. Ms. Sarna

**420A. Clinical Care of Intermediate and Recovering High-Risk Neonates (3 to 10 units).** Lecture, three hours; discussion, one hour; laboratory, 18 hours. Prerequisite: course 403. First clinical practicum in care of high-risk neonates. Emphasis on development and refinement of clinical nursing skills in management of intermediate and recovering neonates. Ms. Gottesman

**420B. Clinical Care of Critically Ill High-Risk Neonates (3 to 10 units).** Lecture, three hours; discussion, one hour; laboratory, 18 hours. Prerequisite: course 420A. Second clinical practicum in care of high-risk neonates. Emphasis on development and refinement of clinical nursing skills in delivery room stabilization of newborns and care of critically ill neonates. Ms. Gottesman and the Staff

**420C. Advanced Clinical Care of High-Risk Neonates (8 units).** Lecture, one hour; discussion, one hour; laboratory, 18 hours. Prerequisite: course 420B. Offers students opportunity to assume greater independence in managing care of high-risk neonates at all levels of care. Ms. Gottesman and the Staff

**421A. Clinical Nursing Care of Children (8 units).** Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisites: courses 203, 223. Application of a theoretical model and the nursing process to a specific, identifiable client population in a pediatric setting, with special emphasis on assessment and diagnosis. Content covers each aspect of nursing process. Ms. Zahr

**421B. Advanced Clinical Nursing Care of Children (8 units).** Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 421A. Role of the clinical nurse specialist in pediatric nursing, with emphasis on practitioner component of the role. Students identify a selected population for whom direct care is planned and implemented within a conceptual framework for nursing interventions. Emphasis on development of a researchable clinical question. Ms. Zahr

**421C. Clinical Specialization in Nursing Care of Children (8 units).** Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 421B. Required for pediatric clinical nursing specialty. Practitioner role is continued in this course to foster consolidation of knowledge and skills. Emphasis on consultation, staff development, research, and patient advocacy dimensions of the clinical nurse specialist role. Ms. Zahr

**422A. Clinical Maternity Nursing (8 units).** Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 203. Emphasis on developing skill in utilization of assessment, intervention, and evaluation phases of nursing process with childbearing families. Examination of family-centered orientations and theoretical models as they relate to development of nursing practice and care giving. Ms. Koniak-Griffin

**422B. Advanced Clinical Maternity Nursing (8 units).** Lecture, two hours; discussion, one hour; laboratory, 15 hours. Prerequisite: course 422A. Knowledge and clinical expertise refined and extended, with emphasis on high-risk conditions in the reproductive process. Emphasis on prescriptive, intervention, and evaluative phases of nursing process and on teaching, counseling skills, and collegial relations. Ms. Koniak-Griffin

**422C. Clinical Specialization in Maternity Nursing (6 units).** Discussion, one hour; laboratory, 15 hours. Prerequisite: course 422B. Required for maternity nursing specialization. Advanced clinical practice to foster consolidation of knowledge and skills. Emphasis on consultation and staff development dimensions of clinical nurse specialist role. Ms. Koniak-Griffin

**423A. Advanced Clinical Medical-Surgical Nursing (8 units).** Lecture, two hours; laboratory, 18 hours. Prerequisites: courses 203, 204, 209A, 209B, 220A (may be taken concurrently). Advanced course in theory and practice of nursing care of adults. Emphasis on critical evaluation, integration, and application of scientific and theoretical knowledge within an advanced nursing practice role. Focus on acutely ill patients. Ms. Dracup and the Staff

**423B. Advanced Clinical Medical-Surgical Nursing (8 units).** Lecture, two hours; laboratory, 18 hours. Prerequisite: course 423A. Study of clinical specialization and other expanding roles in nursing. Emphasis on continued refinement and extension of professional knowledge and skills in a selected clinical area in care of patients with chronic health problems. Practicum planned in congruence with students' career goals. Ms. Baker

**423C. Clinical Specialization in Medical-Surgical Nursing (6 units).** Discussion, two hours (five weeks); laboratory, 15 hours (10 weeks). Prerequisite: course 423B. Required for medical-surgical nursing specialization. Advanced knowledge and clinical skills provided to equip students to perform in clinical nurse specialist roles. Emphasis on practitioner, educator, consultant, and researcher roles.

Ms. Baker

**424A. Clinical Psychiatric Nursing (5 units).** Lecture, one hour; discussion, two hours; laboratory, six hours. Prerequisites: course 405, consent of instructor. Focus on process of psychotherapy, with specific emphasis on knowledge and skills of assessment and individual therapy practice.

Ms. van Servellen and the Staff

**424B. Advanced Clinical Psychiatric Nursing (8 units).** Discussion, three hours; laboratory, 15 hours. Prerequisite: course 424A. Refinement and extension of understanding of the process of psychotherapy of individuals, groups, and families.

Ms. van Servellen and the Staff

**424C. Clinical Specialization in Psychiatric Nursing (10 units).** Discussion, two hours; laboratory, 24 hours. Prerequisite: course 424B. Supervised internship. Students select setting and population.

Ms. van Servellen and the Staff

**425A. Advanced Clinical Gerontological Nursing.** Lecture/discussion, three hours; laboratory, three hours. Prerequisite: one graduate nursing theory course. Principles and practice of assessment of psychosocial variables in health problems of the elderly. Emphasis on integrated understanding of multiple variable influences in total health. Application of knowledge and skills of psychosocial nursing intervention in rehabilitation of the chronically ill aged.

**425B. Clinical Specialization in Gerontological Nursing (8 units).** Discussion, three hours; laboratory, 30 hours maximum. Prerequisite: course 425A. Extension and demonstration of competencies in planning and implementation of nursing programs in health problems of the elderly.

**428A. Clinical Nursing Management.** Lecture, one hour; discussion, 30 minutes; laboratory, seven and one-half hours. Prerequisite: one organizational theory course. Application of management theory in a health care setting, with emphasis on organizing nursing care of groups of patients. Students work with nurse managers in developing a unit philosophy, objectives, policies, standards of practice, and care evaluation mechanisms.

Ms. McNeese-Smith and the Staff

**428B. Advanced Clinical Nursing Management.** Lecture, one hour; discussion, 30 minutes; laboratory, seven and one-half hours. Prerequisite: course 428A. Examination of role of the nurse in managing scarce resources, with emphasis on patient classification systems, staffing, and assignment of nursing personnel. Cost-effective management of human and financial resources explored extensively.

Ms. McNeese-Smith and the Staff

**428C. Nursing Administration Residency (8 units).** Prerequisites: courses 428A, 428B. Required field residency experience. Students apply management theory to administration of nursing services in a variety of health care settings. Provides organizational-based environment in which students can develop skills in management practice.

Ms. McNeese-Smith and the Staff

**429A-429B. Preceptorships in Primary Ambulatory Care Nursing (9 units each).** Lecture, four hours; laboratory, 15 hours. Prerequisites: courses 264, 402. Theory and clinical practice in nursing management and evaluation of health problems in selected ambulatory population. Emphasis on health maintenance. Attention to developmental and cognitive needs of clients in relation to family, social, and cultural structures.

Ms. Anderson, Ms. Keenan

**429C. Advanced Preceptorship in Primary Ambulatory Care Nursing (10 units).** Lecture, three hours; laboratory, 21 hours. Prerequisites: courses 429A-429B. Required of students who want to meet requirements for preparation as a nurse practitioner as established by California Board of Registered Nursing. Emphasis on refinement and extension of assessment, management, and evaluation skills, family health care, and community health concepts. Placements provide opportunity for in-depth focus on a specific group of health problems.

Ms. Anderson and the Staff

## Special Studies

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward M.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research (4 to 8 units).** Prerequisite: consent of instructor. Opportunity for individual graduate students in nursing to pursue special studies or research interests. May be repeated for credit, but only four units may be applied toward graduate degree requirements. S/U grading.

**597. Individual Study for Comprehensive Examination (4 to 8 units).** May be repeated once for credit, but only four units may be applied toward M.N. degree requirements. S/U grading.

**598. Research for Thesis (4 to 8 units).** Prerequisite: consent of instructor. Recommended for students who elected thesis plan prior to Fall Quarter 1993. May be repeated for credit, but only four units may be applied toward M.N. degree requirements. S/U grading.

**599. Research for and Preparation of D.N.Sc. Dissertation (2 to 8 units).** Individualized faculty supervision of doctoral dissertation research by student's chair. May be repeated for credit, but only eight units may be applied toward doctoral degree requirements. S/U grading.

# School of Public Health

Abdelmonem A. Afifi, Dean

# 17

The emergence of public health as an independent discipline dates back over a century, when the field was concerned mainly with the epidemic of communicable diseases and some facets of sanitation. Changes in socioeconomic conditions, lifestyle, and other factors have brought such issues as accidents, aging, air pollution, alcoholism, drug addiction, smoking, mental health, homicide, and sexually transmitted diseases to the fore as community health problems. In time the following general statement evolved — “The mission of public health is to fulfill society’s interest in assuring conditions in which people can be healthy.”

Public health professionals can promote the health of the community through (1) research into the development of methodologies in biostatistics, epidemiology, demography, and techniques of prevention, (2) investigations into factors which influence health behavior, quality of and access to health care, health education, nutrition, environmental problems, and problems of special population groups such as mothers, children, and minorities, and (3) development of research into new areas that impact on the health of the community. Public health professionals are also responsible for translating knowledge of disease and health enhancement into resolution of health problems in the community. They are committed to the prevention of disease, promotion of health, and improvement in the quality of life.

To fulfill its national and international mission, the school (1) educates new professionals and leaders for the private and public sectors, (2) prepares researchers and educators of future professionals, (3) conducts research to define, protect, and improve conditions for a healthy public, and (4) contributes knowledge, expertise, and service to the community. It is the goal of the school to ensure that the protection and improvement of the public’s health is accomplished by the most efficient and effective means, consistent with equity for all individuals in the state, the nation, and the world.

# School of Public Health

16-071 Center for the Health Sciences, (310) 825-5516

The School of Public Health offers graduate programs leading to both academic and professional degrees in five departments. The Department of Biostatistics develops statistical and analytical techniques for public health use. The Department of Community Health Sciences deals with five areas of study and program implementation, including behaviors which prevent disease and enhance health, health problems of high-risk groups (women, children, the aged, the poor, the disadvantaged, and racial and ethnic minorities), health promotion policy, community nutrition, and international health. The Department of Environmental Health Sciences elucidates health hazards in the general environment and in the workplace. The Department of Epidemiology is concerned with the nature, extent, and distribution of disease and health in populations. The Department of Health Services deals with the organization, financing, quality, and distribution of health care services. The school is also responsible for the administration of the interdepartmental degree program in environmental science and engineering.

## Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree or professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings which follow. Help in deciding on a department is available in the school's Student Affairs Office.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

## Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings which follow for specific requirements and procedures.

## Degrees Offered

Biostatistics .....	M.S., Ph.D.
Environmental Health Sciences .....	M.S., Ph.D.
Environmental Science and Engineering .....	D.Env.
Epidemiology .....	M.S., Ph.D.
Health Services .....	M.S., Ph.D.
Preventive Medicine and Public Health .....	M.S.*
Public Health .....	M.P.H., M.S.**, Dr.P.H., Ph.D.**

\*Not admitting new students at this time.

\*\*Offered through the Community Health Sciences Department.

## Biostatistics

51-254 Center for the Health Sciences, (310) 825-5250

### Professors

Abdelmonem A. Afifi, Ph.D., *Dean*  
 Potter C. Chang, Ph.D.  
 William G. Cumberland, Ph.D.  
 Robert M. Elashoff, Ph.D., *Chair*  
 Donald Guthrie, Ph.D., *in Residence*  
 Robert I. Jennrich, Ph.D.  
 Peter A. Lachenbruch, Ph.D.  
 Virginia A. Clark, Ph.D., *Emerita*  
 Wilfrid J. Dixon, Ph.D., *Emeritus*  
 Olive Jean Dunn, Ph.D., *Emerita*  
 Raymond J. Jessen, Ph.D., *Emeritus*  
 Frank J. Massey, Jr., Ph.D., *Emeritus*

### Associate Professors

Dorota M. Dabrowska, Ph.D.  
 Virginia F. Flack, Ph.D.  
 Nathaniel Schenker, Ph.D., *Vice Chair*  
 Jeremy M.G. Taylor, Ph.D., *in Residence*

### Assistant Professors

Thomas R. Belin, Ph.D., *in Residence*  
 Robert E. Weiss, Ph.D.  
 Weng Kee Wong, Ph.D.

### Lecturers

Martin L. Lee, Ph.D.  
 Jean L. Mickey, Ph.D., *Emerita*

### Adjunct Associate Professors

Frederick J. Dorey, Ph.D.  
 James W. Sayre, Dr.P.H.

### Adjunct Assistant Professors

Cheryl L. Faucett, Ph.D.  
 David W. Gjertson, Ph.D.

tics. The field encompasses the methodology and theory of statistics as applied to problems in the life and health sciences. Biostatisticians are trained in the skilled application of statistical methods to the solution of problems encountered in public health and medicine. They collaborate with scientists in nearly every area related to health and have made major contributions to our understanding of AIDS, cancer, and immunology, as well as other areas. Further, biostatisticians spend a considerable amount of time developing and evaluating the statistical methodology used in those projects. The Department of Biostatistics offers M.S. and Ph.D. degrees in Biostatistics and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in biostatistics. All students receive a balanced education, blending theory and practice.

## Requirements for Graduate Degrees

### Admission

Application forms and the *Announcement of the UCLA School of Public Health* may be obtained by writing to the Student Affairs Office, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the *UCLA Application for Graduate Admission* must be completed. Three letters of recommendation (with at least two from former professors) are required before an application is considered complete. It is your responsibility to ensure that the application file is complete.

The preferred deadline for graduate applications is December 15, 1994, for Fall Quarter 1995 admission. *Applications received after the deadline have considerably reduced opportunities for financial aid and housing.*

## Scope and Objectives

In recent years biostatistics has become one of the most stimulating areas of applied statis-

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. Majors in mathematics, computer science, or a field of application in biostatistics are preferred. Your undergraduate preparation should include calculus and linear algebra. If your undergraduate coursework has been deficient in breadth of fundamental training, you must take specified undergraduate courses after admission. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE). The Medical College Admission Test (MCAT), Dental Admission Test (DAT), or Graduate Management Admission Test (GMAT) may be accepted in lieu of the GRE under certain circumstances. Strong emphasis is placed on the quantitative and analytical components of the GRE; the department does not have a minimum combined score requirement.

Refer to the UCLA *Application for Graduate Admission* for the Test of English as a Foreign Language (TOEFL) requirement for international applicants.

## Master of Science Degree

The Master of Science is a research-oriented degree within the general field of biostatistics. Teaching experience is not required.

See Schoolwide Programs at the end of this chapter for information on the M.P.H. degree.

### Admission

In addition to the general requirements for admission, your undergraduate preparation should include Mathematics 31A, 31B, 32A, 32B, 33A, 33B (second-year calculus), or the equivalent.

### Course Requirements

The M.S. degree requires a minimum of nine graduate and upper division courses, of which at least five must be graduate courses in the 200 and 500 series. The five required graduate courses must be in biostatistics or mathematical statistics, including at least three courses in biostatistics.

### Two-Year Plan

Unless previously taken, the following courses must be included in the degree program: Biostatistics 110A, 110B, 115, 200A, 200B-200C, M215, 240A, 240B, 402A, 402B, 596; any three special topics courses from M210 through 214, courses in the 230 series, and all courses numbered 250 and above, such that at least one of these three courses is in the 200 series; Statistics M152A, 152B.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics, are selected with your adviser's consent and approved by the chair.

A written report and written comprehensive examination covering the above course material must be completed satisfactorily.

### One-Year Plan

The one-year plan is recommended only for exceptional students who have had a one-year course in probability and theoretical statistics and one or more courses in applied statistics.

The following courses must be included in the degree program: Biostatistics 200A, 200B-200C, M215, 240A, 240B, 402A, 402B, two special topics courses in the numbered course sequence defined in the two-year plan, 596.

A written report and written comprehensive examination covering the above course material must be completed satisfactorily.

### Comprehensive Examination Plan

The thesis plan is not used. The written comprehensive examination covers the content of the required courses and must be passed. No more than one reexamination after failure is allowed. If you do not take the reexamination at the time specified by the department, you forfeit your right to reexamination.

## Ph.D. Degree

The Ph.D. is an advanced research degree that emphasizes depth of knowledge and research skills. The dissertation must demonstrate your ability for independent scholarly investigation.

There is no foreign language requirement for the Ph.D.; teaching experience is recommended but not required.

See Schoolwide Programs at the end of this chapter for information on the Dr.P.H. degree.

### Admission

Qualifications for admission are those currently specified by the Graduate Division (see Chapter 3). Normally, students receive an M.S. in Biostatistics at UCLA before admission to the Ph.D. program. Undergraduates with sufficient coursework in mathematics and statistics are considered for admission directly into the Ph.D. program.

### Course Requirements

Unless previously taken, the following courses must be included in the degree program: Biostatistics M250A-M250B, 251, 255, Mathematics 276A-276B; at least three special topics courses from the Biostatistics 230, 270, and 280 series. Some substitution is accepted from courses in mathematics and biomathematics. In addition, your full program of study must be approved by the department and must include, at the graduate level, three areas of knowl-

edge: biostatistics, mathematical statistics, and a third field such as biology, epidemiology, infectious diseases, medicine, microbiology, pharmacology, physiology, psychology, zoology, or public health. You are required to participate in the biostatistics consulting laboratory for one term each year and in the advanced seminar in biostatistics each year.

### Qualifying Examinations

Written qualifying examinations in biostatistics and mathematical statistics are taken before advancement to candidacy and can be repeated once only. The mathematical statistics examination is taken in the spring of your first year in residence; if failed, it must be retaken the following October. The written qualifying examination is taken in Fall Quarter of your second year.

The University Oral Qualifying Examination is taken before advancement to candidacy and after successful completion of the written examinations. Administered by the doctoral committee, it is usually a defense of the dissertation proposal. A failed examination may be repeated once. The timing of reexaminations is specified by the department in the case of written examinations or by your committee in the case of the oral examination. If you do not take the reexaminations at the specified time, you forfeit your right to reexamination.

### Final Oral Examination

The final oral examination, a defense of your dissertation, is required. Reexamination after failure is determined on an individual basis. A copy of the dissertation must be submitted to the Graduate Division and the department.

## Upper Division Courses

**100A. Introduction to Biostatistics.** Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: upper division standing, one biological or physical sciences course. Students who have completed courses in statistics may enroll only with consent of instructor. Not open for credit to students with credit for course 110A. Introduction to methods and concepts of statistical analysis. Sampling situations, with special attention to those occurring in biological sciences. Topics include distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size.

**100B. Introduction to Biostatistics.** Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: course 100A or equivalent. Not open for credit to students with credit for course 110B. Introduction to analysis of variance, linear regression, and correlation analysis.

**100C. Introduction to Biostatistics.** Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: course 100B or equivalent. Design of experiments, analysis of variance, multiple and polynomial regression analysis with biomedical applications.

**100D. Introduction to Biostatistics.** Lecture, three hours; laboratory, two hours. Prerequisite: course 100B or equivalent. Introduction to concepts of probability used in biomedical sciences. Enumeration statistics and nonparametric methods. Comparison of nonparametric with analogous parametric tests. Discussion of power and sample size.

**110A. Basic Biostatistics.** (Formerly numbered 101A.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: Mathematics 31B or equivalent. Not open for credit to students with credit for course 100A. Basic concepts of statistical analysis applied to biological sciences. Topics include random variables, sampling distributions, parameter estimates, statistical inference.

**110B. Basic Biostatistics.** (Formerly numbered 101B.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: course 110A. Not open for credit to students with credit for course 100B. Topics include elementary analysis of variance, simple linear regression; topics related to analysis of variance and experimental designs.

**115. Topics in Estimation.** (Formerly numbered 110C.) Lecture, three hours; discussion, one hour. Prerequisites: Statistics M152A, 152B. Small and large sample properties of common estimation techniques arising in biostatistical application.

**M153A-M153B. Introduction to Computational Statistics.** (Formerly numbered M101D-M101E.) (Same as Biomathematics M153A-M153B and Statistics M153A-M153B.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

## Graduate Courses

**200A. Biostatistics.** Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 100A, 100B, and 100C, or 110A, 110B, and 115. Topics in methodology of applied statistics, such as design, analysis of variance, regression. S/U or letter grading.

**200B-200C. Biostatistics.** Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: courses M153A, 200A. S/U or letter grading.

**200B.** Multiple linear regression, including model validation, influence of observations, regression diagnostics; discriminant analysis; principal components; factor analysis and clinical trials. **200C.** Measures of association and analysis of categorical data, theory of generalized linear models.

**M210. Statistical Methods for Categorical Data.** (Formerly numbered M201E.) (Same as Biomathematics M231.) Lecture, three hours; discussion, one hour. Prerequisites: course 100B or 110B, Statistics 152C or equivalent. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations.

**212. Distribution Free Methods.** (Formerly numbered 201F.) Lecture, three hours; discussion, one hour. Prerequisites: course 100B or 110B, Statistics 152C, or equivalent. Theory and application of distribution free methods in biostatistics.

**213. Statistical Simulation Techniques.** (Formerly numbered 201G.) Lecture, three hours; discussion, one hour. Prerequisites: Statistics 152C, one computer programming course. Techniques for simulating important statistical distributions, with applications in biostatistics. S/U or letter grading.

**214. Finite Population Sampling.** (Formerly numbered 201H.) Lecture, three hours. Prerequisites: course 1110B, Statistics 152B. Theory and methods for sampling finite populations and estimating population characteristics. S/U or letter grading.

**M215. Survival Analysis.** (Formerly numbered M201K.) (Same as Biomathematics M281.) Lecture, three hours; discussion, one hour. Prerequisites: course 110B, Statistics 152C. Statistical methods for analysis of survival data. S/U or letter grading.

**216. Introduction to Statistical Methods for Biological Assays.** (Formerly numbered 201M.) Lecture, three hours. Prerequisite: Statistics 152B. Topics include standard statistical procedures for estimation of relative potency, density of microorganisms, and density of radioactivity, models used for these procedures, and statistical considerations for designing such assays. S/U or letter grading.

**219. Special Topics: Supplemental Topics.** (Formerly numbered 201J.) Lecture, three hours; discussion, one hour. Prerequisite: course 100C. Topics in biostatistics not covered in other courses.

**230. Statistical Graphics.** (Formerly numbered 202J.) Lecture, three hours; discussion, two hours. Prerequisites: courses 110A, 110B, 200A, or equivalent. Graphical data analysis emphasizes use of visual displays of quantitative data to gain insight into data structure by exploring patterns and relationships, and to enhance classical numerical analyses, especially assumption validity checking. Principles of graph construction, graphical methods, and perception issues. S/U or letter grading.

**231. Simultaneous Statistical Inference.** (Formerly numbered 202G.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200C, M250A, Statistics 152C. Methods and theory of simultaneous statistical inference.

**M232. Statistical Analysis of Incomplete Data.** (Formerly numbered M202F.) (Same as Biomathematics M232.) Lecture, three hours; discussion, one hour. Prerequisite: Statistics 152C or equivalent. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

**233. Statistical Methods in AIDS (2 units).** (Formerly numbered 202K.) Prerequisites: courses 110A, 110B, M215, Mathematics M150A-150B, 151, or equivalent. Coverage of methods necessary to address statistical problems in AIDS research, including projection methods for the size of AIDS epidemic and methods for estimating incubation distribution. S/U or letter grading.

**M234. Applied Bayesian Inference.** (Formerly numbered M202H.) (Same as Biomathematics M234.) Lecture, three hours; discussion, one hour. Prerequisites: course 200C, Statistics 152C. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

**M236. Analysis of Repeated Measures Designs (5 units).** (Same as Biomathematics M282.) Lecture, four hours; discussion, two hours. Prerequisites: courses 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

**240A. Research Resources in Biostatistics (2 units).** Lecture, three hours. Introduction to various resources available in statistical research, such as how to obtain access to current index in statistics and introduction to SUN workstation laboratory. Report on research paper in a recent statistics journal required. S/U or letter grading.

**240B. Seminar for Second-Year Biostatistics Master's Students (2 units).** Lecture, three hours. How to give an oral presentation on research results, including audiovisual techniques for a scientific talk and organization for short and long talks. Presentation of a paper from their current research related to their master's report required of students. S/U or letter grading.

**245. Advanced Seminar: Biostatistics (2 units).** (Formerly numbered 204F.) Prerequisite: course 200C. Current research in biostatistics. May be repeated for credit. S/U grading.

**M250A-M250B. Linear Statistical Models.** (Formerly numbered M205A-M205B-M205C.) (Same as Mathematics M279A-M279B.) Lecture, three hours; discussion, one hour. Prerequisite: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. S/U or letter grading.

**251. Multivariate Biostatistics.** (Formerly numbered 206A-206B.) Lecture, three hours; discussion, one hour. Prerequisite: course M250A or equivalent. Multivariate analysis as used in biological and medical situations. Topics from multivariate distributions, component analysis, factor analysis, discriminant analysis, MANOVA, MANCOVA, longitudinal models with random coefficients. S/U or letter grading.

**255. Advanced Topics and Probability in Biostatistics.** Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 276A-276B or consent of instructor. Topics include conditioning, modes of convergence, basic limit results for empirical processes, von-Mises calculus, and notions of efficiency in statistics. Applications cover M-L-R estimation in two-sample and regression models, goodness of fit methods, smoothing techniques, and bootstrap.

**270. Stochastic Processes.** (Formerly numbered 207E.) Lecture, three hours. Prerequisites: upper division mathematics, including statistics and probability. Stochastic processes applicable to medical and biological research.

**271. Mathematical Epidemiology.** (Formerly numbered 207F.) Lecture, three hours. Prerequisites: course 270 or equivalent, upper division mathematics (including statistics and probability). Mathematical theory of epidemiology with deterministic and stochastic models and problems involved in applying the theory.

**273. Statistical Methods for Research Biological Assays.** (Formerly numbered 207H.) Prerequisite: course 216. Topics include statistical methods developed for research assays for which standard procedures do not apply.

**275. Advanced Survival Analysis.** (Formerly numbered 207K.) Lecture, three hours; discussion, one hour. Prerequisites: course 255, Mathematics 276A-276B. Recommended: course M215. Censoring and truncation, single sample problems, K-sample comparisons, Cox regression model, hazard rate and density estimation, estimation in Markov chains and Markov renewal processes, multivariate models, competing risks. S/U or letter grading.

**276. Inferential Techniques that Use Simulation.** (Formerly numbered 207M.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 276A-276B. Recommended: Biostatistics 213. Theory and application of recently developed techniques for statistical inference that use computer simulation. Topics include bootstrap, multiple imputation, data augmentation, stochastic relaxation, and sampling/importance resampling algorithm.

**277. Robustness and Modern Nonparametrics.** Lecture, three hours. Prerequisite: Mathematics 276A. Topics include M-estimation, influence curves, breakdown point, bootstrap, jackknife, smoothing, nonparametric regression, generalized additive models, density estimation.

**M280. Statistical Computing.** (Formerly numbered M207J.) (Same as Biomathematics M280 and Mathematics M280.) Lecture, three hours. Prerequisites: Mathematics 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods.

**285. Advanced Topics: Recent Developments.** (Formerly numbered 207L.) Lecture, three hours; discussion, one hour. Advanced topics and developments in biostatistics not covered in Biostatistics M210 through 219 or 270 through 276 or in other courses. Possible topics include time-series analysis, classification procedures, correspondence analysis, etc. S/U or letter grading.

**295. Application of Statistical Theories in Biomedical Research.** (Formerly numbered 105.) Lecture, three hours; discussion, one hour. Prerequisite: Statistics 152C or 154B. Review of statistical theories essential to biostatistics. Illustration of applications by examples. Topics include delta method, order statistics, asymptotic properties of MLEs, iterative algorithms for MLEs, generalized likelihood ratio tests for categorical data, and transformations.

**400. Field Studies in Biostatistics (2 or 4 units).** Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

**402A. Principles of Biostatistical Consulting (2 units).** Lecture, one hour; discussion, one hour. Prerequisites: course 100B or 110B and Statistics 152B. Presentation of structural format for statistical consulting. Role of statistician and client. Reviews of actual statistician/client interactions and case studies.

**402B. Biostatistical Consulting.** Discussion, two hours; laboratory, two hours. Prerequisite: course 402A. Principles and practices of biostatistical consulting. May be repeated for credit. S/U grading.

**403. Computer Management of Health Data.** Lecture, three hours; laboratory, two hours. Prerequisites: at least one statistics course, two research methodology courses, Program in Computing 1 or equivalent, consent of instructor. Concepts of health data management, design and maintenance of large databases on tapes or disks; computing tools and techniques facilitating data retrieval for statistical analysis, tabulation and report generation useful to biostatisticians, health planners, and other health professionals.

**404. Principles of Sampling.** Lecture, three hours; discussion, one hour. Prerequisites: course 100B, Epidemiology 100, or equivalent. Statistical aspects of design and implementation of a sample survey. Techniques for analysis of data, including estimates and standard errors. Avoiding improper use of survey data.

**405. Demographic Materials and Methods.** Lecture, three hours; laboratory, two hours. Prerequisite: course 100A or 110A. Sources of demographic information; description of human populations; calculation and interpretation of statistics used to measure and describe population growth, structure, geographic distribution, mortality, natality, and migration. S/U or letter grading.

**406. Applied Multivariate Biostatistics.** Lecture, three hours; laboratory, one hour. Prerequisites: course 100B, at least two other upper division research courses. Use of multiple regression, principal components, factor analysis, discriminant function analysis, logistic regression, and canonical correlation in biomedical data analysis. S/U grading optional for nondivision majors.

**410. Statistical Methods in Clinical Trials.** (Formerly numbered 401E.) Lecture, three hours; discussion, two hours. Prerequisite: course 100C or 100D or Statistics 152C or equivalent. Design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, and stratification in human experimentation; various types of controls; prognostic factors, survivorship studies, and design of prognostic studies; organization of clinical trials — administration, comparability, protocols, clinical standards, data collection and management. S/U grading optional for nondivision majors.

**411. Statistical Methods for Longitudinal Data.** (Formerly numbered 401F.) Lecture, three hours. Prerequisites: course 100C or 100D or Statistics 152C or equivalent, Epidemiology 100. Design and analysis of longitudinal or panel studies. S/U grading optional for non-division majors.

**412. Statistical Methods for Case-Control Studies.** (Formerly numbered 401G.) Lecture, three hours. Prerequisites: courses 100C and 100D, or 115. Statistical designs, sampling statistics, and analytic models of case-control studies. Special topics such as exploratory analyses, multiplicity of analyses, cross-validation, small sample performance of variance estimators, measurement error in the covariates, and incomplete data. S/U or letter grading.

**419. Special Topics: Applied Statistics.** (Formerly numbered 401H.) Lecture, three hours; discussion, one hour. Prerequisite: course 100C. Special topics in applied statistics not covered in other courses in professional series.

**420. Database Management Systems.** (Formerly numbered 203A.) Lecture, three hours; laboratory, two hours. Prerequisite: course 403 or equivalent. Database and database models applied to medical and public health studies; design of databases for efficient data retrieval and statistical analysis using package database management and statistical package programs.

**421. Systems Analysis for Health Data.** (Formerly numbered 203B.) Lecture, three hours; laboratory, two hours. Prerequisite: course 420. Health data computer processing as a total system; review of selected health information systems, statistical packages, and computer languages; design, development, testing, and maintenance of a computer system for managing health data.

**495. Teacher Preparation in Biostatistics (2 units).** Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while UH Cr/NCr-graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisite: graduate standing. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units).** Prerequisite: graduate standing. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research (2 to 8 units).** Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research (2 to 8 units).** May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## Community Health Sciences

36-070/36-071 Center for the Health Sciences, (310) 825-5379/825-5308

### Professors

Carol S. Aneshensel, Ph.D.  
Emil Berkanovic, Ph.D.  
Linda B. Bourque, Ph.D.  
E. Richard Brown, Ph.D.  
Osman M. Galal, M.D., Ph.D.  
Michael S. Goldstein, Ph.D.  
Gail G. Harrison, Ph.D., *Chair*  
David Heber, M.D., Ph.D.  
Dean T. Jamison, Ph.D.  
Snehendu B. Kar, Dr.P.H., M.Sc.  
Joel D. Kopple, M.D., *in Residence*  
Virginia C. Li, Ph.D., M.P.H.  
Alfred K. Neumann, M.D., M.A., M.P.H., F.A.B.P.M.  
Charlotte G. Neumann, M.D., M.P.H.  
Michael G. Ross, M.D., M.P.H., *in Residence*  
John F. Schnelle, Ph.D., *in Residence*  
Susan C. Scrimshaw, Ph.D., *Associate Dean for Academic Programs*  
Judith M. Siegel, Ph.D., M.S.Hyg., *Associate Dean for Student Affairs*

### Professors Emeriti

Roslyn B. Alfin-Slater, Ph.D.  
Isabelle F. Hunt, Dr.P.H., R.D.  
Edward B. Johns, Ed.D.  
Alfred H. Katz, D.S.W., M.S.  
Edward L. Rada, Ph.D.  
Marian E. Swendseid, Ph.D.  
Daniel M. Wilner, Ph.D.

### Associate Professors

Neal Halfon, M.D., M.P.H.  
Donald E. Morisky, Sc.D., M.S.P.H., *Vice Chair*

### Assistant Professors

Deborah C. Gliik, Sc.D.  
Marjorie Kagawa-Singer, Ph.D.  
Dawn M. Upchurch, Ph.D.  
Steven P. Wallace, Ph.D.

### Lecturers

Helene G. Brown, B.S.  
Marianne Parker Brown, M.P.H.  
Michael R. Cousineau, Dr.P.H.  
Janis S. Fisler, Ph.D.  
Paul M. Fleiss, M.D., M.P.H.

Patrice E.F. Jelliffe, R.N., M.P.H., *Researcher*  
 Celia Kaplan, Dr.P.H.  
 Joanne Leslie, Ph.D.  
 Ronald L. Linder, Ed.D.  
 Mario Panaqua, B.A.  
 Sora Park, M.P.H.  
 Ruth F. Richards, M.P.H., M.A., *Emerita*

#### Adjunct and Visiting Professors

Edith M. Carlisle, Ph.D., *Adjunct, Researcher*  
 Wen-Pin Chang, M.D., M.P.H., D.M.Sc., *Visiting*  
 James M. Iacono, Ph.D., *Adjunct*

#### Adjunct Associate Professor

Daniel H. Ershoff, Dr.P.H.

#### Adjunct Assistant Professors

Martin Anderson, M.D.  
 Barbara A. Berman, Ph.D.  
 Roger A. Clemens, Dr.P.H.  
 Dierdre S. Gifford, M.D.  
 Stewart A. Laidlaw, Ph.D.  
 Kevin J. Malotte, Ph.D.  
 Jose Quiroga, M.D.  
 Susan B. Sorenson, Ph.D.  
 Antronette K. Yancey, M.D., M.P.H.

#### Assistant Field Program Supervisor

Marta G. Sorini, M.P.H.

## Scope and Objectives

The Department of Community Health Sciences focuses on the health-related behaviors of individuals within the context of the social structure, community, health care systems, and family unit. Of particular interest is how health-related behaviors of individuals are influenced by and interact with conditions in the social, cultural, physical, and biological environment to influence health status, with particular emphasis on identifying, evaluating, and discouraging health-damaging behaviors and facilitating health-promoting behaviors. The curriculum seeks to integrate basic and applied public health theories and methods in applying them to real problems of human populations. Assessment, planning, and evaluation are common themes in the department's educational programs, which provide concentrations in the areas of health education/promotion, international family health, public health nutrition, public health policy, and socio-cultural aspects of health. Students specializing in maternal and child health work across several of these concentrations and may select courses from other departments as well.

The department offers both professional (M.P.H. and Dr.P.H.) and academic (M.S. and Ph.D.) degree programs. Graduates of the professional programs generally assume positions in the planning, administration, and evaluation of public health programs and policies, both in the U.S. and abroad, which have as their objective the maintenance and improvement of the health of individuals, families, communities, and populations. Graduates of the doctoral programs assume teaching and research positions in a wide variety of settings, including universities, government agencies, nongovernmental organizations, international health agencies, and research centers.

## Requirements for Graduate Degrees

### Admission

Application forms and the *Announcement of the UCLA School of Public Health* may be obtained by writing to the Student Affairs Office, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the *UCLA Application for Graduate Admission* must be completed. Three letters of recommendation are required, two from former professors and one from an employer (if no employer, three former professors) before an application is considered complete. It is your responsibility to ensure that the application file is complete.

The preferred deadline for graduate applications is December 15, 1994, for Fall Quarter 1995 admission. *Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.*

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. No screening examination is required for admission. If your undergraduate coursework has been deficient in breadth of fundamental training, you must take specified undergraduate courses after admission. While not an absolute condition of admission, prior health-related or public health-related experience will be considered in your evaluation and enhances your chances of admission. Applicants interested in public health nutrition should be registered dietitians (R.D.), be R.D.-eligible or the equivalent, or have an M.D. or D.D.S. degree. In addition, you must be accepted by and accommodated in the Department of Community Health Sciences.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE). The Medical College Admission Test (MCAT) or Dental Admission Test (DAT) may be accepted in lieu of the GRE but usually *only* for applicants *already holding* M.D. or D.D.S. degrees. Applicants at the master's level must have a minimum GRE combined (verbal and quantitative) score of 1,100. Applicants at the doctoral level need a minimum GRE combined (verbal and quantitative) score of 1,200. The analytical section is not required.

Refer to the *UCLA Application for Graduate Admission* for the Test of English as a Foreign Language (TOEFL) requirement for international applicants.

### Master's Applicants

Your prior program of study should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each

in mathematics, biological sciences, social sciences; one course in physical sciences; and others that constitute an adequate preparation for the proposed area of specialization.

If your prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for your proposed area of specialization, you must include courses in those sciences in your graduate program; these may not be applied toward the minimum requirements for the degree.

### Specific Concentration Requirements

Applicants interested in population and family health are expected to have some prior experience in the health field (paid or volunteer) and preferably a bioscience or behavioral science background.

## Master of Science in Public Health

The Master of Science is a research-oriented degree within the general field of public health. It includes the preparation of a thesis or comprehensive examination/major written report. Teaching experience is not required.

See Schoolwide Programs at the end of this chapter for information on the M.P.H. degree.

### Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Community Health Sciences 597 may not be applied toward the degree requirements. No more than 18 full courses may be required for the degree.

Required school core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived if you have taken a similar course elsewhere and can pass the waiver examination.

Community Health Sciences 210, 211A-211B, 212, Biostatistics 406, and four to six department courses (selected from an approved list) are required. Electives, selected in consultation with an adviser, must include the Community Health Sciences 270 series, 283, and research methods courses. Normal program length is six terms.

Only courses in which you receive a grade of C- or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

## Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before you file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

## Comprehensive Examination/ Report Plan

If the comprehensive examination/report option is approved, a guidance committee of faculty members is appointed. A written comprehensive examination on your major area of study must be passed. If you fail, you may be reexamined once.

The preparation of a major written research report is required; it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

## Master of Science in Preventive Medicine and Public Health

The program is not admitting new students at this time.

## Ph.D. in Public Health

The Ph.D. is an advanced research degree that emphasizes depth of knowledge and research skills. The dissertation must demonstrate your ability for independent scholarly investigation.

There is no foreign language requirement for the Ph.D.; teaching experience is recommended but not required.

See Schoolwide Programs at the end of this chapter for information on the Dr.P.H. degree.

## Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.S. in Public Health or an appropriately related field (students with an M.P.H. need to satisfy the course requirements of the M.S. in Public Health before or after admission), (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by one or more faculty members in the department, (5) approval by the doctoral admissions committee and the department chair. Screening examinations may be required by the department.

You must satisfy the core requirements for the M.P.H. or M.S. in Public Health (depending on your background) at a level acceptable to the doctoral program. Coursework may be waived by examination if equivalent courses have been taken elsewhere.

## Major Field or Subdiscipline

Behavioral sciences and health education.

## Course Requirements

The courses needed to pass the written examination in your major field depend on the area and field you select.

The minor must be in a field cognate to the major field in public health. A strong minor is required, with at least four full graduate courses (16 units) or equivalent from a department that grants a Ph.D. Biostatistics is the only department considered cognate to a major in public health.

## Qualifying Examinations

Before advancement to candidacy, you must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.

## Final Oral Examination

A final oral examination is required of all candidates.

## Lower Division Course

**19. Peer Health Counselor Training.** Limited to students in Peer Health Counselor Program. Analysis of student health care issues as related to campus health care delivery system and to health care consumer. Identification of health needs, determination of appropriate resources, delivery of preventive and self-care education, and delineation of peer health counselor's role. Ms. Park

## Upper Division Courses

**100. Behavioral Sciences and Health Education.** (Formerly numbered 183.) Lecture, three hours; discussion, one hour. Development of broad appreciation of psychosocial factors as they affect health and their implications for public health. Review of theories, models, and modalities of health education for health promotion and disease prevention interventions.

**130. Nutrition and Health (2 units).** (Formerly numbered 161.) Prerequisites: one biology course, one chemistry course, consent of instructor. Not open for credit to nutrition majors. Basic and clinical nutrition theory and practice for students in health sciences curricula.

**132. Health, Disease, and Health Services in Latin America.** (Formerly numbered 174E.) Prerequisite: consent of instructor. Introduction to health, disease, and health services in Latin America, with emphasis on epidemiology, health administration, medical anthropology, and nutrition.

**187. Health Education for Teacher Credentials (2 units).** Limited to students in teacher education credential program. Required for California State Instructional Credential. Teaching/learning process as applied to personal and community health. Topics include psychoactive drugs (alcohol, tobacco, and narcotics), human sexuality, nutrition, and community health resources. Mr. Linder

**189. Community Cancer Education.** Lecture, three hours; project and fieldwork, one hour. Prerequisites: Biology 30 or equivalent, consent of instructor. Exploration of process of cancer education through community resources, culminating in student-generated community field-study proposal and presentation. Ms. Brown

**M197A. Introduction to Indo-American Studies.** (Same as Asian American Studies M197A.) Lecture, three hours. Prerequisite: junior/senior standing in Asian American studies or at least one course in Southeast Asian or Indian history or consent of instructor. Introductory study of Indian American immigration experiences in the U.S., including historical background, demographics, immigration policies and effects, and adaptation experiences. Class projects include sample survey of quality of life, annotated bibliography, and review of creative works. Mr. Kar (Sp)

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

## Graduate Courses

**200. Global Health Problems.** Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Overview of health profile of the world in the 20th century. Global health problems and methods by which they have been dealt in context of the Alma Ata goal of "health for all by year 2000." Mr. Galal, Mr. Neumann

**210. Community Health Sciences.** (Not the same as course 210 prior to Fall Quarter 1994.) Lecture, three hours. Prerequisite: one social sciences course. Basic concepts, relationships, and policy issues in the field of community health, variability in definitions of health and illness, correlates of health and illness behavior, impact of social and community structure on health status, major contemporary approaches to health promotion and health education at community level. Use of comparative international perspective.

**211A-211B. Program Planning, Research, and Evaluation in Community Health Sciences.** (Formerly numbered 210, 211, 217.) Lecture, three hours; discussion, one hour; outside assignments, eight hours. Prerequisite: course 210. Course 211A is prerequisite to 211B. Development, planning, and administration of public health programs in community settings. Introduction to range of research methods and techniques used in designing and conducting health research, with particular emphasis on evaluation of community-based public health programs. Course organized into three modules.

**212. Advanced Social Research Methods in Health.** (Formerly numbered 281.) Lecture, four hours; laboratory, two hours; outside assignments, eight hours. Prerequisites: courses 211A-211B, Biostatistics 100B, 406, consent of instructor. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques.

**213. Research in Community and Patient Health Education.** (Formerly numbered 295B.) Lecture, three hours; discussion, two hours. Prerequisites: course 210, consent of instructor. Application of conceptual, theoretical, and evaluation skills to community-based health education risk-reduction programs. Computer applications, data management, and research methodologies taught through microcomputer and mainframe computer management and analysis of program databases. Mr. Morisky

**214. Issues in Program Evaluation.** (Formerly numbered 289.) Discussion, three hours; reading and research paper, one hour. Prerequisite: course 212 or consent of instructor. Advanced seminar which explores problems of planning and implementing evaluation research in context of local demonstration projects. Mr. Berkanovic

**215. Advanced Topics in Health Survey Research Methods.** (Formerly numbered 291.) Lecture, two hours; discussion, two hours. Prerequisite: course 212 or consent of instructor. Special topics in health survey research methods. Design of special purpose surveys; recent interviewing techniques; diaries and memory aids; measurement error, including response bias, social desirability, response validity; telephone interviewing; obtaining data on sensitive issues; ethics and confidentiality of survey research data.

Mr. Goldstein

**M216. Qualitative Research Methodology.** (Formerly numbered M273.) (Same as Anthropology M284.) Discussion, three hours; laboratory, one hour. Prerequisite: consent of instructor. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care.

Ms. Scrimshaw

**218. Questionnaire Design and Administration.** (Formerly numbered 217.) Lecture, two hours; discussion, one hour; laboratory, one hour; outside assignments. Prerequisites: courses 211A-211B, consent of instructor. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires.

Ms. Bourque

**230. Family and Sexual Violence.** (Formerly numbered 276E.) Lecture, three hours; community, three to four hours. Prerequisite: consent of instructor. Examination of rape, incest, and spouse and elder abuse. Presentation of definitions, causes, outcomes of research on family and sexual violence, as well as response of social service, medical, and criminal justice systems.

Ms. Sorenson

**231. Maternal and Child Nutrition.** (Formerly numbered 270.) Prerequisite: consent of instructor. Nutrition of mothers, infants, and children in countries at various levels of socioeconomic development; measures for prevention and treatment of protein/calorie malnutrition; relationship between nutrition and mental development; impact of ecological, socioeconomic, and cultural factors on nutrition, nutrition education, and service.

Ms. Neumann

**M232. Medical Anthropology in Public Health.** (Formerly numbered M271.) (Same as Anthropology M266, Nursing M250, and Psychiatry M250.) Seminar, three hours. Cross-cultural aspects of human behavior as they relate to perception, treatment, incidence, and prevalence of disease and illness.

Ms. Scrimshaw

**233. Hunger and Food Insecurity as Public Health Issues.** (Formerly numbered 298T.) Lecture, three hours. Prerequisite: course 231 or 443 or equivalent or consent of instructor. Public health aspects of hunger and food insecurity in historical and international perspectives, including measurement and identification of vulnerability, prevention, and options for relieving acute food shortage.

Ms. Harrison

**234. Obesity and Nutrition: Multidisciplinary Perspective (2 units).** (Not the same as course 234 prior to Fall Quarter 1994.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: admission to UCLA postdoctoral fellowship training program in obesity and nutrition, or graduate standing in public health or biological sciences and consent of instructors. Multidisciplinary introduction at advanced graduate level to research methods and topics on obesity and related conditions in humans and in relevant animal and in vitro models.

Ms. Harrison, Mr. Heber

**235. The Family and Mental Health.** (Formerly numbered 272E.) Lecture, two hours; discussion, two hours; assignments, eight hours. Prerequisite: consent of instructor. Emphasis on how social organization of the family, relationships among family members, and extrafamilial roles of family members contribute to or detract from psychological well-being of spouses, parents, and children.

Ms. Aneshensel

**M236. Human Resources and Economic Development.** (Formerly numbered M272J.) (Same as Education M252C.) Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments.

Mr. Jamison (Sp)

**237. Evolving Paradigms of Prevention: Interventions in Early Childhood.** Seminar, three hours; fieldwork, one hour. Prerequisites: graduate standing, consent of instructor. Introduction to use of early childhood interventions as means of preventing adverse health and developmental outcomes. Concepts of developmental vulnerability, approaches to assessment, models of service delivery, evaluation and cost-benefit issues, funding, and other policy issues.

Mr. Halfon

**238. Evolving Paradigms of Prevention: Interventions in Adolescence.** (Formerly numbered 298N.) Seminar, three hours. Prerequisites: graduate standing, consent of instructor. Introduction to organizing principles which underlie health assessment and intervention in adolescent populations (identity formation, access to care, knowledge/attitudes/behavior influences) and provide a basis for understanding pivotal issues in health enhancement, morbidity, and mortality.

Mr. Anderson, Ms. Yancey

**M240. Culture and Human Reproduction.** (Formerly numbered M276.) (Same as Anthropology M262P.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Exploration of human behavior related to reproduction. Cross-cultural exploration of biological and behavioral factors, with particular reference to human adaptation.

Ms. Scrimshaw

**242. Advanced Seminar: Population and Family Health (2 units).** (Formerly numbered 279.) Prerequisites: doctoral standing, consent of instructor. Current research in population and family health. May be repeated for credit. S/U grading.

**243A-243B-243C. Seminars: Preventive Medicine (2 units each).** (Formerly numbered 279D-279E-279F.) Prerequisite: consent of instructor. Three-term sequence devoted to analysis of current issues, practices, research literature, and policy and trends in preventive medicine. Discussion of administrative, epidemiologic, and clinical methods. S/U grading.

Mr. Neumann

**M244. Advanced Seminar: Medical Anthropology.** (Formerly numbered M279H.) (Same as Anthropology M263Q, Nursing M273, and Psychiatry M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

Ms. Browner (Sp)

**M245A-M245B-M245C. Child Abuse and Neglect (2 units, 2 units, 1 unit).** (Formerly numbered M272F-M272G-M272H.) (Same as Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Course M245A is prerequisite to M245B, which is prerequisite to M245C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies.

**246. Women's Roles and Family Health.** Lecture, two hours; discussion, one hour. Prerequisite: consent of department. Rapidly changing roles of women throughout the world are having important effects on women's own health and that of their families. Analysis of multidisciplinary research from both developing and industrialized countries to provide basis for in-depth discussion of programmatic and policy implications.

Ms. Leslie

**M267. Structure and Function of Nutrients Implicated in Etiology of Chronic Disease.** (Same as Epidemiology M276.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: one prior organic chemistry course. Basic nutrition course for public health and science majors.

Mr. Longnecker

**271. Health-Related Behavior Change.** (Formerly numbered 280.) Prerequisite: course 210 or consent of instructor. Unified behavioral science approach to natural determinants of change, as foundation for planned change in health-related behavior at community, group, and individual levels.

Ms. Siegel

**272. Social Epidemiology.** (Formerly numbered 283E.) Lecture, two hours; discussion, one hour. Prerequisite: Epidemiology 100 or consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other socioenvironmental factors associated with general susceptibility to disease and subsequent mortality.

Ms. Siegel

**273. Social Epidemiology of Chronic Disease.** (Formerly numbered 283H.) Lecture, two hours; discussion, one hour. Prerequisite: Epidemiology 100 or consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of chronic diseases. Topics include hypertension, coronary heart disease, and cancer. Emphasis on lifestyles and other socioenvironmental factors associated with chronic diseases.

Ms. Siegel

**M274. Health Professions.** (Formerly numbered M283F.) (Same as Sociology M249A.) Lecture, three hours. Prerequisite: course 210 or consent of instructor. Sociological examination of concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings.

Mr. Goldstein

**M275. Health and Illness Behavior.** (Formerly numbered M283G.) (Same as Sociology M249B.) Prerequisites: course 210 and Epidemiology 100, or consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior.

Mr. Berkanovic

**276. Alcohol and Drug Abuse: Social Policy Perspectives (3 units).** (Formerly numbered 292.) Prerequisite: consent of instructor. Alternative models of alcohol and other drug addictions examined and implications assessed for public policy regarding their control. Prevention efforts and findings from California and national surveys, with primary emphasis on alcohol use and abuse.

**277. Advanced Community Health Education.** (Formerly numbered 295A.) Lecture, two hours; discussion, two hours. Prerequisite: course 210. Before planning the educational components of a health program, one must assess behaviors and factors influencing the health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing a community-based educational program.

Mr. Morisky

**278. Social and Behavioral Perspectives on Work and Health.** (Formerly numbered 297.) Prerequisites: course 470 and Environmental Health Sciences 250, or consent of instructor. Discussion of current social and behavioral research, issues, and perspectives on work and health.

**279. Advanced Community Organization Seminar.** (Formerly numbered 487.) Seminar, three hours. Prerequisite: course 487 or consent of instructor. Advanced seminar on theoretical and practical problems in community organization, with readings and term projects focusing on participation, leadership, outreach, coalitions, and related issues of community organization and social change applied to health problems.

Mr. Brown

**280. International Health Education: Training and Development.** (Formerly numbered 489.) Prerequisites: course 210 and one upper division research methods or epidemiology course, or consent of instructor. Introduction to an international perspective of health education and health promotion. Survey of current developments in health education in both developed and developing countries. Ms. Li

**281. Alcoholism and Drug Abuse among Women.** (Formerly numbered 293.) Prerequisite: consent of instructor. Discussion of psychosocial aspects of abuse of alcohol and other drugs among women. Topics include etiology, prevention, treatment, hormonal influences, and role of the family. Emphasis on current theoretical perspectives and research findings.

**282. Communication in Health Promotion and Education.** Lecture, two hours; discussion, two hours. Prerequisites: course 210, consent of instructor. Design, implementation, and evaluation of interpersonal communication strategies for health promotion programs. Equal emphasis on communication theories, models, and empirical research literature and on specific applications in health programs and case studies. Mr. Kar

**283. Aging and Health Behavior.** (Formerly numbered 283I.) Discussion, three hours. Prerequisite: course 210 or consent of instructor. Graduate seminar intended to explore sociocultural determinants of health-related behaviors among the aged.

Mr. Berkanovic

**284. Ecology of Mental Health.** Lecture, three hours. Prerequisites: course 210, Epidemiology 100, and Biostatistics 100A, or consent of instructor. Analysis of occurrence and distribution of mental disorders in the community and relationships to social structure. Problems of classification, definition, measurement in sociopsychiatric epidemiology, sociocultural and social-psychological factors in mental disorders. Mr. Goldstein

**285. Aging, Health, and Society.** Lecture, three hours; discussion, one hour. General introduction to major social issues affecting health of the elderly in America. Leading gerontological theories and major issues that affect the aged, showing how those theories and issues influence health status, health promotion, and illness among the elderly. Mr. Wallace

**286. Seminar: Behavioral Sciences and Health (2 to 4 units).** Lecture, two hours. Prerequisite: consent of instructor. Recent significant contributions of behavioral sciences to understanding health and illness, with selected and varying topics each term. May be repeated for credit. S/U grading.

Mr. Berkanovic, Mr. Goldstein

**288A-288B. Current Problems in Health Education.** (Formerly numbered 288.) Lecture, one hour; discussion, three hours. Prerequisites: course 210 and three other public health and/or social sciences courses, or consent of instructor. Current problems and findings in health education content areas, such as nutrition, mental health, family health, consumer health, safety, and communicable and chronic diseases. In Progress and S/U grading.

**290. Race, Class, Culture, and Aging.** (Formerly numbered 298.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Experience of aging for African American, Latino, and Asian elderly examined in context of their families, communities, and the nation. Exploration of cultural and structural influences on health and lived experiences of those elders. Mr. Wallace

**291. Health Policy and the Aged.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Examination of political, economic, and social forces that shape health policy for the aged, identifying failings in those policies within framework of broader health policy problems. Mr. Wallace

**292. Communication and Media Development in Health Promotion/Education.** Lecture, three hours; field practice, one hour. Prerequisites: course 210 or prior social sciences courses or consent of instructor. Selected aspects of communications planning, social marketing, mass media, and communications evaluation theory and practice. Ms. Glik

**293. Social and Behavioral Research in AIDS: Roundtable Discussion (2 units).** (Formerly numbered 298.) Review and discussion of research programs directed toward identification of psychosocial, biobehavioral, environmental, and community factors related to prevention and control of AIDS/HIV.

Mr. Morisky

**294. Social and Behavioral Factors of AIDS/HIV: A Global Perspective.** (Formerly numbered 298.) Prerequisites: course 100 and Epidemiology 100 or prior social sciences courses, or consent of instructor. Overview of social and behavioral factors which influence both the transmission as well as prevention of HIV/AIDS throughout the world.

Mr. Morisky

**296A-296L. Advanced Research Topics in Behavioral Sciences and Health Education (2 to 4 units each).** Prerequisite: consent of instructor. Advanced study and analysis of current topics in behavioral sciences and health education. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading:

**296A. AIDS Prevention.**

Mr. Morisky

**296M-296Z. Advanced Research Topics in Population and Family Health (2 to 4 units each).** Prerequisite: consent of instructor. Advanced study and analysis of current topics in population and family health. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading:

**296M. Advanced Research Methods.**

Ms. Bourque

**400. Field Studies in Public Health (2 or 4 units).** Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

**411. Issues in Cancer Prevention and Control.** (Formerly numbered 288A.) Lecture, two hours. Prerequisites: Medicine M293 and three courses in behavioral sciences and health education core, or consent of instructor. Provides students with working knowledge of cancer control objectives for the nation, rationale and various phases of cancer control research, and presentation of cancer control interventions, including smoking cessation/prevention, cancer screening, and dietary and psychosocial interventions. Ms. Bastani, Ms. Berman

**M417. Injury Prevention Strategies and Countermeasures (2 units).** (Same as Epidemiology M417.) Prerequisites: Epidemiology 100 or equivalent, consent of instructor. Lectures with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U or letter grading.

Mr. Kraus, Ms. Sorenson

**430A. International Health Agencies and Programs.** (Formerly numbered 470A.) Prerequisite: consent of instructor. Historical development and functions of international health organizations. Key problems and trends in international health. Bilateral programs, medical/religious missions, private foundations, and others disseminating information, money, and services.

Mr. Neumann

**430B. Advanced Issues in International Health.** (Formerly numbered 470B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. In-depth focus on major health care issues confronting recipient less-developed countries and donors of technical and financial assistance.

Mr. Neumann

**431. Research in Women's Health: Theories and Methods.** (Formerly numbered 471A.) Prerequisite: consent of instructor. Interdisciplinary perspective critically examining research on women's health. Overview of scientific inquiry and methods; gender roles; status attainment and medical sociology. Review of current data on women's health.

Ms. Upchurch

**M432. Perinatal Health Care: Principles, Programs, and Policies.** (Formerly numbered 432.) (Same as Obstetrics and Gynecology M432.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Comprehensive examination of perinatal health care, including perinatal epidemiology, outcome measures, public programs, controversies surrounding new technology, regionalization, organization of services at federal, state, and county levels, and medical/legal issues. Ms. Gifford

**433. Reproductive Health: Demographic Applications.** (Formerly numbered 471C.) Introductory aspects of population dynamics; reproductive biology (male and female); contraceptive methods; fertility-related behaviors and STDs; methods to measure contraceptive (life tables) and program (evaluation) effectiveness. Ms. Upchurch

**434A. Maternal and Child Health in Developing Areas.** (Formerly numbered 472A.) Prerequisite: course 231 or consent of instructor. Major health problems of mothers and children in developing areas, stressing causation, management, and prevention. Particular reference to adapting programs to limited resources in cross-cultural milieu.

Mr. Galal, Ms. Neumann

**434B. Recent Developments in Maternal and Child Health in Disadvantaged Countries (2 units).** (Formerly numbered 472B.) Prerequisite: course 231 or consent of instructor. Analytic in-depth consideration of recent advances in the field of international maternal and child health, with special reference to developing countries.

**435. Seminar: Advanced Issues in Women's Health (2 units).** (Formerly numbered 298S.) Prerequisites: course 246 or 431, consent of instructor. Provides a more advanced and in-depth understanding of ways in which scientists "know" and considerations of women's place in scientific discourse. Examination of a series of case studies as a starting point for discussion. Ms. Leslie, Ms. Upchurch

**436A-436B. Child Health, Programs, and Policies.** (Formerly numbered 436.) Prerequisite: Health Services 100. Course 436A is prerequisite to 436B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations.

Mr. Halfon

**437. Preventive Medicine and the Family.** (Formerly numbered 473E.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Comprehensive review and evaluation of scientific background and application of principles of preventive medicine, with primary focus on the family and the disadvantaged. Mr. Neumann

**438. Research Seminar: Community Child Health Services (2 units).** (Formerly numbered 473F.) Discussion, one hour; laboratory, one hour; field trips, two hours. Prerequisite: consent of instructor. Examination and development of evaluation strategies for existing community child health services at the local level and development of evaluation strategies for selected topics in programmatic areas. Emphasis on collaborative research and consultation skills, with participation of local health department personnel.

**439. Health Services in Child Day Care.** (Formerly numbered 473G.) Lecture, two hours; discussion, two hours; one field trip, three hours. Prerequisite: consent of instructor. Assessment of needs, planning, and development of health and nutrition services for young children in day care and related child development programs.

**440. Child Health Policy.** (Formerly numbered 473H.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Analysis of development and characteristics of child health programs and policies; issues related to health services for children examined according to chronological development of child; relationship of health programs to programs of nutrition, day care, education, and welfare; strategies for achieving change and politics of developing a child health policy. Mr. Halfon

**441. Planning and Development of Family Health Programs.** (Formerly numbered 475.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Theory, guidelines, and team exercise for planning community health/family planning projects in the U.S. and in developing countries. Phases include community needs identification; goal setting; budget and work plan development; funding; staffing; evaluation design; data and cost analysis; and project presentation. Mr. Neumann

**443. Assessment of Family Nutrition.** (Formerly numbered 477.) Prerequisite: course 231 or consent of instructor. Assessment of nutritional status of families in developing countries, with special reference to limited resources, terrain, and cross-cultural considerations, stressing anthropometric methods and techniques. Ms. Harrison, Ms. Neumann

**444. Anthropometric and Dietary Aspects of Nutritional Assessment.** (Formerly numbered 478.) Lecture, two hours; laboratory, two hours. Prerequisite: course 443 or consent of instructor(s). Practical skills in anthropometric and dietary assessment, including selection of appropriate methods, data gathering and handling, and analysis and presentation. Ms. Neumann

**445. Food and Nutrition Planning: Policies and Programs in World Context.** (Formerly numbered 479.) Lecture, two hours; discussion, two hours. Prerequisite: course 434A or consent of instructor. Discussion of policies regarding improvement of food supplies and their global impact on health of disadvantaged families, including review of effect of many factors, with emphasis on need for multidisciplinary action, food and nutrition planning, and external assistance. Ms. Jelliffe

**446. Nutrition Education and Training: Third World Considerations.** (Formerly numbered 479D.) Lecture, two hours; discussion, one hour; student participation, one hour. Prerequisite: course 434A or consent of instructor. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary health care services, mass media, communications, and governmental and international interventions. Ms. Jelliffe

**447. Health Issues in the Middle East.** Prerequisite: course 200 or 231 or 434A or consent of instructor. Recommended: background in Islamic or Middle Eastern studies. Current health issues and problems of countries in the Middle East and implications for socio-economic development. Review of economic, demographic, and cultural variation of the region to provide background for discussion of trends and patterns of health and nutritional status of population in the area. Mr. Galati

**470. Introduction to Occupational Health Education.** (Formerly numbered 294.) Lecture, one hour; discussion; two hours; outside assignment, one hour. Prerequisites: course 210, two sociology or anthropology courses or equivalent, consent of instructor. Health education theory and practice as applied to occupational health and safety. Emphasis on design and evaluation of education programs dealing with health and safety issues for workplace settings.

**474. Self-Care and Self-Help in Community Health.** Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Review of background, principles, concepts, programs, and research concerning the emerging field of self-care in health. Mr. Katz

**480. Health Education in Clinical Settings.** Lecture, two hours; discussion, two hours. Prerequisites: courses 271, 282, Health Services 100, consent of instructor. Analysis of role, methods, and techniques of health education pertaining to hospitals, clinics, and patient education. Observation and discussion of clinical activities in the medical center in relation to the process of health education.

**482. Practicum: Health Education (4 or 8 units).** Discussion, two hours; fieldwork, 20 to 40 hours. Prerequisites: courses 210, 271, consent of instructor. Study of community and group-felt needs as reflected in behavior. Analysis of data for understanding, planning, implementing, and evaluating need-directed health education and medical care programs. Ms. Sorini

**483. Social Interventions for Health Promotion and Evaluation.** Lecture, two hours; discussion, one hour; seminar, one hour. Prerequisites: courses 210, 271, or equivalent, one social sciences or research methods course, consent of instructor. Selected social intervention strategies for health promotion and health education programs. Emphasis on theories, working assumptions, methodologies, and impacts of selected strategies within contexts of planned change in health-related behaviors. Mr. Kar

**487. Community Organization for Health.** (Formerly numbered 287.) Lecture, three hours; fieldwork, four to six hours. Prerequisites: course 210, three public health, sociology, or anthropology courses or equivalent. Theory and practice of community organizations, including models and strategies of community organization and their application to health problems and health policy. Particular attention to use of community organization for health promotion and to change public policy. Mr. Brown

**490. Professional Writing for Public Health (2 units).** Prerequisite: consent of instructor. Practice in writing reports, grant proposals, abstracts, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various professional journals to help participants improve both their prose style and their editorial abilities. S/U or letter grading.

**495. Teacher Preparation in Public Health (2 units).** Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while UH Cr/NCr-graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research (2 to 8 units).** Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research (2 to 8 units).** Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## Environmental Health Sciences

56-070 Center for the Health Sciences, (310) 825-7675

### Professors

Climis A. Davos, Ph.D.  
Curtis D. Eckhart, Ph.D., *Vice Chair*  
John R. Froines, Ph.D., *Chair*  
William C. Hinds, Sc.D.  
Mohammad G. Mustafa, Ph.D.  
Irwin H. Suffet, Ph.D.  
Arthur M. Winer, Ph.D.  
Robert A. Mah, Ph.D., *Emeritus*

### Associate Professors

Richard F. Ambrose, Ph.D.  
Shane Que Hee, Ph.D.  
Jane L. Valentine, Ph.D.

### Assistant Professors

Michael D. Collins, Ph.D.  
L. Donald Duke, Ph.D.  
Wen-Chen Victor Liu, Ph.D., *in Residence*

### Lecturers

Larry Baresi, Dr.P.H.  
Frank C. Gomez, Dr.P.H.  
Mario Panaqua, B.A.  
Walter Wegst, Ph.D.

### Adjunct Assistant Professors

Edward J. O'Neill, M.D., M.P.H.  
David M. Pikelney, Ph.D.  
Diane L. Saber, Ph.D.

### Associate Field Program Supervisor

Robert G. Lindberg, Ph.D.

## Scope and Objectives

The Department of Environmental Health Sciences focuses its research and educational activities on the protection of human health from biological, chemical, and physical hazards in the environment. Its graduates are highly trained scientists and professionals capable of identifying and measuring agents of environmental concern; evaluating the health, environmental, and all other impacts of such agents; developing means for their effective management; and evaluating alternative policies directed at improving and protecting environments. Such training is accomplished through several degree programs which offer specialized study in selected academic areas of environmental health sciences

such as air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality. Graduates of the department pursue careers in the private or public sector as researchers, educators, managers, policymakers, and/or practitioners.

The department offers M.S. and Ph.D. degrees in Environmental Health Sciences and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in environmental health sciences. In addition, a unique doctoral degree (Doctor of Environmental Science and Engineering — D.Env.) is offered by the interdepartmental Environmental Science and Engineering Program which is administered through the department.

## Requirements for Graduate Degrees

### Admission

Descriptive brochures and applications for the department, as well as for the Environmental Science and Engineering program, may be obtained together with the *Announcement of the UCLA School of Public Health* by writing to the Administrator, Department of Environmental Health Sciences, 56-070 CHS, UCLA, Los Angeles, CA 90024-1772.

The preferred deadline for graduate applications is December 15, 1994, for Fall Quarter 1995 admission. *Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.*

### Master's Applicants

The department requires the following:

- (1) A bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least one year of chemistry (including organic chemistry or biochemistry), physics, biology, and mathematics through calculus.
- (2) A junior/senior grade-point average of at least 3.0.
- (3) A combined (verbal and quantitative) Graduate Record Examination (GRE) score of at least 1,100.
- (4) A score of at least 550 on the Test of English as a Foreign Language (TOEFL) for international students whose native language is other than English.

### Doctoral Applicants

The department requires the following:

- (1) A bachelor's degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least one year of chemistry (including organic chemistry or biochemistry), physics, biology, and mathematics through calculus.
- (2) A junior/senior grade-point average of at least 3.0.

(3) A master's degree in a related field with a grade-point average of at least 3.5 for graduate studies.

(4) A combined (verbal and quantitative) Graduate Record Examination (GRE) score of at least 1,200.

(5) A score of at least 550 on the Test of English as a Foreign Language (TOEFL) for international students whose native language is other than English.

## Master of Science Degree

The Master of Science is a research-oriented degree which includes the preparation of a thesis or comprehensive examination and a major written report. Academic areas of concentration include air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality.

See Schoolwide Programs at the end of this chapter for information on the M.P.H. degree.

### Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. However, you must also take additional courses as required by your area of concentration. No more than 18 full courses may be required for the degree. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Environmental Health Sciences 597 may not be applied toward the degree requirements.

Required school core courses include Biostatistics 100A, 100B, and Epidemiology 100. Required department core courses include Environmental Health Sciences 101, 201 (may be repeated for credit), 210, 230, 240, 250, 410A, 410B, M411, 598 (courses 101 and 210 are not required of industrial hygiene majors). Each core course may be waived if you have taken a similar course elsewhere and can pass the waiver examination.

Only courses in which you receive a grade of C- or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

### Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before you file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

### Comprehensive Examination/Report Plan

If the comprehensive examination/report option is selected, you complete a research activity

(Environmental Health Sciences 596) of at least eight units and prepare an in-depth written report on it which must be approved by your adviser and one other faculty member approved by the department chair. A written comprehensive examination on your major area of study, prepared by a committee of faculty members, must also be passed. If you fail, you may be reexamined once.

## Ph.D. Degree

The Ph.D. is an advanced research degree that emphasizes depth of knowledge and research skills. The dissertation must demonstrate your ability for independent scholarly investigation. Academic areas of concentration include air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality.

There is no foreign language requirement for the Ph.D.

See Schoolwide Programs at the end of this chapter for information on the Dr.P.H. degree.

### Course Requirements

You must fulfill the minimum requirements of the Graduate Division (see "Requirements for Graduate Degrees" in Chapter 3). Courses in your major field as recommended by your adviser and guidance committee are required, as are courses in a minor field related to environmental health sciences in a department outside the School of Public Health that grants a Ph.D. or in the Department of Biostatistics. This usually consists of three or four full courses, as specified by the department offering the minor.

### Qualifying Examinations

Before advancement to candidacy, you must pass a departmental written examination in the major field and an oral qualifying examination. Normally no more than one reexamination is allowed. You must also complete the requirements in the minor field set forth by the offering department. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.

### Final Oral Examination

A final oral examination is required of all candidates.

## Upper Division Courses

**100. Introduction to Environmental Health.** (Formerly numbered 155.) Lecture, three hours; discussion, one hour. Prerequisites: one course each in chemistry and biology, consent of instructor. Introduction to environmental health, including coverage of sanitary principles and chronic and acute health effects of environmental contaminants.

Mr. Eckhart, Mr. Mustafa

**101. Environmental Health.** (Formerly numbered 150.) Lecture, three hours; discussion, one hour. Prerequisites: one course each in chemistry and biology, consent of instructor. Broad coverage of environmental health, including airborne and waterborne pollutants; pollutants from urban industrial and agricultural wastes; pollution from pesticide chemicals, mining, and energy production and consumption; chemical food additives; and occupational exposure to chemical and physical hazards.

Mr. Eckhart, Mr. Mustafa

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

## Graduate Courses

**201. Seminar: Health Effects of Environmental Contaminants (2 units).** (Formerly numbered 255.) Prerequisites: courses 101, 210, 230, 250, consent of instructor. Emphasis on health effects of air, water, environmental pollutants on man and review of research literature. May be repeated for credit.

**202. Seminar: Environmental Chemistry (2 units).** Seminar, one hour. Prerequisites: courses 100 or 101, 410A, and 410B, or consent of instructor. Environmental chemistry aspects of environmental health sciences through multimedia analyses and biological and microbiological analyses. May be repeated for credit.

Mr. Que Hee

**210. Public Health and Environmental Microbiology.** (Formerly numbered 153.) Lecture, three hours. Prerequisites: one course each in biology, organic chemistry, and biochemistry, consent of instructor. Basic principles: cycling of matter, fates of natural and man-made compounds in the environment, wastewater and drinking water microorganisms and treatment, and public health microorganisms.

**211. Science and Politics of Environmental Regulation.** (Formerly numbered 259B.) Lecture, three hours. Prerequisite: consent of instructor. Analysis of how science, law, administration, economics, and politics influence state and national environmental regulation from formulation to implementation, including rule making, public participation, federalism, enforcement, and judicial review.

**212. Applied Ecology.** (Formerly numbered Environmental Science 298B.) Prerequisite: one ecology course or consent of instructor. Application of ecological theory and principles to solve environmental problems, including conservation biology, assessment of environmental impacts, and restoration ecology and mitigation of environmental impacts.

Mr. Ambrose

**220. Biological Effects of Air Pollution.** (Formerly numbered 152.) Lecture, three hours; discussion, one hour. Prerequisites: one course each in chemistry and biology, consent of instructor. Survey of biological effects and assessment methods of air contaminants present in urban, industrial, and occupational environments.

Mr. Mustafa

**225. Atmospheric Transport and Transformations of Airborne Chemicals.** (Formerly numbered 250B.) Prerequisites: science, engineering, or public health major, one year of calculus, and one course each in physics, organic chemistry, and physical chemistry, or consent of instructor. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds.

Mr. Winer

**230. Environmental Management.** (Formerly numbered 154.) Lecture, four hours; discussion, one hour. Prerequisites: Economics 100, Political Science 142 or 143, Mathematics M112A, 115A, or equivalent. Introduction to foundations and principles of environmental management, decision making, and evaluation of environmental policies and programs.

Mr. Davos

**231. Environmental Decision Systems Analysis.** (Formerly numbered 254.) Lecture, four hours; discussion, one hour. Prerequisite: course 230. Techniques and models of systems analysis and concepts of general system theory as applied to comprehensive study, planning, evaluation, and management of environmental decision systems. Experimentation with relevant computer programs.

Mr. Davos

**232. Environmental Policy Decision Making.** (Formerly numbered 454.) Prerequisites: courses 230, 231, consent of instructor. Foundations, principles, and modeling of environmental policy decision making. Critical analysis of normative and behavioral models of action choices for protection and enhancement of environmental health, and development of an alternative model.

Mr. Davos

**235. Quantitative Methods for Environmental Assessment.** Lecture, four hours; discussion, one hour. Prerequisites: bachelor's degree in science, engineering, or public health, one term of statistics, and one year of advanced mathematics, or consent of instructor. Introduction to quantitative methods for evaluating health effects and environmental impacts of human activities; concepts of environmental assessments and planning. Assignments include statistics analysis, risk assessment, economic methods. Examples from U.S. and California regulations, policy, project environmental assessments.

Mr. Duke

**M239. Pollution Prevention Forum Series (2 units).** (Same as Urban Planning M262C.) Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area.

Mr. Froines, Mr. Gottlieb

**240. Environmental Toxicology.** (Formerly numbered 253A.) Lecture, four hours; discussion, one hour. Prerequisite: one organic chemistry course. Essentials of toxicology, dose response, physical, chemical, or biological agents that adversely affect man and environmental quality.

Mr. Froines

**241. Environmental Toxicology: Trace Contaminants.** (Formerly numbered 253B.) Lecture, three hours; discussion, one hour. Prerequisite: one organic chemistry course. Essentials of toxicology in relation to trace contaminants.

Mr. Froines

**M249. Toxics Reduction: Science, Engineering, and Policy Issues.** (Same as Urban Planning M262A and Chemical Engineering M290U.) Lecture, three hours. Prerequisites: Urban Planning 260A and 260B, or consent of instructor. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area.

Mr. Allen, Mr. Froines, Mr. Gottlieb, Ms. Roque

**250. Introduction to Occupational Safety and Health.** (Formerly numbered 156.) Prerequisite: consent of instructor. Scientific, legal policy, and historical issues in occupational health. Introduction to various related disciplines (e.g., occupational medicine, nursing, industrial hygiene, toxicology, epidemiology, health education).

Mr. Froines

**251. Occupational Disease.** (Formerly numbered 256.) Prerequisites: course 250, consent of instructor. Introduction to health effects of occupational exposures, including recognition, evaluation, and prevention of occupational diseases. Emphasis on concept of disease mechanisms, manifestations, and classification relevant to professionals in disciplines related to occupational health.

Mr. Froines, Mr. Harber

**252D. Properties and Measurement of Airborne Particles.** (Formerly numbered 257E.) Prerequisites: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems.

Mr. Hinds

**252E. Identification and Measurement of Gases and Vapors.** (Formerly numbered 257F.) Lecture, three hours; discussion, one hour; other, two hours. Prerequisites: course 250, one year each of chemistry, physics, and calculus, consent of instructor. Theoretical and practical aspects of industrial hygiene sampling and measurement of gases and vapors.

Mr. Que Hee

**252F. Industrial Hygiene Measurements Laboratory (3 units).** (Formerly numbered 257G.) Corequisites: courses 252D, 252E. Limited to industrial hygiene majors. Laboratory methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environment.

Mr. Hinds, Mr. Que Hee

**252G. Industrial and Environmental Hygiene Assessment.** Lecture, one hour; discussion, two hours; laboratory, two hours; other, four hours. Prerequisites: courses 101, 250, 252D, 252E, 252F. Environmental and industrial hygiene sampling strategies and assessment via walk-through surveys, lectures, group discussion, actual field measurements, laboratory calibrations, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards.

Mr. Froines, Mr. Hinds, Mr. Que Hee

**253. Physical Agents in the Work Environment (2 units).** (Formerly numbered 157H.) Prerequisites: course 250, one year of physics, consent of instructor. Physics, measurement methods, health effects, and control methods for radiation (ionizing and nonionizing), noise, and heat in the workplace environment.

Mr. Hinds, Mr. Liu, Mr. Wegst

**254. Health Hazards of Industrial Processes.** (Formerly numbered 157G.) Lecture, two hours; four field trips. Prerequisites: courses 250, 255, consent of instructor. Industrial processes and operations and occupational health hazards that arise from them.

Mr. Froines, Mr. Hinds, Mr. Que Hee

**255. Control of Airborne Contaminants in Industry.** (Formerly numbered 257H.) Lecture, two hours; laboratory, two hours. Prerequisites: courses 250, 252D, one year of physics, consent of instructor. Principles and applications of control technology to industrial environments, including general and local exhaust ventilation, air cleaning equipment, and respiratory protection.

Mr. Hinds

**256. Biological Monitoring in Occupational/Environmental Health.** (Formerly numbered 257I.) Lecture, two hours; discussion, one hour; assignments, two hours. Prerequisites: courses 101, 250, 252E, Biostatistics 100A, consent of instructor. Principles and application of biological monitoring for assessment of occupational exposure to organic and inorganic chemicals.

Mr. Que Hee

**257. Critical Review of Scientific Basis of Occupational Standards.** (Formerly numbered 259A.) Prerequisites: courses 240, 250, 251, Epidemiology 100, consent of instructor. Designed to provide students with opportunity to review scientific basis for association of selected occupational exposures with disease. Special emphasis on critical evaluations of the literature. Attention specifically to interface of science and regulatory standards.

**258. Identification and Analysis of Hazardous Wastes.** (Formerly numbered 258C.) Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Prerequisites: courses 250, 252E, Biostatistics 100A, consent of instructor. Designed to define, identify, label, and quantify hazardous wastes and how workers should be protected. Provides a critical understanding of all analytical aspects of hazardous wastes, health aspects, and regulation and practice of handling hazardous wastes.

Mr. Que Hee (odd years)

**259. Occupational Ergonomics (2 units).** (Formerly numbered 298A.) Prerequisite: course 250. Exploration of ergonomic principles for study of worker's safety, health, and performance. Mr. Liu

**261. Chemical Behavior of Aquatic Systems.** (Formerly numbered 251.) Lecture, three hours. Prerequisites: course 101, Chemistry 11A, 11B, Mathematics 3A. Chemistry of ocean waters, rivers, groundwaters, and water treatment systems. Topics include thermodynamics of natural waters, acids and bases, carbon dioxide cycle, solubility reactions, oxidation and reduction, plus applied problems. Ms. Valentine

**262. Environmental Microbiology.** (Formerly numbered 252.) Lecture, three hours. Prerequisites: one course each in microbiology and biochemistry. Basic concepts of eutrophication, indicator organisms, aquatic microbes; assessment of biological treatment practices in water reuse and/or purification.

**263. Geochemistry of Groundwater (2 units).** (Formerly numbered 151A.) Prerequisites: Biostatistics 100A, Chemistry 11A, 103, Earth and Space Sciences 1, consent of instructor. Geochemistry of groundwater as impacted by the geologic environment and other natural factors and changes in composition due to water use.

**264. Fate and Transport of Organic Chemicals in the Aquatic Environment.** (Formerly numbered 213.) Prerequisite: bachelor's degree in science, engineering, geophysics, chemistry, biology, or public health. Evaluation of how and where and in what form and concentration organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes. Mr. Suffet

**400. Field Studies in Environmental Health Sciences (2 or 4 units).** Prerequisite: consent of instructor. Field observation and studies in selected community environmental health organizations. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

**401. Environmental Measurements.** (Formerly numbered 450.) Lecture, two hours; laboratory, four hours. Prerequisites: course 101, Chemistry 11A, 11CL, consent of instructor. Instrumental methods for laboratory and field applications to assess quantity of environmental pollutants in air, food, and water, and to assess degree of exposure to such factors as noise and radiation. Ms. Valentine

**410A. Instrumental Methods in Environmental Sciences.** (Formerly numbered 410.) Lecture, four hours; discussion, two hours; other, two hours. Prerequisites: one year each of physics, chemistry, and biology, consent of instructor. Theory and principles of instrumental methods through lectures and group discussions. Mr. Que Hee, Mr. Suffet

**410B. Instrumental Methods Laboratory in Environmental Health Sciences.** (Formerly numbered 410.) Lecture, one hour; discussion, one hour; laboratory, four hours; other, two hours. Prerequisites: course 101, one year each of physics, chemistry, and mathematics, consent of instructor. Laboratory techniques and instrumentation used in preparation and analysis of biological, environmental, and occupational samples.

Mr. Panaqua, Mr. Que Hee, Mr. Suffet

**M411. Environmental Health Sciences Seminar (2 units).** (Same as Environmental Science M411.) Prerequisite: consent of instructor. Required of graduate students in environmental health sciences for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

**461. Water Quality and Health.** (Formerly numbered 451.) Lecture, three hours; discussion, one hour. Prerequisites: courses 101, 401, consent of instructor. Introduction to water quality, with coverage of hydrology, water chemistry, and various chemical contaminants that may affect human health. Various treatment methods and health implications. Ms. Valentine

**462. Environmental Hygiene and Appropriate Technologies (2 units).** (Formerly numbered 452.) Prerequisite: consent of instructor. Environmental sanitation of water supplies in rural and developing areas. Review of water quality problems and solutions for nonurban, developing community. Technical, socioeconomic, and cultural problems associated with maintenance and delivery of high water quality.

**470. Environmental Hygiene Practices (2 units).** (Formerly numbered 457.) Prerequisites: courses 101, 230, 401, Epidemiology 100, consent of instructor. Field principles and practices of environmental sanitation as applicable to the sanitarian. Topics include theory, code enforcement, and inspection procedures for applicable environmental topic areas. Mr. Gomez

**495. Teacher Preparation in Environmental Health Sciences (2 units).** Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while UH Cr/Ncr-graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research (2 to 8 units).** Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research (2 to 8 units).** Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## Environmental Science and Engineering (Interdepartmental)

46-081 Center for the Health Sciences, (310) 825-9901

### Professors

David T. Allen, Ph.D. (Chemical Engineering)

Richard Berk, Ph.D. (Sociology)

David J. Chapman, Ph.D., D.Sc. (Biology)

Yoram Cohen, Ph.D. (Chemical Engineering)

Climis A. Davos, Ph.D. (Environmental Health Sciences)

John R. Froines, Ph.D. (Environmental Health Sciences)

Malcolm S. Gordon, Ph.D. (Biology)

William C. Hinds, Sc.D. (Environmental Health Sciences)

Raymond V. Ingersoll, Ph.D. (Earth and Space Sciences)

William E. Kastenberg, Ph.D. (Mechanical, Aerospace, and Nuclear Engineering)

Antony R. Orme, Ph.D. (Geography)

Michael K. Stenstrom, Ph.D. (Civil and Environmental Engineering)

Irwin H. Suffet, Ph.D. (Environmental Health Sciences)

Stanley W. Trimble, Ph.D. (Geography)

Richard Turco, Ph.D. (Atmospheric Sciences)

Martin Wachs, Ph.D. (Urban Planning; Distinguished Teaching Award)

Arthur M. Winer, Ph.D. (Environmental Health Sciences), Director

Kyle D. Bayes, Ph.D., Emeritus (Chemistry and Biochemistry)

Austin J. MacInnis, Ph.D., Emeritus (Biology)

Robert A. Mah, Ph.D., Emeritus (Environmental Health Sciences)

David Okrent, Ph.D., Emeritus (Mechanical, Aerospace, and Nuclear Engineering)

Richard L. Perrine, Ph.D., Emeritus (Civil and Environmental Engineering)

### Associate Professors

Richard F. Ambrose, Ph.D. (Environmental Health Sciences)

Trudy Cameron, Ph.D. (Economics)

Shane Que Hee, Ph.D. (Environmental Health Sciences)

Walter E. Reed, Ph.D. (Earth and Space Sciences)

### Assistant Professors

Warren Blier, Ph.D. (Atmospheric Sciences)

L. Donald Duke, Ph.D. (Environmental Health Sciences)

### Associate Field Program Supervisor

Robert G. Lindberg, Ph.D. (Environmental Health Sciences)

## Scope and Objectives

Enlightened management of the environment is necessary to maintain a suitable quality of life. Such management requires scientists trained in a multiplicity of environmental disciplines. These interdisciplinary, interactive skills are developed through the UCLA graduate Environmental Science and Engineering Program, leading to the Doctor of Environmental Science and Engineering (D.Env.) degree.

The goal of the program is to prepare professional environmental analysts to deal with the complexities of various courses of action on the environment and resources, to develop recommendations for sound environmental policies, and to devise means to implement policies adopted.

The present focus of the program, that of interdisciplinary training in the environmental sciences and its application, is a successful one. Graduates have been employed in technical assessment and management positions with governmental agencies, consulting firms, and industrial firms concerned with environment-related projects.

No undergraduate major is offered; however, studies can be arranged along several routes. Students with majors in the natural sciences, geography/environmental studies, public health, or engineering who have environmental or energy problem solving as a professional goal may wish to supplement their course preparation in consultation with the program faculty.

Although participating faculty members are mainly from the College of Letters and Science and the School of Engineering and Applied Science, the program is administered through the School of Public Health.

## Doctor of Environmental Science and Engineering

### Admission

In addition to meeting University minimum standards, you must have an excellent scholastic record (3.0 GPA in undergraduate work and 3.5 in graduate work) and must be acceptable to the admissions committee. Your overall academic record, including a minimum combined Graduate Record Examination (GRE) score of 1,200, must reflect exceptional verbal and quantitative skills. Three letters of recommendation are required. You must hold a master's degree in engineering, public health, or one of the natural sciences to be formally admitted to the program.

In exceptional cases, students with graduate training in fields of science and engineering who have not earned a master's degree may be considered for admission. In these cases you must show evidence of graduate training equivalent to the master's degree, including some research experience. Students with a bachelor's degree may be informally affiliated with the program while earning a master's degree in one of the participating departments.

All students must have taken the following preparation courses: (1) one semester or two quarters of introductory biology with laboratory; (2) one year of general chemistry with laboratory, including analytical methods, and one term of organic chemistry; (3) one course or equivalent experience in elementary programming and use of computer hardware and software; (4) one course in introductory geology with laboratory; (5) one year of calculus and one course in

elementary statistics; (6) one year of introductory physics with laboratory. Any of the courses may be taken after you arrive at UCLA.

As English language skills are essential to completion of the curriculum, applicants for whom English is a second language are required to score successfully on the Test of English as a Foreign Language (TOEFL). If you are accepted into the program with identified language deficiencies, you must remove the deficiencies before being advanced to candidacy.

Subject to available funds, the program offers fellowships or graduate student researcher appointments to eligible first-year students. Prospective students may write for descriptive brochures to the Environmental Science and Engineering Program, School of Public Health, 46-081 CHS, UCLA, Los Angeles, CA 90024-1772.

### Major Fields or Subdisciplines

Specialties within the program include, but are not limited to, the assessment and management of hazardous substances in the air, soil, and water environments, migration of contaminants in groundwater, air pollution abatement, health risks of toxic substances, mitigation of ecosystem impacts, environmental assessment, and environmental problems common to the U.S. and Latin American countries. Research projects are conducted on a wide range of air and water pollution problems with biological and health impacts. Also, you may slant your work toward greater emphasis either on the science engineering aspect or on the science policy aspect of your specialty.

### Course Requirements

Course requirements consist of core courses, breadth courses, the environmental science and engineering seminar, and problems courses.

**Core and Breadth Courses** — Sixteen courses are required (one of which may be waived based on prior coursework), including four core courses offered by the program faculty. At least seven courses must be at the graduate level. Courses are selected from the following categories, with electives chosen in consultation with your faculty adviser.

*Environmental Science* — Seven courses, including Environmental Health Sciences 212 (core), 225 (core), 240, 264 (core), and electives in environmental biology, microbiology, or ecology, in environmental geology, and in atmospheric sciences.

*Environmental Engineering* — Five courses, including Civil and Environmental Engineering 150, 155, and three electives.

*Environmental Management, Law, and Policy* — Four courses, including Environmental Health Sciences 235 (core), Urban Planning M264, and two electives.

**Seminar** — You are required to enroll in Environmental Science and Engineering M411 twice per year.

**Problems Courses** — Problems courses constitute intensive multidisciplinary team research projects directed toward the solution of current environmental problems. Before proceeding to the problems course sequence, you must have completed a minimum of three core courses and seven breadth courses and have the approval of the program faculty. Twenty-four quarter units of the Environmental Science and Engineering 400 series (problems course sequence) are required. Enrollment in more than one problems course per term is not allowed. Normally problems course credit is earned only through courses offered by the program. However, you may petition the faculty for permission to earn problems course credit through multidisciplinary environmental projects offered in other departments at UCLA.

### Qualifying Examinations

The written qualifying examination is normally taken during your second year in residence, after completing the core courses and most of the breadth courses. If all or parts of the examination are failed, one and only one repeat is allowed — at the next offering. The written examination covers the material in the core courses, the breadth courses, and selected topics in classical and contemporary subjects in the program's areas of interest.

When you have completed all other course requirements and are in the final term of the problems courses, a doctoral committee is established. The committee conducts the University Oral Qualifying Examination, which explores the depth, breadth, and extent of your preparation, with appropriate emphasis on practical problems and situations. After successful completion of the oral examination and the problems course requirements, you are advanced to candidacy.

In case of failure, you may repeat the oral examination once after completing any additional coursework or individual study the doctoral committee may recommend.

### Internship

Once you have been advanced to candidacy, an 18- to 24-month internship in your field of interest is arranged at an outside institution. Arrangements for the internship are primarily your responsibility and must be approved by the doctoral committee and program director. Supervision during the field training experience is by your doctoral committee and the field program supervisor. During the internship, you must register for eight units of a 599 course in each academic-year term.

### Dissertation/Final Oral Examination

A dissertation is required and should be a scholarly treatment of the problem area in which you have worked, but not a description of the totality of the experience. It should show evidence of critical thought and originality. No later than nine months after advancement to candidacy and the beginning of the internship,

you are required to present a written prospectus, including an outline, of the dissertation and defend it before your doctoral committee. After completing the internship, you must defend the dissertation before your doctoral committee.

The final oral examination may be waived by unanimous consent of your doctoral committee. If the dissertation and your performance on the final oral examination are judged satisfactory, you are awarded the degree of Doctor of Environmental Science and Engineering (D.Env.).

## Graduate Courses

**400A. Environmental Science and Engineering Problems Course (8 units).** Prerequisite: consent of instructor and program director. Primarily intended for students enrolled in environmental science and engineering doctoral program. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

**400B. Environmental Science and Engineering Problems Course (8 units).** Prerequisites: successful completion of course 400A, consent of instructor and program director. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

**400C. Environmental Science and Engineering Problems Course (8 units).** Prerequisites: successful completion of course 400B, consent of instructor and program director. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems.

**400D. Environmental Science and Engineering Problems Course (8 units).** Prerequisite: successful completion of course 400C and of internship approved by doctoral committee and program director. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems.

**410. Environmental Science and Engineering Workshop (2 units).** Prerequisite: consent of instructor. Primarily intended for students enrolled in environmental science and engineering doctoral program. Development of analytical or experimental skills essential to solution of environmental problems studied within courses 400A through 400D.

**M411. Environmental Health Sciences Seminar (2 units).** (Formerly numbered 411.) (Same as Environmental Health Sciences M411.) Prerequisite: consent of instructor. Required of graduate students in environmental health sciences for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisite: consent of instructor and program director. Supervised investigation of advanced environmental problems. S/U grading.

# Epidemiology

71-254 Center for the Health Sciences, (310) 825-8579

## Professors

Lawrence R. Ash, Ph.D.  
Roger Detels, M.D., M.S.  
Ralph R. Frerichs, D.V.M., Dr.P.H., *Chair*  
Sander Greenland, Dr.P.H.  
Robert W. Haile, Dr.P.H.

Thomas M. Mack, M.D., M.P.H.  
John M. Peters, M.D., M.P.H., Sc.D.

## Adjunct Associate Professors

David E. Coady, M.D., M.P.H.  
James R. Greenwood, Ph.D., M.P.H.  
Susan M. Preston-Martin, Ph.D., M.P.H.  
Gary H. Spivey, M.D., M.P.H.

## Adjunct Assistant Professors

Roberta M. Malmgren, Ph.D.  
Marc A. Strassburg, Dr.P.H.

## Scope and Objectives

Epidemiology has been defined as the study of the distribution and determinants of disease and injury in human populations. Epidemiologists study variations of disease in relation to such factors as age, sex, race, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

Epidemiology is a young field with constantly expanding boundaries. The range of activities that may be at least partly epidemiologic includes determination of the health needs of populations, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or

curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are borrowed from other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of purely epidemiologic methodology which includes not only statistical methodology and principles of study design, but a unique way of thinking that is beyond the rote memorization of rules. The contribution of epidemiology to any study involving groups of people is being increasingly recognized and demanded.

Epidemiologists may work in many settings, including international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, colleges and universities, and numerous research projects privately and publicly sponsored.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in Epidemiology and, through the School of Public Health, the M.P.H. and Dr.P.H. with a specialization in epidemiology.

## Requirements for Graduate Degrees

### Admission

Application forms and the *Announcement of the UCLA School of Public Health* may be obtained by writing to the Student Affairs Office, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772. An *Epidemiology Handbook* may be obtained by writing to the Department of Epidemiology, 71-254 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the UCLA *Application for Graduate Admission* must be completed. Three letters of recommendation are required, two from former professors and one from an employer (if no employer, three former professors) before an application is considered complete. It is your responsibility to ensure that the application file is complete.

The preferred deadline for graduate applications is December 15, 1994, for Fall Quarter 1995 admission. *Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.*

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. No screening examination is required for admission. If your undergraduate coursework has been deficient in breadth of fundamental training, you must take specified undergraduate courses after admission. Prior field

experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation. In addition, you must be accepted by the Department of Epidemiology.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE) General Test. Medical College Admission Test (MCAT) or Dental Admission Test (DAT) scores are accepted *only* for applicants *already holding* M.D. or D.D.S. degrees. Applicants at the master's level must have a minimum GRE combined (verbal and quantitative) score of 1,100. Applicants at the doctoral level need a minimum GRE combined (verbal and quantitative) score of 1,200. The analytical section is not required.

Refer to the UCLA *Application for Graduate Admission* for the Test of English as a Foreign Language (TOEFL) requirement for international applicants.

### Master's Applicants

Your prior program of study should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and others that constitute an adequate preparation for the proposed area of specialization.

If your prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for your proposed area of specialization, you must include courses in those sciences in your graduate program; these may not be applied toward the minimum requirements for the degree.

### Master of Science Degree

The Master of Science is a research-oriented degree within the general field of epidemiology. It includes the preparation of a thesis or comprehensive examination/major written report. Teaching experience is not required.

See Schoolwide Programs at the end of this chapter for information on the M.P.H. degree.

### Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 56 units (38 units of core courses and 18 units of electives), at least 20 units of which must be in the 200 or 500 series. A maximum of one course from Epidemiology 290 or 291 and one 596 course (four units) may be applied toward the total course requirement. If you intend to write a thesis, four units of course 598 may also be applied toward the 18-unit elective requirement.

Required core courses include Epidemiology 200, 201A-201B, 220, 290 or 291, Biostatistics 100A or 110A, 100B or 110B; one additional statistics course (four units) in regression or multivariate methods to be approved by the department; and Biostatistics 403 or Epidemiology

410A-410B or equivalent. Equivalent courses must be approved by the department. Each core course may be waived if you have taken a similar course elsewhere and can pass the waiver examination. A waiver course does not reduce the unit requirements. Elective courses include all those offered by the department with the exception of those stated above.

All courses included for advancement to candidacy, except Epidemiology 290 or 291, must be taken for a letter grade (not on an S/U grading basis). You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California. In addition, you must maintain an average of no less than 3.0 (B) in courses 200, 201A-201B, and 220.

A thesis or comprehensive examination must be completed before graduation.

### Thesis Plan

If the thesis option is approved, a thesis committee of faculty members is appointed by the dean of the Graduate Division on recommendation of the department. The committee approves the thesis prospectus before you file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

### Comprehensive Examination Plan

If the comprehensive examination option is selected, a guidance committee of departmental faculty members is appointed. A comprehensive examination on your major area of study must be passed. If you fail, you may be reexamined once.

### Master of Science in Preventive Medicine and Public Health

The program is not admitting new students at this time.

### Ph.D. Degree

The Ph.D. is an advanced research degree that emphasizes depth of knowledge and research skills. The dissertation must demonstrate your ability for independent scholarly investigation.

There is no foreign language requirement for the Ph.D.; teaching experience is recommended but not required.

See Schoolwide Programs at the end of this chapter for information on the Dr.P.H. degree.

### Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) at least a 3.0 junior/senior undergraduate grade-point average and at least a 3.5 GPA in graduate studies, and (3) approval by the department admissions committee, an academic adviser, and the department chair.

### Course Requirements

You must fulfill the course requirements for the M.S. degree in Epidemiology with an average of no less than 3.3 (B+) in Epidemiology 200, 201A-201B, and 220. Equivalent courses taken at other institutions may be used to fulfill these requirements subject to approval by the department. Continuation in the doctoral program is contingent on satisfying the 3.3 (B+) grade-point requirement. You must also take courses 202A, 202B or one additional statistics course beyond the M.S. requirements, at least three terms of course 292, and one pathobiology course (four units). The statistics and pathobiology courses must be approved by the department. In addition, you must take at least 12 units of graduate-level courses (excluding 500-level courses) outside the department, which must be selected with the approval of your academic adviser. If you have prior postbaccalaureate coursework, you may petition for substitution of part or all of the 12-unit requirement. Recommendation for the degree is based on your attainments rather than on the completion of specific courses.

### Qualifying Examinations

Before advancement to candidacy, you must pass the departmental written doctoral examination and the University Oral Qualifying Examination. Normally no more than one reexamination is allowed for the written examination. A doctoral committee is nominated and, if approved, administers the University Oral Qualifying Examination. After completing the course requirements and passing both the written and oral examinations, you may be advanced to candidacy and complete work on a dissertation in your principal field of study.

### Final Oral Examination

A final public defense of your dissertation is required.

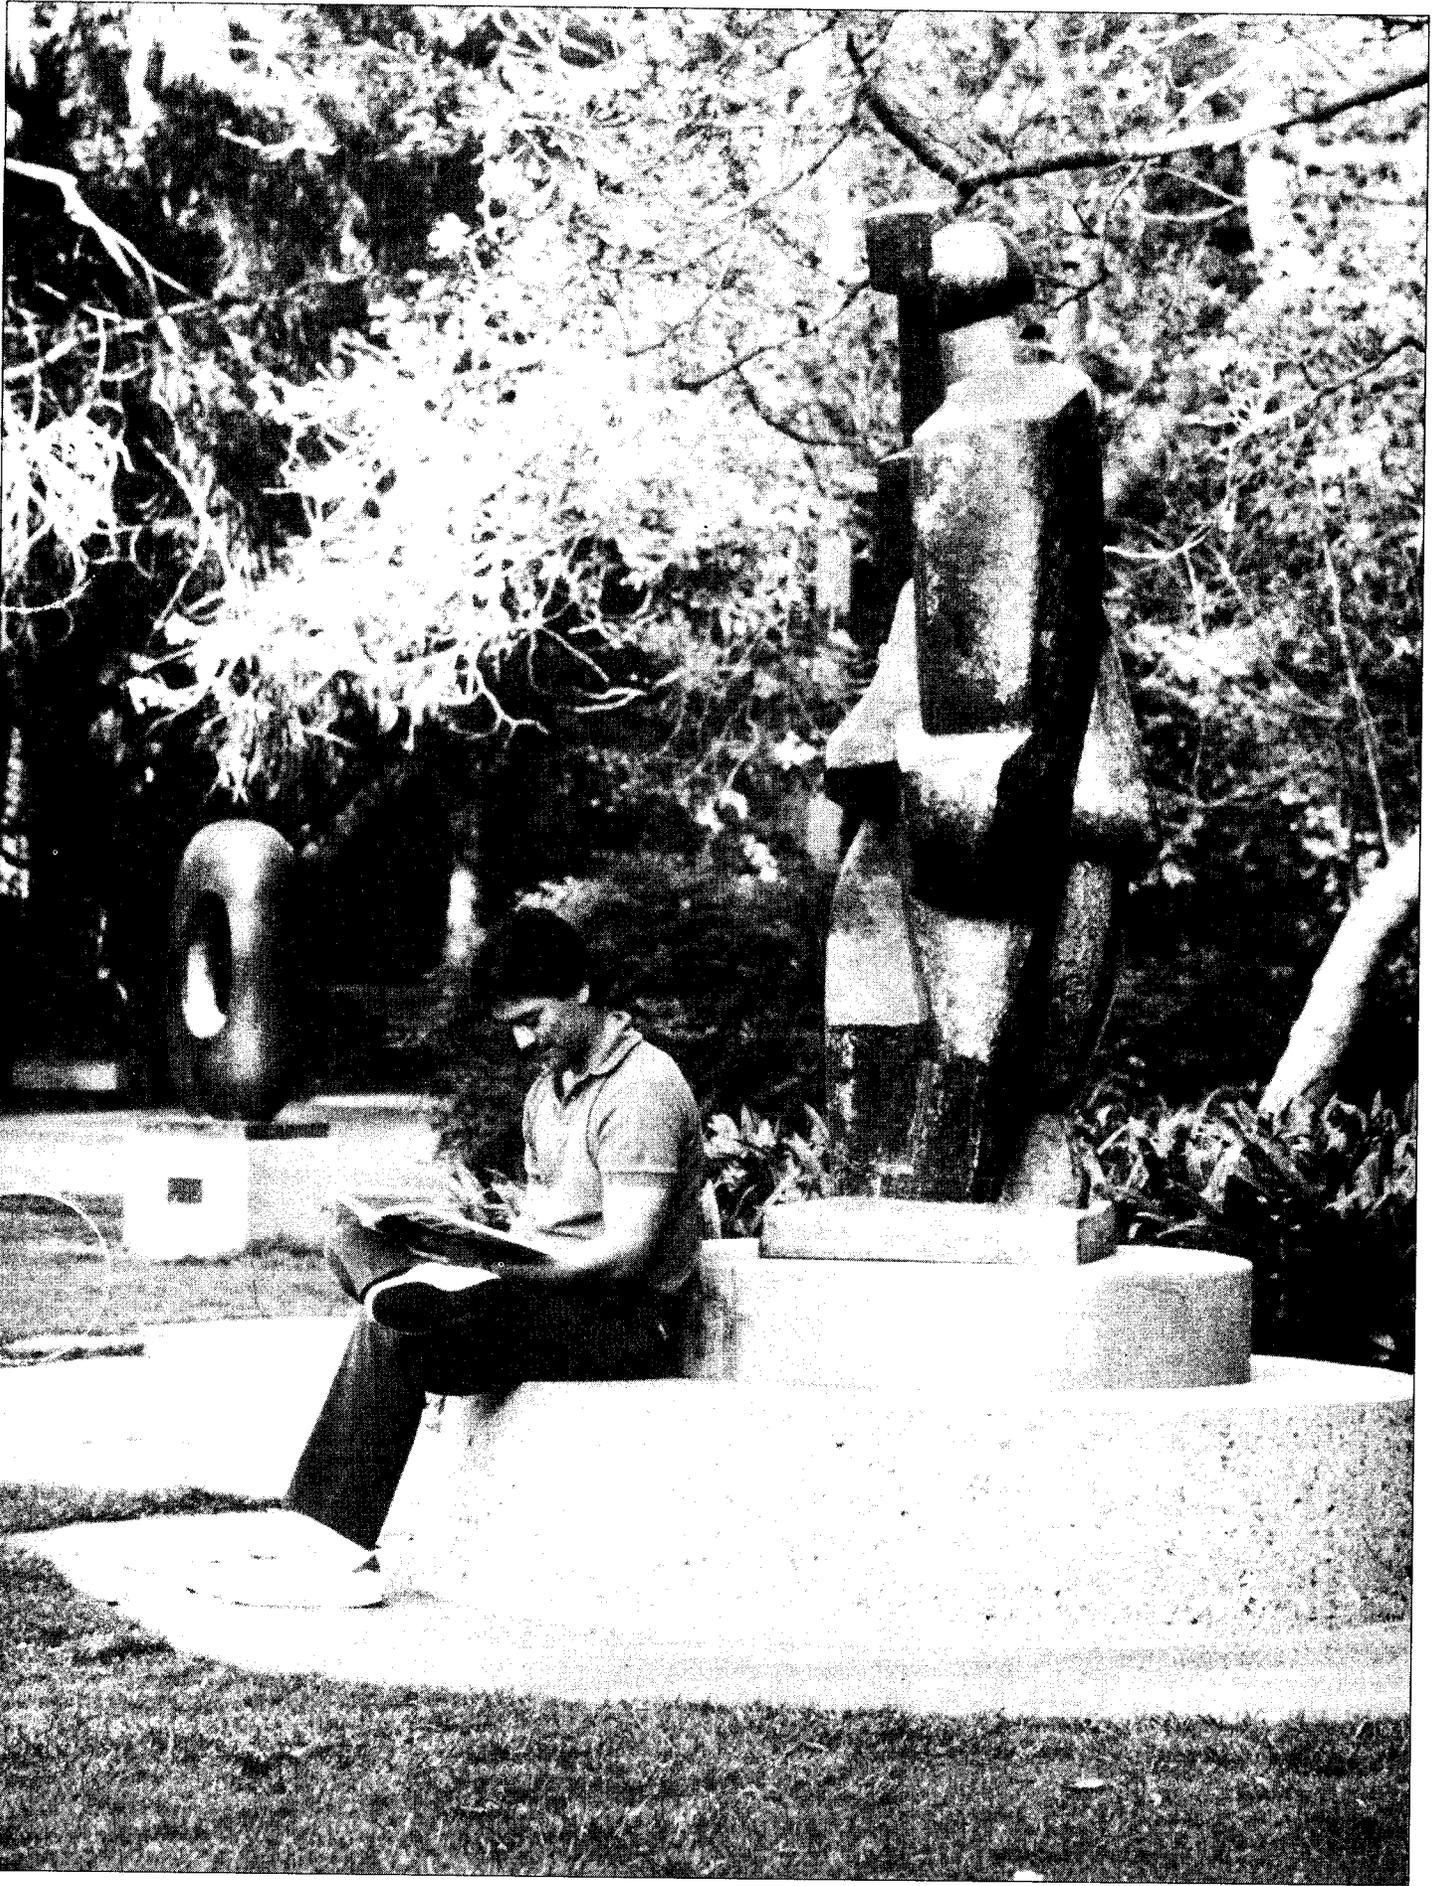

### Upper Division Courses

**100. Principles of Epidemiology.** (Formerly numbered 112.) Lecture, two hours; discussion, four hours. Prerequisite: one full biological sciences course. Not open for credit to students with credit for course 200. Introduction to epidemiology, including factors governing health and disease in populations. Ms. Coulson, Mr. Kraus

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

### Graduate Courses

**200. Epidemiology I.** (Formerly numbered 114.) Lecture, two hours; laboratory, four hours. Prerequisites: Biostatistics 100A (may be taken concurrently), one full biological sciences course, consent of instructor. Not open for credit to students with credit for course 100. Introduction to epidemiology, including factors governing health and disease in populations. Mr. Frerichs, Ms. Visscher

**201A-201B. Epidemiologic Methods I and II (6 units each).** (Formerly numbered 211A-211B.) Lecture, four hours; discussion, two hours; other, 12 hours. Prerequisites: Biostatistics 100A, 100B, at least two upper division biology or social sciences courses, consent of instructor. Recommended but not required: course 100 or 200 or equivalent. Comprehensive coverage of concepts, principles, and methods in epidemiology, with emphasis on study design, statistical analysis, and causal inference. Theoretical and quantitative emphasis, focusing on investigation of disease etiology and other causal relationships in public health.

Mr. Morgenstern

**202A-202B. Epidemiology: Theory and Methodology.** (Formerly numbered 211C-211D.) Prerequisites for course 202A: course 201B; for course 202B: course 202A, consent of instructor. Advanced principles and methods of epidemiologic analysis. Topics include relating prevalence and incidence, analysis of clustering and seasonality; measures of effect, sources of bias, regression to the mean, estimation and hypothesis testing in epidemiology; models for risk and rates; cohort analysis. S/U or letter grading.

Mr. Greenland

**203. Topics in Theoretical Epidemiology (2 units).** (Formerly numbered 223.) Prerequisite: consent of instructor. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic models, epidemiologic models, problems in inference, model specification problems, design issues, analysis issues, and confounding. May be repeated for credit with consent of instructor. S/U grading.

Mr. Greenland

**204. Advanced Applied Epidemiology.** Prerequisites: courses 201A-201B. Students submit written reviews of published research articles in applied epidemiology to be discussed in seminar format. Issues include study design, analysis, and causal inferences. New studies to be proposed and critiqued. S/U or letter grading.

Mr. Haile

**210. Public Health Research Using Available Data (2 units).** (Formerly numbered 227.) Lecture, one hour; discussion, one hour. Prerequisites: courses 100, 410A or Biostatistics 403 or equivalent, Biostatistics 100A, consent of instructor. Presentations and discussions of availability, concepts, content, and usefulness of already collected data in public health research. Major emphasis on public data such as National Center for Health Statistics surveys, vital statistics, census, etc.

Ms. Coulson

**M214. Immunology of AIDS (2 units).** (Same as Biology M293B, Microbiology M262B, and Microbiology and Immunology M262B.) Lecture, one hour; discussion, one hour. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, 202D, M258B, M258C, or equivalent, consent of instructor. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.

**220. Principles of Infectious Disease Epidemiology.** (Formerly numbered 210.) Lecture, three hours. Prerequisites: course 100 or 200 or equivalent, consent of instructor. Ascertainment of infection, transmission, and epidemiological parameters rather than clinical and pathological aspects. Specific diseases discussed in depth to illustrate epidemiologic principles.

Mr. Ash

**223A. Protozoal Diseases of Man.** (Formerly numbered 218A.) Prerequisite: consent of instructor. May be taken concurrently with course 223B. Comprehensive overview of systematics, morphology, biology, host/parasite relationships, public health problems, and control of protozoa parasitic in man and animals.

Mr. Ash (odd years)

**223B. Protozoal Diseases of Man (2 units).** (Formerly numbered 218B.) Laboratory, four hours. Prerequisite or corequisite: course 223A. Laboratory methods of diagnosis and microscopic recognition of protozoa parasitic in man and animals. Intestinal protozoa and organisms occurring in blood and tissues of their hosts and pathology associated with these infections.

Mr. Ash (odd years)

**224A. Helminthic Diseases of Man.** (Formerly numbered 220A.) Prerequisite: consent of instructor. May be taken concurrently with course 224B. Comprehensive overview of systematics, morphology, biology, host/parasite relationships, public health problems, and control of nematodes, trematodes, and cestodes parasitic in man and animals.

Mr. Ash (even years)

**224B. Helminthic Diseases of Man (2 units).** (Formerly numbered 220B.) Laboratory, four hours. Prerequisite: consent of instructor. Diagnosis and practical microscopic recognition of nematodes, trematodes, and cestodes parasitic in man and animals. Pathology produced by these infections.

Mr. Ash (even years)

**227. AIDS: A Major Public Health Challenge.** (Formerly numbered 212D.) Prerequisites: course 100 or 200 or equivalent, Biostatistics 100A or 110A, consent of instructor. Presentation of epidemiologic, biologic, psychological, and clinical characteristics of AIDS and HIV-1 infection. Discussion of policy implications and intervention strategies. S/U or letter grading.

Mr. Detels

**M228. Biology of HIV.** (Same as Microbiology and Immunology M275.) Lecture, three hours. Prerequisites: course 100 and Biostatistics 100A or equivalent, two biology courses, consent of instructor. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory.

Ms. Giorgi

**230. Epidemiology of Sexually Transmitted Diseases.** (Formerly numbered 212L.) Prerequisites: course 100 or 200, consent of instructor. Sexually transmitted diseases; medical/biological aspects, epidemiology and control in developed and developing countries. S/U or letter grading.

Ms. Visscher

**240. Cardiovascular Epidemiology.** (Formerly numbered 212E.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Topics include definition, pathogenesis, descriptive epidemiology, magnitude of risk factors, strategies for prevention, lipoprotein metabolism, epidemiology of diabetes, hypertension, and chronic lung disease.

Mr. Longnecker

**241. Epidemiology of Neurologic Disease (2 units).** (Formerly numbered 212G.) Prerequisites: course 100 or 200, consent of instructor. Epidemiologic characteristics of selected chronic neurologic diseases, with particular emphasis on etiology and possible control.

Ms. Visscher

**242. Epidemiology of Cancer.** (Formerly numbered 215A.) Prerequisites: course 100 or 200, consent of instructor. Etiological concepts and mechanisms. Pathogenesis, diagnosis, and classification of neoplastic diseases. Epidemiologic principles and methods as applied to cancer. Classical studies in cancer epidemiology. Models of causal association.

Mr. Haile

**243. Epidemiology of Cancer (2 units).** (Formerly numbered 215B.) Lecture, one hour; discussion, one hour. Prerequisites: course 242, consent of instructor. Current issues in cancer epidemiology, including etiologic research, screening programs, prevention.

Mr. Haile

**244. Research Methods in Cancer Epidemiology (2 units).** (Formerly numbered 225.) Prerequisites: course 100, Biostatistics 100A, consent of instructor. Biologic, quantitative, philosophical, and administrative considerations in epidemiologic cancer research. Hypothesis specification and choice of study design. Uses of descriptive epidemiology, cohort studies, case control studies. Clustering, screening, and cancer control. Means of identifying subjects and controls. Design of instruments. Sources of bias and confounding.

Mr. Mack

**246. Epidemiology of Aging (2 units).** Prerequisites: course 100 or 200 or equivalent, consent of instructor. Epidemiologic methods of estimating present and future burdens of aging: morbidity, disability, and dependency. Epidemiology of major disabling conditions affecting the elderly. Evaluation of possible intervention strategies. Methodologic issues in geriatric epidemiology. S/U or letter grading.

Ms. Malmgren

**251. Epidemiology of Nonintentional Injuries.** (Formerly numbered 212I.) Lecture, three hours; discussion, two hours. Prerequisites: course 100 or 200, Biostatistics 100A, consent of instructor. Pertinent epidemiology methods for study of nonintentional trauma, including that from motor vehicle crashes, occupational exposures, falls, and other major external causes, which focus on research approaches, data sources, analytical techniques. Substantive findings on related subproblem areas presented for critical review.

Mr. Kraus

**252. Epidemiology of Assault, Homicide, and Suicide (2 units).** (Formerly numbered 212K.) Lecture, two hours; discussion, one hour. Prerequisites: course 100 or 200, consent of instructor. Presentation and evaluation of epidemiologic research approaches to study of violent injury, including description of incidence, study design, risk factor analysis, and control evaluation.

Mr. Kraus

**253. Acute Traumatic and Chronic Repetitive Injuries from Work-Related Exposures (2 units).** Lecture, two hours; discussion, one hour. Prerequisites: course 100 or equivalent, Biostatistics 100A, consent of instructor. Lectures and discussions on magnitude, scope, research approaches, and intervention strategies for work-related acute traumatic and chronic repetitive (musculoskeletal) injuries. Emphasis on injury research methods for all external causes of injury, utilizing epidemiology for high-risk group and risk-factor identification and injury prevention. S/U or letter grading.

Mr. Kraus

**260. Environmental Epidemiology.** (Formerly numbered 213.) Lecture, two hours; discussion, one hour; independent study, three hours. Prerequisites: course 100 or 200, consent of instructor. Methodological problems and approaches of epidemiology for assessing health impact of major types of environmental exposure.

Mr. Spivey

**261. Occupational Epidemiology.** (Formerly numbered 212J.) Lecture, two hours; discussion, two hours. Prerequisites: course 100 or 200 or equivalent, consent of instructor. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments.

Mr. Kraus

**263. Genetic Epidemiology (2 units).** (Formerly numbered 226.) Prerequisites: course 100 or 200, consent of instructor. Proper design, analysis, interpretation, and application of analytical methods used by genetic epidemiologists, including studies of familial prevalence, twins, migrants, genetic marker-disease associations, and more complex analyses of genetic models.

Mr. Haile

**264. Meta-Analysis in Epidemiology (2 units).** Lecture, 90 minutes; discussion, 30 minutes. Prerequisites: courses 201A-201B, Biostatistics 406 or one multivariate analysis course beyond 100C or 200C. Designed to teach epidemiology doctoral students how to conduct and evaluate a meta-analysis of epidemiologic data.

Mr. Longnecker

**266. Nutritional Epidemiology.** (Formerly numbered M266.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 201A-201B, Biostatistics 100D or 110C, one prior nutrition course, consent of instructor. Designed to prepare students for conduct of research relating diet to health. Topics include methods of diet assessment, error in measurement of diet, methods of adjusting for energy intake in epidemiologic analysis, and analysis of epidemiologic data relating diet to disease.

Mr. Longnecker

**267. Epidemiology of Chronic Disease.** Prerequisite: course 100 or 200. Lecture topics include descriptive epidemiology and risk factors for heart disease and cancer; discussion sessions focus on recent articles; laboratory sessions feature use of spreadsheets for graphic display of data. S/U or letter grading.

Mr. Longnecker

**270. Epidemiology and Health Policy (2 units).** (Formerly numbered 217.) Prerequisites: courses 100 or 201A-201B, Biostatistics 100B or 110B, Health Services 100, consent of instructor. Application of epidemiologic methods and findings in health services research, population health planning, and health policy to provide framework for integrating causal inference with decision making. Emphasis on conceptual and methodologic issues confronting researchers, clinicians, planners, administrators, and legislators. Mr. Morgenstern

**M276. Structure and Function of Nutrients Implicated in Etiology of Chronic Disease.** (Same as Community Health Sciences M267.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: one prior organic chemistry course. Basic nutrition course for public health and science majors. Mr. Longnecker

**280. Parasitic Diseases and Global Health.** (Formerly numbered 212F.) Prerequisite: consent of instructor. Overview of major human parasitic diseases in terms of their biology, occurrence, distribution, and transmission in nature; diseases they cause and impact they have on health of populations; interaction with other disease states; and interventional strategies for their control. Mr. Ash

**281. Epidemiology for Developing Countries.** (Formerly numbered 415.) Prerequisites: courses 100 and/or 200, Biostatistics 100A, consent of instructor. Uses of epidemiology for assessing the burden of illness in the community, establishing program priorities, and developing disease intervention or prevention strategies. Mr. Frerichs

**282. Rapid Epidemiologic Surveys in Developing Countries.** (Formerly numbered 418.) Prerequisites: courses 100 and/or 200, Biostatistics 100A, 100B, consent of instructor. Microcomputer-assisted planning and organizing of epidemiologic surveys in developing countries, including teaching of methods for two-stage cluster sampling, training interviewers, and use of microcomputers to develop questionnaires, select sample population, process and analyze data, and prepare final report. Mr. Frerichs

**290. Seminar: Epidemiology — Infectious and Tropical Disease (2 units).** (Formerly numbered 222.) Prerequisite: consent of instructor. Review of research on specific diseases of public health importance. May be repeated for credit. S/U grading.

**291. Seminar: Epidemiology — Methodology (2 units).** (Formerly numbered 221.) Prerequisites: course 100 or 200, consent of instructor. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

**292. Advanced Seminar: Epidemiology (2 units).** (Formerly numbered 229.) Prerequisites: course 201B, consent of instructor. Current research in epidemiology. May be repeated for credit. S/U grading.

**293. International HIV/AIDS Seminar (2 units).** Prerequisite: consent of instructor. Ongoing discussion of worldwide pandemic of HIV/AIDS, with emphasis on problems of surveillance, reporting, and intervention. Discussion of recent literature. Presentations by fellows from other countries. S/U grading. Mr. Detels

**400. Field Studies in Epidemiology (2 or 4 units).** Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

**410A. Management of Epidemiologic Data (2 units).** Prerequisites: course 100, Biostatistics 100A (one course may be taken concurrently with consent of instructor). Concepts, collection, and management of data, with particular emphasis on databases in chronic infectious diseases. Introduction to personal computers and appropriate software for epidemiologic studies. Ms. Coulson

**410B. Management of Epidemiologic Data (2 units).** Prerequisites: course 410A or equivalent, consent of instructor. Data management for various epidemiologic study designs, confidentiality concerns; data management systems; introduction to mainframe computer. Ms. Coulson

**411. Research Resources in Epidemiology (2 units).** Lecture, one hour; discussion, one hour. Prerequisites: course 100 or 200, Biostatistics 100A, consent of instructor. Instruction and practical experience in use of varied bibliographic aids and sources of information, building of reference files, and presentation of research findings for publication. Ms. Coulson, Ms. Deeney

**414. Practical Epidemiologic Investigations (2 to 4 units).** Lecture, one to two hours; laboratory, one to two hours. Prerequisites: course 100 or 200 or equivalent, consent of instructor. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings. Mr. Strassburg and the Staff

**M417. Injury Prevention Strategies and Countermeasures (2 units).** (Same as Community Health Sciences M417.) Prerequisites: course 100 or equivalent, consent of instructor. Lectures with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U or letter grading. Mr. Kraus

**495. Teacher Preparation in Epidemiology (2 units).** Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while UH Cr/NCr-graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research (2 to 8 units).** Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research (2 to 8 units).** Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## Health Services

31-269 Center for the Health Sciences, (310) 825-2594, 825-7863

### Professors

Ronald M. Andersen, Ph.D. (*Fred W. and Pamela K. Wasserman Professor of Health Services*), Chair  
Robert H. Brook, M.D., Sc.D.  
E. Richard Brown, Ph.D.  
William Comanor, Ph.D.  
Jonathan E. Fielding, M.D., M.P.H.  
Patricia A. Ganz, M.D.  
Charles E. Lewis, M.D., Sc.D.  
Marvin Marcus, D.D.S.  
Thomas H. Rice, Ph.D.  
Stuart O. Schweitzer, Ph.D.  
Paul R. Torrens, M.D., M.P.H.  
Lester Breslow, M.D., M.P.H., *Emeritus*  
Carl E. Hopkins, Ph.D., M.P.H., *Emeritus*  
Milton I. Roemer, M.D., M.P.H., *Emeritus*  
Max H. Schoen, D.D.S., Dr.P.H., *Emeritus*  
William Shonick, Ph.D., *Emeritus*

### Associate Professors

Emily K. Abel, Ph.D.  
Glenn A. Melnick, Ph.D.  
Robert O. Valdez, Ph.D.

### Assistant Professors

Roshan Bastani, Ph.D., *in Residence*  
William E. Cunningham, M.D., M.P.H.  
Gerald F. Kominski, Ph.D., *Associate Chair*  
Mark S. Litwin, M.D., M.P.H.

### Lecturers

Bruce W. Bennett, Ph.D.  
Geraldine Dallek, M.P.H.  
William Gurtner, M.P.H.  
Joe Hafez, M.P.A.  
Diana W. Hilberman, M.S.P.H.  
Hwai-Tai Lam, Ph.D.  
Arleen Leibowitz, Ph.D.  
Joyce Mann, Ph.D.

### Adjunct and Visiting Professors

Ellen Alkon, M.D., M.P.H., *Adjunct*  
Michael Bobrow, A.I.A., *Adjunct*  
Molly J. Coye, M.D., M.P.H., *Visiting*  
Caswell A. Evans, Jr., D.D.S., M.P.H., *Adjunct*  
Arlene Fink, Ph.D., *Adjunct*  
Jacqueline B. Kosecoff, Ph.D., *Adjunct*  
Ruth J. Roemer, J.D., *Adjunct, Researcher*

### Adjunct and Visiting Associate Professors

Raymond D. Goodman, M.D., M.P.H., *Adjunct*  
Shoshanna Sofaer, Dr.P.H., *Visiting*

### Visiting Assistant Professor

John C. Lammers, Ph.D.

### Assistant Field Program Supervisor

Diana W. Hilberman, M.S.P.H.

## Scope and Objectives

The field of health services examines the organization and financing of various activities to

prevent and treat disease. This includes programs in both the public and private sectors at all levels — local, state, and federal.

Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse backgrounds are harmonized by their devotion to the analysis of problems in the financing and delivery of health services, with focus on populations rather than individual patients.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public Health (M.P.H.), includes training in various aspects of health administration such as policy formulation, health planning, organization, and management. For more advanced professional work, the Dr.P.H. degree offers education in the full scope of public health services and prepares candidates for leadership in community health work at all jurisdictional levels.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/UCLA Center for Health Care Financing Research afford opportunities for joint activities with the RAND Health Sciences Program. Graduates of the academic degree programs pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

## Requirements for Graduate Degrees

### Admission

Application forms and the *Announcement of the UCLA School of Public Health* may be obtained by writing to the Student Affairs Office, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772, or to the Department of Health Services, 31-269 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the *UCLA Application for Graduate Admission* must be completed. Three letters of recommendation are required, two from former professors and one from an employer (if no employer, three former professors) before an application is considered complete. It is your responsibility to ensure that the application file is complete.

The preferred deadline for graduate applications is December 15, 1994, for Fall Quarter 1995 admission. *Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.*

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. No screening examination is required for admission. If your undergraduate coursework has been deficient in breadth of fundamental training, you may be required to take specified undergraduate courses after admission. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation. In addition, you must be accepted by and accommodated in the Department of Health Services.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE). The Medical College Admission Test (MCAT), Dental Admission Test (DAT), or Law School Aptitude Test (LSAT) are not accepted. However, in some cases, individuals with a medical, dental, or law degree may waive the GRE requirement. Certain other criteria must be met, including licensure to practice in California. A written request must accompany applications of those individuals desiring a waiver of this requirement. Graduate Management Admission Test (GMAT) scores are accepted only for applicants to the joint M.B.A./M.P.H. program. Applicants at the master's level must have a minimum GRE combined (verbal and quantitative) score of 1,100. Applicants at the doctoral level need a minimum GRE combined (verbal and quantitative) score of 1,200. The analytical section is not required.

Refer to the *UCLA Application for Graduate Admission* for the Test of English as a Foreign Language (TOEFL) requirement for international applicants.

### Master's Applicants

Your prior program of study should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and others that constitute an adequate preparation for the proposed area of specialization.

If your prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for your proposed area of specialization, you must include courses in those sciences in your graduate program; these may not be applied toward the minimum requirements for the degree.

## Master of Science Degree

The Master of Science is a research-oriented degree within the general field of health services. It includes the preparation of a thesis or comprehensive examination/major written report. Teaching experience is not required.

See Schoolwide Programs at the end of this chapter for information on the M.P.H. degree.

## Course Requirements

You must complete at least one year of graduate residence at the University of California and 17 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement (10 courses). Health Services 597 may not be applied toward the degree requirements.

Required school core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived if you have taken a similar course elsewhere and can pass the waiver examination.

Required department core courses include Health Services 200A-200B-200C, 237A-237B, 237C. You are strongly encouraged to take Biostatistics 200A, 200B, and Epidemiology 201A-201B. Elective courses should be selected from the 200 or 500 series in consultation with your adviser.

Only courses in which you receive a grade of C – or better may be applied toward the requirements for a master's degree. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

## Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before you file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

## Comprehensive Examination/Report Plan

If the comprehensive examination/report option is approved, a guidance committee of faculty members is appointed. A written comprehensive examination on your major area of study must be passed. If you fail, you may be reexamined once.

The preparation of a major written research report is required; it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

## Master of Science in Preventive Medicine and Public Health

The program is not admitting new students at this time.

## Ph.D. Degree

The Ph.D. is an advanced research degree that emphasizes depth of knowledge and research skills. The dissertation must demonstrate your ability for independent scholarly investigation.

There is no foreign language requirement for the Ph.D.; teaching experience is recommended but not required.

See Schoolwide Programs at the end of this chapter for information on the Dr.P.H. degree.

## Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.S. in Health Services or an appropriately related field (students with an M.P.H. need to satisfy the course requirements of the M.S. in Health Services before or after admission), (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by the department to the School of Public Health, (5) approval by the doctoral admissions committee and the department chair. Screening examinations may be required.

## Course Requirements

In addition to the requirements for the M.S. in Health Services, you must take Health Services 249H, Biostatistics 200A, 200B, and Epidemiology 201A-201B. A cognate with at least three courses (12 units) from a department that grants a Ph.D. degree is also required. Cognate courses must be at the graduate level and should be core theory and research courses for the discipline selected. Acceptable cognate areas include economics, epidemiology, history, political science, psychology, and sociology.

## Qualifying Examinations

Before advancement to candidacy, you must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When you are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

After passing the University Oral Qualifying Examination, you may be advanced to candidacy and commence work on a dissertation in your principal field of study. The doctoral committee guides your progress toward completion of the dissertation.

## Final Oral Examination

A final oral examination is required of all candidates.

## Upper Division Courses

**100. Health Services Organization.** (Formerly numbered 130.) Lecture, four hours; discussion, one hour. Prerequisite: four units of social sciences. Structure and function of American health care system; issues and forces shaping its future.

**131. Structure and Function of Health Care Facilities.** Lecture, two hours; discussion, two hours. Prerequisites or corequisites: course 100, consent of instructor. Introduction to structure, organization, and function of health care facilities.

**132. Financial and Managerial Accounting for Health Services Organizations.** (Formerly numbered 141.) Prerequisites: course 100 or equivalent, consent of instructor. Introduction to financial and managerial accounting and its application to the health services industry.

**133. Introduction to Health Economics.** (Formerly numbered 148.) Prerequisite: consent of instructor. Presentation of tools of economic analysis. Topics include introductory concepts of microeconomics, theory of demand for health insurance and health care, substitution of health personnel, hospital cost functions, and costs and benefits of health programs. Mr. Salehi

**134. Introduction to Comprehensive Health Planning.** Lecture, four hours; fieldwork, four hours. Prerequisite: one upper division microeconomics, statistics, calculus, or political science course. Concepts underlying health planning, state of the art, and some relevant literature. Mr. Melnick

**136. Introduction to Health Services Research.** (Formerly numbered 136A.) Prerequisites: Biostatistics 100A or equivalent, consent of instructor. Review of the field of health services research. Uses of quantitative methods and applications of conceptual/theoretical constructs (as well as methodologies) from social and behavioral sciences and epidemiology to studies of workings of health services. Mr. Lewis

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

## Graduate Courses

**200A-200B-200C. Health Systems Organization and Financing.** (Formerly numbered 230A-230B.) Lecture, four hours; discussion, two hours. In-depth analysis of health services systems in the U.S., using relevant theories, concepts, and models. **200A-200B.** Prerequisite: health services major. **200C.** Prerequisites: courses 200A-200B, and health services major or consent of instructor.

Mr. Andersen, Mr. Torrens

**M204A-M204B-M204C. Seminars: Pharmaceutical Economics and Policy (1 unit, 1 unit, 2 units).** (Formerly numbered M204.) (Same as Economics M204L-M204M-M204N.) Seminar, three hours every other week for three terms. Prerequisites: course 236 or equivalent, Economics 201A-201B-201C or equivalent, or consent of instructor, graduate standing in public health or economics. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress grading.

Mr. Comanor, Mr. Intriligator, Mr. Schweitzer

**214. Measurements of Effectiveness and Outcomes of Health Care.** Lecture, three hours. Prerequisites: courses 200A-200B-200C, 422, and Biostatistics 100A or equivalent, or consent of instructor. Historical perspective for development of health status measures and their utilization in assessment of outcomes and effectiveness in medical care. Review of current methods in context of current research and practice.

Ms. Ganz

**220. Seminar: Cost Containment.** (Formerly numbered 298.) Lecture, three hours. Through lectures and discussion of journal articles, analysis of success and failure of alternative methods of controlling U.S. health care costs. Examination of how other countries have controlled their costs. Mr. Rice

**231. History of Public Health.** (Formerly numbered 435.) Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Emphasis on topics which illuminate current issues in public health policy. Discussion of historical perspectives on health care providers, health care institutions, health care reform movements, public health activities, childbirth, and AIDS. Ms. Abel

**232. Governmental Health Services and Trends.** Prerequisites: course 100, two additional upper division social or behavioral sciences courses, consent of instructor. Systematic analysis of interface between organized programs of personal health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health and newer medical care and quality control functions. Mr. Shonick

**233. Health Policy Analysis.** Lecture, two hours; discussion, two hours. Prerequisites: course 100 or equivalent, three social sciences courses, consent of instructor. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy. Mr. Valdez

**234. Health Services Organization and Management Theory.** (Formerly numbered 430.) Prerequisites: courses 100 or equivalent, 131, two upper division social sciences courses or equivalent, consent of instructor. Application of contemporary organization and management theory to systems that provide personal health care services. Environmental characteristics, missions/goals, structure and processes of health services organizations.

**235. Law, Social Change, and Health Service Policy.** Prerequisites: course 100, two upper division political science or sociology courses or equivalent, consent of instructor. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs. Ms. Roemer

**236. Microeconomic Theory of the Health Sector.** (Formerly numbered 238.) Lecture, four hours; discussion, two hours. Prerequisites or corequisites: Biostatistics 100A or equivalent and intermediate microeconomics. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Mr. Kominski, Mr. Schweitzer

**237A-237B. Special Topics in Health Services Research Methodology.** Lecture, one hour; discussion, three hours. Prerequisites: Biostatistics 100A, 100B, consent of instructor. In-depth consideration of problems in application of statistical and other quantitative methods in health services research. Critique of adequacy of study designs, appropriateness of analyses, and degree to which conclusions are supported by data. Mr. Rice, Mr. Valdez

**237C. Issues in Health Services Methodologies.** Prerequisites: courses 237A-237B, doctoral student standing. Intended to assist students in understanding the research process and its application in study of health services in the U.S. Introduction to issues related to reporting, disseminating, and documenting research findings. Mr. Valdez

**238. Politics of Health Care.** (Formerly numbered 138.) Prerequisite: course 100 or equivalent. Concepts and procedures for political analysis; national, state, and local politics in health care; examination of selected case studies. Mr. Valdez and the Staff

**239. Aging and Long-Term Care.** Prerequisites: courses 100, 238, Community Health Sciences 270, or equivalent, consent of instructor. Long-term care of the chronically ill elderly examined from perspective of political and sociodemographic trends, including populations at risk, policy options, and alternative forms of care such as nursing homes, home care, and care by informal support systems. Ms. Abel

**240. Health Care Issues in International Perspective.** Prerequisites: two health administration courses, two upper division social sciences courses, or equivalent, consent of instructor. Analysis of crucial issues in health care; manpower policy, economic support, health facilities, patterns of health service delivery, regulation, planning, and other aspects of health care systems probed in settings of European welfare states, developing nations, and socialist countries. Mr. Roemer

**M241. Women, Health, and Aging: Policy Issues (2 or 4 units).** (Same as Social Welfare M290D.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent, consent of instructor. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs.

Ms. Abel

**244. Seminar: Health Services and Policy Evaluation.** Prerequisites: Biostatistics 100A, 100B, basic courses in program evaluation and health services organization, or equivalent, doctoral standing, consent of instructor. Seminar applying alternative evaluation research theories and methods to health service organizations and systems. Topics include linking evaluation criteria to policy decisions, theories, and previous research; political and organizational context of evaluation; utilization of findings; and meta-evaluation. S/U or letter grading.

**245. Society's Response to Aging.** Prerequisites: two health services courses, two upper division social sciences courses, or equivalent, consent of instructor. Examination of central issues of health care delivery to the elderly in the U.S. Topics include demographic trends, economic characteristics, health status, demand for care, health care financing, long-term care, and continuum of care for the aged.

**246. Seminar: Special Populations — Health Service Policy Issues.** (Formerly numbered 448.) Prerequisites: courses 200A-200B-200C, 232, 238, or equivalent, consent of instructor. Limited to doctoral students or M.S. and M.P.H. students with advanced degrees. Doctoral-level seminar which focuses on health services for selected priority population groups, integrating scientific, organizational, economic, ethical, and political evidence as a basis for public policy. Different populations may be selected for attention each year.

Mr. Brown

**247. Research Topics in Health Economics.** Prerequisites: courses 100, 236, 446 or equivalent, consent of instructor. Seminar in economic analysis of current health services issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health programs.

Mr. Schweitzer

**248. Small Area Planning for Resources for Personal Health Service.** Lecture, three hours; laboratory, two hours. Prerequisites: courses 100, 134, or equivalent, consent of instructor. General planning theory and health planning theory, methods, and experience with planning for personal health care resources for small geographic areas. Determining needs and estimating required utilization levels and health care resources. Survey of elements of different disciplines used in areawide health planning. Laboratory projects and exercises designed to implement studies of health planning theory and methods.

**249A-249Z. Special Topics in Health Services (2 to 4 units each).** Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced seminars covering current issues and special topics in health policy, health financing, and organization and administration of health services. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change:

**249D. Principles of Organization Leadership: Applications in Public Health and Welfare.** Lecture, three hours; discussion, three hours. Prerequisite: M.P.H. or M.S. degree or equivalent or consent of instructor. Examination of principles and models of organization leadership, including presentation by current leaders in the fields of health and welfare. Theories and empirical investigations of leadership qualities.

Mr. Andersen, Mr. Lammers

**249E. Health Policy Seminar.** Prerequisites: courses 200A-200B-200C (may be taken concurrently), 236, Biostatistics 100A, 100B, or equivalent, consent of instructor. Limited to doctoral students and M.S. or M.P.H. students with advanced degrees. Public policy concerning payment for medical care services and characteristics of the market for those services: demand for care, fee-for-service and prepaid payment systems, regulation of price and capital investment, private sector efforts to control health care costs.

**249F. Quality Assessment and Assurance.** Prerequisites: course 100, Biostatistics 100A, Epidemiology 100, one additional health services or epidemiology course, or equivalent, consent of instructor. Fundamental issues in quality assessment, quality assurance, and measurement of health status.

Mr. Brook

**249G. Medical Technology — Development, Diffusion, Assessment, and Health Services.** Prerequisites: courses 200A-200B-200C, 238, or equivalent, one upper division policy analysis course. Doctoral-level seminar focusing on public policies that pertain to advancement of medical science and development of new technologies and promotion and regulation of their use.

Mr. Kominski

**249H. Current Research Issues.** Discussion, two hours. Prerequisite: doctoral student standing. Review of articles in health services journals nominated as the best published during 1990. Analysis of articles to determine contribution to theory, methods, and/or implications for management or policy in health services organizations or health services as a field. S/U or letter grading.

Mr. Andersen, Mr. Rice

**249I. Research Methodology.** Lecture, one hour; discussion, three hours. Prerequisites: courses 237A-237B, doctoral student standing. Theory-driven model building and specification, operationalization, data definition and documentation, data screening and transformation techniques, use of indexes and scales, and data reduction methods. Some hands-on measurement and analysis work. Research project with term-paper analysis required. Course builds on concepts and research methods learned in courses 237A-237B, 237C.

**249J. Mental Health Services.** Lecture, three hours. Prerequisites: courses 200A-200B-200C or doctoral standing or consent of instructor. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects.

Mr. West

**249K. Health Care Practice Guidelines, Variations in Care, and Patient Outcomes.** Lecture, three hours. Prerequisites: courses 200A-200B-200C, 422, Biostatistics 100A, 100B, graduate student standing. Participation of students in critical review and discussion of selected papers dealing with course topics, including small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for health policy. S/U or letter grading.

Ms. Ganz

**400. Field Studies in Health Services (2 or 4 units).** Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

**422. Practices of Evaluation in Health Services: Theory and Methodology.** (Formerly numbered 422A-422B.) Lecture, three hours. Prerequisites: courses 200A-200B-200C or equivalent or consent of instructor. Introduction to health services evaluation. Examination and performance of specific evaluation procedures. Conducting of health services investigations, reporting results and methodologies.

Ms. Bastani

**431. Managerial Processes in Health Service Organizations.** Lecture, one hour; laboratory, three hours. Prerequisites: course 234, consent of instructor. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, system, and interorganization. Unique features of health service organizations are stressed as applications are presented.

Mr. Torrens

**432. Integrative Seminar: Health Services Management.** Prerequisite: course 431. Residents and preceptors are responsible for presenting cases of actual administrative problems for solution by teams of students and faculty.

**433. Health Service Organization Policy and Strategy.** Lecture, three hours; discussion, one hour. Prerequisites: courses 131, 234, 400 (at least six units), or equivalent, consent of instructor. Conceptual, analytical, and technical aspects of policy and strategy formulation in health service organizations. Special attention to structure and dynamics of competitive markets, corporate-level strategic planning and marketing, managerial ethics and values, organizational creativity/innovation.

Mr. Torrens

**434. Employer/Employee Health Management.** Lecture, two hours; discussion, two hours. Prerequisites: course 100, a combination of three graduate courses in health planning, hospital finance, health policy, health insurance, occupational health, health services research, and health information systems, or equivalent, consent of instructor. Preview and analysis of how employer and employee groups provide, sponsor, and manage health-related services for others.

Mr. Fielding

**435. Management Science for Health Planning and Administration.** (Formerly numbered 132.) Lecture, three hours; laboratory, two hours. Prerequisites: Biostatistics 100A and either Biostatistics 403 or Management 404, or equivalent, consent of instructor. Introduction to use of quantitative analyses to support managerial and operational decisions in health services organizations. Topics include mathematical models for structuring decisions, resource allocation, inventory control, task sequencing, scheduling, and forecasting. Use of microcomputers.

**436. Financial Management of Health Service Organizations.** Prerequisites: courses 131, 132, 234, or equivalent, consent of instructor. Application of financial management and accounting principles to health care facilities, including unique financial characteristics of health care facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and risk management.

Mr. Kominski

**437. Legal Environment of Health Services Management (2 units).** Prerequisites: course 131 or equivalent, consent of instructor. General survey of legal aspects of health services management, including governance, agency, informed consent, medical malpractice, contracts, negligence, and case law relating to health facility operations.

**438. Issues and Problems of Local Health Administration.** Lecture, three hours. Prerequisites: course 100 or equivalent, Epidemiology 100, one additional health services course or equivalent, consent of instructor. Overview of administrative issues currently faced by local health departments, including providing public health programs during fiscal constraint, quality improvement, interagency relationships and partnerships, and political and public interactions.

Ms. Alkon

**439. Dental Care Administration.** Lecture, three to four hours. Prerequisites or corequisites: Biostatistics 100A, Epidemiology 100, or equivalent. In-depth examination of several specific dental care policy issues: manpower, relationship of treatment to disease, national health program strategies, and evaluation mechanisms.

Mr. Marcus

**440A. Health Information Systems: Organization and Management.** Lecture, two hours; laboratory, three hours. Prerequisites: courses 200A-200B-200C or equivalent, consent of instructor. Principles of and systems related to organization and management of a health facility's health information system.

**440B. Health Information Systems: Organization and Management.** Lecture, two hours; laboratory, three hours. Prerequisites: course 440A or equivalent, consent of instructor. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to principles of medical auditing; analysis of medical and health services.

**441. Ambulatory Care in the U.S.** Seminar, three hours. Prerequisites: courses 132, 200A-200B-200C, and Management 403, or equivalent, or consent of instructor. Introduction to organization and management concepts, problems, and issues in ambulatory health services, including financial management and information systems requirements.

Mr. Valdez

**442. Managed Health Care: Quality and Cost.** Lecture, three hours. Prerequisite: consent of instructor. Overview of issues related to growth, management, and planning of managed health care systems. Review of role of HMOs and PPOs, as well as discussion of managed care as a solution.

Mr. Torrens

**443A. Biological and Social Bases of Prevention.** Lecture, two hours; discussion, two hours. Prerequisites: courses 100 or 200A-200B-200C, Biostatistics 100A, Epidemiology 100, graduate standing, consent of instructor. Development, current status, and potential of preventive medicine in public health practice, focusing on risk indicator approach (exercise, alcohol, stress, etc.), with consideration of program settings, delivery problems, and issues.

Mr. Lewis

**443D. Advanced Hospital Financial Management Simulation.** Lecture, one hour; discussion, one hour; laboratory, two hours. Prerequisites: courses 100, 132, 436, consent of instructor. Practical aspects of hospital management decisions in a changing environment examined through computer simulation, with particular attention to economic projections, demand patterns, investment programs, and health care regulations.

**443E. Advanced Hospital Financial Management Seminar.** Prerequisites: courses 100, 131, 132, 436, or equivalent, consent of instructor. Hospital financial management, including reimbursement management, capital financing, and capital investment analysis, discussed and analyzed with respect to students' individual residency sites.

**444. Applied Methodology in Health Planning.** Lecture, three hours; fieldwork, four hours. Prerequisites: courses 200A-200B-200C, or equivalent, consent of instructor. Demonstration of methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles area.

Mr. Melnick

**445. Strategic Planning and Marketing in Health Care.** (Formerly numbered 242.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200A-200B-200C, Biostatistics 100A, 100B, or equivalent, consent of instructor. Survey course covering theory and applications of strategic planning and marketing concepts as they apply to health care organizations. Lectures and discussion of case studies for which students must prepare in advance, fieldwork, and micro-computer exercises.

Mr. Melnick

**446. Financing Health Care.** Prerequisites: course 100, Economics 1, 2, or equivalent, consent of instructor. Patterns of health care financing by consumers, providers, third-party intermediaries; trends in health service use; expenditures, national health insurance, and international comparisons of health financing.

Mr. Schweitzer

**447. State Health Policy Issues.** Seminar, three hours. Prerequisite: course 238. Focus on health policy development and implementation at state government level, with emphasis on financing, direct provision, and regulation of health care services, facilities, equipment technology, and manpower. Exploration of intergovernmental relationships.

**447D. Management of Health Maintenance Organizations.** Lecture, three hours. Prerequisites: courses 100, 134, or equivalent, consent of instructor. Alternative approaches to fee-for-service for paying, providing, or arranging for delivery of health care services, and relating these approaches to national health policy.

**447E. Health Insurance Principles and Programs.** Prerequisites: courses 100, 232, one additional health services course, or equivalent, consent of instructor. Examination of social, actuarial, and commercial assumptions underlying private health insurance. Comparison with government-sponsored health insurance. Analysis of diversity of voluntary medical care insurance plans under different sponsorships and with varied scopes of coverage and benefits and their implications for public and private medical care developments.

Mr. Shonick

**M448. Health Policy Issues for Dental Professionals (2 units).** (Formerly numbered M449.) (Same as Dentistry M422.) Prerequisites: course 100 or equivalent, Biostatistics 100A or equivalent, Epidemiology 100, consent of instructor. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

**M448D. Case Studies in Dental Practice (2 units).** (Formerly numbered M449D.) (Same as Dentistry M433A.) Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

Mr. Marcus

**495. Teacher Preparation in Health Services (2 units).** Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while UH Cr/Ncr-graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research (2 to 8 units).** Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research (2 to 8 units).** Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## Schoolwide Programs

16-071 Center for the Health Sciences, (310) 825-5516

### Master of Public Health

The M.P.H. is a professional degree in the field of public health. You are expected to focus on public health practice and to acquire a broad knowledge related to professional skills. Teaching experience is not required.

#### Admission

Application forms and the *Announcement of the UCLA School of Public Health* may be obtained by writing to the Student Affairs Office, School of Public Health, 16-071 CHS, UCLA, Los Angeles, CA 90024-1772. Both the School of Public Health Application for Admission to Graduate Status and the *UCLA Application for Graduate Admission* must be completed. Three letters of recommendation (with at least two from former professors) are required before an application is considered complete. It is your responsibility to ensure that the application file is complete.

The preferred deadline for graduate applications is December 15, 1994, for Fall Quarter 1995 admission. *Applications received after the deadline have considerably reduced opportunities for admission, financial aid, and housing.*

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B (3.0) average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. If your undergraduate coursework has been deficient in breadth of fundamental training, you must take specified undergraduate courses after admission. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered in your evaluation.

Applicants must also perform satisfactorily on a recent (within the last five years) Graduate Record Examination (GRE). The Medical College Admission Test (MCAT), Dental Admission Test (DAT), or Graduate Management Admission Test (GMAT) may be accepted in lieu of the GRE under certain circumstances.

Refer to the *UCLA Application for Graduate Admission* for the Test of English as a Foreign Language (TOEFL) requirement for international applicants.

Your prior program of study should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and

others that constitute an adequate preparation for the proposed area of specialization.

If your prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for your proposed area of specialization, you must include courses in those sciences in your graduate program; these may not be applied toward the minimum requirements for the degree.

Applicants must be one of the following:

- (1) Holders of a bachelor's degree from an accredited institution. Preparation in the sciences basic to public health must be adequate. Such sciences may include various combinations of (a) life sciences, (b) physical sciences and mathematics, (c) social sciences, (d) behavioral sciences. You are not expected to be prepared in all four of these fields, but a background in a suitable combination of these sciences is required.
- (2) Qualified physicians at UCLA in the General Preventive Medicine Residency.
- (3) Qualified students in the Latin American or African Area Studies articulated degree program or in the School of Management or Medicine.

### Specific Concentration Requirements

- (1) Students concentrating in *biostatistics* should have completed at least one year of calculus. Majors in mathematics, statistics, computer science, or a field of application in biostatistics are preferred.
- (2) Students concentrating in *environmental health sciences* should have a bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Coursework should include one year of general chemistry (including quantitative analysis) and two quarters or one semester of organic chemistry and/or biochemistry, mathematics through calculus, one year of biological sciences, and one year of physics. Substitutions for these requirements will be considered for applicants with an otherwise superior academic background.
- (3) Applicants to the one-year *health services organization* program must have a prior doctoral degree (M.D., D.D.S., J.D., Ph.D., or equivalent). Applicants with doctoral degrees from other countries should plan to take the two-year program; satisfactory performance on the GRE is required, and a personal interview is recommended.

### Course Requirements

You must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses, at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree. No more than 18 full courses may be required for the degree.

Required school core courses include Biostatistics 100A or 110A, Community Health Sciences 100 (210 for community health sciences majors), Environmental Health Sciences 100 or 101, Epidemiology 100 (200, 201A-201B for epidemiology majors), and Health Services 100 (200A-200B-200C for health services majors). Each core course may be waived if you have taken a similar college-level course elsewhere and can pass the waiver examination.

The remaining courses are determined by your choice of an area of specialization as described below and include the requirement of one course in the 400 series. Field training in an approved public health program of up to 10 weeks (a minimum of four units but no more than eight) is required of candidates who have not had prior relevant field experience.

In addition to the core courses, at least three courses (two or four units) outside your area of specialization are strongly recommended.

Only courses in which you receive a grade of C- or better may be applied toward the requirements for a master's degree. S/U-graded courses may not be applied toward the degree requirements. You must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

### Areas of Specialization

Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

#### Biostatistics

Required department courses include Biostatistics 100A, 100B, and 100C (in exceptional circumstances, courses 110A, 110B, and 115 may be substituted), 402A, 402B (satisfies the field training requirement), 403, 406, and two courses from 200A through M236 or 404 through 419 (except 406). Epidemiology 201A and 201B are recommended. Elective courses should be selected in public health, biomathematics, or mathematics. Students whose mathematics preparation does not include sufficient calculus must take courses in the Mathematics Department while in the M.P.H. program.

#### Community Health Sciences

Required courses include Community Health Sciences 210, 211A-211B, and either 400 or 482. You should complete courses 210 and 211A-211B in your first three terms in residence. Normally two years or six terms are needed to complete the 60 units of coursework. Candidates with a prior doctoral degree or advanced preparation in a related field may complete an M.P.H. degree in one year (48 units), but only after formal consideration and approval of the departmental faculty. You must also select one of the following areas of concentration.

*Health Education/Promotion* — Community Health Sciences 271, 282, 482 (eight units), and 487 are required. In addition, two to three

elective courses from the list of specialty areas are selected in consultation with your adviser. Individual and experimental courses may not be applied toward the required course units. Additional courses may be elected, in consultation with your faculty adviser, from within the school or in other schools/colleges at UCLA.

*International Family Health* is for health professionals (physicians, nurses, nutritionists, etc.) who intend to work or have worked in developing areas and nonhealth professionals with work experience in international health, community development, or related work. Community Health Sciences 200, 400, 430A, 434A, and 441 are required. In consultation with your adviser, you select electives from courses M232, M236, 246, 280, 294, 431, 447, and relevant courses from within the school or in other schools/colleges at UCLA.

*Public Health Nutrition* is for dietitians and nutritionists who have an R.D., are R.D.-eligible, or have an equivalent licensure/credential from another country; persons concurrently enrolled in internship leading to R.D. eligibility; physicians and dentists; and other health professionals on a case-by-case basis depending on completed graduate and undergraduate coursework. Community Health Sciences 231, 400, and 443 are required. In consultation with your adviser, you select electives from courses 212, 218, M432, 436A, 436B, 444, and relevant courses from within the school and currently under development in the Community Health Sciences Department.

*Public Health Policy* is for students interested in combining coursework in health promotion, prevention, and health policy. Community Health Sciences 400 and 487 are required. In consultation with your adviser, you must also select three courses from 214, M236, 276, 291, 431, 436A, 436B, 440.

*Sociocultural Aspects of Health* is for students interested in the relation between location in the social system and health outcomes. Community Health Sciences 272, M275, and either 400 or 482 are required. In consultation with your adviser, you must also select two courses from 230, 235, 237, 238, M240, M244, M245A, M245B, M245C, 246, 273, 278, 281, 283, 284, 285, 290, 291, 431, M432, 433, 474.

Note: The School of Public Health, through the Department of Community Health Sciences, also maintains a joint M.P.H./Dietetic Internship program with the West Los Angeles Veterans Administration Medical Center and Hospital.

Students with a professional degree may graduate with an M.P.H. in one academic year (48 units). Students without a professional health degree need four to six terms (60 units) of study.

#### Environmental Health Sciences

You can obtain the M.P.H. with a concentration in air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality.

Required department core courses include Biostatistics 100B, Environmental Health Sciences 201, 210, 230, 240, 250, 401 (or 410A and 410B). You also must take at least 12 additional units in the department at the 200 level or above and additional courses as required by your area of concentration. A total of eight units must be in the 400 series.

### Epidemiology

Required department core courses include Biostatistics 100B, Epidemiology 201A-201B, 220, 400 (for predoctoral students), 596 (for postdoctoral students). At least eight additional units must be selected from epidemiology courses in infectious and tropical diseases (M214, 223A, 223B, 224A, 224B, 227, M228, 230), quantitative methods (202A, 202B, 203), chronic diseases (240, 241, 242, 243, 244), problems of developing countries (280, 281, 282), injuries (251, 252, 253, M417), and other topics (204, 210, 246, 260, 261, 263, 270, M276, 410A, 410B, 411, 414).

You must also submit a report demonstrating competence in epidemiology. For predoctoral students the report may not be submitted prior to completion of course 400, which must be taken after completion of course 201B. Course 596, for postdoctoral students, may be taken concurrently with 201B. Students holding a doctorate in an appropriate biomedical science may petition for waiver of course 400.

### Health Services

Required department core courses include Health Services 200A-200B-200C.

*Policy and Management* — This is a two-year program requiring 18 full courses, a summer internship in a local health care organization, and a major written research report. Required courses include Health Services 400, 422, Biostatistics 100B, Health Services 236 or Management 403, and five courses from Health Services 131, 134, 231, 233, 234, 235, 236, 239, 240, 244, 431, 433, 434, 435, 436, 441, 444, 446, 447E. You must select at least two additional electives and are encouraged to choose courses outside the department and/or School of Public Health.

*M.P.H./M.B.A.* — This is a three-year concurrent degree program requiring a minimum of 12 full courses (48 units) in the School of Public Health and a summer internship in a local health care organization. Required courses include Health Services 400 and 422. Management 402 may be substituted for Biostatistics 100A. For further information, refer to the listing under "Cooperative Degree Programs" later in this section.

*Health Services Organization* — This is a one-year program requiring a minimum of 12 full courses (48 units). Admission is limited to students with prior doctoral-level degrees (M.D., Ph.D., J.D., D.D.S., or equivalent). Health Services 236 or Management 403 is required.

### Comprehensive Examination Plan

You must pass a comprehensive examination in your department. If you fail, you may be reexamined once. The aim of the examination, as a culminating experience, is to assess your ability to select theories, methods, and techniques from across the content matter of a field, integrate and synthesize knowledge, and apply it to the solution of public health problems.

### Field Training

Field training in an approved public health program is required of candidates who have not had prior relevant field experience. A minimum of four units, but no more than eight, is required.

### Interdepartmental International Health

The school offers several options for foreign or domestic students interested in international health. Faculty members in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international health-related interests and courses relevant to health occupations and cross-cultural settings.

If you are interested, specify the department most relevant to your skills area on your application, clearly indicating your international interests. You will be given an appropriate adviser and directed to the international health committee, which is interdepartmental and promotes internationally oriented training and research. Its members consult with interested students and attempt to optimize the learning experience.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to apply to the Community Health Sciences Department.

### Cooperative Degree Programs

Following are descriptions of combined programs of study leading to the M.P.H. degree. In the articulated degree programs listed below, no course may be used for credit toward more than one degree.

#### M.A.-African Area Studies/M.P.H.

The School of Public Health and the African Area Studies Program have an articulated degree program whereby you can work sequentially for the master's degree in African area studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser,

African Area Studies Program, UCLA African Studies Center, and/or the Student Affairs Office, UCLA School of Public Health.

#### M.A.-Latin American Studies/M.P.H.

The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. degree program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

#### M.B.A./M.P.H.

The Department of Health Services and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Health Services Management Program, UCLA School of Public Health. GMAT scores are required for admission.

#### Preventive Medicine Residency Program

An accredited residency in general preventive medicine is available to physicians through the School of Public Health. The residency is designed to prepare qualified physicians for leadership roles in preventive medicine and public health practice, research, and teaching. Completion of the program can lead to board eligibility in general preventive medicine and public health — a specialty recognized by the American Board of Preventive Medicine.

The residency currently consists of at least two years of work but may be completed over a longer period of time. The first part is comprised of formal studies leading to the Master of Public Health degree (generally in family health, epidemiology, or health services). Other areas (e.g., maternal and child health) may be considered on an individual basis. Application must be made both to the School of Public Health for admission to the M.P.H. program and to the Preventive Medicine Residency Program.

The second part consists of supervised field training in preventive medicine and public health, which is individually organized for each resident's particular interests and needs. A variety of opportunities is available through UCLA, including close working relationships with the Los Angeles County Department of Health Services, the Jonsson Comprehensive Cancer Center, Cedars-Sinai Medical Center, Saint John's Community Clinic, Venice Family Clinic, other city and county health departments in the state, Canyon Ranch in Tucson, and the Institute for Aerobic Research in Dallas. New affiliations are developed as the need arises. Residents may also undertake studies toward qualification for a more advanced degree in public health — the Dr.P.H. or Ph.D. — or do research in collaboration with members of the faculty. Physician applicants who have completed M.P.H. studies at an accredited school of public health may be admitted directly into the field training part, although physicians who will complete their M.P.H. training at UCLA are preferred. A license to practice medicine in California is a prerequisite to field training. For further information, contact the Student Affairs Office, UCLA School of Public Health.

## Doctor of Public Health

The Doctor of Public Health (Dr.P.H.) is the highest professional degree for the public health generalist. You are expected to focus on public health practice and to acquire broad knowledge related to professional skills. The dissertation is of an applied, practical, problem-solving nature and must demonstrate your ability for independent investigation.

There is no foreign language requirement; teaching experience is recommended but not required.

## Admission

In addition to the University minimum requirements, each department requires (1) satisfactory performance on the Graduate Record Examination (GRE), (2) completion of the M.P.H. or a master's degree in an appropriately related field (if the master's degree is in a field other than public health, you must have taken the equivalent of the M.P.H. mandatory core courses or include them in your course of study after admission), (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses, (4) a positive recommendation by a department to the School of Public Health, (5) approval by the admissions policy committee and the associate dean for Student Affairs. Screening or evaluation examinations may be required by each department.

## Course Requirements

The course requirements in the major field depend on the department/program and the field you select. You must take a minimum of six full

courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than your major department/program.

The major department/program also requires an additional area of concentration which may be either inside or outside the school. In departments/programs that allow it, an equivalent field experience completed while a doctoral student and approved by the guidance committee may be substituted for the additional area of concentration.

## Areas of Specialization

Areas of specialization and typical course plans, in addition to courses required for the master's degree, are listed below.

### Biostatistics

The Dr.P.H. requires a research orientation for which the coursework for the M.S. in Biostatistics is more appropriate preparation than the coursework for the M.P.H.

The following courses, if not already taken, should be included: Biostatistics 115, 200A, 200B-200C, M250A-M250B; any three additional graduate-level courses in biostatistics selected with consent of your adviser; three courses in the 400 series selected with consent of your adviser; Statistics M152A, 152B. All registered doctoral students enroll in Biostatistics 402B for one term each year. This may be used as the additional area of concentration referenced below.

In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than Biostatistics are required for breadth. The department also requires an additional area of concentration which may be either inside or outside the school.

Electives, selected in consultation with your adviser, should be chosen from courses in mathematics, biomathematics, survey research methods, operations research, computer data processing, and other appropriate areas.

### Community Health Sciences

The following programmatic areas are offered:

**Behavioral Sciences and Health Education** — At least four advanced research methods/statistics courses and at least five advanced courses from a list designed and offered by the department are required. In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than your major program are required for breadth; four of these must be in only one other department/program. Two terms of research experience prior to beginning the dissertation are required, as is participation in Community Health Sciences 286 (program doctoral seminar) and 288. Elective courses should be selected in consultation with your adviser. Written qualifying examinations in both the major and minor areas of concentration are required.

**Population and Family Health** — Course content for the major field includes courses needed for the M.P.H., Community Health Sciences 242 (program doctoral seminar), and two advanced courses in research methodology. Beyond the master's degree requirements, a minimum of 48 units (four terms with an average of 12 units each) is required. Of these, at least 20 units must be in this program, in addition to the program doctoral seminar.

In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than your major program are required for breadth (you may petition to include up to two 100-level courses). The major program also requires 18 units in an additional area of concentration which may be either inside or outside the school.

### Environmental Health Sciences

You can obtain the Dr.P.H. with a concentration in air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality. You must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than Environmental Health Sciences.

The department also requires additional courses in your major field as recommended by your adviser and guidance committee and courses in a minor field outside the department.

### Epidemiology

The recommended program includes additional courses in biostatistics, demography, and epidemiology beyond those required for the M.P.H.

You must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than Epidemiology. The department also requires an additional area of concentration which may be either inside or outside the school. An equivalent field experience completed while a doctoral student and approved by your guidance committee may be substituted for the additional area of concentration.

A detailed course plan is developed in consultation with your faculty adviser in the department and in your minor area.

### Health Services

The Dr.P.H. has a professional comprehensive orientation and prepares students for leadership positions in health services administration. An M.P.H. degree or equivalent is required, and full-time work experience in some aspect of public health is highly recommended. With full-time study, you may complete the Dr.P.H. in three years.

In your first two years you are normally expected to complete 18 full courses (72 units) beyond the M.P.H. degree to develop mastery in (1) basic tools of social analysis, (2) health and disease in populations, (3) promotion of health

and prevention of disease, and (4) health systems and their management. The specific course program depends on your previous coursework and experience. Your third year includes a residency in a public or private health services organization, seminar courses (eight units) devoted to principles and strategies of health services leadership, and preparation of a problem-solving dissertation related to your residency experience.

### **Screening/Qualifying Examinations**

No screening examination is required in any department except Biostatistics, which requires a written screening examination of all students entering the doctoral program, to be taken before the end of your first year in the program (if not taken prior to entering the program). Courses covered by this and other examinations are determined in consultation with your adviser and the department faculty.

Before advancement to candidacy, you must pass written examinations in your major field prepared and administered by the department faculty. Normally no more than one reexamination after failure is allowed. The doctoral committee is nominated after you have made a tentative decision on a dissertation topic. The doctoral committee administers the University Oral Qualifying Examination after you have successfully completed the written examinations.

### **Final Oral Examination**

A final oral examination is required of all candidates.

*UCLA in the mid-1970s.*

# Appendix

## Nondiscrimination

The University of California, in accordance with applicable Federal and State Laws and University Policies, does not discriminate on the basis of race, color, national origin, religion, sex, disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to the Campus Counsel, 3149 Murphy Hall, UCLA, Los Angeles, CA 90024-1405, (310) 825-4042. Speech- and hearing-impaired persons may call TDD (310) 206-6083.

Inquiries regarding Americans with Disabilities Act (ADA) or 504 Compliance may be directed to Dr. Douglas Martin, Special Assistant to the Chancellor/Coordinator of ADA and 504 Compliance, A239 Murphy Hall, UCLA, Los Angeles, CA 90024-1405, Voice (310) 825-2242, CRS (800) 735-2929, TDD/TT (310) 206-3349, Fax (310) 825-3688.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, religion, sex, sexual orientation, disability, or age and may contact the Office of the Dean of Students, 1206 Murphy Hall, for further information and procedures.

## Student Conduct: Violation of University Policies

Students are subject to disciplinary action for several types of misconduct or attempted misconduct, including but not limited to dishonesty such as cheating, multiple submission (i.e., the resubmission of any work which has been previously submitted for credit in identical or similar form in one course to fulfill any of the requirements of another course without the prior consent of the current instructor), plagiarism, or knowingly furnishing false information to the University; forgery, alteration, or misuse of University documents, keys, or identifications; theft of, damage to, or destruction of any property of the University or property of others while on University premises; unauthorized entry to or use of University properties, equipment, or resources; disruption of teaching, research, administration, disciplinary procedures, or other University activities; physical abuse, threats of violence, rape and other forms of sexual assault, or other conduct that threatens the health or safety of any person on University property or in connection with official University functions; disorderly conduct; disturbing the peace; sexual harassment; the use of "fighting words" when they constitute harassment; the use, possession, sale, distribution, or manufacture of alcohol on University properties or at official University functions which is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations; the unlawful use, possession, sale, distribution, or manufacture of controlled substances, identified in Federal and State Laws or Regulations, on University properties or at offi-

cial University functions; and violations of other University policies or campus rules and regulations.

Further information on these infractions and on the procedures concerning student discipline are contained in the *University of California Policies Applying to Campus Activities, Organizations, and Students, Parts A and B; Universitywide Student Conduct Harassment Policy; UCLA Student Conduct Code of Procedures; and UCLA Activity Guidelines*. Copies of these documents are available in the Office of the Dean of Students (1206 Murphy Hall), Center for Student Programming (337 Plaza Building), and Student Psychological Services (A3-062 CHS).

In addition, the Office of the Dean of Students publishes "Official Notices" in the *Daily Bruin* at various times during the year. Such notices are important, and *all students are held responsible* for the information in them.

## Rape and Other Forms of Sexual Assault

UCLA will not tolerate sexual assault in any form, including acquaintance or date rape. Where there is probable cause to believe that the campus regulations prohibiting sexual assault have been violated by a student, the campus will pursue disciplinary actions which may include sanctions up to and including dismissal from the University.

A student accused of sexual assault can be prosecuted under California criminal statutes *and* disciplined under the campus student conduct policies and regulations. Even if the

## Salary and Employment Information, University of California

	BACHELOR'S	MASTER'S	DOCTORATE
	AVERAGE MONTHLY SALARY*		
Engineering	\$2,723	\$3,263	\$4,583
Humanities	1,857	2,254	2,563
Life Sciences	1,846	2,352	3,454
Management	2,102	3,788	4,434
Physical Sciences	2,126	2,848	4,537
Social Sciences	1,931	2,566	3,287

\*Source: A national survey of a representative group of colleges conducted by the College Placement Council, representing the 80 percent range of offers for July 1994 throughout the country. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.

criminal justice authorities choose not to prosecute, the campus can pursue disciplinary action.

## Definitions

A student who individually, or in concert with others, participates in any of the following misconduct is subject to University discipline. (Refer to the *University of California Policies Applying to Campus Activities, Organizations, and Students, Part A* and the *UCLA Student Conduct Code of Procedures* which are available from the Office of the Dean of Students, 1206 Murphy Hall.) The following language describes specific conduct which, at UCLA, may subject a student to University discipline:

Physical abuse, threats of violence, rape, and other forms of sexual assault or other conduct that threatens the health or safety of any person on University property or in connection with official University functions. More specifically:

### Rape

For the purposes of this policy, rape refers to those actions defined as rape by the California Penal Code. The acts summarized below are among the behaviors prohibited by the California Penal Code:

- (1) Sexual intercourse against a person's will accomplished by force or threats of bodily injury.
- (2) Sexual intercourse against a person's will where the person has reasonable fear that she (or he) or another will be injured if she (or he) does not submit to the intercourse.
- (3) Sexual intercourse where the person is incapable of giving consent, or is prevented from resisting, which includes, but is not limited to, instances in which the complainant is prevented from resisting due to alcohol or drugs administered by or with the knowledge of the accused.

### Other Forms of Sexual Assault

The act of sexual assault includes forced sodomy (anal intercourse); forced oral copulation (oral-genital contact); forced penetration by a foreign object, including a finger; and sexual battery (the unwanted touching of an intimate part of another person for the purpose of sexual arousal). These also include situations where the accused sexually assaults a complainant incapable of giving consent, including where the complainant is prevented from resisting due to alcohol or drugs administered by or with the knowledge of the accused.

Note: For the purpose of this policy, students should understand that

- (1) Forced intercourse or other unwanted sexual contact is defined as rape or sexual assault whether the assailant is a stranger or an acquaintance of the complainant.
- (2) Intoxication of the assailant shall not diminish the assailant's responsibility for sexual assault.

## If You Have Been Raped or Sexually Assaulted

Take care of your safety and health needs:

- (1) **Immediately call the police department.** If possible, call the UCLA Department of Community Safety at (310) 825-1491 or 911.
- (2) **Get medical attention.** Campus police will provide transportation to the Santa Monica Hospital Medical Center Emergency Room for emergency medical treatment and evidence collection. A counselor from the Santa Monica Rape Treatment Center will be available at that time, free of charge.

Utilize campus and community support services:

- (1) **Contact a Rape Services Consultant (RSC)** at the Women's Resource Center. RSCs have expertise in working with people who have been raped or sexually assaulted. They can discuss options and alternatives, help identify the most appropriate support services, and provide information about medical care, psychological counseling, academic assistance, legal options, how to file a police report, and how to file a complaint through the Office of the Dean of Students. RSCs are available to assist any UCLA student regardless of where or when the assault occurred. For assistance, contact the Women's Resource Center at (310) 206-8240 or go to 2 Dodd Hall and ask to speak to an RSC.
- (2) **Contact the Rape Treatment Center** at Santa Monica Hospital Medical Center (310-319-4000) for free emergency medical treatment and counseling services.

### Campus Discipline Process When the Assailant Is a Student

Those who believe that they have been raped or otherwise sexually assaulted by a student on University properties or in conjunction with an official University function may file a complaint directly with the Office of the Dean of Students, 1206 Murphy Hall.

Cases referred to the Office of the Dean of Students will be treated under the hearing procedures set forth in the *UCLA Student Conduct Code of Procedures*. If the allegation is of rape or other forms of sexual assault, or sexual harassment, and the case is referred to the Student Conduct Committee, the following *additional* procedures shall also apply:

- (1) The complainant shall be entitled, for support, to have up to two persons of the complainant's choice accompany the complainant to the hearing. A support person may be called as a witness, and the fact that he or she is to act as a witness shall not preclude that person's attendance throughout the entire hearing. If a support person is also a witness, the committee chair (or the hearing officer) may require him or her to testify before the complainant. Neither of these persons shall be entitled to represent or defend the complainant. Similar rights shall be afforded to the accused student.

(2) The complainant shall have the right to be present during the entire hearing notwithstanding the fact that the complainant is to be called as a witness.

(3) Evidence of the complainant's past sexual history, including opinion evidence, reputation evidence, and evidence of specific instances of the complainant's sexual conduct, shall not be admissible by the accused student unless the committee chair or hearing officer makes a specific finding of relevance after an offer of proof by the accused student. Under no circumstances is past sexual history admissible to prove consent. The offer of proof must be made and resolved by the chair or hearing officer before the complainant testifies.

(4) The hearing shall be closed to spectators.

## Harassment

### Sexual Harassment

Every member of the campus community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy.

#### Definition

Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when

- (1) Submission to such conduct is made either explicitly or implicitly a term or condition of instruction, employment, or participation in other University activity;
- (2) Submission to or rejection of such conduct by an individual is used as a basis for evaluation in making academic or personnel decisions affecting an individual; OR
- (3) Such conduct has the purpose or effect of unreasonably interfering with an individual's performance or creating an intimidating, hostile, or offensive University environment.

In determining whether the alleged conduct constitutes sexual harassment, consideration will be given to the record as a whole and to the totality of the circumstances, including the nature of the sexual advances and the context in which the alleged incidents occurred (*University of California Policies Applying to Campus Activities, Organizations, and Students, Part B, Section 40.21*).

### Complaint Resolution

Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly.

Additionally, an individual who believes that she or he has been sexually harassed may contact the alleged offender's supervisor and/or a Sexual Harassment Information Center

counselor for help and information regarding sexual harassment complaint resolution or grievance procedures at one of the locations listed below as determined by the complainant's status at the University at the time of the alleged incident:

- (1) Campus Ombuds Office, 1172 PCPC, (310) 825-7627 (for faculty, staff, students)
- (2) Women's Resource Center, 2 Dodd Hall, (310) 825-3945 (for students)
- (3) Office of Residential Life, Residential Life Building, (310) 825-3401 (for students)
- (4) Office of International Students and Scholars, 105 Men's Gym, (310) 825-1681 (for international students)
- (5) Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985 (for students)
- (6) Office of Vice Chancellor — Academic Personnel, 2147 Murphy Hall, (310) 206-9345 (for faculty, including non-Senate academic appointees and student academic appointees when acting in the capacity of their non-Senate appointments)
- (7) Campus Human Resources/Employee and Labor Relations Division, 2126 Ueberroth Building, (310) 825-0661 (for campus staff employees and students when acting in the capacity of their staff appointments)
- (8) Medical Center Human Resources Office, 924 Westwood Boulevard, Suite 200, (310) 794-0500 (for Medical Center staff employees and students when acting in the capacity of their staff appointments)
- (9) UCLA Extension Dean's Office, 770 UCLA Extension (UNEX), (310) 825-5603 (for UCLA Extension faculty, staff employees, and students)

### Other Forms of Harassment

The University strives to create an environment which fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, age, and other personal characteristics. Certainly harassment, in its many forms, works against those values and often corrodes a person's sense of worth and interferes with one's ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community. The *University of California Policies Applying to Campus Activities, Organizations, and Students, Parts A and B* (hereafter referred to as *Policies*) presently prohibit a variety of conduct by students which, in certain contexts, may be regarded as harassment or intimidation.

For example, harassing expression which is accompanied by physical abuse, threats of violence, or conduct that threatens the health or safety of any person on University property or in connection with official University functions may subject an offending student to University discipline under the provisions of Section 51.16 of the *Policies*.

Similarly, harassing conduct, including symbolic expression, which also involves conduct resulting in damage to or destruction of any property of the University or property of others while on University premises may subject a student violator to University discipline under the provisions of Section 51.12 of the *Policies*.

Further, under specific circumstances described in the *Universitywide Student Conduct Harassment Policy*, students may be subject to University discipline for misconduct which may consist solely of expression. Copies of this *Policy* are available in the Office of the Dean of Students, 1206 Murphy Hall, or in any of the Harassment Information Centers listed below:

- (1) Campus Ombuds Office, 1172 PCPC, (310) 825-7627
- (2) Women's Resource Center, 2 Dodd Hall, (310) 825-3945
- (3) Office of Residential Life, Residential Life Building, (310) 825-3401
- (4) Office of International Students and Scholars, 105 Men's Gym, (310) 825-1681
- (5) Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985
- (6) Office of Fraternity and Sorority Relations, 118 Men's Gym, (310) 825-6322

### Complaint Resolution

One of the necessary measures in our efforts to assure an atmosphere of civility and mutual respect is the establishment of procedures which provide effective informal and formal mechanisms for those who believe that they have been victims of any of the above misconduct.

Many incidents of harassment and intimidation can be effectively resolved through informal means. For example, an individual may wish to confront the alleged offender immediately and firmly. An individual who chooses not to confront the alleged offender and who wishes help, advice, or information is urged to contact any of the Harassment Information Centers listed immediately above.

In addition to providing support for those who believe they have been victims of harassment, Harassment Information Centers offer persons the opportunity to learn about the phenomena of harassment and intimidation; to understand the formal and informal mechanisms by which misunderstandings may be corrected and, when appropriate, student perpetrators may be disciplined; and to consider which of

the available options is the most useful for the particular circumstances.

With regard to the *Universitywide Student Conduct Harassment Policy*, complainants should be aware that not all conduct which is offensive may be regarded as a violation of this *Policy* and may, in fact, be protected expression. Thus, the application of formal institutional discipline to such protected expression may not be legally permissible. Nevertheless, the University is committed to reviewing any complaint of harassing or intimidating conduct by a student and intervening on behalf of the complainant to the extent possible.

## Faculty Code of Conduct

The entire Faculty Code of Conduct can be found in the *UCLA Faculty Handbook, Supplement A (1987)*, pages 32-35 (copies are available in the Academic Personnel Office, 3109 Murphy Hall). Section IIA outlines faculty obligations to students and reads as follows:

### Teaching and Students

Ethical Principles — "As a teacher, the professor encourages the free pursuit of learning in students: holds before them the best scholarly standards of the discipline; demonstrates respect for the student as an individual and adheres to the proper role as intellectual guide and counselor; makes every reasonable effort to foster honest academic conduct and to assure that the evaluation of students reflects their true merit; respects the confidential nature of the relationship between professor and student; avoids any exploitation of students for private advantage and acknowledges significant assistance from them; and protects their academic freedom." (from 1966 AAUP statement)

### Types of Unacceptable Conduct

(1) Failure to meet the responsibilities of instruction, including (a) arbitrary denial of access to instruction, (b) significant intrusion of material unrelated to the course, (c) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, to meet class, to keep office hours, or to hold examinations as scheduled, (d) evaluation of student work by criteria not directly reflective of course performance, (e) undue and unexcused delay in evaluating student work.

(2) Discrimination against a student on political grounds, or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a Vietnam-era veteran or disabled veteran or, within the limits imposed by law or University regulations, because of age or citizenship or for other arbitrary or personal reasons.

(3) Use of the position or powers of a faculty member to coerce the judgment or conscience of a student or to cause harm to a student for arbitrary or personal reasons.

(4) Participating in or deliberately abetting disruption, interference, or intimidation in the classroom.

### Charges of Violation

If a student has reason to believe that a faculty member has violated the code, the student may consult with a member of the Academic Senate Grievance and Disciplinary Procedures Committee (3125 Murphy Hall, 310-825-3852) for help in deciding on appropriate action. If the student believes that formal discipline may be warranted, the alleged violator should be reported to the chair of the department and to the dean of the division or school with a request that a charge be filed with the Academic Senate Charges Committee. If the dean, in consultation with the vice chancellor of Academic Personnel, determines that there are not sufficient grounds for the administration to file a charge, the student may, after discussing the matter with a member of the Academic Senate Grievance and Disciplinary Procedures Committee, file such a charge in person.

### Residence for Tuition Purposes

If you have not been living in California with intent to make it your permanent home for more than one year immediately before the residence determination date for each term in which you propose to attend the University, you must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

### Law Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of The Regents of the University of California. Under these rules adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

### Who Is a Resident?

If you are an adult student (at least 18 years of age), you may establish residence for tuition purposes in California if (1) you are a U.S. citizen, (2) you are a permanent resident or other immigrant, or (3) you are a nonimmigrant who is not precluded from establishing a domicile in the U.S. Nonimmigrants who are not precluded from establishing domicile in the U.S. include those who hold valid visas of the following types — A, E, G, H-1, H-4, I, K, L, O-1, O-3, or R. To establish residence you must be physically present in California for more than one year, and you must have come here with the intent to make Califor-

nia your home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of your stay. You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for one full year. If your parents are not residents of California or you were not previously enrolled as a UC student, you are required to be financially independent in order to be a resident for tuition purposes. Your residence cannot be derived from your spouse or your parents.

### Requirements for Financial Independence

You are considered "financially independent" if one or more of the following apply: (1) you are at least 24 years of age by December 31 of the calendar year for which you are requesting residence classification; (2) you are a veteran of the U.S. Armed Forces; (3) you are a ward of the court or both parents are deceased; (4) you have legal dependents other than a spouse; (5) you are married, or a graduate student or a professional student, and you were not claimed as an income tax deduction by your parents or any other individual for the tax year immediately preceding the term for which you are requesting resident classification; or (6) you are a single undergraduate student and you were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you are requesting resident classification, and you can demonstrate self-sufficiency for those years and the current year. (Note: Financial dependence is not a factor in residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time in the term for which classification is sought.)

### Establishing Intent to Become a California Resident

Indications of your intent to make California your permanent residence can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver's license or, if you do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which you keep your personal belongings; and licensing for professional practice in California. The absence of

these indicia in other states during any period for which you claim residence can also serve as an indication of your intent. Documentary evidence is required, and all relevant indications will be considered in determining your classification. Your intent will be questioned if you return to your prior state of residence when the University is not in session.

### General Rules Applying to Minors

If you are an unmarried minor (under age 18), the residence of the parent with whom you live is considered to be your residence. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of your parent's right of control. If you live with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa which precludes you from establishing domicile in the U.S., you may establish your own residence when both your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

### Specific Rules Applying to Minors

(1) **Divorced or Separated Parents** — You may be able to derive California resident status from a California resident parent if you move to California to live with that parent on or before your 18th birthday. If you begin residing with your California parent after your 18th birthday, you will be treated like any other adult student coming to California to establish residence.

(2) **Parent of Minor Moves from California** — You may be entitled to resident status if you are a minor U.S. citizen or eligible alien whose parent(s) was a resident of California who left the state within one year of the residence determination date if (a) you remained in California after your parent(s) departed, (b) you enroll in a California public postsecondary institution within one year of your parent(s) departure, and (c) once enrolled, you maintain continuous attendance in that institution. Financial independence is not required in this case.

(3) **Two-Year Care and Control** — You may be entitled to resident status if you are a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

### Exemptions from Nonresident Tuition

(1) **Member of the Military** — If you are a member of the U.S. military stationed in California on active duty, unless you are assigned for educational purposes to a state-supported

institution of higher education, you may be exempt from the nonresident tuition fees until you have lived in California long enough to become a resident. You must provide the on-campus residence deputy with a statement from your commanding officer or personnel officer stating that your assignment to active duty in California is not for educational purposes. The letter must include the dates of your assignment to the state.

**(2) Spouse or Other Dependents of Military Personnel** — You are exempt from payment of the nonresident tuition fee if you are a spouse or a natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until you have lived in California long enough to become a resident. You must petition for a waiver of the nonresident tuition fee each term you are eligible. If you are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, you may retain this exemption under conditions listed above.

**(3) Child or Spouse of Faculty Member** — To the extent funds are available, if you are an unmarried dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate, you may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

**(4) Child or Spouse of University Employee** — You may be entitled to resident classification if you are an unmarried dependent child or the spouse of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory). Your parent's or spouse's employment status with the University must be ascertained each term.

**(5) Child of Deceased Public Law Enforcement or Fire Suppression Employee** — You may be entitled to a waiver of the nonresident tuition fee if you are the child of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

**(6) Dependent Child of a California Resident** — If you have not been an adult resident of California for more than one year and are the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, you may be entitled to a waiver of the nonresident tuition until you have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

## Temporary Absences

If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former home during noninstructional periods, your presence in the state will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. **Students who are in the state solely for educational purposes will NOT be classified as residents for tuition purposes regardless of the length of their stay.**

If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or your parents if you are a minor) to verify that you did nothing inconsistent with your claim of a continuing California residence during your absence. Steps that you (or your parents) should take to retain a California residence include the following:

- (1) Continue to use a California permanent address in all records — educational, employment, military, etc.
- (2) Continue to satisfy California tax obligations. If you are claiming California residence, you are liable for payment of income taxes on your total income from the date you establish your residence in the state, including income earned in another state or country.
- (3) Retain your California voter's registration and vote by absentee ballot.
- (4) Maintain a California driver's license and vehicle registration. If it is necessary to change your driver's license or vehicle registration, you must change them back within the time prescribed by law.

## Petition for Resident Classification

You **MUST PETITION IN PERSON** at 1113 Murphy Hall for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which you intend to be classified as a resident.

## Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, you will be allowed until the end of the applicable term to provide it.

## Incorrect Classification

If you were incorrectly classified as a resident, you are subject to a nonresident classification and to payment of all nonresident tuition fees not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the residence deputy.

## Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 1113 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024-1429 (310-825-3447) or to the Legal Analyst — Residence Matters, 300 Lakeside Drive, 7th Floor, Oakland, CA 94612-3565. **NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.**

You are cautioned that this summary is **NOT** a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within 45 days of notification of the residence deputy's final decision.

## Privacy Notice

All of the information requested on the Statement of Legal Residence form is required (by the authority of Standing Order 110.2 (a)-(d) of The Regents of the University of California) for determining whether or not you are a legal resident for tuition purposes. Registration cannot be processed without this information. The Registrar's Office on campus maintains the requested information. You have the right to inspect University records containing the residence information requested on the form.

## Financial Aid Minimum Progress Standards

Federal regulations require UCLA to establish, publish, and apply standards of satisfactory academic progress for financial aid eligibility. Students who fail to meet minimum progress standards become ineligible to receive financial aid until they are in compliance with the standards. If, during any term, you expect you will not be able to meet the satisfactory academic progress requirements listed below, contact the Financial Aid Office immediately for further advising.

### Undergraduate Students

#### Qualitative Standard

The qualitative standard is enforced by your college or school. You are notified by your academic department if you fall below the required grade-point average (GPA).

#### Quantitative Standard

This standard is enforced by the Financial Aid Office on the basis of the number of units (including remedial courses) successfully completed within any given number of regular session terms. It may differ from your college/school requirement.

All students receiving aid as full-time students must be enrolled in at least 12 units in order to obtain funds. To be eligible for financial aid as a full-time student, you must successfully complete at least 24 units in each of your first two academic years at UCLA to maintain satisfactory academic progress. Thereafter, you must successfully complete 84 units by the end of your ninth term, 120 units by the end of your twelfth term, 156 units by the end of your fifteenth term\*, and 180 units by the end of your seventeenth term.

After 17 terms of enrollment as a full-time student or the equivalent as a part-time student, no further need-based financial aid is granted.

The measurement of progress occurs at the end of the academic year. The schedule above is adjusted appropriately for students ending an academic year with a different number of terms completed than is listed above. If you enter UCLA in advanced standing, the number of terms for which you are eligible for aid is reduced proportionally to the number of transfer units credited to your record. For example, if you are credited with 84 transfer units, you would have only eight terms of financial aid eligibility as an undergraduate at UCLA.

If you are a continuing student at UCLA at the time you apply for financial aid, your progress is measured by the satisfactory academic progress chart to determine your eligibility (i.e., you must have successfully completed 48 units if you attended UCLA for six terms). You would then have only 11 terms of financial aid eligibility.

### Nonstandard Enrollment

Part-time students' progress is measured by a modified schedule, and aid is similarly modified. Summer enrollment counts as a term of enrollment for the following year if you apply the units earned toward graduation. Accommodation is made for students enrolled in a joint degree program.

### Successful Completion

To successfully complete units, you must receive a grade of A, B, C, D, or P (S for graduate students) in a course. You are given temporary credit for an IP grade pending receipt of the final grade in the course. Grades of F, I, NP (U for graduate students), NR (No Report), and DR (Deferred Report) do not earn completed units. An I or DR grade that is replaced with a passing grade does earn units.

### Withdrawal and Cancellation

Withdrawal from a term in which you receive financial aid applies as a term attended and

works to your disadvantage on the units-per-term schedule. Cancellation of your registration (prior to the first day of classes), however, does not apply as a term attended. Refund and payback of aid received is based on published schedules and the date you officially withdraw or cancel.

### Disqualification and Reinstatement

The Financial Aid Office monitors satisfactory progress annually after Spring Quarter grades are recorded. Your progress is measured according to the number of terms you have attended at UCLA and the number of units you have successfully completed.

If you have not met the requirements shown on the schedule, your financial aid is discontinued until the deficiencies are satisfied. You may use Summer Sessions or regular academic terms to make up deficiencies.

Your financial aid eligibility is reinstated for the term following the term in which you reestablish compliance with the units-per-term schedule. For example, if you successfully complete 16 units in Fall Quarter and therefore make up your deficiency, you become eligible for financial aid in Winter Quarter. Financial aid is then awarded on the basis of your need and the availability of funds.

### Appeal Process

If you fail to meet the satisfactory academic progress standards because of debilitating illness, prolonged hospitalization, death in your immediate family, or other such mitigating circumstances, you may appeal your disqualification.

To appeal, submit a letter and supporting documentation to the Financial Aid Appeal Committee explaining the circumstances and how they affected your ability to meet the requirements. The committee evaluates your request based on the rationale and evidence you provide.

### Graduate Students

#### Qualitative Standard

The qualitative standard is enforced by the dean of the Graduate Division in consultation with your department.

#### Quantitative Standard

To be eligible for financial aid as a full-time student, you must successfully complete at least eight units per term of enrollment. Approved study loads of less than eight units result in proportionally reduced aid for that term and are charged against your maximum period of eligibility at the appropriate proportional rate.

### Disqualification and Appeal Process

If you fail to meet the qualitative and quantitative requirements, your financial aid is discontinued until the deficiencies are made up. Appeals are reviewed by your academic department, the dean of the Graduate Division, and/or the Financial Aid Appeal Committee.

### Period of Eligibility

The degree program to which you are admitted determines the maximum number of terms for which you can receive need-based financial aid. Terms for which no need-based aid is received are considered when determining your remaining number of terms of financial aid eligibility.

If you are in a credential program or a professional master's program (other than Master of Fine Arts), you are eligible for a maximum of nine terms of need-based financial aid. The professional master's degrees include LL.M., M.Arch., M.A.T., M.B.A., M.C.L., M.E., M.Ed., M.J., M.L.S., M.N., M.P.A., M.P.H., M.S.P., M.S.W.

If you are in a Master of Fine Arts program, you are eligible for a maximum of 12 terms of need-based financial aid. If you are in an M.A. or M.S. program, a doctoral program, or a combination master's/doctoral program, you are eligible for a maximum of 27 terms of need-based financial aid. Students who change their program may be accommodated through an extension of terms of eligibility. The extension should be secured at the time the program change is made.

### Professional Schools

Students attending the Schools of Dentistry, Law, and Medicine are covered by criteria established by the respective school.

## Grading Regulations

### Assigning a Grade

The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor's evaluation of the student's achievement in the course. When on an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student's own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

\*Effective Fall Quarter 1994, students who have completed 15 quarter units of study will no longer be eligible for financial aid funds from Federal Perkins Loans, Federal Supplemental Educational Opportunity Grants, Federal Work-Study funds, or University Student Aid Program funds. However, students in their sixteenth and seventeenth terms may still be eligible for Federal Pell Grant and Federal Family Education Loan Programs if they have not exceeded the limits for these programs.

## Grade Complaints

A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic, the matter should first be taken up with the instructor. If the matter is not resolved, the student may go for counsel to the Campus Ombuds Office or may follow the procedures for the formal filing of charges (see "Faculty Code of Conduct" earlier in the Appendix). If a charge is sustained by the Academic Senate Committees on Charges and on Privilege and Tenure, an ad hoc committee will be appointed within two weeks to review the disputed grade, and any warranted change will be made within four weeks.

## Correction of Grades

All grades, except DR, I, and IP, are final when filed by the instructor in the end-of-term course report. However, the Registrar's Office is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the UCLA Academic Senate in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair. All grade changes are recorded on the transcript.

## Policy on Alternate Examination Dates

In compliance with Section 92640(a) of the California Education Code, the University must accommodate requests for alternate examination dates at a time when that activity would not violate a student's religious creed. This requirement does not apply in the event that administering the test or examination at an alternate time would impose an undue hardship which could not reasonably be avoided. Accommodation for alternate examination dates will be worked out directly and on an individual basis between the student and the faculty member involved.

(1) In general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor.

(2) Students unable to reach a satisfactory arrangement with their instructor should contact the Campus Ombuds Office, 1172 PCPC, or the Office of the Dean of Students, 1206 Murphy Hall, for assistance.

(3) Instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Campus Ombuds Office or the Office of the Dean of Students for assistance.

## Undergraduate Final Examinations

No student shall be excused from assigned final examinations, except as provided above in the policy on alternate examination dates and as provided in the following three paragraphs.

The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based on adequate evaluation of that achievement. The instructor's method of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours' duration and will be given only at the times and places established and published by the department chair and the Registrar's Office.

At the end of the term in which a student is expected to be graduated, a student's major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term and, with the approval of the appropriate Committee on Courses, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release to individual students their original final examinations (or copies). This may be done by any method which insures the students' right to privacy. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular term of instruction, during which period students shall have access to their examinations.

## Disclosure of Student Records

Pursuant to the Federal Family Educational Rights and Privacy Act, the California Education Code, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right (1) to inspect and review records per-

taining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal and State Laws and the University Policies, (2) to have withheld from disclosure, absent their prior consent for release, personally identifiable information from their student records, except as provided by the Federal and State Laws and the University Policies, (3) to inspect records maintained by UCLA of disclosures of personally identifiable information from their student records, (4) to seek correction of their student records through a request to amend the records or, if such request is denied, through a hearing, and (5) to file complaints with the U.S. Department of Education regarding alleged violations of the rights accorded them by the Federal Act.

UCLA, in accordance with the Federal and State Laws and the University Policies, has designated the following categories of personally identifiable information as "public information" which UCLA may release and publish without the student's prior consent: name, address (local/mailed and/or permanent), telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including intercollegiate athletics), and the name, weight, and height of participants on intercollegiate athletic teams.

Students who do not wish certain items (i.e., name, local/mailed and/or permanent address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this "public information" released and published may so indicate through URSA at (310) 208-0425. To restrict the release and publication of the additional items in the category of "public information," complete the Decline to Release form available from the Registrar/Enrollment Office, 1113 Murphy Hall.

Student records which are the subject of the Federal and State Laws and the University Policies may be maintained in a variety of offices, including the Registrar's Office, Office of the Dean of Students, Placement and Career Planning Center (PCPC), Graduate Division, and the offices of a student's college or school and major department. Students are referred to the *UCLA Campus and CHS Directory* which lists all the offices that may maintain student records, together with their campus address and telephone number. Students have the right to inspect their student records in any such office subject to the terms of the Federal and State Laws and the University Policies. Inspection of student records maintained by the Registrar's Office is by appointment only. Call (310) 206-0482 or inquire at Academic Record Services, 1134 Murphy Hall.

A copy of the Federal and State Laws, the University Policies, and the *UCLA Campus and CHS Directory* may be inspected in the office of the Information Practices Coordinator, 500 Unisys Building. Information concerning students' hearing rights may be obtained from that office and from the Office of the Dean of Students, 1206 Murphy Hall.

In addition to the public information described above, information related to your Social Security number, sex, and marital status, and the name(s), address(es), and telephone number(s) of your parents or next of kin are made available to the UCLA University Relations Department for use in alumni, development, and public relations activities. To restrict the release of this additional information, complete a Request for University Relations Information Restriction form available from the Registration/Enrollment Office, 1113 Murphy Hall.

## UCLA Graduation Rates

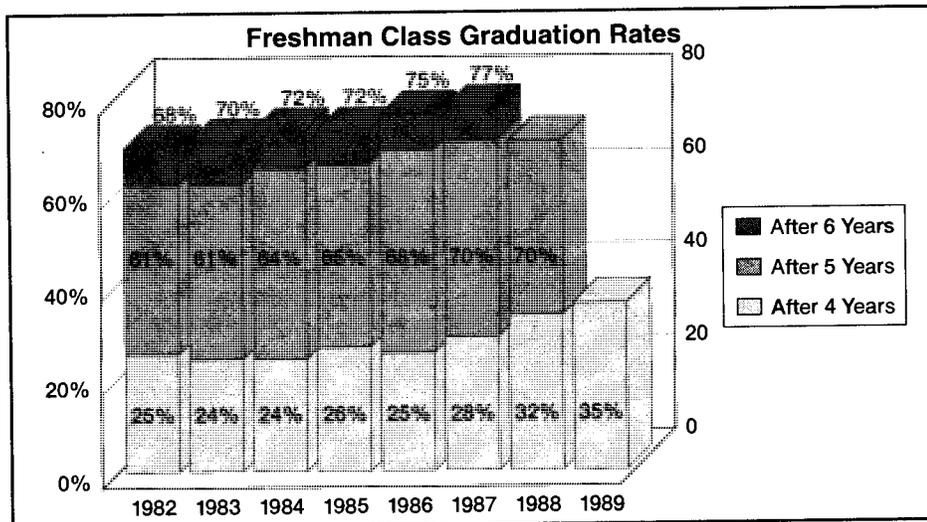

Graduation rates have shown a steady increase over the last eight years. While a little less than two thirds of freshmen who entered UCLA in Fall Quarter 1980 graduated in at least six years, the figure has risen to over 77 percent for the 1987 entering class. In addition, over the last two years of available data, graduation rates have increased for both four- and five-year periods. The five-year graduation rate of 70 percent for the 1987 and 1988 classes is higher than any other five-year rate. The 35 percent four-year rate for the 1989 class portends even higher five- and six-year rates over the next two years.

Students attending public universities often average five years to earn a bachelor's degree. Many enroll for a sixth year to prepare for graduate or professional school admission. Additional reasons students take more than four years to complete their degrees include employment and time taken for internships, travel, or field studies. Also, the data show *elapsed* time. Actual enrollment averages 13 to 14 terms. In addition, many students who do not earn a degree at UCLA have transferred to another UC campus or university.

## Campus Security Information

### UCLA Department of Community Safety

The UCLA Department of Community Safety (310-825-1491), located at Westwood Plaza and Circle Drive South, has 59 sworn California State Police Officers empowered by the State of California with the authority to enforce all state and local laws. UCLA police officers patrol the campus 24 hours a day, 365 days a year. They enforce all applicable local, state, and federal laws, arrest violators, investigate and suppress crime, and provide a full range of police services.

The department is linked by computer to city, state, and federal criminal justice agencies that provide access to information concerning criminal records, wanted persons, stolen property, and vehicle identification. The Detective Bureau handles all criminal investigations, and detectives conduct interviews, arrest violators, execute search warrants, and file cases with the city attorney's office.

To assist in prevention and apprehension efforts, the department employs unarmed security guards to patrol the Center for the Health Sciences and UCLA Medical Plaza. These guards provide on-site security and assistance for all who use the facilities.

In addition, the department employs approximately 200 student community service officers (CSOs) who are the "eyes and ears" (trained observers) of the department and act as non-intervention visual deterrents to crime. CSOs wear high-visibility uniforms and carry two-way police radios. They are dispatched by the department's Communications Center and provide a direct link to police, fire, or medical aid. The CSO Division provides over 20 different safety and security programs but is most well-known for the Campus Escort Service and the Evening Van Service. The Campus Escort Service operates every day of the year from dusk to 1 a.m. Individuals requesting the service call the Communications Center; a CSO is then dispatched to walk them safely to their destination. The service is available to UCLA students, staff, faculty, and visitors and operates on campus and in the nearby residential areas. The Evening Van Service provides a safe and convenient mode of transportation around campus at night.

### Incident Reporting

UCLA police officers have primary jurisdiction over the UCLA campus and the Center for the Health Sciences. The City of Los Angeles Police Department does not handle calls for ser-

vice on campus. All requests for police service should be made to the UCLA Department of Community Safety (Circle Drive South and Westwood Plaza). All crime occurring on campus and in the Center for the Health Sciences should be reported immediately to the department to ensure appropriate action is taken. The University endorses a policy that strongly encourages victims to report all incidents to the department anytime of the day or night. Crimes occurring off campus should be reported immediately to the law enforcement agency with proper jurisdiction over that area.

Police, fire, or medical EMERGENCIES can be reported by dialing 911 from any telephone on campus. All telephones (University, private, public) located on University grounds are tied into the 911 emergency system. Emergencies can also be reported by using the blue-hooded Emergency Reporting Telephones located throughout the campus.

NONEMERGENCY calls for service can be made by contacting the department at (310) 825-1491.

### Crime Prevention

The Department of Community Safety has established a Community-Oriented Policing (COP) Program. One component of that program — crime prevention — provides the best measure of protection. Therefore, the department supports a proactive Crime Prevention Unit that works closely with community members to make UCLA a safer place to work, live, and learn. The unit gives presentations on vehicle and residential security, personal safety, office and equipment security, and rape prevention. Brochures and literature on crime prevention and personal safety are available. Throughout the year, the crime prevention officer and the student housing offices present personal safety workshops and many other crime awareness programs.

### FBI Crime Index and other Offenses — Los Angeles

	1989	1990	1991	1992	1993	% Change

Several programs have been designed to increase the level of crime awareness and campus safety at UCLA. All incidents of criminal activity which pose a potential threat to the campus are brought immediately to the attention of the community through *Campus Alert Bulletins*. With the combined efforts of the Crime Prevention Unit, the Women's Resource Center, and the CSOs, incidents of sexual assault on campus have been reduced.

### Alcohol and Substance Abuse Education

Students with alcohol or substance abuse problems create safety and health risks for themselves and others. Such abuses also can result in a wide range of emotional and behavioral problems. Therefore, UCLA makes available to every student a variety of alcohol and substance abuse awareness programs which are designed to discourage the use of illicit substances and to educate students on the merits of legal and responsible alcohol consumption. Student Psychological Services (310-825-7985) provides counseling and referral assistance to students who are troubled by alcohol or substance abuse problems. The service is completely confidential and free to regularly enrolled students. All information and counseling will be treated in accordance with University Policies and State and Federal Laws. Your decision to seek assistance will not be used in connection with any academic determination or as a basis for disciplinary proceedings.

### Policies

UCLA has been designated drug free, and only under certain conditions is alcohol consumption permitted (none is permitted at athletic events). In keeping with its educational mission, the University assumes the responsibility to better inform the UCLA community about alcohol and substance abuse.

The sale, manufacture, distribution, or possession of any controlled substance without a prescription is illegal under both State and Federal Laws. Such laws are strictly enforced by UCLA police officers. Student violators are subject to University disciplinary action, criminal prosecution, fine, and imprisonment.

The sale, consumption, and distribution of alcohol on the UCLA campus is restricted by the UCLA alcohol policy and California State Law. Organizations or groups violating alcohol or substance policies or laws may be subject to sanctions by the University.

### Residential Housing

UCLA is the size of a small city and provides residential housing to approximately 18,000 students. Housing facilities range from apartments designed for students with children to multi-student apartment complexes to high-rise student residence halls. The UCLA Department of Community Safety and student

The Women's Resource Center (WRC) and the Crime Prevention Unit provide presentations on sexual assault issues. Topics include acquaintance rape education and prevention, personal safety and prevention techniques, recovery from sexual assault, clear communications, pornography, and the continuum of violence and rape in society. The educational programs, tailored to meet the needs of individual audiences, include films, discussion groups, lectures, role-plays, and communication exer-

cises. The WRC reaches students through the residence halls, sororities, fraternities, athletic teams, student clubs, and various student functions. Services include crisis intervention and advocacy for victims of sexual assault; short-term counseling and referrals for survivors, their families, and friends; support groups for rape survivors; and self-defense classes and a lending library. The WRC works closely with the student housing offices and the police department to increase campus safety.

housing staff work hand in hand to create a safe and comfortable living and learning environment.

Campuswide security and safety programs for residents are held throughout the year to increase crime potential awareness and improve campus safety. To keep residents immediately informed of major crime or threats to the campus, *Crime Alert Bulletins* are posted in residential areas by the housing staff. However, residents must take an active role to ensure their own safety by exercising simple commonsense crime prevention techniques. Because the campus is open 24 hours a day, visitation to residence halls and apartments is not restricted. All residence halls have 24-hour access control on entrance doors, and during the evening hours access control monitors are stationed at

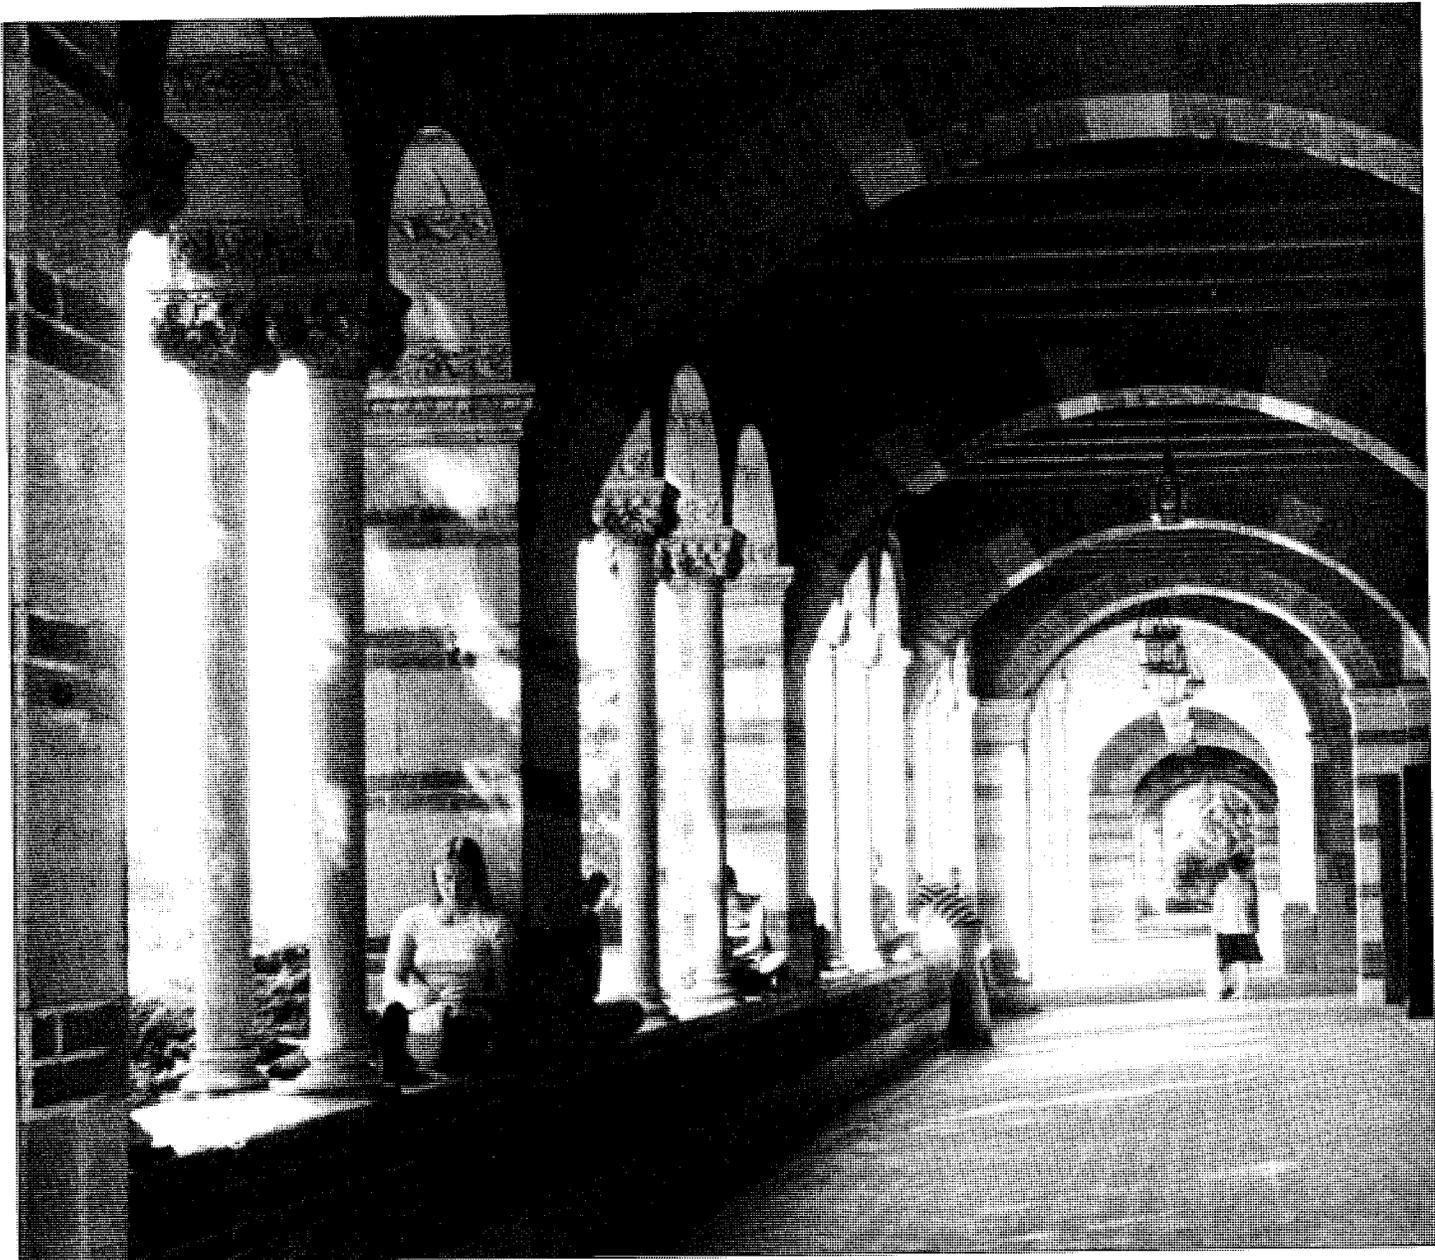

each entrance. Police officers and CSOs are also assigned to the residence halls.

UCLA-affiliated organizations that maintain off-campus facilities come under the jurisdiction of their local police department. The department does not compile statistical data on criminal activity that occurs in such facilities, including off-campus housing facilities *not operated by the University*. Information related to specific locations should be requested from the law enforcement agency with proper jurisdiction over those areas.

### Safety Tips

The nature of the studies and research done at UCLA requires many of the campus buildings to be open 24 hours. Because the campus is so large and adjacent to the greater Los Ange-

les community, individuals with criminal intent find it easy to access the University grounds. Regardless of the time of day or night and no matter where you are on campus, be alert and aware of your surroundings and exercise good commonsense safety precautions. If you park on campus, remember to lock your vehicle and consider investing in a steering wheel locking device and/or alarm. Take advantage of all of the safety services provided by the University and the UCLA Department of Community Safety. Use the Campus Escort Service when walking at night. Keep your room and apartment doors locked at all times. Most important, if you need assistance, do not hesitate to contact the department.

# Endowed Chairs

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University's three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or "chairs," which support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 108 endowed chairs which have been approved by The Regents of the University of California, as follows. (\* Asterisks indicate new chairs which have been approved by The Regents since publication of the 1993-94 *UCLA General Catalog*.)

## College of Letters and Science

- Maurice Amado Chair in Sephardic Studies
- Armenian Educational Foundation Chair in Modern Armenian History
- Arthur Andersen and Company Alumni Chair in Business Economics
- Henry J. Bruman Chair in German History
- Ralph Bunche Chair in International Studies
- Edward W. Carter Chair in Netherlandish Art
- James S. Coleman Chair in International Development Studies
- Courtaulds Chair in Chemistry
- Mr. and Mrs. C.N. Flint Professorship of Philosophy
- Gloria and Paul Griffin Chair in Philosophy
- Armand Hammer Chair in Leonardo Studies
- Marvin Hoffenberg Chair in American Politics and Public Policy
- Endowed Chair in Modern European History
- Franklin D. Murphy Chair in Italian Renaissance Studies
- Narekatsi Chair in Armenian Studies
- 1939 Club Chair
- President's Chair in Developmental Immunology
- Hans Reichenbach Chair in Philosophy of Science
- David S. Saxon Presidential Chair in Physics
- Louis B. Slichter Chair in Geophysics and Planetary Physics
- Charles Speroni Chair in Italian Literature and Culture
- UCLA Alumni and Friends of Japanese Ancestry Chair in Japanese American Studies
- UCLA Foundation Chair
- Saul Winstein Chair in Organic Chemistry

## School of the Arts

- UCLA Art Council Professorship of Art

## School of Engineering and Applied Science

- L.M.K. Boelter Chair in Engineering
- Norman E. Friedmann Chair in Knowledge Sciences
- Hughes Aircraft Company Chair in Electrical Engineering

- Hughes Aircraft Company Chair in Manufacturing Engineering
- Levi James Knight, Jr., Chair in Engineering
- Nippon Sheet Glass Company Chair in Materials Science
- Northrop Chair in Electrical Engineering/Electromagnetics
- Ralph M. Parsons Chair in Chemical Engineering
- Rockwell International Chair in Engineering
- TRW Chair in Electrical Engineering

## Graduate School of Architecture and Urban Planning

- S. Charles Lee Chair in Architecture and Urban Planning
- Harvey S. Perloff Chair

## Graduate School of Education and Information Studies

- Allan Murray Cartter Chair in Higher Education
- George F. Kneller Chair in Education and Philosophy

## School of Law

- Harry Graham Balter Chair in Law
- Connell Professorship of Law
- Richard C. Maxwell Chair in Law
- Arjay and Frances Fearing Miller Chair in Law
- David G. Price and Dallas P. Price Chair in Law
- Security Pacific Bank Chair
- William D. Warren Chair in Law

## John E. Anderson Graduate School of Management

- Allstate Chair in Insurance and Finance
- \*John E. Anderson Chair in Management
- Marion Anderson Chair in Management
- California Chair in Real Estate and Land Economics
- Edward W. Carter Chair in Business Administration
- James A. Collins Chair in Management
- Warren C. Corder Chair in Money and Financial Markets
- Ernst and Young Chair in Accounting
- Henry Ford II Chair in International Management
- Goldyne and Irwin Hearsh Chair in Money and Banking
- IBM Chair in Computers and Information Systems
- Harry and Elsa Kunin Chair in Business and Society
- William E. Leonhard Chair in Management
- Chauncey J. Medberry Chair in Management
- Paine Chair in Management
- Times Mirror Chair in Management Strategy and Policy

## School of Social Welfare

- Marjorie Crump Chair in Social Welfare

## School of Dentistry

- \*Tarrson Family Chair in Periodontics

## School of Medicine

- William S. Adams, M.D., Chair in Medicine
- Louis D. Beaumont Chair in Surgery
- Bowyer Professorship of Medical Oncology
- Judson Braun Chair in Biological Psychiatry
- Joseph Campbell Chair in Child Psychiatry
- Iris Cantor Chair in Breast Imaging
- Edward W. Carter Chair in Internal Medicine
- Castera Chair in Cardiology
- Tony Coelho Chair in Neurology
- Crump Chair in Medical Engineering
- M. Philip Davis Chair in Microbiology and Immunology
- Dumont-UCLA Chair in Transplantation Surgery
- Max Factor Family Foundation Chair in Nephrology
- Charles Kenneth Feldman Chair in Ophthalmology
- Dolly Green Chair in Ophthalmology
- Maud Cady Guthman Chair in Cardiology
- Chizuko Kawata Chair in Cardiology
- George F. Kneller Chair in Family Medicine
- Grace and Walter Lantz Chair in Ophthalmology
- Eleanor I. Leslie Chair in Neuroscience
- William P. Longmire, Jr., Chair in Surgery
- Della Martin Chair in Psychiatry
- Sherman M. Mellinkoff Distinguished Professor in Medicine Chair
- James H. Nicholson Chair in Pediatric Cardiology
- Samuel J. Pearlman, M.D., and Della Z. Pearlman Chair in Head and Neck Surgery
- Thomas P. and Katherine K. Pike Chair in Alcohol Studies
- Elizabeth R. and Thomas E. Plott Chair in Gerontology
- Leo G. Rigler Chair in Radiological Sciences
- Augustus S. Rose Chair in Neurology
- Jennifer Jones Simon Chair in Biophysics
- Norman F. Sprague Chair in Molecular Oncology
- Frances and Ray Stark Chair in Ophthalmology
- Francis Stark Chair in Neurology
- Jules Stein Chair in Ophthalmology
- W. Eugene Stern Chair in Neurosurgery
- Ruth and Raymond Stotter Chair in Neurosurgery
- Dorothy and Leonard Straus Chair in Gastroenterology
- Streisand Chair in Cardiology
- Leon J. Tiber, M.D., and David S. Alpert, M.D., Chair in Medicine
- Richard D. and Ruth P. Walter Chair in Neurology
- Wasserman Professorship of Ophthalmology

## School of Nursing

- Lulu Wolf Hassenplug Chair in Nursing

## School of Public Health

- Fred H. Bixby Chair in Population Policy
- Fred W. and Pamela K. Wasserman Chair in Health Services

# University Administrative Officers

## Regents Ex Officio

*Governor of California*

Pete Wilson

*Lieutenant Governor of California*

Leo T. McCarthy

*Speaker of the Assembly*

Willie L. Brown, Jr.

*State Superintendent of Public Instruction*

To be named

*President of the Alumni Association of the University of California\**

David Flinn

*Vice President of the Alumni Association of the University of California\**

Peter Preuss

*President of the University*

J.W. Peltason

## Appointed Regents\*

William T. Bagley (2002)

Roy T. Brophy (1998)

Clair W. Burgener (2000)

Glenn Campbell (1996)

Frank W. Clark, Jr. (2000)

Ward Connerly (2005)

John G. Davies (2004)

Tirso del Junco (1997)

Alice J. Gonzales (1998)

S. Sue Johnson (2002)

Meredith J. Khachigian (2001)

Leo S. Kolligian (1997)

Howard H. Leach (2001)

S. Stephen Nakashima (2004)

Dean A. Watkins (1996)

Terrence Wooten (1995)\*

## Faculty Representatives to the Board of Regents

Arnold Leiman

Daniel L. Simmons

## Officers of The Regents

*President of The Regents*

Pete Wilson

*Chair of The Regents*

Howard H. Leach

*Vice Chair of The Regents*

S. Sue Johnson

*General Counsel*

James E. Holst

*Secretary*

Leigh Trivette

*Treasurer*

Herbert M. Gordon

## Office of the President

*President of the University*

J.W. Peltason

*Provost and Senior Vice President — Academic Affairs*

Walter E. Massey

*Senior Vice President — Business and Finance*

V. Wayne Kennedy

*Vice President — Agriculture and Natural Resources*

Kenneth R. Farrell

*Vice President — Health Affairs*

Cornelius L. Hopper, M.D.

*Vice President — University and External Relations*

William B. Baker

## Officers Emeriti

*President Emeritus of the University and Professor Emeritus of Education*

David P. Gardner

*President Emeritus of the University and Professor Emeritus of Economics*

Charles J. Hitch

*President Emeritus of the University and Professor Emeritus of Business Administration*

Clark Kerr

*President Emeritus of the University and Professor Emeritus of Physics*

David S. Saxon

*Vice President Emeritus of the University, Professor Emeritus of Agricultural Economics, and Agricultural Economist Emeritus*

Harry R. Wellman

*Vice President Emeritus — Budget Plans and Relations*

Thomas E. Jenkins

*Vice President Emeritus — Financial and Business Management and Professor Emeritus of Pathology*

Baldwin G. Lamson

*Vice President Emeritus — Physical Planning and Construction*

Elmo R. Morgan

*University Provost Emeritus, Chancellor Emeritus, and Professor Emeritus of Mathematics*

Angus E. Taylor

*Assistant President Emeritus*

Dorothy E. Everett

*Associate Vice President Emeritus — Agriculture and Natural Resources Programs*

Lowell J. Lewis

*Assistant Vice President Emeritus*

Loren Furtado

*University Auditors Emeriti*

Norman H. Gross

Robert Tuffnell

*Secretary Emeritus of The Regents*

Bonnie M. Smotony

*Associate Secretary Emeritus of The Regents*

Elizabeth O. Hansen

*Treasurer Emeritus of The Regents*

Owsley B. Hammond

## Chancellors of the Campuses

*Chancellor at Berkeley*

Chang-Lin Tien

*Chancellor at Davis*

Larry Vanderhoef

*Chancellor at Irvine*

Laurel L. Wilkening

*Chancellor at Los Angeles*

Charles E. Young

*Chancellor at Riverside*

Raymond L. Orbach

*Chancellor at San Diego*

Richard C. Atkinson

*Chancellor at San Francisco*

Joseph B. Martin

*Chancellor at Santa Barbara*

Henry T.Y. Yang

*Chancellor at Santa Cruz*

Karl S. Pister

\*Terms of Regents appointed by the Governor expire February 28 of the year named in parentheses. The Student Regent (Terrence Wooten) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.

## University Professors

- E. Margaret Burbidge, *University Professor Emerita*, San Diego, Department of Physics
- Melvin Calvin, *University Professor Emeritus*, Berkeley, Department of Chemistry
- Donald J. Cram, *University Professor*, Los Angeles, Department of Chemistry and Biochemistry
- Gerard Debreu, *University Professor Emeritus*, Berkeley, Departments of Economics and Mathematics
- Amos Funkenstein, *University Professor*, Berkeley, Department of History
- Richard Karp, *University Professor*, Berkeley, Departments of Electrical Engineering and Computer Sciences, Industrial Engineering and Operations Research, and Mathematics
- Murray Krieger, *University Professor*, Irvine, Department of English and Comparative Literature
- Yuan T. Lee, *University Professor Emeritus*, Berkeley, Department of Chemistry
- Glenn T. Seaborg, *University Professor Emeritus*, Berkeley, Lawrence Berkeley Laboratory
- S. Jonathan Singer, *University Professor*, San Diego, Department of Biology
- Neil J. Smelser, *University Professor Emeritus*, Berkeley, Department of Sociology
- Edward Teller, *University Professor Emeritus*, Livermore, Lawrence Livermore Laboratory
- Charles H. Townes, *University Professor Emeritus*, Berkeley, Department of Physics
- Sherwood L. Washburn, *University Professor Emeritus*, Berkeley, Department of Anthropology
- John R. Whinnery, *University Professor Emeritus*, Berkeley, Department of Electrical Engineering and Computer Sciences
- Hayden White, *University Professor*, Santa Cruz, Board of Studies in History of Consciousness

## UCLA Administrative Officers

- Chancellor*  
Charles E. Young, Ph.D.

**How to Reach UCLA**

**By Automobile:**

San Diego Freeway northbound; exit Wilshire Boulevard toward Westwood; left on Westwood Boulevard.

San Diego Freeway southbound; exit Sunset Boulevard; left on Sunset Boulevard; right on Westwood Plaza.

**By Bus:**

Schedule information is available by calling the following numbers:  
 Culver City Municipal Bus Line:  
 (310) 202-5731 or 559-8310

Metropolitan Transportation Authority (RTD):  
 (213) 626-4455

Santa Monica Municipal Bus Line:  
 (310) 451-5444
